RealD Inc.

Notes to condensed consolidated financial statements (unaudited)

1. Business and basis of presentation

RealD Inc., including its subsidiaries (RealD), is a global licensor of stereoscopic 3D technologies.

The accompanying condensed consolidated financial statements are unaudited. These unaudited interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) and applicable rules and regulations of the Securities and Exchange Commission (SEC) regarding interim financial reporting and include all adjustments (consisting of only normal recurring adjustments, unless otherwise indicated), necessary for a fair presentation of our condensed consolidated financial statements. Interim results are not necessarily indicative of results for any subsequent quarter, the full fiscal year or any future periods. Certain information and note disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. Accordingly, these interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto contained in our Annual Report on Form 10-K for the year ended March 25, 2011.

The condensed consolidated financial statements include the accounts of RealD, its wholly owned subsidiaries and its majority owned subsidiaries. We do not have any interests in variable interest entities. For consolidated subsidiaries that are not wholly owned but are majority owned, the subsidiaries' assets, liabilities, and operating results are included in their entirety in the accompanying condensed consolidated financial statements. The noncontrolling interests in those assets, liabilities, and operations are reflected as non-controlling interest in the condensed consolidated balance sheets under equity and condensed consolidated statements of operations.

On April 8, 2010, we reincorporated in Delaware. Each class of our capital stock has a par value of \$0.0001 per share.

On March 6, 2007, Digital Link II, LLC (Digital Link II) was formed between Ballantyne of Omaha, Inc. and RealD with member interests of 44.4% and 55.6%, respectively. Digital Link II was formed to fund the deployment of digital projector systems and servers to third-party exhibitors.

All significant intercompany balances and transactions have been eliminated in consolidation.

We have evaluated the impact of subsequent events up to the filing date of these interim condensed consolidated financial statements.

2. Summary of significant accounting policies

Accounting period

Our fiscal year consists of four 13-week periods for a total of 52 weeks. The fiscal year for 2012 will end on March 23, 2012.

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

Net income (loss) per share of common stock

Basic income (loss) per share of common stock is computed by dividing the net income (loss) attributable to RealD Inc. common stockholders for the period by the weighted average number of shares of common stock outstanding during the period. Because the holders of our convertible preferred stock were entitled to participate in dividends and earnings of our company, we applied the two-class method in calculating our earnings per share for periods when we generated net income prior to the conversion of the preferred shares into common shares on July 21, 2010. The two-class method requires net income to be allocated between the common and preferred stockholders based on their respective rights to receive dividends, whether or not declared. No such dividends were paid. Because the convertible preferred stock was not contractually obligated to share in our losses, no such allocation is made for periods when we had net losses. Due to the conversion of the preferred shares into common shares on July 21, 2010, the two-class method of calculating earnings per share was not applied subsequent to that date.

Edgar Filing: RealD Inc. - Form 10-Q

Table of Contents

The calculation of the basic and diluted income (loss) per share of common stock for the three and six months ended September 23, 2011 and September 24, 2010 was as follows:

(in thousands, except per share data)	Three months ended		Six months ended	
	September 23, 2011	September 24, 2010	September 23, 2011	September 24, 2010
Numerator:				
Net income (loss)	\$ 19,177	\$ (4,214)	\$ 28,579	\$ 5,638
Net (income) loss attributable to noncontrolling interest	(272)	187	(79)	(873)
Accretion of preferred stock	-	(1,096)	-	(4,934)
Net income (loss) attributable to RealD Inc. common stockholders	\$ 18,905	\$ (5,123)	\$ 28,500	\$ (169)
Denominator:				
Weighted-average common shares outstanding (basic)	54,343	42,856	54,151	33,774
Effect of dilutive securities	2,445		3,136	
Weighted-average common shares outstanding (diluted)	56,788	42,856	57,287	33,774
Earnings (loss) per common share:				
Basic	\$ 0.35	\$ (0.12)	\$ 0.53	\$ (0.01)
Diluted	\$ 0.33	\$ (0.12)	\$ 0.50	\$ (0.01)

The weighted-average number of anti-dilutive shares excluded from the calculation of diluted income (loss) per common share for the three and six months ended September 23, 2011 and September 24, 2010 was as follows:

(in thousands)	Three months ended		Six months ended	
	September 23, 2011	September 24, 2010	September 23, 2011	September 24, 2010
Options and warrants to purchase common stock	4,656	10,458	2,379	9,139
Conversion of convertible preferred stock	-	3,885	-	10,360
Total	4,656	14,343	2,379	19,499

In the above anti-dilution table, the columns for the three and six months ended September 24, 2010 exclude 1,630,375 motion picture exhibitor options that vested upon the achievement of screen installation targets because the targets were not met as of September 24, 2010.

Derivative instruments

Our assets and liabilities associated with derivative instruments are recorded at fair value in other current assets or other current liabilities, respectively, in the condensed consolidated balance sheets. Changes in fair value are reported as a component of other income or loss on our condensed consolidated statements of operations. For all periods presented, none of our derivative instruments were designated as hedging instruments. We do not use foreign currency option or foreign exchange forward contracts for speculative or trading purposes.

Edgar Filing: RealD Inc. - Form 10-Q

We purchase foreign currency forward contracts, generally with maturities of six months or less, to reduce the volatility of cash flows primarily related to forecasted payments and expenses denominated in certain foreign currencies. As of September 23, 2011, we had outstanding forward contracts based in Canadian dollar, British pound sterling and Euro with notional amounts totaling \$4.7 million. As of September 23, 2011, the carrying amount of our foreign currency forward contracts was \$0.2 million and was classified as Level 2 fair value instruments, which was determined based on observable inputs that were corroborated by market data. As of March 25, 2011, the carrying amount of our foreign currency forward contracts was not significant and was classified as Level 2 fair value instruments, which was determined based on observable inputs that were corroborated by market data. For the three and six months ended September 23, 2011, the net gain related to the change in fair value of our foreign currency forward contracts was \$0.2 million. For the three and six months ended September 24, 2010, the net loss related to the change in fair value of our foreign currency forward contracts was \$0.1 million.

Accounts receivable

Accounts receivable consist of trade receivables, VAT receivable and other receivables. We extend credit to our customers, who are primarily in the movie production and exhibition businesses. We provide for the estimated accounts receivable that will not be collected. These estimates are based on an analysis of historical bad debts, customer concentrations, customer creditworthiness, current economic trends and changes in the customers' payment terms and their economic condition. Collection of accounts receivable may be affected by changes in economic or other industry conditions and may, accordingly, impact our overall credit risk. The

Table of Contents

allowance for doubtful accounts and customer credits totaled \$2.5 million and \$6.8 million as of September 23, 2011 and March 25, 2011, respectively.

Inventories and deferred costs-eyewear

Inventories and deferred costs eyewear represent eyewear and are substantially all finished goods. Inventories and deferred costs eyewear are valued at the lower of cost (first-in, first-out method) or market value. At each balance sheet date, we evaluate ending inventories and deferred costs-eyewear for net realizable value. We also evaluate inventories for excess quantities and obsolescence. These evaluations include analyses of expected future average selling prices, projections of future demand and technology changes. In order to state inventories at the lower of cost or market, we maintain reserves against such inventories. If our analyses indicate that market is lower than cost, a write-down of inventories is recorded in cost of revenue in the period the loss is identified.

For the three months ended September 23, 2011 and September 24, 2010, we recorded inventory adjustments of \$3.5 million and \$2.4 million, respectively, as a result of our net realizable value analyses. For the six months ended September 23, 2011 and September 24, 2010, we recorded inventory adjustments of \$8.3 million and \$3.4 million, respectively, as a result of our net realizable value analyses.

Domestically, we provide our RealD eyewear free of charge to motion picture exhibitors and then receive a fee from the motion picture studios for the usage of that RealD eyewear by the motion picture exhibitors' consumers.

We believe that it is not operationally practical to perform physical counts or request the motion picture exhibitor to perform physical counts and confirm quantities held to ensure that losses due to damage, destruction and shrinkage are specifically recognized in the period incurred due to the number of domestic RealD-enabled screens and related usage of RealD eyewear. We believe that the cost to monitor shrinkage or usage significantly outweighs the financial reporting benefits of using a specific identification methodology of expensing. We believe that utilizing a composite method of expensing RealD eyewear inventory costs provides a rational and reasonable approach to ensuring that shrinkage is provided for in the period incurred and that inventory costs are expensed in the periods that reasonably reflect the periods in which the related revenue is recognized. In doing so, we believe the following methodology reasonably and generally reflects periodic income or loss under these facts and circumstances:

- For an estimated period of time following shipment to domestic motion picture exhibitors, no expense is recognized between the time of shipment and until the delivery is made as the inventory unit is in transit and unused.
- The inventory unit cost is expensed on a straight-line basis over an estimated usage period beginning when we believe usage of the inventory unit has started. In estimating the expensing start date and related expense period, we consider various factors including, but not limited to, those relating to a 3D motion picture's opening release date, a 3D motion picture's expected release period, the number of currently playing 3D motion pictures, the motion picture exhibitor's buying and stocking patterns and practices and the quantities shipped per inventory unit.

We believe that the expensing methodology described above rationally and reasonably approximates the period the related usage occurs resulting in our RealD eyewear product revenue. The expensing start date following the date of shipment is meant to approximate the date at which usage begins. Additionally, as the expense recognition period has been and is expected to continue to be short, we believe it adequately recognizes inventory impairments due to loss and damage on a timely basis. We further believe that exposures due to loss or damage, if any, are

considered normal shrinkage and a necessary and expected cost to generate the revenue per 3D motion picture earned through RealD eyewear usage. We continue to monitor the reasonableness of this methodology to ensure that it approximates the period over which the related RealD eyewear product revenue is earned and realizable. RealD eyewear inventory costs for products shipped that have not yet been expensed are reported as deferred costs-eyewear.

Impairment of long-lived assets

We review long-lived assets, such as property and equipment, cinema systems, digital projectors and intangibles, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Factors or circumstances that could indicate the occurrence of such events include current period operating or cash flow losses combined with a history of operating or cash flow losses, a projection or forecast that demonstrates continuing operating or cash flow losses, or incurring costs in excess of amounts originally expected to acquire or construct an asset. If the asset is not recoverable, an impairment loss is recognized as the amount by which the carrying amount of the asset exceeds its fair value.

During the three months ended September 23, 2011, we determined that certain of our cinema systems were not recoverable and that the carrying value of the assets exceeded fair value, primarily due to the number of certain of our cinema system assets on hand, including related outstanding purchase commitments and the continuing shift in the mix in the deployment of cinema systems based on the type of digital projectors installed and theater configuration. The fair value was primarily determined by evaluating the discounted future cash flows expected to be generated from the cinema systems. For the three months ended September 23, 2011, impairment charged to cost of revenue for certain of the cinema systems including related outstanding purchase commitments totaled \$6.8 million.

Table of Contents

For the three months ended September 23, 2011 and September 24, 2010, impairment charges for all impaired RealD Cinema Systems charged to cost of revenue totaled \$7.7 million and \$0.2 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, impairment charges for all impaired RealD Cinema Systems charged to cost of revenue totaled \$7.8 million and \$0.3 million, respectively.

Revenue recognition and revenue reductions

We derive substantially all of our revenue from the license of our RealD Cinema Systems and the product sale of our RealD eyewear. We evaluate revenue recognition for transactions using the criteria set forth by the SEC in Staff Accounting Bulletin No. 104, *Revenue Recognition* (SAB 104) and Accounting Standards Codification Topic 605, *Revenue Recognition* (ASC 605). The revenue recognition guidance states that revenue is recognized when all of the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the seller's price to the buyer is fixed or determinable and collectability is reasonably assured.

License revenue

License revenue is accounted for as an operating lease. License revenue is primarily derived under per-admission, periodic fixed fee, or per-motion picture basis with motion picture exhibitors. Amounts received up front, less estimated allowances, are deferred and recognized over the lease term using the straight-line method. Additional lease payments that are contingent upon future events outside our control, including those related to admission and usage, are recognized as revenues when the contingency is resolved and we have no more obligations to our customers specific to the contingent payment received. Certain of our license revenue from leasing our RealD Cinema Systems is earned upon admission by the motion picture exhibitor's consumers. Our licensees, however, do not report and pay for such license revenue until after the admission has occurred, which may be received subsequent to our fiscal period end. We estimate and record licensing revenue related to motion picture exhibitor consumer admissions in the quarter in which the admission occurs, but only when reasonable estimates of such amounts can be made. We determine that there is persuasive evidence of an arrangement upon the execution of a license agreement or upon the receipt of a licensee's admissions report. Revenue is deemed fixed or determinable upon verification of a licensee's admissions report in accordance with the terms of the underlying executed agreement or, in certain circumstances, receipt of a licensee's admissions report. We determine collectability based on an evaluation of the licensee's recent payment history.

Product revenue

We recognize product revenue, net of allowances, when title and risk of loss have passed and when there is persuasive evidence of an arrangement, the payment is fixed or determinable, and collectability of payment is reasonably assured. In the United States and Canada, certain of our product revenue from the sale of our RealD eyewear is earned upon admission and usage by the motion picture exhibitor's consumers. Our customers, however, do not report admission or usage information until after the admission and usage has occurred, and such information may be received subsequent to our fiscal period end. We estimate and record such product revenue in the quarter in which the admission and usage occurs, but only when reasonable estimates of such amounts can be made.

Revenue reductions

We record revenue net of motion picture exhibitor stock options and estimated revenue allowances. In connection with certain exhibitor licensing agreements, we issued the motion picture exhibitors a 10-year option to purchase shares of our common stock at approximately \$0.00667 per share. The stock options were fully vested by March 25, 2011 upon the achievement of screen installation targets. Prior to being fully vested, the motion picture exhibitor stock options were valued at the underlying stock price at each reporting period until the targets were met. Amounts recognized were based on the number of RealD-enabled screens as a percentage of total screen installation targets. The stock options do not have net cash settlement features. Amounts recorded as a revenue reduction totaled \$11.6 million and \$12.0 million for the three months and six months ended September 24, 2010, respectively. As the motion picture exhibitor stock options had fully vested as of March 25, 2011, all of the associated reduction of revenue had been recognized through that date.

