PRESENTATION OF INFORMATION

Sanpaolo IMI S.p.A. publishes audited consolidated financial statements which are included elsewhere in this annual report (the "Consolidated Financial Statements") for Sanpaolo IMI S.p.A. and its consolidated subsidiaries constituting the Sanpaolo IMI Group (the "Sanpaolo IMI Group" or the "Group") in euro, the lawful currency of Italy and eleven other member states of the European Union ("EU"). References to "we" or "our" are to the Group on a consolidated basis. References to "Sanpaolo IMI" or the "Parent Bank" are to Sanpaolo IMI S.p.A. on an unconsolidated basis.

In this annual report, references to "U.S. dollars", "dollars" or "\$" are to the United States dollar; references to "euro", "Euro" or "€" are to the euro; and references to "lire" or "Lit." are to the Italian lira, the former Italian non-decimal denomination of the euro. On January 1, 1999, the Italian lira became a member currency of the euro at a fixed conversion rate of €1 = Lit.1936.27. For purposes of this annual report, "billion" means a thousand million. The noon buying rate in the City of New York for cable transfers in foreign currencies as announced by the Federal Reserve Bank of New York for customs purposes (the "Noon Buying Rate") for the euro in effect on June 6, 2005 was €1 = \$1.2268.

This annual report contains translations of certain euro amounts into U.S. dollars at specified rates. Unless otherwise specified, the translations of euro into U.S. dollars have been made at the Noon Buying Rate for the euro in effect on December 31, 2004, which was €1 = \$1.3538. That rate may differ from the actual rates during the year used in the preparation of Sanpaolo IMI's Consolidated Financial Statements, and dollar amounts in this annual report may differ from the actual dollar amounts that were translated into euro in the preparation of the Consolidated Financial Statements.

The Consolidated Financial Statements included in this annual report have been prepared in accordance with generally accepted accounting principles in Italy, including Legislative Decree No. 87 of January 27, 1992, which implemented European Commission ("EC") Directive 86/635, and the Bank of Italy regulations of January 16, 1995, supplemented by the accounting principles issued by the *Consiglio Nazionale dei Dottori Commercialisti e dei Ragionieri* (collectively, "Italian GAAP"), which differ in certain significant respects from generally accepted accounting principles in the United States ("U.S. GAAP"). For a summary of the significant differences between Italian GAAP and U.S. GAAP, please see: Note 29 on page F-164 to the Consolidated Financial Statements.

In this annual report we also present, primarily for purposes of management's Operating and Financial Review and Prospects, reclassified and pro forma income statement information. For an explanation of the reconciliation between the audited and reclassified income statements, see: Item 3. A. "Selected Financial Data Reconciliation Between Audited and Reclassified Income Statements" on page 14 below. For an explanation of the basis on which the reclassified and pro forma income statements were prepared, see: Item 5. "Operating and Financial Review and Prospects Presentation of Results" and " Explanatory Notes to the Pro Forma Results" on pages 106 and 158 below.

The Consolidated Financial Statements for the years ended December 31, 2001, 2002, 2003 and 2004 were audited by PricewaterhouseCoopers S.p.A. ("PricewaterhouseCoopers"). The Consolidated Financial Statements for the year ended December 31, 2000 were audited by Arthur Andersen S.p.A.

As used in this annual report, "Shares" means the ordinary shares of €2.80 par value of Sanpaolo IMI and excludes the *Azioni Privilegiate* (as defined below).

From time to time, this annual report gives information concerning Sanpaolo IMI's market share in a particular market or segment. In such cases, the figures are derived from official sources, such as the Bank of Italy, or industry bodies, such as the Italian Banking Association.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. This annual report contains forward-looking statements which reflect management's current views on Sanpaolo IMI Group's business, strategy and financial performance. Statements that are not about facts or events that have already occurred, including statements about the Group's or management's beliefs or expectations, are forward-looking statements. Words or phrases such as "will likely result", "are expected to", "will continue", "is anticipated", "estimate", "target", "goal", "project" or similar expressions are intended to identify forward-looking statements but are not the exclusive means of doing so. Forward-looking statements include, but are not limited to, statements under the following headings:

Item 3. "Key Information B. Selected Statistical Information" on page 25 below;

Item 4. "Information on Sanpaolo IMI A. History and Developments of Sanpaolo IMI" on page 69 below;

Item 4. "Information on Sanpaolo IMI C. Business Overview" on page 82 below;

Item 5. "Operating and Financial Review and Prospects" on page 106 below;

Item 8. "Financial Information A. Consolidated Statements and Other Financial Information B. Legal Proceedings" on page 203 below, including statements regarding the likely effect of matters discussed therein; and

Item 11. "Quantitative and Qualitative Disclosures about Market Risk" on page 224 below.

The following important factors could cause the Group's actual results to differ materially from those projected or implied in any forward-looking statements:

the impact of regulatory and judicial decisions and changes in the regulatory and legal environment;

the impact of political and economic developments in Italy and other countries in which the Group operates;

the impact of fluctuations in currency exchange rates, interest rates and stock market prices;

the Group's ability to successfully integrate the employees, products, services and systems of recent mergers and acquisitions;

the Group's ability to achieve the expected return on the investments and capital expenditures it has made in Italy and abroad;

the Group's ability to successfully implement the 2004-2006 Plan (as defined below);

the amount and timing of any future impairment charges related to the Group's equity holdings, goodwill and other assets;

the adoption of IFRS; see: Item 5. "Operating and Financial Review and Prospects D. Critical Accounting Estimates" on page 167 below; and

changes in the competitive environment, particularly in Italy.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The foregoing factors should not be construed as exhaustive and speak only as of the date hereof. The Group undertakes no obligation to release publicly the result of any revisions to these forward-looking statements which may be made to reflect events or circumstances after the date hereof, including, without limitation, changes in the Group's business or acquisition strategy or planned capital expenditures, or to reflect the occurrence of unanticipated events.

Certain forward-looking statements involve statements about risks and uncertainties that could significantly affect expected results and are based upon assumptions of future events which may not prove to be accurate. In particular, this document includes forward-looking statements relating, but not limited, to the Group's potential exposures to various types of market risk. Certain of the market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. See: Item 11. "Quantitative and Qualitative Disclosures about Market Risk" on page 224 below. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains and losses could differ materially from those that have been estimated and readers should not place undue reliance on such forward-looking statements, which speak only as of the date of this annual report. Sanpaolo IMI assumes no responsibility for updating such forward-looking statements.

RISK FACTORS

The Group's financial results are affected by events which are difficult to anticipate.

The Group's earnings and business are affected by general economic conditions, the performance of financial markets, interest rate levels, currency exchange rates, changes in laws and regulation, changes in the policies of central banks, particularly the Bank of Italy and the European Central Bank (the "ECB"), and competitive factors, in each case on a regional, national or international level. Each of these factors can change the level of demand for the Group's products and services, and change the risk to the Group of providing such products and services. For instance, changes in general economic conditions, the performance of financial markets, interest rate levels and the policies of central banks may affect, positively or negatively, the Group's financial performance by affecting the demand for the Group's products and services, the credit quality of borrowers and counterparties, the interest rate margin realized by the Group between its lending and borrowing costs, and the value of the Group's investment and trading portfolios. Changes in laws and regulations may affect, positively or negatively, the Group's ability to provide certain products and services, and the cost of complying with such laws and regulations.

The Group has economic, financial market, credit, legal and other specialists who monitor economic and market conditions and government policies and actions. However, because it is difficult to predict with accuracy changes in economic or market conditions or in governmental policies and actions, it is difficult for the Group to anticipate the effects that such changes could have on its results of operations, financial condition and business activities.

The Group's financial results are affected by changes in interest rates.

The Group's results of operations are dependent to a significant extent on the level of net interest income, which is the difference between interest income from interest-earning assets and interest expense on interest-bearing liabilities. Interest rates are sensitive to many factors beyond the Group's control, such as monetary policies pursued by central banks and national governments, the liberalization of financial services and increased competition in the markets in which the Group operates, domestic and international economic and political conditions, and other factors.

Changes in interest rates could affect the spread between interest rates charged on interest-earning assets and interest rates paid on interest-bearing liabilities, which in turn could affect the level of the Group's net interest income. Moreover, the composition of the Group's assets and liabilities, and any gap position resulting from the composition, causes the Group's net interest income to vary with changes in interest rates. A mismatch of interest-earning assets and interest-bearing liabilities in any given period may, in the event of changes in interest rates, have a material effect on the Group's net interest income and thereby on the Group's results of operations and financial condition.

The Group is subject to credit and market risk.

To the extent any of the instruments and strategies the Group uses to hedge or otherwise manage its exposure to credit or market risk are not effective, the Group may not be able to mitigate effectively the Group's risk exposures in particular market environments or against particular types of risk. The Group's trading revenues and interest rate risk are dependent upon its ability to identify properly, and mark to market, changes in the value of financial instruments caused by changes in market prices or interest rates. The Group's financial results are also dependent upon how effectively the Group determines and assesses the cost of credit and manages its credit risk and market risk concentrations. To the extent the Group's assessments of migrations in credit quality and of risk concentrations, or the Group's assumptions or estimates used in establishing its valuation models for the fair value of the Group's assets and liabilities or in determining the appropriate level of its loan loss allowances and other risk allowances prove inaccurate or not predictive of actual results, the Group could suffer higher

than anticipated credit, trading or investment losses. This in turn could adversely affect the Group's results of operations and financial condition.

For a discussion of the Group's credit and market risks and its management of such risks, please see: Item 11. "Quantitative and Qualitative Disclosures about Market Risk" on page 224 below.

The Group is subject to operational risk.

The Group, like all financial institutions, is exposed to many types of operational risk, including the risk of fraud or other misconduct by employees or outsiders, unauthorized transactions by employees or operational errors, including clerical or record-keeping errors or errors resulting from faulty computer or telecommunications systems. Given the Group's high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. In addition, the Group's dependence upon automated systems to record and process its transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. The Group may also be subject to disruptions of its operating systems, arising from events that are wholly or partially beyond the Group's control (including, for example, computer viruses or electrical or telecommunication outages), which may give rise to losses in service to customers and to loss or liability to the Group. The Group is further exposed to the risk that external vendors may be unable to fulfill their contractual obligations to the Group (or that external vendors will be subject to the risk of fraud or operational errors by their respective employees), and to the risk that its (or its vendors') business continuity and data security systems prove not to be sufficiently adequate. The Group also faces the risk that the design of its controls and procedures prove inadequate, or are circumvented, thereby causing delays in detection or errors in information. Although the Group maintains a system of controls designed to keep operational risk at appropriate levels, the Group has suffered losses from operational risk and there can be no assurance that it will not suffer losses from operational risk in the future that may be material in amount.

For a discussion of the Group's operational risk and its management of such risk, please see: Item 11. "Quantitative and Qualitative Disclosures about Market Risk" on page 224 below.

The Group's risk management policies, procedures and methods may leave the Group exposed to unidentified or unanticipated risks, which could lead to material losses.

The Group has devoted significant resources to developing its risk management policies, procedures and assessment methods and intends to continue to do so in the future. Nonetheless, the Group's risk management techniques and strategies may not be fully effective in mitigating the Group's risk exposure in all economic market environments or against all types of risk, including risks that the Group may fail to identify or anticipate. Some of the Group's qualitative tools and metrics for managing risk are based upon the Group's use of observed historical market behavior. The Group applies statistical and other tools to these observations to arrive at quantifications of its risk exposures. These tools and metrics may fail to predict future risk exposures. These risk exposures could, for example, arise from factors the Group did not anticipate or correctly evaluate in its statistical models. This would limit the Group's ability to manage its risks. The Group's losses thus could be significantly greater than the historical measures indicate. In addition, the Group's quantified modeling does not take all risks into account. The Group's more qualitative approach to managing those risks could prove insufficient, exposing it to material unanticipated losses. If existing or potential customers believe the Group's risk management is inadequate, they could take their business elsewhere. This could harm the Group's reputation, results of operations and financial condition.

Market declines and volatility can materially adversely affect revenues and profits.

Conditions in the financial markets in Italy and elsewhere materially affect the Group's businesses. Market declines and increased volatility can adversely affect the credit quality of the Group's assets and could increase the risk that a greater number of the Group's customers would default on their loans or other obligations. An overall market downturn or increased volatility in market conditions can adversely affect the Group's business, results of operations and financial condition.

Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and leading to material losses.

In some of the Group's businesses, protracted adverse market movements, particularly asset price declines, can reduce the level of activity in the market or reduce market liquidity. These developments can lead to material losses if the Group cannot close out deteriorating positions in a timely way. This may especially be the case for assets of the Group for which there are not very liquid markets to begin with. Assets that are not traded on stock exchanges or other public trading markets, such as derivatives contracts between banks, may have values that the Group calculates using models other than publicly quoted prices. Monitoring the deterioration of prices of assets like these is difficult and failure to do so effectively could lead to losses that the Group did not anticipate or that were higher than those anticipated. This in turn could adversely affect the Group's results of operations and financial condition.

Even where losses are for the accounts of clients of the Group, the clients may fail to repay the Group, leading to material losses for the Group and harm to the Group's business.

While the Group's clients would be responsible for losses the Group incurs in taking positions for their accounts, the Group may be exposed to additional credit risk as a result of their need to cover the losses. The Group's business may also suffer if the Group's clients lose money and the Group loses the confidence of clients in its products and services. This in turn could adversely affect the Group's results of operations and financial condition.

The Group's investment banking revenues may decline in adverse market or economic conditions.

The Group's investment banking revenues, in the form of financial advisory and underwriting fees, directly relate to the number and size of the transactions in which the Group participates and are susceptible to adverse effects from sustained market downturns. These fees and other revenues are generally linked to the value of the underlying assets and therefore decline as asset values decline. In particular, the Group's revenues and profitability could sustain material adverse effects from a significant reduction in the number or size of debt and equity offerings and merger and acquisition transactions.

The Group may generate lower revenues from brokerage, asset management and other commission- and fee-based businesses.

Market downturns are likely to lead to declines in the volume of transactions that the Group executes for its customers and, therefore, to declines in the Group's non-interest revenues. In addition, because the fees that the Group charges for managing its clients' portfolios are in many cases based on the value or performance of those portfolios, a market downturn that reduces the value of the Group's clients' portfolios or increases the amount of withdrawals would reduce the revenues the Group receives from its asset management and custody businesses, among others.

Even in the absence of a market downturn, below-market performance by the Group's mutual funds may result in increased withdrawals and reduced inflows, which would reduce the revenues the Group receives from its asset management business.

Intense competition, especially in the Italian market, where the Group has the largest single concentration of its businesses, could materially hurt the Group's revenues and profitability.

Competition is intense in all of the Group's primary business areas in Italy and the other countries in which the Group conducts its business, including other European countries and the United States. The Group derived approximately 88.5% of its net revenues in 2004 from Italy, a mature market where competitive pressures have increased and we believe will intensify. Downturns in the Italian economy could add to the competitive pressure, through, for example, increased price pressure and lower business volumes for Sanpaolo IMI and its competitors to try to capture. In addition, as a result of technological advances, the growth of e-commerce and the progressive liberalization of financial services in the European Union, we face increased competition for some of our products and services from non-bank competitors, such as mutual funds, pension funds and insurance companies. If the Group is unable to continue to respond to the competitive environment in Italy with attractive product and service offerings that are profitable for the Group, the Group may lose market share in important areas of its business or incur losses on some or all of its activities.

The Group's insurance businesses are subject to inherent risks involving claims.

Future claims in the Group's life insurance business may be higher than expected as a result of changing trends in claims experience resulting from such factors as demographic developments, changes in mortality and other causes beyond the Group's control. These changes could adversely affect the profitability of the Group's insurance products and services.

PART I

ITEM 1. IDENTITY OF DIRECTORS, SENIOR MANAGEMENT AND ADVISORS

(1)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Excludes the *Azioni Privilegiate* (as defined below).

(2)

Includes the *Azioni Privilegiate* (as defined below).

(3)

The *Azioni Privilegiate* (as defined below) were introduced in 2002 (see: Item 4. "A History and Development of Sanpaolo IMI The Merger Group" on page 71 below). n.a. means not applicable.

(4)

Excludes Shares issued and held by Sanpaolo IMI.

(5)

Prices at closing of trading session. Source: Borsa Italiana (Italian Stock Exchange).

(6)

On June 1, 2002, 388,334,018 Shares were converted into *Azioni Privilegiate* (as defined below). Please see: Item 4. "A. History and Developments of Sanpaolo IMI The Merged Group" on page 71 below. The calculation of dividend per Share at the end of 2002 includes the *Azioni Privilegiate*. The dividend was

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

approved at the shareholders' meeting held on April 29, 2005 and was paid on May 26, 2005. The dividend per American Depositary Share (ADS) was U.S. \$1.18 in 2004, U.S. \$0.96 in 2003, U.S. \$0.70 in 2002, U.S. \$1.06 in 2001 and U.S. \$0.98 in 2000.

- (7) The average has been calculated based on daily figures from January 1 to December 31 of each year.
- (8) Calculated on the average number of Shares, excluding the *Azioni Privilegiate* (as defined below).
- (9) Calculated on the average number of shares, including the *Azioni Privilegiate* (as defined below).

Consolidated Balance Sheet and Other Data

The following table shows selected consolidated balance sheet data and other data at the dates indicated. As explained in footnotes 1-5 following the table, the balance sheet data have been extracted from our audited consolidated balance sheet, which is presented in the Consolidated Financial Statements included in this annual report.

Consolidated Balance Sheet Data

	At December 31,				
	2004	2003	2002	2001	2000
	(millions of € except for percentages)				
Total assets	211,157	202,580	203,773	170,485	172,798
Total assets under U.S. GAAP	253,732	238,317	231,814	191,378	188,969
Net loans(1)	145,684	146,877	148,701	118,627	117,825
Due to banks(2)	28,198	28,534	24,456	27,922	29,596
Marketable debt securities and subordinated debt(3)	53,519	57,967	58,174	46,446	44,496

Return on shareholders' equity at year-end(10)	11.80	8.84	8.44	14.19	16.05
<i>Capital Ratio</i>					
Shareholders' equity to total assets at year-end	5.59	5.43	5.17	4.97	4.66

Credit Quality Data

Net doubtful loans(11)	2,566	2,571	2,892	1,948	2,157
Net doubtful loan ratio(12)	1.76	1.75	1.94	1.64	1.83

The item numbers in the footnotes below and elsewhere in this annual report refer, where applicable, to the corresponding item numbers shown in the Audited Consolidated Balance Sheet of Sanpaolo IMI at December 31, 2004, 2003, 2002, 2001 and 2000.

(1)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Represents the sum of Item 30. "Due from banks" plus Item 40. "Loans to customers". Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.

- (2) Represents Item 10. "Due to banks".
- (3) Represents the sum of Item 30. "Securities issued" plus Item 110. "Subordinated liabilities".
- (4) Represents Item 140. "Minority interest".
- (5) Represents the sum of Item 150. "Capital" plus Item 160. "Additional paid in capital" plus Item 170. "Reserves" plus Item 100. "Reserve for general banking risks" plus Item 120. "Negative goodwill arising on consolidation" plus Item 130. "Negative goodwill arising on application of the equity method" plus Item 180. "Revaluation reserves" plus Item 190. "Retained earnings" plus Item 200. "Net income for the year".
- (6) Net interest margin is net interest income as a percentage of average interest-earning assets.
- (7) Return on average total assets is net income after minority interests as a percentage of average total assets.
- (8) Return on assets at year-end is net income after minority interests as a percentage of total assets at year-end.
- (9) Return on average shareholders' equity represents net income after minority interests as a percentage of average shareholders' equity. Average shareholders' equity includes net income.
- (10) Return on shareholders' equity at year-end represents net income after minority interests as a percentage of shareholders' equity at year-end.
- (11) Net doubtful loans represent the sum of net loans classified as non-performing loans, problem loans, loans currently being restructured, restructured loans and unsecured loans exposed to country risk.
- (12) Represents net doubtful loans (see: note 11 above) as a percentage of net loans (see: note 1 above).

Reconciliation Between Audited and Reclassified Income Statements

The following tables show the reconciliation between our audited income statement, which is included in the Consolidated Financial Statements included elsewhere in this annual report, and our reclassified income statement, which is presented primarily for purposes of management's Operating and Financial Review and Prospects. In particular, the tables show which items in the audited income statement have been combined into a single item, broken down into two or more items, or reclassified to other items, for purposes of the reclassified income statement.

- (A) Combination of line items 30.a) "Dividends and other revenues from shares, capital quotas and other equities" and 60. "Profits (losses) on financial transactions" in the audited income statement to form "Profits/(losses) on financial transactions and investment income" in the reclassified income statement.
- (B) Combination of line items 30.b) "Dividends and other revenues from equity investments" and 170. "Income (losses) from investments carried at equity" in the audited income statement to form "Profits/(losses) of companies carried at equity and dividends on equity investments" in the reclassified income statement.
- (C) Combination of line items 40. "Commission income" and 50. "Commission expense" in the audited income statement to form "Net commission and other dealing revenues" in the reclassified income statement.
- (D) Combination of line items 70. "Other operating income" and 110. "Other operating expenses" in the audited income statement to form "Other operating income, net" in the reclassified income statement.
- (E) Combination of line items 120. "Adjustments to loans and provisions for guarantees and commitments", 130. "Writebacks of adjustments to loans and provisions for guarantees and commitments" and 140. "Provisions for probable loan losses" in the audited income statement to form "Adjustments to loans and provisions for guarantees and commitments" in the reclassified income statement.
- (F) Combination of line items 150. "Adjustments to financial fixed assets" and 160. "Writebacks of adjustments to financial fixed assets" in the audited income statement to form "Adjustments to financial fixed assets, net" in the reclassified income statement.
- (G) Breakdown of line item 80.b) "Administrative costs other" in the audited income statement into "Other administrative costs" and "Indirect taxes and similar dues" in the reclassified income statement.
- (H) Breakdown of line item 90. "Adjustments to intangible and tangible fixed assets" in the audited income statement into "Adjustments to intangible and tangible fixed assets" and "Adjustments to goodwill, merger and consolidation differences" in the reclassified income statement.
- (I) Reclassification of negative net interest income of Banca IMI Group in the reclassified income statement to "Profits/(losses) on financial transactions and investment income" in the reclassified income statement as it is related to securities dealing activities rather than banking activities.
- (J) Reclassification of income earned from merchant banking and leasing activities from line item 70. "Other operating income" in the audited income statement to "Net commission and other dealing revenues" in the reclassified income statement as it is related to activities.
- (K) Reclassification of expenses incurred in connection with merchant banking and leasing activities from line item "Other operating income, net" in the reclassified income statement to "Net commission and other dealing revenues" in the reclassified income statement as they are related to financing activities.
- (L) Reclassification of writedowns in the value of securities held as collateral for loans from line item "Profits/(losses) on financial transactions and investment income" in the reclassified income statement to "Adjustments to loans and provisions for guarantees and commitments" in the reclassified income statement as they are considered to be adjustments to such loans.
- (M)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Reclassification from line item 90. "Adjustments to intangible and tangible fixed assets" in the audited income statement to "Net extraordinary income" in the reclassified income statement of (i) €9 million writedown in value of IMIWEB Bank in light of its disposal and (ii) €22 million representing acceleration of depreciation of Banco di Napoli assets to align their depreciation with Sanpaolo IMI's depreciation policy.

(N)

Rounding

(*)

This item refers to the special consolidation method used for the Banco di Napoli group and relates to the net income of Banco di Napoli for the second half of 2000, which had been included as part of the purchase price for Sanpaolo IMI's successive purchases of shares in Banco di Napoli.

Exchange Rates

The following table shows, for the periods indicated, information regarding the Noon Buying Rate for the euro, expressed in U.S. dollars per euro.

Year ended December 31,	High	Low	Average(1)	At Period End
2000	1.0335	0.8270	0.9207	0.9388
2001	0.9535	0.8425	0.8909	0.8901
2002	1.0485	0.8594	0.9495	1.0485
2003	1.2597	1.0361	1.1411	1.2597
2004	1.3625	1.1801	1.2478	1.3538
2005 (through June 6, 2005)	1.3476	1.2227	1.2805	1.2268

(1) Average of the rates for the last business day of each month in the period.

The following table shows the high and low exchange rates between the euro and the U.S. dollar, expressed in U.S. dollars per euro, during the last six months:

Month	High	Low
January 2005	1.3476	1.2954
February 2005	1.3274	1.2773
March 2005	1.3465	1.2877
April 2005	1.3093	1.2819
May 2005	1.2936	1.2349
June 2005 (through June 6, 2005)	1.2268	1.2227

The Shares trade on the *mercato telematico azionario* ("Telematico"), managed by Borsa Italiana S.p.A. ("Borsa Italiana") in euro. Fluctuations in the exchange rate between the euro and the U.S. dollar will affect the U.S. dollar equivalent of the euro price of the Shares and the price of the Sanpaolo IMI American Depositary Shares ("ADSs") listed on the New York Stock Exchange ("NYSE"). Cash dividends are paid by Sanpaolo IMI in euro, and exchange rate fluctuations also affect the U.S. dollar amounts received by owners of ADSs upon conversion by the depositary of dividends on the underlying Sanpaolo IMI Shares.

B. Selected Statistical Information**Assets**

The following table sets forth, at the dates indicated, the principal components of our assets.

	At December 31,					
	2004		2003		2002	
	amount	% of total assets	amount	% of total assets	amount	% of total assets
(in millions of €, except percentages)						
Loans and leases to non-credit institutions, net(1)(2)	121,907	57.73	124,599	61.51	126,701	62.18
of which:						
Short-term loans	37,754	17.88	42,815	21.13	48,637	23.87
Medium- and long-term loans	82,178	38.92	79,600	39.29	75,478	37.04
Non-performing loans	1,161	0.55	1,171	0.58	1,334	0.65
Loans to SGA(3)	814	0.39	1,013	0.50	1,252	0.61
Interest-earning deposits and loans to credit institutions, net(1)	23,777	11.26	22,278	11.00	22,000	10.80
of which:						
Reverse repurchase agreements	12,576	5.96	10,121	5.00	11,618	5.70
Dealing securities and investments	29,290	13.87	25,258	12.47	22,560	11.07
of which:						
Investment securities	3,219	1.52	2,935	1.45	2,897	1.42
Dealing securities	26,071	12.35	22,323	11.02	19,663	9.65
Other assets	36,183	17.14	30,445	15.03	32,512	15.96
Total assets	211,157	100.00	202,580	100.00	203,773	100.00

(1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the amount that appears on the balance sheet.

(2) Includes reverse repurchase agreements in the amounts of €2,808 million, €1,694 million and €2,644 million at December 31, 2004, 2003 and 2002, respectively.

(3) SGA is the company established to recover non-performing loans of Banco di Napoli. See: Note 19 to the Consolidated Financial Statements at page F-125 below.

Loans and Leases to Non-credit Institutions

Our net loans and leases to non-credit institutes, which we also refer to as our loans to customers, totaled €121.9 billion at December 31, 2004, a decrease of €2.7 billion, or 2.2%, from €124.6 billion at December 31, 2003. The decrease was primarily due to the securitization of €1.8 billion of performing loans related to our leasing activities. Short-term loans decreased by €5 billion, or 11.7%, to €37.8 billion at December 31, 2004 from €42.8 billion at December 31, 2003. This decrease was partially offset by a €2.6 billion, or 3.3%, increase in medium- and long-term loans to €82.2 billion at December 31, 2004 from €79.6 billion at December 31, 2003, primarily due to an increase in loans to households.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Breaking down our net loans to customers by counterparty, loans to households increased by €2.5 billion, or 10.0%, to €27.5 billion at December 31, 2004 from €25.0 billion at December 31, 2003; and loans to non-bank financial institutions increased by €1.2 billion, or 11.8%, to €11.4 billion at December 31, 2004 from €10.2 billion at December 31, 2003. These increases were more than offset by a €5.8 billion, or 7.8%, decrease in loans to non-financial companies and small businesses to €68.9 billion at December 31, 2004 from €74.7 billion at December 31, 2003. Loans to governments and

other public entities remained effectively stable, amounting to €13.6 billion at December 31, 2004 compared to €13.8 billion at December 31, 2003. See: also " Loan Portfolio Loans by Category of Borrower" at page 33 below.

At December 31, 2004, the Group's market share of the Italian market for total loans to customers was 10%, with an 11.7% market share of medium- and long-term loans to customers and an 8.1% market share of short-term loans to customers (source: Bank of Italy).

Interest-earning Deposits and Loans to Credit Institutions

Interest-earning deposits, otherwise known as interbank deposits, and loans to credit institutions increased by €1.5 billion, or 6.7%, to €23.8 billion at December 31, 2004 from €22.3 billion at December 31, 2003. Of these totals, financings in the form of reverse repurchase agreements increased by €2.5 billion, or 24.8%, to €12.6 billion at December 31, 2004 compared to €10.1 billion at December 31, 2003, primarily due to an increase in such financings by Banca IMI, especially towards the end of 2004. For a discussion of the net effect of our lending to credit institutions and our funding from credit institutions, see: " Liabilities and Funding Sources" on page 64 below.

Dealing Securities and Investments

The two components of our securities portfolio are investment securities, which are securities held for long-term investment purposes, and dealing securities, which are securities held for trading and liquidity purposes.

At December 31, 2004, the book value of our securities portfolio totaled €29.3 billion, an increase of €4 billion, or 15.8%, compared to €25.3 billion at December 31, 2003. Of the year-end 2004 total, our investment securities accounted for €3.2 billion, an increase of €0.3 billion, or 10.3%, compared to €2.9 billion at December 31, 2003. As a proportion of our total securities portfolio, investment securities represented 10.9% at December 31, 2004 compared to 11.5% at December 31, 2003.

The largest investment portfolio was that of the Parent Bank, amounting to €2.4 billion at December 31, 2004. At year-end 2004, the Parent Bank's investment portfolio consisted of bonds issued by the Italian government (almost 62% of the total Group investment portfolio) and corporate debt (approximately 11% of the total Group investment portfolio).

Dealing securities totaled €26.1 billion at December 31, 2004, an increase of €3.8 billion, or 17.0%, from €22.3 billion at December 31, 2003. The two largest dealing portfolios were those of Banca IMI and the Parent Bank.

Banca IMI's dealing securities totaled €12.0 billion at December 31, 2004, a 4.3% increase compared to €11.6 billion at December 31, 2003. At year-end 2004, Banca IMI's dealing portfolio consisted of Italian government bonds (45.1% of total), other bonds (35.8% of total) and shares, including shares in OICR (Collective Savings Investment Organizations) funds (19.1% of total).

The Parent Bank's dealing and investment portfolios totaled €11.6 billion at December 31, 2004 compared with €11.2 billion at December 31, 2003. At year-end 2004, 75% of the Parent Bank's dealing portfolio consisted of bonds issued by issuers other than the Italian government (including debt issued by the Group), 22% consisted of Italian government bonds, and 3% consisted of shares in the IMI Global Sicav fund (acquired through the incorporation of Invesp).

Average Balances and Interest Rates

For information about the average balances and average yields of our interest-earning assets and the average balances and average costs of our interest-bearing liabilities, please see: Item 5. "Operating and Financial Review and Prospects" on page 106 below.

Change in Net Interest Income Volume and Rate Analysis

For information about the allocation of changes in net interest income to changes in average volume, changes in average rate and changes in both volume and rate by category of our interest-earning assets and our interest-bearing liabilities, please see: Item 5. "Operating and Financial Review and Prospects" on page 106 below.

Net Interest Margin and Interest Spread

For information about our net interest margin and interest spread, please see: Item 5. "Operating and Financial Review and Prospects" on page 106 below.

Return on Equity and Assets

The following table shows certain selected financial ratios which have been derived from our average balance sheet and the Consolidated Financial Statements.

	Year ended December 31,		
	2004	2003	2002
	(percentages)

Return on average shareholders' equity(2)	12.22	8.96	8.28
Dividends as a percentage of net income	50.00	58.21	49.18
Average shareholders' equity as a percentage of average total assets	5.44	5.34	5.18

- (1) Represents net income as a percentage of average total assets.
- (2) Represents net income as a percentage of average shareholders' equity. Average shareholders' equity includes net income.

Loan Portfolio

The Group's loan portfolio consists of loans and leases to non-credit institutions (which is the largest component of our loan portfolio), interbank deposits and loans to credit institutions, and financings in the form of reverse repurchase agreements. In this section, we present a variety of information about the Group's loan portfolio, including the distribution of our loans by categories different from those shown on our average or year-end balance sheet, such as loans by type of facility, loans by category of borrower, domestic and international loans by category of borrower, and loans by geographic area.

For purposes of our average and year-end balance sheet, as well as for purposes of this section, loans, including principal not yet due and principal and interest due but not yet collected, are stated at their net carrying amount, taking into account the financial condition of borrowers in difficulty and any debt-servicing problems faced by individual industrial sectors or the country in which such borrowers are residents. See: " Risk Elements in the Loan Portfolio Non-accrual of Interest" on page 48 below and Note 9 to the Consolidated Financial Statements. The assessment performed also takes into consideration any guarantees received, market prices (where applicable) and general difficulties experienced by the different categories of borrowers. The net carrying amount is determined following a detailed review of loans outstanding during the year, considering the degree of risk associated with the various forms of lending and the risk of default inherent in loans that are currently performing normally. For all doubtful loans (the term we use to refer to loans classified as anything other than *in bonis*, or performing, loans; see: " Risk Elements in the Loan Portfolio" on page 43 below) other than unsecured loans exposed to country risk, the net carrying amount takes into consideration not only

the likelihood of eventual recovery, but also any total or partial failure to generate income and delayed repayments.

When it has been determined that a loan is classified as doubtful, the Group either writes off the loan, with the amount written off being charged directly to income, or makes a provision, which is charged to income through the allowance for probable loan losses. See: " Risk Elements in the Loan Portfolio Allowance for Probable Loan Losses and Write-offs" on page 53 below. In this section, the term "net loans" refers to the amount of loans shown on the balance sheet. Net loans are net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks; see: Note 9 to the Consolidated Financial Statements on page F-21 below). The term "total loans" refers to loans net of any write-offs, but before any deduction for the allowance for probable loan losses. Total loans do not appear on the balance sheet, but are set forth under "Total loans to customers" and "Total loans to banks" in Note 11 to the Consolidated Financial Statements.

Loans by Type of Facility

The following tables show, at the dates indicated, the distribution of the Group's net loans by type of facility.

Net loans(1)	At December 31,					
	2004		2003		2002	
	Amount	% of net loans	Amount	% of net loans	Amount	% of net loans
	(millions of €, except percentages)					
Installment loans	67,890	46.60	64,642	44.01	59,651	40.11
Other fixed-term loans	17,003	11.67	22,791	15.52	28,024	18.85
Loans to banks(2)	11,192	7.68	12,147	8.27	10,326	6.94
Current account overdrafts	16,427	11.28	17,492	11.91	17,574	11.82
Reverse repurchase agreements(3)	15,384	10.56	11,815	8.04	14,262	9.59
Advances with recourse	2,362	1.62	2,557	1.74	3,484	2.34
Import-export loans	2,941	2.02	3,111	2.12	3,090	2.08
Finance leases	3,657	2.51	4,594	3.13	4,266	2.87
Consumer credit and personal loans	3,840	2.64	3,433	2.34	3,782	2.54
Discounted notes	750	0.51	943	0.64	1,067	0.72
Factoring loans	2,916	2.00	2,105	1.43	1,717	1.15
Subordinated loans(3)	161	0.11	76	0.05	123	0.08
Non-performing loans(4)	1,161	0.80	1,171	0.80	1,335	0.90
Net loans	145,684	100.00	146,877	100.00	148,701	100.00

(1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.

(2) Excludes reverse repurchase agreements with and subordinated loans to banks.

(3) Includes such loans to banks.

(4) Includes non-performing loans to banks. For purposes of this table, all non-performing loans are included in the column "Between one and five years". These numbers refer only to net loans and therefore differ from the figures for non-performing loans shown under " Risk Elements in the Loan Portfolio" on page 43 below in the table setting forth our classified loans on a total loan basis.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Net loans(1)	At December 31,			
	2001		2000	
	Amount	% of net loans	Amount	% of net loans
	(millions of €, except percentages)			
Installment loans	45,760	38.57	45,045	38.23

Net loans	118,627	100.00	117,825	100.00

(1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.

(2) Excludes reverse repurchase agreements with and subordinated loans to banks.

(3) Includes such loans to banks.

(4) Includes non-performing loans to banks. For purposes of this table, all non-performing loans are included in the column "Between one and five years". These numbers refer only to net loans and therefore differ from the figures for non-performing loans shown under " Risk Elements in the Loan Portfolio" on page 43 below in the table setting forth our classified loans on a total loan basis.

Remaining Maturities of Loans by Type of Facility

The following table shows the maturities, based upon contract terms, of the Group's net loans by type of facility at December 31, 2004. To the extent loans are rolled over at maturity, they are treated as new loans for credit approval purposes and are included in the table below at their new maturities.

At December 31, 2004								
Net loans(1)	Within one year		Between one and five years		More than five years		Total	
	Amount	% of total	Amount	% of total	Amount	% of total	Amount	% of total
(millions of €, except percentages)								
Installment loans	9,123	12.63	30,088	76.42	28,679	84.12	67,890	46.59
Other fixed-term loans	12,292	17.02	2,221	5.64	2,490	7.30	17,003	11.67
Loans to banks(2)	9,590	13.28	967	2.46	635	1.86	11,192	7.68
Current account overdrafts	15,838	21.93	333	0.85	256	0.75	16,427	11.28
Reverse repurchase agreements(3)	15,384	21.30					15,384	10.56
Advances with recourse	2,361	3.27	1				2,362	1.62
Import-export loans	2,853	3.95	30	0.08	58	0.17	2,941	2.02
Finance leases	785	1.09	1,819	4.62	1,053	3.09	3,657	2.51
Consumer credit and personal loans	1,503	2.08	2,066	5.25	271	0.79	3,840	2.64
Discounted notes	578	0.80	169	0.43	3	0.01	750	0.52
Factoring loans	1,914	2.65	444	1.13	558	1.63	2,916	2.00
Subordinated loans(3)			66	0.17	95	0.28	161	0.11
Non-performing loans(4)			1,161	2.95			1,161	0.80
Net loans	72,221	100.00	39,365	100.00	34,098	100.00	145,684	100.00

(1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.

(2) Excludes reverse repurchase agreements with and subordinated loans to banks.

(3) Includes such loans to banks.

(4) Includes non-performing loans to banks. For purposes of this table, all non-performing loans are included in the column "Between one and five years". These numbers refer only to net loans and therefore differ from the figures for non-performing loans shown under "Risk Elements in the Loan Portfolio" on page 43 below in the table setting forth our classified loans on a total loan basis.

A brief description of the facility classifications reflected in the foregoing tables follows.

Installment loans include mortgage loans to individuals and private entities, and loans to government and other public entities and to non-financial businesses.

Mortgage loans consist primarily of (1) residential mortgages to individuals for private residences, (2) loans to co-operative institutions in the housing industry, and (3) commercial construction loans, all of which are secured by the underlying real property. Residential mortgages to individuals for private residences are typically repaid in monthly installments. Loans to co-operative institutions and small building companies

in the housing industry and commercial construction loans secured by the underlying real property are usually repaid in six-month installments. Retail residential mortgages have

a maximum loan-to-value ratio of 75% (less than the 80% recommended by current Italian regulations) with maturities of up to 30 years, at fixed or floating rates of interest (or a combination of the two, at the customer's option).

The process for recovering against collateral through the Italian legal system often consists of a series of judicial auctions, which successively reduce the ultimate potential recovery and which currently last an average of five and one-half years. Sanpaolo IMI's policy is to limit the value of each loan to 75% of the value of the premises, in the case of mortgages to individuals and loans to co-operative institutions and small building companies in the housing industry; up to 50% of the cost of construction at the time of loan origination, in the case of commercial construction loans; and up to 75% of renovation costs at the time of loan origination, in the case of mortgage loans to finance renovation costs. These limits are reduced if appropriate in light of credit analyses performed on each borrower. Sanpaolo IMI believes that the value of the collateral on its mortgage loans covers its exposure, and makes a provision or write-off whenever such coverage is no longer deemed to be sufficient.

The other categories of installment loans loans to government and other public entities, and loans to non-financial businesses are medium- and long-term loans, primarily at variable rates and primarily in euro. Loans to government and other public entities are made almost exclusively by Sanpaolo IMI's subsidiary, Banca OPI S.p.A. ("Banca OPI"), with a particular concentration on financing investments and infrastructure projects. Loans to government consist primarily of loans to the Italian government and, to a lesser extent, other governments (mostly OECD members). Loans to other public entities consist primarily of loans to Italian regional, provincial and municipal governments.

Other fixed-term loans represent single, fixed-term extensions of credit, at fixed rates, with interest payable at reimbursement of the loan. These loans are generally extended in euro to counterparties in Italy with initial maturities of less than one year, and may be secured by collateral with a value commensurate with that of the loan. This type of facility is primarily extended to large corporates, small- and medium-sized enterprises, small businesses and, to a lesser extent, to the Italian government and other public entities.

Loans to banks include all types of loans to banking and credit institutions, with the exception of repurchase agreements and, to a lesser extent, subordinated loans. These loans consist almost exclusively of interbank time deposits with terms of less than one year, with the remainder being demand deposits. These facilities are unsecured.

Current account overdrafts are facilities whereby Sanpaolo IMI agrees on a revocable basis to extend credit up to a specified limit through a current account of the borrower. The borrower may use this facility on a revolving basis, making periodic payments and further drawdowns. Although not generally the case, Sanpaolo IMI may require the current account overdraft to be secured. These facilities are at variable rates, with interest payments debited quarterly to the current account. They are extended almost exclusively in euro to companies (large corporates, small- and medium-sized enterprises, and small businesses) and households primarily in Italy and to a lesser extent in other OECD countries.

Reverse repurchase agreements are agreements whereby the customer sells securities to Sanpaolo IMI and agrees to repurchase from Sanpaolo IMI equivalent securities at an agreed price and on a stated date. Securities are generally represented by Italian government or other high-grade securities. This type of financing is secured by virtue of the Bank having the property rights in the purchased securities. These reverse repurchase transactions are primarily in euro and generally with a duration of 120 days or less. Counterparties are primarily OECD banking and credit institutions and secondarily other financial institutions.

Advances with recourse are extensions of credit on current accounts to non-financial businesses (large corporates, small- and medium-sized enterprises, and small businesses) on presentation of checks, promissory notes or other negotiable instruments, subject to Sanpaolo IMI's right to revoke the extension of credit in the event it is unable to obtain payment on the relevant negotiable instrument. The instruments presented for payment generally have a maturity of not longer than 12 months. Interest is fixed-rate and paid in advance. The majority of these extensions of credit are in euro to counterparties resident in Italy.

Import-export loans consist of letters of credit and other forms of credit documentation typically used in foreign trade. These facilities generally are in euro, with a maturity of one year or less at fixed rates, and are secured by irrevocable assignments of the borrower's related receivables. Counterparties are generally non-financial businesses (large corporates, small- and medium-sized enterprises, and small businesses) primarily resident in Italy.

Finance leases are extensions of credit which, measured by value, primarily relate to real estate and industrial machinery, and measured by number of transactions, primarily relate to means of transportation. Finance leases are primarily in euro with an initial maturity greater than 24 months and are secured by the asset that is the subject of the lease. Counterparties are non-financial businesses (large corporates, small- and medium-sized enterprises, and small businesses) primarily resident in Italy. These extensions of credit are made through specialized subsidiaries of Sanpaolo IMI.

Consumer credit and personal loans are loans in euro with maturities generally between one and three years and occasionally up to five years, primarily to individuals resident in Italy for consumer and personal use. Consumer credit loans are generally unsecured.

Discounted notes are extensions of credit in which Sanpaolo IMI in effect purchases at a discounted rate from the borrower outstanding debt owed to the borrower by a third party. These are short-term exposures, primarily less than one year, at fixed rates in euro to non-financial businesses (large corporates, small- and medium-sized enterprises, and small businesses) resident in Italy.

Factoring loans include both factoring in the strict sense as well as assignments of receivables. Factoring is a type of financial service whereby a firm sells or transfers title to its accounts receivable to another party (the factor), which then acts as principal, not as agent. The receivables are sold without recourse, meaning that the factor must bear the risk of collection. The purchase is made at a discount to the account's value. Assignments of receivables represented by invoices or cash orders are essentially advances on current accounts (with or without recourse) to non-financial businesses (large corporates, small- and medium-sized enterprises, and small businesses) upon presentation of the relevant documents. The majority of these exposures are in euro at fixed rates, primarily with maturities of less than one year, to companies resident in Italy.

Subordinated loans are junior in priority to other debt, i.e., repayable only after other debts with a higher claim on assets of the debtor have been satisfied. A subordinated creditor thus assumes more risk than a non-subordinated creditor. Subordinated loans are made in euro, primarily at variable rates and with a maturity of not less than five years, to Italian and other European banks and financial institutions.

Non-performing loans (sofferenze) are loans to borrowers who are bankrupt (even in the absence of a court ruling to that effect) or in substantially equivalent condition, without regard to any financial loss projections prepared by the borrower. Non-performing loan exposures are primarily in euro to counterparties resident in Italy, primarily non-financial businesses (large corporates, small- and medium-sized enterprises, and small businesses).

Loans by Category of Borrower

The following tables show, at the dates indicated, the distribution of the Group's net loans by category of borrower:

Net loans(1)	At December 31,					
	2004		2003		2002

(1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.

(2) Excludes loans to municipal companies made by Banca OPI (Public Authorities and Entities Business Sector), which are included in loans to non-financial companies and small businesses.

(3) Includes telecommunications.

For purposes of its loan and credit risk management policy, Sanpaolo IMI groups borrowers into five main categories: (i) governments and other public entities; (ii) banks and credit institutions; (iii) non-financial companies and small businesses; (iv) non-banking financial institutions; and (v) loans to households and others. A brief description of these categories of borrowers follows. For a summary of Sanpaolo IMI's loan and

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

credit risk management policy, see: Item 11. "Quantitative and Qualitative Disclosure about Market Risk Credit Risk Management and Control" on page 228 below.

Governments and Other Public Entities

This category consists of two sub-categories, "governments" and "other public entities". Governments consist of the Republic of Italy, which accounts for the majority of the exposure to this sub-category, and foreign countries, primarily OECD members. Other public entities consist of Italian regions, provinces and cities.

Sanpaolo IMI extends credit to governments and other public entities almost exclusively through its subsidiary, Banca OPI, with a particular focus on financing investments and infrastructure projects.

The primary type of facility for this category of borrowers is installment loans and, to a much lesser extent, other fixed-term loans. Both types of credit extensions to governments and other public entities are in the majority of cases secured by guarantees of the Republic of Italy or other forms of security, such as pledges of or escrow arrangements with respect to such receivables as, typically, tax receipts. Loans to this category of borrowers are generally considered to present a very low credit risk.

Banks and Credit Institutions

Borrowers in this category include Italian and foreign institutions that take deposits and extend credit. In the last few years, loans to banks and credit institutions have been made primarily to foreign institutions in the euro zone. The principal types of facility extended to this category of borrowers are loans to banks and reverse repurchase agreements.

Non-financial Companies and Small Businesses

This category consists of large corporates, small- and medium-sized enterprises, and small businesses, and is divided into seven sub-categories of economic activity: (i) building and construction industry, (ii) wholesale and retail, (iii) manufacturing, (iv) communications, (v) transportation, (vi) agriculture and (vii) foreign non-financial businesses.

Building and construction includes residential and commercial real estate developments, and public works project and engineering companies. Loans to the latter sector are made by Banca OPI and are considered to present a greater credit risk than Banca OPI's other main category of borrowers.

Wholesale and retail includes wholesale and retail trading companies as well as commercial agents and other intermediaries.

Manufacturing includes companies in the energy, mining and extraction, chemical, industrial machinery and transport production, food, textiles, paper, plastic, rubber and lumber sectors and, to a limited extent, the electronic information technology sectors.

Communications includes telecommunications companies.

Transportation includes road transport and railway companies, maritime and internal shipping lines, passenger and cargo airlines, oil and gas pipelines, and related transportation services such as travel agencies, and warehouse and custody services.

Agriculture includes livestock farming, fishing and forestry.

Foreign non-financial businesses are grouped into a single category of borrowers. Extensions of credit to this category consist primarily of import-export loans.

Extensions of credit to non-financial companies and small businesses are made in the form of installment loans, discounted notes, finance leases, other fixed-term loans, advances with recourse and factoring.

Financial Institutions other than Banks

This category includes securities firms (broker-dealers), insurance, leasing and factoring companies. Extensions of credit to non-bank financial institutions consist primarily of reverse repurchase agreements and other fixed-term loans.

Households and Other

This category includes loans to households, by which we mean loans to individuals and to families for non-commercial purposes, as well as to non-profit organizations. Extensions of credit to this category consist primarily of installment loans, current account overdrafts and personal loans.

Borrower Concentrations and Significant Risk Exposures

At December 31, 2004, the Group's largest credit exposure to a single borrower represented 4.42% of the amount of our net loans, while the Group's aggregate credit exposure to its 10 largest borrowers represented 13.0% of our net loans.

Our largest exposure relates to loans made to the Italian government. Loans made to the Italian government as of December 31, 2004 totaled €6.4 billion, increasing to €10.8 billion (which includes €0.8 billion of Italian government guarantees extended in connection with SGA, see: Note 17 to the Consolidated Financial Statements on page F-111 below) if guarantees of the Italian government provided to Sanpaolo IMI in respect of borrowers other than governmental entities are taken into account. In calculating our exposure to the Italian government as a percentage of our net loans, we did not take into account the guarantees of the Italian government for non-governmental borrowers.

At December 31, 2004, the Group had three "significant risk exposures", defined by the Bank of Italy as risk-weighted exposures that exceeded 10% of our regulatory capital. See: Item 4. "C. Business Overview Italian Banking Regulation and Corporate Governance Principles Lending Limits" on page 98 below. The Group's three "significant risk exposures" at December 31, 2004 amounted to a total of €6.35 billion and related to major Italian oil and gas, utilities and transportation groups.

Domestic and International Loans by Category of Borrower

The following tables show, at the dates indicated, the distribution of the Group's total loans, allowance for probable loan losses, and net loans divided by domestic and international loans, based on

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

the location of the borrower, broken down by loans to the public sector, banks and other private sector customers.

At December 31,

	2004				2003			
	Total loans(1)	% of total loans	Allowance	Net loans(2)	Total loans(1)	% of total loans	Allowance	Net loans(2)

- (1) Total loans are loans net of any write-offs but before any deduction for the allowance for probable loan losses.
- (2) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the face of the balance sheet.
- (3) This balance includes €2.2 billion previously classified as loans to local government and other public entities, which is more appropriately classified as loans to domestic non-financial businesses.

Loans by Geographic Area

The following table shows, at the dates indicated, the geographical distribution of the Group's net loans by location of the borrower, as reported to the Bank of Italy.

Net loans(1)	At December 31,									
	2004		2003		2002		2001		2000

- (1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.
- (2) Including banks.

Interest Rate Sensitivity

The following tables show, at the dates indicated, a breakdown between fixed rate and floating rate loans of the Group's domestic and international net loans (based on the location of the borrower) due after one year.

Net loans(1)	At December 31, 2004		
	Domestic	International	Total
	(millions of €)		
Fixed rate	23,216	526	23,742
Floating rate	45,136	4,585	49,721
Total	68,352	5,111	73,463
Net loans(1)	At December 31, 2003		
	Domestic	International	Total

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

At December 31, 2003

	<u>(millions of €)</u>		
Fixed rate	22,251	704	22,955
Floating rate	42,402	4,712	47,114
Total	64,653	5,416	70,069

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Net loans(1)	At December 31, 2002		
	Domestic	International	Total
	(millions of €)		
Fixed rate	21,593	2,713	24,306
Floating rate	37,491	4,564	42,055
Total	59,084	7,277	66,361

(1) Net loans are total loans net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of net loans is the loan amount that appears on the balance sheet.

Foreign Country Outstandings

For the years ended December 31, 2004, 2003 and 2002, foreign country outstandings are those outstandings (i) to residents outside of Italy in euros or in a currency different from the currency of the borrower and (ii) in the local currency of the borrower but not hedged or funded in such currency by a counterparty resident in the same country. Foreign country outstandings include outstandings in euros in countries (other than Italy) which have adopted the euro as their currency, and which have been funded, in euros, in a country different from the country in which the amounts are outstanding. The outstandings include net loans to customers and to banks, other advances, securities and other monetary assets, but exclude finance provided within the Group, loans guaranteed by SACE (an Italian government agency which provides export credit insurance), and loans made to or guaranteed by supranational organizations.

The following table shows, at the dates indicated, the aggregate amount of the Group's cross-border outstandings where outstandings in the borrower's country exceeded 1% of the Group's total assets. The geographic breakdown is based on the country of the borrower or guarantor of ultimate risk.

Net loans and monetary assets	At December 31,					
	2004		2003		2002	
	Amount	% of total assets	Amount	% of total assets	Amount	% of total assets
	(millions of €)		(millions of €)		(millions of €)

Represents net loans and monetary assets to borrowers in these categories denominated in currencies other than the local currency.

(2)

Represents net loans and monetary assets net of liabilities denominated in the local currency.

(3)

Represents guarantees and commitments to residents outside of Italy, excluding supranational organizations.

(4)

These are countries which have adopted the euro. The outstanding amounts have been funded in euros in Italy or in other countries which have adopted the euro.

Risk Elements in the Loan Portfolio

The Group analyzes the risk elements in its loan portfolio based on Italian regulations and industry practice and on applicable local regulations and industry practices in other countries where the Group does business. Its loan classification policies and procedures differ in significant respects from those followed by banks in the United States.

Loan Classifications

The Group divides its loan portfolio into five broad categories:

in bonis, or performing loans;

restructured loans or loans in course of restructuring;

incagli, or problem loans;

sofferenze, or non-performing loans; and

unsecured loans exposed to country risk.

All loans classified as anything other than *in bonis* are referred to, for purposes of this annual report, as "doubtful loans". Potential problem loans are included among *incagli*, or problem loans.

The five classifications above are currently used within the Sanpaolo IMI Group and the classified loans are reported in the Consolidated Financial Statements (see: Note 9 to the Consolidated Financial Statements on page F-21 below) in accordance with the classification criteria in effect as of the relevant date. The Group reports the amounts of loans falling within these classifications to the Bank of Italy in accordance with its regulations.

Our loan portfolio is monitored on an ongoing basis both centrally and at branch or subsidiary level in order to identify potential problems as early as possible and to evaluate the prospects of recovery and estimated losses with respect to problem and non-performing loans (see: Item 11. "Quantitative and Qualitative Disclosures about Market Risk - Credit Risk Management and Control" on page 228 below). In addition, for accounting purposes, each non-performing loan, problem loan, restructured loan or loan in the course of restructuring, or loan exposed to country risk is evaluated on an ongoing basis and a specific provision or write-off is made for the probable loss in accordance with the policies and procedures described below. The entire performing loan portfolio is evaluated for accounting purposes every three months on an aggregate basis.

Loans, including principal not yet due and principal and interest due but not yet collected, are stated at their net carrying amount, taking into account the financial condition of borrowers in difficulty and any debt servicing problems faced by individual industrial sectors or the country in which such borrowers are residents. For a description of how we determine the net carrying amount of our classified loans, please see Note 7 to the Consolidated Financial Statements at page F-10 below.

The following discussion and tables show, at the dates indicated, the Group's total classified loans by category of loan classification. The tables below follow U.S. practice and show total loans that are past due by more than 90 days. With the exception of total loans that are past due by more than

90 days, all other information in this section of the annual report, including credit quality ratios, is based upon Italian regulations and industry practices.

As a percentage of total loans	4.9%	4.9%	4.8%	4.2%	5.0%

(1) Total loans are loans net of any write-offs but before any deduction for the allowance for probable loan losses. Total loans do not appear on the balance sheet, but are set forth in Note 9 to the Consolidated Financial Statements under "Total loans to customers" and "Total loans to banks" on page F-21 below.

(2) Outstanding principal consists of installments of principal (but not interest) which have not yet come due.

(3)

Unpaid installments consist of installments of principal and interest (including default interest) which have come due but have not been paid. See: Note 11 to the Consolidated Financial Statements on page F-40 below.

The quality of our loan portfolio remained substantially stable at December 31, 2004 compared to December 31, 2003. The aggregate of loans overdue by more than 90 days and doubtful loans increased slightly by €82 million, or 1.1%, to €7,445 million at year-end 2004 from €7,363 million at year-end

2003. As a percentage of our total loans, loans overdue by more than 90 days and doubtful loans remained unchanged at 4.9%.

Doubtful loans increased by €175 million, or 2.7%, to €6,654 million at December 31, 2004 from €6,479 million at December 31, 2003, primarily the result of a €251 million, or 5.7%, increase in non-performing loans, partially offset by a €175 million, or 9.6% decrease in problem loans. This net effect was attributable to adverse economic trends and industry conditions in Italy. As a percentage of our total loans, doubtful loans increased slightly to 4.4% at December 31, 2004 from 4.3% at December 31, 2003.

The following is a description of the loan classifications and criteria for determining whether a loan should be classified in the relevant category applied by the banking networks of the Sanpaolo network, Banca Popolare dell'Adriatico, Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Cassa di Risparmio di Venezia, Fiucassa, Sanpaolo Banco di Napoli, Sanpaolo Leasint, Finemiro Banca, Finemiro Finance, Sanpaolo IMI Bank Ireland and Banca OPI (collectively, the "Commercial Banking and Public Authorities and Entities Networks"). The Commercial Banking and Public Authorities and Entities Networks account for, in the aggregate, up to 95% of total Group loans. The loans attributable to Group companies other than the Commercial Banking and Public Authorities and Entities Networks are classified, taking into consideration their respective Business Area (as described below under: Item 4. "Information on Sanpaolo IMI C. Business Overview" on page 82 below) and jurisdiction of incorporation, pursuant to standards comparable to those applied by the Commercial Banking and Public Authorities and Entities Networks.

In bonis, or Performing Loans

These loans include loans past due by more than 90 days which are not otherwise classified. Under Italian practice and Bank of Italy regulations, a loan may be classified as *in bonis*, even though the loan is 90 days past due as to principal, interest or both. Under these circumstances, the loan is still *in bonis*, but it generates default interest. The Commercial Banking and Public Authorities and Entities Networks make a specific provision for the entire amount of such default interest, regardless of the possibility of the default interest being paid. The Commercial Banking and Public Authorities and Entities Networks do not make a specific provision for the regular interest on such loans because they are still considered performing.

The Commercial Banking and Public Authorities and Entities Networks classify loans past due by more than 90 days as *in bonis* if:

in its discretion, the relevant bank believes that the borrower does not have debt servicing problems;

the Bank of Italy regulations do not require the relevant bank to consider the loan as a problem loan (*incagli*) in view of the nature of the transaction (the term of the delay in the payment is shorter than prescribed by the Italian regulators); and

in management's view, the borrower is not experiencing financial difficulties, whether temporary or not.

If a loan that is overdue by more than 90 days fails to satisfy one or both of the above criteria, it will be classified among the *incagli* or the *sofferenze*, as the case may be.

Restructured Loans or Loans in Course of Restructuring

Under the Bank of Italy guidelines, the Commercial Banking and Public Authorities and Entities Networks classify a loan as restructured when a syndicate of banks (or a single bank) agrees to a delay in payment of the loan or re-negotiates the loan at below market rates; a loan is classified as in course

of restructuring when the borrower has applied for consolidation of debt to its banks not more than 12 months previously.

Problem Loans

Under the Bank of Italy guidelines, as implemented by the Commercial Banking and Public Authorities and Entities Networks' policies, the Commercial Banking and Public Authorities and Entities Networks classify a loan as a problem loan (*incagli*) when the borrower is experiencing financial difficulties that are likely to be temporary and which can be resolved within a reasonable time. A "reasonable time" is generally defined as a maximum of 12 months unless the applicable bank of the Commercial Banking and Public Authorities and Entities Networks has agreed with the borrower on a rescheduling of payments and the borrower is making payments in accordance with that schedule. A current account overdraft may be classified as a problem loan if the borrower has exceeded the established credit limit for a period of time that would suggest that the borrower is experiencing financial difficulties.

Installment loans are classified as problem loans based on a variety of criteria, including as a result of a borrower's non-installment loan being classified as a problem loan; conversely, a non-installment loan may be classified as a problem loan, among other reasons, as a result of a borrower's installment loan being classified as a problem loan.

In addition, the Commercial Banking and Public Authorities and Entities Networks' policy has been to classify installment loans, whether amortizing or not, as problem loans when both (i) a borrower fails to pay a specified number of installments when due and (ii) the amount of the overdue payments, net of default interest, is equal to or above 20% of the exposure of the applicable bank of the Commercial Banking and Public Authorities and Entities Networks to the borrower (net of default interest).

The number of missed installments that will cause a loan to be treated as a problem loan depends upon the number of installments required contractually and the term of the loan, as follows:

Installment period	Term of 36 months or less	Term of over 36 months
Monthly	5	7
Quarterly	3	5
Semiannually	2	3
Annually	6 months after 1	6 months after 1

Non-performing Loans

Under the Bank of Italy regulations, as implemented by the Commercial Banking and Public Authorities and Entities Networks' policies, the Commercial Banking and Public Authorities and Entities Networks classify a loan as non-performing (*sofferenze*):

when the borrower is in insolvency proceedings;

once Sanpaolo IMI or any other creditor initiates legal proceedings in respect of the debt of that borrower; or

if the borrower is experiencing serious financial difficulties that are not likely to be temporary, even if Sanpaolo IMI has not yet initiated legal proceedings.

In addition, the Commercial Banking and Public Authorities and Entities Networks' policy, which is derived from the Bank of Italy regulations (see: Item 4. "Information on Sanpaolo IMI C. Business Overview Italian Banking Regulation and Corporate Governance Principles" on page 93 below), has been to classify all loans with periodic payments, whether amortizing or not, as non-performing when

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

both (i) a borrower fails to pay a specified number of installments when due and (ii) the amount of the overdue payments, net of default interest, is equal to or above 20% of Sanpaolo IMI's exposure to the borrower (net of default interest).

The number of missed installments that will cause a loan to be treated as non-performing depends upon the number of installments required contractually and the term of the loan, as follows:

Installment period	Term of 36 months or less	Term of over 36 months
Monthly	8(1)	10(2)
Quarterly	5	7
Semiannually	3	4
Annually	6 months after 2	6 months after 2

(1) 12 monthly installments in the case of Finemiro Banca and Finemiro Finance because of their focus on consumer credit, leasing and factoring.

(2) 14 monthly installments in the case of Finemiro Banca and Finemiro Finance because of their focus on consumer credit, leasing and factoring.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table shows, at the dates indicated, the amount of our non-performing loans by customer group and economic sector and as a percentage of total non-performing loans.

At December 31,

Total non-performing
loans

(1)

Total loans are loans net of any write-offs but before any deduction for the allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of total loans does not appear on the face of the balance sheet, but is set forth in Note 9 to the Consolidated Financial Statements under "Total loans to customers" and "Total loans to banks" on page F-21 below.

Non-Accrual of Interest

Problem loans. Problem loans are not considered non-accrual loans. In accordance with Italian civil and tax law, upon enforcement of loan contracts, the Group is required to continue to accrue contractual interest on the non-overdue principal portion until such time as repayment of the entire amount outstanding on the loans is accelerated (i.e., until the loans are classified as non-performing). Such accrued but unpaid contractual interest is capitalized and included in the loan balances. The Group policy provides that allowances for probable losses on problem loans are based on the total loan value, which includes both principal and accrued but unpaid interest. On an aggregate basis, the allowance for probable losses on problem loans thus covers the total amount of interest capitalized as part of the total loan value of such loans. On an individual loan basis, the provision for the period does not necessarily match the related interest accrued in the year.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The amount of unpaid contractual interest with respect to problem and non-performing installment loans included in income before the related provision was €38 million, €56 million, €105 million, €69 million and €69 million for the years ended December 31, 2004 through 2000, respectively. Sanpaolo IMI does not separately track the amount of unpaid contractual interest accrued with respect to problem non-installment loans because interest is generally capitalized and becomes part of the principal amount of such loans on a more frequent (i.e., quarterly) basis than is the case for problem installment loans.

In accordance with Italian law, the Group is not entitled to, and therefore does not accrue, contractual interest on loans for which repayment has been accelerated. However, the Group is entitled to, and accrues, default interest on these loans as indicated below.

For installment loans, default interest (*interessi di mora*) is calculated at a penalty rate on all past due payments of principal and contractual interest. For non-installment loans, default interest is calculated at the contractual interest rate. The Group's policy is to treat all default interest whether on installment loans or non-installment loans as unrecoverable and, accordingly, provides for the full amount of such interest through a matching specific provision in the same income statement line item. Accrual of default interest, therefore, has no net effect on Sanpaolo IMI's income statement or balance sheet.

The table below shows default interest accrued and provided for and the related income statement and balance sheet amounts.

Income Statement

	For the year ended December 31,				
	2004	2003	2002	2001	2000
	(millions of €)				
Default interest	169	156	184	143	148
Provision for default interest	(169)	(156)	(184)	(143)	(148)
Net default interest					

Balance Sheet

	At December 31,				
	2004	2003	2002	2001	2000
	(millions of €)				
Default interest	936	904	754	594	868
Allowance for default interest	(936)	(904)	(754)	(594)	(868)
Net default interest					

Payments of default interest are accounted for on a cash basis. The amount of default interest collected by Sanpaolo IMI in 2004 was €41 million.

Neither contractual interest nor default interest is calculated on loans to borrowers that have been declared bankrupt or are in bankruptcy proceedings. At December 31, 2004, approximately 33.9% of Sanpaolo IMI Group's total non-performing loans were to such borrowers.

Non-performing loans. Generally, no interest is accrued on non-performing loans (i.e., all non-performing loans are non-accrual loans). In the circumstances in which such interest is accrued, it is fully provided for.

Unsecured Loans Exposed to Country Risk

These are loans to borrowers resident in countries that the Italian Banking Association has determined, under the Bank of Italy guidelines, present country risk. Exceptions are made for exposures valued taking into consideration the risk covered by underlying guarantees. The category of loans exposed to country risk does not include exposures which are classified under restructured loans or loans in course of restructuring, problem loans (*incagli*) and non-performing loans (*sofferenze*). Consequently, this category consists of performing loans that are classified solely because of the country risk they present.

Country risk is classified in seven categories by the Bank of Italy, focusing in particular on credit history, access to the international markets, ratios of debt to gross national product and to exports, debt service ratio and potential and actual extraordinary events for each country. At December 31, 2004, the Group's net exposure in all countries classified as presenting some risk by the Italian Banking Association was €44 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Our total loan exposure to borrowers in countries at risk was €211 million at December 31, 2004, a decrease of €288 million, or 57.8%, from €499 million at December 31, 2003. The decrease was primarily due to the reimbursement of loans in Russia, Argentina, Algeria and Brazil.

Allowance for Probable Loan Losses and Write-offs

Since we present net loans on the balance sheet, the allowance for probable loan losses is shown in a note to the balance sheet. Write-offs made directly to the carrying amount of loans are not separately noted, except for write-offs related to the current year. Guarantees and commitments are subject to valuation by the Group using the same criteria applicable to loans and, if necessary, a provision for probable losses is recorded in the income statement and the related allowance for probable losses is shown in the same note to the balance sheet. See: Note 9 to the Consolidated Financial Statements at page F-21.

For a detailed description of how we assess loans, guarantees and commitment for impairment, see: Note 7 to the Consolidated Financial Statements at page F-10.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table shows, for the years indicated, details of the changes in the Group's allowance for probable loan losses as it affected the balance sheet and statement of income.

	At and for the year ended December 31,				
	2004	2003	2002	2001	2000
	(millions of €)

Ending balances	5,196	4,930	4,636	3,271	3,666

(1) Provisions are the total of additional provisions for loan losses charged to the income statement during the period for those loans where a higher allowance for loan losses was recognized at the end of the period. Write-offs charged directly to income reflect adjustments to loans charged directly to the income statement during the period. The total provisions and write-offs to loans is included in the total amount recorded in line item 120 "Adjustments to loans and provisions for guarantees and commitments" of the audited income statement. A reconciliation of this line item is provided in Note 25 to the Consolidated Financial Statements on page F-142 below.

(2) Revaluations of loans are the total of reversals of provisions credited to the income statement during the period for those loans where a lower allowance for loan losses was recognized at the end of the period, and the reinstatement of loans previously written off. Collections represent receipts of amounts in excess of amounts previously expected to be collected. Such amounts are recorded in line item 130 "Writebacks of adjustments to loans and provisions for guarantees and commitments" of the audited income statement. A reconciliation of this line item is provided in Note 25 to the Consolidated Financial Statements on page F-142 below.

(3) Charge-offs represent write-offs of loans which are no longer expected to be collected, based on events occurring during the year.

(4) Primarily represents foreign exchange differences.

2004

The allowance for loan losses at December 31, 2004 was €5,196 million, a net increase of €266 million, or 5.4%, from €4,930 million at December 31, 2003. This represented a decrease in the rate of growth of the allowance compared to the prior period, both in absolute and percentage terms.

Total provisions and write-offs to loans in 2004 were €865 million, a decrease of €247 million, or 22.2%, compared to €1,112 million in 2003. This decrease was primarily attributable to the fact that provisions in 2003 had been adversely affected by provisions relating to loans to Parmalat and Cirio. Of the €865 million of total provisions and adjustments to loans in 2004, €399 million related to non-performing loans, €212 million to problem loans, €61 million to restructured and loans in course of restructuring, €3 million to unsecured loans exposed to country risk and €190 million to performing loans.

Total write-backs to loans in 2004 were €371 million, a decrease of €25 million, or 6.3%, compared to €396 million in 2003. The net decrease resulted from a €66 million, or 42.9%, decrease in revaluations of loans, which was partially offset by a €41 million, or 17%, increase in collections.

Other charges in 2004 were €228 million, a decrease of €194 million, or 46.0%, compared to €422 million in 2003. The net decrease resulted primarily from a €243 million, or 79.1%, decrease in acquisitions and disposals, primarily because there were no material changes in our scope of consolidation compared to 2003; partially offset by an increase of €126 million, or 48.5%, in write-offs.

The allowance for probable loan losses includes an allowance for general risks on our performing loan portfolio with particular reference to large exposures to certain specific industrial sectors, including the automotive sector. At December 31, 2004, the amount of this allowance was €1,174 million, representing 0.09% of our performing loans (excluding loans to SGA), a coverage ratio unchanged from year-end 2003.

At December 31, 2004, the allowance for loan losses on loans exposed to country risk remained stable at €18 million. The allowance for loan losses as a percentage of total loans exposed to country risk at December 31, 2004 increased by 1.6% compared to December 31, of 2003.

2003

The allowance for loan losses at December 31, 2003 was €4.9 billion, 6.3% higher than the €4.6 billion at the end of 2002, primarily due to an allowance for net adjustments to loans of €716 million. This increase was attributable to an increase in total provisions and adjustments to loans, as a result of adverse economic trends and industry conditions. The effect of the increase in net adjustments to loans was partially offset by a decrease of €307 million for acquisitions and disposals, which included €179 million (€150 million in non-performing loans and €29 million in performing loans) relating to the deconsolidation of Banque Sanpaolo and its subsidiaries Sanpaolo Bail and Sanpaolo Mur, as well as Finconsumo Banca and its subsidiary FC Factor. For a summary of the main changes in the scope of consolidation in 2003, see: Item 5. "A. Results of Operations for the Three Years Ended December 31, 2004 Changes in the Scope of Consolidation" on page 109 below. Loans to the Parmalat group were classified as non-performing and, after a provision of €273 million, resulted in a charge-off of approximately €33 million, (corresponding to 90% of the Group's gross exposure to Parmalat). The loans to the Cirio group (gross exposure of €25 million) were also classified as non-performing and were fully provisioned.

The total provisions and adjustments to loans of the Group grew to €1,112 million in 2003, an increase of €309 million, or 38.5%, compared to 2002, as a result of an increase in specific adjustments to the carrying amount of doubtful loans of €316 million, or 35.7%, as well as a decrease in accruals for probable incurred losses on performing loans of €7 million, or 3.0%. The ratio of gross doubtful loans to gross loans to customers remained stable at 5%, the same level shown in 2002, confirming the substantial stability of the quality of the Group's credit portfolio. A general reserve covers the risk inherent in the performing loan portfolio. At year-end of 2003, this reserve was equal to €1,102 million, corresponding to 0.09% of the performing loan portfolio (excluding loans to SGA), in line with 2002. This reserve is intended to cover the risk of deterioration in creditworthiness inherent in the Group's

loan portfolio, with particular reference to larger exposures to certain specific industrial sectors, including the automotive sector.

Of the €1,112 million of total provisions and adjustments to loans in 2003, €498 million related to non-performing loans, €331 million to problem loans, €12 million to restructured and loans in course of restructuring and €228 million to performing loans.

Total write-backs of adjustments to loans in 2003 were €396 million, an increase of €94 million, or 31%, compared to 2002. The increase is primarily the result of an increase in collections of loans of 17.5%, combined with an increase of €58 million, in the amount of loans revalued in 2003, as compared to 2002. Write-backs of adjustments refer to downward revisions in the expected impairment in loan value which consequently result in an adjustment to the overall allowance for loan losses.

At December 31, 2003, the allowance for loan losses on loans exposed to country risk decreased to €18 million from €39 million in 2002, a decrease of 53.85%. The decrease is principally due to the decrease in the gross value of loans exposed to country risk to €70 million from €149 million in 2002, a 53% decrease. The allowance for loan losses as a percentage of total gross loans exposed to country risk at the end of 2003 increased less than 1% compared to the end of 2002. The total gross loan exposure towards banking and non-banking institutions resident in countries at risk decreased from €903 million in 2002 to €499 million in 2003. The decrease was principally due to the reimbursement of loans in Russia, Egypt, Morocco, Romania, Iran and Argentina.

2002

The allowance for loan losses at December 31, 2002 was €4.6 billion, 39.4% higher than the €3.3 billion at the end of 2001. The increase in the allowance for loan losses was due primarily to the consolidation of €970 million of allowance for loan losses from the former Cardine Group, which was acquired by Sanpaolo IMI in 2002. Such amount is included entirely in "Other changes" in the line item "Acquisitions and disposals" in the table above. Of the €970 million, €611 million relates to non-performing loans, €161 million to problem loans, €25 million to restructured loans, €1 million to unsecured loans exposed to country risk and €172 million to performing loans. The overall increase in the allowance balance can also be attributed to the increase in total provision and adjustments to loans, as a result of negative national and local economic trends and industry conditions.

The total provisions and adjustments to loans of the Group grew to €803 million in 2002, an increase of €181 million, or 29.1%, compared to 2001, as a result of an increase in specific adjustments to the carrying amount of doubtful loans of €157 million (of which €51 million relates to additional provisions for Rawhide, an affiliate of Enron, Marconi Plc and the Cirio group), or 38.2%, as well as an increase in accruals for probable incurred losses on performing loans of €24 million, or 11.4%. The relatively greater increase in specific adjustments with respect to accruals for performing loans reflects a further weakening of an already lackluster economy, which resulted in continued deterioration in credit quality of outstanding loans. The additional accruals for losses on performing loans resulted in an increase in the non-specific allowance to 0.9% of the net performing loan portfolio for a total amount at year-end 2002 of €1,075 million, of which €1,064 million relates to non-bank institutions, compared to an amount of €783 million at the end of 2001.

Of the €803 million of total provisions and adjustments to loans in 2002, €330 million related to non-performing loans, €220 million to problem loans, €11 million to restructured and loans in course of restructuring, €7 million to unsecured loans exposed to country risk and €235 million to performing loans.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Total write-backs of adjustments to loans in 2002 were €302 million, an increase of €26 million, or 9%, compared to 2001. The increase is primarily the result of an increase in collections of loans of 45%, combined with a decrease in the amount of loans revalued in 2002 of €38 million as compared to 2001. Write-backs of adjustments refer to downward revisions in the expected impairment in loan value which consequently result in an adjustment to the overall allowance for loan losses. The decrease in loan revaluations of 28% is attributable to the same economic reasons outlined above for the provisions and adjustments to loans.

At December 31, 2002, the allowance for loan losses on loans exposed to country risk increased to €39 million from €31 million in 2001, an increase of 25.8%, principally related to the increase in the gross value of loans exposed to country risk to €149 million from €120 million in 2001, an increase of 24.2%. The allowance for loan losses as a percentage of total gross loans exposed to country risk at year-end 2002 increased less than 1% compared to year-end 2001. This minor change reflects the effect of the redistribution of the portfolio of loans among countries with different risk coverage ratios. Loans in countries in Latin America (Brazil, Argentina and Venezuela) decreased while new loans in other countries (primarily Romania, Egypt and Morocco) increased.

2001

The allowance for loan losses at December 31, 2001 was €3.3 billion, 10.8% lower than the €3.7 billion at the end of 2000. The decrease was due principally to the sale by Sanpaolo IMI of 18,577 non-performing short-term positions. Such loans had a gross value of €640 million and a related allowance for losses of €529 million. The overall decrease was due also to the deconsolidation of Sanpaolo Immobiliare S.p.A. (sold on July 2, 2001) for €175 million. Such decreases are recorded in the caption Acquisitions and disposals in the table above.

The total provisions and adjustments to loans amounted to €622 million in 2001, a decrease of €12 million, or 1.9%, compared to 2000. The decrease is primarily the result of two different contributing factors: the decline in the accrual of specific provisions and adjustments of €69 million, or 14.4%, due partly to the sale of non-performing loans; and the increase in adjustments with respect to the non-specific allowance to cover the probable risk of loss inherent in loans classified as performing. As a result of the deterioration in the economic environment, adjustments totaling €211 million were made in 2001 compared to €154 million in 2000, or an increase of 37%. Such adjustments covered 0.8% of net performing loans. The Group's non-specific allowance for coverage of such risks totaled €783 million at December 31, 2001, of which €774 million related to non-bank institutions, compared to a non-specific allowance of €629 million at the end of 2000.

Of the €622 million of total provisions and adjustments to loans in 2001, €218 million related to non-performing loans this amount includes specific adjustments made to the position in Enron for €52 million, which raised the coverage of the non-guaranteed portion of the loans to Enron to €60 million €159 million to problem loans, €21 million to restructured and loans in course of restructuring, €13 million to unsecured loans exposed to country risk and €211 million to performing loans.

Total writebacks of adjustments to loans in 2001 were €276 million, a decrease of €139 million, or 33.5%, compared to 2000. The decrease was due primarily to significantly lower collections of loans in 2001 (€142 million) compared to 2000 (€307 million) as a result of the above-mentioned sale of loans.

The total allowance for loan losses included €192 million related to the impairment due to the discounting of classified loans, a decrease of €117 million, or 37.9%, compared to 2000. In particular, write-downs for the same kind of impairment totaled €164 million (compared to €235 million in 2000) on non-performing loans, €21 million (compared to €64 million in 2000) on problem loans and €7 million (compared to €10 million in 2000) on restructured and loans in course of restructuring.

At December 31, 2001, the allowance for loan losses on loans exposed to country risk decreased by 8.8% from €34 million at year-end 2000, to €31 million, as a result of a 37.8% decrease in the amount of gross positions in loans exposed to country risk from €193 million at year-end 2000 to €120 million at year-end 2001. The allowance for loan losses as a percentage of total gross loans exposed to country risk at year-end 2001 of 25.8% increased considerably compared to 17.6% at year-end 2000, primarily due to the economic crisis in Latin America where the gross positions increased (to 72.5% of total loans exposed to country risk, compared to 63.2% at December 31, 2000), resulting in a risk coverage ratio higher than in the previous year.

2000

The allowance for loan losses at December 31, 2000 was €3.7 billion, 5.7% higher than the €3.5 billion at the end of 1999. The increase in the allowance for loan losses was due primarily to the consolidation of €867 million of allowance from the former Banco di Napoli Group, of which €605 million for non-performing loans, €99 million for problem loans, €5 million for restructured loans, €2 million for unsecured loans to risk countries and €156 million for performing loans.

The total provisions and adjustments to loans decreased to €634 million in 2000, a decrease of €30 million, or 4.5%, compared to 1999. The Group's non-specific allowance for coverage of such risks amounted to €629 million, of which €622 million related to non-bank institutions, compared to a non-specific allowance of €303 million at the end of 1999.

Of the €634 million of total provisions and adjustments to loans in 2000, €371 million related to non-performing loans, €87 million to problem loans, €6 million to restructured and loans in course of restructuring, €16 to unsecured loans exposed to country risk and €154 million to performing loans.

Total writebacks of adjustments to loans in 2000 were €415 million, an increase of €54 million, or 15.0%, compared to 1999. The increase was due primarily to a significant increase in collections of loans previously written down to €307 million, 37.7% higher than in 1999.

The total allowance for loan losses included €309 million related to the impairment due to the discounting of classified loans, a decrease of €48 million, or 13.4%, compared to 1999. In particular, write-downs for the same kind of impairment totaled €235 million (compared to: €262 million in 1999) on non-performing loans, €64 million (compared to €74 million in 1999) on problem loans and €10 million (compared to €21 million in 1999) on restructured and loans in course of restructuring.

At December 31, 2000, the allowance for loan losses on loans exposed to country risk decreased by 81.4% from €183 million at year-end 1999 to €34 million, as a result of a significant decrease in related gross positions, which decreased 42.56% from €336 million at year-end 1999 to €193 million at year-end 2000. At December 31, 2000, the allowance for loan losses for country risk was approximately 17.6% of gross loans, a significant reduction from 54.5% at year-end 1999. The decrease was primarily the result of the almost total charge-off of gross loans in Russia which, at December 31, 1999, totaled €182 million, or 54.2% of total gross loans, €155 million of which was included in the allowance (such amount being equal to 84.6% of the total allowance).

Allowance for Probable Loan Losses by Category of Borrower

The following tables show, at the dates indicated, the distribution of the Group's allowance for probable loan losses by category of borrower using the Bank of Italy's borrower categories.

Allowance for loan losses	At December 31, 2004		
	Allowance	% of allowance(1)	% of total loans(2)

Total loans(1)	_____				

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

At December 31,

	2004	2003	2002	2001	2000
	(millions of €, except for percentages)				
Total loans	150,880	151,807	153,337	121,898	121,491
Net adjustments to loans as a percentage of total loans	0.33%	0.47%	0.33%	0.28%	0.18%

(1) Total loans are loans net of any write-offs but before any deduction for the allowance for probable loan losses (including, for performing loans, any allowance for general risks). The amount of total

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

loans does not appear on the balance sheet, but is set forth in Note 9 to the Consolidated Financial Statements under "Total loans to customers" and "Total loans to banks" on page F-21 below.

Securities Portfolio

At December 31, 2004, securities held by the Group were carried on consolidated balance sheet at a book value of €29,290 million, representing 13.87% of our total assets. The aggregate book value and the aggregate market value of securities held by the Group issued by the Italian government and Italian government agencies were €11,985 million and €12,177 million, respectively, at December 31, 2004, and €12,519 million and €9,019 million, respectively, at December 31, 2003. The Group does not otherwise hold securities issued or guaranteed by any one entity or obligor, other than the Italian government, whose carrying value represents more than 10% of our consolidated shareholders' equity determined under Italian GAAP.

Book and Fair Value

The following table shows the book value and the fair value of the Group's securities by type and domicile of issuer at the dates indicated. For a discussion of how the Group values its securities, see: Note 10 to the Consolidated Financial Statements at page F-34 below.

	Year ended December 31,					
	2004		2003		2002	
	Book Value	Fair Value	Book Value	Fair Value	Book Value	Fair Value

(1) Represents primarily (i) short positions on securities as part of Banca IMI's securities dealing activities and (ii) public funds we administer for the Italian government and regional public agencies.

Customer Deposits, Securities and Interbank Borrowings

The principal components of our funding are customer deposits (current accounts, or demand deposits and savings accounts); repurchase agreements; certificates of deposit ("CDs"); bonds; subordinated debt; and interbank funding. Domestic current and savings accounts are primarily interest-bearing accounts. CDs and bonds are issued both by Sanpaolo IMI, its international branches, Sanpaolo IMI Bank (International) and Banca IMI Group, and have maturities ranging from three months to 10 years. The Group's retail customers are the main source of our funding.

At December 31, 2004, funding in euro represented approximately 89.83% of our total funding. Our market share of the Italian market for direct customer deposits, by which we mean deposits and other funding from non-credit institutions and funding from securities except subordinated liabilities, was 9.9% at December 31, 2004 (source: Bank of Italy).

Deposits and Other Funding from Non-credit Institutions

Our deposits and other funding from non-credit institutions totaled €89.3 billion at December 31, 2004, an increase of €8.5 billion, or 10.5%, from €80.8 billion at December 31, 2003. This was primarily due to an increase of €4.9 billion, or 9.1%, in demand deposits to €58.9 billion at year-end 2004 from €54.0 billion at year-end 2003, reflecting the reallocation of customer funds towards greater liquidity. The increase was also affected by an increase of €2.0 billion, or 83.3%, in "other" funding to €4.4 billion at year-end 2004 from €2.4 billion at year-end 2003, primarily attributable to an increase in funding by Banca IMI to finance its securities transactions; and an increase of €1.6 billion, or 15.8%, in funding in the form of repurchase agreements with customers to €11.7 billion at year-end 2004 from €10.1 billion at year-end 2003, again reflecting customers' preferences for more liquid, shorter-term instruments. Time deposits decreased slightly by €0.2 billion, or 1.4%, compared to year-end 2003.

Securities and Subordinated Liabilities

At December 31, 2004, our funding from securities and subordinated liabilities was €52.9 billion, a decrease of €4.4 billion, or 7.7%, from €57.3 billion at December 31, 2003. This was primarily due to a decrease of €4.2 billion, or 59.2%, in CDs, reflecting customers' decreased interest in CDs, due primarily to customers' preferences for more liquidity. There were also slight decreases in commercial paper and bonds of €0.4 billion, or 10.5%, and €0.4 billion, or 1%, respectively, partially offset by an increase of €0.6 billion, or 9.4%, in subordinated liabilities.

Short-term Borrowings and Other Funding from Credit Institutions

At December 31, 2004, our funding from banks totaled €28.2 billion, a decrease of €0.3 billion or 1.1%, compared to €28.5 billion at December 31, 2003. The net decrease resulted from a decrease of €0.9 billion, or 22.5%, in funding from central banks, partially offset by an increase of €0.5 billion, or 2.0%, in funding from other banks. The latter increase was primarily due to an increase in funding in the form of repurchase transactions, which in turn was primarily attributable to Banca IMI's funding of its securities transactions.

