ENTERPRISE FINANCIAL SERVICES CORP AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies used by Enterprise Financial Services Corp (the "Company" or "Enterprise") in the preparation of the condensed consolidated financial statements are summarized below:

Business and Consolidation

Enterprise is a financial holding company that provides a full range of banking and wealth management services to individuals and corporate customers located in the St. Louis, Kansas City and Phoenix metropolitan markets through its banking subsidiary, Enterprise Bank & Trust (the "Bank").

Operating results for the three months ended March 31, 2015 are not necessarily indicative of the results that may be expected for any other interim period or for the year ending December 31, 2015. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Basis of Financial Statement Presentation

The condensed consolidated financial statements of the Company and its subsidiaries have been prepared in accordance with the accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. The condensed consolidated financial statements include the accounts of the Company and its subsidiaries, all of which are wholly owned. All intercompany accounts and transactions have been eliminated. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

NOTE 2 - EARNINGS PER SHARE

Basic earnings per common share data is calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Common shares outstanding include common stock and restricted stock awards where recipients have satisfied the vesting terms. Diluted earnings per common share gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and the if-converted method for convertible trust preferred securities.

The following table presents a summary of per common share data and amounts for the periods indicated.

(in thousands, except per share data)	Three months ended March 31,	
	2015	2014
Net income as reported	\$9,346	\$5,848
Impact of assumed conversions		
Interest on 9% convertible trust preferred securities, net of income tax	—	66
Net income available to common shareholders and assumed conversions	\$9,346	\$5,914
Weighted average common shares outstanding	19,934	19,521
Incremental shares from assumed conversions of convertible trust preferred securities	—	230
Additional dilutive common stock equivalents	223	198
Weighted average diluted common shares outstanding	\$20,157	\$19,949
Basic earnings per common share:	\$0.47	\$0.30
Diluted earnings per common share:	\$0.46	\$0.30

The calculation of diluted earnings per common share for the three months ended March 31, 2015, and 2014, excludes the impact of 0.3 million common stock equivalents, because their effect was anti-dilutive.

NOTE 3 - INVESTMENTS

The following table presents the amortized cost, gross unrealized gains and losses and fair value of securities available for sale and held to maturity:

		March 31, 2015			
(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total securities held to maturity	\$45,985	\$150	\$(340)	\$45,795	

At March 31, 2015, and December 31, 2014, there were no holdings of securities of any one issuer in an amount greater than 10% of shareholders' equity, other than the U.S. Government agencies and sponsored enterprises. The agency mortgage-backed securities are all issued by U.S. Government-sponsored enterprises. Available for sale securities having a fair value of \$251.4 million and \$315.8 million at March 31, 2015, and December 31, 2014, respectively, were pledged as collateral to secure deposits of public institutions and for other purposes as required by law or contract provisions.

The amortized cost and estimated fair value of debt securities at March 31, 2015, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The weighted average life of the mortgage-backed securities is approximately 4 years.

(in thousands)	Available for sale		Held to maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$4,331	\$4,382	\$—	\$—
Due after one year through five years	100,610	102,383	662	664
Due after five years through ten years	25,767	26,561	12,963	12,875
Due after ten years	2,900	2,620	1,258	1,237
Mortgage-backed securities	270,455	274,115	30,680	31,035
	\$404,063	\$410,061	\$45,563	\$45,811

The following table represents a summary of investment securities that had an unrealized loss:

(in thousands)	March 31, 2015					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

	\$43,732	\$306	\$26,189	\$972	\$69,921	\$1,278

(in thousands)	December 31, 2014					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Obligations of U.S. Government-sponsored enterprises	\$5,399	\$10	\$24,852	\$143	\$30,251	\$153
Obligations of states and political subdivisions	16,827	343	5,349	398	22,176	741
Agency mortgage-backed securities	26,367	56	97,054	1,527	123,421	1,583
	\$48,593	\$409	\$127,255	\$2,068	\$175,848	\$2,477

The unrealized losses at both March 31, 2015, and December 31, 2014, were primarily attributable to changes in market interest rates since the securities were purchased. Management systematically evaluates investment securities for other-than-temporary declines in fair value on a quarterly basis. This analysis requires management to consider various factors, which include among other considerations (1) the present value of the cash flows expected to be collected compared to the amortized cost of the security, (2) duration and magnitude of the decline in value, (3) the financial condition of the issuer or issuers, (4) structure of the security, and (5) the intent to sell the security or whether it is more likely than not that the Company would be required to sell the security before its anticipated recovery in market value. At March 31, 2015, management performed its quarterly analysis of all securities with an unrealized loss and concluded no individual securities were other-than-temporarily impaired.

The gross gains and gross losses realized from sales of available for sale investment securities were as follows:

(in thousands)	Three months ended March 31,	
	2015	2014
Gross gains realized	\$63	\$—
Gross losses realized	(40) —

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt, such as current financial information, historical payment experience, credit documentation, and current economic factors among other factors. This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

Grades 1, 2, and 3 – Includes loans to borrowers with a continuous record of strong earnings, sound balance sheet condition and capitalization, ample liquidity with solid cash flow, and whose management team has experience and depth within their industry.

