CARRIAGE SERVICES, INC.

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company

Carriage Services, Inc. (“Carriage”, the “Company”, “we”, “us” or “our”) is a leading provider of deathcare services and merchandise in the United States. As of March 31, 2013, we owned and operated 167 funeral homes in 26 states and 33 cemeteries in 11 states.

Principles of Consolidation

The accompanying Consolidated Financial Statements include us and our subsidiaries. All significant intercompany balances and transactions have been eliminated.

Interim Condensed Disclosures

The information for the three month periods ended March 31, 2012 and 2013 is unaudited, but in the opinion of management, reflects all adjustments which are normal, recurring and necessary for a fair presentation of our financial position and results of operations as of and for the interim periods presented. Certain information and footnote disclosures normally included in annual financial statements have been condensed or omitted. The accompanying Consolidated Financial Statements have been prepared consistent with the accounting policies described in our Annual Report on Form 10-K for the year ended December 31, 2012 and should be read in conjunction therewith. Certain reclassifications have been made to prior period amounts to conform to the current period financial statement presentation with no effect on our previously reported results of operations, consolidated financial position, or cash flows.

Cash and Cash Equivalents

We consider all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Use of Estimates

The preparation of the Consolidated Financial Statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, realization of accounts receivable, goodwill, intangible assets, property and equipment and deferred tax assets. We base our estimates on historical experience, third party data and assumptions that we believe to be reasonable under the circumstances. The results of these considerations form the basis for making judgments about the amount and timing of revenues and expenses, the carrying value of assets and the recorded amounts of liabilities. Actual results may differ from these estimates and such estimates may change if the underlying conditions or assumptions change. Historical performance should not be viewed as indicative of future performance, as there can be no assurance that our results of operations will be consistent from year to year.

Funeral and Cemetery Operations

We record the revenue from sales of funeral and cemetery merchandise and services when the merchandise is delivered or the service is performed. Sales of cemetery interment rights are recorded as revenue in accordance with the retail land sales provisions for accounting for sales of real estate. This method provides for the recognition of revenue in the period in which the customer’s cumulative payments exceed 10% of the contract price related to the interment right. Costs related to the sales of interment rights, which include real property and other costs related to cemetery development activities, are charged to operations using the specific identification method in the period in which the sale of the interment right is recognized as revenue. Revenues to be recognized from the delivery of merchandise and performance of services related to contracts that were acquired in acquisitions are typically lower than those originated by the Company. Sales taxes collected are recognized on a net basis in our Consolidated Financial Statements.

Allowances for bad debts and customer cancellations are provided at the date that the sale is recognized as revenue and are based on our historical experience and the current economic environment. We also monitor changes in delinquency rates and provide additional bad debt and cancellation reserves when warranted. When preneed sales of funeral services and merchandise are funded through third-party insurance policies, we earn a commission on the sale

of the policies. Insurance

- 6 -

Table of Contents

commissions are recognized as revenues at the point at which the commission is no longer subject to refund, which is typically one year after the policy is issued.

Accounts receivable included approximately \$8.4 million and \$8.7 million of funeral receivables at December 31, 2012 and March 31, 2013, respectively, and \$9.2 million and \$8.9 million of cemetery receivables at December 31, 2012 and March 31, 2013, respectively. Non-current preneed receivables represent the payments expected to be received beyond one year from the balance sheet date. Non-current preneed receivables consisted of approximately \$7.3 million and \$7.5 million of funeral receivables and \$15.9 million and \$16.7 million of cemetery receivables at December 31, 2012 and March 31, 2013, respectively. Accounts receivable also include minor amounts of other receivables. Bad debt expense totaled \$0.5 million and \$0.4 million for three months ended March 31, 2012 and 2013, respectively.

Discontinued Operations

In accordance with our Strategic Acquisition Model, non-strategic businesses are reviewed to determine whether such businesses should be sold and the proceeds redeployed elsewhere. A marketing plan is then developed for those locations which are identified as held for sale. When we receive a letter of intent and financing commitment from a buyer and the sale is expected to occur within one year, the location is no longer reported within our continuing operations. The assets and liabilities associated with the location are reclassified as held for sale on the Consolidated Balance Sheet and the operating results, as well as impairments, if any, are presented on a comparative basis in the discontinued operations section of the Consolidated Statements of Operations, along with the income tax effect.

During the first quarter of 2013, we sold funeral homes in Texas which were reported as held for sale at December 31, 2012. We currently have new letters of intent outstanding on funeral homes in Kansas and California; as such, these businesses are no longer reported within our continuing operations. The assets and liabilities associated with the locations are reclassified as held for sale on the Consolidated Balance Sheet and the operating results are presented on a comparative basis in the discontinued operations section of the Consolidated Statements of Operations. See Note 4 to the Consolidated Financial Statements herein for more information.

Business Combinations

Tangible and intangible assets acquired and liabilities assumed are recorded at fair value and goodwill is recognized for any difference between the price of the acquisition and fair value. We customarily estimate related transaction costs known at closing. To the extent that information not available to us at the closing date of an acquisition subsequently becomes available during the allocation period, we may adjust goodwill, assets, or liabilities associated with such acquisition. Acquisition related costs are recognized separately from acquisitions and are expensed as incurred. During the first quarter of 2012, we completed two acquisitions. There were no acquisitions during the first quarter of 2013. See Note 3 to the Consolidated Financial Statements herein for more information.

The excess of the purchase price over the fair value of identifiable net assets of funeral home businesses acquired is recorded as goodwill. Goodwill has primarily been recorded in connection with the acquisition of funeral businesses. Goodwill is tested for impairment by assessing the fair value of each of our reporting units. The funeral segment reporting units consist of our East, Central and West regions in the United States, and we perform our annual impairment test of goodwill using information as of August 31 of each year. In addition, we assess the impairment of goodwill whenever events or changes in circumstances indicate that the carrying value may be greater than fair value. Factors that could trigger an interim impairment review include, but are not limited to, significant adverse changes in the business climate which may be indicated by a decline in our market capitalization or decline in operating results. Our methodology for goodwill impairment testing is described in more detail in Notes 1 and 5 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2012.

Stock Plans and Stock-Based Compensation

We have stock-based employee and director compensation plans under which we may grant restricted stock, stock options, performance awards and employee stock purchase plans, which are described in more detail in Note 17 to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2012. We recognize compensation expense in an amount equal to the fair value of the share-based awards expected to vest over the requisite service period. Fair value is determined on the date of the grant. The fair value of options or awards containing options is determined using the Black-Scholes valuation model. The fair value of the performance awards

is determined using a Monte-Carlo simulation pricing model. See Note 14 to the Consolidated Financial Statements herein for additional information on our stock-based compensation plans.

- 7 -

Table of Contents

Computation of Earnings Per Common Share

Basic earnings per share is computed using the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of common and dilutive common equivalent shares outstanding during the period. Dilutive common equivalent shares consist of stock options and convertible junior subordinated debentures.

Share-based awards that contain nonforfeitable rights to dividends or dividend equivalents, whether paid or unpaid, are recognized as participating securities and included in the computation of both basic and diluted earnings per share. Our grants of restricted stock awards to our employees and directors are considered participating securities and we have prepared our earnings per share calculations to include outstanding unvested restricted stock awards in both the basic and diluted weighted average shares outstanding calculation. See Note 19 to this Consolidated Financial Statements herein for the computations of per share earnings for the three month periods ended March 31, 2012 and 2013.

The fully diluted weighted average shares outstanding for the three months ended March 31, 2013, and the corresponding calculation of GAAP fully diluted earnings per share include approximately 4.4 million shares that would be issued upon conversion of our convertible junior subordinated debentures as a result of the application of the if-converted method prescribed by FASB ASC 260-10-45. For the three months ended March 31, 2012, the conversion of our convertible junior subordinated debentures is excluded from fully diluted earnings per share calculations and the fully diluted weighted average share count because the inclusion of such converted shares would result in an antidilutive impact.

Preneed Funeral and Cemetery Trust Funds

Our preneed and perpetual care trust funds are reported in accordance with the principles of consolidating Variable Interest Entities (“VIEs”). In the case of preneed trusts, the customers are the legal beneficiaries. In the case of perpetual care trusts, we do not have a right to access the corpus in the perpetual care trusts. For these reasons, we have recognized financial interests of third parties in the trust funds in our financial statements as Deferred preneed funeral and cemetery receipts held in trust and Care trusts’ corpus. The investments of such trust funds are classified as available-for-sale and are reported at fair market value; therefore, the unrealized gains and losses, as well as accumulated and undistributed income and realized gains and losses are recorded to Deferred preneed funeral and cemetery receipts held in trust and Care trusts’ corpus in our Consolidated Balance Sheets. Our future obligations to deliver merchandise and services are reported at estimated settlement amounts. Preneed funeral and cemetery trust investments are reduced by the trust investment earnings that we have been allowed to withdraw in certain states prior to maturity. These earnings, along with preneed contract collections not required to be placed in trust, are recorded in Deferred preneed funeral revenue and Deferred preneed cemetery revenue until the service is performed or the merchandise is delivered.