Shipping and handling costs

Amounts billed to customers for shipping and handling costs are included in revenue. Shipping and handling costs that we incur consist primarily of packaging and transportation charges and are recorded in cost of revenue. Shipping and handling costs recognized in cost of revenue were \$2.2 million and \$1.5 million for the three months ended September 23, 2011 and September 24, 2010, respectively. Shipping and handling costs recognized in cost of revenue were \$4.0 million and \$6.6 million for the six months ended September 23, 2011 and September 24, 2010, respectively.

Recent accounting pronouncements

In May 2011, the Financial Accounting Standard Board (FASB) issued Accounting Standards Update (ASU) 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (Topic 820)-Fair Value Measurement* (ASU 2011-04) to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and International Financial Reporting

Table of Contents

Standards. ASU 2011-04 changes certain fair value measurement principles and enhances the disclosure requirements particularly for fair value measurements that are estimated using significant unobservable (Level 3) inputs. ASU 2011-04 will be effective for us beginning after December 15, 2011. We are currently evaluating the impact the adoption of new guidance will have on the consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220)-Presentation of Comprehensive Income* (ASU 2011-05), to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income, or in two separate but consecutive statements. ASU 2011-05 eliminates the option to present components of other comprehensive income as part of the statement of equity. ASU 2011-05 will be effective for us beginning after December 15, 2011 and we will be required to apply it retrospectively. The adoption of this standard will only impact the presentation of our financial statements and will have no impact on the reported results.

In September 2011, the FASB issued ASU 2011-08, *Intangibles (Topic 350) Goodwill and Other* (ASU 2011-08) which allows companies to waive comparing the fair value of a reporting unit to its carrying amount in assessing the recoverability of goodwill if, based on qualitative factors, it is not more likely than not that the fair value of a reporting unit is less than its carrying amount. ASU 2011-08 will be effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. We are currently evaluating the impact the adoption of the new guidance will have on the consolidated financial statements.

3. Property and equipment, RealD Cinema Systems and digital projectors

Property and equipment, RealD Cinema Systems and digital projectors consist of the following:

(in thousands)	September 23, 2011	March 25, 2011
RealD Cinema Systems	\$ 173,964	\$ 142,602
Digital projectors - held for sale	6,193	13,333
Leasehold improvements	1,184	1,163
Machinery and equipment	7,444	6,430
Furniture and fixtures	13	15
Computer equipment and software	2,636	2,089
Construction in process	1,182	820
Total	\$ 192,616	\$ 166,452
Less accumulated depreciation	(36,360)	(25,862)
Property and equipment, RealD Cinema Systems and digital projectors, net	\$ 156,256	\$ 140,590

Depreciation expense amounted to \$7.0 million and \$3.3 million for the three months ended September 23, 2011 and September 24, 2010, respectively. Depreciation expense amounted to \$13.1 million and \$5.9 million for the six months ended September 23, 2011 and September 24, 2010, respectively.

Edgar Filing: RealD Inc. - Form 10-Q

We receive virtual print fees (VPFs) from third-party motion picture studios. VPFs represent amounts from third-party motion picture studios that are paid to us when a motion picture is played on one of our digital projectors. VPFs are deferred and deducted from the selling price of the digital projector. VPFs are recorded as a liability on the accompanying condensed consolidated balance sheets and totaled \$1.0 million and \$1.5 million as of September 23, 2011 and March 25, 2011, respectively.

During the three and six months ended September 23, 2011, we received \$4.0 million in cash from motion picture exhibitor customers for the sale of digital projectors, resulting in a gain of \$1.2 million in other income (loss). During the six months ended September 24, 2010, we received \$15.4 million in cash from motion picture exhibitor customers for the sale of digital projectors, resulting in a gain of \$6.7 million in other income (loss). With the proceeds, we repaid an aggregate of \$5.3 million of notes payable to the equipment providers.

During the three months ended September 23, 2011, we determined that certain of our cinema systems were not recoverable and that the carrying value of the assets exceeded fair value, primarily due to the number of certain of our cinema systems on hand, including related outstanding purchase commitments and the continuing shift in the mix in the deployment of cinema systems based on the type of digital projectors installed and theater configuration. The fair value was primarily determined by evaluating the discounted future cash flows expected to be generated from the cinema systems. For the three months ended September 23, 2011, impairment charged to cost of revenue for certain of the cinema systems including related outstanding purchase commitments totaled \$6.8 million.

Table of Contents

4. Borrowings

Credit Agreement

We have entered into a credit and security agreement with City National Bank, a national banking association, or City National, which was dated as of June 24, 2010 and amended on April 5, 2011 (as amended, the Credit Agreement), to provide that the aggregate principal amount outstanding at any one time under our revolving credit loans may be (i) up to \$50 million through December 31, 2011 and (ii) up to \$25.0 million thereafter and which will mature on June 30, 2012. The Credit Agreement and the revolving credit facility provided thereunder became effective on July 21, 2010. Our obligations under the Credit Agreement are secured by a first priority security interest in substantially all of our tangible and intangible assets in favor of City National and are guaranteed by our subsidiaries, ColorLink, Inc. , or ColorLink and Stereographics Corporation , or Stereographics. The revolving credit facility provides for, at our option, Revolving London Interbank Offered Rate (LIBOR) loans, which bear interest at the greater of three and one half percent (3.50%) or the LIBOR plus two and one-half percent (2.50%) or Revolving Prime loans which bear interest at the greater of three and one half percent (3.50%) or the fluctuating Prime Rate per annum.

Under the Credit Agreement, our business will be subject to certain limitations, including limitations on our ability to incur additional debt, make certain investments or acquisitions, enter into certain merger and consolidation transactions, and sell our assets other than in the ordinary course of business. We will also be required to maintain compliance with certain financial covenants, including a minimum fixed charge coverage ratio and a maximum leverage ratio. As of September 23, 2011, we were in compliance with all financial covenants in the Credit Agreement. If we fail to comply with any of the covenants or if any other event of default, as defined in the Credit Agreement, should occur, the bank could elect to prevent us from borrowing and declare the indebtedness to be immediately due and payable.

As of September 23, 2011, there was \$25.0 million in borrowings outstanding under the Credit Agreement. As of September 23, 2011, borrowings outstanding under the Credit Agreement bear interest at 3.50%. As of March 25, 2011, there were no borrowings outstanding under the Credit Agreement. Interest expense related to our borrowings under our credit facility agreement was \$0.2 million and \$0.4 million for the three and six months ended September 23, 2011, respectively. Interest expense related to our borrowings under our credit facility agreement and credit and security agreement was \$0.2 million and \$0.6 million for the three and six months ended September 24, 2010, respectively.

Notes Payable

As of September 23, 2011, we had no notes payable outstanding. As of March 25, 2011, we had \$2.3 million notes payable outstanding. Interest expense was based on annual interest rates ranging from 7.0% to 8.4%. Interest expense related to notes payable was not significant for the three months ended September 23, 2011. Interest expense related to notes payable was \$0.1 million for the three months ended September 24, 2010. Interest expense related to notes payable was \$0.1 million and \$0.2 million for the six months ended September 23, 2011 and September 24, 2010, respectively.

5. Commitments and contingencies

Indemnities and commitments

Edgar Filing: RealD Inc. - Form 10-Q

During the ordinary course of business, we make certain indemnities and commitments under which we may be required to make payments in relation to certain transactions. These indemnities include indemnities of certain customers and licensees of our technologies, and indemnities to our directors and officers to the maximum extent permitted under the laws of the State of Delaware. The duration of these indemnities and commitments varies, and in certain cases, is indefinite. The majority of these indemnities and commitments do not provide for any limitation of the maximum potential future payments we could be obligated to make. We have not recorded any liability for these indemnities and commitments in the accompanying condensed consolidated balance sheets. We do, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable and estimable.

We have entered into contracts with certain of our vendors. Future obligations under such contracts totaled \$6.8 million at September 23, 2011 and include revolving 90-day supply commitments. Many of the contracts contain cancellation penalty provisions requiring payment of up to 20.0% of the unused contract.

During the three months ended September 23, 2011, we determined that certain of our cinema systems were not recoverable and that the carrying value of the assets exceeded fair value, primarily due to the number of certain of our cinema systems on hand, including related outstanding purchase commitments and the continuing shift in the mix in the deployment of cinema systems based on the type of digital projectors installed and theater configuration. In the three months ended September 23, 2011, outstanding purchase commitments for certain of our cinema systems, including amounts corresponding to cancellation penalty provisions, were included within an impairment charge to cost of revenue was \$2.0 million.

Table of Contents

6. Mandatorily redeemable convertible preferred stock and equity

Mandatorily redeemable convertible preferred stock

We accreted the carrying value of the Series C mandatorily redeemable convertible preferred stock up to liquidation value through July 21, 2010. Accretion was provided using the effective interest-rate method. For the three and six months ended September 24, 2010, we recorded accretion of \$1.1 million \$4.9 million, respectively.

Motion picture exhibitor stock options

In connection with certain motion picture exhibitor licensing agreements, we issued to motion picture exhibitors a 10-year option to purchase 3,668,340 shares of our common stock at \$0.00667 per share. These stock options to our motion picture exhibitor licensees vested upon the achievement of screen installation targets and were valued at the underlying stock price at each reporting period until the targets were met.

Amounts recorded as a revenue reduction totaled \$11.6 million and \$12.0 million for the three and six months ended September 24, 2010, respectively. As the motion picture exhibitor stock options had fully vested as of March 25, 2011, all of the associated reduction of revenue had been recognized through that date. Additionally, 407,593 exhibitor stock options were exercised by certain of our motion picture exhibitors during the six months ended September 23, 2011. As of June 24, 2011 all motion picture exhibitor stock options have been exercised.

Warrants

As of September 23, 2011, there were no warrants outstanding to purchase shares of common stock. For the six months ended September 23, 2011 and September 24, 2010, 326,700 and 326,700, warrants were exercised, respectively.

7. Share-based compensation

We account for stock options granted to employees and directors by recording compensation expense based on estimated fair values. We estimate the fair value of share-based payment awards on the date of grant. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in our consolidated statements of operations. Share-based awards are attributed to expense using the straight-line method over the vesting period. We determine the value of each option award that contains a market condition using a lattice-based option valuation model, while all other option awards are valued using the Black-Scholes valuation model as permitted under ASC 718, *Compensation - Stock Compensation*. The assumptions used in calculating the fair value of share-based payment awards represent our best estimates. Our estimates of the fair values of stock options granted and the resulting amounts of share-based compensation recognized may be impacted by certain variables including stock price volatility, employee stock option exercise behaviors, additional stock option grants, estimates of forfeitures, and the related income tax impact.

Stock options

Edgar Filing: RealD Inc. - Form 10-Q

Stock options granted generally vest over a four-year period, with 25% of the shares vesting after one year and monthly vesting thereafter. The options generally expire ten years from the date of grant. For the six months ended September 23, 2011, we granted 1.6 million stock options at a weighted average grant date fair value of \$12.64 per share. For the three months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to stock options was \$3.9 million and \$1.9 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to stock options was \$6.0 million and \$2.5 million, respectively.

Performance stock options

Certain of our management-level employees receive performance stock options, which gives the recipient the right to receive common stock that is contingent upon achievement of specified pre-established performance goals over the performance period, which is generally three years. The performance goals for the performance stock options are based on the measurement of our total shareholder return, on a percentile basis, compared to a comparable group of companies. Depending on the outcome of the performance goals, the recipient may ultimately earn performance stock options equal to or less than the number of performance stock options granted. For the three months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to performance stock options was \$0.3 million and \$0.4 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to performance stock options was \$0.8 million and \$0.4 million, respectively.

Restricted stock units

Restricted stock units vest over one to four years. For the six months ended September 23, 2011, we granted 0.2 million restricted stock units at a weighted average grant date fair value of \$20.53 per restricted stock unit. For the three months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to restricted stock units was \$0.5 million and \$0.1 million,

Table of Contents

respectively. For the six months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to restricted stock units was \$0.8 million and \$0.1 million, respectively.

Share-based compensation expense for all share-based arrangements for the three and six months ended September 23, 2011 and September 24, 2010 was as follows:

(in thousands)	Three months ended		Six months ended	
	September 23, 2011	September 24, 2010	September 23, 2011	September 24, 2010
Share-based compensation				
Cost of revenue	\$ 133	\$ 30	\$ 198	\$ 43
Research and development	1,174	381	1,571	582
Selling and marketing	1,313	774	2,224	1,156
General and administrative	2,113	1,167	3,639	1,227
Total	\$ 4,733	\$ 2,352	\$ 7,632	\$ 3,008

Included in research and development for the three and six months ended September 23, 2011 is \$0.6 million of additional share-based compensation expense recognized in connection with a modification of stock options and performance stock options pursuant to a separation agreement for one of our officers.

8. Income taxes

Our income tax expense for the three months ended September 23, 2011 and September 24, 2010 was \$4.1 million and \$0.8 million, respectively. Our income tax expense for the six months ended September 23, 2011 and September 24, 2010 was \$9.4 million and \$1.7 million, respectively. We have net operating losses that may potentially be offset against future earnings. We file federal income tax returns and income tax returns in various state and foreign jurisdictions. Due to the net operating loss carryforwards, our United States federal and state returns are open to examination by the Internal Revenue Service and state jurisdictions for all years since inception.

As of September 23, 2011, we have determined based on the weight of the available evidence, both positive and negative, to provide for a valuation allowance against substantially all of the net deferred tax assets. The current deferred tax assets not reserved for by the valuation allowance are those in foreign jurisdictions or amounts that may be carried back in future years. If there is a change in circumstances that causes a change in judgment about the realizability of the deferred tax assets, we will adjust all or a portion of the applicable valuation allowance in the period when such change occurs.