Grade 4 – Includes loans to borrowers with positive trends in profitability, satisfactory capitalization and balance sheet condition, and sufficient liquidity and cash flow.

Grade 5 – Includes loans to borrowers that may display fluctuating trends in sales, profitability, capitalization, liquidity, and cash flow.

Grade 6 – Includes loans to borrowers where an adverse change or perceived weakness has occurred, but may be correctable in the near future. Alternatively, this rating category may also include circumstances where the

borrower is starting to reverse a negative trend or condition, or has recently been upgraded from a 7, 8, or 9 rating.

Grade 7 – Watch credits are borrowers that have experienced financial setback of a nature that is not determined to be severe or influence ‘ongoing concern’ expectations. Although possible, no loss is anticipated, due to strong collateral and/or guarantor support.

Grade 8 – Substandard credits will include those borrowers characterized by significant losses and sustained downward trends in balance sheet condition, liquidity, and cash flow. Repayment reliance may have shifted to secondary sources. Collateral exposure may exist and additional reserves may be warranted.

Grade 9 – Doubtful credits include borrowers that may show deteriorating trends that are unlikely to be corrected.

Collateral values may appear insufficient for full recovery, therefore requiring a partial charge-off, or debt renegotiation with the borrower. The borrower may have declared bankruptcy or bankruptcy is likely in the near term. All doubtful rated credits will be on non-accrual.

NOTE 6 - COMMITMENTS AND CONTINGENCIES

The Company issues financial instruments with off balance sheet risk in the normal course of the business of meeting the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments may involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized in the consolidated balance sheets.

The Company's extent of involvement and maximum potential exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments.

The Company uses the same credit policies in making commitments and conditional obligations as it does for financial instruments included on its consolidated balance sheets. At March 31, 2015, there were no unadvanced commitments on impaired loans.

The contractual amounts of off-balance-sheet financial instruments as of March 31, 2015, and December 31, 2014, are as follows:

(in thousands)	March 31, 2015	December 31, 2014
Commitments to extend credit	\$995,715	\$947,424
Standby letters of credit	52,981	50,108

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments usually have fixed expiration dates or other termination clauses, may have significant usage restrictions, and may require payment of a fee. Of the total commitments to extend credit at March 31, 2015, and December 31, 2014, approximately \$73.0 million and \$65.9 million, respectively, represent fixed rate loan commitments. Since certain of the commitments may expire without being drawn upon or may be revoked, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable, inventory, premises and equipment, and real estate. Other liabilities include approximately \$0.2 million for estimated losses attributable to the unadvanced commitments at March 31, 2015 and December 31, 2014.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These standby letters of credit are issued to support contractual obligations of the Company's customers. The credit risk involved in issuing letters of credit is essentially the same as the risk involved in extending loans to customers. The approximate remaining term of standby letters of credit range from 1 month to 2.9 years at March 31, 2015.

Contingencies

The Company and its subsidiaries are, from time to time, parties to various legal proceedings arising out of their businesses. Management believes there are no such proceedings pending or threatened against the Company or its subsidiaries which, if determined adversely, would have a material adverse effect on the business, consolidated financial condition, results of operations or cashflows of the Company or any of its subsidiaries.

NOTE 7 - DERIVATIVE FINANCIAL INSTRUMENTS

Client-Related Derivative Instruments. The Company enters into interest rate swaps to allow customers to hedge changes in fair value of certain loans. The table below summarizes the notional amounts and fair values of the client-related derivative instruments:

Securities available for sale. Securities classified as available for sale are reported at fair value utilizing Level 2 and Level 3 inputs. Fair values for Level 2 securities are based upon dealer quotes, market spreads, the U.S. Treasury yield curve, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions at the security level. At March 31, 2015, Level 3 securities available for sale

consist primarily of three Auction Rate Securities that are valued based on the securities' estimated cash flows, yields of comparable securities, and live trading levels.

Portfolio Loans. Certain fixed rate portfolio loans are accounted for as trading instruments and reported at fair value. Fair value on these loans is determined using a third party valuation model with observable Level 2 market data inputs.

State tax credits held for sale. At March 31, 2015, of the \$42.4 million of state tax credits held for sale on the condensed consolidated balance sheet, approximately \$10.3 million were carried at fair value. The remaining \$32.1 million of state tax credits were accounted for at cost.

The Company is not aware of an active market that exists for the 10-year streams of state tax credit financial instruments. However, the Company's principal market for these tax credits consists of Missouri state residents who buy these credits and local and regional accounting firms who broker them. As such, the Company employed a discounted cash flow analysis (income approach) to determine the fair value.

The fair value measurement is calculated using an internal valuation model with market data including discounted cash flows based upon the terms and conditions of the tax credits. If the underlying project remains in compliance with the various federal and state rules governing the tax credit program, each project will generate about 10 years of tax credits. The inputs to the discounted cash flow calculation include: the amount of tax credits generated each year, the anticipated sale price of the tax credit, the timing of the sale and a discount rate. The discount rate is estimated using the LIBOR swap curve at a point equal to the remaining life in years of credits plus a 205 basis point spread. With the exception of the discount rate, the other inputs to the fair value calculation are observable and readily available. The discount rate is considered a Level 3 input because it is an "unobservable input" and is based on the Company's assumptions. An increase in the discount rate utilized would generally result in a lower estimated fair value of the tax credits. Alternatively, a decrease in the discount rate utilized would generally result in a higher estimated fair value of the tax credits. Given the significance of this input to the fair value calculation, the state tax credit assets are reported as Level 3 assets.