In accordance with respective state laws, we are required to deposit a specified amount into perpetual and memorial care trust funds for each interment/entombment right and certain memorials sold. Income from the trust funds is distributed to us and used to provide care and maintenance for the cemeteries and mausoleums. Such trust fund income is recognized as revenue when realized by the trust and distributable to us. We are restricted from withdrawing any of the principal balances of these funds.

An enterprise is required to perform an analysis to determine whether the enterprise’s variable interest(s) give it a controlling financial interest in a VIE. This analysis identifies the primary beneficiary of a VIE as the enterprise that has both the power to direct the activities of a VIE that most significantly impact the entity’s economic performance and the obligation to absorb losses of the entity that could potentially be significant to the VIE, or the right to receive benefits from the entity that could potentially be significant to the VIE. Our analysis continues to support our position as the primary beneficiary in certain of our funeral and cemetery trust funds.

Trust management fees are earned by us for investment management and advisory services that are provided by our wholly-owned registered investment advisor (CSV RIA). As of March 31, 2013, CSV RIA provides these services to one institution, which has custody of 68% of our trust assets, for a fee based on the market value of trust assets. Under state trust laws, we are allowed to charge the trust a fee for advising on the investment of the trust assets and these fees are recognized as income in the period in which services are provided.

Table of Contents

Fair Value Measurements

We define fair value as the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). We disclose the extent to which fair value is used to measure financial assets and liabilities, the inputs utilized in calculating valuation measurements, and the effect of the measurement of significant unobservable inputs on earnings, or changes in net assets, as of the measurement date. Additional required disclosures are provided herein in Notes 6, 10 and 11 to the Consolidated Financial Statements. We currently do not have any assets that have fair values determined by Level 3 inputs and no liabilities measured at fair value. We have not elected to measure any additional financial instruments and certain other items at fair value that are not currently required to be measured at fair value.

To determine the fair value of assets and liabilities in an environment where the volume and level of activity for the asset or liability have significantly decreased, the exit price is used as the fair value measurement. For the three month period ended March 31, 2013, we did not incur significant decreases in the volume or level of activity of any asset or liability. We consider an impairment of debt and equity securities other-than-temporary unless (a) the investor has the ability and intent to hold an investment and (b) evidence indicating the cost of the investment is recoverable before we are more likely than not required to sell the investment. If impairment is indicated, then an adjustment is made to reduce the carrying amount to fair value. As of March 31, 2013, no impairments have been identified.

In the ordinary course of business, we are typically exposed to a variety of market risks. Currently, these are primarily related to changes in fair market values related to outstanding debts and changes in the values of securities associated with the preneed and perpetual care trusts. Management is actively involved in monitoring exposure to market risk and developing and utilizing appropriate risk management techniques when appropriate and when available for a reasonable price. Our convertible junior subordinated debentures, payable to Carriage Services Capital Trust (the "Trust"), pay interest at the fixed rate of 7% and are carried on our Consolidated Balance Sheets at a cost of approximately \$89.8 million. The fair value of these securities is estimated to be approximately \$95.2 million at March 31, 2013, based on available broker quotes of the corresponding preferred securities issued by the Trust.

Income Taxes

We and our subsidiaries file a consolidated U.S. Federal income tax return, separate income tax returns in 16 states and combined or unitary income tax returns in 11 states in which we operate. We record deferred taxes for temporary differences between the tax basis and financial reporting basis of assets and liabilities. We record a valuation allowance to reflect the estimated amount of deferred tax assets for which realization is uncertain. Management reviews the valuation allowance at the end of each quarter and makes adjustments if it is determined that it is more likely than not that the tax benefits will be realized.

We analyze tax benefits for uncertain tax positions and how they are to be recognized, measured, and derecognized in financial statements; provide certain disclosures of uncertain tax matters; and specify how reserves for uncertain tax positions should be classified on our Consolidated Balance Sheets. We have reviewed our income tax positions and identified certain tax deductions, primarily related to business acquisitions that are not certain. Our policy with respect to potential penalties and interest is to record them as "Other" expense and "Interest" expense, respectively. The entire balance of unrecognized tax benefits, if recognized, would affect our effective tax rate. We do not anticipate a significant increase or decrease in our unrecognized tax benefits during the next twelve months.

Subsequent Events

Management evaluated events and transactions during the period subsequent to March 31, 2013 through the date the financial statements were issued for potential recognition or disclosure in the accompanying financial statements covered by this report. For more information regarding subsequent events, see Note 20 to the Consolidated Financial Statements herein.

2. RECENTLY ISSUED ACCOUNTING STANDARDS

Comprehensive Income

In February 2013, the FASB amended the Comprehensive Income Topic of the ASC to require reporting of amounts reclassified out of accumulated other comprehensive income (AOCI) by component. In addition, we are required to present significant amounts reclassified out of AOCI to net income in its entirety by the respective line items and to

cross reference any disclosure elsewhere in the notes for amounts reclassified in less than their entirety. This amendment is effective prospectively for public companies for reporting periods after December 15, 2012 which we adopted effective January 1, 2013. See Note 15 to the Consolidated Financial Statements herein for the appropriate disclosures.

- 9 -

Table of Contents**3. ACQUISITIONS**

Our growth strategy includes the execution of our Strategic Acquisition Model. We assess acquisition candidates using six strategic ranking criteria to differentiate the price we are willing to pay under a discounted cash flow methodology. Those criteria are:

- Size of business;
- Size of market;
- Competitive standing;
- Local market demographics;
- Strength of brand;
- and
- Barriers to entry.

During the first quarter of 2012, we completed two acquisitions consisting of two funeral homes. We paid \$11.6 million in cash as consideration for these acquisitions. We acquired substantially all of the assets and assumed certain operating liabilities, including obligations associated with existing preneed contracts. The assets and liabilities were recorded at fair value and included goodwill of \$6.3 million. There were no acquisitions during the first quarter of 2013. The pro forma impact of the acquisition on the prior periods is not presented as the impact is not material to reported results. Thus, the results of the acquired businesses are included in our results from the date of acquisition.

4. ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

We continually review locations to optimize the sustainable earning power and return on our invested capital. Our strategy, the Strategic Acquisition Model, also uses strategic ranking criteria to assess potential disposition candidates. The execution of this strategy entails selling generally non-strategic businesses.

During the first quarter of 2012, we ended a management agreement with a cemetery in Ohio. We currently have new letters of intent outstanding on funeral homes in Kansas and California; as such, these businesses are no longer reported within our continuing operations and are presented as held for sale on our Consolidated Balance Sheet at March 31, 2013.

Assets and liabilities associated with the businesses held for sale in our Consolidated Balance Sheets at December 31, 2012 and March 31, 2013 consisted of the following (in thousands):

	December 31, 2012	March 31, 2013
Assets:		
Current assets	\$ 238	\$ 309
Preneed funeral trust investments	—	70
Receivables from preneed trusts	293	289
Property, plant and equipment, net	504	1,418
Goodwill	85	1,097
Deferred charges and other non-current assets	346	—
Total	\$ 1,466	\$ 3,183
Liabilities:		
Current liabilities	\$ 75	\$ 106
Current portion of long-term debt and capital lease obligations	—	28
Long-term debt, net of current portion	—	85
Deferred preneed funeral revenue	294	289
Deferred preneed funeral receipts held in trust	—	70
Total	\$ 369	\$ 578

Table of Contents

The operating results of the discontinued businesses during the periods presented, as well as the gain on the disposal, are presented in the discontinued operations section of the Consolidated Statements of Operations, along with the income tax effect as follows (in thousands):

	For the three months ended	
	March 31,	
	2012	2013
Revenues	\$977	\$658
Operating income	\$226	\$62
Gain (loss) on disposition	428	(583)
(Provision) benefit for income taxes	(265)	198
Income (loss) from discontinued operations	\$389	\$(323)

5. GOODWILL

Many of the former owners and staff of acquired funeral homes have provided high quality service to families for generations. The resulting loyalty often represents a substantial portion of the value of a funeral business. The excess of the purchase price over the fair value of net identifiable assets acquired, as determined by management in business acquisition transactions accounted for as purchases, is recorded as goodwill.

The following table presents the changes in goodwill in our Consolidated Balance Sheets (in thousands):

	March 31,
	2013
Goodwill as of December 31, 2012	\$218,442
Impairments and changes in previous estimates	(102)
Reclassification of assets held for sale	(1,097)
Goodwill as of March 31, 2013	\$217,243

Changes in previous estimates are related to minor adjustments to inventory. The impairment of \$0.1 million is related to businesses discontinued in the first quarter of 2013 as the carrying value exceeded fair value.

