AMERICAN RIVER BANKSHARES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2007

1. CONSOLIDATED FINANCIAL STATEMENTS

In the opinion of management, the unaudited consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the consolidated financial position of American River Bankshares (the "Company") at March 31, 2007 and December 31, 2006, and the results of its operations and its cash flows for the three-month periods ended March 31, 2007 and 2006 in conformity with accounting principles generally accepted in the United States of America.

Certain disclosures normally presented in the notes to the annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted. The Company believes that the disclosures are adequate to make the information not misleading. These interim

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2006 annual report on Form 10-K. The results of operations for the three-month period ended March 31, 2007 may not necessarily be indicative of the operating results for the full year.

In preparing such financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant changes in the near term relate to the determination of the allowance for loan and lease losses, the provision for taxes and the estimated fair value of investment securities.

2. STOCK-BASED COMPENSATION

Stock Option Plans

In 2000 and 1995, the Board of Directors adopted stock option plans under which options may be granted to employees and directors under incentive and nonstatutory agreements. The plans require that the option price may not be less than the fair market value of the stock at the date the option is granted. The options under the plans expire on dates determined by the Board of Directors, but not later than ten years from the date of grant. The vesting period is generally five years; however the vesting period can be modified at the discretion of the Company's Board of Directors. Outstanding options under the plans are exercisable until their expiration. New shares are issued upon exercise.

Stock Option Compensation

The weighted average grant date fair value of options granted for the three month periods ended March 31, 2007 and 2006 was \$6.37 and \$8.34, respectively. For the three-month periods ended March 31, 2007 and 2006, the compensation cost recognized for stock option compensation was \$62,000 and 37,000, respectively. The recognized tax benefit for stock option compensation expense was \$11,000 and \$7,000, for the three-month periods ended March 31, 2007 and 2006, respectively. At March 31, 2007, the total compensation cost related to nonvested awards not yet recorded is expected to be \$1,133,000. This amount will be recognized over the next five years and the weighted average period of recognizing these costs is expected to be 2.5 years.

8

Stock Option Activity

A summary of option activity under the stock option plans as of March 31, 2007 and changes during the period then ended is presented below:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (\$000)
	-----	-----	-----	-----
Outstanding at January 1, 2007	326,282	\$ 16.32	6.2 years	\$ 2,504
Granted	62,576	\$ 25.80	10.0 years	(110)
Exercised	(22,087)	\$ 6.38	--	--

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

Cancelled	--	--	--	--

Outstanding at March 31, 2007	366,771	\$	18.54	7.0 years
	=====			
Exercisable at March 31, 2007	160,200	\$	12.89	4.8 years
	=====			
				\$ 2,022
				\$ 1,787

The intrinsic value was derived from the market price of the Company's common stock of \$24.05 as of March 31, 2007.

3. COMMITMENTS AND CONTINGENCIES

In the normal course of business there are outstanding various commitments to extend credit which are not reflected in the financial statements, including loan commitments of approximately \$121,624,000 and standby letters of credit of approximately \$6,521,000 at March 31, 2007. Such loans relate primarily to real estate construction loans and revolving lines of credit and other commercial loans. However, all such commitments will not necessarily culminate in actual extensions of credit by the Company during 2007 as some of these are expected to expire without being fully drawn upon.

Standby letters of credit are conditional commitments issued to guarantee the performance or financial obligation of a client to a third party. These guarantees are issued primarily relating to purchases of inventory or as security for real estate rents by commercial clients and are typically short-term in nature. Credit risk is similar to that involved in extending loan commitments to clients and accordingly, evaluation and collateral requirements similar to those for loan commitments are used. The majority of all such commitments are collateralized. The fair value of the liability related to these standby letters of credit, which represents the fees received for issuing the guarantees was not significant at March 31, 2007 or March 31, 2006.

4. EARNINGS PER SHARE COMPUTATION

Basic earnings per share is computed by dividing net income by the weighted average common shares outstanding for the period (5,564,723 shares for the three-month period ended March 31, 2007, and 5,893,821 shares for the three-month period ended March 31, 2006). Diluted earnings per share reflect the potential dilution that could occur if outstanding stock options were exercised. Diluted earnings per share is computed by dividing net income by the weighted average common shares outstanding for the period plus the dilutive effect of options (79,333 shares for the three-month period ended March 31, 2007 and 119,187 for the three-month period ended March 31, 2006). Earnings per share is retroactively adjusted for stock splits and stock dividends for all periods presented.

9

5. COMPREHENSIVE INCOME

Comprehensive income is reported in addition to net income for all periods presented. Comprehensive income is comprised of net income plus other comprehensive income (loss). Other comprehensive income (loss), net of taxes, was comprised of the unrealized gains (losses) on available-for-sale investment securities of \$197,000 for the three-month period ended March 31, 2007 and \$(432,000) for the three-month period ended March 31, 2006. Comprehensive income was \$2,283,000 for the three-month period ended March 31, 2007 and \$1,811,000 for the three-month period ended March 31, 2006. Reclassification adjustments resulting from gain or loss on sale of investment securities were not significant for all periods presented.

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

6. BORROWING ARRANGEMENTS

The Company has a total of \$53,000,000 in unsecured short-term borrowing arrangements with four of its correspondent banks. There were no advances under the borrowing arrangements as of March 31, 2007 or December 31, 2006.

In addition, the Company has a line of credit available with the Federal Home Loan Bank (the "FHLB") which is secured by pledged mortgage loans and investment securities. Borrowings may include overnight advances as well as loans with terms of up to thirty years. Advances (both short and long-term) totaling \$22,583,000 were outstanding from the FHLB at March 31, 2007, bearing interest rates ranging from 2.66% to 6.13% and maturing between April 2, 2007 and April 7, 2008. Advances totaling \$42,270,000 were outstanding from the FHLB at December 31, 2006, bearing interest rates ranging from 2.66% to 6.13% and maturing between January 3, 2007 and April 7, 2008. Remaining amounts available under the borrowing arrangement with the FHLB at March 31, 2007 and December 31, 2006 totaled \$115,400,000 and \$87,091,000, respectively.

7. INVESTMENT SECURITIES

Management periodically evaluates each investment security in a loss position for other than temporary impairment relying primarily on industry analyst reports, observation of market conditions and interest rate fluctuations. Management has the ability and intent to hold securities with established maturity dates until recovery of fair value, which may be maturity, and believes it will be able to collect all amounts due according to the contractual terms for all of the underlying investment securities; therefore, management does not consider these investments to be other-than-temporarily-impaired.

8. INCOME TAXES

In July 2006, the FASB issued Financial Accounting Standards Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes--an Interpretation of FASB statement No. 109. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 also prescribes a recognition threshold and measurement standard for the financial statement recognition and measurement of an income tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions. The Company has adopted FIN 48 as of January 1, 2007.