Derivatives. Derivatives are reported at fair value utilizing Level 2 inputs. The Company obtains counterparty quotations to value its interest rate swaps and caps. In addition, the Company validates the counterparty quotations with third party valuation sources. Derivatives with negative fair values are included in Other liabilities in the consolidated balance sheets. Derivatives with positive fair value are included in Other assets in the consolidated balance sheets.

Level 3 financial instruments

The following table presents the changes in Level 3 financial instruments measured at fair value on a recurring basis as of March 31, 2015 and 2014.

Purchases, sales, issuances and settlements. There were no Level 3 purchases during the quarter ended March 31, 2015 or 2014.

Transfers in and/or out of Level 3. There were no transfers in and/or out of Level 3 for the quarter ended March 31, 2015 and 2014.

From time to time, the Company measures certain assets at fair value on a nonrecurring basis. These include assets that are measured at the lower of cost or fair value that were recognized at fair value below cost at the end of the period.

The following table presents financial instruments and non-financial assets measured at fair value on a non-recurring basis as of March 31, 2015.

(1) The amounts represent only balances measured at fair value during the period and still held as of the reporting date.

Impaired loans are reported at the fair value of the underlying collateral. Fair values for impaired loans are obtained from current appraisals by qualified licensed appraisers or independent valuation specialists. Other real estate owned is adjusted to fair value upon foreclosure of the underlying loan. Subsequently, foreclosed assets are carried at the

23

lower of carrying value or fair value less costs to sell. Fair value of other real estate is based upon the current appraised values of the properties as determined by qualified licensed appraisers and the Company's judgment of other relevant market conditions. Certain state tax credits are reported at cost.

NOTE 9 - NEW AUTHORITATIVE ACCOUNTING GUIDANCE

FASB ASU 2014-09, "Revenue from Contracts with Customers" In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers". The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle of ASU 2014-09 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the new guidance, an entity will (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the contract's performance obligations; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification. The new guidance is effective for annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 for public companies. Early adoption is not permitted. Entities have the option of using either a full retrospective or modified approach to adopt ASU 2014-09. The Company is currently evaluating the new guidance and has not determined the impact this standard may have on its financial statements nor decided upon the method of adoption.

FASB ASU 2014-11, "Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures" In June 2014, the FASB issued ASU No. 2014-11, "Transfers and Servicing (Topic

860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures." The objective of ASU 2014-11 is to amend the accounting for certain secured financing transactions, and requires enhanced disclosures with respect to transactions recognized as sales in which exposure to the derecognized asset is retained through a separate agreement with the counterparty. In addition, the guidance requires enhanced disclosures with respect to the types and quality of financial assets pledged in secured financing transactions. The guidance became effective in the first quarter of 2015, except for the disclosures regarding the types and quality of financial assets pledged, which will become effective in the second quarter of 2015. The adoption of the guidance did not have a material impact on the Company's consolidated balance sheets or statements of operations.

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Some of the information in this report contains "forward-looking statements" within the meaning of and intended to be covered by the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements typically are identified with use of terms such as "may," "might," "will," "should," "expect," "plan," "anticipate," "b," "estimate," "predict," "potential," "could," "continue" and the negative of these terms and similar words, although some forward-looking statements are expressed differently. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain. You should be aware that our actual results could differ materially from those contained in the forward-looking statements due to a number of factors, including, but not limited to: credit risk; changes in the appraised valuation of real estate securing impaired loans; outcomes of litigation and other contingencies; exposure to general and local economic conditions; risks associated with rapid increases or decreases in prevailing interest rates; consolidation within the banking industry; competition from banks and other financial institutions; our ability to attract and retain relationship officers and other key personnel; burdens imposed by federal and state regulation; changes in regulatory requirements; changes in accounting regulation or standards applicable to banks; and other risks discussed under the caption "Risk Factors" of our most recently filed Form 10-K and within this Form 10-Q, all of which could cause the Company's actual results to differ from those set forth in the forward-looking statements.

Readers are cautioned not to place undue reliance on our forward-looking statements, which reflect management's analysis and expectations only as of the date of such statements. Forward-looking statements speak only as of the date they are made, and the Company does not intend, and undertakes no obligation, to publicly revise or update forward-looking statements after the date of this report, whether as a result of new information, future events or otherwise, except as required by federal securities law. You should understand that it is not possible to predict or identify all risk factors. Readers should carefully review all disclosures we file from time to time with the Securities and Exchange Commission which are available on our website at www.enterprisebank.com.

Introduction

The following discussion describes the significant changes to the financial condition of the Company that have occurred during the first three months of 2015 compared to the financial condition as of December 31, 2014. In addition, this discussion summarizes the significant factors affecting the results of operations, liquidity and cash flows of the Company for the three months ended March 31, 2015, compared to the same period in 2014. This discussion should be read in conjunction with the accompanying condensed consolidated financial statements included in this report and our Annual Report on Form 10-K for the year ended December 31, 2014.