9. Equity

A summary of the changes in total equity for the six months ended September 23, 2011 was as follows:

Edgar Filing: RealD Inc. - Form 10-Q

(in thousands)	RealD Inc. stockholders equity		Noncontrolling interest	Total equity
Balance, March 25, 2011	\$	143,324	\$ 1,776	\$ 145,100
Share-based compensation		7,632	-	7,632
Exercise of stock options		479	-	479
Exercise of motion picture exhibitor options		3	-	3
Exercise of warrants		271	-	271
Comprehensive income:				-
Net income (loss)		28,500	79	\$ 28,579
Total comprehensive income				28,579
Balance, September 23, 2011	\$	180,209	\$ 1,855	\$ 182,064

Table of Contents

10. Related-party transactions

On May 19, 2011, we entered into a separation agreement and general release of claims with Joshua Greer, a current director and who previously served as our president. Pursuant to the terms of the separation agreement, Mr. Greer will receive the following benefits: (i) cash severance of \$450,000 paid in ten equal installments, with the first such installment paid on October 15, 2011; (ii) reimbursement from us for insurance coverage under COBRA for 18 months following July 15, 2011 or such earlier time as Mr. Greer becomes eligible for insurance through another employer; (iii) a pro-rated cash performance bonus for fiscal year 2012 (to be paid no later than June 15, 2012), in an amount equal to 30% of 80% of Mr. Greer's salary, computed assuming that Mr. Greer had remained as our president through the end of fiscal year 2012; and (iv) acceleration of a time-based vesting stock option for 105,000 shares granted to Mr. Greer on July 15, 2010 as of July 15, 2011, which will remain exercisable for 6 months following the end of the term of the consulting agreement that we entered into with Mr. Greer on the same date. A second stock option for 105,000 shares granted to Mr. Greer on July 15, 2010 was entirely forfeited and cancelled without consideration. We entered into a consulting agreement with Mr. Greer pursuant to which Mr. Greer will be paid \$275,000 per year commencing as of July 16, 2011. The consulting agreement with Mr. Greer expires on July 16, 2012 (unless earlier terminated).

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary note on forward-looking statements

The following discussion and analysis should be read in conjunction with our interim condensed consolidated financial statements and the related notes that appear elsewhere in this Form 10-Q. These discussions contain forward-looking statements reflecting our current expectations that involve risks and uncertainties. In some cases, you can identify forward-looking statements by terminology such as intends, may, will, should, expects, plans, anticipates, believes, estimates, predicts, potential, continue or the negative of these terms or other comparable terminology, but the absence of these words does not necessarily mean that a statement is not forward-looking. Forward-looking statements include, but are not limited to: statements regarding the extent and timing of future licensing, products and services revenue levels and mix, expenses, margins, net income per diluted share, income taxes, tax benefits, acquisition costs and related amortization, and other measures of results of operations; our expectations regarding demand and acceptance for our technologies; 3D motion picture releases and conversions scheduled for fiscal 2012 ending March 23, 2012 as well their commercial success and consumer preferences; our relationships with consumer electronics panel manufacturers and our ability to generate substantial revenue from the licensing of our 3D technologies for use in the 3D consumer electronics market; our ability to increase the number of RealD-enabled screens in domestic and international markets and market share; our ability to supply our solutions to our customers on a timely basis; RealD relationships with exhibitor and studio partners and the business model for 3D eyewear in North America; the progress, timing and amount of expenses associated with our research and development activities; market and industry growth opportunities and trends in the markets in which we operate, including in 3D content; our plans, strategies and expected opportunities; the deployment of and demand for our products and products incorporating our technologies; and competitive pressures in domestic and international cinema markets impacting licensing and product revenues. Actual results may differ materially from those discussed in these forward-looking statements due to a number of factors, including the risks set forth in the section entitled Risk Factors in Part II, Item 1A of this Quarterly Report on Form 10-Q and elsewhere in this filing. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of these forward-looking statements. We are under no duty to update any of the forward-looking statements after the date of this Quarterly Report on Form 10-Q to conform our prior statements to actual results.

Overview

Edgar Filing: RealD Inc. - Form 10-Q

We are a leading global licensor of 3D technologies. Our extensive intellectual property portfolio is used in applications that enable a premium 3D viewing experience in the theater, the home and elsewhere. We license our RealD Cinema Systems to motion picture exhibitors that show 3D motion pictures and alternative 3D content. We also provide our RealD Display, active and passive eyewear, and RealD Format to consumer electronics manufacturers and content providers and distributors to enable the delivery and viewing of 3D content on high definition televisions, laptops and other displays. Our cutting-edge 3D technologies have been used for applications such as piloting the Mars Rover.

For financial reporting purposes, we currently have one reportable segment. We have three operating segments: cinema, consumer electronics and professional within which we market our various applications. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision-making group, in deciding how to allocate resources and in assessing performance. Our chief operating decision maker is our Chief Executive Officer. We aggregate our three operating segments into one reportable segment based on qualitative factors, including similar economic characteristics and the nature of the products and services. Our product portfolio is used in applications that enable a premium 3D viewing experience across these segments. We currently generate substantially all of our revenue from the license of our RealD Cinema Systems and the use and sale of our eyewear.

Table of Contents**Key business metrics**

Our management regularly reviews a number of business metrics, including the following key metrics to evaluate our business, monitor the performance of our business model, identify trends affecting our business, determine the allocation of resources, make decisions regarding corporate strategies and evaluate forward-looking projections. The measures that we believe are the primary indicators of our quarterly and annual performance are as follows:

- **Number of screens.** Domestic screens are motion picture theater screens in the United States or Canada enabled with our RealD Cinema Systems. International screens are motion picture theater screens outside the United States and Canada enabled with our RealD Cinema Systems.
- **Number of locations.** Domestic locations are motion picture exhibition complexes in the United States or Canada with one or more screens enabled with our RealD Cinema Systems. International locations are motion picture exhibition complexes outside the United States and Canada with one or more screens enabled with our RealD Cinema Systems.
- **Number of 3D motion pictures.** Total 3D motion pictures are the number of 3D motion pictures that are exhibited for more than three showings per day and for a period in excess of one week and for which we receive a license fee from the motion picture exhibitor during the relevant period.
- **Adjusted EBITDA.** We use Adjusted EBITDA as a supplemental measure of our performance. We define Adjusted EBITDA as net income (loss), plus net interest expense, income and other taxes, depreciation and amortization, share-based compensation expense and exhibitor option expense, as further adjusted to eliminate the impact of certain other items that we do not consider indicative of our core operating performance. We consider our core operating performance to be that which can be affected by our managers in any particular period through their management of the resources that affect our underlying revenue and profit generating operations for that period. However, Adjusted EBITDA is not a recognized measurement under U.S. GAAP and should not be considered in isolation or as a substitute for performance measures calculated in accordance with U.S. GAAP. For a reconciliation of Adjusted EBITDA to U.S. GAAP net income (loss) and for further discussion regarding Adjusted EBITDA, see Non-U.S. GAAP discussion.

The following table sets forth additional performance highlights of key business metrics for the periods presented (approximate numbers):

(approximate numbers)	September 23, 2011	Six months ended September 24, 2010
Number of RealD enabled screens (at period end)		
Total domestic RealD enabled screens	11,100	5,600
Total international RealD enabled screens	7,600	3,700
Total RealD enabled screens	18,700	9,300
Number of locations with RealD enabled screens (at period end)		
Total domestic locations with RealD enabled screens	2,500	2,100
Total international locations with RealD enabled screens	2,400	1,700
Total locations with RealD enabled screens	4,900	3,800
Number of 3D motion pictures (released during period)	20	11

Edgar Filing: RealD Inc. - Form 10-Q

Performance highlights for Adjusted EBITDA, another key business metric and a Non-U.S. GAAP financial measure, are presented below under the caption Non-U.S. GAAP discussion. If we are successful in expanding our business with consumer electronics manufacturers and content producers and distributors to incorporate our RealD Display and RealD Format technologies into their products and platforms, our key business metrics in future periods may include the number of units of 3D-enabled plasma and LCD televisions, interactive gaming consoles and laptop computers shipped in that period. To date, we have not generated significant revenue in our consumer electronics business.

Opportunities, trends and factors affecting comparability

We have rapidly evolved and expanded our business since we acquired ColorLink in March 2007. This expansion has included hiring most of our senior management team, acquiring and growing our research and development facilities in Boulder, Colorado, and building infrastructure to support our business. These investments in and changes to our business have allowed us to significantly increase our revenue and key business metrics. We expect to continue to invest for the foreseeable future in expanding our business as we increase our direct sales and marketing presence in the United States, Europe, Asia and other geographic regions, enhance and expand our technology and product offerings and pursue strategic acquisitions.

Cinema

The shift in the motion picture industry from analog to digital over the past decade has created an opportunity for new and transformative 3D technologies. As of September 23, 2011, there were approximately 18,700 RealD-enabled screens worldwide as compared to approximately 9,300 RealD-enabled screens worldwide as of September 24, 2010, an increase of 9,400 RealD-enabled screens or 101%. Based on the slate announcements by motion picture studios, we anticipate that approximately 37 3D motion pictures will be released worldwide in our fiscal year 2012, including sequels to successful major motion picture franchises, such as *Harry Potter*, *Transformers*, *Pirates of the Caribbean*, *Kung Fu Panda* and *Cars*.

Table of Contents**Consumer electronics**

We have recently made available our RealD Display, active and passive eyewear, and RealD Format technologies to consumer electronics manufacturers and content distributors to enable 3D in high definition televisions, laptops and other displays in the home and elsewhere. We believe that the recent success of major 3D motion pictures, including *Pirates of the Caribbean*, *Thor*, *Rio* and *Kung Fu Panda* is leading to the creation and distribution of 3D content for consumer electronics. The development of these technologies represents a significant opportunity for new revenue. After having jointly announced with Samsung a license agreement in May 2011 which we had expected to lead to the incorporation of RealD's 3D display technology into LCD panels manufactured by Samsung beginning in early 2012, we have recently learned that Samsung's initiative to manufacture panels under the license agreement with RealD is not currently being pursued.

Motion picture exhibitor stock options

We incurred variability in our license revenue and operating results in connection with stock options issued to some of our motion picture exhibitor licensees that vested upon the achievement of screen installation targets. For further discussion regarding exhibitor stock options, see Critical accounting policies and estimates.

Results of operations

The following table sets forth our condensed consolidated statements of operations and other data for each of the periods indicated:

(in thousands)	September 23, 2011	Three months ended September 24, 2010	September 23, 2011	Six months ended September 24, 2010
Consolidated statements of operations data:				
Gross revenue	\$ 87,995	\$ 76,878	\$ 147,555	\$ 141,890
Motion picture exhibitor options	-	(11,556)	-	(12,048)
Net revenue	87,995	65,322	147,555	129,842
Cost of revenue	45,473	51,499	69,714	98,117
Gross profit	42,522	13,823	77,841	31,725
Operating expenses:				
Research and development	3,755	3,425	8,400	6,404
Selling and marketing	6,466	5,333	13,695	9,438
General and administrative	9,792	8,369	18,222	14,599
Total operating expenses	20,013	17,127	40,317	30,441
Operating income	22,509	(3,304)	37,524	1,284
Interest expense	(272)	(283)	(483)	(802)

(1) Adjusted EBITDA is not a recognized measurement under U.S. GAAP. For a definition of Adjusted EBITDA and reconciliation to net income (loss), the comparable U.S. GAAP item, see Non-U.S. GAAP discussion. In the period to period comparative discussion below, we describe our net revenue, license revenue (composed principally of revenue from our RealD Cinema Systems), and product and other revenue (principally composed of our RealD eyewear and, to a much lesser extent, professional product revenue).

Table of Contents**Three months ended September 23, 2011 compared to three months ended September 24, 2010**

(in thousands)	September 23, 2011	Three months ended September 24, 2010	Amount change	Percentage change
Revenue:				
Gross license	\$ 51,981	\$ 35,318	\$ 16,663	47%
Motion picture exhibitor options	-	(11,556)	11,556	(100%)
Net license	51,981	23,762	28,219	119%
Product and other	36,014	41,560	(5,546)	(13%)
Total net revenue	\$ 87,995	\$ 65,322	\$ 22,673	35%

The increase in net revenue recorded during the three months ended September 23, 2011 compared to the three months ended September 24, 2010 was primarily due to an increase in net license revenues resulting from an increase in the number of RealD-enabled screens, an increase in the number of 3D motion pictures released and the resulting increase in the box office of 3D motion pictures on RealD-enabled screens partially offset by a decrease in product and other revenue. Our international markets comprised approximately 50% of total revenue for the three months ended September 23, 2011 as compared to 56% for the three months ended September 24, 2010. The decrease in net revenues attributable to international markets was driven by decreases in purchases of RealD eyewear by international motion picture exhibitor customers.

For the three months ended September 23, 2011, there were ten motion pictures that contributed greater than \$1.0 million of admission-based fees to net license revenue. Net license revenue for the three months ended September 23, 2011 includes admission-based fees related to the following motion pictures: *Transformers: Dark of the Moon* (\$10.9 million), *Harry Potter and the Deathly Hallows Part 2* (\$10.3 million), *Cars 2* (\$4.4 million), *The Smurfs* (\$4.1 million), *Captain America: The First Avenger* (\$3.3 million), *Kung Fu Panda 2* (\$1.9 million), *Green Lantern* (\$1.7 million), *Final Destination 5* (\$1.4 million), *Lion King 3D* (\$1.3 million) and *Pirates of the Caribbean: On Stranger Tides* (\$1.2 million). For the three months ended September 24, 2010, there were eight motion pictures that contributed greater than \$1.0 million of admission-based fees to net license revenue. Net license revenue for the three months ended September 24, 2010 includes admission-based fees related to the following motion pictures: *Toy Story 3* (\$9.4 million), *Shrek Forever After* (\$3.7 million), *Despicable Me* (\$3.7 million), *The Last Airbender* (\$3.0 million), *Step Up* (\$1.8 million), *Resident Evil* (\$1.4 million), *Avatar* (\$1.2 million) and *Cats & Dogs: The Revenge of Kitty Galore* (\$1.1 million). Our net license revenue increased during the period as a result of the increased number of RealD-enabled screens and the box office generated by those 3D motion picture releases. In addition, all reduction of revenue related to motion picture exhibitor stock options had been recognized as of March 25, 2011.