The Company previously recognized income tax positions based on management's estimate of whether it is reasonably possible that a liability has been incurred for unrecognized income tax benefits by applying FASB Statement No. 5, Accounting for Contingencies.

The provisions of FIN 48 have been applied to all tax positions of the Company as of January 1, 2007. There was no cumulative effect of applying the provisions of FIN 48 and there was no significant effect on the Company's provision for income taxes for the three months ended March 31, 2007. The Company recognizes interest accrued related to unrecognized tax benefits and accruals for penalties in income tax expense.

10

9. ACCOUNTING PRONOUNCEMENTS

Fair Value Option for Financial Assets and Financial Liabilities

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities -- Including an Amendment of FASB Statement No. 115 ("FAS 159"). This standard permits entities to choose to measure many financial assets and liabilities and certain other items at fair value. An enterprise will report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The fair value option may be applied on an instrument-by-instrument basis, with several exceptions, such as those investments accounted for by the equity method, and once elected, the option is irrevocable unless a new election date occurs. The fair value option can be applied only to entire instruments and not to portions thereof. FAS 159 is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007, with early adoption permissible, subject to certain criteria. Management did not elect to early adopt SFAS 159. Management does not anticipate that this statement will have a significant impact on the Company's financial position, results of operations or cash flows.

Accounting for Deferred Compensation and Postretirement Benefit Aspects of Collateral Assignment Split-Dollar Life Insurance Arrangements

In March 2007, the Emerging Issues Task Force (EITF) reached a final consensus on Issue No. 06-10 (EITF 06-10), Accounting for Deferred Compensation and Postretirement Benefit Aspects of Collateral Assignment Split-Dollar Life Insurance Arrangements. EITF 06-10 requires employers to recognize a liability for the post-retirement benefit related to collateral assignment split-dollar life insurance arrangements in accordance with SFAS No. 106 or APB Opinion No. 12. EITF 06-10 also requires employers to recognize and measure an asset based on the nature and substance of the collateral assignment split-dollar life insurance arrangement. The provisions of EITF 06-10 are effective for the Company on January 1, 2008, with earlier application permitted, and are to be applied as a change in accounting principle either through a cumulative-effect adjustment to retained earnings or other components of equity or net assets in the statement of financial position as of the beginning of the year of adoption; or as a change in accounting principle through retrospective application to all prior periods. The Company does not expect adoption of EITF 06-10 to have a significant impact on its consolidated financial statements, results of operations or liquidity.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following is management's discussion and analysis of the significant changes in American River Bankshares' (the "Company") balance sheet accounts between December 31, 2006 and March 31, 2007 and its income and expense accounts for the three-month periods ended March 31, 2007 and 2006. The discussion is designed to provide a better understanding of significant trends related to the Company's financial condition, results of operations, liquidity, capital resources and interest rate sensitivity. This discussion and supporting tables and the consolidated financial statements and related notes appearing elsewhere in this report are unaudited.

Certain matters discussed or incorporated by reference in this Quarterly Report on Form 10-Q including, but not limited to, matters described in "Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations," are "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. Such forward-looking statements may contain words related to future projections including, but not limited to, words such as "believe," "expect," "anticipate," "intend," "may," "will," "should," "could," "would," and variations of those words and similar words that are

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

subject to risks, uncertainties and other factors that could cause actual results to differ significantly from those projected. Factors that could cause or contribute to such differences include, but are not limited to, the following: (1) variances in the actual versus projected growth in assets; (2) return on assets; (3) loan and lease losses; (4) expenses; (5) changes in the interest rate environment including interest rates charged on loans, earned on securities investments and paid on deposits; (6) competition effects; (7) fee and other noninterest income earned; (8) general

11

economic conditions nationally, regionally, and in the operating market areas of the Company and its subsidiaries; (9) changes in the regulatory environment; (10) changes in business conditions and inflation; (11) changes in securities markets; (12) data processing problems; (13) a decline in real estate values in the Company's operating market areas; (14) the effects of terrorism, the threat of terrorism or the impact of the current military conflict in Iraq and the conduct of the war on terrorism by the United States and its allies, as well as other factors. These factors and other cautionary statements and information set forth in this report should be carefully considered and understood as being applicable to all related forward-looking statements contained in this report, when evaluating the business prospects of the Company and its subsidiaries.

Forward-looking statements are not guarantees of performance. By their nature, they involve risks, uncertainties and assumptions. The future results and shareholder values may differ significantly from those expressed in these forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statement. Any such statement speaks only as of the date of this report, and in the case of any documents that may be incorporated by reference, as of the date of those documents. We do not undertake any obligation to update or release any revisions to any forward-looking statements, to report any new information, future event or other circumstances after the date of this report or to reflect the occurrence of unanticipated events, except as required by law. To gain a more complete understanding of the uncertainties and risks involved in the Company's business, this report should be read in conjunction with the Company's annual report on Form 10-K for the year ended December 31, 2006 and its 2007 reports filed on Form 8-K.

Interest income and net interest income are presented on a fully taxable equivalent basis (FTE) within management's discussion and analysis.

Critical Accounting Policies

General

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The financial information contained within our statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. We use historical loss data and the economic environment as factors, among others, in determining the inherent loss that may be present in our loan and lease portfolio. Actual losses could differ significantly from the factors that we use. Other estimates that we use are related to the expected useful lives of our depreciable assets. In addition, GAAP itself may change from one previously acceptable method to another method. Although the economics of our transactions would be the same, the timing of events that would impact our transactions could change.

Allowance for Loan and Lease Losses

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

The allowance for loan and lease losses is an estimate of the credit loss risk in our loan and lease portfolio. The allowance is based on two basic principles of accounting: (1) Statement of Financial Accounting Standards ("SFAS") No. 5 "Accounting for Contingencies," which requires that losses be accrued when it is probable that a loss has occurred at the balance sheet date and such loss can be reasonably estimated; and (2) SFAS No. 114, "Accounting by Creditors for Impairment of a Loan," which requires that losses be accrued on impaired loans based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan balance.

The allowance for loan and lease losses is determined based upon estimates that can and do change when the actual risk, loss events, or changes in other factors, occur. The analysis of the allowance uses an historical loss view as an indicator of future losses and as a result could differ from the loss incurred in the future. However, since our analysis of risk and loss potential is updated regularly, the errors that might otherwise occur are mitigated. If the allowance for loan and lease losses falls below that deemed adequate (by reason of loan and lease growth, actual losses, the effect of changes in risk factors, or some combination of these), the Company has a strategy for supplementing the allowance for loan and lease losses, over the short-term. For further information regarding our allowance for loan and lease losses, see "Allowance for Loan and Lease Losses Activity" discussion later in this Item 2.

