May 07, 2009

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2009

or

**TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the Transition Period from _____ to _____

Commission File No. 001-32919

Ascent Solar Technologies, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

12300 Grant Street, Thornton, CO

20-3672603
(I.R.S. Employer
Identification No.)

80241

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number including area code: **303-285-9885**

8120 Shaffer Parkway, Littleton, CO 80127

(Former Name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such report(s), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 20, 2009, there were 20,974,203 shares of our common stock issued and outstanding.

ASCENT SOLAR TECHNOLOGIES, INC.

(A Development Stage Company as Defined by SFAS No. 7)

NOTES TO CONDENSED FINANCIAL STATEMENTS

NOTE 1. ORGANIZATION

Ascent Solar Technologies, Inc. (Ascent or the Company) was incorporated on October 18, 2005 from the separation by ITN Energy, Inc. (ITN) of its Advanced Photovoltaic Division and all of that division's key personnel and core technologies. ITN, a private company incorporated in 1994, is an incubator dedicated to the development of thin-film, photovoltaic (PV) battery, fuel cell and nano technologies. Through its work on research and development contracts for private and governmental entities, ITN developed proprietary processing and manufacturing know-how applicable to PV products generally, and to Copper-Indium-Gallium-diSelenide (CIGS) PV products in particular. ITN formed Ascent to commercialize its investment in CIGS PV technologies. In January 2006, in exchange for 1,028,000 shares of common stock of Ascent, ITN assigned to Ascent all ITN's CIGS PV technologies and trade secrets and granted to Ascent a perpetual, exclusive, royalty-free worldwide license to use ITN's proprietary process, control and design technologies in the production of CIGS PV modules. Upon receipt of the necessary government approvals in January 2007, ITN assigned government-funded research and development contracts to Ascent and also transferred the key personnel working on the contracts to Ascent. Today, ITN still provides Ascent a variety of administrative and technical services such as facilities management, equipment maintenance, procurement, and technical support services.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation: The Company's activities to date have substantially consisted of raising capital, research and development, and the development of a 1.5 MW production plant and additional 30 MW expansion plant. Revenues to date have been generated from the Company's governmental research and development (R&D) contracts and have not been significant. The Company's planned principal operations to commercialize flexible PV modules have not yet commenced. Accordingly, the Company is considered to be in the development stage, as defined in Statement of Financial Accounting Standards No. 7 (SFAS No. 7), *Accounting and Reporting by Development Stage Enterprises*.

Cash Equivalents: The Company considers all highly liquid debt securities purchased with an original maturity of three months or less to be cash equivalents. The Company maintains cash balances which may exceed federally insured limits. The Company does not believe that this results in significant credit risk.

Investments: The Company accounts for investments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The Company has classified its investments as available-for-sale. Such investments are carried at fair value, based on quoted market prices with the unrealized holding gains and losses reported as Accumulated other comprehensive income (loss) in the stockholders equity section of the balance sheet. Realized gains and losses on sales of securities are computed using the specific identification method. The Company evaluates declines in market value for potential impairment. If the decline results in a value below cost and is determined to be other than temporary, the investment is written down to its impaired value and a new cost basis is established.

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

Fair Value estimates: The fair value of an asset or liability is the amount at which it could be exchanged or settled in a current transaction between willing parties. The carrying value for cash and cash equivalents, investments, restricted cash, accounts receivable, accounts payable, accrued property and equipment, accrued expenses and other assets and liabilities approximate their fair values due to their short maturities. Effective January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurements* (SFAS 157). In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which provided a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. The Company adopted this statement for financial assets and financial liabilities and nonfinancial assets and nonfinancial liabilities recognized or disclosed at fair value on a recurring basis as of January 1, 2008. The Company adopted this statement for nonfinancial assets and nonfinancial liabilities recognized or disclosed at fair value on a nonrecurring basis as of January 1, 2009. The effect of the adoption of this statement was not material, resulting only in additional disclosures. SFAS 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under SFAS 157 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

Foreign Currency translation: Bank account balances related to our forward contracts are translated to U.S. dollars utilizing the period end exchange rate. Gains or losses on foreign currency transactions are recorded in other income/loss in the Condensed Statements of Operations.

Revenue Recognition: Revenue to date is from governmental research and development contracts under terms that are cost plus fee or firm fixed price. Revenue from cost plus fee contracts is recognized as costs are incurred on the basis of direct costs plus allowable indirect costs and an allocable portion of the firm fixed fee. Revenue from firm fixed price contracts is recognized under the percentage-of-completion method of accounting, with costs and estimated profits included in contract revenue as work is performed. If actual and estimated costs to complete a contract indicate a loss, provision is made currently for the loss anticipated on the contract.

Patents: At such time as the Company is awarded patents, patent costs are amortized on a straight-line basis over the legal life, or over their estimated useful lives, whichever is shorter. As of March 31, 2009, the Company had \$140,524 of net patent costs of which \$28,138 represent costs net of amortization incurred for an awarded patent, and the remaining \$112,386 represents costs incurred for patent applications filed. Amortization expense for the three months ended March 31, 2009 and 2008 was \$1,279.

Property and Equipment: Property and equipment are recorded at the original cost to the Company. Assets are being depreciated over estimated useful lives of one to ten years using the straight-line method, commencing when the asset is placed in service. Leasehold improvements are depreciated over the shorter of the remainder of the lease term or the life of the improvements. Upon retirement or disposal, the cost of the asset disposed of and the related accumulated depreciation are removed from the accounts and any gain or loss is reflected in income. Expenditures for repairs and maintenance are expensed as incurred.

The Company computes depreciation expense using the straight-line method over the estimated useful lives of the assets, as presented in the table below. We amortize leasehold improvements over the shorter of their estimated useful lives or the remaining term of the lease.

	Useful Lives in Years
Buildings	40
Manufacturing machinery and equipment	5 - 10
Furniture, fixtures, computer hardware/software	3 - 7
Leasehold improvements	life of lease

Long-lived assets: We account for our long-lived, tangible assets and definitive-lived intangible assets in accordance with Statement of Financial Accounting Standards No. (SFAS, 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*). As a result, we assess long-lived assets classified as held and used, including our property, plant and equipment, for impairment whenever long-lived asset may not be recoverable. These events would include significant current period operating or cash flow losses associated with the use of a long-lived asset or group of assets combined with a history of such losses, significant changes in the manner of use of assets and significant negative industry or economic trends. We evaluated our long-lived assets for impairment for the period ending March 31, 2009 and concluded that no valuation allowances were required.

Risks and Uncertainties: The Company's operations are subject to certain risks and uncertainties, including those associated with: the ability to meet obligations; continuing losses; fluctuation in operating results; funding expansions; strategic alliances; financing arrangement terms that may restrict operations; regulatory issues; and competition. The recent financial crisis and the resulting tightening in the credit markets have made it more difficult to raise additional capital to fulfill our expansion business plan. Additionally, U.S. government contracts may be terminated prior to completion of full funding by the U.S. government.

Net loss per Common Share: Statement of Financial Accounting Standards No. 128, *Earnings Per Share*, provides for the calculation of Basic and Diluted earnings per share. Basic earnings per share include no dilution and are computed by dividing income available to common stockholders by the weighted-average number of shares outstanding during the period. Diluted earnings per share reflect the potential of securities that could share in the earnings of the Company, similar to fully diluted earnings per share. Common stock equivalents consisting of Class B warrants, IPO warrants (representative warrants), stock options and restricted stock units outstanding as of March 31, 2009 and 2008 of approximately 12.1 million and 11.5 million shares, respectively, have been omitted from loss per share because they are anti-dilutive. Basic and diluted loss per share was the same in each of the periods ended March 31, 2009 and 2008.

Research and Development Costs: Research and development costs are incurred during the process of researching and developing new products and enhancing our manufacturing processes and consist primarily of compensation and related costs for personnel, materials, supplies and equipment depreciation. We expense these costs as incurred until the resulting product has been completed and tested and is ready for commercial manufacturing. We also incur research and development expenses on our U.S. federal government research and development contracts and expense as incurred.

Income Taxes: Deferred income taxes are provided using the liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of the changes in tax laws and rates as of the date of enactment. Interest and penalties, if applicable, would be recorded in operations.

In July 2006, the FASB issued FASB Interpretation (FIN 48), *Accounting for Uncertainty in Income Taxes*. The Company adopted the provisions of FIN 48 on January 1, 2007. As defined, FIN 48 seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. The Company became subject to the provisions of FIN 48 as of January 1, 2007, and has analyzed filing positions in all of the federal and state jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. The Company has identified its federal tax return and its Colorado tax return as major tax jurisdictions, as defined. The periods subject to examination for the Company's federal and state tax returns are tax years 2005 through 2007. The Company believes that its income tax filing positions and deductions will be sustained on audit and does not anticipate any adjustments that will result in a material adverse effect on the Company's financial condition, results of operations, or cash flows. Therefore, no reserves for uncertain income tax positions have been recorded pursuant to FIN 48. In addition, the Company did not record a cumulative effect adjustment related to the adoption of FIN 48.

Stock Based Compensation: The Company accounts for share-based payments under the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123(R)) which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, officers, directors, and consultants, including employee stock options based on estimated fair values. SFAS 123(R) requires companies to estimate the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service period in the Company's Condensed Statements of Operations. Stock based compensation is based on awards ultimately expected to vest and is reduced for estimated forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, as necessary, in subsequent periods if actual forfeitures differ from those estimates.

