**CREDIT SUISSE GROUP REPORTS NET INCOME OF
CHF 1.9 BILLION FOR THE FIRST QUARTER OF 2005**

Group achieves a strong start to 2005, with solid revenues

Return on equity of 22.9% for the banking businesses and 12.0% for Winterthur

Financial Highlights

in CHF million	1Q2005	4Q2004	1Q2004	Change in % vs 4Q2004	Change in % vs 1Q2004
Net revenues	17,062	12,984	16,814	31	1
Total operating expenses	6,146	6,128	6,308	0	(3)
Net income	1,910	959	1,861	99	3
Return on equity	20.6%	10.6%	21.3%	—	—
Basic earnings per share (CHF)	1.64	0.82	1.56		
BIS tier 1 ratio	12.1%	12.3%			

Zurich, May 4, 2005 □ Credit Suisse Group today reported net income of CHF 1,910 million for the first quarter of 2005, compared to CHF 1,861 million in the first quarter of 2004. A continued strong performance from Private Banking and a record quarter for Corporate & Retail Banking contributed to this result. Institutional Securities reported lower net income and had a mixed quarter, with increased revenues in fixed income trading and lower results in equity underwriting and trading as well as in debt underwriting and advisory versus the strong first quarter of 2004. Wealth & Asset Management reported net income which was largely unchanged compared to the first quarter of 2004. Winterthur recorded a solid first-quarter performance, especially in Non-Life, which further improved its underwriting results. Life & Pensions reported moderate growth in its total business volume. The

return on equity was 22.9% for the banking businesses and 12.0% for Winterthur. Credit Suisse Group's overall return on equity was 20.6% for the first quarter.

Credit Suisse Group has received the requisite regulatory approvals from the Swiss Federal Banking Commission to merge its two Swiss banks, Credit Suisse and Credit Suisse First Boston. As previously announced, the merged bank will be operational from May 16, 2005, and will continue to use the Credit Suisse, Credit Suisse First Boston and Credit Suisse Asset Management brands.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Oswald J. Grübel, CEO of Credit Suisse Group, said, "With solid revenues and good net income, Credit Suisse Group has made a strong start to 2005. Private Banking had another excellent quarter and Corporate & Retail Banking reported a record result."

He continued, "While showing an improvement over the previous quarter and gaining market share in some key businesses, the results from Institutional Securities were mixed. Wealth & Asset Management achieved some progress but still has the potential to improve further. We will continue to implement our strategy, which is designed to rebuild a leadership position in these businesses."

Turning to the insurance business, he added, "Winterthur produced a solid performance in the first quarter, especially in Non-Life – which further improved its underwriting results – as the insurance business benefited from increased business volumes and reduced expenses. Going forward, we will continue to work to enhance profitability at Winterthur."

He concluded, "We continue to focus on improving performance and on the integration of our banking businesses and we still have more work to do. My management team and I strongly believe that by creating an integrated bank, we will be able to further improve client service, generate revenue growth and improve efficiency. This will help us to build our position as a leading global financial services provider."

Banking Segments

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Private Banking reported an 11% increase in net income to CHF 685 million in the first quarter of 2005 compared to the previous quarter, as a further recovery in client activity led to sound revenue growth. The segment was able to repeat the strong performance of the first quarter of 2004. The gross margin improved by 9.5 basis points to 137.7 basis points versus the previous quarter but was down 8.6 basis points from the first quarter of 2004. Private Banking's cost/income ratio improved by 2.4 percentage points to 55.4% compared to the previous quarter and was virtually unchanged compared to the corresponding period of 2004.

Corporate & Retail Banking recorded net income of CHF 274 million for the first quarter of 2005, up 7% compared to the fourth quarter and up 45% versus the first quarter of 2004. This result mainly reflects sound revenues and a seasonally low cost base, as well as a net release of provisions for credit losses. Corporate & Retail Banking reported a return on average allocated capital of 22.4%, up 1.6 percentage points from the fourth quarter and up 7.3 percentage points versus the first quarter of 2004. At 61.5%, the cost/income ratio was 2.1 percentage points higher than in the previous quarter and improved by 1.3 percentage points versus the first quarter of 2004.

Institutional Securities generated net income of CHF 540 million in the first quarter of 2005, a 101% increase from the previous quarter. This performance was characterized by a 32% increase in revenues – reflecting higher fixed income and equity trading results and lower investment banking results – and a 14% rise in total operating expenses. Compared to the strong first quarter of 2004, net income declined 13%, due in part to lower revenues. Although fixed income trading results improved versus the prior-year period, revenues in equity trading and underwriting and in debt underwriting and advisory declined. Total operating expenses were down 3% versus the first quarter of 2004. The segment's pre-tax margin (excluding minority interests) improved to 19.9% in the first quarter from 13.7% in the fourth quarter of 2004 but was down from 22.2% in the first quarter of last year.

Wealth & Asset Management reported net income of CHF 135 million for the first quarter of 2005, representing a 114% rise from the previous quarter. This first-quarter performance reflected stable revenues in Credit Suisse Asset Management, lower revenues in Private Client Services and lower fees in Alternative Capital, offset by higher investment-related gains and a decrease in total operating expenses. Compared to the first quarter of 2004, net income declined by 1%, reflecting lower revenues from Credit Suisse Asset Management and Private Client Services as well as lower investment-related gains, offset in part by an increase in fees from Alternative Capital and lower expenses.

Insurance Segments**Credit Suisse Group Insurance Segment Results**

in CHF million		1Q2005	4Q2004	1Q2004	Change in % vs 4Q2004	Change in % vs 1Q2004
Life & Pensions segment	Net Revenues	6,610	3,939	6,298	68	5
	Total op. expenses	427	410	452	4	(6)
	Net income	126	152	139	(17)	(9)
Non-Life segment	Net Revenues	3,049	2,924	3,106	4	(2)
	Total op. expenses	698	1,008	726	(31)	(4)
	Net income	125	(177)	103	—	21

Life & Pensions recorded net income of CHF 126 million in the first quarter of 2005. This 9% decrease compared to the first quarter of 2004 was primarily due to lower investment income from net realized gains, partially offset by improvements in the segment's underlying business. Total business volume, which includes deposits from policyholders and gross premiums written, rose 7% compared to the first quarter of last year. This growth was mainly driven by a 7% increase in gross premiums written. Insurance underwriting and acquisition expenses decreased 12% and administration expenses rose 9% compared to the first quarter of last year. The expense ratio decreased by 0.3 percentage points to 6.3%. In the first quarter of 2005, the net investment return backing traditional life policies was down from 5.6% to 5.3% and the net current investment return remained stable at 3.8%.

Non-Life reported net income of CHF 125 million for the first quarter of 2005, up 21% compared to the first quarter of 2004. This increase was mainly attributable to further improvements in the segment's underwriting results and reduced charges for divested operations. Net premiums earned declined 3% in the first quarter of 2005 and the combined ratio improved by 1.0 percentage points to 99.4% compared to the same period of last year. The claims ratio decreased by 1.6 percentage points to 75.3% in the period under review, mainly reflecting a lower level of large-scale losses and improvements in several market units. Administration expenses decreased 5%, while insurance underwriting and acquisition expenses rose by 3% in the first quarter of 2005. The expense ratio increased by 0.6 percentage points, due primarily to a decrease in net premiums earned. Non-Life's net investment return decreased slightly from 5.1% to 5.0% and the net current investment return remained stable at 3.5% compared to the same period of 2004.

Net New Assets**Net New Assets and Assets under Management (AuM) for the first quarter 2005**

in CHF billion	Net New Assets	Total AuM	Change in AuM % vs 31.12.04
Private Banking	7.0	564.3	4.7
Corporate & Retail Banking	1.0	54.5	1.1
Institutional Securities	(0.5)	16.1	5.9
Wealth & Asset Management¹⁾	5.1	492.0	4.0
Life & Pensions	2.8	119.5	3.5
Non-Life	n/a	25.2	4.6
Credit Suisse Group	15.4	1,271.6	4.2

1) Excluding assets managed on behalf of other entities within Credit Suisse Group
n/a: not applicable

Private Banking generated net new assets of CHF 7.0 billion in the first quarter of 2005, representing an annualized growth rate of 5.2% – with strategic key markets in Asia and Europe again reporting double-digit growth rates. Wealth & Asset Management reported net new assets of CHF 5.1 billion due mainly to corporate and client cash inflows as well as inflows related to the launch of a new real estate fund in Europe. Overall, Credit Suisse Group reported CHF 15.4 billion of net new assets in the first quarter. The Group's total assets under management stood at CHF 1,271.6 billion as of March 31, 2005, up 4.2% from December 31, 2004.

Outlook

Following the generally more favorable business climate in the first quarter, Credit Suisse Group expects to see market activity slow considerably in the second quarter. These less buoyant market conditions are likely to result in more subdued client activity – bringing with it a corresponding decrease in business volumes. However, the Group expects market conditions to improve in the second half of 2005. Credit Suisse Group will concentrate on diligently responding to these trends to capture growth opportunities and on ensuring it has the necessary measures in place to respond rapidly to changing client requirements.

Credit Suisse Group

Credit Suisse Group is a leading global financial services company headquartered in Zurich. It provides private clients and small and medium-sized companies with private banking and financial advisory services, and pension and insurance solutions from Winterthur. In the area of investment banking, it serves global institutional, corporate, government and individual clients in its role as a financial intermediary. Credit Suisse Group's registered shares (CSGN) are listed in Switzerland and in the form of American Depositary Shares (CSR) in New York. The Group employs around 60,000 staff worldwide. As of March 31, 2005, it reported assets under management of CHF 1,271.6 billion.