12

Stock-Based Compensation

The Company accounts for its stock-based compensation under the recognition and measurement principles of Financial Accounting Standards Board Statement Number 123 (revised 2004) ("FAS 123 (R)"), Share-Based Payments. FAS 123 (R) requires all entities to recognize compensation expense in an amount equal to the fair value of share-based payments such as stock options granted to employees. The Company adopted FAS 123 (R) on a modified prospective method, beginning on January 1, 2006. Under this method, the Company is required to record compensation expense (as previous awards continue to vest) for the unvested portion of previously granted awards that remain outstanding at the date of adoption. The fair value of each option is estimated on the date of grant and amortized over the service period using an option pricing model. Critical assumptions that affect the estimated fair value of each option include expected stock price volatility, dividend yields, option life and the risk-free interest rate.

Goodwill

Business combinations involving the Company's acquisition of the equity interests or net assets of another enterprise or the assumption of net liabilities in an acquisition of branches constituting a business may give rise to goodwill. Goodwill represents the excess of the cost of an acquired entity over the net of the amounts assigned to assets acquired and liabilities assumed in transactions accounted for under the purchase method of accounting. The value of goodwill is ultimately derived from the Company's ability to generate net earnings after the acquisition. A decline in net earnings could be indicative of a decline in the fair value of goodwill and result in impairment. For that reason, goodwill is assessed for impairment at a reporting unit level at least annually following the year of acquisition. The Company performed an evaluation of the goodwill, recorded as a result of the Bank of Amador acquisition, during the fourth quarter of 2006 and determined that there was no impairment. While the Company believes all assumptions utilized in its assessment of goodwill for impairment are reasonable and appropriate, changes in earnings, the effective tax rate, historical earnings multiples and the cost of capital could all cause

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

different results for the calculation of the present value of future cash flows.

General Development of Business

The Company is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was incorporated under the laws of the State of California in 1995. As a bank holding company, the Company is authorized to engage in the activities permitted under the Bank Holding Company Act of 1956, as amended, and regulations thereunder. Its principal office is located at 3100 Zinfandel Drive, Suite 450, Rancho Cordova, California 95670 and its telephone number is (916) 854-0123. The Company employed an equivalent of 130 full-time employees as of March 31, 2007.

The Company owns 100% of the issued and outstanding common shares of its banking subsidiary, American River Bank, and American River Financial, a California corporation which has been inactive since its incorporation in 2003.

American River Bank was incorporated and commenced business in Fair Oaks, California, in 1983 and thereafter moved its headquarters to Sacramento, California in 1985. American River Bank operates: (1) five full service offices and one convenience office in Sacramento and Placer Counties including the head office located at 1545 River Park Drive, Suite 107, Sacramento, and branch offices located at 520 Capitol Mall, Suite 100, Sacramento, 9750 Business Park Drive, Sacramento, 10123 Fair Oaks Boulevard, Fair Oaks and 2240 Douglas Boulevard, Roseville, and the convenience office (limited service office) located at 3100 Zinfandel Drive, Suite 450, Rancho Cordova, and (2) three full service offices in Sonoma County located at 412 Center Street, Healdsburg, 8733 Lakewood Drive, Windsor, and 50 Santa Rosa Avenue, Suite 100, Santa Rosa, operated under the name "North Coast Bank, a division of American River Bank." North Coast Bank was incorporated and commenced business in 1990 as Windsor Oaks National Bank in Windsor, California. In 1997, the name was changed to North Coast Bank. In 2000, North Coast Bank was acquired by the Company as a separate bank subsidiary. Effective December 31, 2003, North Coast Bank was merged with and into American River Bank.

On December 3, 2004, the Company acquired Bank of Amador located in Jackson, California. Bank of Amador was merged with and into American River Bank and now operates three full service banking offices as "Bank of Amador, a division of American River Bank" within its primary service area of Amador County, in the cities of Jackson, Pioneer and Ione.

13

American River Bank's deposits are insured by the Federal Deposit Insurance Corporation up to applicable legal limits. American River Bank does not offer trust services or international banking services and does not plan to do so in the near future. American River Bank's primary business is serving the commercial banking needs of small to mid-sized businesses within those counties listed above. American River Bank accepts checking and savings deposits, offers money market deposit accounts and certificates of deposit, makes secured and unsecured commercial, secured real estate, and other installment and revolving credit and offers other customary banking services. American River Bank also conducts lease financing for most types of business equipment, from computer software to heavy earth-moving equipment. American River Bank owns 100% of two inactive companies, ARBCO and American River Mortgage. ARBCO was formed in 1984 to conduct real estate development and has been inactive since 1995. American River Mortgage has been inactive since its formation in 1994.

During 2007, the Company conducted no significant activities other than holding the shares of its subsidiaries. However, it is authorized, with the prior approval of the Board of Governors of the Federal Reserve System (the

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

"Board of Governors"), the Company's principal regulator, to engage in a variety of activities which are deemed closely related to the business of banking. The common stock of the Company is registered under the Securities Exchange Act of 1934, as amended, and is listed and traded on the Nasdaq Global Select Market under the symbol "AMRB."

Overview

The Company recorded net income of \$2,086,000 for the quarter ended March 31, 2007, which was \$157,000 (7.0%) below the \$2,243,000 reported for the same period of 2006. Diluted earnings per share for the first quarters of 2007 and 2006 remained the same at \$0.37. The return on average equity (ROAE) and the return on average assets (ROAA) for the first quarter of 2007 were 14.02% and 1.44%, respectively, as compared to 14.41% and 1.49%, respectively, for the same period in 2006.

Total assets of the Company decreased by \$29,354,000 (4.9%) from \$604,003,000 at December 31, 2006 to \$574,649,000 at March 31, 2007. Net loans totaled \$379,646,000 at March 31, 2007, down \$3,347,000 (0.9%) from the \$382,993,000 at December 31, 2006. Deposit balances at March 31, 2007 totaled \$485,744,000, down \$8,131,000 (1.6%) from \$493,875,000 at December 31, 2006.

The Company ended the first quarter of 2007 with a Tier 1 capital ratio of 9.9% and a total risk-based capital ratio of 11.2% versus 10.3% and 11.6%, respectively, at December 31, 2006.