Overall, the effect of the net increase in funding from deposits and other borrowings from non-credit institutions and from securities and subordinated liabilities led us to reduce our funding from credit institutions. This also allowed us to increase our interbank deposits and loans to credit institutions, see: " Loan Portfolio Interest-earning Deposits and Loans to Credit Institutions" on page 26 above, and as a result there was a decrease at December 31, 2004 in the amount by which our funding from banks exceeded our lending to banks compared to December 31, 2003.

Domestic and International Deposits by Type of Deposit

The following table shows, for the periods presented, the Group's domestic and international deposits, based on location of the branch taking the deposit, by type of deposit:

	For the year ended December 31,					
	2004		2003		2002	
	Average balance	Average rate	Average balance	Average rate	Average balance	Average rate
	(millions of €, except percentages)					
Domestic:						
Non-interest-bearing demand deposits	163		145		560	
Interest-bearing demand deposits	54,683	0.82	55,998	0.96	45,639	2.43

Other foreign savings deposits and certificates of deposits	9,952	2.14	13,955	2.24	14,565	3.33

Funding by Remaining Maturity

As a financial institution, Sanpaolo IMI's sources of funding and certain off-balance-sheet transactions are the principal components of its obligations and future commitments to make future payments under contracts.

The majority of the funding is short-term: demand deposits make up approximately 41% of our funding, demand and short-term funding (up to three months' maturity) together make up approximately 63% of our funding, while the balance is composed of fixed- and floating-rate funding, including subordinated debt.

The following table sets forth, at the date indicated, the principal components of our sources of funding and off-balance-sheet transactions by remaining maturity.

Remaining maturity at December 31, 2004

	On demand	Up to 3 months	Between 3 and 12 months	Between 1 and 5 years		Beyond 5 years		Unspecified	Total
				Fixed rate	Floating rate	Fixed rate	Floating rate		
				(millions of €)					
Sources of funding

Subordinated Debt

In the course of 2004, Sanpaolo IMI made substantial investments to develop its business. To ensure the maintenance of solvency ratios appropriate to the business, Sanpaolo IMI issued subordinated debt in a total amount of €1,066 million.

The following table shows, at the dates indicated, our outstanding subordinated debt by currency and maturity.

Loans	Book value as of 12/31/04	Original currency	Interest rate	Issue date	Maturity date	Book value as of 12/31/03

ITEM 4. INFORMATION ON SANPAOLO IMI

A. History and Developments of Sanpaolo IMI

Incorporation, Length of Life and Domicile

Sanpaolo IMI is incorporated as a limited liability company (*Società per Azioni* or S.p.A.) under the laws of Italy. Sanpaolo IMI was established on November 1, 1998 by the merger of Istituto Bancario San Paolo di Torino S.p.A. ("Sanpaolo") and Istituto Mobiliare Italiano S.p.A. ("IMI"). Sanpaolo IMI is the legal successor of both Sanpaolo and IMI. The life of Sanpaolo IMI, according to its charter, will last until December 31, 2050.

Sanpaolo IMI is registered with the company registrar under number 06210280019 and with the Bank of Italy as a bank and, together with its subsidiaries, as a banking group under numbers 1025.6 and 5084.9.0, respectively. Sanpaolo IMI is the reporting bank ("*capogruppo*") of the Sanpaolo IMI Group for regulatory purposes and, as *capogruppo*, is responsible for monitoring the Group's activities and maintaining the relationship with the Bank of Italy.

Sanpaolo IMI's registered office is located at Piazza San Carlo 156, Turin and its secondary offices are at Viale dell'Arte 25, Rome, and Via Farini 22, Bologna. Sanpaolo IMI can be contacted by telephone at +39-0115551. Sanpaolo IMI's website is www.grupposanpaoloimi.com.

History and Development

IMI was established as a public law entity (*Ente di Diritto Pubblico*) in 1931 and Sanpaolo became a public law credit institution (*Istituto di Credito di Diritto Pubblico*) in 1932. In the 1990s, certain reforms were introduced and the Bank of Italy relaxed certain restrictions on the opening of new branches and Sanpaolo was thus encouraged to continue to expand beyond Piedmont. The Italian government sought to encourage greater private sector involvement in banking through the conversion of charitable foundations with banking businesses (such as Sanpaolo) into separate charities and businesses and through the sale of stakes in state-controlled banks (such as IMI). These developments were encouraged through a series of measures, including tax incentives, to strengthen the capital structure of the banking sector (Law No. 218 of July 30, 1990, the "Amato Law") and through direct sales by the Italian government of state-controlled holding companies.

Pursuant to the Amato Law, Sanpaolo was established as a *Società per Azioni* as of December 31, 1991, under the name Istituto Bancario San Paolo di Torino Società per Azioni. In 1992, approximately 21% of Sanpaolo's share capital was floated in Italy and the shares traded on the Stock Exchange Automated Quotation International System of the London Stock Exchange Limited ("SEAQ International").

The charitable foundation, Compagnia di San Paolo, indirectly remained majority shareholder of Sanpaolo until 1997, when six long-term shareholders and four medium-term shareholders purchased 22% of Sanpaolo's share capital, while a further 31% of Sanpaolo's share capital was sold in an Italian public offering and a global institutional offering. Following the Bank of Italy's approval, Sanpaolo became *capogruppo*.

IMI became a *Società per Azioni* in 1991. There was no public market for IMI's shares prior to 1994. In that year, as part of the Italian government's direct privatization campaign, the Ministry of Treasury and several other IMI shareholders took part in a global offering (the "Global Offering") of more than one-third of IMI's share capital. In connection with the Global Offering, IMI's shares were listed on the Italian Stock Exchange and its American Depositary Shares (each ADS representing three shares) were listed on the New York Stock Exchange. IMI shares were also listed on SEAQ International. In 1995, IMI shares held by the Ministry of Treasury were privately placed with Italian and European financial institutions and private industrial companies. In July 1996, IMI lead-managed

the third offering of its own shares by the Ministry of Treasury to institutional investors in Italy, Europe and the United States.

The Merged Group

During the second half of the 1990s, the banking sector in Italy and worldwide went through a phase of rationalization and consolidation. In Europe, this consolidation was also influenced by the introduction of the euro. In light of these developments, new Italian banking groups were created or consolidated. The Italian government and the Bank of Italy encouraged such developments. The managements of both Sanpaolo and IMI determined that, to compete effectively in the changing Italian and European banking environments, a larger size and an appropriate merger partner would be a positive development and agreed to merge.

The merger between Sanpaolo and IMI was completed as of November 1, 1998. For accounting and tax purposes, the merger became effective as of January 1, 1998. Sanpaolo IMI's Shares and ADSs (each ADS representing two Shares) are listed on, respectively, the *Mercato Telematico Azionario* in Italy and the New York Stock Exchange. The ADS depository is JPMorgan Chase Bank.

In 1999, in the context of the increasing consolidation of banking and financial services in Italy, Sanpaolo IMI reached an agreement with Assicurazioni Generali S.p.A. ("Generali"), an insurance company, whereby Sanpaolo IMI would acquire control of the Banco di Napoli S.p.A. ("Banco di Napoli") group, while Generali would take over the insurance business of Istituto Nazionale delle Assicurazioni S.p.A. ("INA").

During 2000, Sanpaolo IMI acquired control of the Banco di Napoli group. In 2002, Banco di Napoli was merged into Sanpaolo IMI. The merger with Banco di Napoli became effective, for corporate law purposes, as of December 31, 2002 and, for accounting purposes, as of January 1, 2002. In 2003 the Sanpaolo and the Banco di Napoli networks were integrated and Sanpaolo Banco di Napoli S.p.A. was incorporated.

In January 2001, Sanpaolo IMI acquired a stake of approximately 11% in Cardine S.p.A. ("Cardine"), the savings bank resulting from the merger of the Casse Venete and CAER S.p.A., both operating in the north east of Italy. In 2002, Cardine was merged into Sanpaolo IMI. The merger became effective, for corporate law purposes, as of June 1, 2002 and, for accounting purposes, as of January 1, 2002.

In connection with the Cardine merger, the Compagnia di San Paolo and the two largest shareholders of Cardine, the Fondazione Cassa di Risparmio di Padova e Rovigo and the Fondazione Cassa di Risparmio in Bologna (collectively, the "Foundations") agreed to the voluntary conversion (the "Conversion") of Shares held by the Foundations into preferred shares of a special class (the "*Azioni Privilegiate*").

The Conversion was made pursuant to Law 461 of December 23, 1998, enacted by legislative decree 153 of May 17, 1999 (collectively, the "Ciampi Law"), which allows the ordinary shares of banking institutions, such as Sanpaolo IMI, held by charitable banking foundations, such as the Foundations, to be converted into preferred shares of a special class. The *Azioni Privilegiate* have priority over the Shares in respect of dividends and are currently entitled to vote only at extraordinary shareholders' meetings. In 2012, the *Azioni Privilegiate* held by the Foundations are scheduled to be converted back into Shares with full voting rights. The *Azioni Privilegiate* will be converted into Shares, by operation of law, if they are transferred to a different beneficial owner. If such a transfer occurred, the *Azioni Privilegiate* would be converted into Shares at a ratio of one *Azione Privilegiata* to one Share.

B. Significant Developments During 2004

Redesign of the Organizational Structure and Organization by Business Sectors

Following a redesign of the organizational structure, since May 1, 2004, the Sanpaolo IMI Group has adopted a new model whereby the previous four Business Sectors (Domestic Banking Networks, Personal Financial Services, Wealth Management and Financial Markets and International Activities) were replaced by the following Business Sectors:

Commercial Banking,

Asset Management,

Investment Banking,

Personal Financial Services,

Insurance Activities, which are organized under a single insurance holding company, Assicurazioni Internazionali di Previdenza S.p.A. ("A.I.P."),

Public Authorities and Entities, and

Central Functions.

The new organizational model, focused on Commercial Banking, has simplified corporate governance and strengthened the specialization in customer segments of the distribution networks, extending the commercial coordination for markets, which implements and develops the strategies for the retail and the corporate market, to all the bank networks.

For a discussion of the reorganization and composition of the Business Sectors, see: " Business Sectors" on page 83 below. The following discussion of significant events in 2004 is organized by the Business Sectors adopted since May 1, 2004.

Commercial Banking Business Sector

Plan to Develop and Rationalize the Distribution Networks

Having completed the integration of the branches of the former Banco di Napoli, the integration process is currently underway, and at a very advanced stage, for the banks in the Triveneto (comprising the regions of Veneto, Trentino Alto Adige and Friuli Venezia Giulia) and Emilia as well as for Banca Popolare dell'Adriatico.

The integration process involves the gradual adoption of the Sanpaolo network organizational and commercial model (which is divided into a certain number of territorial areas, which supervise their respective territory and coordinate the branches in their territory according to market segment specialization) and the migration of the IT systems to those of the Parent Bank. The migration to the Parent Bank IT system began in March 2004 with Cassa di Risparmio di Venezia and was completed in October 2004 with Banca Popolare dell'Adriatico.

The development and rationalization process also envisages that, to take advantage of the potential generated locally by historical brands, branches within the reference territory of a specific historical brand such as Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Cassa di Risparmio di Venezia and Friulcassa (commonly referred to as the "North East Networks") should belong to the bank holding that brand. In this respect, the plan to rationalize the distribution network, approved by the Board of Directors on July 27, 2004, was executed through the transfer to the North East Networks of the 113 Sanpaolo operating points located within the Triveneto and Emilia areas and the transfer to the Parent Bank of the 30 Cassa di Risparmio di Padova e Rovigo and Cassa di

Risparmio in Bologna operating points located outside of their respective territories. The process began in November 2004 and was completed in January 2005.

Other Initiatives in Italy

On January 20, 2004, Sanpaolo IMI exercised a put option for the 30% stake of Finconsumo Banca it still held. The exercise implemented the agreements entered into with Santander Central Hispano S.A. ("SCH") for the sale to SCH of the entire stake held by the Group in Finconsumo Banca. The transaction, which is part of the rationalization of activities in consumer credit in which the Group operates through Finemiro Banca, was completed at a price of €80 million, producing a gross capital gain of €55 million.

Confirming the strategic importance of the small- and medium-sized company sector ("SMEs"), at the beginning of July 2004 another initiative, aimed at favoring activities in that sector, began with the setting aside of €250 million for medium-term loans for applied research projects. Depending on the rating of the borrowers, the Group finances from 75% to 100% of the cost of the research project. In addition to financial support, an advisory service for technological and industrial projects is also offered, made possible by the Group's know-how gained over the years through the management of research and development funds on behalf of the Italian and regional governments and agencies.

In the context of the Turin 2006 Olympic Winter Games, Sanpaolo IMI has undertaken numerous commercial initiatives, such as the distribution of tickets through its network, distribution of promotional Olympic gadgets to clients and new debit cards, aimed at taking advantage of the Group's role as the leading sponsor (the "Principal Sponsor") of the Turin 2006 Olympic Winter Games. These initiatives are aimed at strengthening customer relationships, with improved customer retention and cross-selling, and increasing the customer base.

Cassa di Risparmio di Firenze

The cooperation among Sanpaolo IMI, Cassa di Risparmio di Firenze and Cassa dei Risparmi di Forlì resulted, at the end of March 2004, in a plan to favor the development of activities relating to SMEs. Sanpaolo IMI, Cassa di Risparmio di Firenze and Cassa de Risparmio di Forlì approved the setting aside of €500 million for loans ranging from €50,000 to €2 million with a standard duration of 5 years to SMEs in Northern Italy, Tuscany and Emilia Romagna. The loans benefit from the cooperation of the leading loan consortia in the regions, with the loan consortia guaranteeing at least 50% of the loans provided to SMEs. This plan is aimed at creating a uniform product throughout Northern Italy, Emilia Romagna and Tuscany, which will offer a prompt and streamlined operating response to the financial needs of SMEs.

An agreement entered into in November 1999 by, among others, Ente Cassa di Risparmio di Firenze, the major shareholder of Cassa di Risparmio di Firenze, and Sanpaolo IMI, concerning the latter's equity interest in Cassa di Risparmio di Firenze, expired on May 1, 2005. Pursuant to the agreement, upon its expiration and in the absence of its renewal by Ente Cassa di Risparmio di Firenze, Sanpaolo IMI may exercise, in the 60 days following the expiration of the agreement, the right to purchase ordinary shares of Cassa di Risparmio di Firenze from Ente Cassa di Risparmio di Firenze corresponding to 10.78% of the share capital of Cassa di Risparmio di Firenze at a price of, under normal circumstances, 1.5 times the average trading price of Cassa di Risparmio di Firenze ordinary shares in the three months preceding the exercise of the Group's right to purchase. The price corresponds to a premium of approximately €125 million for the shares. If the purchase occurs, Sanpaolo IMI will increase its stake in Cassa di Risparmio di Firenze from 18.7% to 29.5% for an expected disbursement, at the current Cassa di Risparmio di Firenze average share price, of approximately €375 million.

Sanpaolo IMI believes it has the right to exercise its right to purchase and, to this effect, has notified Ente Cassa di Risparmio di Firenze of its intention to exercise its right. The purchase resulting from such exercise is subject to Bank of Italy's authorization. Ente Cassa di Risparmio di Firenze does not share Sanpaolo IMI's position, claiming that the non-renewal of the agreement could not be attributed to the Ente Cassa di Risparmio di Firenze and contesting the validity of the purchase right. Sanpaolo IMI has confirmed to Ente Cassa di Risparmio di Firenze and the other signatory of the agreement its availability to discuss, without prejudice to the aforementioned purchase right, the terms of a new agreement. On June 27, 2005, Sanpaolo IMI and Ente Cassa di Risparmio di Firenze agreed to extend the expiration of Sanpaolo IMI's purchase right through September 30, 2005.

Initiatives in Foreign Markets

On April 1, 2004, Inter-Europa Ertekesitesi ("IEE") commenced operations in Hungary. IEE is wholly owned by Inter-Europa Bank, the Hungarian subsidiary of the Group, which is 85.9%-owned by Sanpaolo IMI Internazionale. The activities of IEE consist of the marketing and placement of financial products on commission, operating in particular as an agent of Inter-Europa Bank for the exclusive placement of traditional bank products with small private entrepreneurs that are not yet customers of Inter-Europa Bank. Furthermore, it will, on commission, place third-party financial and insurance products, providing significant opportunities for cross-selling.

As part of the initiatives to strengthen the Group's presence in the Mediterranean basin, two commercial cooperation agreements were entered into with leading banks in Morocco and Tunisia. They are aimed at encouraging the internationalization of Italian companies and at promoting the development of import-export flows between Italy and its commercial partners, offering a complete range of products and services to retail and corporate customers operating in Italy and in the two north African countries. The first agreement was entered into on April 14, 2004, for commercial cooperation with Banque Marocaine du Commerce Extérieur, a leading bank in Morocco with 219 branches. The second agreement was entered into on September 14, 2004, with Banque Internationale Arabe de Tunisie, a leading private Tunisian bank with a network of approximately 100 branches and in which the Group holds a 5.6% stake through Sanpaolo IMI Internazionale.

Other foreign rationalization initiatives included:

The merger by incorporation of IMI Bank (Luxembourg) into Sanpaolo Bank (Luxembourg), which was completed on September 1, 2004. The integration of the two companies and the rationalization of the structures, with consequent cost synergies, was considered useful for the convergence of the Group's supply systems and services.

On October 25, 2004, Sanpaolo Bank (Austria) was sold for €17.2 million to the Austrian insurance company Grazer Wechselfertiger. The transaction was intended to optimize the Group's presence on the Austrian market, considering the existence of an Austrian branch of the Parent Bank.

Asset Management Business Sector

In 2004, in connection with the Insurance Reorganization, the Asset Management Business Sector underwent a major reorganization.

On November 19, 2004, the transfer of the equity interest held by Sanpaolo IMI Wealth Management (the former holding company of the Group's wealth management activities) in Sanpaolo Vita to A.I.P., the newly created insurance holding company of the Group (see: " Insurance Business Sector" on page 79 below) was completed. Pursuant to the transfer, A.I.P. acquired the entire share capital of Sanpaolo Vita. The transfer was effective as of November 30, 2004 for corporate law purposes and as of January 1, 2004 for accounting purposes.

On November 29, 2004, Sanpaolo IMI Wealth Management spun off its asset management activities to Sanpaolo IMI Asset Management and distributed its remaining activities to the Parent Bank. As of December 29, 2004, the date of completion and legal effectiveness of the spin-off and distribution, Sanpaolo IMI Wealth Management ceased to exist. Pursuant to the reorganization, the activities of the Asset Management Business Sector are held directly by the Parent Bank. The reorganization also rationalized the investment structure and the number of employees.

On February 16, 2004, the Group acquired a 50% equity interest in Allfunds Bank for €21 million. Allfunds Bank, formerly wholly owned, through Banco Banif, by SCH, is now jointly controlled by Sanpaolo IMI and SCH and owns a platform offering access to third-party mutual funds available to institutional customers. The purchase falls within the context of the cooperation between Sanpaolo IMI and SCH for the development of a pan-European project in the wholesale distribution of third-party mutual funds through the formation of a joint venture. Sanpaolo IMI and SCH intend to consolidate their position in the sector and identify potential strategic partners in the principal European markets.

Investment Banking Business Sector

In 2004, the rationalization initiatives of the Investment Banking Business Sector included the merger by incorporation of the Group's subsidiaries IMI Bank (Luxembourg) into Sanpaolo Bank (Luxembourg) and the spin-off from Banca IMI to Sanpaolo IMI Asset Management of the entire share capital of Obiettivo SGR, the company of the Group operating in the hedge fund market. Obiettivo SGR was later merged into the subsidiary Sanpaolo IMI Alternative Investments.

The rationalization initiatives have contributed to allowing Banca IMI to focus on its core business (investment banking) and to develop economies of scale in Luxembourg and scope economies in the management of hedge funds.

The presence of the Group in the area of private equity was strengthened by the development of two new multi-regional closed funds dedicated to investments in Italian SMEs.

Fiat and Italenergia

As of December 31, 2004 the Group held a 1.25% stake in the Fiat S.p.A. group ("Fiat"). Fiat is also a major client of the Group.

Fiat is one of Italy's largest industrial groups. Fiat's core business, the production of cars, is carried out by Fiat Auto S.p.A. ("Fiat Auto"). In the first quarter of 2005, the Fiat group's share of the European car market, in terms of sales, was 7.1%, fourth among European car producers (source: First quarter 2005 data of ACEA European data base). As of December 31, 2004 and as of March 31, 2005, the net consolidated debt of the Fiat group was €25.4 billion and €25.9 billion, respectively.

Fiat's credit rating

Fiat is controlled by IFIL, which is controlled by a shareholder of Sanpaolo IMI. See: Item 7. "The Major Shareholders" on page 199 below. Sanpaolo IMI and IFIL have a common director/executive officer. Mr. Marrone is a Director of Sanpaolo IMI and is the general manager of IFI, an affiliate of IFIL. See: Item 6. "A. Directors and Senior Management" on page 176 below.

In June 1999, IMI Investimenti entered into a non-binding consultive agreement with IFIL, Generali and Deutsche Bank relating to a 0.83% stake in Fiat held by IMI Investimenti. In 2003, the value of the stake of IMI Investimenti in Fiat was written down by €12.2 million. In July 2003, IMI Investimenti subscribed to its attributable pro rata share (€27 million) of a €1,836 million capital increase of Fiat through a rights offering. The capital increase was part of Fiat's plan presented in June 2003.

The Sanpaolo IMI Group, like other major Italian banking groups, has a material credit exposure to the Fiat group. Fiat's credit exposure to the Group is classified as performing or *in bonis*. At December 31, 2004, the Group's exposure to Fiat was no longer a "significant risk exposure". See: Item 3, "Loan Portfolio Loans by Category of Borrower" on page 33 above and Item 4, "C. Business Overview Italian Banking Regulation and Corporate Governance Principals Lending Limits" on page 98 below. Below is a discussion of the main developments concerning the relationship and the agreements between the Group and Fiat.

The Fiat Framework Agreement

On May 27, 2002, Fiat, on the one hand, and Sanpaolo IMI, Capitalia S.p.A. ("Capitalia") and Banca Intesa S.p.A. ("Intesa") on the other hand, entered into a framework agreement (the "Fiat Framework Agreement") which supports Fiat's strategic and industrial plan. Unicredito Italiano S.p.A. ("Unicredito") and, together with Sanpaolo IMI, Capitalia and Intesa, the "Participating Banks") also became a party to the Fiat Framework Agreement.

The Fiat Framework Agreement contemplated:

An undertaking by Fiat to reach certain levels of net and gross indebtedness.

An undertaking by the Participating Banks to grant the Fiat Convertible Facility (as described below) and to acquire from Fiat a 51% equity interest in the European retail consumer loans operations of FIDIS S.p.A. ("FIDIS"), the financial services and consumer credit holding company of the Fiat group.

An undertaking by Fiat to deconsolidate the debt of the Italenergia group (as described below) from the Fiat group.

In 2004, all the targets contemplated by the Fiat Framework Agreement were achieved except for Fiat's net indebtedness level which, at the end of 2004, exceeded the maximum level contemplated by the Fiat Framework Agreement. It is expected that, as a result of extraordinary transactions and the conversion of the Fiat Convertible Facility discussed below, in 2005 Fiat's net indebtedness will comply with the targets set forth in the Fiat Framework Agreement.

The Fiat Convertible Facility

Pursuant to the Fiat Framework Agreement, on July 26, 2002, the Participating Banks agreed to grant to Fiat a €3 billion loan (the "Fiat Convertible Facility"), consisting mainly of a conversion of Fiat's then current short-term debt owed to the Participating Banks. The Fiat Convertible Facility is a mandatorily convertible facility. The maturity of the Fiat Convertible Facility is September 2005. The Sanpaolo IMI Group's participation in the Fiat Convertible Facility amounted to €400 million.

In addition to the Participating Banks, Monte dei Paschi di Siena S.p.A., Banca Nazionale del Lavoro S.p.A., ABN AMRO Bank N.V. and BNP Paribas S.A. participated in the Fiat Convertible Facility.

The Fiat Convertible Facility contemplates, as its ordinary means of repayment, the conversion of the outstanding unpaid balance, at the maturity date, into Fiat ordinary shares (the "New Fiat Shares"). In a meeting held on April 26, 2005 between Fiat and the Participating Banks, the Participating Banks acknowledged that at maturity, in September 2005, Fiat will repay the Fiat Convertible Facility by issuing New Fiat Shares. The number of New Fiat Shares that will be issued in repayment of the Fiat Convertible Facility will correspond to (i) the outstanding balance at maturity, divided by (ii) the arithmetic average between €14.44 (which represents an adjustment from the originally agreed upon price of €15.5, made to take into consideration Fiat's rights issue of June 2003) and the weighted average of the share price of Fiat ordinary shares in the six or three months preceding the issuance of the New Fiat Shares. The average share price of Fiat ordinary shares in the

last six months of 2004 was €6.03 per share. At December 31, 2004, the Fiat Convertible Facility represented a loss of €167 million (an increase of €14 million compared to December 31, 2003) for the Sanpaolo IMI Group. The potential loss of €167 million from the firm commitment relating to the Fiat Convertible Facility has been entirely provided for by an appropriate allowance in the allowance for general risks.

If Fiat issues the New Fiat Shares, the holders of the Fiat Convertible Facility will offer the New Fiat Shares to the shareholders of Fiat in accordance with the pre-emptive rights granted by Italian law. If, as is expected, no pre-emptive rights are exercised, the Group's equity interest in Fiat will increase from 1.25% to 4.35%.

Sanpaolo IMI and IFIL have agreed that, if the New Fiat Shares are issued, IFIL will use its best efforts to avoid the application of the provisions of Italian law relating to cross-ownership between listed companies. See: Item 10. "B. Foreign Investment Securities Regulations" on page 216 below. IFIL has agreed to use its best efforts to avoid, without financial cost to Sanpaolo IMI, limitations originating from the cross-ownership between Sanpaolo IMI and Fiat and to allow Sanpaolo IMI to exercise full voting rights in respect of any shares in Fiat that Sanpaolo IMI may hold.

Synesis Finanziaria/FIDIS Retail Italia

Pursuant to the Fiat Framework Agreement, the Participating Banks agreed to acquire a 51% interest in FIDIS Retail Italia S.p.A ("FIDIS Retail Italia") the holding company of FIDIS' European retail consumer loans activity.

On May 14, 2003, the Participating Banks, each holding 25% of the equity, established a company called Synesis Finanziaria S.p.A. ("Synesis") in order to acquire the interest in FIDIS Retail Italia. The total purchase price paid in different tranches in 2003 and 2004 by Synesis was approximately €375 million. The sale of the 51% equity interest in FIDIS Retail Italia allowed the Fiat group to reduce its consolidated gross financial indebtedness by approximately €6 billion.

The Participating Banks and Synesis, on one side, and Fiat Auto, on the other side, have also entered into agreements relating to the corporate governance of FIDIS Retail Italia. Pursuant to such agreements, the board of directors of FIDIS Retail Italia consists of six members, out of which four are designated by Synesis and two by Fiat Auto. The chairman of the board of directors is one of the directors designated by Synesis; the deputy chairman of the board of directors is one of the directors designated by Fiat Auto. Subject to certain exceptions which require a qualified quorum, the board of directors of FIDIS Retail Italia adopts its resolutions, including those relating to important corporate events, by simple majority. A qualified majority of 60% of the share capital is required for certain decisions for which the extraordinary shareholders' meeting of FIDIS Retail Italia is responsible. FIDIS Retail Italia and Fiat Auto also entered into agreements in connection with their commercial relationship.

Fiat Auto has a call option to buy back the 51% interest in FIDIS Retail Italia held by Synesis. Initially, the call option could be exercised in certain periods between January 2004 and January 2006. The exercise price of the call option was designed to give the Participating Banks a predetermined return on their investment.

In the event of a change in control of Fiat Auto or in case Fiat Auto sells its 49% interest in FIDIS Retail Italia, Fiat Auto will be required to purchase, or to cause a third party to purchase, the 51% interest in FIDIS Retail Italia held by Synesis at a price in line with the price contemplated by the call option.

In February 2005, the Participating Banks and Synesis, on one side, and Fiat Auto, on the other side, agreed to extend their contractual commitments for two years. Pursuant to such extension, among other things, Fiat may elect to exercise, for a premium, the call option by January 2008.

Italenergia bis Edison

Italenergia Bis S.p.A. ("Italenergia Bis") is the holding company of Edison S.p.A. ("Edison"), the holding company of Italy's second largest energy group. Edison produces, imports and sells electric power and hydrocarbons.

The current group structure is the result of a process that started in July 2001 with a public tender offer to acquire Montedison S.p.A. which at that time controlled Edison through a vehicle called Italenergia S.p.A., owned by Fiat (38.6%), Electricité de France ("EDF" 18%), Carlo Tassara (20%) and by a group of three banks: Capitalia (9.6%), IMI Investimenti of the Sanpaolo IMI Group (7.8%), and Banca Intesa (6%). The three banks are collectively referred to as the "Banking Shareholders".

In June 2002, the Banking Shareholders, Fiat and EDF entered into an agreement for the reorganization of the Edison group. The plan, completed in December 2002, provided for the creation of Italenergia Bis, the new holding company where all shareholders of Italenergia transferred their interests. Edison was merged into Italenergia and the new entity was called Edison S.p.A. ("New Edison").

Fiat sold (the "Fiat Sale") to the Banking Shareholders a 14% interest in Italenergia Bis. As part of this transaction, the Sanpaolo IMI Group purchased another 4.66% interest in Italenergia Bis, increasing its total equity interest in Italenergia Bis from 7.82% to 12.48%.

As a result of the sale, the stake held by Fiat in Italenergia decreased from 38% to 24%. Although Fiat did not control the absolute majority of Italenergia, in accordance with the Bank of Italy's interpretation of the applicable large exposure regulations, before the sale, Italenergia group's debt was required to be consolidated with that of Fiat. The sale allowed Fiat to deconsolidate the Italenergia Bis and Edison debt. This led to a €1,098 million decrease in the exposure of the Sanpaolo IMI Group to the Fiat group and a concurrent increase in the Sanpaolo IMI Group's exposure to Italenergia Bis by the same amount.

In connection with the sale, the Banking Shareholders, Fiat and EDF entered into shareholders' agreements. Such agreements among Italenergia Bis' shareholders include:

Put and call options agreements among EDF and the Banking Shareholders relating to the 23.4% interest in Italenergia Bis held by the Banking Shareholders before the Fiat Sale. Each Banking Shareholder, pursuant to put and call options, will have the right to sell to EDF ("EDF Put Options") its interest in Italenergia Bis. EDF will have the right to have each Banking Shareholder sell ("EDF Call Options" and, together with the EDF Put Options, the "EDF Put and Call Options") such interests. Subject to the recent developments discussed below, the EDF Put Options were exercisable in February 2005. Subject to the recent developments discussed below, the EDF Call Options were exercisable in March 2005. The exercise price of the EDF Put and Call Options were designed to give the Participating Banks a predetermined return on their investment. Furthermore, the exercise price of the EDF Put and Call Options allows the Participating Banks to benefit from any potential upside relating to the performance of the Italenergia group.

Fiat's option to sell to EDF its 24.6% interest in Italenergia Bis and options (the "Drag Along Option") for the Banking Shareholders to divest in favor of Fiat or EDF the 14% interest in Italenergia Bis acquired from Fiat.

At the end of 2004, EDF commenced, claiming that Italian legislative and regulatory actions had frustrated the purpose of the EDF Put and Call Options, arbitration proceedings in order to obtain a ruling declaring the termination of the effectiveness of the EDF Put and Call Options or the suspension of their terms. IMI Investimenti together with the other Banking Shareholders, filed its response in the arbitration proceedings. The Group believes that EDF's claim is unfounded, and this is supported by a legal opinion of outside counsel. It is expected that the arbitration proceeding will terminate by the end of 2005.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In February 2005, the Banking Shareholders notified EDF of their intention to exercise the EDF Put Options. The exercise of the EDF Put Options allows the Banking Shareholders to exercise the Drag Along Option. In March 2005, the Banking Shareholders notified Fiat of their intention to exercise the Drag Along Option. It is expected that, subject to adjustments, the Group will receive up to €550 million for the sale of its entire stake in Italenergia Bis. The sale is subject to the resolution of the arbitration proceedings commenced by EDF.

On May 13, 2005, EDF and AEM S.p.A. (an Italian listed company operating in the energy sector) announced the execution of an agreement pursuant to which, as a result of certain corporate transactions, EDF and AEM S.p.A. will acquire the joint control of Edison. The closing of the transactions contemplated by the agreement, which is subject to certain conditions, would imply, among other things, the execution of the EDF Put and Call Options. If that were the case, the above-mentioned arbitration could be resolved earlier than expected.

Personal Financial Services Business Sector

On June 30, 2004, the shareholders' meeting of Sanpaolo IMI approved the spin-off (the "Spin-Off") of the equity interest held by its subsidiary, Banca Fideuram, in Fideuram Vita to Sanpaolo IMI. The Spin-Off, further described below under "Insurance Business Sector", was completed on November 19, 2004, and was effective as of November 30, 2004. In connection with the Spin-Off the minority shareholders of Banca Fideuram received 0.07470 Sanpaolo IMI Shares for each Banca Fideuram share.

The Spin-Off was instrumental in the Insurance Reorganization, as defined below, and strengthened Banca Fideuram's focus on its core businesses (financial consultancy services, asset management and private banking) by allowing it to save financial resources otherwise required to support the growth of insurance activities. In particular, a strategic objective of the Personal Financial Services Business Sector was identified in volume growth in the reference customers segments (which are those with a medium/high saving potential), confirming Banca Fideuram's profitability at the current levels.

Insurance Business Sector

In the first half of 2004, the project to reorganize the Group's insurance activities (the "Insurance Reorganization") commenced. The guidelines of the Insurance Reorganization were approved by the Board of Directors on February 13, 2004. The Insurance Reorganization provided for the creation of a single holding company into which all the different companies operating in the life and property and casualty sector have been consolidated, with the aim of:

rationalizing the presence in the insurance market and achieving a critical volume capable of encouraging increased efficiency through cost synergies and scale economies;

increasing the focus on the insurance business and encouraging product innovation in sectors such as welfare and personal insurance; and

exploiting the complementary nature of insurance and financial needs.

The Insurance Reorganization was implemented through the concentration of the insurance subsidiaries into a single company. The corporate vehicle identified for that purpose was A.I.P., previously called Noricum Vita, of which the Group held control since December 2003.

The main steps toward achieving the Insurance Reorganization were:

the Spin-Off to Sanpaolo IMI of the stake held by Banca Fideuram in Fideuram Vita;

the Spin-Off to A.I.P. of the total stake held by Sanpaolo IMI Wealth Management in Sanpaolo Vita; and

the merger by incorporation of Sanpaolo Vita and Fideuram Vita into A.I.P.

The Spin-Off was an important element of the Insurance Reorganization. Fideuram Vita was a subsidiary of Banca Fideuram. Banca Fideuram is listed on the Italian Stock Exchange. The Group controls 73.4% of Banca Fideuram. In order to contribute Fideuram Vita to the single insurance holding company, the Boards of Directors of Sanpaolo IMI and of Banca Fideuram approved, on May 18, 2004, a de-merger project of the equity interest held by Banca Fideuram in Fideuram Vita in favor of Sanpaolo IMI. The project was presented for approval to the extraordinary shareholders' meetings of Sanpaolo IMI and Banca Fideuram. The extraordinary Sanpaolo IMI shareholders' meeting approved the project on June 30, 2004.

Based upon the financial results as of December 31, 2003, the reference date used for valuation purposes in the Spin-Off, the key financial terms of the Spin-Off were:

the valuation of the interest held by Banca Fideuram in Fideuram Vita (corresponding to 99.8% of the share capital of Fideuram Vita) in the amount of €678.6 million (of which €603.0 million corresponds to the embedded value of the equity interest as of December 31, 2003, net of €8.7 million of dividends distributed to Banca Fideuram by Fideuram Vita in the first quarter of 2004);

the allocation to Banca Fideuram shareholders, other than Sanpaolo IMI, of Sanpaolo IMI Shares valued at €9.27 per Share, corresponding to the official average Share price (ex-dividend) during the month preceding May 17, 2004; and

the allocation to Banca Fideuram shareholders of Sanpaolo IMI Shares proportional to the interest in Banca Fideuram held by each shareholder other than Sanpaolo IMI: the exchange ratio was determined at 0.07470 Sanpaolo IMI Shares for each Banca Fideuram share.

Pursuant to the completion of the Insurance Reorganization, A.I.P. has been active in the insurance market since December 1, 2004.

For a discussion of the financial contribution of the Insurance Business Sector, see: Item 5. "Operating and Financial Review and Prospectus A. Results of Operations for the Three Years Ended December 31, 2004 Profits on Financial Transactions, Dividends from Shares and Equity Investments and Income from Companies carried at Equity" on page 119 below. In addition to the consideration expressed under Item 5. "Operating and Financial Review and Prospectus", a way to assess the value of the Insurance Business Sector is represented by its embedded value, which comprises the sum of adjusted shareholder's equity and the value of the business at the valuation date.

An embedded value is an estimate, made using actuarial techniques, of the value of a company, such as A.I.P., calculated on a going-concern basis, but excluding any value attributable to future new business. Embedded value earnings, defined as the change in the embedded value over a period after adjustment for any capital inflows and outflows such as dividends and capital injections, provide a measure of the company's performance in terms of its ability to generate value.

The consolidated embedded value of the Group's Insurance Business Sector at December 31, 2004, net of minority interests, was estimated at €2,433 million, an increase of €283 million compared to the embedded value of €2,150 million at December 31, 2003. Such pro forma basis, which assumes that the Insurance Reorganization had been completed as of January 1, 2004, is necessary to account for the effects of the Insurance Reorganization. The embedded earnings of the Insurance Business Sector in 2004 were €497 million, and are determined as (i) the change in the embedded value in 2004 (€283 million) plus (ii) dividends distributed by A.I.P. in 2004 and other capital movements (€67 million), plus (iii) the income generated in other Group companies net of costs, adjustments for

deferred acquisition costs, taxes and minority interests) (€147 million), associated with distribution and asset management activities.

Public Authorities and Entities Business Sector

In 2004, the Italian market for public authorities and entities as banking clients witnessed an increase in administrative and financial decentralization and growing competition in profit margins. At the end of 2004, a commercial agreement was entered into between Banca OPI, the Group subsidiary that heads this Business Sector, and the banking networks of the Group aimed at maximizing cross-selling between the various structures in the relative areas of competence (medium- and long-term loans and bridging loans for medium- long-term transactions for Banca OPI and short-term loans for the banking networks of the Group).

It is expected that commercial offices will be established for this sector. The offices will be dedicated to public authorities and entities and will have the task of directly initiating origination activities and supporting the operating points in their marketing function to increase the Group's commercial effectiveness in the public authorities and entities market.

Central Functions

Cooperation with Caisse Nationale des Caisses d'Epargne ("CNCE")

In the context of the strategic cooperation with the French group, Caisse d'Epargne, on December 9, 2004, the Parent Bank's 3.45% equity interest in CDC Ixis was exchanged for shareholdings in two of the three operating sub-holdings of CNCE: Ixis Asset Management Group (in which the Group acquired a 12% stake) and Ixis Corporate & Investment Bank (in which the Group acquired a 2.45% stake). The exchange was considered strategic to the development of collaboration opportunities, with particular reference to asset management activities.

The exchange was part of the complex reorganization of CNCE's shareholdings structure. This entailed the incorporation into CNCE of CDC Ixis and the reorganization of CNCE market activities into three areas: asset management, investment banking and custody. The reorganization makes the Caisse d'Epargne group one of the most important universal banking groups in the French market, with a similar positioning to Sanpaolo IMI in their domestic markets, especially in terms of territorial coverage and total assets.

Italia Holding, formerly CDC Ixis Italia Holding S.A., an affiliate of CNCE, is a party to the April 21 Agreement as defined below (see: Item 7. "Major Shareholders and Related Party Transactions A. The Major Shareholders", on page 199 below).

Discussions with Dexia S.A.

In November 2004, Sanpaolo IMI held exploratory discussions with Dexia S.A., a Franco-Belgian financial institution, relating to possible forms of co-operation between Sanpaolo IMI and Dexia S.A., including a merger of the two groups. The meetings of the Board of Directors of Dexia S.A. and Sanpaolo IMI held, respectively, on November 28, 2004 and November 29, 2004 decided to discontinue the discussions, the existence of which had previously been publicly disclosed.

Real Estate Portfolio

On November 18, 2004, a project was completed for the sale of the real estate portfolio of the Group, which was not considered as strategic to the business of the Group. As of December 2003, the portfolio included 105 properties of the Parent Bank and 126 properties belonging to various companies of the Group. The properties belonging to the Parent Bank were sold to the Carlyle group through the sale of 100% of CSP Investimenti (the subsidiary of the Group to which the Parent Bank

had assigned its portfolio). The properties belonging to the other companies of the Group were sold directly. The sale was aimed at rationalizing the management of the Group's property assets on the basis of organizational requirements and favorable market conditions. The sale price was €320 million, allowing a pre-tax capital gain of almost €100 million. Approximately one third of the capital gain was recorded in the equity of the Group's banking networks as of December 2003 for revaluation according to Law 350/2003, and the remainder was recorded as Group profit for 2004.

Recent Developments

Sanpaolo IMI intends to develop a new business plans which is expected to be disclosed before the end of 2005.

For a discussion of recent developments involving:

Cassa di Risparmio di Firenze, see: "Commercial Banking Business Sector Other Initiatives in Italy Cassa di Risparmio di Firenze" at page 73 above.

Fiat, see: "Investment Banking Business Sector Fiat and Italenergia The Fiat Convertible Facility" on page 76 above.

Italenergia, see: "Investment Banking Business Sector Fiat and Italenergia Italenergia bis Edison" on page 77 above.

Agreements and Alliances with International Partners

For developments concerning the cooperation with CNCE, see: "Central Function Cooperation with Caisse Nationale des Caisses d'Epargne ("CNCE")" on page 81 above.

New Organizational Model

Effective on May 1, 2004, the Group introduced a new organizational model. See: "Redesign of the Organizational Structure and Organization by Business Sectors" on page 72 above.

Public Tender Offers

No public tender offer in respect of Sanpaolo IMI's Shares has been made from January 1, 2004 to date.

C. Business Overview

At December 31, 2004, the Group was one of the leading banking groups in Italy by total assets (€211.2 billion), loans to customers (€121.9 billion) and customers' financial assets (€377.4 billion), of which 35.8% was represented by direct customer deposits (€135.2 billion), 38.3% by assets under management (€144.5 billion) and 25.9% by assets under administration (€97.8 billion). At the same date, the Group had 3,205 branches in Italy, together with 113 branches and 18 representative offices abroad.

The Group is a full service banking group which provides a broad range of credit and financial products and services to its customers in Italy and abroad. The Group's business consists of banking, asset management and capital markets activities, as well as certain other banking-related services. The Group's principal banking operations are retail banking, corporate banking, mortgage lending, medium-and long-term lending, investment banking (including advisory, structured finance and merchant banking), asset management and insurance. In addition, the Group is active in treasury and trading operations. Sanpaolo IMI's capital markets activities include participating as a specialist in the Italian government bond market, and participating as a leading underwriter and trader in the Italian domestic equity market, and as lead manager in Eurobond issues and warrants.

Business Sectors

The Group is organized for operational, management and budget purposes by Business Sector.

At December 31, 2004, the Group was divided into the Business Sectors described below. Each Business Sector comprises different Business Areas. Each Business Area has, within the Group, a certain level of autonomy and is subject to individual monitoring and budgeting activities.

Business Sector	Business Areas
Commercial Banking	Sanpaolo (Parent Bank operating areas and product companies) Cassa di Risparmio di Padova e Rovigo Cassa di Risparmio in Bologna Cassa di Risparmio di Venezia Friulcassa Banca Popolare dell'Adriatico Sanpaolo Banco di Napoli
Asset Management	Sanpaolo IMI Asset Management
Investment Banking	Banca IMI Sanpaolo IMI Private Equity IMI Investimenti
Personal Financial Services	Banca Fideuram
Insurance	A.I.P.
Public Authorities and Entities	Banca OPI

In addition, to these Business Sectors, the Group also has a corporate center known as Central Functions, which is responsible for and includes the following activities:

holding activities;

the management of equity investments;

finance and treasury functions;

the Macchina Operativa Integrata ("MOI" or integrated operating vehicle); and

GEST Line, which manages the Group's tax collection activities.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following chart provides an overview of the internal operational organization of the Sanpaolo IMI Group as of December 31, 2004:

(1) On January 24, 2005 the stake in Farbanca increased from 21.9% to 22.7%.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The main differences compared to the prior organizational structure are:

the introduction of two new Business Sectors:

Insurance, dedicated to insurance activities; and

Public Authorities and Entities, dedicated to the support of local government structures and public bodies;

the subdivision of the previous Wealth Management and Financial Market Business Sector in to two Business Sectors:

Asset Management, dedicated to providing asset management products to the Group networks and institutional investors; and

Investment Banking, which operates through Banca IMI, the Group investment bank, and Sanpaolo IMI Private Equity, responsible for the Group's private equity activities;

the incorporation of International Activities into the Commercial Banking Business Sector.

Commercial Banking Business Sector

The Commercial Banking Business Sector, which constitutes the Group's core business, comprises the following banking networks:

Sanpaolo, which is widespread in north western Italy and has a significant presence in central Italy and its islands;

Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Cassa di Risparmio di Venezia and Friulcassa, all located in the north east of Italy;

Banca Popolare dell'Adriatico, with a presence in the central Adriatic regions; and

Sanpaolo Banco di Napoli, with a presence in the mainland southern regions of Italy.

The networks, dedicated to the service of retail and private customers and companies, cover all of Italy through more than 3,000 banking branches and integrated multi-channel infrastructures. The Commercial Banking Business Sector also includes:

the Large Groups unit, which is responsible for managing relations with the major groups of domestic and international importance;

the Parent Bank's International Activities and Foreign Networks, which focus on corporate lending; and

the Irish subsidiary, Sanpaolo IMI Bank Ireland, and Sanpaolo IMI Internazionale, established to develop and supervise the Group's activities in Central and Eastern Europe.

The Commercial Banking Business Sector also includes companies operating in private banking, consumer credit, and leasing.

Asset Management Business Sector

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Pursuant to the Insurance Reorganization, the Asset Management Business Sector includes Sanpaolo IMI Asset Management and its subsidiaries, dedicated to providing asset management products to the Group networks, as well as institutional investors.

Investment Banking Business Sector

The Investment Banking Business Sector operates through:

Banca IMI, the Group's investment bank;

Sanpaolo IMI Private Equity, responsible for private equity activities;

IMI Investimenti, which is dedicated to the management of major industrial shareholdings; and

the Structured Finance unit, which is dedicated to project financing and specialized structured lending.

Personal Financial Services Business Sector

The Personal Financial Services Business Sector manages the activities carried out by the networks of financial planners of the Banca Fideuram group to serve customers with medium/high savings potential.

Insurance Business Sector

The Insurance Business Sector operates through A.I.P., the company that has been operational since December 1, 2004 and, as a result of the Insurance Restructuring, comprises all the Group's insurance activities. The Insurance Restructuring led to the creation of a leading Italian insurance operator with consolidated premium of over €8.5 billion and technical reserves of €38.8 billion, corresponding to an estimated market share of 11.9% in premiums and 12.5% in reserves (source: ANIA, Italian Insurance Companies' Association). A.I.P. has over 2 million insurance contracts.

Public Authorities and Entities Business Sector

The Public Authorities and Entities Business Sector is dedicated to public organizations and institutions and, through Banca OPI, provides advisory services and medium- and long-term financing to public entities and public infrastructures.

Central Functions

Central Functions includes holding activities, finance, the management of certain shareholding investments (including the Group's shareholdings in Cassa di Risparmio di Firenze, Cassa dei Risparmi di Forlì and Banca delle Marche), the Group's IT operating platform (MOI) and GEST Line, which manages the Group's tax collection activities. The main task of Central Functions is the centralized strategic direction, governance and control of the other Group's Business Sectors.

The loss registered by Central Functions in 2004 reflects the fact that Central Functions sustains costs using a centralized system on behalf of other Group companies and allocates the costs to the operating units only partially. This method responds to the need to safeguard cost control through a central body, which has the facilities to govern costs and monitor the pursuit of efficiency levels.

The Distribution Network

The Group's distribution network consists, primarily, of the Commercial Banking networks, the networks of affiliate banks or banks with which the Group has entered into distribution agreements, the Group's financial planners (mainly from Banca Fideuram and Sanpaolo Invest SIM) and the foreign branches and representative offices of the Group.

In 2004, the Group continued to develop and rationalize its distribution network. In particular:

The integration of the banking networks (Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Cassa di Risparmio di Venezia and Friulcassa, also referred to as the "North-East Networks") operating in the north east of Italy and Banca Popolare dell'Adriatico was completed through the migration of the IT systems to that of the Parent Bank, together with the adoption of the Sanpaolo IMI organization and commercial structure. The distribution model of the Sanpaolo network, characterized by branch specialization according to customer type (retail, private and companies) has now been extended to all the Group's networks.

In order to rationalize its presence in Italy and strengthen the competitive position of the networks, optimizing the brand names, 113 operating points of the Sanpaolo network in the provinces of the Triveneto and Emilia were transferred to the North-East Networks; at the same time, 30 operating points of Cassa di Risparmio di Padova e Rovigo and Cassa di Risparmio in Bologna located outside their respective reference territories (namely Rome, Milan and Lodi) were transferred to the Sanpaolo network. The transfers began in November 2004 and were concluded in January 2005.

At the end of 2004, the Sanpaolo IMI Group had a network of 3,205 banking branches in Italy, 32.7% of which are distributed throughout the north west of Italy, which is widely covered by the Sanpaolo network, 29.5% in the north east of Italy (Triveneto and Emilia), where the four North-East Networks and Cassa dei Risparmi di Forlì (in which the Group holds a 29.8% stake) are concentrated, and 25.3% in southern Italy, Sicily and Sardinia, headed, for the mainland regions, by the Sanpaolo Banco di Napoli network, and by the Sanpaolo network in Sicily and Sardinia. The remaining 12.5% of the Group's network is located in central Italy where the branches of Sanpaolo and Banca Popolare dell'Adriatico are located.

The branches of Cassa di Risparmio di Firenze (in which the Group holds a 18.7% stake) and Banca delle Marche (in which the Group holds a 7% stake) are also located in central Italy. The Group has entered into distribution agreements with both banks.

Through both internal and external development, the Group's networks currently cover all the Italian regions, almost all the 103 Italian provinces and over 20% of Italian municipalities.

The Group's branches in Italy represent 10.4% of all banking branches located in Italy. In particular, the Group has 11.1% of all branches located in the north west of Italy, 11.4% of all branches located in the north east of Italy, 5.7% of all branches located in the center of Italy and 13.5% of all branches located in the south of Italy and on the Italian islands.

In 2004, the Group confirmed its commitment to the distribution of multi-channel services, which include telephone banking and internet banking as well as traditional delivery channels. With regard to the private retail segments, at the end of 2004, banking contracts managed by branches of the Parent Bank rose above 465,000, an increase of 20% compared with December 31, 2003 on a pro forma basis, which takes into account the intra-group transfers of banking branches (see: " Commercial Banking Business Sector" on page 72 above). In 2004, internet banking contracts with companies reached 32,000 for Parent Bank customers (an increase of 20% compared to 2003), 8,700 for Sanpaolo Banco di Napoli customers (an increase of 80% compared to 2003), and 16,300 for customers of the North-East Networks and Banca Popolare dell'Adriatico (an increase of over 180% compared to 2003).

Retail customer service is also carried out through the network of ATMs which, at the end of December 2004, included, among others, 1,929 Parent Bank ATMs, 844 Sanpaolo Banco di Napoli ATMs and 1,085 ATMs of the North-East Networks and Banca Popolare dell'Adriatico, as well as through POS terminals (30,949 for the Parent Bank network, 11,928 for Sanpaolo Banco di Napoli, and 19,595 for the North-East Networks and Banca Popolare dell'Adriatico).

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The Group's distribution structure also comprises 4,317 financial planners, primarily in Banca Fideuram and Sanpaolo Invest SIM.

The Group operates abroad through a network of 113 branches and 18 representative offices.

In 2004, the Parent Bank opened representative offices in Paris and Dubai and transformed the representative office in Madrid into an operating branch.

Distribution network (Italy and abroad)	At December 31,		% Change December 31, 2004- December 31, 2003
	2004	2003	
Banking branches and area offices	3,318	3,272	1.4

Assets managed and administered on behalf of customers

Assets under management represent client financial assets managed by the Group on behalf of its clients. Assets under administration present client financial assets held in custody by the Group on behalf of the clients.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

At December 31, 2004, asset management volumes amounted to €144.5 billion, a slight increase of €774 million, or 0.5%, from €143.7 billion at December 31, 2003. The increase was due to the positive performance of the markets (€4.4 billion), which more than compensated for a net outflow of €3.6 billion.

At December 31, 2004, the Group's mutual funds and fund-based portfolio management totalled €98.0 billion, a decrease of €4.7 billion, or 4.6%, from €102.7 billion at December 31, 2003. The decrease was primarily due to divestments in mutual funds (a decrease of €7.5 billion), partially

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

compensated by an increase in subscriptions of life policies (an increase of €5.5 billion). In 2004, the recovery of the financial markets and the postponement of the expected increase in interest rates led customers to prefer equity funds and bond funds over liquidity funds.

As regards the types of funds, at December 31, 2004, the value of bond and equity funds represented, respectively, 44.3% and 24.8% of the total value of Group funds, compared to, respectively, 41.5% and 23.6% at December 31, 2003. At December 31, 2004, the Group was the leader in the domestic market for mutual funds, with a market share of 20.1% (source: Assogestioni, Italian mutual funds association).

In 2004, the life insurance sector confirmed the growth already shown in 2003. At December 31, 2004, life technical reserves, were €40.4 billion, an increase of €6.9 billion, or 20.6%, from €33.5 billion at December 31, 2003. The increase was primarily due to a net increase in premiums of €5.5 billion. In 2004, there was an increase in customers' interest in traditional policies such as saving policies, investment policies and pension policies, a sector in which the range of products has been expanded. These policies represented approximately half the premium inflows in the life insurance segment. The remainder mainly comprised index-linked and unit-linked policies. At December 31, 2004, the Group had a share of the domestic life insurance market of 12% in terms of technical reserves and 16% in new business (premiums on new policies) (source: ANIA, Italian Insurance Companies Association).

At December 31, 2004, asset administration volumes reached €97.8 billion, an increase of €5.1 billion, or 5.6%, from €92.6 billion at December 31, 2003.

The following table shows, at the dates indicated, the amounts of assets managed and administered on behalf of customers.

	At December 31,				
	2004		2003		% 2004/2003
	(millions of €)	(%)	(millions of €)	(%)	(%)
Asset management	144,485	38.3	143,711	39.0	0.5
Asset administration	97,757	25.9	92,610	25.2	5.6
Total assets managed and administered	242,242		236,321		

The following table shows, at the dates indicated, a breakdown of assets under management.

	At December 31,				
	2004		2003		% 2004/2003
	Amount		Amount		
	(millions of €)	(%)	(millions of €)	(%)	(%)

Total Group mutual funds	100.0	100.0

Activities in financial markets

Dealing, Treasury and financial management activities

Control of the treasury activities and the financial risk management of the domestic bank networks is centralized in the Parent Bank. With respect to the treasury activities of the Group, the Parent Bank guarantees access to monetary, currencies and securities markets, as well as payment systems, and controls the Group's liquidity policy. The Parent Bank accesses over the counter derivative markets mainly through Banca IMI, taking advantage of the synergies with Banca IMI's market-making activities. Positions on interest rate risks are adopted in accordance with the strategic views of the Group Financial and Market Risks Committee see: Item 11. "Quantitative and Qualitative Disclosures about Market Risk" on page 224 below.

With reference to the centralized management of liquidity, at the end of 2004, 59% of the Parent Bank's interbank lending and 55% of its interbank borrowing were infra-Group financings and deposits. The negative net interbank position of the Parent Bank was financed by the treasury function through short-term liquidity under a strict policy of funding diversification. Approximately 74% of the overall volume of the Parent Bank's interbank lending and borrowing was in euro, of which 56% was effected through the e-Mid electronic platform. Approximately 15% of the treasury function's short-term funding was effected through the issuance of CDs and commercial paper in international markets.

In 2004, with respect to medium- and long-term funding, which is also centralized for the domestic banking networks and the Group companies, Sanpaolo IMI issued €2.4 billion of securities through our internal network and the Sanpaolo Banco di Napoli and Banca Fideuram networks. Of this amount, €2.27 billion consisted of senior debt and €0.13 billion subordinate (Lower Tier II) debt. The Parent Bank issued €3.3 billion of securities in international markets, of which €2.3 billion consisted of senior debt and €1 billion of subordinate (Lower Tier II) debt. Other funding, for a total of €2.2 billion, was

effected by the Parent Bank in the form of borrowings and deposits from international markets, direct deposits from Group banks, and deposits from international organizations. In 2004, the North-East Networks and Banca Popolare dell'Adriatico issued a total of €2 billion in medium- and long-term senior debt.

The volume of derivatives transactions hedging interest rate risk showed a substantial increase towards the end of 2004 due to a number of factors, some of which were extraordinary. The difficulty in interpreting the evolution of macro-economic performance in 2004, which led to major changes in our interest rate risk positions, was coupled with, in the second half of 2004 the effect of reviewing our internal model of representing risk generated by core deposits, as defined under IFRS, (see: Item 11, "Quantitative and Qualitative Disclosures about Market Risk Financial Risk Management and Control" on page 225 below) and preparing for the transition to IFRS. These factors combined to affect the timing of derivative transactions, resulting in particular in an increase in the execution of new contracts at year-end 2004. These transactions were effected by the finance department in accordance with the guidelines established by the Group Financial and Market Risks Committee (See: Item 11. "Quantitative and Qualitative Disclosures about Market Risk" at page 224 below).

For further information about our funding activities, (see: Item 3. "Key Information B. Selected Statistical Information Funding by Remaining Maturity" on page 66 above").

Placement and advisory activities

Despite a reduction in the volume of new issuances, in 2004 Banca IMI acted as leader in the placement of 39 debt issuances, for a total amount of approximately €17 billion. Banca IMI was especially active in transactions involving foreign issuers, in particular:

in the financial institutions sector, the senior debt issues of Banca Antonveneta, Islandsbanki, AngloIrish Bank, Cassa di Risparmio di Rimini, Cassa dei Risparmi di Forlì, Mediocredito del Trentino Alto Adige, Banca delle Marche, Veneto Banca and Landsbanki Island; the subordinated debt issues of Sanpaolo IMI and Unibanca, the medium term note program of Cassa di Risparmio di Bolzano, and the securitization of leasing rates of Sanpaolo Leasint;

in the government bonds and local government sector, the placement of inflation-linked *Buoni Pluriennali del Tesoro* (fixed rate Italian government bonds), the private placement of Greek Government bonds, and debt issues for the municipality of Naples and the Friuli Venezia Giulia region; and

in the corporate issuers segment, the debt issues of Enel and General Electric and the high-yield issue of IT Holding.

In the equity sector, characterized by an appreciable recovery of the main international stock indices, 2004 saw an increase in operating volumes and the number of transactions (especially in the initial public offering sector) in Europe. In 2004, the Italian market also showed signs of recovery compared to 2003. The recovery was mainly attributable to the placement of the third tranche of Enel shares, the largest share issuance in the world for 2004.

In 2004, in Italy, Banca IMI participated in the Enel issuance, the public offerings of Terna and the Tecla real estate fund, the initial public offering of Geox, the capital increase of Buzzi Unicem, the private placements of Lottomatica and Isagro and, internationally, the institutional offerings of Genworth Financial and General Electric shares. It also participated in the placement of certain tranches in the capital increase of Mondo TV and Buongiorno Vitaminic.

In relation to corporate finance advisory activities, in 2004 the domestic market showed a marked slow-down compared to 2003. The slow-down was partly compensated for by increased activities at the end of 2004. In this context, Banca IMI assisted Amga and Smat in the acquisition of a majority stake

in Acque Potabili, Finmeccanica in its sale of approximately 10% of ST Microelectronics, SIA in the formation of a joint venture with GL Trade, Manuli in the context of the inverse merger of FinM into Manuli, Edison in the disposal of Edison T&S and the related gas transportation network, as well as in the evaluation of Edison's subsidiary Iniziative Sviluppo Energie S.p.A., Cassa di Risparmio di Firenze and Cassa di Risparmio di Genova in the purchase of, respectively, Cassa di Risparmio di La Spezia and Cassa di Risparmio di Carrara, IT Holding in the disposal of the Romeo Gigli and Gentry di Portofino trademarks, and IPSE for a fairness opinion.

At the end of 2004 and beginning of 2005, Banca IMI continued to provide global advisory services to the Fiat group and consultancy services to the Albanian government for the privatization of the telecom and energy sectors.

In 2004, Banca IMI also advised the Ministry for the Economy in structuring the F.I.P fund (Fondo Immobili Pubblici public real estate fund) in the context of the privatization of public real estate assets.

In 2005, with regard to the privatization of the real estate assets of the Italian government, Banca IMI is involved in the securitization and placement of the F.I.P. fund. Banca IMI is also providing advisory services to the Egyptian financier Naguib Sawiris in the leverage buy-out that will allow the Egyptian telecommunications company Orascom to acquire control of the Italian telecommunications company Wind S.p.A from Enel.

Significant Subsidiaries

The following table sets forth the significant subsidiaries (as defined by Rule 1-02 of Regulation S-X) of the Group at December 31, 2004.

Name	Registered Offices	Ownership held by	%	Voting rights at shareholders' meeting %
Banca Fideuram	Italy	Sanpaolo IMI	73.37	73.37
Banca IMI	Italy	Sanpaolo IMI	100.00	100.00
Banca OPI	Italy	Sanpaolo IMI	100.00	100.00
Sanpaolo Banco Di Napoli	Italy	Sanpaolo IMI	100.00	100.00

Banca Fideuram has a network of 4,313 financial planners and 89 branches in Italy and operates through its own specialized companies dedicated to asset management services.

Banca IMI, the Group's investment bank, engages in securities dealing for itself and for customers, underwrites equity and debt capital offerings for companies, and also provides corporate finance advisory services.

Banca OPI provides financial services to the public sector, with particular emphasis on the financing of infrastructure investments and public works.

Sanpaolo Banco di Napoli is the Group's bank which covers the regions of mainland southern Italy. Established in 2003, it includes all the Sanpaolo and Banco di Napoli branches operating in Basilicata, Calabria, Campania, and Apulia into a single entity, with a distribution network of 688 branches and 60 other operating points.

Italian Banking Regulation and Corporate Governance Principles

Italian Banking Regulations Overview

Structure of the Italian Banking System

During the 1990s, the Italian banking system underwent a reorganization and consolidation process as a consequence of changes in banking regulations as well as the competitive stimulus resulting from the liberalization of European financial markets and the introduction of the euro. The main steps in this evolution were the enactment of the Amato Law, the privatization process and the Legislative Decree No. 385 of September 1, 1993 (the "Consolidated Banking Law"), and Legislative Decree No. 58 of February 24, 1998 (the "Consolidated Securities Law").

The current system allows the banks to decide which banking and related financial activities to engage in and which structures to adopt, subject only to generally applicable rules of prudence and the banks' own By-laws. The current Italian banking regulations now largely mirror the EU Second Banking Directive (Dir. No. 89/646/CEE, now consolidated in Dir. No. 2000/12/CE). The effect of the regulatory changes and Europe-wide liberalization has been a significant increase in competition and consolidation in the Italian banking industry.

The Privatization Process

The Amato Law encouraged consolidation and also encouraged banks controlled by governmental and public law entities to adopt a joint-stock structure and to strengthen their capital bases.

The process was accelerated by the implementation of the Privatization Law (Law No. 474 of July 30, 1994) and the Decree of the Minister of Economy and Finance (the "Dini Directive"), enacted, respectively, in July and November 1994. These statutes permitted and promoted the sale of majority holdings of banks owned by the Ministry of Economy and Finance and by Italian banking foundations (considered public law entities) to the private sector. Certain fiscal incentives were provided for Italian banking foundations to reduce their stakes in banks that converted into joint-stock companies under the Amato Law to below 50%. Furthermore, to encourage the reform, new incentives were introduced pursuant to the Ciampi Law, which reorganized the regulatory framework of the Italian banking foundations. Those incentives were reviewed and permitted by the European Commission, which decided on August 22, 2002, that fiscal measures introduced in 1998 and 1999 in favor of banking foundations were not subject to the European Union's state aid rules). Pursuant to the Ciampi Law (Legislative Decree No. 153 of May 17, 1999), the banking foundations that modify their By-laws and progressively divest their stakes in banks and only maintain controlling interests in entities dealing with social purposes, are considered as private not for profit organizations with social purposes. The Ministry of Economy and Finance is in charge of authorizing the sales of holdings in banks owned by foundations in compliance with criteria of transparency and non-discrimination.

In accordance with Article 25 of the Ciampi Law, as modified by Law No. 212 of 2003, the deadline for the banking foundations to dispose of their control of banking institutions was extended to December 2005 (the Ciampi Law initially set the deadline for the disposals at June 2003). Moreover, the longer term of December 2008 will be allowed for those banking foundations that will entrust their stakes in banking institutions to asset management companies ("*società di gestione del risparmio*") which will be in charge of managing them independently. The regulations concerning such asset management companies are still to be enacted by the Minister of Economy and Finance. A bank can be considered as controlled even in situations of joint-control exercised, directly or indirectly by two or more banking foundations, as contemplated by Article 6 of the Ciampi Law. If such joint control is ascertained, the banking foundations have to terminate the agreement pursuant to which they exercise the joint control within 90 days of the notice by the competent supervisory authority (ministerial Decree n. 150 of May 18, 2004). The banking foundations with net equity not in excess of €200 million or operations in

Italian autonomous regions ("*regioni a statuto speciale*") are exempted from the requirement to dispose of their control of banking institutions.

Implementation of the EU Second Banking Directive

Effective January 1, 1993, the old distinction between "ordinary credit institutions" and "special credit institutions" was formally eliminated and every kind of banking activity can now be performed by any bank, which can collect and solicit savings deposits from the public, issue bonds and grant medium- and long-term credit subject to regulations issued by the Bank of Italy.

Italian banks, whether incorporated as joint-stock companies (*Società per Azioni*), co-operative banks (*banche popolari* and *banche di credito cooperativo*), or as residual public law entities (governed by special regulations) subject to their By-laws and to financial services regulation, may also engage in all the business activities that are subject to mutual recognition under the EU Second Banking Directive, and in certain other financial activities not listed therein.

Credit institutions incorporated in a European Union country other than Italy may conduct banking business in Italy as well as those business activities that are subject to mutual recognition and are authorized to be carried out in their home country, provided that the Bank of Italy is informed by the entity supervising the relevant EU credit institution. Such supervising entity retains control over the relevant EU credit institution (so-called "home-country control" rule).

Consolidated Banking Law

Effective January 1, 1994, the Consolidated Banking Law, which repealed and replaced previous regulations, has defined the role and the powers of the supervisory authorities and has regulated the definition of banking and related activities. Moreover, the Consolidated Banking Law contains provisions regarding: the authorization of banking activities, the acquisition of equity participation in banks, specific discipline of co-operative banks, banking supervision (on an unconsolidated and consolidated basis), special bankruptcy procedures for banks, and the supervision of financial companies, the transparency of contractual terms and conditions related to banking and financial services, applicable fines and sanctions. The resulting regulatory framework of Italian banking system is described below.

Supervisory Authorities

Under the Consolidated Banking Law, the supervision and regulation of Italian banks are exercised by: three different Authorities, with the aim of granting the sound and prudent management of the supervised entities, the overall stability, efficiency and competitiveness of the financial system as well as the compliance with provisions concerning credit. The supervisory authorities are the following:

the *Interministerial Committee for Credit and Savings* (the Comitato Interministeriale per il Credito e per il Risparmio or "CICR"). The CICR includes the Minister of Economy and Finance and other economic ministers, acts upon proposals of the Bank of Italy, and has wide-ranging policy-making and guidance powers.

the *Minister of Economy and Finance*. The Minister of Economy and Finance has broad powers in relation to banking and other financial activities, which include: (i) authorizing the establishment in Italy of the first branch of non-EU banks and (ii) setting definite eligibility standards for holders of equity interests of a bank; and the level of professional experience required from directors and executives of banks and other financial intermediaries. The Minister of Economy and Finance may also fine banks and their managers with administrative sanctions and place banks in mandatory liquidation (*liquidazione coatta amministrativa*) or under extraordinary management (*amministrazione straordinaria*).

the *Bank of Italy*, which is in charge of implementing the policies set forth by CICR by adopting regulations and instructions concerning the following four main areas: (i) capital requirements; (ii) risk exposure; (iii) acquisition of equity participations; and (iv) administrative and accounting organization and internal audit.

The main set of rules implemented by the Bank of Italy with respect to banks is collected in the *Istruzioni di Vigilanza per le Banche* (Supervisory Directives for Banks), which is updated from time to time.

The Bank of Italy supervises the banking institutions through its own auditing body, granting authorizations and examining the reports that banks are required to file on a regular basis. The main supervisory powers include: the review of financial statements and statistical data; the preliminary review of amendments to By-laws; inspections; and verification of capital ratios, reserve requirements exposure limits. Each year the Bank of Italy publishes a report on its supervisory activity.

In addition, the Bank of Italy oversees compliance with rules of conduct and disclosure requirements provided for banking and financial transactions and services, with particular reference to: (i) public notices of interest rates, prices, charges for customer notifications and every other economic condition concerning the transactions and services offered; (ii) prescribed contractual forms; (iii) consumer protection in cases of unfavorable modification of interest or any other price or condition or unilateral alteration of contract, and (iv) periodic notifications to customers. The Bank of Italy also cooperates with governmental entities in preventing and repressing usury. To this end the Bank of Italy and the *Ufficio Italiano Cambi* ("UIC") conduct a periodic survey to measure the "average overall effective rate" charged by banks and financial intermediaries for different types of transactions. The data collected is published in a decree of the Minister of Economy and Finance and is used to calculate the threshold beyond which rates are considered usurious.

The Bank of Italy conducts inspections of all credit institutions through its supervisory staff of auditors. Matters covered by an examination include the accuracy of reported data, compliance with banking regulations, and By-laws. Specific areas of audit include compliance with exposure and other prudential limits.

The Bank of Italy requires all banks to report interim balance sheets on a monthly basis.

As a consequence of the Cirio and Parmalat defaults (see: Item 8. "Financial Information B. Legal Proceedings" on page 204 below), there has been an intense debate on the regulatory framework applicable to banks. In this context, in March 2004 the Italian Parliament began to examine a new bill, which was intended, among other things, to revise the entire system of supervisory authorities. The current version of the bill provides for minor changes to the system of supervisory authorities in comparison with the original version.

Banking and Related activities

Pursuant to Section 10 of the Consolidated Banking Law, banking is broadly defined as fund raising and granting credit.

Under the Consolidated Banking Law, banks are also allowed to carry out other activities, including: financial leasing and payment services; issuance of credit cards and traveler's checks; trading in money market instruments, foreign exchange, futures, options and securities; participation in issuances of securities and related services; advisory services related to capital structure, industrial strategy and business combinations; money brokerage; portfolio management and portfolio advisory services; safekeeping and administration of securities.

In addition to banking and related activities, banks are permitted to provide investment services and to hold control shareholdings in banking, financial and insurance companies. Italian banking groups

are therefore entitled to provide services that are subject to different supervisory authorities. In particular, the Bank of Italy supervises the banking and related activities and exercises prudential supervision on intermediaries providing investment services, Commissione Nazionale per le Società e la Borsa ("CONSOB", the Italian securities regulator) is responsible for disclosure and fair dealing in providing investment services, while the Istituto per la Vigilanza sulle Assicurazioni Private e di Interesse Collettivo ("ISVAP") is the supervisory authority responsible for insurance services.

It should be also noted that, under the Consolidated Banking Law, banking groups comprise either: (i) an Italian parent bank and the banking, financial and instrumental companies it controls or (ii) a parent financial company and the banking, financial and instrumental companies it controls, provided that banking activity is significant within the group, as determined by the Bank of Italy in compliance with CIRC directives. All the companies belonging to a banking group are subject to the supervision on a consolidated basis of the Bank of Italy.

In compliance with EU Directive 2002/82 on financial conglomerates and the Basle II Agreement, insurance companies will be included in the prudential supervisory area and will be subject to capital adequacy requirements as determined by the supervisory authority.

The adoption of IAS/IFRS (as defined below) entails that insurance companies will be included in the scope of consolidation of Italian banking groups, while Italian GAAP only makes reference to banking activities.

Participation in the Share Capital of a Bank

Pursuant to Section 19 of the Consolidated Banking Law, and in compliance with EU Directive 2000/12, the Bank of Italy's prior authorization is required in the event that acquisition of shares (together with the shares already held) reaches or exceeds 5% of the voting rights or leads to control over an Italian bank. Prior authorization by the Bank of Italy is also required when the 10%, 15%, 20%, 33% or 50% threshold of voting rights is triggered.

Pursuant to Bank of Italy regulations, the authorization from the Bank of Italy must also be obtained before any irrevocable commitment to buy a significant stake in a bank. In the case of purchases (or sales) which could lead to controlling interest in a bank, the request for authorization to the Bank of Italy must also be preceded (by not more than 30 days) by a preliminary notification to the Bank of Italy concerning the main elements of the transaction (timetable, methods and sources of finance).

The Bank of Italy may grant its authorization subject to conditions likely to ensure the sound and prudent management of the bank. Persons who, directly or indirectly engage in significant business activity in economic sectors other than banking and finance may not be authorized to acquire shares of a bank which, when added to those already held, would represent more than 15% of the voting rights or control of the bank.

The Bank of Italy as well as, when the bank is a listed company, CONSOB (the Italian securities and stock exchange regulator), must be notified of any agreement, however concluded, which involves an Italian bank or could lead to a joint exercise of voting rights in a bank or in the parent company of such bank.

Deposit Insurance

The Interbank Deposit Guarantee Fund (*Fondo Interbancario di Tutela dei Depositi*, (the "Guarantee Fund"), established in 1987 by the principal Italian banks, protects depositors against the risk of insolvency of a bank and the loss of their deposited funds. Sanpaolo has been a member of the Guarantee Fund since 1987.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

As a result of certain amendments to the Consolidated Banking Law, in 1996 (pursuant to EU Directive No. 94/19), a bank's membership in the Guarantee Fund became compulsory and must have a minimum coverage of Lit. 200 million (€103,291) per depositor.

Deposits covered by the Guarantee Fund are mainly those of ordinary customers, namely repayable funds in the form of deposits, bank drafts and other similar instruments; bearer deposits, bonds and deposits placed by other credit institutions for their own account have been excluded. Furthermore, the guarantee scheme does not cover, among others, deposits of government and local authorities, financial and insurance companies, and mutual funds.

Capital Adequacy Requirements

Solvency Ratios

The implementation of the Basle Committee's risk-based capital guidelines, which occurred in 1988, is based on the EU's "Own Funds Directive" and the "Solvency Ratio Directive" consolidated in the EU Directive 2000/12. Under these risk-based capital guidelines, implemented since 1992 by the Bank of Italy, a bank's capital adequacy assessment is based on the ratio of its total capital to the risk-adjusted value of its assets and off-balance sheet exposures. A bank's capital is composed of primary capital and supplementary capital. The consolidated total of primary and supplementary capital of a bank may not be less than 8% (or 7% on an unconsolidated basis) of the bank's risk-weighted assets.

Primary capital (Tier I) consists of: paid-in equity capital, retained earnings, funds for general banking risks, and innovative capital instruments such as preferred shares, minus: treasury stock, intangible assets and losses for the preceding and current fiscal years. Innovative capital instruments can be included in Tier I capital only up to 15% of the capital including such instruments. Any amount in excess of that level can be included in supplementary capital as hybrid capital instruments.

Supplementary capital (Tier II) capital consists of: asset revaluation reserves, general loan loss reserves, hybrid capital instruments and subordinated loans, minus: net unrealized losses from investments in securities. Starting in March 1998, supplemental assets may include 35% of the net unrealized gains on interests in non-banking and non-financial companies listed on a regulated market. Fifty percent of any net losses must be deducted from supplemental assets, as already provided for net losses on securities. Tier II capital cannot exceed Tier I capital. There are also limitations on the maximum amount of certain items of Tier II capital, such as subordinated debt, which may not exceed 50% of Tier I capital.

The capital adequacy ratios are applied to the sum of primary and supplementary capital, less equity investments and certain quasi-equity capital instruments in, and subordinated loans to, affiliated credit and financial institutions.

To assess the capital adequacy of banks under the risk-based capital guidelines, a bank's capital is related to the total of the risk-adjusted values of its assets and off-balance-sheet exposures. The various categories of assets are assigned one of five risk weightings: 0%, 20%, 50%, 100% and 200%.

In January 2001, the Basle Committee published proposals for an overhaul of the existing international capital adequacy standards. The two principal goals of the proposals are:

to align capital requirements more closely with the underlying risks (introducing, among other things, the possibility to use internal rating systems for credit risk) and

to introduce a capital charge for operational risk.

According to the new agreement adopted by the Basle Committee in June 2004, when measuring regulatory capital for banks, it is appropriate to deduct such bank's equity and other regulatory capital

investments in insurance subsidiaries and also significant minority investments in insurance entities. Under this approach, the bank would remove from its balance sheet assets and liabilities of, as well as third-party capital investments in, an insurance subsidiary. Alternative approaches can be applied, but should include a group-wide perspective for determining capital adequacy and avoid any double-counting of capital.

The European Commission approved, on July 14, 2004, a proposal for a new directive (the "Capital Adequacy Directive") in order to implement the Basle 2 regulatory framework in each EU country by the end of 2006. During 2003, Sanpaolo IMI launched the Basle 2 Project, with the objective of preparing the Group for adoption of the Advanced Approaches from the date the new capital accord comes into effect. (See: Item 11. "Quantitative and Qualitative Disclosures about Market Risk The Basle 2 Project" on page 224 below).

Market Risk Capital Requirements

In March 1997, on the basis of EU directive 93/6 and in response to the increased activity of Italian banks in securities intermediation, the Bank of Italy requested specific consolidated capital requirements, in order to carry out securities intermediation activities. The requirements concern the various classes of risk involved and apply to all securities not held to maturity (i.e., trading account securities and available-for-sale investment securities).

The risks covered by the capital requirements are:

position risk: the risk deriving from fluctuations in the price of the securities due to market trends and status of the issuer;

settlement risk: the risk that arises in securities settlement transactions when, after the contract has matured, the counterparty has not fulfilled its obligation to deliver the securities or amounts due;

counterparty risk: the risk that the counterparty will not perform its contractual obligations upon maturity;

concentration risk: refers to exceeding, as the result of risk positions in the portfolio of marketable securities, the individual credit limit established with regard to the concentration of risks;

commodities positions: refers to the risk of potential losses in commodities positions;

foreign exchange risk: the risk of incurring losses due to adverse changes in foreign exchange rates.

In February 2000, the Bank of Italy introduced the possibility (subject to prior authorization) for banks to use their own internal models to calculate capital requirements to cover market risks. The models may use commodity position risk and total portfolio exchange rate risk. In 2000, certain other modifications to the regulatory framework on market risk concerning the calculation of commodity position risk and new methods of valuing options became effective. See: Note 16 on page F-103 to the Consolidated Financial Statements.

Lending Limits

The Bank of Italy issued certain instructions in respect of the EU Large Exposure Directive in October 1993. From November 1993 until the end of 1998, all loans made by a bank to a single borrower or group of affiliated borrowers (together with all other exposures as defined by the EU Large Exposure Directive) could not exceed 40% of the bank's own funds (as defined pursuant to the EU Own Funds Directive). These regulations were consolidated in EU Directive 2000/12. Since January 2002, the above-mentioned ceiling has been lowered to 25% of the bank's own funds.

A specific limit applies to loans to companies which are affiliated with banks (i.e., companies in which a bank holds a stake of 20% or more) and to loans to shareholders holding a stake of 15% or more in a bank: these exposures cannot exceed 20% of the bank's own funds as specified by the Bank of Italy regulations.

In addition, the amount of a bank's large exposures defined as exposures individually exceeding 10% of the bank's own funds may not, in the aggregate, exceed eight times the bank's own funds. Under the Bank of Italy's instructions, loans and other exposures are assigned one of four risk weightings (0%, 20%, 50% or 100%), largely depending on the identity of the debtor or guarantor.

These concentration limits apply to banking groups on a consolidated basis, although the activities related to the trading portfolio of banks and of securities dealing firms (*società di intermediazione mobiliare*, "SIMs") belonging to a banking group are not taken into account in assessing the group's exposures. Such activities are specifically regulated by regulations implementing EU Directive 93/6. In addition, banks belonging to a banking group are individually subject to a 40% limit on weighted exposures to a single borrower or group of affiliated borrowers.

For a discussion of the Group's large exposures as of December 31, 2004 see: Item 3. "Key Information B. Selected Statistical Information Loan Portfolio Loans by Category of Borrower" on page 33 above and Note 19 to Consolidated Financial Statements on page F-125.

Medium- and Long-Term Credit and Funding Activity

The applicable regulations allow all banks to provide medium- and long-term credit to borrowers. Nevertheless, specific conditions are required for banks providing medium and long term credit to companies if the credit exceeds the threshold of 30% of total funding. In this regard, no restrictions are provided in relation to those banks whose shareholders' equity exceeds €1 billion as well as to former special credit institutions, regardless of the amount of their shareholders' equity, and to those banks whose liability structure is principally founded on funding raised in the medium- and long-term markets.

Furthermore, the regulations include provisions concerning the control of changes in maturities as well as methods that empower the Bank of Italy to identify the banks most exposed to the risk of losses linked to interest-rate fluctuations. As of June 2004, all the provisions concerning changes in maturities had to be applied by banking groups on a consolidated basis.

With reference to the provisions concerning funding activity, the regulations provide the opportunity for all banks to collect savings from the public in any form permitted by law. Banks are also permitted to use various instruments such as bonds, certificates of deposit, and other funding instruments, which can also be issued in the form of subordinated or perpetual debt for funding activities.

Equity Investments by Banks

Banks are permitted to make equity investments in all types of companies, subject to rules enacted by the Bank of Italy. Generally, equity participations by a bank in all types of companies may not in the aggregate exceed, together with real estate investments, the bank's consolidated capital. These rules require prior authorization for equity investments exceeding 10% of the consolidated capital of the acquiring bank or 10% or 20% of the capital stock (or otherwise entailing the taking of control) of the bank, financial or insurance company being acquired and for taking control of ancillary banking service companies. Investments in insurance companies exceeding in the aggregate 40% of the bank's consolidated capital (and 60% of its unconsolidated capital) are not authorized.

Moreover, equity participations in companies other than banks or financial or insurance companies may not exceed (i) 15% of the bank's consolidated capital (or 7.5% for investments in unlisted

companies), (ii) 3% of the bank's consolidated capital for investments in a single company or group of companies, or (iii) 15% of the capital stock of the company whose shares are being acquired by the bank. The limit described in (iii) does not apply if the value of the equity investment and the sum of all the other investments exceeding the 15% owned by the bank, do not exceed 1% of its consolidated capital.

Higher limits are applied by the Bank of Italy upon request by *banche abilitate* (authorized banks), which are banks with at least €1 billion in capital and which meet the solvency ratios, and by the so-called *banche specializzate* (specialized banks), which are banks that collect mainly medium- and long-term funds, take no demand deposits, have capital in excess of €1 billion and meet the solvency ratios. The Bank of Italy has recognized Sanpaolo IMI as a *banca abilitata*. Therefore, Sanpaolo IMI is empowered to purchase over 15% of the capital of a non-financial company, as long as both the value of the equity investment and the sum of all other investments exceeding the 15% limit do not exceed 2% of its consolidated capital. The aggregate of equity investments in non-financial companies cannot, in any event, exceed 50% of Sanpaolo IMI's consolidated capital (or 25% of its consolidated capital for investments in unlisted companies); investments in a single non-financial company or group of companies may not exceed 6% of the bank's consolidated capital.

Administrative and Accounting Organization and Internal Audit

The Bank of Italy's regulatory supervision has, in recent years, focused on verifying the existence of conditions of efficiency and self-regulation of banking groups. The focus of the Bank of Italy led Italian banking groups to review their internal controls. The terminology used by the Bank of Italy, "Internal Control System", introduces a strong concept of innovation in the Italian regulatory system: no longer formal controls, but an integration of sub-systems of control which, operating in an integrated manner at all levels throughout the organization, can manage all kinds of risks. In this context, the internal audit department is required to focus on the organization structure. The structure must be designed to evaluate the capacity of the company to reach its given objectives with effectiveness and efficiency. Within Sanpaolo IMI, these responsibilities are assigned to the Internal Audit Department, which is independent from the operating structures and has free access within its mandate to data, archives and company assets. (See: Item 6. "Directors, Senior Management and Employees C. Board Practices Committee for Internal Control and Internal Audit Department" on page 188 below).

Mandatory Reserves

The ECB and the Bank of Italy require that banks based in Italy must maintain mandatory cash reserves, directly or indirectly through an intermediary bank, with the Bank of Italy.

The amount of the reserve is calculated on a monthly basis at a 2% rate on the total of the following items subject to the reserve requirements: deposits and outstanding debt securities, excluding liabilities due to other banks, to the ECB and to other national central banks. There is no reserve requirement for deposits and debt securities issued with a maturity of more than two years or repayable with a notice of more than two years and for repurchase agreements.

The reserve can be amended by banks for the whole amount during a particular month as long as the average amount of the daily balances is not less than the required reserve. The Bank of Italy pays interest on the reserve at the average refinancing rates set by the ECB for that month. Sums in excess of the reserve required do not receive interest. In the event of a violation of the requirements of the mandatory reserve, the ECB may impose proportional fines on the bank (or intermediary bank).

Financial Intermediaries

The Consolidated Banking Law also governs certain financial activities performed by non-banking entities, which, in order to be allowed to deal with the public, must be enrolled in a general register kept by the UIC. Such regulated financial activities are as follows: acquiring equity investments, granting loans in any form (including leasing activities) and performing payment or brokerage services in foreign currency. Pursuant to Law 130 of April 30, 1999, relating to securitizations, the transferring of assets to special purpose vehicles and the collection of credits and cashier services are to be considered among such regulated financial activities.

Financial intermediaries that deal with the public may engage in the activities listed above and, subject to specific authorization, derivatives trading activities for their own accounts and placement of financial instruments, are required to observe the rules for clarity of contractual conditions set forth in the Consolidated Banking Law. Further provisions set forth requirements for the probity of the participants and for the probity and professional competence of their business representatives.

The financial intermediaries have also to be enrolled in a special register (provided for in Section 107 of Decree N. 385 of 1993, the "Special Register") maintained by the Bank of Italy, if they meet certain objective criteria, defined by the Ministry of Economy and Finance, and corresponding to the activities they perform, their size, their debt to equity ratio and their internal control system and organization. These intermediaries are subject to the oversight of the Bank of Italy, which, in August 1996, issued regulations concerning various aspects of capital requirements and risk management. Financial intermediaries must also comply with the rules governing the regular and consolidated annual financial statements of banks.

Securities Market Control and Legislation

The Italian implementing provisions (Law No. 415 of 1996, "Eurosime Law") of the European Directives on investment services (No. 93/22/EEC of May 10, 1993) and market risk capital requirements (No. 93/6/EEC of March 15, 1993), allowed banks to operate directly in regulated securities markets. Restrictions on access by foreign banks and investment firms to the Italian investment services sector have also been removed.

In 1998, the regulations introduced by the Eurosime Law were reorganized within the framework of the Consolidated Securities Law. The Consolidated Securities Law that was recently revised as a result of important amendments to Italian corporate law contains rules concerning the prudential supervision applicable to intermediaries that provide investment services (including the requirement to use guarantee systems as protection against crises) and to intermediaries that offer collective investment management services (mutual funds and open-end investment companies). In particular, the Bank of Italy is responsible for issues related to limitation of risk and financial stability while CONSOB is responsible for issues related to disclosure and proper business conduct. Other sections of the Consolidated Securities Law concern standards for organization and management of financial markets, centralized management of financial instruments, methods for soliciting investments and corporate governance of companies that have listed securities.

Regulated Markets

The organization and management of Italy's regulated markets is reserved to joint stock corporations: Borsa Italiana S.p.A. runs the Milan stock exchange (which includes the electronic equity market "MTA" or "telematico", (which is subdivided among the Blue Chip, Star and Ordinary segments), Nuovo Mercato and Mercato Expandi, the Securities Derivatives Market (SeDeX), the Italian Derivatives Market (IDEM), the After Hours Market (TAH), the MTF (which is a segment of the MTA dedicated to funds) and the Fixed Income Market (MOT and EuroMOT). All the Italian regulated markets are entered onto a list kept by CONSOB. CONSOB continues to exercise

supervisory control over listed companies, intermediaries and the markets, as well as the correctness and intelligibility of the information required of companies issuing listed securities and other forms of solicitation relating to securities. CONSOB is also empowered to verify compliance with the legislation regarding insider trading and to report infringements to the public prosecutors. In this regard, the Italian Parliament recently issued a new law (Law n. 62 of April 18, 2005) on price-sensitive information and market abuse, amending the Consolidated Securities Law, in order to implement EU Directive 6 of January 28, 2003. The new law sets forth precautionary measures aiming at strengthening the level of protection and the proper use and disclosure of price-sensitive information.

Intermediaries

Securities market participants in Italy include (subject to partially different conditions) investment firms such as SIMs, financial intermediaries the persons entered in the Special Register and banks. Banks, the investment firms and authorized financial intermediaries are allowed to provide investment services, including: professional brokerage and dealing in securities, underwriting and placement, asset management, retail distribution of securities and advisory services regarding investments in securities. As mentioned before, these intermediaries are regulated by CONSOB and the Bank of Italy, and have to observe prudential regulations and rules on transparent and fair business dealing (such as disclosure duties and rules on conflict of interest).

Because of the recent reform of Italian corporate law, a new important provision had an impact on the liability regime related to dealing and brokerage of corporate bonds applicable to intermediaries. Under the new rules, with reference to private placements of corporate bonds, the intermediary that sells such corporate bonds to "retail" investors, carrying out dealing and brokerage services, is liable, where the amount of bonds issued exceeds a certain level, to such investors for the insolvency of the issuer.

As for the legal framework regarding investment services, a new European directive was enacted in 2004 (Directive 39 of April 21, 2004), repealing and replacing EU directive 93/22. The EU member states, Italy included, are required to implement the new regulations by April 30, 2006.

Mutual Funds

The marketing, promotion, organization and ownership of mutual funds and the management of SICAVs (even if established by third parties) are reserved for a specific category of authorized intermediaries, SGR (*società di gestione del risparmio*) and SICAV (*società di investimento a capitale variabile*). The rules concerning the investment limits of mutual funds, with respect to single sectors or companies and overall minimum portfolio diversification, are set by the Ministry of Economy and Finance. The reform introduced by the Consolidated Securities Law allows SGRs, supervised by the Bank of Italy for those aspects concerning financial stability and risk management policies, to operate in the sector of asset management. Regulations on mutual funds were recently revised by the Bank of Italy. A new regulation was issued on April 14, 2005. The regulation is aimed at ensuring, among other things, full compliance with EU provisions.

Corporate Governance

The following is a discussion of Italian corporate governance regulatory framework. For a discussion of the comparative analysis between NYSE corporate governance standards and Sanpaolo IMI corporate governance practice see: Item 6. "Directors, Senior Management and Employees C. Board Practices Comparative Analysis between NYSE Corporate Governance Standards and Sanpaolo IMI Corporate Governance Practice" on page 189 below.

Italian regulatory framework

A specific section of the Consolidated Securities Law is devoted to the corporate governance of listed companies. This section contains, among others, provisions concerning both voluntary and mandatory tender offers; the disclosure of interests held by the shareholders, of interlocking interests and of shareholder agreements. The board of statutory auditors was given broader powers to examine the management of the company, and further measures to protect minority shareholders were added. The Consolidated Securities Law introduced a special system for the voting of proxies at the shareholders' meetings of listed companies and for the solicitation and collection of such proxies; CONSOB regulations specify the methods and procedures.

In 1999, a committee, coordinated by the Chairman of Borsa Italiana (the "Committee") and composed of representatives of Italian banks, industries, insurance companies and associations of issuers and investors, prepared a Code of Self-Regulation for listed companies (the "Code"), a model of corporate governance that emphasizes the role and the responsibilities of the board of directors and ensures a balanced division of power among the executive and non-executive members of the board of directors, the auditing department and the relation with all the shareholders. The Code recommends the constitution within the board of directors of certain technical committees. According to the Code, the board of directors is required to appoint, within the board of directors itself, a committee for internal control (*Comitato per il controllo interno*). The purpose of such committee is to advise and make proposals. The committee for internal control is composed of non executive directors, the majority of which is independent. The chairman of the board of auditors or another auditor appointed by the chairman of the board of auditors participates in the committee's meetings. As for the composition, tasks and powers of the committee for internal control in Sanpaolo IMI; see: Item 6. "Directors, Senior Management and Employees C. Board Practices Committee for Internal Control and Internal Audit Department" at page 188 below.

The importance of the Code, whose application is voluntary, was immediately acquired by the market. The Board of Directors of Sanpaolo IMI adhered to the Code in 2000. Borsa Italiana currently requires all companies applying for listing on MTA to submit a statement comparing their corporate governance model to the model of the Code. In 2002, the Committee revised the Code to reinforce the independence of the non-executive members of the Board of Directors, the correct handling of confidential information, the responsibility of the board of Directors for the internal control system and the compliance with criteria of substantial and procedural fairness with reference to the transactions with related parties. In April 2005 Borsa Italiana promoted the constitution of a new committee to revise the Code and, eventually, adopt a new code taking into consideration new EU law provisions.

Moreover, in January 2003, the Italian Government approved a reform of corporate law (the "Reform"), governing limited liability and joint-stock companies and co-operatives. The Reform, whose provisions became part of the Italian Civil Code, introduced more flexible corporate models as well as rules concerning, among others, simplification of the incorporation procedures and the issuance of new financial instruments by limited liability and joint-stock companies. The Reform became effective on January 1, 2004. Provisional regulations were enacted to allow companies to gradually conform to the Reform. Full compliance with the Reform was required by September 30, 2004.

The main innovations introduced by the Reform with regard to companies relate to their corporate governance. Together with the "ordinary" system, which is the traditional organizational structure which entails three different corporate bodies with different tasks and powers, the shareholders' meeting, management and supervisory bodies (the board of directors or sole director and the board of statutory auditors), the new rules provide for two other models: the "single" system and the "dual" system. Each company is able to elect which corporate governance system, among those listed below, it wants to implement.

The Italian Legislative Decree No. 37/04, approved on February 6, 2004, modified the Consolidated Banking Law and the Consolidated Securities Law to coordinate their provisions on banks and listed companies with the provisions of the Reform. The amendments to the Consolidated Banking Law and the Consolidated Securities Law include, among others, amendments relating to the duties and responsibilities of the administrative and supervisory bodies of the companies provided by the new models of governance. Moreover, on December 28, 2004, the Italian Government issued Legislative Decree No. 310/2004, which further modified the Consolidated Banking Law and the Consolidated Securities Law in order to complete the reform process and remove all the inconsistencies noticed during the first year of effectiveness of the Reform.

The following are the three models of governance which companies are able to adopt pursuant to the Reform:

The "ordinary system" is based on the shareholders' meeting, which appoints the administrative body (the board of directors or the sole director) and the supervisory body (the board of statutory auditors).

The "dual system" involves a management board which manages the company, plus a supervisory board, appointed at the shareholders' meeting. The supervisory board must have at least three members, one of whom must be listed on the Italian auditors' register. The supervisory board is responsible for appointing and removing the members of the management board, approving the accounts and bringing any claims against the members of the management board. The supervisory board is, substantially, assigned the tasks and powers which are reserved to the shareholders' meeting in the "ordinary" system;

The "single system" involves a board of directors with administrative tasks, appointed at the shareholders' meeting, plus a 'supervisory management board' within the board of directors itself. The supervisory management board is appointed by the board of directors unless otherwise provided by the By-laws.

Italian banks are not allowed to adopt the new corporate models provided by the Reform until new regulations on corporate governance and organization implementing the Reform are enacted by the Bank of Italy.

Therefore, Sanpaolo IMI whose corporate governance framework reflects the mandatory provisions of Italian corporate law and securities laws is required to maintain the "ordinary" system. The organizational structure of the Parent Bank is based on:

The shareholders' meeting;

The Board of Directors, which is responsible for the strategic direction of the Group and its ordinary and extraordinary administration (except for those powers expressly attributed to the exclusive responsibility of the shareholders' meeting) and which consists of executive and non-executive Directors;

The Technical Committees (among which are the Remuneration and Personnel Policies Technical Committee and the Committee for Internal Control, see: Item 6. "Directors, Senior Management and Employees C. Board Practices" on page 187 below), consisting of Directors, as well as consultative and management functions designed to support the Board of Directors; and

The Board of Statutory Auditors (*Collegio Sindacale*) (see: Item 6. "Directors, Senior Management and Employees A. Directors and Senior Management" on page 176 below).

D. Organizational Structure

See: Item 4. "C. Business Overview" on page 82 above.

E. Property, Plants and Equipment

Sanpaolo IMI owns the headquarters buildings of the Sanpaolo IMI Group, located in Turin, and secondary offices located in Rome and in Bologna. In addition, Sanpaolo IMI owns or leases other properties in Italy and abroad which are used for Group operations or leased to third parties.

Sanpaolo IMI has conducted an audit of any environmental issues that may affect the use of its assets. Full details of this analysis are published in its "Social Report" (*Bilancio Sociale*) which is available in English on Sanpaolo IMI's website: www.grupposanpaoloimi.com, under "corporate social responsibility". The Social Report considers direct environmental impact (energy consumption, recyclable publication expenses, waste disposal, atmospheric emissions and water consumption) and indirect impact (financings of environmentally sensitive projects and ethical investment funds).

Management believes that Sanpaolo IMI is compliant with all relevant environmental standards in Italy and abroad and pursues a policy of adherence to best international practices.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

The following discussion is based on and should be read in conjunction with, the Consolidated Financial Statements included in this report, which have been prepared in accordance with Italian GAAP. Italian GAAP differs in certain significant respects from U.S. GAAP. For a summary of the significant differences between Italian GAAP and U.S. GAAP, see: Note 29 to the Consolidated Financial Statements on page F-164 below. The Consolidated Financial Statements have not been reclassified in order to comply with the format required for the consolidated statements of income and balance sheets of bank holding companies pursuant to Regulation S-X under the U.S. securities laws, but have been presented in the same format as that used in the consolidated financial statements included in our annual report to shareholders prepared pursuant to Italian law (which we refer to as our Italian annual report).

Presentation of Results

In the discussion that follows, for each of the financial years ended December 31, 2004 and December 31, 2003, we review:

the audited, consolidated statement of income for the year, comparing the results for each line item with those of the audited, consolidated statement of income for the preceding year;

a comparison between the unaudited, reclassified statement of income for the year and the unaudited, reclassified statement of income for the preceding year; and

for the year ended December 31, 2003, an additional comparison between the audited or reclassified consolidated statement of income for the year, as applicable, and the unaudited, pro forma consolidated statement of income for the preceding year.

We also discuss our operating results broken down by the Business Sectors identified in Item 4. "Information on Sanpaolo IMI C. Business Overview" on page 82 above.

The reclassified income statements presented in this discussion are derived from and reconciled to the audited income statements, and are prepared consistently with and as authorized by Italian law and regulations. With two main exceptions, the differences between our audited and reclassified income statements are formatting and presentation differences. The two main exceptions relate to the reclassification of certain income and expense amounts with respect to our securities dealing and merchant banking activities to line items that we believe are more closely related to such activities. For a fuller explanation, see: Item 3. "B. Selected Financial Data Reconciliation Between Audited and Reclassified Income Statements" on page 14 above. The reclassified income statements also form the basis of management's discussion and analysis of operating results in our Italian annual report.

The pro forma income statements presented in this discussion were neither required to be, nor were, prepared in accordance with Article 11 of Regulation S-X under the U.S. securities laws. They were prepared pursuant to and in accordance with Italian law and regulations and are reconciled to the audited and reclassified income statements as shown in " Explanatory Notes to the Pro Forma Income Statements" on page 158 below. In effect, each pro forma income statement was prepared as if the changes in the scope of consolidation that occurred in the succeeding financial year had occurred in the financial year presented in the pro forma income statement. This allows the results of each financial year to be compared with the results of the preceding financial year as if the scope of consolidation of the preceding financial year had been the same.

For this reason, management believes the pro forma results for the year ended December 31, 2002 are meaningful in showing the trends underlying Sanpaolo IMI's results in 2003. The pro forma income statements also form the basis of the preceding year's income statement in management's discussion and analysis of operating results in our Italian annual report.

Our Consolidated Financial Statements included in this report do not present a breakdown of operating results by Business Sector, as there is no such requirement under Italian law or Italian GAAP and thus no Italian accounting principle applicable to segment reporting. Management does not prepare operating results by Business Sector derived from our Consolidated Financial Statements for any purpose. However, for purposes of strategic and operational planning, management prepares reclassified income statements broken down by Business Sector. These Business Sector income statements reflect the organizational structure of the Group and are based on the reclassified income statements that form the basis of management's discussion and analysis of operating results in our Italian annual report. Consequently, the discussion of our operating results by Business Sector in this report is based solely on our reclassified income statements. See: " A. Results of Operations for the Three Years Ended December 31, 2004" on page 109 below.

General Factors Affecting Sanpaolo IMI's Business

The International Economy

In 2004, the global economy grew at a particularly fast rate. According to the most recent estimates, world output grew at a pace well above 4%, over one percentage point more than 2003. The recovery was led by the United States, China and India, which provide a strong impulse to international trade. Emerging countries showed the highest development rates of the last twenty years; countries in transition maintained sustained growth rates; even mature economies despite considerable cyclical differences on the whole registered stronger economic activity than in 2003.

Considering the numerous adverse shocks the rise in the price of commodities, especially oil, the fall in value of the U.S. dollar and the considerable geopolitical instability in the Middle East the global economy has shown a surprising capacity for absorption, albeit with certain geographical differences.

The United States reported a solid economic performance in 2004. Its GDP grew at an annual rate of 4.4%, benefiting from the impulse of the expansionary fiscal and monetary policies of the past three years. However, its public sector and foreign trade deficits have worsened. In 2004, the public sector deficit reached \$412 billion and the foreign trade deficit exceeded \$617 billion.

Despite the dramatic rise in the prices of commodities and imported goods, inflation remained under control in the United States. Consumer prices showed relatively contained increases on the whole, although there was some inflationary pressure at the end of the year. Inflation rose to 3.3% in December 2004 from 1.9% at the end of 2003. During 2004, the Federal Reserve Board changed the stance of its monetary policy. From June 2004 onwards, a series of increases took the policy rate from 1% to 2.25% by December 2004, a level that nevertheless remains historically low. Despite the recovery in money market rates, long-term rates, following a dramatic increase in the first half of 2004, showed a downward trend in the second half of the year.

The release of figures on the growing deficit, as well as rumors of possible changes in the composition of some of the major central banks currency reserves, weakened the U.S. dollar against most free-floating currencies. At the end of December 2004, the euro and the yen had increased in value by 7.9% and 4.9%, respectively, against the U.S. dollar and the dollar-pegged Chinese yuan.

The Euro Zone and the Italian Economy

In 2004, the Euro zone (by which we mean the EU member states that have adopted the euro as their currency) grew at a slower than expected rate of 1.8%, 0.5% more than the previous year. In the first part of 2004, the international trade balance favored exports, offsetting the stagnant trend in domestic demand. However, in the second half of the year, the lower contribution of exports, partly linked to the increase in value of the euro against the U.S. dollar and the Chinese yuan, led to a fall in manufacturing.

Among Euro zone members, Germany and Italy had the lowest growth rates: 1% and 1.1%, respectively, over the whole year, with a contraction of economic activity in the last quarter. The growth performance of the two countries was largely affected by the weakness of domestic demand. France and Spain showed livelier trends with growth rates of 2.3% and 2.6%, respectively, due to the positive dynamics of household consumption, which was sustained by a large increase in real estate prices.

The public balance of payments worsened, despite an improvement in the market situation compared with 2003, approaching an average deficit of 3% for the whole European Union. Among Euro zone countries, public sector net debt reached 3.9% in Germany and 3.7% in France.

Inflation in 2004 was 2.1%, largely in line with 2003, but with a more volatile pattern owing to the extensive swings in oil prices. The European Central Bank ("ECB") kept the policy rate at 2% for the whole of 2004.

The modest growth of Italy's GDP in 2004 was largely due to the stagnation that has characterized the manufacturing industry for several years. During 2004, companies in Italy were negatively affected by weak domestic demand, but benefited from the positive dynamics of foreign demand, which, however, grew at a lower rate compared with the overall trend in international trade. The decrease in Italy's share of international trade is related, on the one hand, to the erosion of its competitiveness and, on the other, to the lower growth in international demand for typical Italian products. At sectorial level, there was a significant decrease in the fashion and mechanical sectors. On the other hand, the construction sector, in expansion since 1999, showed a positive trend.

Lower income from one-off taxes, compared with 2003, was a burden for Italy's public finances. Government net debt worsened in 2004, increasing to 3% of GDP from 2.9% in 2003. However, public sector debt as a percentage of GDP continued to fall gradually (105.8% in 2004 compared to 106.3% in 2003).

The rate of inflation in Italy was 2.2% in 2004. The inflationary trend in consumer prices slowed considerably towards the end of the year, falling below the Euro zone average.

The Italian Banking Sector

In 2004, a weak economy constrained the dynamics of banking loans in Italy, which, however, still increased at a rate higher than nominal GDP.

Loans increased by 5.5% in 2004 compared with 6.3% in 2003. The overall trend was sustained by a significant increase in household loans (+13.4%). Mortgages, still in considerable expansion (+19.8%), were encouraged, on the one hand, by the substantial increases in prices and sales in the real estate market and, on the other, by the persistence of particularly favorable financing conditions. Consumer credit, while continuing to account for a small part of total household debt (below the average of the main European countries), increased at a sustained pace (+15.4%). The other categories of household loans grew at a lower rate (+4.4%).

Loans to non-financial companies showed, on the whole, a smoother trend (+4.7%), paying heavily for the stagnation of manufacturing activity and the probable postponement of companies' investment decisions. Among the various business sectors, loans to services connected with the transportation sector were the most heavily penalized (-15.3%). On the other hand, in line with the positive dynamics of the relevant economic sector, loans to other services, including real estate services, showed the most significant growth (+16.6%). After years of decline, in 2004 loans to the public sector began to grow again (+1.7%). Long-term credit to companies grew at considerably higher rates (+8.1%) compared with short-term credit (+0.4%), indicating the continuation of the re-composition of the financial structure of companies towards longer-term funding.

In 2004, non-performing loans decreased by 2%. The main risk ratios (including the net non-performing loans/net loans ratio) consequently reflected a slight improvement in credit quality.

The climate of uncertainty that characterized 2004 favored a significant increase in the preference for liquidity and prudent financial investment by households. In this setting, bank deposits increased by 6.9% due to the contribution of total deposits (+4.8%), led by demand deposits (+6%) and bonds, which continued to grow considerably (+10.3%).

With money market reference rates substantially stable, the average rate on banks' interest-bearing liabilities in 2004 remained at the levels of year-end 2003. On the other hand, the average yield on banks' interest-earning assets continued to fall, especially for the household sector. At the end of 2004, the short-term interest spread on household and non-financial company loan rates was 10 basis points lower than at year-end 2003.

The International and Italian Equity Markets

The main international share indices reflected an alternating trend in the first nine months of 2004 before ending the year with a net gain compared to 2003. The S&P 500 gained 9%, the Nikkei 7.6%, the DJ Euro Stoxx 9.9% and the Mibtel 18.1%. Globally, equity markets benefited largely from two factors: a positive trend in company earnings, generated not only by cost reductions but also especially in the United States by increases in operating revenues and the particularly low level of nominal and real interest rates.

Owing to the recovery of prices, the stock market capitalization of Italian companies listed on domestic exchanges rose to €581 billion in 2004, a strong increase also as a percentage of GDP (43.1% at year-end 2004 compared with 37.6% at year-end 2003). There were eight new listings, in Italy in 2004 compared to four in 2003. Capital raised through public offerings in 2004 amounted to €12 billion compared to €2.8 billion in 2003, on the basis of 18 transactions compared with six transactions in 2003. The total funds raised by listed companies through capital increases, on the other hand, fell to €3.3 billion in 2004 compared with €9.8 billion in 2003, on the basis of 23 transactions compared to 28 in 2003. The average daily value of shares traded was €2.9 billion in 2004 compared with €2.7 billion in 2003.

The Italian Asset Management Sector

In a scenario characterized by uncertain economic conditions, a considerable increase in real estate prices and a prudent attitude by Italian households in favor of lower-risk financial investments, the asset management industry grew at a lower rate in 2004 than in 2003.

At December 31, 2004, the value of investment funds managed by Italian intermediaries was €515.4 billion, an increase of 1.3% compared with year-end 2003. The increase was due to a positive revaluation of share and bond prices, which was partially offset by significant disinvestment outflows. As of December 31, 2004, there was a net outflow of funds, primarily attributable to the second half of the year, totaling €10.5 billion. The capital outflow affected all categories of funds, apart from so-called flexible funds, which are income funds that can invest in a variety of interest-paying instruments. The deficit was particularly large for liquidity funds (- €6.5 billion euro).

A. Results of Operations for the Three Years Ended December 31, 2004

1. Changes in the Scope of Consolidation

Our results of operations fully consolidate all Italian and foreign subsidiaries engaged in banking, finance or related activities in which we hold, directly or indirectly, more than 50% of the voting rights or which we otherwise control, with the exception of certain minor subsidiaries not material to us, or which are subject to liquidation proceedings or agreements for their disposal. The scope of full

consolidation also excludes SGA, the company that acquired the non-performing loans of the former Banco di Napoli. See: Note 17 to the Consolidated Financial Statements on page F-111 below.

All Italian and foreign subsidiaries engaged in banking, finance or related activities which we jointly control with other shareholders are consolidated under the proportional method. Under this method, our proportional share of the results of operations, assets and liabilities of such entities is included in our financial statements.

Other entities not engaged in banking, finance or related activities, or over which we exercise significant influence by holding, directly or indirectly, between 20% and 50% of the voting rights, are accounted for under the equity method. In addition, in accordance with Bank of Italy regulations, all Italian and foreign subsidiaries engaged in insurance-related activities are consolidated under the equity method, independently of the percentage of the Group's equity interests in such subsidiary. Under this method, our equity in the earnings of such entities (i.e., our proportional share in their profits or losses) is included in our financial statements. For a more detailed explanation of the basis on which we consolidate our subsidiaries and other entities, see: Note 2 to the Consolidated Financial Statements on page F-7 below.

2004 Compared with 2003

There were no material changes in the Group's scope of consolidation in the year ended December 31, 2004 compared with 2003.

2003 Compared with 2002

The main changes in the scope of consolidation in the year ended December 31, 2003 compared with 2002 were:

First, the full consolidation in the 2003 financial statements of the following companies, which had been consolidated under the equity method in the 2002 financial statements:

Eptaconsors S.p.A. ("Eptaconsors") and its subsidiaries, following the increase in the equity interest held by the Group which, in the first half of 2003, rose from 40.48% to 100%. In the fourth quarter of 2003, Eptaconsors and its subsidiary, Eptasim S.p.A., were merged into Invesp S.p.A; and

Inter-Europa Bank RT and its principal subsidiaries, following the increase in the equity interest held by the Group in 2003 from 32.51% to 85.87%.

Second, the proportional consolidation in the 2003 financial statements of Cassa dei Risparmi di Forlì S.p.A. ("Cassa dei Risparmi di Forlì"), following the acquisition of joint control by the Parent Bank, which, in May 2003, increased its equity interest from 21.02% to 29.77%. In the 2002 financial statements, Cassa dei Risparmi di Forlì had been consolidated under the equity method.

Third, accounting using the equity method in the 2003 financial statements of the following companies, which had been fully consolidated in the 2002 financial statements:

IW Bank S.p.A., following the disposal at the beginning of 2003 of the 80% equity interest previously held by Banca IMI; and

Banque Sanpaolo S.A. and its subsidiaries, following the disposal in December 2003 of a 60% equity interest previously held by the Parent Bank.

Fourth, accounting using the equity method in the 2003 financial statements of Finconsumo Banca S.p.A. ("Finconsumo"), as a result of the entry into a sale agreement and termination of joint control by the Parent Bank, after which a 20% equity interest was sold. In the 2002 financial statements, Finconsumo had been proportionately consolidated.

Fifth, Synesis Finanziaria S.p.A., the holding company of FIDIS Retail Italia, was included in the scope of consolidation for the first time in 2003, under the equity method, following the Group's acquisition of a 25% equity interest.

2. Year Ended December 31, 2004 Compared with Year Ended December 31, 2003

Overview

The results of the Group for the year ended December 31, 2004 showed an improvement compared to 2003 in all the principal indicators for profitability, efficiency and asset quality. Net income was €1,393 million, an increase of 43.3% compared to 2003; and RoE was 12.2%, 3 percentage points higher than in 2003. We also improved our cost to income ratio, which fell to 63.5% from 65.3% in 2003. Our net non-performing loans/net loans ratio remained effectively stable at 1%.

This performance was made possible by a positive trend in revenues, primarily due to commissions and profits from companies carried at equity, and the constant monitoring of expenses leading to a reduction in operating costs, as well as an increase in net extraordinary income compared with net extraordinary expenses in 2003 that were primarily attributable to staff leaving incentive plans. Net income for the year was above our budget target, continuing the growth begun in 2003.

Net Interest Income

The following table sets forth the components of the Group's net interest income for the years ended December 31, 2004 and 2003, based on its audited income statement.

Audited Consolidated Statement of Income

	2004	2003	%
	_____	_____	_____
	(millions of €)		
10. Interest income and similar revenues	7,195	7,443	(3.3)
20. Interest expense and similar charges	(3,508)	(3,701)	(5.2)
	_____	_____	_____
	3,687	3,742	(1.5)
	_____	_____	_____

In 2004, the difference between interest income and interest expenses, which we refer to as net interest income, decreased by 1.5% to €3,687 million compared with €3,742 million in 2003.

Net interest income in 2004 was positively affected by the results of Banca IMI, which produced net interest income of €118 million, a 353.8% increase compared with net interest income of €26 million in 2003. This increase was due to a further reduction in Banca IMI's financing needs, attributable to the continuing decrease in its arbitrage activities with respect to equities as a result of changed market and other conditions. Banca IMI's net interest income is related to securities dealing activities rather than banking activities. Management believes that excluding the impact of Banca IMI's net interest income is helpful to a better understanding of the components of and reasons for the year-on-year changes in net interest income from the Group's banking activities. See: Item 3. "Selected Financial Data Reconciliation Between Audited and Reclassified Income Statements" on page 14 above.

Excluding Banca IMI's net interest income, as shown in our reclassified income statement discussed below, the Group's net interest income in 2004 was €3,569 million, a 4.0% decrease compared with €3,716 million in 2003. This decrease in net interest income was due to the net effect of changes in the average spread and a net reallocation of average balances towards lower-yielding activities, which reduced net interest income by €187 million, partially offset by the net effect of changes in the average balances of interest-earning assets and interest-bearing liabilities, which increased net interest income by €40 million.

Both components of net interest income, interest income and interest expense, decreased in 2004 compared with 2003. Interest income decreased by 3.3% to €7,195 million from €7,443 million, and interest expense decreased by 5.2% to €3,508 million from €3,701 million. The decrease in interest income resulted primarily from a decrease in market interest rates and, to a lesser extent, from a net reallocation of volumes towards lower-yielding activities. The decrease in interest expense was primarily attributable to the decrease in market interest rates.

The interest rate that serves as the benchmark for short-term loans, the three-month Euribor rate, decreased to an average rate of 2.11% in 2004 from an average rate of 2.33% in 2003. This decrease was reflected in the average yield on the Group's interest-earning assets and the average cost of interest-bearing liabilities in 2004, which, excluding the average balances and interest income and expense of Banca IMI, were 4.23% and 2.01%, respectively, compared to 4.53% and 2.20%, respectively, in 2003. Since the decrease in the average yield on our interest-earning assets was greater than the decrease in the average cost of our interest-bearing liabilities, our average interest spread in 2004 decreased to 2.22% from 2.33% in 2003.

Average Balances and Interest Rates

The following tables show, on the basis of Sanpaolo IMI's reclassified financial statements, the average balances and interest rates, by category and by currency, of the Group's interest-earning and non-interest-earning assets and interest-bearing and non-interest-bearing liabilities for the years ended December 31, 2004, 2003 and 2002. Our loans and other interest-earning assets are presented net of any write-offs and any allowance for probable loan losses (including, for performing loans, any allowance for general risks). For purposes of these tables, (i) average balances have been determined based on daily figures for interest-earning assets and interest-bearing liabilities of Sanpaolo IMI, Sanpaolo Banco di Napoli S.p.A., Banca Fideuram S.p.A. ("Banca Fideuram"), Banca OPI, Banca Popolare dell'Adriatico S.p.A., Cassa di Risparmio di Padova e Rovigo S.p.A., Cassa di Risparmio di Venezia S.p.A., Cassa di Risparmio in Bologna S.p.A., and Friulcassa S.p.A., and on quarterly figures for all the other assets and liabilities of the Group; management believes that the average figures below present substantially the same trend as would be presented by daily averages; (ii) interest income and expense in the following tables vary from the amounts presented in the Consolidated Financial Statements (see footnotes to tables below for further details); (iii) tax-exempt income has not been calculated on a tax-equivalent basis because the effect of such calculations would not be significant; and (iv) the average balance of non-accruing loans has been included in the average balance of non-interest-earning assets.

(1) For the year ended December 31, 2002, the average balance, interest and average yield for certain items differ from those reported in our 2002 annual report because of reclassifications made to ensure consistency with and comparability to the methodology used for the year ended December 31, 2003. The impact of such changes, which include the reclassification of the former Cardine group's non-accruing loans from interest-earning assets to non-interest-earning assets and the reclassification of capitalization certificates from securities to loans, is the following:

loans and leases to non-credit institutions: the average balance decreased from €118,868 million to €116,467 million; interest decreased from €6,732 million to €6,756 million; and the average yield increased from 5.66% to 5.80%;

trading account securities and investments: the average balance decreased from €17,351 million to €16,722 million; interest decreased from €750 million to €726 million; and the average yield increased from 4.32% to 4.34%; and

non-interest-earning assets: the average balance increased from €50,299 to €53,329.

(2) Total interest income varies by €565 million, €378 million and €527 million from income as shown in the Consolidated Financial Statements for the years ended December 31, 2004, 2003 and 2002, respectively, due to the following differences:

the reclassification of interest income of Banca IMI that relates to securities dealing activities of €552 million, €402 million and €447 million in 2004, 2003 and 2002, respectively; and

the reclassification of interest income (and expense) on derivatives contracts hedging interest rate risk, which in the Consolidated Financial Statements are netted together, but which in the above table are netted against interest income (or expense) of the respective assets or liabilities hedged by the derivatives. Such amounts decreased interest income and interest expense by €13 million in 2004; increased interest

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

income and interest expense by €24 million in 2003; and decreased interest income and interest expense by €80 million in 2002.

- (3) Represents interest income as a percentage of average interest-earning assets.
- (4) This line item comprises the credits from SGA. SGA is the company established to recover non-performing loans of Banco di Napoli. See: Note 17 to the Consolidated Financial Statements on page F-111.

(1) Total interest expense varies by €447 million, €352 million and €562 million from expense as shown in the Consolidated Financial Statements for the years ended December 31, 2004, 2003 and 2002, respectively, due to the following differences:

the reclassification of interest expense of Banca IMI that relates to securities dealing activities of €434 million, €376 million and €482 million in 2004, 2003 and 2002, respectively; and

the reclassification of interest income (and expense) on derivatives contracts hedging interest rate risk. For details, see footnote 2 to the "assets" table of our average balance sheet at page 113 above.

(2) Represents interest expense as a percentage of average interest-bearing liabilities.

(3)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Represents senior and subordinated debt issued by the Group.

(4)

Average shareholders' equity includes net income.

(1) Represents the average balance for the year minus the average balance for the previous year, multiplied by the average yield for the year.

(2)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Represents the average yield for the year minus the average yield for the previous year, multiplied by the average balance for the year.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

- (3) Represents the difference between Net Change and the sum of Volume and Rate.
- (4) Represents interest for the year minus interest for the previous year.
- (5) Consists of the receivable from SGA. SGA is the company established to recover non-performing loans of Banco di Napoli. See: Note 17 to the Consolidated Financial Statements on page F-111 below.
- (6) Represents senior and subordinated debt issued by Group.

Excluding Banca IMI, the average balance of the Group's interest-earning assets remained effectively stable, increasing by only €790 million, or 0.5%, compared with 2003. This increase was primarily due to:

an increase of €2,360 million, or 19.0%, in interbank deposits and loans to credit institutions;

an increase of €1,984 million, or 13.7%, in trading account securities and investments, which was primarily attributable to Banca OPI's financing activities, including the purchase of bonds issued by the public sector (mainly local authorities in Italy and foreign governments and agencies) and by companies operating in the financing and construction of public works;

a decrease of €3,066 million, or 28.4%, in financings in the form of reverse repurchase agreements, which was primarily attributable to the interbank sector; and

a €613 million decrease in the receivable from SGA, the company established to recover non-performing loans of Banco di Napoli, as the loan balance is gradually paid down. See: Note 17 to the Consolidated Financial Statements on page F-111.

The average balance of loans and leases to non-credit institutions remained virtually unchanged at €116,784 million in 2004 a mere increase of €125 million, or 0.1%, compared to 2003. This reflected an increase in the level of lending to households and non-financial institutions, offset by a decrease in the level of lending to family businesses and financial companies and, to a lesser extent, governments and other public bodies.

Excluding Banca IMI, the average balance of the Group's interest-bearing liabilities also remained stable, decreasing by only €197 million, or 0.1%, compared with 2003. This result was affected by:

a decrease of €2,882 million, or 25.7%, in funding in the form of repurchase agreements, primarily attributable to the interbank sector;

a decrease of €2,497 million, or 10.3%, in deposits and other borrowings from credit institutions;

an increase of €3,758 million, or 5.6%, in deposits and other borrowings from non-credit institutions, primarily due to increases in demand deposits and saving accounts, which were only partially offset by decreases in certificates of deposit and commercial paper; and

an increase of €1,424 million, or 2.8%, in securities and subordinated liabilities, primarily due to the issuance by the Group (including the Parent Bank) in 2004 of €4.57 billion of senior debt and €1.13 billion in subordinated (lower Tier II) debt.

The increases in interbank deposits and loans to credit institutions and the decrease in reverse repo financings, repo funding and funding from deposits and other borrowings from credit institutions were all primarily due to an increase in our funding in deposits and other borrowings from non-credit institutions (and, to a lesser extent, in securities and subordinated liabilities), as customers shifted out of managed assets and continued their shift from certificates of deposit towards more liquidity, primarily in the form of demand deposits. This led us to reduce our funding from other banks, to reduce the amount of certificates of deposit issued by foreign branches and subsidiaries of the Group and to increase our lending to other banks in forms other than reverse repos.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Excluding Banca IMI, the difference between the average balance of non-interest-bearing liabilities and shareholders' equity on the one hand and the average balance of non-interest-earning assets on the

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

other hand, which we refer to as the funding imbalance, was €4,741 million in 2004 compared to €3,754 million in 2003, an increase of €987 million. The effect of this increase was to increase the amount of non-interest-bearing liabilities available to fund interest-earning assets, which positively affected our net interest income.

The following table sets forth the components of that Group's net interest income for the years ended December 31, 2004 and 2003, based on our reclassified income statement.

Reclassified Consolidated Statement of Income		2004	2003	%
(millions of €)				
10.	Interest income and similar revenues	7,195	7,443	(3.3)
30.c)	Dividends from equity investments under 20% of stake, treated as interest			
10.a)	Interest margin of Banca IMI Group(1)	(118)	(26)	353.8
20.	Interest expense and similar charges	(3,508)	(3,701)	(5.2)
	Net interest income	3,569	3,716	(4.0)

(1) Reclassification of (positive)/negative net interest income of Banca IMI Group to "Profits (losses) on financial transactions and investment income" as it is related to securities dealing activities rather than banking activities.

On the basis of the reclassified income statement, in 2004, net interest income decreased by 4.0% from €3,716 million in 2003 to €3,569 million. The components of and reasons for this decrease in net interest income are the same as described under our audited income statement above.

The following table shows the Group's average yield, net interest margin and average interest spread, including the effect of hedging (see footnote 2 to the "Assets" table of our average balance sheet on page 113 above), for the years ended December 31, 2004, 2003 and 2002.

	Year ended December 31,		
	2004	2003	2002
(percentages)			
Average yield(1)	4.23	4.53	5.30
Euro	4.35	4.75	5.54
Non-euro	2.92	2.61	3.32
Net interest margin(2)	2.28	2.38	2.45
Euro	2.40	2.57	2.65
Non-euro	0.97	0.74	0.80
Average interest spread(3)	2.22	2.33	2.36
Euro	2.34	2.53	2.57
Non-euro	0.84	0.58	0.59

(1) Represents interest income as a percentage of average interest-earning assets.

- (2) Represents net interest income as a percentage of average interest-earning assets.
- (3) Represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.

Net Commissions (and Other Dealing Revenues)

The following table sets forth the components of the Group's net commissions for the years ended December 31, 2004 and 2003, based on our audited income statement.

Audited Consolidated Statement of Income		2004	2003	%
(in millions of €)				
40.	Commission income	3,998	3,722	7.4
50.	Commission expense	(761)	(685)	11.1
		3,237	3,037	6.6

In 2004, the difference between commission income and commission expense, which we refer to as net commissions, increased by €200 million, or, 6.6% to €3,237 million from €3,037 million in 2003.

The growth in net commissions occurred across all areas, except for "other commissions, net". Net commissions from asset management, securities brokerage and advisory services, which accounted for 58.8% of total net commissions, increased by €128 million, or 7.2%, to €1,904 million in 2004 from €1,776 million in 2003. This increase was due to:

an increase of €167 million, or 11.3%, in net commissions from asset management to €1,646 million in 2004 from €1,479 million in 2003. This increase was primarily due to (i) the reallocation of assets under management to higher added-value instruments, including an increase in financial policies and similar insurance contracts in the life sector, and (ii) the positive performance of the financial markets, reflected in a 0.5% increase in the value of assets under management to €144,485 million at December 31, 2004 from €143,711 million at December 31, 2003. Both of these factors more than compensated for a €3.6 billion net outflow of assets under management; and

a decrease of €39 million, or 13.1%, in net commissions from securities and currency brokerage and custody activities to €258 million in 2004 from €297 million in 2003, primarily due an overall decrease in transaction volumes.

Among the other components of net commissions, net commissions from loans and guarantees increased by €52 million, or 18.5%, to €333 million in 2004 from €281 million in 2003; net commissions from collection and payment services increased by €9 million, or 3.8%, to €248 million in 2004 from €239 million in 2003; and net commissions from current and savings accounts increased by €43 million, or 8.8%, to €531 million in 2004 from €488 million in 2003. These increases were due both to increased transaction volumes and the impact of tariff increases. Other net commissions decreased by €28 million, or 11.1%, to €224 million in 2004 from €252 million in 2003, primarily due to a decrease in other services and tax collection services.

In 2004, the ratios of net commissions to, respectively, administrative costs and payroll costs were 70.9% and 115.6%, respectively, a significant improvement compared with 65.9% and 106.9%, respectively, in 2003.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table sets forth the components of the Group's net commissions for the years ended December 31, 2004 and 2003, based on our reclassified income statement.

Reclassified Consolidated Statement of Income		2004	2003	%
(in millions of €)				
40.	Commission income	3,998	3,722	7.4
50.	Commission expense	(761)	(685)	11.1
70.a)	Income from sale of merchant banking activities, other income from leasing activities	13	20	(35.0)
110.a)	Loss from merchant banking activities, other charges on the leasing activities	(10)	(21)	(52.4)
Net commissions and other dealing revenues		3,240	3,036	6.7

(1) This item is made up of the following components of Item 70. "Other operating income": income from sale of merchant banking activities, other income from leasing activities.

(2) This item is made up of the sum of the following components of Item 110. "Other operating expenses": losses from merchant banking activities and other charges from leasing activities, for the part, within those components, that expressly refers to commission expenses.

On the basis of our reclassified consolidated statement of income, in 2004, net commissions and other dealing revenues increased by 6.7% to €3,240 million from €3,036 million in 2003. Except for the immaterial impact of our merchant banking and leasing activities, the components of and reasons for this increase are the same as discussed under our audited income statement above.

Profits on Financial Transactions, Dividends from Shares and Equity Investments, and Income from Companies Carried at Equity

The following table sets forth the Group's profits on financial transactions, dividends from shares and equity investments, and income from companies carried at equity for the years ended December 31, 2004 and 2003, based on our audited income statement.

Audited Consolidated Statement of Income		2004	2003	%
(in millions of €)				
30.	Dividends and other revenues	152	309	(50.8)
a)	from shares, quotas and other equities	79	223	(64.6)
b)	from equity investments	73	86	(15.1)
60.	Profits (losses) on financial transactions	235	198	18.7
170.	Income (losses) from investments carried at equity	278	197	41.1
		665	704	(5.5)

In 2004, profits on financial transactions, dividends on shares and equity investments, and income from companies carried at equity decreased by €39 million, or 5.5%, to €665 million from €704 million in 2003. This decrease was due to an overall decrease of 50.8% in dividends and other revenues from shares and other equities to €152 million in 2004 from €309 million in 2003, partially offset by a 41.1% increase in income from companies carried at equity to €278 million in 2004 from €197 million in 2003 and an 18.7% increase in profits on financial transactions to €235 million in 2004 from €198 million in 2003.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Dividends and other revenues from shares and other equities, together with profits on financial transactions, reflect the Group's dealing activities in securities, foreign exchange and derivatives. In the aggregate, income from these activities amounted to €314 million in 2004, a decrease of €107 million,

or 25.4%, from €421 million in 2003. This decrease was due to a 64.6% decrease in dividends and other revenues from shares and other equities to €79 million in 2004 from €223 million in 2003, primarily attributable to a continued decrease in Banca IMI's arbitrage activities with respect to equities, as a result of changed market and other conditions, partially offset by an 18.7% increase in profits on financial transactions to €235 million in 2004 from €198 million in 2003. The increase in profits on financial transactions was primarily due to net realized and unrealized gains of €222 million on securities transactions effected primarily by Banca IMI in 2004 compared to net realized and unrealized losses of €22 million in 2003, partially offset by net realized and unrealized losses of €52 million on derivatives transactions related to securities transactions effected primarily by Banca IMI in 2004 compared to net realized and unrealized gains on such transactions of €150 million in 2003.

Income from companies carried at equity and dividends and other revenues from equity investments (which represent income from minority shareholdings), in the aggregate, amounted to €351 million in 2004, an increase of €68 million, or 24.0%, from €283 million in 2003. This decrease was due to:

a 41.1% increase in income from companies carried at equity to €278 million in 2004 from €197 million in 2003, primarily due to the results of the Group's insurance companies concentrated in A.I.P.; and

a 15.1% decrease in dividends and other revenues from equity investments, representing other revenues from unconsolidated minority shareholdings such as Santander Central Hispano S.A., to €73 million in 2004 from €86 million in 2003, entirely due to the elimination of the tax credit on dividends as the result of the introduction of a new Italian corporate tax (IRES).

The following table sets forth the Group's profits on financial transactions, dividends from shares and equity investments, and income from companies carried at equity for the years December 31, 2004 and 2003, based on our reclassified income statement.

Reclassified Consolidated Statement of Income	2004	2003	%
	(in millions of €)		
30.a) Dividends and other revenues from shares, quotas and other equities	79	223	(64.6)
60. Profits (losses) on financial transactions	235	198	18.7
60.a) Writedowns to securities considered as adjustments to loans			
10.a) Interest margin of Banca IMI Group	118	26	(353.8)
	432	447	(3.4)
Profits (losses) on financial transactions and dividends on shares			
30.b) Dividends and other revenues from equity investments	73	86	(15.1)
170. Income (losses) from investments carried at equity	278	197	41.1
	351	283	24.0
Profits (losses) of companies carried at equity and dividends on equity investments			
	783	730	7.3

On the basis of our reclassified consolidated statement of income, in 2004, profits on financial transactions, dividends from shares and equity investments, and income from companies carried at equity increased by €53 million, or 7.3%, to €783 million from €730 million in 2003. Except for the impact of reclassifying Banca IMI's net interest income, the reasons for and components of this increase are the same as discussed under our audited income statement above.

Operating Expenses

The following table sets forth the principal components of the Group's operating expenses for the years ended December 31, 2004 and 2003, based on our audited income statement.

Audited Consolidated Statement of Income		2004	2003	%
(in millions of €)				
80.	Administrative costs	(4,565)	(4,610)	(1.0)
a)	payroll	(2,803)	(2,841)	(1.3)
b)	other	(1,762)	(1,769)	(0.4)
	<i>other administrative costs</i>	(1,510)	(1,512)	(0.1)
	<i>other indirect taxes</i>	(252)	(257)	(1.9)
70.	Other operating income	399	396	0.8
110.	Other operating expenses	(76)	(68)	11.8
90.	Adjustments to intangible and tangible fixed assets	(656)	(642)	2.2
		(4,898)	(4,924)	(0.5)

In 2004, operating expenses decreased by €26 million, or 0.5%, to €4,898 million from €4,924 million in 2003. This was primarily due to successful efforts to reduce administrative costs, thus permitting the Group to absorb the material impact of the integration and restructuring costs attributable to the Group's expansion in recent years.

Administrative costs in 2004 totaled €4,565 million, a decrease of €45 million, or 1.0%, from €4,610 million in 2003, in contrast with an annual inflation rate Italy of 2.1% in 2004. All of the main components of administrative costs showed improvements in 2004: payroll costs decreased by €38 million, or 1.3%, to €2,803 million in 2004 from €2,841 million in 2003; other administrative costs decreased by €2 million, or 0.1% from €1,512 million in 2003; and indirect taxes decreased by €5 million, or 1.9%, to €252 million in 2004 from €257 million in 2003.

Payroll costs decreased primarily due to a net decrease in the average number of Group employees of 2.8% compared with 2003. The decrease was primarily attributable to staff leaving incentives in connection with the Income, Employment and Re-training Fund for Staff in the Banking Industry ("Solidarity Fund"), a fund established to support the income of employees who accepted early retirement. To qualify for the Solidarity Fund, the employees must be entitled to retire within 60 months from their early retirement date. The decrease in average terms of the number of employees more than compensated for the ordinary dynamics of payroll costs, which were adversely affected by (i) a 1.9% increase that was attributable to provisions for the estimated inflation-adjusted pay increase for 2004 related to the renewal in February 2005 of the national collective labor agreement governing the Italian banking sector, which expired in December 2003, (ii) increased payments, made from April 1, 2004 onwards, contractually due as the result of the non-renewal of that national collective labor agreement within the prescribed time period, (iii) increased costs (such as employee moving expenses) related to the IT migration processes and unification of the banking networks' distribution model, and (iv) an increase in the variable component of payroll costs, reflecting the improvement in the Group's financial results.

The decrease in other administrative costs was primarily attributable to a decrease in IT costs to €419 million in 2004 from €430 million in 2003, primarily due to the integration of the Group's banking networks; and a decrease in general expenses to €247 million in 2004 from €258 million in 2003. These decreases were almost completely offset by an increase in indirect payroll costs to €104 million in 2004 from €94 million in 2003, primarily due to training and mobility within the Group resulting from the integration processes; an increase in promotion, advertising and marketing expenses to €99 million in 2004 from €93 million in 2003, primarily due to sponsorship of the 2006 Olympic Winter Games in Turin; an increase in real estate costs, primarily due to increased rental charges; and an increase in

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

professional fees and insurance costs, primarily due to issues related to the extension of the Parent Bank's credit policy to all companies of the Group and to increased insurance premiums as a result of increased customer demand for products with insurance coverage. Utilities remained unchanged, as a decrease in telephone costs offset an increase in energy costs.

In 2004, other operating income remained effectively stable, amounting to €399 million in 2004 compared to €396 million in 2003. Other operating expenses increased by €8 million, or 11.8%, to €76 million in 2004 compared to €68 million in 2003, primarily due to decreases in income from merchant banking activities, rental and other income from real estate, and recoveries of expenses, which were partially offset by an increase in income from leasing activities.

Adjustments to the value (depreciation and amortization) of tangible and intangible fixed assets in 2004 amounted to €656 million, an increase of €14 million, or 2.2%, compared with €642 million in 2003. Adjustments other than those due to goodwill, merger and consolidation differences totaled €457 million in 2004 compared with €484 million in 2003, a decrease of €27 million, or 5.6%, and were primarily attributable to the amortization of software costs, the depreciation of furniture and equipment, and the amortization of real estate. The €27 million decrease reflected the trend in the Group's capital expenditures, which decreased compared with 2003.

Adjustments to goodwill and merger and consolidation differences in 2004 amounted to €199 million, an increase of €41 million, or 25.9%, compared with €158 million in 2003. This increase was primarily due to extraordinary write-down of the goodwill related to the Group's shareholdings in Cassa dei Risparmi di Forlì and the Fideuram Wargny group in the amounts of €40 million and €16 million, respectively.

In 2004, the ratio of costs to income decreased to 63.5% from 63.9% in 2003, due to both an increase in income and a decrease in costs.

The following table sets forth the principal components of the Group's operating expenses for the years ended December 31, 2004 and 2003, based on our reclassified income statement.

Reclassified Consolidated Statement of Income		2004	2003	%

(1) This item is made up of the sum of Item 70. "Other operating income" less Item 70.a) "Income from merchant banking activities, other income from leasing activities".

(2) This item is made up of the sum of Item 110. "Other operating expenses" less Item 110.a) "Loss from merchant banking activities, other charges from leasing activities".

(3)

This item refers to certain components of Item 90. "Adjustments to intangible and tangible fixed assets": amortization of goodwill arising on application of equity method, amortization of merger differences, amortization of goodwill and amortization of goodwill arising on consolidation.

On the basis of the reclassified consolidated statement of income, in 2004, operating expenses decreased by €63 million, or 1.3% to €4,702 million from €4,765 million in 2003. In terms of administrative costs, the components of and reasons for this decrease are the same as discussed under our audited income statement above. Except for the immaterial impact of reclassifying the income and losses from our merchant banking and leasing activities under "Net Commissions (and Other Dealing Revenues)" discussed above, and the impact of reclassifying adjustments to goodwill merger and consolidation differences under "Net Value Adjustments and Provisions for Loan Losses" discussed below, the components of and reasons for the decrease in adjustments to the value of tangible and intangible fixed assets are the same as discussed under our audited income statement above.

Net Value Adjustments and Provisions for Loan Losses

The following table sets forth the principal components of the Group's net value adjustments to loans and financial fixed assets and provisions for loan losses for the years ended December 31, 2004 and 2003, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2004	2003	%
	(in millions of €)		
100. Provisions for risks and charges	(231)	(195)	18.5
120. Adjustments to loans and provisions for guarantees and commitments	(894)	(1,126)	(20.6)
130. Writebacks of adjustments to loans and provisions for guarantees and commitments	386	417	(7.4)
140. Provisions to the allowance for probable loan losses	(17)	(15)	13.3
150. Adjustment to financial fixed assets	(106)	(158)	(32.9)
160. Writebacks of adjustment to financial fixed assets	124	218	(43.1)
	<u>(738)</u>	<u>(859)</u>	<u>(14.1)</u>

In 2004, net value adjustments and provisions for loan losses decreased by €121 million, or 14.1% to €738 million from €859 million in 2003. This decrease was primarily due to the €232 million decrease in adjustments to loans and provisions for guarantees compared with 2003.

The main components of the €738 million total were as follows:

€231 million in provisions for risks and charges, an increase of €36 million, or 18.5% from €195 million in 2003, primarily due to increased provisions for legal disputes, in particular bankruptcy liquidations. Of the €231 million total:

€127 million relates to provisions of the Parent Bank, consisting of:

€91 million relating to claims made against the Group in legal and bankruptcy proceedings, primarily due to an increase in claims by receivers of bankrupt customers pending at December 31, 2004, including claims filed by the administrator of the insolvent Parmalat group;

€23 million relating to probable losses from guarantees and other transactions; and

€13 million relating to personnel-related liabilities, including €6 million to cover deficits of certain independent supplementary pension funds which supplement Sanpaolo IMI's compulsory pension fund and €6 million to cover seniority bonuses to employees.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

€104 million relates to provisions of the Parent Bank's subsidiaries, consisting of:

€39 million of provisions made by the Cardine Finanziaria and Sanpaolo Banco di Napoli banking networks, primarily related to claims in legal and bankruptcy proceedings;

€32 million of provisions made by subsidiaries in connection with the sale, distribution and management of financial products, €30 million of which was attributable to Banca Fideuram and its subsidiaries relating to probable losses on advance commissions, claims in legal and bankruptcy proceedings, and a fund for contractual amounts due to Fideuram's network of private bankers;

€33 million of provisions made by other subsidiaries, primarily attributable to accruals made for the restructuring of our private banking business following the merger of Sanpaolo Bank S.A. and IMI Bank Lux S.A. (€14 million) and to probable losses relating to our tax collection activities (€8 million).

€525 million of negative net adjustments to loans and provisions for guarantees and commitments, which are provisions for probable losses or against Group's loan and guarantee portfolio net of write-backs, a decrease of €199 million, or 27.5%, from €724 million in 2003. The decrease was due to a general improvement in the quality of our loan portfolio and included a €14 million provision for probable losses on our exposure under the Fiat Convertible Facility. Provisions made for general risks on our performing loan portfolio totaled €110 million in 2004 compared to €38 million in 2003, and, as a result, the allowance for general risks on our performing loan portfolio was €1,174 million at December 31, 2004 compared with €1,102 million at December 31, 2003. The allowance covers the probable losses relating to the Fiat Convertible Facility, which have been estimated at €167 million. At December 31, 2004, the coverage of our performing loan portfolio (excluding the receivable from SGA) by the related allowance was 1.0%.

€18 million of positive net adjustments to financial fixed assets, a decrease of €42 million, or 70%, compared with €60 million of positive net adjustments in 2003. The positive net adjustment was primarily due to a €122 million write-back of the Group's equity interest in SCH, which was partially offset by a €61 million write-down of the Group's equity interest in Hutchison 3G Italia S.p.A., a €23 million write-down of a put option granted to the Fondazione della Cassa dei Risparmi di Forlì, and a €5 million write-down of the Group's equity interest in Fiat.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table sets forth the principal components of the Group's net value adjustments to loans and financial fixed assets and provisions for loan losses for the years ended December 31, 2004 and 2003, on the basis of our reclassified income statement.

	_____	_____	
Net value adjustment and provision for loan losses and equity in earnings of unconsolidated subsidiaries	(738)	(859)	(14.1)
	_____	_____	

On the basis of the reclassified consolidated statement of income, in 2004, net value adjustments and provisions for loan losses decreased by €121 million, or 14.1% to €738 million from €859 million in 2003. The components of and reasons for this decrease are the same as discussed under our audited income statement above. In addition, adjustments to goodwill and merger and consolidation differences amounted to €199 million, a 25.9% increase compared with €158 million in 2003. The components of and reasons for this increase are the same as discussed under "Operating Expenses" under our audited income statement above.

Net Extraordinary Income

The following table set forth the Group's net extraordinary income for the years ended December 31, 2004 and 2003, on the basis of its audited income statement.

Audited Consolidated Statement of Income	2004	2003	%
	(in millions of €)		
190. Extraordinary income	323	548	(41.1)
200. Extraordinary expenses	(175)	(580)	(69.8)
	_____	_____	
	148	(32)	
	_____	_____	

Net extraordinary income amounted to €148 million in 2004, an increase of €180 million compared with net extraordinary expense of €32 million in 2003. This increase was due to a €405 million, or 69.8%, decrease in extraordinary expenses to €175 million in 2004 from €580 million in 2003, partially offset by a €225 million, or 41.1%, decrease in extraordinary income to €323 million in 2004 from €548 million in 2003. The main components of net extraordinary income in 2004 included:

€61 million of capital gains from the sale of real estate and real estate shareholdings;

€55 million from the sale of the Group's remaining 30% equity interest in Finconsumo Banca;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

€50 million from the disposal by a Group subsidiary of Sanpaolo IMI Shares received in the spin-off of Fideuram Vita; and

€50 million loss on the transfer of the Group's equity interest in CDC Ixis to other companies of the French Caisse d'Epargne group in connection with the restructuring of that group.

Minority Interest in Income of Consolidated Subsidiaries

The following table sets forth the minority interest in income of consolidated subsidiaries for the years ended December 31, 2004 and 2003, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2004	2003	%
	(in millions of €)		
250. Minority interests	(48)	(48)	
Minority interests related to consolidated subsidiaries were €48 million in 2004, the same as in 2003.			

Income Taxes

The following table sets forth the Group's income taxes for the years ended December 31, 2004 and 2003, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2004	2003	%
	(in millions of €)		
240. Income taxes	(658)	(657)	0.2
In 2004, the Group's effective tax rate was 31.3%, a significant decrease compared with the effective tax rate of 38.9% in 2003. The decrease was primarily attributable to tax benefits related to equity investments effective as of 2004, as well as the decrease of one percentage point in the IRPEG (Italian Corporate Income Tax) and the benefits resulting from the application to the Group of a single national fiscal consolidation under the Italian Consolidated Income Tax.			

Net Income

The following table sets forth the Group's net income for the years ended December 31, 2004 and 2003, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2004	2003	%
	(in millions of €)		
Net Income	1,393	972	43.3

In 2004, for all of the reasons discussed under the various line items above, net income amounted to €1,393 million, a 43.3% increase from €972 million in 2003.

3. Year Ended December 31, 2003 Compared with Year Ended December 31, 2002

Overview

For the year ended December 31 2003, the Group's results showed an improvement in income margins and less vulnerability to the decrease in interest rates and to market volatility.

The positive trend in operating revenues and cost containment efforts, together with the writebacks and profits from the investment portfolio, more than offset the adverse impact of adjustments to loans and extraordinary expenses linked with staff leaving incentives. Net income for the year, amounting to €

972 million, increased by 9.3% compared with 2002 and exceeded the plan, confirming the growth forecast in the 2003-2005 Plan.

For the year ended December 31, 2003, RoE, representing net income after minority interests as a percentage of monthly average shareholders' equity, increased to 9.0% from 8.3% in 2002.

Net Interest Income

The following table sets forth the components of the Group's net interest income for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our audited income statement.

Audited Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
			(millions of €)	
10. Interest income and similar revenues	7,443	8,693	8,455	(14.4)
20. Interest expense and similar charges	(3,701)	(4,955)	(4,837)	(25.3)
	3,742	3,738	3,618	0.1

In 2003, the difference between interest income and interest expenses, which we refer to as net interest income, remained virtually flat, amounting to €3,742 million compared with €3,738 million in 2002, due to changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with net interest income for 2002 on a pro forma basis, net interest income increased by 3.4% from €3,618 million.

Net interest income in 2003 was also positively affected by the results of Banca IMI, which showed positive net interest income of €26 million, a 174.3% increase compared with negative net interest income of €(35) million in 2002. This increase was primarily due to a reduction in Banca IMI's financing needs, attributable primarily to a decrease in its arbitrage activities with respect to equities as a result of changed market conditions. Banca IMI's net interest income is related to securities dealing activities rather than banking activities. Management believes that excluding the impact of Banca IMI's net interest income is helpful to a better understanding of the components of and reasons for the year-on-year changes in net interest income from the Group's banking activities. See: Item 3. "Selected Financial Data Reconciliation Between Audited and Reclassified Income Statements" on page 14 above.

Excluding Banca IMI's net interest income, as shown in our reclassified income statement discussed below, the Group's net interest income in 2003 was €3,716 million, a 1.5% decrease compared with €3,773 million in 2002. This decrease was due to the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with reclassified net interest income for 2002 on a pro forma basis, net interest income in 2003 showed an increase of €63 million, or 1.7%, from €3,653 million. This increase in net interest income compared with 2002 on a pro forma basis was due to the net effect of changes in the average balances of interest-earning assets and interest-bearing liabilities, which increased net interest income by €133 million, partially offset by the net effect of changes in the average spread, which reduced net interest income by €70 million.

Both components of net interest income, interest income and interest expense, decreased in 2003 compared with 2002. Interest income decreased by 14.4% to €7,443 million from €8,693 million, and interest expense decreased by 25.3% to €3,701 million from €4,955 million. Both decreases were primarily due to a decrease in interest rates. To a much lesser extent, the decreases were attributable to the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, interest income in 2003 decreased by 12.0% from €8,455 million and interest expense in 2003 decreased by 23.5% from €4,837 million.

The interest rate that serves as the benchmark for short-term loans, the three-month Euribor rate, decreased from 2.96% in December 2002 to 2.15% in December 2003 and, averaged over the year, decreased from an average rate of 3.32% in 2002 to 2.33% in 2003. This decrease was reflected in the average yield on the Group's interest-earning assets and the average cost of interest-bearing liabilities in 2003, which, excluding the average balances and interest income and expense of Banca IMI, were 4.53% and 2.20%, respectively. The average spread of 2.33% represented a slight decrease in the average spread of 2.36% in 2002 and 2002 on a pro forma basis. Customer transactions, which refer to loans to customers, customer deposits and senior debt securities issued by the Group, generated an average spread of 3.14% compared with 3.04% in 2002 and in 2002 on a pro forma basis.

Average Balances and Interest Rates

The following tables show average balances and interest rates for the Group for the years ended December 31, 2003, 2002 and 2002 pro forma, based on its reclassified financial statements.

For purposes of these tables, (i) average balances have been determined based on daily figures for interest-earning assets and interest-bearing liabilities of Sanpaolo IMI, Sanpaolo Banco di Napoli, Banca Fideuram, Banca OPI, Banca Popolare dell' Adriatico, Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio di Venezia, Cassa di Risparmio in Bologna, and Friulcassa, and on quarterly figures for all the other assets and liabilities of the Group; management believes that the average figures below present substantially the same trend as would be presented by daily averages; (ii) interest income and expense in the following tables vary from the amounts presented in the Consolidated Financial Statements (see footnotes to tables below for further details); (iii) tax-exempt income has not been calculated on a tax-equivalent basis because the effect of such calculations would not be significant; and (iv) the average balance of non-accruing loans has been included in the average balance of non-interest-earning assets (see footnotes to tables below for further details).

(1)

For the year ended December 31, 2002, the average balance, interest and average yield for certain items differ from those reported in our 2002 annual report because of reclassifications made to ensure consistency with and comparability to the methodology used for the year ended December 31, 2003. The impact of such changes, which include the reclassification of the former Cardine group's non-accruing loans from interest-earning assets to non-interest-earning assets and the reclassification of capitalization certificates from securities to loans, is the following:

loans and leases to non-credit institutions: the average balance decreased from €118,868 million to €116,467 million; interest decreased from €6,732 million to €6,756 million; and the average yield increased from 5.66% to 5.80%;

trading account securities and investments: the average balance decreased from €17,351 million to €16,722 million; interest decreased from €750 million to €726 million; and the average yield increased from 4.32% to 4.34%; and

non-interest-earning assets: the average balance increased from €50,299 to €53,329.

(2)

Total interest income varies by €378 million and €527 million from income as shown in the Consolidated Financial Statements for the years ended December 31, 2003 and 2002, respectively, due to the following differences:

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

reclassification of interest income of Banca IMI that relates to securities dealing activities of €402 million and €447 million in 2003 and 2002, respectively; and

reclassification of interest income (and expense) on derivatives contracts hedging interest rate risk, which in the Consolidated Financial Statements are netted together, but which in the above table are netted against interest income (or expense) of the respective assets or liabilities hedged by the derivatives. Such amounts increased interest income and interest expense by €24 million in 2003 and decreased interest income and interest expense by €80 million in 2002.

(3)

Represents interest income as a percentage of average interest-earning assets.

(4)

This line item comprises the credits from SGA. SGA is the company established to recover non-performing loans of Banco di Napoli. See: Note 17 to the Consolidated Financial Statements on page F-111.

(1)

Total interest expense varies by €352 million and €562 million from expense as shown in the Consolidated Financial Statements for the years ended December 31, 2003 and 2002, respectively, due to the following differences:

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

reclassification of interest expense of Banca IMI that relates to securities dealing activities of €376 million and €482 million in 2003 and 2002, respectively; and

reclassification of interest income (and expense) on derivatives contracts hedging interest rate risk, which in the Consolidated Financial Statements are netted together, but which in the above table are netted against interest income (or expense) of the respective assets or liabilities hedged by the derivatives. Such amounts increased interest income and interest expense by €24 million in 2003 and decreased interest income and interest expense by €80 million in 2002.

- (2) Represents interest expense as a percentage of average interest-bearing liabilities.
- (3) This item comprises senior debt securities and subordinated debt.
- (4) Average shareholders' equity includes net income.

Change in Net Interest Income Volume and Rate Analysis

The following table shows the allocation, by category of interest-earning assets and interest-bearing liabilities and by currency, of changes in the Group's net interest income among changes in average volume, changes in average rate and changes in volume/rate for the year ended December 31, 2003 compared to the year ended December 31, 2002 pro forma. In addition, this table reconciles the differences between this information for the year ended December 31, 2002 and 2002 pro forma. This table supplements the tables presented in Item 3. "Key Information B. Selected Statistical Information Change in Net Interest Income Volume and Rate Analysis" on page 27 above and is presented here solely to show the comparison between 2003 and 2002 excluding the impact of the changes in the scope of consolidation.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Volume: corresponds to the average balance for the year minus the average balance for the previous year, multiplied by the average yield for such year.

- (2) Rate: corresponds to the average yield for the year minus the average yield for the previous year, multiplied by the average balance for such year.
- (3) Volume/Rate: corresponds to "Net Change" minus "Volume" and minus "Rate".
- (4) Net Change: corresponds to the interest for the year minus the interest for the previous year.
- (5) This item comprises the credits from SGA. SGA is the company established to recover non-performing loans of Banco di Napoli. See: Note 17 to the Consolidated Financial Statements on page F-111 below.
- (6) This item comprises senior debt securities and subordinated debt.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Excluding Banca IMI, the average balance of the Group's interest-earning assets increased by €1,941 million, or 1.3%, compared with 2002, due to the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with the average balance of interest-earning assets for 2002 on a pro forma basis, interest-earning assets increased by 4.5% to €155,977 million from €149,297 million. This overall increase was due to a 2.9% increase in loans to customers, primarily due to an increase in medium-and long-term loans attributable primarily to lower interest rates; an 80% increase in reverse repurchase agreements; and a 13.6% increase in interbank deposits and loans to credit institutions; and was partially offset by a 10.5% decrease in the securities held by the Group, as a result of measures to rationalize the Group's portfolio; and a 43.3% decrease in the receivable from SGA, relating to the former Banco di Napoli's non-performing loans. For an explanation of the receivable from SGA, see: Note 17 to the Consolidated Financial Statements on page F-111 below.

Excluding Banca IMI, the average balance of the Group's interest-bearing liabilities increased by €2,936 million, or 2.0%, compared with 2002. This result was affected by the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with the average balance of interest-bearing liabilities for 2002 on a pro forma basis, interest-bearing liabilities increased by 5.2% to €152,223 million from €144,687 million. This overall increase was due to a 28.6% increase in Interbank deposits and debt from credit institutions; a 28.6% increase in repurchase agreements; a 2.9% increase in customer deposits; and an 8.5% increase in the Group's subordinated debt; and was partially offset by a 5.8% decrease in senior debt securities issued by the Group.

Excluding Banca IMI, the difference between the average balance of non-interest-bearing liabilities and shareholders' equity on the one hand and the average balance of non-interest-earning assets on the other hand, which we refer to as the funding imbalance, decreased from €4,749 million in 2002 to €3,754 million in 2003, a decrease of €995 million. Excluding the impact of the changes in the scope of consolidation, as shown by a comparison with 2002 on a pro forma basis, the funding imbalance decreased from €4,610 million in 2002, a decrease of €856 million. The effect of this decrease was to reduce the amount of non-interest-bearing liabilities available to fund interest-earning assets, which adversely affected our net interest income.

The following table sets forth the components of the Group's net interest income for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our reclassified income statement.

Reclassified Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
			(millions of €)	
10. Interest income and similar revenues	7,443	8,693	8,455	(14.4)
30.c) Dividends from equity investments under 20% of stake, treated as interest				
10.a) Interest margin of Banca IMI Group(1)	(26)	35	35	(174.3)
20. Interest expense and similar charges	(3,701)	(4,955)	(4,837)	(25.3)
Net interest income	3,716	3,773	3,653	(1.5)

(1) Reclassification of (positive)/negative net interest income of Banca IMI Group to "Profits (losses) on financial transactions and investment income" as it is related to securities dealing activities rather than banking activities.

On the basis of the reclassified income statement, in 2003, net interest income decreased by 1.5% from €3,773 million in 2002 to €3,716 million. This was primarily due to changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with net interest income for 2002 on a pro forma basis, net interest income increased by 1.7% from €3,653 million. The

components of and reasons for this increase in net interest income are the same as described under our audited income statement above.

Net Commissions (and Other Dealing Revenues)

The following table sets forth the components of the Group's net commissions for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our audited income statement.

Audited Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
			(millions of €)	
40. Commission income	3,722	3,467	3,562	7.4
50. Commission expense	(685)	(671)	(772)	2.1
	3,037	2,796	2,790	8.6

In 2003, the difference between commission income and commission expenses, which we refer to as net commissions, increased by 8.6% to €3,037 million from €2,796 million in 2002. Our performance in net commissions, partially attributable to the recovery of financial markets, improved gradually in the course of 2003.

The growth in commission income occurred across all areas. Commissions from asset management, securities brokerage and advisory services increased by 6.2%, primarily due to a 12.1% increase in commissions from brokerage and custody of securities and currencies and a 5% increase in asset management commissions. Asset management commissions, which had been mostly in decline during the first half of the year, showed a progressive improvement in the second half, attributable to the increase in both the volume and the value of assets under management. As a proportion of total net commissions, asset management commissions decreased from 50.4% in 2002 to 48.7% in 2003. Among other commission income, commissions from loans and guarantees, deposits and current accounts and other net commissions increased by 13.3%, 14.8% and 14.5%, respectively, compared with 2002, primarily due to increases in volume.

In 2003, the ratios of net commissions to, respectively, administrative costs and payroll costs were 65.9% and 106.9%, a significant improvement compared with 60.2% and 97.9% in 2002.

Net commissions were only slightly affected by changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, net commissions in 2003 increased by 8.9% from €2,790 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table sets forth the components of the Group's net commissions for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our reclassified income statement.

Reclassified Consolidated Statement of Income		2003	2002	2002 pro forma	% 2003/2002
		(unaudited)			
		(millions of €)			
40.	Commission income	3,722	3,467	3,562	7.4
50.	Commission expense	(685)	(671)	(772)	2.1
70.a)	Income from merchant banking activities, other income from leasing activities(1)	20	27	19	(25.9)
110.a)	Loss from merchant banking activities, other charges from leasing activities(2)	(21)	(14)	(14)	50.0
Net commissions and other dealing revenues		3,036	2,809	2,795	8.1

(1) This item is made up of the following components of Item 70. "Other operating income": income from sale of merchant banking activities, other income from leasing activities.

(2) This item is made up of the sum of the following components of Item 110. "Other operating expenses": losses from merchant banking activities and other charges from leasing activities, for the part, within those components, that expressly refers to commission expenses.

On the basis of the reclassified consolidated statement of income, in 2003, net commissions and other dealing revenues increased by 8.1 to €3,036 million from €2,809 million in 2002. Except for the immaterial impact of our merchant banking and leasing activities, the components of and reasons for this increase are the same as discussed under our audited income statement above.

Compared to the reclassified pro forma results for 2002, net commissions and other dealing revenues in 2003 increased by 8.6% from €2,795 million.

Profits on Financial Transactions, Dividends from Shares and Equity Investments, and Income from Companies Carried at Equity

The following table sets forth the Group's profits on financial transactions, dividends from shares and equity investments, and income from companies carried at equity for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our audited income statement.

Audited Consolidated Statement of Income		2003	2002	2002 pro forma	% 2003/2002
		(unaudited)			
		(millions of €)			
30.	Dividends and other revenues:	309	565	565	(45.3)
a)	<i>from shares, capital quotas and other equities</i>	223	410	410	(45.6)
b)	<i>from equity investments</i>	86	155	155	(44.5)
60.	Profits (losses) on financial transactions	198	(98)	(80)	302.0
170.	Income (losses) from investments carried at equity	197	137	159	43.8
		704	604	644	16.6

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In 2003, profits on financial transactions, dividends on shares and equity investments, and income from companies carried at equity increased by 16.6% to €704 million from €604 million in 2002. This increase was due to an increase in profits on financial transactions and a 43.8% increase in income from companies carried at equity, partially offset by a 45.6% decrease in dividends and other revenues from shares and other equities and a 44.5% decrease in dividends and other revenues from equity investments. The increase was also affected by the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, profits on financial

transactions, dividends on shares and equity investments, and income from companies carried at equity increased by 9.3% from €644 million.

Dividends and other revenues from shares and other equities, together with profits on financial transactions, reflect the Group's dealing activities in securities, foreign exchange and derivatives. In the aggregate, income from these activities amounted to €421 million, a 34.9% increase from €312 million in 2002. This increase was due to an increase in profits on financial transactions from €(98) million to €198 million, due primarily to the placement of interest and exchange rate derivatives structured by Banca IMI and distributed by the Parent Bank's commercial network, partially offset by a decrease in dividends and other revenues from shares and other equities from €410 million to €223 million, primarily due to a decrease in Banca IMI's arbitrage activities with respect to equities, as a result of changed market conditions. The changes in the scope of consolidation affected income from the Group's brokerage activities only slightly, with the impact being felt exclusively in profits on financial transactions. Excluding the impact of these changes, as shown by a comparison with dividends and other revenues from shares and other equities, and profits on financial transactions for 2002 on a pro forma basis, income from these activities increased by 27.6% from €330 million.

Income from companies carried at equity and dividends and other revenues from equity investments (which represent income from minority shareholdings), in the aggregate, amounted to €283 million in 2003, a decrease of 3.1% from €292 million in 2002. This decrease consisted of:

a 43.8% increase in income from companies carried at equity to €197 million from €137 million in 2002, primarily due to the results of the insurance companies in the Sanpaolo IMI Wealth Management Business Area, which increased by €9 million in 2003; the tax collection companies in which Sanpaolo IMI has a minority interest, which increased by €10.1 million in 2003; and a €21.8 million reduction in the losses of several companies in which Sanpaolo IMI has minority interests compared with 2002. In addition, the overall increase was affected by a net contribution of €39.5 million from companies that were consolidated at equity for the first time in 2003, of which the largest contribution was Banque Sanpaolo (€27.1 million); and

a 44.5% decrease in dividends and other revenues from equity investments, representing other revenues from unconsolidated minority shareholdings, from €155 million in 2002 to €86 million. The decrease was primarily due to the elimination of dividends from Cardine Banca from this line item as a result of the Cardine merger in 2002.

Compared to the pro forma results for 2002, income from companies carried at equity and dividends and other revenues from equity investments, in the aggregate, decreased by 9.9% from €314 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table sets forth the components of the Group's profits on financial transactions, dividends from shares and equity investments, and income from companies carried at equity for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our reclassified income statement.

Reclassified Consolidated Statement of Income		2003	2002	2002 pro forma	% 2003/2002
				(unaudited)	
		(millions of €)			
30.a)	Dividends and other revenues from shares, capital quotas and other equities	223	410	410	(45.6)
60.	Profits (losses) on financial transactions	198	(98)	(80)	302.0
60.a)	Writedowns to securities considered as adjustments to loans		9	9	(100.0)
10.a)	Interest margin of Banca IMI Group	26	(35)	(35)	174.3
		<u>447</u>	<u>286</u>	<u>304</u>	
	Profits (losses) on financial transactions and dividends on shares				56.3
30.b)	Dividends and other revenues from equity investments	86	155	155	(44.5)

		<u>283</u>	<u>292</u>	<u>314</u>	
	Profit (losses) of companies carried at equity and dividends on equity investments				(3.1)
		<u>730</u>	<u>578</u>	<u>618</u>	26.3

On the basis of the reclassified consolidated statement of income, in 2003, profits on financial transactions, dividends on shares and equity investments, and income from companies carried at equity increased by 26.3% to €730 million from €578 million in 2002. Except for the impact of reclassifying Banca IMI's net interest income, the reasons for and components of this increase are the same as discussed under our audited income statement above.

Compared to the reclassified pro forma results for 2002, profits on financial transactions, dividends on shares and equity investments, and income from companies carried at equity in 2003 increased by 18.1% from €618 million.

Operating Expenses

The following table set forth the principal components of the Group's operating expenses for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our audited income statement.

Audited Consolidated Statement of Income

2003

2002

2002 pro forma

% 2003/2002

|--|--|--|--|--|

137

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In 2003, operating expenses decreased by 2.1% from €5,029 million in 2002 to €4,924 million. This was primarily due to successful efforts to contain the rate of increase of administrative costs, thus permitting the Group to absorb the material impact of the integration and restructuring costs attributable to the Group's expansion in recent years. The decrease was also attributable to the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, operating expenses remained virtually flat, decreasing by 0.8% from €4,962 million.

Administrative costs in 2003 totaled €4,610 million, a 0.8% decrease from €4,648 million in 2002. In terms of its main components, payroll costs decreased by 0.5% from €2,856 million in 2002, other administrative costs decreased by 1.3% from €1,792 million and indirect taxes decreased by 2.7% from €264 million. The overall decrease in administrative costs was due to changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, administrative costs increased by 0.7%, a rate of increase significantly below the 2.7% annual inflation rate in Italy in 2003, due primarily to increased payroll costs; and other administrative costs and indirect taxes remained virtually flat.

Excluding the impact of the changes in the scope of consolidation, payroll costs showed a contained increase of 1.0% from €2,814 million in 2002 pro forma, despite contractual pay increases resulting from the national collective labor agreement governing the Italian banking sector (whose financial terms expired at the end of 2003). This result was achieved by efforts to reduce and optimize the number of employees of the Group, which decreased in average terms by 2.9% compared with 2002 on a pro forma basis. A decrease in average terms of 1% was attributable to staff leaving incentives in connection with the Income, Employment and Re-training Fund for Staff in the Banking Industry ("Solidarity Fund"), a fund established to support the income of employees who accepted early retirement. To qualify for the Solidarity Fund, the employees must be entitled to retire within 60 months from their early retirement date. Of the 2,900 employees who voluntarily applied for the Solidarity Fund in accordance with the above-mentioned criteria, 957 retired in 2003. The remainder will retire in 2004. Consequently, the benefits expected from personnel reductions will be felt more strongly from 2004.

Excluding the impact of the changes in the scope of consolidation, other administrative costs remained virtually flat, amounting to €1,512 million in 2003 compared with €1,508 million in 2002 on a pro forma basis. This is evidence of the Group's ability to control its costs and was attributable primarily to reductions in professional, general, marketing and advertising, and utilities expenses.

Real estate costs remained substantially unchanged in 2003, whereas IT costs and indirect personnel costs increased compared with 2002. The increase in IT costs to €426 million in 2003 from €404 million in 2002 was primarily attributable to the unification of the IT systems of the banking networks in the Parent Bank's *Macchina Operativa Integrata* (MOI), or Integrated Operating Platform. The increase in indirect personnel costs to €91 million in 2003 from €75 million in 2002 was attributable to transfer and training expenses related to the ongoing process of integrating the Group's distribution networks.

In 2003, other operating income decreased by 6.2% from €422 million in 2002, primarily due to a decrease in reimbursements of expenses by third parties and also due to the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, other operating income decreased by 3.6% from €411 million. Other operating expenses increased by 36.0% from €50 million in 2002, primarily due to the Group's leasing activities.

Adjustments to the value (depreciation and amortization) of tangible and intangible fixed assets in 2003 amounted to €642 million, a 14.7% decrease compared with €753 million in 2002. Adjustments other than those due to goodwill, merger and consolidation differences totaled €484 million in 2003 compared with €510 million in 2002. The €80 million decrease reflected the trend in the Group's

capital expenditures, which, although still at high levels, decreased compared with 2002. The Group's capital expenditures were directed primarily to improving its central processing capacity and modernizing its technological infrastructure in the context of the integration of the IT systems of the Group's bank networks in the MOI, as well as the development of new applications and products to the reorganization and specialization of the Group's commercial network.

Adjustments to goodwill and merger and consolidation differences in 2003 amounted to €158 million, a 25.5% decrease compared with €212 million in 2002. This decrease was primarily due to the completion, at the end of 2002, of the ten-year amortization related to the merger of the former Banca Provinciale Lombarda and the former Banco Lariano. The 2002 result also reflected an impairment charge to goodwill arising from the Group's acquisition of Fideuram Wargny in December 2000.

In 2003, the ratio of costs to income decreased to 63.9% from 68.4% in 2002, primarily as a result of the growth in income.

The following table sets forth the principal components of the Group's operating expenses for the years ended December 31, 2003, 2002 and 2002 pro forma, based on our reclassified income statement.

Reclassified Consolidated Statement of Income		2003	2002	2002 pro forma	% 2003/2002

(2) This item is made up of the sum of Item 110. "Other operating expenses" less Item 110.a) "Loss from merchant banking activities, other charges from leasing activities".

(3) This item refers to certain components of Item 90. "Adjustments to intangible and tangible fixed assets": amortization of goodwill arising on application of equity method, amortization of merger differences, amortization of goodwill and amortization of goodwill arising on consolidation.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

On the basis of the reclassified consolidated statement of income, in 2003, operating expenses remained virtually flat, decreasing by 0.7% from €4,800 million in 2002 to €4,765 million. In terms of administrative costs, the components of and reasons for this decrease are the same as discussed under our audited income statement above. Except for the immaterial impact of reclassifying the income and losses from our merchant banking and leasing activities under "Net Commissions (and Other Dealing Revenues)" discussed above, and the impact of reclassifying adjustments to goodwill merger and consolidation differences under "Net Value Adjustments and Provisions for Loan Losses" discussed below, the components of and reasons for the decrease in adjustments to the value of tangible and intangible fixed assets are the same as discussed under our audited income statement above.

Compared to the reclassified pro forma results for 2002, operating expenses in 2003 also remained virtually flat, increasing by 0.7% to €4,765 million from €4,731 million in 2002.

On a reclassified basis, in 2003, the ratio of costs to income decreased to 61.9% from 65.1% in 2002.

Net Value Adjustments and Provisions for Loan Losses

The following table sets forth the principal components of the Group's net value adjustments to loans and financial fixed assets and provisions for loan losses for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our audited income statements.

Audited Consolidated Statement of Income		2003	2002	2002 pro forma	% 2003/2002
		(unaudited)			
(millions of €)					
100.	Provisions for risks and charges	(195)	(261)	(261)	(25.3)
120.	Adjustments to loans and provisions for guarantees and commitments	(1,126)	(889)	(858)	26.7
130.	Writebacks of adjustment to loans and provisions for guarantees and commitments	417	320	302	30.3
140.	Provisions to the allowance for probable loan losses	(15)	(27)	(27)	(44.4)
150.	Adjustment to financial fixed assets	(158)	(569)	(569)	(72.2)
160.	Writebacks of adjustment to financial fixed assets	218	8	8	
		(859)	(1,418)	(1,405)	(39.4)

In 2003, net value adjustments and provisions for loan losses decreased by 39.4% from €1,418 million in 2002 to €859 million. This decrease was due primarily to the €411 million decrease in write-downs of the Group's financial fixed assets compared with 2002, as well as the €215 million write-back in the Group's equity interest in SCH, whose €399 million write-down had adversely affected the Group's results in 2002.

The main components of the €859 million total were as follows:

€195 million of provisions for risks and charges, a 25.3% decrease from €261 million in 2002, primarily due to the recalculation of the probable losses arising from the renegotiation of subsidized residential mortgage loans, following the promulgation by the Ministry of Economy and Finance of the Ministerial Decree of March 31, 2003, which established the average rate applicable to installments maturing after July 1, 1999 on the relevant loans. Provisions in 2002 had also been affected by restructuring costs accrued by Banca Fideuram in connection with the integration of Banca Sanpaolo Invest. Of the €195 million total:

€117 million relates to provisions of the Parent Bank, consisting of:

€57 million relating to claims made against the Group in legal and bankruptcy proceedings, compared to €48 million in 2002;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

€38 million relating to probable losses from guarantees and securities dealing activities with customers (of which €30 million relates to the sale and distribution of Cirio and Parmalat bonds), compared to €79 million in 2002; and

€22 million relating to personnel-related liabilities, consisting of €16 million to cover deficits of certain independent supplementary pension funds which supplement Sanpaolo IMI's compulsory pension fund, and €6 million to cover seniority bonuses to employees;

€78 million relates to provisions of the Parent Bank's subsidiaries, consisting of:

€37 million relating to risks in connection with the sale and distribution of financial products, compared to €68 million in 2002;

€21 million of provisions made by the Cardine Finanziaria and Sanpaolo Banco di Napoli banking networks; and

€20 million of provisions made by other subsidiaries.

€724 million of negative net adjustments to loans and provisions for guarantees and commitments, which are reserves against the Group's loan and guarantee portfolio net of write-backs, an increase of 21.5% from €596 million in 2002. This increase was due primarily to the €273 million provision for 90% of the Group's exposure to Parmalat and the €10 million provision related to the write-down of the Group's entire exposure to Cirio, partially offset by the net effect of the changes in the scope of consolidation. Excluding the impact of such changes, as shown by a comparison with 2002 on a pro forma basis, negative net adjustments to loans and provisions for guarantees and commitments increased in 2003 by 24.2% from €583 million in 2002. Reserves against performing loans were increased to €1,102 million at December 31, 2003, compared with €1,064 million at the end of 2002. At the end of 2003, the coverage of the Group's performing loan portfolio (excluding loans to SGA) by reserves remained at 0.9%, the same as at year-end 2002.

€60 million of positive net adjustments to financial fixed assets compared with €561 million of negative net adjustments in 2002. This improvement was primarily due to the €215 million write-back in the Group's equity interest in SCH, reflecting a valuation of the Group's equity interest at €8.075 per share, the average price of SCH's ordinary shares in the second half of 2003. This was partially offset by the €105 million write-down of the Group's equity interest in H3G, as well as a €12 million write-down of its equity interest in Fiat, which reflected a valuation of the Group's equity interest at €6.397 per share, the average price of Fiat's ordinary shares in December 2002.

Compared to the pro forma results for 2002, net value adjustments and provisions for loan losses in 2003 decreased by 38.9% from €1,405 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following table sets forth the principal components of the Group's net value adjustments to loans and financial fixed assets and provisions for loan losses for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our reclassified income statement.

	Adjustments to loans and provisions for guarantees and commitments, net	(724)	(604)	(590)	19.9
150.	Adjustment to financial fixed assets	(158)	(569)	(569)	(72.2)
160.	Writebacks of adjustment to financial fixed assets	218	8	8	
	Adjustment to financial fixed assets, net	60	(561)	(561)	110.7
	Net value adjustment and provisions for loan losses and equity in earnings of unconsolidated subsidiaries	(859)	(1,426)	(1,412)	(39.8)

On the basis of the reclassified consolidated statement of income, in 2003, net value adjustments and provisions for loan losses decreased by 39.8% from €1,426 million in 2002 to €859 million. The components of and reasons for this decrease are the same as discussed under our audited income statement above. In addition, adjustments to goodwill and merger and consolidation differences amounted to €158 million, a 25.5% decrease compared with €212 million in 2002. The components of and reasons for this decrease are the same as discussed under "Operating Expenses" under our audited income statement above.

Compared to the reclassified pro forma results for 2002, net value adjustments and provisions for loan losses in 2003 decreased by 39.2% from €1,412 million.

Net Extraordinary Income

The following table sets forth the components of the Group's net extraordinary income for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our audited income statement.

Audited Consolidated Statement of Income		2003	2002	2002 pro forma	% 2003/2002
				(unaudited)	
		(millions of €)			
190.	Extraordinary income	548	575	580	(4.7)
200.	Extraordinary expenses	(580)	(248)	(241)	133.9
		(32)	327	339	(109.8)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Audited Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002

142

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In 2003, net extraordinary income amounted to negative €(32) million compared with positive net extraordinary income of €327 million in 2002, a decrease of 109.8%, primarily due to a 133.9% increase in extraordinary expenses. The main components of net extraordinary income in 2003 included:

€475 million in provisions for staff leaving incentives, primarily attributable to the Solidarity Fund;

€16 million in expenses in connection with the Group taking advantage of a tax amnesty. In addition to this amount, the Group's total expenditure on this matter included €11 million related to insurance subsidiaries that are consolidated using the equity method, and €20 million for which existing tax allowances were used;

€320 million in capital gains from the sale of various shareholdings, including €240 million from the sale of a 60% equity interest in Banque Sanpaolo and €44 million from the sale of a 20% equity interest in Finconsumo Banca; and

€84 million from the release of excess allowances, primarily due to the recalculation of probable losses arising from the renegotiation of subsidized residential mortgage loans, in accordance with the terms established by the Ministerial Decree of March 31, 2003, discussed under "Net Value Adjustments and Provisions for Loan Losses (and Adjustments to Goodwill, Merger and Consolidation Differences)" above.

Compared to the pro forma results for 2002, net extraordinary income in 2003 decreased by 109.4% from €339 million.

The following table sets forth the components of the Group's net extraordinary income for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our reclassified income statement.

Reclassified Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
			(millions of €)	
190. Extraordinary income	548	575	580	(4.7)
200. Extraordinary expenses	(580)	(248)	(241)	133.9
90.b) Adjustments to fixed assets considered as extraordinary expenses		(31)	(19)	(100.0)
Net extraordinary income(1)	(32)	296	320	(110.8)

(1) This Item refers to the sum of Item 200 "Extraordinary expenses" plus Item 90.b) Adjustments to fixed assets considered as extraordinary expenses".

On the basis of the reclassified consolidated statement of income, in 2003, net extraordinary income amounted to negative €(32) million compared with positive net extraordinary income of €296 million in 2002, a decrease of 110.8%. Except for the impact of the fact that there were no adjustments to fixed assets considered as extraordinary expenses in 2003 compared with 2002, the components of and reasons for this decrease are the same as discussed under our audited income statement above.

Compared to the reclassified pro forma results for 2002, net extraordinary income in 2003 decreased by 110% from €320 million.

Minority Interest in Income of Consolidated Subsidiaries

The following table sets forth the minority interest in income of consolidated subsidiaries for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
				(millions of €)

250. Minority interests	(48)	(43)	(43)	11.6
-------------------------	------	------	------	------

Minority interests related to consolidated subsidiaries were €48 million in 2003 compared with €43 million in 2002, due to the higher net income attributable to minority shareholders.

Income Taxes

The following table sets forth the Group's income taxes for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
				(millions of €)

240. Income taxes	(657)	(450)	(443)	46.0
-------------------	-------	-------	-------	------

In 2003, the Group's effective tax rate was 39.4%, a decrease compared with the effective tax rate of 44.2% in 2002. The decrease was the result of the two percentage point reduction in the IRPEG (Italian Corporate Income Tax) rate and the half percentage point reduction in the IRAP (Italian Regional Income Tax) rate, as well as an increase in the amount of income taxable at reduced rates or not subject to IRAP, such as write-backs of equity investments and capital gains from the sale of shareholdings and dividends, which offset the non-deductibility from IRAP of staff leaving expenses.

Compared to 2002 on a pro forma basis, the Group's effective tax rate decreased from 43.3% to 39.4% for the same reasons discussed above.

Net Income

The following table sets forth the Group's net income for the years ended December 31, 2003, 2002 and 2002 pro forma, on the basis of our audited income statement.

Audited Consolidated Statement of Income	2003	2002	2002 pro forma	% 2003/2002
			(unaudited)	
				(millions of €)

Net income	972	889	901	9.3
------------	-----	-----	-----	-----

In 2003, for all of the reasons discussed under the various line items above, net income amounted to €972 million, a 9.3% increase from €889 million in 2002. Net income in 2002 was affected by a €364 million write-back of the Group's reserves for general banking risks. Excluding the impact of that write-back in 2002, net income in 2003 increased by 85.1% from €525 million in 2002.

Compared to the pro forma results for 2002, net income in 2003 increased by 7.9% from €901 million.

4. Results of Operations by Business Sector for the Three Years Ended December 31, 2004

As explained more fully under " Presentation of Results" on page 106 above, the following discussion is based on our reclassified income statement, the only basis upon which management prepares operating results by Business Sector".

The statement of income of the Business Sectors is the result of the statements of income of the Business Areas that make up each Business Sector. The statements of income of the Business Areas were prepared as follows:

for Sanpaolo (Parent Bank operating areas and product companies) the Business Area whose business is carried out both by the Parent Bank and its subsidiaries, the accounts of the Parent Bank attributable to the relevant Business Area were consolidated with the income statement line items of the relevant subsidiaries. The attribution to individual Business Areas of Parent Bank line items was made on the basis of the following principles:

net interest income was calculated using appropriate internal transfer rates between each Business Area and the Group's Treasury function; and

in addition to effective commissions, notional commissions for services rendered by one Business Area to another were quantified based on the Group's internal transfer pricing standards;

for Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Cassa di Risparmio di Venezia, Friulcassa, Banca Popolare dell'Adriatico, Sanpaolo Banco di Napoli, Sanpaolo IMI Asset Management, Banca IMI, Sanpaolo IMI Private Equity, IMI Investimenti, Banca Fideuram, A.I.P. and Banca OPI, the Business Areas whose business is carried out entirely by subsidiaries of the Parent Bank, reference was made to the income statements of the subsidiaries themselves, in addition to their contribution to the Group's consolidated net income, which was calculated net of minority interest and intercompany adjustments.

As with the statement of income, the capital of each Business Sector is the result of the sum of the capital of the Business Areas that make up the Business Sector. The allocation of capital to each Business Area was made in accordance with the following criteria:

for those Business Areas whose business is carried out both by the Parent Bank and by its subsidiaries, the average economic capital of the Parent Bank allocated to the relevant Area was consolidated with that of the subsidiaries of the relevant Area. The capital is measured according to Value at Risk analysis or VaR. Distinctions are made among the different types of risk: credit risk, market risk and operational risk; and

for those Business Areas whose business is carried out exclusively by subsidiaries of the Parent Bank, reference is made to the average net shareholders' equity (including net income for the year) of the relevant subsidiaries.

Finally, the profitability of each Business Area was calculated as follows:

for those Business Areas whose business is carried out both by the Parent Bank and by its subsidiaries, profitability is expressed in terms of RORAC (Return on Risk Adjusted Capital), dividing the Business Area's contribution to net income of the Group by its economic capital quantified according to VaR; and

for those Business Areas whose business is carried out exclusively by subsidiaries of the Parent Bank, profitability is expressed in terms of RoE (Return on Equity), dividing the Business Area's contribution to net income of the Group by its average net shareholders' equity (including net income for the year), in accordance with the same methodology used to calculate RoE for the Group.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following tables show net income and allocated capital by Business Sector for the year ended December 31, 2004.

Net Income by Business Sector in 2004 (millions of €)

Allocated Capital by Business Sector in 2004 (millions of €)

Operating Results of the Business Sectors

The following tables show the statements of income, operating structure and the profitability ratios attributable to the Business Sectors for the years ended December 31, 2004, 2003, 2003 pro forma and 2002 pro forma.

In addition, we present tables showing comparisons between the results for 2004 compared with 2003 on a pro forma basis, and the results for 2003 compared with 2002 on a pro forma basis. For

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

purposes of these comparative tables, the 2003 pro forma figures assume that changes to the organizational structure of the Business Sectors in 2004 had occurred on January 1, 2003. For an explanation of those changes, see: Item 4. "Information on Sanpaolo IMI C. Business Overview Business Sectors" on page 83 above.

*Commercial Banking (formerly Domestic Banking Networks)**2004 vs. 2003 pro forma*

In 2004, Commercial Banking managed over 75% of the Group's volumes, generating approximately 78% of net interest and other banking income. Commercial Banking's net interest and other banking income increased by 2% in 2004 compared to 2003 pro forma. This trend was higher than that of the Group as a whole and reflects the ability of the banking networks and the related product companies to offset the decline in net interest income with other sources of income, particularly commission revenues, as well as profits from financial transactions.

The contained 0.9% increase in operating expenses, together with the aforementioned increase in net interest and other banking income, produced a 3.7% increase in operating income for Commercial Banking in 2004 compared to 2003 pro forma. Payroll costs, which represent a substantial portion of Commercial Banking's operating expenses, remained substantially stable. Commercial Banking employed 33,615 staff at December 31, 2004, corresponding to 79% of the Group's total staff.

The 84.6% decrease in net extraordinary income in 2004 compared with 2003 pro forma was largely offset by the 25.3% decrease in provisions and net adjustments to loans and financial fixed assets, which in 2003 pro forma had been adversely affected by write-downs related to Parmalat bonds. Commercial Banking's net income in 2004 was €1,023 million, an increase of 20.2% compared with 2003 pro forma.

Commercial Banking absorbed 70% of the Group's capital in 2004, virtually the same as in 2003 pro forma.

Since average capital allocated to the Business Sector increased by 4.3% compared with 2003 pro forma, a lower rate of increase than that of net income, the profitability of Commercial Banking, measured by RoE/RORAC, increased to 12.8% in 2004 from 11.1% in 2003 pro forma.

2003 vs. 2002 pro forma

In 2003 the Domestic Banking Networks managed most of the volumes handled by the Group, accounting for almost 96% of net interest income. Despite the decrease in interest rates, net interest income of the Domestic Banking Networks increased by 3.3% in 2003 compared with 2002 on a pro forma basis, due to the same reasons discussed under our Group consolidated income statement above. The favorable trend of all revenue components was reflected in a 6% increase in the Domestic Banking Networks' net interest and other banking income compared with 2002 pro forma. This income margin represented 81% of the Group's net interest and other banking income for 2003. Approximately 75% of customer financial assets and transactions in securities, foreign exchange and derivatives can be attributed to the Domestic Banking Networks.

Operating expenses increased by less than the average annual rate of inflation in Italy, and thus decreased in real terms. This contributed to a 11.6% increase in operating income compared with 2002 on a pro forma basis. Personnel costs form a significant component of the costs of the Domestic

Banking Networks, which, as of December 31, 2003, employed 33,314 people, corresponding to 77% of the Group's total staff.

The significant increase in provisions and net adjustments to loans and financial fixed assets adversely affected net income, which nevertheless increased to €973 million in 2003, a 15.8% increase compared with 2002 pro forma, higher than the increase in average capital allocated to the Business Sector. This improvement in the profitability of the Domestic Banking Networks, measured by RoE/RORAC, reached 12.7% in 2003, compared with 11.4% in 2002 pro forma. The Domestic Banking Networks absorbed 71% of the Group capital.

Asset Management (formerly Wealth Management and Financial Markets)

2004 vs. 2003 pro forma

In 2004, Asset Management contributed over 5% of the Group's consolidated net income while absorbing just over 1% of the capital, substantially in line with the results in 2003 pro forma. This Business Sector, which uses the Group's banking networks throughout the country for the placement of its products, was characterized by high levels of profitability in 2004, which increased to 46.3% compared to 31.2% in 2003 pro forma.

Asset Management's contribution to net income of the Group increased to €75 million in 2004 compared with the €49 million in 2003 pro forma, which takes into account the demerger of the insurance companies from this Business Sector as part of the creation of the Insurance Business Sector. This increase was due primarily to a decrease in payroll and administrative costs, the absence of any adjustments to goodwill and a decrease in provisions for risks and charges and also to the integration of Eptafund.

2003 vs. 2002 pro forma

In 2003 Wealth Management and Financial Markets contributed 22% of the consolidated net income of the Group for 2003, absorbing 12.5% of the capital. Wealth Management and Financial Markets benefited from considerable synergies from the placement of its products through the Group's banking networks and showed significant improvement in RoE, which increased to 15.7% in 2003 from 12.9% in 2002 pro forma.

The contribution to consolidated Group net income in 2003 was €214 million, an increase compared with €158 million in 2002 pro forma, primarily due to the increase of revenues, including those related to asset management, and a substantial stability in costs.

Investment Banking (formerly Wealth Management and Financial Markets)

Investment Banking contributed €45 million to the Group's consolidated net income in 2004, primarily due to the results of Banca IMI and, to a lesser extent, Structured Finance, which compensated for the losses of IMI Investimenti and Sanpaolo IMI Private Equity. The net result, a considerable improvement compared to 2003 pro forma, was primarily the result of a decrease in adjustments to financial fixed assets in 2004 compared to 2003 pro forma.

Investment Banking absorbed 15% of the Group's capital in 2004 compared with 13% in 2003 pro forma, and employed just over 1% of the Group's staff in 2004, unchanged compared with 2003 pro forma.

Personal Financial Services

2004 vs. 2003 pro forma

Personal Financial Services operated in 2004 through a network of 4,313 financial planners and 1,824 employees. Its contribution to the Group's net income was €128 million compared with €105 million in 2003 pro forma. The results for 2004 and 2003 pro forma take into account the demerger of Banca Fideuram's insurance activities as part of the creation of the Insurance Business Sector.

Personal Financial Services contributed €128 million to the Group's net income in 2004, or 9% of the Group's total net income, compared to €105 million in 2003 pro forma, or 11% of the Group's total net income. Personal Financial Services absorbed 4% of the Group's capital in 2004. The Business Sector's profitability, measured by RoE, remained high at 29% in 2004 compared with 25.9% in 2003 pro forma.

Commissions benefited from the allocation of assets under management to higher added-value instruments and the recovery of the financial markets. Assets under management increased by 2.3% to €59.5 billion in 2004 compared to 2003 pro forma, and in particular there was an increase of the total amount of managed funds generating recurring commissions (such as mutual funds, portfolio management and unit-linked investments). Operating income in 2004 was €276 million, an increase of 26.6% compared with 2003 pro forma, primarily due to an increase in commission revenues. The cost to income ratio improved by 6 percentage points, decreasing to 56.5%. This trend confirmed the success of commercial policies based on a return to profitability and the synergies resulting from the integration with Sanpaolo Invest.

2003 vs. 2002 pro forma

Personal Financial Services operated in 2003 through a network of 4,543 financial planners and 1,871 employees. Its contribution to the Group's net income increased to €132 million compared with €111 million in 2002. Personal Financial Services contributed 14% of the Group's net income and absorbed 7% of the capital.

Transactions benefited from a better level and mix of net asset management inflow than expected in the budget targets for 2003. The results were obtained through net interest and other banking income just below that of 2002, combined with a decrease in costs and provisions. As a result, in 2003, RoE rose to 17.9% from 14.1% in 2002.

Insurance

Insurance operates through A.I.P., the company that has been operational since December 1, 2004 and comprises all the Group's insurance companies. This concentration of the Group's insurance activities led to the creation of a leading Italian insurance operator, with consolidated premium flows of over €8.5 billion and technical reserves of €38.8 billion euro. As of December 31, 2004, A.I.P. had an estimated market share of 11.9% for premiums and 12.5% for reserves. (source: ANIA Italian Insurance Companies' Association.) As of December 31, 2004, A.I.P. had over 2 million insurance contracts.

The results for 2004 and 2003 pro forma are presented as if all the insurance companies of the Group had been concentrated in this Business Sector since January 1, 2003. As A.I.P. was consolidated using the equity method, the company's contribution to the Group results is represented only by net income.

The Insurance Business Sector's net income was €216 million in 2004, a 75.6% increase from €123 million in 2003 pro forma. Insurance absorbed 9% of the Group's capital in 2004 compared to 8%

in 2003 pro forma, while allocated capital increased by 8.2% to €987 million in 2004 from €912 million in 2003 pro forma. Since allocated capital increased at a lower rate than net income, the profitability of the Insurance Business Sector, as measured by RoE, increased to 21.9% in 2004 compared with 13.5% in 2003 pro forma.

Public Authorities and Entities

Owing to a decrease in margins caused by the ordinary termination of significant transactions with high returns entered into in the past and increased competition in the public sector financing market, this Business Sector succeeded in increasing its net interest income by 1.6% in 2004 compared with 2003 pro forma, primarily due to an increase in the total volume of loans to and investments in debt securities issued by customers. Operating income was €132 million in 2004, a 5.0% decrease compared with €139 million in 2003 pro forma. Net income in 2004 was €74 million, a decrease of 19.6% compared with €92 million in 2003 pro forma, primarily due to an increase in provisions for probable loan losses.

Public Authorities and Entities absorbed 7% of the Group's capital in 2004 and its profitability, measured by RoE/RORAC, was 9.4% in 2004 compared with 13% in 2003 pro forma.

Central Functions

2004 vs. 2003 pro forma

Central Functions includes the Group's holding activities, finance, the management of equity investments (including the Group's shareholdings in Cassa di Risparmio di Firenze, Cassa dei Risparmi di Forlì and Banca delle Marche), the MOI and GEST Line, which manages the Group's tax collection activities. Central Functions' main component is represented by bodies that direct the strategy, governance and control of the other Business Sectors.

The income results reflect the nature of Central Functions, which incurs costs using a centralized system and on behalf of other Group companies, only partially allocating them to the operating units. This structure was implemented in order to safeguard cost control through central bodies which have the facilities to control costs and monitor the pursuit of cost efficiency.

Central Functions showed a loss of €168 million in 2004, primarily attributable to the share of costs not allocated to operating functions and to the amortization of goodwill consequent to equity investments made at holding level, partly offset by the write-back in the value of the Group's equity interest in SCH and by the gains from the sale of equity investments. Central Functions' loss of €260 million in 2003 pro forma was adversely affected by extraordinary charges relating to staff leaving incentives.

2003 vs. 2002 pro forma

In 2003 Central Functions included the Group's holding activities, including the former Cardine Finanziaria, the MOI and the management of property, equity investments and the Group's lending policy. Consequently, all the activities for the direction, support, management and control of the Group's Business Sectors, as well as infrasector adjustments, were attributed to Central Functions.

Central Functions showed a loss of €387 million in 2003, primarily attributable to the share of costs not allocated to operating functions and also to the amortization of goodwill in relation to equity investments made at holding level and not attributable to operating Business Areas. The writeback of the shareholding in SCH, the capital gains on the disposals of the equity portfolio, and the extraordinary expenses incurred in relation to staff leaving incentives were also allocated to Central Functions in 2003.

In 2002 pro forma, Central Functions showed a loss of €225 million, primarily attributable to the share of costs not allocated to operating areas and to the write-downs of the investment portfolio, only partially offset by the use of reserves for general banking risks.

5. Explanatory Notes to the Pro Forma Results

In order to ensure comparability of our results on a consistent basis in relation to the main changes to the scope of consolidation, the consolidated accounts of the Sanpaolo IMI Group for the previous year are also presented in a pro forma version. Our pro forma results are unaudited.

2002 Pro Forma

The pro forma results for the year 2002 assume the full consolidation of the Eptaconsors Group and Inter-Europa Bank, the proportional consolidation of Cassa dei Risparmi di Forlì and the non-consolidation of IW Bank, Banque Sanpaolo and Finconsumo Banca with effect from January 1, 2002.

The preparation of the 2002 Pro Forma is based on the 2002 consolidated financial statements of the Sanpaolo IMI Group, which is reconciled to the audited 2002 Consolidated Financial Statement (column "a" of the following tables).

To prepare the 2002 Pro Forma, the following adjustments were made:

In column "b" of the attachments:

The full consolidation of the 100% shareholding in Eptaconsors and its subsidiaries, following the reversal in the valuation in net equity of the 40.48% share already held in the previous year. For this purpose, the purchase of the additional 59.52% shareholding has been simulated as of January 1, 2002, offset against €55 million of "customer deposits";

The full consolidation of the 85.87% shareholding in Inter-Europa Bank, following the reversal in the valuation of net equity of the 32.51% share already held in the previous year. For this purpose, the purchase of the additional 53.36% shareholding has been simulated as of January 1, 2002, offset against €30 million of "customer deposits";

The proportional consolidation of the 29.77% shareholding in Cassa dei Risparmi di Forlì, following the reversal in the valuation in net equity of the 21.02% share already held in the previous year. For this purpose, the purchase of the additional 8.75% shareholding has been simulated as of January 1, 2002, offset against €68 million of "customer deposits";

In column "c" of the attachments:

The full deconsolidation of IW Bank, following the disposal of 80% of the entire shareholding previously held, and the valuation in net shareholders' equity of the residual 20%. The disposal of the majority shareholding has been simulated with effect from January 1, 2002, and offset against an increase in "loans to banks" in a total amount equal to the sale price of the shareholding of €5 million, with the subsequent loss recorded directly to net shareholders' equity, in accordance with relevant accounting principles. At the same time, a reverse entry, equal to the negative net adjustment to the value of the shareholding to reflect the sale price of the shareholding net of tax, was made to the consolidated statement of income for the year ended December 31, 2002;

The proportional deconsolidation of Finconsumo Banca, as an effect of the sale agreement (which was followed by the disposal of 20% of the investment) and of the end of joint control, with the consequent valuation of the entire investment held using the equity method;

In column "d" of the attachments:

The full deconsolidation of Banque Sanpaolo and its subsidiaries, following the disposal of 60% of the entire previously held shareholding, and the valuation in net equity of the remaining 40%. In particular, the disposal of the majority shareholding has been simulated with effect from December 31, 2002 and offset against an increase in "loans to banks" in a total amount of €481 million, with the subsequent net gain recorded directly to net equity reserves, in accordance with relevant accounting principles.

(1) On the basis of recent instructions received from the Bank of Italy, capitalization certificates held by the Group (€648 million) have been reclassified from the caption in the published financial statements "dealing securities" to the caption "loans to customers".

(2) The figures assume the full consolidation of the Eptaconsors group and of Inter-Europa Bank and the proportional consolidation of Cassa dei Risparmi di Forlì with effect from January 1, 2002.

(3) The figures assume the deconsolidation of IW Bank and Finconsumo Banca, with effect from January 1, 2002.

B. Liquidity and Capital Resources**Liquidity**

For information concerning the principal categories of the Group's funding sources, see: Item 3. "Key Information B. Selected Statistical Information Liabilities and Funding Sources" on page 64 above.

The working capital requirements of the Group are fully met through its funding strategies and Sanpaolo IMI believes that its credit standing will continue to give it access to both traditional and innovative funding.

There are no legal or economic restrictions, except for regulatory restraints, on the ability of subsidiaries to transfer funds to Sanpaolo IMI in the form of cash dividends, loan or advances, and such restrictions have no material impact on the ability of the company to meet its cash obligations.

Shareholders' Equity

Group shareholders' equity was €11,804 million as of December 31, 2004, and showed the following movements in the course of 2004:

	Changes in shareholders' equity
	(millions of €)
Shareholders' equity as of December 31, 2003	10,995
Decreases	(715)
Dividends	(715)
Exchange and other adjustments	
Use of reserves for general banking risks	
Increases	1,524
Monetary revaluation	
Net income for the year	1,393
Change in Reserve for general banking risks	2
Spin off of the share held by Fideuram Vita in Sanpaolo IMI	117
Differences arising on the translation of foreign currency financial statements and other adjustments	12
Shareholders' equity as of December 31, 2004	11,804

In addition to the distribution of the 2003 dividend and the net income for 2004, the changes with respect to shareholders' equity at the end of December 2003 reflect the increase in Sanpaolo IMI reserved for the minority shareholders of Banca Fideuram, in connection with the Spin Off of Banca Fideuram Vita in favor of the Parent Bank. The Spin Off also lead to an increase in consolidated reserves due to the acquisition of the reserves of Banca Fideuram Vita formerly attributable to the minority shareholders of Banca Fideuram.

Treasury Shares

As of December 31, 2004, the Group held 5,137,361 Sanpaolo IMI Shares, equal to 0.28% of Sanpaolo IMI's ordinary share capital, which were recorded, among the assets on the balance sheet, at a total market value of €54.4 million (€10.585 per Share).

During 2004, the Group pursued the aim of concentrating the ownership of Sanpaolo IMI Shares in the Parent Bank, excluding those by Banca IMI in connection with its securities dealing activities. The following were the Group's transactions in Sanpaolo IMI Shares during 2004:

as of December 31, 2003, the Parent Bank held 3,220,919 Sanpaolo IMI Shares in its portfolio, equal to 0.18% of the share capital, which were recorded in the assets in the Balance sheet at a market value of €34 million (€10.413 per Share). Pursuant to the decisions made by the shareholders' meeting regarding authorization to purchase and dispose of own Shares, during 2004 the Bank purchased 795,000 Shares (€2.2 million nominal value), for an outlay of €7.1 million. Consequently, at 31 December 2004, the Bank held 4,015,919 own Shares in its portfolio (€11.2 million nominal value), equal to 0.22% of the share capital, which were recorded in the assets of the securities dealing portfolio in the balance sheet at a market value of €42.5 million (€10.585 per Share);

as of December 31, 2003, the subsidiary Banca IMI, in relation to its institutional dealing activity, recorded, among the liabilities in its accounts, a "short-term position" in relation to 395,575 Sanpaolo IMI Shares (€1.1 million nominal value) attributable to the normal dealing activity and financially balanced by transactions in derivatives. During the year, the company purchased 4,707,753 Shares (€13.2 million nominal value) for a cost of €44.7 million, and sold 4,311,012 Shares (€12.1 million nominal value) for a total outlay of €42.7 million. Consequently, at December 31, 2004, Banca IMI held 1,166 Sanpaolo IMI Shares in its portfolio (approximately €3,000 nominal value) booked at a market value of approximately €12,000;

as of December 31, 2003, the subsidiary Banca Fideuram held no shares in its portfolio. During 2004, and following the above-mentioned Spin Off of Banca Fideuram Vita, Banca Fideuram acquired 1,120,276 Sanpaolo IMI Shares (€3.1 million nominal value) for a cost of €12.7 million. At December 31, 2004, Banca Fideuram adjusted the value of such shares by €0.8 million. Consequently as of December 31, 2004, the bank held 1,120,276 Sanpaolo IMI Shares in its portfolio (€3.1 million total nominal value) booked at a market value of €11.9 million.

following the Spin Off, the subsidiary Invesp, already a shareholder in Banca Fideuram with a 9.28 stake but with no Parent Bank Shares in its portfolio as of December 31, 2003, acquired 6,793,642 Shares (nominal value of €19.0 million). These Shares, reported at the time of the Spin Off for an outlay of €8.4 million, were divested by Invesp at a price of €69.4 million.

Regulatory Capital and Capital Adequacy

The following table sets forth the Tier I and the Tier II capital levels and the relative ratios of the Sanpaolo IMI group at December 31, 2004 and 2003. In accordance with Bank of Italy regulations, the ratios set forth with respect to the capital of Sanpaolo IMI have been calculated net of any dividend distributions. The ratios reflect the clarifications made in the Bank of Italy's technical note of August 3, 2001. See: also Item 4. "Information on Sanpaolo IMI C. Business Overview Italian Banking Regulation and Corporate Governance Principles Capital Adequacy Requirements" on page 97 above for further details.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

	At December 31,	
	2004	2003
	(millions of €, except ratios)	
Tier I capital		
Share capital	5,218	5,144
Additional paid-in capital	725	708
Reserves(1)	4,975	4,516
Preferred Securities in €	1,000	1,000
Less: intangible assets	(1,058)	(1,330)
Tier I capital(2)	10,860	10,038
Tier II capital		
Revaluation reserves	71	75
Subordinated debt	5,209	4,326
Other positive items	85	91
Other negative items	(9)	(22)
Tier II capital	5,356	4,470
Less: financial investments	(840)	(837)
Total Tier I and Tier II capital ("Own Funds")	15,376	13,671
Tier III capital subordinated loans	594	598
Total Tier I, Tier II and Tier III capital	15,970	14,269
Total minimum capital(3)	10,676	10,921
Excess capital(4)	5,294	3,348
Weighted assets (€/mil)		
Lending risk	119,600	124,987
Market risk	13,063	10,963
Other requirements	787	563
Total weighted assets	133,450	136,513
Capital adequacy ratios (%)		
Tier I capital/Total risk-weighted assets	8.1%	7.4%
Total capital/Total risk-weighted assets	12.0%	10.5%

(1) The item refers to the sum of the following Items of the consolidated financial statements: Item 170 "Reserves" plus Item 200 "Net income for the year" plus Item 140 "Minority interest" (net of the portion referring to revaluation reserves) plus Item 130 "Negative goodwill arising on application of the equity method" plus Item 100 "Reserve for general banking risks", less dividend distributed and treasury Shares.

(2)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Tier I regulatory minimum capital requirements are calculated as 4% of total risk-weighted assets.

(3)

Total minimum capital requirements are calculated as 8% of total risk-weighted assets.

(4)

This item represents the difference between Total Tier I, Tier II and Tier III capital and total minimum capital.

Material Commitments for Capital Expenditures

As of December 31, 2004, we had no material commitments for capital expenditures on fixed assets.

Tabular Disclosure of Contractual Obligations

The following table presents the Group's known contractual obligations by remaining maturity for the categories specified below at December 31, 2004.

	At December 31, 2004 Payments due by maturity				Total
	less than 1 year	between 1 and 3 years	between 3 and 5 years	more than 5 years	
	(in € millions)				
Long-term debt(1)	16,922	14,433	8,449	13,715	53,519
Lease obligations(2)	3	3		5	11
Other obligations(3)	20	11	1		32
Guarantees and commitments of which:	30,547	7,045	8,148	1,374	47,114
Guarantees(4)	11,841	3,093	1,947	418	17,299
Lines of credit(5)	13,500	3,461	5,104	844	22,909
Purchased securities subject to settlement(6)	2,783				2,783
Other commitments(7)	2,423	491	1,097	112	4,123
Total	47,492	21,492	16,598	15,094	100,676

- (1) Long-term debt consists of senior debt securities and subordinated debt issued by the Group. See: Note 10 to the Consolidated Financial Statements on page F-34 below and Item 3. "Key Information B. Selected Statistical Information Liabilities and Funding Sources on page 64 above. It excludes debt due to customers and debt due to banks since such debt is generally short-term in nature.
- (2) Represents financial and operating lease obligations.
- (3) Represents miscellaneous obligations.
- (4) Primarily represents commercial and financial guarantees provided to public entities, banks and other financial institutions on behalf of customers to secure loans, overdrafts and other facilities. For further details, see Note 18 to the Consolidated Financial Statements at page F-115.
- (5) Represents (i) undrawn lines of credit (€12,556 million), (ii) committed mortgage loans and leasing contracts (€6,279 million) and (iii) committed loans (€4,074 million). For further details, see Note 9 to the Consolidated Financial Statements at page F-21.
- (6) Represents securities purchased as of the date indicated for which settlement has not yet occurred.
- (7) Represents, primarily, (i) commitments to purchase securities arising from put options with third parties (including put option to purchase shares in Cassa di Risparmio di Forlì, Banca Koper, Cassa di Risparmio di Firenze and Banca delle Marche) for an aggregate amount of €1,613 million and (ii) credit derivatives for an aggregate amount of €1,397 million. For further details, see Notes 11 and 12 to the Consolidated Financial Statements at pages F-40 and F-76.

Off-Balance Sheet Arrangements

Other than the off-balance sheet guarantees, lines of credit and other commitments disclosed in "Tabular Disclosure of Contractual Obligations" above, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

C. Trend Information

In a difficult market scenario, with signals of a general deceleration in economic growth in the first quarter of 2005 as compared with the first quarter of 2004, the Group's operating result were substantially stable. This was due to significant cost control, and an increase of 6.2% in income before extraordinary items. The increase in income before extraordinary items was due to the decrease in provisions and net adjustments. In the first quarter of 2005, net income decreased, on an annual basis by approximately 12%. The decrease was due primarily to the divestiture of the Group's stake in Finconsumo Banca (see: Item 4. "Information on Sanpaolo IMI - B. Significant Developments During 2004 - Commercial Banking Business Sector - Other Initiatives in Italy" on page 73 above) recorded in the first quarter of 2004.

The weakness of the Italian economy, which has shown signs of deterioration in the first months of 2005, may affect the results of the Group, especially net interest income which is influenced by the persistence of low interest rates. To counteract that trend the Group will pursue its strategy to increase its volume of business with companies and private customers.

With regard to the corporate market, the Group will focus on increasing its business volumes through increases in the current customers loan portfolio and acquiring new customers. In the retail market the Group will try to improve its competitive position in the fast-growing markets of residential mortgages and consumer credit and to consolidate its leadership in Italian asset management. Benefits are also expected to come from the integration of the Group's bank networks, which is expected to increase commercial focus and cost containment.

D. Critical Accounting Estimates

Critical accounting estimates with respect to our Italian GAAP financial statements

The discussion and analysis of our results of operations and financial condition are based on our consolidated financial statements, which have been prepared in accordance with Italian GAAP. The preparation of these financial statements requires management to apply accounting methods and policies that are based on difficult or subjective judgments, estimates based on past experience and assumptions determined to be reasonable and realistic based on the related circumstances. The application of these estimates and assumptions affects the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the balance sheet date and the reported amounts of income and expenses during the reporting period. Actual results may differ from these estimates given the uncertainty surrounding the assumptions and conditions upon which the estimates are based. We have summarized below our accounting estimates that require the more subjective judgment of our management in making assumptions or estimates regarding the effects of matters that are inherently uncertain and for which changes in conditions may significantly affect the results reported in the combined and consolidated financial statements.

Detailed information regarding accounting policies is provided in Note 7 to the Consolidated Financial Statements on page F-10 below.

Allowance for Loan Losses

The Group provides for losses existing in its loan book so as to state its loan portfolio at its estimated realizable value. The assessment performed takes into consideration any guarantees or other security received, market prices (where applicable) and general economic conditions experienced by different categories of borrower.

Estimated realizable value is determined following a detailed review of loans. This review is conducted on a timely basis (as appropriate for the type of loan) and is consolidated for all loans outstanding at the end of the period. The review considers the degree of risk associated with the various forms of lending and also the risk of default inherent in performing loans as a result of general economic circumstances.

The general provision against performing loans is calculated on a statistical basis, which provides a historical valuation of portfolio risk. These provisions are integrated, at the Parent Bank level and commercial networks, by a portfolio model based on risk management methodologies used for monitoring and controlling credit risks.

The specific provision against doubtful loans involves estimating the amount and timing of future financial flows arising, discounting those flows at an appropriate rate and estimating the enforceability and amount which may be recovered through the sale of any security held or calling of any guarantees.

Subjective judgments are made in this process that may vary from person to person and team to team. Furthermore, judgments change with time as new information becomes available or as workout strategies evolve, resulting infrequent revisions to the specific provisions as individual decisions are taken, case by case.

Determining the allowance for loan losses requires specific judgments applied to the results of the statistical analysis. This is applied at business level where management takes account of the quality of the statistical analyses and the relevance of historical data used in the analyses, current information, and the general economic and environmental factors mentioned before.

Changes in the estimates and assumptions used in determining the allowance for loan allowance could have a direct impact on the provision and could result in a change in the allowance. However, experience suggest that the estimations and assumptions are reliable and stable.

Fair Values of Financial Instruments

Quoted market prices in active and liquid markets are the most reliable measure of fair value of financial instruments because they accurately represent the prices paid for and received for financial assets and liabilities. However, if such prices are not readily determinable, the Group calculates fair value based on either internal valuation models or management's estimate of amounts that could be realized under current market conditions, assuming an orderly liquidation over a reasonable period of time. Certain financial instruments, including OTC derivatives, are valued using pricing models that consider, among other factors, contractual and market prices, credit risk, interest rate yield curve, volatility factors and/or prepayment rates of the underlying positions. The main areas of judgment in applying these models are:

estimate the expected cash flows under the terms of each contract; and

discount these values using an appropriate discount rate.

The use of different pricing models and assumptions could produce materially different estimates of fair value. This will result in changes in the carrying value of the financial instrument where they are carried at fair value. Where the instrument is carried at amortized cost, or the lower of cost and market value, changes in their estimated fair value, arising from changes in management's assumptions

on the above variables, may result in a write-down in their value. In this case, it will also be necessary for management to exercise judgment as to whether or not changes in the underlying valuation assumptions are only temporary.

Goodwill

The Group capitalizes acquired goodwill and amortizes it over its useful economic life. There is a rebuttable presumption that the useful economic life of purchased goodwill is limited and does not exceed 20 years from the date of acquisition. This assessment involves management making judgments and assumptions over:

the nature of the acquired business;

the economic environment in which it operates; and

the period of time over which the value of the business is expected to exceed the value of assets.

Different assumptions and judgments may lead to a different amortization charge being recognized in income during the period.

Under U.S. GAAP, goodwill is no longer amortized and therefore the Group must also consider at least annually whether the current carrying value of the goodwill is impaired. The Group evaluates impairment using a two-step process. First, the Group compares the aggregate fair value of the reporting unit to its carrying amount, including goodwill. If the fair value exceeds the carrying amount, no impairment exists. If the carrying amount of the reporting unit exceeds the fair value, then the Group compares the implied fair value, defined below, of the reporting unit's goodwill with its carrying amount. If the carrying amount of the goodwill exceeds the implied fair value, then goodwill impairment is recognized by writing the goodwill down to the implied fair value.

The first element of this allocation is based on the areas of the business expected to benefit from the synergies derived from the acquisition. The second element reflects the allocation of the net assets acquired and the difference between the consideration paid for those net assets and their fair value. This allocation is reviewed following business reorganizations. The carrying value of the operating unit, including the allocated goodwill, is compared to its fair value to determine whether any impairment exists. A detailed calculation may need to be carried out taking into consideration changes in the market in which a business operates (e.g. competition activity, regulatory change). In the absence of readily available market price data to value the reporting units, judgment is required to:

estimate the expected future cash flows of the reporting unit; and

discount these values using an appropriate discount rate.

Changes in either of these variables could potentially impact upon whether or not any impairment is recognized.

Pensions

The Group participates directly and indirectly in defined benefit pension schemes for part of its employees. The pension cost for these schemes is assessed in accordance with the advice of a qualified actuary. This cost is annually charged to the income statement. In determining this cost the actuarial value of the assets and liabilities of the scheme are calculated. This involves modeling their future growth and requires management and the actuary to make assumptions as to factors such as:

price inflation;

dividends and earnings growth;

pension increases;

return on new investments;

discount rates; and

employee's life expectancy.

There is an acceptable range in which these estimates can validly fall. If different estimates within that range had been selected the cost recognized in the income statement could be significantly altered.

Deferred Tax Asset Valuation Allowance

The Group recognizes deferred tax assets and liabilities for the estimated future tax effects of temporary differences between the book value of the assets and liabilities and their fair value for tax purposes, net operating loss carry forwards and tax credits. The recognition of deferred tax assets is subject to management's judgment based on available evidence that they are likely to be recovered. In the event that we determine that we would not be able to realize all or part of our deferred tax assets in the future, an adjustment to our deferred tax assets would be charged to income tax expense in the period that the determination was made.

Provisions for risks and charges

Provisions are made for risks, charges and probable liabilities whose timing and extent cannot be determined at period-end or at the time the financial statements are prepared. The use of different estimates or assumptions by management could produce different provisions for risk and charges.

Significant accounting policies with respect to our reconciliation from Italian to U.S. GAAP

We include a reconciliation of net income and shareholders' equity between Italian GAAP and U.S. GAAP within Note 29 to the Consolidated Financial Statements on page F-164. The preparation of this reconciliation requires management to consider accounting policies under U.S. GAAP to determine whether or not a difference in GAAP exists, and to quantify the amount of that difference where appropriate. These policies may also be based on difficult or subjective judgments, estimates based on past experience and assumptions determined to be reasonable and realistic based on the related circumstances.

Unless indicated otherwise, all of the significant accounting policies identified above, are equally critical to preparation of the U.S. GAAP reconciliation, and involve similar judgment and assumptions by management.

Business Combination

Goodwill and intangible assets include the cost of acquired subsidiaries in excess of the fair value of the tangible net assets recorded in connection with acquisitions. Acquired intangible assets include core deposit, customer list, brand and asset under management. Accounting for goodwill and acquired intangible assets requires management's estimate regarding (i) the fair value of the acquired intangible assets and the initial amount of goodwill to be recorded, (ii) the amortization period and (iii) the recoverability of the carrying value of acquired intangible assets.

To determine the initial amount of goodwill to be recorded upon acquisition, we have to determine the consideration and the fair value of the net assets acquired. We use independent appraisers and our internal analysis, generally based on discounted cash flow techniques, to determine the fair value of the net assets acquired and non-cash components of the consideration paid. The actual fair value of net assets acquired could differ from the fair value determined, resulting in an under- or over-statement of goodwill.

The useful lives of acquired intangible assets are estimated based on the period over which the assets are expected to contribute directly or indirectly to the future cash flows of the acquired entity.

The amortization period under U.S. GAAP is reviewed annually in light of the above factors for acquired intangible assets. In making these assumptions, we consider historical results, adjusted to reflect current and anticipated operating conditions. Because a change in these assumptions can result in a significant change in the recorded amount of acquired intangible assets, we believe the accounting for business combination is one of our critical accounting estimates.

E. Recent Accounting Developments

Transition to IFRS international accounting standards

The regulatory context

As from 2005, EC regulation no. 1606/2002 (IAS Regulation) requires listed companies subject to the legislation of each EU member State, to prepare their consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standard Board ("IASB") and as endorsed by the European Commission. Moreover, IAS Regulations grant EU member States the right to adopt early the application of IFRS to the stand-alone financial statements of listed companies and to the stand-alone and consolidated financial statements of non-listed companies.

The 2003 European Law no. 306 ("Legge Comunitaria 2003") endorsed by the Italian Parliament on October 31, 2003, gives the Italian Government a mandate for the application of IFRS to Italian companies.

On 25 February 2005, the Italian Government exercised the mandate by issuing a legislative decree allowing banks and financial institutions (subject to the regulatory supervisions of the Bank of Italy) to adopt IFRS to the stand-alone financial statements as from 2005 and requires the mandatory adoption as from 2006. The same decree confirms the current authority of the Bank of Italy and ISVAP (Italian Insurance Regulatory Authority) to define the form and content of banking and insurance financial statements respectively in annual reports and appertaining notes.

In April 2005, CONSOB (Italian Public Authority Responsible for Regulating the Italian Securities Market) issued further regulations containing the instructions for preparing interim financial statements and the transition to IFRS. In 2005, the Bank of Italy will provide the regulations required to assess the impact of IFRS on regulatory capital and the abovementioned regulations relating to the form and content of financial statements in annual reports and appertaining notes.

In regards to the adoption of the new accounting standards, as of today 36 standards and including the respective improvements have been endorsed by the EU. The endorsement process was carried out without any substantial problems for the majority of the standards; however the endorsement of IAS 39, relating to financial recognition and measurements of financial instruments, has been subject to prolonged delays because of the issues raised by banks and regulatory authorities. A particular concern raised by the banks in connection with IAS 39 was the prohibition of fair value hedge of core deposits on a portfolio basis, while the main concern for regulatory authorities was the possible application of fair value option to financial liabilities.

IAS 39 had been endorsed in November 2004 on the basis of a late compromise known as the 'carve out' solution. The agreement reached on the EU endorsed version of IAS 39 removes part of the original IASB text which was subject of the debate. Accordingly, the standard's text as adopted by the EU does not fully conform to that of the IASB. The EU hopes that in 2005 the IASB will review the disputed text to reach a wide consensus on the text of IAS 39.

Main accounting and valuation changes

Compared to currently applicable Italian GAAP, IFRS are characterized by a more frequent use of fair value valuation criteria. This is reflected in:

the requirement to use a fair value valuation for a wide category of financial instruments, including:

trading or available for sale securities. According to the Italian accounting standard currently applied by the Group, only listed securities including those in the not held to maturity portfolio are valued at fair value; all non-listed securities are valued at the lower of purchase cost and the market value. Held-to-maturity securities are recorded at cost taking into account other than temporary losses.

hedging and non-hedging derivative contracts. Currently, derivative contracts entered to hedge banking book transactions are valued at cost, while the amount attributable to such transactions is recorded on an accrual basis.

all financial instruments, essentially lending and funding contracts, hedged against the risk of devaluation in price (fair value hedges). In compliance with currently applicable Italian accounting standards, financial instruments included in the banking book are accounted for on an accrual basis at their net carrying amount less provision (lending) or redemption price (funding).

equity investments below significant control interest. This category of equity investments is currently valued at cost and such equity investments are written down to reflect any permanent losses in value.

The option to account all tangible fixed assets at fair value as an alternative to amortizing the cost value. Moreover, there is the option to measure tangible assets at the date of the transition to IFRS at fair value and use it as its deemed cost at that date.

The requirement to apply the purchase method of accounting for business combinations. The purchase method requires that all assets and liabilities purchased to be valued at fair value, regardless of the method used to account for the transaction (purchases of businesses, mergers, transfers, etc.). Currently, applicable Italian accounting standards allow maintaining the pre-existing book values.

The requirement to apply fair value to intangibles and to write down the value in the event of permanent losses commonly referred to as impairments. Goodwill and intangible assets with indefinite useful life should not be amortized but should be reviewed for impairment at least annually. Currently applicable Italian accounting standards require intangible assets to be recorded at purchase cost and amortized over the period of their expected useful life.

In connection with liabilities relating to personnel (such as termination indemnities and other long-term employer commitments), IFRS requires actuarial calculations of the expected future liability taking into account the time when such liabilities will be paid out. Currently, these liabilities are accounted for an amount that represents the liability that should be paid at the date of the financial statements if all employees were terminated at the balance sheet date.

Furthermore, with the adoption of IFRS, employee stock options are reported at their initial fair value for a vesting period as personnel costs offset against a specific reserve in shareholders' equity. According to Italian accounting standards, employee stock options are not recorded in the financial statements.

IFRS applies the contractual rates for the discounting of doubtful loans. This criterion, which is not as common under Italian accounting standards, is already applied in the Sanpaolo IMI Group financial statements.

Lastly, accordingly to IFRS all subsidiary companies and including equity investments that are considered controlled (except for those companies that are subject to bankruptcy proceedings) are consolidated. Therefore, the consolidation area of the Sanpaolo IMI Group will include those insurance companies which are currently accounted for using the equity method.

The IFRS Project and the Group

In December 2002, the Sanpaolo IMI Group launched a project to plan and implement the measures necessary to adequately cope with the transition to the new regulatory framework. In the context of the project, the Parent Bank took on a role of leading and controlling the activities entered into by the Group companies by creating the "Group Guidelines" (established in 2003) which supplied methodological and operational support to subsidiaries for planning the transitional processes. The Group also provided constant monitoring of the progress and the measures undertaken at the subsidiaries.

The project was mainly split into two areas:

Study and analysis of IFRS and of the main issues raised by their implementation. This activity, which involved a high number of resources (approximately 120 specialists within the Parent Bank and the material subsidiaries were divided into 15 working groups) has enabled the creation of the first IFRS compliant version of the "Group Accounting Policies Handbook", which represents the main point of reference for the Parent Bank and all the subsidiaries for the preparation of their financial statements using consistent and homogeneous Group policies. The handbook is subject to continuous updates to reflect the developments of the IFRS content.

Activities performed independently within the different areas of the Group on the basis of the above mentioned guidelines. In particular, these activities include:

Adjustments of IT systems, to be completed in 2005. Given the uncertainties surrounding the application of the new accounting policies to different areas of significance (stand-alone financial statements, tax regulation, and reports to the Supervising Authorities) which have characterized the project since its inception, the Group has taken all the required actions aimed at guaranteeing parallel assessments of net income and equity results on the basis of both IFRS and Italian accounting policies. Overall, the two areas of the project activity and taking into account the residual activities programmed for 2005 at the Parent Bank and its subsidiaries, the external costs of the IFRS Project have been estimated at €32 million.

Organizational operations regarding administration, valuation and accounting processes. These activities started in the second half of 2004 and will be finalized by 2005.

Training operations. These activities were created with the aim of providing insight of the new regulatory framework to the Parent Bank and all the subsidiaries through training courses and meetings specializing at different levels and detail. As of December 2004, the first two training modules have been completed, involving 2,000 employees of the Parent Bank and its subsidiaries. Training will continue throughout 2005.

Application to the Group

With regard to the adoption of IFRS within the Sanpaolo IMI Group, the Board of Directors decided to take advantage of the option provided by Italian law to adopt IFRS for the preparation of the 2005 stand-alone financial statement. For reasons of uniformity of accounting reporting within the

Group and coherence with the consolidated balance sheets, a similar approach was also adopted for the subsidiaries. Transition to IFRS is expected for the 2005 half year consolidated financial statements.

Based on a first valuation, it has been estimated that the transition to IFRS is expected to increase shareholders' net equity by approximately €250/300 million, mainly as result of the one time application of the fair value to the land component of the Group's real estate portfolio (IAS 16). This non-material result is primarily attributable to the fact that the valuation of the Group's loan portfolio, that represents in general for the Italian banking system the most significant accounting item, was for the Group Sanpaolo IMI already in line with IFRS. The Group adopted (in line with the best international practice) the criterion now required by IFRS to evaluate doubtful loans at net present value since 1998, the year that Sanpaolo IMI securities were registered in the United States of America.

An analysis of other areas of possible impact of the Group's first time adoption of IFRS, caused either by the application of the new accounting standards concerning financial instruments and hedge accounting (IAS 32 and 39), employee benefits, contingent liabilities and the provisions (IAS 19 and 37), the Group's decision not to apply IFRS 3 retrospectively to business combinations as in accordance with the transitional provisions set out in IFRS 1, resulted in no material effects on the overall consolidated shareholders' equity.

From an income statement point of view, the consolidated net income for 2004 adjusted for the application of IFRS, taking into account the abovementioned exemptions to not apply IFRS 3 retrospectively, the adoption as of 1 January 1, 2005 of IFRS concerning financial instruments (IAS 32 and 39) and insurance contracts (IFRS 4), shows an estimated increase in net income of over €100 million. This result is mainly attributable to the fact that goodwill is not amortized under IFRS.

The abovementioned estimates will be subject to updates of the new regulatory framework and will be reanalyzed during the 2005 half year consolidated financial statements that are to be prepared in accordance with IFRS as endorsed by the EU. The IFRS financial information will be subject to a full audit by our auditor PricewaterhouseCoopers, S.p.A., except for the half year consolidated financial statements which will be subject to a limited review as proposed by the CONSOB.

Developments under U.S. GAAP

EITF Issue 03-01: The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments

The EITF Issue 03-01 (EITF 03-01) provides guidance on recognizing other-than-temporary impairments on securities classified as either available for sale or held to maturity under SFAS 115 and for investments accounted for under the cost method. In September 2004, the FASB delayed the effective date of EITF 03-1 for measurement and recognition of impairment losses until implementation guidance is issued. In December 2004, the FASB decided to reconsider in its entirety all guidance on disclosing, measuring and recognizing other-than-temporary impairments of debt and equity securities and requires companies to continue to comply with existing accounting literature. Once the effective date of the measurement and recognition guidance has been confirmed, Sanpaolo IMI will assess the impact of EITF 03-1 on its consolidated financial statements.

SOP 03-3: Accounting for Certain Loans or Debt Securities Acquired in a Transfer

In December 2003, the American Institute of Certified Public Accountants (AICPA) released Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3) which supersedes AICPA Practice Bulletin 6, "Amortization of Discounts on Certain Acquired Loans". SOP 03-3 addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable to credit quality. SOP 03-3 limits accreditable yield to the excess of the investor's estimate of undiscounted cash flows over the investor's initial

investment in the loan and prohibits the recognition of the non-accretable difference. Under SOP 03-3, subsequent increases in cash flows expected to be collected generally should be recognized prospectively through adjustment of the loan's yield over its remaining life while any decreases in cash flows expected to be collected should be recognized as impairments. SOP 03-3 also provides guidance with regard to presentation and disclosures. SOP 03-3 is effective for loans acquired in fiscal years beginning after December 15, 2004. Sanpaolo IMI is currently assessing the transition the impact of SOP 03-3 in its consolidated financial statements.

SFAS 153: Exchanges of Nonmonetary assets

The FASB issued SFAS 153 Exchanges of Non-monetary assets, an amendment of APB Opinion No. 29 in December 2004. SFAS 153 provides for a general exception from fair value measurement for exchanges of nonmonetary assets that do not have commercial substance. The Statement is effective for fiscal years beginning after June 15, 2005. Sanpaolo IMI is currently assessing the impact of SFAS 153 in its consolidated financial statements.

EITF 02-14: Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock

In July 2004, the FASB ratified the consensus reached in EITF Issue No. 02-14, "Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock" ("EITF 02-14"). EITF 02-14 concludes that an investor that has the ability to exercise significant influence over an investee should apply the equity method of accounting only when it has an investment in common stock and/or an investment that is in-substance common stock. EITF 02-14 addresses the determination of whether an investment is in-substance common stock but does not change existing guidance concerning the assessment of whether an investor has the ability to exercise significant influence over an investee. The consensus in EITF 02-14 is effective for reporting periods beginning after September 15, 2004. Sanpaolo IMI is currently assessing the impact of EITF 02-14 in its consolidated financial statements and will implement EITF 02-14 on January 1, 2005.

SFAS 154: Accounting Changes and Error Correction

SFAS 154 was issued in May 2005 and is effective for accounting changes and corrections of errors made in fiscal years beginning after 15 December 2005. SFAS 154 provides guidance on the accounting changes (voluntary and those required by the issuance of an accounting pronouncement) and error corrections. APB Opinion No.20 previously required that most voluntary changes in accounting principles be recognized by including in net income in the period of change, the cumulative effect of changing to a new accounting principle. SFAS 154 establishes, unless impracticable, retrospective application of the direct effects of the change as the required method for reporting change in accounting principles in the absence of explicit transition requirements specific to the newly adopted accounting principle. The correction of an error in previously issued financial statements is not an accounting change although the reporting of an error correction involves adjustments to previously issued financial statements similar to those reporting an accounting change. Sanpaolo IMI is currently assessing the impact of SFAS 154 in its consolidated financial statements.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and Senior Management****Board of Directors**

The Board of Directors of Sanpaolo IMI was renewed by the general shareholders' meeting of April 29, 2004, which also approved the financial statements for the year ended December 31, 2003. The mandate of the Board of Directors will expire at the general shareholders' meeting called to approve the financial statements for the year ended December 31, 2006.

The following table sets forth the names, position and year of appointment of the members of the Board of Directors of Sanpaolo IMI.

Name	Age	Position	Appointed
Enrico Salza	68	Chairman	1998(1)
Maurizio Barracco	61	Director	2004
Pio Bussolotto	69	Director	2002
Giuseppe Fontana	51	Director	1998

Alberto Tazzetti	57	Director	2004
Josè Manuel Varela	58	Director	2004

(1)

Appointed Chairman in 2004.

For a discussion of the election of the Board of Directors, see: Item 7. "A. The Major Shareholders' Agreements Among Shareholders" on page 199 below.

General Manager and Senior Management

On November 12, 2004 the Board of Directors of Sanpaolo IMI nominated Mr. Pietro Modiano as General Manager.

On November 29, 2004 the Board of Directors of Sanpaolo IMI defined the powers of the General Manager. Such powers are to be exercised within the context of the strategies, and plans determined by the Board of Directors of Sanpaolo IMI. Furthermore, the General Manager has the power to delegate his powers and is required to report quarterly to the Board of Directors of Sanpaolo IMI.

The General Manager is the head of the operating and executive structure of Sanpaolo IMI and is responsible for the Commercial Banking Business Sector. Including the banking networks in Italy and abroad. Furthermore, the General Manager is responsible for the specialist companies operating in specific markets, territories and businesses such as public entities (Banca OPI), investment banking (Banca Imi), private equity, consumer credit (Finemiro Banca), leasing (Sanpaolo Leasing) and tax collection (Gest Line).

The General Manager has also in relation to the granting of loans, powers, Group guarantees to financial institutions, financial risk management and control, recovery of loans, legal proceedings on

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

non-recovered assets and liabilities, administration procedures against Parent Bank and costs, as well as powers in matters concerning personnel and structures within the context of the frameworks approved by the administrative bodies. The General Manager has all the powers necessary for the ordinary management of the Parent Bank and formulates proposals for the Board of Directors and the Executive Committee.

On December 3, 2004 Mr. Modiano was also nominated chairman of Banca IMI, a material subsidiary of the Parent Bank.

The following table sets forth the members of the senior management (the "Senior Managers") of Sanpaolo IMI as of the date of this annual report, their age, positions with Sanpaolo IMI and year of appointment.

Name	Age	Position	Appointed
Alfonso Iozzo	62	Managing Director	2001
Pietro Modiano	53	General Manager	2004
Roberto Firpo	59	Head of Corporate Department	2004
Marina Tabacco	50	Head of Private & Retail Department	2004
Alfredo Checchetto	60	Head of Group Coordination for Triveneto	2004
Bruno Picca	55	Head of Finance and Administration Department	2004
Pier Luigi Curcuruto	55	Head of MOI Department	2000
Aldo Gallo	56	Head of Audit Department	1999
Maurizio Montagnese	49	Head of Group Personnel and Organization Department	1999
Bruno Mazzola	57	Head of Shareholdings Investments Department	2004
Piero Luongo	50	Head of General, Legal and External Affairs Department	2001

Biographical Data

The following is selected biographical data of the current Directors:

Enrico Salza, Chairman. Mr. Salza was Deputy Chairman of Sanpaolo from 1984 to 1995 and of Sanpaolo IMI from 2001 to 2004. He is an entrepreneur and the managing director of Tecno Holding S.p.A. He was formerly chairman of the Turin Chamber of Commerce and Unioncamere Piemontese. He served as managing director of Cerved S.p.A. until 2002, director of Union Bank of Switzerland in Italy and deputy chairman and managing director of Il Sole 24 Ore from 1971 to 1989, as well as a director of Compagnia di San Paolo. He was chairman of the conference center "Torino Incontra", and is honorary chairman of the Associazione Sviluppo Scientifico e Tecnologico del Piemonte and a member of the executive committee of the International Chamber of Commerce.

Maurizio Barracco has been managing director of Veedol Lubrificanti S.p.A. and president of SAEL Italia S.p.A. director of RCS Editori S.p.A. from 1984 to 2002, he is currently director of RCS Daily Newspapers S.p.A. From 2000 he has been managing director of Arin group and chairman of consorzio Acqua Blu.

Pio Bussolotto, Managing Director of Sanpaolo IMI from 2002 to 2004, was also managing director of Cardine Banca, Cassa di Risparmio di Padova e Rovigo and Casse Venete Banca. Since 2001 he is a member of the board of directors of Fondo Interbancario di Tutela dei Depositi. He was a director of Camera di Commercio Industria Artigianato e Agricoltura di Padova and of Mediobenevezie Banca.

Giuseppe Fontana is an entrepreneur, heading the holding of gruppo Fontana, international leader in the production of bolts and nuts. He is director of the hotel group Villa d'Este, vice chairman of the Associazione Industriali of Monza and Brianza. He is director of Banca Fideuram and of Banca Popolare di Sondrio. Since 1995 he has been director of IMI and then of Sanpaolo IMI.

Ettore Gotti Tedeschi is senior country representative of SCH, whose Italian branch he established in 1993, and chairman of Banca Finconsumo. Previously he was co-founder and Senior Partner of

Akros Finanziaria, managing director merchant banking and chairman of Azimut. He teaches at the Università Cattolica di Milano and is a director of the Cassa di Depositi e Prestiti.

Alfonso Iozzo, Managing Director, has spent his professional career at Sanpaolo, where he entered in 1961. He was Head of the Research Department, then of the Foreign Department and subsequently deputy general manager of the Bank. With the reorganization of the Bank upon its transformation into a limited company he became joint general manager in 1992 and then in 1995 general manager of the holding Gruppo Bancario Sanpaolo. From February 1995 he was secretary general of the Compagnia di San Paolo, an office which he left upon being nominated to his current role in the bank.

Virgilio Marrone has been a director of IFI S.p.A. since 1973, first as assistant to the managing director, then as secretary general. From 1993 he was joint general manager and responsible for business development of IFI S.p.A. and from 2002 general manager of IFI S.p.A. He is also director of Exor Group, Luxembourg.

Iti Mihalich is chairman of Società Reale Mutua di Assicurazioni, Banca Reale, Rem Assicurazioni and Reale Immobili and of other Italian and foreign insurance companies. He is also deputy chairman of Ala Assicurazioni S.p.A. and director of Friulcassa, Sara Assicurazioni S.p.A. and Sara Vita S.p.A.

Anthony Orsatelli worked in the French premier's office and finance ministry from 1977 to 1987. He then moved to Banque Nationale de Paris with assignments in London and Tokyo. In 1995 he joined the CDC group. He became chief executive of CDC Ixis in 2003. In 2003 he has been appointed as member of the Committee of Caisse Nationale des Caisses d'Epargne, with responsibility for Financing and Capital Market activities.

Emilio Ottolenghi is a petroleum entrepreneur and from 1959 managing director of "La Petrolifera Italo-Rumena S.p.A.". From 1993 to 1995 he was chairman of the Gruppo Bancario Credito Romagnolo S.p.A. and from 1995 to 1998 deputy chairman of Sanpaolo, then Director of Sanpaolo IMI; from 1999 to 2002 he was deputy chairman of Sanpaolo IMI Private Equity.

Orazio Rossi, Deputy Chairman, is a commercial and industrial entrepreneur. He was chairman of Cardine Banca until 2000. He joined the Board of Directors of Sanpaolo IMI and was appointed Deputy Chairman in March 2002. He is currently a member of the board of directors of the Associazione fra le Casse di Risparmio Italiane and a member of the executive committee of the Associazione Bancaria Italiana. He was previously a member of the board of directors of the Rovigo Chamber of Commerce and of Federalcasse Banca.

Gianguido Sacchi Morsiani has been a university professor of administrative law since 1997 and is the author of many legal publications. He has also worked as European Commission expert in connection with the harmonization of the legislations of EU countries. He has been a member of the Technical Committee of the Finance Ministry and Chairman of I.C.C.R.I. He was the chairman and deputy chairman of Cardine Banca. He has been chairman of Cassa di Risparmio in Bologna since 1980. He is chairman of Finemiro Banca.

Alfredo Saenz Abad was executive director of Tubacex S.A. from 1965 to 1980, then moving to banking where he had important roles in Banco de Vizcaya, Banca Catalana and Banco Bilbao Vizcaya, going on to become chairman of Banesto in 1993. From 1999 he was a director of SCH, becoming in 2002 deputy chairman and managing director. He is also vice chairman of Santander Central Hispano Investment.

Mario Sarcinelli began his career with the Bank of Italy, where he had various positions, becoming deputy general manager from 1976 to 1981. He was general manager of the Treasury from 1982 to 1991, he was foreign trade minister in 1987. Vice chairman of the new European Bank for Reconstruction and Development from 1991 to 1994, from 1994 to 1998 he was chairman of Banca Nazionale del Lavoro. He teaches at "La Sapienza" (Rome) university and Luiss university.

Leone Sibani is chairman of Sanpaolo IMI Private Equity (since 2002) and is a director of Banca Popolare dell'Adriatico (since 2003) and Sanpaolo IMI Internazionale (since 2002). He is also a

director of Compagnia Assicuratrice Unipol S.p.A. and director of the Associazione per lo Sviluppo degli Studi di Banca e Borsa.

Alberto Tazzetti is a member of the general board of Compagnia di San Paolo, a partner and director of Sicurezza Lavoro S.r.l. as well as director of the Centrale del Latte di Torino Spa. He is also a member of the Comitato Esecutivo della Piccola Industria and member of the Consiglio Direttivo of Confindustria, and deputy chairman of the Unione Industriale of Turin.

Josè Manuel Varela began his career in the research department of the Spanish Ministry of Commerce, subsequently holding important roles in Banco Iberico S.A. and Banco Exterior S.A. de Espana. Since 1987 he has worked for SCH, where he is responsible for the European Division, Consumer Banking in Europe and Strategic Alliances.

The following is selected biographical data of the General Manager and the other Senior Managers (other than of Mr. Iozzo whose selected biographical data is presented above):

Pietro Modiano is Sanpaolo IMI's General Manager. Before joining the Group in 2004, he had been, since October 2000, deputy general manager of the Unicredit group and was responsible for the corporate banking division as chief executive officer of the Unicredit Banca d'Impresa and chief executive officer of UBM, respectively, the corporate and investment bank of the Unicredit group. He began his career with Credito Italiano in 1977 in the planning and economic research department. Mr. Modiano has also been a member of the board directors of a number of leading Italian companies and is currently a member of the board of directors of the Italian Banking Association.

Roberto Firpo is responsible for the Corporate Department having pursued his career within Sanpaolo IMI covering various posts in different sectors.

Marina Tabacco is responsible for the Private & Retail Department having pursued her career within Sanpaolo IMI covering various positions in different sectors.

Alfredo Checchetto is responsible for the Group Coordination for Triveneto. Prior to the merger of Sanpaolo IMI and Cardine Finanziaria he was the General Director of Cardine Finanziaria and held various positions in Cassa di Risparmio di Padova e Rovigo.

Bruno Picca is responsible for the Finance and Administration Department and, as such, has the functions of Chief Financial Officer. Mr. Picca pursued his career within Sanpaolo IMI, holding various positions in different sectors including Financial Control and Planning.

Pier Luigi Curcuruto is responsible for the integrated operation vehicle MOI. He has pursued his professional career with various companies, including Italtel, System & Management, EDS Europa and Banca Popolare di Milano.

Aldo Gallo is responsible for the Audit Department having pursued his career within Sanpaolo IMI covering various positions in different sectors.

Maurizio Montagnese is responsible for the Group Personnel and Organization Department. Previously he held similar positions in Unicredito, Cassa di Risparmio di Verona and Olivetti.

Bruno Mazzola is responsible for Shareholdings Investment Department having pursued his career within Sanpaolo IMI holding various positions in subsidiaries of the Parent Bank.

Piero Luongo is responsible for the General, Legal and External Affairs Department. Prior to the merger of Sanpaolo and IMI he pursued his professional career in IMI covering various positions.

	Director	CC Bang AG
	Director	Elcon Finans AS

Board of Statutory Auditors

The following table sets forth, the names of the members of the Board of Statutory Auditors, who were elected by the general meeting of shareholders on April 30, 2002, for the three years 2002-2004. The alternate auditor, Gian Luca Galletti, was appointed by the general shareholders' meeting of April 29, 2004, in place of Antonio Ottavi, who resigned as alternate auditor from January 19, 2004.

Name	Age	Position
Mario Paolillo	74	Chairman of Board of Auditors
Aureliano Benedetti	69	Auditor
Maurizio Dallochio	47	Auditor
Paolo Mazzi	58	Auditor
Enrico Vitali	44	Auditor
Stefania Bortoletti	38	Alternate Auditor
Gian Luca Galletti	43	Alternate Auditor

The Board of Statutory Auditors was renewed by the general shareholders' meeting of April 29, 2005. The statutory auditors were elected for a three-year term and their mandate will expire at the general shareholders' meeting called to approve the financial statement for the year ended December 31, 2007.

The following table sets forth the names, the age and the position of the current statutory auditors of Sanpaolo Imi:

Name	Age	Position
Maurizio Dallochio	47	Chairman of Board of Auditors
Aureliano Benedetti	69	Auditor
Gianluca Ferrero	41	Auditor
Augusto Franchini	65	Auditor
Paolo Mazzi	58	Auditor
Carlo Pavesio	59	Alternate Auditor
Paolo Piccatti	48	Alternate Auditor

The statutory auditors were elected through the voting list and in observance of a procedure which envisages the timely publication of the candidacies and ensures a representation of representatives of minority shareholders (see: "C. Board Practices Comparative Analysis between NYSE Corporate Governance Standards and Sanpaolo IMI Corporate Governance Practice" on page 189 below).

In case any of the statutory auditors ceases for any reason to serve in such capacity, the alternate auditor automatically replaces him until the next shareholders' meeting, at which a replacement will be elected by the shareholders. Statutory auditors are required to attend the general meeting of shareholders, Board of Directors meetings and Executive Committee meetings.

The Board of Statutory Auditors is called upon to supervise the observance of applicable laws and the Articles of Association, the observance of principles of correct management and the adequacy of the organizational structure, for the areas of competence, of the internal control system and the Parent Bank's administrative-accounting system, as well as the adequacy of the provisions given by the Parent Bank to its subsidiaries to fulfill the communication and information obligations provided for by law. As specified below Sanpaolo IMI has designated the Board of Statutory Auditors, and the Board of Statutory Auditors has accepted such designation as Sanpaolo IMI's Audit Committee for purposes of Rule 10A-3 under the Securities Exchange Act (see: "C. Board Practices Comparative Analysis between NYSE Corporate Governance Standards and Sanpaolo IMI Corporate Governance Practice" on page 189 below).

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The general meeting of shareholders held on April 29, 2005 set the yearly compensation for the newly appointed members of the Board of Statutory Auditors at €100,000 for the Chairman of the Board of Statutory Auditors and at €65,000 for each of the Statutory Auditors.

Independent Auditors

The financial statements of Sanpaolo IMI are required to be audited by an independent auditing firm whose assignment has to be approved by the general shareholders' meeting that approves the annual financial statements. The resolution of the general shareholders' meeting authorizing such appointment must be furnished to CONSOB together with the Board of Statutory Auditors' opinion on the appointment. In accordance with Italian law, such appointment is for three years and the general shareholders' meeting may not appoint the same external auditors for more than three consecutive three-year terms. Arthur Andersen S.p.A. audited the financial statements of Sanpaolo IMI and its predecessor, Sanpaolo, since the fiscal year ending December 31, 1992 and terminated its assignment with the opinion for the fiscal year 2000. PricewaterhouseCoopers S.p.A. was appointed by the general shareholders' meeting on April 28, 2000 for the three year term 2001-2003 and was confirmed for the three-year term 2004-2006 by the general shareholders' meeting of April 29, 2004.

(*) Date of general shareholders' meeting called to approve the financial statements for the year.

(1) This includes:

for the Chairman and Deputy Chairman, the remuneration is calculated with reference to the net income for the year 2003, divided proportionally to their presence while both serving as Co-Deputy Chairman at meetings held during the year, pursuant to a resolution of the Board of Directors following the approval of the financial statements for 2003. The Board of Directors' meeting of May 11, 2004 set an all-inclusive fixed annual remuneration for the President and Vice President for the year 2004;

for the Directors, other than the Chairman and Deputy Chairman, the remuneration is calculated with reference to the net income for the year 2003, divided proportionally to their presence at meetings held during the year, pursuant to a resolution of the Board of Directors following the approval of the financial statements for 2004. For the year 2004, the amount due calculated in accordance with Group results totals €2,090,000. Since the distribution to each member will be made after the Shareholders' meeting to approve the 2004 financial statements, such consideration will be reported in the annual report discussing 2005.

(2) Remuneration matured with subsidiaries of the Group.

(3) Members of the Executive Committee.

(4) Members of the Board of Directors who stepped down from office in 2004.

(5) Members of the Board of Directors who stepped down from office in 2003.

(a) €466,000 paid to Sanpaolo IMI.

(b) €91,000 paid to Sanpaolo IMI.

(c) In addition to the amount shown in the table, €7,000 in fees and €122,000 in bonus and other incentives (relating to the variable part of the remuneration for 2003) were paid to IFI S.p.A..

(d) The €2,600 thousand refers to a once-for-all consideration for the termination of office. In addition to the amount shown in the table, €77,000 was paid to Sanpaolo IMI by subsidiaries of the Group.

(e) The €2,325 thousand refers to a once-for-all consideration for the termination of office. In addition to the amount shown in the table, €110,000 was paid to Sanpaolo IMI by subsidiaries of the Group.

- (f) €57,000 paid to CDC Ixis Italia Holding S.A. relating to the variable part of the remuneration for 2003.

The aggregate compensation for the year ended December 31, 2004 for the General Manager Pietro Modiano was of €1.965 million. This compensation includes the sign-in bonus paid in 2004 of €1.750 million.

The aggregate compensation for the year ended December 31, 2004 for the Senior Managers, other than Alfonso Iozzo and Pietro Modiano (whose compensation is disclosed, respectively, in the table above and in the preceding paragraph), holding such positions as of December 31, 2004 was of approximately €4.4 million. Such amount includes the compensation received by certain Senior Managers for positions within the Group that they no longer hold. The above-mentioned compensation includes bonuses of approximately €2 million.

Sanpaolo IMI pays annual bonuses to the Senior Managers based on corporate performance, measured primarily by the Group's profitability. The annual bonuses also reflect the achievement of economic targets planned for the Group and for the areas of responsibility of each Senior Manager.

Stock option plans for the year ended December 31, 2004

The shareholders' meeting, held on July 31, 1998 authorized the Board of Directors to introduce stock option plans in favor of Group executives, resorting to increases in capital against payment up to a maximum amount subsequently determined to be €40 million, corresponding to 14,285,714 Shares.

In accordance with this mandate, the Board of Directors approved the following stock option plans:

a first plan, dated February 9, 1999 assigning to the Managing Directors and to 56 other executives a total of 6,772,000 options in three equal tranches exercisable from 2000, 2001 and 2002, respectively, and expiring on March 31, 2003 (extended to March 31, 2004 by resolution of the Board of Directors on July 30, 2002), at a strike price of €12.396 per Share, the rights have lapsed as the deadline for their exercise has lapsed;

a second plan, dated June 27, 2000, assigning to the Managing Directors and to 122 other executives, 3,378,270 options exercisable from 2003 and expiring on March 31, 2005, at a strike price of €16.45573 per Share;

a third plan, dated December 18, 2001, assigning to 171 Group executives, including 40 executives of the Group's subsidiaries, 4,030,000 options exercisable after the issue of the dividend for 2003 and expiring on March 31, 2006, at a strike price of €12.7229 per Share.

On April 30, 2002, the shareholders' meeting granted a new power of attorney to the Board of Directors to approve stock incentive plans in favor of Group executives, resorting to increases in capital against payment up to a maximum amount of €51,440,648, corresponding to 18,371,660 Shares.

In accordance with this mandate, the Board of Directors, on December 17, 2002, approved a new stock option plan, assigning to 291 Group executives (in connection with the office they held), including 77 executives of the Group's subsidiaries, 8,280,000 options, which can be exercised at a price of €7.1264 per Share after the issue of the dividend relating to the year 2004 and expiring on March 31, 2007. On January 25, 2005 the Board of Directors postponed the expiration of this stock option plan to May 15, 2007.

On May 14, 2002, on the basis of the authorization by the shareholders meeting held on April 30, 2002, the Board of Directors approved a stock option plan for the Chairman and the Managing Directors for the period 2001-2003. The plan provides for the assignment of 1,650,000 options exercisable after the issue of the dividend for 2003 and expiring on the approval by the Board of Directors of the 2005 financial results and, in any event, on March 31, 2006. The strike price is €12.6244 per Share. On January 25, 2005 the Board of Directors postponed the expiration of this stock option plan to May 15, 2006.

In connection with the Parent Bank's payment in June 2002 of the 2001 annual production premium to its employees (which is an amount contractually agreed upon between the Parent Bank and its employees' union representatives, and is linked to each employee's compensation level), the Board of Directors approved the introduction of a plan (the "2002 Share Plan") under which all Parent Bank personnel who were employed on June 27, 2002 could elect to receive Shares (which are restricted for three years) in an amount linked to the production premium to which they were entitled. Participation in the 2002 Share Plan was voluntary.

On March 4, 2003, the Board of Directors approved a second such plan (the "2003 Share Plan") in connection with the Parent Bank's payment of the 2002 annual production premium to its employees. The features of the 2003 Share Plan were identical to those of the 2002 Share Plan.

Both the 2002 and 2003 Share Plans allowed the Parent Bank and its employees to take advantage of governmental tax and social security incentives.

In 2003, the 14,090 employees, or 51.3% of those entitled to receive the 2002 annual production premium, elected to participate in the 2003 Share Plan. Accordingly, Parent Bank personnel employed on June 27, 2003 received an aggregate amount of 2,344,522 Shares, valued in accordance with applicable tax standards at €8.1271 per Share, for an aggregate cost to Sanpaolo IMI of approximately €19 million.

If the 8,503,270 outstanding options on Sanpaolo IMI Shares not yet exercised in 2003 were to be exercised, this would entail further capital increases of €23,809,156 and the booking of additional paid-in capital of €95,761,224.

	Number of Shares	Average exercise price €	Market price €

(1) Original deadline of March 2006 postponed to May 2006 by the Board of Directors on January 25, 2005.

(2) Original deadline of March 2007 postponed to May 2007 by the Board of Directors on January 25, 2005

C. Board Practices

Directors' Benefit Arrangements on Termination

As of the date of this annual report, there are no service contracts between any Director and Sanpaolo IMI or any of its subsidiaries providing benefits upon termination of service.

Remuneration and Personnel Policies Technical Committee

As specified in Item 4. "Information on Sanpaolo IMI C. Business Overview Italian Banking Regulation and Corporate Governance Principles Corporate Governance" on page 102 above, the Code recommends the constitution within the board of directors of certain technical committees.

The Remuneration and Personnel Policies Technical Committee is a committee of the Board of Directors for evaluating, in agreement with the Chairman of the Board of Statutory Auditors and reporting to the Board of Directors, the remuneration of the Directors with particular offices and examining the total remuneration structure of the Directors, also taking into account any employment or assignment in subsidiaries of the Parent Bank. The Remuneration and Personnel Policies Technical Committee considers in depth the issues concerning the definition of the general strategies for senior management remuneration and management policies at Parent Bank and Group level, as well as the approval and modification of the general arrangements concerning employment relationships.

In 2004, the Remuneration and Personnel Policies Technical Committee met 7 times. As of the date of this annual report, the Remuneration and Personnel Policies Technical Committee consists of the following three non-executive Directors one of which (Mr. Tazzetti) is an independent Director:

Iti Mihalich (Chairman)
Alfredo Saenz Abad
Alberto Tazzetti

The Managing Director and the General Manager take part in the meetings of the Remuneration and Personnel Policies Technical Committee.

Committee for Internal Control and Internal Audit Department

The Committee for Internal Control (*comitato per il controllo interno*) has been formed pursuant to the Code. As discussed below, the Committee for Internal Control is a different body from the Board of Statutory Auditors.

The Committee for Internal Control consists of the following non-executive Directors:

Giuseppe Fontana (Chairman)
Virgilo Marrone
Mario Sarcinelli

Messrs. Fontana and Sarcinelli are independent directors. Mr. Marrone holds executive positions in companies controlled by IFI, which is controlled by Giovanni Agnelli & C. Sapa one of the shareholders of Sanpaolo IMI, which have significant business relations with Sanpaolo IMI. Because he holds such executive positions, he is not considered to be an independent Director. The Managing Director, the General Manager and the Chairman of the Board of Statutory Auditors, as well as the Heads of the Finance and Administration Department and of the Audit Department in their respective capacities, take part in the meetings of the Committee for Internal Control.

The Committee for Internal Control normally meets monthly; in 2004, the Committee for Internal Control met 17 times. The Committee for Internal Control analyzes the issues and the relevant policies in order to assess, in the context of its evaluation of the Group's internal control system, issues which should be further investigated. The Committee for Internal Control also evaluates the adoption of the most appropriate corrective measures in order to deal with any omissions and anomalies of the audit processes, referring to both internal audits and external audits by the independent auditors.

In particular, the Committee for Internal Control:

assists the Board of Directors in its role in determining the guidelines and periodical checks on the adequate and effective functioning of the internal controls of the Parent Bank and companies of the Group;

evaluates the work plans prepared by internal control and receives their periodical reports;

evaluates, together with the independent auditors, the management of the companies of the Group, the adequacy of the accounting principles used and their proper application in the preparation of the consolidated financial statements;

evaluates the proposals formulated by the independent auditors in connection with their responsibilities, as well as the work plan set out for the audit of the financial statements and the results contained in the audit report and letter to management;

maintains close contact with the Board of Statutory Auditors, through the participation of its Chairman at meetings of the Board of Directors, so as to allow reciprocal and timely exchange of information on the internal controls system;

reports to the Board of Directors, at least every six months, on the occasion of the approval of the annual and interim reports, on the activity undertaken by the Committee for Internal Control and the adequacy of the system of internal controls of the Group;

carries out any further tasks assigned to it by the Board of Directors, particularly in relations with the independent auditors;

preliminarily evaluates relevant transactions with related parties.

The Committee for Internal Control also undertakes the responsibilities and functions relating to it as a regulatory body pursuant to legislative decree no. 231 of 2001 relating to the administrative responsibility of companies and presents a specific annual report on its activities to the Board of Directors.

The Bank of Italy's supervisory activities in recent years have concentrated on verifying that banks have an adequate level of efficiency and control. This has led the Bank of Italy to revise its regulatory instructions on matters of internal control. This approach, which reflects international developments, establishes a set of general principles for banks to comply with; in addition to a limited number of prescriptive measures. The Bank of Italy's goal is to encourage the management of banks to develop highly effective systems of internal control. The terminology used by the Bank of Italy, "system of internal control", introduces a strong concept of innovation, with an integrated system of controls at all levels of the organization, including controls involving formal checks and a series of control subsystems to monitor the various types of risks.

As part of this new approach, the banks' internal audit department is required to direct its efforts towards checking the adequacy of the organization as a whole, evaluating the company's ability to achieve its objectives with efficiency and effectiveness.

In Sanpaolo IMI this task is entrusted to a separate Internal Auditing Department, which has the necessary independence from the operating structures as it reports directly to the Managing Director. In carrying out its duties, the Internal Audit Department is not subject to any limits in its access to company information, archives and assets, as foreseen in the Internal Audit Regulations approved by the Board of Directors in December 1999, which extend to the whole Group a system of internal controls that allows the Parent Bank to exercise effective control over the Group's overall risk exposure.

The Sanpaolo IMI Internal Audit Department is responsible for evaluating the adequacy of the Group's overall system of internal controls, checking that transactions are carried out properly and that the risks are properly controlled. Internal Audit is also responsible for bringing to the attention of the Board of Directors and senior management any improvements that could be made to the Group's risk management policies, measurement tools and procedures.

The Internal Audit Department reports on its activities on a quarterly basis to the Board of Directors, as well as to the Committee for Internal Control. Furthermore, there are regular, continuous contacts between the Internal Audit Department and the other control bodies including the Board of Statutory Auditors. There is a constant flow of information and cooperation between the Internal Audit Department and the Board of Statutory Auditors. Such flow of information and cooperation is ensured by periodical reports by the head of Internal Audit Department on the results of the activities performed.

Comparative Analysis between NYSE Corporate Governance Standards and Sanpaolo IMI Corporate Governance Practice.