Net license revenues comprised 59% and 36% of total revenues for each of the three months ended September 23, 2011 and September 24, 2010, respectively. International license revenues comprised 56% of gross license revenues in the three months ended September 23, 2011 as compared to 52% for the three months ended September 24, 2010.

The decrease in our net product and other revenue in the three months ended September 23, 2011 as compared to the three months ended September 24, 2010, was primarily a result of a decrease in the volume of RealD eyewear largely sold to our international markets. The decrease in RealD eyewear volume internationally compared to the prior period resulted from a growing trend among consumers to reuse RealD eyewear for multiple viewings, as well as the inventory build by non-U.S. motion picture exhibitors in prior periods. International product revenues comprised 41% of total product revenues in the three months ended September 23, 2011 as compared to 59% for the three months ended September 24, 2010. International product and other revenues were 50% and 133% of international license revenue for the three months ended September 23, 2011 and September 24, 2010, respectively.

Edgar Filing: RealD Inc. - Form 10-Q

We expect our future revenue, particularly in our license business, will be driven by the number of RealD-enabled screens and motion pictures released in 3D, the box office performance of those motion pictures as well as the relative performance of those motion pictures displayed in 2D vs. 3D.

Table of Contents*Cost of Revenue*

(in thousands)	Three months ended		Amount change	Percentage change
	September 23, 2011	September 24, 2010		
Revenue	\$ 87,995	\$ 65,322	\$ 22,673	35%
Cost of revenue:				
License	14,703	3,364	11,339	337%
Product and other	30,770	48,135	(17,365)	(36%)
Total cost of revenue	\$ 45,473	\$ 51,499	\$ (6,026)	(12%)
Gross profit	\$ 42,522	\$ 13,823	\$ 28,699	208%
Gross margin		48%		21%

For the three months ended September 23, 2011, our cost of revenue decreased primarily due to the decrease of RealD eyewear sales and the increased usage of recycled eyewear. Cost of revenue decreased, as a percentage of revenue, to 52% for the three months ended September 23, 2011, as compared to 79% for the three months ended September 24, 2010. Contributing to the improvement in gross margin was an increase in license revenue, a decrease in RealD eyewear sales and the increased usage of recycled eyewear, which generates higher gross margin. The percentage of usage of recycled eyewear may decrease in future periods resulting in lower gross profit and gross margin.

There was no motion picture exhibitor option expense in the three months ended September 23, 2011. Excluding the impact of motion picture exhibitor stock options of \$11.6 million, gross profit would have been \$25.4 million for the three months ended September 24, 2010, and gross margin would have been 33.0%.

License cost of revenue increased \$11.3 million quarter-over-quarter primarily as a result of a \$7.5 million increase in impairment expense and a \$3.1 million increase in depreciation expense resulting from an increase in RealD-enabled screens. Included in license cost of sales for the three months ended September 23, 2011 and September 24, 2010 is depreciation expense of \$6.3 million and \$3.2 million, respectively. Depreciation expense as a percentage of gross license revenue increased to 12% for the three months ended September 23, 2011 from 9% for the three months ended September 24, 2010.

During the three months ended September 23, 2011, we determined that certain of our cinema systems were not recoverable and that the carrying value of the assets exceeded fair value, primarily due to the number of certain of our cinema systems on hand, including related outstanding purchase commitments and the continuing shift in the mix in the deployment of cinema systems based on the type of digital projectors installed and theater configuration. The fair value was primarily determined by evaluating the discounted future cash flows expected to be generated from the cinema systems. For the three months ended September 23, 2011, impairment charged to cost of revenue for certain of the cinema systems including related outstanding purchase commitments totaled \$6.8 million.

We had product and other gross profit of \$5.2 million for the three months ended September 23, 2011, primarily due to RealD eyewear. The decrease in our cost of product and other revenue is primarily a result of the decrease in the volume of RealD eyewear, the increased usage of recycled eyewear and a decrease in freight related expenses. Product and other gross margin increased to 15% for the three months ended September 23, 2011 as compared to negative 16% for the three months ended September 24, 2010. Freight related expense decreased by an aggregate of \$1.2 million as a result of the decreased volume of RealD eyewear. Expedited freight charges were insignificant in the three months ended September 23, 2011 and September 24, 2010.

Edgar Filing: RealD Inc. - Form 10-Q

Our cost of revenue as a percentage of net revenue will be affected in the future by the relative mix of net license and net product revenue, the mix of domestic and international product revenues, the relative mix of products and any new revenue sources. As the number of RealD-enabled screens and the number of 3D motion pictures and attendance increase, our total cost of revenue may continue to increase.

Operating expenses

(in thousands)	September 23, 2011	Three months ended September 24, 2010	Amount change	Percentage change
Research and development	\$ 3,755	\$ 3,425	\$ 330	10%
Selling and marketing	6,466	5,333	1,133	21%
General and administrative	9,792	8,369	1,423	17%
Total operating expenses	\$ 20,013	\$ 17,127	\$ 2,886	17%

Edgar Filing: RealD Inc. - Form 10-Q

Table of Contents

Research and development. Our research and development expenses increased primarily due to an increase of \$0.2 million in consultant fees, a \$0.5 million increase in severance costs pursuant to a separation agreement for one of our officers and \$0.2 million increase in depreciation. These increases were partially offset by decreases in contractual and discretionary bonuses of \$0.5 million. We expect to increase our research and development expenses to support our anticipated growth in consumer electronics projects and initiatives, primarily for additional personnel, consultants and prototype and materials costs, as well as for continued investment in our cinema business.

Selling and marketing. Our selling and marketing expenses increased primarily due to the incurrence of additional advertising and marketing initiatives of \$1.0 million and a \$0.9 million increase in personnel costs. The change in personnel costs includes an increase in salaries and benefits of \$0.4 million as the number of selling and marketing personnel increased to 28 at September 23, 2011 from 16 at September 24, 2010 and a \$0.5 million increase in share-based compensation expense. These increases were partially offset by decreases in contractual and discretionary bonuses of \$0.8 million. We expect to incur additional selling and marketing expenses as we increase our international marketing efforts, particularly in Asia and Latin America, build our consumer electronics business worldwide and market future 3D films.

General and administrative. Our general and administrative expenses increased primarily due to a \$1.5 million increase in personnel costs. The increase in personnel costs includes an increase of \$0.9 million in share-based compensation expense and an increase in salaries and benefits of \$0.6 million as we increased the number of general and administrative employees to 36 at September 23, 2011 from 20 at September 24, 2010 to support our overall growth, including the requirements of being a public company. Professional fees increased \$0.6 million and occupancy costs increased \$0.3 million to support the growth in our operations. These increases were partially offset by decreases in bad debt expense of \$0.6 million and decreases in contractual and discretionary bonuses of \$0.4 million. Sales and use tax expense was \$2.0 million for both the three months ended September 23, 2011 and September 24, 2010. Property tax expense increased \$0.1 million to \$0.3 million for the three months ended September 23, 2011. We expect to continue to incur additional general and administrative expenses to comply with SEC reporting requirements, stock exchange listing standards and the provisions of the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010.

Other

Interest expense. Interest expense for the three months ended September 23, 2011 and September 24, 2010 was \$0.3 million.

Income tax. Our income tax expense for the three months ended September 23, 2011 was \$4.1 million compared to \$0.8 million for the three months ended September 24, 2010, primarily due to an increase in our foreign tax expense. We have net operating losses that may potentially offset taxable income in the future. We expect to incur an increasing amount of income tax expenses that relate primarily to federal and state income tax and international operations. We file federal income tax returns and income tax returns in various state and foreign jurisdictions. Due to the net operating loss carryforwards, our United States federal and state returns are open to examination by the Internal Revenue Service and state jurisdictions for all years since inception.

Six months ended September 23, 2011 compared to six months ended September 24, 2010

(in thousands)	September 23, 2011	Six months ended September 24, 2010	Amount change	Percentage change
Revenue:				

Edgar Filing: RealD Inc. - Form 10-Q

Gross license	\$ 87,692	\$ 61,600	\$ 26,092	42%
Motion picture exhibitor options	-	(12,048)	12,048	(100%)
Net license	87,692	49,552	38,140	77%
Product and other	59,863	80,290	(20,427)	(25%)
Total net revenue	\$ 147,555	\$ 129,842	\$ 17,713	14%

The increase in net revenue recorded during the six months ended September 23, 2011 compared to the six months ended September 24, 2010 was primarily due to the an increase in net license revenues resulting from an increase in the number of RealD-enabled screens, an increase in the number of 3D motion pictures released and the resulting increase in the box office of 3D motion pictures on RealD-enabled screens partially offset by a decrease in product and other revenue. Our international markets comprised approximately 51% of gross revenue for the six months ended September 23, 2011 as compared to 53% for the six months ended September 24, 2010.

For the six months ended September 23, 2011, there were 12 motion pictures that contributed greater than \$1.0 million of admission-based fees to net license revenue. The top ten motion pictures that contributed greater than \$1.0 million of admission-based fees to net license revenue for the six months ended September 23, 2011 included the following: *Transformers: Dark of the Moon* (\$10.9 million), *Harry Potter and the Deathly Hallows Part 2* (\$10.3 million), *Pirates of the Caribbean: On Stranger Tides* (\$9.0 million), *Thor* (\$5.8 million), *Kung Fu Panda 2* (\$5.4 million), *Rio* (\$5.3 million), *Cars 2* (\$4.5 million), *The Smurfs* (\$4.1 million), *Captain*

Table of Contents

America: The First Avenger (\$3.3 million) and *Green Lantern* (\$2.6 million). For the six months ended September 24, 2010, there were 11 motion pictures which contributed greater than \$1.0 million of admission-based fees to net license revenue. The top ten motion pictures that contributed greater than \$1.0 million of admission-based fees to net license revenue for the six months ended September 24, 2010 included the following: *Toy Story 3* (\$12.1 million), *Shrek Forever After* (\$7.9 million), *How to Train Your Dragon* (\$5.7 million), *Alice in Wonderland* (\$4.8 million), *Clash of the Titans* (\$4.3 million), *Despicable Me* (\$3.7 million), *The Last Airbender* (\$3.0 million), *Avatar* (\$2.6 million), *Step Up* (\$1.8 million) and *Resident Evil: Afterlife* (\$1.4 million). Our net license revenue increased during the period as a result of the increased number of RealD-enabled screens and the box office generated by those 3D motion picture releases. In addition, all reduction of revenue related to motion picture exhibitor stock options had been recognized as of March 25, 2011.

Net license revenues comprised 59% and 38% of total revenues for each of the six months ended September 23, 2011 and September 24, 2010, respectively. International license revenues comprised 57% of gross license revenues in the six months ended September 23, 2011 as compared to 45% for the six months ended September 24, 2010.

The decrease in our net product and other revenue in the six months ended September 23, 2011 as compared to the six months ended September 24, 2010, was primarily a result of a decrease in the volume of RealD eyewear largely sold to our international markets. The decrease in RealD eyewear volume internationally compared to the prior period resulted from a growing trend among consumers to reuse RealD eyewear for multiple viewings, as well as the inventory build by non-U.S. motion picture exhibitors in prior periods. International product revenues comprised 42% of total product revenues in the six months ended September 23, 2011 as compared to 59% for the six months ended September 24, 2010. International product and other revenues were 50% and 172% of international license revenue for the six months ended September 23, 2011 and September 24, 2010, respectively.

Cost of Revenue

(in thousands)	September 23, 2011	September 24, 2010	Amount change	Percentage change
Revenue	\$ 147,555	\$ 129,842	\$ 17,713	14%
Cost of Revenue:				
License	21,119	6,359	14,760	232%
Product and other	48,595	91,758	(43,163)	(47%)
Total cost of revenue	\$ 69,714	\$ 98,117	\$ (28,403)	(29%)
Gross profit	\$ 77,841	\$ 31,725	\$ 46,116	145%
Gross margin	53%	24%		

For the six months ended September 23, 2011, our cost of revenue decreased primarily due to the decrease of RealD eyewear sales and the increased usage of recycled eyewear. Cost of revenue decreased, as a percentage of revenue, to 47% for the six months ended September 23, 2011, as compared to 76% for the six months ended September 24, 2010. Contributing to the improvement in gross margin was an increase in license revenue, a decrease in RealD eyewear sales and the increased usage of recycled eyewear, which generates higher gross margin. The percentage of usage of recycled eyewear may decrease in future periods resulting in lower gross profit and gross margin.

There was no motion picture exhibitor option expense in the six months ended September 23, 2011. Excluding the impact of motion picture exhibitor stock options of \$12.0 million, gross profit would have been \$43.8 million for the six months ended September 24, 2010, and gross margin would have been 31%.

Edgar Filing: RealD Inc. - Form 10-Q

License cost of revenue increased \$14.8 million primarily as a result of a \$7.5 million increase in impairment expense and a \$6.2 million increase in depreciation expense resulting from an increase in RealD-enabled screens. Included in license cost of sales for the six months ended September 23, 2011 and September 24, 2010 is depreciation expense of \$11.8 million and \$5.6 million, respectively. Depreciation expense as a percentage of gross license revenue increased to 13% for the six months ended September 23, 2011 from 9% for the six months ended September 24, 2010.

During the six months ended September 23, 2011, we determined that certain of our cinema systems were not recoverable and that the carrying value of the assets exceeded fair value, primarily due to the number of certain of our cinema systems on hand including related purchase commitments and the continuing shift in the mix in the deployment of cinema systems based on the type of digital projectors installed and theater configuration. The fair value was primarily determined by evaluating the discounted future cash flows expected to be generated from the cinema systems. For the six months ended September 23, 2011, impairment charged to cost of revenue for certain of the cinema systems including related outstanding purchase commitments totaled \$6.8 million.