Table One below provides a summary of the components of net income for the periods indicated (See the "Results of Operations" section that follows for an explanation of the fluctuations in the individual components):

Table One: Components of Net Income

(Dollars in thousands)	For the three months ended March 31	
	2007	2006
Net interest income*	\$ 6,636	\$ 6,875

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

Net Interest Income and Net Interest Margin

Net interest income represents the excess of interest and fees earned on interest earning assets (loans and leases, securities, Federal funds sold and investments in time deposits) over the interest paid on interest-bearing deposits and borrowed funds. Net interest margin is net interest income expressed as a percentage of average earning assets. The Company's net interest margin was 5.04% for the three months ended March 31, 2007 and 5.12% for the three months ended March 31, 2006.

The fully taxable equivalent interest income component for the first quarter of 2007 increased \$353,000 (3.8%) to \$9,553,000 compared to \$9,200,000 for the three months ended March 31, 2006. The increase in the fully taxable equivalent interest income for the first quarter of 2007 compared to the same period in 2006 is broken down by rate (up \$310,000) and volume (up \$43,000). The rate increase can be attributed to increases implemented by the Company during 2004, 2005 and 2006 and continuing through the first quarter of 2007 in response to the Federal Reserve Board (the "FRB") increases in the Federal funds and Discount rates. Increases by the FRB have resulted in seventeen 25 basis point increases since June 2004. The overall increasing interest rate environment since June 2004 has resulted in a 41 basis point increase in the yield on average earning assets from 6.85% for the first quarter of 2006 to 7.26% for the first quarter of 2007. The volume increase was the result of the change in mix of earning assets from lower yielding investment securities to higher earning loans and leases. Average loan balances were up \$16,841,000 (4.5%) in 2007 over the balances in 2006, while average investment securities balances were down \$28,440,000 (16.8%). The increase in average loans is the result of the Company's concentrated focus on business lending, the demand for commercial real estate and the effects of a favorable local market.

Interest expense was \$592,000 (25.5%) higher in the first quarter of 2007 versus the same period in the prior year. The average balances on interest bearing liabilities were \$11,556,000 (3.0%) lower in the first quarter of 2007 versus the same quarter in 2006. The lower balances in interest bearing balances accounted for a \$101,000 decrease in interest expense. Average borrowings were down \$13,461,000 (26.5%) as the Company focused on reducing the higher cost borrowings; the decrease in other borrowings accounting for \$141,000 in reduced interest costs compared to the first quarter of 2007. Increased rates accounted for an additional \$693,000 in interest expense for the three-month period ended March 31, 2007. Interest paid on interest bearing liabilities increased 72 basis points on a quarter-over-quarter basis from 2.46% to 3.18%. The increase in rates is a direct result of the higher overall rate environment.

Table Two, Analysis of Net Interest Margin on Earning Assets, and Table Three, Analysis of Volume and Rate Changes on Net Interest Income and Expenses, are provided to enable the reader to understand the components and trends of the Company's interest income and expenses. Table Two provides an analysis of net interest margin on earning assets setting forth average assets, liabilities and shareholders' equity; interest income earned and interest expense paid and average rates earned and paid; and the net interest margin on earning assets. Table Three sets forth a summary of the changes in interest income and interest expense from changes in average asset and liability balances (volume) and changes in average interest rates.

- (1) The average balance of non-accruing loans and leases is not significant as a percentage of total loans and leases and, as such, has been included in net loans.
- (2) Loan fees of \$144,000 and \$301,000 for the three months ending March 31, 2007 and March 31, 2006, respectively, have been included in the interest income computation.
- (3) Includes taxable-equivalent adjustments that primarily relate to income on certain securities that is exempt from federal income taxes. The effective federal statutory tax rate was 35% for the three months ended March 31, 2007 and 2006.
- (4) The rate/volume variance has been included in the rate variance.

Provision for Loan and Lease Losses

The Company provided \$121,000 for loan and lease losses for the first quarter of 2007 as compared to \$84,000 for the first quarter of 2006. Net loan and lease charge-offs for the three months ended March 31, 2007 were \$60,000 or .06% (on an annualized basis) of average loans and leases as compared to recoveries of \$4,000 or less than .01% (on an annualized basis) of average loans and leases for the three months ended March 31, 2006. For further information please see "Allowance for Loan and Lease Losses Activity."

Noninterest Income

Table Four below provides a summary of the components of noninterest income for the periods indicated (Dollars in thousands):

Table Four: Components of Noninterest Income

Three Months Ended

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

	March 31,	
	2007	2006
Service charges on deposit accounts	\$ 194	\$ 209
Accounts receivable servicing fees	71	104
Gain on sale of securities	--	--
Merchant fee income	128	129
Income from residential lending	65	65
Bank owned life insurance	88	44
Other	95	83
Total noninterest income	\$ 641	\$ 634

17

Noninterest income increased slightly by \$7,000 (1.1%) to \$641,000 for the three months ended March 31, 2007 as compared to \$634,000 for the three months ended March 31, 2006. The increase is primarily related to increased income from bank owned life insurance (up \$44,000 or 100%) as a result of the Company purchasing additional policies near the end of the fourth quarter of 2006. This increase was offset by a reduction of fees from accounts receivable servicing (down \$33,000 or 31.7%).

Noninterest Expense

Noninterest expense increased \$54,000 (1.5%) to a total of \$3,692,000 in the first quarter of 2007 compared to the \$3,638,000 recorded in the first quarter of 2006. Salary and employee benefits increased \$160,000 (8.1%). The salaries component increased \$35,000 (2.2%) mainly as a result of market-condition salary adjustments, additional administrative staff to address the burden of more stringent compliance and regulatory issues, and service personnel to help achieve strategic growth in business banking. At March 31, 2007, the Company employed 130 persons on a full-time equivalent basis as compared to 124 at March 31, 2006. The employee benefits and taxes component increased by \$33,000, primarily as a result of the increase in employees. In addition, the adoption of FAS 123(R) in January of 2006 resulted in an increase in salaries and benefits of \$17,000 from the first quarter of 2006 to the first quarter of 2007. On a quarter-over-quarter basis, occupancy expenses were down \$11,000 or 3.1%. Furniture and equipment decreased \$64,000 or 28.1% year over year, primarily due to less amortization of technology related equipment. Although still being used, certain equipment has reached its fully depreciated life.

Other expenses for the first quarter of 2007 were \$1,062,000, a decrease of \$31,000 (2.8%) over the prior year quarter. The efficiency ratios (fully taxable equivalent), excluding the amortization of intangible assets, for the 2007 and 2006 first quarters were 49.7% and 47.3%, respectively.

Provision for Income Taxes

The effective federal and state tax rate for the first quarter of 2007 was 38.2% versus 39.4% for the first quarter of 2006. The decrease is related to the Company's additional investment in bank owned life insurance during the fourth quarter of 2006. The income from bank owned life insurance is tax-free, helping to reduce the Company's tax rate.