Below are highlights of the Company's Core performance measures, which we believe are important measures of financial performance, but are non-GAAP measures. Core performance measures include contractual interest on PCI loans, but exclude incremental accretion on these loans, and exclude the Change in the FDIC receivable, gain or loss of other real estate covered under FDIC loss share agreements, and certain other income and expense items the Company believes are not indicative of or useful to measure the Company's operating performance on an ongoing basis. A reconciliation of Core performance measures has been included in this MD&A section under the caption "Use of Non-GAAP Financial Measures".

(1) A non-GAAP measure. A reconciliation has been included in this MD&A section under the caption "Use of Non-GAAP Financial Measures."

During the quarter ended March 31, 2015, the Company noted the following:

The Company reported net income of \$9.3 million for the first three months of 2015, compared to \$6.0 million in the linked fourth quarter, and \$5.9 million for the same period in 2014. The increase in net income is due to a decrease in noninterest expenses from improved expense control initiatives and reversal of provision for loan losses of PCI loans due to higher expected cash flows.

On a core basis¹, net income was \$7.1 million, or \$0.35 per share for the first three months of 2015, compared to \$6.7 million, or \$0.33 per share in the linked fourth quarter and \$5.6 million, or \$0.28 per share in the prior year period. The increase from the prior year was primarily due to increases in earning asset balances, driving growth in core net interest income combined with a reduction in noninterest expenses.

Net interest income in the first quarter of 2015 decreased \$1.8 million from the linked fourth quarter and \$1.3 million from the prior year period due to lower balances of PCI loans, lower accelerated cash flows on PCI loans, and lower interest rates on newly originated loans. These items were partially offset by lower interest expense primarily related to the payoff of debt with higher interest rates in the prior year.

On a core basis¹, net interest income remained stable when compared to the linked fourth quarter, and increased 8% from the prior year period due to strong portfolio loan growth and improvements in funding costs during 2014.

•

The Core net interest margin¹, defined as Net interest margin (fully tax equivalent), including contractual interest on PCI loans, but excluding the incremental accretion on these loans, increased 2 basis points from

29

the prior year period primarily due to the managed reductions in funding costs combined with an improved earning asset mix.

Fee income, which primarily includes the Company's wealth management revenue, service charges and other fees on deposit accounts, sales of other real estate, and state tax brokerage activity, decreased 9% compared to the prior year period largely due to lower gains on sales of other real estate.

Noninterest expense declined 5% and the Company's efficiency ratio improved to 61.14% compared to the prior year period. Core noninterest expenses¹ declined by 6% partially due to lower legal expenses on problem loans and overall expense management .

Balance sheet highlights

Loans – Loans totaled \$2.5 billion at March 31, 2015, including \$94.8 million of purchase credit impaired ("PCI") loans. Portfolio loans excluding PCI loans increased \$261.6 million, or 12%, from March 31, 2014. Commercial & Industrial loans increased \$204.7 million, or 19%, Consumer and other loans increased \$22.3 million, or 47%, Construction loans and Residential real estate loans increased \$37.1 million, or 13%, and Commercial Real Estate decreased \$2.6 million. See Item 1, Note 4 – Portfolio Loans for more information.

Deposits – Total deposits at March 31, 2015 were \$2.7 billion, an increase of \$222.5 million, or 9%, from March 31, 2014 partially due to enhanced deposit gathering efforts in both commercial and business banking.

Asset quality – Nonperforming loans, including troubled debt restructurings, were \$15.1 million at March 31, 2015, compared to \$15.5 million at March 31, 2014. Nonperforming loans represented 0.62% of portfolio loans at March 31, 2015 versus 0.71% at March 31, 2014. There were no portfolio loans that were 30-89 days delinquent and still accruing at March 31, 2015 or March 31, 2014.

Provision for portfolio loan losses was an expense of \$1.6 million for the three months ended March 31, 2015, compared to expense of \$1.0 million for the three months ended March 31, 2014. See Item 1, Note 4 – Portfolio Loans and, Provision for Loan Losses and Allowance for Loan Losses in this section for more information.

(1) Change in volume multiplied by yield/rate of prior period.

(2) Change in yield/rate multiplied by volume of prior period.

(3) Nontaxable income is presented on a fully-tax equivalent basis using the combined statutory federal and state income tax rate in effect for each year.

NOTE: The change in interest due to both rate and volume has been allocated to rate and volume changes in proportion to the relationship of the absolute dollar amounts of the change in each.

Net interest income (on a tax equivalent basis) was \$29.5 million for the three months ended March 31, 2015 compared to \$30.8 million for the same period of 2014, a decrease of \$1.3 million, or 4%. Total interest income decreased \$1.9 million and total interest expense decreased \$0.6 million. The tax-equivalent net interest rate margin was 3.92% for the first quarter of 2015, compared to 4.13% for the fourth quarter of 2014, and 4.39% in the first

quarter of 2014.

Interest rates remain at historically low levels and continue to negatively impact loan yields leading to lower net interest margins. As seen in the table above, changes in interest rates have led to a \$1.1 million, and \$1.5 million

32

reduction, in interest income in our portfolio and PCI loans, respectively. Additionally, the run-off of higher yielding PCI loans continue to negatively impact net interest margin leading to a \$2.1 million decrease in interest income due to volume. To partially mitigate lower yields on loans, the Company has taken specific actions to lower deposit and other borrowing costs including the prepayment of \$50.0 million of FHLB borrowings in December 2014.

