

AGL RESOURCES INC
Form 10-K405
December 18, 2001

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended September 30, 2001

Commission File Number 1-14174

AGL RESOURCES INC.

(Exact name of registrant as specified in its charter)

Georgia

58-2210952

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

817 West Peachtree Street, N.W. Atlanta,
Georgia 30308

404-584-9470

(Address and zip code of principal
executive offices)

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

| <u>Title of Class</u> | <u>Name of exchange on which registered</u> |
|---------------------------------|---|
| Common Stock, \$5 Par Value | New York Stock Exchange |
| Preferred Share Purchase Rights | New York Stock Exchange |
| 8% Trust Preferred Securities | New York Stock Exchange |

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Edgar Filing: AGL RESOURCES INC - Form 10-K405

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Aggregate market value of shares of Common Stock held by non-affiliates of the registrant, computed by reference to the closing price of such stock as of November 30, 2001: \$1,182,886,861

The number of shares of Common Stock outstanding as of November 30, 2001 was 55,197,707

shares.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the 2001 Annual Report to Shareholders for AGL Resources Inc. for the fiscal year ended September 30, 2001 ("Annual Report") are incorporated herein by reference in Parts I and II and portions of the Proxy Statement for the Annual Meeting of Shareholders ("Proxy Statement") to be held February 1, 2002, are incorporated herein by reference in Part III.

PART I

ITEM 1. BUSINESS

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 allows public companies to provide cautionary remarks about forward-looking statements that they make in documents that are filed with the Securities and Exchange Commission ("SEC"). Forward-looking statements in Management's Discussion and Analysis include, but are not limited to, statements about the following:

- state and federal regulation;
- business prospects;
- industry trends;
- concentration of credit risk;
- environmental investigations and cleanups;
- quantitative and qualitative disclosures about market risk;
- propane operations; and

- changes required by the Public Utility Holding Company Act of 1935 ("PUHCA").

Important factors that could cause actual results to differ substantially from those in the forward-looking statements include, but are not limited to, the following:

- industrial, commercial, and residential growth in the service territories of AGL Resources Inc. and its subsidiaries ("AGL Resources");
- changes in price and demand for natural gas and related products;
- impact of changes in state and federal legislation and regulation on the gas and electric industries and on AGL Resources, including the impact of the current review of Atlanta Gas Light Company's rates by the Georgia Public Service Commission;
- effects and uncertainties of deregulation and competition, particularly in markets where prices and providers historically have been regulated, unknown risks related to nonregulated businesses, and unknown issues such as the stability of certificated marketers;
- review of natural gas deregulation in Georgia by the governor-appointed Natural Gas Consumer Protection Task Force;
- concentration of credit risk in certificated marketers;
- industry consolidation;
- impact of acquisitions and divestitures;
- changes in accounting policies and practices issued periodically by accounting standard-setting bodies;
- interest rate fluctuations, financial market conditions, and general economic conditions;
- uncertainties about environmental issues and the related impact of such issues;
- impact of changes in weather upon the temperature sensitive portions of the business; and
- other factors and the related impact of such factors.

NATURE OF OUR BUSINESS

AGL Resources is a registered public utility holding company that manages its business in three operating segments and one non-operating segment. AGL Resources Inc. and its subsidiaries are collectively referred to as "AGL Resources."

Distribution Operations Segment

The distribution operations segment includes the results of operations and financial condition of AGL Resources' three natural gas local distribution companies ("LDC"): Atlanta Gas Light Company ("AGLC"), Virginia Natural Gas, Inc.

("VNG") and Chattanooga Gas Company ("CGC").

Effective October 1, 2000, AGL Resources acquired all of the outstanding common stock of VNG, a wholly owned subsidiary of Consolidated Natural Gas Company and an indirect subsidiary of Dominion Resources, Inc ("DRI"). The purchase price of approximately \$535 million, paid in cash, included approximately \$7.5 million in working capital. The acquisition was accounted for as a purchase for financial accounting purposes, and as a result VNG's operations were consolidated with AGL Resources beginning October 1, 2000. The excess purchase price of \$183.6 million over the fair value of the assets acquired and liabilities assumed was allocated to goodwill, which was amortized using a life of 40 years. Effective October 1, 2001, AGL Resources adopted Statement of Financial Accounting Standards (SFAS) No. 142, "Goodwill and Other Intangible Assets."