Balance Sheet Analysis

The Company's total assets were \$574,649,000 at March 31, 2007 as

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

compared to \$604,003,000 at December 31, 2006, representing a decrease of 4.9%. The average balance of total assets for the three months ended March 31, 2007 was \$588,775,000, which represents a decrease of \$19,774,000 or 3.2% over the average balance of \$608,549,000 for the three-month period ended March 31, 2006. The decrease relates primarily to an overall decrease in deposit balances (see "Deposits" on page 23). In addition, the Company has not reinvested the proceeds from matured investment securities which has resulted in an overall decrease in assets.

Investment Securities

The Company classifies its investment securities as held to maturity or available for sale. The Company's intent is to hold all securities classified as held to maturity until maturity and management believes that it has the ability to do so. Securities available for sale may be sold to implement asset/liability management strategies and in response to changes in interest rates, prepayment rates and similar factors. Table Five below summarizes the values of the Company's investment securities held on March 31, 2007 and December 31, 2006.

Loans and Leases

The Company concentrates its lending activities in the following principal areas: (1) commercial; (2) commercial real estate; (3) multi-family real estate; (4) real estate construction (both commercial and residential); (5) residential real estate; (6) lease financing receivable; (7) agriculture; and (8) consumer loans. At March 31, 2007, these categories accounted for approximately 23%, 47%, 1%, 21%, 2%, 1%, 2% and 3%, respectively, of the Company's loan portfolio. This mix was relatively unchanged compared to 22%, 45%, 1%, 23%, 2%, 2%, 2% and 3% at December 31, 2006. Continuing economic activity in the Company's market area, new borrowers developed through the Company's marketing efforts, and credit extensions expanded to existing

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

borrowers resulted in the Company originating over \$49,000,000 in new loans during the first quarter of 2007; however, loan and lease paydowns and payoffs resulted in a net decrease of \$3,347,000 in loans from December 31, 2006. The Company did experience increases in loan balances for commercial (\$1,570,000 or 1.8%) and commercial real estate (\$5,800,000 or 3.3%) and decreases in balances for multi-family real estate loans (\$23,000 or 0.6%), real estate construction loans (\$9,220,000 or 10.2%), residential real estate loans (\$814,000 or 9.4%), lease financing receivable (\$405,000 or 6.4%), agriculture loans (\$222,000 or 3.0%) and consumer loans (\$47,000 or 0.4%). Table Six below summarizes the composition of the loan portfolio as of March 31, 2007 and December 31, 2006.

Table Six: Loan and Lease Portfolio Composition

(Dollars in thousands)	March 31, 2007	December 31, 2006

Deferred loan and lease fees, net	(630)	(705)
Allowance for loan and lease losses	(5,935)	(5,874)
Total net loans and leases	\$ 379,646	\$ 382,993

19

A significant portion of the Company's loans and leases are direct loans and leases made to individuals and local businesses. The Company relies substantially on local promotional activity and personal contacts by American River Bank officers, directors and employees to compete with other financial institutions. The Company makes loans and leases to borrowers whose applications include a sound purpose and a viable primary repayment source, generally supported by a secondary source of repayment.

Commercial loans consist of credit lines for operating needs, loans for equipment purchases, working capital, and various other business loan products. Consumer loans include a range of traditional consumer loan products such as personal lines of credit and loans to finance purchases of autos, boats, recreational vehicles, mobile homes and various other consumer items. Construction loans are generally comprised of commitments to customers within the Company's service area for construction of commercial properties, multi-family properties and custom and semi-custom single-family residences. Other real estate loans consist primarily of loans secured by first trust deeds on commercial and residential properties typically with maturities from 3 to 10 years and original loan to value ratios generally from 65% to 75%. Agriculture loans consist primarily of vineyard loans and development loans to plant vineyards. In general, except in the case of loans under SBA programs or Farm Services Agency guarantees, the Company does not make long-term mortgage loans; however, American River Bank has a residential lending division to assist customers in securing most forms of longer term single-family mortgage financing. American River Bank acts as a broker between American River Bank's clients and the loan wholesalers. American River Bank receives an origination

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

fee for loans closed.

Risk Elements

The Company assesses and manages credit risk on an ongoing basis through a total credit culture that emphasizes excellent credit quality, extensive internal monitoring and established formal lending policies. Additionally, the Company contracts with an outside loan review consultant to periodically review the existing loan and lease portfolio. Management believes its ability to identify and assess risk and return characteristics of the Company's loan and lease portfolio is critical for profitability and growth. Management strives to continue its emphasis on credit quality in the loan and lease approval process, active credit administration and regular monitoring. With this in mind, management has designed and implemented a comprehensive loan and lease review and grading system that functions to continually assess the credit risk inherent in the loan and lease portfolio.

Ultimately, underlying trends in economic and business cycles may influence credit quality. American River Bank's business is concentrated: (1) in the Sacramento Metropolitan Statistical Area, (2) in Sonoma County, through North Coast Bank, a division of American River Bank, whose business is focused on businesses within the three communities in which it has offices (Santa Rosa, Windsor, and Healdsburg), and (3) in Amador County, through Bank of Amador, a division of American River Bank, whose business is focused on businesses and consumers within the three communities in which it has offices (Jackson, Pioneer, and Ione). American River Bank also has a diversified residential construction loan business in numerous Northern California counties. The Sacramento Metropolitan Statistical Area is a diversified economy, but with a large State of California government presence and employment base. The economy of Sonoma County is diversified with professional services, manufacturing, agriculture and real estate investment and construction, while the economy of Amador County is reliant upon government, services, retail trade, manufacturing industries and Indian gaming.

The Company has significant extensions of credit and commitments to extend credit that are secured by real estate. The ultimate repayment of these loans is generally dependent on personal or business cash flows or the sale or refinancing of the real estate. The Company monitors the effects of current and expected market conditions and other factors on the collectability of real estate loans. The more significant factors management considers involve the following: lease rate and terms, capitalization rates, absorption and sale rates, real estate values and rates of return, operating expenses, inflation, and sufficiency of repayment sources independent of the real estate including, in some instances, personal guarantees.

In extending credit and commitments to borrowers, the Company generally requires collateral and/or guarantees as security. The repayment of such loans is expected to come from cash flows or from proceeds from the sale of selected assets of the borrowers. The Company's requirement for collateral and/or guarantees is determined on a case-by-case basis in connection with management's evaluation of the creditworthiness of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, income-producing

20

properties, residences and other real property. The Company secures its collateral by perfecting its security interest in business assets, obtaining deeds of trust, or outright possession among other means.