Cautionary Statement Regarding Forward-Looking Information

This press release contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to our plans, objectives or goals; our future economic performance or prospects; the potential effect on our future performance of certain contingencies; and assumptions underlying any such statements. Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include (i) market and interest rate fluctuations; (ii) the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations in particular; (iii) the ability of counterparties to meet their obligations to us; (iv) the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations; (v) political and social developments, including war, civil unrest or terrorist activity; (vi) the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations; (vii) the ability to maintain sufficient liquidity and access capital markets; (viii) operational factors such as systems failure, human error, or the failure to properly implement procedures; (ix) actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations; (x) the effects of changes in laws, regulations or accounting policies or practices; (xi) competition in geographic and business areas in which we conduct our operations; (xii) the ability to retain and recruit qualified personnel; (xiii) the ability to maintain our reputation and promote our brands; (xiv) the ability to increase market share and control expenses; (xv) technological changes; (xvi) the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users; (xvii) acquisitions, including the ability to integrate successfully acquired businesses; (xviii) the adverse resolution of litigation and other contingencies; and (xix) our success at managing the risks involved in the foregoing. We caution you that the foregoing list of important factors is not exclusive; when evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the risks identified in our most recently filed Form 20-F and reports on Form 6-K furnished to the US Securities and Exchange Commission.

Letter to Shareholders 2005 Q1

Dear Shareholders,

Credit Suisse Group recorded net income of CHF 1,910 million in the first quarter of 2005 versus CHF 1,861 million in the first quarter of 2004, an increase of CHF 49 million, or 3%. This was driven largely by increased net income in Corporate & Retail Banking and Non-Life, offset in part by declines in Institutional Securities and Life & Pensions, while Private Banking and Wealth & Asset Management reported net income largely unchanged compared to the first quarter of 2004.

Credit Suisse Group made a strong start to 2005, reporting net income of CHF 1.9 billion for the first quarter, with performance driven by solid revenues. The return on equity for the Group was 20.6%, with the banking segments and Winterthur reporting a return on equity of 22.9% and 12.0%, respectively.

Private Banking performed well, reporting strong net income. A further recovery in client activity during the quarter led to revenues which were almost unchanged compared to the strong first quarter 2004. Corporate & Retail Banking reported record net income for the first quarter, which was mainly attributable to sound revenues and a seasonally low cost base, as well as a continuing favorable credit environment.

Our Institutional Securities segment produced a mixed first quarter. Fixed income trading results improved compared to the first quarter of 2004. Results in equity trading and underwriting as well as in debt underwriting and advisory declined. Wealth & Asset Management reported net income, which was largely unchanged compared to the first quarter of 2004.

Our insurance business, Winterthur, delivered a solid first-quarter performance, especially in Non-Life, which further improved its underwriting results. Life & Pensions reported a moderate increase in its total business volume,

reflecting growth in several markets within Europe.

While the Group generated strong first-quarter results, it is nonetheless evident that we must continue to sharpen our focus and close gaps in our performance going forward. At the end of 2004, we announced our plans to combine our banking businesses globally to produce a more powerful integrated organization. The first stage in this process is the merger of our two Swiss banks, Credit Suisse and Credit Suisse First Boston, which is planned for later this month. The design of the new organization will be finalized by the end of the summer and we expect it to be operational as of January 1, 2006. My management team and I remain firmly convinced that our measures to enhance cooperation between our banking businesses in order to capture synergies for revenue growth and to improve our efficiency will generate major benefits for our clients, shareholders and employees and help to secure our position as a leading global financial services provider in the future.

Net new assets

The Group reported net new assets of CHF 15.4 billion in the first quarter of 2005, an increase of CHF 11.9 billion compared to the fourth quarter of 2004. Double-digit growth rates in asset gathering in key Asian and European markets contributed to net new assets of CHF 7.0 billion in Private Banking, while Wealth & Asset Management reported net new assets of CHF 5.1 billion.

Private Banking

Private Banking reported an 11% increase in net income to CHF 685 million in the first quarter of 2005 compared to the previous quarter, as a further recovery in client activity led to sound revenue growth. The segment was able to repeat the strong performance of the first quarter of 2004. The gross margin improved by 9.5 basis points to 137.7 basis points versus the previous quarter but was down 8.6 basis points from the first quarter of 2004. Private Banking's cost/income ratio improved by 2.4 percentage points to 55.4% compared to the previous quarter and was virtually unchanged compared to the corresponding period of 2004.

Corporate & Retail Banking

Corporate & Retail Banking recorded net income of CHF 274 million for the first quarter of 2005, up 7% compared to the fourth quarter and up 45% versus the first quarter of 2004. This result mainly reflects sound revenues and a seasonally low cost base, as well as a net release of provisions for credit losses. Corporate & Retail Banking reported a return on average allocated capital of 22.4%, up 1.6 percentage points from the fourth quarter and up 7.3 percentage points versus the first quarter of 2004. At 61.5%, the cost/income ratio was 2.1 percentage points higher than in the previous quarter and improved by 1.3 percentage points versus the first quarter of 2004.

Institutional Securities

Institutional Securities generated net income of CHF 540 million in the first quarter of 2005, a 101% increase from the previous quarter. This performance was characterized by a 32% increase in revenues – reflecting higher fixed income and equity trading results – and a 14% rise in expenses. Compared to the strong first quarter of 2004, net income declined 13%, due mainly to lower revenues. Although fixed income trading results improved versus the prior-year period, revenues in equity trading and underwriting and in debt underwriting and advisory declined. Expenses were down 3% versus the first quarter of 2004. The segment's pre-tax margin (excluding minority interests) improved to 19.9% in the first quarter from 13.7% in the fourth quarter of 2004, but was down from 22.2% in the first quarter of last year.

Wealth & Asset Management

Wealth & Asset Management reported net income of CHF 135 million for the first quarter of 2005, representing a 114% rise from the previous quarter. This first-quarter performance reflected stable revenues in Credit Suisse Asset Management and lower revenues in Private Client Services and lower fees in Alternative Capital, offset by higher investment-related gains and a decrease in expenses. Compared to the first quarter of 2004, net income declined by 1% due to lower revenues from Credit Suisse Asset Management and Private Client Services as well as lower investment-related gains, offset in part by an increase in fees from Alternative Capital and lower expenses.

Life & Pensions

Life & Pensions recorded net income of CHF 126 million in the first quarter of 2005. This 9% decrease compared to the first quarter of 2004 was primarily due to lower investment income from net realized gains, partially offset by improvements in the segment's underlying business. Total business volume, which includes deposits from policyholders and gross premiums written, rose 7% compared to the first quarter of last year. This growth was mainly driven by a 7% increase in gross premiums written. Insurance underwriting and acquisition expenses decreased 12% and administration expenses rose 9% compared to the first quarter of last year. The expense ratio decreased by 0.3 percentage points to 6.3%. In the first quarter of 2005, the net return on investments backing traditional life policies was down from 5.6% to 5.3% and the net current investment return remained stable at 3.8%.

Non-Life

Non-Life reported net income of CHF 125 million for the first quarter of 2005, up 21% compared to the first quarter of 2004. This increase was mainly attributable to further improvements in the segment's underwriting results and reduced charges for divested operations. Net premiums earned declined 3% in the first quarter of 2005 and the combined ratio improved by 1.0 percentage points to 99.4% compared to the same period of last year. The claims ratio decreased by 1.6 percentage points to 75.3% in the period under review, mainly reflecting a lower level of large-scale losses and improvements in several market units. Administration expenses decreased 5%, while underwriting and acquisition expenses rose by 3% in the first quarter of 2005. The expense ratio increased by 0.6 percentage points, due primarily to a decrease in net premiums earned. Non-Life's net investment return decreased slightly from 5.1% to 5.0% and the net current investment return remained stable at 3.5% compared to the same period of 2004.

Outlook

Following the generally more favorable business climate in the first quarter, we expect to see market activity slow considerably in the second quarter. These less buoyant market conditions are likely to result in more subdued client activity – bringing with it a corresponding decrease in business volumes. However, we expect market conditions to improve in the second half of 2005. Credit Suisse Group will concentrate on diligently responding to these trends to capture growth opportunities and on ensuring we have the necessary measures in place to respond rapidly to changing client requirements.

Message from the Chief Executive Officer

Oswald J. Grübel
Chief Executive Officer
Credit Suisse Group

Dear shareholders, clients and colleagues

Credit Suisse Group made a strong start to 2005, reporting net income of CHF 1.9 billion for the first quarter, with performance driven by solid revenues. The return on equity for the Group was 20.6%, with the banking segments and Winterthur reporting a return on equity of 22.9% and 12.0%, respectively. During the quarter, the Group generated net new assets of CHF 15.4 billion.

Private Banking performed well, reporting strong net income. A further recovery in client activity during the quarter led to revenues which were almost unchanged compared to the strong first quarter 2004. Reflecting healthy inflows from strategic key markets in Asia and Europe, the segment reported net new assets of CHF 7.0 billion for the first quarter. Private Banking also expanded its presence in key growth markets during that period.

Corporate & Retail Banking reported record net income for the first quarter, which was mainly attributable to sound revenues and a seasonally low cost base, as well as a continuing favorable credit environment. Improvements in the

segment's return on average allocated capital and cost/income ratio underscored the strength of its underlying business.

Our Institutional Securities segment produced a mixed first quarter. Fixed income trading results improved compared to the first quarter of 2004. Results in equity trading and underwriting as well as in debt underwriting and advisory declined. In comparison to the prior-year period, we made some progress in reducing expenses.

Wealth & Asset Management reported net income, which was largely unchanged compared to the first quarter of 2004. Alternative Capital saw an increase in fees, while Credit Suisse Asset Management and Private Client Services posted a decline in revenues versus the first quarter of 2004. The result was helped by a decrease in expenses compared to the same period of last year. The segment reported CHF 5.4 billion in net new assets in the first quarter.

Our insurance business, Winterthur, delivered a solid first-quarter performance, especially in Non-Life, which further improved its underwriting results. Life & Pensions reported a moderate increase in its total business volume, reflecting growth in several markets within Europe.

While the Group generated strong first-quarter results, it is nonetheless evident that we must continue to sharpen our focus and close gaps in our performance going forward. At the end of 2004, we announced our plans to combine our banking businesses globally to produce a more powerful integrated organization. The first stage in this process is the merger of our two Swiss banks, Credit Suisse and Credit Suisse First Boston, which is planned for later this month. The design of the new organization will be finalized by the end of the summer and we expect it to be operational as of January 1, 2006. My management team and I remain firmly convinced that our measures to enhance cooperation between our banking businesses in order to capture synergies for revenue growth and to improve our efficiency will generate major benefits for our clients, shareholders and employees and help to secure our position as a leading global financial services provider in the future.