6. PRENEED TRUST INVESTMENT**Preneed Cemetery Trust Investments**

Preneed cemetery trust investments represent trust fund assets that we are generally permitted to withdraw when the merchandise or services are provided. The components of Preneed cemetery trust investments in our Consolidated Balance Sheets at December 31, 2012 and March 31, 2013 are as follows (in thousands):

	December 31,	March 31, 2013
	2012	
Preneed cemetery trust investments, at fair value	\$73,126	\$75,213
Less: allowance for contract cancellation	(2,166)	(2,146)
Preneed cemetery trust investments, net	\$70,960	\$73,067

Upon cancellation of a preneed cemetery contract, a customer is generally entitled to receive a refund of the corpus and some or all of the earnings held in trust. In certain jurisdictions, we are obligated to fund any shortfall if the amounts deposited by the customer exceed the funds in trust, including some or all investment income. As a result, when realized or unrealized losses of a trust result in the trust being under-funded, we assess whether we are responsible for replenishing the corpus of the trust, in which case a loss provision is recorded.

Earnings from our preneed cemetery trust investments are recognized in revenue when a service is performed or merchandise is delivered. Trust management fees charged by our wholly-owned registered investment advisor are included in revenue in the period in which they are earned.

Where quoted prices are available in an active market, investments held by the trusts are classified as Level 1 investments pursuant to the three-level valuation hierarchy. Our Level 1 investments include cash, common stock, U.S. treasury debt, U.S. agency obligations and equity mutual funds. Where quoted market prices are not available for the specific security, then fair values are estimated by using quoted prices of similar securities in active markets or other inputs other than quoted prices that

Table of Contents

can corroborate observable market data. These investments are corporate debt, preferred stocks, foreign debt, mortgage backed securities and fixed income securities, all of which are classified within Level 2 of the valuation hierarchy. There were no significant transfers between Levels 1 and 2 for the three months ended March 31, 2013. There are no Level 3 investments in the preneed cemetery trust investment portfolio. See Note 11 for further information of the fair value measurement and the three-level valuation hierarchy.

The cost and fair market values associated with preneed cemetery trust investments at March 31, 2013 are detailed below (in thousands):

	Fair Value Hierarchy Level	Cost	Unrealized Gains	Unrealized Losses	Fair Market Value	
Cash and money market accounts	1	\$922	\$—	\$—	\$922	
Fixed income securities:

Trust securities		\$72,187	\$2,171	\$(2,327)	\$72,031	
Accrued investment income		\$1,095			\$1,095	
Preneed cemetery trust investments					\$73,126	
Market value as a percentage of cost					99.8	%

We determine whether or not the assets in the preneed cemetery trusts have an other-than-temporary impairment on a security-by-security basis. This assessment is made based upon a number of criteria including the length of time a security has been in a loss position, changes in market conditions and concerns related to the specific issuer. If a loss is considered to be other-than-temporary, the cost basis of the security is adjusted downward to its fair market value. Any reduction in the cost basis of the investment due to an other-than-temporary impairment is likewise recorded as a reduction in Deferred preneed

Table of Contents

cemetery receipts held in trust. There will be no impact on earnings unless and until such time as the investment is withdrawn from the trust in accordance with state regulations at an amount that is less than its original basis. We have determined that the unrealized losses in our cemetery merchandise and service trust investments are considered temporary in nature, as the unrealized losses were due to temporary fluctuations in interest rates and equity prices. The investments are diversified across multiple industry segments using a balanced allocation strategy to minimize long-term risk. We believe that none of the securities are other-than-temporarily impaired based on our analysis of the investments. Our cemetery merchandise and service trust investment unrealized losses, their associated fair market values, and the duration of unrealized losses as of March 31, 2013 and December 31, 2012, respectively, are shown in the following tables (in thousands):

March 31, 2013

	In Loss Position Less than 12 months		In Loss Position Greater than 12 months		Total

	2012	2013
Purchases	\$24,039)	\$(4,161)
Sales	24,088	5,009

Table of Contents

Preneed Funeral Trust Investments

Preneed funeral trust investments represent trust fund assets that we are permitted to withdraw as services and merchandise are provided to customers. Preneed funeral contracts are secured by funds paid by the customer to us. Preneed funeral trust investments are reduced by the trust earnings we have been allowed to withdraw prior to our performance and amounts received from customers that are not required to be deposited into trust, pursuant to various state laws. The components of Preneed funeral trust investments in our Consolidated Balance Sheets at December 31, 2012 and March 31, 2013 are as follows (in thousands):

	December 31, 2012	March 31, 2013
Preneed funeral trust investments, at fair value	\$85,415	\$87,728
Less: allowance for contract cancellation	(2,519) (2,504)
Preneed funeral trust investments, net	\$82,896	\$85,224

Upon cancellation of a preneed funeral contract, a customer is generally entitled to receive a refund of the corpus and some or all of the earnings held in trust. In certain jurisdictions, we are obligated to fund any shortfall if the amounts deposited by the customer exceed the funds in trust, including some or all investment income. As a result, when realized or unrealized losses of a trust result in the trust being under-funded, we assess whether we are responsible for replenishing the corpus of the trust, in which case a loss provision is recorded.

Earnings from our preneed funeral trust investments are recognized in revenue when a service is performed or merchandise is delivered. Trust management fees charged by our wholly-owned registered investment advisor are included in revenue in the period in which they are earned.

Where quoted prices are available in an active market, investments held by the trusts are classified as Level 1 investments pursuant to the three-level valuation hierarchy. Our Level 1 investments include cash, U. S. Government, agencies and municipalities, common stocks and equity mutual funds. Where quoted market prices are not available for the specific security, then fair values are estimated by using quoted prices of similar securities in active markets or other inputs other than quoted prices that can corroborate observable market data. These investments are corporate debt, preferred stocks, foreign debt, mortgage backed securities and fixed income securities, all of which are classified within Level 2 of the valuation hierarchy. There were no significant transfers between Levels 1 and 2 for the three months ended March 31, 2013. There are no Level 3 investments in the preneed funeral trust investment portfolio. See Note 11 for further information of the fair value measurement and the three-level valuation hierarchy.

	For the three months ended March 31,	
	2012	2013
Purchases	\$(17,873)	\$(3,186)
Sales	18,174	3,915

7. PRENEED CEMETERY RECEIVABLES

Preneed sales of cemetery interment rights and related products and services are usually financed through interest-bearing installment sales contracts, generally with terms of up to five years with such interest income reflected as Preneed cemetery finance charges. In substantially all cases, we receive an initial down payment at the time the contract is signed. Occasionally, we offer zero percent interest financing to promote sales as limited-time offers. At March 31, 2013, the balances of preneed receivables for cemetery interment rights and for merchandise and services were \$21.3 million and \$8.7 million, respectively, of which \$10.3 million is presented in Accounts receivable and \$19.7 million is presented in Preneed receivables. The unearned finance charges associated with these receivables were \$3.3 million and \$3.6 million at December 31, 2012 and March 31, 2013, respectively.

Table of Contents

We determine an allowance for customer cancellations and refunds on contracts in which revenue has been recognized on sales of cemetery interment rights. We have a collections policy where past due notifications are sent to the customer beginning at 15 days past due and periodically thereafter until the contract is cancelled or payment is received. We reserve 100% of the receivables on contracts in which the revenue has been recognized and payments are 90 days past due or more, which was approximately 5.3% of the total receivables on recognized sales at March 31, 2013. An allowance is recorded at the date that the contract is executed and periodically adjusted thereafter based upon actual collection experience at the business level. For the three months ended March 31, 2013, changes in the allowance for contract cancellations were as follows (in thousands):

	March 31, 2013
Beginning balance	\$1,903
Write-offs and cancellations	(591)
Provision	193
Ending balance	\$1,505

The aging of past due financing receivables as of March 31, 2013 is as follows (in thousands):

	31-60 Past Due	61-90 Past Due	91-120 Past Due	>120 Past Due	Total Past Due	Current	Total Financing Receivables
Recognized revenue	\$556	\$268	\$177	\$930	\$1,931	\$19,047	\$20,978
Deferred revenue	169	113	84	453	819	8,258	9,077
Total contracts	\$725	\$381	\$261	\$1,383	\$2,750	\$27,305	\$30,055

8. RECEIVABLES FROM PRENEED
TRUSTS

The receivables from preneed trusts represent assets in trusts which are controlled and operated by third parties in which we do not have a controlling financial interest (less than 50%) in the trust assets. We account for these investments at cost. As of December 31, 2012 and March 31, 2013, receivables from preneed trusts are as follows (in thousands):

	December 31, 2012	March 31, 2013
Preneed trust funds, at cost	\$26,671	\$27,772
Less: allowance for contract cancellation	(800)	(834)
Receivables from preneed trusts, net	\$25,871	\$26,938

9. CONTRACTS SECURED BY INSURANCE

Certain preneed funeral contracts are secured by life insurance contracts. Generally, the proceeds of the life insurance policies have been assigned to us and will be paid upon the death of the insured. The proceeds will be used to satisfy the beneficiary's obligations under the preneed contract for services and merchandise. Preneed funeral contracts secured by insurance totaled \$237.4 million and \$272.6 million at December 31, 2012 and March 31, 2013, respectively, and are not included in our Consolidated Balance Sheets.