AGLC conducts its primary business, the distribution of natural gas, throughout most of Georgia. VNG distributes natural gas in southeastern Virginia. Chattanooga distributes natural gas in the Chattanooga area of Tennessee. The Georgia Public Service Commission ("GPSC") regulates AGLC; the Virginia State Corporation Commission ("VSCC") regulates VNG and the Tennessee Regulatory Authority ("TRA") regulates Chattanooga. The GPSC, the VSCC, and the TRA regulate distribution operations with respect to rates, maintenance of accounting records, and various other matters. Generally, distribution operations utilize the same accounting policies and practices utilized by non-regulated companies for financial reporting under accounting principles generally accepted in the United States of America. However, sometimes the GPSC, VSCC, and the TRA order an accounting treatment different from that used by non-regulated companies to determine the rates charged to customers.

Wholesale Services Segment

The wholesale services segment includes the results of operations and financial condition of Sequent Energy Management, LP ("Sequent"), AGL Resources' asset optimization and wholesale trading and marketing company. Asset optimization focuses on capturing the value from idle or underutilized assets, typically by employing transactions that balance the needs of varying markets. During fiscal 2000, Sequent primarily provided gas procurement services to AGLC and CGC.

On November 30, 2001, Sequent reached an agreement with Enron for early termination of an asset management contract related to VNG. The two-year asset management contract authorized Enron to manage a comprehensive portfolio of natural gas supply, transmission and other energy services for Sequent, on behalf of VNG. Under the termination agreement, Sequent will assume the role of asset manager for VNG, effective December 1, 2001.

Energy Investments Segment

The energy investments segment includes the results of operations and financial condition of AGL Resources' investments in SouthStar Energy Services, LLC ("SouthStar") and US Propane LLC ("US Propane"), as well as its wholly owned subsidiaries, AGL Networks, LLC ("AGL Networks") and through the date of sale, Utilipro, Inc. ("Utilipro").

SouthStar is a joint venture in which a subsidiary of AGL Resources is a 50% owner, a subsidiary of Dynegy Holdings, Inc is a 20% owner and a subsidiary of Piedmont Natural Gas Company is a 30% owner. Although AGL Resources owns 50% of SouthStar, it does not have a controlling interest, as each owner has an equal vote within the governing board of SouthStar. SouthStar markets natural gas and related services to residential and small commercial customers in Georgia and to industrial customers in the Southeast. SouthStar began marketing natural gas to customers in Georgia during the first quarter of fiscal 1999 under the trade name Georgia Natural Gas Services.

On February 15, 2000, AGL Resources entered into a definitive agreement to combine its propane operations with the propane operations of Atmos Energy Corporation, Piedmont Natural Gas Company, and TECO Energy, Inc. The joint venture, which is called US Propane, subsequently combined US Propane's operations with Heritage Propane Partners

("Heritage Propane"). The transaction closed on August 10, 2000 (the propane transaction). Through this transaction, US Propane acquired ownership of the general partner, as well as certain limited partner units, of Heritage Propane, a master limited partnership that distributes propane throughout the United States. As a result of the transaction, AGL Resources has a 22.36% ownership interest in US Propane, which in turn owns 30.8% of Heritage Propane, and recognized a pre-tax and after-tax gain of \$13.1 million and \$10.7 million, respectively in the fourth quarter of fiscal 2000.

AGL Networks was formed on August 15, 2000 for the purpose of leasing to other telecommunications companies the underground infrastructure needed to deliver high-speed networks. On November 6, 2001, AGL Networks announced its purchase of a telecommunications network in Atlanta from ACSI Network Technologies, Inc. The purchase enables AGL Networks to get to market quicker and at less cost than would have been the case under AGL Networks' previously announced plan to build its own fiber-optic network.

Effective March 2, 2001, AGL Resources sold substantially all of the assets of Utilipro, which engaged in the sale of integrated customer care solutions and billing services to energy marketers in the United States, to Alliance Data Systems Corporation for \$17.9 million, resulting in a pre-tax gain of \$10.9 million.

Corporate Segment

The Corporate segment includes the results of operations and financial condition of AGL Resources' non-operating business units, including AGL Services Company ("AGSC") and AGL Capital Corporation. AGSC is a service company established in accordance with PUHCA. AGL Capital Corporation was established to finance the acquisition of VNG, refinance existing short-term debt; and fund ongoing financing needs of AGL Resources and its subsidiaries through a commercial paper program, the issuance of various debt and hybrid securities, and other financing mechanisms. All of the costs associated with AGSC and the financing costs associated with AGL Capital Corporation are allocated to the operating segments, in accordance with PUHCA. Corporate also includes intercompany eliminations for transactions between operating business segments.

(The remainder of this page was left intentionally blank.)

State Regulatory Activity

The following regulatory activities have occurred or are in process with the GPSC:

- On August 24, 2001, the GPSC issued an Initiation of Earnings Review and Procedural and Scheduling Order ("Earnings Review Order") in Docket No. U-14311-U initiating an earnings review of AGLC. On September 7, 2001, AGLC filed a Motion of Reconsideration, or in the alternative, Motion to Defer Hearing Schedule ("Motion for Reconsideration of Earnings Review"), which requested the GPSC to reconsider, or in the alternative, defer its August 24, 2001 Earnings Review Order. On September 18, 2001, the GPSC denied

AGLC's Motion for Reconsideration of Earnings Review, but did modify the procedure set forth in the Earnings Review Order.

The GPSC staff filed direct testimony, including its quantification of AGLC's revenue requirement, on November 16, 2001. If AGLC does not consent to the revenue requirement proposed by the staff, AGLC will file its quantification of revenue requirement on January 11, 2002. A final decision in this proceeding is set for April 29, 2002. Under the modified procedure and schedule, new rates will be effective May 1, 2002. AGLC cannot determine the outcome of the Earnings Review Order.

- AGLC filed a three-year, 2001-2004 Capacity Supply Plan ("Capacity Supply Plan") with the GPSC, which included agreements with AGL Resources' wholly owned subsidiary Sequent to manage interstate pipeline capacity and provide additional capacity for the more than 100,000 customers added since the last plan was submitted three years ago. On September 14, 2001, the GPSC rejected AGLC's proposed Capacity Supply Plan and adopted a capacity plan for AGLC, which AGLC did not endorse. Subsequently, in October 2001, AGLC petitioned for reconsideration and oral argument concerning the Capacity Supply Plan, as well as the capacity plan adopted by the GPSC on September 14, 2001, but not endorsed by AGLC. On November 5, 2001, the GPSC amended the capacity plan adopted on September 14, 2001 to allow AGLC to obtain an additional 68,000 dekatherms of peak day capacity.

In addition to approving AGL Resources' acquisition of VNG on July 28, 2000, the VSCC issued an order on September 25, 2000, approving transactions between VNG and other subsidiaries of AGL Resources. The September order permits the use of a services company to provide VNG with shared support services including legal, regulatory, finance, accounting, engineering, gas control and capacity planning services. Recovery of the costs associated with such services will continue to be subject to the rate and regulatory authority of the VSCC.

Rate Structure

As required by the GPSC, effective February 1, 2001, AGLC implemented a seasonal rate design for the calculation of each residential customer's annual SFV capacity charge, which is billed to certificated marketers and reflects the historic volumetric usage pattern for the entire residential class. Previously, AGLC billed certificated marketers for each residential customer's distribution costs in equal monthly installments. Generally, this change should result in residential customers being billed by the certificated marketers for a higher capacity charge in the winter months and a lower charge in the summer months. This requirement has an operating cash flow impact, but does not change AGLC's annual revenue recognition. As a result, AGLC continues to recognize its residential SFV capacity revenues for financial reporting purposes in equal monthly installments. Any difference between the billings under the new seasonal rate design and the SFV revenue recognized is deferred and reconciled on an annual basis. As of September 30, 2001, AGLC had unrecovered seasonal rates of approximately \$10.2 million (included as a current asset in the Consolidated Balance Sheets) related to the difference between the billings under the new seasonal rate design and the SFV revenue recognized.