Outlook

Following the generally more favorable business climate in the first quarter, we expect to see market activity slow considerably in the second quarter. These less buoyant market conditions are likely to result in more subdued client activity bringing with it a corresponding decrease in business volumes. However, we expect market conditions to improve in the second half of 2005. Credit Suisse Group will concentrate on diligently responding to these trends to capture growth opportunities and on ensuring we have the necessary measures in place to respond rapidly to changing client requirements.

Yours sincerely,

Oswald J. Grübel
May 2005

Credit Suisse Group

Credit Suisse Group recorded net income of CHF 1,910 million in the first quarter of 2005 versus CHF 1,861 million in the first quarter of 2004, an increase of CHF 49 million, or 3%. This was driven largely by increased net income in Corporate & Retail Banking and Non-Life, offset in part by declines in Institutional Securities and Life & Pensions, while Private Banking and Wealth & Asset Management reported net income largely unchanged compared to the first quarter of 2004.

Factors affecting results of operations

Major US equity indices showed minor declines during the first quarter while major European indices closed generally higher. Asian indices were mixed, with many, though higher than at the beginning of the quarter, closing below their quarterly highs. While trading volumes were up, volatility remained low relative to historical norms, however a flat yield curve and tight credit spreads created strong customer-driven activity and a more favorable trading environment. The Group's banking segments benefited generally from the improved market levels and activity.

The US Federal Reserve raised interest rates by 50 basis points during the quarter, while both the Bank of England and the European Central Bank left their respective rates unchanged. In line with the increase in US interest rates during the quarter, the US dollar strengthened against most major currencies, however it still remained weaker than in the first quarter of 2004. Movements in the US dollar – Swiss franc exchange rate impact Credit Suisse First Boston's reported results in particular, due to its businesses being managed on a US dollar basis. Specifically, the weakening of the dollar against the Swiss franc adversely affected revenues and favorably impacted expenses. When measured in Swiss francs versus the first quarter 2004, revenues were down 2%, while in US dollar terms revenues increased 4%.

The global credit environment continued to remain positive with an increased number of upgrades and a reduced number of downgrades by rating agencies. As was the case during 2004, this continued to have a favorable impact on the Group's provisions for credit losses.

Although the combined volume of debt and equity underwriting decreased by 5.2% compared to the first quarter of 2004, there was a substantial increase compared to the fourth quarter of 2004, including a number of large deals from European issuers and European governments. The asset-backed securities environment was highly competitive, which resulted in fee spread compression relative to the first quarter of 2004 and an 18% industry-wide decline in global high-yield debt issuance was recorded. Global industry volumes for investment grade debt issuances remained unchanged. A strong start was seen in the number of initial public offerings early in the quarter, however the pace reduced toward the end of the quarter. Overall, an industry-wide decline of 14% in the volume of new equity issuances was recorded compared to the first quarter of 2004. In addition, announced mergers and acquisitions activity trended higher in the quarter.

Summary of segment results

Credit Suisse consists of the Private Banking and Corporate & Retail Banking segments. Key results for the segments were as follows:

– Private Banking reported net income of CHF 685 million in the first quarter of 2005, virtually unchanged compared to the first quarter of 2004. In the course of expanding its presence in Asia, Private Banking opened an office in Bangkok, Thailand, in March 2005, which will serve as a point of contact for international clients. Private Banking's new branch in Dubai, United Arab Emirates, started business on April 1, 2005.

– Corporate & Retail Banking reported net income of CHF 274 million in the first quarter of 2005, an increase of CHF 85 million, or 45%, compared to the first quarter of 2004, with improved market levels and activity contributing

toward improved results. To support the strategic aim of achieving further growth in the Swiss residential mortgage business, Corporate & Retail Banking intensified its marketing activities. In the first quarter of 2005 Corporate & Retail Banking saw a growth rate of 8.7% (annualized) in residential mortgage volumes, which was again well above market growth.

Credit Suisse First Boston consists of the Institutional Securities and Wealth & Asset Management segments. During the first quarter of 2005, Credit Suisse First Boston continued its trend towards an improved financial performance, recording net income of CHF 675 million, down 11% compared to the strong first quarter of 2004 and up 103% compared to the fourth quarter of 2004. Credit Suisse First Boston reported net revenues of CHF 4,503 million for the quarter (excluding minority interest revenues arising from investments required to be consolidated under Financial Accounting Standards Board Interpretation No. 46 Revised, or FIN 46R), down 5% from the strong first quarter of 2004 and up 22% from the fourth quarter of 2004. A disciplined approach to compensation expenses was maintained, with its compensation to revenue ratio (excluding minority interest revenues arising from FIN 46R) reduced to 51.9% in the first quarter of 2005 compared to 53.2% in the first quarter of 2004 and 52.9% in the fourth quarter of 2004. In the first quarter of 2005, the effective tax rate was 22% compared to 25% in the first quarter of 2004. Excluding CHF 272 million of non-taxable minority interest income arising from FIN 46R, the effective tax rate was 28% for the first quarter of 2005. Key results for the segments were as follows:

– Institutional Securities reported net income of CHF 540 million in the first quarter of 2005, a decrease of CHF 83 million, or 13%, compared to the first quarter of 2004. In the current market environment, fixed income and equity trading performed well even though down by a combined 4%, and investment banking results decreased more significantly.

– Wealth & Asset Management reported net income of CHF 135 million in the first quarter of 2005, a decrease of CHF 1 million, or 1%, compared to the first quarter of 2004, due to lower revenues from Credit Suisse Asset Management and Private Client Services, as well as lower investment-related gains. This was offset in part by an increase in fees from Alternative Capital and a decrease in total operating expenses.

Winterthur consists of the Life & Pensions and Non-Life segments. A solid performance in Winterthur during the first quarter of 2005 resulted in net income of CHF 251 million. Total business volume increased and total operating expenses decreased resulting in productivity gains. Key results for the segments were as follows:

– Life & Pensions reported net income of CHF 126 million in the first quarter of 2005, a decrease of CHF 13 million, or 9%, compared to the first quarter of 2004. Total business volume increased moderately, reflecting growth in several markets within Europe. Life & Pensions achieved a strong start in the newly introduced second pillar pension business in Slovakia, achieving the number one position in the market. The business, which generates fee income for Life & Pensions as an administrator, is not reflected in total business volume.

– Non-Life reported net income of CHF 125 million in the first quarter of 2005, an increase of CHF 22 million, or 21%, compared to the first quarter of 2004. Non-Life's net income rose primarily due to improvements in underwriting results.

Credit Suisse Group consolidated results

Net revenues

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

The Group reported net revenues of CHF 17,062 million, an increase of CHF 248 million, or 1%, compared to the first quarter of 2004.

Net interest income of CHF 3,055 million was reported in the first quarter of 2005, a decrease of CHF 23 million, or 1%, compared to the first quarter of 2004. This was due largely to a decrease in Institutional Securities of CHF 133 million, or 13%, which was partially offset by an increase of CHF 103 million in Private Banking mainly as a result of dividend income on its own trading portfolio.

Commissions and fees decreased by CHF 324 million, or 9%, due mainly to a decline in investment banking fees in Institutional Securities of CHF 213 million, or 25%, compared to the first quarter of 2004. In addition, Private Banking reported a decrease of CHF 83 million, or 6%, due to declines in client activity compared to the first quarter of 2004, reflecting investor caution in the markets.

Trading revenues increased CHF 312 million, or 21%, to CHF 1,828 million, driven mainly by increased trading results in Institutional Securities, Corporate & Retail Banking and Life & Pensions. This was partially offset by the lower ex-dividend value of the trading portfolio in Private Banking.

Net realized gains/(losses) from investment securities decreased by CHF 102 million, or 19%, to CHF 426 million due to a decline in both insurance segments.

Insurance net premiums earned increased CHF 350 million, or 5%, to CHF 7,749 million, compared to the first quarter of 2004, due mainly to an increase in Life & Pensions of CHF 326 million, or 7%, driven predominantly by growth in Switzerland, Spain and Germany. This was partially offset by a decline in Non-Life of CHF 85 million, or 3%, due primarily to a lower level of premiums in the German health business as a result of premiums financed through bonuses.

Other revenues of CHF 765 million were reported compared to CHF 730 million in the first quarter of 2004, reflecting increased gains on private equity-related investments in Institutional Securities as well as an increase of CHF 79 million in Wealth & Asset Management. The latter related largely to minority interests arising on investments that are required to be consolidated under accounting rules (FIN 46R). This was partially offset by a decrease in Private Banking of CHF 36 million, due mainly to divestiture gains recorded in the first quarter of 2004.

Total benefits, claims and credit losses

The Group reported a net release in provisions for credit losses of CHF 36 million in the first quarter 2005, compared to a net expense of CHF 34 million in the first quarter of 2004. This was largely due to net releases of CHF 19 million in Corporate & Retail Banking and of CHF 19 million in Institutional Securities, reflecting the ongoing favorable credit environment.

Compared to the first quarter of 2004, policyholder benefits, claims and dividends increased by CHF 253 million, or 3%, to CHF 8,105 million. Life & Pensions reported an increase of CHF 276 million due to an increase in provisions for future benefits in line with the development of premiums. Additionally, Non-Life reported a decrease of CHF 78 million due mainly to lower policyholder claims. Investment income credited to policyholder account balances, reported by Life & Pensions, increased by CHF 54 million, or 20%, to CHF 324 million, due to improvements in the financial markets.

Operating expenses

The Group reported total operating expenses of CHF 6,146 million in the first quarter of 2005, a decrease of CHF 162

million, or 3%, compared to the first quarter of 2004.

Insurance underwriting, acquisition and administration expenses remained virtually unchanged at CHF 1,059 million.

Banking compensation and benefits decreased CHF 132 million, or 4%, to CHF 3,296 million, largely attributable to lower performance-related compensation in the Institutional Securities segment in line with the first quarter result. This was partially offset by increased salaries and benefits in Institutional Securities due mainly to increased headcount, as well as higher performance-related compensation in Corporate & Retail Banking.

Other expenses amounted to CHF 1,791 million, a decrease of CHF 32 million, or 2%, with higher commission expenses, professional fees and litigation provisions in Institutional Securities offset by decreases in Private Banking, reflecting on-going cost containment.

