QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended September 30, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission File Number: 1-13461

Group 1 Automotive, Inc.

(Exact name of registrant as specified in its charter)

Delaware 76-0506313
(State or other (I.R.S.
jurisdiction of Employer
incorporation or Identification
organization) No.)

800 Gessner, Suite
500
Houston, Texas
77024
(Address of
principal executive
offices) (Zip code)
(713) 647-5700
(Registrant's
telephone number,
including area
code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this Chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Edgar Filing: GROUP 1 AUTOMOTIVE INC - Form 10-Q

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of October 27, 2016, the registrant had 21,371,172 shares of common stock, par value \$0.01, outstanding.

Table of Contents

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. INTERIM FINANCIAL INFORMATION

Business and Organization

Group 1 Automotive, Inc., a Delaware corporation, is a leading operator in the automotive retailing industry with business activities in 14 states in the United States of America ("U.S."), 19 towns in the United Kingdom ("U.K.") and four states in Brazil. Group 1 Automotive, Inc. and its subsidiaries are collectively referred to as the "Company" in these Notes to Consolidated Financial Statements.

The Company, through its regions, sells new and used cars and light trucks; arranges related vehicle financing; sells service and insurance contracts; provides automotive maintenance and repair services; and sells vehicle parts. As of September 30, 2016, the Company's U.S. retail network consisted of the following two regions (with the number of dealerships they comprised): (a) the East (36 dealerships in Alabama, Florida, Georgia, Louisiana, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, and South Carolina), and (b) the West (76 dealerships in California, Kansas, Louisiana, Oklahoma, and Texas). The U.S. regional vice presidents report directly to the Company's Chief Executive Officer and are responsible for the overall performance of their regions, as well as for overseeing the market directors and dealership general managers that report to them. In addition, as of September 30, 2016, the Company had two international regions: (a) the U.K. region, which consisted of 29 dealerships in the U.K. and (b) the Brazil region, which consisted of 18 dealerships in Brazil. The operations of the Company's international regions are structured similarly to the U.S. regions, each with a regional vice president reporting directly to the Company's Chief Executive Officer.

The Company's operating results are generally subject to seasonal variations, as well as changes in the economic environment. This seasonality is generally attributable to consumer buying trends and the timing of manufacturer new vehicle model introductions. In addition, in some markets within the U.S., vehicle purchases decline during the winter months due to inclement weather. As a result, U.S. revenues and operating income are typically lower in the first and fourth quarters and higher in the second and third quarters. For the U.K., the first and third calendar quarters tend to be stronger, driven by plate change months of March and September. For Brazil, the Company expects higher volumes in the third and fourth calendar quarters. The first quarter is generally the weakest, driven by heavy consumer vacations and activities associated with Carnival. Other factors unrelated to seasonality, such as changes in economic condition, manufacturer incentive programs, or shifts in governmental taxes or regulations may exaggerate seasonal or cause counter-seasonal fluctuations in the Company's revenues and operating income.

Basis of Presentation

The accompanying unaudited condensed Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the U.S. ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments of a normal and recurring nature considered necessary for a fair presentation have been included in the accompanying unaudited condensed Consolidated Financial Statements. Due to seasonality and other factors, the results of operations for the interim period are not necessarily indicative of the results that will be realized for any other interim period or for the entire fiscal year. For further information, refer to the Consolidated Financial Statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 ("2015 Form 10-K").

All business acquisitions completed during the periods presented have been accounted for using the purchase method of accounting, and their results of operations are included from the effective dates of the closings of the acquisitions. The allocations of purchase price to the assets acquired and liabilities assumed are assigned and recorded based on estimates of fair value and are subject to change within the purchase price allocation period (generally one year from the respective acquisition date). All intercompany balances and transactions have been eliminated in consolidation.

Business Segment Information

The Company has three reportable segments: the U.S., which includes the activities of the Company's corporate office, the U.K. and Brazil. The reportable segments are the business activities of the Company for which discrete financial information is available and for which operating results are regularly reviewed by its chief operating decision maker to allocate resources and assess performance. The Company's chief operating decision maker is its Chief Executive Officer. See Note 14, "Segment Information," for additional details regarding the Company's reportable segments.

Variable Interest Entity

8

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

In 2013, the Company entered into arrangements to provide a related-party entity, which owns and operates retail automotive dealerships, a fixed-interest-rate working capital loan and various administrative services for a variable fee, both of which constitute variable interests in the entity. The Company's exposure to loss as a result of its involvement in the entity includes the balance outstanding under the loan arrangement. The Company holds an 8% equity ownership interest in the entity. The Company has determined that the entity meets the criteria of a variable interest entity ("VIE"). The terms of the loan and services agreements provide the Company with the right to control the activities of the VIE that most significantly impact the VIE's economic performance, the obligation to absorb potentially significant losses of the VIE and the right to receive potentially significant benefits from the VIE. Accordingly, the Company qualified as the VIE's primary beneficiary and consolidated the assets and liabilities of the VIE as of September 30, 2016 and December 31, 2015, as well as the results of operations of the VIE beginning on the effective date of the variable interests arrangements to September 30, 2016. The floorplan notes payable liability of the VIE is securitized by the new and used vehicle inventory of the VIE. The carrying amounts and classification of assets (which can only be used to settle the liabilities of the VIE) and liabilities (for which creditors do not have recourse to the general credit of the Company) that are included in the Company's consolidated statements of financial position for the consolidated VIE as of September 30, 2016 and December 31, 2015, are as follows (in thousands):

	September 30, December 31,	
	2016	2015
Current assets	\$ 16,491	\$ 12,849
Non-current assets	13,478	11,022
Total assets	\$ 29,969	\$ 23,871
Current liabilities	\$ 15,563	\$ 8,257
Non-current liabilities	20,684	17,064
Total liabilities	\$ 36,247	\$ 25,321

Recently Adopted Accounting Pronouncements

In November 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes. This update requires an entity to classify deferred tax liabilities and assets as non-current within a classified statement of financial position. The Company elected to early adopt ASU 2015-17 during the first quarter of fiscal 2016, with retrospective application. Accordingly, deferred tax assets in the amount of \$14.1 million, which were previously classified as current assets at December 31, 2015, were reclassified to non-current deferred income tax liabilities on the Company's Consolidated Balance Sheets to conform to current year presentation.

In April 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. The amendments in the accounting standard require debt issuance costs to be presented on the balance sheet as a direct reduction from the carrying amount of the related debt liability. The Company adopted ASU 2015-03 during the first quarter of fiscal 2016, with retrospective application. Accordingly, debt issuance costs in the amounts of \$0.5 million and \$3.6 million, which were previously classified as current and long-term assets, respectively, at December 31, 2015, were reclassified as a direct reduction from the carrying amount of the related debt liability on the Company's Consolidated Balance Sheets to conform to current year presentation.

In September 2015, the FASB issued ASU 2015-16, Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments. The amendments in the accounting standard eliminate the requirement for an acquirer in a business combination to account for measurement-period adjustments retrospectively. The amendments also require that the acquirer must recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amount is determined, including the effect on earnings of any amounts they would have recorded in previous periods if the accounting had been completed at the acquisition date. The amendments in this ASU were to be applied prospectively to adjustments to provisional amounts that occur after the effective date and were effective for interim and annual periods beginning after December 15, 2015. The Company adopted ASU 2015-16 during the first quarter of fiscal 2016. The adoption of this amendment did not materially impact the Company's financial statements.

Recently Issued Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) that amends the accounting guidance on revenue recognition. The amendments in this ASU are intended to provide a framework for addressing revenue issues, improve comparability of revenue recognition practices, and improve disclosure requirements. The amendments in this accounting standard update are effective for interim and annual reporting periods beginning after December 15, 2017. The standard can be adopted either retrospectively to each reporting period presented or as a cumulative effect adjustment as of

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

the date of adoption. The Company is currently evaluating the method of adoption, the impact that the adoption of the provisions of the ASU and the additional disclosure requirements will have on its consolidated financial statements. However, at this time, the Company does not expect the adoption to materially impact its consolidated financial statements and, therefore, expects to adopt as a cumulative effect adjustment as of the date of adoption.

In July 2015, the FASB issued ASU 2015-11, Inventory (Topic 330): Simplifying the Measurement of Inventory. The amendments in the accounting standard replace the lower of cost or market test with a lower of cost and net realizable value test. The amendments in this ASU should be applied prospectively and are effective for interim and annual periods beginning after December 15, 2016. Earlier application is permitted as of the beginning of an interim or annual reporting period. The Company does not expect the adoption to materially impact its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). The amendments in this ASU relate to the accounting for leasing transactions. This standard requires a lessee to record on the balance sheet the assets and liabilities for the rights and obligations created by leases with lease terms of more than 12 months. In addition, this standard requires both lessees and lessors to disclose certain key information about lease transactions. This standard will be effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is in the process of evaluating the impact that adoption will have on its consolidated balance sheet and statement of income. However, the Company expects that the adoption of the provisions of the ASU will have a significant impact on its consolidated balance sheet, as currently about half of its real estate is rented, not owned, via operating leases. Adoption of this ASU is required to be done using a modified retrospective approach. In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The amendment addresses several aspects of the accounting for share-based payment award transactions, including: income tax consequences; classification of awards as either equity or liabilities; and classification on the statement of cash flows. This standard will be effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years, with early adoption permitted. The Company is currently evaluating the impact that the adoption of the provisions of the ASU will have on its consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326) Measurement of Credit Losses on Financial Instruments. The amendment replaces the current incurred loss impairment methodology of recognizing credit losses when a loss is probable, with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to assess credit loss estimates. The standard will be effective for fiscal years beginning after December 15, 2019, with early adoption permitted for periods after December 15, 2018. The Company is currently evaluating the impact that the adoption of the provisions of the ASU will have on its consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The amendment addresses several specific cash flow issues with the objective of reducing the diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The standard will be effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The Company is currently evaluating the impact that the adoption of the provisions of the ASU will have on its consolidated financial statements.

2. ACQUISITIONS AND DISPOSITIONS

During the nine months ended September 30, 2016, the Company acquired 12 U.K. dealerships, inclusive of 17 franchises. In Brazil, the Company acquired one dealership, representing one franchise, and opened two other dealerships for one previously awarded franchises. Aggregate consideration paid for these dealerships totaled \$61.2 million, including the associated real estate and goodwill, as well as \$3.9 million of cash received in the acquisition of the dealerships. The purchase price has been allocated based upon the consideration paid and the estimated fair values of the assets acquired and liabilities assumed at the acquisition date. The allocation of the purchase price is preliminary and based on estimates and assumptions that are subject to change within the purchase price allocation period (generally one year from the respective acquisition date). In addition, during the nine months ended

September 30, 2016, the Company disposed of four U.S. dealerships and four dealerships in Brazil. As a result of these U.S. and Brazil dealership dispositions, a net pretax gain of \$1.8 million and a net pretax loss of \$0.8 million, respectively, were recognized for the nine months ended September 30, 2016.

During the nine months ended September 30, 2015, the Company acquired three U.S. dealerships, sold one U.S. dealership and terminated one U.S. dealership franchise. The Company also terminated two franchises in Brazil. As a result of these dispositions, a net pretax gain of \$0.7 million, including related asset impairments, was recognized for the nine months ended September 30, 2015.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

3. DERIVATIVE INSTRUMENTS AND RISK MANAGEMENT ACTIVITIES

The periodic interest rates of the Revolving Credit Facility (as defined in Note 8, “Credit Facilities”) and certain variable-rate real estate related borrowings in the U.S. are indexed to the one-month London Inter Bank Offered Rate (“LIBOR”), plus an associated company credit risk rate. In order to minimize the earnings variability related to fluctuations in these rates, the Company employs an interest rate hedging strategy, whereby it enters into arrangements with various financial institutional counterparties with investment grade credit ratings, swapping its variable interest rate exposure for a fixed interest rate over terms not to exceed the related variable-rate debt.

The Company presents the fair value of all derivatives on its Consolidated Balance Sheets. The Company measures the fair value of its interest rate derivative instruments utilizing an income approach valuation technique, converting future amounts of cash flows to a single present value in order to obtain a transfer exit price within the bid and ask spread that is most representative of the fair value of its derivative instruments. In measuring fair value, the Company utilizes the option-pricing Black-Scholes present value technique for all of its derivative instruments. This option-pricing technique utilizes a one-month LIBOR forward yield curve, obtained from an independent external service provider, matched to the identical maturity term of the instrument being measured. Observable inputs utilized in the income approach valuation technique incorporate identical contractual notional amounts, fixed coupon rates, periodic terms for interest payments and contract maturity. The fair value estimate of the interest rate derivative instruments also considers the credit risk of the Company for instruments in a liability position or the counterparty for instruments in an asset position. The credit risk is calculated by using the spread between the one-month LIBOR yield curve and the relevant average 10 and 20-year rate according to Standard and Poor’s. The Company has determined the valuation measurement inputs of these derivative instruments to maximize the use of observable inputs that market participants would use in pricing similar or identical instruments and market data obtained from independent sources, which is readily observable or can be corroborated by observable market data for substantially the full term of the derivative instrument. Further, the valuation measurement inputs minimize the use of unobservable inputs. Accordingly, the Company has classified the derivatives within Level 2 of the hierarchy framework as described by Accounting Standards Codification (“ASC”) 820, Fair Value Measurement.

The related gains or losses on these interest rate derivatives are deferred in stockholders’ equity as a component of accumulated other comprehensive loss. These deferred gains and losses are recognized in income in the period in which the related items being hedged are recognized in expense. However, to the extent that the change in value of a derivative contract does not perfectly offset the change in the value of the items being hedged, that ineffective portion is immediately recognized in other income or expense. Monthly contractual settlements of these swap positions are recognized as floorplan or other interest expense in the Company’s accompanying Consolidated Statements of Operations. All of the Company’s interest rate hedges are designated as cash flow hedges. At September 30, 2016, all of the Company’s derivative contracts that were in effect were determined to be effective. The Company had no gains or losses related to ineffectiveness or amounts excluded from effectiveness testing recognized in the Consolidated Statements of Operations for either the three or nine months ended September 30, 2016 or 2015, respectively.

The Company held interest rate swaps in effect as of September 30, 2016 of \$616.0 million in notional value that fixed its underlying one-month LIBOR at a weighted average rate of 2.6%. The Company records the majority of the impact of the periodic settlements of these swaps as a component of floorplan interest expense. For the three and nine months ended September 30, 2016, the impact of the Company’s interest rate hedges in effect increased floorplan interest expense by \$2.8 million and \$8.4 million, respectively. For the three and nine months ended September 30, 2015, the impact of the Company’s interest rate hedges in effect increased floorplan interest expense by \$2.8 million and \$8.3 million, respectively. Total floorplan interest expense was \$11.1 million and \$9.7 million for the three months ended September 30, 2016 and 2015, respectively, and \$33.7 million and \$29.0 million for the nine months ended September 30, 2016 and 2015, respectively.

In addition to the \$616.0 million of swaps in effect as of September 30, 2016, the Company held 19 additional interest rate swaps with forward start dates between December 2016 and December 2020 and expiration dates between December 2019 and December 2030. The aggregate notional value of these 19 forward-starting swaps was \$975.0 million, and the weighted average interest rate was 2.3%. The combination of the interest rate swaps currently in

effect and these forward-starting swaps is structured such that the notional value in effect through December 2030 does not exceed \$908.6 million, which is less than the Company's expectation for variable rate debt outstanding during such period.

As of September 30, 2016 and December 31, 2015, the Company reflected liabilities from interest rate risk management activities of \$45.9 million and \$31.2 million, respectively, in its Consolidated Balance Sheets. Included in Accumulated Other Comprehensive Loss at September 30, 2016 and 2015 were accumulated unrealized losses, net of income taxes, totaling \$28.7 million and \$24.8 million, respectively, related to these interest rate swaps.

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table presents the impact during the current and comparative prior year periods for the Company's derivative financial instruments on its Consolidated Statements of Operations and Consolidated Balance Sheets.

	Amount of Unrealized Loss, Net of Tax, Recognized in Other Comprehensive Income (Loss)	
	Nine Months Ended September 30,	
	2016	2015
	(In thousands)	
Derivatives in Cash Flow Hedging Relationship		
Interest rate swap contracts	\$ (15,575)	\$ (12,907)
	Amount of Loss Reclassified from Other Comprehensive Income (Loss) into Statements of Operations	
	Nine Months Ended September 30,	
	2016	2015
	(In thousands)	
Location of Loss Reclassified from Other Comprehensive Income (Loss) into Statements of Operations		
Floorplan interest expense	\$ (8,414)	\$ (8,306)
Other interest expense	(1,775)	(1,275)

The amount expected to be reclassified out of other comprehensive income (loss) into earnings as additional floorplan interest expense or other interest expense in the next twelve months is \$12.8 million.

4. STOCK-BASED COMPENSATION PLANS

The Company provides stock-based compensation benefits to employees and non-employee directors pursuant to its 2014 Long Term Incentive Plan (the "Incentive Plan"), as well as to employees pursuant to its Employee Stock Purchase Plan, as amended (the "Purchase Plan", formerly named the 1998 Employee Stock Purchase Plan).
Long Term Incentive Plan

The Incentive Plan provides for the grant of options (including options qualified as incentive stock options under the Internal Revenue Code of 1986 and options that are non-qualified), restricted stock, performance awards, bonus stock, and phantom stock to the Company's employees, consultants, non-employee directors and officers. The Incentive Plan expires on May 21, 2024. The terms of the awards (including vesting schedules) are established by the Compensation Committee of the Company's Board of Directors. As of September 30, 2016, there were 1,232,361 shares available for issuance under the Incentive Plan.

Restricted Stock Awards

Under the Incentive Plan, the Company grants to non-employee directors and certain employees restricted stock awards or, at their election, restricted stock units at no cost to the recipient. Restricted stock awards qualify as participating securities as each award contains non-forfeitable rights to dividends. As such, the two-class method is required for the computation of earnings per share. See Note 5, "Earnings Per Share," for further details. Restricted stock awards are considered outstanding at the date of grant but are subject to vesting periods upon issuance up to five years. Restricted stock units are considered vested at the time of issuance, however, since they convey no voting rights, they are not considered outstanding when issued. Restricted stock units settle in cash upon the termination of the grantees' employment or directorship. In the event an employee or non-employee director terminates his or her employment or directorship with the Company prior to the lapse of the restrictions, the shares, in most cases, will be forfeited to the Company. The Company issues new shares or treasury shares, if available, when restricted stock vests. Compensation expense for restricted stock awards is calculated based on the market price of the Company's common stock at the date of grant and recognized over the requisite service period. Forfeitures are estimated at the time of valuation and reduce expense ratably over the vesting period. This estimate is adjusted annually based on the extent to which actual or expected forfeitures differ from the previous estimate.

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

A summary of the restricted stock awards as of September 30, 2016, along with the changes during the nine months then ended, is as follows:

	Awards	Weighted Average Grant Date Fair Value
Nonvested at December 31, 2015	893,360	\$ 69.16
Granted	244,820	54.35
Vested	(243,730)	58.48
Forfeited	(29,380)	73.22
Nonvested at September 30, 2016	865,070	\$ 67.87

Employee Stock Purchase Plan

The Purchase Plan authorizes the issuance of up to 4.5 million shares of common stock and provides that no options to purchase shares may be granted under the Purchase Plan after May 19, 2025. The Purchase Plan is available to all employees of the Company and its participating subsidiaries and is a qualified plan as defined by Section 423 of the Internal Revenue Code. At the end of each fiscal quarter (the “Option Period”) during the term of the Purchase Plan, employees can acquire shares of common stock from the Company at 85% of the fair market value of the common stock on the first or the last day of the Option Period, whichever is lower. As of September 30, 2016, there were 1,289,527 shares available for issuance under the Purchase Plan. During the nine months ended September 30, 2016 and 2015, the Company issued 125,154 and 76,694 shares, respectively, of common stock to employees participating in the Purchase Plan. With respect to shares issued under the Purchase Plan, the Company's Board of Directors has authorized specific share repurchases to fund the shares issuable under the Purchase Plan.

The weighted average fair value of employee stock purchase rights issued pursuant to the Purchase Plan was \$13.05 and \$18.66 during the nine months ended September 30, 2016 and 2015, respectively. The fair value of stock purchase rights is calculated using the grant date stock price, the value of the embedded call option and the value of the embedded put option.

Stock-Based Compensation

Total stock-based compensation cost was \$4.7 million and \$4.7 million for the three months ended September 30, 2016 and 2015, respectively, and \$14.9 million and \$14.2 million for the nine months ended September 30, 2016 and 2015, respectively. Cash received from Purchase Plan purchases was \$5.6 million and \$5.6 million for the nine months ended September 30, 2016 and 2015, respectively. The tax deductions for restricted stock vested were less than the associated book expense previously recognized, which resulted in a reduction of additional paid-in capital of \$0.1 million for the nine months ended September 30, 2016. Comparatively, the tax benefit realized for the tax deductions from vesting of restricted shares totaled \$1.8 million and resulted in an increase of additional paid in capital for the nine months ended September 30, 2015.

5. EARNINGS PER SHARE

The two-class method is utilized for the computation of the Company's earnings per share (“EPS”). The two-class method requires a portion of net income to be allocated to participating securities, which are unvested awards of share-based payments with non-forfeitable rights to receive dividends or dividend equivalents, including the Company's restricted stock awards. Income allocated to these participating securities is excluded from net earnings available to common shares, as shown in the table below. Basic EPS is computed by dividing net income available to basic common shares by the weighted average number of basic common shares outstanding during the period. Diluted EPS is computed by dividing net income available to diluted common shares by the weighted average number of dilutive common shares outstanding during the period.