VNG and CGC employ rate structures that include volumetric rate designs that allow recovery of costs through gas usage. Revenues from sales and transportation services are recognized in the same period in which the related volumes are delivered to customers. VNG and CGC bill and recognize sales revenues from residential and certain commercial and industrial customers on the basis of scheduled meter readings. In addition, revenues are recorded for estimated deliveries of gas, not yet billed to these customers, from the meter reading date to the end of the accounting period. For wholesale and other commercial and industrial customers, revenues are based upon actual deliveries to the end of the period.

Transition to Competition Costs

On October 19, 1999, the GPSC approved an order allowing AGLC to defer certain transition to competition costs for fiscal 2000 that AGLC considered to be "stranded" as a result of deregulation ("Order"). In accordance with the Order, AGLC deferred approximately \$10 million in stranded costs for fiscal 2000. These stranded costs are recorded as a regulatory asset on AGLC's balance sheets and are being amortized over a five-year period beginning October 1, 1999. Of the total transition to competition costs, AGLC amortized \$2.0 million during fiscal 2001, leaving an unamortized balance, net of deferred taxes, of \$3.8 million at September 30, 2001. Management intends to seek recovery of these costs in connection with the Earnings Review Order Proceeding.

AGLC Pipeline Replacement Program

On January 8, 1998, the GPSC issued procedures and set a schedule for hearings about alleged pipeline safety violations. On July 21, 1998, the GPSC approved a settlement between AGLC and the staff of the GPSC that details a 10-year pipeline replacement program for approximately 2,300 miles of cast iron and bare steel pipe. Over that 10-year period, AGLC will recover from end-use customers, through billings to certificated marketers, the costs related to the program net of any cost savings from the program. All such amounts will be recovered through a combination of SFV rates and a pipeline safety revenue rider. October 1, 2001 marks the beginning of the fourth year of the 10-year pipeline replacement program. To date the total mileage of cast iron and bare steel pipe replaced is 750 miles. The most recent estimate of the total remaining costs of this program are approximately \$597.7 million, of which \$518.4 million is related to capital expenditures and \$79.3 million is related to operation and maintenance costs. AGLC has recorded a long-term liability and a corresponding regulatory asset in the consolidated balance sheets as of September 30, 2001 in the amount of \$518.4 million for the capital expenditures in connection with the Pipeline Replacement Program.

The capital expenditure costs incurred from the pipeline safety program are capitalized and depreciated over the life of the assets. The operation and maintenance costs are expensed as incurred. Recoveries, which are recorded as revenue, are based on a formula which allows AGLC to recover operation and maintenance costs that are in excess of those included in AGLC's current base rates; depreciation expense; and an allowed rate of return on the capital expenditures. In the near term, the primary financial impact to AGLC from the pipeline safety program is reduced cash flow from operating and investing activities, as the timing related to cost recovery does not match the timing of when costs are incurred. However, AGLC is allowed the recovery of carrying costs on the under recovered balance resulting from the timing mismatch.

During fiscal 2001, approximately 255 miles of pipe were replaced and AGLC's capital expenditure costs and operation and maintenance costs related to the program were approximately \$50.0 million and \$7.5 million, respectively. For fiscal 2000, 248 miles of pipe were replaced, and capital expenditure and operation and maintenance costs were \$49.2 million and \$8.4 million, respectively. On October 1, 1999, AGLC began recovering costs of the program through the pipeline safety revenue rider. The amount recovered during fiscal 2001 was approximately \$3.7 million, compared to \$2.0 million for fiscal 2000.