10. CEMETERY PERPETUAL CARE TRUST INVESTMENTS

Care trusts' corpus on our Consolidated Balance Sheets represent the corpus of those trusts plus undistributed income. The components of Care trusts' corpus as of December 31, 2012 and March 31, 2013 are as follows (in thousands):

	December 31, 2012	March 31, 2013
Trust assets, at fair value	\$46,542	\$47,165
Obligations due to trust	(622)	(82)
Care trusts' corpus	\$45,920	\$47,083

The income from these perpetual care trusts provides funds necessary to maintain cemetery property and memorials in perpetuity. This trust fund income is recognized, as earned, in cemetery revenues. Trust management fees charged by our wholly-owned registered investment advisor are included in revenue in the period in which they are earned.

Table of Contents

Where quoted prices are available in an active market, investments held by the trusts are classified as Level 1 investments pursuant to the three-level valuation hierarchy. Our Level 1 investments include cash, common stock, U.S. treasury debt, U.S. agency obligations and equity mutual funds. Where quoted market prices are not available for the specific security, then fair values are estimated by using quoted prices of similar securities in active markets or other inputs other than quoted prices that can corroborate observable market data. These investments are corporate debt, preferred stocks, foreign debt, mortgage backed securities and fixed income securities, all of which are classified within Level 2 of the valuation hierarchy. There were no significant transfers between Levels 1 and 2 for the three months ended March 31, 2013. There are no Level 3 investments in the cemetery perpetual care trust investment portfolio. See Note 11 for further information of the fair value measurement and the three-level valuation hierarchy. The following table reflects the cost and fair market values associated with the trust investments held in perpetual care trust funds at March 31, 2013 (in thousands):

	Fair Value Hierarchy Level	Cost	Unrealized Gains	Unrealized Losses	Fair Market Value	
Cash and money market accounts	1	\$683	\$—	\$—	\$683

Accrued investment income		\$709			\$709	
Cemetery perpetual care investments					\$46,542	
Market value as a percentage of cost					99.8	%

We are required by various state laws to pay a portion of the proceeds from the sale of cemetery property interment rights into perpetual care trust funds. We determine whether or not the assets in the cemetery perpetual care trusts have an other-than-temporary impairment on a security-by-security basis. This assessment is made based upon a number of criteria including the

- 19 -

Table of Contents

length of time a security has been in a loss position, changes in market conditions and concerns related to the specific issuer. If a loss is considered to be other-than-temporary, the cost basis of the security is adjusted downward to its fair market value. Any reduction in the cost basis due to an other-than-temporary impairment is also recorded as a reduction to Care trusts' corpus.

We have determined that the unrealized losses in our perpetual care trust investments are considered temporary in nature, as the unrealized losses were due to temporary fluctuations in interest rates and equity prices. The investments are diversified across multiple industry segments using a balanced allocation strategy to minimize long-term risk. We believe that none of the securities are other-than-temporarily impaired based on our analysis of the investments. Our perpetual care trust investment unrealized losses, their associated fair market values, and the duration of unrealized losses for the period as of March 31, 2013 and December 31, 2012, respectively, are shown in the following tables (in thousands):

	March 31, 2013					
	In Loss Position Less than 12 months		In Loss Position Greater than 12 months		Total

11. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date applicable for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. We disclose the extent to which fair value is used to measure financial assets and liabilities, the inputs utilized in calculating valuation measurements, and the effect of the measurement of significant unobservable inputs on earnings, or changes in net assets, as of the measurement date.

We evaluated our financial assets and liabilities for those financial assets and liabilities that met the criteria of the disclosure requirements and fair value framework. The carrying values of cash and cash equivalents, trade receivables, and trade payables approximate the fair values of those instruments due to the short-term nature of the instruments. The fair values of receivables on preneed funeral and cemetery contracts are impracticable to estimate because of the lack of a trading market and the diverse number of individual contracts with varying terms. The long-term debt and line of credit are classified within Level 2 of the Fair Value Measurements hierarchy. The fair values of the long-term debt and line of credit approximate the carrying values of these instruments based on the index yields of similar securities compared to U.S. Treasury yield curves. The fair value of the convertible junior subordinated debentures is approximately \$95.2 million at March 31, 2013, based on available broker quotes of the corresponding preferred securities issued by the Trust. We identified investments in fixed income securities, common stock and mutual funds presented within the preneed and perpetual care trust investments categories on our Consolidated Balance Sheets as having met such criteria. See Notes 6 and 10 to this Consolidated Financial Statements herein for the fair value hierarchy levels of our trust investments.

The following three-level valuation hierarchy based upon the transparency of inputs is utilized in the measurement and

valuation of financial assets or liabilities as of the measurement date:

Level 1 – Fair value of securities based on unadjusted quoted prices for identical assets or liabilities in active markets.

Our investments classified as Level 1 securities include cash, common stock, U.S. treasury debt, U.S. agency obligations and equity mutual funds.

Level 2 – Fair value of securities estimated based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs other than quoted market prices that are observable or that can be corroborated by observable market data by correlation. These inputs include interest rates, yield curves, credit risk, prepayment speeds, rating, and tax-exempt status. Our investments classified as Level 2 securities include corporate debt, preferred stocks, foreign debt, mortgage backed securities, certain fixed income securities and fixed income mutual funds.

Level 3 – Unobservable inputs based upon the reporting entity's internally developed assumptions which market participants would use in pricing the asset or liability. As of March 31, 2013, we did not have any assets that had fair values determined by Level 3 inputs and no liabilities measured at fair value.

We account for our investments as available-for-sale and measure them at fair value under standards of financial accounting and reporting for investments in equity instruments that have readily determinable fair values and for all investments in debt securities.

Table of Contents

12. LONG-TERM DEBT

The Company's senior long-term debt consisted of the following at December 31, 2012 and March 31, 2013 (in thousands):

	December 31, 2012	March 31, 2013
Revolving credit facility, secured, floating rate	\$44,700	\$43,000
Term loan, secured, floating rate	127,500	125,000
Acquisition debt	2,427	2,187
Less: current portion	(11,086)	(11,469)
Total long-term debt	\$ 163,541	\$ 158,718

As of March 31, 2013, we had a \$235 million secured bank credit facility (the "Credit Facility") with Bank of America, N.A. as Administrative Agent comprised of a \$105 million revolving credit facility and a \$130 million term loan. The Credit Facility also contains an accordion provision to borrow up to an additional \$40 million in revolving loans, subject to certain conditions. The Credit Facility is set to mature on September 30, 2017 and is collateralized by all personal property and funeral home real property in certain states. Interest under the new Credit Facility is payable at prime or LIBOR options. As of March 31, 2013, \$43 million was drawn under the revolving credit facility and \$125 million was outstanding on the term loan. No letters of credit were issued and outstanding under the Credit Facility at March 31, 2013. See Subsequent Events, Note 20, herein for further information on our Credit Facility.

We have no material assets or operations independent of our subsidiaries. All assets and operations are held and conducted by subsidiaries, each of which (except for the Trust, which is a single purpose entity that holds our 7% debentures issued in connection with the issuance of the Trust's term income deferrable equity securities (TIDES) 7% convertible preferred securities) have fully and unconditionally guaranteed our obligations under the Credit Facility. Additionally, we do not currently have any significant restrictions on our ability to receive dividends or loans from any subsidiary guarantor under the Credit Facility.

We were in compliance with the covenants contained in the Credit Facility as of March 31, 2013. The Credit Facility calls for key ratios that we must comply with including a requirement to maintain a leverage ratio of no more than 3.75 to 1.00 through June 29, 2014 and no more than 3.50 to 1.00 thereafter, and a covenant to maintain a fixed charge coverage ratio of no less than 1.20 to 1.00. As of March 31, 2013, the leverage ratio was 3.03 to 1.00 and the fixed charge coverage ratio was 2.41 to 1.00.

Acquisition debt consists of deferred purchase price and promissory notes payable to sellers. These notes bear interest at 0%, discounted at imputed interest rates ranging from 8.50% to 9.50%, with original maturities from one to ten years.

13. COMMITMENTS AND CONTINGENCIES

Litigation

We are a party to various litigation matters and proceedings. For each of our outstanding legal matters, we evaluate the merits of the case, our exposure to the matter, possible legal or settlement strategies and the likelihood of an unfavorable outcome. We intend to defend ourselves in the lawsuits described herein. If we determine that an unfavorable outcome is probable and can be reasonably estimated, we establish the necessary accruals. We hold certain insurance policies that may reduce cash outflows with respect to an adverse outcome of certain of these litigation matters.

Leathermon, et al. v. Grandview Memorial Gardens, Inc., et al., United States District Court, Southern District of Indiana, Case No. 4:07-cv-137. On August 17, 2007, five plaintiffs filed a putative class action against the current and past owners of Grandview Cemetery in Madison, Indiana, including our subsidiaries that owned the cemetery from January 1997 until February 2001, on behalf of all individuals who purchased cemetery and burial goods and services at Grandview Cemetery. Plaintiffs are seeking monetary damages and claim that the cemetery owners performed burials negligently, breached Plaintiffs' contracts and made misrepresentations regarding the cemetery. The Plaintiffs also allege that the claims occurred prior, during and after we owned the cemetery. On October 15, 2007, the case was removed from Jefferson County Circuit Court, Indiana to the Southern District of Indiana. On April 24, 2009, shortly before Defendants had been scheduled to file their briefs in opposition to Plaintiffs' motion for class certification,

Plaintiffs moved to amend their complaint to add new class representatives and claims, while also seeking to abandon other claims. We, as well as several other Defendants, opposed Plaintiffs' motion to amend their complaint and add parties. In April 2009, two Defendants moved to disqualify Plaintiffs'

- 22 -

Table of Contents

counsel from further representing Plaintiffs in this action. On June 30, 2010, the Court granted the Defendants' motion to disqualify Plaintiffs' counsel. In that order, the Court gave Plaintiffs 60 days within which to retain new counsel. On May 6, 2010, Plaintiffs filed a petition for writ of mandamus with the Seventh Circuit Court of Appeals seeking relief from the trial court's order of disqualification of counsel. On May 19, 2010, the Defendants responded to the petition of mandamus. On July 8, 2010, the Seventh Circuit denied Plaintiffs' petition for writ of mandamus. Thus, pursuant to the trial court's order, Plaintiffs were given 60 days from July 8, 2010 in which to retain new counsel to prosecute this action on their behalf. Plaintiffs retained new counsel and the trial court granted the newly retained Plaintiffs' counsel 90 days to review the case and advise the Court whether or not Plaintiffs would seek leave to amend their complaint to add and/or change the allegations as are currently stated therein and whether or not they would seek leave to amend the proposed class representatives for class certification. Plaintiffs moved for leave to amend both the class representatives and the allegations stated within the complaint. Defendants filed oppositions to such amendments. The Court issued an order permitting the Plaintiffs to proceed with amending the class representatives and a portion of their claims; however, certain of Plaintiffs' claims have been dismissed. Discovery in this matter will now proceed. We intend to defend this action vigorously. Because the lawsuit is in its preliminary stages, we are unable to evaluate the likelihood of an unfavorable outcome to us or to estimate the amount or range of any potential loss, if any, at this time.

14. STOCK-BASED COMPENSATION**Stock Options and Employee Stock Purchase Plan**

No stock options were awarded during the first quarter of 2013. As of March 31, 2013, there were 283,258 stock options outstanding and 110,124 stock options which remain unvested.

During the first quarter of 2013, employees purchased a total of 22,027 shares of common stock through the employee stock purchase plan ("ESPP") at a weighted average price of \$11.43 per share. We recorded pre-tax stock-based compensation expense for the ESPP and for stock options totaling \$97,000 and \$146,000 for the three months ended March 31, 2012 and 2013, respectively.

The fair value of the right (option) to purchase shares under the ESPP is estimated on the date of grant (January 1, 2013) associated with the four quarterly purchase dates using the following assumptions:

	2012	2013	
Dividend yield	1.7	% 0.6	%
Expected volatility	32	% 31	%
Risk-free interest rate	0.02%, 0.06%, 0.09%, 0.12%	0.08%, 0.12%, 0.135%, 0.15%	
Expected life (years)	0.25, 0.50, 0.75, 1.00	0.25, 0.50, 0.75, 1.00	

Expected volatilities are based on the historical volatility during the previous twelve months of the underlying common stock. The risk-free rate for the quarterly purchase periods is based on the U.S. Treasury yields in effect at the time of grant (January 1). The expected life of the ESPP grants represents the calendar quarters from the grant date (January 1) to the purchase date (end of each quarter).

Common Stock Grants to Officers and Key Employees

We, from time to time, issue shares of restricted common stock to certain officers and key employees from our stock benefit plans. The restricted stock shares issued to officers and key employees vest in 33.33% increments over three year periods. Related to the vesting of restricted stock awards previously awarded to our officers and employees, we recorded \$240,000 and \$313,000 in pre-tax compensation expense, included in general, administrative and other expenses, for the three months ended March 31, 2012 and 2013, respectively.

As of March 31, 2013, we had \$2.3 million of unrecognized compensation costs related to unvested restricted stock awards, which are expected to be recognized over a weighted average period of approximately 1.7 years.

Table of Contents

Performance-based Stock Awards

During the third quarter of 2012, the Compensation Committee of our Board of Directors (our “Board”) approved the grant of performance awards with both market and service vesting conditions to certain officers, employees and outside directors. The awards vest and become exercisable only in the event the closing price of our common stock is greater than or equal to \$21.50 on any three days, whether or not consecutive, within a period of 30 consecutive calendar days, and the grantee remains continuously employed by us from the grant date through such date, which can be no earlier than the first anniversary of the grant date. If the market condition is met prior to the first anniversary of the grant date, then such award will not become vested until the first anniversary of the grant date, provided that the grantee remains continuously employed by us from the grant date through the first anniversary of the grant date. Promptly following the date a grantee’s award becomes vested (but no later than March 15th of the year following the year in which the award becomes vested) and subject to the grantee’s payment of the purchase price, we will issue and deliver to the grantee the number of shares of our common stock subject to the award. The purchase price is equal to the greater of (a) the fair market value of a share of our common stock on the grant date plus \$0.50 or (b) \$9.00. A grantee’s award will automatically terminate without payment of any consideration if (i) the grantee’s employment with us terminates for any reason (other than due to death or disability) prior to the vesting or (ii) the vesting does not occur on or before the fifth anniversary of the grant date. No performance awards were granted during the first quarter of 2013. The pre-tax compensation expense associated with these awards for the three months ended March 31, 2013 was approximately \$169,000.

Director Compensation Policy

On March 5, 2012, our Board approved a new Director Compensation Policy, which provides for the following:

(a) the chairman of our Audit Committee receives an annual cash retainer of \$17,500, the chairman of our Compensation and our Corporate Governance Committees receives an annual cash retainer of \$15,000; and the Lead Director of our Board receives an annual cash retainer of \$115,000, payable in quarterly installments; (b) each independent director of our Board receives an annual cash retainer of \$40,000 paid on a quarterly basis and an annual equity retainer of \$75,000 in shares of our common stock issued at our annual meeting of stockholders. Additionally, each independent director receives \$2,000 for each regular or special meeting of the full Board, our Audit Committee and our Executive Committee attended in person or by phone. Members of the other committees and their chairmen receive \$1,600 for each committee meeting held in person or by phone that such director attends. Under our Director Compensation Policy, the annual cash retainers for each committee chairman and the annual equity retainer are paid on the date of our annual meeting of stockholders, which for this year will be held on May 22, 2013.

We recorded \$161,000 and \$133,000 in pre-tax compensation expense, included in general, administrative and other expenses, for the three months ended March 31, 2012 and 2013, respectively, related to the director fees, annual retainers and deferred compensation amortization.

15. STOCKHOLDERS' EQUITY

Share Repurchase Program

During May 2012, our Board approved an increase to the share repurchase program authorizing us to purchase an additional \$3 million of our common stock up to a total of \$8 million. The repurchases are executed in the open market and through privately negotiated transactions subject to market conditions, normal trading restrictions and other relevant factors. During 2012, we repurchased 686,208 shares of common stock at an aggregate cost of \$4.5 million and an average cost per share of \$6.60. No repurchases were made in the first quarter of 2013. The repurchased shares are held as treasury stock. Since the beginning of this program, we have spent \$5.3 million buying back our common stock under this plan.

Cash Dividends

Our Board declared a quarterly dividend of \$0.025 per share, totaling \$452,000, which was paid on March 1, 2013 to record holders of our common stock as of February 13, 2013. We have a dividend reinvestment program so that stockholders may elect to reinvest their dividends into additional shares of our common stock.