Core net interest margin¹ was 3.46% for the quarter ended March 31, 2015, compared to 3.44% for the same prior year period. Core net interest margin¹ increased 2 basis points from the prior year quarter primarily due to the managed reductions in funding costs combined with an improved earning asset mix. These factors mitigated continued pressure in portfolio loan yields and reductions in PCI loan balances as those balances continue to run-off. Pressure on loan yields and continued reductions in PCI loan balances could lead to a decline in core net interest margin in 2015.

Purchase Credit Impaired "PCI" Contribution

The following table illustrates the financial contribution of PCI loans and other assets covered under FDIC shared loss agreements for the most recent five quarters.

(in thousands)	For the Quarter ended				
	March 31, 2015	December 31, 2014	September 30, 2014	June 30, 2014	March 31, 2014
Contractual interest income	\$1,539	\$1,840	\$1,701	\$1,878	\$1,988

PCI assets income before income tax expense	\$4,788	\$4,269	\$1,665	\$2,984	\$1,942

At March 31, 2015, the remaining accretable yield on the portfolio was estimated to be \$33 million and the non-accretable difference was approximately \$38 million. Absent cash flow accelerations or pool impairment, the Company currently estimates average PCI loan balances to be approximately \$80 million and income before tax expense on PCI assets will be approximately \$8 million to \$10 million in 2015.

Noninterest Income

The following table presents a comparative summary of the major components of noninterest income.

(in thousands)	Three months ended March 31,		Increase (decrease)		
	2015	2014			
Wealth management revenue	\$1,740	\$1,722	\$18	1	%

(1) A non-GAAP measure. A reconciliation has been included in this MD&A section under the caption "Use of Non-GAAP Financial Measures."

Noninterest income decreased \$0.3 million, or 9% in the first quarter of 2015 compared to the first quarter of 2014. Core noninterest income¹ declined slightly in the first quarter of 2015 due to lower gains on sale of other real estate than in the first quarter of 2014. Wealth management revenues were flat in the first quarter of 2015. Assets under administration at March 31, 2015 of \$1.5 billion grew 2% compared to March 31, 2014.

Noninterest Expense

The following table presents a comparative summary of the major components of noninterest expense:

Other loss share expenses	470	829	(359) (43)%
Total noninterest expense	\$ 19,950	\$ 21,102	\$(1,152) (5)%

(1) A non-GAAP measure. A reconciliation has been included in this MD&A section under the caption "Use of Non-GAAP Financial Measures."

Noninterest expenses were \$20.0 million for the quarter ended March 31, 2015, compared to \$24.8 million for the quarter ended December 31, 2014, and \$21.1 million for the quarter ended March 31, 2014. Core noninterest expenses¹, which exclude certain items and expenses directly related to PCI loans and assets covered under loss share agreements decreased to \$19.1 million for the quarter ended March 31, 2015, from \$20.2 million for the linked quarter and \$20.4 million for the prior year period.

The Company's Core efficiency ratio¹ was 60.7% for the quarter ended March 31, 2015, compared to 62.8% for the linked quarter, and 68.2% for the prior year period, and reflects lower legal expenses on problem loans, overall expense management and revenue growth trends. Core efficiency ratio is a non-GAAP measure. The attached tables contain a reconciliation of Core efficiency ratio.

The Company anticipates total noninterest expenses to be between \$19 million and \$21 million per quarter for 2015.

Income Taxes

For the quarter ended March 31, 2015, the Company's income tax expense, which includes both federal and state taxes, was \$5.0 million compared to \$3.0 million for the same period in 2014. The combined federal and state effective income tax rates were relatively consistent at 35.0% and 34.0% for the quarters ended March 31, 2015, and 2014, respectively.

Assets

Loans by Type

The Company grants commercial, residential, and consumer loans primarily in the St. Louis, Kansas City and Phoenix metropolitan areas. The Company has a diversified loan portfolio, with no particular concentration of credit in any one economic sector; however, a substantial portion of the portfolio is secured by real estate. The ability of the Company's borrowers to honor their contractual obligations is partially dependent upon the local economy and its effect on the real estate market. The following table summarized the composition of the Company's loan portfolio:

(in thousands)	March 31, 2015	December 31, 2014	Increase (decrease)		
Commercial and industrial	\$1,265,104	\$1,270,259	\$(5,155)(0.4)%

Total loans	\$2,530,347	\$2,533,019	\$(2,672)(0.1)%

Portfolio loans remained stable at \$2.4 billion at March 31, 2015 when compared to the linked quarter. PCI loans totaled \$94.8 million at March 31, 2015, a decrease of \$4.3 million, or 4.4%, from the linked fourth quarter, primarily as a result of principal paydowns and accelerated loan payoffs.

Provision and Allowance for Loan Losses

The following table summarizes changes in the allowance for loan losses arising from loans charged off and recoveries on loans previously charged off, by loan category, and additions to the allowance charged to expense.