We had product and other gross profit of \$11.3 million for the six months ended September 23, 2011, primarily due to RealD eyewear. The decrease in our cost of product and other revenue is primarily a result of the decrease in the volume of RealD eyewear, the

Table of Contents

increased usage of recycled eyewear and a decrease in freight related expenses. Product and other gross margin increased to 19% for the six months ended September 23, 2011 as compared to negative 14% for the six months ended September 24, 2010. Freight related expense decreased by an aggregate of \$6.3 million as a result of the decreased volume of RealD eyewear as well as a reduction in expedited freight charges. Expedited freight charges were \$0.2 million and \$4.0 million in the six months ended September 23, 2011 and September 24, 2010, respectively.

Our cost of revenue as a percentage of net revenue will be affected in the future by the relative mix of net license and net product revenue, the mix of domestic and international product revenues, the relative mix of products and any new revenue sources. As the number of RealD-enabled screens and the number of 3D motion pictures and attendance increase, our total cost of revenue may continue to increase.

Operating expenses

(in thousands)	September 23, 2011	Six months ended September 24, 2010	Amount change	Percentage change
Research and development	\$ 8,400	\$ 6,404	\$ 1,996	31%
Selling and marketing	13,695	9,438	4,257	45%
General and administrative	18,222	14,599	3,623	25%
Total operating expenses	\$ 40,317	\$ 30,441	\$ 9,876	32%

Research and development. Our research and development expenses increased primarily due to a \$1.1 million increase in spending on personnel costs, a \$0.5 million increase in severance costs pursuant to a separation agreement for one of our officers and a \$0.4 million increase in depreciation. The change in personnel costs includes a \$1.0 million increase in share-based compensation expense and \$0.1 million in salaries and benefits as the number of research and development personnel increased to 32 at September 23, 2011 from 31 at September 24, 2010. These increases were partially offset by decreases in contractual and discretionary bonuses of \$0.1 million. We expect to increase our research and development expenses to support our anticipated growth in consumer electronics projects and initiatives, primarily for additional personnel, consultants and prototype and materials costs, as well as for continued investment in our cinema business.

Selling and marketing. Our selling and marketing expenses increased primarily due to the incurrence of additional advertising and marketing initiatives of \$2.4 million in the six months ended September 24, 2011, an increase of \$1.8 million in personnel expenses and \$0.4 million of selling and marketing costs related to the feature film, *Carmen in 3D* which we co-produced with London's Royal Opera House. The change in personnel costs includes an increase of \$0.7 million in salaries and benefits as we increased the number of selling and marketing personnel to 28 at September 23, 2011 from 16 at September 24, 2010 and an increase of \$1.1 million in share-based compensation expense. These increases were partially offset by decreases in contractual and discretionary bonuses of \$0.2 million and decreases in consultant fees of \$0.2 million. We expect to incur additional selling and marketing expenses as we increase our international marketing efforts, particularly in Asia and Latin America, build our consumer electronics business worldwide and market future 3D films.

General and administrative. Our general and administrative expenses increased primarily due to a \$3.6 million increase in personnel costs. The increase in personnel costs includes an increase in salaries and benefits of \$1.2 million as we increased the number of general and administrative employees to 36 at September 23, 2011 from 20 at September 24, 2010 to support our overall growth, including the requirements of being a public company and an increase of \$2.4 million in share-based compensation expense. Legal expenses and professional fees increased \$2.0 million, depreciation expense increased \$0.3 million and occupancy costs increased \$0.5 million to support the growth in our operations. These increases were partially offset by decreases in bad debt expense of \$2.5 million. Sales and use tax expense was \$3.5 million and \$4.2 million for the six months ended September 23, 2011 and September 24, 2010, respectively. The decrease of \$0.7 million of sales and use tax was primarily due to an increase of tax collected on license revenue during the period. Property tax was \$0.8 million and \$0.4 million for the six months ended September 23, 2011 and September 24, 2010, respectively. The increase of \$0.4 million of property tax was primarily attributable to the

Edgar Filing: RealD Inc. - Form 10-Q

increased installed base of RealD Cinema Systems. We expect to continue to incur additional general and administrative expenses to comply with SEC reporting requirements, stock exchange listing standards and the provisions of the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010.

Other

Interest expense. Interest expense for the six months ended September 23, 2011 and September 24, 2010 was \$0.5 million and \$0.8 million, respectively. The decrease was primarily due to interest rates related to the borrowings under our Credit Agreement and reduction in the outstanding amounts of our notes payable.

Income tax. Our income tax expense for the six months ended September 23, 2011 was \$9.4 million compared to \$1.7 million for the six months ended September 24, 2010, primarily due to an increase in our foreign tax expense. We have net operating losses that may

Table of Contents

potentially offset taxable income in the future. We expect to incur an increasing amount of income tax expenses that relate primarily to federal and state income tax and international operations. We file federal income tax returns and income tax returns in various state and foreign jurisdictions. Due to the net operating loss carryforwards, our United States federal and state returns are open to examination by the Internal Revenue Service and state jurisdictions for all years since inception.

Seasonality and Quarterly Performance

Although not apparent in our results of operations due to our rapid growth rate, our operations are generally subject to seasonal trends based on the number of 3D motion pictures released and the box office of those 3D motion pictures. As is the case with other participants in the motion picture exhibition industry, we expect that our fiscal quarters ending September and December generally will tend to show stronger box office performance and higher revenues due to the summer and holiday moviegoing seasons, when many of the largest grossing films in any given year are typically released. The quarters ending March and June traditionally do not benefit from the same box office performance due to the number and nature of the motion pictures released in those seasonal periods. We expect to experience seasonal fluctuations in results of operations as a result of these trends. Our quarterly financial results have fluctuated in the past and may continue to fluctuate in the future based on a number of other factors in addition to these seasonal trends, many of which are beyond our control. Factors that may cause our operating results to vary or fluctuate include those discussed in Part II, Item 1.A below under the caption Risk factors.

Liquidity and capital resources

Since our inception and through September 23, 2011, we have financed our operations through the proceeds we received in connection with our IPO, the sale of redeemable convertible preferred stock, borrowings under our previous credit facility agreement and our current Credit Agreement with City National and through the net cash provided by operating activities. Our cash flow from operating activities has historically been significantly impacted by the contractual payment terms and patterns related to the license of our RealD Cinema Systems and use and sale of our RealD eyewear, as well as significant investments in research, development, selling and marketing activities and corporate infrastructure. Prior to fiscal 2010, many of our licensing and product sale contracts included terms that required upfront payments.

Cash provided by operating activities is expected to be a primary recurring source of funds in future periods and will be driven by our expected revenue generated from the 3D motion pictures exhibited on our RealD Cinema Systems and RealD-enabled screens, partially offset by increased working capital requirements associated with installing new RealD Cinema Systems as well as for building inventory, logistics and recycling costs for our RealD eyewear. Depending on our operating performance in any given period and the installation rate of additional RealD Cinema Systems, we expect to supplement our liquidity needs primarily with borrowings under our Credit Agreement.

As of September 23, 2011, our primary sources of liquidity were our cash and cash equivalents of \$32.5 million and our Credit Agreement providing for a revolving credit facility of up to (i) up to \$50.0 million through December 31, 2011 and (ii) up to \$25.0 million thereafter, \$25.0 million of which was available for borrowing.

Our cash equivalents primarily consist of money market funds and other marketable securities that mature within three months from the date of purchase. The carrying amount of cash equivalents reasonably approximates fair value due to the short maturities of these instruments. The primary objective of our investment activities is preservation of capital, fulfillment of liquidity needs and fiduciary control of cash and

Edgar Filing: RealD Inc. - Form 10-Q

investments. We also seek to maximize income from our investments without assuming significant risk. We do not enter into investments for trading or speculative purposes.

We believe that our cash, cash equivalents, potential cash flows from operations, and our availability under our Credit Agreement will be sufficient to satisfy our currently anticipated cash requirements through at least the next 12 months.

The following table sets forth our major sources and (uses) of cash for each period as set forth below.

(in thousands)	September 23, 2011	Six months ended September 24, 2010
Operating activities	\$ 28,142	\$ 10,696
Investing activities	(36,005)	(29,922)
Financing activities	\$ 23,442	\$ 53,494

Table of Contents

Cash flow from operating activities

Net cash inflows from operating activities during the six months ended September 23, 2011 primarily resulted from net income, partially offset by decreases in accounts payable and accrued expenses. Decreases in accounts payable and accrued expenses were related to timing of payments due to increased cash flow from operations.

Net cash inflows from operating activities during the six months ended September 24, 2010 primarily resulted from improved operating performance as RealD Cinema System installations and admissions increased. Net cash inflows from operating activities also benefited from increases in deferred revenue from international eyewear sales, accounts payable and accrued expenses, partially offset by an increase in glasses inventories and accounts receivable. Increases in accounts payable and accrued expenses were due to increased business activities at quarter end, resulting in significant amounts due to vendors and employees. Glasses inventories and accounts receivable grew in order to support an increase in RealD Cinema System installations and admissions.

Cash flow from investing activities and capital resources

For both the six months ended September 23, 2011 and September 24, 2010, cash outflow for investing activities was primarily related to the establishment of our initial infrastructure and for the purchase of component parts for our RealD Cinema Systems, digital projectors, and other property, equipment and leasehold improvements. In the six months ended September 23, 2011 and September 24, 2010, we received proceeds of \$4.0 million and \$15.4 million, respectively, as a result of the sale of digital projectors to certain of our motion picture exhibitors. In the six months ended September 24, 2010, we purchased available-for-sale securities of \$6.8 million. Capital expenditures were \$40.0 million for the six months ended September 23, 2011 and \$38.4 million for the six months ended September 24, 2010. We expect our capital expenditures of cinema systems and related components to be approximately \$50.0 million to \$60.0 million for the fiscal year ending March 23, 2012. In the future, we will continue to invest in our business to grow sales and develop new products and support the related increasing employee headcount.

Cash flow from financing activities

Net cash inflows from financing activities for the six months ended September 23, 2011 primarily resulted from proceeds from the Credit Agreement of \$30.0 million partially offset by \$5.0 million repayments on the Credit Agreement.

Net cash inflows from financing activities for the six months ended September 24, 2010 primarily resulted from the proceeds from the completion of the initial public offering of our common stock in which we sold and issued 6 million shares of common stock at an issue price of \$16.00 per share. A total of approximately \$96 million in gross proceeds were raised from the initial public offering, or \$81.9 million in net proceeds after deducting underwriting discounts and commissions of approximately \$6.7 million and other offering costs of approximately \$7.4 million. We used the net proceeds from the initial public offering to repay \$25.1 million of amounts outstanding under the credit facility agreement. In the six months ended September 24, 2010, repayments of long-term debt of \$8.1 million and a noncontrolling interest distribution of \$0.9 million offset proceeds from our revolving credit facility of \$5.0 million.

As of September 23, 2011, we had no notes payable outstanding. As of March 25, 2011 we had \$2.3 million notes payable outstanding. Interest expense was based on annual interest rates ranging from 7.0% to 8.4%. The notes were secured by the underlying equipment.

Edgar Filing: RealD Inc. - Form 10-Q

We have entered into the Credit Agreement with City National, which was dated as of June 24, 2010 and amended on April 5, 2011, to provide that the aggregate principal amount outstanding at any one time under our revolving credit loans may be (i) up to \$50.0 million through December 31, 2011 and (ii) up to \$25.0 million thereafter and which will mature on June 30, 2012. The Credit Agreement and the revolving credit facility provided thereunder became effective on July 21, 2010. Our obligations under the Credit Agreement are secured by a first priority security interest in substantially all of our tangible and intangible assets in favor of City National and are guaranteed by our subsidiaries, ColorLink and Stereographics.

Under the Credit Agreement, our business is subject to certain limitations, including limitations on our ability to incur additional debt, make certain investments or acquisitions, enter into certain merger and consolidation transactions, and sell our assets other than in the ordinary course of business. We will also be required to maintain compliance with certain financial covenants, including a minimum fixed charge coverage ratio and a maximum leverage ratio. As of September 23, 2011, we were in compliance with all financial covenants in our Credit Agreement. If we fail to comply with any of the covenants or if any other event of default, as defined in the Credit Agreement, should occur, the bank could elect to prevent us from borrowing and declare the indebtedness to be immediately due and payable. As of September 23, 2011, there was \$25.0 million outstanding under the Credit Agreement and there was \$25.0 million available to borrow under the Credit Agreement. In the future, we may continue to utilize commercial financing, lines of credit and term loans for general corporate purposes, including investing in technology.

For the six months ended September 23, 2011 and September 24, 2010, proceeds from employee stock option exercises were \$0.5 million and \$0.4 million, respectively. For the six months ended September 23, 2011 and September 24, 2010 proceeds from the exercise of warrants in our common stock were \$0.3 million and \$0.3 million. From time to time, we expect to receive cash from the

Table of Contents

exercise of employee stock options and warrants in our common stock. Proceeds from the exercise of employee stock options and warrants outstanding will vary from period to period based upon, among other factors, fluctuations in the market value of our common stock relative to the exercise price of such stock options and warrants.

Off-balance sheet arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in those types of relationships. We enter into guarantees in the ordinary course of business related to the guarantee of our own performance and the performance of our subsidiaries.

