ITEM 2.05 COSTS ASSOCIATED WITH EXIT OR DISPOSAL ACTIVITIES

On September 4, 2008, Tyco Electronics Ltd. (the Company) announced its intent to initiate a restructuring and consolidate production of its automotive products in key manufacturing sites throughout Eastern and Western Europe. This initiative is part of the simplification of the Company's global manufacturing footprint, including the exit of certain manufacturing operations and the migration of certain facilities and product lines to lower cost countries. The proposed changes, which are subject to consultation with several works councils, would involve three automotive plant closures and restructuring of operations at several facilities in Spain and France, and would impact approximately 850 employees.

Based on current foreign exchange rates, the Company estimates that charges associated with the European automotive restructuring plan will be approximately \$155 million, with an expected completion target within 15 months. The charges are primarily comprised of employee related termination benefits of approximately \$125 million and other costs of \$10 million that will result in future cash expenditures. In addition, the Company expects to record non-cash charges of approximately \$20 million primarily related to inventory and fixed assets. The Company expects to incur total restructuring related charges of approximately \$135 million in the fourth quarter of fiscal 2008 ending September 26, 2008. The initiation of the European automotive restructuring plan in the fourth quarter of fiscal 2008 will increase the Company's previously announced fiscal 2008 restructuring charges by approximately \$70 million, from approximately \$130 million to approximately \$200 million in fiscal 2008.