For purposes of determining estimated fair value of share-based payment awards on the date of grant under SFAS 123(R), the Company uses the Black-Scholes option-pricing model (Black-Scholes Model). The Black-Scholes Model requires the input of highly subjective assumptions. Because the Company's employee stock options may have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models may not provide a reliable single measure of the fair value of the Company's employee stock options. Management will continue to assess the assumptions and methodologies used to calculate estimated fair value of share-based compensation. Circumstances may change and additional data may become available over time, which result in changes to these assumptions and methodologies, which could materially impact the Company's fair value determination.

The application of the SFAS 123(R) accounting principles may be subject to further interpretation and refinement over time. There are significant differences among option valuation models, and this may result in a lack of comparability with other companies that use different models, methods and assumptions. If factors change and the Company employs different assumptions in the application of SFAS 123(R) in future periods, or if the Company decides to use a different valuation model, the compensation expense that the Company records in the future

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

under SFAS 123(R) may differ significantly from what it has recorded in the current period and could materially affect its loss from operations, net loss and net loss per share.

Comprehensive income (loss): Our comprehensive income (loss) consists of our net income (loss), and changes in unrealized gains or losses on available for sale investments, the impact of which has been excluded from net loss. We present our comprehensive income (loss) in the Condensed Statements of Stockholders' Equity and Comprehensive Income and (Loss). Our accumulated other comprehensive income (loss) is presented as a component of equity in our Condensed Balance

Sheets and consists of the cumulative amount of unrealized gains or losses on available-for-sale investments that we have incurred since the inception of our business.

Reclassifications: Certain reclassifications have been made to the 2008 financial information to conform to the 2009 presentation. Such reclassifications had no effect on net loss and are primarily related to reclassifying costs between Research and development costs and General and administrative expenses in the Condensed Statements of Operations.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Unaudited Information: The accompanying interim financial information as of March 31, 2009 and for the three months ended March 31, 2009 and 2008 and the period from inception (October 18, 2005) through March 31, 2009 was taken from the Company's books and records without audit. However, in the opinion of management, such information includes all adjustments (consisting only of results of normal recurring accruals) that are necessary to properly reflect the financial position of the Company as of March 31, 2009 and the results of operations for the three months ended March 31, 2009 and 2008 and the period from inception (October 18, 2005) through March 31, 2009 so that the financial statements are not misleading.

Recent Accounting Pronouncements: In May 2008, the FASB issued SFAS No. 162, The Hierarchy of Generally Accepted Accounting Principles, which becomes effective upon approval by the SEC. The standard sets forth the sources of accounting principles and provides entities with a framework for selecting the principles used in the preparation of financial statements that are presented in conformity with GAAP. It is not expected to change any of our current accounting principles or practices and therefore, is not expected to have a material impact on our financial statements.

NOTE 3. LIQUIDITY AND CONTINUED OPERATIONS

As discussed in Note 1, the Company is in the development stage and is currently incurring significant losses from operations. As of March 31, 2009, the Company had \$71.2 million in cash, restricted cash and investments of which approximately \$40 million we intend to use in 2009 for progress payments to our equipment suppliers for our 30 MW line and \$2 million for facility infrastructure for our 30 MW expansion. An additional \$26 million is required in 2010 for final payments to our equipment suppliers on the 30MW line.

The Company commenced commercial production on its 1.5 MW production line in the first quarter 2009. We do not expect that sales revenue from the 1.5 MW production line will be sufficient to support operations and cash requirements, and it is unlikely that sales revenue will support operating cash requirements unless we achieve actual production capacity of at least 30 MW per year. Our original equipment delivery schedule called for installation of all of the 30 MW production equipment during 2009. Due to the recent financial crisis affecting the financial markets, our ability to obtain credit or to raise additional capital has become increasingly difficult. In order to preserve cash, we have extended the equipment delivery schedule related to the first 30MW of annual rated production capacity to 2010. We now expect to begin production using equipment with an annual rated production capacity of approximately 15 MW in early 2010, and full 30 MW of annual rated production capacity by the end of 2010.

The Company expects its current cash balance to be sufficient to cover its operational expenditures through 2009 based on currently known factors, although it expects that it will need to raise additional capital prior to early 2010 to complete its expansion plans.

NOTE 4. FAIR VALUE MEASUREMENTS

Effective January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurements* (SFAS 157). In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which provided a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. The Company adopted this statement for financial assets and financial liabilities and nonfinancial assets and nonfinancial liabilities recognized or disclosed at fair value on a recurring basis as of January 1, 2008. The Company adopted this statement for nonfinancial assets and nonfinancial liabilities recognized or disclosed at fair value on a nonrecurring basis as of January 1, 2009. The effect of the adoption of this statement was not material, resulting only in additional disclosures. SFAS 157 defines fair value,

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under SFAS 157 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value under SFAS 157 must maximize the use of observable inputs and minimize the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

- Level 1 Quoted prices in active markets for identical assets or liabilities.

- Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

In accordance with SFAS 157, the following table represents the Company's fair value hierarchy for its financial assets measured at fair value on a recurring basis and its classification on the balance sheet as of March 31, 2009:

	Level 1	Level 2	Level 3	Total	Cash Equivalents	Investments
Financial Assets:						
U.S. government securities	\$	\$ 34,874,916	\$	\$ 34,874,916	\$	\$ 34,874,916
Money market funds	22,103,325			22,103,325	22,103,325	
Corporate securities		4,728,471		4,728,471		4,728,471
Municipal bonds						
	\$ 22,103,325	\$ 39,603,387	\$	\$ 61,706,712	\$ 22,103,325	\$ 39,603,387
Financial Liabilities:						
Derivative liability	\$	\$ 612,212	\$	\$ 612,212		

NOTE 5. INVESTMENTS

The Company accounts for investments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. Securities held by the Company as of March 31, 2009 are classified as available-for-sale and consisted of U.S. government securities, corporate securities, and municipal bonds. Such investments are carried at fair value, based on quoted market prices with the unrealized holding gains and losses reported as Accumulated other comprehensive income in the stockholders' equity section of the balance sheet. Realized gains and losses on sales of securities are computed using the specific identification method. The Company evaluates declines in market value for potential impairment. If the decline results in a value below cost and is determined to be other than temporary, the investment is written down to its impaired value and a new cost basis is established. A summary of available-for-sale securities as of March 31, 2009 is as follows:

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
U.S. government securities	\$ 34,748,883	\$ 180,836	\$ (54,803)	\$ 34,874,916
Corporate securities	4,728,448	13,397	(13,374)	4,728,471
Municipal bonds				
Total	\$ 39,477,331	\$ 194,233	\$ (68,177)	\$ 39,603,387

Contractual maturities of our available-for-sale investments as of March 31, 2009 were as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
One year or less	\$ 35,041,632	\$ 141,661	\$ (68,177)	\$ 35,115,116
One year to two years	4,435,699	52,572		4,488,271
Total	\$ 39,477,331	\$ 194,233	\$ (68,177)	\$ 39,603,387

We typically invest in highly-rated securities with low probabilities of default. Our investment policy specifies minimum investment grade criteria, types of acceptable investments, concentration limitations and duration.

NOTE 6. ACCOUNTS RECEIVABLE

Effective January 1, 2007, the Company completed the novation, or transfer, of approximately \$3.5 million in government funded research and development contracts (R&D contracts) from ITN to the Company. The various contracts are being performed for U.S. government customers that include the Air Force Research Laboratory and the National Aeronautics and Space Administration. In addition to approximately \$1.6 million of future revenues to be provided under the transferred contracts, the key scientists, engineers, and process technicians responsible for deliverables under the transferred contracts were also transferred from ITN to become full-time Ascent employees. In 2007 and 2008, additional R&D contracts were awarded to the Company of approximately \$3.4 million.

Accounts receivable consists mainly of billed and unbilled amounts under these R&D contracts. Management deems all accounts receivable to be collectible.

The following table summarizes components of accounts receivable related to R&D contracts:

	As of March 31, 2009	As of December 31, 2008
Billed receivables	\$ 398,126	\$ 273,995
Unbilled receivables	11,026	62,241
Total	\$ 409,152	\$ 336,236

Unbilled receivables represent costs incurred but not yet billed, including retainage amounts by the government on contracts that have not been closed out at the end of the period.

Provisional Indirect Cost Rates During 2007, 2008 and 2009, the Company billed the government under cost-based R&D contracts at provisional billing rates which permit the recovery of indirect costs. These rates are subject to audit on an annual basis by the government agencies cognizant audit agency. The cost audit will result in the negotiation and determination of the final indirect cost rates. The Company has not been audited and has not received final rate determinations for the year ended December 31, 2007 or December 31, 2008. The final rates, if different from the actual, may create an additional receivable or liability. In the opinion of management, re-determination of any cost-based contracts will not have a material effect on the Company's financial position or results of operations.

Contract Status The Company has authorized but not completed contracts on which work is in process as follows:

	As of March 31, 2009	As of December 31, 2008
Total contract price of initial contract awards, including exercised options and approved change orders (modifications)	\$ 6,889,991	\$ 6,889,991
Completed to date(1)	(4,777,896)	(4,307,951)
Authorized backlog	\$ 2,112,095	\$ 2,582,040

(1) Includes work performed by ITN prior to January 1, 2007.

NOTE 7. PROPERTY AND EQUIPMENT

The following table summarizes property and equipment:

	As of March 31, 2009	As of December 31, 2008
Furniture, fixtures, computer hardware and computer software	\$ 776,780	\$ 715,310
Manufacturing machinery and equipment	12,375,755	12,257,585
Leasehold improvements	789,342	789,342
Net depreciable property, plant and equipment	13,941,877	13,762,237
Building	5,653,685	5,634,060
Building construction in process	10,738,313	9,050,136
Net property, plant and equipment	30,333,875	28,446,433
Less: Accumulated depreciation and amortization	(1,970,359)	(1,521,922)
Property and equipment, net	\$ 28,363,516	\$ 26,924,511

Property and Equipment depreciation and amortization expense for the three months ended March 31, 2009 and 2008 was \$448,437 and \$264,959, respectively.