Non-U.S. GAAP discussion

In addition to our U.S. GAAP results, we present Adjusted EBITDA as a supplemental measure of our performance. However, Adjusted EBITDA is not a recognized measurement under U.S. GAAP. We define Adjusted EBITDA as net income (loss), plus net interest expense, income and other taxes, depreciation and amortization, share-based compensation expense and exhibitor option expense, as further adjusted to eliminate the impact of certain items that we do not consider indicative of our core operating performance. Management considers our core operating performance to be that which can be affected by our managers in any particular period through their management of the resources that affect our underlying revenue and profit generating operations that period. Non-U.S. GAAP adjustments to our results prepared in accordance with U.S. GAAP are itemized below. You are encouraged to evaluate these adjustments and the reasons we consider them appropriate for supplemental analysis. In evaluating Adjusted EBITDA, you should be aware that in the future we may incur expenses that are the same as or similar to some of the adjustments in this presentation. Our presentation of Adjusted EBITDA should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items.

Set forth below is a reconciliation of Adjusted EBITDA to net income for the three and six months ended September 23, 2011 and September 24, 2010:

(in thousands)	September 23, 2011	Three months ended September 24, 2010	September 23, 2011	Six months ended September 24, 2010
Net income (loss)	\$ 19,177	\$ (4,214)	\$ 28,579	\$ 5,638
Add (deduct):				
Interest expense	272	283	483	802
Income tax expense	4,159	824	9,411	1,651
Depreciation and amortization	7,054	3,376	13,152	6,044
Other income (1)	(1,099)	(197)	(949)	(6,807)
Share-based compensation expense (2)	4,733	2,352	7,632	3,008
Exhibitor option expense (3)	-	11,556	-	12,048
	7,710	164	7,828	295

Edgar Filing: RealD Inc. - Form 10-Q

Impairment of assets and
intangibles (4)

Sales and use tax (5)	2,017	2,007	3,507	4,152
Property tax (6)	330	241	766	447
Management fee (7)	-	87	-	175
Adjusted EBITDA	\$ 44,353	\$ 16,479	\$ 70,409	\$ 27,453

(1) Includes amortization of debt issue costs and unrealized foreign currency exchange gains and losses and gain on sale of digital projectors.

(2) Represents share-based compensation expense of nonstatutory and incentive stock options and restricted stock units to employees, officers and directors.

Table of Contents

- (3) Represents stock options granted to some of our motion picture exhibitor licensees. The amounts are recorded as contra revenue in the condensed consolidated financial statements.
- (4) Represents impairment of long-lived assets, such as fixed assets, theatrical equipment and identifiable intangibles.
- (5) Represents taxes incurred by us for cinema license and product revenue.
- (6) Represents property taxes on RealD Cinema Systems and digital projectors.
- (7) Represents payment of management fees to our Series C mandatorily redeemable convertible preferred stockholder (included in general and administrative expense), which were terminated upon the completion of our IPO.

We present Adjusted EBITDA because we believe it assists investors and analysts in comparing our performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance. In addition, we use Adjusted EBITDA in developing our internal budgets, forecasts and strategic plan, in analyzing the effectiveness of our business strategies in evaluating potential acquisitions; in making compensation decisions, in communications with our board of directors concerning our financial performance and because our credit facility agreement uses Adjusted EBITDA to measure our compliance with certain covenants. Adjusted EBITDA has limitations as an analytical tool which include, among others, the following:

- Adjusted EBITDA does not reflect our cash expenditures, or future requirements, for capital expenditures or contractual commitments;
- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not reflect the significant interest expense, or the cash requirements necessary to service interest or principal payments, on our debts;
- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such replacements;
- non-cash compensation is and will remain a key element of our overall long-term incentive compensation package, although we exclude it as an expense when evaluating our ongoing operating performance for a particular period;
- Adjusted EBITDA does not reflect the impact of certain cash charges resulting from matters we consider not to be indicative of our ongoing operations; and
- other companies in our industry may calculate Adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, Adjusted EBITDA should not be considered in isolation or as a substitute for performance measures calculated in accordance with U.S. GAAP. We compensate for these limitations by relying primarily on our U.S. GAAP results and using Adjusted EBITDA only as a supplement. Our consolidated financial statements and the notes to those statements included elsewhere are prepared in accordance with U.S. GAAP. See also Part II, Item 7: Management's discussion and analysis of financial condition and results of operations Non-U.S. GAAP discussion and Seasonality.

Critical accounting policies and estimates

This discussion is based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of our financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, estimates and judgments are evaluated, including those related to revenue recognition, revenue deductions, product returns, fair value of our common stock, share-based compensation, inventories, definite lived asset impairments, goodwill impairment and income taxes. These estimates and judgments are based on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, which form the basis for our judgments about the carrying values of assets and liabilities not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results may differ from these estimates.

We believe the following critical accounting policies, among others, affect our more significant judgments and estimates used in the preparation of our condensed consolidated financial statements.

Revenue recognition and revenue reductions

We derive substantially all of our revenue from the license of our RealD Cinema Systems and the product sale of our RealD eyewear. We evaluate revenue recognition for transactions using the criteria set forth by the SEC in Staff Accounting Bulletin No. 104, *Revenue Recognition* (SAB 104) and Accounting Standards Codification Topic 605, *Revenue Recognition* (ASC 605). The revenue recognition guidance states that revenue is recognized when all of the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the seller's price to the buyer is fixed or determinable and collectability is reasonably assured.

Table of Contents

License revenue. License revenue is accounted for as an operating lease. License revenue is primarily derived under per-admission, periodic fixed fee, or per-motion picture basis with motion picture exhibitors. Amounts received up front, less estimated allowances, are deferred and recognized over the lease term using the straight-line method. Additional lease payments that are contingent upon future events outside our control, including those related to admission and usage, are recognized as revenues when the contingency is resolved and we have no more obligations to our customers specific to the contingent payment received. Certain of our license revenue from leasing our RealD Cinema Systems is earned upon admission by the motion picture exhibitor's consumers. Our licensees, however, do not report and pay for such license revenue until after the admission has occurred, which may be received subsequent to our fiscal period end. We estimate and record licensing revenue related to motion picture exhibitor consumer admissions in the quarter in which the admission occurs, but only when reasonable estimates of such amounts can be made. We determine that there is persuasive evidence of an arrangement upon the execution of a license agreement or upon the receipt of a licensee's admissions report. Revenue is deemed fixed or determinable upon verification of a licensee's admissions report in accordance with the terms of the underlying executed agreement or, in certain circumstances, receipt of a licensee's admissions report. We determine collectability based on an evaluation of the licensee's recent payment history.

Product revenue. We recognize product revenue, net of allowances, when title and risk of loss have passed and when there is persuasive evidence of an arrangement, the payment is fixed or determinable, and collectability of payment is reasonably assured. In the United States and Canada, certain of our product revenue from the sale of our RealD eyewear is earned upon admission and usage by the motion picture exhibitor's consumers. Our customers, however, do not report admission or usage information until after the admission and usage has occurred, and such information may be received subsequent to our fiscal period end. We estimate and record such product revenue in the quarter in which the admission and usage occurs, but only when reasonable estimates of such amounts can be made.

Revenue reductions. We record revenue net of motion picture exhibitor stock options and estimated revenue allowances. In connection with certain exhibitor licensing agreements, we issued the motion picture exhibitors a 10-year option to purchase shares of our common stock at approximately \$0.00667 per share. The stock options vested upon the achievement of screen installation targets. Motion picture exhibitor stock options were valued at the underlying stock price at each reporting period until the targets were met. Amounts recognized were based on the number of RealD-enabled screens as a percentage of total screen installation targets. The stock options do not have net cash settlement features. Amounts recorded as a revenue reduction totaled \$11.6 million and \$12.0 million for the three months and six months ended September 24, 2010, respectively. As of March 25, 2011, all 3,668,340 motion picture exhibitor stock options had vested and all associated reduction of revenue had been recognized.

Share-based compensation

We account for stock options granted to employees and directors by recording compensation expense based on estimated fair values. We estimate the fair value of share-based payment awards on the date of grant. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in our consolidated statements of operations. Share-based awards are attributed to expense using the straight-line method over the vesting period. We determine the value of each option award that contains a market condition using a lattice-based option valuation model, while all other option awards are valued using the Black-Scholes valuation model as permitted under ASC 718, *Compensation - Stock Compensation*. The assumptions used in calculating the fair value of share-based payment awards represent our best estimates. Our estimates of the fair values of stock options granted and the resulting amounts of share-based compensation recognized may be impacted by certain variables including stock price volatility, employee stock option exercise behaviors, additional stock option grants, estimates of forfeitures, and the related income tax impact.

Stock options

Edgar Filing: RealD Inc. - Form 10-Q

Stock options granted generally vest over a four-year period, with 25% of the shares vesting after one year and monthly vesting thereafter. The options generally expire ten years from the date of grant. For the six months ended September 23, 2011, we granted 1.6 million stock options at a weighted average grant date fair value of \$12.64 per share. For the three months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to stock options was \$3.9 million and \$1.9 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to stock options was \$6.0 million and \$2.5 million, respectively.

For purposes of determining the expected term and in the absence of historical data relating to stock option exercises, we apply a simplified approach: the expected term of awards granted is presumed to be the mid-point between the vesting date and the end of the contractual term. We use the average volatility of similar, publicly traded companies as an estimate for expected volatility. The risk-free interest rate for periods within the expected or contractual life of the option, as applicable, is based on the United States Treasury yield curve in effect during the period the options were granted. Our expected dividend yield is zero.

Performance stock options

Certain of our management-level employees receive performance stock options, which gives the recipient the right to receive common stock that is contingent upon achievement of specified pre-established performance goals over the performance period, which is generally three years. The performance goals for the performance stock options are based on the measurement of our total shareholder

Table of Contents

return, on a percentile basis, compared to a comparable group of companies. Depending on the outcome of the performance goals, the recipient may ultimately earn performance stock options equal to or less than the number of performance stock options granted. For the three months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to performance stock options was \$0.3 million and \$0.4 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to performance stock options was \$0.8 million and \$0.4 million, respectively.

The lattice-based option valuation model uses terms based on the length of the performance period and compound annual growth rate goals for total stockholder return based on the provisions of the award. For purposes of determining the expected term and in the absence of historical data relating to stock option exercises, we apply a simplified approach: the expected term of awards granted is presumed to be the mid-point between the vesting date and the end of the contractual term. We use the average volatility of a peer group of companies as an estimate for expected volatility. The risk-free interest rate for periods within the expected or contractual life of the option, as applicable, is based on the United States Treasury yield curve in effect during the period the options were granted.

Restricted stock units

Restricted stock units vest over one to four years. For the six months ended September 23, 2011, we granted 0.2 million restricted stock units at a weighted average grant date fair value of \$20.53 per restricted stock unit. For the three months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to restricted stock units was \$0.5 million and \$0.1 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, share-based compensation expense related to restricted stock units was \$0.8 million and \$0.1 million, respectively.

Share-based compensation expense for the three and six months ended September 23, 2011 and September 24, 2010 was as follows:

(in thousands)	Three months ended		September 23, 2011	Six months ended September 24, 2010
	September 23, 2011	September 24, 2010		
Share-based compensation				
Cost of revenue	\$ 133	\$ 30	\$ 198	\$ 43
Research and development	1,174	381	1,571	582
Selling and marketing	1,313	774	2,224	1,156
General and administrative	2,113	1,167	3,639	1,227
Total	\$ 4,733	\$ 2,352	\$ 7,632	\$ 3,008

Included in research and development for the three and six months ended September 23, 2011 is \$0.6 million of additional share-based compensation expense recognized in connection with a modification of stock options and performance stock options pursuant to a separation agreement for one of our officers.

Inventories

Edgar Filing: RealD Inc. - Form 10-Q

Domestically, we provide our RealD eyewear free of charge to motion picture exhibitors and then receive a fee from the motion picture studios for the usage of that RealD eyewear by the motion picture exhibitors' consumers.

For RealD eyewear located at a motion picture exhibitor, we believe that it is not operationally practical to perform physical counts or request the motion picture exhibitor to perform physical counts and confirm quantities held to ensure that losses due to damage, destruction, and shrinkage are specifically recognized in the period incurred due to the number of domestic RealD-enabled screens and related usage of RealD. We believe that the cost to monitor shrinkage or usage significantly outweighs the financial reporting benefits of using a specific identification methodology of expensing. We believe that utilizing a composite method of expensing RealD eyewear inventory costs provides a rational and reasonable approach to ensuring that shrinkage is provided for in the period incurred and that inventory costs are expensed in the periods that reasonably reflect the periods in which the related revenue is recognized. In doing so, we believe the following methodology reasonably and generally reflects periodic income or loss under these facts and circumstances:

- For an estimated period of time following shipment to domestic motion picture exhibitors, no expense is recognized between the time of shipment and until the delivery is made as the inventory unit is in transit and unused.
- The inventory unit cost is expensed on a straight-line basis over an estimated usage period beginning when we believe usage of the inventory unit has started. In estimating the expensing start date and related expense period, we consider various factors including, but not limited to, those relating to a 3D motion picture's opening release date, a 3D motion picture's expected release period, the number of currently playing 3D motion pictures, the motion picture exhibitor's buying and stocking patterns and practices and the quantities shipped per inventory unit.

Table of Contents

We believe that the expensing methodology described above rationally and reasonably approximates the period the related usage occurs resulting in our RealD eyewear product revenue. The expensing start date following the date of shipment is meant to approximate the date at which usage begins. Additionally, as the expense recognition period has been and is expected to continue to be short, we believe it adequately recognizes inventory impairments due to loss and damage on a timely basis. We further believe that exposures due to loss or damage, if any, are considered normal shrinkage and a necessary and expected cost to generate the revenue per 3D motion picture earned through RealD eyewear usage. We continue to monitor the reasonableness of this methodology to ensure that it approximates the period over which the related RealD eyewear product revenue is earned and realizable. RealD eyewear inventory costs for products shipped that have not yet been expensed are reported as deferred costs-eyewear.

Impairment of long-lived assets

We review long-lived assets, such as property and equipment, cinema systems, digital projectors and intangibles, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Factors or circumstances that could indicate the occurrence of such events include current period operating or cash flow losses combined with a history of operating or cash flow losses, a projection or forecast that demonstrates continuing operating or cash flow losses, or incurring costs in excess of amounts originally expected to acquire or construct an asset. If the asset is not recoverable, an impairment loss is recognized as the amount by which the carrying amount of the asset exceeds its fair value.

