Notes to Schedule of Investments (unaudited)

1. Organization and Significant Accounting Policies

Western Asset Global High Income Fund Inc. (the Fund) was incorporated in Maryland and is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund's primary investment objective is high current income. The Fund's secondary objective is total return.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Investment Valuation. Debt securities are valued at the mean between the last quoted bid and asked prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market, and are valued at the mean between the last quoted bid and asked prices as of the close of business of that market. Equity securities for which market quotations are available are valued at the last reported sales price or official closing price on the primary market or exchange on which they trade. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

The Fund has adopted Statement of Financial Accounting Standards No. 157 (FAS 157). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund uses valuation techniques to measure fair value that are consistent with the market approach, income approach and/or cost approach, depending on the type of the security and the particular circumstance.

Edgar Filing: WESTERN ASSET GLOBAL HIGH INCOME FUND INC. - Form N-Q

The following is a summary of the inputs used in valuing the Fund's assets carried at fair value:

Description	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Long-term investments:				
Corporate bonds & notes		\$ 336,843,509	\$ 82,925	\$ 336,926,434

Short-term investments		13,075,000		13,075,000
Total investments	\$ 726,844	\$ 437,329,809	\$ 87,904	\$ 438,144,557
Other financial instruments:				
Forward currency contracts		\$ (144,883)		\$ (144,883)
Interest rate swaps		(27,382)		(27,382)
Credit default swaps on credit indices - sell protection		(3,180,820)		(3,180,820)
Total other financial instruments		\$ (3,353,085)		\$ (3,353,085)
Total	\$ 726,844	\$ 433,976,724	\$ 87,904	\$ 434,791,472

Values include any premiums paid or received with respect to swap contracts

Notes to Schedule of Investments (unaudited) (continued)

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

INVESTMENTS IN SECURITIES	CORPORATE BONDS & NOTES	ASSET- BACKED SECURITIES	COMMON STOCKS CONSUMER DISCRETIONARY	PREFERRED STOCKS CONSUMER DISCRETIONARY	WARRANTS	TOTAL
Balance as of May 31, 2009	\$ 1,206,667			\$ 4,559	\$ 337	\$ 1,211,563
Accrued premiums/discounts	9,290					9,290
Realized gain/(loss) 1			\$ (694,145)			(694,145)
Change in unrealized appreciation (depreciation) 2	7,758		695,435			703,193
Net purchases (sales)			(1,290)			(1,290)
Net transfers in and/or out of Level 3	(1,140,790)	\$ 83				(1,140,707)
Balance as of August 31, 2009	\$ 82,925	\$ 83		\$ 4,559	\$ 337	\$ 87,904
Net unrealized appreciation (depreciation) for investments in securities still held at August 31, 2009 2	\$ (535,855)	\$ (166,780)				\$ (702,635)

1 This amount is included in net realized gain (loss) from investment.

2 Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized.

(b) Repurchase Agreements. When entering into repurchase agreements, it is the Fund's policy that its custodian or a third party custodian take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market daily to ensure the adequacy of the collateral. If the seller defaults, and the market value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

(c) Forward Foreign Currency Contracts. The Fund may enter into a forward foreign currency contract to hedge against foreign currency exchange rate risk on its non-U.S. dollar denominated securities or to facilitate settlement of a foreign currency denominated portfolio transaction. A forward foreign currency contract is an agreement between two parties to buy and sell a currency at a set price with delivery and settlement at a future date. The contract is marked-to-market daily and the change in value is recorded by the Fund as an unrealized gain or loss. When a forward foreign currency contract is closed, through either delivery or offset by entering into another forward foreign currency contract, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value of the contract at the time it was closed.

Notes to Schedule of Investments (unaudited) (continued)

Forward foreign currency contracts involve elements of market risk in excess of the amounts reflected in the Statement of Assets and Liabilities. The Fund bears the risk of an unfavorable change in the foreign exchange rate underlying the forward foreign currency contract. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

(d) Swap Agreements. The Fund may invest in swaps for the purpose of managing their exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with ordinary portfolio transactions.