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

The following table sets forth the calculation of EPS for the three and nine months ended September 30, 2016 and 2015.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
	(In thousands, except per share amounts)			
Weighted average basic common shares outstanding	20,568	23,132	21,355	23,294
Dilutive effect of employee stock purchases, net of assumed repurchase of treasury stock	10	5	9	4
Weighted average dilutive common shares outstanding	20,578	23,137	21,364	23,298
Basic:				
Net Income	\$35,366	\$45,261	\$116,237	\$127,385
Less: Earnings allocated to participating securities	1,427	1,729	4,652	4,906
Earnings available to basic common shares	\$33,939	\$43,532	\$111,585	\$122,479
Basic earnings per common share	\$1.65	\$1.88	\$5.23	\$5.26
Diluted:				
Net Income	\$35,366	\$45,261	\$116,237	\$127,385
Less: Earnings allocated to participating securities	1,426	1,729	4,651	4,905
Earnings available to diluted common shares	\$33,940	\$43,532	\$111,586	\$122,480
Diluted earnings per common share	\$1.65	\$1.88	\$5.22	\$5.26

6. INCOME TAXES

The Company is subject to U.S. federal income taxes and income taxes in numerous U.S. states. In addition, the Company is subject to income tax in the U.K. and Brazil relative to its foreign subsidiaries. The Company's effective income tax rate of 36.5% for the three months ended September 30, 2016 was more than the U.S. federal statutory rate 35.0%, due primarily to taxes provided for in U.S. state jurisdictions and valuation allowances provided for net operating losses and other deferred tax assets in certain U.S. states and in Brazil, partially offset by taxes provided for in the U.K. at the applicable statutory rate. The Company's effective income tax rate of 35.0% of pretax income for the nine months ended September 30, 2016, was approximately equal to the U.S. federal statutory rate of 35.0%, as taxes provided for in U.S. state jurisdictions and valuation allowances provided for net operating losses and other deferred tax assets in certain U.S. states and in Brazil were offset by taxes provided for in the U.K. at the applicable statutory rate and the tax impact of a dealership disposition in Brazil.

For the three and nine months ended September 30, 2016, the Company's effective tax rate decreased to 36.5% and 35.0%, respectively, as compared to 38.0% and 37.6% for the same periods in 2015. This decrease was primarily due to the mix effect resulting from proportionately more pretax income generated in the Company's U.K. region, as well as changes to valuation allowances provided for net operating losses and other deferred tax assets in certain U.S. states and in Brazil, in addition to the tax impact of a dealership disposition in Brazil during the nine months ended September 30, 2016.

As of September 30, 2016 and December 31, 2015, the Company had no unrecognized tax benefits with respect to uncertain tax positions and did not incur any interest and penalties nor did it accrue any interest for the nine months ended September 30, 2016. When applicable, consistent with prior practice, the Company recognizes interest and penalties related to uncertain tax positions in income tax expense.

Taxable years 2011 and subsequent remain open for examination by the Company's major taxing jurisdictions.

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

7. DETAIL OF CERTAIN BALANCE SHEET ACCOUNTS

Accounts and notes receivable consisted of the following:

	September 30, 2016	December 31, 2015
	(unaudited)	
	(In thousands)	
Amounts due from manufacturers	\$92,700	\$93,206
Parts and service receivables	35,548	32,479
Finance and insurance receivables	21,318	22,374
Other	9,464	12,913
Total accounts and notes receivable	159,030	160,972
Less allowance for doubtful accounts	2,736	3,204
Accounts and notes receivable, net	\$156,294	\$157,768

Inventories consisted of the following:

	September 30, 2016	December 31, 2015
	(unaudited)	
	(In thousands)	
New vehicles	\$1,166,128	\$1,262,797
Used vehicles	315,277	275,508
Rental vehicles	137,600	134,509
Parts, accessories and other	75,986	72,917
Total inventories	1,694,991	1,745,731
Less lower of cost or market reserves	7,612	7,980
Inventories, net	\$1,687,379	\$1,737,751

New and used vehicles are valued at the lower of specific cost or market and are removed from inventory using the specific identification method. Parts and accessories are valued at lower of cost (determined on either a first-in, first-out or an average cost basis) or market.

Property and equipment consisted of the following:

	Estimated Useful Lives in Years	September 30, 2016	December 31, 2015
		(unaudited)	
		(dollars in thousands)	
Land	—	\$395,358	\$364,475
Buildings	25 to 50	545,669	505,414
Leasehold improvements	varies	169,742	155,585
Machinery and equipment	7 to 20	98,341	90,993
Furniture and fixtures	3 to 10	87,603	82,688
Company vehicles	3 to 5	11,714	11,603
Construction in progress	—	69,511	58,361
Total		1,377,938	1,269,119
Less accumulated depreciation		259,153	235,138
Property and equipment, net		\$1,118,785	\$1,033,981

During the nine months ended September 30, 2016, the Company incurred \$78.9 million of capital expenditures for the construction of new or expanded facilities and the purchase of equipment and other fixed assets in the maintenance of the

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Company's dealerships and facilities, excluding \$32.7 million of capital expenditures accrued as of December 31, 2015. As of September 30, 2016, the Company had accrued \$19.9 million of capital expenditures. In addition, the Company purchased real estate (including land and buildings) during the nine months ended September 30, 2016 associated with existing dealership operations totaling \$34.0 million. And, in conjunction with the acquisition of dealerships and franchises in the nine months ended September 30, 2016, the Company acquired \$28.8 million of real estate and other property and equipment. The Company recognized \$2.0 million in asset impairments related to property and equipment for the nine months ended September 30, 2016.

As of December 31, 2015, the Company determined that certain real estate investments qualified for held-for-sale treatment. As a result, the Company classified the carrying value, after adjustment to estimated fair market value, of the real estate, totaling \$1.4 million, in prepaid and other current assets in its Consolidated Balance Sheets.

8. CREDIT FACILITIES

In the U.S., the Company has a \$1.8 billion revolving syndicated credit arrangement that matures on June 17, 2021 and is comprised of 24 financial institutions, including six manufacturer-affiliated finance companies ("Revolving Credit Facility"). The Company also has a \$300.0 million floorplan financing arrangement ("FMCC Facility") with Ford Motor Credit Company ("FMCC") for financing of new Ford vehicles in the U.S. and other floorplan financing arrangements with several other automobile manufacturers for financing of a portion of its U.S. rental vehicle inventory. In the U.K., the Company has financing arrangements with BMW Financial Services, Volkswagen Finance and FMCC for financing of its new and used vehicles. In Brazil, the Company has financing arrangements for new, used, and rental vehicles with several financial institutions, most of which are manufacturer affiliated. Within the Company's Consolidated Balance Sheets, Floorplan notes payable - credit facility and other primarily reflects amounts payable for the purchase of specific new, used and rental vehicle inventory (with the exception of new and rental vehicle purchases financed through lenders affiliated with the respective manufacturer) whereby financing is provided by the Revolving Credit Facility. Floorplan notes payable - manufacturer affiliates reflects amounts related to the purchase of vehicles whereby financing is provided by the FMCC Facility, the financing of a portion of the Company's rental vehicles in the U.S., as well as the financing of new, used, and rental vehicles in both the U.K. and Brazil. Payments on the floorplan notes payable are generally due as the vehicles are sold. As a result, these obligations are reflected in the accompanying Consolidated Balance Sheets as current liabilities.

Revolving Credit Facility

On June 17, 2016, the Company amended its Revolving Credit Facility principally to increase the total borrowing capacity from \$1.7 billion to \$1.8 billion and to extend the term from an expiration date of June 20, 2018 to June 17, 2021. The Revolving Credit Facility consists of two tranches, providing a maximum of \$1.75 billion for U.S. vehicle inventory floorplan financing ("Floorplan Line"), as well as a maximum of \$360.0 million and a minimum of \$50.0 million for working capital and general corporate purposes, including acquisitions ("Acquisition Line"). The capacity under these two tranches can be re-designated within the overall \$1.8 billion commitment, subject to the aforementioned limits. Up to \$125.0 million of the Acquisition Line can be borrowed in either euros or British pound sterling. The Revolving Credit Facility can be expanded to a maximum commitment of \$2.1 billion, subject to participating lender approval. The Floorplan Line bears interest at rates equal to the LIBOR plus 125 basis points for new vehicle inventory and the LIBOR plus 150 basis points for used vehicle inventory. The Acquisition Line bears interest at the LIBOR plus 150 basis points plus a margin that ranges from zero to 100 basis points, depending on the Company's total adjusted leverage ratio, for borrowings in U.S. dollars and a LIBOR equivalent plus 125 to 250 basis points, depending on the Company's total adjusted leverage ratio, on borrowings in euros or British pound sterling. The Floorplan Line requires a commitment fee of 0.15% per annum on the unused portion. Amounts borrowed by the Company under the Floorplan Line for specific vehicle inventory are to be repaid upon the sale of the vehicle financed, and in no case is a borrowing for a vehicle to remain outstanding for greater than one year. The Acquisition Line also requires a commitment fee ranging from 0.20% to 0.45% per annum, depending on the Company's total adjusted leverage ratio, based on a minimum commitment of \$50.0 million less outstanding borrowings. In conjunction with the Revolving Credit Facility, the Company has \$5.7 million of related unamortized costs as of

September 30, 2016, which are included in Prepaid expenses and other current assets and Other Assets on the accompanying Consolidated Balance Sheets and amortized over the term of the facility.

After considering the outstanding balance of \$1,043.8 million at September 30, 2016, the Company had \$396.2 million of available floorplan borrowing capacity under the Floorplan Line. Included in the \$396.2 million available borrowings under the Floorplan Line was \$59.7 million of immediately available funds. The weighted average interest rate on the Floorplan Line was 1.7% as of September 30, 2016 and December 31, 2015, excluding the impact of the Company's interest rate swaps. With regards to the Acquisition Line, there were no borrowings outstanding as of September 30, 2016 and December 31, 2015. After considering \$37.1 million of outstanding letters of credit and other factors included in the Company's available borrowing base

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

calculation, there was \$313.9 million of available borrowing capacity under the Acquisition Line as of September 30, 2016. The amount of available borrowing capacity under the Acquisition Line is limited from time to time based upon certain debt covenants.

All of the U.S. dealership-owning subsidiaries are co-borrowers under the Revolving Credit Facility. The Company's obligations under the Revolving Credit Facility are secured by essentially all of the Company's U.S. personal property (other than equity interests in dealership-owning subsidiaries), including all motor vehicle inventory and proceeds from the disposition of dealership-owning subsidiaries, excluding inventory financed directly with manufacturer-affiliates and other third-party financing institutions. The Revolving Credit Facility contains a number of significant covenants that, among other things, restrict the Company's ability to make disbursements outside of the ordinary course of business, dispose of assets, incur additional indebtedness, create liens on assets, make investments and engage in mergers or consolidations. The Company is also required to comply with specified financial tests and ratios defined in the Revolving Credit Facility, such as the fixed charge coverage and total adjusted leverage ratios. Further, the Revolving Credit Facility restricts the Company's ability to make certain payments, such as dividends or other distributions of assets, properties, cash, rights, obligations or securities ("Restricted Payments"). The Restricted Payments cannot exceed the sum of \$208.5 million plus (or minus if negative) (a) one-half of the aggregate consolidated net income for the period beginning on April 1, 2014 and ending on the date of determination and (b) the amount of net cash proceeds received from the sale of capital stock after June 2, 2014 and ending on the date of determination less (c) cash dividends and share repurchases after June 2, 2014 ("Credit Facility Restricted Payment Basket"). For purposes of the calculation of the Credit Facility Restricted Payment Basket, net income represents such amounts per the consolidated financial statements adjusted to exclude the Company's foreign operations, non-cash interest expense, non-cash asset impairment charges, and non-cash stock-based compensation. As of September 30, 2016, the Credit Facility Restricted Payment Basket totaled \$112.9 million. The Company was in compliance with all applicable covenants and ratios under the Revolving Credit Facility as of September 30, 2016.

Ford Motor Credit Company Facility

The FMCC Facility provides for the financing of, and is collateralized by, the Company's Ford new vehicle inventory in the U.S., including affiliated brands. This arrangement provides for \$300.0 million of floorplan financing and is an evergreen arrangement that may be canceled with 30 days' notice by either party. As of September 30, 2016, the Company had an outstanding balance of \$145.9 million under the FMCC Facility with an available floorplan borrowing capacity of \$154.1 million. Included in the \$154.1 million available borrowings under the FMCC Facility was \$22.5 million of immediately available funds. This facility bears interest at a rate of Prime plus 150 basis points minus certain incentives. The interest rate on the FMCC Facility was 5.00% before considering the applicable incentives as of September 30, 2016.

Other Credit Facilities

The Company has credit facilities with BMW Financial Services, Volkswagen Finance, FMCC, and another third-party financial institution for the financing of new, used and rental vehicle inventories related to its U.K. operations. These facilities are denominated in British pound sterling and are evergreen arrangements that may be canceled with notice by either party and bear interest at a base rate, plus a surcharge that varies based upon the type of vehicle being financed. The annual interest rates charged on borrowings outstanding under these facilities range from 1.10% to 3.50%. As of September 30, 2016, borrowings outstanding under these facilities totaled \$94.4 million.

The Company has credit facilities with financial institutions in Brazil, most of which are affiliated with the manufacturers, for the financing of new, used and rental vehicle inventories related to its Brazilian operations. These facilities are denominated in Brazilian real and have renewal terms ranging from one month to twelve months. They may be canceled with notice by either party and bear interest at a benchmark rate, plus a surcharge that varies based upon the type of vehicle being financed. The annual interest rates charged on borrowings outstanding under these facilities, after the grace period of zero to 90 days, range from 16.77% to 24.45%. As of September 30, 2016, borrowings outstanding under these facilities totaled \$23.1 million.

Excluding rental vehicles financed through the Revolving Credit Facility, financing for U.S. rental vehicles is typically obtained directly from the automobile manufacturers. These financing arrangements generally require small

monthly payments and mature in varying amounts over a period of two years. The interest rate charged on borrowings related to the Company's rental vehicle fleet varies up to 5.00%. Rental vehicles are typically transferred to used vehicle inventory when they are removed from service and repayment of the borrowing is required at that time. As of September 30, 2016, borrowings outstanding under these facilities totaled \$108.6 million.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

9. LONG-TERM DEBT

The Company carries its long-term debt at face value, net of applicable discounts and capitalized debt issuance costs. Long-term debt consisted of the following:

	September 30, 2016	December 31, 2015
	(dollars in thousands)	
5.00% Senior Notes (aggregate principal of \$550,000 at September 30, 2016 and December 31, 2015)	\$ 540,075	\$ 538,933
5.25% Senior Notes (aggregate principal of \$300,000 at September 30, 2016 and December 31, 2015)	295,455	295,156
Real Estate Related and Other Long-Term Debt	393,813	365,564
Capital lease obligations related to real estate, maturing in varying amounts through June 2034 with a weighted average interest rate of 9.8%	48,679	51,902
	1,278,022	1,251,555
Less current maturities of other long-term debt	45,305	52,021
	\$ 1,232,717	\$ 1,199,534

Included in current maturities of long-term debt and short-term financing in the Company's Consolidated Balance Sheets as of September 30, 2016, and December 31, 2015, was \$17.0 million and \$3.0 million, respectively, of short-term financing that was due within one year.

5.00% Senior Notes

On June 2, 2014, the Company issued \$350.0 million aggregate principal amount of its 5.00% Senior Notes due 2022 ("5.00% Notes"). Subsequently, on September 9, 2014, the Company issued an additional \$200.0 million of 5.00% Notes at a discount of 1.5% from face value. The 5.00% Notes will mature on June 1, 2022 and pay interest semiannually, in arrears, in cash on each June 1 and December 1, beginning December 1, 2014. Using proceeds of certain equity offerings, the Company may redeem up to 35.0% of the 5.00% Notes prior to June 1, 2017, subject to certain conditions, at a redemption price equal to 105% of principal amount of the 5.00% Notes plus accrued and unpaid interest. Otherwise, the Company may redeem some or all of the 5.00% Notes prior to June 1, 2017 at a redemption price equal to 100% of the principal amount of the 5.00% Notes redeemed, plus an applicable premium, and plus accrued and unpaid interest. On or after June 1, 2017, the Company may redeem some or all of the 5.00% Notes at specified prices, plus accrued and unpaid interest. The Company may be required to purchase the 5.00% Notes if it sells certain assets or triggers the change in control provisions defined in the 5.00% Notes indenture. The 5.00% Notes are senior unsecured obligations and rank equal in right of payment to all of the Company's existing and future senior unsecured debt and senior in right of payment to all of its future subordinated debt. The 5.00% Notes are guaranteed by substantially all of the Company's U.S. subsidiaries. The U.S. subsidiary guarantees rank equally in the right of payment to all of the Company's U.S. subsidiary guarantor's existing and future subordinated debt. In addition, the 5.00% Notes are structurally subordinated to the liabilities of its non-guarantor subsidiaries and are subject to customary covenants, including a restricted payment basket and debt limitations. The restricted payment basket calculation under the terms of the 5.00% Notes is the same as under the Credit Facility Restricted Payment Basket. The 5.00% Notes were registered with the Securities and Exchange Commission in June 2015.

The underwriters' fees, discount and capitalized debt issuance costs relative to the 5.00% Notes totaled \$13.1 million. These amounts are included as a direct reduction of the 5.00% Notes on the accompanying Consolidated Balance Sheets and are being amortized over a period of eight years in conjunction with the term of the 5.00% Notes. The 5.00% Notes are presented net of unamortized underwriters' fees, discount and debt issuance costs of \$9.9 million as of September 30, 2016.

5.25% Senior Notes

On December 8, 2015, the Company issued 5.25% senior unsecured notes with a face amount of \$300.0 million due to mature on December 15, 2023 ("5.25% Notes"). The 5.25% Notes pay interest semiannually, in arrears, in cash on each June 15 and December 15, beginning June 15, 2016. Using proceeds of certain equity offerings, the Company may

redeem up to 35.0% of the 5.25% Notes prior to December 15, 2018, subject to certain conditions, at a redemption price equal to 105.25% of principal amount of the 5.25% Notes plus accrued and unpaid interest. Otherwise, the Company may redeem some or all of the 5.25% Notes prior to December 15, 2018 at a redemption price equal to 100% of the principal amount of the 5.25% Notes redeemed, plus an applicable make-whole premium, and plus accrued and unpaid interest. On or after December 15, 2018, the Company may redeem some or all of the 5.25% Notes at specified prices, plus accrued and unpaid interest. The Company may be required to purchase the 5.25% Notes if it sells certain assets or triggers the change in control provisions defined in the 5.25% Notes indenture. The 5.25% Notes are senior unsecured obligations and rank equal in right of payment to all of the Company's existing and future senior unsecured debt and senior in right of payment to all of its future

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

subordinated debt. The 5.25% Notes are guaranteed by substantially all of the Company's U.S. subsidiaries. The U.S. subsidiary guarantees rank equally in the right of payment to all of the Company's U.S. subsidiary guarantor's existing and future subordinated debt. In addition, the 5.25% Notes are structurally subordinated to the liabilities of its non-guarantor subsidiaries and are subject to customary covenants, including a restricted payment basket and debt limitations. The restricted payment basket calculation under the terms of the 5.25% Notes is the same as under the Credit Facility Restricted Payment Basket.

The underwriters' fees and capitalized debt issuance costs relative to the 5.25% Notes totaled \$5.0 million. These amounts are included as a direct reduction of the 5.25% Notes on the accompanying Consolidated Balance Sheets and are being amortized over a period of eight years in conjunction with the term of the 5.25% Notes. The 5.25% Notes are presented net of unamortized underwriters' fees and debt issuance costs of \$4.5 million as of September 30, 2016.

Acquisition Line

See Note 8, "Credit Facilities," for further discussion on the Company's Revolving Credit Facility and Acquisition Line.

Real Estate Related and Other Long-Term Debt

The Company, as well as certain of its wholly-owned subsidiaries, has entered into separate term mortgage loans in the U.S. with three of its manufacturer-affiliated finance partners, Toyota Motor Credit Corporation ("TMCC"), BMW Financial Services NA, LLC ("BMWFS") and FMCC, as well as several third-party financial institutions. These mortgage loans may be expanded for borrowings related to specific buildings and/or properties and are guaranteed by the Company. Each mortgage loan was made in connection with, and is secured by mortgage liens on, the real property owned by the Company that is mortgaged under the loans. The mortgage loans bear interest at fixed rates between 3.00% and 4.69%, and at variable indexed rates plus a spread between 1.50% and 2.50% per annum. The Company capitalized \$2.7 million of related debt issuance costs related to the mortgage loans that are included as a direct reduction to the mortgage loans on the accompanying Consolidated Balance Sheets and are being amortized over the terms of the mortgage loans. As of September 30, 2016, \$0.7 million remained unamortized.

The mortgage loans consist of 55 term loans for an aggregate principal amount of \$363.0 million. As of September 30, 2016, borrowings outstanding under these notes totaled \$326.3 million, with \$28.8 million classified as a current maturity of long-term debt. For the nine months ended September 30, 2016, the Company made additional net borrowings and principal payments of \$42.2 million and \$12.1 million, respectively. The agreements provide for monthly payments based on 15 or 20-year amortization schedules and mature between May 2017 and December 2024. These mortgage loans are cross-collateralized and cross-defaulted with each other.

The Company has entered into 13 separate term mortgage loans in the U.K. with other third-party financial institutions which are secured by the Company's U.K. properties. These mortgage loans (collectively, "U.K. Notes") are denominated in British pound sterling and are being repaid in monthly installments that will mature by September 2034. As of September 30, 2016, borrowings under the U.K. Notes totaled \$54.1 million, with \$4.5 million classified as a current maturity of long-term debt in the accompanying Consolidated Balance Sheets. For the nine months ended September 30, 2016, the Company assumed \$8.3 million of term mortgage loans in conjunction with U.K. dealership acquisitions, made no additional borrowings and made principal payments of \$3.6 million associated with the U.K. Notes.

The Company also has a working capital loan agreement with a third-party financial institution in the U.K. As of September 30, 2016, borrowings under the U.K. third-party loan totaled \$7.7 million and were due in October 2016. For the nine months ended September 30, 2016, the Company made \$7.8 million of additional borrowings and made principal payments of \$3.0 million.

The Company has a separate term mortgage loan in Brazil with a third-party financial institution (the "Brazil Note"). The Brazil Note is denominated in Brazilian real and is secured by one of the Company's Brazilian properties, as well as a guarantee from the Company. The Brazil Note is being repaid in monthly installments that will mature by April 2025. As of September 30, 2016, borrowings under the Brazil Note totaled \$4.0 million, with \$0.4 million classified as a current maturity of long-term debt in the accompanying Consolidated Balance Sheets. For the nine months ended September 30, 2016, the Company made no additional borrowings and made principal payments of \$0.3 million

associated with the Brazil Note.

The Company also has a working capital loan agreement with a third-party financial institution in Brazil. The principal balance on this loan is due by February 2017 with interest only payments being made until the due date. As of September 30, 2016, borrowings under the Brazilian third-party loan totaled \$6.8 million. For the nine months ended September 30, 2016, the Company made no additional borrowings.

Fair Value of Long-Term Debt

The Company's outstanding 5.00% Notes had a fair value of \$552.8 million and \$545.9 million as of September 30, 2016 and December 31, 2015, respectively. The Company's outstanding 5.25% Notes had a fair value of \$302.1 million and \$297.8

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

million as of September 30, 2016 and December 31, 2015, respectively. The Company's fixed interest rate borrowings included in real estate related and other long-term debt totaled \$95.6 million and \$100.7 million as of September 30, 2016 and December 31, 2015, respectively. The fair value of such fixed interest rate borrowings was \$96.5 million and \$102.4 million as of September 30, 2016 and December 31, 2015, respectively. The fair value estimates are based on Level 2 inputs of the fair value hierarchy available as of September 30, 2016 and December 31, 2015. The Company determined the estimated fair value of its long-term debt using available market information and commonly accepted valuation methodologies. Considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, these estimates are not necessarily indicative of the amounts that the Company, or holders of the instruments, could realize in a current market exchange. The use of different assumptions and/or estimation methodologies could have a material effect on estimated fair values. The carrying value of the Company's variable rate debt approximates fair value due to the short-term nature of the interest rates.

10. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value as the price that would be received in the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; requires disclosure of the extent to which fair value is used to measure financial and non-financial assets and liabilities, the inputs utilized in calculating valuation measurements, and the effect of the measurement of significant unobservable inputs on earnings, or changes in net assets, as of the measurement date; and establishes a three-level valuation hierarchy based upon the transparency of inputs utilized in the measurement and valuation of financial assets or liabilities as of the measurement date:

- Level 1 — unadjusted, quoted prices for identical assets or liabilities in active markets;
- Level 2 — quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs other than quoted market prices that are observable or that can be corroborated by observable market data by correlation; and
- Level 3 — unobservable inputs based upon the reporting entity's internally developed assumptions that market participants would use in pricing the asset or liability.

The Company's financial instruments consist primarily of cash and cash equivalents, contracts-in-transit and vehicle receivables, accounts and notes receivable, investments in debt and equity securities, accounts payable, credit facilities, long-term debt and interest rate swaps. The fair values of cash and cash equivalents, contracts-in-transit and vehicle receivables, accounts and notes receivable, accounts payable, and credit facilities approximate their carrying values due to the short-term nature of these instruments or the existence of variable interest rates. The Company evaluated its assets and liabilities for those that met the criteria of the disclosure requirements and fair value framework of ASC 820 and identified demand obligations, interest rate derivative instruments, and investment balances in certain financial institutions as having met such criteria.

The Company periodically invests in unsecured, corporate demand obligations with manufacturer-affiliated finance companies, which bear interest at a variable rate and are redeemable on demand by the Company. Therefore, the Company has classified these demand obligations as cash and cash equivalents in the accompanying Consolidated Balance Sheets. The Company determined that the valuation measurement inputs of these instruments include inputs other than quoted market prices, that are observable or that can be corroborated by observable data by correlation. Accordingly, the Company has classified these instruments within Level 2 of the hierarchy framework.

In addition, the Company maintains an investment balance with certain of the financial institutions in Brazil that provide credit facilities for the financing of new, used and rental vehicle inventories. The investment balances bear interest at a variable rate and are redeemable by the Company in the future under certain conditions. The Company has classified these investment balances as long-term assets in the accompanying Consolidated Balance Sheets. The Company determined that the valuation measurement inputs of these instruments include inputs other than quoted market prices, that are observable or that can be corroborated by observable data by correlation. Accordingly, the Company has classified these instruments within Level 2 of the hierarchy framework.

The Company's derivative financial instruments are recorded at fair market value. See Note 3, "Derivative Instruments and Risk Management Activities" for further details regarding the Company's derivative financial instruments. See

Note 9, "Long-term Debt" for details regarding the fair value of the Company's long-term debt.

11. COMMITMENTS AND CONTINGENCIES

From time to time, the Company's dealerships are named in various types of litigation involving customer claims, employment matters, class action claims, purported class action claims, as well as claims involving the manufacturer of automobiles, contractual disputes and other matters arising in the ordinary course of business. Due to the nature of the automotive retailing business, the Company may be involved in legal proceedings or suffer losses that could have a material adverse effect on the Company's business. In the normal course of business, the Company is required to respond to customer, employee and other third-party complaints. Amounts that have been accrued or paid related to the settlement of litigation are included in selling, general and administrative expenses in the Company's Consolidated Statements of Operations. In addition, the manufacturers of the vehicles that the Company sells and services have audit rights allowing them to review the validity of amounts claimed for incentive, rebate or warranty-related items and charge the Company back for amounts determined to be invalid payments under the manufacturers' programs, subject to the Company's right to appeal any such decision. Amounts that have been accrued or paid related to the settlement of manufacturer chargebacks of recognized incentives and rebates are included in cost of sales in the Company's Consolidated Statements of Operations, while such amounts for manufacturer chargebacks of recognized warranty-related items are included as a reduction of revenues in the Company's Consolidated Statements of Operations.

Legal Proceedings

In September 2015, Volkswagen admitted that certain of its diesel models were intentionally programmed to meet various regulatory emissions standards only during laboratory emissions testing. In late June 2016, Volkswagen agreed to pay up to an aggregate of \$14.7 billion to settle claims stemming from the diesel emissions scandal. On October 25, 2016, a U.S. Federal judge approved this settlement. On or about September 30, 2016, Volkswagen agreed to allocate \$1.21 billion among its 652 dealers for a class settlement in exchange for their agreement not to sue Volkswagen. In October 2016, the Company received notification from Volkswagen that it is entitled to receive, in the

aggregate, approximately \$13.2 million in connection with the Company's current and prior ownership of seven Volkswagen dealerships in the U.S. The Company will receive half of the compensation immediately in a lump sum amount, and the rest of the compensation in 18 monthly installments. The Volkswagen brand represented 1.7% of the Company's total new vehicle retail unit sales for the nine months ended September 30, 2016.

Table of Contents GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS – (Continued)

Currently, the Company is not party to any legal proceedings that, individually or in the aggregate, are reasonably expected to have a material adverse effect on the Company's results of operations, financial condition, or cash flows, including class action lawsuits. However, the results of current, or future, matters cannot be predicted with certainty, and an unfavorable resolution of one or more of such matters could have a material adverse effect on the Company's results of operations, financial condition, or cash flows.

Other Matters

The Company, acting through its subsidiaries, is the lessee under many real estate leases that provide for the use by the Company's subsidiaries of their respective dealership premises. Pursuant to these leases, the Company's subsidiaries generally agree to indemnify the lessor and other parties from certain liabilities arising as a result of the use of the leased premises, including environmental liabilities, or a breach of the lease by the lessee. Additionally, from time to time, the Company enters into agreements in connection with the sale of assets or businesses in which it agrees to indemnify the purchaser, or other parties, from certain liabilities or costs arising in connection with the assets or business. Also, in the ordinary course of business in connection with purchases or sales of goods and services, the Company enters into agreements that may contain indemnification provisions. In the event that an indemnification claim is asserted, liability would be limited by the terms of the applicable agreement.

From time to time, primarily in connection with dealership dispositions, the Company's subsidiaries sublet to the dealership purchaser the subsidiaries' interests in any real property leases associated with such dealerships and continue to be primarily obligated on the lease. In these situations, the Company's subsidiaries retain primary responsibility for the performance of certain obligations under such leases. To the extent that the Company remains primarily responsible under such leases, a quantification of such lease obligations is included in the Company's disclosure of future minimum lease payments for non-cancelable operating leases in Note 18, Operating Leases to "Item 8. Financial Statements and Supplementary Data" of the 2015 Form 10-K.

In certain instances, also in connection with dealership dispositions, the Company's subsidiaries assign to the dealership purchaser the subsidiaries' interests in any real property leases associated with such dealerships. The Company's subsidiaries may retain secondary responsibility for the performance of certain obligations under such leases to the extent that the assignee does not perform, if such performance is required following the assignment of the lease. Additionally, the Company and its subsidiaries may remain subject to the terms of a guaranty made by the Company and its subsidiaries in connection with such leases. In these circumstances, the Company generally has indemnification rights against the assignee in the event of non-performance under these leases, as well as certain defenses. The Company and its subsidiaries also may be called on to perform other obligations under these leases, such as environmental remediation of the leased premises or repair of the leased premises upon termination of the lease. However, potential environmental liabilities are generally known at the time of the sale of the dealership if not previously remediated. The Company does not have any known material environmental commitments or contingencies and presently has no reason to believe that it or its subsidiaries will be called on to so perform.

Although not estimated to be material, the Company's exposure under these leases is difficult to estimate and there can be no assurance that any performance of the Company or its subsidiaries required under these leases would not have a material adverse effect on the Company's business, financial condition, or cash flows.

BALANCE, September 30, 2016	\$806,681	\$59,943	\$13,769	\$880,393 ⁽¹⁾

⁽¹⁾ Net of accumulated impairment of \$97.8 million.

The Company evaluates intangible franchise rights and goodwill assets for impairment annually or more frequently if events or circumstances indicate possible impairment. During the three months ended September 30, 2016, the Company identified circumstances indicating possible impairment of some individual franchise rights and requiring a quantitative assessment. The Company did not identify any such circumstances relative to the goodwill for each of its reporting units. Based on the results of the Company's assessment, the Company determined that the fair values of the franchise rights on two U.S. franchises were below their respective carrying values, resulting in franchise asset impairment charges of \$10.6 million. This was recognized as an asset impairment in the Company's Consolidated Statements of Operations during the three months ended September 30, 2016.

14. SEGMENT INFORMATION

As of September 30, 2016, the Company had three reportable segments: (1) the U.S., (2) the U.K., and (3) Brazil. Each of the reportable segments is comprised of retail automotive franchises, which sell new and used cars and light trucks; arranges related vehicle financing; sells service and insurance contracts; provides automotive maintenance and repair services; and sells vehicle parts. The vast majority of the Company's corporate activities are associated with the operations of the U.S. operating segments and therefore the corporate financial results are included within the U.S. reportable segment.

Reportable segment revenue, income (loss) before income taxes, (provision) benefit for income taxes and net income (loss) were as follows for the three and nine months ended September 30, 2016 and 2015:

	Three Months Ended September 30, 2016				Nine Months Ended September 30, 2016			
	U.S.	U.K.	Brazil	Total	U.S.	U.K.	Brazil	Total

15. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

The following tables include condensed consolidating financial information as of September 30, 2016 and December 31, 2015, and for the three and nine months ended September 30, 2016 and 2015, for Group 1 Automotive, Inc.'s (as issuer of the 5.00% Notes), guarantor subsidiaries and non-guarantor subsidiaries (representing foreign entities). The condensed consolidating financial information includes certain allocations of balance sheet, statement of operations and cash flows items that are not necessarily indicative of the financial position, results of operations or cash flows of these entities had they operated on a stand-alone basis. In accordance with Rule 3-10 of Regulation S-X, condensed consolidated financial statements of non-guarantors are not required. The Company has no assets or operations independent of its subsidiaries. Obligations under the 5.00% Senior Notes are fully and unconditionally and jointly and severally guaranteed on a senior unsecured basis by the Company's current 100%-owned domestic subsidiaries and certain of the Company's future domestic subsidiaries, with the exception of the Company's "minor" subsidiaries (as defined by Rule 3-10 of Regulation S-X). There are no significant restrictions on the ability of the Company or subsidiary guarantors for the Company to obtain funds from its subsidiary guarantors by dividend or loan. None of the subsidiary guarantors' assets represent restricted assets pursuant to SEC Rule 4-08(e)(3) of Regulation S-X.

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q (this "Form 10-Q") includes certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended ("Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). Forward-looking statements may appear throughout this report including, but not limited to, the following sections: "Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Quantitative and Qualitative Disclosures About Market Risk." This information includes statements regarding our plans, goals or current expectations with respect to, among other things:

- our future operating performance;
- our ability to maintain or improve our margins;
- operating cash flows and availability of capital;
- the completion of future acquisitions;
- the future revenues of acquired dealerships;
- future stock repurchases, refinancing of debt, and dividends;
- future capital expenditures;
- changes in sales volumes and availability of credit for customer financing in new and used vehicles and sales volumes in the parts and service markets;
- business trends in the retail automotive industry, including the level of manufacturer incentives, new and used vehicle retail sales volume, customer demand, interest rates and changes in industry-wide inventory levels; and
- availability of financing for inventory, working capital, real estate and capital expenditures.

Although we believe that the expectations reflected in these forward-looking statements are reasonable when and as made, we cannot assure you that these expectations will prove to be correct. When used in this Form 10-Q, the words "anticipate," "believe," "estimate," "expect," "intend," "may" and similar expressions, as they relate to our company and management, are intended to identify forward-looking statements, which are generally not historical in nature. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, there can be no assurance that future developments affecting us will be those that we anticipate. All comments concerning our expectations for future revenues and operating results are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Actual results may differ materially from anticipated results in the forward-looking statements for a number of reasons, including:

- future deterioration in the economic environment, including consumer confidence, interest rates, the prices of oil and gasoline, the level of manufacturer incentives and the availability of consumer credit may affect the demand for new and used vehicles, replacement parts, maintenance and repair services and finance and insurance products;
- adverse domestic and international developments such as war, terrorism, political conflicts or other hostilities may adversely affect the demand for our products and services;
- the existing and future regulatory environment, including legislation related to the Dodd-Frank Wall Street Reform and Consumer Protection Act, climate control changes legislation, and unexpected litigation or adverse legislation, including changes in state franchise laws, may impose additional costs on us or otherwise adversely affect us;
- a concentration of risk associated with our principal automobile manufacturers, especially Toyota, Nissan, Honda, BMW, Ford, Daimler, General Motors, Chrysler, and Volkswagen, because of financial distress, bankruptcy, natural disasters that disrupt production or other reasons, may not continue to produce or make available to us vehicles that are in high demand by our customers or provide financing, insurance, advertising or other assistance to us;
- restructuring by one or more of our principal manufacturers, up to and including bankruptcy may cause us to suffer financial loss in the form of uncollectible receivables, devalued inventory or loss of franchises;
- requirements imposed on us by our manufacturers may require dispositions, limit our acquisitions or increases in the level of capital expenditures related to our dealership facilities;
- our existing and/or new dealership operations may not perform at expected levels or achieve expected improvements;

- our failure to achieve expected future cost savings or future costs may be higher than we expect;
- manufacturer quality issues, including the recall of vehicles, may negatively impact vehicle sales and brand reputation;
- available capital resources, increases in cost of financing (such as higher interest rates) and our various debt agreements may limit our ability to complete acquisitions, complete construction of new or expanded facilities, repurchase shares or pay dividends;
- our ability to refinance or obtain financing in the future may be limited and the cost of financing could increase significantly;
- foreign exchange controls and currency fluctuations;
- new accounting standards could materially impact our reported earnings per share;
- our ability to acquire new dealerships and successfully integrate those dealerships into our business;
- the impairment of our goodwill, our indefinite-lived intangibles and our other long-lived assets;
- natural disasters, adverse weather events and other catastrophic events;
- our foreign operations and sales in the U.K. and Brazil, which pose additional risks;
- the inability to adjust our cost structure to offset any reduction in the demand for our products and services;
- loss of our key personnel;
- competition in our industry may impact our operations or our ability to complete additional acquisitions;
- the failure to achieve expected sales volumes from our new franchises;
- insurance costs could increase significantly and all of our losses may not be covered by insurance; and
- our inability to obtain inventory of new and used vehicles and parts, including imported inventory, at the cost, or in the volume, we expect.

For additional information regarding known material factors that could cause our actual results to differ from our projected results, please see Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2015 (the "2015 Form 10-K"), as well as "Management's Discussion and Analysis" and "Quantitative and Qualitative Disclosures About Market Risk."

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no responsibility to publicly release the result of any revision of our forward-looking statements after the date they are made.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those discussed in the forward-looking statements because of various factors. See "Cautionary Statement about Forward-Looking Statements."

In the preparation of our financial statements and reporting of our operating results in accordance with United States generally accepted accounting principles ("U.S. GAAP"), certain non-core business items are required to be presented. Examples of items that we consider non-core include non-cash asset impairment charges, gains and losses on dealership, franchise or real estate transactions, and catastrophic events such as hail storms, hurricanes, and snow storms. In order to improve the transparency of our disclosures, provide a meaningful presentation of results from our core business operations and improve period-over-period comparability, we have included certain adjusted financial measures that exclude the impact of these non-core business items. These adjusted measures are not measures of financial performance under U.S. GAAP, but are instead considered non-GAAP financial performance measures. In addition, management evaluates the Company's results of operations on both an as reported and a constant currency basis. The constant currency presentation, which is a non-GAAP measure, excludes the impact of fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our underlying business and results of operations, consistent with how we evaluate our performance. We calculate constant currency percentages by converting our current period reported results for entities reporting in currencies other than United States dollars using comparative period exchange rates rather than the actual exchange rates in effect during the respective periods. The constant currency performance measures should not be considered a substitute for, or superior to, the measures of financial performance prepared in accordance with U.S. GAAP.

Our management uses these adjusted measures in conjunction with U.S. GAAP financial measures to assess our business, including communication with our Board of Directors, investors and industry analysts concerning financial performance. Therefore, we believe these adjusted financial measures are relevant and useful to users of the following financial information. For further explanation and reconciliation to the most directly comparable GAAP measures, see "Non-GAAP Financial Measures" below.

Overview

We are a leading operator in the automotive retail industry. Through our dealerships, we sell new and used cars and light trucks; arrange related vehicle financing; sell service and insurance contracts; provide automotive maintenance and repair services; and sell vehicle parts. Our operations are aligned into four geographic regions: the East and West Regions in the United States ("U.S."), the United Kingdom ("U.K.") Region, and the Brazil Region. Our U.S. regional vice presidents report directly to our Chief Executive Officer and are responsible for the overall performance of their regions, as well as for overseeing the dealership operations management that report to them. Further, the East and West Regions of the U.S. are economically similar in that they deliver the same products and services to a common customer group, their customers are generally individuals, they follow the same procedures and methods in managing their operations, and they operate in similar regulatory environments. As a result, we aggregate the East and West Regions of the U.S. into one reportable segment. The operations of our international regions are structured similarly to the U.S. regions, each with a regional vice president reporting directly to our Chief Executive Officer. As such, our three reportable segments are the U.S., which includes the activities of our corporate office, the U.K. and Brazil. As of September 30, 2016, we owned and operated 210 franchises, representing 32 brands of automobiles, at 159 dealership locations and 37 collision centers worldwide. We own 147 franchises at 112 dealerships and 28 collision centers in the U.S., 40 franchises at 29 dealerships and eight collision centers in the U.K., and 23 franchises at 18 dealerships and one collision center in Brazil. Our operations are primarily located in major metropolitan areas in Alabama, California, Florida, Georgia, Kansas, Louisiana, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, Oklahoma, South Carolina and Texas in the U.S., in 19 towns of the U.K. and in key metropolitan markets in the states of Sao Paulo, Parana, Mato Grosso do Sul and Santa Catarina in Brazil.

Outlook

During the three months ended September 30, 2016, industry new vehicle registrations in the U.S. declined 1.3% compared to the same period a year ago. In response, and particularly given the headwinds we are experiencing in most of our energy-dependent markets, we are focused on opportunities to enhance our operating results by:

- (a) improving our new and used vehicle gross profit per unit sold;
- (b) continuing to focus on our higher margin parts and service business, implementing strategic selling methods, and improving operational efficiencies;
- (c) investing capital where necessary to support our anticipated growth, particularly in our parts and service business; and
- (d) further leveraging our revenue and gross profit growth through the continued implementation of cost efficiencies.

Table of Contents

In terms of GDP, the U.K. economy represents the fifth largest economy in the world. Industry new vehicle registrations in the U.K. increased 1.4% and 2.6% in the three and nine months ended September 30, 2016, respectively, as compared to the same period a year ago. The majority vote in favor of the Referendum of the United Kingdom's Membership of the European Union (E.U.) (referred to as Brexit), advising for the exit of the United Kingdom from the European Union, created much uncertainty in the U.K., as well as the global markets. The U.K. industry's new vehicle sales experienced more volatility than normal following the Brexit vote. We expect industry sales to remain volatile in the near future and overall flat to slightly down in 2017. In addition, the announcement of Brexit initially caused significant exchange rate fluctuations that resulted in the weakening of the British pound sterling, in which we conduct business in the U.K., against the U.S. dollar and other global currencies. The weakening of the British pound sterling has and may continue to adversely affect our results of operations, as well as have a negative impact on the pricing and affordability of the vehicles in the U.K. Volatility in exchange rates is expected to continue in the short term.