Income tax expense

The Group recorded income tax expense of CHF 630 million compared to CHF 570 million in the first quarter of 2004, an increase of CHF 60 million, or 11%, reflecting the Group's improved results in the first quarter of 2005.

The Group tax expense is reduced by non-taxable income arising on investments that are required to be consolidated under accounting rules (FIN 46R). The amount of non-taxable income relating to these investments varies from one period to the next and in the first quarter of 2005 amounted to CHF 272 million. Due mainly to this effect, the Group's effective tax rate in the first quarter of 2005 was 22%.

Cumulative effect of accounting changes

Reflecting the Group's application of SFAS 123R (Revised 2004) "Share-Based Payment", an after-tax gain of CHF 14 million was recorded, mainly within Institutional Securities, to reverse the expense previously recognized on outstanding unvested awards that are not expected to vest. For further information, readers are referred to the Summary of significant accounting policies and Recently adopted accounting standards in the Notes to the condensed consolidated financial statements.

Equity capital

Credit Suisse Group's consolidated BIS tier 1 ratio was 12.1% as of March 31, 2005, down from 12.3% as of December 31, 2004. This decrease was largely attributable to a general increase in risk-weighted assets mainly relating to the strengthening of the US dollar, an increase in market risk exposures and an increase in certain balance sheet positions in line with the Group's business plan. The Group's shareholders' equity as of March 31, 2005, increased to CHF 38.5 billion from CHF 36.3 billion as of December 31, 2004. At the Annual General Meeting on April 29, 2005, the Board of Directors proposed a dividend of CHF 1.50 per share and the launch of a share repurchase program for a value of up to CHF 6 billion. Both proposals were approved.

Compared to December 31, 2004, Winterthur improved its capital position, reporting shareholders' equity of CHF 8.5 billion as of March 31, 2005, an increase of CHF 0.3 billion. Winterthur's solvency position improved, with its consolidated EU solvency ratio increasing to 192% as of December 31, 2004, from 168% as of December 31, 2003.

Net new assets

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

The Group reported net new assets of CHF 15.4 billion in the first quarter of 2005, an increase of CHF 11.9 billion compared to the fourth quarter of 2004. Double-digit growth rates in asset gathering in key Asian and European markets contributed to net new assets of CHF 7.0 billion in Private Banking, while Wealth & Asset Management reported net new assets of CHF 5.1 billion, due mainly to corporate and client cash inflows as well as inflows related to the launch of a new real estate fund in Europe. As of March 31, 2005, the Group's total assets under management amounted to CHF 1,271.6 billion, an increase of 4.2% compared to December 31, 2004.

Credit Suisse Group structure

Credit Suisse Group comprises three divisions with six reporting segments: Credit Suisse, including the segments Private Banking and Corporate & Retail Banking; Credit Suisse First Boston, including the segments Institutional Securities and Wealth & Asset Management; and Winterthur, including the segments Life & Pensions and Non-Life.

The organizational chart presented below reflects the legal entity, division and segment structure that will be operational as of May 16, 2005. The Credit Suisse legal entity will comprise the former Credit Suisse First Boston bank and the former Credit Suisse bank, which will be merged on May 13, 2005. The merger of these Swiss legal entities constitutes the first step towards the creation of an integrated organization.

It is planned that the merged bank will combine the Credit Suisse and Credit Suisse First Boston divisions in 2006 in order to better address client needs in a rapidly changing market environment. The objective of the new integrated bank is to operate more efficiently and provide enhanced advisory services and products with a sharper focus on client needs. The new integrated bank will be structured along three lines of business. Private Client Services will include those activities geared toward private clients. Corporate & Investment Banking will include the products and services provided to corporate and investment banking clients. Asset Management will include asset management products and services.

The following table sets forth an overview of segment results:

1Q2005, in CHF m	Private Banking	Corporate & Retail Banking	Institutional Securities	Wealth & Asset Management	Life & Pensions Non-Life	Corporate Center	Credit Suisse Group

As of January 1, 2004, Credit Suisse Group bases its capital adequacy calculations on US GAAP, which is in accordance with the Swiss Federal Banking Commission (SFBC) newsletter 32 (dated December 18, 2003). The SFBC has advised Credit Suisse Group that it may continue to include as Tier 1 capital CHF 2.1 billion (December 31, 2004: CHF 2.1 bn) of equity from special purpose entities, which are deconsolidated under FIN 46R, and that Credit Suisse First Boston may include CHF 6.0 billion (December 31, 2004: CHF 5.7 billion) of such equity as Tier 1 capital.

Risk Management

Credit Suisse Group's overall position risk, measured on the basis of Economic Risk Capital (ERC), increased 6% in the first quarter of 2005 compared with the previous quarter. The increase was mainly due to higher risk exposures at Credit Suisse First Boston and the strengthening of the US dollar. The more narrowly defined average Value-at-Risk (VaR) in US dollar terms for the trading book of Credit Suisse First Boston increased by 22% during the first quarter of 2005 due to more active position taking in the mortgage and asset-backed securities markets. The loan portfolios across the Group continued to benefit from a favorable credit environment, resulting in a net release of credit provisions of CHF 36 million for the first quarter of 2005.

Economic Risk Capital trends

Credit Suisse Group assesses risk and economic capital adequacy using its Economic Risk Capital (ERC) model. ERC is designed to measure all quantifiable risks associated with the Group's activities on a consistent and comprehensive basis. Credit Suisse Group assigns ERC for position risk, operational risk and business risk. Position risk measures the potential annual economic loss associated with market, credit and insurance exposures that is exceeded with a given, small probability (1% for risk management purposes; 0.03% for capital management purposes). It is not a measure of the potential impact on reported earnings, since non-trading activities generally are not marked to market through earnings.

Over the course of the first quarter of 2005, Credit Suisse Group's 1-year, 99% position risk ERC increased by 6%, mainly due to higher commercial real estate, asset-backed securities and OTC equity derivative positions at Credit Suisse First Boston and the strengthening of the US dollar.

At the end of the first quarter of 2005, 51% of the Group's position risk ERC was with Credit Suisse First Boston, 32% with Winterthur, 15% with Credit Suisse and 2% with the Corporate Center.

Trading risks

Credit Suisse Group assumes trading risks through the trading activities of the Institutional Securities segment of Credit Suisse First Boston and – to a lesser extent – the trading activities of Credit Suisse. Trading risks are measured using Value-at-Risk (VaR) as one of a range of risk measurement tools. VaR is the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon and for a specified confidence level. In order to show the aggregate market risk in the Group's trading books, the table below shows the trading-related market risk for Credit Suisse First Boston, Credit Suisse and Credit Suisse Group on a consolidated basis, as measured by a 10-day VaR scaled to a 1-day holding period and based on a 99% confidence level. This means that there is a one in 100 chance of incurring a daily mark-to-market trading loss that is at least as large as the reported VaR.

Credit Suisse First Boston's average 1-day, 99% VaR in the first quarter of 2005 was CHF 63 million, compared to CHF 53 million during the fourth quarter of 2004. In US dollar terms, Credit Suisse First Boston's average 1-day, 99% VaR was USD 54 million during the first quarter 2005, compared to USD 45 million during the fourth quarter of 2004. The increase in average VaR was due to an increase in exposure in the mortgage and asset-backed securities markets as a result of engaging in additional market opportunities during the quarter.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

Credit Suisse' average 1-day, 99% VaR in the first quarter of 2005 was CHF 11 million, compared to CHF 10 million during the fourth quarter of 2004. The increase in average VaR was due to an increase in the average equity risk. The VaR development during the quarter was characterized by a reduction towards the end of the quarter due to a decrease in the inventory positions in alternative investment products.

The segments with trading portfolios use backtesting to assess the accuracy of the VaR model. Daily backtesting profit and loss is compared to VaR with a one-day holding period. Backtesting profit and loss is a subset of actual trading revenue and includes only the profit and loss effects due to movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions. It is appropriate to compare this measure with VaR for backtesting purposes, since VaR assesses only the potential change in position value due to overnight movements in financial market variables. On average, an accurate one-day, 99% VaR model should have no more than four backtesting exceptions per year. A backtesting exception occurs when the daily loss exceeds the daily VaR estimate.

Credit Suisse First Boston had no backtesting exceptions during the first quarter of 2005 (and one backtesting exception in the last twelve months). The histogram entitled "Frequency of trading revenue for Credit Suisse First Boston" compares the distribution of daily backtesting profit and loss during the first quarter of 2005 with the distribution of actual trading revenues, which includes fees, commissions, provisions and the profit and loss effects associated with any trading subsequent to the previous night's positions.

Loan exposure

Credit Suisse Group's total gross loan exposure grew 4% as of March 31, 2005 compared to December 31, 2004, with the increase concentrated at Credit Suisse.

Compared to December 31, 2004 non-performing loans and total impaired loans at Credit Suisse Group declined 10% as of March 31, 2005. The decline in non-performing loans and total impaired loans in the first quarter of 2005 was largely attributed to reductions at Credit Suisse where non-performing loans declined 10% and total impaired loans were 11% lower. Credit Suisse First Boston reported a small reduction in non-performing and total impaired loans, while Winterthur reported small increases.

During the first quarter of 2005, the Group recorded a net release of provisions for credit losses amounting to CHF 36 million, compared to a net release of CHF 127 million recorded in the fourth quarter of 2004. Presented in the accompanying tables are the additions, releases and recoveries included in determining the allowance for loan losses.

Coverage of non-performing loans and total impaired loans by valuation allowances at Credit Suisse Group improved at the end of the first quarter of 2005 compared to the end of the fourth quarter 2004, as coverage improved for Credit Suisse and Credit Suisse First Boston, but declined slightly at Winterthur.