In management's judgment, a concentration exists in real estate loans

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

which represented approximately 70.9% of the Company's loan and lease portfolio at March 31, 2007, down from 71.4% at December 31, 2006. Although management believes this concentration to have no more than the normal risk of collectability, a substantial decline in the economy in general, or a decline in real estate values in the Company's primary market areas in particular, could have an adverse impact on the collectability of these loans and require an increase in the provision for loan and lease losses that could adversely affect the Company's future prospects, results of operations, profitability and stock price. Management believes that its lending policies and underwriting standards will tend to minimize losses in an economic downturn; however, there is no assurance that losses will not occur under such circumstances. The Company's loan policies and underwriting standards include, but are not limited to, the following: (1) maintaining a thorough understanding of the Company's service area and originating a significant majority of its loans within that area, (2) maintaining a thorough understanding of borrowers' knowledge, capacity, and market position in their field of expertise, (3) basing real estate loan approvals not only on market demand for the project but also on the borrowers' capacity to support the project financially in the event it does not perform to expectations (whether sale or income performance), and (4) maintaining conforming and prudent loan to value and loan to cost ratios based on independent outside appraisals and ongoing inspection and analysis by the Company's lending officers.

Nonaccrual, Past Due and Restructured Loans and Leases

Management generally places loans and leases on nonaccrual status when they become 90 days past due, unless the loan or lease is well secured and in the process of collection. Loans and leases are charged off when, in the opinion of management, collection appears remote.

At March 31, 2007, non-performing loans and leases (those loans on non-accrual status and those loans still accruing and past due 90 days or more) were \$766,000 or 0.20% of total loans and leases. Non-performing loans and leases were \$78,000 or 0.02% of total loans and leases at December 31, 2006. The increase was primarily related to addition of one real estate secured loan that was past due 90 days and still accruing interest in the amount of \$450,000, that management believes is well-secured. There were no loan concentrations in excess of 10% of total loans not otherwise disclosed as a category of loans as of March 31, 2007 or December 31, 2006. Management is not aware of any significant problem loans, which were accruing and current at March 31, 2007, where serious doubt exists as to the ability of the borrower to comply with the present repayment terms and that would result in a significant loss to the Company. Table Seven below sets forth nonaccrual loans and loans past due 90 days or more as of March 31, 2007 and December 31, 2006.

Table Seven: Non-Performing Loans

(Dollars in thousands)	March 31, 2007	December 31, 2006

Allowance for Loan and Lease Losses Activity

The Company maintains an allowance for loan and lease losses ("ALLL") to cover probable losses inherent in the loan and lease portfolio, which is based upon management's estimates of those losses. The ALLL is established through a provision for loan and lease losses and is increased by provisions charged against current earnings and recoveries and reduced by charge-offs and reversals of previous provisions charged to earnings. Actual losses for loans and leases can vary significantly from this estimate. The methodology and assumptions used to calculate the allowance are continually reviewed as to their appropriateness given the most recent losses realized and other factors that influence the estimation process. The model assumptions and resulting allowance level are adjusted accordingly as these factors change.

The adequacy of the ALLL and the level of the related provision for loan and lease losses is determined based on management's judgment after consideration of numerous factors including but not limited to: (1) historical loss rates, (2) local and regional economic conditions, (3) credit policy and underwriting, (4) management and staff effectiveness, (5) trends in delinquencies and charge-offs, (6) credit concentrations, (7) impaired loans, (8) risk factors assigned to criticized or classified (problem) credits not considered impaired, and (8) assessments by banking regulators and other third parties. The Board of Directors reviews management's analysis of the adequacy of the ALLL quarterly.

Table Eight below summarizes, for the periods indicated, the activity in the allowance for loan and lease losses.

Table Eight: Allowance for Loan and Lease Losses

(Dollars in thousands)	Three Months Ended March 31,	
	2007	2006
Average loans and leases outstanding	\$ 387,398	\$ 370,557
Allowance for possible loan and lease losses at beginning of period	\$ 5,874	\$ 5,679
Loans and leases charged off:		
Commercial	--	--
Real estate	(71)	--
Consumer	(4)	--
Lease financing receivable	--	--
Total	(75)	--
Recoveries of loans and leases previously charged off:		
Commercial	8	--

Total	15	4

Net loans and leases (charged off) recovered	(60)	4
Additions to allowance charged to operating expenses	121	84

Allowance for possible loan and lease losses at end of period	\$ 5,935	\$ 5,767

Ratio of net charge-offs to average loans and leases outstanding (annualized)	.06%	.00%
Provision for possible loan and lease losses to average loans and leases outstanding (annualized)	.13%	.09%
Allowance for possible loan and lease losses to loans and leases, net of deferred fees, at end of period	1.54%	1.52%

22

The Company establishes general reserves in accordance with Statement of Accounting Standards ("SFAS") No. 5., Accounting for Contingencies, and specific reserves in accordance with SFAS No. 114, Accounting by Creditors for Impairment of a Loan. The ALLL is internally allocated based on loan category, loan grades, estimated risk factors, and loan impairment as discussed in the prior paragraph; however, the entire allowance is available to cover actual loan and lease losses. While management uses available information to recognize possible losses on loans and leases, future additions to the allowance may be necessary, based on changes in economic conditions and other matters. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's ALLL. Such agencies may require the Company to provide additions to the allowance based on their judgment of information available to them at the time of their examination. The adequacy of the ALLL is determined based on three components. First, the dollar weighted risk factor of the loan portfolio (excepting criticized and classified credits and impaired loans) is determined. Second, risk factors are assigned to criticized and classified loans and leases not considered impaired. Third, the Company determines whether a loan is impaired and if so measures the degree of impairment within the context of SFAS No. 114 "Accounting by Creditors for Impairment of a Loan". These are estimated potential losses associated with specific borrowers based upon estimated future cash flows or collateral value and events affecting the risk rating. These three calculations are designed to encompass the entire balance of the loan and lease portfolio. When these three dollar numbers are aggregated, it is then compared to the actual ALLL balance at the measurement date. Management is responsible to maintain the actual ALLL within a reasonable range of the total estimated loss risk inherent in the loan and lease portfolio. However, no prediction of the ultimate level of loans and leases charged off in future periods can be made with any certainty. The allowance for loan and lease losses totaled \$5,935,000 or 1.54% of total loans and leases at March 31, 2007 and \$5,767,000 or 1.52% of total loans and leases at December 31, 2006.

Other Real Estate

At March 31, 2007 and December 31, 2006, the Company did not have any other real estate ("ORE") properties.

Deposits

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

At March 31, 2007, total deposits were \$485,744,000 representing a decrease of \$8,131,000 (1.4%) from the December 31, 2006 balance of \$493,875,000. Noninterest-bearing deposits decreased \$13,610,000 (8.5%) while interest-bearing deposits increased \$5,479,000 (1.6%). The overall competitive demand for deposit balances has resulted in a decrease in the Company's deposits. Overall the Company has retained its deposit relationships; however, the amount on deposit in these accounts is currently lower than in previous quarters.