In terms of GDP, the Brazilian economy represents the ninth largest economy in the world. At present, the Brazilian economy is in recession and is facing many challenges. Industry new vehicle registrations in Brazil declined 22.5% for the nine months ended September 30, 2016 as compared to the same period a year ago. We expect macro-economic conditions in Brazil to remain challenged in the near term and automobile industry sales to continue to be under pressure for the remainder of 2016 and into 2017. Longer term, we expect improvements in industry sales volumes and are utilizing a strategy of aligning with growing brands. In conjunction with this strategy, we added four franchises in Brazil during the nine months ended September 30, 2016. These franchises are expected to generate approximately \$20 million in annual revenues. In addition, since December 31, 2015, we have disposed of four franchises in Brazil. These four franchises combined to generate roughly \$35 million in trailing twelve month revenues. We expect that the net impact to our profitability of this adjustment to our portfolio will be positive. We expect that our operations will continue to consistently generate positive cash flow in the future and we are focused on maximizing the return that we generate from our invested capital, as well as positioning our balance sheet to take advantage of investment opportunities as they arise. We remain committed to our growth-by-acquisition strategy and, over the long term, we believe that significant opportunities exist to enhance our portfolio with dealership acquisitions in the U.S., U.K. and Brazil that provide satisfactory returns on our investment. We will continue to pursue dealership investment opportunities that we believe will add value for our stockholders and will continue to monitor the relative value of dealership acquisitions, share repurchases and shareholder dividends in the future. However, our capital allocation strategy is dynamic and dependent on a variety of market conditions. We continue to closely scrutinize all planned future capital spending and work closely with our manufacturer partners to make prudent capital investment decisions that are expected to generate an adequate return and/or improve the customer experience. We anticipate that our capital spending for the year of 2016 will be less than \$125 million.

Financial and Operational Highlights

Our operating results reflect the combined performance of each of our interrelated business activities, which include the sale of new vehicles, used vehicles, finance and insurance products, and parts, as well as maintenance, repair and collision restoration services. Historically, each of these activities has been directly or indirectly impacted by a variety of supply/demand factors, including vehicle inventories, consumer confidence, discretionary spending levels, availability and affordability of consumer credit, manufacturer incentives, weather patterns, fuel prices and interest rates. For example, during periods of sustained economic downturn or significant supply/demand imbalances, new vehicle sales may be negatively impacted as consumers tend to shift their purchases to used vehicles. Some consumers may even delay their purchasing decisions altogether, electing instead to continue to maintain and repair their existing vehicles. In such cases, however, we believe the new vehicle sales impact on our overall business is mitigated by our ability to offer other products and services, such as used vehicles and parts, as well as maintenance, repair and collision restoration services. In addition, our ability to expediently adjust our cost structure in response to changes in new vehicle sales volumes also tempers the negative impact of such volume changes.

In the U.S., we generally experience higher volumes of vehicle sales and service in the second and third calendar quarters of each year. This seasonality is generally attributable to consumer buying trends and the timing of manufacturer new vehicle model introductions. In addition, in some regions of the U.S., vehicle purchases decline

during the winter months due to inclement weather. As a result, our U.S. revenues and operating income are typically lower in the first and fourth calendar quarters and higher in the second and third calendar quarters. For the U.K., the first and third calendar quarters tend to be stronger, driven by the vehicle license plate change months of March and September. For Brazil, we expect higher volumes in the third and fourth calendar quarters. The first calendar quarter is generally the weakest, driven by heavy consumer vacations and activities associated with Carnival. Other factors unrelated to seasonality, such as changes in economic condition, manufacturer incentive programs and changes in currency exchange rates, may exaggerate seasonal or cause counter-seasonal fluctuations in our reported consolidated revenues and consolidated operating income.

Table of Contents

Our operating results as reported on a U.S. GAAP basis for the three months ended September 30, 2016 were negatively impacted by the following non-core items: \$10.8 million of non-cash impairment charges on a pre-tax basis (\$6.7 million on an after-tax basis), \$0.5 million of losses related to vehicle inventory losses from catastrophic events in Texas and Louisiana on a pre-tax basis (\$0.3 million on an after-tax basis), and a \$0.3 million charge for a foreign transaction tax in Brazil on both a pre-tax and after-tax basis, partially offset by a \$1.1 million pre-tax gain related to real estate and dealership transactions (\$0.7 million on an after-tax basis). For the nine months ended September 30, 2016, our operating results as reported on a U.S. GAAP basis were negatively impacted by the following non-core items: \$12.3 million of non-cash impairment charges on a pre-tax basis (\$7.7 million on an after-tax basis), \$5.9 million of losses related to catastrophic events on a pre-tax basis (\$3.7 million on an after-tax basis), \$0.6 million of acquisition costs on both a pre-tax and after-tax basis, and a \$0.3 million charge for a foreign transaction tax in Brazil on both a pre-tax and after-tax basis, partially offset by a \$1.7 million benefit related to foreign deferred income taxes on an after-tax basis and \$1.0 million of net gains related to real estate and dealership transactions on a pre-tax basis (\$0.3 million on an after-tax basis). On a comparable basis, our operating results as reported on a U.S. GAAP basis for the three months ended September 30, 2015 were negatively impacted by the following non-core item: \$0.9 million of non-cash impairment charges on a pre-tax basis (\$0.8 million on an after-tax basis). For the nine months ended September 30, 2015, our operating results as reported on a U.S. GAAP basis were negatively impacted by the following non-core items: \$2.0 million of non-cash impairment charges on a pre-tax basis (\$1.6 million on an after-tax basis), a \$1.0 million charge related to vehicle inventory losses from flooding in Houston, Texas, on a pre-tax basis (\$0.6 million on an after-tax basis), a \$1.0 million legal settlement on a pre-tax basis (\$0.6 million on an after-tax basis), and \$0.2 million in severance costs on both a pre-tax and after-tax basis, partially offset by \$1.1 million of net gains related to real estate and dealership transactions on a pre-tax basis (\$0.6 million on an after-tax basis). These non-core items have been excluded from our U.S. GAAP results in the following discussion of "adjusted" results. Please see "Non-GAAP Financial Measures" for further explanation and reconciliation of the U.S. GAAP and non-GAAP data.

For the three and nine months ended September 30, 2016, all of our financial results were bolstered from growth in the U.K., primarily as a result of the acquisition of a group of dealerships in February 2016. Partially offsetting these improvements in the U.K. for both the three and nine months ended September 30, 2016, the British pound sterling significantly weakened versus the U.S. Dollar, as compared to the same periods a year ago. In total for the three months ended September 30, 2016, our revenues increased 0.8% from 2015 levels to \$2.8 billion, reflecting a 33.2% increase in the U.K., partially offset by decreases of 2.9% and 13.2% in the U.S. and Brazil, respectively. In the U.S., a 2.5% improvement in parts and service revenues was more than offset by a 5.5% decline in new vehicle retail revenues and a 1.7% decline in finance and insurance revenues. For Brazil, the 13.2% decrease in total revenues is primarily explained by a 17.0% decline in new vehicle retail revenues. For the nine months ended September 30, 2016, our total revenues improved 3.2% to \$8.2 billion, reflecting a 42.8% increase in the U.K., partially offset by a 1.0% decline in the U.S. and a 20.4% decrease in Brazil. In the U.S., improvements of 4.4% and 2.9% in parts and service and retail used vehicle revenues, respectively, were more than offset by a 3.7% decline in new vehicle retail revenues. In Brazil, the 20.4% decline in total revenues is primarily explained by a 23.5% decrease in new vehicle retail revenues, as well as a weakening in the Brazilian real versus the U.S. Dollar for the nine-months ended September 30, 2016 compared to the comparable prior period. Total gross profit improved \$8.3 million, or 2.1%, to \$406.7 million for the third quarter of 2016 over the prior year period, primarily as a result of a \$11.2 million, or 31.0% increase in our U.K. operations. In the U.S., total gross profit decreased 0.5%, as a 1.5% improvement in our parts and service business was more than offset by declines of 0.9%, 4.5% and 1.7% in our new vehicle retail, used vehicle retail and finance and insurance businesses, respectively. In Brazil, we realized a 9.8% decline in total gross profit, which was more than explained by a 24.7% decrease in our new vehicle retail business. For the nine months ended September 30, 2016, gross profit increased 4.5% over the prior year period to \$1.2 billion, primarily as a result of \$44.2 million, or 42.4%, increase in our U.K. operations, coupled with a \$19.0 million, or 1.9% increase in our U.S. operations. In the U.S., the 1.9% improvement primarily reflects a 3.9% growth in our parts and service business, coupled with a 1.2% improvement in our new vehicle retail business. In Brazil, total gross profit declined 25.2% for the nine months ended September 30, 2016, reflecting decreases of 35.3% and 25.1% in our new vehicle retail and

parts and service businesses, respectively, as well as a further weakening in the Brazilian real versus the U.S. Dollar for the nine months ended September 30, 2016 compared to prior period. Selling, General and Administrative expenses ("SG&A") rose 3.5% to \$299.0 million in the third quarter of 2016, as compared to the prior year period, primarily as a result of a 40.8% increase in our U.K. segment, as well as a 6.4% increase in Brazil. As a partial offset, SG&A in our U.S. segment declined 0.9%, as we responded to declining revenues and gross profit by continuing to leverage our structure and execute on cost savings initiatives. For the nine months ended September 30, 2016, SG&A rose 6.0% over the prior year period, driven by increases of 2.7% and 46.2% in our U.S. and U.K. segments, respectively. The increase in the U.S. was primarily driven by increases in other variable costs associated with vehicle inventory levels, as well as the expansion of our fixed operations business. The increase in the U.K. is explained by the general correlation of variable costs, including salesperson commission payments, and vehicle sales, as well as the incremental number of dealerships owned and operated. On an adjusted basis, total SG&A rose 3.6% and 5.5% for the three and nine months ended September 30, 2016, respectively. For the three months ended September 30, 2016, net income decreased 21.9% to \$35.4 million and diluted income per share decreased 12.2% to \$1.65, as compared to the three months ended September 30, 2015. For the nine months ended September 30, 2016, net income

Table of Contents

decreased 8.8% to \$116.2 million and diluted income per share declined 0.8% to \$5.22, as compared to the nine months ended September 30, 2015. On an adjusted basis for the three months ended September 30, 2016, net income decreased 8.8% to \$42.0 million, but diluted income per share improved 2.6% to \$1.96 as compared to the three months ended September 30, 2015. On an adjusted basis for the nine months ended September 30, 2016, net income decreased 2.6% to \$126.4 million, but diluted income per share grew 6.0% to \$5.68. The increases in our adjusted diluted income per share for both the three and nine months ended September 30, 2016 can be attributed to decreases of 11.1% and 8.3% in our weighted average diluted common shares outstanding, respectively, over the prior year periods. The decreases in weighted average dilutive common shares outstanding were primarily the result of the repurchase of 2,609,443 shares of our common stock over the last twelve months. For the nine months ended September 30, 2016, our net cash provided by operations increased \$155.7 million over the prior year period to \$386.6 million, primarily driven by a \$152.3 million increase in the net change in operating assets and liabilities. On an adjusted basis, our net cash provided by operations increased \$8.0 million over the prior year period to \$237.8 million, primarily driven by a \$4.6 million increase in the net change in operating assets and liabilities. See "Liquidity and Capital Resources" and "Non-GAAP Financial Measures" for details regarding adjustments to cash flow.

Performance Indicators

Consolidated Statistical Data

The following table highlights certain of the key performance indicators we use to manage our business.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Unit Sales				
Retail Sales				
New Vehicle	45,597	47,126	130,022	131,130
Used Vehicle	33,012	32,491	98,754	93,913
Total Retail Sales	78,609	79,617	228,776	225,043
Wholesale Sales	15,027	14,926	43,077	43,493
Total Vehicle Sales	93,636	94,543	271,853	268,536
Gross Margin				
New Vehicle Retail Sales	5.1	% 5.0	% 5.1	% 5.0
Total Used Vehicle Sales	5.5	% 5.7	% 5.9	% 6.0
Parts and Service Sales	54.2	% 54.8	% 54.0	% 54.3
Total Gross Margin	14.4	% 14.2	% 14.7	% 14.5
SG&A ⁽¹⁾ as a % of Gross Profit	73.5	% 72.5	% 73.9	% 72.9
Adjusted SG&A ⁽¹⁾ as a % of Gross Profit ⁽²⁾	73.6	% 72.5	% 73.5	% 72.8
Operating Margin	3.0%	3.5%	3.2%	3.5%

⁽¹⁾ Selling, general and administrative expenses.

⁽²⁾ See "Non-GAAP Financial Measures" for more details.

The following discussion briefly highlights certain of the results and trends occurring within our business. Throughout the following discussion, references may be made to Same Store results and variances which are discussed in more detail in the "Results of Operations" section that follows. Our results are impacted by changes in exchange rates relating to our U.K. and Brazil segments. As exchange rates fluctuate, our results of operations as reported in U.S. dollars fluctuate. For example, if the British pound sterling were to weaken against the U.S. dollar, our U.K. results of

operations would translate into less U.S. dollar reported results. The British pound sterling weakened against the U.S. dollar as the average exchange rate during the three and nine months ended September 30, 2016 decreased 18.0% and 10.2%, respectively, compared to the same periods in 2015. The Brazilian real strengthened against the U.S. dollar for the three months ended September 30, 2016 as the average exchange rate increased 8.1% but weakened by 12.6% for the nine months ended September 30, 2016, as compared to the same periods in 2015.

Management evaluates the Company's results of operations on both an as reported and a constant currency basis. Constant currency, which is a non-GAAP measure, excludes the impact of fluctuations in foreign currency exchange rates. We

Table of Contents

believe providing constant currency information provides valuable supplemental information regarding our underlying business and results of operations, consistent with how we evaluate our performance. We calculate constant currency percentages by converting our current period reported results for entities reporting in currencies other than United States dollars using comparative period exchange rates rather than the actual exchange rates in effect during the respective periods. The constant currency performance measures should not be considered a substitute for, or superior to, the measures of financial performance prepared in accordance with U.S. GAAP.

Our consolidated revenues from new vehicle retail sales declined 0.8% for the three months ended September 30, 2016 and increased 1.6% for the nine months ended September 30, 2016 as compared to the same periods in 2015. For the third quarter of 2016, growth in our U.K. segment was more than offset by declines in the U.S. and Brazil. During the third quarter of 2016, the U.K. experienced more volatility than normal following the Brexit vote. Following a decline of nearly 1.0% in June 2016, and flat industry sales in July, industry sales of new vehicles grew 3.0% in August, and 1.6% in September 2016 over 2015 levels, aided by increased fleet sales. Our new vehicle retail unit sales in the U.K. rose 62.4% and 64.5%, respectively, for the three and nine months ended September 30, 2016, as compared to the same periods in 2015, primarily reflecting the acquisition of a dealership group in early February, as well as the continued successful execution by our operating team on key initiatives. Excluding the impact of acquisitions, for the three and nine months ended September 30, 2016, new vehicle retail unit sales increased 1.5% and 6.2%, respectively, in the U.K.. During the three months ended September 30, 2016, industry new vehicle registrations in the U.S. declined 1.3% compared to the same period a year ago. Our U.S. new vehicle retail unit sales decreased 9.5% and 7.5% for the three and nine months ended September 30, 2016, respectively, from the same periods a year ago. The decline in our new vehicle retail unit sales was driven by our over-weight exposure to many energy-dependent markets in Texas and Oklahoma, which have been particularly soft as a result of depressed oil prices. For the three and nine months ended September 30, 2016, our new vehicle unit sales in Texas were down 10.4% and 7.9%, while our Oklahoma unit sales were down 17.7% and 10.9%, respectively, when compared to the same periods a year ago. As a result, our U.S. revenues from new vehicle retail sales declined 5.5% and 3.7% for the three and nine month periods of 2016, respectively, reflecting a partial offset to the reduced volumes with increases in our average new vehicle retail sales price of 4.4% and 4.1%, respectively. The increases in our average sales price were primarily due to the shift in the mix of new retail units sold, as our truck unit sales increased to 55.9% of total new vehicle retail units sold for the three months ended September 30, 2016 as compared to 50.7% last year, generally correlating with lower gas prices. For the nine months ended September 30, 2016, our truck unit sales increased to 55.5% of total new vehicle retail units sold as compared to 50.5% for the same period a year ago. For the three and nine months ended September 30, 2016, Brazil new vehicle retail unit sales declined 32.2% and 24.2% and, on a U.S. dollar basis, new vehicle retail revenues declined 17.0% and 23.5%, respectively, when compared to the same periods in 2015, reflecting decreased consumer confidence and higher interest rates. Consolidated new vehicle retail gross margin improved 10 basis points to 5.1% for the three and nine months ended September 30, 2016, as compared to the same periods in 2015, driven by a 20 basis point increase in the U.S. for the three and nine month periods of 2016. Our U.S. operating team took a more disciplined approach to new vehicle pricing that focused on increased gross profit per unit. As a result, we improved new vehicle gross profit per retail unit "PRU" sold in the U.S. by 9.5% and 9.4% for the three and nine months ended September 30, 2016, respectively, as compared to last year. The increase in the U.S. was partially offset by the competitive selling environment in the U.K., the worsening economic conditions in Brazil, and the impact of the change in exchange rates between periods.

Our used vehicle results are directly affected by economic conditions, the level of manufacturer incentives on new vehicles and new vehicle financing, the number and quality of trade-ins and lease turn-ins, the availability of consumer credit, and our ability to effectively manage the level and quality of our overall used vehicle inventory. Our total revenues from used vehicle retail sales increased 2.2% and 5.7% for the three and nine months ended September 30, 2016, respectively, as compared to the same period in 2015, primarily due to acquisition activity particularly in the U.K. In the U.S., used vehicle retail revenues was relatively flat for the three months ended September 30, 2016, as a 1.7% decline in retail used vehicle units sold was essentially offset by a 1.4% increase in the average retail used vehicle sales price per unit. Revenue from used vehicle retail sales improved 2.9% in the U.S. for the nine months ended September 30, 2016, as compared to the same period in 2015, resulting from the combination of a 1.6%

increase in retail used vehicle units sold and a 1.3% improvement in our average retail used vehicles sales price per unit. The U.K. generated increases in used vehicle retail revenues of 19.6% and 26.0%, respectively, primarily reflecting the acquisition of a dealership group in early February. The increases in the U.K. were dampened by the impact of exchange rates between periods. In Brazil, our used vehicle retail revenues declined by 3.2%, primarily as a result of an 18.8% decrease in the number of retail used vehicle units sold that reflects the continued weakening in economic conditions. Used vehicle retail revenues in Brazil decreased 7.1%, for the nine months ended September 30, 2016, due to the impact of the change in the currency rates between periods. On a constant currency basis, used vehicle retail sales increased 5.2% for the first nine months of 2016 compared to the same period in 2015. Total used vehicle retail gross profit decreased 1.3% for the three months ended September 30, 2016. The growth in used vehicle retail unit sales of 1.6% for the third quarter of 2016 was more than offset by a 2.9% decline in used vehicle retail gross profit PRU compared to a year ago. We generated a 107.2% improvement in used vehicle retail gross profit PRU for our Brazil operations that was offset by a 2.9%

Table of Contents

decline in the U.S. and a 15.2% decline in the U.K. The decline in the U.K. was the result of the change in exchange rates between periods as on a constant currency basis, used vehicle retail gross profit PRU was flat with the prior year period. Total used vehicle retail gross profit increased 3.4% for the nine months ended September 30, 2016, as improvements in used vehicle retail unit sales were partially offset by a decline in used vehicle retail gross profit PRU of 1.8%. The decline in used vehicle retail gross profit PRU primarily reflects a decline of 7.7% in the U.K., as compared to the same period in 2015, that was driven by the change in the exchange rates between periods. On a constant currency basis, used vehicle retail gross profit PRU in the U.K. increased 1.3%. In Brazil, used vehicle retail gross profit PRU increased 19.3%. The improvement in used vehicle retail gross profit PRU for the three and nine months ended September 30, 2016 in Brazil was primarily due to improved sales processes. In the U.S., used vehicle gross profit PRU was relatively flat for the nine months ended September 30, 2016 when compared to a year ago. Our parts and service sales increased 5.3% and 6.9% for the three and nine months ended September 30, 2016, respectively, as compared to the same periods in 2015. This growth was driven by increases in all aspects of our business: warranty parts and service, wholesale parts, customer-pay parts and service, and collision. Primarily, these increases were due to the execution of key management initiatives, dealership acquisition activity, an increase in the number of units being recalled, and an increase in the number of the late-model vehicles in operation, which tend to more consistently return to the dealership for warranty, maintenance and repair services. During the first nine months of 2016, our warranty parts and service revenues were bolstered from high volume recall campaigns by manufacturers in the U.S. and Brazil, particularly in our Toyota, Honda, Ford, Nissan and Mercedes-Benz brands. Additionally, as manufacturer paid maintenance programs continue to expand in the U.S., there has been an ongoing shift of business from our customer-pay to our warranty parts and service business. The increase in our collision sales was the result of enhanced operational processes, the addition of technicians to add operating capacity, and the expansion of our relationships with insurance providers. The increase in our customer-pay parts and service and wholesales parts revenues was driven by the U.S., primarily as a result of the execution of management initiatives. Our parts and service gross margin decreased 60 and 30 basis points for the three and nine months ended September 30, 2016, respectively, as compared to the same periods in 2015, driven primarily by declines in the U.S. parts and service gross margin of 60 and 20 basis points, respectively. The declines in our U.S. parts and service gross margin were primarily the result of less lucrative, Original Equipment Manufacturer ("OEM") paid recall warranty campaigns in 2016 as compared to those in 2015. Additionally, we experienced a mix shift in our U.S. parts and service gross margin as our relatively lower margin wholesale parts business, which is relatively lower margin, grew in relation to our internal work. The decline in internal work in the U.S. was the result of a decrease in total retail vehicles sales volumes in 2016 compared to 2015.

Our consolidated finance and insurance revenues PRU sold increased 2.3% for the three months ended September 30, 2016, as compared to the same period in 2015. We generated a 4.8% increase in finance and insurance revenues PRU to \$1,588 in the U.S. and a 46.3% improvement in Brazil. These improvements were partially offset by a 5.3% decline in finance and insurance revenues PRU in the U.K, coupled with the mix effect of a relatively greater contribution from our U.K. segment. The decline in the U.K. was directly related to the change in exchange rates between periods, as on a constant currency basis our finance and insurance revenues PRU improved 11.5%. For the nine months ended September 30, 2016, our consolidated finance insurance revenues PRU increased 1.2%, when compared to the same period in 2015. In total for both the three and nine months ended September 30, 2016, the increases in our income per contract and penetration rates on many of our product offerings were partially offset by an increase in our overall chargeback experience.

Our total consolidated gross margin increased 20 basis points for the three months ended September 30, 2016 to 14.4%, as compared to the same period in 2015. Declines in the parts and service and used vehicle sectors of our business were more than offset by improvements in our new vehicle results. For the nine months ended September 30, 2016, our total consolidated gross margin increased 20 basis points directly as a result of improved new vehicle margins, compared to the same period 2015.

Our consolidated SG&A expenses increased in absolute dollars by 3.5% and 6.0% for the three and nine months ended September 30, 2016, respectively, as compared to the same periods in 2015, primarily as a result of the incremental number of dealerships owned and operated and increased personnel costs primarily driven by commission

payments as a result of higher new vehicle margins, as well as higher insurance deductible charges in the U.S. relating to catastrophic events. In addition, during 2016, we experienced additional loaner vehicle costs as we continued to service a large amount of customers affected by recalled vehicles. For the three and nine months ended September 30, 2016, our consolidated SG&A expenses as a percentage of gross profit increased 100 basis points to 73.5% and 73.9%, respectively, as compared to the same periods a year ago. On an adjusted basis, our consolidated SG&A expenses as a percentage of gross profit increased by 110 and 70 basis points to 73.6% and 73.5% for the three and nine months ended September 30, 2016, respectively, as compared to the same periods in 2015. These increases were partially due to the mix effect of increased U.K. operations that inherently have a higher cost structure, as well as the additional dealerships acquired in 2016.

Table of Contents

The combination of all of these factors resulted in an operating margin of 3.0% and 3.2% for the three and nine months ended September 30, 2016, respectively. This reflects a 50 and 30 basis-point decline compared to the same periods in 2015. On an adjusted basis, operating margin declined 20 and 10 basis points for the three months and nine months ended September 30, 2016 to 3.3% and 3.4%, respectively, as compared to the same periods in 2015.

For the three and nine months ended September 30, 2016, floorplan interest expense increased 15.0% and 16.2%, respectively, as compared to the same periods in 2015. For the third quarter of 2016, the increases were primarily driven by the U.S. and U.K., due to a higher LIBOR interest rate in the U.S. and the impact of acquisitions in the U.K. when compared to 2015. For the nine months ended September 30, 2016, the increase in our consolidated floorplan interest expense was also attributable to an increase in our supply of luxury brand units during the first quarter, as our OEM partners redirected additional supply to the U.S. and U.K. to offset weakness in other global markets. These increases in the U.S. and U.K. were offset by a decline in Brazil as a result of improvements in vehicle inventory management processes. Other interest expense, net increased 22.8% and 20.6% for the three and nine months ended September 30, 2016, respectively, as compared to the same periods in 2015, primarily attributable to interest incurred on our 5.25% Notes offerings. As a partial offset, the vast majority of the proceeds from the 5.25% Notes offerings were used to fund the outstanding borrowings of the Company's acquisition line of credit, pay off certain mortgages, contribute to the Company's floorplan offset accounts, and for general corporate purposes.

We address these items further, and other variances between the periods presented, in the "Results of Operations" section below.

Critical Accounting Policies and Accounting Estimates

The preparation of our Consolidated Financial Statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions. In particular, to evaluate the carrying value of goodwill and intangible franchise rights for impairment, we must estimate the fair market value of the net assets of each of our reporting units and our intangible franchise rights, using estimates, assumptions and unobservable inputs that require us to use our knowledge of (1) the industry, (2) recent transactions and (3) reasonable performance expectations for our operations. On June 23, 2016, the British Citizens voted on a referendum in favor of exiting the E.U. The majority vote in favor of Brexit has created uncertainty in the global markets and in the regulatory environment in the U.K., as well as the overall European Union. The impact on our financial results and operations may not be known for some time, but could be adverse. In addition, automotive dealers in the U.K. rely on the legislative doctrine of "Block Exemption" to govern market representation activities of competing dealers and dealer groups. To date, there has been no clear indication of how such legislation may be effected by Brexit, but a change to such legislation could be adverse. If, as a result of the clarification of any of these uncertainties, the estimates, assumptions and inputs utilized in our annual impairment test for goodwill and intangible franchise rights change or fail to materialize, the resulting decline in the estimated fair market value of such assets could result in a material non-cash impairment charge. While we are not aware of any changes in circumstances that has resulted in a decline in fair value of these assets at this time, we continue to closely monitor the situation.

We disclosed certain critical accounting policies and estimates in our 2015 Form 10-K, and no other significant changes have occurred since that time.

Results of Operations

The "Same Store" amounts presented below include the results of dealerships for the identical months in each period presented in comparison, commencing with the first full month in which the dealership was owned by us and, in the case of dispositions, ending with the last full month it was owned by us. The following table summarizes our combined Same Store results for the three and nine months ended September 30, 2016, as compared to 2015. Same Store results also include the activities of our corporate headquarters.

(1)See "Non-GAAP Financial Measures" for more details.

The discussion that follows provides explanation for the variances noted above. Each table presents by primary income statement line item comparative financial and non-financial data of our Same Store locations, those locations acquired or disposed of ("Transactions") during the periods and the consolidated company for the three and nine months ended September 30, 2016 and 2015.

Our Same Store operating results as reported on a U.S. GAAP basis for the three months ended September 30, 2016 were negatively impacted by the following non-core items (on a pre-tax basis): \$10.8 million of non-cash impairment charges, \$0.5 million of losses related to catastrophic events and \$0.3 million of foreign transaction tax. For the nine months ended September 30, 2016, our Same Store operating results as reported on a U.S. GAAP basis were negatively impacted by the following non-core items (on a pre-tax basis): \$5.9 million of losses related to catastrophic events, \$12.3 million of non-cash impairment charges, \$0.6 million of acquisition costs, \$0.8 million of net losses related to real estate and dealership transactions, and \$0.3 million of foreign transaction tax. On a comparable basis, our same store operating results as reported on a U.S. GAAP basis for the three months ended September 30, 2015 were negatively impacted by the following non-core items (on a pre-tax basis): \$0.8 million of non-cash impairment

charges. Our same store operating results as reported on a U.S. GAAP basis for the nine months ended September 30, 2015 were impacted by the following non-core items (on a pre-tax basis): \$1.3 million of non-cash impairment charges, \$1.0 million charge related to vehicle inventory losses from flooding in Ho

Table of Contents

uston, Texas, a legal settlement of \$1.0 million, \$0.2 million in severance costs and \$0.4 million loss on real estate and dealership transactions. These non-core items have been excluded from our U.S. GAAP results in the following discussion of "adjusted" results. Please see "Non-GAAP Financial Measures" for further explanation and reconciliation of the Same Store U.S. GAAP and non-GAAP data.

Other	667	(23.9)%	877	2,030	(14.4)%	2,371
Total	41,989	(8.5)%	45,870	119,724	(6.5)%	127,997

In total, our Same Store new vehicle retail unit sales decreased 8.5% for the three months ended September 30, 2016, as compared to the same period in 2015. The decrease was primarily driven by decreases of 7.9% and 30.5% in our Same Store U.S. and Brazil segments, respectively. The decline in our U.S. new vehicle retail unit sales was primarily due to softness in the energy markets, as well as an overall decline in new vehicle retail demand in the industry. For the three months ended September 30, 2016, our unit sales in our energy-dependent markets of Texas and Oklahoma were down 10.4% and 17.7% respectively, when compared to the same period a year ago as a result of depressed oil prices. Overall, the U.S. seasonally adjusted annual selling rate declined 1.7% from 18.0 million units in September 2015 to 17.7 million units in September 2016, and has declined from an average of 17.7 million units for the three months ended September 30, 2015 to 17.5 million units for the three months ended September 30, 2016. In addition, our U.S. operating team has placed a heightened focus on improving new vehicle margins, resulting in lower unit sales volumes. The 30.5% decline in our Same Store new vehicle retail unit sales in Brazil reflected the decrease in total Brazil industry sales, as well as the continued local economic challenges. Partially offsetting the declines in the U.S. and Brazil was a 1.5% increase in our U.K. Same Store new vehicle retail unit sales for the three months ended September 30, 2016 compared to a year ago. During the third quarter of 2016, the U.K. experienced more volatility than normal following the Brexit vote, however industry results for the month of September 2016 increased 1.6% over 2015 levels. For the quarter ended September 30, 2016, U.K. industry sales increased 1.4% as compared to the same period last year. The increase of 1.5% in our U.K. new vehicle retail units sales reflects growth of 6.9% in our BMW/MINI brands and 2.0% in our Audi brands for the three months ended September 30, 2016 as compared to the same period last year, primarily due to enhanced sales processes, as well as an increase in overall U.K. industry sales. For the nine months ended September 30, 2016, as compared to the same period in 2015, total Same Store new vehicle retail unit sales decreased 6.5%, primarily driven by decreases of 7.0% in the U.S. and 20.7% in Brazil, partially offset by a 6.2% increase in the U.K., where industry sales reached a record level surpassing 2.0 million registrations in the first nine months of 2016, which was an increase of 2.6% over last year.

Our total Same Store revenues from new vehicle retail sales revenue decreased 5.8% for the three months ended September 30, 2016, as compared to the same period in 2015, reflecting declines in all of our segments. The 4.4% decrease in U.S. Same Store new vehicle revenue was primarily due to the decline in new vehicle retail units of 7.9%, which was partially offset by a 3.9% increase in the average new vehicle retail sales price to \$36,038. The increase in U.S. Same Store average new vehicle retail sales price was primarily due to a mix shift in sales from cars to trucks, generally driven by lower gas prices. For the third quarter of 2016, U.S. Same Store new vehicle retail truck sales represented 55.9% of total Same Store new vehicle retail units sold, as compared to 51.3% for the same period last year. Our U.K. Same Store new vehicle revenues decreased 9.7% for the three months ended September 30, 2016, as compared to the same period last year, explained by the change in exchange rate between the periods. On a constant

currency basis, our U.K. Same Store new vehicle retail revenues increased 6.1% for the third quarter of 2016, primarily as a result of the increase in new vehicle retail units and a 4.5% increase in the average new vehicle retail sales price when compared to 2015 on a constant currency basis. Our Brazil Same Store new vehicle retail sales revenue decreased 18.4% for the three months ended September 30, 2016, reflecting a 30.5% decline in new vehicle retail units partially offset by a 17.4% increase in the average new vehicle retail sales price as compared to last year. For the nine months ended September 30, 2016, as compared to the same period a year ago, total Same Store new vehicle sales revenue declined by 4.2%, primarily driven by a 3.6% decrease in the U.S. and a 23.2% decrease in Brazil. The decreases in new vehicle sales revenues in the U.S. and Brazil primarily relate to a decrease of 7.0% and 20.7% in new vehicle retail units,

Table of Contents

respectively. The decrease in our total Same Store new vehicle retail sales revenue was partially offset by a 2.3% increase in the U.K., reflecting a 6.2% increase in new vehicle retail units sold. The level of retail sales, as well as our own ability to retain or grow market share during any future period, is difficult to predict.

Our total Same Store new vehicle gross profit decreased 4.7% for the three months ended September 30, 2016, as compared to the same period in 2015, reflecting declines in all of our segments. In the U.S., Same Store new vehicle gross profit decreased 1.2%, explained by a 7.9% decrease in new vehicle retail units, partially offset by a 7.3% increase in gross profit PRU to \$1,769 as a result of our operating team's disciplined new vehicle pricing that focused on increasing gross profit per retail unit. Our Same Store new vehicle gross profit in the U.K. decreased 13.6%, primarily due to the decrease in gross profit PRU of 14.9% to \$1,806. Both of which can be explained by the change in the currency exchange rates between periods. On a constant currency basis, our Same Store U.K. gross profit increased 1.3% and gross profit PRU remained relatively flat, as compared to the same period in 2015. In Brazil, Same Store new vehicle gross profit declined 25.4% for the three months ended September 30, 2016. The decrease in gross profit in Brazil is primarily explained by the 30.5% decline in new units sold, partially offset by an increase of 7.3% in gross profit PRU to \$1,863. Our total Same Store new vehicle gross margin for the three months ended September 30, 2016, as compared to the same period in 2015, increased 10 basis points from 5.0% to 5.1%. For the nine months ended September 30, 2016, as compared to the same period a year ago, total Same Store gross new vehicle profit decreased by 2.5%, driven by a decrease of 34.7% in Brazil coupled with a 1.2% decrease in the U.K., and partially offset by an increase of 0.6% in the U.S. For the nine months ended September 30, 2016, our total Same Store new vehicle gross margin increased 10 basis points to 5.1%, as compared to 5.0% in the same period in 2015. Most manufacturers offer interest assistance to offset floorplan interest charges incurred in connection with inventory purchases. This assistance varies by manufacturer, but generally provides for a defined amount, adjusted periodically for changes in market interest rates, regardless of our actual floorplan interest rate or the length of time for which the inventory is financed. We record these incentives as a reduction of new vehicle cost of sales as the vehicles are sold, impacting the gross profit and gross margin detailed above. The total assistance recognized in cost of sales during the three months ended September 30, 2016 and 2015 was \$13.0 million and \$13.5 million, respectively. The amount of interest assistance we recognize in a given period is primarily a function of: (a) the mix of units being sold, as U.S. domestic brands tend to provide more assistance, (b) the specific terms of the respective manufacturers' interest assistance programs and market interest rates, (c) the average wholesale price of inventory sold, and (d) our rate of inventory turnover. Over the past three years, consolidated manufacturers' interest assistance as a percentage of our total consolidated floorplan interest expense has ranged from 90.0% in the first quarter of 2014 to 139.9% in the third quarter of 2015. In total, manufacturers' interest assistance was 116.6% of floorplan interest expense in the third quarter of 2016. And, in the U.S., manufacturers' interest assistance was 128.5% of floorplan interest expense in the third quarter of 2016.

We decreased our new vehicle inventory levels by \$96.7 million, or 7.7%, from \$1,262.8 million as of December 31, 2015 to \$1,166.1 million as of September 30, 2016 as a result of our focus on inventory management in response to an over-supply of inventory in some of our luxury brands as of December 31, 2015. During the fourth quarter of 2015, our supply of luxury brand units, such as Mercedes-Benz and BMW, increased as our OEM partners redirected additional supply to the U.S. and U.K to offset weakness in other global markets. As compared to September 30, 2015, our inventory levels have increased by \$23.7 million, or 2.1%, primarily due to the acquisition of additional dealerships. Additionally, several manufacturers have issued stop sales of a number of vehicle models due to recall campaigns that has contributed to an increase in our new vehicle inventory. Our consolidated days' supply of new vehicle inventory was 59 days as of September 30, 2016, which is down from 67 days as of December 31, 2015 and down from 61 days as of September 30, 2015.

In addition to factors such as general economic conditions and consumer confidence, our used vehicle business is affected by the level of manufacturer incentives on new vehicles and new vehicle financing, the number and quality of used vehicle trade-ins and lease turn-ins, the availability of consumer credit, and our ability to effectively manage the level and quality of our overall used vehicle inventory.

Our total Same Store used vehicle retail revenues decreased \$8.0 million, or 1.2%, for the three months ended September 30, 2016, as compared to the same period in 2015, reflecting a 0.7% decrease in total Same Store used vehicle retail unit sales, coupled with a 0.5% decrease in average used vehicle retail selling price to \$21,075. In the U.S., Same Store used vehicle retail revenues increased \$1.9 million, or 0.3%, reflecting a 1.3%, or \$263, increase in the average used vehicle retail sales price that

Table of Contents

was partially offset by a 0.9% decrease in Same Store used vehicle retail unit sales. As a percentage of U.S. Same Store used vehicle retail unit sales, CPO units increased 40 basis points to 26.1% for the third quarter of 2016, as compared to 25.7% for the same period in 2015. In the U.K., Same Store used vehicle retail revenues decreased 11.3% for the quarter ended September 30, 2016. This decline can be more than explained by a change in exchange rates as on a constant currency basis, our U.K. Same Store used vehicle retail revenue increased 4.7%, driven by a 3.4% increase in Same Store used vehicle retail unit sales and a 1.3% increase in the average used vehicle retail sales price. In Brazil, for the three months ended September 30, 2016, Same Store used vehicle retail revenues were up 0.8%, reflecting a 10.9% increase in the average used vehicle retail selling price (2.8% on a constant currency basis) and the impact of the change in exchange rates between periods. On a constant currency basis, Same Store used vehicle revenues in Brazil were down 6.5%, primarily reflecting a 9.1% decrease in Same Store used vehicle retail units. For the nine months ended September 30, 2016, our total Same Store used vehicle retail revenues improved 1.7%, primarily as a result of a 2.4% increase in used vehicle retail unit sales. This improvement reflects an increased focus by our operations team and enhanced processes that are being implemented. Our total Same Store average used vehicle retail sales price for the nine months of 2016 remained relatively flat as compared to last year. In total, our Same Store used vehicle retail total gross profit for the three months ended September 30, 2016 decreased 3.1%, as compared to the same period in 2015, reflecting declines in the U.S. and U.K. segments that were partially offset by improvements in Brazil. In the U.S., Same Store used vehicle gross profit decreased by 4.1%, driven by a decline in Same Store used vehicle gross profit PRU of 3.2%, or \$47, coupled with a decrease in Same Store used vehicle retail unit sales of 0.9%. In the U.K., Same Store used vehicle retail gross profit declined 9.6%, reflecting a 12.5% decrease in Same Store gross profit PRU that was partially offset by a 3.4% improvement in Same Store used vehicle retail unit sales. These declines in the U.K. can be explained by the change in exchange rates between periods as, on a constant currency basis, Same Store used vehicle retail gross profit and used vehicle gross profit PRU in the U.K. improved 6.8% and 3.4%, respectively. The increases in the U.K. were primarily a result of improving industry conditions and a strong performance by our operating teams. In Brazil, the increase of 91.7% in Same Store used vehicle retail gross profit resulted from a \$785, or 111.0%, increase in Same Store used vehicle retail gross profit PRU that was partially offset by a 9.1% decrease in Same Store used vehicle retail unit sales. The improvement in Brazil is primarily a result of increased focus on used vehicles and the implementation of new and improved sales processes by our local operating team. For the nine months ended September 30, 2016, as compared to the same period in 2015, total Same Store used vehicle retail gross profit increased 0.4%, driven by a 2.4% increase in Same Store used vehicle retail units that was partially offset by a 2.0% decrease in Same Store used vehicle gross profit PRU. During the three months ended September 30, 2016, total Same Store wholesale used vehicle revenue decreased 1.6%, as compared to the same period in 2015, driven by declines in the U.K. and the Brazil segments and partially offset by increases in our U.S. business. In the U.S., the 3.8% increase in Same Store wholesale used vehicle revenue for the three months ended September 30, 2016 was the result of an 8.2% increase in used vehicle wholesale average sales price that was partially offset by a 4.0% decline in Same Store wholesale used vehicle unit sales. The increase in our average used vehicle wholesale sales price reflects the improvement in used vehicle market prices. The Manheim Index for the third quarter of 2016 increased 2.0% as compared to the same period last year. The decline in U.S. used vehicle wholesale unit sales volume was driven by lower used vehicle trade-in activity associated with lower new vehicle unit sales volume during the third quarter of 2016, particularly in our energy driven markets. In the U.K., Same Store used vehicle wholesale revenue declined 16.4%. On a constant currency basis, Same Store used vehicle wholesale sales declined 1.4%, reflecting a 2.5% decrease in Same Store used vehicle wholesale average sales price that was partially offset by a 1.2% increase in Same Store used vehicle wholesale units. In Brazil, Same Store used vehicle wholesale revenue declined 20.4% as a result of a decrease in Same Store used vehicle wholesale average sales price of 21.5% that was partially offset by a 1.3% increase in Same Store wholesale used vehicle unit sales. This decline in our wholesale business in Brazil reflects a strategic decision to retail more of our trade-in units. For the nine months ended September 30, 2016, as compared to the same period in 2015, Same Store used vehicle wholesale revenue decreased 7.1%, driven by a 5.5% decline in Same Store used vehicle wholesale unit sales coupled with a 1.8% decline in Same Store average used vehicle wholesale sales price.

Our total Same Store used vehicle wholesale gross profit increased 8.9% from a loss of \$1.6 million for the three months ended September 30, 2015 to a loss of \$1.5 million for the comparable period in 2016. This increase was driven by a 6.3%, or \$7, increase in our Same Store used vehicle wholesale gross profit per unit from a loss of \$112 per unit for the three months ended September 30, 2015 to a loss of \$105 per unit for the same period this year, coupled with a decrease in total Same Store used vehicle wholesale units of 2.9%. In the U.S., used vehicle wholesale gross profit increased 9.0% for the three months ended September 30, 2016, primarily as a result of a 5.6% increase in wholesale gross profit per unit coupled with a 4.0% decline in used vehicle wholesale units in 2016 as compared to the same period in 2015. The increase in profitability corresponds with a 2.0% increase in the average used vehicle market prices during the third quarter of 2016 as reflected in the Manheim index. In the U.K., the 9.6% increase in Same Store used vehicle wholesale gross profit was driven by the change in exchange rates between periods. In Brazil, the decline in Same Store used vehicle wholesale gross profit of 13.2% was driven by a decrease in Same Store used vehicle wholesale gross profit per unit of 14.5%. For the nine months ended September 30,

Table of Contents

2016, our total Same Store used vehicle wholesale gross profit decreased 14.8%, driven by a 5.5% decrease in used vehicle wholesale unit sales as the used vehicle wholesale gross profit per unit remained flat as compared to the same period in 2015.

As of September 30, 2016, we increased our used vehicle inventory levels by \$39.8 million, or 14.4%, from December 31, 2015 and by \$20.0 million, or 6.8%, from September 30, 2015 to \$315.3 million, primarily reflecting improved used vehicle sales. This increase in inventory levels also reflects the impact of the stop sale instructions from various OEMs primarily associated with Takata airbag recalls. At September 30, 2016, we had approximately 500 used vehicle units in our U.S. inventory on stop sale awaiting completion of repairs. Our consolidated days' supply of used vehicle inventory increased to 34 days, as of September 30, 2016, as compared to 33 days as of December 31, 2015 and September 30, 2015.

Our total Same Store parts and service revenues increased \$7.7 million, or 2.6%, to \$303.4 million for the three months ended September 30, 2016, as compared to the same period in 2015, primarily driven by growth in the U.S. and Brazil, partially offset by a decline in our U.K. business. For the three months ended September 30, 2016, our U.S. Same Store parts and service revenue increased 3.4%, or \$8.9 million, reflecting a 3.5% increase in customer-pay parts and service revenue, a 5.1% increase in warranty parts and service revenues, a 3.2% increase in collision revenue, and a 2.0% increase in wholesale parts revenues, when compared to the same period in 2015. The growth in customer-pay parts and service revenue was supported by the continued progress we are making in adding service technicians and expanding shop capacity where applicable. The increase in warranty parts and service revenue was primarily driven by high volume recall campaigns within our Honda, General Motors, Nissan, Toyota, Mercedes-Benz, and Ford brands that occurred during the third quarter of 2016. The increase in collision revenue was primarily attributable to strategic initiatives that continue to enhance our operational processes, the addition of

technicians to add operating capacity and the expansion of direct repair programs with insurance companies. The increase in wholesale parts revenues was primarily due to increased focus and better overall management of this portion of our business in a few key markets. Our total Same Store parts and service revenue improved \$32.5 million, or 3.7%, to \$898.0 million for the nine months ended September 30, 2016, as compared to the same period in 2015, primarily reflecting an increase in the U.S. that was partially offset by a decrease in our U.K. and Brazil businesses. For the nine months ended September 30, 2016, our U.S. same store parts and service revenues improved 4.7%, primarily as a result of a 4.4% increase in customer-pay parts and ser

Table of Contents

vice revenues, a 5.7% increase in warranty parts and service revenues, a 4.3% increase in wholesale parts revenues, and a 4.8% increase in collision revenues.

Our U.K. Same Store parts and service revenues decreased 8.6%, or \$2.2 million, for the three months ended September 30, 2016, as compared to the same period in 2015. This decline can be more than explained by a change in exchange rates. On a constant currency basis, we realized a 7.9% improvement in our Same Store parts and service revenues, driven by an increase of 12.3% in our warranty parts and service revenue, a 4.6% increase in our customer-pay parts and service revenue, a 9.2% increase in our wholesale parts revenue, and a 13.1% increase in our collision revenue. The increases in customer-pay parts and service, collision and wholesale parts revenues are mainly attributable to the implementation of management initiatives designed to enhance processes and increase productivity. Additionally, we grew our warranty parts and service revenue, primarily due to an increase in high volume recalls within our BMW and Audi brands that occurred during the third quarter of 2016. For the nine months ended September 30, 2016 as compared to the same period in 2015, our U.K. same store parts and service revenues decreased 1.2%, which is more than explained by the decline in exchange rates between periods. On a constant currency basis, our U.K. Same Store parts and service revenues increased 8.7%, as we generated improvements in customer-pay, warranty parts and service, wholesale parts, and collision revenues when compared to the same period a year ago.

Our Same Store parts and service revenues in Brazil increased 10.1%, or \$1.1 million, for the three months ended September 30, 2016, compared to the same period 2015. The increase in Brazil Same Store parts and service revenues was driven by a 32.2% increase in our collision revenue, a 5.5% increase in customer-pay parts and service revenue, and a 10.4% increase in warranty parts and service revenue. For the nine months ended September 30, 2016, our Brazil Same Store parts and service revenues declined 5.9% due to the change in exchange rates between periods. On a constant currency basis, our Brazil Same Store parts and service revenues increased 6.5%, as we experienced improvements in customer-pay, warranty parts and service, wholesale parts, and collision revenues when compared to the same period a year ago.

Our total Same Store parts and service gross profit for the three months ended September 30, 2016 increased 1.2%, as compared to the same period in 2015. This increase in gross profit was driven by an increase of 2.4% in the U.S., partially offset by declines of 9.0% and 2.5% in the U.K. and Brazil, respectively. The increase in the U.S. was driven by increases in our customer-pay, warranty, and collision businesses. The decline in the U.K. can be explained by the change in the currency rates, as U.K. Same Store parts and service gross profit increased 7.4% on a constant currency basis. This increase reflects increases in each portion our U.K. parts and service business. For the nine months ended September 30, 2016, our total Same Store gross profit increased 3.0%, as compared to the same period a year ago, primarily driven by an increase of 4.2% in the U.S., and partially offset by a 0.8% and a 18.5% decrease in the U.K. and Brazil, respectively. The increase in the U.S. was driven by our customer-pay, warranty, and collision business. The decline in the U.K. was more than explained by the change in the exchange rates between periods. On a constant currency basis, the U.K. Same Store parts and service gross profit increased by 9.1%, reflecting increases in all portions of our parts and service business. In Brazil, on a constant currency basis, Same Store parts and service gross profit declined by 7.4%, reflecting a mix shift away from our customer-pay parts and service towards warranty parts and service that generates lower margins on a relative basis.

For the three months ended September 30, 2016, our total Same Store parts and service gross margin declined 70 basis points, as compared to the same period in 2015. This decrease was driven by a 50 basis-point decrease in the U.S., primarily driven by lower margin, parts-intensive, warranty campaigns in 2016 as compared to higher margin, labor-intensive warranty campaigns in 2015. This mix shift was coupled with a decrease in internal work between the parts and service departments of our dealerships and the new and used vehicle departments as a result of a decline in total retail vehicle sales volumes for the third quarter of 2016 as compared to the same period in 2015. For the nine months ended September 30, 2016, our total Same Store parts and service gross margin declined 40 basis points, compared to the same periods in 2015. This decline was driven by our U.S. Same Store parts and service gross margin which declined by 30 basis-points due to the increase in parts-intensive warranty campaigns.

Our total Same Store finance and insurance revenues decreased \$1.5 million, or 1.4%, to \$104.5 million, for the three months ended September 30, 2016, as compared to the same period in 2015, driven by a decline in the U.S., slightly offset by an improvement in Brazil. Our U.S. Same Store finance and insurance revenue declined \$1.8 million, or 1.8%, primarily due to the 5.0% decrease in total vehicle retail unit sales volume coupled with an increase in our overall chargeback experience. As a partial offset, the U.S. experienced increases in income per contract, as well as penetration rates for most of our major U.S. product offerings. In the U.K., our Same Store finance and insurance revenues remained relatively flat for the three months ended September 30, 2016, as a 2.3% increase in new and used

vehicle retail unit sales volume coupled with an increase in penetration rates and income per contract on many of our product offerings was offset by the impact of the change in exchange rates between periods. On a constant currency basis, our U.K. Same Store finance and insurance revenue increased 17.6% as compared to the same period in 2015. Our Brazil Same Store finance and insurance revenue increased \$0.3 million, or 18.8%, for the three months ended September 30, 2016. On a PRU basis, our total Same Store finance and insurance revenues improved 4.0% for the quarter ended September 30, 2016, to \$1,421. This improvement can be explained by increas

Table of Contents

es in the U.S. and Brazil of 3.3% and 59.1%, respectively, as compared to the same period in 2015. These increases were partially offset by a 2.3% decline in the U.K. that can be explained by the change of exchange rates between periods. On a constant currency basis, our Same Store finance and insurance revenues PRU in the U.K. increased 15.0%.

Our total Same Store finance and insurance revenues remained relatively flat for the nine months ended September 30, 2016, as compared to the same period in 2015, as a 10.2% increase in the U.K. was offset by a 0.8% and 2.7% decline in the U.S. and Brazil, respectively. Our U.S. Same Store finance and insurance revenue declined \$2.2 million, or 0.8% for the nine months ended September 30, 2016, primarily due to a 3.3% decrease in new and used retail sales volumes and an increase in our chargeback expense that was partially offset by increases in penetration rates and income per contract for some of our major U.S. product offerings. Our U.K. Same Store finance and insurance revenues improved by \$1.8 million, or 10.2%, for the nine months ended September 30, 2016, as compared to the same period in 2015. The improvement was primarily driven by a 5.7% increase in total retail sales and increases in our penetration rates and income per contract that was partially offset by the change in exchange rates between periods. Our Same Store finance and insurance revenues in Brazil decreased 2.7%, or \$0.1 million, for the nine months ended September 30, 2016, as compared to the same period a year ago. This decline was driven by the change in currency rates between periods as, on a constant currency basis, Same Store finance and insurance revenues in Brazil increased 9.8%. For the nine months ended September 30, 2016, our total Same Store revenues PRU increased 2.6% to \$1,414, as compared to the same period in 2015, reflecting improvements in all our segments.

(1) See "Non-GAAP Financial Measures" for more details.

Our SG&A consists primarily of salaries, commissions and incentive-based compensation, as well as rent and facility costs, advertising, insurance, benefits, utilities and other fixed expenses. We believe that the majority of our personnel, all of our advertising and a portion of certain other expenses are variable and can be adjusted in response to changing business conditions. We continue to aggressively pursue opportunities that take advantage of our size and negotiating leverage with our vendors and service providers in order to more effectively rationalize our cost structure.

Our total Same Store personnel costs increased \$2.0 million, or 1.1%, for the three months ended September 30, 2016, as compared to the same period in 2015, primarily as a result of increases of 1.4% and 16.9% in the U.S. and Brazil, respectively. These increases were partially offset by a 6.0% decline in personnel costs in our U.K. segment. The decrease in Same Store personnel costs in the U.K. can be explained by the change in exchange rates between periods, as Same Store personnel costs in the U.K. increased 10.9% on a constant currency basis. For the nine months ended September 30, 2016, as compared to the

Table of Contents

same period in 2015, our total Same Store personnel costs increased \$13.1 million, or 2.6%, driven by increases of 3.1% and 1.0% in the U.S. and U.K., respectively, and partially offset by a 5.5% decline in our Brazil segment. The decline in Same Store personnel costs in Brazil can be explained by the change in exchange rates between periods, as Same Store personnel costs in Brazil increased 6.6% on a constant currency basis for the nine months ended September 30, 2016, respectively.

For the three months ended September 30, 2016, our consolidated Same Store advertising costs remained flat, reflecting a 37.4% increase in our Brazil segment that was offset by a 12.0% decrease in our U.K. segment. Our U.S. Same Store advertising costs for the third quarter of 2016 remained relatively flat as compared to the same period last year. The decrease in U.K. Same Store advertising costs can be explained by the change in exchange rates between periods, as Same Store advertising costs in the U.K. increased 3.9% on a constant currency basis for the three months ended September 30, 2016. For the nine months ended September 30, 2016, as compared to the same period in 2015, our consolidated Same Store advertising costs declined 0.7%, to \$54.6 million, driven by decreases of 0.4%, 4.1%, and 3.6% in the U.S., U.K. and Brazil, respectively. The decrease in the U.S. Same Store advertising costs primarily resulted from more efficient advertising strategies and our scale, which we continue to leverage in negotiations with service providers for more favorable rates. The decreases in Same Store advertising costs in the the U.K. and Brazil can be explained by the changes in exchange rates between periods, as Same Store advertising costs increased by 5.8% and 7.2%, respectively, on a constant currency basis.

Our consolidated Same Store rent and facility costs decreased 3.3% to \$24.5 million for the three months ended September 30, 2016, as compared to the same period a year ago, reflecting decreases of 2.8% and 17.6% in the U.S. and U.K., respectively. and partially offset by an increase of 8.4% in Brazil. The decrease in the U.S. was primarily the result of our ongoing efforts to own our dealership facilities. The decrease in Same Store rent and facility costs in the U.K. was driven by lower utility expense associated with a reduction in oil and gas prices. The increase in Brazil can be explained by the change in exchange rates between periods as Same Store rent and facility costs remained flat on a constant currency basis from the comparable period in 2015. For the nine months ended September 30, 2016, our consolidated Same Store rent and facility costs decreased 0.7% to \$74.6 million, primarily driven by decreases of 9.0% and 10.9% in our U.K. and Brazil segments, respectively, and partially offset by an increase of 1.5% in our U.S. segment. The increase in the U.S. was primarily the result of an increase in property taxes associated with higher property values that stem from continued improvements to our existing facilities designed to enhance the profitability of our dealerships and the overall customer experience. The declines in the U.K. and Brazil can be explained by the change in exchange rates between periods as Same Store rent and facility costs for the nine months ended September 30, 2016 remained relatively flat on a constant currency basis as compared to the same period in 2015.

For the three months ended September 30, 2016, our total Same Store other SG&A decreased 0.6% to \$59.6 million as compared to the same period in 2015, primarily driven by 0.4% and 12.5% decreases in our U.S. and U.K. segments, respectively, partially offset by a 34.6% increase in Brazil. The decrease in U.K. can be explained by the change in exchange rates between periods, as Same Store other SG&A increased 3.3% on a constant currency basis. The increase on a constant currency basis in the U.K. is primarily explained by higher loaner vehicle costs associated with an increase in parts and service and collision business. For the nine months ended September 30, 2016, as compared to 2015, our total Same Store other SG&A increased 3.8% to \$178.9 million, primarily driven by an increase of 5.4% in our U.S. segment, and partially offset by declines of 1.6% and 9.2% in the U.K. and Brazil, respectively. The decreases in the U.K. and Brazil can be explained by the changes in exchange rates between periods, as Same Store other SG&A increased 8.3% and 3.8%, respectively, on a constant currency basis. Total Same Store other SG&A for the nine months ended September 30, 2016 included \$5.9 million in deductible charges related to catastrophic weather events, \$0.6 million in acquisition costs, a \$0.4 million loss on real estate and other dealership transactions, and a \$0.3 million foreign transaction tax in Brazil. On a comparable basis, total Same Store other SG&A for the nine months ended September 30, 2015 included a \$1.0 million charge related to vehicle inventory losses from flooding, a legal settlement of \$1.0 million, and \$0.4 million loss related to real estate and dealership transactions in the U.S., as well as \$0.2 million in severance costs in the U.K.

Our total Same Store SG&A increased 0.3% for the three months ended September 30, 2016, as compared to the same period in 2015, primarily driven by increases of 0.6% and 19.9% in the U.S. and Brazil, respectively. These increases

were offset by a 9.0% decline in our U.K. segment. After adjusting for \$0.5 million in deductible charges related to catastrophic weather events in the U.S. and a \$0.3 million foreign transaction tax in Brazil, our adjusted total Same Store SG&A remained flat for the three months ended September 30, 2016, as compared to the same period in 2015. For the nine months ended September 30, 2016, as compared to the same period in 2015, total Same Store SG&A increased \$18.8 million, or 2.3%, driven by an increase of 3.1% in the U.S., and partially offset by 0.8% and 7.4% declines in our U.K. and Brazil segments, respectively. For the nine months ended September 30, 2016, as compared to the same period in 2015, our adjusted total Same Store SG&A increased \$14.3 million, or 1.7%, reflecting an increase of 2.6% in the U.S., and partially offset by decreases of 1.3% and 8.2% in the U.K. and Brazil, respectively.

Table of Contents

Our total Same Store SG&A as a percentage of gross profit for the three months ended September 30, 2016, as compared to 2015, increased 100 basis points to 72.7%, primarily driven by a 50 basis point increase in our U.S. segment Same Store SG&A as a percentage of gross profit, as well as a 21.4 percentage point increase in our Brazil segment. The increase in Brazil was due a 9.8% decline in gross profit. Offsetting these increases, our U.K. Same Store SG&A as a percentage of gross profit improved 10 basis points to 77.5% for the three months ended September 30, 2016 compared to a year ago, primarily reflecting leverage of our cost structure realized with the growth of our revenue and gross profit. On an adjusted basis, total Same Store SG&A as a percentage of gross profit increased 80 basis points to 72.5% for the third quarter of 2016, primarily driven by a 40 basis point increase in our U.S. segment adjusted Same Store SG&A as a percentage of gross profit. For the nine months ended September 30, 2016, as compared to the same period in 2015, our total Same Store SG&A as a percentage of gross profit increased 110 basis points to 73.3%. Our adjusted total Same Store SG&A as a percentage of gross profit increased 70 basis points to 72.7% for the nine months ended September 30, 2016, driven by a 70 basis point increase in the U.S. and partially offset by an improvement of 210 basis points in our U.K. Same Store SG&A as a percentage of gross profit.

Depreciation and Amortization Data

Total	\$12,891	9.1%	\$11,811	\$38,067	7.4%	\$35,441

Our total Same Store depreciation and amortization expense increased 5.9% and 5.2% respectively, for the three and nine months ended September 30, 2016, as compared to the same periods in 2015, as we continue to strategically add dealership-related real estate to our investment portfolio and make improvements to our existing facilities that are designed to enhance the profitability of our dealerships and the overall customer experience. We critically evaluate all planned future capital spending, working closely with our manufacturer partners to maximize the return on our investments.

Floorplan Interest Expense

Total manufacturer's assistance	\$12,979	(4.2)%	\$13,545	\$36,818	(0.7)%	\$37,087

Our floorplan interest expense fluctuates with changes in our borrowings outstanding and interest rates, which are based on the one-month London Inter Bank Offered Rate ("LIBOR") (or Prime rate in some cases) plus a spread in the U.S. and U.K. and a benchmark rate plus a spread in Brazil.

To mitigate the impact of interest rate fluctuations, we employ an interest rate hedging strategy, whereby we swap variable interest rate exposure for a fixed interest rate over the term of the variable interest rate debt. As of

September 30, 2016, we had interest rate swaps with an aggregate notional amount of \$616.0 million in effect that fixed our underlying one-month LIBOR at a weighted average interest rate of 2.6%. The majority of the monthly settlements of these interest rate swap

Table of Contents

liabilities are recognized as floorplan interest expense. From time to time, we utilize excess cash on hand to pay down our floorplan borrowings, and the resulting interest earned is recognized as an offset to our gross floorplan interest expense.

Our total Same Store floorplan interest expense increased 10.5% to \$10.4 million for the three months ended September 30, 2016, as compared to the same period in 2015. The increase was driven by the increase in our Same Store floorplan interest expense in the U.S. of \$1.1 million, or 12.1%, primarily attributed to an increase in our weighted average borrowing rate primarily as a result of an increase in LIBOR compared to the same period a year ago. Additionally, we experienced an increase in our weighted average floorplan borrowings outstanding of \$37.9 million for the three months ended September 30, 2016 reflecting higher inventory levels in 2016 when compared with 2015 as several manufacturers have issued stop sales on a number of vehicle models due to recall campaigns, which has contributed to an increase in our new and used inventory. In the U.K., our Same Store floorplan interest expense decreased 8.5%, to \$0.6 million, for the three months ended September 30, 2016, primarily due to the change in exchange rates between periods. In Brazil, our Same Store floorplan interest expense decreased 70.0% for the three months ended September 30, 2016. The decrease in the Brazil Same Store floorplan interest was direct result of improved inventory levels and strategic cash management.

For the nine months ended September 30, 2016, our total Same Store floorplan interest expense increased 10.7% to \$31.6 million as compared to the same period in 2015 primarily driven by an increase in the U.S. and partially offset by a decline in Brazil. The U.S. increased 15.2% for the nine months ended September 30, 2016 when compared to 2015 primarily driven by \$95.6 million increase in weighted average borrowing outstanding, coupled with an increase in the weighted average borrowing rate, including the impact of the interest rate swaps. During the first quarter of 2016, we experienced an increase in our supply of luxury brands units as several of our OEM partners redirected additional inventory supply to the U.S. to offset weakness in other global markets. Additionally, during the first nine months of 2016, several manufacturers have issued stop sales on a number of vehicle models due to recall campaigns that has contributed to an increase in our new and used inventory as compared to the same period in 2015. The 90.5% decline in Same Store floorplan interest expense in Brazil for the nine months ended September 30, 2016 was driven by a decrease in weighted average borrowings outstanding when compared to the same period in 2015, resulting from improved inventory levels and strategic cash management. On a constant currency basis, Same Store floorplan expense increased 5.1% in the U.K. for the nine months ended September 30, 2016.

Other Interest Expense, net

Other interest expense, net consists of interest charges primarily on our real estate related debt, working capital lines of credit and our other long-term debt, partially offset by interest income. For the three months ended September 30, 2016, other interest expense increased \$3.2 million, or 22.8%, to \$17.1 million, as compared to the same period in 2015. For the nine months ended September 30, 2016, other net interest expense increased \$8.7 million, or 20.6%, to \$50.7 million, as compared to the same period in 2015. These increases were primarily attributable to interest incurred on our 5.25% Notes (defined below), issued in December 2015, and used to fund the outstanding borrowings of the Company's acquisition line of credit, pay off certain mortgages, contribute to the Company's floorplan offset accounts, and for general corporate purposes.

Provision for Income Taxes

Our provision for income taxes decreased \$7.5 million to \$20.3 million for the three months ended September 30, 2016, as compared to the same period in 2015 and \$14.3 million to \$62.6 million for the nine months ended September 30, 2016, as compared to the same period in 2015. These decreases were primarily due to the decrease of pretax book income, coupled with a lower effective tax rate. For the three months ended September 30, 2016, our effective tax rate decreased to 36.5% from 38.0% as compared to the same period in 2015. For the nine months ended September 30, 2016, our effective tax rate decreased to 35.0% from 37.6% from the same period in 2015. These decreases were primarily due to the mix effect resulting from proportionately more pretax income generated in our U.K. region and the tax impact of dealership dispositions in the U.S. and Brazil, partially offset by taxes provided for in U.S. state jurisdictions and valuation allowances provided for net operating losses and other deferred tax assets in certain U.S. states and in Brazil.

On an adjusted basis, for the three months ended September 30, 2016, our effective adjusted tax rate decreased to 36.5% from 37.8% as compared to the same period in 2015. For the nine months ended September 30, 2016, our effective adjusted tax rate decreased to 35.8% from 37.4% for the same period in 2015. These decreases were due to the aforementioned items related to the tax rates.

We expect our effective tax rate for the remainder of 2016 will be approximately 37.0%. We believe that it is more likely than not that our deferred tax assets, net of valuation allowances provided, will be realized, based primarily on the assumption of future taxable income and taxes available in carry back periods.

Liquidity and Capital Resources

Our liquidity and capital resources are primarily derived from cash on hand, cash temporarily invested as a pay down of Floorplan Line and FMCC Facility (defined below) levels, cash from operations, borrowings under our credit facilities, which

Table of Contents

provide vehicle floorplan financing, working capital and dealership and real estate acquisition financing, and proceeds from debt and equity offerings. Based on current facts and circumstances, we believe we will have adequate cash flow, coupled with available borrowing capacity, to fund our current operations, capital expenditures and acquisitions for the remainder of 2016. If economic and business conditions deteriorate or if our capital expenditures or acquisition plans for 2016 change, we may need to access the private or public capital markets to obtain additional funding.

Cash on Hand. As of September 30, 2016, our total cash on hand was \$22.9 million. The balance of cash on hand excludes \$82.2 million of immediately available funds used to pay down our Floorplan Line and FMCC Facility (defined below) as of September 30, 2016. We use the pay down of our Floorplan Line and FMCC Facility as a channel for the short-term investment of excess cash.

Cash Flows. With respect to all new vehicle floorplan borrowings in the normal course of business, the manufacturers of the vehicles draft our credit facilities directly with no cash flow to or from us. With respect to borrowings for used vehicle financing, we finance up to 85% of the value of our used vehicle inventory in the U.S., and the funds flow directly to us from the lender. All borrowings from, and repayments to, lenders affiliated with our vehicle manufacturers (excluding the cash flows from or to manufacturer-affiliated lenders participating in our syndicated lending group) are presented within Cash Flows from Operating Activities on the Consolidated Statements of Cash Flows in conformity with U.S. GAAP. All borrowings from, and repayments to, the Revolving Credit Facility (defined below) (including the cash flows from or to manufacturer-affiliated lenders participating in the facility) and other credit facilities in Brazil unaffiliated with our manufacturer partners (collectively, "Non-OEM Floorplan Credit Facilities"), are presented within Cash Flows from Financing Activities in conformity with U.S. GAAP. However, the incurrence of all floorplan notes payable represents an activity necessary to acquire inventory for resale, resulting in a trade payable. Our decision to utilize our Revolving Credit Facility does not substantially alter the process by which our vehicle inventory is financed, nor does it significantly impact the economics of our vehicle procurement activities. Therefore, we believe that all floorplan financing of inventory purchases in the normal course of business should correspond with the related inventory activity and be classified as an operating activity. As a result, we use the non-GAAP financial liquidity measure "Adjusted net cash provided by operating activities" to supplement our evaluation of cash flows. We believe that this classification eliminates excess volatility in our operating cash flows prepared in accordance with U.S. GAAP and avoids the potential to mislead the users of our financial statements. In addition, because the majority of our dealership acquisitions and dispositions are negotiated as asset purchases, we do not assume transfer of liabilities for floorplan financing in the execution of the transactions. Therefore, borrowings and repayments of all floorplan financing associated with dealership acquisition and disposition are characterized as either operating or financing activities in our statement of cash flows presented in conformity with U.S. GAAP, depending on the relationship described above. However, the floorplan financing activity is so closely related to the inventory acquisition process that we believe the presentation of all acquisition and disposition related floorplan financing activities should be classified as investing activity to correspond with the associated inventory activity, and we have made such adjustments in our adjusted cash flow presentations.

The following tables set forth selected historical information regarding cash flows from our Consolidated Statements of Cash Flows on a GAAP and on an adjusted, non-GAAP basis. For further explanation and reconciliation to the most directly comparable GAAP measures, see "Non-GAAP Financial Measures" below.

GAAP Basis	Nine Months Ended	
	September 30,	
	2016	2015

Sources and Uses of Liquidity from Operating Activities

For the nine months ended September 30, 2016, we generated \$386.6 million of net cash flow from operating activities, primarily consisting of \$116.2 million in net income, adjusted for non-cash items related to depreciation and amortization of \$38.1 million, stock-based compensation of \$14.9 million, asset impairment of \$12.8 million, deferred income taxes of \$14.3 million, and amortization of debt discounts and debt issue costs of \$2.8 million, as well as \$188.3 million net change in operating assets and liabilities. Included in the net changes of operating assets and liabilities were cash inflows of \$0.4 million from the net decrease in accounts and notes receivable, \$78.9 million from increases in accounts payable and accrued expenses, \$49.6 million from decreases of vehicle receivables and contracts-in-transit, \$18.0 million from the net decrease in prepaid expenses and other assets, and \$60.8 million from decreases in inventory levels. These cash inflows were partially offset by \$19.1 million from the net decrease in floorplan borrowings. After adjusting for \$145.8 million of cash outflows related to the net change in our Non-OEM Floorplan Credit Facilities, excluding the change in our floorplan offset accounts and net dealership acquisition and disposition activity, as well as \$3.0 million of net cash outflows associated with the change in our manufacturer-affiliated floorplan notes payable related to net dealership acquisition and disposition activity, and the change in our FMCC floorplan offset account, our adjusted net cash flow generated from operating activities for the nine months ended September 30, 2016 was \$237.8 million.

For the nine months ended September 30, 2015, we generated \$230.9 million of net cash flow from operating activities, primarily consisting of \$127.4 million in net income, adjusted for non-cash items related to depreciation and amortization of \$35.4 million, deferred income taxes of \$13.1 million, and stock-based compensation of \$14.2 million, as well as \$35.9 million net change in operating assets and liabilities. Included in the net changes of operating assets and liabilities were cash inflows of \$29.5 million from decreases of vehicle receivables and contracts-in-transit, \$1.5 million from the net decrease in prepaid expenses and other assets, \$50.0 million from the net increases in floorplan borrowings, and \$30.9 million from increases in accounts payable and accrued expenses. These cash inflows were partially offset by cash outflows of \$68.5 million from increases in inventory levels and \$6.8 million from the net increase in accounts and notes receivable. After adjusting for \$1.4 million of cash inflows related to the net change in our Non-OEM Floorplan Credit Facilities, excluding the change in our floorplan offset accounts and net dealership acquisition and disposition activity, as well as \$2.5 million of net cash outflows associated with the change in our floorplan notes payable related to net dealership acquisition and disposition activity, and the change in our FMCC floorplan offset account, our adjusted net cash flow generated from operating activities for the nine months ended September 30, 2015 was \$229.8 million.

Working Capital. At September 30, 2016, we had \$71.9 million of working capital. Changes in our working capital are explained primarily by changes in floorplan notes payable outstanding. Borrowings on our new vehicle floorplan notes payable, subject to agreed upon pay-off terms, are equal to 100% of the factory invoice of the vehicles. Borrowings on our used vehicle floorplan notes payable, subject to agreed upon pay-off terms, are limited to 85% of the aggregate book value of our used vehicle inventory, except in the U.K. and Brazil. At times, we have made payments on our floorplan notes payable using excess cash flow from operations and the proceeds of debt and equity offerings. As needed, we re-borrow the amounts later, up to the limits on the floorplan notes payable discussed above, for working capital, acquisitions, capital expenditures or general corporate purposes.

Sources and Uses of Liquidity from Investing Activities

During the nine months ended September 30, 2016, we used \$157.0 million in net cash flow for investing activities. Included in the total cash use for the nine months ended September 30, 2016, was \$57.3 million of cash flows for dealership acquisition activity. We also used \$125.7 million during the first nine months of 2016 for purchases of property and equipment and to construct new and improve existing facilities, consisting of \$78.9 million for capital expenditures, \$34.0 million for the purchase of real estate associated with existing dealership operations and a \$12.8 million net decrease in the accrual for capital expenditures from year-end. These cash outflows were partially offset by cash inflows of \$23.1 million related to dispositions of franchises and fixed assets. After adjusting for \$10.4 million of cash outflows associated with the change in floorplan notes payable in conjunction with dealership disposition activity, our adjusted net cash flow used in investing activities for the nine months ended September 30, 2016 was \$167.5 million.

Table of Contents

During the nine months ended September 30, 2015, we used \$274.9 million for investing activities. Included in the total cash use for the nine months ended September 30, 2015, was \$212.3 million of cash flows for dealership acquisition activity. We also used \$78.3 million during the first nine months of 2015 for purchases of property and equipment and to construct new and improve existing facilities, consisting of \$44.1 million for capital expenditures, \$16.3 million for the purchase of real estate associated with existing dealership operations and a \$17.9 million net decrease in the accrual for capital expenditures from year-end. These cash outflows were partially offset by cash inflows of \$9.7 million related to dispositions of franchises and fixed assets and \$6.0 million of refunds of escrow deposits for dealership and real estate acquisitions. After adjusting for \$32.1 million of cash inflows associated with the change in floorplan notes payable in conjunction with dealership acquisition activity and \$3.8 million of cash outflows associated with the change in floorplan notes payable in conjunction with dealership disposition activity, our adjusted net cash flow used in investing activities for the nine months ended September 30, 2015 was \$246.5 million.

Capital Expenditures. Our capital expenditures include costs to extend the useful lives of current facilities, as well as to start or expand operations. In general, expenditures relating to the construction or expansion of dealership facilities are driven by dealership acquisition activity, new franchises being granted to us by a manufacturer, significant growth in sales at an existing facility, relocation opportunities, or manufacturer imaging programs. We critically evaluate all planned future capital spending, working closely with our manufacturer partners to maximize the return on our investments. We forecast our capital expenditures for the full year of 2016 will be less than \$125 million which could generally be funded from excess cash.

Acquisitions. We usually purchase businesses based on expected return on investment. In general, the purchase price, excluding real estate and floorplan liabilities, is approximately 15% to 20% of the annual revenue. Cash needed to complete our acquisitions normally comes from excess working capital, operating cash flows of our dealerships, and borrowings under our floorplan facilities, term loans and our Acquisition Line (defined below).

Sources and Uses of Liquidity from Financing Activities

For the nine months ended September 30, 2016, we used \$222.1 million in net cash flow from financing activities, primarily related to cash outflows of \$127.6 million to repurchase our Company's common stock, \$15.1 million for dividend payments, and \$107.0 million in net payments on our Floorplan Line. These cash outflows were partially offset by cash inflows of \$6.0 million of net borrowings of other debt and \$23.8 million in net borrowings of long-term debt related to real estate loans. Adjusting for \$157.4 million of cash outflows from net repayments associated with our non-OEM floorplan notes payable, the adjusted cash flow from financing activities associated with our Floorplan Line was \$50.4 million (representing the net cash activity in our floorplan offset accounts). In total, we used \$62.8 million in adjusted net cash flow from financing activities.

For the nine months ended September 30, 2015, we generated \$30.2 million in net cash flows from financing activities, primarily related to cash inflows of \$68.7 million of net borrowings on our Acquisition Line (defined below), \$50.2 million of net borrowings on our Floorplan Line and \$1.4 million of net borrowings of long-term debt related to real estate loans. These cash inflows were partially offset by \$14.8 million for dividend payments, \$66.7 million to repurchase our Company's common stock and \$9.6 million in net payments of other debt. Adjusting for \$26.8 million of cash inflows from net borrowings associated with our non-OEM floorplan notes payable, the adjusted cash flow from financing activities with our Floorplan Line was \$23.3 million (representing the net cash activity in our floorplan offset accounts). In total, we generated \$2.9 million in adjusted net cash flow from financing activities.

Credit Facilities, Debt Instruments and Other Financing Arrangements. Our various credit facilities, debt instruments and other financing arrangements are used to finance the purchase of inventory and real estate, provide acquisition funding and provide working capital for general corporate purposes.

Revolving Credit Facility. On June 17, 2016, we amended our revolving credit facility principally to increase the total borrowing capacity from \$1.7 billion to \$1.8 billion and to extend the term from an expiration date of June 20, 2018 to June 17, 2021 (the "Revolving Credit Facility"). The Revolving Credit Facility, which is comprised of 24 financial institutions, including six manufacturer-affiliated finance companies, consists of two tranches, providing a maximum of \$1.75 billion for U.S. vehicle inventory floorplan financing ("Floorplan Line"), as well as a maximum of \$360.0 million and a minimum of \$50.0 million for working capital and general corporate purposes, including acquisitions ("Acquisition Line"). The capacity under these two tranches can be re-designated within the overall \$1.8 billion

commitment, subject to the aforementioned limits. Up to \$125.0 million of the Acquisition Line can be borrowed in either euros or British pound sterling. The Revolving Credit Facility can be expanded to a maximum commitment of \$2.1 billion, subject to participating lender approval. The Floorplan Line bears interest at rates equal to the LIBOR plus 125 basis points for new vehicle inventory and the LIBOR plus 150 basis points for used vehicle inventory. The Acquisition Line bears interest at the LIBOR plus 150 basis points plus a margin that ranges from zero to 100 basis points for borrowings in U.S. dollars and LIBOR equivalent plus 125 to 250 basis points on borrowings in euros or British pound sterling, depending on our total adjusted leverage ratio. The Floorplan Line requires a commitment fee of 0.15% per annum on the unused portion. The Acquisition Line also requires a commitment fee ranging from 0.20% to

Table of Contents

0.45% per annum, depending on our total adjusted leverage ratio, based on a minimum commitment of \$50.0 million less outstanding borrowings.

After considering the outstanding balance of \$1,043.8 million at September 30, 2016, we had \$396.2 million of available floorplan borrowing capacity under the Floorplan Line. Included in the \$396.2 million available borrowings under the Floorplan Line was \$59.7 million of immediately available funds. The weighted average interest rate on the Floorplan Line was 1.7% as of September 30, 2016, excluding the impact of our interest rate swaps. With regards to the Acquisition Line, there were no borrowings outstanding as of September 30, 2016. After considering \$37.1 million of outstanding letters of credit and other factors included in our available borrowing base calculation, there was \$313.9 million of available borrowing capacity under the Acquisition Line as of September 30, 2016. The amount of available borrowing capacity under the Acquisition Line is limited from time to time based upon certain debt covenants.

All of our U.S. dealership-owning subsidiaries are co-borrowers under the Revolving Credit Facility. Our obligations under the Revolving Credit Facility are secured by essentially all of our U.S. personal property (other than equity interests in dealership-owning subsidiaries), including all motor vehicle inventory and proceeds from the disposition of dealership-owning subsidiaries, excluding inventory financed directly with manufacturer-affiliates and other third-party financing institutions. The Revolving Credit Facility contains a number of significant covenants that, among other things, restrict our ability to make disbursements outside of the ordinary course of business, dispose of assets, incur additional indebtedness, create liens on assets, make investments and engage in mergers or consolidations. We are also required to comply with specified financial tests and ratios defined in the Revolving Credit Facility, such as the fixed charge coverage and total adjusted leverage ratios. Further, the Revolving Credit Facility restricts our ability to make certain payments, such as dividends or other distributions of assets, properties, cash, rights, obligations or securities ("Restricted Payments"). The Restricted Payments cannot exceed the sum of \$208.5 million plus (or minus if negative) (a) one-half of the aggregate consolidated net income for the period beginning on April 1, 2014 and ending on the date of determination and (b) the amount of net cash proceeds received from the sale of capital stock after June 2, 2014 and ending on the date of determination less (c) cash dividends and share repurchases after June 2, 2014 ("Credit Facility Restricted Payment Basket"). For purposes of the calculation of the Credit Facility Restricted Payment Basket, net income represents such amounts per our consolidated financial statements, adjusted to exclude our foreign operations, non-cash interest expense, non-cash asset impairment charges, and non-cash stock-based compensation. As of September 30, 2016, the Credit Facility Restricted Payment Basket totaled \$112.9 million.

As of September 30, 2016, we were in compliance with all our financial covenants, including:

	As of September 30, 2016	
	Required	Actual
Total Adjusted Leverage Ratio	< 5.50	3.88
Fixed Charge Coverage Ratio	> 1.20	2.35

Based upon our current five-year operating and financial projections, we believe that we will remain compliant with such covenants in the future.

Ford Motor Credit Company Facility. Our floorplan financing arrangement ("FMCC Facility") with Ford Motor Credit Company ("FMCC") provides for the financing of, and is collateralized by, our U.S. Ford new vehicle inventory, including affiliated brands. This arrangement provides for \$300.0 million of floorplan financing and is an evergreen arrangement that may be canceled with 30 days' notice by either party. As of September 30, 2016, we had an outstanding balance of \$145.9 million under the FMCC Facility with an available floorplan borrowing capacity of \$154.1 million. Included in the \$154.1 million available borrowings under the FMCC Facility was \$22.5 million of immediately available funds. This facility bears interest at a rate of Prime plus 150 basis points minus certain incentives. The interest rate on the FMCC Facility was 5.00% before considering the applicable incentives as of September 30, 2016.

Table of Contents

The following table summarizes the position of our U.S. credit facilities as of September 30, 2016.

U.S. Credit Facilities	As of September 30, 2016		
	Total Commitment	Outstanding	Available
	(In thousands)		
Floorplan Line ⁽¹⁾	\$ 1,440,000	\$ 1,043,806	\$ 396,194
Acquisition Line ⁽²⁾	360,000	37,139	313,914
Total Revolving Credit Facility	1,800,000	1,080,945	710,108
FMCC Facility ⁽³⁾	300,000	145,930	154,070
Total U.S. Credit Facilities ⁽⁴⁾	\$ 2,100,000	\$ 1,226,875	\$ 864,178

(1) The available balance at September 30, 2016 includes \$59.7 million of immediately available funds.

(2) The outstanding balance of \$37.1 million is related to outstanding letters of credit as of September 30, 2016. The available borrowings may be limited from time to time, based on certain debt covenants.

(3) The available balance at September 30, 2016 includes \$22.5 million of immediately available funds.

(4) The outstanding balance excludes \$226.0 million of borrowings with manufacturer-affiliates and third-party financial institutions for foreign and rental vehicle financing not associated with any of our U.S. credit facilities.

Other Inventory Credit Facilities. We have credit facilities with BMW Financial Services, Volkswagen Finance, FMCC and another third-party financial institution for the financing of new, used and rental vehicle inventories related to our U.K. operations. These facilities are denominated in British pound sterling and are evergreen arrangements that may be canceled with notice by either party and bear interest at a base rate, plus a surcharge that varies based upon the type of vehicle being financed. The annual interest rates charged on borrowings outstanding under these facilities range from 1.10% to 3.50%. As of September 30, 2016, borrowings outstanding under these facilities totaled \$94.4 million.

We have credit facilities with financial institutions in Brazil, most of which are affiliated with the manufacturers, for the financing of new, used and rental vehicle inventories related to our Brazil operations. These facilities are denominated in Brazilian real and have renewal terms ranging from one month to twelve months. They may be canceled with notice by either party and bear interest at a benchmark rate, plus a surcharge that varies based upon the type of vehicle being financed. The annual interest rates charged on borrowings outstanding under these facilities, after the grace period of zero to 90 days, range from 16.77% to 24.45%. As of September 30, 2016, borrowings outstanding under these facilities totaled \$23.1 million.

Other Inventory Financing Arrangements. Excluding rental vehicles financed through the Revolving Credit Facility, financing for U.S. rental vehicles is typically obtained directly from the automobile manufacturers. These financing arrangements generally require small monthly payments and mature in varying amounts over a period of two years. The interest rate charged on borrowings related to our rental vehicle fleet varies up to 5.00%. Rental vehicles are typically transferred to used vehicle inventory when they are removed from service and repayment of the borrowing is required at that time. As of September 30, 2016, borrowings outstanding under these facilities totaled \$108.6 million.

Stock Issuances. No shares of our common stock were issued during the three months ended September 30, 2016 nor September 30, 2015.

Stock Repurchases. From time to time, our Board of Directors gives authorization to repurchase shares of our common stock, subject to the restrictions of various debt agreements and our judgment. The Company issues new shares or treasury shares, if available, when restricted stock vests. With respect to shares issued under the Employee Stock Purchase Plan, as amended (the "Purchase Plan", formerly named the 1998 Employee Stock Purchase Plan), the Company's Board of Directors has authorized specific share repurchases to fund the shares issuable under the Purchase Plan.

In February 2016, our Board of Directors authorized a new purchase program of up to \$150.0 million of our common shares, replacing any amount remaining from the November 2015 authorization. In the three months ended September 30, 2016, under our Rule 10b5-1 plan, effective from July 1, 2016 to July 28, 2016, we repurchased

244,205 shares at an average price of \$50.61 for an aggregate cost of \$12.4 million, leaving \$22.4 million of repurchase authorization remaining. These stock repurchase amounts exclude 26,172 shares received during the three months ended September 30, 2016 in net settlement of pre-acquisition contingencies related to our 2013 acquisition of UAB Motors. Future repurchases are subject to the discretion of our Board of Directors after considering our results of operations, financial condition, cash flows, capital requirements, existing debt covenants, outlook for our business, general business conditions and other factors.

Dividends. The payment of dividends is subject to the discretion of our Board of Directors after considering the results of operations, financial condition, cash flows, capital requirements, outlook for our business, general business conditions, the political and legislative environments and other factors.

Further, we are limited under the terms of the Revolving Credit Facility, certain Real Estate Notes (defined below) 5.00% Senior Notes and 5.25% Senior Notes in our ability to make cash dividend payments to our stockholders and to repurchase shares of our outstanding common stock, based primarily on our quarterly net income or loss. As of September 30, 2016, the most stringent of the restricted payment baskets limits us to \$112.9 million in restricted payments. The Credit Facility Restricted Payment Basket will increase in the future periods by 50.0% of our future cumulative net income, adjusted to exclude the Company's foreign operations, non-cash interest expense, non-cash asset impairment charges, and non-cash stock-based compensation, plus the net proceeds received from the sale of our capital stock, and decrease by the amount of future payments for cash dividends and share repurchases. For the three months ended September 30, 2016, we paid dividends of \$4.7 million to common stock shareholders and \$0.2 million to unvested restricted stock award holders.

5.00% Senior Notes. On June 2, 2014, we issued \$350.0 million aggregate principal amount of our 5.00% Senior Notes due 2022 ("5.00% Notes"). Subsequently, on September 9, 2014, we issued an additional \$200.0 million of 5.00% Notes at a discount of 1.5% from face value. The 5.00% Notes will mature on June 1, 2022 and pay interest semiannually, in arrears, in

Table of Contents

cash on each June 1 and December 1, beginning December 1, 2014. Using proceeds of certain equity offerings, we may redeem up to 35.0% of the 5.00% Notes prior to June 1, 2017, subject to certain conditions, at a redemption price equal to 105% of principal amount of the 5.00% Notes plus accrued and unpaid interest. Otherwise, we may redeem some or all of the 5.00% Notes prior to June 1, 2017 at a redemption price equal to 100% of the principal amount of the 5.00% Notes redeemed, plus an applicable premium, and plus accrued and unpaid interest. On or after June 1, 2017, we may redeem some or all of the 5.00% Notes at specified prices, plus accrued and unpaid interest. We may be required to purchase the 5.00% Notes if we sell certain assets or trigger the change in control provisions defined in the 5.00% Notes indenture. The 5.00% Notes are senior unsecured obligations and rank equal in right of payment to all of our existing and future senior unsecured debt and senior in right of payment to all of our future subordinated debt. The 5.00% Notes are guaranteed by substantially all of our U.S. subsidiaries. The U.S. subsidiary guarantees rank equally in the right of payment to all of our U.S. subsidiary guarantor's existing and future subordinated debt. In addition, the 5.00% Notes are structurally subordinated to the liabilities of our non-guarantor subsidiaries and are subject to customary covenants, including a restricted payment basket and debt limitations. The restricted payment basket calculation under the terms of the 5.00% Notes is the same as under the Credit Facility Restricted Payment Basket. The 5.00% Notes were registered with the Securities and Exchange Commission in June 2015.

The underwriters' fees, discount and capitalized debt issuance costs relative to the 5.00% Notes totaled \$13.1 million. These amounts are included as a direct reduction of the 5.00% Notes on the accompanying Consolidated Balance Sheets and are being amortized over a period of eight years in conjunction with the term of the 5.00% Notes. The 5.00% Notes are presented net of unamortized underwriters' fees, discount and debt issuance costs of \$9.9 million as of September 30, 2016.

5.25% Senior Notes. On December 8, 2015, we issued \$300.0 million aggregate principal amount of our 5.25% Notes due to mature on December 15, 2023 ("5.25% Notes") in a private placement exempt from the registration requirements of the SEC. The 5.25% Notes and the related guarantees have not been, and will not be, registered under the Securities Act or the securities laws of any other jurisdiction. The 5.25% Notes pay interest semiannually, in arrears, in cash on each June 15 and December 15, beginning June 15, 2016. Using proceeds of certain equity offerings, the Company may redeem up to 35.0% of the 5.25% Notes prior to December 15, 2018, subject to certain conditions, at a redemption price equal to 105.25% of principal amount of the 5.25% Notes plus accrued and unpaid interest. Otherwise, the Company may redeem some or all of the 5.25% Notes prior to December 15, 2018 at a redemption price equal to 100% of the principal amount of the 5.25% Notes redeemed, plus an applicable make-whole premium, plus accrued and unpaid interest. On or after December 15, 2018, the Company may redeem some or all of the 5.25% Notes at specified prices, plus accrued and unpaid interest. We may be required to purchase the 5.25% Notes if we sell certain assets or trigger the change in control provisions defined in the 5.25% Notes indenture. The 5.25% Notes are senior unsecured obligations and rank equal in right of payment to all of our existing and future senior unsecured debt and senior in right of payment to all of our future subordinated debt. The 5.25% Notes are guaranteed by substantially all of our U.S. subsidiaries. The U.S. subsidiary guarantees rank equally in the right of payment to all of our U.S. subsidiary guarantor's existing and future subordinated debt. In addition, the 5.25% Notes are structurally subordinated to the liabilities of our non-guarantor subsidiaries and are subject to customary covenants, including a restricted payment basket and debt limitations. The restricted payment basket calculation under the terms of the 5.25% Notes is the same as under the Credit Facility Restricted Payment Basket.

The underwriters' fees and capitalized debt issuance costs relative to the 5.25% Notes totaled \$5.0 million. These amounts are included as a direct reduction of the 5.25% Notes on the accompanying Consolidated Balance Sheets and are being amortized over a period of eight years in conjunction with the term of the 5.25% Notes. The 5.25% Notes are presented net of unamortized underwriters' fees and debt issuance costs of \$4.5 million as of September 30, 2016.

Real Estate Related and Other Long-Term Debt. We have entered into separate term mortgage loans in the U.S. with three of our manufacturer-affiliated finance partners, Toyota Motor Credit Corporation, BMW Financial Services NA, LLC and FMCC, as well as several third-party financial institutions. These mortgage loans may be expanded for borrowings related to specific buildings and/or properties and are guaranteed by us. Each loan was made in connection with, and is secured by mortgage liens on, the real property owned by us that is mortgaged. These mortgage loans

bear interest at fixed rates between 3.00% and 4.69%, and at variable indexed rates plus a spread between 1.50% and 2.50% per annum. As of September 30, 2016, the aggregate outstanding balance under these mortgage loans was \$326.3 million, with \$28.8 million classified as a current maturity of long-term debt in the accompanying Consolidated Balance Sheets.

Additionally, we have entered into 13 separate term mortgage loans in the U.K. with other third-party financial institutions which are secured by our U.K. properties. These mortgage loans (collectively, "U.K. Notes") are denominated in British pound sterling and are being repaid in monthly installments that will mature by September 2034. As of September 30, 2016, borrowings under the U.K. Notes totaled \$54.1 million, with \$4.5 million classified as a current maturity of long-term debt in the accompanying Consolidated Balance Sheets.

Table of Contents

We also have a working a capital loan agreement with a third-party financial institution in the U.K. The principal balance on this loan is due by October 2016. As of September 30, 2016, borrowings under the U.K. third-party loan totaled \$7.7 million. For the nine months ended September 30, 2016, we made \$7.8 million of additional borrowings and made principal payments of \$3.0 million.

We have a separate term mortgage loan in Brazil with a third-party financial institution (the "Brazil Note"). The Brazil Note is denominated in Brazilian real and is secured by one of the Company's Brazilian properties, as well as a guarantee from the Company. The Brazil Note is being repaid in monthly installments that will mature by April 2025. As of September 30, 2016, borrowings under the Brazil Note totaled \$4.0 million, with \$0.4 million classified as a current maturity of long-term debt in the accompanying Consolidated Balance Sheets.

We also have a working capital loan agreement with a third-party financial institution in Brazil. The principal balance on this loan is due by February 2017 with interest only payments being made until the due date. As of September 30, 2016, borrowings under the Brazilian third-party loans totaled \$6.8 million.

Non-GAAP Financial Measures

In addition to evaluating the financial condition and results of our operations in accordance with GAAP, from time to time our management evaluates and analyzes results and any impact on the Company of strategic decisions and actions relating to, among other things, cost reduction, growth, and profitability improvement initiatives, and other events outside of normal, or "core," business and operations, by considering alternative financial measures not prepared in accordance with GAAP. This includes evaluating measures such as adjusted selling, general and administrative expenses, adjusted net income, adjusted diluted income per share, adjusted cash flows from operating, investing and financing activities and constant currency. These adjusted measures are not measures of financial performance under U.S. GAAP, but are instead considered non-GAAP financial performance measures. Non-GAAP measures do not have definitions under GAAP and may be defined differently by and not be comparable to similarly titled measures used by other companies. As a result, any non-GAAP financial measures considered and evaluated by management are reviewed in conjunction with a review of the most directly comparable measures calculated in accordance with GAAP. We caution investors not to place undue reliance on such non-GAAP measures, but also to consider them with the most directly comparable GAAP measures. In our evaluation of results from time to time, we exclude items that do not arise directly from core operations, such as non-cash asset impairment charges, gains and losses on dealership franchise or real estate transactions, and catastrophic weather events such as hail storms, hurricanes, and snow storms. Because these non-core charges and gains materially affect the Company's financial condition or results in the specific period in which they are recognized, management also evaluates, and makes resource allocation and performance evaluation decisions based on, the related non-GAAP measures excluding such items.

In addition to using such non-GAAP measures to evaluate results in a specific period, management believes that such measures may provide more complete and consistent comparisons of operational performance on a period-over-period historical basis and a better indication of expected future trends. Our management also uses these adjusted measures in conjunction with U.S. GAAP financial measures to assess our business, including communication with our Board of Directors, investors and industry analysts concerning financial performance. We disclose these non-GAAP measures, and the related reconciliations, because we believe investors use these metrics in evaluating longer-term period-over-period performance, and to allow investors to better understand and evaluate the information used by management to assess operating performance. The exclusion of certain expenses in the calculation of non-GAAP financial measures should not be construed as an inference that these costs are unusual or infrequent. We anticipate excluding these expenses in the future presentation of our non-GAAP financial measures.

The following tables reconcile certain reported non-GAAP measures to the most comparable GAAP measure from our Statements of Operations by segment and on a consolidated basis (dollars in thousands, except per share amounts). Only adjusted amounts are reconciled below.

Change in net borrowings and repayments on floorplan notes payable-credit facilities, excluding net activity associated with our floorplan offset account	159,264	(27,285)	
Adjusted net cash provided by (used in) financing activities	\$(62,789)	\$2,946	(2,231.3)

Item 3. Quantitative and Qualitative Disclosures About Market Risk

This Quantitative and Qualitative Disclosures About Market Risk contains information about our market-sensitive financial instruments that constitute forward-looking statements. See “Cautionary Statement about Forward-Looking Statements.”

We are exposed to a variety of market risks, including interest rate risk and foreign currency exchange rate risk. We address interest rate risks primarily through the use of interest rate swaps. We do not currently hedge foreign exchange risk, as discussed further below. The following quantitative and qualitative information is provided about foreign currency exchange rates and financial instruments to which we are a party at September 30, 2016, and from which we may incur future gains or losses from changes in market interest rates. We do not enter into derivative or other financial instruments for speculative or trading purposes.

Hypothetical changes in interest rates and foreign currency exchange rates chosen for the following estimated sensitivity analysis are considered to be reasonable near-term changes generally based on consideration of past fluctuations for each risk category. However, since it is not possible to accurately predict future changes in interest rate and foreign currency exchange rates, these hypothetical changes may not necessarily be an indicator of probable future fluctuations.

As of September 30, 2016, our 5.00% Notes, with an outstanding principal amount of \$550.0 million, had a fair value and carrying amount of \$552.8 million and \$540.1 million, respectively. At December 31, 2015, our 5.00% Notes, with an outstanding principal amount of \$550.0 million, had a fair value and carrying amount of \$545.9 million and \$538.9 million, respectively. As of September 30, 2016, our 5.25% Notes, with an outstanding principal amount of \$300.0 million, had a fair value and carrying amount of \$302.1 million and \$295.5 million, respectively. At December 31, 2015, our 5.25% Notes, with an outstanding principal amount of \$300.0 million, had a fair value and carrying amount of \$297.8 million and \$295.2 million, respectively. Our other fixed-rate debt, primarily consisting of real estate related debt, had outstanding borrowings of \$95.6 million and \$100.7 million as of September 30, 2016 and December 31, 2015, respectively. The fair value of such fixed interest rate borrowings was \$96.5 million and \$102.4 million as of September 30, 2016 and December 31, 2015, respectively.

Interest Rates. We have interest rate risk in our variable-rate debt obligations. Our policy is to monitor the effects of market changes in interest rates and manage our interest rate exposure through the use of a combination of fixed and floating-rate debt and interest rate swaps.

We use interest rate swaps to adjust our exposure to interest rate movements when appropriate, based upon market conditions. As of September 30, 2016, we held interest rate swaps with aggregate notional amounts of \$616.0 million that fixed our underlying one-month LIBOR at a weighted average rate of 2.6%. These hedge instruments are designed to convert floating rate vehicle floorplan payables under our Revolving Credit Facility and variable rate real estate related borrowings to fixed rate

Table of Contents

debt. We entered into these swaps with several financial institutions that have investment grade credit ratings, thereby minimizing the risk of credit loss. We reflect the current fair value of all derivatives on our Consolidated Balance Sheets. The fair value of interest rate swaps is impacted by the forward one-month LIBOR curve and the length of time to maturity of the swap contracts. The related gains or losses on these transactions are deferred in stockholders' equity as a component of accumulated other comprehensive loss. As of September 30, 2016, net unrealized losses, net of income taxes, totaled \$28.7 million. These deferred gains and losses are recognized in income in the period in which the related items being hedged are recognized in expense. However, to the extent that the change in value of a derivative contract does not perfectly offset the change in the value of the items being hedged, that ineffective portion is immediately recognized in the results of operations. All of our interest rate hedges are designated as cash flow hedges. As of September 30, 2016, all of our derivative contracts were determined to be effective. As of September 30, 2016, a 100 basis-point change in the interest rates of our swaps would have resulted in a \$5.5 million change to our annual interest expense. In addition to the \$616.0 million of swaps in effect as of September 30, 2016, we also held 19 interest rate swaps with forward start dates between December 2016 and December 2020 and expiration dates between December 2019 and December 2030. As of September 30, 2016, the aggregate notional amount of these swaps was \$975.0 million with a weighted average interest rate of 2.3%. The combination of these swaps is structured such that the notional value in effect at any given time through December 2030 does not exceed \$908.6 million.

A summary of our interest rate swaps, including those in effect, as well as forward-starting, follows (dollars in millions):

	Q3 2016	Q4 2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
Weighted average notional amount in effect during the period	\$616	\$621	\$814	\$811	\$909	\$555	\$424	\$163	\$129	\$125	\$125	\$100	\$100	\$100
Weighted average interest rate during the period	2.64 %	2.64 %	2.54 %	2.60 %	2.28 %	2.19 %	1.75 %	1.72 %	1.80 %	1.81 %	1.81 %	1.85 %	1.85 %	1.85 %

As of September 30, 2016, we had \$1,496.0 million of variable-rate borrowings. Based on the aggregate amount of variable-rate borrowings outstanding as of September 30, 2016, and before the impact of our interest rate swaps described above, a 100 basis-point change in interest rates would have resulted in an approximate \$15.0 million change to our annual interest expense. After consideration of the interest rate swaps described above, a 100 basis-point change would have yielded a net annual change of \$9.5 million in annual interest expense based on the variable borrowings outstanding as of September 30, 2016. This interest rate sensitivity increased from September 30, 2015 primarily as a result of the increase in variable-rate floorplan borrowings.

Our exposure to changes in interest rates with respect to our variable-rate floorplan borrowings is partially mitigated by manufacturers' interest assistance, which in some cases is influenced by changes in market based variable interest rates. We reflect interest assistance as a reduction of new vehicle inventory cost until the associated vehicle is sold. During the three months ended September 30, 2016, we recognized \$13.0 million of interest assistance as a reduction of new vehicle cost of sales. For the past three years, the reduction to our new vehicle cost of sales has ranged from 90.0% of our floorplan interest expense for the first quarter of 2014 to 139.9% for the third quarter of 2015. In the

U.S., manufacturer's interest assistance was 128.5% of floorplan interest expense in the third quarter of 2016. Although we can provide no assurance as to the amount of future interest assistance, it is our expectation, based on historical data that an increase in prevailing interest rates would result in increased assistance from certain manufacturers over time.

Foreign Currency Exchange Rates. As of September 30, 2016, we had dealership operations in the U.K. and Brazil. The functional currency of our U.K. subsidiaries is the British pound sterling (£) and of our Brazil subsidiaries is the Brazilian real (R\$). We intend to remain indefinitely invested in these foreign operations and, as such, do not hedge against foreign currency fluctuations that may temporarily impact our investment in our U.K. and Brazil subsidiaries. If we change our intent with respect to such international investment, we would expect to implement strategies designed to manage those risks in an effort to mitigate the effect of foreign currency fluctuations on our earnings and cash flows. A 10% devaluation in average exchange rates for the British pound sterling to the U.S. dollar would have resulted in an \$121.4 million decrease to our revenues for the nine months ended September 30, 2016. A 10% devaluation in average exchange rates for the Brazilian real to the U.S. dollar would have resulted in an \$28.6 million decrease to our revenues for the nine months ended September 30, 2016.

For additional information about our market sensitive financial instruments please see Part II, "Item 7. Management's Discussion & Analysis of Financial Condition and Results of Operations," "Item 7A. Quantitative and Qualitative Disclosures About Market Risk" and Note 4 to "Item 8. Financial Statements and Supplementary Data" in our 2015 Form 10-K.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), we have evaluated, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this quarterly report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in reports that we file under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of September 30, 2016 at the reasonable assurance level.

Our management, including our principal executive officer and our principal financial officer, does not expect that our disclosure controls and procedures can prevent all possible errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that objectives of the control system are met. There are inherent limitations in all control systems, including the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the intentional acts of one or more persons. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and while our disclosure controls and procedures are designed to be effective under circumstances where they should reasonably be expected to operate effectively, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in any control system, misstatements due to possible errors or fraud may occur and not be detected.

Changes in Internal Control over Financial Reporting

During the three months ended September 30, 2016, there was no change in our system of internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In September 2015, Volkswagen admitted that certain of its diesel models were intentionally programmed to meet various regulatory emissions standards only during laboratory emissions testing. In late June 2016, Volkswagen agreed to pay up to an aggregate of \$14.7 billion to settle claims stemming from the diesel emissions scandal. On October 25, 2016, a U.S. Federal judge approved this settlement. On or about September 30, 2016, Volkswagen agreed to allocate \$1.21 billion among its 652 dealers for a class settlement in exchange for their agreement not to sue Volkswagen. In October 2016, we received notification from Volkswagen that we are entitled to receive, in the aggregate, approximately \$13.2 million in connection with our current and prior ownership of seven Volkswagen dealerships in the U.S. We will receive half of the compensation immediately in a lump sum amount, and the rest of the compensation in 18 monthly installments. The Volkswagen brand represented 1.7% of our total new vehicle retail unit sales for the nine months ended September 30, 2016.

We are not party to any legal proceedings, including class action lawsuits that, individually or in the aggregate, are reasonably expected to have a material adverse effect on our results of operations, financial condition or cash flows. For a discussion of our legal proceedings, see Part I, “Item 1. Financial Statements,” Notes to Consolidated Financial Statements, Note 11, “Commitments and Contingencies.”

Item 1A. Risk Factors

In addition to the information set forth in this Form 10-Q, you should carefully consider the risk factors previously disclosed in “Item 1A. Risk Factors” of our 2015 Form 10-K. Readers should carefully consider the factors discussed in Part 1, “Item 1A. Risk Factors” in our 2015 Form 10-K, which could materially affect our business, financial condition or future results. The risks described in our 2015 Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

The United Kingdom’s proposed withdrawal from the European Union could have an adverse effect on our business and financial results.

On June 23, 2016, a referendum was held in the U.K. to determine whether the country should remain a member of the E.U., with voters approving to withdraw from the E.U. (commonly referred to as Brexit). Following the results of this non-binding referendum, the U.K. government began formal negotiations with the E.U. regarding the terms and conditions of the proposed withdrawal from the EU. Current uncertainty over whether the U.K. will ultimately leave the E.U., as well as the final outcome of the negotiations between the U.K. and E.U., could have an adverse effect on our business and financial results. The long-term effects of Brexit will depend on the terms negotiated between the U.K. and the E.U., which may take years to complete.

The announcement of Brexit caused significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against foreign currencies in which we conduct business. The British pound sterling has weakened since the Brexit vote, with an average exchange rate of the British pounds sterling to the U.S. dollars of 1.30 after the Brexit vote through October 27, 2016, as compared to the weighted average exchange rate of 1.44 for period from January 1, 2016 to June 22, 2016, a decrease of 10.8%. A weakening British pound sterling as compared to the U.S. dollar negatively impacts our U.S. dollar reported results of operations. Volatility in exchange rates is expected to continue in the short term. Our U.K. business generated approximately 16.3% of our total revenue in the nine months ended September 30, 2016.

Additionally, there is much uncertainty surrounding the effects Brexit will have on the regulatory environment of the U.K. and the overall E.U. and its remaining individual members. Currently, automotive dealers in the U.K. rely on the legislative doctrine of “Block Exemption” to govern market representation activities of competing dealers and dealer groups. To date, there has been no clear indication of how such legislation may be affected by Brexit.

Any of these effects of Brexit, and others we cannot anticipate at this time, could adversely affect our business, consolidated financial position, results of operations, and cash flows.

We are subject to a concentration of risk in the event of financial distress, merger, sale or bankruptcy, including potential liquidation, of, or other adverse economic impacts on, certain major vehicle manufacturers.

In September 2015, Volkswagen admitted that certain of its diesel models were intentionally programmed to meet various regulatory emissions standards only during laboratory emissions testing. In late June 2016, Volkswagen agreed to pay

up to an aggregate of \$14.7 billion to settle claims stemming from the diesel emissions scandal. On October 25, 2016, a U.S. Federal judge approved this settlement. On or about September 30, 2016, Volkswagen agreed to allocate \$1.21 billion among its 652 dealers for a class settlement in exchange for their agreement not to sue Volkswagen. In addition, several other manufacturers have issued stop sales on a number of vehicle models due to recall campaigns.

As disclosed in “Item 1A. Risk Factors” of our 2015 Form 10-K, adverse publicity, product defects, vehicle recall campaigns, litigation and unappealing vehicle design related to events such as these may have an adverse impact on the vehicle manufacturer and on our business, the value of dealerships related to those manufacturers, results of operations and financial condition. Currently, we do not believe that the impact of these issues will be material to us. However, we continue to monitor the development of these issues, because the full extent of the impact on us is not known at this time.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the three months ended September 30, 2016:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
July 1 - July 31, 2016 ⁽²⁾	244,205	\$ 50.61	244,205	\$ 22,394
August 1 - August 31, 2016	—	—	—	\$ 22,394
September 1 - September 30, 2016	—	—	—	\$ 22,394
Total	244,205	\$ 50.61	244,205	

⁽¹⁾ In February 2016, the Board of Directors approved a new authorization of up to \$150.0 million of shares of our common stock which replaced the prior \$100.0 million authorization. The shares may be repurchased from time to time in open market or privately negotiated transactions, depending on market conditions, at our discretion, and funded by cash from operations. During the three months ended September 30, 2016, 244,205 shares were repurchased for a total cost of \$12.4 million.

⁽²⁾ Shares were purchased under a 10b5-1 plan effective between July 1, 2016 and July 28, 2016.

Item 6. Exhibits

Those exhibits to be filed by Item 601 of Regulation S-K are listed in the Exhibit Index immediately preceding the exhibits filed herewith and such listing is incorporated herein by reference.