The following table sets forth the Group's risk profile, using ERC as the common risk denominator:

in CHF m	Change in % from			Change Analysis: Brief Summary 31.03.05 vs 31.12.04
	31.03.05	31.12.04	31.03.04	
Interest Rate, Credit Spread ERC & Foreign Exchange ERC	4,519	7	(5)	Increase in interest rate risk at Winterthur, partially offset by lower foreign exchange risks at Credit Suisse First Boston
Equity Investment ERC	3,468	18	(3)	Increase at Credit Suisse First Boston due to higher equity trading risk in OTC equity derivatives
Swiss & Retail Lending ERC	1,660	1	(9)	No material change

International Lending ERC & Counterparty ERC	2,192	0	(10)	Lower lending risks associated with syndications in USD terms at Credit Suisse First Boston, fully offset by the impact of the higher USD exchange rate
Emerging Markets ERC	1,877	(6)	2	Decrease at Credit Suisse First Boston due to lower risk exposures in Brazil and Turkey
Real Estate ERC & Structured Asset ERC ¹⁾	4,008	11	22	Increase at Credit Suisse First Boston due to higher commercial real estate risk and higher asset-backed securities positions
Insurance Underwriting ERC	846	6	25	Increase related to revised assessment of risks in discontinued operations
Simple sum across risk categories	18,570	7	1	
Diversification benefit	(5,954)	9	(2)	
Total Position Risk ERC	12,616	6	2	

1-year, 99% position risk ERC, excluding foreign exchange translation risk. For an assessment of the total risk profile, operational risk ERC and business risk ERC have to be considered. For a more detailed description of the Group's ERC model, please refer to Credit Suisse Group's Annual Report 2004, which is available on the website: www.credit-suisse.com/annualreport2004. Prior period balances have been restated for methodology changes in order to maintain consistency over time.

¹⁾ This category comprises the real estate investments of Winterthur, Credit Suisse First Boston's commercial real estate exposures, Credit Suisse First Boston's residential real estate exposures, Credit Suisse First Boston's asset-backed securities exposure as well as the real estate acquired at auction and real estate for own use in Switzerland.

The following table sets forth the trading-related market risk exposure for Credit Suisse, Credit Suisse First Boston and Credit Suisse Group on a consolidated basis, as measured by scaled one-day, 99% VaR:

in CHF m	1Q2005				4Q2004

Provision for credit losses disclosed in the Credit Suisse Group consolidated statements of income also includes provisions for lending-related exposure of CHF 4 million, CHF 6 million and CHF 0 million for 1Q2005, 4Q2004 and 1Q2004, respectively.

Private Banking

Private Banking provides high-net-worth individuals in Switzerland and in numerous other markets around the world with wealth management products and services.

Private Banking reported a strong result for the first quarter of 2005. One of the drivers was a recovery in client activity compared to the second half of 2004.

In the course of the expansion of its presence in Asia, Private Banking opened an office in Bangkok, Thailand, in March 2005. The new office will serve as a point of contact for international clients. Private Banking's new branch in Dubai, United Arab Emirates, started business on April 1, 2005.

In the first quarter of 2005, Private Banking reported net income of CHF 685 million, which was virtually unchanged compared to CHF 681 million in the first quarter of 2004; however, it represents an increase of CHF 69 million, or 11%, compared to the fourth quarter of 2004.

Net revenues amounted to CHF 1,912 million in the first quarter of 2005, almost unchanged versus the first quarter of 2004. Compared to the previous quarter, net revenues increased by CHF 195 million, or 11%. Net interest income benefited primarily from dividend income from the own equity portfolio. This was offset by the lower ex-dividend value of the own equity trading portfolio reported in trading revenues. However, strong income from trading execution had a positive impact on trading revenues. Commissions and fees amounted to CHF 1,209 million, which was CHF 83 million, or 6%, below the first quarter of 2004, due to reduced brokerage fees and product sales. Compared to the previous quarter, however, commissions and fees increased by CHF 60 million, or 5%, driven mainly by increased brokerage fees due to higher client activity.

Total operating expenses amounted to CHF 1,060 million in the first quarter of 2005, CHF 13 million, or 1%, below the first quarter of 2004. Compared to the fourth quarter of 2004, operating expenses increased by CHF 67 million, or 7%, due mainly to an increase in performance-related compensation accruals reflecting the better result. Other expenses were CHF 460 million, which is below the first quarter of 2004, reflecting ongoing cost containment.

The cost/income ratio stood at 55.4% in the first quarter of 2005, 0.1 percentage points above the corresponding period in 2004. However, compared to the previous quarter, the cost/income ratio improved by 2.4 percentage points.

Private Banking's gross margin stood at 137.7 basis points in the first quarter of 2005, which is 8.6 basis points below the first quarter of 2004 but well above Private Banking's mid-term target of 130 basis points. Compared to the previous quarter, the gross margin improved by 9.5 basis points due to a substantial increase in underlying revenues.

Private Banking reported a net new asset inflow of CHF 7.0 billion for the first quarter of 2005, which represents an annualized growth rate of 5.2%. Strategic key markets in Asia and Europe reported double-digit growth rates in asset gathering.

Assets under management benefited from higher equity markets as well as from the strengthening of the US dollar and stood at CHF 564.3 billion at the end of the first quarter of 2005, up CHF 25.2 billion, or 5%, compared to year-end 2004.

The following table presents the results of the Private Banking segment:

in CHF m	1Q2005	4Q2004	1Q2004	Change in % from 4Q2004	Change in % from 1Q2004

Corporate & Retail Banking

Corporate & Retail Banking offers banking products and services to corporate and retail clients in Switzerland.

Corporate & Retail Banking reported a strong result in the first quarter of 2005 and further improved its return on average allocated capital.

To support its strategic aim of achieving further growth in the Swiss residential mortgage business, Corporate & Retail Banking intensified its marketing activities. In the first quarter of 2005, Corporate & Retail Banking reported a growth rate of 8.7% (annualized) in residential mortgage volumes, which was again well above market growth. Corporate & Retail Banking recorded net income of CHF 274 million in the first quarter of 2005. This represents an increase of CHF 85 million, or 45%, compared to the corresponding period of last year and of CHF 17 million, or 7%, compared to the previous quarter. This result mainly reflects sound revenues, a seasonally low cost base as well as a net release of provisions for credit losses.

Net revenues in the first quarter of 2005 amounted to CHF 860 million, up CHF 73 million, or 9%, compared to the corresponding period of 2004. This growth in net revenues was mainly driven by a strong trading result as well as by higher commission and fee income. These improvements more than offset the decline in net interest income of CHF 29 million, or 5%, reflecting higher hedging costs as well as margin pressure in the Swiss market.

Provisions for credit losses in the first quarter of 2005 resulted in a net release of CHF 19 million, compared to net provisions of CHF 48 million in the corresponding period of last year. The net release in the first quarter of 2005 reflects an ongoing favorable credit environment requiring a low level of new provisions. Total impaired loans declined from CHF 3.7 billion at the end of December 2004 to CHF 3.2 billion at the end of March 2005.

Total operating expenses amounted to CHF 529 million in the first quarter of 2005. The increase of CHF 35 million, or 7%, compared to the same period of the previous year and of CHF 52 million, or 11%, compared to the prior

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

quarter, was driven mainly by higher performance-related compensation accruals reflecting the better result. Other expenses decreased by CHF 50 million or 18% compared to the previous quarter.

Corporate & Retail Banking achieved a return on average allocated capital of 22.4%, which is an improvement of 7.3 percentage points compared to the corresponding period of the previous year and an improvement of 1.6 percentage points compared to the previous quarter.

The segment's cost/income ratio stood at 61.5%, an improvement of 1.3 percentage points compared to the first quarter of 2004 but 2.1 percentage points above the previous quarter.

The following table presents the results of the Corporate & Retail Banking segment:

Institutional Securities

Institutional Securities provides financial advisory, lending and capital raising services, as well as sales and trading for global users and suppliers.

Institutional Securities' first-quarter 2005 net income decreased CHF 83 million to CHF 540 million compared with the first quarter 2004, primarily reflecting lower revenues relative to an exceptionally strong first quarter in the previous year. When measured in Swiss francs versus the first quarter 2004, net revenues were down 4%, while in US dollar terms, net revenues were up 1%. Compared to the fourth quarter of 2004, net income increased CHF 271 million, reflecting a 32% increase in net revenues and a 14% increase in total operating expenses.

Due to the continued favorable credit environment during the first quarter 2005, provisions for credit losses amounted to a net release of CHF 19 million. This compares to a net release of CHF 21 million in the first quarter 2004 and a net release of CHF 118 million in the fourth quarter 2004, which benefited from a significant recovery related to the sale of an impaired loan. Compared to December 31, 2004, total impaired loans decreased CHF 29 million to CHF 620 million, and valuation allowances as a percentage of total impaired loans increased 5.5 percentage points to 87.6% as of March 31, 2005.

Total operating expenses of CHF 3,006 million were CHF 92 million, or 3%, lower than in the first quarter of 2004. Compensation expenses decreased 8%, or CHF 181 million, in the first quarter of 2005, reflecting lower performance-related costs, partially offset by increased salaries and benefits relating to higher headcount, severance costs of CHF 58 million and higher costs related to deferred compensation plans. Other expenses increased 11% to CHF 936 million, primarily reflecting higher commission expenses, professional fees and litigation provisions. Total operating expenses were up 14% compared to the fourth quarter of 2004, reflecting a 29% increase in compensation expenses and a 10% decrease in other expenses.

Total investment banking revenues include debt underwriting, equity underwriting and advisory and other fees. First-quarter 2005 investment banking results declined 25% when compared with the first quarter 2004, mainly as a result of decreases in debt and equity underwriting as well as a small decline in advisory fees.

Debt underwriting revenues of CHF 306 million decreased 23% from the first quarter 2004 due primarily to lower results in asset-backed securities and commercial structured products. The asset-backed securities environment was

highly competitive in the quarter and resulted in fee spread compression relative to the first quarter of the previous year. In addition, first-quarter 2004 commercial structured products results were particularly strong. Leverage finance results were essentially flat from first-quarter 2004 levels despite an 18% industry-wide decline in global high-yield debt issuance. For the first quarter of 2005, Institutional Securities was ranked third in global high-yield new issuances. First-quarter 2005 investment grade capital markets revenues increased despite a significantly lower industry market share ranking, which reflected a change in client focus and strategy in this business. Global industry volume for investment grade debt issuance was unchanged compared to the first quarter 2004.

Equity underwriting revenues in the first quarter of 2005 decreased 43% compared to the first quarter of 2004 to CHF 138 million. This decrease reflected a 14% industry-wide decline in the volume of new equity issuances and strong first-quarter 2004 results. Similarly, equity underwriting revenues decreased 31% compared to the fourth quarter of 2004 primarily due to a decline in industry-wide new issuances. Institutional Securities increased its market share to rank second in global IPOs in the first quarter 2005, with key transactions for the quarter including the Premiere AG IPO (the largest media IPO in German history), the AFK Sistema IPO (the largest Russian IPO in history) and the Huntsman IPO and convertible offering (the largest US IPO by a chemicals sector issuer on record).