Since the inception of the pipeline replacement program in October 1998, AGLC has incurred approximately \$142.3 million in capital expenditure costs and \$27.4 million in operation and maintenance costs, of which \$5.7 million has been recovered from SFV rates and the pipeline safety revenue rider. In addition to the program being ahead of schedule at September 30, 2001, the program is operating below its established budget as a result of efficiencies in engineering, bidding, construction and project management.

Energy Services Agreement

On November 30, 2000, the VSCC issued its Order Granting Approval ("Approval Order") of an energy services agreement between VNG and Sequent, in which VNG designated Sequent as the manager of VNG's gas acquisition and management functions. The Approval Order directed VNG and Sequent to share in any gains realized from the management of VNG's gas assets each year. VNG will credit its portion of all gains from the sharing mechanism to its customers.

Weather Normalization.

The weather normalization adjustment rider, authorized by the TRA to offset the impact of unusually cold or warm weather on customer billings and operating margin, remains in effect for CGC. VNG does not have a weather normalization adjustment rider.

Inventory Assignment

. Pursuant to the Deregulation Act, certificated marketers, including AGLC's marketing affiliate Georgia Natural Gas Services, began selling natural gas to firm end-use customers at market-based prices in November 1998. Part of the unbundling process is the allocation of certain pipeline services that AGLC has under contract, including interstate pipeline transportation and gas storage.

In particular, AGLC has allocated the majority of its pipeline storage services that it has under contract to the certificated marketers, along with a corresponding amount of inventory based on the respective market share of the certificated marketers.

As of September 30, 2001, AGLC had \$91.9 million in underground natural gas storage. This amount is retained storage used by AGLC to balance temporary differences between certificated marketers' expected and actual demand.

Regulatory Accounting

. AGL Resources has recorded regulatory assets and liabilities in its Consolidated Balance Sheets, in accordance with Statement of Financial Accounting Standards ("SFAS") 71, "Accounting for the Effects of Certain Types of Regulation."

In July 1997, the Emerging Issues Task Force ("EITF") concluded that once legislation is passed to deregulate a segment of a utility and that legislation includes sufficient detail for the enterprise to determine how the transition plan will affect that segment, SFAS 71 should be discontinued for that segment of the utility. The EITF consensus permits assets and liabilities of a deregulated segment to be retained if they are recoverable through a segment that remains regulated.

Georgia has enacted legislation that allows deregulation of natural gas sales and the separation of some ancillary services of local natural gas distribution companies. However, the rates that AGLC, as the local gas distribution company, charges to transport natural gas through its intrastate pipe system will continue to be regulated by the GPSC. Therefore, the continued application of SFAS 71 is appropriate for regulatory assets and liabilities related to AGLC's delivery services.

Environmental Matters

Before natural gas was widely available in the Southeast, AGLC manufactured gas from coal and other fuels. Those manufacturing operations were known as manufactured gas plants ("MGP"), which AGLC ceased operating in the 1950s. AGLC has been associated with 10 MGP sites in Georgia and 3 in Florida. Because of recent environmental concerns, AGLC is required to investigate possible environmental contamination at those plants and, if necessary, clean up any contamination.

Based on investigations to date, AGLC believes that some cleanup is likely at most of the sites. In Georgia, the state Environmental Protection Division ("EPD") supervises the investigation and cleanup of MGP sites. In Florida, the U.S. Environmental Protection Agency ("EPA") has that responsibility.

For those elements of the MGP program where AGLC has engineering cost estimates, AGLC believes that the most likely cost of future actions at its MGP sites will be \$163.0 million. This estimate still contains various engineering uncertainties, and could increase as contracts are entered into, perhaps by as much as 50%. For those elements of the MGP program where AGLC still cannot perform engineering cost estimates, there remains considerable variability in available cost estimates. For these elements AGLC believes that the remaining cost of future actions at its MGP sites will be within a range of \$8.0 million to \$25.2 million. AGLC cannot at this time identify any single number within this range as a better estimate of its likely future costs. Consequently, as of September 30, 2001, AGLC has recorded the sum of \$163.0 million plus the lower end of the remaining range, \$8.0 million, or a total of \$171.0 million, as a liability and a corresponding regulatory asset. This figure does not include other potential expenses, such as unasserted property damage, personal injury or natural resource damage claims, legal expenses or other costs for which AGLC may be held liable, but with respect to which the amount cannot be reasonably forecast. AGLC has entered into cost-sharing arrangements with respect to several MGP sites.