(in thousands)	Three months ended March 31,

Net chargeoffs to average loans (annualized)	0.25	% 0.08
Allowance for loan losses to total loans	1.24	1.28

The provision for loan losses on portfolio loans for the three months ended March 31, 2015 was \$1.6 million compared to \$1.0 million for the comparable 2014 period. The provision for loan losses for the three month period ended March 31, 2015 was primarily to provide for charge-offs incurred during the quarter.

For PCI loans, the Company remeasures contractual and expected cash flows periodically. When the remeasurement process results in a decrease in expected cash flows, typically due to an increase in expected credit losses, impairment is recorded through provision for loan losses. Similarly, when expected credit losses decrease in the remeasurement process, prior recorded impairment is reversed before the yield is increased prospectively. The provision for loan losses on PCI loans for the three months ended March 31, 2015 was a benefit of \$3.3 million compared to provision of \$3.3 million for the comparable 2014 period.

The allowance for loan losses on portfolio loans was 1.24% of total loans at March 31, 2015, and December 31, 2014, compared to 1.28% at March 31, 2014. Management believes the allowance for loan losses is adequate to absorb inherent losses in the loan portfolio and coverage trends reflect steady improvements in credit quality measures and classified loan levels. The reduction in the ratio of allowance for loan losses to total loans over the prior year period is due to continued strong credit performance, as well as continued improvement in our loss migration results.

Nonperforming assets

The following table presents the categories of nonperforming assets and other ratios as of the dates indicated.

(in thousands)	March 31, 2015	December 31, 2014	March 31, 2014

(1) Excludes purchase credit impaired loans and assets covered under FDIC shared-loss agreements, except for their inclusion in total assets.

Nonperforming loans

Nonperforming loans exclude PCI loans that are accounted for on a pool basis, as the pools are considered to be performing. See Item 1, Note 5 – Purchase Credit Impaired Loans for more information on these loans.

Nonperforming loans based on loan type were as follows:

(in thousands)	March 31, 2015	December 31, 2014	March 31, 2014
Construction and land development	\$6,366	\$6,866	\$7,729

Other real estate

Other real estate at March 31, 2015, was \$5.6 million, compared to \$24.9 million at March 31, 2014. Approximately 64% of total Other real estate, or \$3.6 million, is covered by FDIC shared-loss agreements.

The following table summarizes the changes in Other real estate for the quarter ending:

(in thousands)	March 31, 2015	December 31, 2014	March 31, 2014	
Other real estate beginning of period	\$7,840	\$11,087	\$23,252	
Additions and expenses capitalized to prepare property for sale	890	2,401	4,722	
Writedowns in value	(224) (468) (536)
Sales	(2,922) (5,180) (2,539)
Other real estate end of period	\$5,584	\$7,840	\$24,899	

The writedowns in fair value were recorded in Loan legal and other real estate expense based on current market activity shown in the appraisals. In addition, for the three months ended March 31, 2015, the Company realized a negligible net gain on the sale of other real estate and recorded these gains as part of Noninterest income.

Liabilities

Liabilities totaled \$2.9 billion at March 31, 2015, consistent with balances at December 31, 2014. Liabilities remained stable due to a \$183 million increase in total deposits, offset by a decrease of \$138 million in short-term Federal Home Loan Bank advances and a decrease of \$53 million in other borrowings.

Deposits (in thousands)	March 31, 2015	December 31, 2014	Increase (decrease)

Demand deposits / total deposits	25	% 26			%

Total deposits at March 31, 2015 were \$2.7 billion, an increase of \$183 million, or 7.4%, from December 31, 2014. The increase in deposits within our money market accounts reflect initiatives to enhance overall deposit levels as well as to improve our funding mix. The composition of our noninterest bearing deposits remained stable at 26% of total deposits at March 31, 2015 compared to December 31, 2014. Growth in balances and the change in composition modestly improved deposit costs during the first quarter when compared to the linked fourth quarter at 0.40%, as compared to 0.41%, and improved from the 0.44% for the prior year period.

Shareholders' Equity

Shareholders' Equity totaled \$326 million at March 31, 2015, an increase of \$9.9 million from December 31, 2014. Significant activity during the three months ended March 31, 2015:

- Net income of \$9.3 million,
- Other comprehensive income of \$1.7 million from the change in unrealized gain/loss on investment securities,
- Dividends paid on common stock of \$1.1 million

Liquidity and Capital Resources

Liquidity

The objective of liquidity management is to ensure we have the ability to generate sufficient cash or cash equivalents in a timely and cost-effective manner to meet our commitments as they become due. Typical demands on liquidity are run-off from demand deposits, maturing time deposits which are not renewed, and fundings under credit commitments to customers. Funds are available from a number of sources, such as from the core deposit base and from loans and securities repayments and maturities.

Additionally, liquidity is provided from sales of the securities portfolio, fed fund lines with correspondent banks, the Federal Reserve and the FHLB, the ability to acquire large and brokered deposits, and the ability to sell loan participations to other banks. These alternatives are an important part of our liquidity plan and provide flexibility and efficient execution of the asset-liability management strategy.