First-quarter 2005 advisory and other fees of CHF 183 million decreased 9% compared to the first quarter of 2004 and 15% compared to the fourth quarter of 2004, due in part to lower announced transaction volumes in 2004 and in part to the timing of fees. Institutional Securities increased its global mergers and acquisitions market share based on announced transaction dollar volume to number six in the first quarter of 2005 from number eleven for the full year 2004. Institutional Securities advised on five of the top ten announced transactions in the first quarter 2005 — the sale of SunGard Data Systems to a group of private investment firms (the largest leveraged buyout since 1989), the sale of AT&T to SBC Communications, Federated Department Stores' acquisition of May Department Stores, the sale of Gecina to Metrovacesa (the largest European real estate transaction on record) and the sale of Toys 'R' Us to a private investor group (the largest retail leveraged buyout in history).

Total trading revenues include fixed income and equity sales and trading. Total trading revenues for the first quarter of 2005 decreased CHF 122 million, or 4%, compared to an exceptionally strong first quarter of 2004. This slight decline primarily reflects weaker equity trading results, particularly in risk taking and positioning and in the convertibles business due to low volatility levels. Institutional Securities' first quarter 2005 average daily VaR was CHF 63 million, down from CHF 66 million in the first quarter 2004 and up from CHF 53 million in the fourth quarter 2004.

Fixed income trading generated revenues of CHF 1,926 million in the first quarter of 2005, an increase of 3% from the strong first quarter 2004. The increase primarily reflects improved results in emerging markets trading, asset-backed securities and commercial and residential structured products, partially offset by weaker results in risk taking and positioning and leverage finance. Structured products results increased as a result of improved origination, distribution and trading conditions in local markets. Leverage finance results were down primarily due to lower volumes in the US high-yield market and spread compression. Effective January 1, 2005, Institutional Securities enhanced its estimates of fair value of over-the counter (OTC) derivatives to bring them closer to how the dealer market prices such contracts. Specifically, the valuations were enhanced to take into account better market data regarding counterparty credit exposure and to remove certain administrative cost adjustments that are no longer an element of OTC derivative pricing. This change in estimate resulted in a CHF 125 million adjustment to the valuation of OTC derivatives, which increased revenues for the first quarter 2005. Compared to the fourth quarter 2004, fixed income trading increased substantially by 51%, due to strong performances in emerging markets trading, commercial and residential structured products, interest rate products and the above-mentioned enhancements in fair value estimates, partially offset by weaker results in treasury products.

Equity trading revenues decreased 16% to CHF 926 million in the first quarter of 2005 compared to the first quarter 2004. This decline reflects weaker revenues in the convertibles business due to low volatility, lower risk taking and positioning results and weaker equity derivatives results. These declines were partially offset by improved revenues in

prime services, driven primarily by business growth. The prime services business continued to gain momentum by adding valuable client mandates and by advancing in *Global Custodian* magazine's annual Prime Brokerage survey to the number two position among all prime brokers, up from number eight in 2004, with twenty "best-in-class" awards. In addition, activity in the Latin America equity cash business was higher as a result of an increase in client-driven activity. Institutional Securities continued to provide more clients with advanced execution services, which includes its award-winning algorithmic trading platform, resulting in an increased revenue contribution. Equity trading revenues increased 12%, or CHF 98 million, compared to the fourth quarter of 2004, primarily due to stronger revenues in equity derivatives and prime services.

Other (including loan portfolio) revenues of CHF 363 million in the first quarter of 2005 increased 98% from the first quarter 2004 due to an increase in gains on private equity-related investments managed separately from Alternative Capital and higher minority interest revenues.

The following table presents the results of the Institutional Securities segment:

in CHF m	1Q2005	4Q2004	1Q2004	Change in % from 4Q2004	Change in % from 1Q2004

Wealth & Asset Management

Wealth & Asset Management offers international asset management services to institutional, mutual fund and private investors, provides advisory services for, and invests in, alternative investment vehicles including private equity funds, and provides financial advisory services to high-net-worth individuals and corporate investors.

The Wealth & Asset Management segment is comprised of Credit Suisse Asset Management, Alternative Capital, Private Client Services and Other.

Wealth & Asset Management reported net income of CHF 135 million for the first quarter of 2005, a decrease of CHF 1 million compared to the first quarter of 2004. When measured in Swiss francs versus the first quarter of 2004, net revenues were up 8%, while in US dollar terms, net revenues were up 14%. Net income increased CHF 72 million compared to the fourth quarter 2004. The fourth quarter included severance costs of CHF 88 million associated with the announced changes in the structure of Alternative Capital.

Wealth & Asset Management's first-quarter of 2005 net revenues were CHF 936 million, a 8% increase from the first quarter of 2004. Revenues before investment-related gains decreased 1% to CHF 667 million compared to the first quarter of 2004, primarily due to lower revenues from Credit Suisse Asset Management and Private Client Services, offset in part by an increase in fees from Alternative Capital driven by higher placement fees in the private funds business.

First-quarter of 2005 investment-related gains decreased 17% compared to the first quarter of 2004, to CHF 105 million reflecting gains from the sale of private equity investments and an increase in interest costs associated with carrying the investment portfolio.

Minority interest revenues, arising from investments that are required to be consolidated under accounting rules (FIN 46R), increased CHF 96 million in the first quarter of 2005 to CHF 164 million compared to the first quarter of 2004.

Compared with the first quarter of 2004, total operating expenses decreased by 4%, or CHF 26 million, reflecting lower other expenses and lower compensation expenses. Compensation expenses in the first quarter of 2005 included severance costs of CHF 7 million.

Wealth & Asset Management had an inflow of net new assets of CHF 5.4 billion during the quarter due to inflows of CHF 3.2 billion in Private Client Services as a result of corporate and client cash inflows, inflows of CHF 1.6 billion in Credit Suisse Asset Management, primarily due to the launch of a new real estate fund in Europe, and inflows of CHF 0.6 billion in Alternative Capital. Assets under management as of March 31, 2005, of CHF 502.3 billion increased by 4% compared to December 31, 2004, due to foreign currency exchange rate movements, net new asset inflows and positive market performance, partially offset by the divestment of a fund in Alternative Capital.

The following table presents the results of the Wealth & Asset Management segment:

in CHF m	1Q2005	4Q2004	1Q2004	Change in % from 4Q2004	Change in % from 1Q2004

Life & Pensions

Life & Pensions offers life insurance and pension solutions to private and corporate clients in Switzerland and selected markets in Europe and Asia through multiple distribution channels.

In the first quarter of 2005, Life & Pensions reported net income of CHF 126 million, down 9% from a net income of CHF 139 million in the first quarter of 2004. This decline was primarily attributable to lower investment income from net realized gains, partially offset by improvements in the underlying business.

Total business volume increased 7% compared to the corresponding period of the previous year. Growth in the first quarter of 2005 was primarily driven by a solid increase in gross premiums written of CHF 327 million, or 7%, to CHF 5.0 billion, which was mainly from Switzerland, Spain and Germany. Deposit business, which includes unit-linked business, grew by 5%, with significant growth in the Central and Eastern European, Swiss and German operations.

In the first quarter of 2005, the net investment return backing traditional life policies amounted to 5.3%, compared to 5.6% in the corresponding quarter of the previous year. Net current investment return remained stable at 3.8% but net realized gains decreased by 0.3 percentage points to 1.5%.

Dividends to policyholders in the first quarter of 2005 decreased CHF 47 million. The first quarter of 2005 reflected the policyholder's share of the improved performance in the quarter, whereas the higher level of charges in the first quarter of 2004 was primarily due to the introduction of the legal quota in the Swiss group life business.

Insurance underwriting and acquisition expenses decreased slightly, by CHF 19 million, compared to the first quarter of 2004. Administration expenses increased CHF 22 million compared to the first quarter of 2004, which was due to the unusually low level of administration expenses in 2004. The expense ratio decreased by 0.3 percentage points to 6.3%.

The following table presents the results of the Life & Pensions segment:

in CHF m	1Q2005	4Q2004	1Q2004	Change in % from 4Q2004	Change in % from 1Q2004

Non-Life

Non-Life provides non-life insurance products to private clients and small and medium-sized corporate clients in Switzerland, North America and certain markets in Europe.

In the first quarter of 2005, Non-Life reported net income of CHF 125 million, an increase of 21% compared to net income of CHF 103 million in the first quarter of 2004. This increase was driven primarily by further improvements in

underwriting results and reduced charges for divested operations.

Net premiums earned decreased by CHF 85 million, or 3%, to CHF 2.7 billion in the first quarter of 2005 compared to the same quarter of the previous year. This decline was primarily due to a lower level of premiums financed through bonuses in the German health business, partially offset by premium growth in Switzerland.

In the first quarter of 2005, the net investment return decreased slightly to 5.0%. Net current investment return remained stable at 3.5%, and net realized gains decreased by 0.1 percentage points to 1.5%.

The combined ratio improved by 1.0 percentage points to 99.4% in the first quarter of 2005, compared with the same quarter of the previous year. This development was driven by improvements in most market units. The claims ratio decreased by 1.6 percentage points to 75.3% in 2005 versus the corresponding period of the previous year, due mainly to a lower level of large-scale losses and improvements in several market units.

Administration expenses decreased CHF 15 million, whereas insurance underwriting and acquisition expenses increased slightly from CHF 362 million in the first quarter of 2004 to CHF 374 million in the first quarter of 2005. The expense ratio increased by 0.6 percentage points to 24.1% in the first quarter of 2005, compared to the same quarter of the previous year, driven primarily by the decrease in net premiums earned.

Non-Life reported a net loss from discontinued operations of CHF 19 million in the first quarter of 2005, due to charges related to risks retained on the business sold in the UK in 2003.

The following table presents the results of the Non-Life segment:

in CHF m	1Q2005	4Q2004	1Q2004	Change in % from 4Q2004	Change in % from 1Q2004

Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group (the Group) are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) and are stated in Swiss francs (CHF). For a description of the Group's significant accounting policies, see note 1 of the consolidated US GAAP financial statements for the year ended December 31, 2004, included in Credit Suisse Group's Annual Report 2004.