During the three months ended September 23, 2011, we determined that certain of our cinema systems were not recoverable and that the carrying value of the assets exceeded fair value, primarily due to the number of certain of our cinema systems on hand, including related outstanding purchase commitments and the continuing shift in the mix in the deployment of cinema systems based on the type of digital projectors installed and theater configuration. The fair value was primarily determined by evaluating the discounted future cash flows expected to be generated from the cinema systems. For the three months ended September 23, 2011, impairment charged to cost of revenue for certain of the cinema systems including related outstanding purchase commitments totaled \$6.8 million.

For the three months ended September 23, 2011 and September 24, 2010, impairment charges for all impaired RealD Cinema Systems charged to cost of revenue totaled \$7.7 million and \$0.2 million, respectively. For the six months ended September 23, 2011 and September 24, 2010, impairment charges for all impaired RealD Cinema Systems charged to cost of revenue totaled \$7.8 million and \$0.3 million, respectively.

Deferred tax asset valuation and tax exposures

As of September 23, 2011, we have determined based on the weight of the available evidence, both positive and negative, to provide for a valuation allowance against substantially all of the net deferred tax assets. The current deferred tax assets not reserved for by the valuation allowance are those in foreign jurisdictions or amounts that may be carried back in future years. If there is a change in circumstances that causes a change in judgment about the realizability of the deferred tax assets, we will adjust all or a portion of the applicable valuation allowance in the period when such change occurs.

We are subject to ongoing tax exposures, examinations and assessments in various jurisdictions. Accordingly, we may incur additional tax expense based upon the outcomes of such matters. In addition, when applicable, we adjust tax expense to reflect our ongoing assessments of

such matters which require judgment and can materially increase or decrease its effective rate as well as impact operating results.

Significant judgment is required in determining the provision for income taxes, deferred tax assets and liabilities, the valuation allowance against our deferred tax assets and uncertainty in income tax positions. Our financial position and results of operations may be materially impacted if actual results significantly differ from these estimates or the estimates are adjusted in future periods.

Contingencies and assessments

We are subject to various loss contingencies and assessments arising in the course of our business, some of which relate to litigation, claims, property taxes and sales and use or goods and services tax assessments. We consider the likelihood of the loss or the incurrence of a liability, as well as our ability to reasonably estimate the amount of loss in determining loss, contingencies and assessments. An estimated loss contingency or assessment is accrued when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. We regularly evaluate current information available to us to determine whether such accruals should be adjusted. Based on the information presently available, including discussion with counsel and other consultants, management believes that resolution of these matters will not have a material adverse effect on our business, consolidated results of operations, financial condition or cash flows.

Table of Contents

Recent accounting pronouncements

In May 2011, the Financial Accounting Standard Board (FASB) issued ASU 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (Topic 820)-Fair Value Measurement* (ASU 2011-04) to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. GAAP and International Financial Reporting Standards. ASU 2011-04 changes certain fair value measurement principles and enhances the disclosure requirements particularly for fair value measurements that are estimated using significant unobservable (Level 3) inputs. ASU 2011-04 will be effective for us beginning after December 15, 2011. We are currently evaluating the impact the adoption of new guidance will have on the consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220)-Presentation of Comprehensive Income* (ASU 2011-05), to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income, or in two separate but consecutive statements. ASU 2011-05 eliminates the option to present components of other comprehensive income as part of the statement of equity. ASU 2011-05 will be effective for us beginning after December 15, 2011 and we will be required to apply it retrospectively. The adoption of this standard will only impact the presentation of our financial statements and will have no impact on the reported results.

In September 2011, the FASB issued ASU 2011-08, *Intangibles (Topic 350) Goodwill and Other* (ASU 2011-08) which allows companies to waive comparing the fair value of a reporting unit to its carrying amount in assessing the recoverability of goodwill if, based on qualitative factors, it is not more likely than not that the fair value of a reporting unit is less than its carrying amount. ASU 2011-08 will be effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. We are currently evaluating the impact the adoption of new guidance will have on the consolidated financial statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have operations outside the United States. We are exposed to market risks in the ordinary course of our business. These risks primarily include interest rate, foreign exchange and inflation risks as well as changes in the general economic conditions in the countries where we conduct business. To reduce certain of these risks, we monitor the financial condition of our large customers and limit credit exposure by collecting in advance and setting credit limits, as we deem appropriate. In addition, our investment strategy currently has been to invest in financial instruments that are highly liquid, readily convertible into cash and which mature within three months from the date of purchase. We also enter into foreign exchange derivative hedging transactions as part of our risk management program. For accounting purposes, we do not designate any of our derivative instruments as hedges and we do not use derivatives for speculating trading purposes and are not a party to leveraged derivatives.

Interest rate risk

We are exposed to market risk related to changes in interest rates.

Edgar Filing: RealD Inc. - Form 10-Q

Our investments are considered cash equivalents and primarily consist of money market funds. At September 23, 2011, we had cash and cash equivalents of \$32.5 million. The carrying amount of cash equivalents reasonably approximates fair value due to the short maturities of these instruments. The primary objective of our investment activities is preservation of capital, fulfillment of liquidity needs and fiduciary control of cash and investments. We also seek to maximize income from our investments without assuming significant risk. We do not enter into investments for trading or speculative purposes. Our investments are exposed to market risk due to a fluctuation in interest rates, which may affect our interest income and the fair market value of our investments. Due to the short-term nature of our investment portfolio, however, we do not believe an immediate 10% increase or decrease in interest rates would have a material effect on the fair market value of our portfolio, and therefore, we do not expect our operating results or cash flows to be materially affected by a sudden change in market interest rates.

We do not believe our cash equivalents have significant risk of default or illiquidity. While we believe our cash equivalents do not contain excessive risk, we cannot provide absolute assurance that in the future our investments will not be subject to adverse changes in market value. In addition, we maintain significant amounts of cash and cash equivalents at one or more financial institutions that are in excess of federally insured limits. We cannot be assured that we will not experience losses on these deposits.

The revolving credit facility provides for, at our option, Revolving London Interbank Offered Rate (LIBOR) loans, Revolving Prime loans which bear interest at the greater of three and one half percent (3.50%) or the fluctuating Prime Rate per annum. Changes in interest rates do not affect operating results or cash flows on our fixed rate borrowings but would impact our variable rate borrowings. At September 23, 2011, we had \$25.0 million borrowings outstanding under the Credit Agreement. As of September 23, 2011, borrowings outstanding under the Credit Agreement bear interest at 3.50%.

Table of Contents

Foreign currency risk

We have foreign currency risks related to our revenue and operating expenses denominated in currencies other than the United States dollar. Our historical revenue has generally been denominated in United States dollars, and a significant portion of our current revenue continues to be denominated in United States dollars; however, we expect an increasing portion of our future revenue to be denominated in currencies other than the United States dollar, primarily the Euro, British pound sterling, Canadian dollar, Japanese yen, Chinese Yuan and Hong Kong dollar. Our operating expenses are generally denominated in the currencies of the countries in which our operations are located, primarily the United States and United Kingdom. Increases and decreases in our international revenue from movements in foreign exchange rates are partially offset by the corresponding increases or decreases in our international operating expenses. To further reduce our net exposure to foreign exchange rate fluctuations on our results of operations, we have entered into foreign currency forward contracts.

As of September 23, 2011, we had outstanding forward contracts based in Canadian dollar, British pound sterling and Euro with notional amounts totaling \$4.7 million. We do not designate any of our forward contracts as hedges for accounting purposes. For the three and six months ended September 23, 2011, the net gain related to the change in fair value of our foreign currency forward contracts was \$0.2 million. For the three and six months ended September 24, 2010, the net loss related to the change in fair value of our foreign currency forward contracts was \$0.1 million. With regard to these contracts, a hypothetical 10.0% adverse movement in foreign exchange rates compared with the U.S. dollar relative to exchange rates on September 23, 2011 would result in a \$0.5 million reduction in fair value of these forward contracts and a corresponding foreign currency loss of approximately \$0.3 million. This analysis does not consider the impact that hypothetical changes in foreign currency exchange rates would have on anticipated transactions and assets and liabilities that these foreign currency sensitive instruments were designed to offset.

As our international operations grow, our risks associated with fluctuation in currency rates will become greater, and we will continue to reassess our approach to managing this risk. In addition, currency fluctuations or a weakening United States dollar can increase the costs of our international expansion. As our international operations grow, we expect to conduct more of our business in currencies other than the U.S. dollar, thereby increasing risks associated with fluctuation in currency rates. Currency fluctuations or a weakening United States dollar can increase the costs of our international expansion. As our exposure to currency risks grows, we will continue to reassess our risk management.

Inflation risk

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition and results of operations.

Counterparty risk

Our financial statements, including derivatives, are subject to counterparty credit risk, which we consider as part of the overall fair value measurement. We attempt to mitigate this risk through credit monitoring procedures.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Subject to the limitations noted above, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the fiscal period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of such date, our disclosure controls and procedures were effective to meet the objective for which they were designed and operate at the reasonable assurance level.

Table of Contents

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter ended September 23, 2011, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II.

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are involved in various legal proceedings from time to time arising from the normal course of business activities, including claims of alleged infringement of intellectual property rights, commercial, employment and other matters. In our opinion, resolution of these proceedings is not expected to have a material adverse effect on our operating results or financial condition. However, it is possible that an unfavorable resolution of one or more such proceedings could materially affect our future operating results or financial condition in a particular period.

ITEM 1A. RISK FACTORS

The following risk factors and other information included in this Quarterly Report on Form 10-Q should be carefully considered. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we presently deem less significant may also impair our business operations. If any of the following risks actually occur, our business, operating results and financial condition could be materially adversely affected.

Risks relating to our business

If motion pictures that can be viewed with RealD Cinema Systems are not made or are not commercially successful, our revenue will decline.

Almost all of our revenue is currently dependent upon both the number of 3D motion pictures released and the commercial success of those 3D motion pictures. Although we have produced alternative content in 3D, such as the production of *Carmen in 3D* with London's Royal Opera House, we are not actively developing 3D motion pictures or our own 3D content, other than the current production of *Madame Butterfly*, and therefore, we rely on motion picture studios producing and releasing 3D motion pictures compatible with our RealD Cinema Systems. There is no guarantee an increasing number of 3D motion pictures will be released or that motion picture studios will continue to produce 3D motion pictures at all. Motion picture studios may refrain from producing and releasing 3D motion pictures for any number of reasons, including their lack of commercial success, consumer preferences, the lower-cost to produce 2D motion pictures or the availability of other entertainment

Edgar Filing: RealD Inc. - Form 10-Q

options. The commercial success of a 3D motion picture depends on a number of factors that are outside of our control, including whether it achieves critical acclaim, timing of the release, cost, marketing efforts and promotional support for the release. In the past, consumer interest in 3D motion pictures was episodic and motion picture studios tended to use 3D motion pictures as a gimmick rather than as an artistic tool to enhance the viewing experience. If consumers' recent renewed interest in the 3D viewing experience fails to grow or it declines for any reason, box office performance may suffer and motion picture studios may reduce the number of 3D motion pictures they produce. Poor box office performance of 3D motion pictures, disruption or reduction in 3D motion picture production or conversion of two-dimensional motion pictures into 3D motion pictures, changes in release schedules, cancellations of motion picture releases in 3D versions, a reduction in marketing efforts for 3D motion pictures by motion picture studios or a lack of consumer demand for 3D motion pictures could result in lower 3D motion picture attendance, which would substantially reduce our revenue. For example, that fact that Warner Brothers was unable to convert *Harry Potter and the Deathly Hallows Part 1* from 2D into 3D in time for a 2010 release in 3D negatively impacted 3D motion picture attendance and, we believe, the box office for that motion picture and our revenue in the period in which that motion picture was released.

Table of Contents

If motion picture exhibitors do not continue to use our RealD Cinema Systems or experience financial difficulties, our growth and results of operations could be adversely affected.

Our primary licensees in the motion picture industry are motion picture exhibitors. Our license agreements with motion picture exhibitors do not obligate these licensees to deploy a specific number of our RealD Cinema Systems. We cannot predict whether any of our existing motion picture exhibitor licensees will continue to perform under their license agreements with us, whether they will renew their license agreements with us at the end of their term or whether we may now or in the future be in breach of those agreements. If motion picture exhibitors reduce or eliminate the number of 3D motion pictures that are exhibited in theaters, then motion picture studios may not produce and release 3D motion pictures and our revenue could be materially and adversely affected.

In addition, license revenue from American Multi-Cinema, Inc., or AMC, Cinemark USA, Inc., or Cinemark, and Regal Cinemas, Inc., or Regal, together comprised approximately 22% of our gross license revenue in the six months ended September 23, 2011, 23% in the year ended March 25, 2011, 30% in the year ended March 26, 2010 and 37% in the year ended March 27, 2009.

Any inability or failure by our motion picture exhibitors to pay us amounts due in a timely fashion or at all could substantially reduce our cash flow and could materially and adversely impact our financial condition and results of operations.

A deterioration in our relationships with the major motion picture studios could adversely affect our business.

The six major motion picture studios accounted for approximately 82% of domestic box office revenue and 9 of the top 10 grossing 3D motion pictures in calendar year 2010. Such 3D motion pictures are also released internationally. In addition, for our domestic operations, these major motion picture studios pay us a per use fee for our RealD eyewear. To the extent that our relationship with any of these major motion picture studios deteriorates or any of these studios stop making motion pictures that can be viewed at RealD-enabled theater screens, refuse to co-brand with us or stop using or paying for the use of our RealD eyewear in domestic markets, our costs could increase and our revenue could decline, which would adversely affect our business and results of operations. We understand that at least one motion picture studio is demanding a change to the 3D eyewear business model in North America to resemble the international model, and that May 2012 may be the timeline for the proposed change. While we support multiple business models for our RealD eyewear around the world, the uncertainty and any potential dispute with a motion picture studio over the domestic eyewear business model could adversely affect our results of operations, financial condition, business and prospects.