Other Borrowed Funds

Other borrowings outstanding as of March 31, 2007 and December 31, 2006, consist of advances (both long-term and short-term) from the FHLB. Table Nine below summarizes these borrowings:

Table Nine: Other Borrowed Funds

(Dollars in thousands)

	March 31, 2007		December 31, 2006	
	Amount	Rate	Amount	
Short-term borrowings:				
FHLB advances	\$ 20,083	4.73%	\$ 37,270	
Long-term Borrowings:				
FHLB advances	\$ 2,500	5.19%	\$ 5,000	

23

The maximum amount of short-term borrowings at any month-end during the first three quarters of 2007 and 2006 was \$42,384,000 and \$51,684,000, respectively. The FHLB advances are collateralized by loans and securities pledged to the FHLB. The following is a breakdown of rates and maturities on FHLB advances (dollars in thousands):

	Short-term	Long-term
Amount	\$ 20,083	\$ 2,500
Maturity	2007 to 2008	2008
Average rates	4.73%	5.19%

The Company has also been issued a total of \$2,500,000 in letters of credit by the FHLB which have been pledged to secure Local Agency Deposits. The letters of credit act as a guarantee of payment to certain third parties in accordance with specified terms and conditions. The letters of credit were not drawn upon in 2007 or 2006 and management does not expect to draw upon these lines in the future. See Liquidity section that follows for additional information on FHLB borrowings.

Capital Resources

The current and projected capital position of the Company and the

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

impact of capital plans and long-term strategies is reviewed regularly by management. The Company's capital position represents the level of capital available to support continuing operations and expansion.

The Company and American River Bank are subject to certain regulations issued by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation, which require maintenance of certain levels of capital. Failure to meet these minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, American River Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and American River Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. At March 31, 2007, shareholders' equity was \$59,983,000, representing a decrease of \$2,388,000 (3.8%) from \$62,371,000 at December 31, 2006. The ratio of total risk-based capital to risk adjusted assets was 11.2% at March 31, 2007 compared to 11.6% at December 31, 2006. Tier 1 risk-based capital to risk-adjusted assets was 9.9% at March 31, 2007 and 10.3% at December 31, 2006.

Table Ten below lists the Company's actual capital ratios at March 31, 2007 and December 31, 2006 as well as the minimum capital ratios for capital adequacy.

Table Ten: Capital Ratios

Capital to Risk-Adjusted Assets	At March 31, 2007	At December 31, 2006	Minimum Regulatory Capital Requirement
Leverage ratio	7.5%	7.8%	4.00%
Tier 1 Risk-Based Capital	9.9%	10.3%	4.00%
Total Risk-Based Capital	11.2%	11.6%	8.00%

Capital ratios are reviewed on a regular basis to ensure that capital exceeds the prescribed regulatory minimums and is adequate to meet future needs. Management believes that both the Company and American River Bank met all of their capital adequacy requirements as of March 31, 2007 and December 31, 2006.

The Company, through a Board of Director authorized plan, may repurchase, as conditions warrant, up to 5% annually of the Company's common stock. Repurchases are generally made in the open market at market prices. (See Part II, Item 2, for additional disclosure).

Inflation

The impact of inflation on a financial institution differs significantly from that exerted on manufacturing, or other commercial concerns, primarily because its assets and liabilities are largely monetary. In general, inflation primarily affects the Company and its subsidiaries through its effect on market rates of interest, which affects the Company's ability to attract loan

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

customers. Inflation affects the growth of total assets by increasing the level of loan demand, and potentially adversely affects capital adequacy because loan growth in inflationary periods can increase at rates higher than the rate that capital grows through retention of earnings which may be generated in the future. In addition to its effects on interest rates, inflation increases overall operating expenses. Inflation has not had a significant effect upon the results of operations of the Company and its subsidiaries during the periods ended March 31, 2007 and 2006.

Liquidity

Liquidity management refers to the Company's ability to provide funds on an ongoing basis to meet fluctuations in deposit levels as well as the credit needs and requirements of its clients. Both assets and liabilities contribute to the Company's liquidity position. Federal funds lines, short-term investments and securities, and loan repayments contribute to liquidity, along with deposit increases, while loan funding and deposit withdrawals decrease liquidity. The Company assesses the likelihood of projected funding requirements by reviewing historical funding patterns, current and forecasted economic conditions and individual client funding needs. Commitments to fund loans and outstanding letters of credit at March 31, 2007 and December 31, 2006 were approximately \$121,624,000 and \$6,521,000 and \$114,582,000 and \$5,701,000, respectively. Such loan commitments relate primarily to revolving lines of credit and other commercial loans and to real estate construction loans. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

The Company's sources of liquidity consist of cash and due from correspondent banks, overnight funds sold to correspondent banks, unpledged marketable investments and loans held for sale and/or pledged for secured borrowings. At March 31, 2007, consolidated liquid assets totaled \$48.4 million or 8.4% of total assets compared to \$68.7 million or 11.4% of total assets on December 31, 2006. In addition to liquid assets, the Company maintains short-term lines of credit in the amount of \$53,000,000 with correspondent banks. At March 31, 2007, the Company had \$53,000,000 available under these credit lines. Additionally, American River Bank is a member of the FHLB. At March 31, 2007, American River Bank could have arranged for up to \$140,483,000 in secured borrowings from the FHLB. These borrowings are secured by pledged mortgage loans and investment securities. At March 31, 2007, the Company had advances, borrowings and commitments (including letters of credit) outstanding of \$25,083,000, leaving \$115,400,000 available under these FHLB secured borrowing arrangements. American River Bank also has informal agreements with various other banks to sell participations in loans, if necessary. The Company serves primarily a business and professional customer base and, as such, its deposit base is susceptible to economic fluctuations. Accordingly, management strives to maintain a balanced position of liquid assets and borrowing capacity to volatile and cyclical deposits.

Liquidity is also affected by portfolio maturities and the effect of interest rate fluctuations on the marketability of both assets and liabilities. The Company can sell any of its unpledged securities held in the available-for-sale category to meet liquidity needs. These securities are also available to pledge as collateral for borrowings if the need should arise. American River Bank has established a master repurchase agreement with a correspondent bank to enable such transactions. American River Bank can also pledge securities to borrow from the FRB and the FHLB. The principal cash requirements of the Company are for expenses incurred in the support of administration and operations. For nonbanking functions, the Company is dependent upon the payment of cash dividends from American River Bank to service its commitments. The Company expects that the cash dividends paid by American River Bank to the Company will be sufficient to meet this payment schedule.