NOTE 8. DEPOSITS ON MANUFACTURING EQUIPMENT

As of March 31, 2009, the Company had entered into purchase agreements of approximately \$102 million for the acquisition of manufacturing production tools and approximately \$7 million for one meter wide manufacturing development tools for the Company's planned expansion to approximately 30 MW of rated capacity and planned future implementation of one meter wide substrates. As of March 31, 2009, the Company had made or accrued progress payments of approximately \$49.4 million on these purchase agreements which are reflected on the Balance Sheet as Deposits on manufacturing equipment. Generally, these purchase agreements have milestone-based deliverables, such as the Company's acceptance of design requirements and successful installation and commissioning of the equipment.

NOTE 9. DEBT

In January 2006, the Company completed a \$1.6 million bridge loan (Bridge Financing) from lenders (Bridge Noteholders) to help meet the Company's working capital needs. The loans (Bridge Loans) accrued interest at an annual rate of 10% and were due and payable upon the earlier of January 2007 or the completion of Ascent's public offering of equity securities with gross proceeds of at least \$5,000,000 (Qualified Public Offering). In July 2006, with the proceeds from a Qualified Public Offering (*i.e.*, the Company's initial public offering or IPO), the Company repaid the Bridge Loans including accrued interest.

In connection with the Bridge Loans, the Company issued rights (Bridge Rights) to the Bridge Noteholders. One Bridge Right was issued for every \$25,000 loaned. In July 2006, upon completion of the IPO, the holders of Bridge Rights received restricted units. The holder of each Bridge Right received that number of units equal to \$25,000 divided by the IPO price of the units of \$5.50 for a total of 290,894 units. The units are identical to those offered in Ascent's IPO and consisted of one share of common stock, one redeemable Class A public warrant and two non-redeemable Class B warrants. In September 2006, the SEC declared effective the Company's Registration Statement on Form SB-2 (Reg. No. 333-137008)

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

for the shares and warrants underlying the 290,894 units issued in connection with the Bridge Rights. The Registration Statement on Form SB-2 subsequently was converted to a Registration Statement on Form S-3.

Paulson Investment Company, Inc. acted as the placement agent for the Bridge Financing. The Company paid Paulson Investment Company, Inc. a commission equal to 10% of the gross proceeds from the Bridge Financing, plus reasonable out-of-pocket expenses. The Bridge Loans and the Bridge Rights were allocated for accounting purposes based on the relative fair values of the Bridge Loans without the Bridge Rights and the Bridge Rights themselves at the time of issuance. The actual value of the Bridge Loans and the Bridge Rights was computed at \$1,600,000 each for a total value of \$3,200,000. Since they were each of equal value, the \$1,600,000 of proceeds was allocated 50% to the Bridge Loans and 50% to the Bridge Rights (*i.e.*, \$800,000 each). The Bridge Rights of \$800,000 were accounted for as paid-in capital.

The discount for the commission (\$160,000) and the Bridge Rights (\$800,000) were amortized into interest expense over the life of the loans. In July 2006 with the repayment of the Bridge Loans, the remaining unamortized balance of the discount for commission and Bridge Rights of \$960,000 was recognized as interest expense in the Condensed Statements of Operations.

On February 8, 2008, the Company acquired an approximately 120,000 square foot manufacturing and office facility in Thornton, Colorado, for approximately \$5.5 million. The purchase was financed by a promissory note, deed of trust and construction loan agreement with the Colorado Housing and Finance Authority (CHFA) (Construction Loan), which provided the Company borrowing availability of up to \$7.5 million for the building and building improvements. The Company paid approximately \$1.3 million in cash and was advanced approximately \$4.2 million from CHFA to fund the initial acquisition of the property. The terms of the Construction Loan required payments of interest only at 6.6% on the outstanding balance. On January 29, 2009, the Construction Loan was converted into a permanent loan pursuant to a loan modification agreement between the Company and CHFA (Permanent Loan). The Permanent Loan has an interest rate of 6.6% and the principal will be amortized over a period of approximately 19 years and 1 month consistent with a maturity date 20 years after the incurrence of the Construction Loan on February 8, 2008. An additional \$75,000 loan commitment fee was paid in 2008 and reflected on the balance sheet in non-current assets. This fee is being amortized into interest expense over the 20 year life of the Construction and the Permanent Loan. As of March 31, 2009, we have expended approximately \$9.8 million in building improvements of which \$3.4 million was funded by CHFA. As of March 31, 2009, the renovation was substantially complete. Additional infrastructure costs related to the build-out of two additional structures, electrical upgrade and other utilities have increased our budget for our building improvements since originally projected early in 2008. We will incur a prepayment penalty if the Permanent Loan is prepaid prior to December 31, 2015 equal to the sum of (i) the present value of the total principal and interest payments due under the Note from the prepayment date to December 31, 2015, and (ii) the present value of the remaining principal balance of the Note that would have been due as of December 31, 2015, less the principle amount of the Note outstanding. Further, pursuant to certain negative covenants contained in the deed of trust associated with the permanent loan, until the Permanent Loan is repaid and all of our secured obligations performed in full, we may not, among other things, without CHFA's prior written consent: create or incur additional indebtedness; merge or consolidate with any other entity; or make loans or advances to our officers, shareholders, directors or employees, which consent will not be unreasonably withheld.

On January 29, 2009, the date of the closing of our Permanent Loan of \$7,500,000, our future principal payments were due as follows:

2009	\$	187,150
2010		217,463
2011		232,257
2012		248,059
2013		264,935
Thereafter		6,350,136
	\$	7,500,000

NOTE 10. DERIVATIVE FINANCIAL INSTRUMENTS

The Company is actively engaged in purchasing manufacturing equipment internationally and is exposed to foreign currency risk. In July 2008 and March 2009, the Company entered into fair value hedges utilizing forward contracts designed to match scheduled contractual payments to equipment suppliers which are denominated in Euros and Yen. The total notional value of the Euro forward contracts was 6.4 million with various contract settlement dates beginning September 15, 2008 through July 31, 2009. The total notional value of the Yen forward contracts was ¥521.4 million with contract settlement

dates of March and April 2009. The Company elected not to use hedge accounting under SFAS 133 and accordingly, the unrealized losses on each forward contract were determined at each balance sheet date based upon current market rates and are reported as Unrealized losses on forward contracts in the Condensed Statement of Operations. Upon settlement of the forward contracts, realized gains or losses are reported in the Condensed Statement of Operations as Realized gains or losses on forward contracts. As of March 31, 2009, the unrealized gain on these forward contracts was \$154,191 and the realized loss was \$566,373. Although the hedging activity is designed to fix the dollar amount to be expended, the asset purchased is recorded at the spot rate in effect as of the date of the payment to the supplier. The difference between the spot rate and the forward rate has been reported as a loss on forward contract. During the first quarter 2009, forward contracts for delivery of 1,820,560 and ¥393,750,000 were settled and deposited in a bank account for future payments to our equipment suppliers. Period end translation adjustments related to the Euros and Yen on deposit in our bank account are accounted for as realized gains and losses on forward contract transactions. Included in cash and cash equivalents is \$2,518,027 related to 1,892,336 Euros and \$3,973,660 related to 393,750,000 Yen held as of March 31, 2009. In connection with the forward contracts, the Company has a \$2.3 million deposit account with the bank holding the forward contracts which is reflected as restricted cash on the March 31, 2009 balance sheet. Derivative financial instruments are not used for speculative or trading purposes. See Note 4 for information about the fair value measurement of our derivative financial instruments.

NOTE 11. STOCKHOLDERS EQUITY

The Company's authorized capital stock consists of 75,000,000 shares of common stock, \$0.0001 par value, and 25,000,000 shares of preferred stock, \$0.0001 par value. In November 2005, the Company issued 972,000 shares of common stock at a price of \$0.04 per share. The Company has recorded for financial statement purposes the 972,000 shares at a fair value of \$1.00 per share. The Condensed Statements of Stockholders Equity reflects compensation expense of \$933,120 related to the recording of this stock transaction. In January 2006, in consideration of certain asset transfers, licenses and service agreements, the Company issued 1,028,000 shares of common stock to ITN Energy Systems, Inc.

Preferred stock, \$0.0001 par value per share, may be issued in classes or series. Designations, powers, preferences, rights, qualifications, limitations and restrictions are determined by the Company's Board of Directors.

Initial Public Offering: On July 10, 2006, the SEC declared effective the Company's Registration Statement on Form SB-2 (Reg. No. 333-131216), and the Company completed its IPO of 3,000,000 units on July 14, 2006. Each unit consisted of one share of common stock, one redeemable Class A warrant and two non-redeemable Class B warrants. The managing underwriter of the IPO was Paulson Investment Company, Inc. The IPO price was \$5.50 per unit. The gross proceeds of the offering were \$16,500,000. Ascent's net proceeds from the offering, after deducting the underwriter's discount of \$1,097,250 and other fees and expenses, aggregated approximately \$14,000,000.

The common stock and Class A and Class B warrants traded only as a unit through August 9, 2006, after which the common stock, the Class A warrants and the Class B warrants began trading separately.