Due to its listing on MTA in Milan and on the NYSE since 1998, Sanpaolo IMI has progressively improved its corporate governance, in order to observe the mandatory provisions of Italian corporate and securities law and to comply with U.S. regulations applicable to foreign private issuers.

As a result, its framework is similar in many respects to, and provides investor protections that are comparable with, the corresponding rules of the NYSE. Nevertheless, important differences remain. Pursuant to Section 303 A of the NYSE Listed Company Manual, Sanpaolo IMI, as a foreign private issuer, is permitted to follow Italian corporate governance practice. Nevertheless, under the NYSE listed company manual, Sanpaolo IMI is required to comply with certain requirements concerning the following: (i) the appointment of an audit committee that satisfies the requirements of Rule 10A-3

under the Exchange Act, (ii) certain certification requirements and (iii) the disclosure of the ways in which its corporate governance practices differ from those followed by U.S. companies under NYSE listing standards.

As required by the NYSE, we provide below a brief summary of the significant differences between our corporate governance practices as an issuer incorporated in Italy and those required of U.S. companies under NYSE listing standards.

Audit Committee. U.S. companies listed on the NYSE are required to establish an audit committee that satisfies the requirements of Rule 10A-3 ("Rule 10A-3") under the Exchange Act. In particular, the audit committee must have a minimum of three members at least one of which with accounting or related financial expertise and all such members must satisfy prescribed requirements for independence. See: also Item 16A. "Audit Committee Financial Expert" on page 232 below. Moreover, the NYSE listed company manual provides for additional requirements which only U.S. issuers must comply with. Among others, the audit committee (whose purpose must be addressed in a written charter) should have the responsibility for: (i) assisting the board of directors to oversee the integrity of the company's financial statements and compliance with legal and regulatory requirements; (ii) assisting the board of directors to monitor the independent auditors qualifications and independence and the performance of the company's internal audit department and independent auditors; (iii) discuss with management and the independent auditors the company's annual audited financial statements and discuss policies with respect to risk assessment and risk management.

Under Rule 10 A-3 and the relevant regulations issued by the U.S. Securities and Exchange Commission (the "SEC"), Sanpaolo IMI, as a foreign private issuer, is required to be fully compliant with the applicable regulations concerning the Audit Committee by July 31, 2005. In this regard, the SEC provided certain regulations for foreign private issuers that take into account the different legal framework and corporate governance standards related to the home jurisdictions of the foreign private issuers. In particular, the SEC sets forth a general exemption from compliance with all the audit committee requirements if the foreign private issuer meets specific requirements concerning, among others, the corporate governance model, the main features of the body appointed as audit committee and the independence requirement. As for the tasks and functions reserved to the audit committee, the SEC regulations require that the board of statutory auditors, in accordance with any applicable home country legal or listing requirements or the issuer's governing documents, is responsible, to the extent permitted by law, for the appointment, retention and oversight of the work of any registered public accounting firm engaged (including, to the extent permitted by law, the resolution of disagreements between management and the auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the issuer. Other requirements, such as the complaint procedures requirement, advisors requirement and funding requirement, apply to the board of statutory auditors, to the extent permitted by law.

In accordance with the general exemption provided by the SEC regulations (Rule 10A-3 (c) (3)), Sanpaolo IMI decided to grant the role and functions of Audit Committee to its *Collegio Sindacale* (Board of Statutory Auditors, see: Item 6. "Directors, Senior Management and Employees A. Directors and Senior Management" on page 176 above). Sanpaolo IMI is adopting all the organizational measures which are required to be taken by the end of July 2005.

Pursuant to mandatory Italian laws and regulations, the Board of Statutory Auditors is required to exercise a specific control function. According to Italian corporate law, the Board of Statutory Auditors must be composed exclusively of independent outsiders (neither directors, nor their family members, nor executive officers nor employees) appointed by the shareholders' meeting. All the members of the Board of Statutory Auditors must meet certain integrity and experience requirements under applicable regulations. Based on Sanpaolo IMI's by-laws, which reflect Italian law provisions, two members of the Board of Statutory Auditors must be financial experts in Italian GAAP or other accounting and

financial standards applicable to Italian issuers (chartered accountants or equivalent) and two members must be appointed by minority shareholders.

The Board of Statutory Auditors is a different body from the Committee for Internal Control described above under "Committee for Internal Control and Internal Audit Department". Although the Committee for Internal Control is responsible of certain internal control related issues, the Committee for Internal Control is a committee of the Board of Directors, constituted pursuant to self regulatory Italian provisions, and shares with the Board of Directors the responsibility of the management of the Parent Bank. On the other hand, the Board of Statutory Auditors is granted its general control function pursuant to mandatory Italian law provisions.

With reference to the tasks and powers of the Board of Statutory Auditors, under Italian law, the Auditors must monitor the management of the company and its compliance with laws and regulations and with the by-laws. It must also assess and monitor the adequacy of the company's corporate structure for matters within the Board of Statutory Auditors' authority, its internal controls, its administrative and accounting systems, and its disclosure procedures, and has the obligation to report any irregularity to the CONSOB, the Bank of Italy and the shareholders' meeting called to approve the company's financial statements. There is a constant flow of information and cooperation between the Internal Audit Department and the Board of Statutory Auditors, through periodical reports by the head of the Internal Audit Department on its activities. The Board of Directors is also required to report to the Board of Statutory Auditors, at least quarterly, on the Group's activities and results, on the main transactions from an economical and financial point of view, and on the transactions in which the directors have personal interests.

Moreover, the principal accountants of Sanpaolo IMI are appointed by the general shareholders' meeting based on the recommendation of the Board of Statutory Auditors. Pursuant to Sanpaolo IMI's policies, all other engagements of principal accountants must be pre-approved by the Board of Statutory Auditors (see: Item 16C. "Principal Accountant Fees and Services" on page 233 below).

On April 29, 2005 Sanpaolo IMI's shareholders' meeting, in compliance with the SEC regulations, granted the Board of Statutory Auditors a fund in order to permit the Board of Statutory Auditors, acting as Audit Committee, to independently engage advisors.

Independent Directors. Under NYSE listing rules applicable to U.S. companies, independent directors must constitute a majority of the board of directors. As of April 29, 2004, with the election of Sanpaolo IMI's new Board of Directors, there are eight independent Directors (out of the total of 17 Directors). The status of such Directors as "independent" has been evaluated by the Board of Directors pursuant to the provisions of the Code.

The definition of "independent director" provided by the NYSE is more restrictive than the Italian definition set out in the Code. Furthermore, under the Code, it is not mandatory for a majority of directors to be independent.

Pursuant to the Code, the Parent Bank is only required to have an adequate number of independent non-executive Directors. The Code recommends that the number of independent Directors should be adequate in relation to the total number of non-executive directors and significant in terms of the total number of Directors. The adequacy of the number of independent Directors also depends on whether the company belongs to a group. Pursuant to the Code, independent Directors:

- (i) do not entertain, directly or indirectly or on behalf of third parties, nor have recently entertained business relationships with (a) the company, (b) its subsidiaries, (c) the executive directors and (d) the shareholder or a group of shareholders who controls the company that, because of their significance, could be able to influence the director's independent judgment;

- (ii) neither own, directly or indirectly or on behalf of third parties, a quantity of shares enabling them to control the company or exercise a considerable influence over it, nor participate in shareholders' agreements to control the company;
- (iii) are not immediate family members of executive directors of the company or of persons in the situations covered by points (i) and (ii) above.

Non-management Directors' Meetings. Pursuant to NYSE listing standards, non-management directors must meet on a regular basis without the presence of management and independent directors must meet separately at least once per year. There are no corresponding provisions under Italian rules and Sanpaolo IMI has not provided specific mandatory requirements for having such meetings.

Nominating/Corporate Governance Committee. Under NYSE standards, U.S. listed companies are required to have a nominating/corporate governance committee composed entirely of independent directors, with the main purpose of identifying individuals qualified to become directors and develop and recommend to the board of directors a set of corporate governance principles.

Sanpaolo IMI does not have such a committee. The nominations of the Directors are based on the proposals presented by the shareholders, who are not obliged to give advance notice of the candidates they intend to nominate. In several shareholders' meetings of Sanpaolo IMI, a list of candidates for the Board of Directors was agreed and, pursuant to applicable law provisions, disclosed in advanced by a group of shareholders.

A voting list is not envisaged for the nomination of the Board of Directors, but it is mandatory under Italian law for the nomination of members of the Board of Statutory Auditors.

Compensation Committee. Under NYSE standards, U.S. listed companies are required to establish a compensation committee composed entirely of independent directors. In addition to the review and approval of corporate goals relevant to the chief executive officer's compensation and evaluation of the chief executive officer's performance in light of set targets. This committee must determine and approve the chief executive officer's compensation and make recommendations to the board of directors with respect to non-executive compensation, incentive-compensation plans and equity-based plans.

Pursuant to Sanpaolo IMI's by-laws, the shareholders' meeting determines the remuneration of non-executive Directors, while the Board of Directors determines the remuneration of the Chairman and the Managing Director. Such determination is made after consultation with the Remuneration and Personnel Policies Technical Committee, which is a technical committee for remuneration and personnel policies. (see: Item 6. "Directors, Senior Management and Employees C. Board Practices Remuneration and Personnel Policies Technical Committee" on page 187 above.)

Internal Audit Function. Under NYSE standards, U.S. listed companies must maintain an internal audit function to provide management and the audit committee with ongoing assessments of the company risk's management processes and system of internal control. A U.S. listed company may choose to outsource this function to a third-party service provider other than its independent auditor.

Sanpaolo IMI has an Internal Audit Department, which reports directly to the chief executive officer. The Internal Audit Department has the main function of verifying operations and risk management performance. The Internal Audit Department, which in the performance of its activity has no constraints or limit of access to data, archives and company assets, has the responsibility of bringing to the attention of the Board of Directors and the senior management possible improvements in risk management policies, measuring instruments and procedures, providing periodic reports on the results of its activity and any anomalies found.

Code of business conduct and ethics. NYSE listing standards require U.S. listed companies to adopt a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers. The code should provide for the reporting of breaches of its provisions.

Sanpaolo IMI, also in compliance with the NYSE regulations and Section 406 of the Sarbanes-Oxley Act of 2002, has adopted a code of ethics ("Code of Ethics").

The Code of Ethics, together with the Italian listed companies Code and Italian law provisions, regulates certain aspects relating to:

conflicts of interests,

corporate opportunities,

confidentiality,

fair dealing,

protection and proper use of Sanpaolo IMI's assets,

compliance with laws, rules and regulations, and

reporting any unlawful or unethical behavior.

Disclosure Committee. It is Sanpaolo IMI's policy to ensure, as required by applicable laws and regulations, an accurate, complete, timely and correct disclosure to shareholders and holders of financial instruments issued by Sanpaolo IMI. To that end, Sanpaolo IMI in 2003 constituted a Disclosure Committee which is governed by an internal statute. The Disclosure Committee consists of members of senior management, such as the Head of Finance and Administration Department, the Head of General Affairs and Legal Department, and the Head of Audit, as well as other officers of the Group. The role of the Disclosure Committee, generally, is to assist the Managing Director, the Head of Finance and Administration Department and the Board of Directors in carrying out their duties and responsibilities in connection with the Group's compliance with its reporting and disclosure obligations.

Adoption and Disclosure of Corporate Governance Guidelines. U.S. companies listed on the NYSE are required to adopt and disclose corporate governance guidelines. Such disclosures are included in this annual report and English translations of Sanpaolo IMI's corporate governance policies can be found on Sanpaolo IMI's website: www.grupposanpaoloimi.com under "corporate governance".

Certification Requirements. A chief executive officer of a U.S. company listed on the NYSE must annually certify that he or she is not aware of any violation by the company of NYSE corporate governance standards. In accordance with NYSE listing rules applicable to foreign private issuers, Sanpaolo IMI is not required to provide the NYSE with this annual compliance certification. However, in accordance with rules applicable to both U.S. companies and foreign private issuers, Sanpaolo IMI's chief executive officer is required to promptly notify the NYSE in writing after any executive officer becomes aware of any material non-compliance with the NYSE corporate governance standards applicable to Sanpaolo IMI. Sanpaolo IMI is also required to submit an executed written affirmation annually to the NYSE as well as an interim written affirmation each time a change occurs to the Board of Directors or any of the committees subject to the NYSE standards. In 2005, the annual written affirmation is to be submitted no later than 20 days after July 1, 2005.

In more general terms, Sanpaolo IMI's corporate governance system is based on transparent and rigorous rules governing the role of managing and control structures, conflicts of interest, effective internal controls and proper correct relations with shareholders. Further information is detailed in the

following documents (all available in English on the website: www.grupposanpaoloimi.com, under "corporate governance"):

the "Code of Ethics"

the "Report on the corporate governance system and adherence to the Code of Self Regulation for Listed Companies"

the "Code of Behavior of relevant persons and Sanpaolo IMI for transactions concerning listed financial instruments of the Group and communication to the market".

The documents mentioned above are reviewed regularly and updated to reflect legislative and regulatory developments and changes in operational practice.

D. Employees

At December 31, 2004, the Group employed 42,738 people, a decrease of 727 people (1.7%) compared to December 31, 2003. This trend has had a positive influence on personnel costs (a decrease of 1.3%) and is the result of approximately 3,600 departures and 2,800 new hires.

Departures under leaving incentives were over 2,300, 2,100 of which took advantage of the "Income, employment and retraining fund". The departures led to rationalization and integration at Group level and created space in the distribution structure for the entry of new personnel. This represented an important investment for the future, especially in support of the commercial development plan for the networks.

As a result of rationalization and integration activities foreseen, there was a significant use of infra-group mobility involving over 500 people in 2004. The mobility was also achieved through re-training.

With reference to the Parent Bank, at the end of 2004 there were 20,794 employees, a reduction of 609 people (a 2.8% decrease) compared with December 31, 2003. The data is adjusted for the transfer by the Parent Bank of the operative branches in the provinces of the Triveneto and Emilia to Cassa di Risparmio di Padova e Rovigo and Cassa di Risparmio in Bologna see: Item 4. "Information on Sanpaolo IMI B. Significant Developments During 2004 Commercial Banking Business Sector" on page 72 above.

Employees taking advantage of the "Income, reemployment and re-training fund" within the Parent Bank were over 2,000 out of a pool of approximately 2,450 employees. In 2004, there were approximately 1,400 departures under the fund and approximately one hundred other retirements with incentives.

At the end of 2004 Sanpaolo Banco di Napoli employed 5,727 people, a reduction of 86 people compared to the end of 2003 due to 255 entries, of which 105 new hires, and 341 departures, of which 219 using the "Income, employment and re-training fund".

At the end of 2004, the North-East Networks and Banca Popolare dell'Adriatico employed 8,954 people, a reduction of 17 people compared to December 31, 2003. The data is adjusted for the transfer by the Parent Bank of the operative branches in the provinces of the Triveneto and Emilia to Cassa di Risparmio di Padova e Rovigo and Cassa di Risparmio in Bologna see: Item 4. "Information on Sanpaolo IMI B. Significant Developments During 2004 Commercial Banking Business Sector" on page 72 above. Recourse to the "Income, employment and re-training fund" led to the departure of 440 people in addition to approximately 50 retirements with incentives. These departures were compensated by the insertion of personnel necessary to cope with the migration to the IT systems of the Parent Bank and the application of its organization processes see: Item 4. "Information on

Sanpaolo IMI B. Significant Developments During 2004 Commercial Banking Business Sector" on page 72 above.

In the other companies of the Group, there was a reduction of 15 people compared with the end of 2003.

In particular, in 2004 continued activities in the tax collection sector, lead to a 6.5% decrease in personnel. The reduction in the number of employees was made possible also through use of the "Income, employment and re-training fund" which contributed to the departure of approximately 70 people.

Growth continued in consumer banking (an increase of 16.5%) and in the East European banks (an increase of 6.4%).

The restructuring of the Epta group, begun in 2003, was completed with the absorption of its personnel by other companies of the Group, also using professional re-training.

The following table shows the Group's total headcount at the dates indicated:

	At December 31, 2004		At December 31, 2003		change, % 2004/2003	
		%		%		%

Employment Agreements

In Italy, national collective bargaining agreements are generally negotiated between the national association of banks and the national unions. The relations of the individual banks with their employees must be based on and comply with the guidelines set out by the national collective bargaining agreements.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The national collective bargaining agreements for non-management staff, which covers almost all the employees of Sanpaolo IMI, which expired on December 31, 2003, has been renewed with binding terms on April 1, 2005. The renewed agreement will expire on December 31, 2005. The collective bargaining agreement takes into consideration all the recent amendments in labor laws pertaining to flexibility, traineeship and increases the adoption of temporary workers.

Pursuant to the renewed agreement, in the 2004-2005 period wages will increase by 5.8%, with an average increase, for a middle-level employee, of €152 per month.

In the specific instance of Sanpaolo IMI, a second-level collective bargaining agreement (an agreement entered into at company level to improve the provisions of the national agreement in certain specific areas) was executed in May 2001. At the time, several important innovations were introduced, such as the definition of new professional skills and an increase in staff performance-related bonus schemes. The incentive scheme covers almost the entirety of Sanpaolo IMI's personnel and is directly related to the achievement of set targets and provides for cash bonus payments, calculated and communicated in advance, both for branch managers and for the staff. Negotiations for a new second-level agreement is expected to begin before the end of 2005.

Concerning the ongoing reorganizations and integration of the Group's companies, procedures have been executed to introduce Sanpaolo IMI's business model (see: Item 4. "Information on Sanpaolo IMI B. Significant Developments During 2004 Commercial Banking Business Sector Plan to Develop and Rationalize the Distribution Network" on page 72 above) and professional skills in the companies originally belonging to the Cardine Finanziaria group.

Furthermore, an agreement has been reached on October 9, 2004 with the trade unions active among the employees of the Group concerning the personnel of the former Cardine Finanziaria. This agreement provides for the general application of all binding terms of Sanpaolo IMI's second level agreement. Similar agreements have been entered into with some of the aforementioned Cardine Finanziaria companies.

Finally, a Group level agreement has been entered into to unify all labor provisions concerning management staff of the commercial banks of the Group.

Benefits

Sanpaolo IMI provides certain retirement benefits to its employees. From December 31, 1990, Sanpaolo and its employees began to make certain contributions to the *Istituto Nazionale per la Previdenza Sociale* ("INPS"), the state-run pension scheme, which provides a flow of income to employees upon retirement.

Until December 31, 1990, employees of Sanpaolo were entitled to retirement benefits from the *Cassa di Previdenza*, a private pension scheme funded by Sanpaolo and by Sanpaolo's employees. In accordance with the Amato Law, Sanpaolo was no longer allowed to make payments to the *Cassa di Previdenza* after December 31, 1990.

After December 31, 1990, those employees who were employed by Sanpaolo as of that date became entitled to receive from the *Cassa di Previdenza* supplemental benefits which, when added to the payments from INPS, provide such employees with equivalent retirement coverage as was previously extended to them under the *Cassa di Previdenza* plan before December 31, 1990. Approximately 9,000 employees of Sanpaolo IMI will benefit from this retirement plan. As of December 31, 2004 Sanpaolo IMI had set aside a total of €124 million during the previous years with respect to this specific retirement coverage.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Sanpaolo IMI has also created the *Fondo Pensioni del Gruppo Sanpaolo IMI*, a private pension fund to which employees can make tax deductible contributions. Sanpaolo IMI itself pays tax deductible contributions to the same fund on behalf of such employees.

Furthermore, pursuant to Italian law, Sanpaolo IMI annually sets aside for every employee a certain amount (equal to the employee's annual salary divided by 13.5), and upon retirement, pays the employee the sum of such amounts adjusted for inflation. Sanpaolo IMI accrues this fund on its balance sheet.

The Group extends similar retirement benefits to the employees of the other entities of the Commercial Banking Business Sector other than the Sanpaolo networks. Generally, employees who were employed before the enactment of the Amato Law make payments to pension schemes with definite performances, such are the schemes which will give to the employees a pay out calculated, generally, in accordance with the most recent salary. Such personnel may, as well, make payments to pension schemes with definite contributions, such are the schemes which will give to the employees a pay out corresponding exclusively to the contributions made by the employees or for the benefit of the employees, financed by tax deductible contributions by the employees and the employers.

Personnel employed after the enactment of Legislative Decree 124 of 1993 can make payments solely to pension schemes with definite contributions, financed by tax deductible contributions by the employees and the employers. Such funds are, depending on the employer, either funds managed by the employer pursuant to an arrangement between the employer and the trade unions, or open funds to which employees of different sectors are allowed to make payments.

Labor Relations

Overall, Sanpaolo IMI considers satisfactory the relations with its employees. Approximately 75% of the employees belong to one of the nine national unions, representing both employees and middle-management. This is in accordance with data from the Italian banking sector.

E. Share Ownership

The following table sets forth, as of May 15, 2005, the investments in Sanpaolo IMI and in the companies it controls held by the current member of the Board of Directors and of the Board of Statutory Auditors of Sanpaolo IMI:

Name(*)	Company	How held	Shares held as of May 15, 2005

(4)

An affiliate of CNCE.

Agreements among Shareholders*The April 19 Agreement*

On April 19, 2004, the Compagnia, FCRPR and FCRB (collectively, the "Foundations") entered into an agreement (the "April 19 Agreement"), pursuant to which they agreed, among other things, to propose to Sanpaolo IMI to adopt a series of amendments to its By-laws. The amendments related primarily to the creation of the position of General Manager. In addition, the Foundations agreed to cooperate by discussing among themselves the issues of greater relevance relating to their stakes in Sanpaolo IMI. To this end, the Foundations established an ad hoc committee chaired by Mr. Renzo Giubergia. According to its terms, the April 19 Agreement will expire on April 19, 2007.

The April 21 Agreement

On April 21, 2004, the Foundations entered into an agreement (the "April 21 Agreement" and, together with the April 19 Agreement, the "Agreements") with SCH and CDC Ixis Italia Holding S.A. ("CIH", now Italia Holding S.A.) a subsidiary of CNCE.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Board of Directors and changes to Articles and By-laws

Pursuant to the April 21 Agreement:

The parties agreed to vote at the general shareholders' meeting of Sanpaolo IMI on April 29, 2004, for the election of a new Board of Directors composed of 17 candidates agreed upon by the parties. All the candidates proposed by the parties were elected to the Board of Directors.

The parties agreed that they would propose to Sanpaolo IMI's Board of Directors to appoint Orazio Rossi as Vice Chairman and Alfonso Iozzo as Managing Director.

The parties agreed that if a director proposed upon the suggestion of SCH or CIIH ceases office for any reason, the Parties would use their best efforts to have the Board of Directors co-opt for a director suggested by SCH or CIIH, as applicable.

The parties agreed to propose certain amendments to the By-laws of the Parent Bank, defining, among other things, the role and the functions of the General Manager.

Consultation

The parties agreed to consult from time to time to exchange views concerning their respective interests as shareholders of the Parent Bank.

Agreement Not to Trade in Shares and Related Rights

Each party has agreed not to modify in any way, for the entire duration of the Agreements, except with the previous written consent of the other parties, its shareholding in the ordinary capital of the Parent Banks. The parties jointly and severally assume the mutual responsibility for ensuring that the maximum limit of Shares held in total by the parties will not exceed 29.9% of the ordinary capital of the Parent Bank threshold. Thus the parties agreed that, directly or indirectly:

they will not purchase additional Shares;

they will not trade in any way rights of any sort concerning Shares of the Bank and, in particular, will not take, acquire obligations or make agreements of any sort with any third party concerning the exercise of rights resulting from the ownership of Shares;

they will not transfer Shares, nor subject such Shares to any pledge, lien, guarantee or charge that in any way may limit their full and unconditional availability.

The above-mentioned restrictions do not apply to:

purchases and sales of Shares, within the limit of 2.5% of Sanpaolo IMI's capital, made temporarily in the context of trading or treasury management activities, or the purchase of guarantees or investments of reserves by insurance companies forming part of the shareholder's group;

transfers made within the same group, provided that the transferring party remains responsible for the transfer and the recipient agrees unconditionally to the agreement.

Notwithstanding the above-mentioned restrictions, each Foundation has the option, given prior information to the other parties, to reduce its shareholding of *Azioni Privilegiate*, while keeping the shareholding in ordinary capital unchanged.

Duration and Early Dissolution

The Agreement will lapse automatically and its effectiveness will cease 15 days before the date of the first call of Sanpaolo IMI's shareholders' meeting that will be called to approve the financial statements for the year ending on December 31, 2006.

In addition, causes of automatic and early dissolution of the Agreement are:

the termination of the whole Board of Directors of Sanpaolo IMI pursuant to Article 2386, last paragraph, of the Italian Civil Code;

the launch of a public tender offer (*Offerta Pubblica di Acquisto or OPA*) by a third party, or an exchange offer (*Offerta Pubblica di Scambio or OPS*), for the Parent Bank such as to allow control over the Parent Bank or in any case the possession of a quantity of Shares greater than the total share of the capital of the Parent Bank, including both ordinary and *Azioni Privilegiate*, held by the Foundations;

only for CIH, the sale, by Sanpaolo IMI, of its shareholding in CIH or, in the case of agreed reallocation of that shareholding (see: Item 4. "Information on Sanpaolo IMI B. Significant Developments During 2004 Commercial Banking Business Sector Initiatives in Foreign Markets" on page 74 above), the sale of the shareholding held by the Parent Bank following the reallocation.

Differences in Voting Rights

Certain classes of voting rights (*Azioni Privilegiate*) were created in connection with the Cardine Merger. See: Item 4. "Information on Sanpaolo IMI A. History and Developments of Sanpaolo IMI The Merged Group" on page 71 above. *Azioni Privilegiate* are entitled to vote only at extraordinary shareholders' meetings.

Number of Record Holders in the United States

As of June 6, 2005, there were 12,411,585 ADSs outstanding, representing 24,823,170 Shares or approximately 1.68% of Sanpaolo IMI's ordinary share capital; as of such date, there were 29 holders of record of Sanpaolo IMI ADSs.

B. Related Party Transactions

The following were the material or unusual transactions between Sanpaolo IMI and its subsidiaries on the one hand, and parties related to the Group on the other hand, from January 1, 2004 through May 13, 2005:

On December 9, 2004, the 3.45% stake in CDC Ixis held by the Parent Bank was exchanged for a 12% stake in Ixis Asset Management Group ("IAMG") and a 2.45% stake in Ixis Corporate & Investment Bank ("ICIB"). The transaction resulted from the restructuring of the Caisse des Depots et Consignations and the Caisses d'Epargne groups and the incorporation of CDC Ixis in CNCE. The transaction was carried out through a capital increase of IAMG and ICIB with the contribution of CDC Ixis shares. As of September 2004, IAMG and ICIB had a cumulative fair value, estimated by external advisors, of €278 million, €50 million less than the book value of CDC Ixis, as of December 31, 2003. On December 7, 2004, Sanpaolo IMI and CNCE entered into shareholders' agreements to regulate governance, shareholdings and other rights relative to the subsidiary companies IAMG and ICIB. For a description of the transaction, see: Item 4. B. "Significant Developments During 2004 Central Functions Cooperation with Caisse Nationale des Caisses d'Epargne ("CNCE")" on page 81 above.

At the end of 2004 and in January 2005, Sanpaolo Vita sold to Reale Mutua Assicurazioni a certain amount of premiums related to new life insurance policies. The maximum value of the premiums sold was estimated at €85 million. The economic terms of the transaction, which were not subject to independent assessment, were in line with market conditions. At the time of the transaction, Reale Mutua Assicurazioni was a significant shareholder of Sanpaolo IMI and a party to shareholders' agreements effective at that time.

On February 16, 2005, shares in the "Fondo Centro Impresa" (an investment fund focused on Central Italy) managed for customary fees by Sanpaolo IMI Fondi Chiusi SGR, were subscribed by: certain Group companies as well as Banca Cassa di Risparmio di Firenze in the amount of €15 million; Fondazione Cassa di Risparmio in Bologna (a significant shareholder of Sanpaolo IMI) in the amount of €12.5 million; Compagnia di San Paolo (a significant shareholder of Sanpaolo IMI) in the amount of €5 million; Cassa di Risparmio di Forlì in the amount of €5 million; and Fondazione Cassa di Risparmio di Padova e Rovigo (a significant shareholder of Sanpaolo IMI) in the amount of €2 million. On the same date, shares in the "Fondo Nord Ovest Impresa" (an investment fund focused on North-West Italy), managed for customary fees by Sanpaolo IMI Fondi Chiusi SGR, were subscribed by: certain Group companies as well as by Compagnia di San Paolo (a significant shareholder of Sanpaolo IMI) in the amount of €20 million and Fondazione Cassa di Risparmio di Padova e Rovigo (a significant shareholder of Sanpaolo IMI) for €3 million. The transactions were carried out at the same conditions applicable to all investors.

On April 28, 2005, Sanpaolo Bank S.A. and Ente Holding S.r.l. (controlled by a pension fund of the Sanpaolo IMI Group) settled certain issues which originated in connection with the purchase of real estate by Ente Holdings S.r.l. from a defaulting third party. Pursuant to the settlement, Sanpaolo Bank S.A. acquired all the loans of the defaulting seller held by Ente Holding S.r.l. for €7.75 million. Sanpaolo IMI deems the settlement adequate and basically fair for Sanpaolo Bank S.A.

Transactions with Representatives

There are outstanding loans to members of the Board of Directors and to senior managers of Sanpaolo IMI. All such loans were made in the ordinary course of business, on substantially the same terms (including interest rates and collateral) as those prevailing at the time for comparable transactions, and did not involve more than the normal risk of collectibility or present other unfavorable features.

In 2004, two properties were sold to two members of the Board of Directors of the Parent Bank for a total of €0.7 million. The first sale was pursuant to an option awarded by the Board of Directors of the Parent Bank awarded on December 22, 1998 and extended by the Board of Directors of the Parent Bank as part of the overall financial treatment approved by the Board of Directors of the Parent Bank at the time the Director was elected. This sale was for €0.4 million. The second sale, by Emil Europe 92 (a subsidiary of Cassa di Risparmio in Bologna) to a Director of the Parent Bank for €0.2 million, was subject to the valuation by an external expert.

Loans and Guarantees Given

The amounts shown in the table below refer to loans and guarantees granted to the Directors and Statutory Auditors of the Parent Bank, to subjects exercising functions relating to the administration, management and control of companies of the Group and to companies identified as being of extraordinary importance pursuant to Art. 136 of the Consolidated Banking Act. In compliance with this provision and regulations of the Bank of Italy, such loans and guarantees are to be approved unanimously by the Board of Directors with the favorable vote of all the members of the Board of

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Statutory Auditors. In case of transactions entered into by subsidiaries of the Group, the prior consent of the Parent Bank is also required.

	At December 31,	
	2004	2003
Directors	9	21

Statutory Auditors

Among our business with related parties in 2004 there have been and currently are loans, guarantees and commitments. All of these lending related credit exposures, as of June 6, 2005, were made in the ordinary course of business, on substantially the same terms (including interest rates and collateral) as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectibility or present other unfavorable features.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Statements and Other Financial Information

See the Consolidated Financial Statements and related notes in the F- pages and Item 17. "Financial Statements".

Sanpaolo IMI's dividend policy is to maximize dividend payout while complying with the standards of a well-capitalized financial institution.

B. Legal Proceedings

The Group is subject to certain claims and is a party to a large number of legal proceedings relating to the normal course of its business. Although it is difficult to determine the outcome of such claims and proceedings with certainty, Sanpaolo IMI believes that liabilities related to such claims and proceedings are unlikely to have, in the aggregate, a material adverse effect on the Group's financial condition, results of operations or cash flow.

Incompatibility of the Ciampi Law with the European Union Principles

With its Decision C3955 of December 11, 2001, the European Commission declared incompatible with European Union law the tax benefit provided by the Ciampi Law in connection with mergers of banks or banking groups and ordered the Italian government to suspend the benefit and to recover from all banks that had taken advantage of the tax benefit the full amount of such benefit. In compliance with the decision of the European Commission, the Italian government, with Law Decree No. 282 of December 24, 2002, subsequently converted into Law No. 27 on February 21, 2003, ordered the restitution of all such tax benefits before December 31, 2002. In compliance with Law No. 27 of 2003, Sanpaolo IMI paid back the total amount (€200 million) of its tax benefit under the Ciampi Law on December 31, 2002, using funds that had been previously set aside for that purpose.

The above-mentioned decision by the European Commission has been appealed by the Italian Government and by the banks involved (including Sanpaolo IMI) to the European Courts. The appeal is still pending. However, the outcome of this appeal is not expected to have an adverse effect on the Sanpaolo IMI Group because Sanpaolo IMI has already paid back the full amount of its tax benefit. An adverse ruling would simply confirm that Sanpaolo IMI had been obliged to pay back the tax benefit in December 2002. A positive ruling would give Sanpaolo IMI the right to recover €200 million.

In the first half of 2004 a special reserve of €854 million was reclassified as ordinary reserve. The special reserve was made in order to take advantage of the tax benefits provided by the Ciampi Law.

Italian Government Regulations on Subsidized Residential Mortgage Loans

In light of declining interest rates in Italy, various regulations were issued in 1999 which imposed upon the entire Italian banking sector a review of interest rates on loans subsidized totally or partially by the public sector, if so requested by the borrowers or loan sponsors. Article 29 of Law No. 133 of 1999 on low-interest residential mortgage loans is the regulation with the largest potential impact on the Sanpaolo IMI Group. If implemented, the regulation is expected to apply retroactively from July 1, 1999.

The Italian banking sector is seeking to prevent the application of the regulation. Sanpaolo IMI and other banks filed an appeal against the implementing decree, Ministerial Decree 110 of March 24, 2000, with the Regional Administrative Court of Lazio, but the court ruled against the banks. A new appeal is currently pending. For the act to become applicable, the Ministry of Economy will have to establish, pursuant to Article 145.62 of Law No. 388 of 2000 (the "2001 Budget Law"), an actual global average rate applicable to the residential mortgage loans covered by the act. On March 31, 2003, the

Ministry of Economy established that the rate will be 12.61%, applicable to installments maturing after July 1, 1999.

Group companies have proceeded with the accounting and administrative procedures for the application of the actual average global rate and for providing compensation for installments payments received since July 1, 1999. Group companies also provided for compensation for the six-month installment payments due at December 31, 2003 and with regard to subsidized mortgages pursuant to Article 29 of Law No. 133 of 1999. Certain compensation concerning the renegotiation of some specific types of subsidized mortgages and regional funds, as well as compensation for expired mortgages, still have to be agreed with the interested parties.

The potential charge resulting from future renegotiation of mortgages not included in the first application of the regulatory framework described herein amounts, at Group level, to €68 million and is covered by specific and appropriate allowances. From 2005, the negative impact on our results of operations is expected to gradually decrease as a result of the reduction of such mortgages as a percentage of the current mortgage portfolio.

Italian Government Regulations on Other Subsidized Loans

A regulation was issued under Article 128 of the 2001 Budget Law on subsidized agricultural loans, which has the effect of imposing upon the entire Italian banking sector a review of interest rates on certain subsidized loans, if so requested by the borrowers or loan sponsors. This applies only to installments still outstanding.

For Article 128 of the 2001 Budget Law to become applicable, an implementing Ministerial Decree will have to be issued. No such Ministerial Decree has yet been issued. If implemented, the regulation is expected to apply to interest accruing on the relevant loan from the date on which a request for renegotiation of the interest rate applicable to the loan is made. The interest rates that will apply to the Group's outstanding loans that are covered by the regulation will not be known until the Ministerial Decree has been issued and negotiations with any requesting borrowers or loan sponsors are completed. Therefore, as of the date of this annual report, Sanpaolo IMI is not able to assess the potential impact of this regulation on its future interest income.

Law No. 268 of September 24, 2003 provides that when such law becomes effective, for the application of Article 128 of the 2001 Budget Law, loans may be extended, including by a bank different from the original lender, exclusively for the prepayments of agricultural improvement mortgages which are at least five years into amortization. The extension of such new loans, which will be made at market rates, appear to be optional and not mandatory on the part of the lender. The extension of the new loans will require the presentation of appropriate prepayment requests to be formulated also by the subsidizing public authority.

The Group has not made any provisions for loans covered by the foregoing regulations because the 2001 Budget Law, which was enacted by Law No. 268 of 2003, refers only to "installments still due", and, therefore, relates only to the possibility of future mortgage renegotiations.

Current Account Overdrafts

The Italian banking system is characterized by the relatively large proportion of overdraft financing provided through current accounts. A borrowing is made whenever a customer's drawings exceed the credit balance in the account. An overdraft customer is granted a maximum overdraft limit on the basis of Sanpaolo IMI's lending policy. Debit interest on overdraft facilities is typically charged quarterly and at a floating rate.

In March 1999, the Italian High Court (*Corte di Cassazione*) declared the capitalization of interest payable quarterly to be illegitimate, thereby completely changing the previously applicable law. This

decision was based on the assumption that the relevant clauses in bank contracts do not integrate "regulatory uses" (i.e. uses which are binding towards the generality of people), as it was believed in the past, but rather "trading use" (i.e. uses which are binding only between the parties to the agreement) which contrast with the prohibition of anatocism in compliance with Art. 1283 of the Italian Civil Code.

After the reversal by the Italian High Court, Legislative Decree No. 342/99 was enacted, confirming the legitimacy of capitalization of interest in current account contracts if it is applied over the same period applied for calculating interest payable and receivable. The Italian Credit and Savings Interdepartmental Committee ("CICR") was assigned the task of determining the methods of such calculation. From April 2000, the date on which CICR's instructions became effective, all current accounts were adjusted applying quarterly capitalization to interests receivable and payable.

Since April 2000, capitalization on a quarterly basis is considered legitimate and the dispute refers only to those contracts executed before that date. Nevertheless, despite the fact that the Italian High Court repeatedly confirmed the invalidity of capitalization clauses, many judges have disregarded the rulings and continue to consider such clauses.

With a ruling issued on November 4, 2004, the Italian High Court reiterated its position. Nevertheless, on the basis of a number of circumstances different from those already examined by the Italian High Court, the ruling issued by the Italian High Court on November 4, 2004 does not eliminate the possibility of upholding the legitimacy, on the basis of legal arguments considered well founded by the courts, of the method of calculating interest payable.

As a whole, the number of pending cases concerning the Group has remained at an insignificant level in absolute terms. Nevertheless, such claims are subject to careful and continuous monitoring. The risks relating to the disputes in question correspond to the prudent accruals made to the allowance for other risks and charges which are proportionate to the total of each claim. Where the claims do not quantify the demand and until an accounting opinion has been expressed on the issue, the risk involved is covered by an accrual to the allowance for other risks and charges in the amount of €142 million (of which €122 million is attributable to the Parent Bank) destined, in its entirety, to cover all disputes of an undetermined amount and of an uncertain outcome.

Italian Law on Fixed Rate Mortgage Loans

Decree Law No. 394 of December 29, 2000 on usury was enacted into law on February 27, 2001. This law applies to any installments on fixed-rate mortgage loans due after December 31, 2000, and requires banks to renegotiate outstanding loans on the basis of a "substitute rate" of 9.96% for residential and business mortgage loans, reduced to 8% for residential mortgage loans of up to €77,469 for the purchase of a primary residence (provided it is not considered a luxury home) as certified by the borrowers.

During 2001 and 2002, the Group made adjustments to all mortgages covered by these provisions. Currently the allowance for other risks and charges includes a residual accrual of €3 million relating in its entirety to the Parent Bank. The amount is meant to cover further eventual requests, that may be put forth in the future or that are not yet supported by the applicable documentation, from eligible borrowers to reduce the applicable interest rates to 8%.

CONSOB Proceeding against Sanpaolo IMI Asset Management SGR S.p.A.

In 2002, CONSOB brought an administrative proceeding against Sanpaolo IMI Asset Management SGR S.p.A. ("Sanpaolo IMI Asset Management"), a company of the Group operating in the asset management business, claiming that the positive financial results of one Sanpaolo IMI Asset Management investment fund were obtained to the detriment of the financial results of two other

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Sanpaolo IMI Asset Management investment funds and that Sanpaolo IMI Asset Management's internal audit system was inadequate in this respect.

Sanpaolo IMI Asset Management responded to CONSOB, asserting that there was no connection among the performances of the three investment funds and that it always took appropriate measures as far as internal controls were concerned. On December 24, 2002, CONSOB fined Sanpaolo IMI Asset Management €499,000. Sanpaolo IMI Asset Management appealed the fine at the Appeal Court (*Corte di Appello*) of Milan which, on November 26, 2003, declared the fine illegitimate. On May 17, 2004, CONSOB appealed the ruling to the High Court (*Corte di Cassazione*). The appeal is pending.

Proceedings concerning GEST Line

GEST Line is the Company of the Group engaged in the business of collecting duties and taxes. GEST Line was established from the merger by incorporation of the Gerico, Sanpaolo Riscossioni Genova, Sanpaolo Riscossioni Prato and Esaban tax collection companies.

The risks connected to the pending proceedings are almost exclusively due to the tax and financial authorities' allegations of irregularity in the tax collection service and vary in nature and size according to the individual companies incorporated.

A series of administrative and accounting procedures concerning Gerico S.p.A., controlled by the former Cardine Banca, merged by incorporation into Sanpaolo IMI, are pending. The procedures were initiated by both the local financial offices and district sections of the Court of Accounts (*Corte dei Conti*). The procedures relate to alleged failures to collect tax revenues. The proceedings are pending and are in various stages of judgment.

The proceedings against Esaban originated from a series of proceedings concerning the denial of requests for reimbursements made by the tax and financial authorities from 1999 to 2001.

Through Law No. 311/2004, the legislator has provided tax collection licensees with the faculty of an amnesty to amend irregularities in connection with activities performed by collectors up to November 20, 2004. In order to benefit from the amnesty, a payment of €3 for each inhabitant residing in the territorial areas covered by the license is required. It appears that the amnesty is appropriate for the type of dispute involving GEST Line. This was also corroborated by the opinion of outside counsel. GEST Line is evaluating the possibility of complying with the amnesty, the cost of which, considering the population resident in the applicable territory, has been estimated at approximately €24 million.

The risks connected to the proceedings for both Gerico and Esaban are fully covered by the unlimited guarantees assumed at the time towards the above companies by the companies conferring their respective tax collection business lines (the individual savings banks later merged into Cardine Banca and the former Banco di Napoli). These guarantees concerned any losses or liabilities due to events predating the respective conferrals and expire in 2005. Sanpaolo IMI, following the corporate restructuring with the incorporation of Cardine Banca and Banco di Napoli, succeeded to the obligations deriving from these guarantees, whose risks are, in total, adequately provided for.

The guarantees do not include the risk concerned mainly with tax collection for the Venice concession which instead falls exclusively upon GEST Line. Following proceedings for tax damages relating to tax collection activities in Venice for presumed irregularities by certain tax collection officials, the local Corte dei Conti held GEST Line liable for approximately €11 million. The verdict has been contested with suspension of its effectiveness. The risk is covered by an appropriate allowance.

Proceedings relating to the Insolvencies of the Cirio and Parmalat Groups

Default by Cirio on its Bonds

In November 2002, the Cirio group, one of Italy's largest agricultural and food groups, defaulted on one of its corporate bonds; this provoked the cross-default of all issues. Cirio had approximately €1.25 billion in principal amount of debt securities outstanding. The Sanpaolo IMI Group, like the other major Italian banking groups, had entered into a series of loan transactions with the Cirio group.

CONSOB Claims relating to Cirio

Following an investigation from April to October 2003 into dealings in Cirio bonds by Sanpaolo IMI from 2000 to 2002, CONSOB, in a letter dated May 4, 2004, alleged that Sanpaolo IMI had committed certain regulatory violations. CONSOB's claims relate to alleged deficiencies in Sanpaolo IMI's procedures for dealing with its clients, alleged lack of adequate disclosure and alleged breach of fiduciary duties. The allegations were notified both to the Parent Bank and to the members of the Board of Directors and the Board of Statutory Auditors in office at the time of the period under investigation, as well as certain executives held responsible for alleged acts or omissions concerning the alleged irregularities.

Both the Parent Bank and the recipients of the allegations have proceeded to make their defense statement. A decree issued by the Ministry of Economy on February 28, 2005 terminated the administrative procedures. The decree endorsed a proposal made by CONSOB and imposed fines on each of the accused. Only the Parent Bank was ordered to pay the relevant amounts (up to approximately €1.2 million), since it was jointly liable pursuant to Art. 195, subsection 9 of Legislative Decree 58/1998.

The Parent Bank and each of the accused opposed the decree issued by the Ministry of the Economy on February 28, 2005 before the Turin Court of Appeal.

Criminal Investigation relating to Cirio

State prosecutors are investigating individuals formerly or currently affiliated with several banks, including Sanpaolo IMI, concerning dealings in Cirio bonds as well as financing relationships with Cirio. These investigations, whose preliminary stage ended on May 11, 2005, also relate to certain Sanpaolo IMI executives, including two former Directors. Sanpaolo IMI believes these proceedings are unfounded. The criminal liability alleged in these proceedings is personal.

Default by Parmalat on its Bonds

The Parmalat Group, an important multinational group in the food sector, was declared insolvent in December 2003. In total, as of that date, Parmalat had issued 26 bonds for an amount of approximately €7.2 billion, the majority of which were sold in the European market. Among the purchasers of Parmalat bonds were certain retail customers of Sanpaolo IMI.

The initiatives taken by Sanpaolo IMI on behalf of its retail customers who had purchased Parmalat bonds was formalized in an agreement with the *Comitato per la difesa dei possessori dei bond Parmalat clienti del Gruppo Sanpaolo IMI* ("Parmabonds Committee"). This was established on February 2, 2004 by certain customers to monitor the developments relating to the Parmalat bonds and to obtain proof of their claims in the insolvency proceedings. Sanpaolo IMI has undertaken to provide ancillary logistical and financial support to the Parmabonds Committee, which will retain all management and decision-making autonomy.

As part of the legal actions already undertaken, the Parmabonds Committee obtained, on the terms it requested, full recognition of the credit claimed by its members and their registration in the definitive lists of creditors of the various insolvent companies. Furthermore, civil proceedings are being

initiated by members of the Parmabonds Committee in the various criminal proceedings pending in Milan and Parma in order to obtain redress for the financial and moral damages incurred as bondholders as a result of the crimes committed by all those who will be held responsible for the default of the issuing companies.

Restitution Claims made by the Administrator of the Insolvent Parmalat Group

In the period between the end of December 2004 and March 2005, the administrator of the Parmalat group has initiated procedures against the Sanpaolo IMI Group, as well as against several other Italian and foreign banks aimed at recovering the payments made by companies of the Parmalat group on accounts held by the banks in the year preceding the beginning of Parmalat's insolvency procedure. The claims are made pursuant to Article 67, paragraph 2 of the Italian bankruptcy law (*Legge fallimentare*).

The aggregate amount claimed from the Group in six proceedings brought on behalf of six insolvent companies of the Parmalat group is €1,248 million. Pursuant to an internal evaluation of the claims, and as corroborated by the outside counsel assisting the Group in these procedures, the Group believes that its estimated liability related to the claims is scarcely material and fully accounted for in its allowance for risks and charges. The Group believes that the claims are scarcely material because several preliminary exceptions apply (exceptions which are sufficient to resolve the claims in the Group's favor) and because most of the claimed amounts lack the necessary requisites to be categorized as "payments" under Italian bankruptcy law and, therefore, are not subject to restitution. The Group consequently believes that its allowance for general risks and charges is, in the aggregate, adequate to cover the risk arising from these claims.

Defaults on Republic of Argentina Bonds

In relation to defaulted bonds issued by the Republic of Argentina, public exchange offers were made in parallel in Argentina, the United States, Japan and certain European countries, including Italy, between January 14 and February 25, 2005. The exchange offers were made by the government of Argentina to all categories of investors in bonds issued by the Republic of Argentina.

The nominal value of the bonds subject to the exchange offers was approximately US \$82 billion at the December 31, 2003 exchange rate. The number of Italian investors involved in the exchange offers was estimated at over 400,000. It was disclosed in the market that global international acceptance exceeded 76% of the nominal value of the defaulted bonds.

As far as the Sanpaolo IMI Group is concerned, during the exchange period, just over half of its private clients holding bonds issued by the Republic of Argentina divested the defaulted bonds by selling them in the secondary market or accepting the public exchange offer. As part of the initiatives promoted by Task Force Argentina ("TFA") upon invitation of the applicable clients' association, the Parent Bank has expressed its willingness to meet all the expenses deriving from legal or arbitration proceedings that may be brought against the Republic of Argentina for the Group's customers holding bonds issued by the Republic of Argentina who did not accept the public exchange offer.

Provisions relating to Bonds in Default

With respect to complaints by the Group's clients holding bonds in default, Group policy provides that Group companies pay particular attention, by way of a proper course of investigation, to the adequacy of the financial instruments sold in relation to the position of each investor.

On the basis of the analyses and evaluations made in respect of the potential liabilities arising from complaints relating to the dealing activities by the Group in respect of bonds in default, including bonds issued by Cirio, Parmalat and the Republic of Argentina, the Group has proceeded to adjust the

amount accrued to the allowance for risks and charges over previous years, bringing the balance of the allowance to €29 million as of December 31, 2004.

Proceedings by the Autorità Garante for Competition and Market (Antitrust Authority) Against the Former Sanpaolo IMI Wealth Management (currently Sanpaolo IMI Asset Management SGR) and the Former Fideuram Vita (currently A.I.P.)

In January 2004, the Antitrust Authority notified Sanpaolo IMI Wealth Management, as controlling company and outsourcer of Sanpaolo Vita, and Fideuram Vita of the commencement of an investigation. The preliminary investigation conducted by the Antitrust Authority, first regarding a number of other insurance companies and later extended to the Group companies, is aimed at alleged restrictive practices in relation to the purchase of an advisory service from a company specialized in analyzing the insurance market and acquiring information on the conditions of contracts, prices and data related to competitors in the life insurance and pensions sector. According to the Antitrust Authority, the fact that several companies share the same information would appear to be potentially damaging to competition. The Group companies, in a precautionary context aimed at reducing the risks resulting from any potential violation, terminated the advisory relationship with the supplier of the aforementioned market data before the investigation began.

The investigation was concluded on September 30, 2004. The Antitrust Authority, while not imposing any fines, found the companies of the Group in violation of Article 2, subsection 2 of Law No. 287/90, ascertaining the existence of a horizontal agreement between companies, for the exchange of sensitive commercial information between competing businesses.

An appeal against the ruling has been initiated before the Lazio Regional Administrative Court (*Tribunale Amministrativo Regionale*). Pursuant to a hearing held on April 20, 2005, the Lazio Regional Administrative Court, with its decision of April 27, 2005, annulled the ruling of the Antitrust Authority. The Antitrust Authority may file an appeal against the ruling of the Lazio Regional Administrative Court within 60 days from the date that the ruling will be made subject to notice or, in the absence of such notice, within a year from the filing of the ruling with the Court's secretariat.

Proceedings of the State Prosecution Against Certain Individuals Working for Banca Fideuram and certain Executives of Its Subsidiary, Fideuram Bank Suisse

In March 2004, the State Prosecution (*Procura della Repubblica presso il Tribunale di Firenze*) launched investigations relating to, among others, certain financial salespersons of Banca Fideuram and executives of its Swiss subsidiary, Fideuram Bank Suisse. The Investigations relate to an alleged conspiracy to offer investment services or financial products in Italy without regulatory authorization, and, in the case of one individual, money laundering.

The Bank has created a specific working group to assess the allegations and to ensure full collaboration with the investigating authorities.

Investigation Against Sanpaolo INVEST and Banca Fideuram

On May 5, 2005, the prosecution of Spoleto concluded an investigation related to alleged irregularities of a financial planner of Sanpaolo INVEST against certain clients of Sanpaolo INVEST. The former managing director and the former head of internal controls of Sanpaolo INVEST were also under investigation for alleged unlawful interference in the internal control functions of Sanpaolo INVEST and the supervision functions of public authorities pursuant to Article 2638 of the Italian Civil Code. The basis for this allegation was the failure to notify CONSOB of irregularities which emerged in an internal control in connection with the financial planner.

On June 6, 2005, also in connection with the proceedings mentioned above, CONSOB initiated an investigation of Sanpaolo INVEST internal controls.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Since the proceedings also relate to the managing director and the head of internal controls of Sanpaolo INVEST, Sanpaolo INVEST and Banca Fideuram (which, as holder of banking activities previously held by Sanpaolo INVEST, is deemed jointly liable with Sanpaolo INVEST) are also part of the proceedings and are, allegedly, responsible for administrative violations pursuant to Law No. 231 of 2001. Such administrative violations, if proved, would entail fines ranging from a minimum of €52,000 to a maximum of €620,000.

The proceedings, of which only the preliminary phase has been concluded, is closely monitored by a working group of the Parent Bank.

CONSOB Regulatory Action Relating to Banca Fideuram

Following a series of meetings between CONSOB and the management of Banca Fideuram, as part of CONSOB's regulatory supervision of Banca Fideuram's activities, on June 9 2005, CONSOB notified Banca Fideuram that it had found certain deficiencies in Banca Fideuram's internal controls and procedures. These deficiencies relate to certain procedures in connection with investment services and advice that Banca Fideuram provides to its clients, as well as certain internal controls relating to those procedures. CONSOB also requested that Banca Fideuram convene a meeting of its board of directors within 30 days to acknowledge these deficiencies and to take urgent steps to resolve them.

Prior to CONSOB's notification, Banca Fideuram had already started to develop a plan designed to address these issues. The plan will be reviewed by Banco Fideuram's board of directors, which will be held as requested by CONSOB.

EDF Arbitration Proceeding

For a discussion of the arbitration proceedings brought by EDF in connection with the EDF Put and Call Options, see: Item 4. "Information on Sanpaolo IMI B. Significant Developments During 2004 Investment Banking Business Sector Fiat and Italtenergia" on page 75 above.

Dividends

The total dividend paid by Sanpaolo IMI each year is approved by the annual shareholders' meeting. The dividends related to each year are paid in the following year. Dollar amounts have been converted at the Noon Buying Rate in effect on the respective payment dates.

Year	Dividends per Share in Lire/€	Dividends per Share in U.S.\$
2000	Lit.1,100/€0.57(1)	0.49
2001	€0.57(2)	0.53
2002	€0.30(3)	0.35
2003	€0.39(4)	0.48
2004	€0.47(5)	0.59

- (1) Approved at the annual shareholders' meeting held on April 30, 2001 and paid on May 24, 2001.
- (2) Approved at the annual shareholders' meeting held on April 30, 2002 and paid on May 23, 2002.
- (3) Approved at the annual shareholders' meeting held on April 29, 2003 and paid on May 22, 2003.
- (4) Approved at the annual shareholders' meeting held on April 29, 2004 and paid on May 27, 2004.
- (5) Approved at the annual shareholders' meeting held on April 29, 2005 and paid on May 26, 2005.

C. Significant Changes

See: Item 4. "Information on Sanpaolo IMI B. Significant Developments During 2004" on page 72 above.

ITEM 9. LISTING DETAILS**A. Performance of Sanpaolo IMI Share Prices**

The Sanpaolo IMI Share price began 2004 at €10,340 and ended at €10,600 at December 30, 2004. This increase represented a gain of 2.5% in each Share's value. For the same period, the Milan banking share index gained 9.8% in value.

On June 6, 2005, the closing Share price was €11.29, an increase of 6.5% from the beginning of 2005. During the same period the Milan indices, covering the top 30 companies and the banking sector, increased by 2.1% and 10.0%, respectively.

The principal trading market for the Sanpaolo IMI Shares is the *Telematico* under the symbol "SPI". The Sanpaolo IMI Shares and ADSs are also traded on SEAQ International, the London Stock Exchange's quotation system for equity securities of non-UK incorporated companies. Sanpaolo IMI ADSs, each representing two Sanpaolo IMI Shares, have been listed on the NYSE under the symbol "IMI" since November 2, 1999. JPMorgan Chase Bank is Sanpaolo IMI's Depository and issues the American Depositary Receipts ("ADRs") evidencing ADSs.

a) The following table lists the reported annual high and low prices of Sanpaolo IMI Shares from 2000 through June 6, 2005. From January 4, 1999, the Sanpaolo IMI Shares began trading on *Telematico* in euro.

Year	High(*)(**)(€)	Low(*)(**)(€)
2000	20.800	11.483
2001	18.893	8.764
2002	13.702	5.231
2003	11.346	5.796
2004	11.072	8.799
2005 (through June 6, 2005)	12.476	10.200

(*) Prices prior to November 2, 1999 have been restated to take account of a property spin-off.

(**) Prices at closing of trading session, source: Borsa Italiana.

b) The following table lists the reported high and low prices of Sanpaolo IMI Shares on the *Telematico* and the reported high and low prices of Sanpaolo IMI ADSs on the NYSE for each quarter of 2003 and 2004 and for the first two quarters of 2005.

	Telematico(1)		NYSE	
	High	Low	High	Low
2003				
First quarter	7.03	5.80	14.88	12.76
Second quarter	8.54	6.31	20.03	12.86
Third quarter	9.23	7.85	20.93	18.28
Fourth quarter	11.35	8.78	27.44	20.71
2004				
First quarter	11.07	9.14	27.81	22.35
Second quarter	10.03	9.06	23.93	21.66
Third quarter	9.88	8.80	24.75	21.60
Fourth quarter	10.72	9.33	29.05	22.65
2005				
First quarter	12.08	10.20	31.40	26.15
Second quarter (until June 6, 2005)	12.48	11.16	32.47	27.57

(1)

Prices at closing of trading session. (source: Borsa Italiana.)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

As of May 30, 2005, there were 12,411,585 ADSs outstanding, representing 24,823,170 Shares or approximately 1.68% of Sanpaolo IMI ordinary share capital. As of June 6, 2005, there were 29 holders of record of Sanpaolo IMI ADSs.

c)

The following table lists the reported high and low market prices of Sanpaolo IMI ADSs for the most recent six months:

Months	High	Low
January 2005	28.85	26.15
February 2005	29.40	27.39
March 2005	31.40	28.90
April 2005	32.47	29.36
May 2005	30.25	27.70
June 2005 (through June 6, 2005)	28.14	27.57

The Sanpaolo IMI ADS quotation is presented in the decimal equivalent of the fractional quotation for January 2002 and thereafter in decimal form following the decimalization of all stocks quoted on the NYSE.

B. Markets

Clearance and Settlement of Sanpaolo IMI Shares

The settlement of stock exchange transactions is facilitated by a joint stock company (Monte Titoli SpA., "Monte Titoli") which carries out the activity of central depository. Monte Titoli's shares are currently almost entirely owned by Borsa Italiana Group. Most Italian banks, brokers and securities dealers have securities accounts as participants with Monte Titoli.

The Legislative Decree No. 213/98 provided for the dematerialization of securities listed or traded on regulated markets. As a consequence of the Legislative Decree, all listed securities must be actually entered into central depositories, and the operations concerning them have to be done by book entry. For this reason, beneficial owners of Sanpaolo IMI Shares must hold their interests through specific accounts with any of the participants in Monte Titoli. The beneficial owners of Sanpaolo IMI Shares held with Monte Titoli may transfer their shares, collect dividends, create liens and exercise other rights with respect to those Sanpaolo IMI Shares through such accounts.

Beneficial owners of Sanpaolo IMI Shares may also hold their interests through Euroclear and Clearstream and may transfer the Sanpaolo IMI Shares, collect dividends and exercise other shareholders' rights through Euroclear or Clearstream. Investors may request Euroclear or Clearstream to transfer their Shares to an account of such holders with a participant having an account with Monte Titoli.

Securities Trading in Italy

Sanpaolo IMI Shares are listed in Milan and New York, respectively on the *Telematico* and NYSE. As explained above (see: Item 4. "Information on Sanpaolo IMI C. Business Overview Italian Banking Regulation and Corporate Governance Principles" on page 93 above), Borsa Italiana is the joint stock company organizing and managing the regulated markets for financial instruments. Borsa Italiana, previously owned by the public sector, was privatized in January 1998. The shares of Borsa Italiana are currently owned by financial intermediaries and primarily Italian Banks: Sanpaolo IMI holds as of December 31, 2004, a 13.74% share of the capital of Borsa Italiana.

The ordinary shareholders' meeting of Borsa Italiana is entitled, according to Section 62, Legislative Decree No. 58/1998, to issue rules establishing the condition and procedures for the admission, exclusion and suspension of market participants and financial instruments to and from trading, and those for the conduct of trading and any obligations of market participants and issuers.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

According to current Borsa Italiana regulations, a three-day rolling cash settlement period applies to all trades of equity securities in Italy. Any person, through an authorized intermediary, may purchase or sell listed securities. An "official price", calculated for each security as a weighted average of all trades effected during the trading day and a "reference price", calculated for each security as a weighted average of the last 10% of trades effected during such day are reported daily. Each of these prices is net of the quantity traded using the cross-order function.

In particular market conditions, Borsa Italiana may, with reference to markets, categories of financial instruments or individual instruments:

Prolong the duration or delay the start of one or more phases of trading;

Interrupt, where possible, continuous trading with the simultaneous reactivation of opening auction;

Modify the trading conditions; and

Suspend or reactivate trading.

Prior to January 13, 2003, Sanpaolo IMI Shares were traded only in minimum lots of prescribed size (or multiples thereof), determined for the Sanpaolo IMI in 50 Shares. After January 13, 2003, Sanpaolo IMI Shares may be traded without any minimum lot restriction. The Shares are included in the index of the 30 largest companies on the *Telematico* in terms of capitalization and liquidity ("MIB30").

Since February 19, 1996, call and put options are traded on the Italian derivatives market, which includes the Sanpaolo IMI Shares.

Sanpaolo IMI ADSs have not at any time been suspended from trading on the NYSE (nor has trading at any other time been halted).

ITEM 10. ADDITIONAL INFORMATION

A. By-laws

As reported in Article 4 of the By-laws, Sanpaolo IMI has as its purpose the taking of deposits from the public and the business of lending in its various forms, in Italy and abroad.

Sanpaolo IMI can undertake, within the limits of the regulations in force, all banking and financial transactions and services as well as any other transaction in the way of business and in whatever way related to the achievement of its corporate objective.

Sanpaolo IMI in its capacity as Reporting Bank or capogruppo for the Bank of Italy purposes of the Sanpaolo IMI Banking Group according to the terms of Article 61 of Legislative Decree 385 of September 1, 1993 issues, in the exercise of its function of management and coordination, instructions to the members of the Group for the execution of the instructions issued by the regulatory authorities in the interests of stability of the Group itself as a whole.

There are neither provision in the By-laws concerning limitations in the right to hold securities nor concerning:

- (a) a Director's power to vote on a proposal, arrangement or contract in which the Director is materially interested;
- (b) Retirement or non-retirement of Director under an age limit requirement;
- (c) Number of Shares for Director's qualification.

The Board of Directors, in compliance with Italian law, determine the remuneration of Directors with particular responsibilities, having heard the opinion of the board of statutory auditors. In compliance with Italian law, the compensation of the Directors is determined by the shareholders' meeting and not by the board of directors. The borrowing powers of Sanpaolo IMI are regulated by Italian law.

The share capital is divided into ordinary Shares and *Azioni Privilegiate*. Shares have dividend rights. Dividends not claimed within five years following the day on which they are available are retained by Sanpaolo IMI and placed to reserves, as provide for the Article 23 of the By-laws.

Every ordinary Share confers the right to one vote in ordinary and extraordinary meetings. Every *Azione Privilegiata* confers the right to one vote only in extraordinary meetings.

The shareholders' meeting is ordinary or extraordinary according to the terms of the law and can be called in Italy not necessarily at the registered office. The ordinary shareholders' meeting is called at least once a year within 120 days the end of the financial year or, when particular circumstances demand, within 180 days. The extraordinary shareholders' meeting is called to approve matters reserved to it by law or by the articles of association. Participation and representation in the shareholders' meeting are regulated by Italian law.

There are no provisions in the By-laws which have been designed to prevent a change in control of Sanpaolo IMI.

B. Foreign Investment

There are no limitations imposed by Italian law on the rights of non-residents of Italy or foreign persons to hold or vote shares other than those limitations described below, which apply equally to all owners of such shares. The Sanpaolo IMI By-laws do not provide for any limitations.

Securities Regulations

Pursuant to Italian securities laws, any holding of any direct or indirect interest in excess of 2%, 5%, 7.5%, 10%, and higher multiples of 5%, in the voting shares of a listed company must be notified to CONSOB and the company within the five trading days following the acquisition (the same communication has to be done for the reduction of such interest below the above specified percentages). The voting rights relating to the Shares for which the required notifications have not been given may not be exercised. Cross-ownership between listed companies may not exceed 2% of their respective voting Shares. Likewise, cross-ownership between a listed company and an unlisted company may not exceed 2% of the voting Shares of the listed company or 10% of the voting Shares of the unlisted company. The 2% threshold may be increased to 5% pursuant to an agreement between the companies approved by the ordinary shareholders' meeting of the two companies. Pursuant to CONSOB interpretation of cross-ownership (release of October 10, 1999) foreign companies are treated as unlisted companies. Italian listed companies' stake in a foreign company may not exceed 10% of such foreign company's stake in the Italian listed company exceeds 2%, conversely a foreign company may not exceed the 2% limit if the Italian company owing more than 10% of such foreign company. Any Shares held in excess of such thresholds may not be voted and must be sold by one of the companies as specified by applicable law. Shares held through subsidiaries, fiduciaries or intermediaries are taken into account for the purposes of calculating these ownership thresholds. However, those provisions on cross-ownership do not apply when a controlled company purchases the shares of a controlling company, within certain limits provided by law and following the approval of the controlled company ordinary shareholders' meeting.

Furthermore, any agreement, in whatever form, intended to regulate the exercise of voting rights in a listed company (or in the company or companies controlling a listed company), together with any of its subsequent amendments, renewal or termination, must be: (i) notified to CONSOB, within five days from its execution; (ii) disclosed to the public through the publication, in abstract form, in one Italian newspaper having general circulation, within ten days from its execution; and (iii) deposited in the companies' Register at the site where such listed company has its registered office, within 15 days from its execution.

The same requirements are also mandated for agreements, in whatever form, that (a) impose an obligation of prior consultation for the exercise of voting rights in a listed company and in its controlling companies; (b) contain undertaking limiting the transferability of the shares and other securities granting rights for the acquisition or subscription of the Shares; (c) provide for the acquisition of the Shares and securities hereon; and (d) contemplate or cause the exercise, also in association with other person, of dominant influence on the listed company that issued the shares and on its controlled entities.

Based on the Consolidated Securities Law, the duration of the above mentioned agreements cannot exceed three years. Each party to the agreement can withdraw from such an agreement by giving a six-month notice, unless otherwise provided in the agreements.

Banking Regulations

The requests for the purchase of more than 5% of the capital of an Italian bank, made by any national of a State other than an EU member state, that applies discriminatory measures with regards to similar acquisitions by an Italian national must be reported to the Ministry of Economy and Finance Minister. The President of the Italian Council of Ministers may deny such authorization upon the Ministry of Economy and Finance Minister's proposal.

For the other purchase requirements or limitations provided for Italian banking legislation, see: Item 4. "Information on Sanpaolo IMI C. Business Overview Italian Banking Regulation and Corporate Governance principles Participation in the Share Capital of a Bank" on page 96 above.

Antitrust Regulations

In accordance with Italian antitrust law (Law No. 287 of October 10, 1990), concentrations between undertakings which meet certain turnover thresholds, are subject to mandatory notification to Italian antitrust authorities. The Bank of Italy, upon consultation with the Italian Antitrust Authority, is the required to prohibit acquisitions of sole or joint control over a bank that would create or strengthen a dominant position in the domestic market or a significant part thereof. However, any concentration with a "EU dimension", as defined in Article 1 of the "EC Merger Regulation" (Council Regulation No. 139/2004 of January 20, 2004 on the control of concentrations between undertakings), must to be notified to the European Commission for approval before being implemented.

C. Exchange Controls and Material Contracts

Exchange Controls

As a general rule, sresidents of Italy may hold foreign currency and foreign securities of any kind, within and outside Italy, and no exchange control consent is required in Italy for the transfer outside of Italy of dividends or other distributions with respect to, or the proceeds from the sale of, shares of an Italian company. However, Italian residents and non-resident investors, who transfer, directly or indirectly (through banks or other intermediaries) into or out of Italy, cash, investments or other securities in excess of €12,500 must report all such transfers to the "Ufficio Italiano Cambi" (Italian Exchange Office). In the case of indirect transfers, banks or other intermediaries are required to maintain records of all such transfers for five years for inspections by Italian tax and judicial authorities. Non compliance with these reporting and record-keeping requirements may result in administrative fines or, in the case of false reporting or in certain cases of incomplete reporting, criminal penalties. The Ufficio Italiano Cambi is required to maintain reports for a period of ten years and may use such reports directly or through other government offices, to police money laundering, tax evasion and any other crime or violation.

Individuals, non profit entities and non commercial partnerships that are residents of Italy must disclose on their annual tax returns all investments and financial assets held outside Italy, as well as the total amount of transfers to, from, within and between countries other than Italy relating to such foreign investments or financial assets, even if at the end of the taxable period foreign investment or financial assets are no longer owned. No such disclosure is required if (i) the foreign investment or financial assets are exempt from income tax; or (ii) the total value of the foreign investments or financial assets at the end of the taxable period or the total amount of the transfers effected during the fiscal year does not exceed €12,500. Corporate residents of Italy are exempt from these tax disclosure requirements with respect to their annual tax returns because this information is required to be discussed in their financial statements.

D. Taxation

The following summary describes the material Italian tax and U.S. federal income tax consequences of the acquisition, ownership and sale of Shares, including Shares represented by ADSs evidenced by ADRs, that are generally applicable to U.S. holders who own Shares or ADSs as capital assets. For these purposes, a U.S. holder is a beneficial owner of Shares or ADSs that is, for U.S. federal income tax purposes:

a citizen or resident of the United States;

a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States or of any political subdivision of the United States; or

an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

and who qualifies for the benefits of the current income tax convention between the United States and Italy (the "Income Tax Convention"). Special rules apply to U.S. holders that are also residents of Italy. This summary does not discuss the treatment of Shares or ADSs that are held in connection with a permanent establishment or fixed base through which a beneficial owner carries on business or performs personal services in Italy.

This discussion is based on the tax laws and practices of Italy and the United States currently in effect, as well as the Income Tax convention. These laws may change, possibly with retroactive effect. This discussion does not address U.S. state, local or other non-U.S. tax consequences. This discussion is based in part upon representations by the Depositary and assumes that each obligation provided for in, or otherwise contemplated by, the Deposit Agreement and any related agreement will be performed in accordance with its respective terms. The U.S. Treasury has expressed concerns that parties to whom ADRs are pre-released may be taking actions that are inconsistent with U.S. holders of ADSs claiming foreign tax credits for U.S. federal income tax purposes. Such actions would also be inconsistent with U.S. holders of ADSs claiming of the reduced rate of tax applicable to dividends received by certain non-corporate U.S. holders. Accordingly, the analysis of the creditability of Italian taxes and the availability of the reduced tax rate for dividends received by certain non-corporate U.S. holders, both described below, could be affected by actions that may be taken by parties to whom ADSs are pre-released.

Please note that this discussion does not address all of the tax consequences that may be relevant in light of a U.S. holder's particular circumstances. In particular, it does not address U.S. holders subject to special rules, including:

persons subject to the alternative minimum tax;

insurance companies;

tax-exempt entities;

dealers and traders in securities or foreign currencies;

financial institutions;

partnership or other entities classified as partnerships for U.S. federal income tax purposes;

persons who acquired Shares or ADSs pursuant to the exercise of any employee stock option or otherwise as compensation;

persons who own the Shares or ADSs as part of an integrated investment, including a straddle, hedging or conversion transaction, comprised of the Shares or ADSs and one or more other positions for tax purposes;

persons whose functional currency is not the U.S. dollar; or

persons who actually or constructively own 10% or more of Sanpaolo IMI's voting stock.

U.S. Holders should consult their own tax advisors with regard to the application of Italian tax law, and U.S. federal income tax laws to the Shares or ADSs, and any tax consequences arising under the laws of any U.S. state, local or non-U.S. taxing jurisdictions. For purposes of the Income Tax Convention, the current estate tax convention between the United States and Italy (the "Estate Tax Convention"), Italian tax and U.S. federal income tax law, U.S. holders of ADRs evidencing ADSs will be generally treated as owners of the Shares represented by those ADSs.

This discussion assumes that Sanpaolo IMI was not a passive foreign investment company for its 2004 taxable year, as described more fully below.

Italian Taxation

Taxation of Dividends

Italian law provides for the withholding of income tax at a 27% rate on dividends paid by Italian resident companies to shareholders who are not residents of Italy for tax purposes (the rate is 12.50% in the case of dividends from saving shares *azioni di risparmio*). Reduced rates (normally 15%) apply to non-resident shareholders who are entitled to, and comply with, procedures for claiming benefits under an income tax convention. Italy has concluded income tax conventions with over 70 foreign countries, including all of the members of the European Community, Argentina, Australia, Brazil, Canada, Japan, New Zealand, Norway, Switzerland, the United States and some countries in Africa, the Middle East and Far East.

Under the Income Tax Convention, dividends derived and beneficially owned by U.S. holders are generally subject to Italian withholding tax at a reduced rate of 15%.

As to dividends derived in respect of shares held in the centralized deposit system managed by Monte Titoli, instead of the 27% withholding tax mentioned above, a substitute tax, at the same 27% rate, applies. Such substitute tax is levied by the custodian of the shares.

Since the Shares underlying Sanpaolo IMI ADRs are sub-deposited with Monte Titoli, no withholding tax will be applied by Sanpaolo IMI directly, and the substitute tax will be applied by the custodian. The Depositary's instructions specify the procedures that U.S. holders of ADSs must follow in order to obtain a reduction of the rate of the substitute tax to 15% pursuant to the Income Tax Convention.

According to Italian law, in order to obtain a reduced rate under the Income Tax Convention, the following procedure must be followed. The custodian must receive, in a timely manner (in accordance with the custodian's requirements) prior to the dividend payment date:

- (i) a declaration of the U.S. holder containing all the data that identifies the beneficial owner of the Shares (if different from the U.S. holder),
- (ii) a request by the beneficial owner for the application of the Income Tax Convention which contains a declaration that indicates the fulfillment of all conditions required by the Income Tax Convention, as well as the necessary elements to determine the applicable Income Tax Convention withholding tax rate, together with a statement that such beneficial owner does not maintain a permanent establishment or a fixed base in Italy; and
- (iii) a certification from the U.S. Internal Revenue Service that the beneficial owner is a U.S. resident for the purpose of the Income Tax Convention. Such certificate will be effective until March 31 of the year following submission. The processing of requests for certification by the U.S. Internal Revenue Service may take a significant amount of time and may be subject to delays. Accordingly, in order to be eligible for the procedure described below, U.S. holders should begin the process of obtaining certificates as soon as possible after receiving instructions from the depositary on how to claim the 15% reduced rate under the Income Tax Convention.

The custodian may advise the Depositary, and the Depositary will advise U.S. holders, of any additional limited period during which the custodian is able to receive claims for the 15% reduced treaty rate.

If the custodian does not receive the required documentation on a timely basis, or if in the custodian's judgment the documentation fails to satisfy the requirements of Italian law for any reason, a U.S. holder will not be entitled to obtain the Income Tax Convention rate at source and instead must claim a refund of 12% of the dividend (representing the difference between the 27% ordinary rate and

the 15% Income Tax Convention rate) directly from the Italian tax authorities. Extensive delays have been encountered by U.S. holders seeking refunds from the Italian tax authorities.

Italian law provides an alternative mechanism under which non-resident shareholders can claim a refund of up to four-ninths of Italian withholding taxes on dividend income by establishing to the Italian tax authorities that the dividend income was subject to income tax in another jurisdiction in an amount at least equal to the total refunds claimed. U.S. holders should consult their own tax advisors concerning the possible availability of these additional refunds, which traditionally have been payable only after extensive delays.

Distribution of additional Shares to U.S. holders with respect to their Shares or ADSs that are made as part of a pro rata distribution to all shareholders of Sanpaolo IMI generally will not be subject to Italian tax.

Italian companies are required to supply to the Italian tax authorities certain information concerning the identity of non-resident shareholders in connection with the payment of dividends. Shareholders are required to provide their Italian tax identification number, if any, or alternatively, in the case of individuals, their name, address and place and date of birth, or in the case of legal entities and partnerships, their name, country of establishment, address and the information required for individuals with respect to one of their representatives.

Non-resident shareholders are also required to provide their foreign tax identification number, if any.

In the case of ADSs owned by U.S. holders, Sanpaolo IMI understands that the provision of information concerning the Depository, in its capacity as holder of record of the Shares, will satisfy these requirements. Sanpaolo IMI will be required to provide information concerning non-resident beneficial owners of Shares, however, to the extent such owners wish to benefit from reduced withholding tax rates on dividends under an income tax convention, and claims for such benefits therefore must be accompanied by the required information.

Taxation of Capital Gains

The Italian capital gains tax is not applicable if (i) the seller is a non-resident without a permanent establishment in Italy, (ii) the Shares (or ADSs) are listed on a stock exchange and (iii) during any 12-month period the seller does not dispose of Shares (or ADSs) that comprise a "qualified shareholding". For Shares listed on a stock exchange, a "qualified shareholding" consists of shares which entitle the holder to exercise more than 2% of the voting rights of the company or represent more than 5% of the share capital.

Since the Shares (and ADSs) are listed, capital gains realized on the sale of shareholdings in Sanpaolo IMI by non-resident holders without a permanent establishment in Italy are not subject to capital gains tax provided that the Shares disposed are not a "qualified shareholding". In addition, an exemption from capital gains tax may be available pursuant to an income tax convention. Capital gains realized on the sale of qualified shareholdings are subject to income tax at ordinary rates; the tax base is 40% of the realized gain. Pursuant to the Income Tax Convention, a U.S. holder will not be subject to capital gains tax unless the Shares or ADSs form part of the business property of a permanent establishment of the U.S. holder in Italy or pertain to a fixed base available to the U.S. holder in Italy for the purpose of performing independent personal services. U.S. holders who sell Shares or ADSs may be required to produce appropriate documentation establishing that they meet the requirements for the exemption from capital gains under the Income Tax Convention.

Other Italian Taxes

Estate and Gift Tax

Pursuant to Law 383 of October 18, 2001, inheritance and gift tax no longer applies to inheritance and gift transfers made after October 25, 2001. Gift transfers to persons other than the spouse, ascendants or descendants or relatives within the 4th degree will be subject to transfer taxes ordinarily applicable to transfers for consideration, if any, when the value of the gift to each person exceeds €180,759.91; the tax applies only to the amount in excess thereof.

Transfer Tax

No transfer tax is payable upon the transfer of Shares through an officially recognized stock exchange. Transfers of Shares or ADSs outside an officially recognized stock exchange are also exempted from the payment of transfer tax provided that the parties entering into the agreement pursuant to which the transfer takes place are:

- (i) all non-residents,
- (ii) all banks, Italian securities dealing firms (SIMs) or stockbrokers, or
- (iii) banks, SIMs or stockbrokers, on the one hand, and non-residents or investment funds, on the other hand.

In any other case, transfer tax is currently payable at the following rates:

€0.072 per €51.65 (or fraction thereof) of the price at which the Shares or ADSs are transferred when the transfer is made between private individuals directly or through an intermediary that is not a bank, SIM or stockbroker;

€0.0258 per €51.65 (or fraction thereof) of the price at which the Shares or ADSs are transferred when the transfer is made either (i) between a bank and a private individual or (ii) between private individuals through a bank, SIM or stockbroker.

The change of a clearing system or depository (e.g., Euroclear, Clearstream or Monte Titoli) not involving a transfer of the ownership of the transferred Shares or ADSs will not trigger the Italian transfer tax.

Apart from the above exemptions and exclusions, there are questions regarding the applicability of the transfer tax to the transfer of ADSs, since ADSs are not shares themselves. In general, with respect to U.S. holders, the transfer tax will not be applicable on transfers of Sanpaolo IMI Shares or ADSs. However, in the case of transfers which are not executed on an official stock exchange and are entered into with an Italian counterparty other than a bank or other authorized financial intermediary or an investment fund, it is advisable that U.S. holders consult their own tax advisors concerning the applicability of this transfer tax. Deposits and withdrawals of Shares in return for ADSs by U.S. holders will not be subject to the transfer tax.

United States Federal Income Taxation

Taxation of Dividends

Distributions made with respect to the Shares or ADSs (other than certain pro rata distributions of Shares), before reduction for any Italian tax withheld, will generally constitute foreign source dividend income for U.S. federal income tax purposes to the extent such distributions are made from Sanpaolo IMI's current or accumulated earnings and profits, as determined in accordance with U.S. federal income tax principles. A corporate U.S. holder will not be entitled to claim a dividends-received deduction for dividends paid on the Shares or ADSs. Subject to applicable limitations that may vary

depending upon a holder's individual circumstances and the discussion above regarding concerns expressed by the U.S. Treasury, dividends paid to certain non-corporate U.S. holders in taxable years beginning before January 1, 2009 may be taxable at a maximum tax rate of 15%. Non-corporate U.S. holders should consult their own tax advisers to determine whether they are subject to any special rules that limit their ability to be taxed at this favorable rate.

The amount of any dividend paid in euros, including the amount of any Italian tax withheld, will be equal to the U.S. dollar value of such euros on the date of receipt by the Depository, in the case of U.S. holders of ADSs, or by the U.S. holder, in the case of U.S. holders of Shares, regardless of whether the payment is in fact converted into U.S. dollars on the date of receipt. Gain or loss, if any, recognized on the sale or other disposition of such euros will be U.S. source ordinary income or loss. The amount of any distribution of property other than cash will be the fair market value of such property on the date of distribution.

Subject to applicable limitations and restrictions and the discussion above regarding concerns expressed by the U.S. Treasury, Italian taxes withheld from dividends at a rate not in excess of that provided in the Income Tax Convention will be eligible for credit against a U.S. holder's U.S. federal income tax liability. Italian taxes withheld in excess of the rate provided in the Income Tax Convention will generally not be eligible for credit against a U.S. holder's U.S. federal income tax liability. See: " Italian Taxation Taxation of Dividends" on page 219 above for a discussion of how to obtain the rate of withholding provided for in the Income Tax Convention.

The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. The rules governing foreign tax credits are complex. Therefore, U.S. holders should consult their own tax advisers concerning the availability of foreign tax credits in their particular situation.

Taxation of Capital Gains

A U.S. holder will recognize capital gain or loss for U.S. federal income tax purposes on the sale or exchange of Shares or ADSs in the same manner as the U.S. holder would on the sale or exchange of any other shares of stock held as capital assets. As a result, a U.S. holder will generally recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the amount realized and such holder's adjusted basis in the Shares or ADSs determined in U.S. dollars. Any capital gain or loss will generally be U.S. source and will be long-term if the Shares or ADSs were held for longer than one year. U.S. holders should consult their own tax advisers about the treatment of capital gains, which may be taxed at lower rates than ordinary income for non-corporate U.S. holders, and capital losses, the deductibility of which may be limited.

Information Reporting and Backup Withholding

A U.S. holder may, under certain circumstances, be subject to information reporting and backup withholding with respect to dividends or the proceeds of any sale, exchange or redemption of ADSs or Shares unless the U.S. holder:

is a corporation or comes within certain other exempt categories, and, when required, demonstrates this fact, or

in the case of backup withholding, provides a correct taxpayer identification number, certifies that it is not subject to backup withholding and otherwise complies with applicable requirements of the backup withholding rules.

Any amount withheld under these rules will be creditable against a U.S. holder's U.S. federal income tax liability if the U.S. holder provides the required information to the U.S. Internal Revenue

Service. If a U.S. holder is required to and does not provide a correct taxpayer identification number, the U.S. holder may be subject to penalties imposed by the U.S. Internal Revenue Service.

Passive Foreign Investment Company Rules

Based on proposed U.S. Treasury regulations, Sanpaolo IMI does not expect to be a "passive foreign investment company" ("PFIC") for U.S. federal income tax purposes for its 2004 taxable year. However, this is a factual determination that must be made annually and thus there can be no assurance that Sanpaolo IMI will not be considered a PFIC for any future taxable year. In addition, there can be no assurance that the proposed regulations will be finalized in their current form. If Sanpaolo IMI were treated as a PFIC for any taxable year during which a U.S. holder held Shares or ADSs, certain adverse tax consequences could apply to the U.S. holder.

E. Documents on Display

Sanpaolo IMI is required by Italian law and the regulatory authorities to make available to the public certain documents. These include principally the financial statements of the Group and of the Parent Bank, the Articles and By-laws and any other documents relating to shareholders' resolutions.

These documents are available at Segreteria Societaria of Sanpaolo IMI, Piazza San Carlo 156, 10121 Turin, Italy.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

General

The Group is strongly committed to risk management and control on the basis of the following three principles:

clear identification of responsibility for taking on risks;

measurement and control systems in line with international best practice;

organizational separation between the Business Areas that conduct business activities and those responsible for controls.

The policies relating to the acceptance of credit and financial risks are defined by the Parent Bank's Board of Directors and Executive Committee with support from the Group Financial and Market Risks Committee ("CRFMG") and the Group Credit Committee, which are discussed below under "Financial Risk Management Control Organization" and "Credit Risk Management and Control Organization", respectively.

As discussed below, the Parent Bank also performs general risk management and control functions and takes risk-acceptance decisions in the case of particularly large risks.

The Business Areas that generate credit and/or financial risks are all assigned limits of autonomy and each has its own control structure (see: Item 4. "Information on Sanpaolo IMI D. Organizational Structure" on page 105 above). For the main Group banking networks (Sanpaolo Banco di Napoli, Cassa di Risparmio in Bologna, Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio di Venezia, Banca Popolare dell'Adriatico and Friulcassa) these functions are carried out, on the basis of an outsourcing contract, by the Parent Bank's risk control functions, which periodically report to the board of directors and the audit committee of the subsidiary.

The Basle 2 Project

On June 26, 2004, the Basle Committee on Banking Supervision published the new Capital Accord on capital adequacy ("Basle 2").

Basle 2 provides for new quantitative rules to establish the minimum capital requirement to cover credit, market and operational risks:

as regards credit risk, the new rules introduce a greater degree of correlation between capital requirements and risks, through the use of ratings and other credit risk measurement tools. Basle 2 sets out a standard approach, as well as two increasingly sophisticated approaches based on internal risk management tools;

as regards market risk, the regulations currently in force (i.e. the Basle 1 Accord) will continue to apply;

finally, Basle 2 introduces capital charges for operational risk, which can also be measured using three approaches of increasing analytical sophistication.

