(1) Cost of investments shown approximates cost for federal income tax purposes. Gross unrealized appreciation of investments and gross unrealized depreciation of investments at December 31, 2004 were \$15,474,473 and \$697,548, respectively, resulting in net unrealized appreciation of investments of \$14,776,925.

(2) The Fund calculates net asset values based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use last reported sale prices, current market quotations or valuations from computerized matrix systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the Board). The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board determines that this does not represent fair value. Securities traded in the over-the-counter (OTC) market are valued at the last bid price available on the valuation date prior to valuation.

Number of Contracts	Contracts to Receive	In Exchange For (\$)	Expiration Dates	Unrealized Depreciation (\$)
<b>Futures Contracts</b>				
50	U.S. Treasury Note 5 Year Futures	5,473,088	March 2005	(3,475)
440	U.S. Treasury Note 10 Year Futures	49,138,795	March 2005	(113,705)
				(117,180)