The Bank's Asset-Liability Management Committee oversees our liquidity position, the parameters of which are approved by the Bank's Board of Directors. Our liquidity position is monitored monthly by producing a liquidity

41

report, which measures the amount of liquid versus non-liquid assets and liabilities. Our liquidity management framework includes measurement of several key elements, such as the loan to deposit ratio, a liquidity ratio, and a dependency ratio. The Company's liquidity framework also incorporates contingency planning to assess the nature and volatility of funding sources and to determine alternatives to these sources. While core deposits and loan and investment repayments are principal sources of liquidity, funding diversification is another key element of liquidity management and is achieved by strategically varying depositor types, terms, funding markets, and instruments.

Parent Company liquidity

The parent company's liquidity is managed to provide the funds necessary to pay dividends to shareholders, service debt, invest in subsidiaries as necessary, and satisfy other operating requirements. The parent company's primary funding sources to meet its liquidity requirements are dividends and payments from the Bank and proceeds from the issuance of equity (i.e. stock option exercises, stock offerings). Another source of funding for the parent company includes the issuance of subordinated debentures and other debt instruments. Management believes our current level of cash at the holding company of \$12.2 million will be sufficient to meet all projected cash needs for the remainder of 2015.

As of March 31, 2015, the Company had \$56.8 million of outstanding subordinated debentures as part of eight Trust Preferred Securities Pools. These securities are classified as debt but are included in regulatory capital and the related interest expense is tax-deductible, which makes them an attractive source of funding.

Bank liquidity

The Bank has a variety of funding sources available to increase financial flexibility. In addition to amounts currently borrowed, at March 31, 2015, the Bank could borrow an additional \$341.3 million from the FHLB of Des Moines under blanket loan pledges and has an additional \$680.5 million available from the Federal Reserve Bank under a pledged loan agreement. The Bank has unsecured federal funds lines with four correspondent banks totaling \$45.0 million. On December 30, 2013, the Company prepaid \$30.0 million of debt with the Federal Home Loan Bank with a weighted average interest rate of 4.09% and a maturity of 3 years and incurred a prepayment penalty of \$2.6 million. On December 23, 2014, the Company prepaid an additional \$50.0 million of debt with the Federal Home Loan Bank with a weighted average interest rate of 3.17%, a maturity of 3 years and incurred a prepayment penalty of \$2.9 million. These transactions are expected to further reduce our cost of interest bearing liabilities in future periods and will help mitigate net interest margin compression.

Investment securities are another important tool to the Bank's liquidity objectives. Of the \$410.1 million of the securities available for sale at March 31, 2015, \$251.4 million was pledged as collateral for deposits of public institutions, treasury, loan notes, and other requirements. The remaining \$158.7 million could be pledged or sold to enhance liquidity, if necessary.

In the normal course of business, the Bank enters into certain forms of off-balance sheet transactions, including unfunded loan commitments and letters of credit. These transactions are managed through the Bank's various risk management processes. Management considers both on-balance sheet and off-balance sheet transactions in its evaluation of the Company's liquidity. The Bank has \$1,048.7 million in unused commitments as of March 31, 2015. While this commitment level would exhaust the majority the Company's current liquidity resources, the nature of these commitments is such that the likelihood of funding them in the aggregate at any one time is low.

Capital Resources

The Company and the Bank are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the

Company and its bank affiliate must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The banking affiliate's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total, Tier 1, and Common equity tier 1 capital to risk-weighted assets, and of Tier 1 capital to average assets. To be categorized as “well capitalized”, banks must maintain minimum total risk-based (10%), Tier 1 risk-based (8%), Common equity tier 1 risk-based (6.5%), and Tier 1 leverage ratios (5%). As of March 31, 2015, and December 31, 2014, the Company and the Bank met all capital adequacy requirements to which they are subject.

The Bank continues to exceed regulatory standards and met the definition of “well-capitalized” (the highest category) at March 31, 2015. Beginning with reporting for the first quarter of 2015, the Company adopted the Regulatory Capital Framework (Basel III). The Company has implemented the necessary processes and procedures to comply with Basel III.

The following table summarizes the Company's various capital ratios at the dates indicated:

(in thousands)	March 31, 2015	December 31, 2014	
Total capital to risk-weighted assets	12.88	% 13.40	%
Tier 1 capital to risk-weighted assets	11.62	% 12.14	%
Common equity tier 1 capital to risk-weighted assets ¹	9.78	% 10.15	%
Leverage ratio (Tier 1 capital to average assets)	10.76	% 10.48	%
Tangible common equity to tangible assets ²	9.01	% 8.69	%
Tier 1 capital	\$346,597	\$335,220	
Total risk-based capital	383,928	369,867	

¹ Not an applicable regulatory ratio until the quarter ended March 31, 2015

² Not a required regulatory capital ratio

The decline in regulatory ratios at March 31, 2015 represents the impact of an increase in risk weighted assets under the Basel III guidelines. The Company believes the tangible common equity and Tier 1 common equity ratios are important measures of capital strength even though they are considered to be non-GAAP measures. The tables further within MD&A reconcile these ratios to U.S. GAAP.

Use of Non-GAAP Financial Measures:

The Company's accounting and reporting policies conform to generally accepted accounting principles ("GAAP") in the U.S. and the prevailing practices in the banking industry. However, the Company provides other financial measures, such as Core net interest margin, tangible common equity ratio and Tier 1 common equity ratio, in this filing that are considered “non-GAAP financial measures.” Generally, a non-GAAP financial measure is a numerical measure of a company's financial performance, financial position or cash flows that exclude (or include) amounts included in (or excluded from) the most directly comparable measure calculated and presented in accordance with U.S. GAAP.