Basle 2 is designed to promote, through lower capital charges, the adoption of more sophisticated methods, both in credit risk and in operational risk. In order to qualify for lower capital charges, however, banks must satisfy a set of basic requirements with regard to risk management and control methodologies and processes. We believe the main advantages from the adoption of Basle 2 will come from the management and operating results obtained from the systematic application of new methodologies, which should improve risk management and control capabilities as well as increasing the efficiency and effectiveness of customer service.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In order to take advantage of these opportunities, since 2003, Sanpaolo IMI has launched the "Basle 2 Project", whose mission is to prepare the Group to adopt the advanced approaches as soon as Basle 2 comes into force at the end of 2006. During 2004 and the first months of 2005, significant investments have been made to achieve the following summarized objectives:

improvements to our risk measurement methodologies and historical databases, especially for credit risk (rating models, loss given default, exposure at default) and operational risk; and

updating our organizational procedures and related technological support, especially with regard to the loan approval process. This is almost complete for both corporate and retail portfolios.

Further investments are planned 2005 in order to complete the above-mentioned activities and to launch new initiatives focused on developing IT process applications and databases to support risk management activity and credit risk mitigation and reporting.

Financial Risk Management and Control

Organization

The main body responsible for the management and control of financial risks is the Board of Directors of the Parent Bank. It defines the criteria and strategic issues concerning market risks, allocates capital on the basis of the expected risk/return profile and approves the operating risk limits for the Parent Bank and the guidelines for the subsidiaries.

The CRFMG is responsible for defining risk measurement criteria and methodologies, the structure of the Parent Bank and Business Areas' risks limits and verifying the Group companies' risk profile. The CRFMG consists of the Managing Director, the heads of the Business Areas and the Risk Management Department.

The Treasury Department of the Parent Bank is responsible for the treasury activities, including access to markets and hedging against market risks generated by lending activities of the Domestic Banking Network.

The Risk Management Department, a department of the Parent Bank, is responsible for developing risk monitoring methodologies and proposals regarding the system of operating risk limits for the various lines of business of the Parent Bank and of the Group. The Risk Management Department is also responsible for the measurement of risks existing in the various operating units and for monitoring the Business Areas' compliance with the operating risk limits laid down by the Board of Directors and Executive Committee of the Parent Bank.

The individual Business Areas measure their financial risks, using approved methodologies, models and a system of limits consistent with the Parent Bank's global policy.

Measurement techniques

The financial risk measurement methods used by the Group consist mainly of:

Value at Risk (VaR);

Sensitivity Analysis; and

Worst Case Scenario.

VAR

VaR modeling is a statistical technique that produces an estimate of the potential loss in a portfolio over a specified holding period which is statistically unlikely to be exceeded more than once during the given holding period. The Group uses a model based on historical volatility and correlations

between the individual risks of each currency made up of short and long-term interest rates, exchange rates and equity prices. The Group's model is based on the last 250 trading days, a 10-day holding period and a 99% confidence level. VaR models have certain limitations; they are more reliable during normal market conditions, and historical data may fail to predict the future. VaR results, therefore, cannot guarantee that actual risk will follow the statistical estimate. As a result, management also relies on other tools, such as Sensitivity Analysis and Worst Case Scenario.

Sensitivity Analysis

This method quantifies the change in value in the portfolio following adverse movements of risk factors. As regards interest rate risk, adverse movement is defined as a parallel and uniform shift of 100 basis points of the interest rate curve. The measurements include the interest rate risk originated by demand customer accounts, which are typical of commercial banks, whose features of stability and partial and delayed reactions to interest rate fluctuations have been studied by analyzing a large collection of historical data, obtaining a maturity representation model through equivalent deposits. For loans, the average duration is a very short time (approximately 1 month), whereas the estimated average duration for core deposits is greater (approximately 12 months), depending on their stability features.

A measure of net interest income at risk is also applied to the main banking networks of the Group. Net interest income at risk is the potential change in net interest income resulting from a parallel and instantaneous shock of ± 25 basis points in the level of interest rates over the next 12 months. This measurement shows the effect of the changes in interest rates on the portfolio. The measurement excludes assumptions regarding future changes in the assets and liabilities mix, and, therefore, cannot be considered a predictor of the future level of the Group's net interest income.

Worst Case Scenario

This method establishes a risk measurement (maximum potential loss), which represents the worst possible economic result of those obtained in various hypothetical scenarios. The method is designed to represent a significant shock to current market parameters on the basis of a holding period of one day and accumulating the losses deriving from the various risk factors in absolute terms. The idea underlying the determination of the shocks to be assigned to the risk factors is to ensure a high degree of prudence: the objective of the method is to quantify and limit the maximum potential loss that could emerge in extreme market conditions.

As regards liquidity risk, the Sanpaolo IMI Group adopted since July 2003 a "Liquidity Policy", which provides for the monitoring of specific action thresholds which, if exceeded, will trigger implementation of the contingency plan.

Financial Risk from Lending Activities

The market risk generated by the Group's banking book, which includes all assets and liabilities including related hedging derivatives not included in the trading book, is monitored by means of Sensitivity Analysis, together with measurement of the VaR.

In 2004, the financial risk generated by the Group's lending activity (Asset and Liability Management), measured through Sensitivity Analysis, showed an average value of approximately €83 million, compared with €131 million in the previous year, decreasing to €29 million at the end of 2004.

During 2004, the VaR of the lending activities fluctuated around the average value of €36 million (with a minimum value of €10 million and a maximum value of €65 million), amounting to €12 million at December 31, 2004, compared to €75 million at December 31, 2003.

In 2004, the foreign exchange risk generated by lending activities was not material.

The sensitivity of net interest income from the Group's banking activities assuming an increase or decrease of 25 basis points in interest rates for the next 12 months was an increase of €42 million at December 31, 2004 in the event of a rate increase and decrease of €34 million in the event of a rate decrease, corresponding to approximately 1% of the consolidated annual net interest income.

Equity Investments in non-Group Listed Companies

Equity investments held in listed companies consolidated proportionately or included at net equity showed a market value, at December 31, 2004 prices, of €1,555 million. The market value of equity investments showed, according to prices at December 31, 2004, a net potential capital gain on the book value of the investments of €66 million (after economic adjustments of their book value during the first quarter of 2005).

The VaR method is used to measure the market risk of the equity investments portfolio. During 2004, the VaR related to minority investments in listed companies, was an average of €135 million, with a minimum of €102 million and a maximum of €214 million. At December 31, 2004, the VaR related to minority investments in listed companies was €115 million. This value was significantly smaller than that at year-end 2003 (€217 million) because of the combined effect of the sale of shareholdings and the decrease in the average volatility of share prices (which, with regard to the portfolio under review, decreased from 28% at the end of 2003 to 16% at the end of 2004).

VaR equity investments portfolio	2004	2003
	(millions of €)	
Average	135.1	230.9
Low	102.2	199.8
High	213.6	273.5
Year-end	114.7	217.1

Trading Activities

Most of these risks are concentrated in Banca IMI and its subsidiaries, and arise from dealing in fixed income securities, equity securities, currencies and derivatives.

The VaR of trading activities during 2004 averaged €7 million (compared to €12 million in 2003), with a minimum of €2 million and a maximum of €20 million. At the end of December 2004, the VaR was €6 million, a significant decrease compared with year-end 2003 (€15 million).

VaR trading by type of risk	At December 31, 2004	At December 31, 2003	Average 2004	Low 2004	High 2004	Average 2003
	(millions of €)					
Interest rate risk	4.2	1.6	3.6	0.5	9.6	3.8
Exchange rate risk	1.6	2.8	1.3	0.1	6.1	0.8
Equity price risk	3.5	14.0	4.8	0.9	19.0	11.6
Diversification effect	(3.6)	(3.5)	(2.9)	n.a.	n.a.	(4.1)
Total	5.8	14.8	6.9	1.9	19.7	12.0

In addition to VaR, the Worst Case Scenario analysis is used to monitor the impact of potential losses that might arise under extreme market conditions. The maximum potential daily loss in 2004 was an average of €41 million, compared with €35 million in 2003.

**Maximum Potential Daily Loss from Trading in 2004
(millions of €)**

Backtesting showed the prudent nature of the internal measurement techniques used. In 2004, actual daily losses were never higher than the risk measures expressed in terms of maximum potential loss, while the actual trading loss exceeded the ex-ante VaR on a daily basis in only two cases.

Credit Risk Management and Control

Organization

Sanpaolo IMI has established lines of conduct to be followed when taking on credit risk; these rules are to be applied throughout the Group. They provide for levels of approval limits defined in terms of total Group credit exposure to a particular counterparty. The first level of approval limits applies to each individual Business Area or subsidiary, which in turn defines the approval limits to be delegated to its branches. Transactions in excess of these limits must be submitted to the appropriate body within the Parent Bank, consisting of (according to the increasing level of exposure) the Group Credit Committee (composed of the Managing Director and the heads of the relevant functions), the Executive Committee and the Board of Directors.

In terms of credit risk control, the Risk Management Department is responsible for defining, updating and monitoring the risk measurement techniques used by the Parent Bank and by the Group as a whole, ensuring that they are constantly in line with industry best practice. The Risk Management Department is also responsible for analyzing the risk profile of the Parent Bank and the Group and for proposing any corrective action. Furthermore, the Risk Management department is responsible for measuring the exposure of larger borrowers and preparing summary reports for the Parent Bank's senior management on changes in credit quality and on the use of economic capital by the Business Areas.

The risk control units operating within the individual Business Areas are responsible for measuring and monitoring their Business Area's portion of the loan book.

Measurement Techniques

Sanpaolo IMI has developed a series of instruments to ensure analytical control over the quality of loans to customers and financial institutions, as well as exposures subject to country risk.

For loans to customers, various grading models have been developed. These differ according to the counterparty's size and industry sector. These models make it possible to summarize the counterparty's credit quality in a single rating measurement, which reflects the probability of default in a period of one year, calibrated to the average level of the economic cycle. By means of statistical calibrations, these ratings have been made fully consistent with those assigned by rating agencies, forming one overall scale of reference. Back-testing analyses carried out to date, comparing insolvency forecasts with actual defaults, confirm that, in management's view, the models used are reliable.

As of January 2005, the rating, which had been previously used in the loan approval process only for counterparties submitted to Group Credit Committee or higher bodies, was introduced as an essential element of the process with regard to loan approvals by the branch networks. The rating, together with the assessment of the credit mitigating factors (typically guarantees and covenants), contributes to the definition of the credit risk strategy, represented by the combination of commercial policies and management behavior (frequency of credit lines reviews and recovery actions).

The new loan approval process of the networks, designed in accordance with the Basle 2 organizational requirements, has been implemented at the corporate segment level of Sanpaolo IMI and Sanpaolo Banco di Napoli. During 2005, it will be gradually extended to the other types of customers and to all the Italian subsidiaries of the Group whose main mission is to take on credit risk.

For banking and financial counterparties, a scoring system has been devised which classifies financial institutions on a scale consistent with those used by the rating agencies. The risk class constitutes the basic level of information, which is integrated with the type and duration of the transaction, as well as the level of collateral. This leads to the setting of maximum credit limits for each counterparty.

Lastly, for country risk, ratings are assigned on the basis of a model that takes into consideration the views of rating agencies and other specialized institutions, market information and internal assessments.

These ratings are not just a direct instrument with which to monitor credit risk, but also constitute a primary element for the credit risk portfolio model, which summarizes the information on asset quality in terms of risk indicators, including the expected loss and economic capital. The expected loss is the product of probability of default (derived from the rating), exposure at default and loss given default. Loss given default is measured with reference to an economic, as opposed to accounting, concept of loss comprehensive of legal costs, calculated prudently on the recoveries from disputes on a discounted basis. The "expected" loss represents the average of the loss distribution, while the economic capital is defined as the maximum "unexpected" loss which the Group could incur with a confidence level of 99.95%.

Credit Risk

This refers to all of the Group's on- and off-balance sheet credit exposures. Credit risk analysis applies to the loan books of the Parent Bank, Sanpaolo Banco di Napoli, Banca Popolare dell'Adriatico, Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Cassa di Risparmio di Venezia, Friulcassa, Banca OPI, Sanpaolo IMI Bank Ireland and Sanpaolo Leasint. The loan book analyzed represents 95% of the Group's credit-risk-weighted assets.

In terms of exposure, the analytical rating covers 70% of the credit portfolio. Unrated counterparties (mostly households with residential mortgages) have been given an average probability

of default, based on actual default experience for the preceding years. Excluding households, analytical ratings covered slightly less than 90% of counterparties in other sectors.

Analysis of Drawdowns by Rating Source

In relation to the combination of analytical ratings, less than half are represented by ratings of specialized agencies, while the majority are internal ratings; the latter prevail by far in the corporate sector.

**Composition as of December 31, 2004 of the Loan Portfolio by Rating Source
(Percentages)**

**Composition as of December 31, 2004 of the Loan Portfolio by Level Of Rating
(Percentages)**

Loans to customers to which an analytical rating has been assigned, which represent the main reference of the credit risk management model, show what we believe is a high credit quality, with a portion of investment grade loans (from AAA to BBB) equal to about 75% of the total.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The expected loss of the portfolio considered, at December 31, 2004, accounted for 0.43% of loans, compared to 0.46% at year-end 2003. The expected loss measure has been taken into account in

establishing the amount of the allowance for general risks on performing loans. At the end of 2004, the economic capital was equal to 4.50% of loans, the same ratio as at year-end 2003.

The Management and Control of Other Risks

Sanpaolo IMI also considers two other types of risk in its models: operational risk and business risk.

Operational risk is defined as the risk of incurring losses as a result of four macro categories of events: fraud, legal risks (including breach of contractual obligations), weaknesses in internal control or information systems, and natural calamities. A database of significant events that took place in the last ten years has been used for each category. From the database it was possible to identify the impact in terms of losses from public sources of information. The empirical distributions of losses calculated in this way are estimated by means of distribution theories according to the extreme value theory. The risk capital is defined as the minimum measurement, net of existing insurance policies, needed to face the maximum potential loss with a confidence level of 99.95%; the method also provides for the application of a correction factor to take account of the effectiveness of internal controls in the various operating areas.

It should be noted that this method was developed with the intention of allocating to the Business Areas and to the Group as a whole a quantity of capital adjusted to the potential of these types of events. The control of operating risks is carried out through the definition of internal rules and procedures, compliance with which is monitored by the Audit Department of the Parent bank.

The internal operational risk measurement model is being developed in order to align its main elements with the Basle 2 regulatory requirements. In particular, the scenario analysis processes at Group level are being expanded and studied in depth, taking into account, in a structured way, the economic effect of the effectiveness and frequency of controls. These are coupled with the refining of the statistical processes through in-depth studies of loss data analyses, available either through internal databases or our participation in consortium initiatives with leading banking groups (DIPO in Italy and ORX at international level).

During 2004, the operational risk management and control process was implemented following the approval of the Group's regulations on operational risk, which define the organizational structure, the area of application and the guidelines. In accordance with the Basle 2 regulatory requirements, the process provides for the direct involvement of the lines of business, subsidiaries and the corporate center structures.

Business risk (also called strategic risk) is the risk of incurring losses as a result of changes in the macro- or micro-economic scenario which could jeopardize the ability to generate income, typically by reducing operating volumes or compressing margins.

This is evaluated through the breakdown of the Business Area assets, on the basis of the respective cost and revenue structures, into fundamental "industrial" business sectors (such as consulting and distribution). The Business Areas are then allocated a level of capitalization in line with the norm for companies operating in the same type of activity.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

Not applicable.

PART II

ITEM 13. DEFAULT, DIVIDEND ARREARAGES AND DELINQUENCIES

None.

ITEM 14. MATERIAL MODIFICATION TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

ITEM 15. CONTROLS AND PROCEDURES

As of December 31, 2004, Sanpaolo IMI, under the supervision of and with the participation of Sanpaolo IMI's management, including the Managing Director and the Head of Finance and Administration Department, performed an evaluation of the effectiveness of Sanpaolo IMI's disclosure controls and procedures. Based on this evaluation, Sanpaolo IMI's Managing Director and Head of Finance and Administration Department concluded that Sanpaolo IMI's disclosure controls and procedures are effective for gathering, analyzing and disclosing the information Sanpaolo IMI is required to disclose in the reports it files under the Exchange Act, within the time periods specified in the SEC's rules and forms. Sanpaolo IMI's management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature can provide only reasonable assurance regarding management's control objectives.

There has been no change in Sanpaolo IMI's internal control over financial reporting that occurred during the period covered by this annual report that has materially affected, or is reasonably likely to materially affect, Sanpaolo IMI's internal control over financial reporting.

ITEM 16. RESERVED

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

As specified in Item 6. "Directors, Senior Management and Employees C. Board Practices Comparative Analysis between NYSE Corporate Governance Standards and Sanpaolo IMI Corporate Governance Practice Audit Committee" on page 190 above, the Board of Statutory Auditors performs the functions of the Audit Committee for purposes of Section 10A the Exchange Act, as permitted by Rule 10A-3 under the Exchange Act. According to applicable regulations (with particular reference to Article 148 of the Consolidated Securities Law and Ministerial Decree No. 162 of March 30, 2000), at least two members of the Board of Statutory Auditors must comply with specific accounting experience requirements, and all the members of the Board are required to have experience in the financial sector. Taking into account that the members of the Sanpaolo IMI Board of Statutory Auditors comply with both of the above-mentioned conditions, the Board of Statutory Auditors has acknowledged on May 13, 2005 that each of its members is an Audit Committee financial expert, as defined in the instruction to paragraph (a) of item 16A of Form 20-F. For the names of the members of the Board of Statutory Auditors, see: Item 6. "Directors, Senior Management and Employees A. Directors and Senior Management Board of Statutory Auditors" on page 182 above.

ITEM 16B. CODE OF ETHICS

In response to Section 406 of the Sarbanes-Oxley Act of 2002, Sanpaolo IMI has adopted a code of ethics that applies to our principal executive officer, principal financial officers or persons performing similar functions. A copy of the code is attached to this annual report.

Information regarding any future amendments or waivers to the code will be published on Sanpaolo IMI's website (www.grupposanpaoloimi.com under "corporate social responsibility").

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

As a company listed on the Italian Stock Exchange, Sanpaolo IMI is subject to a mandatory audit by an audit firm registered on a special list maintained by CONSOB. The term of this appointment, resolved by the shareholders' meeting at the suggestion of the Board of Directors and subject to the opinion of the Board of Statutory Auditors, is three years and may not be renewed for more than two consecutive succeeding terms.

The first three-year appointment of PricewaterhouseCoopers S.p.A. for the audit of Sanpaolo IMI's financial statements ended with respect to the fiscal year ended December 31, 2003. The shareholders' meeting of Sanpaolo IMI on April 29, 2004, reappointed PricewaterhouseCoopers S.p.A. as independent auditors for the three-year period 2004-2006.

Effective from April 10, 2003, Sanpaolo IMI established a Group directive for the Board of Statutory Auditors' pre-approval of fees for any audit service and permitted non-audit services provided by the auditors of Sanpaolo IMI and the auditors upon whom such auditors rely. The directive was adopted in order to comply with rules issued by the U.S. Securities and Exchange Commission pursuant to release No. 33-8183 (the "Auditor Independence Rules").

The following table summarizes the assignments invoiced to Gruppo Sanpaolo IMI by PricewaterhouseCoopers S.p.A. or by companies within its network.

Assignment	Year of Invoice		Amount approved by Sanpaolo IMI's Statutory Auditors (%) ^(*)
	2003	2004	
	(in thousands of €)		
Audit Fees	6,989	6,731	73%
Audit-Related Fees	3,345	3,463	88%
Tax Fees	460	144	91%
All Other Fees	519	309	96%

(*)

The percentage that was not approved by Sanpaolo IMI's Board of Statutory Auditors relates to assignments that pre-date May 6, 2003, the date of effectiveness of the Auditor Independence Rules. After such date, all audit and permitted non-audit services assigned to PricewaterhouseCoopers S.p.A. and its network were approved by the Board of Statutory Auditors. The percentage also includes invoices related to appointments made by courts and other public authorities.

Audit fees mainly consist of fees billed for professional services rendered to the Sanpaolo IMI Group by PricewaterhouseCoopers S.p.A. and its network for the audit of Sanpaolo IMI's and its subsidiaries, individual and consolidated financial statement for fiscal years 2003 and 2004.

Audit-related fees mainly consist of the consideration paid to PricewaterhouseCoopers S.p.A. and its network for issuing comfort letters in connection with securities offerings in the international markets, assurance statements requested by local regulations and by supervisory bodies, as well as financial due diligence and audits as part of corporate merger and acquisition transactions. Audit-related fees included, in 2004, €865,000 paid to PricewaterhouseCoopers S.p.A. for extraordinary professional services rendered in relation to the transition to IFRS.

Tax fees include the consideration paid to PricewaterhouseCoopers S.p.A. and its network for the provision of professional services in relation to tax matters rendered primarily to the Group's foreign companies.

All other fees consist of the aggregate fees billed for services, other than the services reported above under "audit fees", "audit-related fees" and "tax fees", provided by PricewaterhouseCoopers S.p.A. and its network in 2003 and 2004.

ITEM 16E. PURCHASES OF EQUITY SECURITIES

The general shareholders' meeting of Sanpaolo IMI held on April 29, 2005 renewed the authorization for Sanpaolo IMI to purchase its Shares, for 18 months and up to a maximum of 180 million Shares at a price of no less than 30% and no more than 10% of the end of trading price of the Shares on the Milan Stock Exchange on the day preceding each individual transaction. The shareholders' meeting of Sanpaolo IMI also acknowledged and confirmed the amount of the reserve to purchase Shares at €1,000 million. Own Shares can also be used, in the context of incentive plans to employees of the Parent Bank or of the Group.

The following table sets forth the number and price of the Shares purchased by the Group in 2004. None of the purchases of Shares carried out by the Group in 2004 were made as part of publicly announced plans or programs.

Year 2004	Total Number of Shares (or Units) Purchased(1)	Average Price Paid per Share
		€
January 2004	188,311	10.232
February 2004	21,182	10.497
March 2004	2,052,218	9.570
April 2004	315,512	9.561
May 2004	276,922	9.649
June 2004	51,596	9.375
July 2004	20,115	9.370
August 2004	878,298	8.935
September 2004	1,575,752	9.496
October 2004	20,923	9.436
November 2004	53,320	6.384
December 2004	49,252	5.999
Total	5,503,401	9.411

(1) The amounts do not include the Shares acquired by Banca Fideuram and Invesp in the context of the Insurance Reorganization.

Certification Pursuant to Section 906 of the Sarbanes-Oxley Act

June 27, 2005

Securities and Exchange Commission
450 Fifth Street, N.W.
Washington, D.C. 20549

Ladies and Gentlemen:

The certification set forth below is being submitted in connection with the Sanpaolo IMI Annual Report on Form 20-F for the year ended December 31, 2003, (the "Report") for the purpose of complying with Rule 13a-14(b) or Rule 15(d)-14(b) of the Securities Exchange Act of 1934 (the "Exchange Act") and Section 1350 of Chapter 63 of Title 18 of the United States Code.

Alfonso Iozzo the Managing Director of Sanpaolo IMI S.p.A. and Bruno Picca the Head of Finance and Administration Department of Sanpaolo IMI S.p.A., certifies that, to the best of his knowledge:

1. the Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of Sanpaolo IMI S.p.A.

[PRICEWATERHOUSECOOPERS LETTERHEAD]

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders of
Sanpaolo Imi SpA

We have audited the accompanying consolidated balance sheets of Sanpaolo Imi SpA and its subsidiaries as of December 31, 2004 and 2003, and the related consolidated statements of income, of cash flows and of changes in shareholders equity for each of the three years in the period ended December 31, 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We did not audit the financial statements of certain consolidated subsidiaries, which statements reflect "total assets" of 18 percent and 13 percent of the related consolidated totals as of December 31, 2004 and 2003, respectively, total "net interest income" (as result of the aggregation of items "10" and "20" of Consolidated Statement of Income) of 3 percent, 1 percent and 2 percent of the related consolidated totals for each of the three years in the period ended December 31, 2004 and total "net interest and other banking income" (as result of the aggregation of items "10", "20", "30", "40", "50", "60" and "170" of Consolidated Statement of Income) of 12 percent, 8 percent and 4 percent of the related consolidated totals for each of the three years in the period ended December 31, 2004. Those statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included for these companies, is based solely on the reports of the other auditors.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sanpaolo Imi SpA and its subsidiaries at December 31, 2004 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2004, in conformity with the Italian law governing consolidated financial statements and accounting principles generally accepted in Italy.

For a more comprehensive understanding of the consolidated financial statements, we draw your attention to the following circumstances:

- (a) Cardine Banca SpA merged into Sanpaolo IMI SpA during the financial year 2002; the merger became effective, for accounting and tax purposes, starting from 1 January 2002;
- (b) The Group's net income for the financial year 2002 includes a credit of Euro 364 million due to the release of the reserve for general banking risk to the Statement of Income.

The accounting principles referred to above vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 29 to the consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Board of Directors and Stockholders of
BANCA D'INTERMEDIAZIONE MOBILIARE IMI S.p.A.**

1.
We have audited the balance sheet of Banca d'Intermediazione Mobiliare IMI S.p.A. (the "Bank"), a wholly owned subsidiary of Sanpaolo IMI S.p.A., as of December 31, 2004 and 2003 and the related statements of operations, changes in stockholders' equity and cash flows for each of the two years in the period ended December 31, 2004. Such financial statements were previously provided to you and are not enclosed herewith. These financial statements are the responsibility of the Bank's Directors. Our responsibility is to express an opinion on these financial statements based on our audits.
2.
We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. The Bank is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.
3.
In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Banca d'Intermediazione Mobiliare IMI S.p.A. as of December 31, 2004 and 2003 and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2004 in conformity with the Italian law governing financial statements and generally accepted accounting principles in Italy.
4.
The accounting principles generally accepted in Italy vary in certain significant respects from accounting principles generally accepted in the United States. Information relating to the nature and effect of such differences is presented in the Note "Significant Differences Between Italian and US Generally Accepted Accounting Principles" to the financial statements of Banca d'Intermediazione Mobiliare IMI S.p.A. (not enclosed herewith).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

**To the Board of Directors and Stockholders of
Gest Line S.p.A.**

1.
We have audited the balance sheet of GEST Line S.p.A. (the "Company"), a wholly owned subsidiary of Sanpaolo IMI S.p.A., as of December 31, 2004, and the related statements of operations, changes in stockholders' equity and cash flows for the year then ended. Such financial statements were previously provided to you and are not enclosed herewith. These financial statements are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these financial statements based on our audit.
2.
We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.
3.
In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of GEST Line S.p.A. as of December 31, 2004 and the results of its operations and its cash flows for the year then ended in conformity with the Italian law governing financial statements and generally accepted accounting principles in Italy.
4.
The accounting principles generally accepted in Italy vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in the Note "Significant Differences Between Italian and US Generally Accepted Accounting Principles" to the financial statements of GEST Line S.p.A. (such financial statements were previously provided to you and are not enclosed herewith).
5.
For a better understanding of the financial statements, we draw your attention to the following aspects, which are more fully described in the Directors' Report on Operations and the Explanatory Notes:

Sede Legale: Via Tortona, 25 - 20144 Milano
Capitale Sociale: sottoscritto e versato Euro 10.327.590,00 - deliberato Euro 10.850.000,00
Partita IVA/Codice Fiscale/Registro delle Imprese Milano n. 03049560166 - R.E.A. Milano n. 1720239
F-2-D

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

the Company has completed the reconciliation and adjustment of certain accounting discrepancies in a number of accounts used in its ordinary tax collection activities. The results of this process have led the Company to post extraordinary charges of 7,105 thousand euros and extraordinary income of 8,872 thousand euros in its financial statements. Moreover, as a result of existing guarantees pledged by the Sole Shareholder, the Company has posted further extraordinary income of 2,275 thousand euros in relation to the above adjustments, with a balancing entry under accounts receivable from the Parent Company;

the Company is involved in litigation with the Venice Court of Auditors regarding tax damages deriving from the indictment of a number of Tax Collectors and in relation to which the Company has received 7 convictions, immediately appealed before the Central Divisions of the Court of Auditors. In accordance with the opinions of external legal advisors regarding the presumable outcome of the litigation, the Directors believe the specific provisions made to be fair and prudential; and

pursuant to art. 2497-bis, section one of the Italian Civil Code, the Company has declared that it is subject to the management and coordination of Sanpaolo IMI S.p.A. and has, therefore, included highlights from this company's financial statements in its Explanatory Notes. Our opinion on the financial statements of GEST Line S.p.A. does not extend to such data.

INDEPENDENT AUDITORS' REPORT

**To the Stockholder and the Board of Directors of
GEST Line S.p.A.
(formerly Esaban S.p.A.)**

We have audited the balance sheet of GEST Line S.p.A. (the "Company"), previously named Esaban S.p.A., as of December 31, 2003, and the related statements of income, cash flows and changes in stockholders' equity for the period ended December 31, 2003, all expressed in Euros. Such financial statements were previously provided to you and are not enclosed herewith. These financial statements are the responsibility of the Company's Directors. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (PCAOB) in the United States of America. Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of GEST Line S.p.A. as of December 31, 2003, and the results of its operations and its cash flows for the period ended December 31, 2003, in conformity with the Italian law governing financial statements and generally accepted accounting principles in Italy.

For a better understanding of the financial statements, we draw your attention to the following aspects, which are more fully described in the Directors' Report on Operations and the Explanatory Notes:

on September 11, 2003 a General Meeting of shareholders approved the change of Company name from Esaban S.p.A. to GEST Line S.p.A. On the same date the deed was signed for the merger of GEST Line S.p.A. with Ge.Ri.Co. S.p.A., Sanpaolo Riscossioni Genova S.p.A. and Sanpaolo Riscossioni Prato S.p.A., legally effective from October 1, 2003 and retroactively effective for accounting purposes from January 1, 2003. Following the merger GEST Line S.p.A. acquired all the existing assets, liabilities, commitments and guarantees of the merged companies;

F-2-F

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

the Company is proceeding with the reconciliation and adjustment of certain accounting discrepancies in its bank and post office current accounts and a number of accounts used in its ordinary tax collection activities. In response to the findings of the specially established working group, during 2003 the Company activated existing guarantees pledged by the Sole Shareholder for the Naples, Caserta and Gorizia concessions. This activation resulted in extraordinary income of approximately 797 thousand euros being posted to the financial statements, offsetting the above adjustments, and in a balancing-entry on the accounts receivable from the Parent Company. On the basis of the results to date, and in view of existing guarantees for the main concessions, the Directors believe that the completion of the above activities will not have a significant impact on the Company's results of operations;

the Company is involved in litigation with the Venice Court of Auditors regarding tax damages deriving from the indictment of a number of Tax Collectors and in relation to which the Company has received 8 convictions, immediately appealed before the Central Divisions of the Court of Auditors. In accordance with the opinions of external legal advisors regarding the presumable outcome of the litigation, the Directors believe the specific provisions made to be fair and prudential.

[ERNST AND YOUNG LETTERHEAD]

**REPORT OF INDEPENDENT REGISTERED
PUBLIC ACCOUNTING FIRM**

To the Shareholders and the Board of Directors of
Banca Fideuram S.p.A.

We have audited the balance sheet of Banca Fideuram S.p.A. as of December 31, 2004, and the related statement of income for the year then ended. Such financial statements were previously provided to you and are not enclosed herewith. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit the financial statements of certain investments in subsidiaries, which statements respectively represent approximately 26% and approximately 1% of total investments and total assets. Those statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for such subsidiaries, is based solely on the reports of the other auditors.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States of America). Those Standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit and the report of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the financial position of Banca Fideuram S.p.A. as of December 31, 2004, and the results of its operations for the year then ended in conformity with the Italian laws governing financial statements and generally accepted accounting principles in Italy.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) FORM AND CONTENT OF CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2004, 2003 AND 2002

The Bank's consolidated financial statements for 2004, 2003 and 2002 have been prepared pursuant to Decree 87 of January 27, 1992, which implemented EEC Directive 86/635. They also take into account the requirements contained in the Bank of Italy instructions dated July 30, 1992 and subsequent amendments. For all matters not governed by special regulations, reference has been made to the Italian Civil Code and to national accounting standards.

The consolidated financial statements comprise the consolidated balance sheet, the consolidated statement of income and these explanatory notes.

These consolidated explanatory notes are presented with comparative figures taken from the financial statements as of December 31, 2003 and 2002 and provide all the information required by law, including any supplementary information considered necessary to give a true and fair view of the Group's financial position. The tables provided for by law and the details required by the Bank of Italy are numbered in accordance with Bank of Italy instructions or based on the date of the relevant Instructions.

In compliance with current rules, the financial statements have been prepared in millions of Euro, except for per share information and as indicated.

The following schedules are attached to the consolidated financial statements:

Statement of changes in consolidated shareholders' equity;

Statement of consolidated cash flow;

Reconciliation between the profit and net equity of the Parent Bank and that of the Group;

List of equity investments that exceed 10% in unlisted companies and limited liability companies (as per CONSOB resolution no. 11715 of November 24, 1998).

(2) SCOPE OF CONSOLIDATION

The scope of line by line consolidation reflects membership of the SANPAOLO IMI Banking Group as recorded in the appropriate register in compliance with Art. 64 of Legislative Decree no. 385 dated September 1, 1993, with the exception of certain minor subsidiaries whose balance sheets and results of operations are not significant to the consolidated financial statements, or which have been put into liquidation or listed for disposal. In addition to SANPAOLO IMI S.p.A. (the Parent Bank), the Banking Group comprises those directly and indirectly controlled subsidiaries which carry out banking, finance or other activities which complement those of the Parent Bank.

The scope of line by line consolidation excludes Società per la gestione di attività S.p.A. (Sga), the shares of which have been transferred to the Treasury Ministry as a pledge with voting right, as part of the special procedures described in Note 17 "Other liabilities". Furthermore, those companies carried at equity and for which disposal has been formally arranged are excluded.

Joint control equity investments have been consolidated using the proportional method.

Investments in subsidiaries whose activities differ from banking, financing or other activities which complement those of the Parent Bank and those that are excluded from the scope of consolidation for the aforementioned reasons, as well as shareholdings in companies subject to significant influence where the Group controls at least 20% of the voting rights in the ordinary meeting (i.e. associated companies), are carried at equity.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The line by line and proportional consolidation area of the SANPAOLO IMI Group as of December 31, 2004, showed no significant changes compared with December 31, 2003, apart from the proportional consolidation of Allfunds Bank S.A., following the purchase in February 2004 of 50% of the company by the SANPAOLO IMI Group. Attention is also brought to the exclusion of Finconsumo Banca S.p.A. from the area of consolidation according to the equity method, following the disposal of the residual 30% share during the first quarter of 2004 and of Sanpaolo Bank (Austria) A.G., following its disposal in October 2004.

The main changes in the line-by-line and proportional consolidation area compared with December 31, 2002 were as follows:

the transfer of the following investments from the area of consolidation according to the equity method to that of line-by-line consolidation:

the Eptaconsors S.p.A. and its subsidiaries, following the increase in the investment held by the SANPAOLO IMI Group which, in the first half of 2003, rose from 40.48% to 100%. In the fourth quarter of 2003, Eptaconsors S.p.A. and its subsidiary Eptasim S.p.A. were merged into Invesp S.p.A.;

the Hungarian Inter-Europa Bank RT and its main subsidiaries, following the increase in the investment held by the Group which, in 2003, rose from 32.51% to 85.87%;

the transfer of Cassa dei Risparmi di Forlì S.p.A. from the area of consolidation according to the equity method, to that of proportional consolidation, following the attainment of joint control by the Parent Bank which, in May 2003, increased its investment from 21.02% to 29.77%;

the passage from the area of consolidation on a line-by-line basis to that of consolidation according to the equity method of:

IW Bank S.p.A. following the disposal at the beginning of 2003 of 80% of its shares previously held by Banca IMI S.p.A.;

Banque Sanpaolo S.A. and its subsidiaries following the disposal in December 2003 of 60% of its shares previously held by the Parent Bank;

the transfer of Finconsumo Banca S.p.A. from the area of proportional consolidation to the area of consolidation according to the equity method, as an effect of the sale agreement and of the termination of joint control (which was followed by the disposal of 20% of the investment).

Attention is brought to the inclusion in the area of consolidation according to the equity method, of the newly acquired interest in Synesis Finanziaria S.p.A. (25%), holder of controlling interests in FIDIS Retail Italia.

Companies consolidated on a line-by-line or proportional basis and investments carried at equity are listed in Note 11.

(3) METHODS AND EFFECTS OF THE CONSOLIDATION OF THE FORMER CARDINE GROUP COMPANIES IN 2002

For the first time inclusion in the consolidated financial statements of the former Cardine Group companies, following the merger by incorporation of the Parent Bank Cardine Banca S.p.A. into SANPAOLO IMI S.p.A., it has been taken into account the shareholders' equity of the newly-consolidated companies and to the related book values as of January 1, 2002, this being the reference date of the transaction, for accounting and tax purposes. For the purposes of alignment to the accounting principles of the SANPAOLO IMI Group, the reference net shareholders' equities have been appropriately adjusted in order to reflect the discounting of doubtful loans of the former Cardine

Group (€ 63 million net of the related tax effect), as well as the losses on investment securities (€ 23 million net of the related tax effect).

The first time consolidation of the former Cardine Group shareholdings revealed positive and negative goodwill differences on line-by-line consolidation and on net equity for, respectively, € 314 million and € 299 million. The positive differences have been allocated as follows:

- a) € 299 million have been deducted from negative goodwill, using the faculty provided for by art. 32, subsection 4 of Decree. 87/92, confirmed by subsection 5 of the same article, as well as the relevant application of the Bank of Italy instructions (provision dated July 30, 1992 and subsequent amendments);
- b) the remaining € 15 million of assets in the consolidated balance sheet to be amortized over 10 years, given the nature of the investment. For the year 2002, amortization charged to the statement of income totaled € 1.5 million.

Considering that, as mentioned earlier, the merger by incorporation of Cardine Banca has an accounting effect as of January 1, 2002, the SANPAOLO IMI consolidated statement of income for the year 2002 reflects the financial flow of the former Cardine Group companies line-by-line for the whole period.

(4) CONSOLIDATION PRINCIPLES

The main consolidation principles adopted are as follows:

The book value of equity investments in consolidated companies, held by the Parent Bank or by other Group companies, is offset against the corresponding portion of the Group's share of the company's shareholders' equity adjusted where necessary to bring the company into line with Group accounting principles including their assets and liabilities on a line-by-line basis in accordance with the "full consolidation method". The off setting of book value against shareholders' equity is carried out on the basis of values current at the time the investment was consolidated for the first time, or at the time the controlling interest was acquired. Where appropriate, any differences are allocated to the assets and liabilities of the consolidated companies concerned, or, for the quota attributable to the Group, on the basis of the application of the equity ratios to "goodwill or negative goodwill", depending on whether the value of the investment is higher or lower than the related portion of shareholders' equity.

More specifically, the shareholders' equity of Group companies used in calculating consolidation differences has been determined as follows:

from investments held in portfolio as of December 31, 1994, this being the date of the Parent Bank's first consolidated financial statements, with reference to their financial position as of December 31, 1993;

from investments purchased after December 31, 1994, with reference to their financial position as of the date of purchase or, where this is not available, with reference to the financial position reported in the official financial statements prepared closest to that date;

from investments formerly belonging to the IMI Group, with reference to their financial position as of January 1, 1998 (accounting date for the merger of Sanpaolo and IMI);

from investments formerly belonging to the Cardine Group, with reference to their financial position as of January 1, 2002 (accounting date for the merger between SANPAOLO IMI and Cardine Banca).

Investments in companies carried at equity are recorded in the financial statements at the amount equal to the corresponding portion of their shareholders' equity. Any balance not assignable to the assets or liabilities of the companies concerned at the time this method is first implemented, is booked

under "positive/negative goodwill arising on application of the equity method". In the years after the first year of consolidation, the adjustment of the value of these investments is booked under "negative goodwill arising on application of the equity method" and to "Profit (losses) from investments carried at equity" for, respectively, the changes referring to reserves and those referring to the net income of the company in which the investment is held.

"Positive goodwill" arising on the application of line-by-line consolidation, proportional consolidation or the equity method is deducted from the total "negative goodwill" already existing, or which arose during the same year, and up to the total amount. Investments acquired to be re-sold as part of the merchant banking activity are not offset in this way. Positive goodwill which is not offset against negative goodwill is amortized over a period corresponding to the use of the investment (see Note 16).

Receivables, payables, off-balance sheet transactions, and costs and revenues, as well as any gains and losses relating to significant transactions between consolidated Group companies, are eliminated. By way of exception, given the provisions of art. 34, Decree. 87/92, costs and revenues arising from trading in financial instruments and currency within the Group are not eliminated if such transactions were carried out under normal market conditions.

Financial statements denominated in currencies not included in the euro-zone are converted into euro at year-end exchange rates. Differences arising on the conversion of shareholders' equity captions using these closing exchange rates are allocated to consolidated reserves, unless they are offset by specific hedging transactions.

(5) FINANCIAL STATEMENTS USED FOR CONSOLIDATION

The financial statements used for the line-by-line consolidation process are those prepared as of December 31, 2004, 2003 and 2002, as approved by subsidiaries' Board of Directors. They have been adjusted, where necessary, for consistency with Group accounting policies. The financial statements of subsidiaries operating in the financial leasing sector and included in consolidation, have been prepared using the financial lease method, which is essentially consistent with Group accounting policies.

Investments with significant influence have been valued according to the equity method, made on the basis of the latest definitive or draft financial statements available.

(6) AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements and those of the Parent Bank, have been subjected to an audit by PricewaterhouseCoopers S.p.A., in accordance with the shareholders' resolution dated April 28, 2000, which appointed the firm as auditors for the 2001/2003 three-year period and with the shareholders' resolution dated April 29, 2004, which appointed the firm as auditors for the 2004/2006 three-year period.

(7) DESCRIPTION OF ACCOUNTING POLICIES

The accounting policies used in the preparation of the consolidated financial statements for 2004, 2003 and 2002 are consistent.

The preparation of these financial statements requires management to apply accounting methods and policies that are based on difficult or subjective judgments, estimates based on past experience and assumptions determined to be reasonable and realistic based on the related circumstances. The application of these estimates and assumptions affects the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the balance sheet date and the reported amounts of income and expenses during the reporting period. Actual results may differ from these estimates given the uncertainty surrounding the assumptions and conditions upon which the estimates are based.

Loans, guarantees and commitments

Loans to banks and customers

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their net carrying amount ("*presumibile valore di realizzo*"), which is the outstanding principal, or principal plus related interest, adjusted for the allowance for loan losses, including charge-offs, taking into account the solvency of borrowers in difficulty and any debt-servicing problems faced by individual industrial sectors or the countries in which borrowers are resident.

The assessment performed also takes into consideration any existing guarantees, market prices and downward trends involving consistent loan categories. Net carrying amount is determined following a detailed review of outstanding loans, taking into consideration the degree of risk associated with the various forms of lending and the risk of default inherent in performing loans. The net carrying amount of doubtful loans (non-performing, problem and restructured loans, loans being restructured) takes into consideration not only the likelihood of possible recovery, but also any total or partial failure to generate income and delayed repayments.

Loans valued on a case-by-case basis comprise:

non-performing loans: loans to borrowers, in a state of insolvency or similar;

problem loans: loans to borrowers suffering temporary difficulties which are likely to be overcome in an acceptable period of time;

restructured loans: loans for which a syndicate of banks (or a single bank) reschedules the repayment of principal or re-negotiates the applicable terms at lower-than-market rates;

loans being restructured: loans for which the borrower has applied for consolidation to a variety of banks within the past 12 months.

On the other hand:

loans exposed to "country risk": loans not guaranteed to borrowers resident in countries with debt-servicing difficulties; these are normally adjusted applying, from country to country, writedown percentages that are not lower than those specified by the Banking association. Exceptions are made for certain positions, which are valued taking into account the level of risk covered by underlying guarantees. These loans do not include specific positions which, on the basis of an objective state of insolvency, are classified in the previous risk categories;

performing loans: loans to borrowers who are not currently presenting specific insolvency risks are valued on a general basis. Loans acquired from third parties for investing purposes, or rather with the intent of holding them in portfolio up to their expiry in order to maximize the return on such investments, are classified at purchase cost; any difference between the price paid for the investment and the nominal or reimbursement value is reflected in the statement of income to adjust the interest relating to the loans acquired, according to the residual duration of the loans and on the basis of the accruals principle. General adjustments to other performing loans are calculated by the individual subsidiaries on the basis of historical/statistical methods used to determine the impairment of loans judged to be effectively incurred, but the amount of which is not known at the moment of evaluation.

The historical/statistical method used by the Parent Bank and by the other bank networks of the Group encompasses the following stages:

- 1.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

at the end of the period an estimate is made of the performing loans which, based on the movements over the last five years, are expected to become doubtful loans during the next year;

F-11

2. the potential losses likely to be incurred on the aggregate of point 1 above, are calculated assuming that the loss percentage on performing loans transferred to doubtful loans is in line with the average loss observed over the last five years;
3. in order to back-test the effectiveness and accuracy of the method, the results of the historical statistical method are compared with the ratings used to monitor and control credit risks on the basis of risk management methods.

The losses, resulting from a calculation and a reasoned comparison of the risk management models, are the reference parameter used to calculate the "general provision" destined to cover the default risk on performing loans. This calculation is aligned to what is assumed to be an adequate value, determined also considering specific qualitative factors belonging to the portfolio and valuations of the expected economic performance.

Loans are classified as being non-performing, problem, restructured or exposed to country risk by reference to current relevant Bank of Italy regulations, integrated by internal instructions which establish more restrictive criteria and rules for the transfer of loans within the various risk categories.

The operating structures classify doubtful loans under the coordination of the central departments responsible for the supervision of credit control. After review by the latter, the resulting net carrying amounts are formally approved by the regulating committees and other steering groups within the organization.

Default interest accrued during the year is eliminated from the statement of income since, for the sake of prudence, collection is considered wholly unlikely.

Writedowns, both specific and general, are made by an adjustment to reduce the value of the asset recorded in the balance sheet on the basis of the aforementioned criteria. The original values may be reinstated by means of writebacks, when the reasons for such writedowns cease to apply.

Discounting adjustments have been calculated to reflect the difference between:

the net carrying amount;

and the net present value of future financial flows (principal and interest).

The net present value of future financial flows is determined on the basis of expected cash receipts, the timing of such receipts and the applicable discounting rate.

The timing and extent of expected cash receipts are determined on the detailed calculations provided by the departments responsible for loan evaluation. Where these are not available, estimates and general statistics deriving from internal historical data and studies of the relevant business sectors are used.

With regard to the discounting rate, as of December 31, 2004, the Parent Bank used the average reference rate of 4.5%, determined as the appropriate approximate average performance at the date of inception of the doubtful loan portfolio and calculated on the basis of the contractual rates actually applied by the Parent Bank on medium/long-term loans (fixed and floating rate) and on short-term loans (floating rate). As it is necessary to simplify data processing and reduce its costs, it is deemed that this average rate is sufficiently close to the result which would have been obtained had current contractual rates been applied to transactions now classified as doubtful loans. Subsidiaries have used a similar approach using, in the case of foreign companies, reference rates appropriate to the markets concerned.

The posting of value adjustments due to discounting results in writebacks to discounted loans: the passage of time, and the approach of the expected collection deadlines, implies an automatic reduction in the underlying financial charges previously deducted from the value of the loans.

Loans for which the Group acquired protection against the risk of non-performance as part of credit derivative contracts ("protection buyer") continue to be booked in the financial statements among loans secured by personal guarantees.

Loans deriving from financing and deposit contracts

Loans deriving from financing and deposit contracts are recorded at the amount disbursed. Loans backed by discounted notes, provided by customers within the scope of lending activities, are stated at their nominal value. The difference between nominal value and the amount disbursed is deferred and amortized over the remaining life of the notes.

Repurchase agreements on securities and securities lending

Repurchase agreements on securities that require the holder to resell securities when the agreement matures are treated as lending transactions. The amounts disbursed in this way are therefore recorded as loans. Income from lending, comprising interest coupons on securities and the differential between the spot and forward prices for such securities, is recorded on an accruals basis as interest in the statement of income.

Transactions involving the loan of securities guaranteed by funds freely available to the lender are treated in the same way as repurchase agreements on securities. Securities loaned, not guaranteed by sums of money, are recorded in the financial statements as a combination of two functionally-linked transactions, of assets or liabilities against deposits or loans. These transactions are essentially the same as repurchase agreements, therefore the securities loaned remain in the portfolio of the lender.

Finance leases

Lease transactions are stated using the lease accounting methodology, which discloses the economic substance of lease contracts and transactions. This approach, which recognizes the financial nature of lease transactions, treats the excess of total lease payments over the cost of the related asset as interest income. Such income is credited to the statement of income according to the residual outstanding principal and the pre-determined rate of return, also taking into consideration the end-of-lease purchase value of the asset. Accordingly, the balance of loans under finance leases reported in the consolidated financial statements essentially represents the outstanding principal on loans to customers and installments due but not yet collected.

The residual value of underlying assets is recorded at cost less permanent impairments.

The residual value of underlying assets is evaluated for impairment if there are changes in circumstances that indicate that the carrying amount of the assets may not be recoverable. Recoverability of residual value of underlying assets is measured by a comparison of the carrying amount of an asset to its recoverable amount, calculated as the net selling price.

Guarantees and commitments

Guarantees and commitments giving rise to credit risk are recorded at the total value of the exposure, and are valued applying the same criteria as those used for loans. Expected losses in relation to guarantees and commitments are covered by the related reserve ("provision for guarantees and commitments"). Commitments include exposures to underlying borrowers for credit derivatives for which the Group has taken over the credit risk ("protection seller").

Credit derivatives

Hedging sales Credit derivatives which involve hedging sales are recorded in caption 20 "commitments" according to their notional value. If payment of a fixed amount is expected, the final sum established by the contract is recorded.

Hedging purchases Credit derivatives which involve hedging purchases are booked to the underlying asset among loans secured by personal guarantees.

Credit derivatives are classified as belonging to the dealing portfolio ("trading book") when the bank is holding them for trading. Credit derivatives not included in the trading book are classified to the banking book.

Credit derivatives belonging to the trading book are valued individually, taking into consideration the credit and market risk inherent in the contracts.

Credit derivatives belonging to the banking book are valued:

at cost adjusted to take into account any permanent losses in value, in the case of contracts which involve hedging sales;

in a consistent manner with the underlying asset object of the protection, for contracts which involve hedging purchases.

The premium paid or collected on contracts belonging to trading book is recorded among premiums for options (caption 150 under assets and caption 50 under liabilities of the balance sheet).

The premium on contracts belonging to banking book is recorded as commission income or expense according to whether the amount is collected or paid (respectively captions 40 and 50 of the statement of income).

Securities and off-balance sheet transactions (other than foreign currency transactions)

Investment securities

Investment securities due to be held by the Group as long-term steady investments are valued at cost, determined using the "daily weighed average cost" method, adjusted to reflect accruals for the year of issue and dealing discounts (the latter being the difference between the purchase price and the related redemption price, net of issue discounts yet to mature).

Such securities are written down to reflect any lasting deterioration in the solvency of the issuers and the ability of the related nations to repay debt. Investment securities may also be written down in consideration of the market trend in accordance with the first subsection of art. 18 of Decree 87/92. The original value is reinstated if the reasons for any writedowns cease to apply.

Dealing securities

Securities held for dealing and treasury purposes are stated at cost on acquisition, determined using the "average daily cost" method, adjusted to reflect accrued issue discounts. They are valued as follows:

securities quoted in organized markets: the official price quoted on the last trading day of the year;

securities not quoted in organized markets: at the lower between cost and market value. The latter value is estimated via the discounting of future cash flows, applying market rates at the time of valuation, for similar type of instruments and the creditworthiness of the issuer. Where possible, the estimates are compared with quoted securities with similar financial characteristics.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The original value of dealing securities is reinstated when the reasons for any writedowns cease to apply. Unquoted securities which are economically linked to derivative contracts are valued at market price, consistent with the accounting treatment of the contracts concerned.

Securities held for dealing purposes include securities issued by Group companies which were purchased on the market and held for negotiation purposes.

Any transfers between investment security and dealing security portfolios are made on the basis of the value resulting from the application at the time of the transaction of the valuation policies for the portfolio of origin; the related economic effects are reported in caption 60. "Profits (losses) on financial transactions" if the portfolio of origin is a dealing portfolio, and in caption 150. "Adjustments to fixed financial assets" if the portfolio of origin is an investment portfolio. Securities transferred and still held at year-end are valued using the method applicable to the destination portfolio.

Commitments to buy or sell for securities transactions to be settled

Commitments to buy are valued on the basis applicable to the destination portfolio. The value of commitments to sell, on the other hand, takes into consideration the contractual forward sale price.

Equity investments

Equity investments which are neither consolidated on a line-by-line basis nor valued under equity method, are stated at cost, increased to reflect past revaluations at the time the company was transformed and the effect of mergers, determined on a LIFO basis. Cost is written down to reflect any permanent losses in value, taking into account any reductions in the equity value of the companies concerned and the trend in exchange rates for those investments held at historical rates. The original value of equity investments is reinstated if the reasons for any writedowns cease to apply.

Equity investments may also be written down in consideration of the market trend, in accordance with the first subsection of art. 18 of Decree 87/92.

With reference to investments held in Isveimer and in Sga, any charges which the Parent Bank may be called on to bear to cover losses incurred by companies will be covered through measures taken in accordance with Law 588/96, accomplished with the procedures provided by the Ministerial Decree of September 27, 1974, as revealed in Note 17.

Dividends from investments that are not subject to line by line consolidation or valued at equity method are recorded when the tax credit becomes collectible, usually in the year in which dividends are declared and collected.

Assets and liabilities denominated in foreign currency (including off-balance sheet transactions)

Assets and liabilities denominated in foreign currency

Assets and liabilities denominated in foreign currencies or adjusted to reflect foreign exchange fluctuations, as well as financial fixed assets funded in foreign currencies or adjusted to reflect foreign exchange fluctuations, are valued using spot exchange rates applicable at year end. Equity investments denominated in foreign currencies subject to local exchange control restrictions (non-convertible currencies) stated in currencies other than those of use, and those not fully or partially covered with a deposit in the currency of denomination of the investment are stated, with regard to the part financed in currencies other than those of use, at the historical rates of exchange applying at the time of acquisition.

Foreign currency costs and revenues are stated at the exchange rates applying at the time of the transaction.

Unsettled spot and forward currency transactions

Unsettled spot and forward currency transactions carried out for hedging purposes are valued in the same way as the assets and liabilities being hedged, whether they are recorded on or off the balance sheet.

Transactions not carried out for hedging purposes are valued:

at year-end spot exchange rates, in the case of spot transactions still to be settled;

at period-end forward exchange rates for maturity dates corresponding with that of the transactions being valued, in the case of forward transactions.

The effect of these valuations is debited or credited to the statement of income.

Tangible fixed assets

Tangible fixed assets are stated at purchase cost, including related charges and the cost of improvements. In certain cases, purchase cost may have been restated in connection with incorporation, mergers or with the application of monetary revaluation laws.

Operating assets are depreciated on a straight-line basis over their residual useful lives. Tangible fixed assets are written down in cases where there is a permanent loss in value, regardless of how much depreciation has already been accumulated. The value of such assets is reinstated in future accounting periods if the reasons for any writedowns no longer apply.

Costs for ordinary maintenance and repairs, which do not increase the utility and/or useful life of the assets, are expensed in the year they are incurred.

Intangible fixed assets

Intangible fixed assets are stated at purchase or production cost, including related charges, and amortized over the period they are expected to generate a benefit, as described below:

start-up costs and other deferred charges are amortized, generally on a straight-line basis, over five years;

costs incurred for the purchase of software or for its development, using external resources, are generally amortized on a straight-line basis over three years, taking into account the expected residual period of utilization.

Other assets

Own shares

Own shares are valued according to the purposes for which they are held. In particular, they are valued at cost, determined using the "daily weighed average cost" method, if they are classed as long-term investments. For this purpose own shares, used to complete strategic deals which require their availability, are considered as long-term investments (e.g. share exchanges as part of the acquisition of equity investments, co-operation agreements and other corporate finance deals).

On the other hand, own shares are stated at year-end (closing date) market value if they are held in a dealing portfolio, since they are available for sale or destined for share incentive or stock option plans.

Stock option plans

Stock incentive plans approved by the Parent Bank, which do not entail the assignment of own shares, consist in the assignment of rights to underwrite increases in share capital against payment. Considering that neither Italian regulations nor Italian accounting policies provide specific instructions to such effect, these plans are accounted for by carrying the capital increase and paid-in capital, on the exercised date.

Payables

Payables are stated at their nominal value. The difference between the nominal value of loans received, or securities placed, and the amount actually received, is recorded in the financial statements among deferrals and released to the statement of income on an accruals basis, in accordance with the repayment plan implicit in the funding transaction. Zero-coupon securities are stated at their issue price plus accrued interest. Consistent with the policies described above, repurchase agreements that require the holder to resell the acquired securities when the agreement matures are recorded among payables, as well as securities borrowing transactions.

Repurchase agreements on securities issued by Group companies are not reported on the above basis if they are arranged by the issuing company concerned. In this case, they are recorded as securities issued with a forward repurchase commitment.

Provisions for employee termination indemnities

The provisions for employee termination indemnities represent the liability matured for each employee at period-end, accrued in accordance with current legislation and payroll agreements.

Provisions for risks and charges

Provisions for risks and charges cover known or probable liabilities for which the timing and/or exact amount of payment are uncertain at the time the financial statements are prepared, but for which the amount can be reasonably estimated.

Pensions and similar commitments

The pension fund, qualifiable as an "internal" pension fund, is set up by some bank networks of the Group (Cassa di Risparmio di Venezia, Friulcassa, and Banca Popolare dell'Adriatico) to cover charges linked to supplementary pension funds payable to former employees entitled to such treatment. Following the agreement reached with the Trade Unions in 2004, the pension fund set up by the Cassa di Risparmio in Bologna as of December 31, 2003 was written off as an effect of the transfer of the management of the supplementary pension fund to external pension funds. The potential liability arising in this connection is assessed at year-end on the basis of independent actuarial appraisals, in order to determine the provisions to technical reserves needed to cover future pensions. A similar fund has been set up by Cassa dei Risparmi di Forlì (a proportionally consolidated company)

Provisions for taxation

The provisions for taxation cover deferred taxes and income taxes on business activities, including those charged on units operating abroad. The provision also takes into consideration current and potential disputes with the tax authorities.

Income taxes are estimated prudently on the basis of the tax charges for the year, determined in relation to current tax legislation.

Deferred taxation, determined according to the so called "balance sheet liability method", reflects the tax effect of temporary differences between the book value of assets and liabilities and their value for tax purposes, which will lead to taxable and deductible amounts in future. To this end, taxable temporary differences are defined as those which will give rise to taxable income in future years (deferred capital gains, for example); while deductible temporary differences are defined as those which will give rise to deductible amounts in future years (such as provisions and costs that can be deducted for tax purposes over a period of years, e.g. general loan writedowns in excess of the fiscally deductible amount and accruals to provisions for risks and charges).

Deferred tax liabilities are calculated by applying to each consolidated company the enacted tax rate on taxable temporary differences likely to generate a tax burden and on deductible temporary differences if the recoverability is reasonably certain.

The deferred taxation on equity reserves that will become taxable "however used" is charged against shareholders' equity. Deferred taxation relating to revaluations arising on conversion to the Euro, credited to a specific reserve that will become taxable pursuant to art. 21 of Decree 213/98, is charged directly against this reserve.

No provision is made for the Parent Banks' reserves subject to taxation only in the event of distribution. This is because such reserves are allocated to accounts that are not available for distribution and because the events which would give rise to such taxation are not expected to occur.

Deferred taxation on shareholders' equity items of consolidated companies is not booked if it is unlikely that any liability will actually arise, bearing in mind the permanent nature of the investment.

Deferred tax assets and liabilities relating to the same kind of tax, applicable to the same entity and expiring in the same period, are offset against each other.

Deferred tax assets are booked to the assets side of the balance sheet under caption 150 "Other assets" offset against income tax. Liabilities for deferred taxes are booked to the liabilities side of the balance sheet under sub-caption 80.b "Taxation" and are also offset against income tax.

If the deferred tax (asset or liability) relates to transactions directly involving shareholders' equity without affecting the statement of income, it is debited or credited to shareholders' equity.

Other provisions

The "provision for guarantees and commitments" covers losses on guarantees given and, more generally, the contingencies associated with the Group's guarantees and commitments and the exposures to credit derivatives for which the Group has taken over the credit risk (protection seller).

The provision for other risks and charges covers estimated incurred losses arising from legal disputes, including repayments claimed by the receivers of bankrupt customers. It also covers probable charges in connection with guarantees given on the sale of equity investments, the Group's commitment to support the Interbank Deposit Guarantee Fund, the renegotiation of subsidized home mortgage loans (Law 133/99 and that dictated by Budget Law 2001) and unsubsidized fixed rate mortgages (Law Decree 394 dated December 29, 2000, converted to Law 24 dated February 28, 2001); probable charges connected to customer complaints in respect of dealing activities in securities and other connected charges and contingent liabilities.

The "provisions for other personnel charges" mainly comprise:

provisions made by the Parent Bank and by Sanpaolo Banco di Napoli S.p.A on the basis of an independent actuarial report, in order to cover the technical deficit of the Supplementary Pension Fund, an independent fund which supplements the compulsory pension fund, as well as accruals for other welfare and social contributions;

provisions made on an mathematical/actuarial basis to set up the technical reserve needed to cover long-service bonuses payable to employees;

provisions made to cover discretionary employee bonuses, commitments for staff leaving incentives offered during the year and in prior years and other contingent liabilities.

Reserves for general banking risks

These reserves cover general business risks and, as such, form part of shareholders' equity in compliance with international supervisory standards and Bank of Italy instructions.

Accruals and deferrals

Accruals and deferrals are recognized in accordance with the matching principle.

Derivatives contracts

Derivatives on currency, securities, interest rates, stockmarket indexes and other assets

Derivative contracts are valued individually using the methods applicable to the portfolio concerned (hedging and non-hedging contracts). The valuation criteria of derivative contracts are also applied to embedded derivatives which represent the components of hybrid financial instruments and include both derivative and host contracts. Embedded derivative contracts are separated from host contracts and are valued according to host contracts basis.

The values determined are recorded separately in the balance sheet without offsetting assets and liabilities. Agreements between the parties to off-set reciprocal receivables and payables in the case of default by one of the counterparts ("*master netting agreement*") are not relevant for disclosure purposes, but are taken into consideration when assessing the counterparty's credit risk.

The values determined by the contract valuation process (hedging and non-hedging) are adjusted on a case-by-case or a general basis, where appropriate, in order to reflect the credit risk (counterparty and/or country risk) inherent in the contracts.

Hedging contracts

These are entered into with the aim of protecting the value of individual assets or liabilities, as well as any groups of assets or liabilities or off-balance sheet items, from the risk of market fluctuations. In the case of groups of assets or liabilities (or off-balance sheet items), the hedging objective is achieved via the use by the Group of *asset and liability management* techniques. A transaction is considered to be a hedge in the presence of the following documented conditions:

- a) intent to enter into a hedge;
- b) strict correlation between the terms and conditions of the assets or liabilities hedged and those inherent in the hedging contract.

If just one of the conditions above ceases to apply, then the contract is re-qualified as "non-hedging".

Hedging derivatives are valued on a basis consistent with the assets and liabilities being hedged. The related procedures for presentation in the financial statements are summarized below:

Balance sheet: interest margins accrued on contracts hedging the risk of interest arising from interest earning/bearing assets and liabilities are classified among "Accrued income" and/or "Accrued expenses". The amount paid or collected up-front at the moment of stipulating derivative contracts under terms different to market, as well as interest margins maturing in future years on Forward Rate

Agreements ("FRA") hedging the risk of interest arising from interest-earning / bearing assets and liabilities are classified among "Prepaid expenses" and/or "Deferred income". The market value (net of any accruals) of contracts hedging the risk of price fluctuations in dealing transactions, as well as the effect of valuing contracts hedging the exchange risk on lending and funding activities (principal portion) using year-end spot exchange rates, are classified among "Other assets" and/or "Other liabilities". Contracts hedging investment securities, or total loans and deposits, are valued at cost.

Statement of income: where derivative contracts are intended to hedge the risk of fluctuations in the interest rates on interest-earning / bearing assets and liabilities, the interest margins accrued and the amount paid or collected up-front at the moment of stipulating derivative contracts under terms different to market, will form part of net interest income on an accruals basis. If the derivative contract hedges the risk of market price or exchange fluctuations (principal portion), then the revenues or costs generated (with the exception of the differentials earned) are treated as "Profits (losses) on financial transactions". More specifically, interest margins and earnings on derivative contracts hedging dealing securities are treated as interest, if they relate to multiple-flow contracts (e.g. IRS Interest Rate Swap) or to single-flow contracts where the duration of the underlying asset is less than one year (e.g. FRA Forward Rate Agreement); but as profits (losses) on financial transactions, if they relate to single-flow contracts where the duration of the underlying asset is more than one year (e.g. futures and options).

Non-hedging contracts

These are valued as follows:

Contracts on securities, interest rates, stockmarket indexes and other assets: contracts quoted in organized markets are stated at their market value on the last day of the period. Contracts linked to reference indicators subject to official observation are stated on the basis of their financial value (replacement cost), determined with reference to the market quotations for those indicators on the last day of the period. Other contracts are valued with reference to other elements determined on an objective and consistent basis.

Foreign currency derivatives: these are stated using the forward exchange rates ruling at period-end for the maturity dates of the transactions subject to valuation.

The related procedures for presentation in the financial statements are summarized below:

Balance sheet: the amounts determined from the valuation of non-hedging contracts are classified as "Other assets" or "Other liabilities".

Statement of income: the economic effects of non-hedging derivative contracts are classified as "Profits (losses) on financial transactions". The structure of this caption, according to the sectors of the financial instruments being traded (securities, currency, other financial instruments) and to the nature of income/charges which they generate (valuations or not), is illustrated in a specific table in the explanatory notes.

Internal deals

The Parent Bank and the subsidiary Banca IMI have adopted an organizational structure based on specialized trading desks that have exclusive authorization to deal in specific derivatives. The arrangement is based mainly on the goals of efficiency (lower transaction costs), improved management of market and counterparty risks, and the optimal allocation of specialized human resources. These desks manage portfolios consisting of various types of derivatives and, sometimes, securities and operate within defined limits of net risk.

The desks serve as counterparties to other desks that are not authorized to deal in the market (but which are autonomous from an accounting point of view), by means of internal deals in derivatives at market prices.

With regard to the accounting treatment of internal deals and their effect on income, it should be noted that:

internal deals involving derivatives held in specialized desk portfolios are stated at market value when entered into for dealing/trading purposes;

internal deals involving derivatives held in non-specialized desk portfolios are treated on a basis consistent with the assets or liabilities being hedged (for example, at market value if they hedge listed dealing securities and at cost if they hedge investment securities and/or deposits).

Settlement date

Security and currency and transactions, deposits, interbank operations and the bills portfolio are recorded with reference to their settlement dates.

(8) ADJUSTMENTS AND PROVISIONS RECORDED FOR FISCAL PURPOSES

Art. 7, subsection 1, b) and c) of Decree 2/6/2004 no. 37, has annulled Articles 15, subsection 3 and 39, subsection 2 of Decree 87/92, which allowed banks to "make value adjustments and accruals solely for fiscal purposes".

Following this change in regulation, it is compulsory for the statement of income of the Parent Bank and its subsidiaries, as of December 31, 2004, to disclose the adjustments and provisions made solely for fiscal purposes in prior years. This release has been recorded to extraordinary income.

When preparing the consolidated financial statements, these adjustments and provisions were already subject to reversals in previous years, consequently increasing the net result of the Group. Therefore, the extraordinary income recorded by the Parent Bank and its subsidiaries, in accordance with the new regulation, has been eliminated from the consolidated statement of income to cover the reinstatement of the consolidated equity reserves (see Attachments "Reconciliation between the Bank's financial statements and the consolidated financial statements").

(9) LOANS

The Group's loan portfolio is analyzed below by type of counterparty:

	12/31/04	12/31/03
	(€/mil)	
Due from banks (caption 30)	23,777	22,278
Loans to customers (caption 40) (*)	121,907	124,599
Total	145,684	146,877

(*) The amount includes € 841 million (€ 1,042 million as of December 31, 2003) of loans to Società per la Gestione di Attività S.p.A. (Sga) (see Information contained in Note 17 "Other liabilities"), of which € 814 million (€ 1,013 million as of December 31, 2003) disbursed under Law 588/96.

Due from banks (caption 30)

Amounts due from banks include:

<i>Detail of caption 30 "Due to banks" (Table 1.1 B.I.)</i>	12/31/04	12/31/03
	(€/mil)	
(a) Deposits with central banks	472	514
(b) Bills eligible for refinancing with central banks		
(c) Finance leases		
(d) Repurchase agreements	12,383	10,050
(e) Securities loaned	193	71

Deposits with central banks as of December 31, 2004 include the compulsory reserve of € 374 million with the Bank of Italy and other foreign central banks (€ 422 million as of December 31, 2003).

Loans to customers (caption 40)

Loans to customers, which are analyzed by technical form in the Report on Group Operations, include:

<i>Detail of caption 40 "Loans to customers" (Table 1.2 B.I.)</i>	12/31/04	12/31/03
	(€/mil)	
(a) Bills eligible for refinancing with central banks	1	1
(b) Finance leases	3,657	4,593
(c) Repurchase agreements	2,306	1,669
(d) Securities loaned	502	25

The decrease in the caption "finance leases" refers to the disposal of receivables deriving from leasing contracts in respect of a securitization transaction carried out by Sanpaolo Leasing S.p.A. (Note 19 "Concentration and distribution of assets and liabilities").

Secured loans to customers, excluding those granted directly to Governments or other public entities, are detailed in the table below:

<i>Secured loans to customers (Table 1.3 B.I.)</i>	12/31/04	12/31/03
	(€/mil)	
(a) Mortgages	34,347	33,152
(b) Pledged assets:		
1. cash deposits	347	626
2. securities(*)	4,778	4,017
3. other instruments	413	270
(c) Guarantees given by:		
1. Governments(**)	4,382	5,500
2. other public entities	592	565
3. banks	623	969
4. other operators	18,902	17,106
Total	64,384	62,205

(*)

Includes repurchase and similar agreements guaranteed by underlying securities totaling € 2,808 million compared with € 1,694 million as of December 31, 2003.

(**)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Including € 814 million (€ 1,013 million as of December 31, 2003) of loans to Società per la gestione delle attività S.p.A. (Sga).

F-22

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Loans to customers guaranteed by banks and other operators include € 83 million of positions (€ 99 million as of December 31, 2003) for which the Parent Bank purchased buyer protection against the risk of non-performance, by means of derivative contracts.

Secured loans to customers and those granted directly to Governments or other public entities represent 63.9% of total loans to customers (61.0% as of December 31, 2003).

Degree of risk in loan portfolio

The principal and interest elements of loans are stated at their net carrying amount by applying the policies described in detail in Note 7. The related writedowns are made by reducing the asset value of the loans concerned in the balance sheet.

The net carrying amount of doubtful loans takes into account not only the likelihood of recovery, but also the total or partial lack of income generation and the delay in repayment. Total adjustments for discounting purposes as of December 31, 2004 amount to € 212 million (€ 221 million as of December 31, 2003).

Analysis of loans to customers

Loans to customers for the years ended December 31, 2004 and 2003 are detailed in the tables below:

(Bank of Italy instructions dated 12/17/98)

As of December 31, 2004	Gross exposure	Total adjustments	Net Exposure
	(€/mil)		
A. Doubtful loans	6,625	4,078	2,547
A.1 Non-performing loans	4,619	3,458	1,161
A.2 Problem loans	1,646	526	1,120
A.3 Loans currently being restructured	131	39	92
A.4 Restructured loans	193	44	149
A.5 Unsecured loans exposed to country risk	36	11	25
B. Performing loans	120,453	1,093	119,360
Total loans to customers	127,078	5,171	121,907

Non-performing loans include unsecured loans to residents in nations exposed to risk, for a gross exposure of € 2 million, written-down in full.

(Bank of Italy instructions dated 12/17/98)

As of December 31, 2003	Gross exposure	Total adjustments	Net Exposure
	(€/mil)		
A. Doubtful loans	6,433	3,892	2,541
A.1 Non-performing loans	4,364	3,193	1,171
A.2 Problem loans	1,821	645	1,176
A.3 Loans currently being restructured	24	3	21
A.4 Restructured loans	193	42	151
A.5 Unsecured loans exposed to country risk	31	9	22
B. Performing loans	123,069	1,011	122,058
Total loans to customers	129,502	4,903	124,599

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

As of December 31, 2003, non-performing and problem loans include unsecured loans to residents of nations exposed to risk for a gross exposure of € 4 million and € 13 million, respectively, and which have been written down by € 4 million and € 9 million, respectively.

Analysis of loans to banks

Loans to banks for the years ended December 31, 2004 and 2003 are detailed below:

(Bank of Italy instructions dated 12/17/98)

As of December 31, 2004	Gross exposure	Total adjustments	Net Exposure
	(€/mil)		
A. Doubtful loans	29	10	19
A.1 Non-performing loans	2	2	
A.2 Problem loans	1	1	
A.3 Loans currently being restructured			
A.4 Restructured loans			
A.5 Unsecured loans exposed to country risk	26	7	19
B. Performing loans	23,773	15	23,758
Total loans to banks	23,802	25	23,777

Non-performing and problem loans do not include any loans of a significant amount granted to residents of nations exposed to risk.

(Bank of Italy instructions dated 12/17/98)

As of December 31, 2003	Gross exposure	Total adjustments	Net Exposure
	(€/mil)		
A. Doubtful loans	46	16	30
A.1 Non-performing loans	6	6	
A.2 Problem loans	1	1	
A.3 Loans currently being restructured			
A.4 Restructured loans			
A.5 Unsecured loans exposed to country risk	39	9	30
B. Performing loans	22,259	11	22,248
Total loans to banks	22,305	27	22,278

As of December 31, 2003, non-performing loans include unsecured loans to residents of nations exposed to country risk, held in portfolio by the Parent Bank, for a gross exposure of € 4 million, written down in full.

Non-performing loans (Table 1.4.B.I.)

	12/31/04	12/31/03
	(€/mil)	
Non-performing loans (net amount, including default interest)	1,161	1,171

Movements in doubtful loans to customers

Movements in gross doubtful loans to customers during 2004 were as follows:

<i>(Bank of Italy instructions dated 12/17/98)</i>	Non-performing loans	Problem loans	Loans being restructured	Restructured loans	Unsecured loans exposed to country risk
Description/Categories	(€/mil)				
A Gross value as of January 1, 2004	4,364	1,821	24	193	31
<i>A.1 including: for default interest</i>	789	93	1	1	
B Increases	1,098	1,676	324	254	8
B.1 inflows from performing loans	183	1,249	124	35	
B.2 default interest	124	29	1	1	
B.3 transfers from other categories of doubtful loans	622	153	175	156	
B.4 other increases	169	245	24	62	8
C Decreases	843	1,851	217	254	3
C.1 outflows to performing loans	12	148		39	
C.2 write-offs	311	162		1	
C.3 collections	414	711	25	96	2
C.4 disposals	16	10			
C.5 transfers to other categories of doubtful loans	61	787	178	80	
C.6 other decreases	29	33	14	38	1
D Gross value as of December 31, 2004	4,619	1,646	131	193	36
<i>D.1 including: for default interest</i>	844	78	1		

Other decreases include receivables deriving from the sale of loans completed by subsidiaries for a total sale price of € 26 million, of which € 16 million refer to non-performing loans and € 10 million to problem loans. These receivables are carried in the financial statements for a total gross value of € 112 million (of which € 53 million for non-performing loans, € 59 million for problem loans) and for a total net value of € 48 million (of which € 20 million for non-performing loans and € 28 million for problem loans). Furthermore, these subsidiaries have disposed of performing loans totaling € 28 million (carried in the financial statements for a net value equal to the total gross value). In addition to this is the previously mentioned disposal of receivables in respect of the securitization transaction carried out by Sanpaolo Leasint (see Note 19 "Concentration and distribution of assets and liabilities").

Movements in gross doubtful loans to customers during 2003 were as follows:

<i>(Bank of Italy instructions dated 12/17/98)</i>					
Description/Categories	Non-performing loans	Problem loans	Loans being restructured	Restructured loans	Unsecured loans exposed to country risk
	(€/mil)				
A Gross value as of January 1, 2003	4,294	1,767	35	268	83
<i>A.1 including: for default interest</i>	<i>641</i>	<i>88</i>			
B Increases	1,334	1,778	37	69	
B.1 inflows from performing loans	464	1,387		17	
B.2 default interest	109	36	1		
B.3 transfers from other categories of doubtful loans	554	97	28	37	
B.4 other increases	207	258	8	15	
C Decreases	1,264	1,724	48	144	52
C.1 outflows to performing loans	23	323		38	27
C.2 write-offs	302	137		5	2
C.3 collections	462	674	11	34	21
C.4 disposals	81	1		1	
C.5 transfers to other categories of doubtful loans	64	558	29	65	
C.6 other decreases	332	31	8	1	2
D Gross value as of December 31, 2003	4,364	1,821	24	193	31
<i>D.1 including: for default interest</i>	<i>789</i>	<i>93</i>	<i>1</i>	<i>1</i>	

During 2003, "Other increases" include the balance of € 43 million (composed of € 26 million for non-performing loans and € 17 million for problem loans) relating to Cassa dei Risparmi di Forlì and to Inter-Europa Bank, which were included in the consolidation area during the year.

"Other decreases" include the balance of € 245 million (composed of € 244 million for non-performing loans and € 1 million for loans exposed to country risk) relating to the deconsolidation of Banque Sanpaolo and its subsidiaries Sanpaolo Bail and Sanpaolo Mur, as well as Finconsumo Banca and its subsidiary FC Factor, which were not included in the consolidation area during the year.

"Disposal" relate to the sale of loans completed by subsidiaries for a total sale price of € 83 million, of which € 81 million refer to non-performing loans, € 1 million to problem loans and € 1 million to restructured loans. Those loans were carried in the financial statements for a total gross value of € 241 million (of which € 150 million for non-performing loans, € 90 million for problem loans and € 1 million for restructured loans) and for a total net value of € 90 million (of which € 88 million for non-performing loans, € 1 million for problem loans and € 1 million for restructured loans).

Movements in gross doubtful amounts due from banks

Movements in gross doubtful amounts due from banks during 2004 were as follows:

<i>(Bank of Italy instructions dated 12/17/98)</i>	Non-performing loans	Problem loans	Loans being restructured	Restructured loans	Unsecured loans exposed to country risk
Description/Categories			(€/mil)		
A Gross value as of January 1, 2004	6	1			39

Total adjustments as of December 31, 2004 include € 212 million relating to the adoption of a policy for discounting doubtful loans. More specifically, writedowns for discounting purposes total € 160 million on non-performing loans, € 41 million on problem loans and € 11 million on restructured loans and loans being restructured.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Movements during 2003 in adjustments made to loans granted to customers were as follows:

<i>(Bank of Italy instructions dated 12/17/98)</i> Description/Categories	Non-performing loans	Problem loans	Loans being restructured	Restructured loans	Unsecured loans exposed to country risk	Performing loans
	(€/mil)					
A Total adjustments as of January 1, 2003	2,960	565	4	54	24	993

<i>D.1 including: for default interest</i>	<i>789</i>	<i>93</i>	<i>1</i>	<i>1</i>		<i>19</i>

During 2003, "Other increases" include the balance of € 24 million (composed of € 16 million for nonperforming loans, € 4 million for problem loans and € 4 million for performing loans) relating to Cassa dei Risparmi di Forlì and to Inter-Europa Bank, which were included in the consolidation area during the year.

"Other decreases" include the balance of € 179 million (composed of € 150 million for non-performing loans and € 29 million for performing loans) relating to the deconsolidation of Banque Sanpaolo and its subsidiaries Sanpaolo Bail and Sanpaolo Mur, as well as Finconsumo Banca and its subsidiary FC Factor, which were not included in the consolidation area during the year.

Total adjustments as of December 31, 2003 include € 221 million relating to the Group policy for discounting doubtful loans. More specifically, writedowns for discounting purposes total € 151 million on non-performing loans, € 63 million on problem loans and € 7 million on restructured loans and loans being restructured.

With reference to the more recent situations of default by important industrial groups, the outstanding amounts of loans given to Parmalat Group classified as non-performing loans totaled € 33 million, after a writedown of € 273 million, corresponding to approximately 90% of the gross exposure. The Cirio group loans (gross exposure of € 25 million) have also been classified as non-performing and loans are writedown almost in full.

Movements in adjustments made to loans granted to banks

Movements during 2004 in adjustments made to loans granted to banks were as follows:

During 2003, "Other decreases" in loans exposed to country risk include € 1 million relating to the deconsolidation of Banque Sanpaolo and its subsidiaries Sanpaolo Bail and Sanpaolo Mur, which were not included in the consolidation area during the year.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Loans to customers and banks resident in nations exposed to country risk are analyzed below for the years ended December 31, 2004 and 2003:

Country	Gross exposure as of 12/31/04		
	Total (book value)	including: unsecured	
		book value (€/mil)	weighted value
Brazil	51	30	29
Azerbaijan	37	12	12
Venezuela	13	8	8
Trinidad-Tobago	4	4	4
Argentina	51	3	3
Serbia and Montenegro	2	2	2
Costa Rica	1	1	
Cayman Islands	18		
Lebanon	11		
Dominican Republic	9		
Pakistan	6		
Philippines	4		
Others	4	2	2
Total gross exposure	211	62	60
Total adjustments	18	18	
Net exposures as of 12/31/04	193	44	

For the purposes of these notes, the countries considered are those listed by the Italian Banking Association, for which, in the absence of specific guarantees, general adjustments have been made.

Adjustments to unsecured loans exposed to country risk have been made by applying the weighting criteria and the writedown percentages agreed industry-wide by the Italian Banking Association, as mentioned above. Such writedowns are made to cover all of the losses that might arise from those events that are typical to "country risk".

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Secured loans, amounting to € 149 million are mainly insured by SACE (the Italian export credit agency) or equivalent entities and by guarantees from banking operators in the OECD (Organization for Economic Co-operation and Development) area.

Country	Gross exposure as of 12/31/03		
	Total (book value)	including: unsecured	
		book value	weighted value
		(€/mil)	
Brazil	62	38	38
Venezuela	11	10	10
Russian Federation	261	5	5
Argentina	73	4	3
Algeria	17	2	2
Angola	12	2	2
Serbia and Montenegro	4	2	2
Peru	2	2	2
Philippines	9	2	1
Costa Rica	2	2	
Lebanon	19		
Pakistan	12		
Others	15	1	
Total gross exposure	499	70	65
Total adjustments	18	18	
Net exposures as of 12/31/03	481	52	

Secured loans, amounting € 429 million as of December 31, 2003 are mainly insured by SACE (the Italian export credit agency) or equivalent entities and by guarantees from banking operators in the OECD (Organization for Economic Co-operation and Development) area. In addition, they comprise loans of € 92 million granted by the Parent Bank to a major customer resident in Russia, that are guaranteed by receivables deriving from supply contracts with leading West European companies. This collateral is deemed adequate to cover the credit risk. In compliance with Bank of Italy regulations, these loans are included in the calculation of country risk, which is deducted from the Bank's capital for supervisory purposes.

Other information relating to loans

Information regarding the distribution of loans, by category of borrower, business sector, geographical area, currency and liquidity, is provided in Note 19.

(10) SECURITIES

Securities owned by the Group are analyzed as follows:

	12/31/04	12/31/03
	(€/mil)	
Treasury bills and similar bills eligible for refinancing with central banks (caption 20)	2,553	3,923
Bonds and other debt securities (caption 50)	23,716	18,588
Shares, quotas and other equities (caption 60)	3,021	2,747

	<u>12/31/04</u>	<u>12/31/03</u>
Total	29,290	25,258

F-34

"Treasury bills and similar bills eligible for refinancing with central banks" represent securities which may be used for refinancing purposes on condition that they are not subject to restrictions deriving from other transactions.

Investment securities

Securities recorded in the consolidated financial statements include those which will be held long term by Group companies and declared as such in their financial statements. The investment securities portfolio is analyzed as follows:

<i>Investment securities (Table 2.1 B.1)</i>	12/31/04		12/31/03	
	Book value	Fair value	Book value	Fair value
1. Debt securities				
1.1 Government securities				
quoted	2,088	2,155	2,153	2,216
unquoted	46	58		
1.2 other securities				
quoted	540	546	139	143
unquoted	475	496	585	599
2. Equity securities				
quoted	7	7		
unquoted	63	63	58	58
Total	3,219	3,325	2,935	3,016

The comparison between the market value and book value carried in the financial statements reveals net unrealized gains for the Parent Bank and some subsidiaries, of € 12 million on securities not covered by derivative contracts and of € 94 million on hedged securities. The evaluation of related derivative contracts reveals potential losses for € 82 million (including € 35 million for operations entered into with Group companies operating on financial markets within their brokerage activity).

"Other securities", quoted and unquoted (€ 1,015 million), mainly include securities held by the Parent Bank for € 362 million and by foreign subsidiaries for € 513 million. The remainder refers mainly to investments made by Banca Fideuram S.p.A. and by Sanpaolo Invest SIM S.p.A. in insurance policies issued by Fideuram Vita destined for the financial planner network fidelization program (€ 137 million).

In relation to classification by issuer, the aforementioned € 1,015 million refer to investments in securities in foreign Governments and public entities amounting to € 310 million, while the remaining € 705 million mainly include, in addition to the aforementioned policies (€ 137 million), securities issued by leading companies in the European Union and in other industrialized countries (€ 498 million), as well as International Organizations (€ 70 million).

"Equities" only comprise units in mutual funds mainly included in the investment portfolios of Sanpaolo IMI Private Equity Group S.p.A..

As of December 31, 2003, the difference between the market value and the book value for the Parent Bank and some subsidiaries is an unrealized gain of € 1 million on securities not covered by derivative contracts and € 80 million on hedged securities. The evaluation of related derivative contracts reveals potential losses for € 62 million (including € 30 million for operations entered into with Group companies operating on financial markets within their brokerage activity).

"Other securities", quoted and unquoted (€ 724 million), mainly include securities held by the Parent Bank for € 451 million and by foreign subsidiaries for € 152 million. These securities also include

investments made during the year by Banca Fideuram S.p.A. in insurance policies issued by Fideuram Vita related to a deferred compensation scheme (€ 119 million).

In more detail, the aforementioned € 724 million refer to investments in securities in foreign Governments and public organizations amounting to € 111 million and other investments in securities amounting to € 613 million. Mainly include, in addition to the aforementioned insurance policies (€ 119 million), securities issued by leading companies in the European Union and in other industrialized countries (€ 442 million), particularly the United States and Singapore, as well as International Organizations (€ 72 million).

"Equities" only comprise units in mutual funds mainly included in the investment portfolios of Sanpaolo IMI Private Equity Group.

The following table shows changes in investment securities during 2004:

	(€/mil)
A. Opening balance as of January 1, 2004	2,935
B. Increases	
B1. purchases	120
B2. writebacks	1
B3. transfers from dealing portfolio	383
B4. other changes	21
C. Decreases	
C1. sales	54
C2. redemptions	136
C3. adjustments	4
<i>including:</i>	
<i>long-term writedowns</i>	4
C4. transfers to dealing portfolio	
C5. other changes	47
D. Closing balance as of December 31, 2004	3,219

"Transfers from dealing portfolio" at subcaption B3 refer to transfers by Sanpaolo Bank S.A. in the context of the re-definition of its portfolio following the merger with IMI Bank Lux S.A..

Subcaption B4. "Increases other changes" includes € 3 million exchange gains on securities denominated in foreign currencies and € 3 million profits from dealings.

Subcaption C5. "Decreases other changes" includes € 3 million which refers to the effect of the non-consolidation of Sanpaolo Bank Austria (excluded from the consolidation area during the year) and € 20 million exchange losses on securities denominated in foreign currency.

In addition, subcaptions B4 and C5 also include accrued issue and dealing discounts.

Sales were completed mainly by the Parent Bank and by Sanpaolo Bank S.A. in the context of the redefinition of the investment portfolio following the merger operations.

The "adjustments in value" at subcaption C3, amounting to € 4 million, refer to losses in value of a long-term nature.

The resulting book values are substantially in line with the reimbursements after offsetting the positive (€ 28 million) and negative differences by the same amount.

It should be noted that movements in the investment portfolio are carried out by Group companies on the basis of resolutions passed by the Board of Directors and within the limits set by them.

The following table shows changes in investment securities during 2003:

<i>Changes in investments securities during the year (Table 2.2 B.I.)</i>	<i>(€/mil)</i>
A. Opening balance as of January 1, 2003	2,897
B. Increases	1,464
B1. purchases	1,383
B2. writebacks	2
B3. transfers from dealing portfolio	3
B4. other changes	76
C. Decreases	1,426
C1. sales	510
C2. redemptions	177
C3. adjustments	8
<i>including:</i>	
<i>long-term writedowns</i>	7
C4. transfers to dealing portfolio	80
C5. other changes	651
D. Closing balance as of December 31, 2003	2,935

During 2003 "Transfers from dealing portfolio" at subcaption B3 refer to transfers by a foreign subsidiary.

Subcaption B4. "Increases other changes" includes € 25 million which refers to the effect of the consolidation of the Inter-Europa Bank Group and the Eptaconsors Group (included in the consolidation area during the year), € 14 million exchange gains on securities denominated in foreign currency and € 19 million gains from dealings.

Subcaption C5. "Decreases other changes" includes € 531 million which refers to the effect of the deconsolidation of Banque Sanpaolo and Finconsumo Banca (excluded from the consolidation area during the year), € 91 million exchange losses on securities denominated in foreign currency and € 6 million losses from dealings.

In addition, subcaptions B4 and C5 also include accrued issue and dealing discounts.

Disposals, mainly made by the Parent Bank in the context of the redefinition of investment portfolio following the merger operations concluded in 2002 (€ 399 million), led to the recording of net extraordinary income of € 13 million.

The "adjustments in value" at subcaption C3., of € 8 million, refer mainly to losses in value of a long-term nature (€ 7 million). The writedowns recorded were mainly calculated on the negative trend in the conditions of solvency of borrowers in relation to securities or collaterals. When determining the adjustments, the prices agreed for the securities disposed of at the beginning of 2004 were considered, as well as the prices supplied by the arrangers for the issues remaining in portfolio.

Subcaption C4. "Transfers to dealing portfolio" refers to transfers made by the Parent Bank and by a foreign subsidiary in connection with changes to the local regulatory framework.

The positive net differences between reimbursements and book values (issue and dealing discounts) totaled € 4 million and have been booked to the statement of income on the basis of the accruals principle. More specifically, the Parent Bank and other foreign subsidiaries show positive differences for, respectively, € 3 million and € 1 million.

It should be noted that movements in the investment portfolio are carried out by Group companies on the basis of resolutions passed by the Board of Directors and within the limits set by them.

Dealing securities

These securities, held for treasury and dealing purposes, comprise:

<i>Dealing securities (Table 2.3 B.I.)</i>	12/31/04		12/31/03	
	Book value	Fair value	Book value	Fair value
	(€/mil)			
1. Debt securities				
1.1 Government securities				
quoted	7,870	7,870	9,600	9,600
unquoted	24	24	40	40
1.2 other securities				
quoted	6,102	6,102	3,407	3,409
unquoted	9,124	9,357	6,587	6,608
2. Equities				
quoted	2,621	2,621	2,443	2,448
unquoted	330	330	246	246
Total	26,071	26,304	22,323	22,351

The increase in dealing securities is mainly attributable to Banca IMI, in relation to its trading activities and to Banca OPI, following its subscription to public issue bonds (mainly local authorities and foreign counterparties from the government sector) and entities operating in the financing and realization of public works.

In the reclassified consolidated financial statements, the dealing securities portfolio also includes € 54 million in SANPAOLO IMI S.p.A. shares in the portfolio of the Parent Bank and Banca Fideuram.

As of December 31, 2003, the dealing securities portfolio also included € 34 million in SANPAOLO IMI S.p.A. shares in the portfolio of the Parent Bank.

Gains shown in the table for other quoted debt securities and other quoted equities refer to values quoted on small East European markets characterized by limited liquidity. These gains are not reflected in the statement of income.

The following table shows changes in dealing securities during 2004:

<i>Changes in dealing securities during the year (Table 2.4 B.I.)</i>	(€/mil)
A. Opening balance as of January 1, 2004	22,323

C2. adjustments	89
C3. transfers to investment portfolio	3
C5. other changes	3,235
D. Closing balance as of December 31, 2003	22,323

During 2003, subcaption B4. "Increases other changes" includes € 171 million which refers to the effect of the consolidation of the Eptaconsors Group, the Inter-Europa Bank Group and Cassa dei Risparmi di Forlì (included in the consolidation area during the year).

Subcaption C5. "Decreases other changes" includes € 202 million which refers to the effect of the deconsolidation of Banque Sanpaolo Group (excluded from the consolidation area during the year).

"Transfers from dealing portfolio" include € 179 million of equities reclassified from the investment portfolio in respect of their intended disposal.

Other information relating to securities

The composition of the securities portfolio is analyzed by geographical area, currency and liquidity in Note 19.

(11) INVESTMENTS

Equity investments, reported in asset captions 70 and 80 of the balance sheet, are analyzed as follows:

	12/31/04	12/31/03
	(€/mil)	
Equity investments (caption 70)	3,421	3,442
Investments in Group companies (caption 80)	1,082	1,130

Notes to the table significant investments:

- (*)
- Type of relationship:
- 1 = control ex Art. 2359 Italian Civil Code, subsection 1, no. 1: majority of voting rights in the ordinary meeting.
 - 2 = control ex Art. 2359 Italian Civil Code, subsection 1, no. 2: dominating influence in the ordinary meeting.
 - 3 = control ex Art. 2359 Italian Civil Code, subsection 2, no. 1: agreements with other partners.
 - 4 = other forms of control.
 - 5 = single leadership ex Art. 26, subsection 1 of Decree 87/92.
 - 6

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

= single leadership ex Art. 26, subsection 2 of Decree 87/92.

7

= joint control ex Art. 35, subsection 1 of Decree 87/92.

8

= associated company ex Art. 36, subsection 1 of Decree 87/92: company over which "significant influence" is exercised, which is assumed to exist when at least 20% of the voting rights in the ordinary meeting are held.

(**)

Shareholders' equity for consolidated companies corresponds to that used for the consolidation procedures. It also includes income for the year before distribution of dividends (net of any interim dividends).

(***)

The list does not include investments of Isveimer S.p.A. (in liquidation) and Società per la gestione di attività S.p.A. (Sga), given the particular characteristics of the respective interest held (see Note 17 "Other liabilities").

(A)

The company was transferred from the Parent Bank to Sanpaolo IMI Internazionale in February 2004.

(B)

Following the merger by incorporation of Invesp S.p.A., the Parent Bank acquired a further quota of 9.28%.

(C)

Lease transactions are shown in the financial statements according to the financial lease method.

(D)

The company is now controlled by Sanpaolo Bank S.A., following the merger of IMI Bank (Lux) S.A. in September 2004.

(E)

The company was set-up in January 2004.

(F)

The Parent Bank acquired direct control of the company following the merger by incorporation of IMI Bank (Lux) S.A. and the spin off of Sanpaolo IMI WM S.p.A..

(G)

In September 2004 the company merged IMI Bank (Lux) S.A..

(H)

The company is now controlled by Sanpaolo IMI Asset Management S.g.r. S.p.A. following the spin off of Sanpaolo IMI WM S.p.A. in December 2004.

(I)

In April 2004 the company merged Eptafund S.g.r. p.a..

(J)

Following the spin off of Sanpaolo IMI WM S.p.A., the Parent Bank purchased direct control of the company.

(K)

In January 2004 the Parent Bank purchased direct control of the company.

(L)

The company is jointly controlled with Santander Central Hispano S.A..

(M)

In December 2004 the company merged Fideuram Vita S.p.A. and Sanpaolo Vita S.p.A.. The valuation has been made on the basis of the consolidated financial statements prepared by the company in which the investment is held.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

- (N) The company is now controlled by Sanpaolo IMI Asset Management S.g.r. S.p.A. following the spin off of Sanpaolo IMI WM S.p.A. in December 2004.
- (O) The book value is included in the valuation in net equity of the holding company.
- (P) In March 2004 the company was sold to Fideuram Vita S.p.A. by Banca Fideuram S.p.A. (subsequently merged into A.I.P. S.p.A.).
- (Q) Following the merger by incorporation of Invesp S.p.A., the Parent Bank acquired direct control of the company.
- (R) The company's book value reflects the estimated realizable value according to the stage of completion of the liquidation process.
- (S) Shareholders' equity refers to the financial statements as of December 31, 2003.
- (T) In December 2004 the company was sold to GEST Line S.p.A. by Banca Popolare dell'Adriatico S.p.A..
- (U) Represents the sum of the book values of shareholdings under 500,000 euro.
- (V) The valuation has been made on the basis of the consolidated financial statements prepared by the company in which the investment is held.
- (W) The valuation has been made on the basis of the consolidated financial statements as of September 30, 2004 prepared by the company in which the investment is held.
- (X) In the 2003 financial statements the company was included in the consolidation area using the proportional method and recorded among "Investments carried at equity other" for intangibility. The valuation has been made on the basis of the consolidated financial statements prepared by the company in which the investment is held.
- (Y) The investment, controlled by Centradia Group Ltd, is not included among "Investments carried at equity subsidiaries" as the holding company is jointly controlled.
- (Z) The company was purchased in January 2004.
- (AA) The investment controlled by Banka Koper d.d. is not included among "Investments carried at equity subsidiaries" as the holding company Banka Koper is included in consolidation using the proportional method.
- (BB) The company was included among "Investments carried at equity other" in respect of the parasocial contracts which allow the Sanpaolo IMI Group to exercise significant interest. The valuation has been made on the basis of the consolidated financial statements prepared by the company in which the investment is held.
- (CC) The Parent Bank now holds an interest in the company, following the merger of Invesp S.p.A. in December 2004.
- (DD) In December 2004 the company was sold to GEST Line S.p.A. by Friulcassa S.p.A..
- (EE) Shareholders' equity refers to the financial statements as of June 30, 2004.
- (FF) The company holds 51% of Fidis Retail Italia.
- (GG) The investment refers to the IMI-SIR dispute illustrated in Note 13 "Other assets"
- (HH)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The company was sold by the Parent Bank to GEST Line S.p.A. in December 2004.

(II)

In relation to the equity deficit of the company, acquired as part of the restructuring of that group, it is expected that the company's equity deficit should be offset on completion of the debt restructuring, which entails the shareholder banks waiving their receivables.

Notes to the table significant investments:

- (*) Type of relationship:
- 1 = control ex Art. 2359 Italian Civil Code, subsection 1, no. 1: majority of voting rights in the ordinary meeting.
 - 2 = control ex Art. 2359 Italian Civil Code, subsection 1, no. 2: dominating influence in the ordinary meeting.
 - 3 = control ex Art. 2359 Italian Civil Code, subsection 2, no. 1: agreements with other partners.
 - 4 = other forms of control.
 - 5 = joint control ex Art. 35, subsection 1 of Decree 87/92.
 - 6 = associated company ex Art. 36, subsection 1 of Decree 87/92: company over which "significant influence" is exercised, which is assumed to exist when at least 20% of the voting rights in the ordinary meeting are held.

(**) Shareholders' equity for consolidated companies corresponds to that used for the consolidation procedures. It also includes income for the year before distribution of dividends (net of any interim dividends).

(***) The list does not include investments of Isveimer S.p.A. (in liquidation) and Società per la gestione di attività S.p.A. (Sga), given the particular characteristics of the respective interest held (see Note 17 "Other liabilities").

(A) The company was transferred from the Parent Bank to Sanpaolo IMI Internazionale in February 2004.

(B)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In July 2003 the company merged by incorporation Fideuram Capital SIM S.p.A. and was beneficiary of the transfer of the business branch of Banca Sanpaolo Invest S.p.A. (now Sanpaolo Invest SIM S.p.A.).

- (C) Lease transactions are shown in the financial statements according to the financial lease method.
- (D) Complete control of the company was acquired following the Public Offer concluded in June 2003.
- (E) In June 2003 the company merged Banca Agricola di Cerea S.p.A..
- (F) The company became part of the Sanpaolo IMI Group following the purchase of control over Eptaconsors S.p.A. later merged with Invesp S.p.A..
- (G) The company became part of the Sanpaolo IMI Group following the purchase of control over Inter Europa Bank Rt. in April 2003.
- (H) In July 2003 the company merged Fideuram Gestioni Patrimoniali SIM S.p.A..
- (I) The company was formed from the merger in December 2003 between Cassa di Risparmio di Udine e Pordenone S.p.A. and Cassa di Risparmio di Gorizia S.p.A..
- (J) In October 2003 the company merged Sanpaolo Riscossioni Genova S.p.A., Sanpaolo Riscossioni Prato S.p.A. and Ge.Ri.Co. S.p.A. thereby concentrating the Group's tax collection activities. The company was beneficiary of the transfer by the Parent Bank of the stake in Esatri S.p.A..
- (K) In April 2003 the company was transferred from the Parent Bank to Sanpaolo IMI Internazionale S.p.A. and also became part of Sanpaolo IMI Group in the same month, following the conclusion of the Public Offer launched in March 2003.
- (L) In December 2003 the company merged Eptaconsors S.p.A., Eptasim S.p.A. and Rsp S.r.l..
- (M) In the consolidated financial statements for 2002, the company was included among "Investments carried at equity subsidiaries".
- (N) In the third quarter of 2003, the newly formed company was beneficiary of the business branch represented by the Southern Territorial Direction of the Parent Bank.
- (O) In January 2003 the Parent Bank purchased direct control of the company by subscribing to the increase in share capital.
- (P) In October 2003 the company merged Eptafid S.p.A..
- (Q) In January 2004 the Parent Bank purchased direct control of the company.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

- (R) In April 2003, the Parent Bank transferred to the company the shareholding held in Inter-Europa Bank Rt. The company is also beneficiary of the transfer of minority shareholdings in banks operating in Central Eastern Europe and the Mediterranean.
- (S) In July 2003 the company was sold to Banca Fideuram S.p.A. by Sanpaolo Invest SIM S.p.A..
- (T) In July 2003 the business branch of the company was the object of a spin off to Banca Fideuram S.p.A..
- (U) This company, which was among "Investments carried at equity other" in the 2002 consolidated financial statements, has been included in the area of proportional consolidation in respect of agreements with Cassa di Risparmio di Firenze and Fondazione Cariforli.
- (V) The company was sold by the Parent Bank to Banca IMI S.p.A. in December 2003.
- (W) The book value is included in the valuation in net equity of the holding company.
- (X) The company was established in the second half of 2003.
- (Y) The company was sold to the Parent Bank by FIN.OPI S.p.A. in December 2003. The company is beneficiary of the spin off of the real estate business branch of the Parent Bank. In the consolidated financial statements the company is carried at net equity, adjusted to reflect the reversal of the capital gains of infra Group transactions.
- (Z) The company has been excluded from the line by line area of consolidation following the reduction in activities.
- (AA) In December 2003 the Group purchased control of the company also through the subsidiary Sanpaolo Vita S.p.A..
- (BB) In October 2003 the company merged Brokerban S.p.A..
- (CC) The valuation has been made on the basis of the consolidated financial statements prepared by the company in which the investment is held.
- (DD) Equity investment acquired in the second half of 2003.
- (EE) The company's book value reflects the estimated realizable value according to the stage of completion of the liquidation process.
- (FF) The company has been excluded from the line by line area of consolidation as it has been put into liquidation.
- (GG) The company was cancelled from the Register of Companies in January 2004. (HH) Represents the sum of the book values of shareholdings under € 500,000. (II) Shareholders' equity refers to the financial statements as of June 30, 2003. (JJ) Equity investment acquired in the first half of 2003.
- (KK) The company, which was consolidated on a line by line basis in the 2002 financial statements, has been included among "Investments carried at equity other" having successfully concluded the disposal of 60% of the company to Caisse Nationale des Caisses d'Epargne.
- (LL) The valuation has been made on the basis of the consolidated financial statements as of September 30, 2003 prepared by the company in which the investment is held.
- (MM) The investment was transferred by the Parent Bank to Gest Line S.p.A. in December 2003.
- (NN) The company, which was included in the proportional area of consolidation in the 2002 financial statements, has been included among "Investments carried at equity other" having successfully concluded the disposal of 20% of the company to Santander Central Hispano; In January 2004 the disposal of the remaining 30% was completed.
- (OO)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Shareholders' equity refers to the financial statements as of December 31, 2002.

(PP)

The company, which was consolidated on a line by line basis in the 2002 financial statements, has been included among "Investments carried at equity - other" having successfully concluded in November 2003 the disposal of 80% of the company to Centrobanca.

(QQ)

The investment controlled by Banka Koper d.d. is not included among "Investments carried at equity - subsidiaries" as the holding company Banka Koper is included in consolidation using the proportional method.

(RR)

The company was included among "Investments carried at equity - other" in respect of the parasocial contracts which allow the Sanpaolo IMI Group to exercise significant interest in the management of the company.

(SS)

The investment was purchased in the first half of 2003. The company holds 51% of Fidis Retail Italia.

(TT)

The investment refers to the IMI-SIR dispute illustrated in Note 13 "Other assets".

(UU)

In relation to the equity deficit of the company, acquired as part of the restructuring of that group, it is expected that the company's equity deficit should be offset on completion of the debt restructuring, which entails the shareholder banks waiving their receivables.

(VV)

The financial data refers to the financial statements in liquidation as of October 31, 2003.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Among the remaining investments held by the Group the most significant are listed below by amount invested (book value equal to or higher than € 2.5 million):

As of December 2004, the main characteristics of the commitments and options on significant investments are provided below:

the Cassa dei Risparmi di Forlì share purchase agreement of November 29, 2000, between Fondazione CR Forlì (seller) and SANPAOLO IMI and Cassa di Risparmio di Firenze (purchasers), provides that the purchasers shall grant Fondazione an option to sell ordinary shares representing not more than 51.35% of the share capital of CR Forlì, to be exercised in a number of tranches, at a unit price of € 8.11 per share for the first two tranches and at a price determined according to the "fair market value" for the last tranches. The put option may be exercised by Fondazione at any time between June 12, 2002 and the 15th day before the expiry of the first period for notice of termination of the Consortium Agreement drawn up between the same parties (December 31, 2008). On May 12, 2003 Fondazione CR Forlì exercised the first tranche of the put option on 8,335,370 shares (equal to 8.75% of the share capital), for a price of € 68 million for the quota attributable to SANPAOLO IMI. After acquisition, the investment held by SANPAOLO IMI rose to 29.77%. The option on the portion of share capital still held by Fondazione, involved the booking of € 174 million to commitments for the "put options issued";

the agreement between the Parent Bank and the majority shareholders of Banka Koper, aimed at purchasing a controlling investment in the company, provides that, in the event the Public Offering in March 2002 for the entire share capital of the company is successful, SANPAOLO IMI guarantees the leading shareholders a put option on their shares which were not contributed in the Public Offering. Such entitlement is also extended to each shareholder which

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

contributed at least one share to the Public Offering. Each shareholder may exercise the put option during the 30 days after March 31, June 30, September 30, and December 31, of each year, commencing from the 30 days after December 31, 2002 and up to the 30th day after June 30, 2006. The price is equal to that of the Public Offering, plus interest calculated on the rate paid by Banka Koper 'one year and one day' deposits in Slovenian Tolar, for the period extending from the last effective day of the Public Offering, to the day on which the put option is exercised and is reduced by the dividends collected on such shares. This transaction involved the booking of € 83 million to "commitments for put options issued", such amount being the equivalent of 33.79% of the share capital;

in the context of the agreement concluded on November 15, 1999 between Ente Cassa di Risparmio di Firenze and SANPAOLO IMI for the acquisition of a 15% stake in Cassa di Risparmio di Firenze, a right of pre-emption at "fair price" was granted to SANPAOLO IMI, in the event that Ente CR Firenze transfers CR Firenze shares. The agreement also provided that, in the event that SANPAOLO IMI should not exercise its pre-emption right, the shares involved, representing a total of around 10.8% of CRF share capital, may be offered on sale to third parties at the same "fair price". In the event of an unsuccessful sale to third parties, Ente CRF is entitled to offer the shares on sale to the Bank, who is obliged to purchase them at a price equal to the arithmetical average of the official stockmarket prices over the previous three months, increased by 50%, on the condition that the average daily volume of dealings in the shares is equal to € 3 million (under this assumption, the amount as of December, 31, 2004 is estimated at approximately € 296 million, while the amount as of December 31, 2003 was € 238 million). If, however, the average daily volume of dealings in the shares is less than € 3 million, the price will be determined according to the best technical valuation of the sector. Considering that the conditions under which the Bank is obliged to purchase in the event of an unsuccessful sale to third parties by Ente CRF and that the Bank has not yet expressed its willingness to exercise its pre-emption rights, no amount for commitments has been recorded to the financial statements;

in the context of the agreement concluded on July 16, 2003 between SANPAOLO IMI and the Fondazioni shareholders of Banca delle Marche, which led to the take over of 7% of the share capital in the latter bank, SANPAOLO IMI granted to the Fondazioni a put option on 8% of the bank's capital, exercisable before 12/31/06. The unit price for exercising the put option shall equal the greater amount of: (i) € 1.8, plus the one-month Euribor rate (365 day basis) from the date of execution of the contract to the date on which the put option is exercised, less the dividends collected by Fondazioni in the same period and, (ii) € 1.8 plus any increase in net equity of each Banca delle Marche share from 12/31/02 to the date on which the put option is exercised, on the basis of the latest financial statements or the half year report, whichever is most recent. This transaction involved the booking of € 107 million to "commitments for put options issued".

In the context of the parasocial contracts valid up to 12/31/06, which may be extended on agreement between the parties, SANPAOLO IMI has a pre-emptive right to purchase the remaining shares which Fondazioni may decide to sell, with the exception of limited assumptions, and the right to co-sell (at a price not lower than that paid) if the pre-emptive right is not exercised.

Detail of the above commitments, where recorded to the financial statements, is provided in the memorandum accounts (caption 20 Guarantees and Commitments), in the Explanatory Notes, in the table on forward transactions (Table 10.5 B.I. "Other transactions") and in the supplementary information requested by the Basel Committee on Banking Supervision and the International Organization of Securities Commissions (IOSCO).

Changes during the year in the investment portfolio

The following table shows the changes during 2004 in the investment portfolio:

<i>Investments in Group companies (Table 3.6.1 B.I.)</i>	(€/mil)
A. Opening balance as of January 1, 2004	1,130
B. Increases	
B1. purchases	1
B2. writebacks	
B3. revaluations	
B4. other changes	214
C. Decreases	
C1. sales	226
C2. adjustments	18
including:	
long-term writedowns	
C3. other changes	19
D. Closing balance as of December 31, 2004	1,082
E. Total revaluations	69
F. Total adjustments	871

Subcaption B1. "Purchases" refers to the payment to share capital of € 1 million to cover prior year losses incurred by Obiettivo Sgr S.p.A.

Subcaption B4. "Other changes" includes:

increases in subsidiaries valued according to the net equity method (€ 145 million), substantially reflect the income from the net valuation of dividends distributed;

the book value of Sanpaolo Bank (Austria) A.G. (€ 14 million) valued for the first time at equity and no longer consolidated on a line by line basis;

profits of € 51 million and € 3 million earned from the disposal of, respectively, CSP Investimenti S.r.l. and Sanpaolo Bank (Austria) A.G.

Subcaption C1. "Sales" reflect the disposal of shares held in Sanpaolo Bank (Austria) A.G. for € 17 million and CSP Investimenti S.r.l. for € 208 million.

Subcaption C2. "Adjustments" refers to the writedown of € 18 million to the investment in 3G Mobile Investments S.A. by IMI Investimenti (see Note 25 "Adjustments, writebacks and provisions").

Subcaption C3. "Other adjustments" includes decreases in subsidiaries valued according to the net equity method (€ 4 million) as well as from the merger by incorporation of Obiettivo Sgr S.p.A. in Sanpaolo IMI Alternative Investments S.p.A. (€ 3 million).

The following table shows the changes during 2003 in the investment portfolio:

<i>Investments in Group companies (Table 3.6.1B.1.)</i>	(€/mil)
A. Opening balance as of January 1, 2003	840
B. Increases	
B1. purchases	93
B2. writebacks	
B3. revaluations

C1. sales	2
C2. adjustments	30
including:	
long-term writedowns	30
C3. other changes	29
D. Closing balance as of December 31, 2003	1,130
E. Total revaluations	69
F. Total adjustments	853

Subcaption B1. "Purchases" reflects the payments during the year to the share capital of Sanpaolo Vita S.p.A. (€ 60 million) and to Fideuram Vita S.p.A. (€ 31 million). Furthermore, this caption includes a total of € 2 million for investments made during the year for the formation of Consumer Financial Services S.r.l..

Subcaption B4. "Other changes" includes the transfer of the real estate branch of the Parent Bank to the subsidiary CSP Investimenti S.r.l. (€ 160 million), as well as the increase in value of subsidiary companies valued according to the equity method (€ 79 million). This subcaption also reflects the € 15 million transfer of the shareholding in Noricum Vita S.p.A. from "Other changes" to the aggregate in question.

Subcaption C1. "Sales" reflects the sale price of IMIWeb (UK) Limited (€ 2 million).

Subcaption C2. "Adjustments" refers to the write down of the investment in 3G Mobile Investments S.A. by IMI Investimenti (€ 30 million) (see Note 25 "Adjustments, writebacks and provisions").

Subcaption C3. "Other changes" reflects the decrease (€ 12 million) following the line by line consolidation of Sanpaolo IMI Internazionale S.p.A. and NHS Mezzogiorno SGR S.p.A.. This subcaption also includes decreases in a number of subsidiaries valued according to the net equity method (€ 8 million) and the exit of the subsidiaries controlled by Banque Sanpaolo S.A. (€ 5 million) from the consolidation area following the disposal of the controlling stake in the bank (60%).

The following table shows the changes during 2004 in other equity investments:

<i>Other equity investments (Table 3.6.2 B.I.)</i>	(€/mil)
A. Opening balance as of January 1, 2004	3,442
B. Increases	
B1. purchases	31
B2. writebacks	123
B3. revaluations	
B4. other changes	402
C. Decreases	
C1. sales	165
C2. Adjustments	60
including:	
long-term writedowns	10
C3. other changes	352
D. Closing balance as of December 31, 2004	3,421
E. Total revaluations	245
F. Total adjustments	1,046

Subcaption B1. "Purchases" includes:

investments made by Banca OPI S.p.A. and by its subsidiary FIN.OPI S.p.A. in AEM Torino S.p.A. (€ 17 million), in Rimini Fiera S.p.A. (€ 2 million), in Hera S.p.A. (€ 1 million) and in Henderson PFI Secondary Fund (€ 1 million);

the increases in capital subscribed by Ldv Holding Bv in Convergenza S.c.a. (€ 3 million), by FIN.OPI S.p.A. in Transdev S.A. (€ 1 million) and by Sanpaolo IMI Internazionale S.p.A. in Biat S.A.(€ 1 million);

payment of € 2 million to the share capital of Synesis Finanziaria S.p.A. by IMI Investimenti S.p.A..

Subcaption B2. "Writebacks" refers mainly to writebacks made by the Parent Bank and by Sanpaolo IMI International S.A. in Santander Central Hispano S.A. for € 122 million. (see Note 25 "Adjustments, writebacks and provisions").

Subcaption B4. "Other changes" includes:

profits for € 75 million realized from the sale of investments, of which € 67 million from the Parent Bank's disposal of shares held in Finconsumo Banca S.p.A. (€ 55 million), in HDI Assicurazioni S.p.A. (€ 5 million), in Mostra d'Oltremare (€ 3 million), in CRIF S.p.A. (€ 2 million), in Meliorbanca S.p.A. (€ 2 million), € 4 million from the disposal by IMI Investimenti of shares in Serene S.p.A. and € 2 million from the disposal by Friulcassa S.p.A. and Cariparo S.p.A. of shares held in Acegas-APS S.p.A.;

the book value of the € 4 million shareholding in Centradia Group Ltd valued for the first time at net equity and no longer consolidated proportionally;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

the shareholdings in IXIS Asset Management Group S.A. for € 192 million and in IXIS Corporate & Investment Bank S.A. for € 86 million, received following the repositioning of the CDC Ixis investment;

increases in non-subsiary companies valued according to the net equity method (€ 44 million), substantially reflect the income from the net valuation of dividends distributed.

F-71

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Subcaption C1 "Sales" refers to:

the disposal by the Parent Bank of the shareholding in Finconsumo Banca S.p.A. for € 80 million, in HDI Assicurazioni S.p.A. for € 47 million, in Mostra d'Oltremare for € 3 million, in Unipol S.p.A. for € 3 million, in Meliorbanca for € 2 million and in Crif S.p.A. for € 2 million;

the disposal by IMI Investimenti S.p.A. of its shareholding in Serene S.p.A. for € 5 million;

the disposal by FIN.OPI S.p.A. of a portion of its shareholding in Sinloc S.p.A. for € 10 million and of the shareholding in Immobiliare Colonna '92 S.r.l. for € 2 million;

the disposal by Friulcassa S.p.A. and Cariparo S.p.A. of shares held in Acegas-APS S.p.A. for € 5 million.

Subcaption C2. "Adjustments" mainly reflects writedowns made by NHS Investments S.A. and IMI Investimenti S.p.A. in Hutchinson 3G Italia S.p.A. for € 43 million and by IMI Investimenti S.p.A. in Fiat S.p.A. for € 5 million. Detail of other adjustments is provided in Note 25 "Adjustments, writebacks and provisions".

Subcaption C3. "Other changes" includes:

the decrease equal to the value of the transferred shareholding in CDC Ixis for € 277 million against the investments in IXIS Asset Management Group S.A. and IXIS Corporate & Investment Bank S.A.;

the € 50 million loss from the transfer of the investment in CDC Ixis to the company vehicles IXIS Asset Management Group S.A. and Ixis Corporate Investment Bank in which the Parent Bank repositioned the investment;

the € 16 million decrease in value of companies valued using the equity method;

reimbursements of capital for € 8 million made by some companies.

The following table shows the changes during 2003 in other equity investments:

F. Total adjustments	1,155
-----------------------------	--------------

Subcaption B1. "Purchases" includes the investments made by the Parent Bank and by other Group companies in Synesis Finanziaria S.p.A. (€ 93 million), Banca delle Marche S.p.A. (€ 92 million), Edison S.p.A. (€ 66 million), Hera S.p.A. (€ 10 million), Galaxy S. a r.l. (€ 5 million) and Attività Finanziarie Merlo S.p.A. (€ 5 million), as well as the private equity investments in Carpine S.p.A.

F-72

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

(€ 10 million) and Aeroporti Holding S.r.l. (€ 6 million) by the subsidiary Sanpaolo IMI Private Equity S.p.A.. Also included are increases in capital subscribed by the Group and increases in shareholdings in Fiat S.p.A. (€ 27 million), Compagnia Assicuratrice Unipol S.p.A. (€ 27 million), Borsa Italiana S.p.A. (€ 12 million), AEM Torino S.p.A. (€ 10 million), Banca Popolare di Lodi S.c.r.l. (€ 6 million), CDC Ixis S.A. (€ 5 million), Banco del Desarrollo S.A. (€ 4 million) and Noricum Vita S.p.A. (€ 4 million).

Subcaption B2. "Writebacks" refers mainly to writebacks made by the Parent Bank and by Sanpaolo IMI International S.A. in Santander Central Hispano S.A. (€ 215 million).

Subcaption B4. "Other increases" includes:

the book value of the shares held in Banque Sanpaolo S.A. (€ 173 million), Finconsumo Banca S.p.A. (€ 25 million) and IW Bank S.p.A. (€ 1 million), valued for the first time at equity and no longer consolidated line by line or proportionally;

profits (€ 54 million) realized from the sale of investments, of which € 9 million refer to the sale by IMI Investimenti S.p.A. of shares in Edison S.p.A., € 7 million to the disposal of shares held by the Parent Bank and by Invesp S.p.A. in Intesa Holding Asset Management S.p.A., € 6 million for the disposal by Invesp S.p.A. of Beni Stabili S.p.A. shares, € 5 million for the disposal by Friulcassa S.p.A. of shares in Cedacri S.p.A., € 3 million for the disposal by the Parent Bank of shares in Meliorbanca S.p.A., and € 15 million profit earned from the merchant banking activities of Ldv Holding BV;

the € 32 million increase in value of companies valued using the equity method;

the book value of portfolio investments of companies included in consolidation during the year for the first time, especially the Inter-Europa Bank Rt Group. (€ 2 million) and Cassa dei Risparmi di Forlì (€ 2 million).

Subcaption C1. "Sales" refers to:

the disposal by IMI Investimenti of the shareholding in Edison S.p.A. for € 33 million, Enel S.p.A. for € 14 million, Eni S.p.A. for € 8 million and Acea S.p.A. for € 1 million;

the disposal by Ldv Holding Bv of the shareholding in Amps S.p.A. for € 44 million and in Wire Industries S.p.A. for € 6 million;

the disposal by IMI Investimenti S.p.A. and Invesp S.p.A. of the shareholding in Olivetti S.p.A. for € 29 million;

the disposal by the Parent Bank and IMI Investimenti S.p.A. of the shareholding in Banca Popolare di Lodi S.c.r.l. for € 25 million;

the disposal by the Parent Bank and by Invesp S.p.A. of the shareholding in Beni Stabili S.p.A. for € 24 million and Intesa Holding Asset Management S.p.A. for € 8 million;

the disposal by Sanpaolo IMI Private Equity S.p.A. of its shareholding in Spinner Global Technology Fund Ltd for € 8 million;

the disposal by Friulcassa S.p.A. of its shareholding in Cedacri S.p.A. for € 7 million;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

the disposal by the Parent Bank of the shareholding in Adriavita S.p.A. for € 5 million and in Meliorbanca S.p.A. for € 4 million;

the disposal by Invesp S.p.A. of its shareholding in CBI Factor S.p.A. for € 3 million.

Subcaption C2. "Adjustments" mainly reflects the writedown by NHS Investments S.A. of the investment in Hutchinson 3G Italia S.p.A. (€ 75 million), by IMI Investimenti S.p.A. in Fiat S.p.A. (€ 12 million) and by the Parent Bank and Sanpaolo IMI Internazionale S.p.A. in Kredyt Bank S.A.

F-73

(€ 11 million). (Detail of other adjustments is provided in Note 25 "Adjustments, writebacks and provisions").

Subcaption C3. "Other decreases" includes:

the transfer to dealing securities portfolio for the negotiation of the investments in Eni S.p.A. for € 100 million, Edison S.p.A. for € 39 million, Fiat S.p.A. for € 37 million, Zwahlen & Mair S.A. for € 2 million, and Euroclear Ltd for € 1 million;

the book values of investments in Cassa dei Risparmi di Forlì S.p.A. (€ 45 million), Eptaconsors S.p.A. (€ 32 million) and Inter-Europa Bank Rt (€ 8 million), following their first time inclusion in consolidation according to the line by line or proportional method;

the value of the companies held by Banque Sanpaolo S.A. (€ 28 million), excluded from the consolidation area, following the sale of the controlling stake in the bank (60%);

the € 19 million decrease in value of companies valued using the equity method;

the book value of the shares in Noricum Vita S.p.A. (€ 15 million) following its passage among controlling shares.

Amounts due to and from Group companies and investments (non-Group companies)

Amounts due to and from Group companies, as established in art. 4 of D.Lgs. 87/92, as well as subsidiaries and affiliated companies (non-Group companies), are analyzed in the following tables:

<i>Amounts due to and from Group companies (Table 3.2 B.I.)</i>	12/31/04	12/31/03
(a) Assets		
1. due from banks		
of which:		
subordinated

F. Total adjustments	2,904
(a) accumulated depreciation	2,900
(b) long-term writedowns	4

At the time of approval of the 2003 financial statements, Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Friulcassa and Banca Popolare dell'Adriatico took advantage of the possibility to reevaluate the company assets booked to the 2002 financial statements, in accordance with subsections 25 and 27 of Art. 2, of Law 350 dated 12/24/2003 (2004 Financial Law), which reopened the terms provided for by the original law 342/2000 (Art. 10-16).

This revaluation, which provides for the payment of a substitute tax in place of Corporate Income Tax and the Regional Tax on Business equal to 19% on gains relating to amortizable assets and 15% on gains relating to non-amortizable assets, was applied to those assets owned but not used by the company (instrumental and non-instrumental).

The criteria chosen to determine the maximum limit of the value of revaluation was the "market value", established by recent appraisals carried out by external companies and specialists (who applied a reduction in value of 17.5% to the so called "disposal packs") and also taking into account, as a precautionary measure, any minor realizable value of assets subject to purchase offers.

The balance of the revaluation, net of the relevant substitute tax, has been accrued to a specific net equity reserve subject to taxation. Altogether the assets were revalued by € 65 million, the substitute tax totaled € 11 million, and the resulting difference of 54 million has been accrued to a revaluation reserve (see note 16).

The other increases refer mainly to the changes in the area of consolidation during the year.

The other decreases refer mainly to the effect of the deconsolidation of Banque Sanpaolo and its subsidiaries (€ 105 million), as well as the transfer of non-operating assets of the Parent Bank to the subsidiary CSP Investimenti S.r.l., a subsidiary company valued according to the equity method. This transfer was completed on December 31, 2003 and includes the business branch composed of property considered not to be functional for the activities of the Parent Bank. This operation resulted in the disposal of a number of premises in over 100 buildings with a net book value of € 149 million. Among the properties included in the transfer of the business branch were 9 buildings, for a depreciable value of € 7 million, being historical buildings they are bound by law 1089/1939 and as such, subject to

regulations provided by Law Decree 490/1999. In accordance with this legislation, the effectiveness of the transfer has been suspended pending the expiry of the pre-emptive rights of the State, in March 2004. In consideration of the aforementioned encumbrance, the property was kept in the financial statements of the Parent Bank as of December 31, 2003.

Intangible fixed assets (caption 110)

Intangible fixed assets comprise:

	12/31/04	12/31/03
Goodwill	6	7
Software in use	191	201
Software not yet in use	41	73
Other deferred charges	51	62
Total	289	343

The caption "software in use" refers to purchases of new packages for integrating the operating network procedures.

Amounts recorded to the caption "software not yet in use" relate to changes interventions to develop programs mainly ordered from third parties and not yet completed.

Other "Deferred charges" include:

€ 36 million (€ 49million as of December 31, 2003) for leasehold property improvements;

€ 1 million (€ 2 million as of December 31, 2003) for start-up and expansion costs.

The following table shows the changes in intangible fixed assets during 2004.

Amounts in transit with branches and subsidiaries(1)	925	1,416
Reimbursement of the incentive pursuant to the Legge Ciampi suspended	200	200
Loans to Carlyle Group(4)	155	
Deposit with the Bank of Italy relating to the liquidation of Isveimer(5)	58	58
Deposit with the Bank of Italy relating to the coverage of Sga's losses(5)	7	
Other(6)	1,559	1,317
Total	23,597	17,986

- (1) The amounts were mostly settled at the beginning of the new financial year.
- (2) The credit refers to the payment to the State of an amount equal to 1.5% of the sums declared in the F24 tax return for the year 2003 and performed at the closing of the year 2004.
- (3) See Note 15 "Provisions".
- (4) This item refers to the amount owed by the Carlyle Group for the extension granted for the payment of 50% of the price for the trading, in 2004, of 100% of the shares in CSP Investimenti Srl, as well as some property. These amounts are accompanied by on demand bank guarantees.
- (5) See Note 17 "Other Liabilities".
- (6) "Other" includes the estimated realizable value of € 1.3 million for the loan arising from the Rome Court of Appeal in relation to the IMI-SIR dispute. Detailed information on this dispute is provided later in this Note.

IMI Sir dispute

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Other assets include € 1.3 million which refer to the net carrying amount of the loan which was definitively enforced by the First Civil Section of the Supreme Court through sentence 2469/03. This sentence has substantially confirmed decision no. 2887, passed by the Rome Court of Appeal on September 11, 2001, which condemned Consorzio Bancario SIR S.p.A. (in liquidation) to reimburse to the Bank the sum of € 506 million previously paid by IMI to the heirs of Mr. Nino Rovelli as compensation for damages, in accordance with the sentence passed by the Rome Court of Appeal on November 26, 1990. However, the sentence changed the ruling on the amount of interest payable by the Consorzio on the grounds of procedures and not of merit in respect of whether or not it should

F-81

include the amount matured from the date on which the appeal was served (equal to around € 72.5 million as of December 31, 2001). Furthermore, the Supreme Court referred to another section of the Rome Court of Appeal the decision on whether or not the total amount owed to the Bank by Consorzio should be reduced by approximately € 14.5 million, as compensation for the damages related to the transaction between the Consorzio and IMI in respect of the additional agreement of 7.19.1979: if the trial judge holds the claim amount unjustified, the sentence against the Consorzio to pay the sum of € 506 million will be reduced accordingly. In this respect, proceedings have begun within the terms, for the resummons of the sentence before the Rome Court of Appeal where judgment is currently pending.

The same Supreme Court sentence passed final judgment on the right of Consorzio to be held harmless by Mrs Battistella Primarosa (heir to Mr. Nino Rovelli) and of Eurovalori S.p.A.. The Supreme Court also endowed the Consorzio's right to recourse as subordinate to the previous payment of the amount owed to SANPAOLO IMI S.p.A. and assigned the sentence on this particular appeal to the trial judge. Judgement commenced in February 2004 and is still under way.

For the purposes of preparing the financial statements, the book value of the loan subject to the Supreme Court sentence has been calculated in accordance with national and international accounting standards for revenue recognition, on the basis of its estimated realizable value, as confirmed by authoritative opinions.

With reference to the above, taking into account that the initiatives carried out so far have not achieved substantial results, the Bank has considered that the net carrying amount of this loan should be within the bounds of the Consorzio's capital and its ability to pay; such amount, net of the effects attributable to the previously mentioned Supreme Court sentence, being substantially in line with that currently recorded.

Taking a consistent approach, since 2001, the investment held in the Consorzio has been written down to zero.

On April 29, 2003, the Criminal Section IV of the Court of Milan, finally sentenced Rovelli's heir and the other co-defendants to different terms of imprisonment in relation to their respective levels of responsibility for the crimes committed, establishing also the compensation for damages to be awarded to the plaintiffs, among which SANPAOLO IMI.

To this end it should be noted that the Court quantified the amount of damages to be liquidated solely for moral injury at € 516 million, without however granting provisional enforceability of the sentence, which would have allowed the plaintiffs to take immediate action in order to recover the amount receivable.

Therefore, since the sentence is not final nor binding (in that a plea for burden has been proposed by all the parties and that it is still pending before the relevant Court of Appeal), it is expected that

under the circumstances no relevance can be given to the amount due from Consorzio Bancario SIR either autonomously or as an element of valuation.

Analysis of caption 160 "Accrued income and prepaid expenses" (Table 5.2 B.I.)

Accrued income and prepaid expenses (caption 160)	12/31/04	12/31/03
	(€/mil)	
Accrued income		
income from derivative contracts	1,635	1,163
interest from loans to customers	511	536
interest on securities	276	275
bank interest	90	100
other	218	149
Prepaid expenses		
commission on placement of securities and mortgage loans	153	213
up-front and other charges on derivative contracts	355	31
discounts on bond issues	245	277
other	336	361
Total	3,819	3,105

The increase in accrued income and prepaid expenses in respect of operations on derivative contracts is attributable to the significance of such operations during the year, an effect of the phenomenon regarding activities in financial management described in the Report on operations.

Distribution of subordinated assets (Table 5.4 B.I.)

Other information	12/31/04	12/31/03
	(€/mil)	
(a) Due from banks	10	10
(b) Loans to customers	151	66
(c) Bonds and other debt securities	254	165
Total	415	241

Subordinated loans to banks and to customers refer mainly to Group companies. Subordinated bonds and other debt securities refer mainly to issues by leading banking institutions and securities which represent securitization transactions (see Note 19 "Concentration and distribution of assets and liabilities").

198

F-86

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

As of December 31, 2004 the provision is made up of € 192 million from some Group bank networks (Banca Popolare dell'Adriatico, Cassa di Risparmio di Venezia and Friulcassa) and of € 6 million from the Cassa dei Risparmi di Forlì.

The fall in the provision refers mainly to the outsourcing during the year of the pre-existing provision by Cassa di Risparmio di Bologna for which € 112 million has been recorded to other decreases.

Accruals to the reserve in question were made on the basis of independent actuary appraisals.

The following table shows changes in the reserve for pensions and similar commitments during 2003

	(€/mil)
Opening balance January 1, 2003	343
Increases	
provisions	14
other	11
Decreases	
utilisations	24
other	40
Closing balance December 31, 2003	304

As of December 31, 2003 the provision is made up of € 298 million from the former Cardine Group banks and € 6 million from the Cassa dei Risparmi di Forlì. The reserve accrued by the Parent Bank as of December 31, 2002, (€ 41 million) to cover charges in relation to the integration of the pension paid to former IMI S.p.A. staff, has been transferred during the year to Section A of the Pensions Reserve in relation to former Banco di Napoli staff, subject to the Bank's original obligation in respect of access to the fund (the transfer has been booked to other decreases for a value of € 39 million).

Accruals to the reserve in question were made on the basis of independent actuary appraisals.

Taxation (caption 80.b)

The following table shows changes in the reserve for taxation during 2004.

	Current tax liabilities	Deferred tax liabilities	Total
		(€/mil)	
Changes in the reserve for taxation during the year 2004			
Opening balance January 1, 2004	630	102	732
Increases			
provisions for current income taxes	522	62	584
other changes	3	33	36
Decreases			
payment of income taxes	279	37	316
other changes	27	20	47
Closing balance December 31, 2004	849	140	989

The provisions for taxation are composed of € 849 million to cover current income taxes and actual, existing or potential fiscal disputes, including local taxes payable by foreign branches and subsidiaries, as well as € 140 million to cover deferred taxes.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

During the year, SANPAOLO IMI and many of its subsidiaries have adhered to an initiative in terms of "tax reform and benefits" in compliance with the 2004 Budget Law ("Legge Finanziaria"), by sustaining a total charge of € 10 million, of which € 7 million with the use of pre-existing reserves (for further detail refer to Note 26 "Other consolidated statement of income captions").

Deferred tax assets and liabilities recorded in the consolidated financial statements refer to temporary differences between the accounting and fiscal value of assets and liabilities accrued in 2004 and in prior years, for which it is deemed likely that a tax liability will be incurred in the future (in the case of deferred tax liabilities) or which will most likely be recovered (in the case of deferred tax assets). Deferred taxation has been calculated by each Group company and also on consolidation in respect of the tax effect of specific consolidation entries. The tax effect relating to provisional differences of each Group subsidiary has been calculated applying different tax rates according to the respective country of residence.

The following table shows changes in the reserve for taxation during 2003.

<i>Changes in the reserve for taxation during the year 2003</i>	Current tax liabilities	Deferred tax liabilities	Total
		(€/mil)

Closing balance December 31, 2003	630	102	732

(*)

Other changes include exchange adjustments to reserves denominated in currencies other than the Euro.

The provisions for taxation are composed of € 630 million to cover current income taxes and actual, existing or potential fiscal disputes, including local taxes payable by foreign branches and subsidiaries, as well as € 102 million to cover deferred taxes.

During 2003, SANPAOLO IMI and many of its subsidiaries have adhered to an initiative in terms of "tax reform and benefits" in compliance with the 2003 Budget Law ("Legge Finanziaria"), by sustaining a total charge of € 48 million, of which € 21 million with the use of pre-existing reserves (for further detail refer to Note 26 "Other consolidated statement of income captions"). As regards fiscal disputes, it is worth pointing out that:

in a sentence dated October 23, 2003, the subsidiary Fideuram Vita obtained a favorable judgment from the Supreme Court in respect of its dispute with the tax authorities regarding the years from 1985 to 1987;

the subsidiary Sanpaolo Life Ltd, pursuant to Art. 15 of the aforementioned 2003 Budget Law, closed the action made in December 2002 by the Tax Police in the context of an examination of Banca Sanpaolo Invest S.p.A. With respect to the Sanpaolo Life products promoted by Banca Sanpaolo Invest and by other SANPAOLO IMI Group distribution channels on behalf of the insurance broker with which Life has a distribution agreement, the Tax Police claim that Sanpaolo Life is effectively a fixed business in Italy and therefore applicable to taxation on its products.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Deferred tax assets and liabilities recorded in the consolidated financial statements refer to temporary differences between the accounting and fiscal value of assets and liabilities accrued in 2003 and in prior years, for which it is deemed likely that a tax liability will be incurred in the future (in the case of deferred tax liabilities) or which will most likely be recovered (in the case of deferred tax assets). Deferred taxation has been calculated by each Group company and also on consolidation in respect of the tax effect of specific consolidation entries. The tax effect relating to provisional differences of each Group subsidiary has been calculated applying different tax rates according to the respective country of residence.

The following tables about deferred tax liabilities and deferred tax assets are available for the year 2004 and 2003.

<i>Detail of deferred tax liabilities</i>	12/31/04	12/31/03
	(€/mil)	
Deferred tax liabilities charged to the statement of income:	129	88
on profits from Group companies	6	7
other	123	81
Deferred tax liabilities charged to shareholders' equity:	11	14
on Parent Bank reserves:	11	13
<i>Other reserves Reserves ex Law 169/83</i>	4	4
<i>Other reserves Reserves ex Legislative Decree 213/98</i>	7	9
on reserves of other subsidiaries		1
Total	140	102

Deferred taxation recorded to the statement of income refers mainly to accruals made by Banca OPI in respect of the difference between the adjustment to value of loans recognized by tax laws compared to that recorded in the financial statements.

Changes in deferred tax assets credited in net shareholders' equity

During 2002 tax benefits for € 250 million were booked in respect of funds concerning the deferred tax asset generated by the merger of Banco di Napoli into SANPAOLO IMI, in relation to the quota of goodwill on Banco di Napoli, credited in 2000 to offset pre-existing negative goodwill at first consolidation. This amount decreased to € 226 million in 2003 and was further by € 26 million in 2004, following the booking in the consolidated statements of income of the tax effects generated by the amortization of the merger differences following the aforementioned merger operation.

Information as per Consob Communication 1011405 dated February 15, 2001

Tax benefits under Decree 153 dated 5/17/99 (Ciampi Law)

Law Decree 153 dated May 17, 1999 known as "Legge Ciampi" introduced tax instruments in respect of restructuring operations on banks and, among others, set a reduced tax rate for bank or banking group concentration transactions of 12.50% on profits destined to a special reserve to be composed of the maximum amount, to be broken down on a straight-line basis over five years, at 1.2%

of the difference between the receivables and payables of all the banks that took part in the transaction and the aggregate of the major bank participating in the transaction.

Through a statement dated December 11, 2001, the European Commission declared that the tax benefits under "Legge Ciampi" were incompatible with Community principles.

Together with the Italian Government who, in February 2002, filed an appeal against the European Court of Justice, ABI (the Italian Bankers' Association) and the banks concerned, including SANPAOLO IMI, petitioned the High Court of Luxembourg to cancel the decision of the European Commission. The dispute is still pending even if, in view of the pending sentence on the appeal filed by the Government before the Court of Justice, the Court has decided to suspend judgement until the appeal by the Italian Government is settled.

Following the aforementioned decision by the European Commission, decree law 63 of April 15, 2002 (subsequently converted into Law 112 on June 15, 2002) suspended "Legge Ciampi" with effect from 2001. Commencing from that year, current income taxes and deferred taxes have therefore been determined without taking into account the benefits in question. Furthermore, through decree law 282 of December 24, 2002 (subsequently converted into Law 27 on February 21, 2003), the Government implemented the decision of the Commission whereby it enforced payment of the unpaid taxes (being the relief granted to banks through "Legge Ciampi") by December 31, 2002. It should be noted that SANPAOLO IMI and the Cardine group merged banks that, through the law in question, benefited from tax relief for the years 1998, 1999 and 2000 had accrued prudently the corresponding amount to the tax reserve.

In respect of the expiry on December 31, 2002, the Group paid € 200 million, which corresponds to the lower tax liabilities already paid in by the Bank and the merged banks and includes interest at an annual rate of 5.5%, which is substantially in line with the full amount to be reimbursed, apart from some minor adjustments. Merely for precautionary measures, reservations were expressed to the Department of the Treasury, the payee, in respect of the petitions brought before the High Court of the European Community.

As far as the effect on the financial statements is concerned, considering that the recovery of the tax relief has been applied in the presence of disputes brought against the European Commission by the Italian Government and the banks concerned and that in any case the amount paid cannot be considered definitive, such amounts have been recorded to other assets and wholly offset by accruals to the tax reserve.

In the first half of 2004, following the expiry of the three year period subject to taxation as provided by a specific law, € 854 million of the Bank's net equity was reclassified from the reserve accrued according to the "Legge Ciampi" to an ordinary reserve.

Provisions for risks and charges Other provisions (caption 80.c)

Closing balance December 31, 2004	145	1,031	683	1,859

(*)

Other increases mainly include € 28 million offset against personnel costs (of which € 24 million accruals for the renewal of the CCNL employment contract which expired at the end of 2003 and € 4 million for bonuses and incentives in favor of employees) and € 14 million offset against "extraordinary expenses" referring to staff leaving incentives for Parent Bank employees.

Provisions for "guarantees and commitments" of € 145 million cover expected losses in respect of guarantees and more generally, the contingencies associated with guarantees and commitments, including exposures to derivate contracts on loans for which the Group has taken over the credit risk (protection seller). More specifically, the provisions include risks calculated on a case by case basis as well as the physiological risk of performing accounts valued using the same principles as those applied to loans.

Provisions for "other risks and charges" amounting to € 1,031 million, include:

the Parent Bank for € 554 million, of which:

€ 356 million provided against estimated losses on legal disputes and, more specifically, on claims by receivers of bankrupt customers;

€ 165 million to cover potential charges among which guarantees given as part of company transactions and those relating to risks connected to dealing activities in securities;

€ 33 million accrued against potential charges deriving from the renegotiation of mortgage loans to a specific reserve calculated on the basis of current laws.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

SANPAOLO Banco di Napoli for € 147 million, of which:

€ 90 million provided against estimated losses on legal disputes, including claims by receivers of bankrupt customers;

F-94

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

€ 34 million accrued against potential charges deriving from the probable renegotiation of mortgage loans to a specific reserve calculated on the basis of the parameters that are currently available;

€ 11 million for outstanding contributions connected to special loans;

€ 12 million for other categories;

€ 62 million for other Group bank networks, of which € 4 million against potential costs deriving from the renegotiation of mortgage loans;

the tax collection services of the Group for € 20 million to cover specific risks in the sector and restructuring charges;

other subsidiaries for € 248 million, mainly relating to risks, also of a commercial or operational nature, connected to the distribution of and dealing in financial products.

Provisions for "other personnel costs", of € 683 million, include:

the Parent Bank for € 547 million, of which:

€ 307 million for staff leaving incentives completed in previous years. With reference to initiatives defined during 2003, the reserve also includes charges referring to staff whose employment contracts were transferred to Sanpaolo Banco di Napoli SpA in the context of the conferral of the business branch represented by the Southern Territorial Direction. The provisions of the transfer require that the Parent Bank reimburses the receiving company the sums paid by the latter as leaving incentives to employees on the basis of the company agreement with the Parent Bank dated June 14, 2003.

€ 125 million accrued, on the basis of independent actuarial appraisals, to cover the technical deficit of the supplementary pension fund, an independent entity, which integrates the compulsory pension fund for Istituto Bancario Sanpaolo di Torino employees;

€ 53 million of other provisions in respect of charges for social contributions and the supplementary pension fund;

€ 38 million accrued against potential liabilities deriving mainly from the renewal of the work contract and employee premiums and incentives, the issue of which is at the discretion of the Parent Bank;

€ 24 million to cover payment of long service bonuses to employees.

other subsidiaries for € 136 million, of which € 97 million refer to those Group bank networks operating in Central Northern Italy and € 16 million to SANPAOLO Banco di Napoli.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

- (1) This caption mainly comprises € 452 million for accruals to "Income, employment and re-training fund for staff in the banking industry", of which € 376 million refer to the Parent Bank and € 76 million to the former Cardine bank networks, booked to "extraordinary expenses", and of € 76 million being the contra-entry of "personnel costs", mainly relating to accruals for bonuses and discretionary incentives for employees, of which € 39 million refer to the Parent Bank, € 33 million to the former Cardine bank networks and € 4 million to SANPAOLO Banco di Napoli.
- (2) This caption includes the effect of the deconsolidation of Banque Sanpaolo.

Provisions for "guarantees and commitments" of € 131 million cover expected losses in respect of guarantees and more generally, the contingencies associated with guarantees and commitments, including exposures to credit derivatives for which the Group has taken over the credit risk (protection seller). More specifically, the provisions include risks calculated on a case by case basis as well as the physiological risk of performing accounts valued using the same principles as those applied to loans.

Provisions for "other risks and charges" amounting to € 927million, include:

the Parent Bank for € 490 million, of which:

€ 294 million provided against estimated probable losses on legal disputes and, more specifically, on claims by receivers of bankrupt customers;

€ 163 million to cover probable charges among which guarantees given as part of company transactions and those relating to risks connected to dealing activities in securities;

€ 33 million accrued against probable charges deriving from the probable renegotiation of mortgage loans to a specific reserve calculated on the basis of the parameters that are currently available;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Sanpaolo Banco di Napoli for € 141 million, of which:

€ 89 million provided against estimated probable losses on legal disputes, including claims by receivers of bankrupt customers;

€ 34 million accrued against probable charges deriving from the probable renegotiation of mortgage loans to a specific reserve calculated on the basis of the parameters that are currently available;

€ 10 million for outstanding contributions connected to special loans;

€ 8 million for other categories;

€ 44 million for the former Cardine bank networks, of which € 5 million against probable costs deriving from the renegotiation of mortgage loans;

the tax collection services of the Group for € 18 million to cover specific risks in the sector and restructuring charges;

other subsidiaries for € 234 million, mainly relating to risks, also of a commercial or operational nature, connected to the distribution of and dealing in financial products.

Provisions for "other personnel costs", of € 888 million, include:

the Parent Bank for € 738 million, of which:

€ 494 million for staff leaving incentives offered to employees during the year and in prior years. With reference to initiatives completed during 2003, the reserve also includes charges referring to staff whose employment contracts were transferred to Sanpaolo Banco di Napoli S.p.A. in the context of the conferral of the Business Branch represented by the Southern Territorial Direction. The provisions of the transfer requires that the Parent Bank reimburses the receiving company the sums paid by the latter as leaving incentives to employees on the basis of the company agreement with the Parent Bank dated June 14, 2003;

€ 120 million accrued, on the basis of independent actuarial appraisals, to cover the technical deficit of the supplementary pension fund, an independent entity, which integrates the compulsory pension fund for Istituto Bancario San Paolo di Torino employees;

€ 54 million of other provisions to the supplementary pension fund;

€ 44 million accrued against probable liabilities deriving mainly from employee premiums and incentives, the issue of which is at the discretion of the Parent Bank;

€ 18 million to cover payment of long service bonuses to employees;

€ 8 million provisions made to the technical reserve Law 336/70, for employee accident coverage and to cover other minor probable liabilities.

other subsidiaries for € 150 million, of which € 117 million refer to the former Cardine bank networks and € 10 million to Sanpaolo Banco di Napoli.

Information as per Consob Communication 1011405 of February 15, 2001.

Low-interest mortgage loans

Law 133/99, implemented with Ministerial Decree 110/2000 (against which an appeal was presented before the administrative court) forces banks, upon receipt of a specific request by borrowers or by the body issuing the borrowing facilities, to review the interest rates applied to mortgages issued, with charges to be borne in full or partially by the public sector.

F-97

As no "threshold rate" is set for low-interest mortgages loans, subsection 62 of Art. 145 of Law 388 dated December 23, 2000 (Budget Law 2001) clarifies that the renegotiation rate is to be considered as "the average effective global rate for home mortgage loans being amortized", assigning the identification of the transactions within which to carry out the observations to determine the renegotiation rate to a subsequent regulation. To this end, with the Decree dated April 4, 2001, the Treasury set up the new consistent category of low-interest loans being amortized, and the Bank of Italy issued the correlated methodological notes to identify the average rates for the sector. To complete the application of the framework of the legislation, Ministerial Decree dated March 31, 2003 was enacted, which identified the interest rates to be applied, 12.61%, for the purposes of renegotiating such loans.

The Group banks commenced accounting-administration activities in order to apply the new interest rates and to carry out the necessary adjustments to the installments expired after July 1, 1999. These activities refer to the six months ended December 31, 2003 and concern those loans to which the benefits of Art. 29 of Law 133/99 apply.

In the same context, mortgages assisted by Regional subsidies were also renegotiated in those cases where the bodies have adopted the provisions established by the framework of the legislation, whilst other loans obtained through Regional applications are still being investigated, also by ABI (the Italian Bankers' Association).

Some aspects still have to be defined with the interested bodies in respect of the renegotiation of some types of loans granted according to specific incentive laws. Loans already extinguished or amortized are being renegotiated and it is expected that these activities will be concluded before the end of this year in respect of both the bodies and the borrowers.

The Group banks have decided to continue, still in agreement with the system, with the appeals which were disregarded in the first degree by the Lazio Regional Administration Court, against that stated in Ministerial Decree 110/2000.

For completeness it is highlighted that the provisions of the Ministerial Decree of March 31, 2003 for determining the renegotiation rate cannot be formally defined as being fully established, owing to an isolated appeal presented before the Lazio Regional Administration Court by a Regional Body. Nevertheless, because of its characteristics and in the light of case law precedents issued by the same Regional Administration Court, such initiative would not appear appropriate to bring the current regulatory model under discussion.

The probable charge in respect of the future renegotiation of mortgage loans not included up to now in the enforcement of the applicable legislative measures, equal to € 68 million (€ 76 million in 2003) (of which € 30 million refer to the Parent Bank both in 2004 e 2003), has been covered by making appropriate accruals to the provision for other risks and charges. In the years following 2004, the negative impacts on the statement of income will be gradually reduced because of the expiry of current mortgage loans.

Low-interest agricultural mortgage loans

The provisions of Art. 128 of Law 388/2000 (Budget Law 2001) introduced the faculty for borrowers to renegotiate "loan installments still to expire" at more favorable rates fixed for low-interest transactions, as an alternative to early extinction, whilst providing the same benefits. Renegotiation is subject to the implementation of a Ministerial Decree which has still not yet been issued.

Later, Law 268 of September 24, 2003 was enacted providing that, for the purpose of applying Art. 128 of Law 388/2000, even different banks may grant loans destined exclusively for the early extinction of agricultural mortgages which had been amortized for at least five years at the date on which Law 268/03 became effective. These new financial transactions, to be completed at market rates and the granting of which has been merely authorized and is not obligatory for the lending bank, are

subject to presentation of specific requests for early extinction and financing, also to be formulated by the local authorities providing the benefits.

Considering the precise reference to the "loan installments still to expire" already contained in Law 388/2000, enacted by Law 268/03, and the consequent possibility to activate "renegotiation" of such loans only for the future, no specific provisions have been made.

Fixed-rate unsubsidized mortgage loans (usury)

In compliance with the provisions of Decree Law 394/2000, (converted into Law 24/2001 and containing the authentic interpretation of "anti-usury" Law 108/1996) and the subsequent Constitutional Court Sentence 29/2002, the SANPAOLO IMI Group adjusted all mortgages covered by these provisions to the annual "replacement" rate of 9.96% with effect from installments expiring before December 31, 2000. Furthermore, an annual interest rate of 8% was applied to those loans which, thanks to the presentation of self-certification by the borrowers, the eligibility requirements to such reduction were ascertained (the original capital of the loan not being more than 150 million Italian Lira, granted to first-time buyers of non-luxury homes).

The reserves for other risks and charges included as of December 31, 2004 and 2003 a residual accrual of € 3 million (wholly referring to the Parent Bank) to cover further requests to reduce interest rates to 8% not yet received or not yet documented by borrowers possessing the legal requirements to benefit from such rates.

Anatocism (interest on interest)

In March 1999, the Supreme Court declared quarterly capitalization of interest payable to be illegitimate, thereby completely changing the previous law. This decision was based on the assumption that the relevant clauses in bank contracts do not integrate "regulatory" use as believed in the past, but rather "trading", which contrasts with the prohibition of anatocism in compliance with art. 1283 of the Italian Civil Code.

After the reversal by the Supreme Court, Decree Law 342/99 was enacted, confirming the legitimacy of capitalization of interest in current account contracts if it is applied over the same period as that for calculating interest payable and receivable: the Credit and Savings Interdepartmental Committee was assigned to determine the methods of such calculation and from April 22, 2000, the date on which the Committee's instructions became effective, all current accounts were adjusted applying quarterly capitalization to interest receivable and payable.

Since April 2000, the capitalization of half-yearly interests is considered legitimate and the dispute refers only to those contracts signed before that date: it should be noted that, despite the fact that the Supreme court has repeatedly confirmed the invalidity of the capitalization clauses, many judges of merit have disregarded the sentence, continuing to consider it legitimate.

With the sentence issued on November 4, 2004 by the United Sections, the Supreme Court again authoritatively excluded that the use in question can be considered regulatory.

Nevertheless, on the basis of a number of profiles different to those already examined by them, the sentence issued by the United Sections does not eliminate the possibility of upholding the legitimacy of the method of calculating half-yearly interest payable, by way of arguments recognized as being well founded by jurisprudence of worth.

As a whole the number of cases pending has remained at an insignificant level in absolute terms, but is subject to careful and continuous monitoring. The risks relating to the disputes in question correspond to the prudent accruals made to the Provisions for other risks and charges which are proportionate to the total of each legal request. Where the introductory measures do not quantify the

demand and until an accounting opinion has been expressed on the issue, the risk involved is covered by an accrual to the provision for other risks and charges of € 142 million (€ 69 million as of December 31, 2003), of which € 122 million (€ 50.5 million as of December 31, 2003) refer to the Parent Bank, destined, in its entirety, to hedge disputes of an undetermined amount and of an uncertain outcome.

GEST Line dispute

GEST Line S.p.A. is the SANPAOLO IMI Group company for tax collection activities, created from the merger by incorporation of the tax collection companies Gerico, Sanpaolo Riscossioni Genova, Sanpaolo Riscossioni Prato and Esaban.

The risks connected to this dispute are almost exclusively attributable to a dispute with the tax authorities in respect of claims of irregularities and vary by nature and size according to the business of each merged company.

With reference to Gerico S.p.A., previously a subsidiary of the former Cardine Banca and later merged by incorporation into SANPAOLO IMI S.p.A., there are a series of administrative and accounting procedures pending filed by local Tax offices and by the General Accounting Office for presumed fiscal damages, all originating from the non-collection of income taxes. More specifically, the aforementioned proceedings are connected to presumed irregularities committed by some tax collection officials reporting activities during inspections on delinquent tax payers premises. These proceedings are still pending on various levels of judgement and are constantly defended by the legal professionals engaged by the company.

The dispute involving Esaban S.p.A. (a company in the tax collection sector of the former Banco di Napoli, which incorporated all the other tax collection companies of the Group, changing its name to GEST Line S.p.A.) originated from a series of provisions denying the reimbursements issued by the tax authorities in the years 1999 2001, all contested according to hierarchy.

Through Law no. 311/2004 (Art. 1, subsection 426) the legislator has provided tax collection licensees with the faculty of an amnesty to amend irregularities in connection with activities performed by collectors up to November 20, 2004, through payment of the sum of € 3 for each inhabitant residing in the territorial areas to which they were assigned. Compliance with this faculty appears appropriate to include the type of dispute affecting the Licensee, also in the opinion of external consultants. GEST Line is evaluating the possibility of complying with the amnesty, the cost of which, considering the population resident in the territory assigned, is equal to around € 24 million.

The total risks connected to the Gerico S.p.A. and Esaban S.p.A. disputes are covered by unlimited guarantees already received by the aforementioned companies from the companies transferring the respective tax collection branches of business (each of the savings banks then merged into Cardine Banca and the former Banco di Napoli). The above mentioned guarantees cover any losses or contingent liabilities following events prior to the respective dates of transfer and expire in 2005. In light of the events which involving the merger of Cardine Banca and Banco di Napoli, SANPAOLO IMI took over the commitments deriving from the aforementioned guarantees, the risks of which are, as a whole, covered by appropriate accruals.

The risk pertaining to the dispute in respect of the tax collection activities of the concession in Venice is not comprised in the aforementioned guarantees and, instead, solely affects the capital of GEST Line. Following the proceedings for fiscal damages as a result of presumed irregularities by some tax officials, the local section of the General Accounting Office passed sentence against the licensee for a sum of around € 11 million. The relevant sentences have all been contested with its enforcement suspended; as a consequence an appropriate accrual has been made.

The Cirio Group insolvency in respect of the sale of bonds

In November 2002, the Cirio Group, one of the largest Italian Groups operating in the agroindustrial sector, was declared insolvent in respect of the repayment of a loan issued on the Euromarket. As a result this event led to a cross default on all the existing issues. The bonds issued by the Cirio Group had a nominal value totaling around € 1.25 billion. The SANPAOLO IMI Group, like all the principal Italian banking groups, had loan transactions with the Cirio Group.

Consob proceedings in relation to operations carried out on Cirio bonds

Following the investigations carried out in April-October 2003, in relation to SANPAOLO IMI's dealings in Cirio bonds during the 2000-2002 three year period, in a letter dated May 4, 2004, Consob raised a series of claims of presumed violation of sector regulations by SANPAOLO IMI when performing dealing activities in the aforementioned bonds.

These claims were notified to the Bank and to the members of the Board of Directors and of the Board of Statutory Auditors in office at the time of the dealings, as well as to some company directors who, at various levels, were considered responsible for the presumed irregularities.

Both the Bank and the other accused parties have moved to formulate their statements for their defense. The administrative procedures were concluded through a decree issued by the Ministry of Economy and Finance on February 28, 2005 which, accepting the proposal made by Consob, inflicted fines on each of the accused and the Bank alone was ordered to pay the relevant amounts, being jointly liable according to Art. 195, subsection 9 of Decree 58/1998.

The Bank and each of the accused will oppose the aforementioned sentence before the competent Court of Appeal of Turin.

Criminal investigations related to Cirio

At the same time the Criminal Courts are investigating a number of credit institutes, including SANPAOLO IMI, concerning dealing activities with savers in relation to bonds issued by Cirio Group companies and the management of financial activities with the aforementioned Group. The investigations are still in the preliminary stage and also concern company representatives including two Directors no longer in office.

Confident of the absolute regularity, in general terms, of the company's activities in relation to the investigations being carried out by the Criminal Courts and, in particular, of the total lack of involvement of the aforementioned company representatives, the Bank is cooperating fully with the authorities in the context of the investigations.

Management of complaints

With respect to complaints by customers holding Parmalat and Cirio bonds, Group policy provides that Group companies pay particular attention, by way of a proper course of investigation, to the adequacy of the financial instruments sold in relation to the position of each investor.

On the basis of the analyses and evaluations made in respect of the potential liabilities arising from complaints about the dealing activities by the Group's banks in respect of bonds in default, the SANPAOLO IMI Group has proceeded to adjust the amount accrued to the provision for risks and charges over previous years, bringing the balance of this provision to € 29 million as of December 31, 2004 (€ 30 million as of December 31, 2003).

Dispute relating to the proceedings sanctioned by Consob against Sanpaolo Imi Asset Management S.G.R. S.p.A.

The financial administrative sanctions issued by the Ministry of Economy following the proposal by Consob after inspection assessments at Sanpaolo IMI Asset Management have, in accordance with Art. 195 TUF (Financial Law), been contested by SGR and its sanctioned representatives before the Milan Court of Appeal which, on November 26, 2003, declared the sanctions illegal. An appeal against this decision has been filed before the Supreme Court by the Ministry and by Consob. SGR immediately filed a counter-appeal, requesting the dismissal of the appeal filed by the Authorities. Judgment is still pending.

Proceedings against Sanpaolo IMI Wealth Management and Fideuram Vita initiated by the Antitrust Authority

In January 2004 the Antitrust Authority notified Sanpaolo IMI Wealth Management, as holder and outsourcer of Sanpaolo Vita, and Fideuram Vita that they were subject to investigations in respect of the purchase of a database from a company specialized in analyzing the insurance market. This database contained information concerning contractual conditions, prices and methods of distribution of products in the life insurance and pensions sector. Having concluded the investigation, which was originally performed on a number of insurance companies before being carried out on the aforementioned Group companies, the Antitrust Authority issued a "Communication of the Investigation Results", in which it assumes the existence of a restrictive agreement. Following the receipt of this "Communication", all of the parties involved prepared their counter claims; the procedure was concluded on September 30, 2004 whereby the Antitrust Authority, whilst not inflicting fines, found the companies involved in violation of Art. 2, subsection 2 of Law 287/90, ascertaining the existence of a horizontal agreement between said companies, consisting of the exchange of sensitive commercial information between competitive businesses.

An appeal against the aforementioned verdict has been lodged before the Lazio Regional Administration Court.

Proceedings initiated by the Legal Authorities against a certain number of financial planners of Banca Fideuram and employees of subsidiary Fideuram Bank Suisse.

In March 2004 the Legal Authorities (Public Prosecutor's Office of the Court of Florence) commenced investigations into, among others, a certain number of financial planners of the Banca Fideuram group and employees of the subsidiary Fideuram Bank Suisse. The claims concern participation in the crime of abusiveness (consisting in the offer of investment services or financial products by a subject unauthorized in Italy), apart from one financial planner who is also charged with money laundering. The bank has set up a special work team for the quick and in-depth verification of the facts and has ensured maximum cooperation with the investigating Authorities.

Reserve for probable loan losses (caption 90)

This caption reflects provisions made by certain subsidiaries to cover credit risks including risks arising from derivatives transactions; these risks are only potential, therefore the reserve is not set off against asset balances.

Changes in the reserve for probable loan losses during 2004 and 2003 are analyzed below:

<i>Changes during the year in "Reserve for probable loan losses" (Table 7.2 B.I.)</i>		(€/mil)

Group shareholders' equity

Capital and equity reserves (liability captions 150, 160, 170 and 180)

The capital, additional paid-in capital and the legal reserve coincide with the corresponding captions of the shareholders' equity of the Parent Bank.

As of December 31, 2004 "Share capital" amounts to € 5,217,679,140.80 (€ 5,144,064,800 as of December 31, 2003) increased during the year by € 73,614,340.8 for the exchange with the shareholders of Banca Fideuram as part of the spin off to SANPAOLO IMI of the stake held by Banca Fideuram in Fideuram Vita. The share capital is composed of 1,475,122,818 ordinary shares (1,448,831,982 as of December 31, 2003) and 388,334,018 preference shares, both with a nominal value of € 2.8 euro each.

Additional paid-in capital increased by € 17 million following the allocation of the surplus arising from the spin-off of Banca Fideuram as a result of the reduced profit reserves of the spun-off company.

With reference to the allocation of the surplus from the spin-off of Banca Fideuram, € 15 million, attributable to the reduced capital reserve of the spun-off company, was booked to the "legal reserve" in order to bring it to 20% of the new "share capital" of the Bank, following the above mentioned increase in share capital.

The "reserve for own shares" has been set up by the Parent Bank and by some subsidiaries to cover the SANPAOLO IMI shares in portfolio. The difference between this reserve and the SANPAOLO IMI shares in portfolio can be attributed to the minority interest in SANPAOLO IMI shares held by Banca Fideuram.

"Other reserves" includes the Parent Bank's remaining reserves and changes at Group level in the equity of the companies included in the consolidation.

The "revaluation reserves" are lodged with certain Group companies following the revaluation of investments made in application of special laws. During 2003 revaluations for € 65 million were made by the subsidiaries Cassa di Risparmio di Padova e Rovigo, Cassa di Risparmio in Bologna, Banca Popolare dell'Adriatico and Friulcassa in compliance with Law 342 of November 21, 2000 (as subsequently modified by Law 350 of December 24, 2003). This revaluation was set-off by the increase in the equity reserves of the subsidiaries for € 54 million and by recording € 11 million to a reserve for substitute tax.

Reserve for general banking risks (liability caption 100)

The "Reserve for general banking risks" exclusively refers to accruals made by certain subsidiaries.

Positive goodwill arising on consolidation (asset caption 90)

This caption expresses the remaining goodwill arising from line by line and proportional consolidation after off-setting against negative goodwill on first time consolidation, amortization and writedowns.

Analysis of caption 90 "Positive goodwill arising on consolidation"

	12/31/04	12/31/03
	(€/mil)	
Banco di Napoli	546	636
Cassa dei Risparmi di Forlì	82	140
Banka Koper	49	57
Financiere Fideuram		16

Banque Privee Fideuram Wargny		3
SANPAOLO IMI Private Equity S.p.A.	5	7
Allfunds Bank	8	
Inter-Europa Bank	4	5
Eptaconsors	4	4
Banca Popolare dell'Adriatico	4	4
Total	712	883

The reduction in value of the consolidation differences of Cassa dei Risparmi di Forlì and of Banque Privée Fideuram Wargny and Financière Fideuram represent the share of amortization, as well as the adjustments made to goodwill at year-end for € 56 million, in order to reflect the long-term nature of the writedown to these investments in the consolidated financial statements, as shown in the Parent Bank financial statements of SANPAOLO IMI S.p.A. and of Banca Fideuram (see Note 25).

Goodwill arising on consolidation of Banco di Napoli reflects the excess price paid with respect to its adjusted shareholders' equity, for the part not compensated by the negative goodwill arising on consolidation. Given the nature of the investment, amortization will be calculated over 10 years.

The first time consolidation of the former Cardine Group shareholdings revealed positive and negative goodwill differences on line-by-line consolidation and on net equity for, respectively, € 314 million and € 299 million. The positive differences have been allocated as follows:

- a) € 299 million have been deducted from negative goodwill, using the faculty provided for by art. 32, subsection 4 of Decree 87/92, confirmed by subsection 5 of the same article, as well as the relevant application of the Bank of Italy instructions (provision dated July 30, 1992 and subsequent amendments);
- b) the remaining € 15 million of assets in the consolidated balance sheet to be amortized over 10 years, given the nature of the investment.

Negative goodwill arising on application of the equity method and on consolidation (liability captions 120 and 130)

Liability captions 120 and 130 represent the negative differences arising on line-by-line consolidation and on application of the equity method after off-setting them against positive differences on first time consolidation.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Details of the aforementioned off setting operations between negative and positive differences on first time consolidation are shown in the table below.

	12/31/04	12/31/03
	(€/mil)	
Negative goodwill arising on first-time consolidation:		
line-by-line		
<i>former IMI Group</i>	952	952
<i>former Cardine Group</i>	241	241
using the equity method		
<i>former IMI Group</i>	75	75
<i>former Cardine Group</i>	58	58
Total	1,326	1,326
Goodwill arising on first-time consolidation:		
line-by-line		
<i>former Banco di Napoli Group</i>	(854)	(854)
<i>former Cardine Group</i>	(296)	(296)
using the equity method		
<i>Cassa di Risparmio di Firenze</i>	(173)	(173)
<i>former Cardine Group</i>	(3)	(3)
Total	(1,326)	(1,326)

The balance of caption 130 "Negative goodwill arising on application of the equity method", for € 430 million (€ 213 million as of December 31, 2003), represents the Group's interest in the increase in shareholders' equity of investments valued using the equity method and recorded after first time consolidation. The amount refers mainly to companies operating in the insurance sector.

Positive goodwill arising on application of the equity method (asset caption 100)

This caption expresses the remaining goodwill arising on application of the equity method after offsetting against negative goodwill on first time consolidation and amortization.

<i>Analysis of caption 100 "Positive goodwill arising on application of the equity method"</i>	12/31/04	12/31/03
	(€/mil)	
Cassa di Risparmio di Firenze	39	47
Eptaventure	1	1
Sagat	7	10
Carpine	1	
Noricum (now AIP)	1	2
Aeffe	8	16
Total	57	76

Given the strategic nature of the investments, goodwill arising on companies consolidated line by line and proportionally (caption 90), as well as that from Cassa di Risparmio di Firenze, is amortized over 10 years. The goodwill in Sanpaolo IMI Private Equity, Aeffe and Eptaventure, purchased under private equity, is amortized over 5 years, as well as the goodwill in SAGAT and Noricum.

Own shares (asset caption 140)

Own shares held in portfolio are represented by securities of the Parent Bank held by itself and by other Group companies.

As of December 31, 2004, the Parent Bank, Banca IMI and Banca Fideuram held 5,137,361 SANPAOLO IMI shares in their portfolio (equal to 0.28% of the share capital). These are recorded at market value among the assets in the Balance sheet for € 54.4 million.

Detail of the movements in 2004 is provided below:

F-107

Minority interests (liability caption 140)

As of December 31, 2004, the portion of "Minority interests" amounting to € 176 million (€ 271 million as of December 31, 2003) essentially relates to the quota attributable to minority shareholders in Banca Fideuram.

A statement of changes in the consolidated shareholders' equity for the period is attached to these notes, together with a reconciliation of the Parent Bank's net income and shareholders' equity and the corresponding consolidated amounts.

Regulatory capital

A breakdown of the regulatory capital and a description of the minimum requirements for supervisory purposes is provided below. The final results will be submitted to the Bank of Italy following approval of these financial statements:

Category/value	12/31/04	12/31/03
	(€/mil)	
A. Regulatory capital		
A.1 Tier 1 capital	10,860	10,038
A.2 Tier 2 capital	5,356	4,470
A.3 Items to be deducted	(840)	(837)
A.4 Regulatory capital	15,376	13,671
B. Minimum regulatory requirements

(a) With a minimum of 5.375% and a maximum of 8.250%.

During the year, the Parent Bank issued new Tier 2 subordinated loans for € 1,066 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

During 2003, the Parent Bank issued new subordinated loans for € 350 million in the form of Tier 2 subordinated loans destined to replace those in expiry and for € 600 million in the form of Tier 3 subordinated liabilities.

The Tier 2 subordinated liabilities not included in the calculation of regulatory capital as of December 31, 2004 are equal to € 152 million (€ 490 million as of December 31, 2003).

Detail of subordinated liabilities as of December 31, 2003, is provided below:

	Original currency	Amount in the financial statements as of 12/31/03 (€/mil)	Amount in original currency (millions)	Interest rate	Issue date	Maturity date	Starting date of early redemption of the loan

(*) Early redemption of the loan is not provided for.

(a) With a minimum of 5.375% and a maximum of 8.250%.

Preferred Securities, which are attributable to Tier 1 capital, satisfy the following requirements:

the securities are not redeemable, the issuer's redemption right, if any, cannot be exercised during the first 10 years after issue; redemption has to be authorized in advance by the Bank of Italy;

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

the contract provides for the possibility of suspending remuneration of the securities, even partially, if the Parent Bank, which directly controls the issuer, has not distributed dividends on its own shares during the previous year;

dividends cannot be accumulated in subsequent years;

in the event of the liquidation of SANPAOLO IMI, the holders of securities can only be reimbursed after all other subordinated and non-subordinated creditors have been paid.

Contractually, subordinated loans included in Tier 2 may not be redeemed prior to maturity, nor converted into capital or any other type of liability. In particular, such contracts provide that:

where permitted, early redemption can only take place on the issuer's initiative and with Bank of Italy authorization;

the loan period must not be less than five years; if no maturity is stated, the contract must state that a notice period of at least five years has to be given;

in the event that the issuer is put into liquidation, the loan can only be reimbursed once all other creditors, not similarly subordinated, have been satisfied.

The Tier 3 subordinated loans, issued to cover market risk, meet the following conditions:

the original duration is not less than 2 years;

the payment of interest and principal is suspended if the capital requirements of SANPAOLO IMI should fall below 7% on an individual basis or 8% on a consolidated basis;

in the event that the issuer is put into liquidation, the loan can only be reimbursed once all other creditors, not similarly subordinated, have been satisfied.

Other information on subordinated liabilities

See Note 19 for information regarding the distribution of subordinated liabilities by geographical area, type of currency and degree of liquidity.

Liabilities in respect of the Banco di Napoli loans to be restored ex Law 588/96

Other liabilities includes two deposits of € 58 million and € 7 million (the same as of December 31, 2003) which represent the residual principal and interest for the recovery made by the Bank of Italy in relation to the outlay in the past by the former Banco di Napoli to cover the liquidation deficit of Isveimer and the losses of Società per la Gestione di Attività S.p.A. (Sga). These interventions form part of the reorganization plan prepared, with the Bank of Italy's approval, on the basis of Law 588/96 containing urgent provisions for the recovery, reorganization and privatization of former Banco di Napoli. Furthermore, the same law establishes to hold the former Banco di Napoli harmless from the economic and financial consequences of the measures taken or to be taken using the mechanism provided by the Treasury Ministry Decree of September 27, 1974. Since December 31, 2002, following the merger by incorporation of Banco di Napoli into SANPAOLO IMI, the latter has, for all legal purposes, taken over from the Banco in the recovery mechanism.

To summarize, the procedure applicable both to Isveimer and to Sga states that the Bank of Italy will grant extraordinary advances at a special low rate of interest (1%) to cover the losses of the subsidiaries concerned. Such advances must be invested in Government securities, so that the differential between the interest income on the securities purchased and the interest expense on the advances received can directly reduce the "loans to be restored" and the related interest accrued, based on the "minimum interest rate offered on the principal refinancing transactions". During 2004 and 2003, it was not necessary for SANPAOLO IMI to cover Sga losses. However, during 2003 in relation to SGA's incurred losses in previous years, there were 4 advances totaling € 12,288 million, granted on December 27, 2002, with the following expiry: € 270.4 million on March 1, 2003, € 134 million on June 1, 2003; € 2,578.6 million on December 22, 2003 and € 9,304.8 million on December 29, 2003.

From an accounting point of view, the advances received from the Bank of Italy and the Government securities purchased were shown under the memorandum accounts, while the financial flows deriving from collection of coupons on such securities and from the payment of interest on the

advances were, respectively, debited and credited directly to the "loans to be restored". This accounting treatment, authorized by the Bank of Italy, places emphasis on the substance of the situation rather than the form, in accordance with Decree Law 87 of January 27, 1992.

As of December 29, 2003, the Bank of Italy did not consider it necessary to activate new advances; therefore it was possible to release the securities held as guarantee; from an accounting point of view the write-offs were made to the memorandum accounts which recorded the amount of advances received and the value of the securities purchased.

A summary of the circumstances relating to the investments in Isveimer S.p.A. and in Società per la gestione di attività S.p.A. is provided below.

The liquidation of Isveimer

Isveimer S.p.A., a subsidiary of Banco di Napoli which financed industrial development in Southern Italy, was put in voluntary liquidation in 1996.

In 1997, Banco di Napoli intervened to reduce the final liquidation deficit estimated to be € 917 million. The cost of this intervention and the related interest were recovered in accordance with Law 588/96, as mentioned above, and with the methods described in the aforementioned Treasury Decree of 1974.

On the expiry of the advances granted by the Bank of Italy, the recovery process showed a balance in favor of the Central Bank of € 58 million, lodged as a non interest-bearing deposit with the same Central Bank. This deposit is shown under "other assets" offset by "other liabilities".

Società per la Gestione di Attività (Sga)

The Società per la Gestione di Attività S.p.A. ("SGA") is not a true operating subsidiary of SANPAOLO IMI. In particular, SGA is a special purpose entity that was created in 1996 as part of a restructuring plan for the Banco di Napoli (which was acquired by SANPAOLO IMI in 2000 and then merged in the latter in 2002), governed by Law No. 588/96 and made in direct agreement with the Bank of Italy, for the sole purpose of acquiring and managing the non-performing loans in Banco di Napoli's portfolio at December 31, 1996. The primary function of SGA was, in fact, to acquire the non-performing loan portfolio of Banco di Napoli, as by law it was not possible to transfer the non-performing loan portfolio directly to the Italian government. SGA has, in fact, no material assets or liabilities other than those directly related to the acquisition of Banco di Napoli's non-performing loans and does not engage in any other activities.

Although Banco di Napoli formally owns SGA, full and effective control of such business by operation of Law No. 588/96 and through the pledge of Banco di Napoli's shares in SGA lies with the Ministry of Treasury of the Italian Government, which in turn delegated the full power to appoint the Board of Directors of SGA to the Bank of Italy. The pledge of shares was made in accordance with Law No. 588/96 and is irrevocable for the life of the company. Consequently, Banco di Napoli, and then SANPAOLO IMI Group, has absolutely no input or influence over the operations of SGA and all risks and rewards of ownership of the portfolio of non-performing loans were effectively transferred to SGA and, by virtue of the guarantee following described, to the Italian government.

As a consequence of the mentioned transaction, SANPAOLO IMI has in its balance sheet an interest-bearing receivable from SGA for financing extended to SGA in connection with its purchase of the portfolio of non-performing loans from Banco di Napoli while the SGA balance sheet includes only the portfolio of non-performing loans acquired and debt towards SANPAOLO IMI. In particular, Banco di Napoli extended an interest-bearing loan, on market terms, to SGA to enable SGA to purchase Banco di Napoli's portfolio of non-performing loans and to cover its operating costs. Banco di Napoli's portfolio of non-performing loans was subsequently purchased by SGA at book value, which

was representative of the fair value of the non-performing loans because (1) the book value of the loans had been adjusted prior to the sale to reflect a write-down required by the Bank of Italy pursuant to an examination of Banco di Napoli and (2) the book value corresponds to the amount that the Italian government guaranteed; hence, Banco di Napoli did not recognize either a gain or a loss on the sale and without recourse and ceased recording the loans on its balance sheet and SGA recorded the loans on its balance sheet.

Banco di Napoli's loan to SGA and any other losses incurred by SGA are fully and unconditionally guaranteed by the Italian government; any residual value in SGA in excess of the debt owed to Banco di Napoli will remain with the Italian Ministry of the Treasury. The Italian government's guarantee of Banco di Napoli's loan to SGA operates through the following mechanism, which was established by Law No. 588/96. The Italian government, through the Bank of Italy, extends to Banco di Napoli a loan that bears interest at 1%. Banco di Napoli is required by the Bank of Italy to simultaneously use the proceeds of that loan to purchase Italian government bonds and other guaranteed bonds from the Bank of Italy. In this way, a net cash flow of zero is achieved. The difference between the interest income on the government bonds purchased by Banco di Napoli and the interest expense on the Italian government's 1% loan to Banco di Napoli is used to pay down the interest-bearing receivable from the Italian government held by Banco di Napoli. The amount of the 1% loan from the Bank of Italy to Banco di Napoli is periodically reset based on the amount of SGA's incurred losses and the corresponding amount of net interest income (between the return on the government bonds and the interest expense on the Bank of Italy's loan) needed to cover such losses.

The loss of time value incurred by Sga up to December 31, 2002, has been covered by the former Banco di Napoli and by SANPAOLO IMI and recovered on the basis of the provisions of Law no. 588/96, using the methods recommended by the aforementioned Treasury Ministry decree of 1974. The recovery process has revealed a balance in favor of Central Bank equal to € 7 million, which on January 30, 2004 was lodged in a non interest-earning deposit with the same Central Bank. Also in this case the deposit is shown under "other assets" offset by "other liabilities". No further interventions were necessary after the 2002 year-end. With the transfer on July 1, 2003 of the business branch made up of the Southern Territorial Direction, all accounts held with SGA were transferred to Sanpaolo Banco di Napoli S.p.A..

As of December 31, 2004, loans of Sanpaolo Banco di Napoli S.p.A. in respect of SGA totaled € 841 million (€ 1,042 million as of December 31, 2003), of which € 814 million granted for the measures provided by law 588/96 (€ 1,013 as of December 31, 2003) and € 27 million disbursed for the ordinary activity of the company (€ 29 million as of December 31, 2003).

In relation to this item, the transfer of the business branch made up of the Southern Territorial Direction to the new company Sanpaolo Banco di Napoli S.p.A. also provides that SANPAOLO IMI is obliged to hold harmless Sanpaolo Banco di Napoli S.p.A. from the losses and/or liabilities which may arise in respect of loans to Società per la gestione di attività S.p.A. (Sga) deriving from the business transferred. Any losses which may arise on such loans must be covered by SANPAOLO IMI S.p.A. which, in turn, must commence recovery on the basis of the provisions of Law 588/96.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

(**)

They include basis swaps for € 19,938 million both in purchases and sales.

F-117

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Dealings in derivative contracts principally include transactions entered into within the scope of investment banking activities and to cover dealing portfolios. The results from the valuation of derivative contracts are revealed in the statement of income and described in the note concerning profits and losses on financial transactions of Note 23.

"Hedging" derivatives refer mainly to transactions to cover interest, exchange rate and/or share indexes risks on funding and/or lending activities. These mainly reflect the activities of the Parent Bank and its subsidiaries operating in the loans sector.

"Other transactions" principally refer to some types of derivative contracts included under structured financial instruments.

Derivative contracts included under structured financial instruments amount to € 9,531 million (€ 14,814 million as of December 31, 2003), at nominal value.

At year end the potential net loss on the aggregate value of derivative hedging contracts entered into by Group companies was calculated at € 561 million (€ 264 million as of December 31, 2003). In compliance with accounting policies, this amount was not recorded in the financial statements since the purpose of the derivative contracts in question is to hedge interest, market and/or exchange rate risks with regard to funding activities and/or lending activities. These contracts are, in fact, recorded on a consistent basis with those adopted for hedging transactions. It should be noted that if the assets and liabilities object of the above treatment were to be valued in the same way, the consequent result would generally offset the loss revealed above.

Forward transactions as of December 31, 2004, as shown in the above table, mainly reflect the activities of the Parent Bank and its subsidiaries operating in the loans sector and in dealing activities.

currency against currency	22	1,416		1,438
purchases against Euro	2,431	9,160		11,591
sales against Euro	105	7,187		7,292
(c) other instruments				
purchases				
sales				
3.2 without exchange of capital				
(a) currency				
currency against currency	14	30		44
purchases against Euro	37	35		72
sales against Euro	35	30	12	77
(b) other instruments(**)				
purchases	38,384	199,965	593	238,942
sales	21,355	243,062	8,517	272,934
Total	78,650	475,377	16,240	570,267

(*) They also include hedging derivatives belonging to the dealing portfolio for € 5,084 million.

(**) They include basis swaps for € 14,537 million and other index swap derivatives for € 18 million both in purchases and sales.

Financial information relating to derivative contracts and forward currency purchase/sale transactions

This section offers supplementary information on operations in derivative contracts according to the standards established by the Basel Committee on Bank Supervision and the International Organization of Securities Commissions (IOSCO).

The table below shows the notional nominal capital, by type, of forward currency purchase/sale transactions and derivative contracts on interest rates, exchange rates and stockmarket indexes for year 2004.

<i>Notional amounts</i> 12/31/04	Interest rate related	Exchange rate related	Stockmarket index related	Other	Total
			(€/mil)		
OTC trading contracts					
Forward(a)	25,435	3,513			28,948
Swap(b)	554,026	456			554,482
Options purchased	26,292	10,475	4,655		41,422
Options sold	41,060	9,925	6,548		57,533
Other derivative contracts	978	40	113		1,131
Exchange traded contracts					
Futures purchased	37,986	12	24		38,022
Futures sold	45,390	19	56		45,465
Futures		49			49
Options purchased	736		2,624		3,360
Options sold	453		2,236		2,689
Other derivative contracts					
Total trading contracts	732,356	24,489	16,256		773,101
Total non trading contracts	36,827	15,043	9,329		61,199
Total contracts(c)	769,183	39,532	25,585		834,300
including OTC contracts	684,617	39,453	20,646		744,716

(a) The caption includes the F.R.A. contracts and forward currency purchase/sale transactions.

(b) The caption mainly includes the I.R.S., C.I.R.S. contracts, and basis swaps.

(c) Includes basis swaps amounting to € 19,938 million and does not include forward currency transactions with an original duration of less than 2 days, amounting on the whole to € 3,658 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The table below shows the notional nominal capital, by type, of forward currency purchase/sale transactions and derivative contracts on interest rates, exchange rates and stockmarket indexes for year 2003.

<i>Notional amounts</i> 12/31/03	Interest rate related	Exchange rate related	Stockmarket index related	Other	Total
			(€/mil)		
OTC trading contracts					
Forward(a)	24,067	3,340			27,407
Swap(b)	305,875	629			306,504
Options purchased	17,948	8,641	7,019		33,608
Options sold	23,554	8,337	9,208		41,099
Other derivative contracts	958	227	18		1,203
Exchange traded contracts					
Futures purchased	3,569	2	33		3,604
Futures sold	42,839	14	288		43,141
Futures		6			6
Options purchased					
Options sold	605		377		982
Other derivative contracts	120		204		324
Total trading contracts	419,535	21,196	17,147		457,878
Total non trading contracts	52,625	17,701	14,408		84,734
Total contracts(c)	472,160	38,897	31,555		542,612
including OTC contracts	425,027	38,874	30,654		494,555

- (a) The caption includes the F.R.A. contracts and forward currency purchase/sale transactions.
- (b) The caption mainly includes the I.R.S., C.I.R.S. contracts, and basis swaps.
- (c) Includes basis swaps amounting to € 14,537 million and other index swap derivatives for € 18 million, and does not include forward currency transactions with an original duration of less than 2 days, amounting on the whole to € 2,900 million.

The following tables show the residual duration of the above OTC transaction for year 2004 and 2003.

<i>Residual maturity of notional amounts underlying OTC derivative contracts</i> 12/31/2004	Up to 12 months	Between 1 and 5 years	Beyond 5 years	Total
				(€/mil)
Interest rate related	286,031	252,035	146,551	684,617
Exchange rate related	33,899	4,971	583	39,453
Stockmarket index related	7,706	10,039	2,901	20,646
Other contracts				
<i>Residual maturity of notional amounts underlying OTC derivative contracts</i> 12/31/2003	Up to 12 months	Between 1 and 5 years	Beyond 5 years	Total
				(€/mil)

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Residual maturity of notional amounts underlying OTC derivative contracts

12/31/2003

	Up to 12 months	Between 1 and 5 years	Beyond 5 years	Total
Interest rate related	174,667	157,425	92,935	425,027
Exchange rate related	33,618	4,967	289	38,874

Other contracts				

F-121

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The following tables report the credit risk equivalent relating to OTC contracts broken down into their various components: positive market value and add on for year 2004 and 2003.

<i>Notional amounts, fair values and similar add on</i> 12/31/04	Interest rate related	Exchange rate related	Equity index related	Other	Total
			(€/mil)		
Notional amounts	684,617	39,453	20,646		744,716
A. Fair value of OTC trading contracts					
A.1 positive fair value	10,934	460	471		11,865
A.2 negative fair value	(11,023)	(454)	(406)		(11,883)
B. Add on	3,118	210	374		3,702
C. Fair value of OTC non-trading contracts					
C.1 positive fair value	509	270	544		1,323
C.2 negative fair value	(1,043)	(988)	(191)		(2,222)
D. Add on	108	270	283		661
Credit risk equivalent (A.1+B+C.1+D)	14,669	1,210	1,672		17,551
<i>Notional amounts, fair values and similar add on</i> 12/31/03	Interest rate related	Exchange rate related	Equity index related	Other	Total
			(€/mil)		
Notional amounts	425,027	38,874	30,654		494,555
A. Fair value of OTC trading contracts					
A.1 positive fair value	5,374	343	426		6,143
A.2 negative fair value	(5,450)	(416)	(302)		(6,168)
B. Add on	1,842	178	501		2,521
C. Fair value of OTC non-trading contracts					
C.1 positive fair value	659	284	533		1,476
C.2 negative fair value	(905)	(1,046)	(195)		(2,146)
D. Add on	149	302	371		822
Credit risk equivalent (A.1+ B+C.1+D)	8,024	1,107	1,831	0	10,962

The following tables report the positive and negative fair value of quoted contracts for year 2004 and 2003:

<i>Notional amounts and fair values of quoted contracts</i> 12/31/04	Interest rate related	Exchange rate related	Equity index related	Other	Total
			(€/mil)		
Notional amounts	84,566	79	4,939		89,584

A. Fair value of quoted trading contracts

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

<i>Notional amounts and fair values of quoted contracts</i> 12/31/04	Interest rate related	Exchange rate related	Equity index related	Other	Total
A.1 positive fair value	7	2	3		12
A.2 negative fair value	(18)	(1)	(2)		(21)
B. Fair value of quoted non-trading contracts					
C.1 positive fair value					
C.2 negative fair value					

F-122

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

<i>Notional amounts and fair values of quoted contracts</i> 12/31/03	Interest rate related	Exchange rate related	Equity index related	Other	Total
			(€/mil)		
Notional amounts	47,133	23	901		48,057
A. Fair value of quoted trading contracts					
A.1 positive fair value			17		17
A.2 negative fair value			(14)		(14)
B. Fair value of quoted non-trading contracts					
C.1 positive fair value					
C.2 negative fair value					

Market values of hedging and dealing transactions arranged with third parties have been calculated using the criteria established by the Bank of Italy to determine the solvency ratio. The market values identified in the table above derive from the application of the aforementioned criteria which provide for inclusion in the calculation of the market value of accrued income and expenses currently maturing as well as the result deriving from the current rate revaluation of the principal amount of cross-currency interest rate swaps to be exchanged at maturity.

Lastly, the following tables show the breakdown of credit risk equivalent on OTC contracts by type of counterparty for year 2004 and 2003

<i>Credit quality of OTC derivative contracts, by counterparty</i> 12/31/04	Positive fair value	Add on	Credit risk equivalent(a) (current value)
			(€/mil)
Governments and central banks		7	7
Banks	11,849	3,964	15,813
Other operators	1,339	392	1,731
Total	13,188	4,363	17,551

(a) The credit risk equivalent reported in this table includes transactions with an original life not exceeding 14 days. The existence of Master Netting Agreements allows a reduction in the above equivalent credit risk of €12,523 million in respect of banks and €137 million in respect of other operators.

<i>Credit quality of OTC derivative contracts, by counterparty</i> 12/31/03	Positive fair value	Add on	Credit risk equivalent(a) (current value)
			(€/mil)
Governments and central banks	10	12	22
Banks	6,735	2,999	9,734
Other operators	874	332	1,206
Total	7,619	3,343	10,962

(a)

The credit risk equivalent reported in this table includes transactions with an original life not exceeding 14 days. The existence of Master Netting Agreements allows a reduction in the above equivalent credit risk of €4,810 million in respect of banks and €153 million in respect of other operators.

F-123

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

The aforementioned transactions are not normally covered by real nor personal guarantees. There have been no losses on loans for derivatives during the year, and there are no outstanding derivative contracts waived, but not settled.

The inherent risks of derivative contracts entered into by Group companies, including those "hedging contracts" whose current value is not shown in the financial statements, are subject to monitoring within the context of the complete system of risk management and control set up by the Group.

A description of the organizational model and the results of monitoring the evolution of risks for 2004 is reported in the appropriate section of the Report on Group Operations ("Risk management and control").

Credit derivatives

Transactions in credit derivatives carried out by the Group as of December 31, 2004 and as of December 31, 2003 are analyzed below:

(Table 10.6.B.1)

12/31/04

Categories of operations

Categories of operations	Negotiation	Other transaction	Total
	(€/mil)		
1. Hedging purchases			
1.1 With exchange of capital			
credit default swap	833	233	1,066
credit linked note		202	202
1.2 Without exchange of capital			
credit default swap	250		250
2. Hedging sales			
2.1 With exchange of capital			
credit default swap	798	372	1,170
credit linked note		40	40
2.2 Without exchange of capital			
credit default swap	150		150
credit linked note	6	30	36
Total	2,037	877	2,914

Table above comprises credit derivatives recorded by the Parent Bank, included under structured financial instruments amounting to €278 million (€356 million as of December 31, 2003), at nominal value.

(Table 10.6.B.I)

12/31/03

Categories of operations	Negotiation	Other transaction	Total
		(€/mil)	
1. Hedging purchases			
1.1 With exchange of capital			
credit default swap	321	351	672
1.2 Without exchange of capital			
credit default swap			
2. Hedging sales			
2.1 With exchange of capital			
credit default swap	318	426	744
credit linked note		40	40
2.2 Without exchange of capital			
credit default swap	6	58	64
Total	645	875	1,520

Other information relating to guarantees

The classification of guarantees given by category of counterparty is provided in Note 19, while forward transactions related to dealing on behalf of third parties are described in Note 20.

(19) CONCENTRATION AND DISTRIBUTION OF ASSETS AND LIABILITIES**Significant exposures**

The table below shows the positions defined as "significant exposures" by the Bank of Italy in compliance with EC guidelines. For this purpose, the positions are considered significant if the overall exposure to a single client (or group of companies) on a consolidated basis is equal to or greater than 10% of the Group's regulatory capital. Exposure is calculated using a system of weighting positions exposed to lending risk, which takes into account the nature of the counterparty and the guarantees received.

(Table 11.1 B.I.)

	12/31/04	12/31/03
(a) Amount (€/mil)	6,350	7,290
(b) Number	3	3

Distribution of loans to customers, by category of borrower

Loans to customers are distributed by main category of borrower as follows:

(Table 11.2 B.I.)

	12/31/04	12/31/03
	(€/mil)	
(a) Governments	6,713	7,551
(b) Other public entities	6,855	6,275
(c) Non-financial businesses	62,860	68,822
(d) Financial institutions	11,405	10,222
(e) Family businesses	6,051	5,910
(f) Other operators	28,023	25,819
Total	121,907	124,599

Distribution of loans to resident non-financial companies and family businesses

The distribution of loans to non-financial companies and family businesses resident in Italy is detailed below, by sector to which the borrower belongs:

(Table 11.3 B.I.)

	12/31/04	12/31/03
	(€/mil)	
(a) Other services for sale	13,943	13,979
(b) Commerce, salvage and repairs	9,563	9,693
(c) Construction and public works	6,956	7,098
(d) Energy products	3,966	4,656
(e) Transport	3,558	2,874
(f) Other sectors	25,680	30,322
Total	63,666	68,622

Distribution of credit derivatives by category of borrower

As of December 31, 2004 credit derivatives, equal to € 2,914 million, classified in relation to category of counterparty are distributed as follows:

€ 2,017 million to banks;

€ 867 million to financial institutions;

€ 30 million to other operators.

As of December 31, 2003 credit derivatives, equal to € 1,520 million, classified in relation to category of counterparty are distributed as follows:

€ 1,099 million to banks;

€ 385 million to financial institutions;

€ 36 million to other operators.

Distribution of guarantees given, by category of counterparty

Guarantees given by the Group are classified by category of counterparty as follows:

(Table 11.4 B.I.)

	12/31/04	12/31/03
	(€/mil)	
(a) Governments	24	
(b) Other public entities	48	219
(c) Banks	591	726

The "liquidity", "rates" and "exchange" risks inherent in the distribution by expiry, type of rate and currency of Group assets, liabilities and forward transactions (of which the two tables above supply a simplified representation with reference to the precise situation at the end of the year), are subject to monitoring within the context of the complete system of risk management and control set up by the Group.

A description of the organizational model and the results of monitoring the evolution of risks for 2004 is reported in the appropriate section of the Report on Group Operations ("Risk management and control").

Securitization transactions

Group securitization transactions

As of December 31, 2004 the SANPAOLO IMI Group accounts show two securitization transactions, both carried out by the subsidiary Sanpaolo Leasint S.p.A..

SPLIT 1 Operation In 1997 the company made a non-recourse assignment of performing loans under leasing contracts as per Law 52/91 for a total book value of € 504 million, in order to free part of the loan portfolio, generating sources of additional liquidity and, at the same time, benefiting from credit risk containment. The initial transfers of loans by Sanpaolo Leasint S.p.A. ("Leasint") was accounted for under Italian GAAP as sales at book value in accordance with Law No. 52/91. Consequently, the loans ceased to be recognized on the balance sheets of Leasint and therefore the consolidated balance sheet of SANPAOLO IMI, with no related gain or loss. In order to effect the sale of the loans, a special purpose vehicle ("**SPV**") was established and the transaction was structured so that the SPV issued and sold interest-bearing bonds on the open market and used the proceeds to acquire the loans of Leasint. Under the terms of the transaction, the SPV issued three tranches of debt (Classes A, B and C), all with differing credit ratings, such that the Class C bonds were considered subordinated to the Class A and Class B bonds. Leasint was required to purchase all the Class C bonds in the amount of €50 million. The purchases were made by Leasint to ensure that the residual risk related to the transferred loans remained with Leasint. In conjunction with the acquisition of the Class C bonds issued by the SPV, Leasint recognized an investment in debt securities in its balance sheet. The agreements governing the transfer of the loans by Leasint, although explicitly without recourse, do not protect Leasint from the residual risks of the transferred loans. In particular, Leasint receives interest payments on the Class C bonds of the SPV that it holds, equal to the difference between the interest income on the transferred portfolio and the interest expenses on the Class A and Class B bonds. Those interest payments are reduced to the extent that the transferred loans are deemed to be uncollectible. If the amount of loans deemed to be uncollectible exceeds the amount of interest due to Leasint on the bonds it holds, there is a corresponding reduction in the principal amount of such bonds, up to the entire book value of the Class C bond (€50 million). To date there have been no reductions in the principal amount of the Class C bonds held by Leasint. The net interest income recognized by SANPAOLO IMI is equal to the difference between the interest income on that loan portfolio and the interest expense on the bonds issued by the relevant special purpose vehicle. Under an accounting point of view, the impact of the transaction on the income statement in the years subsequent the securitization was the same as if such receivables had remained on SANPAOLO IMI balance sheet.

In 2004 and 2003 no revolving assignments were made against the original securitization transaction, in order to ensure the equivalence of the initial securitized assets to the securities issued up to the contract date set for repayment of the securities. The assigned portfolio is subject to continuous monitoring which consists of preparing a quarterly settlement report for the various entities involved (rating agencies, factoring companies, vehicle companies and trustees) with a detailed explanation of the state of the loans and of collections during the period. The servicer activity commits the company to the separate administration, management and collection of the portfolio originally assigned and of the loans subsequently due, as well as handling any recovery procedures. As of 31 December 2004, loans to be collected amounted to € 1million (€ 13 million as of December 31, 2003). The operation was concluded in January 2005 with the reimbursement of the subordinated security.

SPLIT 2 Operation In the last quarter of 2004, Sanpaolo Leasint made a non-recourse assignment of receivables deriving from performing leasing contracts to Split2 Srl, a vehicle company set up especially in accordance with law no. 139/99. The leasing contracts, involving property, automobiles and operating assets, total € 1,805 million. In addition to the portfolio and under certain conditions, the structure of the operation provides for the disposal of other portfolios on a quarterly basis to replace the receivables collected by Split2 in the first 18 months (revolving period). With the aim of collecting the funding necessary for the purchase of these loans, Split2 issued three classes of securities with ratings assigned by the three agencies (Moody's, S&P and Fitch). They were successfully distributed on the market and Sanpaolo Leasint wholly subscribed to a Class C class for € 18 million. The object of this operation is to diversify the company's sources of financing, to match funding to the underlying loans, as well as to free up economic and regulatory capital. As servicer, Sanpaolo Leasint continues to manage the collection of assigned loans and to maintain relations directly with customers, transferring the capital and interest collected on loans to accounts opened in the name of SPV at the depository collecting bank. It also provides the periodical information about the portfolio, required by the Rating Agencies for monitoring purposes. The amount collected as servicer totaled € 102 million as of December 31, 2004. The underlying securitization activities to junior securities as of December 31, 2004 amount to € 1,726 million and wholly refer to performing loans from leasing operations.

Securities in portfolio representing third party securitization transactions

As of December 31, 2004, the Group holds investment and dealing securities from third party securitizations, as shown in the following table:

12/31/04 Type of underlying activities	Loan quality	book value			Total
		"Senior" securities	"Mezzanine" securities	"Junior" securities	
(€/mil)					
Dealing securities portfolio					
Central and local authorities	Performing	901	35	20	956
Building mortgage loans	Performing	3			3
Commercial/industrial/agricultural mortgage loans	Performing	1			1
Consumer loans	Performing	14			14
Leasing	Performing	8			8
Health care receivable	Performing	399			399
Public real estate	Performing	270			270
Social security contributions	Performing	166			166
Tax credits	Performing	415			415
Other loans	Performing	3	10		13
		2,180	45	20	2,245

As of 31 December 2004, the investment securities portfolio was held solely by the Parent Bank and was almost written down in full.

The underlying activities to junior securities deriving from third party securitization transactions (pro quota value) amount to € 345 million.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

As of December 31, 2003, the Group held investment and dealing securities from third party securitizations, as shown in the following table:

12/31/03 Type of underlying activities	Loan quality	book value			Total
		"Senior" securities	"Mezzanine" securities	"Junior" securities	
(€/mil)					
Investment securities portfolio					
Leasing	Performing	19			19
Other loans	Performing	1			1
		20			20
Dealing securities portfolio					
Central and local authorities	Performing	805	35	20	860
Building mortgage loans	Performing	1			1
Consumer loans	Performing	14	11		25
Leasing	Performing	2			2
Health care receivable	Performing	401			401

Social security contributions	Performing	56			56
	Problem loans	5			5
Other loans	Performing	1			1
		1,302	46	20	1,368
		1,322	46	20	1,388

As of December 31, 2003 the investment securities portfolio is shown net of adjustments in value totaling € 18 million, of which € 4 million were booked during the year.

The underlying activities to junior securities deriving from third party securitization transactions (proquota value) amount to € 354 million.

(20) ADMINISTRATION AND DEALING ON BEHALF OF THIRD PARTIES

Dealing in securities

Purchases and sales made during the year on behalf of third parties were as follows:

(Table 12.1 B.1.)	12/31/04	12/31/03
(€/mil)		
(a) Purchases		
1. settled	117,402	114,927
2. not settled	16	23
Total purchases	117,418	114,950
(b) Sales		
1. settled	104,664	126,552

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

(Table 12.1 B.1.)

	12/31/04	12/31/03
2. not settled	16	10
Total sales	104,680	126,562

Purchase and sale transactions performed on behalf of third parties include, respectively, € 32,524 million and € 19,550 million for dealings in derivative contracts (respectively € 9,201 million and € 21,406 million as of December 31, 2003).

Other transactions		

Research and Development

Applied Research Reserve

SANPAOLO IMI manages transactions arising from applications received by December 31, 1999 out of the Applied Research Reserve. As of December 31, 2004, there are resolutions to be stipulated for € 57 million and disbursements to be made for € 387 million (respectively € 115 million and

€ 587 million as of December 31, 2003) As of December 31, 2003 there were also loans for € 697 million.

Reserve for Research Grants

SANPAOLO IMI continued to provide services to the Ministry of Education, Universities and Research (MIUR) for the management of industrial research projects and researcher training schemes using the Reserve for Research Grants. During 2004, 87 applications were received for research investment for € 295 million and MIUR deliberated on financing of € 151 million. During 2003, 113 applications were received for research investment for € 386 million and MIUR deliberated on financing of € 339 million. The reduction in applications was reflected in the lack of funds, which led the Ministry to completely suspend the "reception desk" for applications, which had already been limited to the areas of Southern Italy, with effect from March 3, 2004.

Reserve for Technological Innovation

SANPAOLO IMI continued to provide services to the Ministry for Productive Activities (MAP) for the management of development projects utilizing the Reserve for Technological Innovation. The "reception desk" was suspended by MAP in January 2003 owing to lack of funds. Activities continue exclusively on the passing of Notices reserved for projects within technological sectors considered to be of prominence or to be carried out in particular areas of Italy. During 2003 MAP deliberated on financing of € 270 million. During 2004, 203 applications were received for research investments for € 236 million and MAP deliberated on financing of € 224 million.

During 2004, activities connected to the three reserves generated a total € 10.5 million commission from the Public Administration (€ 9 million during 2003).

Guarantee Fund for small and medium-sized enterprises in Southern Italy (Law 341/95)

With the Convention stipulated between the Italian Treasury and the Bank on December 21, 1995, as approved and activated by Decree of the Director-General of the Treasury dated January 5, 1996, SANPAOLO IMI, in its capacity as Managing Body, has been granted the concession to this Fund established under Law 341/1995.

The purpose of Law 341/1995 is to promote rationalization of the financial situation of small and medium-sized enterprises in Southern Italy, as defined by EU parameters. This involves measures of various types, from interest-relief grants on loans designed to convert short-term bank borrowing into medium and long-term loans, to the granting of supplementary guarantees on investment loans, for the purchase of equity investments and for the debt consolidation described above.

Acceptance of new applications has been closed since the beginning of 2000. As of December 31, 2004, there are 816 applications for € 332 million, broken down as follows:

€ 318 million for the consolidation of short-term debt for which contributions are being paid;

€ 14 million for investment loans, of which an application for € 1 million is not yet completed.

As of December 31, 2003, there were 1,564 applications for € 626 million, broken down as follows:

€ 611 million relating to the consolidation of short-term debt (of which € 610 million already being paid and € 1 million waiting for the final documentation);

€ 13 million for investment loans; an application for € 1 million not yet completed;

€ 1 million for the purchase of investments.

During 2003 the management activities for this Ministry generated € 0.3 million commission.

Notes accepted after collection and taxation

The Group has received instructions to collect third-party receivables as part of its portfolio transactions. The nominal value of such receivables is € 15,781 million (€ 33,700 million as of December 31, 2003).

Furthermore, through the subsidiary Gest Line, the Group manages the collection and recovery of taxation and duties for € 36,666 million (€ 32,956 million as of December 31, 2003).

Third-party portion of syndicated loans

The portion of syndicated loans arranged by the Parent Bank for third parties without a representation mandate totaled € 559 million at period end (€ 564 million as of December 31, 2003).

Portfolio management services rendered by third parties

The amount of portfolio management services rendered by third parties and offered to customers through Group companies as of December 31, 2004 amounted to € 3,760 million (€ 4,704 million as of December 31, 2003) broken down as follows: € 1,061 million of mutual funds, € 505 million of fund-based portfolio management, € 535 million of portfolio management schemes and € 1,659 million in insurance policies (respectively € 1,184 million, € 917 million, € 497 million and € 2,106 as of December 31, 2003).

(21) INTEREST

depreciation of property	82	93	92
long-term writedowns of property		3	
depreciation of furniture and installations	156	156	202
Total	656	642	753

Individual assets have been written down with reference to their remaining useful lives using, in most cases, the maximum fiscally-allowed rates, including the provision of accelerated depreciation.

In 2004, "Amortization of goodwill arising on consolidation" includes the investments in Banque Privee Wargny, Financiere Fideuram and Cassa dei Risparmi di Forlì reflecting, in addition to the portion of ordinary amortization for 2004, the extraordinary adjustment of a long-term nature of € 16 million for the French subsidiaries and € 40 million for the Cassa, made in order to align their value to that shown in the Parent Bank financial statements of Banca Fideuram and of the Parent Bank.

In 2003 "Amortization of goodwill arising on consolidation" included the investment in Banka Koper d.d. reflecting, in addition to the portion of ordinary amortization for 2003, the extraordinary adjustment of € 8 million, made in order to align the value of the investment in the Slovenian bank to

the estimated opinion obtained in view of transferring the company to Sanpaolo IMI Internazionale S.p.A..

In 2002 "Amortization of goodwill arising on consolidation" included for the French group Fideuram Wargny, besides the ordinary amortization for the year 2002, a writedown of € 44 million, made to take account of the downward trend in financial markets and of a more prudent evaluation of prospects of future profit for the subsidiaries.

Provisions for risks and charges (caption 100)

Provisions for risks and charges of € 231 million during 2004 reflect the consolidation of the corresponding provisions of the Parent Bank for € 127 million, designed as follows:

€ 91 million to strengthen the fund against losses on legal disputes, to reflect the increase in the claims by receivers of bankrupt customers recorded at the end of 2004, among which those filed by the Commission for the Parmalat Group companies;

€ 23 million to cover other potential risks, among which guarantees given in respect of company transactions;

€ 13 million to increase the reserve for other personnel costs, of which € 6 million for charges relating to supplementary pension funds and € 6 million to cover long-service bonuses to employees.

Provisions made by subsidiaries (€ 104 million), comprise € 39 million of provisions made by the Cardine Finanziaria and SANPAOLO Banco Napoli Bank Networks; the remaining € 65 million refer to:

€ 32 million for provisions made by the subsidiaries operating in the placement and management of financial products against the risks involved in such activities. In particular, € 30 million refer to the contribution by Banca Fideuram and its subsidiaries to cover probable losses on commissions paid in advance, legal disputes (including bankruptcies) and indemnity contracts to Private bankers;

€ 33 million for provisions made by other subsidiaries. This provision mainly reflects the accruals made for the restructuring of the Private Banking business, following the merger between Sanpaolo Bank SA and IMI Bank Lux SA (€ 14 million) and for the risks inherent in the tax collection business (€ 8 million).

Provisions for risks and charges of € 195 million during 2003 reflect the consolidation of the corresponding provisions of the Parent Bank for € 117 million, designed as follows:

€ 57 million to strengthen the fund against losses on legal disputes;

€ 38 million to cover potential charges among which guarantees given in respect of extraordinary transactions and those relating to risks connected to dealing activities in securities with customers;

€ 22 million to increase the reserve for other personnel costs, of which € 16 million for charges relating to supplementary pension funds and € 6 million to cover long-service bonuses to employees.

Provisions made by subsidiaries (€ 78 million) comprise € 21 million of provisions made by the "Bank Networks" held by Cardine Finanziaria and by SANPAOLO Banco di Napoli; the remaining € 57 million refers to provisions made by subsidiaries against the risks involved in operating

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

in the placement and management of financial products (€ 37 million) and to provisions made by other subsidiaries (€ 20 million).

F-142

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

Provisions for risks and charges, for € 261 million, made during 2002 reflect the consolidation of the corresponding provisions of the Parent Bank for € 149 million and € 18 million for provisions made by during the year by "Network Banks" held by Cardine Finanziaria. The remainder refers to provisions of € 68 million made by subsidiaries operating in the placement and management of financial products against the risks involved in such activities and € 26 million accrued by other subsidiaries.

The provisions made by the Parent Bank are allocated as follows:

€ 79 million for potential charges deriving from any renegotiation of mortgage loans, premium transactions and other potential liabilities;

€ 48 million to strengthen the fund against losses on legal disputes;

€ 22 million to increase the coverage of the reserve for other personnel costs, of which € 6 million to cover long-service bonuses to employees and € 6 million to integrate the provisions established to balance the technical deficit of the Bank's employee pension fund.

The provisions made by the "Network Banks" are allocated as follows:

€ 5 million against potential costs deriving from the renegotiation of mortgage loans;

€ 8 million to increase the reserve for other risks and charges against losses on legal disputes, especially claims from bankruptcy liquidators;

€ 5 million for other risks and charges.

The provisions made by the other subsidiaries operating in financial services for families are made up of prudent provisions against risks connected with the distribution and management of financial products.

Banca Popolare di Lodi S.c.r.l.			1
Metzler International A.G.			1
Other minor equity investments	2	2	4
Total	78	150	542

(1)

The figure includes the effect of the writedown of the entire investment in Hutchinson 3G Italia S.p.A., including the portion held through the subsidiary 3G Mobile Investments S.A. which was consolidated using the equity method. This treatment is aimed at disclosing the effect of the writedown in the value of the investment in a single balance sheet caption.

During 2002 in the context of the purchase agreement for shares in Banca Comerciala Sanpaolo IMI Bank Romania S.A. (former West Bank S.A.), the former Cardine Banca granted some shareholders a put option on their shares, for a unit price not lower than that set for the acquisition of the majority shareholding in Banca Comerciala by Cardine Banca. With respect to this put option, SANPAOLO IMI booked a commitment for € 5 million.

Considering that the investment in West Bank S.A. was written down to reflect the reduction in equity value from the effect of the losses for the year and that the put options are valued at cost and eventually written down to reflect any permanent losses in value, the December 31, 2002 financial statements were adjusted by € 5 million to reflect the proportionate value of the put options in respect of the write down of the investment.

Adjustments to other investment securities, equal to € 28 million, is composed of € 23 million for the adjustment made by the Parent Bank on a put option granted to the Fondazione shareholder of Cassa dei Risparmi di Forlì, € 4 million for an adjustment to the value of investment securities and € 1 million for other investment securities.

Writebacks of adjustments to financial fixed assets (caption 160)

Writebacks of fixed financial assets (€ 124 million) refer to writebacks of equity investments for € 123 million (of which € 122 million refer to Santander Central Hispano S.A.) and to writebacks of investment securities for € 1million. The writeback of the investment in SCH was made on the basis of precise quotations at year end (€ 9.13 per share) for the stake held by SANPAOLOIMI International SA and to the purchase cost of the stake held by the Parent Bank (€ 8.7 per share), to reflect their recovery, as a result of which the reasons for the writedowns ("impairment") made in 2001 and 2002 ceased to apply.

Writebacks of fixed financial assets (€ 218 million) refer to writebacks of equity investments for € 216 million (of which € 215 million refer to Santander Central Hispano S.A.) and to writebacks of investment securities for € 2 million.

Writebacks of fixed financial assets in 2002 (€ 8 million) refer to writebacks of equity investments for € 3 million and writebacks of investment securities for € 5 million.

Changes in the reserve for general banking risks (caption 230)

In 2004 movements in the reserve were made solely by subsidiaries and show accruals of € 2 million.

In 2003 movements in the reserve were made solely by subsidiaries, showing utilizations of € 13 million and accruals of € 4 million, with net utilization at consolidated level equal to € 9 million.

During 2002 the Reserve for General Banking Risks has been fully used by the Parent Bank, amounting to € 358 million (including the allocation of the merger goodwill from the incorporation of Cardine Banca). Residual use at consolidated level (€ 6 million) reflects the movements of the subsidiaries.

This use has been made to cover the negative impact on net income of the devaluations of the listed investment portfolio, also taking account of the need to optimize the Group's tax position.

(26) OTHER CONSOLIDATED STATEMENT OF INCOME CAPTIONS

Total	323	548	575

(*) This caption refers to the disposal of contracts connected with the shareholding in Banca Agricola Mantovana, disposed of simultaneously with the booking of losses for the same amount.

(**) This caption refers to the income recorded at consolidation level following the disposal by Invesp, already holder of 9.28% of Banca Fideuram, of 6,793,642 SANPAOLO IMI shares received in exchange after the partial spin off from Banca Fideuram of Fideuram Vita.

(***) The "Realignment for tax collection" derives from the accounting adjustments made to eliminate the previous disalignment in respect of IT archives or the inventories prepared to this specific purpose by the subsidiary Gest Line.

(****) The detail of gains on investments is shown in Note 11 "Investments".

Gains from the sale of companies already included in consolidation (line by line or proportionally) refer to the sale of the total shareholding in Sanpaolo Bank Austria (€3 million). The balance for 2003 includes the profits realized from the sale of 60% interest in Banque Sanpaolo (€240 million) and from the first tranche (equal to 20%) of the sale of Finconsumo Banca (€44 million). Both companies were included in consolidation in 2002 (respectively line by line and proportionally).

In 2003, the use of excess reserves included income of €62 million from the release of reserves for potential charges relating to the renegotiation of Parent Bank mortgage loans, in excess in respect of the most recent regulatory framework of reference.

Gains on investment securities referred to the Parent Bank and essentially derive from the disposal of corporate bonds in the context of the redefinition of investment portfolio following the merger operations concluded in 2003.

Gains on other financial fixed assets referred to income generated by the Parent Bank in respect of closing derivative contracts hedging investment securities.

Extraordinary expense (caption 200)

Total	175	580	248

(*)

The "Realignment for tax collection" derives from the accounting adjustments made to eliminate the previous disalignment in respect of IT archives or the inventories prepared to this specific purpose by the subsidiary Gest Line.

(**)

The figures as of December 31, 2002 refer to the disposal of the shareholding in Banca Agricola Mantovana, disposed of simultaneously with the derivative contracts connected with this shareholding with the booking of contingent assets for the same amount.

"Extraordinary expenses for supplementary pension funds" is composed of €8 million for the outsourcing of the supplementary pension fund of Cassa di Risparmio in Bologna and €7 million for the mathematical adjustment to the Friulcassa fixed performance supplementary pension fund.

In 2004, with respect to the "Tax reform and benefits" initiatives, SANPAOLO IMI and its subsidiaries incurred charges totaling €10 million, of which €3 million were charged to the statement of income for 2004 and €7 million economically neutralized as an effect of the use of pre-existing reserves. More specifically, such charge refers to companies consolidated on a line by line basis for €5 million (€3 million of which is recorded to the statement of income as "extraordinary items" and €2 million compensated by the use of pre existing funds) and to subsidiary companies consolidated using the net equity method for €5 million.

In 2003, with respect to the "Tax reform and benefits" initiatives, SANPAOLO IMI and its subsidiaries incurred charges totaling €48 million, of which €27 million were charged to the statement of income for 2003 and €21 million economically neutralized as an effect of the use of pre-existing reserves. More specifically, such charge refers to companies consolidated on a line by line basis for €36 million (€16 million of which is recorded to the statement of income as "extraordinary items" and €20 million compensated by the use of pre-existing funds) and to subsidiary companies consolidated using the net equity method for €12 million (€11 million of which is recorded to the consolidated

statement of income as "Profit (losses) from investments carried at equity" and €1 million compensated by the use of pre-existing reserves).

Expenses for staff leaving incentives principally include accruals made by the Parent Bank (€15 million). In 2003 they included accruals made by the Parent Bank (€376 million) and by former Cardine bank networks (€80 million).

Losses on investments refer to €50 million for the loss arising from the transfer of the investment in CDC Ixis to the company vehicles IXIS Asset Management Group S.A. and Ixis Corporate Investment Bank, in which the Parent Bank repositioned the investment following the restructuring of CNCE.

In 2003, losses on investments refer mainly to the disposal of investments in Olivetti S.p.A. (€3 million). Losses on other financial fixed assets refer to Parent Bank charges in respect of closing derivative contracts hedging investment securities.

In 2002, restructuring costs include provisions made for the restructuring of the tax collections sector (€13 million) and for the charges expensed to the statement of income for the announced disposal of IMIWEB Bank (€9 million).

Income taxes for the year (caption 240)

Analysis of caption 240 "Income taxes for the year" (B.I instruction dated 08/03/99)

	2004	2003	2002
	(€/mil)		
1. Current income taxes	524	500	932
2. Change in deferred tax assets	89	290	368
3. Change in deferred tax liabilities	45	(133)	(850)
4. Income taxes for the year	658	657	450

Income taxes for the year 2004, totaling €658 million, established a Group tax rate of 31.3%, lower than that registered in 2003 (38.9%). This drop essentially refers to the one percentage point reduction in the IRES tax rate and to the introduction of a new system of income and charges related to equity investments, which more than compensated the higher charges deriving from the wider tax base for the regional tax on business activities introduced by the 2004 corrective measures. For completeness it is highlighted that in 2004 the Bank perfected the agreements within the Group necessary to activate the "National fiscal consolidation".

Income taxes for the year 2003, totaling €657 million, established a Group tax rate of 39.4%, lower than that registered in 2002 (44.2%). The improvement was the result of the two percentage point reduction in IRPEG (Corporate Income Tax) and the half percentage point reduction in IRAP (Regional Income Tax), and by the higher amount of income taxable at reduced rates or not subject to IRAP, such as writebacks of equity investments, gains for the sale of shareholdings and dividends, which balanced the non-deductibility in terms of IRAP of staff leaving expenses.

(27) OTHER INFORMATION REGARDING THE CONSOLIDATED STATEMENT OF INCOME**Geographical distribution of revenues**

The geographical distribution of revenues, based on the location of the Group's companies and their branches for years 2004, 2003 and 2002, is as follows:

<i>(Table 7.1 B.I.)</i>	2004				2003			
	Italy	Other EU countries	Other countries	Total	Italy	Other EU countries	Other countries	Total
	(€/mil)

(28) OTHER INFORMATION**DIRECTORS AND STATUTORY AUDITORS****Remuneration**

The remuneration of Directors, including the variable component, and Statutory Auditors for the performance of their duties in the Parent Bank and in the subsidiary companies is as follows:

<i>(Table 1.1 B.I.)</i>	2004	2003	2002
	(€/mil)		
Directors(*)	15	12	8
Statutory Auditors	1	1	1

(*)

This caption does not include € 0.8 million (€ 1.6 million in 2003 and € 0.8 million in 2002) received by the Directors for similar activities performed at other Group companies which they paid back to the Parent Bank.

The captions in the table above include the remuneration paid in 2004 to the Directors and Auditors of Prospettive 2001 and Invesp, which were merged into SANPAOLO IMI S.p.A. in 2004 and the remuneration paid in 2003 to the Directors and Auditors of Cardine Finanziaria, which was merged into SANPAOLO IMI S.p.A. in 2003. The figures in the table include also the remuneration toward the Directors and Statutory Auditors of Cardine Banca S.p.A. for the period before its merger by incorporation with SANPAOLO IMI S.p.A. (1/1/02-5/31/02).

(*) Date of Shareholders' meeting called to approve the financial statements for the year.

(1) This includes

for the **Chairman and Deputy Chairman**, the emolument corresponding to the profit for the year 2003, divided proportionally to their presence while both serving as Vice Presidents at meetings held during the year, on the basis of a motion of the Board of Directors following the approval of the financial statements for 2003. The Board of Directors' meeting of May 11, 2004 set an allinclusive fixed annual remuneration for the President and Vice President for the year 2004;

for the **Managing Director and Chief Executive Officer** the variable part of the emolument for 2003. With regard to the Chief Executive Officer, the amount also includes the entry bonus paid in 2004 equivalent to € 1,750 thousand;

for the **Directors**, the emolument corresponding to the profit for the year 2003, divided proportionally to their presence at meetings held during the year, on the basis of a motion of the Board of Directors following the approval of the financial statements for 2003. For the year 2004, the amount due calculated according to the Group results totals € 2,090,000. Since the distribution to each member will be made after the Shareholders' meeting to approve the 2003 financial statements, such consideration will be reported in the relevant table attached to the financial statements for the year 2005.

(2) Emoluments matured with SANPAOLO IMI S.p.A. subsidiary companies.

(3) Members of the Executive Committee.

(4) Members of the Board of Directors stepping down from office in 2004.

(5) Members of the Board of Directors stepping down from office in 2003.

(a) € 466,000 paid to SANPAOLO IMI S.p.A..

(b) € 11,000 paid to SANPAOLO IMI S.p.A..

(c) € 91,000 paid to SANPAOLO IMI S.p.A..

(d) In addition to the amount shown in the table, € 7,000 in emoluments of office and € 122,000 in bonus and other incentives (relating to the variable part of the emolument for 2003) paid to IFI SpA.

(e) The balance of € 2,600 thousand refers to *once-for-all* consideration for the termination of office. In addition to the amount shown in the table, € 77,000 was paid to SANPAOLO IMI SpA by the subsidiary companies.

(f) The balance of € 2,325 thousand refers to *once-for-all* consideration for the termination of office. In addition to the amount shown in the table, € 110,000 was paid to SANPAOLO IMI SpA by subsidiary companies.

(g)

€ 57,000 paid to CDC IXIS Italia Holding S.A. and relating to the variable part of emolument for 2003.

Stock option plans

The Shareholders' Meeting held on July 31, 1998 authorized the Board of Directors to make stock incentive (stock option) plans in favor of Group executives, resorting to increases in capital against payment up to a maximum amount subsequently established as €40 million, corresponding to 14,285,714 shares.

On the strength of this power of attorney, the Board of Directors:

in the meeting held on February 9, 1999, presented a first plan, assigning to the Managing Directors, inasmuch as General Managers, and to other 56 executives, a total of 6,772,000 rights exercisable for one third as of 2000, for one third as of 2001 and for the remaining third as of 2002 and no later than March 31, 2003 (extended to March 31, 2004 with resolution of the Board of Directors of July 30, 2002), at a subscription price of €12.396 per share; the rights have lapsed as the deadline for their exercise has expired;

in the meeting of June 27, 2000, it presented a second plan, assigning to the Managing Directors, inasmuch as General Managers, and to other 122 executives, 3,378,270 rights exercisable as of 2003 and no later than March 31, 2005, at a subscription price of €16.45573 per share;

on December 18, 2001, it approved a third stock option plan, assigning to 171 Group executives, of which about 40 employees of subsidiaries, 4,030,000 rights exercisable after the issue of the dividend for 2003 and no later than March 31, 2006, at a price of €12.7229.

The Shareholders' Meeting, held on April 30, 2002, conferred a new power of attorney to the Board of Directors to make stock incentive plans in favor of Group executives, resorting to increases in capital against payment up to a maximum amount of €51,440,648, corresponding to

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

18,371,660 shares.

On the strength of this power of attorney, on December 17, 2002 the Board of Directors presented a new stock option plan, assigning to 291 Group executives, of which about 77 employees of subsidiaries, in relation to the office held, 8,280,000 rights exercisable at a price of €7.1264 after the issue of the dividend for 2004 and no later than March 31, 2007 (postponed to May 15, 2007 by the Board of Directors on January 25, 2005).

F-156

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In compliance with article 78 of CONSOB resolution no. 11971 of May 14, 1999, it is hereby noted that the Directors and Chairman of the Bank enjoyed the benefits of the following stock option plans:

2000 Plan: this stock option plan approved by the Board of Directors in the year 2000 assigns to each Managing Director (Mr. Rainer Stefano MASERA and Mr. Luigi MARANZANA) 188,285 rights to subscribe the Bank's shares at a price of €16.45573 per share, with the right to exercise such rights from 2003 until March 31, 2005;

2001/2003 Plan: a stock option plan approved by the Board of Directors on May 14, 2002 for the Chairman and Managing Directors for the three year period 2001-2003, made on the basis of the power of attorney conferred by the Ordinary Shareholders' meeting of April 30, 2002 to utilize own shares for such plan. On the basis of this plan, Mr. Rainer Stefano MASERA, Mr. Alfonso IOZZO and Mr. Luigi MARANZANA were assigned 450,000 total fixed rights each for the three year period 2001-2003. Mr. Pio BUSSOLOTTO was assigned 300,000 total rights for the three year period 2001-2003. Such rights became exercisable at a price of €12.6244 on issue of the dividend for 2003 and no later than May 15, 2006. The latter term was deferred by the Board of Directors to January 25, 2005 (the previous final date having been March 31, 2006).

Furthermore, March 31, 2004 was the expiry date for exercising the stock options for the 1999/2001 plan which assigned each Managing Director (Mr. Rainer Stefano MASERA and Mr. Luigi MARANZANA), 370,000 rights to subscribe the Bank's shares at a price of €12.396 per share. The option rights were not exercised.

The following table shows the stock options assigned to the Directors and General Managers on the basis of Attachment 3C Schedule 2, of Consob resolution no. 13616 dated June 12, 2002.

Name and surname	Description of office(*)	Options at the beginning of the year			Option assigned during the year			Options exercised during the year			Options expired during the year	Options at the end of the year

Description of office at the moment rights are assigned.

F-157

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

In 2002 the Board of Directors approved the first stock granting operation of SANPAOLO IMI shares to all Parent Bank personnel in service on June 27, 2002. The initiative, application for which was voluntary, was connected with the 2001 company production premium issued in May 2002.

The assignment of free shares, stock granting, (unavailable for three years) involved 14,427 employees, 72.5% of those entitled. On the basis of the initiative regulations, personnel received 1,912,373 shares with a reference cost per unit of €10.0196 (calculated according to the current tax standards) for a commitment of €19.2 million.

Lastly, the Board of Directors on March 4, 2003 approved a second plan for the stock granting operation to Parent Bank personnel (considered in the company configuration at that time) with voluntary application, for a cost graduated in relation to the individual level of remuneration, providing for a connection with the 2002 company production premium issued in 2003. The assignment of these free shares (unavailable for three years) involved 14,090 employees, 51.3% of those entitled. On the basis of the regulations of this initiative, personnel in service on June 27, 2003 received 2,344,522 shares with a reference cost per unit of €8.1271 (calculated according to the current tax standards) for a commitment of €19.1 million.

In greater detail, Banca Fideuram approved stock incentive plans: in 2002 in favor of directors and financial operators; in 2003 and 2005 in favor of the Fideuram and Sanpaolo Invest networks. More details can be found in the company's financial statements.

<i>Development of stock option plans in 2004</i>	Number of shares	Average exercise price (€)	Market price (€)

(29) SUMMARY OF SIGNIFICANT DIFFERENCES BETWEEN ITALIAN AND U.S. GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

As described in Note 1, the Consolidated Financial Statements of the SANPAOLO IMI Group have been prepared in accordance with Decree No. 87 of January 27, 1992, which implemented EEC Directive 86/635, the requirements contained in the Bank of Italy instructions dated July 30, 1992 and subsequent amendments and, for all matters not governed by special regulations, reference has been made to the Italian Civil Code and to national accounting standards, (collectively "Italian GAAP") that vary in certain respects from generally accepted accounting principles in the United States of America ("U.S. GAAP"). A description of the significant differences and their effects on net income and shareholders' equity is set forth in the following notes. See also Note 7, "Description of accounting policies" for additional information on the accounting principles that SANPAOLO IMI follows.

SIGNIFICANT DIFFERENCES IN VALUATION AND INCOME RECOGNITION PRINCIPLES UNDER ITALIAN AND U.S. GAAP	Note 29.1
NET INCOME AND SHAREHOLDERS' EQUITY RECONCILIATION BETWEEN ITALIAN AND U.S. GAAP	Note 29.2
SIGNIFICANT PRESENTATION DIFFERENCES BETWEEN ITALIAN AND U.S. GAAP	Note 29.3
CONSOLIDATED FINANCIAL STATEMENTS	Note 29.4
ADDITIONAL INFORMATION REQUIRED BY U.S. GAAP	Note 29.5

(29.1) SUMMARY OF SIGNIFICANT DIFFERENCES IN VALUATION AND INCOME RECOGNITION PRINCIPLES UNDER ITALIAN GAAP AND U.S. GAAP

The following is a summary of the significant differences in valuation and income recognition principles under Italian GAAP and U.S. GAAP. The impact on net income and shareholders' equity of each of these differences is reconciled within Note 29.2 below.

ITALIAN GAAP

U.S. GAAP

(a) Business Combinations

Italian GAAP does not provide any guidance in determining the appropriate accounting treatment for a business combination involving the exchange of stock.

Until June 30, 2001 both the purchase method and the pooling of interests method were acceptable methods of accounting for a business combination, according to certain criteria. For all business combinations initiated after this date, the pooling of interest method is no longer permitted.

Goodwill

Where the purchase method of accounting for a business combination has been applied, goodwill is capitalized and amortized over its useful life that should not exceed 20 years. Business combinations undertaken by the Group that have been accounted for as a pooling result in a reserve within shareholders' equity (referred to as "negative goodwill" within the Italian GAAP financial statements), which is used to offset positive amounts of goodwill arising from subsequent business combinations, accounted for using the purchase method.

Until January 1, 2002 goodwill acquired as of June 30, 2001 was amortized over its estimated useful life. From that date, goodwill is no longer amortized but reviewed at least annually for impairment at a reporting unit level instead, in accordance with SFAS 142.

Purchase price allocation

Using the pooling of interest method requires the assets and liabilities of the merged entity to remain at cost.

Using the purchase method under U.S. GAAP results in the allocation of the purchase price to the assets and liabilities of the acquired company. These fair value adjustments are amortized over their individual useful economic lives.

Other adjustments

Certain significant mergers within the Group have been accounted using the "pooling of interest" method under U.S. GAAP, except for consolidating the merger entity at the beginning of the year in which the business combination is consummated.

All the business combinations accounted for using the pooling of interest method under Italian GAAP would have been accounted for using the purchase method under U.S. GAAP and therefore consolidated from the date of acquisition.

The reversals of the above adjustments as a result of the divestments are included in this line item.

F-163

(b) Investments in Debt, Equity Securities and own bonds

Debt and equity securities held for investment or trading purposes are accounted for as follows:

Investment debt securities are stated at amortized cost less any write-down for permanent diminution in value; the original value of the investment is reinstated if the reason for write-downs cease to apply.

Marketable debt securities and equity securities held for trading purposes and all other securities held without a particular identifiable purpose are classified as trading securities. These securities are recorded at market value, with the related unrealized gains and losses recognized in the statement of income.

Debt and equity securities held for sale in the Group's insurance portfolio are recorded at the lower of cost or market value, with any related losses recognized in the statement of income.

Permanent investments in companies where the Group owns less than 20% of the voting shares are stated at cost, less any write-down for permanent diminution in value. The original value of the investment is reinstated if the reason for write-downs cease to apply.

Holding of own bonds are classified and accounted for similar to third party debt securities.

Debt and marketable equity securities are classified according to management's intent within one of the following categories:

Held to maturity securities are measured at amortized cost less any other than temporary impairment. Reversals of impairments are not permitted.

Trading securities are held at fair value with unrealized gains or losses recognized in the statement of income.

Available for sale securities are held at fair value, with unrealized gains recorded as a net amount directly to a separate component of equity until they are realized, at which time the gain or loss is reclassified to the statement of income. Any "other than temporary" impairment is taken to the statement of income. Reversals of impairments are not permitted.

Investments in debt and marketable equity securities held within the Group's insurance portfolios would be classified and recorded based on management's intent described above.

Non-marketable equity investments of 20% or less are accounted for under the cost method, reduced through write-downs to reflect "other than temporary" impairments in value. Reversals of impairments are not permitted.

Purchases of own bonds are treated as a reduction of the debt outstanding. Any difference between the cost of repurchase and the carrying value of the liability is taken to the statement of income. Any gain or loss on resale is treated as a premium or discount and amortized over the remaining term of the bond.

ITALIAN GAAP

U.S. GAAP

(c) Revaluation of Assets

Premises are recorded in the financial statements at original cost, adjusted in some circumstances for the application of specific monetary revaluation required by Italian law.

Revaluations of fixed assets are not permitted.

Depreciation is charged on properties based on the revalued amount.

Depreciation is charged on all properties based on cost.

(d) Treasury Shares

Treasury shares purchased by the Parent are recognized on the balance sheet as assets and carried at acquisition cost, while those purchased by subsidiaries are also recognized on the balance sheet as assets, but carried at fair value with unrealized gains and losses taken in the statement of income. Gains and losses on sales are recorded through earnings.

Treasury shares are classified as treasury stock and shown as a deduction from stockholders' equity at cost.

(e) Advertising and Start-Up Costs

Advertising and start-up costs are deferred and amortized over five years.

Advertising and start-up costs are expensed as incurred.

(f) Derivatives and Hedging Activities

The accounting treatment for derivatives is dependent upon whether the derivative is entered into and qualifies as a hedge of an asset, liability or firm commitment. Derivatives not qualifying as hedges are recorded at fair value with changes in fair value recognized in the statement of income. Derivatives qualifying as a hedge are generally not reflected in the financial statements until the corresponding impact of the hedged transaction is recognized in the statement of income. Embedded derivatives are separated from the underlying host contract, but are held at cost.

U.S. GAAP only permits hedge accounting to be applied if certain criteria are met.

The Group has chosen not to adopt hedge accounting for all derivatives held for non-trading purposes due to the operational cost of meeting the documentation and effectiveness testing requirements of FAS 133.

These are considered effective as economic hedges and continue to qualify for hedge accounting under Italian GAAP.

All derivative instruments (including certain derivative instruments embedded in other contracts) are recorded in the balance sheet as either an asset or liability measured at fair value with changes in fair value recognized in the statement of income.

ITALIAN GAAP

U.S. GAAP

(g) Modification of Debts

Italian GAAP requires all modifications of debt instruments to be accounted for as modifications of the original debt by the creditor with no impact on the statement of income at the inception.

U.S. GAAP requires a creditor to account for a modified debt instrument as a new debt instrument if certain criteria are met. The original instrument is extinguished and a gain or loss recognized in the statement of income.

(h) Pension Plans

Defined benefit pension plans have been granted to certain employees by separate legal entities. The Group is contingently liable in the future if the assets of the plans are insufficient to fund the future benefit payments to the plan participants.

The liability and assets are estimated on a total service basis. As such, the Group has accrued amounts reflecting its contingent liability to the plan.

The liabilities and assets of the defined benefit pension plan are measured based on an "attribution period" as defined in SFAS 87.

The company has adopted an accounting policy to reflect the minimum required recognition of experience (gains)/losses as defined under SFAS 87.

An adjustment has therefore been recorded to reflect the differences described.

F-166

(i) Stock Option Plans

There is no specific accounting principle or established method for accounting for stock option plans under Italian GAAP. Stock option plans are not recorded within the financial statements; only a narrative disclosure is provided within the management report. The Group records stock-based compensation such as awards of stock options as an issuance of stock when an employee exercises the options.

If the indexed part of the stock based compensation award is hedged by a linked derivative or other hedging instrument, fair value changes in both the hedged item and the hedging instrument are deferred until the maturity date of the plan.

The Group has elected to apply APB No. 25 and related interpretations in accounting for stock option plans until December 31, 2003. The difference between the quoted market price of the stocks granted or awarded on the measurement day less the amount, if any, the employee is required to contribute is expensed as compensation cost during the vesting period. The measurement date is the first date at which both (1) the number of shares the employee is entitled to receive and (2) the option or the purchase price, if any, are known.

The derivative is recognized on the balance sheet as an asset or liability at fair value. Changes in fair value of the derivative are reported through earnings. The estimated compensation cost of the award is recognized as a liability and subsequently adjusted for changes in the estimated cost through the statement of income.

In 2004, the Group adopted the fair value recognition provisions of SFAS 123(R) using the modified prospective application. Under the fair value recognition provisions of SFAS 123(R), stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense over the vesting period. In connection with the use of the modified prospective application, compensation expense recognized in 2004 equals the expense for the year that would have been recognized had the fair value recognition provisions of SFAS 123 been applied to all awards granted.

F-167

ITALIAN GAAP

U.S. GAAP

(j) Employee Termination Costs and Other Provisions

A restructuring liability is accrued for the estimated cost of early retirement when a decision has been made and approved at the appropriate governance level to reduce personnel through the offering of early retirement compensation. The estimated liability is based on projections of the eligible employees that will accept the early retirement offer and the respective cost to be incurred upon their retirement.

A provision for expected future losses related to subsidiaries' liquidation costs is accrued on global basis.

Permissible accruals of employee termination cost relating to business combinations or restructuring are limited to the estimated cost of involuntary terminations. No accrual is permitted for voluntary terminations until the employee is eligible for the termination benefits and has accepted the termination offer.

Provisions for future losses are not permitted.

(k) Deferred Taxes

Deferred taxes are not calculated on reserves generated by either domestic and foreign group companies if those reserves will not be distributed.

Deferred tax assets are only recorded when they are "reasonably certain" of occurring.

Deferred taxes are calculated on reserves generated by domestic group companies irrespective of whether they will be distributed until December 31, 2002. During 2003 a new tax law in Italy allows the Group to prepare consolidated tax returns, as a result the Group will not calculate deferred taxes on unremitted earnings.

Deferred tax assets are recorded with respect to all temporary differences. A valuation allowance is recorded against a deferred tax asset when it is "more likely than not" that some portions of the deferred tax asset will not be realized. This results in a larger net deferred tax assets balance being recorded under U.S. GAAP when compared to Italian GAAP.

(l) Allowance for General Banking Risks

This provision covers the general business risks of the Group and, as such, forms part of the stockholders' equity in compliance with international supervisory standards and Bank of Italy instructions. The provision is accrued through a charge to the statement of income.

Provisions for potential losses such as an allowance for general banking risks are not allowed under U.S. GAAP.

ITALIAN GAAP

U.S. GAAP

(m) Consolidation

Entities should be consolidated when they are under the control of the reporting entity. Control is the ability to direct the financial and operating policies of the entity with a view to gaining economic benefit and may be exercised through majority voting rights or other means.

Subsidiaries engaging in a different industry to that of the parent Bank are accounted for using the equity method.

Under U.S. GAAP, the Group determines whether it has a controlling financial interest in any entity by initially evaluating whether the entity is a variable interest entity (VIE) or voting interest entity.

Under FIN 46-R, a controlling financial interest in a variable interest entity is present where an enterprise has a variable interest, or a combination of variable interests, that will absorb the majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both. The enterprise with a controlling financial interest is the primary beneficiary and is required to consolidate the VIE. The consolidation of certain VIEs under U.S. GAAP does not affect the reconciliation of net income or shareholders' equity. However the effect of consolidating these entities increased total assets and minority interest at December 31, 2004 by approximately €240 million.

Voting interest entities are evaluated for consolidation in accordance with ARB 51. ARB 51 states that the usual condition for a controlling financial interest in an entity is ownership of a majority voting interest.

The Parent exerts control over the insurance entities through ownership of the majority of the voting share capital and shall therefore apply full consolidation to such businesses. U.S. GAAP adjustments related to the insurance entities are aggregated in the reconciliation and explained in detail in note 29.2 below. Summarized financial information regarding these companies is reported in the Note 29.5 below.

(n) Deferred Acquisition Costs and Actuarial Reserves

Acquisition costs for new life insurance contracts are expensed as incurred by the Group's life insurance companies.

Acquisition costs for new life insurance contracts are deferred and amortized over the estimated life of the contracts. This adjustment is reported in the reconciliation within the item "insurance companies".

(o) Proportional Consolidation

Companies that are under joint control may be consolidated using the proportional consolidation method.

Companies that are under joint control should be accounted for using the equity method.

Summarized financial information regarding these companies is reported in the Note 29.5 (b) and (c) below.

F-170

ITALIAN GAAP

U.S. GAAP

(p) Securitization

Transfer of assets made to SPE in accordance with Italian Law 130, which governs securitization transactions, are derecognized, regardless the substance of the transactions itself.

Transfers of financial assets are accounted for as sales if the criteria under SFAS 140 are met. Transfers that do not qualify as sale under SFAS 140 are accounted for as secured borrowing transactions. The effect of applying SFAS 140 was to increase total assets and total liabilities at December 31, 2004 by approximately €1,805 million.

(q) Earning Per Share

Disclosure of earning per share is recommended but not required. SANPAOLO IMI discloses such information using U.S. GAAP guidance for determining the basic and diluted number of share used in the calculated.

U.S. GAAP requires disclosure of a basic and diluted earnings per share, calculated in accordance with SFAS 128 "Earnings Per Share".

F-171

E. Recent accounting developments

Developments under Italian GAAP

International Financial Reporting Standards (IFRS)

By Regulation, the European Union (EU) agreed in 2002 that virtually all listed companies must use International Financial Reporting Standards (IFRS) adopted for use in the EU in the preparation of their 2005 consolidated accounts. We will comply with this Regulation and produce our consolidated accounts in accordance with EU endorsed IFRS for the year ended December 31, 2005. The objective of the Regulation is to improve financial reporting and enhance transparency to assist the free flow of capital throughout the EU and to improve the efficiency of the capital markets. We commenced a conversion project that consists of identifying the differences between IFRS and existing Italian standards, making new accounting policy decisions, training relevant staff, rewriting our accounting manual, preparing an IFRS compliant budgeting process for the year 2005, adjusting existing reporting systems, adapting procedures and policies where applicable, and converting the opening balance sheet and other comparative financial information. In addition, the conversion project is assisting our businesses and functions to consider and address the wider business impact of the change in reporting in the EU. The conversion process, including reviewing the accuracy of the opening balances, will continue during 2005.

Although many of the uncertainties concerning whether and how the standards will be adopted for use in the EU have been resolved, some questions remain, particularly regarding the endorsement of amendments to standards and to interpretations issued in the second half of 2004. In addition, how IFRS financial statements will be interpreted for tax and regulatory capital purposes remains subject to some uncertainty, and the tax treatment of the first time adoption adjustments not determined until later. However, SANPAOLO IMI is following customary project controls and management and is on track to meet all requirements for financial reporting in 2005.

The following is a brief summary of the major differences that are expected to affect our consolidated financial statements.

Hedge accounting (IAS 39) The Group does not intend to comply fully with the provisions of IAS 39 but rather intends to fully comply with the provisions of IAS 39 as endorsed by the EU. Both cash flow hedge accounting and micro fair value hedge accounting will be used resulting in all hedging derivatives being carried at fair value, equity volatility with respect to cash flow hedge accounting and any hedge ineffectiveness being reflected immediately in income.

Classification of instruments (IAS 39) Italian GAAP requires the separate classification of financial assets between trading securities and long-term securities. Under IFRS, financial assets will be classified as: held to maturity; loans and receivables (carried at amortised cost less impairment); held for trading and fair valued through income; or available for sale and fair valued through equity. Financial liabilities held for trading will be fair valued through income. The fair value option is not currently available for other financial liabilities under EU law.

Balance sheet gross up (IAS 32/39/27) the IFRS netting rules coupled with the consolidation requirements will result in significant grossing up of the balance sheet, including certain funds under management being included on balance sheet, securitizations and line by line consolidation of insurance subsidiaries.

Business combination (IFRS 3) the purchase method requires that all assets and liabilities purchased (including contingent liabilities) to be initially recorded at their fair value. An intangible asset must be recognized separately from goodwill if it meets the criteria. Goodwill and intangible assets with indefinite lives rather than being subject to systematic annual amortisation will be tested for

impairment each year. Future acquisitions will give rise to more intangible assets that are subject to amortization and potentially less goodwill.

Share-based payments (IFRS 2) an annual charge for share options and other share-based payments will be determined based on the fair value of options granted spread over the vesting period.

Revaluation of fixed assets (IFRS 1) an entity may elect to measure property, plant and equipment at the date of transition to IFRS at its fair value and use that fair value as its deemed cost at that date.

Termination indemnity liabilities (IAS 19) should be accounted for considering actuarial calculations of the expected future liability, considering the time value, inflation rates, interest rate and expected employee service period. Additionally, an entity may elect to use a "corridor" approach that leaves some actuarial gains and losses unrecognized.

De-recognition of liabilities (IAS 39) liabilities can only be removed from the balance sheet when they are legally extinguished.

The restated 2004 IFRS results, excluding the impact of IAS 32 and IAS 39 on financial instruments and IFRS 4 on insurance contracts, and the opening 2005 IFRS balance sheet, including these standards, will be issued in the second quarter of 2005. The first results on a full IFRS basis will be provided for the consolidated financial statements for the year ended December 31, 2005.

Developments under U.S. GAAP

EITF Issue 03-01: The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments

The EITF Issue 03-01 (EITF 03-01) provides guidance on recognizing other-than-temporary impairments on securities classified as either available for sale or held to maturity under SFAS 115 and for investments accounted for under the cost method. In September 2004, the FASB delayed the effective date of EITF 03-1 for measurement and recognition of impairment losses until implementation guidance is issued. In December 2004, the FASB decided to reconsider in its entirety all guidance on disclosing, measuring and recognising other-than-temporary impairments of debt and equity securities and requires companies to continue to comply with existing accounting literature. Once the effective date of the measurement and recognition guidance has been confirmed, SANPAOLO IMI will assess the impact of EITF 03-1 on its consolidated financial statements.

SOP 03-3: Accounting for Certain Loans or Debt Securities Acquired in a Transfer

In December 2003, the American Institute of Certified Public Accountants (AICPA) released Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3) which supersedes AICPA Practice Bulletin 6, "Amortization of Discounts on Certain Acquired Loans". SOP 03-3 addresses accounting for differences between contractual cash flows and cash flows expected to be collected from an investor's initial investment in loans or debt securities acquired in a transfer if those differences are attributable to credit quality. SOP 03-3 limits accretable yield to the excess of the investor's estimate of undiscounted cash flows over the investor's initial investment in the loan and prohibits the recognition of the non-accretable difference. Under SOP 03-3, subsequent increases in cash flows expected to be collected generally should be recognized prospectively through adjustment of the loan's yield over its remaining life while any decreases in cash flows expected to be collected should be recognized as impairments. SOP 03-3 also provides guidance with regard to presentation and disclosures. SOP 03-3 is effective for loans acquired in fiscal years beginning after 15 December 2004. SANPAOLO IMI is currently assessing the impact of SOP03-3 in its consolidated financial statements once IFRS will be adopted.

SFAS 153: Exchanges of Nonmonetary assets

The FASB issued SFAS 153 Exchanges of Nonmonetary assets, an amendment of APB Opinion No. 29 in December 2004. SFAS 153 provides for a general exception from fair value measurement for exchanges of nonmonetary assets that do not have commercial substance. The Statement is effective for fiscal years beginning after 15 June 2005. SANPAOLO IMI is currently assessing the impact of SFAS 153 in its consolidated financial statements once IFRS will be adopted.

EITF 02-14: Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock

In July 2004, the FASB ratified the consensus reached in EITF Issue No. 02-14, "Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock" ("EITF 02-14"). EITF 02-14 concludes that an investor that has the ability to exercise significant influence over an investee should apply the equity method of accounting only when it has an investment in common stock and/or an investment that is in-substance common stock. EITF 02-14 addresses the determination of whether an investment is in-substance common stock but does not change existing guidance concerning the assessment of whether an investor has the ability to exercise significant influence over an investee. The consensus in EITF 02-14 is effective for reporting periods beginning after September 15, 2004. SANPAOLO IMI is currently assessing the impact of EITF 02-14 in its consolidated financial statements once IFRS will be adopted and will implement EITF 02-14 on January 1, 2005.

SFAS 154: Accounting Changes and Error Correction

SFAS 154 was issued in May 2005 and is effective for accounting changes and corrections of errors made in fiscal years beginning after 15 December 2005. SFAS 154 provides guidance on the accounting changes (voluntary and those required by the issuance of an accounting pronouncement) and error corrections. APB Opinion No.20 previously required that most voluntary changes in accounting principles be recognized by including in net income in the period of change, the cumulative effect of changing to a new accounting principle. SFAS 154 establishes, unless impracticable, retrospective application of the direct effects of the change as the required method for reporting change in accounting principles in the absence of explicit transition requirements specific to the newly adopted accounting principle. The correction of an error in previously issued financial statements is not an accounting change although the reporting of an error correction involves adjustments to previously issued financial statements similar to those reporting an accounting change.

(29.2) NET INCOME AND SHAREHOLDERS' EQUITY RECONCILIATION BETWEEN ITALIAN AND U.S. GAAP

The following is a summary of the most significant adjustments to consolidated net income and to consolidated shareholders' equity which would be required if U.S. GAAP had been applied to the accompanying Consolidated Financial Statements.

Net income

	Year ended December 31,		
	2004	2003	2002
	(€/mil)		
Net income after minority interest as reported under Italian GAAP	1,393	972	889
a) Business Combinations:			
Impairment of Goodwill	(106)		(982)
Amortization of Goodwill	136	158	198

(29.3) SIGNIFICANT PRESENTATION DIFFERENCES BETWEEN ITALIAN AND U.S. GAAP

In addition to the differences in valuation and income recognition principles disclosed in Note No. 29.1 and 29.2, other differences exist between Italian and U.S. GAAP relating to the presentation of financial statements. These are only presentation difference and do not result in additional differences between Italian and U.S. GAAP figures.

The following is a summary of the significant classification differences between U.S. GAAP formats as set forth in Regulation S-X of the Securities and Exchange Commission of the United States of America and the formats required by the Italian Law (Decree 87 of January 27, 1992). Furthermore, in paragraph 31.4 are reported the balance sheet and the statement of income in accordance with the format required by US GAAP. However, these statements are prepared on the basis of the financial information included in the Italian financial statements prepared in accordance with Italian GAAP; hence before the US GAAP adjustments indicated in the table reported in paragraph 31.2

Balance Sheet

- (A) Treasury bills and similar bills eligible for refinancing with central banks are presented as a separate item (caption No. 20) in the Italian balance sheet. Under U.S. GAAP such investments are presented under "Trading account assets" and "Investment securities".
- (B) The item "Interest-bearing deposits in other banks" is presented for Italian purposes under the caption "30 Due from banks" for the portion related to the interest-bearing deposit due from banks.
- (C) The items "Federal funds sold and securities purchased under resale agreements or similar arrangements" to banks and other customers are presented for Italian purposes in captions "30 Due from banks" and "40 Loans to customers", respectively.
- (D) Amounts under caption "30 Due from banks", for the portion related to the medium and long term loan due from banks, and "40 Loans to customers", except those indicated in (C) and (B), are presented under "Loans" in the U.S. GAAP balance sheet.
- (E) Investments in securities shown under captions "50 Bonds and other debt securities" and "60 Shares and other equities" are presented under "Trading account assets", "Available for sale securities" and "Held to maturity" according to classification under SFAS No. 115.
- (F) Investments in affiliated companies are presented under "70 Equity investments" and "80 Equity Investments in Group companies". Under U.S. GAAP such investments are presented under "Investments in affiliated companies".
- (G) Goodwill arising on application of the equity method is shown as a separate item in the Italian balance sheet (caption No. 100), while according to U.S. GAAP it is presented under "Investments in affiliated companies".
- (H) Amounts under "120 Tangible fixed assets" have been shown under "Premises and equipment" in the U.S. consolidated balance sheet.
- (I) Amounts under caption "140 Own shares" are deducted from balances of "Other stockholders' equity" under U.S. GAAP.
- (J) The following captions of the asset side of the Italian balance sheet are presented under "Other assets" according to U.S. GAAP formats: "90 Goodwill arising on consolidation", "110 Intangible fixed assets", "150 Other assets", "160 Accrued income and prepaid expenses".

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

- (K) "Securities sold under repurchase agreements" to banks and other customers are presented for Italian purposes in captions "10 Due to banks" and "20 Due to customers", respectively.
- (L) Deposits to banks, customers and deposits in security form are presented respectively under captions "10 Due to banks", "20 Due to customers" and "30 Securities issued" while according to U.S. GAAP they are included under the separate caption "Deposits".
- (M) Short-term borrowings presented under caption "30 Securities issued" are reported in a separate caption in the U.S. GAAP balance sheet. They consist primarily of commercial paper.
- (N) Amounts under captions "10 Due to banks", "20 Due to customers", "30 Securities issued", "40 Public funds administered" and "110 Subordinated liabilities" with maturity greater than one year are presented under the caption "Long term debt" in U.S. GAAP.
- (O) The following captions of the Italian balance sheet are presented under "Other liabilities" according to U.S. GAAP: "50 Other liabilities", "60 Accrued expense and deferred income", "70 Provision for termination indemnities", "80 Provision for risks and charges".
- (P) Minority interest (caption No. 140) is presented in the same named caption "Minority interest in consolidated subsidiaries" and the amount under "150 Capital" is presented under caption "Capital stock".
- (Q) Captions "100 Reserve for general banking risks", "120 Negative goodwill arising on consolidation", "130 Negative goodwill arising on application of the equity method", "160 Additional paid-in capital", "170 Reserves", "180 Revaluation reserves" and "200 Net income for the year" are presented under caption "Other stockholders' equity" under U.S. GAAP.
- (R) Acceptances are not reported on the Italian balance sheet, but rather as a commitment in Caption "Guarantees and commitments". Under U.S. GAAP, acceptances and the related customer liabilities are recorded on the balance sheet.

Statements of Income

- (A) "Interest earnings on deposits and loans to credit institutions", "Interest on investment securities" and "Trading account interest" are reported under caption "10 Interest income and similar revenues" in the Italian statement of income. Under U.S. GAAP such amounts are under separate captions.
- (B) The captions of U.S. statements of income "Interest Expense Borrowings from credit institutions", "Interest Expense Borrowings from non-credit institutions", "Interest Expense Securities and commercial paper" and "Net effect of off-balance sheet instruments" are presented under caption "20 Interest expense and similar charges" according to Italian GAAP.
- (C) Amounts presented in caption "Loans and lease to credit institution" under U.S. GAAP are included in captions "10 Interest income and similar revenues", "40 Commission income" and "140 Provision to the reserve for probable loan losses" under Italian GAAP according to the nature of such income.
- (D) "Net write-offs and provision for loan losses" are shown for Italian purposes under "120 Adjustments to loans and provisions for guarantees and commitments" and "130 Write-backs of adjustments to loan and provisions for guarantees and commitments".
- (E) The caption "30 Dividends and other revenues b) from investments" in the Italian statements of income is reported in caption "Dividends" under U.S. GAAP.

Edgar Filing: SANPAOLO IMI SPA - Form 20-F

- (F) "Commission and fees from fiduciary activities", "Commissions, brokers' fees and markups on securities underwriting and other securities activities" shown as separate captions under U.S. GAAP are classified in caption "40 Commission income".
- (G) Amounts under caption "Fees for other customer services" in statements of income under U.S. GAAP are presented in caption "40 Commission income" and "70 Other operating income" (for the refunds of expenses) under Italian GAAP.
- (H) The following captions in the Italian GAAP statements of income are presented in caption "Profit or loss on transactions in securities in dealer trading account" under U.S. GAAP: "30 Dividends and other revenues a) from shares and other equities" and "60 Profits (losses) on financial transactions".
- (I) The caption "Equity in (loss) earnings of unconsolidated subsidiaries" in U.S. GAAP is reported in the caption "170 Income (losses) from investments carried at equity" under Italian GAAP.
- (J) The amounts shown in caption "Income or loss in affiliated, other companies and investments securities" under U.S. GAAP are presented primarily in "150 Adjustments to financial fixed assets", "160 Write-backs of adjustments to financial fixed assets" "190 Extraordinary income" and "200 Extraordinary expenses".
- (K) The captions "Goodwill amortization" and "Amortization of intangibles" in the U.S. GAAP are reported in caption "90 Adjustments to intangible and tangible fixed assets".
- (L) Salaries and employee benefits are presented under caption "80 Administrative costs a) payroll" in Italian statements of income.
- (M) In the caption "Net occupancy expenses of leased premises" under U.S. GAAP are presented net costs of not owned premises (e.g. rentals payable, costs of routine maintenance). They are shown in different captions in Italian statements of income: "70 Other operating income", "80 Administrative costs b) other", "90 Adjustment to intangible and tangible fixed assets" and "110 Other operating expenses".
- (N) In the caption "Net premises and equipment expenses" under U.S. GAAP are presented net costs of owned premises. They are recorded in different caption under Italian GAAP format: "70 Other operating income", "90 Adjustment to intangible and tangible fixed assets", "190 Extraordinary income", "200 Extraordinary expenses".
- (O) "Income tax expense" is presented in the caption "240 Income tax" according to Italian GAAP format.
- (P) "Minority interest in income of consolidated subsidiaries" is shown in caption "250 Minority interests" in Italian statements of income.
- (Q) The remaining amounts not reported in the above illustrated items are shown in "Other income" and "Other expenses" in the U.S. statement of income.

(29.4) CONSOLIDATED FINANCIAL STATEMENTS

The following consolidated balance sheets and statements of income show the impact of applying U.S. GAAP presentation requirements to amounts determined under Italian GAAP. Excluding the adjustment for own shares in the balance sheet, the following tables do not reflect the US GAAP adjustments indicated in table in paragraph 31.2.