Class A warrants. On May 24, 2007, the Company publicly announced that it intended to redeem its outstanding Class A warrants. The Class A warrants became eligible for redemption by the Company at \$0.25 per warrant on April 16, 2007, when the last reported sale price of the Company's common stock had equaled or exceeded \$9.35 for five consecutive trading days. There were 3,290,894 Class A warrants issued in connection with the Company's initial public offering, including the warrants issued to the Bridge Noteholders. The Class A warrants were exercisable at a price of \$6.60 per share.

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

The exercise period ended June 22, 2007. During the exercise period, 3,098,382 Class A warrants (94.1% of the total outstanding) were exercised for an equal number of shares of common stock, and the Company received \$20,449,321 in proceeds from the warrant exercises. At the end of the exercise period, 192,512 Class A warrants remained outstanding. The Company has set aside funds with its warrant transfer agent to redeem the outstanding warrants for \$0.25 per warrant, or a total cost of \$48,128. As of March 31, 2009, 9,090 Class A warrants remain unredeemed.

Class B warrants. The Class B warrants included in the units became exercisable on August 10, 2006. The exercise price of a Class B public warrant is \$11.00. The Class B warrants expire on July 10, 2011. The Company does not have the right to redeem the Class B warrants. During the years ended December 31, 2008 and 2007, 98,800 and 11,000 Class B warrants, respectively were exercised resulting in proceeds to the Company of approximately \$1,086,800 and \$121,000 respectively. As of March 31, 2009, 10,502,583 Class B warrants were outstanding.

IPO warrants. Warrants to purchase 300,000 units at \$6.60 were issued to underwriters of the Company's initial public offering in July 2006 (representative's warrants). A unit consists of one share of common stock, one Class A redeemable warrant and two Class B non-redeemable warrants. The warrants expire on July 10, 2011. Upon exercise of the

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

representative's warrants, holders will be forced to choose whether to exercise the underlying Class A warrants or hold them for redemption. As noted above, on June 25, 2007, any Class A warrants then outstanding expired and became redeemable.

Representative's warrants to purchase 150,000 units have been exercised as of December 31, 2007, as have the 150,000 underlying Class A warrants resulting in an issuance of 300,000 shares of common stock and 300,000 Class B warrants for total proceeds to the Company of \$1.98 million. During the year ended December 31, 2008 an additional 37,500 units were exercised, as well as 37,500 underlying Class A warrants resulting in an issuance of 75,000 shares of common stock and 75,000 Class B warrants for total proceeds to the Company of \$495,000. To the extent that holders of representative's warrants are entitled to receive Class A warrants upon exercise of the representative's warrants, those warrants will be immediately subject to call for redemption at \$0.25 per warrant. The holders will then have to decide whether to exercise their Class A warrants or hold them for redemption. As of March 31, 2009, 112,500 representative's warrants remained unexercised.

Private Placement of Securities: The Company completed a private placement of securities with Norsk Hydro Produksjon AS (Hydro) in March 2007. Hydro is a subsidiary of Norsk Hydro ASA. Hydro purchased 1,600,000 shares of the Company's common stock (representing 23% of the Company's outstanding common stock post transaction) for an aggregate purchase price of \$9,236,000. The Company recorded \$75,807 of costs associated with the private placement as a reduction to Additional paid in capital on the Company's Balance Sheets. In connection with the private placement, Hydro was granted options to purchase additional shares and warrants.

In August 2007, Hydro acquired an additional 934,462 shares of the Company's common stock and 1,965,690 Class B warrants through the exercise of an option previously granted to Hydro and approved by Ascent's stockholders in June 2007. Gross proceeds to the Company were \$10.48 million, and reflected per share and per warrant purchase prices equal to the average of the closing bids of each security, as reported by NASDAQ, for the five consecutive trading days preceding exercise. After acquiring these additional shares, Hydro again held 23% of the total outstanding common shares, after its holdings were diluted as the result of the redemption of Class A warrants and 23% of total outstanding Class B warrants. Pursuant to a second option that was approved by Ascent's stockholders in June 2007, beginning December 13, 2007, Hydro was entitled to purchase additional shares and Class B warrants up to a maximum of 35% of each class of security.

In March 2008, Hydro acquired an additional 2,341,897 shares of the Company's common stock and 1,689,905 Class B warrants through the exercise of the second option previously granted to Hydro and approved by Ascent's stockholders in June 2007, resulting in Hydro ownership of approximately 35% of each class of security. Gross proceeds to the Company were \$28.4 million, and reflected per share and per warrant purchase prices were equal to the average of the closing bids of each security, as reported by NASDAQ, for the five consecutive trading days preceding exercise. As a result of the Company's Secondary Public Offering in May 2008, Hydro's holdings were diluted to approximately 27%.

On October 8, 2008, Hydro acquired an additional 2,421,801 shares of the Company's common stock. The purchase resulted in a return to Hydro's ownership of approximately 35% of the Company's common stock. Gross proceeds to the company from the follow on investment were approximately \$15 million, and reflect per share purchase prices equal to the average of the closing bids of each security, as reported by NASDAQ, for the five consecutive trading days preceding exercise. Until June 15, 2009, the second option entitles Hydro to purchase from the Company additional restricted shares of common stock and Class B warrants to maintain ownership of up to 35% of issued and outstanding common stock and Class B warrants.

Other Proceeds: During the three months ended March 31, 2008, the Company received proceeds from a greater than 10% shareholder equal to the profits realized on the sale of the Company's stock that was purchased and sold within a six month or less time frame. Under Section 16(b) of the Securities and Exchange Act, the profit realized from this transaction by the greater than 10% shareholder must be disgorged to the Company under certain circumstances. The Company has recorded the proceeds received on this transaction of \$148,109 as Additional paid in capital and is reflected on the Condensed Statements of Stockholders' Equity.

Secondary Public Offering: On May 15, 2008, the SEC declared effective the Company's Registration Statement on Form S-3 (Reg. No. 333-149740), and the Company completed its Secondary Public Offering of 4,370,000 shares of common stock, which included 570,000 shares issued upon the underwriter's exercise of their overallotment in full. The offering price of \$14.00 per share resulted in proceeds of \$61,180,000. After deducting underwriting discounts and commissions and offering expenses of approximately \$4,361,000, net proceeds to the Company were approximately \$56,819,000. JP Morgan was the managing underwriter of the Secondary Public Offering.

As of March 31, 2009, the Company had 20,973,870 shares of common stock and no shares of preferred stock outstanding.

NOTE 12. STOCK BASED COMPENSATION

Stock Option Plan: The Company's 2005 Stock Option Plan, as amended (Stock Option Plan) provides for the grant of incentive or non-statutory stock options to the Company's employees, directors and consultants. The Board of Directors adopted and the stockholders approved an increase in the total shares of common stock reserved for issuance under the Stock Option Plan from 1,000,000 to 1,500,000 on July 1, 2008.

Restricted Stock Plan: The Board of Directors adopted the Company's 2008 Restricted Stock Plan with stockholder approval on July 1, 2008. The Restricted Stock Plan reserves up to 750,000 shares of our common stock for restricted stock awards and restricted stock units to eligible employees, directors and consultants of the Company.

The Stock Option Plan and the Restricted Stock Plan are administered by the Compensation Committee of the Board of Directors, which determines the terms of the options and shares, including the exercise price, expiration date, vesting schedule and number of shares. Equity Compensation awards to executive officers and directors are also subject to approval by the Board of Directors. The term of any incentive stock option granted under the Stock Option Plan may not exceed ten years, or five years for options granted to an optionee owning more than 10% of the Company's voting stock. The exercise price of an incentive stock option granted under the Option Plan must be equal to or greater than the fair market value of the shares of the Company's common stock on the date the option is granted. An incentive stock option granted to an optionee owning more than 10% of the Company's voting stock must have an exercise price equal to or greater than 110% of the fair market value of the Company's common stock on the date the option is granted. The exercise price of a non-statutory option granted under the Option Plan must be equal to or greater than 85% of the fair market value of the shares of the Company's common stock on the date the option is granted. According to the terms of the Restricted Stock Plan, no individual may be granted, in any fiscal year, more than 200,000 shares. Vesting of shares of restricted stock granted under the Restricted Stock Plan may occur over a specified period of time or based upon performance metrics announced at the time of grant.

Stock Based Compensation: The Company accounts for share-based payments under the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123(R)) which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, officers, directors and consultants, including employee stock options based on estimated fair values. Stock based compensation expense recognized in the Condensed Statements of Operations for the three months ended March 31, 2009 and 2008 and for the period from inception (October 18, 2005) through March 31, 2009 is based on awards ultimately expected to vest and it has been reduced for estimated forfeitures.

The weighted average estimated fair value of stock options granted for the three months ended March 31, 2009 was \$3.49. There were no stock options granted in the three months ended March 31, 2008. Fair value was calculated using the Black-Scholes Model with the following weighted average assumptions:

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

	For the Three Months Ended	
	2009	2008
Expected volatility	108.9%	
Risk free interest rate	1.9%	
Expected dividends		
Expected life (in years)	6.45	

For the three months ended March 31, 2009, the Company based its estimate of expected volatility, expected life and expected forfeiture rate on historical company experience.

Stock-based compensation expense is calculated on a straight-line basis over the vesting periods of the related options. In future periods, the compensation expense that the Company records under SFAS 123(R) may differ significantly from what the Company recorded in the current period, as the Company builds company-specific performance history.

As of March 31, 2009, the Company had approximately \$1,651,000 of total compensation cost related to non-vested stock option awards not yet recognized and expects to recognize these costs over a weighted average period of approximately 2.2 years. As of March 31, 2009, approximately 1,027,000 shares were expected to vest in the future at a weighted average

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

exercise price of \$4.91. As of March 31, 2009, approximately 77,500 shares remained available for future grants under the Option Plan.

In addition to the stock options discussed above, the Company recognized share-based compensation expense related to restricted stock awards and restricted stock units of \$118,974 and \$0 for the three months ended March 31, 2009 and 2008, respectively. The weighted average grant date fair value of restricted stock for the three months ended March 31, 2009 and 2008 was \$3.76 and \$16.51 per share respectively. Total unrecognized share-based compensation expense from unvested restricted stock awards and restricted stock units as of March 31, 2009 was approximately \$593,000 which is expected to be recognized over a weighted average period of approximately 2.1 years.

Total stock-based compensation expense related to both stock options and restricted stock awards and units is reflected in our Condensed Statements of Operations as follows:

	For the three months ended	
	March 31,	
	2009	2008
Stock-based compensation cost included in:		
Research and development	\$ 175,643	\$ 90,415
Selling, general and administrative	234,165	80,978
Total stock-based compensation cost	\$ 409,808	\$ 171,393

NOTE 13. RELATED PARTY TRANSACTIONS

Included in General and administrative expenses for the three months ended March 31, 2009 and 2008 are \$201,057 and \$247,259 respectively, of costs to ITN for facility sublease costs, administrative support expenses and reimbursement of shared expenses.

Included in Research and development expenses for the three months ended March 31, 2009 and 2008 are \$594,398 (including \$31,312 of fee) and \$243,390, respectively, of R&D and manufacturing support activities provided by ITN. Beginning January 1, 2009, all R&D and manufacturing activity provided by ITN included cost plus 7% fee. Related party payables of \$365,119 and \$263,280 as of March 31, 2009 and December 31, 2008 respectively, represent costs remaining to be paid to ITN for these expenditures and amounts payable to officers and directors for Board of Directors fees and reimbursement of travel expenditures. Related party receivables of \$24,765 and \$0 as of March 31, 2009 and December 31, 2008 respectively, represent insurance related costs paid by the Company on behalf of ITN.

Included in Property and equipment and Deposits on manufacturing equipment as of March 31, 2009 is \$1,708,956 of costs to ITN for the construction of manufacturing and research and development equipment incurred during the period January 1, 2006 to March 31, 2009.

NOTE 14. COMMITMENTS

Sublease Agreement: On November 1, 2005, the Company entered into a sublease agreement with ITN, a greater than five percent stockholder of the Company, to lease office space in Littleton, Colorado. In 2005 and 2006, two Board

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

members of Ascent were partial owners of the company that leased this office space to ITN. As of January 1, 2007, they no longer have an investment in the building the Company is subleasing from ITN. Future minimum payments due under the sublease as of December 31, 2008 are as follows:

Year ending December 31:		
2009	\$	227,896
2010	\$	113,948

The Company is also responsible for payment of pass-through expenses such as property taxes, insurance, water and utilities. Rent expense for the three months ended March 31, 2009 and 2008 was \$59,265 and \$56,973, respectively.

Patent License Agreements: In 2006, the Company entered into two non-exclusive patent license agreements. In consideration for the right to license certain inventions, the Company is required to pay annual royalty payments based on net sales of products manufactured using the licensed technology. If there are no net sales of products manufactured using the

licensed technology, then a minimum royalty payment is required. The Company has made payments for the annual minimum royalties due associated with these patent license agreements.

NOTE 15. RETIREMENT PLAN

On July 1, 2006, the Company adopted a qualified 401(k) plan (Plan) which provides retirement benefits for all of its eligible employees. Under the plan, employees become eligible to participate at the first entry date, provided that they are at least 21 years of age. The participants may elect through salary reduction to contribute up to ceilings established in the Internal Revenue Code and the Plan documents. The Company will match 100% of the first six percent of employee eligible compensation contributions per pay period. In addition, the Company may make discretionary contributions to the Plan as determined by the Board of Directors. Employees are immediately vested in all salary reduction contributions. Rights to benefits provided by the Company's discretionary and matching contributions vest 100% after the first year of service.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with our audited financial statements and the notes to those financial statements appearing elsewhere in this Form 10-Q. This discussion and analysis contains statements of a forward-looking nature relating to future events or our future financial performance. As a result of many factors, our actual results may differ materially from those anticipated in these forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

Overview

We are a development stage company formed to commercialize flexible PV modules using proprietary technology. For the three months ended March 31, 2009, we generated approximately \$516,000 in revenues. A majority of revenue was from government research and development contracts not from our planned principal operations to commercialize flexible PV modules. As of March 31, 2009, we had an accumulated deficit of approximately \$29.5 million. Under our current business plan, we expect losses to continue through 2009 at which point we plan to commence production on our initial 30 MW manufacturing line that is currently in development. To date, we have financed our operations primarily through public and private equity financings including our recent secondary public offering of 4,370,000 shares of common stock with net proceeds of approximately \$56.8 million completed in May 2008, and an additional investment of approximately \$15 million by our largest shareholder Norsk Hydro in October 2008. The proceeds from these stock sales are primarily being utilized to fund the equipment purchases for our 30 MW production facility in Thornton, Colorado.

While focused on speed to market, we believe that quality and consistency of product will be paramount to our success in the marketplace. Consequently, our path to commercialization is defined by a highly disciplined, staged progression based upon the achievement of key milestones and supported by over fourteen years of concerted research and development activity by our scientists. Our progression also takes into account market conditions, as well as financing options. In keeping with our philosophy, we completed construction of a 1.5 MW production line in December 2007. In March 2008, we demonstrated initial operating capability (IOC) of our 1.5 MW production line by initiating production trials as an end-to-end integrated process. Early IOC production trials resulted in average thin-film device efficiencies of 9.5% and small area monolithically integrated module efficiencies of over 7%. Recent and ongoing production optimization trials have resulted in thin-film device efficiencies in the 9.5% to 11.5% range and corresponding module efficiencies in the 7.0% to 9.0% range. In the fourth quarter 2008 the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) independently verified that the modules produced on our 1.5 MW line measured as high as 9.64% in conversion efficiency. The test modules measured six inches wide by one foot long and serve as our building block for both building integrated PV (BIPV) and portable power products. During 2008 we focused on testing and qualifying our 1.5 MW production line in anticipation of commencing limited regular production. During the first quarter of 2009, we began regular production of monolithically integrated flexible CIGS modules from our 1.5 MW production line. We expect that process optimization will be an ongoing effort as we continuously strive for improvements in production yield, production throughput, and product efficiency that have a direct bearing on our cost competitiveness in the marketplace.

During 2008, we initiated the critical tasks of internal product testing and product development with customers. In 2009, we continued those tasks further and have commenced prototype development with our BIPV, electronic integrated PV (EIPV) and military customers by providing them test samples from our 1.5MW production line. At the same time we expect to complete the internal testing and product certification in the second half of 2009.

The Company's new manufacturing facility in Thornton, Colorado is in the final stages of completion and will be ready to accommodate installation of the equipment in the second quarter of 2009. Production tooling and equipment for the 30 MW plant began arriving in the first

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

quarter of 2009 and installation is scheduled to be completed in the first half of 2010. We expect to begin production with an annual rated capacity of 15 MW by the middle of 2010, and 30 MW of annual capacity by the end of 2010. We intend to incrementally expand our production capacity to 110 MW or greater by adding more capacity based on manufacturing developments, market conditions and availability of financing.

Commercialization and Manufacturing Expansion Plan

We intend to be the first company to manufacture large, roll-format, PV modules in commercial quantities that use CIGS on a flexible, plastic substrate. Our manufacturing expansion plan entails the design, installation, qualification, testing

and operation of additional production tools to increase our rated production capacity. We intend to incrementally expand our aggregate production capacity to 30 MW by attaining the following milestones within the time frames indicated:

- Second half of 2009: complete product certification with Underwriters Laboratory (UL) in the U.S. and Technischer Überwachungs-Verein (TÜV) in Europe from 1.5 MW production line.
- Fourth quarter of 2009: begin qualification of production tools for the first 30 MW.
- First half of 2010: begin production and ramp up of the first half of initial 30 MW capacity.
- Second half of 2010: commence ramp up to full 30 MW of rated capacity.

Although we currently plan to expand our production capacity to 110 MW or more by adding more capacity, the actual timing and amount of production capacity for the initial 30 MW and follow on capacity that we install may significantly deviate due to market conditions, availability of financing, timeliness of delivery of production tools, product performance and other factors.

Rated production capacity refers to our expected level of annual production upon optimization of our production process and is based on assumed production yields and module efficiencies. The actual production levels that we are able to realize at any point during our planned expansion will depend on a variety of factors, including our ability to optimize our production process to achieve targeted production yields and module efficiencies.

Although we currently plan to expand our production capacity in accordance with the timeline above, the actual timing and amount of production capacity that we install may significantly deviate from the above plan due to market conditions, availability of financing, timeliness of delivery of production tools, product performance and other factors. See Significant Trends, Uncertainties and Challenges below. We also recognize the importance of developing strategies and plans that may allow for the timely acceleration of our production beyond the current plan in order to meet market demand and the challenges from competitors who are presently expanding their operations.

Although we do not expect that minor delays in product certifications would significantly affect our ability to continue developing product applications with our customers, delays that extend significantly beyond mid-2009 likely would impact our ability to develop demand for our PV modules, and would affect our planned sales and results of operations in 2010, when we expect to have commenced production using our planned production tools for approximately 30 MW of rated capacity.

Using our 1.5 MW production line as a model, we have consummated the fixed price delivery contracts for the majority of the production tools for the 30 MW line. The equipment supplier schedules in the supply agreements provide for the installation of the majority of the production tools by the end of the third quarter of 2009. We plan to commence production ramp up to 30 MW of rated capacity by the end of the first quarter 2010. In order to qualify approximately 30 MW of rated capacity by the end of 2009, we intend to purchase and install production tools

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

that will process one-third meter wide plastic rolls similar to those used in our existing 1.5 MW production line. Significant delays in achieving desired production yields, module efficiencies or other performance metrics on the 1.5 MW production line and/or delays in the delivery, installation and qualification of the 30 MW production tools may impact our real and projected product sales in 2010.

We have initiated engineering and development of the one meter wide production tools to support future expansion of rated capacity. Successfully transitioning to one meter wide rolls should significantly increase our throughput, thereby reducing the number of manufacturing tools and, hence, the amount of capital expenditures required for equipment and facilities. Generally speaking, we believe that all other process variables, such as speed, thickness and composition, should remain unchanged. Based upon discussions with our equipment suppliers, we have identified deposition of the CIGS layer in the one meter wide format as the most challenging aspect of transitioning to one meter wide rolls; consequently, we have initiated the development of one meter wide prototype CIGS and molybdenum production tools to enable us to begin evaluating and testing one meter wide area deposition sources and process control systems. The one meter CIGS prototype production tool is scheduled for installation in 2009 and the one meter molybdenum production tool is scheduled for delivery in 2010. We plan to conduct six to nine months of testing and evaluation prior to committing the capital in to procure the one meter format production tools to support further expansion of rated capacity. Our planned expansion to approximately 110 MW of rated capacity will require additional capital, which we may not be able to obtain on favorable terms, if at all or without dilution to our stockholders.

Capital Equipment Expenditures and Manufacturing Costs

Since our formation in October 2005, most of our cash outlays have gone toward the investment in capital equipment necessary to develop our manufacturing capabilities for producing the commercial products we envision. We expect this trend to continue into the foreseeable future as we expand to approximately 110 MW of rated capacity by the end of 2011. We will require additional capital and additional facilities to achieve our manufacturing expansion plans. If we are unable to secure the necessary capital or to manage the disbursement of capital taking into consideration any unforeseen factors, such as cost increases from our equipment suppliers and the potential negative changes in the value of the U.S. dollar against foreign currencies, our ability to expand our manufacturing capacity as planned, as well as our financial performance and results of operations, may be adversely affected.

We currently expect the capital expenditures to support the first 30 MW of rated capacity to total approximately \$95 million to \$100 million for manufacturing equipment and approximately \$17 million for the acquisition and renovations of our new manufacturing facility in Thornton, Colorado. We also expect capital expenditures of approximately \$8 million for installation, qualification and other associated pre-operating expenses related to the first 30 MW expansion. In addition, we have budgeted approximately \$7 million in 2008 and 2009 for the procurement and installation of the one meter wide manufacturing development tools, sources, and sensor control systems. In order to install the next 30 MW and then additional 50 MW of rated capacity, we expect that we will require another approximately \$225 million to \$235 million for property, plant and equipment and approximately \$15 million for installation, qualification and other associated pre-operating expenses. Capital expenditure estimates for our expansion reflect an increase from our previous estimates primarily due to higher costs for equipment infrastructure, as well as higher estimated costs for certain equipment.

Our major equipment suppliers are located in Japan, the United Kingdom and Germany. To manage the uncertainties related to the procurement of capital equipment, we have continued to work closely with our equipment suppliers to complete the engineering of our new tools and refine the estimates of our planned capital outlays. The production tool costs are subject to change until we place firm procurement orders with our suppliers. To manage the fluctuations of foreign exchange rates, we have implemented forward pricing contracts for certain agreements denominated in foreign currencies.

Significant Trends, Uncertainties and Challenges

We believe that the significant trends, uncertainties and challenges that directly or indirectly affect our financial performance and results of operations are:

- Our ability to achieve desired production yields, module efficiencies and other performance targets, and to obtain necessary or desired certifications for our PV modules;
- Our ability to expand production in accordance with our plans set forth above under **Commercialization and Manufacturing Expansion Plan** ;
- Our ability to achieve projected operational performance and cost metrics;

- Our ability to consummate strategic relationships with key partners, including original equipment manufacturer (OEM) customers, system integrators, and distributors who deal directly with end-users in the BIPV, EIPV, portable power, and commodity solar panel markets;
- The effect that currency fluctuations may have on our capital equipment purchases, manufacturing costs and the price of our planned PV modules;
- Our ability to manage the planned expansion of our manufacturing facilities, operations and personnel;
- Our ability and the ability of our distributors, suppliers and customers to manage operations and orders during the global financial crisis; and
- Our ability to identify and retain a qualified permanent president and chief executive officer.

Basis of Presentation: The Company's activities to date have substantially consisted of raising capital, research and development, and the development of a 1.5 MW production plant and additional 30 MW expansion plant. Revenues to

date have been generated from the Company's governmental research and development (R&D) contracts and have not been significant. The Company's planned principal operations to commercialize flexible PV modules have not yet commenced. Accordingly, the Company is considered to be in the development stage, as defined in Statement of Financial Accounting Standards No. 7 (SFAS No. 7), *Accounting and Reporting by Development Stage Enterprises*.

Cash Equivalents: The Company considers all highly liquid debt securities purchased with an original maturity of three months or less to be cash equivalents. The Company maintains cash balances which may exceed federally insured limits. The Company does not believe that this results in significant credit risk.

Investments: The Company accounts for investments in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The Company has classified its investments as available-for-sale. Such investments are carried at fair value, based on quoted market prices with the unrealized holding gains and losses reported as Accumulated other comprehensive income (loss) in the stockholders' equity section of the balance sheet. Realized gains and losses on sales of securities are computed using the specific identification method. The Company evaluates declines in market value for potential impairment. If the decline results in a value below cost and is determined to be other than temporary, the investment is written down to its impaired value and a new cost basis is established.

Fair Value estimates: The fair value of an asset or liability is the amount at which it could be exchanged or settled in a current transaction between willing parties. The carrying value for cash and cash equivalents, investments, restricted cash, accounts receivable, accounts payable, accrued property and equipment, accrued expenses and other assets and liabilities approximate their fair values due to their short maturities. Effective January 1, 2008, the Company adopted SFAS No. 157, *Fair Value Measurements* (SFAS 157). In February 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157*, which provided a one year deferral of the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. The Company adopted this statement for financial assets and financial liabilities and nonfinancial assets and nonfinancial liabilities recognized or disclosed at fair value on a recurring basis as of January 1, 2008. The Company adopted this statement for nonfinancial assets and nonfinancial liabilities recognized or disclosed at fair value on a nonrecurring basis as of January 1, 2009. The effect of the adoption of this statement was not material, resulting only in additional disclosures. SFAS 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles and enhances disclosures about fair value measurements. Fair value is defined under SFAS 157 as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

Foreign Currency translation: Bank account balances related to our forward contracts are translated to U.S. dollars utilizing the period end exchange rate. Gains or losses on foreign currency translations are recorded in other income/loss in the Condensed Statements of Operations.

Revenue Recognition: Revenue to date is from governmental research and development contracts under terms that are cost plus fee or firm fixed price. Revenue from cost plus fee contracts is recognized as costs are incurred on the basis of direct costs plus allowable indirect costs and an allocable portion of the firm fixed fee. Revenue from firm fixed price contracts is recognized under the percentage-of-completion method of accounting, with costs and estimated profits included in contract revenue as work is performed. If actual and estimated costs to complete a contract indicate a loss, provision is made currently for the loss anticipated on the contract.

Patents: At such time as the Company is awarded patents, patent costs are amortized on a straight-line basis over the legal life, or over their estimated useful lives, whichever is shorter. As of March 31, 2009, the Company had \$140,524 of net patent costs of which \$28,138 represent costs net of amortization incurred for an awarded patent, and the remaining \$112,386 represents costs incurred for patent applications filed. Amortization expense for the three months ended March 31, 2009 and 2008 was \$1,279.

Property and Equipment: Property and equipment are recorded at the original cost to the Company. Assets are being depreciated over estimated useful lives of one to ten years using the straight-line method, commencing when the asset is placed in service. Leasehold improvements are depreciated over the shorter of the remainder of the lease term or the life of the improvements. Upon retirement or disposal, the cost of the asset disposed of and the related accumulated depreciation are removed from the accounts and any gain or loss is reflected in income. Expenditures for repairs and maintenance are expensed as incurred.

The Company computes depreciation expense using the straight-line method over the estimated useful lives of the assets, as presented in the table below. We amortize leasehold improvements over the shorter of their estimated useful lives or the remaining term of the lease.

	Useful Lives in Years
Buildings	40
Manufacturing machinery and equipment	5 - 10
Furniture, fixtures, computer hardware/software	3 - 7
Leasehold improvements	life of lease

Long-lived assets: We account for our long-lived, tangible assets and definitive-lived intangible assets in accordance with Statement of Financial Accounting Standards No. (SFAS, 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*). As a result, we assess long-lived assets classified as held and used, including our property, plant and equipment, for impairment whenever long-lived asset may not be recoverable. These events would include significant current period operating or cash flow losses associated with the use of a long-lived asset or group of assets combined with a history of such losses, significant changes in the manner of use of assets and significant negative industry or economic trends. We evaluated our long-lived assets for impairment for the period ending March 31, 2009 and concluded that no valuation allowances were required.

Risks and Uncertainties: The Company's operations are subject to certain risks and uncertainties, including those associated with: the ability to meet obligations; continuing losses; fluctuation in operating results; funding expansions; strategic alliances; financing arrangement terms that may restrict operations; regulatory issues; and competition. Additionally, U.S. government contracts may be terminated prior to completion of full funding by the U.S. government.

Net loss per Common Share: Statement of Financial Accounting Standards No. 128, *Earnings Per Share*, provides for the calculation of Basic and Diluted earnings per share. Basic earnings per share include no dilution and are computed by dividing income available to common stockholders by the weighted-average number of shares outstanding during the period. Diluted earnings per share reflect the potential of securities that could share in the earnings of the Company, similar to fully diluted earnings per share. Common stock equivalents consisting of Class B warrants, IPO warrants (representative warrants), stock options and restricted stock units outstanding as of March 31, 2009 and 2008 of approximately 12.1 million and 11.5 million shares, have been omitted from loss per share because they are anti-dilutive. Basic and diluted loss per share was the same in each of the periods ended March 31, 2009 and 2008.

Research and Development Costs: Research and development costs are incurred during the process of researching and developing new products and enhancing our manufacturing processes and consist primarily of compensation and related costs for personnel, materials, supplies and equipment depreciation. We expense these costs as incurred until the resulting product has been completed and tested and is ready for commercial manufacturing. We also incur

research and development expenses on our U.S. federal government research and development contracts and expense as incurred.

Income Taxes: Deferred income taxes are provided using the liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of the changes in tax laws and rates as of the date of enactment. Interest and penalties, if applicable would be recorded in operations.

In July 2006, the FASB issued FASB Interpretation (FIN 48), *Accounting for Uncertainty in Income Taxes*. The Company adopted the provisions of FIN 48 on January 1, 2007. As defined, FIN 48 seeks to reduce the diversity in practice associated with certain aspects of the recognition and measurement related to accounting for income taxes. The Company became subject to the provisions of FIN 48 as of January 1, 2007, and has analyzed filing positions in all of the federal and state jurisdictions where it is required to file income tax returns, as well as all open tax years in these jurisdictions. The Company has identified its federal tax return and its Colorado tax return as major tax jurisdictions, as defined. The periods subject to examination for the Company's federal and state tax returns are tax years 2005 through 2007. The Company believes that its income tax filing positions and deductions will be sustained on audit and does not anticipate any adjustments that will result in a material adverse effect on the Company's financial condition, results of operations, or cash flows. Therefore, no reserves for uncertain income tax positions have been recorded pursuant to FIN 48. In addition, the Company did not record a cumulative effect adjustment related to the adoption of FIN 48.

Stock Based Compensation: The Company accounts for share-based payments under the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123(R)) which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, officers, directors, and consultants, including employee stock options based on estimated fair values. SFAS 123(R) requires companies to estimate the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service period in the Company's Condensed Statements of Operations. Stock based compensation is based on awards ultimately expected to vest and is reduced for estimated forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, as necessary, in subsequent periods if actual forfeitures differ from those estimates.

For purposes of determining estimated fair value of share-based payment awards on the date of grant under SFAS 123(R), the Company uses the Black-Scholes option-pricing model (Black-Scholes Model). The Black-Scholes Model requires the input of highly subjective assumptions. Because the Company's employee stock options may have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models may not provide a reliable single measure of the fair value of the Company's employee stock options. Management will continue to assess the assumptions and methodologies used to calculate estimated fair value of share-based compensation. Circumstances may change and additional data may become available over time, which result in changes to these assumptions and methodologies, which could materially impact the Company's fair value determination.

The application of the SFAS 123(R) accounting principles may be subject to further interpretation and refinement over time. There are significant differences among option valuation models, and this may result in a lack of comparability with other companies that use different models, methods and assumptions. If factors change and the Company employs different assumptions in the application of SFAS 123(R) in future periods, or if the Company decides to use a different valuation model, the compensation expense that the Company records in the future under SFAS 123(R) may differ significantly from what it has recorded in the current period and could materially affect its loss from operations, net loss and net loss per share.

Comprehensive income (loss): Our comprehensive income (loss) consists of our net income (loss), and changes in unrealized gains or losses on available for sale investments, the impact of which has been excluded from net loss. We present our comprehensive income (loss) in the Condensed Statements of Stockholders' Equity and Comprehensive Income and (Loss). Our accumulated other comprehensive income (loss) is presented as a component of equity in our Condensed Balance Sheets and consists of the cumulative amount of unrealized gains or losses on available-for-sale investments that we have incurred since the inception of our business.

Reclassifications: Certain reclassifications have been made to the 2008 financial information to conform to the 2009 presentation. Such reclassifications had no effect on net loss and are primarily related to reclassifying costs between Research and development costs and General and administrative expenses in the Condensed Statements of Operations.

Use of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues

and expenses during the reporting period. Actual results could differ from those estimates.

Unaudited Information: The accompanying interim financial information as of March 31, 2009 and for the three months ended March 31, 2009 and 2008 and the period from inception (October 18, 2005) through March 31, 2009 was taken from the Company's books and records without audit. However, in the opinion of management, such information includes all adjustments (consisting only of results of normal recurring accruals) that are necessary to properly reflect the financial position of the Company as of March 31, 2009 and the results of operations for the three months ended March 31, 2009 and 2008 and the period from inception (October 18, 2005) through March 31, 2009 so that the financial statements are not misleading.

Recent Accounting Pronouncements: In May 2008, the FASB issued SFAS No. 162, "The Hierarchy of Generally Accepted Accounting Principles," which becomes effective upon approval by the SEC. The standard sets forth the sources of accounting principles and provides entities with a framework for selecting the principles used in the preparation of financial statements that are presented in conformity with GAAP. It is not expected to change any of our current accounting principles or practices and therefore, is not expected to have a material impact on our financial statements.

Results of Operations

Comparison of the Three Months Ended March 31, 2009 and 2008

Certain reclassifications have been made to the 2008 financial information to conform to the 2009 presentation. Such reclassifications had no effect on net loss and are primarily related to reclassifying costs between R&D costs and G&A expenses in the Statement of Operations. Our activities to date have substantially consisted of raising capital, business and product development, research and development and the development of our 1.5 MW production line and the construction of our 30 MW production line.

Research and Development Revenues. Our R&D revenues were \$516,133 for the three months ended March 31, 2009 compared to \$304,898 for the three months ended March 31, 2008 an increase of \$211,235. The majority of our R&D revenues during the three months ended March 31, 2009 and 2008 were revenues earned on our government R&D contracts. The increase in 2009 primarily relates to two government contracts awarded in June 2008.

Research and Development. R&D costs include the costs incurred for pre-production activities on our 1.5 MW line and our planned 30 MW line and costs related to our governmental contracts. R&D costs were \$3,195,653 for the three months ended March 31, 2009 compared to \$1,824,970 for the three months ended March 31, 2008, an increase of \$1,370,683. Costs related to pre-production activities increased \$1,251,302. The pre-production cost increases were comprised primarily of costs related to material and equipment production start-up activity of approximately \$325,000, depreciation and amortization of approximately \$159,000, personnel related costs of approximately \$470,000, facility related costs of approximately \$212,000, and stock compensation expense of approximately \$85,000. Governmental R&D expenditures increased by \$119,381 related to the contracts awarded June 2008.

General and Administrative. G&A expenses were \$1,580,878 for the three months ended March 31, 2009 compared to \$1,191,152 for the three months ended March 31, 2008, an increase of \$389,726. This increase is comprised of costs associated with increased headcount, increased consulting costs, and increased infrastructure costs of approximately \$135,000, and an increase in stock compensation expense of approximately \$153,000.

Interest Expense. Interest expense was \$83,345 for the three months ended March 31, 2009 compared to \$39,514 for the three months ended March 31, 2008, an increase of \$43,831. Interest expense relates to our CHFA loan utilized for our 30M production facility expansion in Thornton, Colorado. The increase in Interest expense relates to an increased CHFA loan balance as of March 31, 2009 compared to March 31, 2008.

Interest Income. Interest income was \$333,367 for the three months ended March 31, 2009 compared to \$352,047 for the three months ended March 31, 2008, a decrease of \$18,680. Interest income represents interest on cash and investments. The decrease in Interest income is due to significantly lower interest rates in the three months ended

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

March 31, 2009 compared to the three months ended March 31, 2008 offset by a higher average cash balance for the three months ended March 31, 2009 compared to March 31, 2008.

Realized Loss on Forward Contracts and Unrealized Losses on Forward Contracts. For the three months ended March 31, 2009, the unrealized gain on forward contracts was \$154,191 and the realized loss was \$556,373. Although the hedging activity is designed to fix the dollar amount to be expended, the asset purchased is recorded at the spot rate in effect as of the date of the payment to the supplier. The difference between the spot rate and the forward rate has been reported as a loss on forward contract.

Net Loss. Our Net Loss was \$4,412,558 for the three months ended March 31, 2009 compared to a Net Loss of \$2,398,691 for the three months ended March 31, 2008, an increase in Net Loss of \$2,013,867. The increase in Net Loss can be summarized in variances in significant account activity as follows:

	Increase (decrease) of Net Loss For the Three Months Ended March 31, 2009 compared to March 31, 2008	
Contract revenues	\$	(211,235)
Research and development costs		
Manufacturing R&D		1,193,559
Government R&D		91,906
Non-cash stock based compensation		85,218
General and administrative expenses		
Corporate G&A		236,538
Non-cash stock based compensation		153,188
Interest expense		43,831
Interest income		18,680
Realized Loss on forward contract		556,373
Unrealized Gain on forward contracts		(154,191)
Increase of Net Loss	\$	2,013,867

Liquidity and Capital Resources

For the three months ended March 31, 2009, our cash used in operations was approximately \$3.1 million compared to approximately \$1.6 million for the three months ended March 31, 2008. For the three months ended March 31, 2009 approximately \$13.1 million had been expended in capital to complete our 1.5 MW production line and facility modifications, initial payments on our 30 MW and one meter wide development and production tools, and acquisition and renovations to the Thornton, Colorado facility for our manufacturing expansion.

As of March 31, 2009, we had approximately \$71.2 million in cash, restricted cash and investments. We currently expect the capital expenditures needed to support the first 30 MW of rated capacity will total approximately \$95 million to \$100 million for production and manufacturing equipment and approximately \$17 million for the acquisition of the building and renovations of our 30 MW Thornton facility. We also expect capital expenditures of approximately \$8 million for installation, qualification and other associated pre-operating expenses related to the expansion. In addition, we have budgeted approximately \$7 million for the procurement and installation of the one meter wide manufacturing development tools, sources, and sensor control systems. We made actual cash payments of approximately \$45.7 million for the 30 MW production and manufacturing development tools as of March 31, 2009 and expect to make the remaining payments in 2009 and the first half of 2010. Remaining expenditures to complete the Thornton facility in the second quarter 2009 are estimated to be approximately \$2 million.

During the three months ended March 31, 2009, the use of cash for operational expenses averaged approximately \$1 million per month and was related to pre-manufacturing activities, research and technology development, business development and general corporate expenses. We expect operational expenses to increase in 2009 as we commence commercial production and increase the size of our workforce. Our average monthly operational expense for three months ended March 31, 2009 of approximately \$1 million is net of average monthly R&D revenues from our governmental contracts of approximately \$ 0.2 million and average monthly interest income net of interest expense of approximately \$ 0.1 million. A significant component of our costs for the three months ended March 31, 2009 related to the ongoing qualification of our 1.5 MW line and continuing corporate costs related to building the required infrastructure to support our 1.5 MW manufacturing operations and expansion plans. We anticipate that our operational expenditures will continue to increase throughout 2009 due to the planned hiring of additional personnel for both our 1.5 MW production line and the installation and qualification of our new 30 MW of rated production capacity in Thornton, Colorado. As of March 31, 2009, we had 64 full-time employees of which 40 were manufacturing personnel. We plan to continue to increase our staff during 2009, principally in the manufacturing area.

We do not expect that our sales revenue from the 1.5 MW production line will be sufficient to support our operations and cash requirements, and it is unlikely that our sales revenue will support our operating cash requirements unless we achieve actual production capacity of at least 30 MW per year. Our original equipment delivery schedule called for installation of all of the 30MW production equipment during 2009. Due to the recent financial crisis affecting the financial markets, our ability to obtain credit or to raise additional capital has become increasingly difficult. In order to preserve cash we have extended the equipment delivery schedule related to the first 30 MW of annual rated production capacity to 2010. We now expect to begin production using equipment with an annual rated production capacity of approximately 15 MW in early 2010, and full 30 MW of annual rated production capacity by the middle of 2010.

On January 9, 2009, we filed a shelf Registration Statement on Form S-3 with the Securities and Exchange Commission (SEC). The SEC declared the registration statement effective on January 16, 2009. With the shelf registration, we may from time to time sell common stock, preferred stock, warrants or some combination in one or more offerings totaling up to \$150 million.

Off Balance Sheet Transactions

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

As of March 31, 2009, we did not have any off balance sheet arrangements as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Foreign Currency Exchange Risk

The Company is actively engaged in purchasing manufacturing equipment internationally and is exposed to foreign currency risk. Our objective is to fix the dollar amount of our foreign currency denominated manufacturing equipment purchases at time of order. Although the hedging activity is designed to fix the dollar amount to be expended, the asset

purchased is recorded at the spot rate in effect as of the date of the payment to the supplier. The difference between the spot rate and the forward rate has been reported as a loss on forward contract.

In July 2008 and March 2009, the Company entered into fair value hedges utilizing forward contracts designed to match scheduled contractual payments to equipment suppliers which are denominated in Euros and Yen. The total notional value of the Euro forward contracts was 6.4 million with various contract settlement dates beginning September 15, 2008 through July 31, 2009. The total notional value of the Yen forward contracts was ¥521.4 million with contract settlement dates of March and April 2009. Derivative financial instruments are not used for speculative or trading purposes.

Although our reporting currency is the U.S. dollar, we may conduct business and incur costs in the local currencies of other countries in which we may operate, make sales and buy materials. As a result, we are subject to currency translation risk. Further, changes in exchange rates between foreign currencies and the U.S. dollar could affect our future net sales and cost of sales and could result in exchange losses.

We cannot accurately predict future exchange rates or the overall impact of future exchange rate fluctuations on our business, results of operations and financial condition.

Interest Rate Risk

Our exposure to market risks for changes in interest rates relates primarily to our cash equivalents and investment portfolio. As of March 31, 2009, our cash equivalents consisted of money market funds and investments represented U.S. government securities, and high quality corporate securities. The primary objective of our investment activities is to preserve principal and provide liquidity on demand, while at the same time maximizing the income we receive from our investments without significantly increasing risk. The direct risk to us associated with fluctuating interest rates is limited to our investment portfolio and we do not believe that a change in interest rates will have a significant impact on our financial position, results of operations or cash flows.

Commodity and Component Risk

Failure to receive timely delivery of production tools from our equipment suppliers could delay our planned expansion of manufacturing capacity and materially and adversely affect our results of operations and financial condition. Our planned expansion of manufacturing capacity and commercialization timeline depend on the timely delivery of production tools from our equipment suppliers. The relationships with our chosen equipment suppliers are relatively new, and at this point in time we cannot be certain that the equipment orders we place with these suppliers will be fulfilled as we expect or in a timely manner.

We are exposed to price risks for the raw materials used in the manufacture of our PV modules. We depend on a limited number of third-party suppliers for key raw materials, and their failure to perform could cause manufacturing delays and impair our ability to deliver PV modules to customers in the required quality and quantity and at a price that is profitable to us. Our failure to obtain raw materials and components that meet our quality, quantity and cost requirements in a timely manner could interrupt or impair our ability to manufacture our PV modules or increase our manufacturing cost. Most of our key raw materials are either sole-sourced or sourced by a limited number of third-party suppliers. As a result, the failure of any of our suppliers to perform could disrupt our supply chain and impair our operations. In addition, many of our suppliers

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

are small companies that may be unable to supply our increasing demand for raw materials as we implement our planned expansion. We may be unable to identify new suppliers in a timely manner or on commercially reasonable terms. Raw materials from new suppliers may also be less suited for our technology and yield PV modules with lower conversion efficiencies, higher failure rates and higher rates of degradation than PV modules manufactured with the raw materials from our current suppliers.

If delivery of production tools or raw materials are not made on schedule or at all, then we might be unable to carry out our commercialization and manufacturing expansion plans, produce PV modules in the volumes and at the times that we expect or generate sufficient revenue from operations, and our business, results of operations and financial condition could be materially and adversely affected.

Credit Risk

We have certain financial and derivative instruments that potentially subject us to credit risk. These consist primarily of cash, cash equivalents, restricted cash, investments, and forward foreign exchange contracts. We are exposed to credit losses in the event of nonperformance by the counter parties to our financial and derivative instruments. We place

cash, cash equivalents, investments and forward foreign exchange contracts with various high-quality financial institutions, and exposure is limited at any one institution. We continuously evaluate the credit standing of our counter party financial institutions.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934, as amended (Exchange Act) is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission (SEC) rules and forms. Our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives, and management necessarily is required to use its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Our management conducted an evaluation required by Rules 13a-15 and 15d-15 under the Exchange Act of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15 and 15d-15 under the Exchange Act as of March 31, 2009. Based on this evaluation, our management concluded that as of March 31, 2009, the design and operation of our disclosure controls and procedures were effective.

Changes in Internal Control over Disclosure and Reporting

There was no change in our internal control over financial reporting that occurred during the quarterly period ended March 31, 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

None

Item 1A. Risk Factors

Edgar Filing: Ascent Solar Technologies, Inc. - Form 10-Q

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A: Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2008, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing our company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

Item 6. Exhibits

a. The following exhibits are filed as part of, or are incorporated by reference into, this report:

Exhibit No.	Description
3.1	Registrant's Amended and Restated Certificate of Incorporation (incorporated by reference to Exhibit 3.2 to our Registration Statement on Form SB-2 filed January 23, 2006 (Reg. No. 333-131216), as amended)
3.2	Registrant's Second Amended and Restated Bylaws (incorporated by reference to Exhibit 3.2 to our current report on Form 8-K filed February 17, 2009)
10.1	Loan Modification Agreement with Colorado Housing and Finance Authority (incorporated by reference to Exhibit 10.52 to our Annual Report on Form 10-K filed March 12, 2009)
31.1	Chief Executive Officer Certification pursuant to section 302 of the Sarbanes-Oxley Act of 2002*
31.2	Chief Financial Officer Certification pursuant to section 302 of the Sarbanes-Oxley Act of 2002*

Exhibit No.	Description
32.1	Chief Executive Officer Certification pursuant to section 906 of the Sarbanes-Oxley Act of 2002*
32.2	Chief Financial Officer Certification pursuant to section 906 of the Sarbanes-Oxley Act of 2002*

* Filed herewith

ASCENT SOLAR TECHNOLOGIES, INC.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized on the 7th day of May, 2009.