The Company believes these non-GAAP financial measures and ratios, when taken together with the corresponding U.S. GAAP measures and ratios, provide meaningful supplemental information regarding the Company's performance and capital strength. The Company's management uses, and believes investors benefit from referring to, these non-GAAP measures and ratios in assessing the Company's financial and operating results and related trends and when planning and forecasting future periods. However, these non-GAAP measures and ratios should be considered in addition to, and not as a substitute for or preferable to, ratios prepared in accordance with U.S. GAAP. The Company has provided a reconciliation of, where applicable, the most comparable GAAP financial measures and ratios to the

non-GAAP financial measures and ratios, or a reconciliation of the non-GAAP calculation of the financial measure.

43

The Company believes the tangible common equity and Tier 1 common equity ratios are important financial measures of capital strength even though they are considered to be non-GAAP measures and provide useful information about the Company's capital adequacy. The tables below contain reconciliations of these ratios to the most comparable measure under U.S. GAAP.

Core Performance Measures

Core return on average assets	0.88	% 0.82	% 0.74
Core return on average common equity	8.99	% 8.43	% 7.94

The Company believes Core net interest margin is an important measure of our financial performance, even though it is a non-GAAP financial measure, because it provides supplemental information by which the evaluate the impact of excess Covered loan accretion on the Company's net interest margin and the Company's operating performance on an ongoing bases, excluding such impact. The table below reconciles Core net interest margin to the most comparable number under U.S. GAAP.

Critical Accounting Policies

The impact and any associated risks related to the Company's critical accounting policies on business operations are described throughout "Management's Discussion and Analysis of Financial Condition and Results of Operations," where such policies affect our reported and expected financial results. For a detailed description on the application of these and other accounting policies, see the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The disclosures set forth in this item are qualified by the section captioned “Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995” included in Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations of this report and other cautionary statements set forth elsewhere in this report.

Interest Rate Risk

Our interest rate sensitivity management seeks to avoid fluctuating interest margins to provide for consistent growth of net interest income through periods of changing interest rates. Interest rate sensitivity varies with different types of interest-earning assets and interest-bearing liabilities. We attempt to maintain interest-earning assets, comprised primarily of both loans and investments, and interest-bearing liabilities, comprised primarily of deposits, maturing or repricing in similar time horizons in order to minimize or eliminate any impact from market interest rate changes. In order to measure earnings sensitivity to changing rates, the Company uses an earnings simulation model.

The Company determines the sensitivity of its short-term future earnings to a hypothetical plus or minus 100 to 300 basis point parallel rate shock through the use of simulation modeling. The simulation of earnings includes the modeling of the balance sheet as an ongoing entity. Future business assumptions involving administered rate products, prepayments for future rate-sensitive balances, and the reinvestment of maturing assets and liabilities are included. These items are then modeled to project net interest income based on a hypothetical change in interest rates. The resulting net interest income for the next 12-month period is compared to the net interest income amount calculated using flat rates. This difference represents the Company's earnings sensitivity to a plus or minus 100 basis points parallel rate shock.

The following table summarizes the expected impact of interest rate shocks on net interest income (due to the current level of interest rates, the 200 and 300 basis point downward shock scenarios are not shown):

Rate Shock	Annual % change in net interest income
+ 300 bp	6.4%
+ 200 bp	4.1%
+ 100 bp	1.7%
- 100 bp	-1.1%

Interest rate simulations for March 31, 2015, demonstrate that a rising rate environment will have a positive impact on net interest income.

The Company occasionally uses interest rate derivative financial instruments as an asset/liability management tool to hedge mismatches in interest rate exposure indicated by the net interest income simulation described above. At March 31, 2015, the Company had \$23.8 million in notional amount of outstanding interest rate caps, to help manage interest rate risk.

ITEM 4: CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of the Company's Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), management has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15, as of March 31, 2015. Disclosure controls and procedures include without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Based on that evaluation, the CEO and CFO concluded the Company's disclosure controls and procedures were effective as of March 31, 2015 to provide reasonable assurance of the achievement of the objectives described above.

Changes to Internal Controls

There were no changes during the period covered by this Quarterly Report on Form 10-Q in the Company's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, those controls.

PART II - OTHER INFORMATION

ITEM 1: LEGAL PROCEEDINGS

The Company and its subsidiaries are, from time to time, parties to various legal proceedings arising out of their businesses. Management believes there are no such proceedings pending or threatened against the Company or its subsidiaries which, if determined adversely, would have a material adverse effect on the business, consolidated financial condition, results of operations or cash flows of the Company or any of its subsidiaries.

ITEM 1A: RISK FACTORS

For information regarding risk factors affecting the Company, please see the cautionary language regarding forward-looking statements in the introduction to Item 2 of Part I of this Report on Form 10-Q, and Part I, Item 1A of our Report on Form 10-K for the fiscal year ended December 31, 2014. There have been no material changes to the risk factors described in such Annual Report on Form 10-K.

ITEM 2: UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS
