PIK - Payment In Kind.

(1) Senior floating-rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior floating-rate interests will have an expected average life of approximately two to three years.

(2) Security valued at fair value using methods determined in good faith by or at the direction of the Trustees.

- (3) Non-income producing security.
- (4) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At September 30, 2004, the aggregate value of the securities is \$19,894,077 or 6.2% of the Trust's net assets.
- (5) Defaulted security.
- (6) Restricted security.

At September 30, 2004, the Trust had entered into credit default swaps with Credit Suisse First Boston dated February 6, 2004 whereby the Trust will receive 2.45% per year times the notional amount of \$2,900,000. The Trust makes payment only upon a default event on underlying loan assets (50 in total, each representing 2% of the notional value of the swap). At September 30, 2004, the Trust had sufficient cash segregated to cover potential obligations arising from open swap contracts.

The cost and unrealized appreciation (depreciation) in value of the investment securities at September 30, 2004, as computed on a federal income tax basis, were as follows:

<b>Aggregate cost</b>	<b>\$</b>	<b>521,794,704</b>
Gross unrealized appreciation	\$	7,922,509
Gross unrealized depreciation		(1,360,368)
<b>Net unrealized appreciation</b>	<b>\$</b>	<b>6,562,141</b>