Off-Balance Sheet Items

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business in order to meet the financing needs of its customers and to reduce its exposure to fluctuations in interest rates. These financial instruments consist of commitments to extend credit and letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the balance sheet.

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and letters of credit is represented by the contractual amount of those instruments. The Company applies the same credit policies to commitments and letters of credit as it does for loans included on the consolidated balance sheet. As of March 31, 2007 and December 31, 2006, commitments to extend credit and standby letters of credit were the only financial instruments with off-balance sheet risk. The Company has not entered into any contracts for financial derivative instruments such as futures, swaps, options or similar instruments. Loan commitments and standby letters of credit were \$128,145,000 and \$120,283,000 at March 31, 2007 and December 31, 2006, respectively. As a percentage of net loans and leases these off-balance sheet items represent 33.8% and 31.4%, respectively.

The Company has certain ongoing commitments under operating leases. These commitments do not significantly impact operating results.

Other Matters

Effects of Terrorism. The terrorist actions on September 11, 2001 and thereafter, as well as, the current military conflict in Iraq have had significant adverse effects upon the United States economy. Whether the terrorist activities in the future and the actions of the United States and its allies in combating terrorism on a worldwide basis will adversely impact the Company and the extent of such impact is uncertain. Such economic deterioration could adversely affect the Company's future results of operations by, among other matters, reducing the demand for loans and other products and services offered by the Company, increasing nonperforming loans and the amounts reserved for loan and lease losses, and causing a decline in the Company's stock price.

Website Access. American River Bankshares maintains a website where certain information about the Company is posted. Through the website, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments thereto, as well as Section 16 Reports and amendments thereto, are available as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (the "SEC"). These reports are free of charge and can be accessed through the address www.amrb.com by clicking on the SEC Filings link located at that address. Once you have selected the SEC Filings link you will have the option to access the Section 16 Reports or the other above-referenced reports filed by the Company by selecting the appropriate link.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Market Risk Management

Overview. Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest rate risk inherent in its loan, investment and deposit functions. The goal for managing the assets and liabilities of the Company is to maximize shareholder value and earnings while maintaining a high quality balance sheet

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

without exposing the Company to undue interest rate risk. The Board of Directors has overall responsibility for the interest rate risk management policies. The Company has a Risk Management Committee, made up of Company management that establishes and monitors guidelines to control the sensitivity of earnings to changes in interest rates.

Asset/Liability Management. Activities involved in asset/liability management include but are not limited to lending, accepting and placing deposits and investing in securities. Interest rate risk is the primary market risk associated with asset/liability management. Sensitivity of earnings to interest rate changes arises when yields on assets change in a different time period or in a different amount from that of interest costs on liabilities. To mitigate interest

26

rate risk, the structure of the balance sheet is managed with the goal that movements of interest rates on assets and liabilities are correlated and contribute to earnings even in periods of volatile interest rates. The asset/liability management policy sets limits on the acceptable amount of variance in net interest margin and market value of equity under changing interest environments. The Company uses simulation models to forecast earnings, net interest margin and market value of equity.

Simulation of earnings is the primary tool used to measure the sensitivity of earnings to interest rate changes. Using computer-modeling techniques, the Company is able to estimate the potential impact of changing interest rates on earnings. A balance sheet forecast is prepared quarterly using inputs of actual loans, securities and interest bearing liabilities (i.e. deposits/borrowings) positions as the beginning base. The forecast balance sheet is processed against three interest rate scenarios. The scenarios include a 200 basis point rising rate forecast, a flat rate forecast and a 200 basis point falling rate forecast which take place within a one year time frame. The net interest income is measured during the year assuming a gradual change in rates over the twelve-month horizon. The simulation modeling indicated below attempts to estimate changes in the Company's net interest income utilizing a forecast balance sheet projected from the end of period balances.

Table Eleven below summarizes the effect on net interest income (NII) of a +/-200 basis point change in interest rates as measured against a constant rate (no change) scenario.

Table Eleven: Interest Rate Risk Simulation of Net Interest as of March 31, 2007 and December

(In thousands)

	\$ Change in NII from Current 12 Month Horizon March 31, 2007	\$ Chang from C 12 Month December
	-----	-----
Variation from a constant rate scenario		
+200bp	\$ 236	\$
-200bp	\$ (1,585)	\$ (1

The simulations of earnings do not incorporate any management actions, which might moderate the negative consequences of interest rate deviations. Therefore, they do not reflect likely actual results, but serve as reasonable estimates of interest rate risk.

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

Item 4. Controls and Procedures.

The Company, under the supervision and with the participation of its management, including the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of March 31, 2007. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely making known to them material information relating to the Company and the Company's consolidated subsidiaries required to be disclosed in the Company's reports filed or submitted under the Exchange Act.

During the quarter ended March 31, 2007, there have been no changes in the Company's internal control over financial reporting that have significantly affected, or are reasonably likely to materially affect, these controls.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, the Company and/or its subsidiaries is a party to claims and legal proceedings arising in the ordinary course of business. The Company's management is not aware of any significant pending legal proceedings to which either it or its subsidiaries may be a party or has recently been a party, which will have a significant adverse effect on the financial condition or results of operations of the Company or its subsidiaries, taken as a whole.

27

Item 1A. Risk Factors.

There have been no significant changes in the risk factors previously disclosed in the Company's Form 10-K for the period ended December 31, 2006, filed with the Securities and Exchange Commission on March 9, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

On September 20, 2001, the Board of Directors of the Company authorized a stock repurchase program which calls for the repurchase of up to five percent (5%) annually of the Company's outstanding shares of common stock. Each year the Company may repurchase up to 5% of the shares outstanding (adjusted for stock splits or stock dividends). The number of shares reported in column (d) of the table as shares that may be repurchased under the plan represent shares eligible for the calendar year 2007. The repurchases can be made from time to time in the open market as conditions allow and will be structured to comply with Commission Rule 10b-18. Management reports monthly to the Board of Directors on the status of the repurchase program. The Board of Directors has reserved the right to suspend, terminate, modify or cancel this repurchase program at any time for any reason. The following table lists shares repurchased during the quarter and the maximum amount available to repurchase under the repurchase plan.

Period	(a) Total Number of Shares (or	(b) Average Price Paid Per Share	(c) Total Number of Shares (or Units) Purchased as
--------	--------------------------------------	--	--

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

	Units) Purchased	(or Unit)	Part of Publicly Announced Plans or Programs
Month #1 January 1 through January 31, 2007	45,000	\$ 24.70	45,000
Month #2 February 1 through February 28, 2007	114,000	\$ 25.93	114,000
Month #3 March 1 through March 31, 2007	None	N/A	None
Total	159,000	\$ 25.58	159,000

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders.