Credit default swaps

The Fund may enter into credit default swap (CDS) contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate or sovereign issuers, on a specified obligation, or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide protection against defaults of the issuers (i.e., to reduce risk where a Fund has exposure to a sovereign issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of values from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. As a buyer of protection, the Fund generally receives an amount up to the notional value of the swap if a credit event occurs.

Implied spreads are the theoretical prices a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of credit default swap agreements on corporate or sovereign issues are disclosed in the Notes to Schedule of Investments and serve as an indicator of the current status of the payment/ performance risk and represent the likelihood or risk of default for credit derivatives. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract as well as the annual payment rate, serve as an indication of the current status of the payment/ performance risk.

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

Interest Rate Swaps

Edgar Filing: WESTERN ASSET GLOBAL HIGH INCOME FUND INC. - Form N-Q

The Fund may enter into interest rate swap contracts. Interest rate swaps are agreements between two parties to exchange cash flows based on a notional principal amount. The Fund may elect to pay a fixed rate and receive a floating rate, or, receive a fixed rate and pay a floating rate on a notional principal amount. The net periodic payments received or paid on interest rate swap agreements are recognized as realized gains or losses. Interest rate swaps are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealized gain or loss. A liquidation payment received or made at the termination of the swap is recognized as a realized gain or loss. The risks of interest rate swaps include changes in market conditions that will affect the value of the contract or changes in the present value of the future cash flow streams and the possible inability of the counterparty to fulfill its obligations under the agreement. The Fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from the counterparty over the contract's remaining life, to the extent that that amount is positive. This risk is mitigated by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty.

Swap contracts are marked-to-market daily and changes in value are recorded as unrealized appreciation/(depreciation). Gains or losses are realized upon termination of the swap agreement. Periodic payments and premiums received or

Notes to Schedule of Investments (unaudited) (continued)

made by a Fund are recorded as realized gains or losses, respectively. Collateral, in the form of restricted cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Securities held as collateral for swap contracts are identified in the Schedule of Investments. The risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms, and the possible lack of liquidity with respect to the swap agreements.

As disclosed in the Fair Values of Derivatives' Balance Sheet table that follows each Fund's summary of open swap contracts, the aggregate fair value of credit default swaps in a net liability position as of August 31, 2009 was \$(3,180,820). The Fund did not post or receive collateral for swaps at August 31, 2009. If a defined credit event had occurred as of August 31, 2009, the swaps' credit-risk-related contingent features would have been triggered and the Fund would have been required to pay up to \$25,800,000 less the value of the contracts' related reference obligations.

As of August 31, 2009, the Brazil CETIP Interbank Deposit (CDI) rate was 8.62%.

(e) Stripped Securities. The Fund invests in Stripped Securities, a term used collectively for stripped fixed income securities. Stripped securities can be principal only securities (PO), which are debt obligations that have been stripped of unmatured interest coupons or, interest only securities (IO), which are unmatured interest coupons that have been stripped from debt obligations. As is the case with all securities, the market value of Stripped Securities will fluctuate in response to changes in economic conditions, interest rates and the market's perception of the securities. However, fluctuations in response to interest rates may be greater in Stripped Securities than for debt obligations of comparable maturities that pay interest currently. The amount of fluctuation increases with a longer period of maturity.

The yield to maturity on IO's is sensitive to the rate of principal repayments (including prepayments) on the related underlying debt obligation and principal payments may have a material effect on yield to maturity. If the underlying debt obligation experiences greater than anticipated prepayments of principal, the Fund may not fully recoup its initial investment in IO's.

(f) Loan Participations. The Fund may invest in loans arranged through private negotiation between one or more financial institutions. The Fund's investment in any such loan may be in the form of a participation in or an assignment of the loan. In connection with purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of set-off against the borrower and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the participation.

The Fund assumes the credit risk of the borrower, the lender that is selling the participation and any other persons interpositioned between the Fund and the borrower. In the event of the insolvency of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

(g) Inflation-Indexed Bonds. Inflation-indexed bonds are fixed income securities whose principal value or interest rate is periodically adjusted according to the rate of inflation. If the index measuring inflation falls, the principal value or interest rate of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount or

lower interest rate) will be reduced. Inflation adjustments to the principal amount of inflation-indexed bonds are reflected as an increase or decrease to investment. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds. For bonds that do not provide a similar guarantee, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

(h) Foreign Currency Translation. Investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability.

(i) Security Transactions. Security transactions are accounted for on a trade date basis.

Notes to Schedule of Investments (unaudited) (continued)**2. Investments**

At August 31, 2009, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$	16,726,922
Gross unrealized depreciation		(39,826,068)
Net unrealized depreciation	\$	(23,099,146)

At August 31, 2009, the Fund had the following open forward foreign currency contracts:

Foreign Currency	Local Currency	Market Value	Settlement Date	Unrealized Gain(Loss)
Contracts to Buy:				
British Pound	1,680,000	\$ 2,737,359	11/19/09	\$ (116,524)
Euro	3,450,000	4,949,206	11/19/09	(18,829)
				(135,353)
Contracts to Sell:				
British Pound	1,683,000	2,742,247	11/19/09	110,101
Euro	1,050,000	1,506,280	11/19/09	(16,851)
Euro	14,100,000	20,227,189	11/19/09	(102,780)
				(9,530)
Net Unrealized Loss on Open Forward Foreign Currency Contracts				\$ (144,883)

At August 31, 2009, the Fund had the following open swap contracts:

SWAP COUNTERPARTY	NOTIONAL AMOUNT	TERMINATION DATE	PERIODIC PAYMENTS MADE BY THE FUND	PERIODIC PAYMENTS RECEIVED BY THE FUND	UPFRONT PREMIUMS PAID/ (RECEIVED)	UNREALIZED DEPRECIATION
Interest Rate Swaps:						
Credit Suisse First Boston Inc.	4,271,536	1/2/12	BRL-CDI	10.510%	\$	\$ (18,006)*
Credit Suisse First Boston Inc.	2,653,585	1/2/12	BRL-CDI	10.560%		(9,376)*
Net unrealized depreciation on open swap contracts					\$	(27,382)

*Security is valued in good faith at fair value by or under the direction of the Board of Directors (See Note 1).

CREDIT DEFAULT SWAP ON CREDIT INDICES SELL PROTECTION¹

SWAP COUNTERPARTY (REFERENCE ENTITY)	NOTIONAL AMOUNT ²	TERMINATION DATE	PERIODIC PAYMENTS RECEIVED BY THE FUND	MARKET VALUE³	UPFRONT PREMIUMS PAID/ (RECEIVED)	UNREALIZED DEPRECIATION
Barclay s Capital Inc. (CDX North America Crossover Index)	25,800,000	12/20/12	3.750% quarterly	\$ (2,890,570)	\$ 290,250	\$ (3,180,820)

¹ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

² The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

Notes to Schedule of Investments (unaudited) (continued)

3 The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement been closed/sold as of the period end. Decreasing market values when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Notional amount denominated in U.S. dollars, unless otherwise noted.

Percentage shown is an annual percentage rate.

3. Derivative Instruments and Hedging Activities

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, requires enhanced disclosure about an entity's derivative and hedging activities.

The following is a summary of the Fund's derivative instruments categorized by risk exposure at August 31, 2009.

Primary Underlying Risk Disclosure	Forward Foreign Currency Contracts		Swap Contracts		Total
	Unrealized Appreciation	Unrealized Depreciation	Unrealized Appreciation	Unrealized Depreciation	
Interest Rate Contracts				\$ (27,382)	\$ (27,382)
Foreign Exchange Contracts	\$ 110,101	\$ (254,984)			(144,883)
Credit Contracts				(3,180,820)	(3,180,820)
Total	\$ 110,101	\$ (254,984)		\$ (3,208,202)	\$ (3,353,085)

ITEM 2. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act")) are effective as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the disclosure controls and procedures required by Rule 30a-3(b) under the 1940 Act and 15d-15(b) under the Securities Exchange Act of 1934.

(b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant's last fiscal quarter that have materially affected, or are likely to materially affect the registrant's internal control over financial reporting.

ITEM 3. EXHIBITS.

Certifications pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Western Asset Global High Income Fund Inc.