Table of Contents

19. EARNINGS PER SHARE

Earnings per share for the three months ended March 31, 2012 and March 31, 2013 is calculated based on the weighted average number of common and common equivalent shares outstanding during the periods. The following table sets forth the computation of the basic and diluted earnings per share for the three months ended March 31, 2012 and March 31, 2013:

	For the three months ended March 31,	
	2012	2013
Net income	\$4,459	\$5,258
Net income allocated to non-vested share awards	(110)	(118)
Preferred stock dividend	(4)	(4)
Undistributed earnings available to common stockholders	\$4,345	\$5,136
Income (loss) from discontinued operations	389	(323)
Undistributed earnings from continuing operations available to common stockholders	3,956	5,459
Weighted average number of common shares outstanding for basic EPS computation	18,265	18,139
Effect of dilutive securities:		
Stock options	55	197
Convertible junior subordinated debentures	—	4,392
Weighted average number of common and common equivalent shares outstanding for diluted EPS computation	18,320	22,728
Basic earnings per common share:		
Undistributed earnings	\$0.22	\$0.30
Allocation of earnings to non-vested share awards	—	0.01
Basic earnings per share from continuing operations	0.22	0.31
Discontinued operations	0.02	(0.02)
Basic earnings per common share	\$0.24	\$0.29
Diluted earnings per common share:		
Undistributed earnings	\$0.22	\$0.26
Allocation of earnings to non-vested share awards	—	0.01
Diluted earnings per share from continuing operations	0.22	0.27
Discontinued operations	0.02	(0.02)
Diluted earnings per common share	\$0.24	\$0.25

Share-based awards that contain non-forfeitable rights to dividends or dividend equivalents, whether paid or unpaid, are participating securities and included in the computation of both basic and diluted earnings per share. Our grants of restricted stock awards to our employees and directors are considered participating securities and we have prepared our earnings per share calculations to include outstanding unvested restricted stock awards in the basic and diluted weighted average shares outstanding calculation.

The fully diluted weighted average shares outstanding for the three months ended March 31, 2013, and the corresponding calculation of GAAP fully diluted earnings per share include approximately 4.4 million shares that would be issued upon conversion of our convertible junior subordinated debentures as a result of the application of the if-converted method prescribed by FASB ASC 260-10-45. For the three months ended March 31, 2012, the conversion of our convertible junior subordinated debentures is excluded from fully diluted earnings per share calculation and the fully diluted weighted average share count because the inclusion of such converted shares would result in an antidilutive impact.

Table of Contents

The following table sets forth the reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for the three months ended March 31, 2013:

	For the three months ended March 31, 2013		
	Income (Numerator)	Shares (Denominator)	Per-Share Amount
Net income	\$5,258		
Less: Preferred Stock dividends	(4)	
Basic earnings per share			
Net income available to common stockholders	5,254	18,139	\$0.29
Effect of dilutive securities			
Stock options	—	197	
Convertible junior subordinated debentures	484	4,392	
Diluted earnings per share			
Net income available to common stockholders and assumed conversions	\$5,738	22,728	\$0.25

20. SUBSEQUENT EVENTS**Conversion of Preferred Stock**

The Company has 40,000,000 authorized shares of preferred stock. In 2008, we issued 20,000 shares of mandatorily redeemable convertible preferred stock to a key employee in exchange for certain intellectual property rights. The preferred stock has a liquidation value of \$10 per share and is convertible at any time prior April 13, 2013 into the Company's common stock on a one-for-one basis. On April 1, 2013, our key employee converted his 20,000 shares of mandatorily redeemable convertible preferred stock into common stock.

Amendment to the Credit Facility

On April 24, 2013, the Company entered into a third amendment to the Credit Facility (the "Third Amendment") which provides for an increase in the revolving credit commitments under the Credit Facility from \$105 million to \$125 million and a decrease in the interest rate margin. Under the Credit Facility, outstanding borrowings bear interest at either a prime rate or a LIBOR rate, plus an applicable margin based upon the Company's leverage ratio. The Third Amendment decreases the applicable margin for the Company's outstanding borrowings (for both prime rate and LIBOR base rates) by 50 basis points at each leverage ratio threshold.

The Third Amendment also contains amendments which (a) allow the Company to issue subordinated debt or convertible subordinated debt in an amount not to exceed \$100 million, (b) provide the Company with the ability to repurchase up to \$15 million worth of stock-based employee awards, and (c) allow for the Company to refinance its existing convertible junior subordinated debentures with the proceeds of certain issuances of subordinated debt or convertible subordinated debt.

CAUTIONARY STATEMENT ON FORWARD-LOOKING STATEMENTS

In addition to historical information, this Form 10-Q contains certain statements and information that may constitute forward-looking statements within the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements include any projections of earnings, revenues, asset sales, cash flow, debt levels or other financial items; any statements of the plans, strategies and objectives of management for future operations; any statements regarding future economic conditions or performance; any statements of belief; and any statements of assumptions underlying any of the foregoing and are based on our current expectations and beliefs concerning future developments and their potential effect on us. The words “may”, “will”, “estimate”, “intend”, “believe”, “expect”, “project”, “forecast”, “fore”, “should”, “would”, “could”, “plan”, “anticipate” and other similar words or expressions are intended to identify forward-looking statements, which are generally not historical in nature. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate. All comments concerning our expectations for future revenues and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Important factors that could cause actual results to differ materially from those in the forward-looking statements include, but are not limited to, those summarized below:

- the execution of our Standards Operating Model;
- changes in the number of deaths in our markets;
- changes in consumer preferences;
- ability to find and retain skilled personnel;
- the effects of competition;
- the investment performance of our funeral and cemetery trust funds;
- fluctuations in interest rates;
- our ability to obtain debt or equity financing on satisfactory terms to fund additional acquisitions, expansion projects, working capital requirements and the repayment or refinancing of indebtedness;
- death benefits related to preneed funeral contracts funded through life insurance contracts;
- our ability to generate preneed sales;
- the financial condition of third-party insurance companies that fund our preneed funeral contracts;
- increased or unanticipated costs, such as insurance or taxes;
- effects of the application of applicable laws and regulations, including changes in such regulations or the interpretation thereof; and
- other factors and uncertainties inherent in the deathcare industry.

For additional information regarding known material factors that could cause our actual results to differ from our projected results, please see (i) Part II, Item 1A “Risk Factors” in this Form 10-Q and (ii) Part I, Item 1A “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2012.

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

General

We operate two types of businesses: funeral homes, which account for approximately 75% of our revenues, and cemeteries, which account for approximately 25% of our revenues. Funeral homes are principally service businesses that provide funeral services (traditional burial and cremation) and sell related merchandise, such as caskets and urns. Cemeteries are primarily a sales business that sells interment rights (grave sites and mausoleum spaces) and related merchandise, such as markers and outer burial containers. As of March 31, 2013, we operated 167 funeral homes in 26 states and 33 cemeteries in 11 states within the United States. Substantially all administrative activities are conducted in our home office in Houston, Texas.

We have implemented a long-term strategy in our operations designed to improve operating and financial results by growing market share and increasing profitability. We have a decentralized, entrepreneurial and local operating model that includes operating and financial standards developed from our best operations, along with an incentive compensation plan to reward Managing Partners for successfully meeting or exceeding the standards. The model essentially eliminated the use of line-item financial budgets at the location level in favor of the standards. The operating model and its standards, which we refer to as the "Standards Operating Model," focus on the key drivers of a successful operation, organized around three primary areas - market share, people and operating financial metrics. The model and standards are the measures by which we judge the success of each business. In 2012, we began a five year incentive plan, called "Good to Great," which rewards business managers, known as "Managing Partners," with a bonus at the end of five years, equal to a ratio of 4 to 6 times their average annual bonus, if they are able to achieve an annual compound growth rate of 2% over a five year period. To date, the Standards Operating Model has driven significant changes in our organization, leadership and operating practices. Most importantly, the Standards Operating Model has allowed us to measure the sustainable revenue growth and earning power of our portfolio businesses. The Standards Operating Model led to the development of our Strategic Acquisition Model, described below under "Acquisitions," which guides our acquisition and disposition strategy. We expect both models to drive long-term, sustainable increases in market share, revenue, earnings and cash flow. The standards are not designed to produce maximum short-term earnings because we do not believe such performance is sustainable without ultimately stressing the business, which often leads to declining market share, revenues and earnings. Important elements of the Standards Operating Model include:

Balanced Operating Model – We believe a decentralized structure works best in the death care industry. Successful execution of the Standards Operating Model is highly dependent on strong local leadership, intelligent risk taking, entrepreneurial drive and corporate support aligned with the key drivers of a successful operation organized around three primary areas - market share, people and operating financial metrics.

Incentives Aligned with Standards – We believe empowering Managing Partners to do the right things in their operations and local communities, and providing appropriate support with operating and financial practices, will enable long-term growth and sustainable profitability. Each Managing Partner participates in a variable bonus plan whereby he or she earns a percentage of his or her respective business' earnings based upon the actual standards achieved as long as the performance exceeds our minimum standards.

The Right Local Leadership – Successful execution of our operating model is highly dependent on strong local leadership as defined by our 4E Leadership Model, intelligent risk taking and entrepreneurial empowerment. A Managing Partner's performance is judged according to achievement of the Standards for that business.