Certain financial information that is normally included in annual financial statements prepared in accordance with US GAAP but not required for interim reporting purposes has been condensed or omitted. Certain reclassifications have been made to the prior period's financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated statements of financial condition and income for the interim periods presented.

The results of operations for interim periods are not necessarily indicative of results for the entire year. These condensed consolidated financial statements should be read in conjunction with the consolidated US GAAP financial statements and notes thereto for the year ended December 31, 2004.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Share-based compensation

Through December 31, 2002, the Group accounted for its employee share-based compensation program under the intrinsic value method in accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). Under APB 25, no compensation expense was generally recognized for share options, as they were granted at an exercise price equal to the market price of the Group's shares on the grant date.

Effective January 1, 2003, the Group adopted, using the prospective method, the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation (SFAS 123), as amended by SFAS No. 148, Accounting for Stock-Based Compensation – Transition and Disclosure (SFAS 148). Under the prospective method, all new equity-based compensation awards granted to employees and existing awards modified on or after January 1, 2003, are accounted for at fair value. Compensation expense is measured at the grant or modification date based on the fair value of the award and is recognized in the statement of income over the required service period on a straight-line basis. Refer to “New accounting pronouncements” below for a discussion of the Group's adoption of the new share-based payment accounting standard effective January 1, 2005.

The following table presents net income and basic and diluted earnings per share as reported, and as if all outstanding awards were accounted for at fair value under SFAS 123 for the periods prior to January 1, 2005.

in CHF m, except the per share amounts	4Q2004	1Q2004
Net income - as reported	959	1,861
Add: Share-based compensation expense included in reported net income, net of related tax effects	158	186
Deduct: Total share-based compensation expense determined under the fair value method for all awards vested during the year, net of related tax effects	(155)	(190)
Net income - pro forma	962	1,857
Net income available for common shares for basic EPS - pro forma	929	1,794
Net income available for common shares for diluted EPS - pro forma	929	1,880
Basic earnings per share - as reported	0.82	1.56
Basic earnings per share - pro forma	0.82	1.55
Diluted earnings per share - as reported	0.80	1.54
Diluted earnings per share - pro forma	0.80	1.53

NEW ACCOUNTING PRONOUNCEMENTS

In December 2004, the FASB issued SFAS No. 123 (Revised 2004), Share-Based Payment (SFAS 123R). SFAS 123R is effective for annual reporting periods beginning after June 15, 2005. The Group had previously adopted the recognition provisions of SFAS 123, as discussed above. Under SFAS 123R, a company that has previously adopted the recognition provisions of SFAS 123 must adopt the revised standard using the modified prospective method, and may also choose to apply the modified retrospective method to previous reporting periods. The Group has early adopted the new standard as of January 1, 2005, applying the modified prospective method.

The most significant accounting implications of the adoption of SFAS 123R for the Group were as follows: (i) Inclusion of forfeitures in the estimate of compensation expense determined at the grant date rather than as they occur. The Group recorded a cumulative adjustment of approximately CHF 14 million during the first quarter of 2005, to reverse the expense previously recognized on all outstanding unvested awards expected to be forfeited. For new grants after January 1, 2005, forfeitures will be included in the initial estimation of the compensation expense at the grant date; (ii) Recognition of compensation cost for all outstanding unvested awards as of January 1, 2005, that were previously accounted for under APB 25 and for which no expense was previously recognized, based on the original grant-date fair value of each award over the remaining requisite service period of the respective award. The recognition of this expense was not material; and (iii) Adoption of changes to the presentation of the statement of cash flows in accordance with the revised standard.

In December 2003, the AICPA issued Statement of Position (SOP) 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3). SOP 03-3 provides guidance on the accounting for differences between contractual and expected cash flows from the purchaser's initial investment in loans or debt securities acquired in a transfer, if those differences are attributable, at least in part, to credit quality. Among other things, SOP 03-3: (1) prohibits the recognition of the excess of contractual cash flows as an adjustment of yield, loss accrual or valuation allowance at the time of purchase; (2) requires that subsequent increases in expected cash flows be recognized prospectively through an adjustment of yield; and (3) requires that subsequent decreases in expected cash flows be recognized as an impairment. In addition, SOP 03-3 prohibits the creation or carrying over of a valuation allowance in the initial accounting of all loans and debt securities within its scope that are acquired in a transfer. SOP 03-3 becomes effective for loans or debt securities acquired in fiscal years beginning after December 15, 2004. The adoption of SOP 03-3 did not have a material impact on the Group's financial position, results of operations or cash flows.

Earnings per share

The following table sets forth details of the calculation of earnings per share:

in CHF m	1Q2005	4Q2004	1Q2004
Income from continuing operations before cumulative effect of accounting changes	1,916	964	1,931
Income/(loss) from discontinued operations, net of tax	(20)	(5)	(64)
Cumulative effect of accounting changes, net of tax	14	0	(6)
Net income – as reported	1,910	959	1,861
Net income available for common shares for basic EPS ¹⁾	1,864	926	1,798
Net income available for common shares for diluted EPS ²⁾	1,948	926	1,884
Weighted-average common shares outstanding for basic EPS (in m)	1,134.9	1,130.4	1,154.4
Effect of dilutive securities			
Convertible securities	40.4	↗	40.4
Share options	8.2	7.4	9.7
Share awards	14.4	23.6	22.2
Adjusted weighted-average common shares for diluted EPS	1,197.9	1,161.4	1,226.7

Basic earnings per share, in CHF

Income from continuing operations before cumulative effect of accounting changes	1.65	0.82	1.63
Income/(loss) from discontinued operations, net of tax	(0.02)	0.00	(0.06)
Cumulative effect of accounting changes, net of tax	0.01	0.00	(0.01)
Net income available for common shares	1.64	0.82	1.56

Diluted earnings per share, in CHF

Income from continuing operations before cumulative effect of accounting changes	1.63	0.80	1.59
Income/(loss) from discontinued operations, net of tax	(0.01)	0.00	(0.05)
Cumulative effect of accounting changes, net of tax	0.01	0.00	0.00
Net income available for common shares	1.63	0.80	1.54

1) In accordance with EITF 03-6, the basic earnings per share calculation considers the effect of participating securities. Specifically, the allocation of undistributed income related to the mandatory convertible securities is a reduction to the net income available to common shareholders for the purposes of the calculation.

2) Under the if-converted method for calculating diluted EPS, the interest on the mandatory convertible securities is included, when the effect is dilutive.

3) For 4Q2004 the computation of the diluted earnings per share excludes the effect of the potential exchange of convertible securities as the effect would be anti-dilutive.

Pension

The following table sets forth details of the net periodic pension cost for the Swiss and international defined benefit pension and other post-retirement defined benefit plans:
in CHF m

	1Q2005	4Q2004	1Q2004
Service costs on benefit obligation	100	76	119
Interest costs on benefit obligation	184	174	181
Expected return on plan assets	(224)	(233)	(235)
Amortization of			
Unrecognized transition obligation/(asset)	0	(1)	(1)
Prior service cost	10	11	9
Unrecognized (gains)/losses	13	11	10
Net periodic pension costs	83	38	83
Settlement (gains)/losses	0	3	0
Curtailment (gains)/losses	(1)	(1)	5
Termination losses	6	6	5
Total pension costs	88	46	93

Credit Suisse Group previously disclosed in its financial statements for the year ended December 31, 2004, that it expected to contribute CHF 618 million to the pension plans in 2005. As of March 31, 2005, CHF 156 million of contributions have been made.

Guarantees and commitments

Guarantees

The following tables set forth details of contingent liabilities associated with guarantees:

As of March 31, 2005, in CHF m	Total gross amount	Total net amount ¹⁾	Carrying value	Collateral received
Credit guarantees and similar instruments	10,629	9,117	17	3,802
Performance guarantees and similar instruments	6,634	5,908	136	3,338
Securities lending indemnifications	29,229	29,229	0	29,229
Derivatives	266,508	266,508	2,369	300
Other guarantees ²⁾	2,940	2,940	25	1,510
Total guarantees	315,940	313,702	2,547	38,179

As of December 31, 2004, in CHF m	Total gross amount	Total net amount ¹⁾	Carrying value	Collateral received
Credit guarantees and similar instruments	10,425	8,907	12	3,992
Performance guarantees and similar instruments	6,386	5,694	112	3,552
Securities lending indemnifications	24,808	24,808	0	24,808
Derivatives	247,454	247,454	2,482	186
Other guarantees ²⁾	3,112	3,112	25	1,348
Total guarantees	292,185	289,975	2,631	33,886

¹⁾ Total net amount relates to gross amount less any participations.

²⁾ Contingent considerations in business combinations, residual value guarantees and other indemnifications.

Guarantees provided by the Group are broadly classified as follows: Credit guarantees and similar instruments, Performance guarantees and similar instruments, Securities lending indemnifications, Derivatives and Other guarantees. Readers are referred to note 37 "Guarantees and commitments" in the Credit Suisse Group Annual Report 2004 for a further description of Guarantees.

In accordance with the terms of the Sale and Purchase Agreement (SPA) between XL Insurance (Bermuda) Limited (XL or the purchaser) and Winterthur Swiss Insurance (Winterthur) for Winterthur International, Winterthur is required to participate with the purchaser in a review for any adverse development of loss and unearned premium reserves during a three-year post-completion seasoning period, which expired on June 30, 2004. This seasoning process will result in a balancing payment being due to the purchaser.

The provision recorded by Winterthur at March 31, 2005 for this sale-related contingency, net of pre-payments to and risks retained by XL amounted to CHF 659 million (USD 550 million). The provision, which reflects the adverse development of CHF 780 million (USD 651 million) included in Winterthur's submitted Seasoned Net Reserves Amount (SNRA), is based on an extensive analysis of data provided by XL. Winterthur utilized leading third-party claims, actuarial and legal specialists to assist in estimating the reserves required for this liability. On the basis of facts known, Credit Suisse Group believes that the currently recorded provision is adequate to cover the contingencies related to this transaction.