As of September 30, 2000, AGLC had recorded a liability of \$111.7 million. During fiscal 2001, the liability increased \$59.3 million to \$171.0 million. Previously, the liability was recorded based exclusively on a probabilistic model.

During 2001, the estimates were revised to reflect future costs less amounts paid during the year for investigation and cleanup costs. The revision resulted in a corresponding increase in the unrecovered environmental response cost asset.

Competition

Distribution Operations

Distribution Operations is not in significant direct competition with any other distributors of natural gas to residential and small commercial customers. AGLC, VNG and CGC operate under franchise agreements granted them by the communities they serve. The principal competition is electric companies. Electric utilities offer electricity as a rival energy source and compete for the space heating, water heating and cooking markets. The principal means to compete against alternative fuels is lower prices, and natural gas historically has maintained its price advantage in the residential, commercial and industrial markets.

However, Distribution Operations does compete with alternative energy suppliers to distribute natural gas to large commercial and industrial customers. Those customers can switch to alternative fuels, including propane, fuel and waste oils, electricity and, in some cases, combustible wood by-products. AGLC also competes to distribute gas to large commercial and industrial customers who seek to bypass AGLC's distribution system.

Pursuant to the GPSC's rate case order of June 30, 1998, AGLC has been able to price distribution services to large commercial and industrial customers in one of three ways:

- GPSC-approved rates in AGLC's tariff;
- Negotiated rates if an existing rate is not priced competitively with a customer's competitive alternative fuel;
or
- Special contracts approved by the GPSC.

Additionally, interruptible customers have the option of purchasing delivery service directly from certificated marketers, who are authorized to use capacity on AGLC's distribution system that is allocated to the certificated marketers for firm residential and small commercial customers, whenever such capacity is not being used for firm customers.

Wholesale Services

Sequent, although regionally focused, competes with national and regional full service energy providers, energy merchants, and producers and pipelines, some who are larger and better capitalized with national and global exposure for sales based on its ability to aggregate competitively priced commodities from the firm transportation capacity of AGL Resources.

Natural gas competes with other forms of energy including electricity, coal and fuel oils. The primary competitive factor is price. Changes in the availability or price of natural gas and other forms of energy, the level of business activity, conservation, legislation and regulations, the capability to convert to alternative fuels and other factors, including weather, affect demand for natural gas and the level of business of natural gas assets. In addition, increased availability of pricing information to industry participants will continue to exert downward pressure on profit margins in the industry.

Energy Investments

AGL Resources engages in several competitive, energy-related businesses, including gas supply services, wholesale and retail propane sales, and the sale of energy-related products and services for residential, commercial, and industrial customers throughout the Southeast. The energy-related businesses are not regulated and typically face competition from other companies in the same or similar businesses.

SouthStar competes with other energy marketers, including certificated marketers in Georgia, to provide natural gas and related services to customers in Georgia and the Southeast. SouthStar began marketing natural gas to all customers in Georgia during the first quarter of fiscal 1999. Marketing efforts during the transition to competition in Georgia consisted of advertising and promotional campaigns. As of September 30, 2001, SouthStar had the largest market share among approximately eight certificated and active marketers in Georgia.

AGL Networks competes with national and regional telecommunication companies who lease conduit and dark fiber optic cable in metropolitan Atlanta, some of which are Southern Telecom, Level 3, and Metromedia Fiber Networks. With the purchase of ACSI's network, AGL Networks will have the largest fiber optic network in metropolitan Atlanta.

Corporate Reorganization

AGL Resources undertook an operational excellence project during fiscal 2000. The goal was to improve productivity and profitability through internal operational activity reassessment supported with external benchmarks. The project concluded prior to September 30, 2000, and resulted in AGL Resources reorganizing various functions and identifying specific positions to be eliminated.