Funeral and Cemetery Operations

Factors affecting our funeral operating results include: demographic trends relating to population growth and average age, which impact death rates and number of deaths; establishing and maintaining leading market share positions supported by strong local heritage and relationships; effectively responding to increasing cremation trends by selling complementary services and merchandise; controlling salary and merchandise costs; and exercising pricing leverage related to our at-need business to increase average revenue per contract. In simple terms, volume and price are the two variables that affect funeral revenues. The average revenue per contract is influenced by the mix of traditional burial and cremation services because our average cremation service revenue is approximately one-third of the average

revenue earned from a traditional burial service. Funeral homes have a relatively fixed cost structure. Thus, small changes in revenues, up or down, normally cause significant changes to our profitability. Our funeral volumes have increased from 24,510 in 2008 to 28,356 in 2012 (compounded annual increase of 3.7%). Our funeral operating revenue has increased from \$124.1 million in 2008 to \$146.4 million in 2012 (compounded annual increase of 4.2%). The increases are primarily because of businesses we acquired in the last five years and our ability to increase the average revenue per funeral through expanded service offerings and packages. We experienced an increase of 13.3% in

- 31 -

Table of Contents

volumes and 13.2% in funeral operating revenues in the first three months of 2013 compared to the first three months of 2012, primarily as a result of the acquisitions completed during the trailing twelve months.

The percentage of funeral services involving cremations has increased from 38.2% for the year ended 2008 to 46.0% for the year ended 2012, and was 46.4% for the first three months of 2013. On a same store basis, the cremation rate has risen to 45.6% for the first three months of 2013, up from 44.5% for the year ended December 31, 2012, and 44.5% for the comparable three month period in 2012.

Cemetery operating results are affected by the size and success of our sales organization. Approximately 47% of our cemetery revenues for the year ended December 31, 2012 related to preneed sales of interment rights and the delivery of related merchandise and services. For the three months ended March 31, 2013, those preneed sales were approximately 46.2% of cemetery revenues. We believe that changes in the level of consumer confidence (a measure of whether consumers will spend for discretionary items) also affect the amount of cemetery revenues. Currently, approximately 20% of our cemetery revenues are attributable to investment earnings on trust funds and finance charges on preneed installment contracts. Changes in the capital markets and interest rates affect this component of our cemetery revenues.

Our cemetery financial performance from 2008 through 2012 was characterized by fluctuating operating revenues yet increasing field level profit margins. Cemetery operating revenue increased from \$38.0 million in 2008 to \$40.1 million in 2012. Our goal is to build stronger teams of sales leaders and counselors in our larger and more strategically located cemeteries in order to focus on growth of our preneed property sales. Additionally, a portion of our capital expenditures in 2013 is designated to expand our cemetery product offerings.

Financial Revenue

We market funeral and cemetery services and products on a preneed basis. Preneed funeral or cemetery contracts enable families to establish, in advance, the type of service to be performed, the products to be used and the cost of such products and services. Preneed contracts permit families to eliminate issues of making death care plans at the time of need and allow input from other family members before the death occurs. We guarantee the price and performance of the preneed contracts to the customer.

Preneed funeral contracts are usually paid on an installment basis. The performance of preneed funeral contracts is usually secured by placing the funds collected in trust for the benefit of the customer or by the purchase of a life insurance policy, the proceeds of which will pay for such services at the time of need. Insurance policies, intended to fund preneed funeral contracts, cover the original contract price and generally include an element of growth (earnings) designed to offset future inflationary cost increases. Revenue from preneed funeral contracts, along with accumulated earnings, is not recognized until the time the funeral service is performed. The accumulated earnings from the trust investments and insurance policies are intended to offset the inflation in funeral prices. Additionally, we generally earn a commission from the insurance company from the sale of insurance-funded policies reflected as Preneed Insurance Commission. The commission income is recognized as revenue when the period of refund expires (generally one year), which helps us defray the costs we incur to originate the preneed contract (primarily commissions we pay to our sales counselors).

Preneed sales of cemetery interment rights are usually financed through interest-bearing installment sales contracts, generally with terms of up to five years with such earnings reflected as Preneed Cemetery Finance Charges. In substantially all cases, we receive an initial down payment at the time the contract is signed. Occasionally, we offer zero percent interest financing to promote sales as limited-time offers. In most states, regulations require a portion (generally 10%) of the sale amount of cemetery property and memorials to be placed in a perpetual care trust.

We have established a variety of trusts in connection with funeral home and cemetery operations as required under applicable state laws. Such trusts include (i) preneed funeral trusts; (ii) preneed cemetery merchandise and service trusts; and (iii) perpetual care trusts. These trusts are typically administered by independent financial institutions selected by us. Investment management and advisory services are provided either by our wholly-owned registered investment advisor (CSV RIA) or independent financial advisors. As of March 31, 2013, CSV RIA provides these services to one institution, which has custody of 68% of our trust assets, for a fee based on the market value of trust assets. Under state trust laws, we are allowed to charge the trust a fee for advising on the investment of the trust assets and these fees are recognized as income as the advisory services are provided. The investment advisors establish an

investment policy that gives guidance on asset allocation, investment requirements, investment manager selection and performance monitoring. The investment objectives are toward generating long-term investment returns without assuming undue risk, while ensuring the management of assets is in compliance with applicable laws.

Preneed funeral trust fund income earned along with the receipt and recognition of any insurance benefits are deferred until the service is performed. Applicable state laws generally require us to deposit a specified amount (which varies from state

- 32 -

Table of Contents

to state, generally 50% to 100% of selling price) into a merchandise and service trust fund for preneed cemetery merchandise and service sales. The related trust fund income earned is recognized when the related merchandise and services are delivered. In most states, regulations require a portion (generally 10%) of the sale amount of cemetery property and memorials to be placed in a perpetual care trust. The income from perpetual care trusts provides a portion of the funds necessary to maintain cemetery property and memorials in perpetuity. Perpetual care trust fund income is recognized as earned in Cemetery revenues.

Acquisitions

Our growth strategy includes the execution of our Strategic Acquisition Model. We use six strategic ranking criteria to assess acquisition candidates and to differentiate the price we are willing to pay under a discounted cash flow methodology. Those criteria are:

- Size of business;
- Size of market;
- Competitive standing;
- Local market demographics;
- Strength of brand;
- and

Barriers to entry.

In general terms, should a target business be acceptable per the criteria above, we will then determine the value of the target using a discounted cash flow methodology. During 2012, we acquired seven funeral home businesses and one cemetery business. The consideration paid for the 2012 acquisitions was \$42.7 million. We did not acquire any businesses during the first three months of 2013.

Financial Highlights

Net income from continuing operations for the three months ended March 31, 2013 totaled \$5.6 million, equal to \$0.27 per diluted share, compared to net income for the three months ended March 31, 2012, which totaled \$4.1 million, equal to \$0.22 per diluted share. Total revenue for the three months ended March 31, 2013 was \$58.1 million, an increase of 13.2%, compared to \$51.3 million for the comparable period in 2012. Our funeral segment experienced increases in revenue and gross profit primarily as a result of our acquisitions and increased number of contracts from our existing locations. The cemetery segment experienced increases in revenue during the three month period ended March 31, 2013 due to higher preneed property sales, increased volume of atneed contracts and higher trust fund earnings. Gross profit in these segments was higher for the three months ended March 31, 2013 primarily as a result of higher revenue. We experienced increases in general and administrative expenses due to increases in incentive compensation and increases in salaries and benefits for additional support staff at the corporate office. We are providing below a reconciliation of net income from continuing operations (a GAAP measure) to Non-GAAP net income (a non-GAAP measure). Non-GAAP net income is defined as net income from continuing operations, then adjusted for special items, including Withdrawable trust income, acquisition expenses and the other items in the table below. Non-GAAP net income is used as a supplemental financial measurement by management and investors to compare our current financial performance with our previous results and with the performance of other deathcare companies. The adjustment of special items in Non-GAAP income allows management to focus on the evaluation of operating performance as it primarily relates to our operating expenses. We do not intend for this information to be considered in isolation or as a substitute for other measures of performance prepared in accordance with GAAP. In certain states, we are allowed to withdraw realized trust earnings prior to delivery from cemetery merchandise and services trusts, which management describes as “Withdrawable trust income.” The Withdrawable trust income totaled \$0.7 million for the three month period ended March 31, 2012, and \$0.5 million for the three month period ended March 31, 2013. The year over year decline was attributable to substantial gains realized in the trust funds throughout 2012 that were not repeated in 2013. While the Withdrawable trust income is not recognized as revenue in our Consolidated Statements of Operations, it increases cash flow from operations. The Withdrawable trust income is treated as a special item in our Non-GAAP net income calculation.