The amount payable to XL for the SNRA is ultimately subject to an assessment by the Independent Actuary designated in the SPA, who will determine which of the estimates submitted by the two parties is closest to the amount which the Independent Actuary believes to be the correct amount, and that estimate will be conclusively deemed to be the relevant SNRA. This process is ongoing and, consequently, the ultimate resolution of this matter could result in a further significant increase in the required provision for the Winterthur International sale-related contingencies. Winterthur and XL submitted in February 2005 their respective determinations of the SNRA to the Independent Actuary, who was officially engaged on April 13, 2005. The difference between the two positions under review by the Independent Actuary is CHF 1,089 million (USD 909 million).

In addition to the SPA, Winterthur has other agreements, including retrocession agreements with XL, which could result in payments to XL. Furthermore, XL submitted in the fourth quarter of 2004 the first details of its claims relating to alleged breach of warranties in connection with the 2001 sale. With the assistance of outside counsel, Winterthur continues to evaluate these claims and on the basis of facts known, believes that the currently recorded provisions are adequate to cover the contingencies related to this litigation and any other agreements with XL.

The Group provides indemnifications to certain counterparties in connection with its normal operating activities. The Group has determined that it is not possible to estimate the maximum amount it could be obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obligation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses, and may, as a result of its membership arrangements, be required to perform if another member defaults. The Group has determined that it is not possible to estimate the maximum amount of these obligations and believes that any potential requirement to make payments under these arrangements is remote.

Other commitments

The following table sets forth details of other commitments:

As of March 31, 2005, in CHF m	Total gross amount	Total net amount	Collateral received
Irrevocable commitments under documentary credits	4,373	4,122	1,776
Loan commitments	165,458	165,458	94,842
Forward reverse repurchase agreements	16,905	16,905	16,905
Other	4,025	4,025	564
Total other commitments	190,761	190,510	114,087

As of December 31, 2004, in CHF m	Total gross amount	Total net amount	Collateral received
Irrevocable commitments under documentary credits	4,390	4,076	1,577
Loan commitments	149,607	149,607	83,209
Forward reverse repurchase agreements	15,326	15,326	15,326
Other	2,625	2,625	567
Total other commitments	171,948	171,634	100,679

Other commitments of the Group are broadly classified as follows: Irrevocable commitments under documentary credits, Loan commitments, Forward reverse repurchase agreements and Other. Readers are referred to note 37 “Guarantees and commitments” of the Credit Suisse Group Annual Report 2004 for a further description of Other off-balance sheet commitments.

Variable interest entities

FIN 46R “Consolidation of Variable Interest Entities – An Interpretation of ARB No. 51”, requires the Group to consolidate all variable interest entities (VIEs) for which it is the primary beneficiary, defined as the entity that will absorb a majority of expected losses, receive a majority of the expected residual returns, or both. The Group consolidates all VIEs for which it is the primary beneficiary.

As a normal part of its business, the Group engages in transactions with entities that are considered VIEs. These transactions include selling or purchasing assets, acting as a counterparty in derivatives transactions and providing liquidity, credit or other support. Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investment opportunities, and as part of these activities, the Group may retain interests in VIEs. In general, investors in consolidated VIEs do not have recourse to the Group in the event of a default, except where a guarantee was provided to the investors or where the Group is the counterparty to a derivative transaction involving VIEs.

Edgar Filing: CREDIT SUISSE GROUP - Form 6-K

The Group's involvement with VIEs may be broadly grouped into three primary categories: Collateralized debt obligations (CDOs), Commercial paper conduits and Financial intermediation. Readers are referred to note 1 "Summary of significant accounting policies", note 2 "Recently issued accounting standards" and note 39 "Variable interest entities" on pages 117, 133 and 197, respectively, of Credit Suisse Group's Annual Report 2004 for a further description of the Group's policy on consolidation of VIEs and a description of the nature of the Group's involvement with these entities.

In the first quarter of 2005, the Group recorded revenue of CHF 272 million as a result of the consolidation of VIEs under FIN 46R. Net income was unaffected as offsetting minority interests were recorded in the condensed consolidated statements of income.

The following table summarizes the estimated total assets by category related to non-consolidated VIEs:

in CHF m	Carrying value of VIEs' total assets	
	31.03.05	31.12.04
Collateralized debt obligations	36,442	57,517
Commercial paper conduits	5,037	4,456
Financial intermediation	57,458	67,326
Total	98,937	129,299

The following table summarizes the total assets, by category, related to VIEs consolidated as a result of the Group being the primary beneficiary:

in CHF m	VIEs' total assets	
	31.03.05	31.12.04
Collateralized debt obligations	1,927	1,398
Commercial paper conduits	2	3
Financial intermediation	13,561	11,119
Total assets consolidated pursuant to FIN 46R	15,490	12,520

Collateralized debt obligations

As part of its structured finance business, the Group purchases loans and other debt obligations from and on behalf of clients for the purpose of securitization.

The Group has consolidated all CDO VIEs for which it is the primary beneficiary resulting in the inclusion by the Group of approximately CHF 1.9 billion of assets and liabilities of these VIEs. The beneficial interests issued by these VIEs are payable solely from the cash flows of the related collateral, and the creditors of these VIEs do not have recourse to the Group in the event of default.

The Group also retains certain debt and equity interests in open CDO VIEs that are not consolidated because the Group is not the primary beneficiary. The Group's exposure in these CDO transactions typically consists of the interests retained in connection with its underwriting or market-making activities. The Group's maximum loss exposure is equal to the carrying value of these retained interests, which are reported as trading assets and carried at fair value and totaled CHF 1.5 billion as of March 31, 2005.

Commercial paper conduits

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for several commercial paper conduit vehicles (CP conduits). The Group does not sell assets to the CP conduits and does not have any ownership interest in the CP conduits.

The Group's commitments to CP conduits consist of obligations under liquidity and credit enhancement agreements.

As of March 31, 2005, the Group's maximum loss exposure to non-consolidated CP conduits was CHF 9.9 billion, which consisted of CHF 5.0 billion of funded assets and the CP conduits' commitments to purchase CHF 4.9 billion of additional assets.

The Group believes that the likelihood of incurring a loss equal to this maximum exposure is remote because the assets held by the CP conduits, after giving effect to related asset-specific credit enhancements primarily provided by the clients, must be classified as investment grade when acquired by the CP conduits.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The investors typically retain the risk of loss on such transactions but the Group may provide principal protection on the securities to limit the investors' exposure to downside risk.

As a financial intermediary, the Group may administer or sponsor the VIE, transfer assets to the VIE, provide collateralized financing, act as a derivatives counterparty, advise on the transaction, act as investment advisor or investment manager, act as underwriter or placement agent or provide credit enhancement, liquidity or other support to the VIE. The Group also owns securities issued by the VIEs structured to provide clients with investment opportunities, for market-making purposes and as investments. The Group's maximum loss exposure to VIEs related to financial intermediation activities is estimated to be CHF 9.0 billion as of March 31, 2005, which represents the notional amount of any guarantees and the fair value of all other interests held. Further, the Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, including hedging strategies and the risk of loss that is retained by investors.

Cautionary statement regarding forward-looking information

This Quarterly Report contains statements that constitute forward-looking statements. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to our plans, objectives or goals; our future economic performance or prospects; the potential effect on our future performance of certain contingencies; and assumptions underlying any such statements.

Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include (i) market and interest rate fluctuations; (ii) the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations in particular; (iii) the ability of counterparties to meet their obligations to us; (iv) the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations; (v) political and social developments, including war, civil unrest or terrorist activity; (vi) the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations; (vii) the ability to maintain sufficient liquidity and access capital markets; (viii) operational factors such as systems failure, human error, or the failure to properly implement procedures; (ix) actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations; (x) the effects of changes in laws, regulations or accounting policies or practices; (xi) competition in geographic and business areas in which we conduct our operations; (xii) the ability to retain and recruit qualified personnel; (xiii) the ability to maintain our reputation and promote our brands; (xiv) the ability to increase market share and control expenses; (xv) technological changes; (xvi) the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users; (xvii) acquisitions, including the ability to integrate successfully acquired businesses; (xviii) the adverse resolution of litigation and other contingencies; and (xix) our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive; when evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, as well as the risks identified in our most recently filed Form 20-F and reports on Form 6-K furnished to the US Securities and Exchange Commission.

QUARTERLY RESULTS 2005 Q1

DISCLAIMER

Cautionary statement regarding forward-looking information

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995.

Forward-looking statements involve inherent risks and uncertainties, and we might not be able to achieve the predictions, forecasts, projections and other outcomes we describe or imply in forward-looking statements.

A number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions we express in these forward-looking statements, including those we identify in "Risk Factors" in our Annual Report on Form 20-F for the fiscal year ended December 31, 2004 filed with the US Securities and Exchange Commission, and in other public filings and press releases.

We do not intend to update these forward-looking statements except as may be required by applicable laws.

Slide 1

A STRONG START TO 2005

Solid revenue generation in all segments on the back of improved market conditions

Net income of CHF 1.9 bn

Doubled from 4Q04 and up 3% from 1Q04

Return on equity of 20.6% for the Group, at the top end of target range

Banking RoE of 22.9%

Winterthur RoE of 12.0%

Net new assets at Private Banking of CHF 7.0 bn with an annualized growth rate of 5.2%

Share repurchase approved at shareholders' meeting - program to start as early as May 9

RESULTS OVERVIEW

in CHF m, except where indicated	1Q05	VS 4Q04	VS 1Q04
Net revenues	17,062	31%	1%
Total benefits, claims and credit losses	8,069	52%	2%
Total operating expenses	6,146	0%	(3%)
Net income	1,910	99%	3%
Return on equity □ Group	20.6%		
Return on equity □ Banking	22.9%		
Return on equity □ Winterthur	12.0%		
Basic earnings per share (in CHF)	1.64	100%	5%
Diluted earnings per share (in CHF)	1.63	104%	6%

Slide 25

SUMMARY AND OUTLOOK

Strong start to 2005

Solid revenue generation supported by improved market conditions

Market conditions in the second quarter likely to result in more subdued

client activity and decrease in business volume

Recovery of market conditions expected for the second half of 2005

Concentrate on diligently responding to these trends

Ensure the necessary measures are in place to respond rapidly to changing client requirements

Capture growth opportunities