Significant Customers

Information relating to significant customers and disclosures is contained under the caption "Concentration of Credit Risk" included in "Management's Discussion and Analysis of Results of Operations and Financial Condition" in the Annual Report and is incorporated herein by reference.

Employees

On September 30, 2001, AGL Resources and its subsidiaries had 2,300 employees, this compares with 1,938 at September 30, 2000. Of that total, approximately 600 employees are covered under collective bargaining agreements. There are currently six collective bargaining agreements, with the Teamster contract representing the largest group of 360 employees. The Teamster agreement expired in September 2000, and a new agreement, which is effective through March 2003, was reached on October 27, 2000. Contracts were signed this year with the Utility Workers Union in Chattanooga and Cleveland, Tennessee that expires in April 2004. An agreement was also reached with the Operating Engineers Union in Savannah that expires in September of 2004. The contract with the International Brotherhood of Electrical Workers at VNG, which represents approximately 180 employees, expires in May of 2002.

(The remainder of this page was left intentionally blank.)

ITEM 2. PROPERTIES

AGL Resources considers its properties and the properties of its subsidiaries to be well maintained, in good operating condition and suitable for their intended purposes.

At September 30, 2001, the gross property, plant and equipment was valued at approximately \$3.1 billion. The largest portion of this investment (96.9%) is within the Distribution Operations segment. The principal components are distribution systems, LNG storage and production, and office and facility space.

The distribution systems and related facilities of AGLC, VNG and CGC serve most of Georgia, southeastern Virginia and the Chattanooga area of Tennessee, respectively. As of September 30, 2001, distribution operations had approximately 34,400 miles of distribution and transportation mains, approximately 1,660,000 services and approximately 8.3 million Mcf of LNG storage capacity in four LNG plants to supplement the gas supply in very cold weather or emergencies.

[dist_oper.jpg](#)

AGL Resources owns or leases approximately 680,000 square feet of office, warehouse, and facility space throughout its operating areas. These spaces are used for current operations of all segments. The Distribution Operations comprises 512,000 square feet, Wholesale Services 16,000 square feet, Energy Investments 2,000 square feet, and Corporate 150,000 square feet.

With the purchase of ACSI's network, AGL Networks will own 36,000 fiber miles, 1,000 conduit miles and will have a footprint of 160 miles throughout metropolitan Atlanta.

[aglnetworks.jpg](#)

ITEM 3. LEGAL PROCEEDINGS

The nature of the business of AGL Resources and its subsidiaries ordinarily results in periodic regulatory proceedings before various state and federal authorities and/or litigation incidental to the business. For information regarding these proceedings, see the preceding sections in Part I, Item 1, "Business - State Regulatory Matters", "Business - Environmental Matters", and "Business - Significant Customers."

With regard to other legal proceedings, AGL Resources is a party, as both plaintiff and defendant, to a number of other suits, claims and counterclaims on an ongoing basis. Management believes that the outcome of all litigation in which it is involved will not have a material adverse effect on the consolidated financial statements of AGL Resources.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

The remainder of this page was intentionally left blank.

ITEM 4. (A). EXECUTIVE OFFICERS OF THE REGISTRANT

INDEPENDENT AUDITORS' REPORT

To the Shareholders and Board of Directors of AGL Resources Inc.:

We have audited the consolidated balance sheets of AGL Resources Inc. and subsidiaries of September 30, 2001 and 2000 and the related statements of consolidated income, common stockholders' equity, and cash flows for each of the three years in the period ended September 30, 2001 and have issued our report thereon dated October 23, 2001; such financial statements and report are included in your 2001 Annual Report to Shareholders and are incorporated herein by reference. Our audits also included the financial statement schedule of AGL Resources Inc. and subsidiaries, listed in Item 14. This financial statement schedule is the responsibility of AGL Resources Inc.'s management. Our responsibility is to express an opinion based on our audits. In our opinion, such financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.