Table of Contents

(In millions)	Three Months Ended March 31,	
	2012	2013
Net income from continuing operations, as reported	\$4.1	\$5.6
After-tax special items:		
Withdrawable trust income	0.5	0.3
Acquisition expenses	0.2	—
Severance costs	0.3	0.1
Other special items	0.1	0.1
Non-GAAP net income	\$5.2	\$6.1

OVERVIEW OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of the Consolidated Financial Statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an ongoing basis, we evaluate estimates and judgments, including those related to revenue recognition, realization of accounts receivable, inventories, goodwill, other intangible assets, property and equipment, and deferred tax assets. We base our estimates on historical experience, third party data, and assumptions that we believe to be reasonable under the circumstances. The results of these considerations form the basis for making judgments about the amount and timing of revenues and expenses, the carrying value of assets, and the recorded amounts of liabilities. Actual results may differ from these estimates and such estimates may change if the underlying conditions or assumptions change. Historical performance should not be viewed as indicative of future performance, because there can be no assurance that our results of operations will be consistent from year to year.

Management's discussion and analysis of financial condition and results of operations ("MD&A") is based upon our Consolidated Financial Statements presented herewith, which have been prepared in accordance with accounting principles generally accepted in the United States. Our significant accounting policies are more fully described in Note 1 to our Consolidated Financial Statements included in this Form 10-Q. Our critical accounting policies are those that are both important to the portrayal of our financial condition and results of operations and require management's most difficult, subjective, and complex judgment. These critical accounting policies are discussed in MD&A in our Annual Report on Form 10-K for the year ended December 31, 2012. There have been no significant changes to our critical accounting policies since the filing of our Annual Report on Form 10-K for the year ended December 31, 2012.

RESULTS OF OPERATIONS

The following is a discussion of our results of continuing operations for the three month periods ended March 31, 2012 and 2013. The term "same store" or "existing operations" refers to funeral homes and cemeteries acquired prior to January 1, 2008 and owned and operated for the entirety of each period being presented. Funeral homes and cemeteries purchased after December 31, 2007 are referred to as "acquired." This classification of acquisitions has been important to management and investors in monitoring the results of these businesses and to gauge the leveraging performance contribution that a selective acquisition program can have on total company performance. Depreciation and amortization and regional and unallocated funeral and cemetery costs are not included in operating profit.

Table of Contents

Funeral Home Segment. The following tables set forth certain information regarding the revenues and operating profit from the funeral home operations for the three months ended March 31, 2012 compared to the three months ended March 31, 2013.

Three months ended March 31, 2012 compared to three months ended March 31, 2013 (dollars in thousands):

	Three Months Ended		Change		
	March 31, 2012	2013	Amount	%	
Revenues:					
Same store operating revenue	\$31,517	\$33,172	\$1,655	5.3	%
Acquired operating revenue	6,394	9,754	3,360	52.5	%
Preneed funeral insurance commissions	451	508	57	12.6	%
Preneed funeral trust earnings	1,673	1,723	50	3.0	%
Total	\$40,035	\$45,157	\$5,122	12.8	%
Operating profit:					
Same store operating profit	\$12,833	\$13,552	\$719	5.6	%
Acquired operating profit	2,470	3,365	895	36.2	%
Preneed funeral insurance commissions	100	110	10	10.0	%
Preneed funeral trust earnings	1,673	1,709	36	2.2	%
Total	\$17,076	\$18,736	\$1,660	9.7	%

Funeral home same store operating revenues for the three months ended March 31, 2013 increased \$1.7 million, or 5.3%, when compared to the three months ended March 31, 2012, as we experienced a 7.0% increase in the number of contracts, while the average revenue per contract decreased 2.1%, or \$119 per contract, to \$5,472 for those existing operations. The average revenue per contract includes the impact of the funeral trust fund earnings recognized at the time that we provide the services pursuant to the preneed contract. Excluding funeral trust earnings, the average revenue per contract decreased 1.6% to \$5,239. The number of traditional burial contracts increased 5.4% while the average revenue per burial contract decreased 1.3% to \$8,280. The cremation rate for the same store businesses increased from 44.5% to 45.6%. The average revenue per same store cremation contract decreased 2.7% to \$3,048 and the number of cremation contracts increased 9.4%. Cremations with services declined from 37.1% of total cremation contracts in the first quarter of 2012 to 33.4% in the first quarter of 2013. The average revenue for “other” contracts, which are charges for merchandise or services for which we do not perform a funeral service and which make up approximately 6.9% of the total number of contracts, increased 3.6% to \$2,137.

Same store operating profit for the three months ended March 31, 2013 increased \$0.7 million, or 5.6%, from the comparable three months of 2012, and as a percentage of funeral same store operating revenue, increased to 40.9% from 40.7%. The increase in profit is primarily the result of the increase in revenue per the discussion above.

Funeral home acquired revenues for the three months ended March 31, 2013 increased \$3.4 million, or 52.5%, when compared to the three months ended March 31, 2012, as we experienced a 39.7% increase in the number of contracts, and an increase of 9.4%, to \$5,021, in the average revenue per contract for those acquired operations. Excluding funeral trust earnings, the average revenue per contract increased 9.2% to \$4,938. The cremation rate for the acquired businesses was 49.1% for the first quarter of 2013, down 440 basis points from the prior-year period. The average revenue per cremation contract decreased 1.2% to \$3,056 for the first quarter of 2013 and the number of cremation contracts increased 28.3% compared to the same period of 2012. The reason for the large increase in the average revenue per contract for acquired operations and the significant decline in the cremation rate is because the businesses acquired during 2012 serve primarily traditional burial families.

Acquired operating profit for the three months ended March 31, 2013 increased \$0.9 million from the comparable three months of 2012 and, as a percentage of revenue from acquired businesses, was 34.5% for the first quarter of 2013 compared to 38.6% for the first quarter of 2012. As these acquired businesses transition into our Standards Operating Model, we expect to see operating profit margins rise toward those on a same store basis.

The two categories of financial revenue (insurance commissions and trust earnings on matured preneed contracts) on a combined basis increased 5.0% in revenue and 2.6% in operating profit, compared to the three months ended March 31, 2012 as a result of slightly higher earnings on trust contracts. Trust earnings also include trust management fees charged by our wholly-owned registered investment advisor based on the fair market value of the trust assets.

- 35 -

Table of Contents

Cemetery Segment. The following tables set forth certain information regarding the revenues and operating profit from the cemetery operations for the three months ended March 31, 2012 compared to the three months ended March 31, 2013.

Three months ended March 31, 2012 compared to three months ended March 31, 2013 (dollars in thousands):

	Three Months Ended		Change		
	March 31, 2012	2013	Amount	%	
Revenues:					
Same store operating revenue	\$9,403	\$10,140	\$737	7.8	%
Acquired operating revenue	—	69	69	—	
Cemetery trust earnings	1,516	2,403	887	58.5	%
Preneed cemetery finance charges	369	318	(51)	(13.8)	%
Total	\$11,288	\$12,930	\$1,642	14.5	%
Operating profit:					
Same store operating profit	\$2,222	\$3,055	\$833	37.5	%
Acquired operating loss	—	(26)	(26)	—	
Cemetery trust earnings	1,516	2,355	839	55.3	%
Preneed cemetery finance charges	368	318	(50)	(13.6)	%
Total	\$4,106	\$5,702	\$1,596	38.9	%

Cemetery same store operating revenues for the three months ended March 31, 2013 increased \$0.7 million, or 7.8%, compared to the three months ended March 31, 2012. The increase in operating revenue was primarily attributable to preneed property sales which increased \$0.4 million, or 8.7%. We experienced a 4.2% decrease in the number of interment rights (property) sold, yet a 12.3% increase in the average price per interment compared to the first quarter of 2012. The percentage of those interment rights sold that we were able to recognize as revenue, because we received at least 10% of the sales price from the customer, decreased from 92.6% to 91.8%. Same store at-need revenue increased \$0.5 million, or 12.4%, as at-need contracts increased 5.6% while revenue from deliveries of preneed merchandise and services remained flat.

Cemetery same store operating profit for the three months ended March 31, 2013 increased \$0.8 million, or 37.5%. As a percentage of revenues, cemetery same store operating profit increased from 23.6% to 30.1%. The increase in operating profit is primarily a result of the increase in revenue and lower promotional expenses and bad debt.

We acquired one cemetery in the second quarter of 2012 which primarily operates as an at-need business. This is the only business in this category.

The two categories of financial revenue consist of trust earnings and finance charges on preneed receivables. Total trust earnings for the three months ended March 31, 2013 increased 58.5%, when compared to the three months ended March 31, 2012. Earnings from perpetual care trust funds totaled \$1.7 million for the three months ended March 31, 2013 compared to \$1.1 million for the three months ended March 31, 2012, an increase of \$0.6 million, or 49.8%.

Trust earnings recognized upon the delivery of merchandise and service contracts increased 25.4% from the same period in 2012. Trust earnings also include trust management fees charged by the company's wholly-owned registered investment advisor based on the fair ma