If motion picture exhibitors do not continue converting analog theaters to digital or the pace of conversions slows, our future prospects could be limited and our business could be adversely affected.

Our RealD Cinema Systems only work in theaters equipped with digital cinema projection systems, which enable 3D motion pictures to be delivered, stored and projected electronically, and our systems are not compatible with analog motion picture projectors. Motion picture exhibitors have been converting projectors to digital cinema over the last several years, giving us the opportunity to deploy our RealD Cinema Systems. After motion picture exhibitors convert their projectors to digital cinema, they must install a silver screen and our RealD Cinema System in order to display motion pictures in RealD 3D. The conversion by motion picture exhibitors of their projectors and screens from analog to digital cinema requires significant expense. In 2010, motion picture exhibitors installed approximately 20,000 digital cinema projectors, an

Edgar Filing: RealD Inc. - Form 10-Q

approximately 123% growth from 2009, and in 2009, motion picture exhibitors installed approximately 7,500 digital cinema projectors, an approximately 86% growth rate from 2008. Although DCIP completed its financing in March 2010 that is providing funding for the digital conversion of approximately 14,000 additional domestic theater screens operated by our licensees AMC, Cinemark and Regal, we cannot predict the pace or success of this conversion, or that we will have adequate supply of the components comprising our RealD Cinema Systems in any given period to satisfy motion picture exhibitor demand. As of December 31, 2010, approximately 39% of domestic theater screens had converted to digital and a much smaller percentage of international theater screens had been converted. If the market for digital cinema develops more slowly than expected, or if the motion picture exhibitors we have agreements with, including AMC, Cinemark and Regal, delay or abandon the conversion of their theaters, our ability to grow our revenue and our business could be adversely affected.

If the deployment of our RealD Cinema Systems is delayed or not realized, our future prospects could be limited and our business could be adversely affected.

We have license agreements with motion picture exhibitors that give us the right, subject to certain exceptions, to deploy our RealD Cinema Systems if a location under contract is already equipped with our systems and they choose to install additional 3D digital projector systems. As of September 23, 2011, we were working with our motion picture exhibitor licensees to deploy our RealD Cinema Systems on up to approximately 2,900 additional screens under our existing agreements with them. On January 26, 2011, the Company entered into an amendment to its license agreement with Regal to, among other things, provide for revised terms in respect of payment, royalties and duration of the agreement, as well as to expand the number of RealD-enabled screens across the Regal theater circuit by up to 1,500 additional screens. On July 21, 2011, we entered into an amendment to our license agreement with

Table of Contents

Cinemark to, among other things, provide for revised terms in respect of payment, royalties and duration of the agreement, as well as to expand the number of RealD-enabled screens across the Cinemark theater circuit by up to 1,500 additional screens. On July 28, 2011, we entered into an amendment to our license agreement with AMC to, among other things, expand the number of RealD-enabled screens across the AMC theater circuit in the United States and Canada by up to 1,000 additional screens, as well as to revise the term. However, our license agreements do not obligate our licensees to deploy a specific number of our RealD Cinema Systems. Numerous factors beyond our control could influence when and whether our RealD Cinema Systems will be deployed, including motion picture exhibitors' ability to fund capital expenditures, or their decision to delay or abandon the conversion of their theaters to digital projection or reduce the number of 3D motion pictures exhibited in their theaters, and our ability to secure adequate supplies of components comprising our RealD Cinema System in any given period. If motion picture exhibitors delay, postpone or decide not to deploy RealD Cinema Systems at the number of screens they have announced, or we are unable to deploy our RealD Cinema Systems in a timely manner, our future prospects could be limited and our business could be adversely affected.

We have a history of net losses and may continue to suffer losses in the future.

We have incurred net losses in each of our last six full fiscal years, and incurred a net loss of approximately \$12.3 million for the year ended March 25, 2011. If we cannot become profitable, our financial condition will deteriorate, and we may be unable to achieve our business objectives

Any inability to protect our intellectual property rights could reduce the value of our 3D technologies and brand, which could adversely affect our financial condition, results of operations and business.

Our business is dependent upon our patents, trademarks, trade secrets, copyrights and other intellectual property rights. Effective intellectual property rights protection, however, may not be available under the laws of every country in which we and our licensees operate, such as China. The efforts we have taken to protect our proprietary rights may not be sufficient or effective. Any significant impairment of our intellectual property rights could harm our business or our ability to compete. In addition, protecting our intellectual property rights is costly and time consuming. It may not be practicable or cost effective for us to fully protect our intellectual property rights in some countries or jurisdictions. If we are unable to successfully identify and stop unauthorized use of our intellectual property, we could lose potential revenue and experience increased operational and enforcement costs, which could adversely affect our financial condition, results of operations and business.

It is possible that some of our 3D technologies may not be protectable by patents. In addition, given the costs of obtaining patent protection, we may choose not to protect particular innovations that later turn out to be important. Even where we do have patent protection, the scope of such protection may be insufficient to prevent third parties from designing around our particular patent claims or otherwise avoiding infringement. Furthermore, there is always the possibility that an issued patent may later be found to be invalid or unenforceable, or a competitor may attempt to engineer around our issued patent. Additionally, patents only offer a limited term of protection. Moreover, the intellectual property we maintain as trade secrets could be compromised by third parties, or intentionally or accidentally by our employees, which would cause us to lose the competitive advantage resulting from them.

Our RealD Cinema Systems and other technologies are generally designed for use with third-party technologies and hardware, and if we are unable to maintain the ability of our RealD Cinema Systems and other technologies to work with these third-party technologies and hardware, our business and operating results could be adversely affected.

Edgar Filing: RealD Inc. - Form 10-Q

Our RealD Cinema Systems and other technologies are generally designed for use with third-party technologies and hardware, such as Christie projectors, Doremi servers, Harkness Hall screens and Sony Electronics 4K SXR^D digital cinema projectors. Third-party technologies and hardware may be modified, re-engineered or removed altogether from the marketplace. In addition, third-party technologies used to interact with our RealD Cinema Systems, RealD Format and other 3D technologies can change without prior notice to us, which could result in increased costs or our inability to provide our 3D technologies to our licensees. If we are unable to maintain the ability of our RealD Cinema Systems, RealD Format and other 3D technologies to work with these third-party technologies and hardware, our business and operating results could be adversely affected.

We may in the future be subject to intellectual property rights disputes that are costly to defend, could require us to pay damages and could limit our ability to use particular 3D technologies in the future.

We may be exposed to, or threatened with, future litigation or any other disputes by other parties alleging that our 3D technologies infringe their intellectual property rights. Any intellectual property disputes, regardless of their merit, could be time consuming, expensive to litigate or settle and could divert management resources and attention. An adverse determination in any intellectual property dispute could require us to pay damages and/or stop using our 3D technologies, trademarks, copyrighted works and other material found to be in violation of another party's rights and could prevent us from licensing our 3D technologies to others. In order to avoid these restrictions and resolve the dispute, we may have to pay for a license. This license may not be available on reasonable

Table of Contents

terms, could require us to pay significant license fees and may significantly increase our operating expenses. A license also may not be available to us at all. As a result, we may be required to use and/or develop non-infringing alternatives, which could require significant effort and expense, or which may not be possible. If we cannot obtain a license or develop alternatives for any infringing aspects of our business, we may be forced to limit our 3D technologies and may be unable to compete effectively. In certain instances, we have contractually agreed to provide indemnification to licensees relating to our intellectual property. This may require us to defend or hold harmless motion picture exhibitors, consumer electronics manufacturers or other licensees. We have from time to time corresponded with one or more third parties regarding patent enforcement issues and in-bound and out-bound patent licensing opportunities. In addition, from time to time we may be engaged in disputes regarding the licensing of our intellectual property rights, including matters related to our license fee rates and other terms of our licensing arrangements. These types of disputes can be asserted by our licensees or prospective licensees or by other third parties as part of negotiations with us or in private actions seeking monetary damages or injunctive relief or in regulatory actions. Requests for monetary and injunctive remedies asserted in claims like these could be material and could have a significant impact on our business. Any disputes with our licensees, potential licensees or other third parties could materially and adversely affect our business, results of operations and prospects.

If we are unable to maintain our brand and reputation for providing high quality 3D technologies, our business, results of operations and prospects could be materially harmed.

Our business, results of operations and prospects depend, in part, on maintaining and strengthening our brand and reputation for providing high quality 3D technologies. If problems with our 3D technologies cause motion picture exhibitors, consumer electronics manufacturers or other licensees to experience operational disruption or failure or delays in the delivery of their products and services to their customers, our brand and reputation could be diminished. Maintaining and strengthening our brand and reputation may be particularly challenging as we enter business segments in which we have limited experience, such as 3D consumer electronics. If we fail to promote and maintain our brand and reputation successfully, our business, results of operations and prospects could be materially harmed.

Competition from other providers of 3D technologies to the motion picture industry could adversely affect our business.

The motion picture industry is highly competitive, particularly among providers of 3D technologies. Our primary competitors include Dolby Laboratories, Inc., Sony Electronics, Inc., or Sony Electronics, IMAX Corporation, MasterImage 3D, LLC, and X6D Limited. In addition, other companies, including motion picture exhibitors and studios, may develop their own 3D technologies in the future. Consumers may also perceive the quality of 3D technologies delivered by some of our competitors to be equivalent or superior to our 3D technologies. In addition, some of our current or future competitors may have significantly greater financial, technical, marketing and other resources than we do or may have more experience or advantages in the business segments in which we compete that will allow them to offer lower prices or higher quality technologies, products or services. If we do not successfully compete with these providers of 3D technologies, we could lose market share and our business could be materially and adversely affected. In addition, competition could force us to decrease prices and cause our margins to decline, which could adversely affect our business. Pricing pressures in both domestic and international motion picture exhibitor markets continue, and no assurance can be given that reductions to revenue and cost of revenue in future periods will not increase.

We face potential competition from companies with greater brand recognition and resources in the consumer electronics industry.

3D consumer electronics technologies are new and rapidly developing, and we must compete with companies that enjoy competitive advantages, including:

Edgar Filing: RealD Inc. - Form 10-Q

- more developed distribution channels and deeper relationships with consumer electronics manufacturers;
- a more extensive customer base;
- technologies that may be better suited for 3D consumer electronics products;
- broader technology, product and service offerings; and
- greater resources for competitive activities, such as research and development, strategic acquisitions, alliances, joint ventures, sales and marketing, and lobbying for changes in industry and government standards.

As a result, these current and potential competitors may be able to respond more quickly and effectively than we can to new or changing opportunities, products, technologies or standards in 3D consumer electronics. We also face competition where existing licensees relying on our RealD Cinema Systems in the motion picture industry may become current or potential competitors in 3D consumer electronics, or vice versa. For example, Sony Pictures Entertainment, Inc., or Sony Pictures, is a major motion picture studio, but certain of its affiliates also design, manufacture and market consumer electronics products and components and are marketing 3D consumer electronics. To the extent that Sony Electronics or our other licensees choose to utilize competing 3D

Table of Contents

technologies that they have developed or in which they have an interest, rather than use our 3D technologies, our growth prospects could be adversely affected.

The introduction of new 3D technologies and changes in the way that our competitors operate could harm our business. If we fail to keep up with rapidly changing 3D technologies or the growth of new and existing opportunities, our 3D technologies could become less competitive or obsolete.

The motion picture and consumer electronics industries in general are undergoing significant changes. Due to technological advances and changing consumer tastes, numerous companies have developed, and are expected to continue to develop, new 3D technologies that may compete directly with our 3D technologies. We believe that original equipment manufacturers may be working to develop laser-based projection technologies, which may compete with, be incompatible with or render our RealD Cinema Systems obsolete. Competitors may develop alternative 3D technologies that are more attractive to consumers, content producers and distributors, motion picture exhibitors, consumer electronics manufacturers and others, or more cost effective than our technologies, and compete with or render our 3D technologies obsolete. As a result of this competition, we could lose market share, which could harm our business and operating results. We expect to continue to expend considerable resources on research and development in response to changes in the motion picture and consumer electronics industries. However, we may not be able to develop and effectively market new 3D technologies that adequately or competitively address the needs of these changing industries, which could have a material and adverse effect on our business, results of operations and prospects.

If our 3D technologies fail to be widely adopted by or are not compatible with the needs of our licensees, our business prospects could be limited and our operating results could be adversely affected.

Our motion picture and consumer electronics licensees depend upon our 3D technologies being compatible with a wide variety of motion picture and consumer electronics systems, products and infrastructure. We make significant efforts to design our 3D technologies to address capability, quality and cost considerations so that they either meet or, where possible, exceed the needs of our licensees in the motion picture and consumer electronics industries. To have our 3D technologies widely adopted in the motion picture and consumer electronics industries, we must convince a broad spectrum of professional organizations worldwide, as well as motion picture studios and exhibitors and consumer electronics manufacturers who are members of such organizations, to adopt them and to ensure that our 3D technologies are compatible with their systems, products and infrastructure.

If our 3D technologies are not widely adopted or retained or if we fail to conform our 3D technologies to the expectations of, or standards set by, industry participants, they may not be compatible with other products and our business, operating results and prospects could be adversely affected. We expect that meeting and maintaining the needs of our licensees for compatibility with them will be significant to our business in the future. In addition, the market for broadcast technologies has traditionally been heavily regulated by governments or other regulatory bodies, and we expect this to continue to be the case in the future. If our 3D technologies are not compatible with the broadcasting infrastructure or governmental or regulatory requirements in particular geographic areas, our ability to compete in these markets could be adversely affected.

Other forms of entertainment may be more attractive to consumers than those using our 3D technologies, which could harm our growth and operating results.

Edgar Filing: RealD Inc. - Form 10-Q

We face competition for consumer attention from other forms of entertainment that may drive down motion picture box office, license revenue from motion picture exhibitors, and license revenue from 3D-enabled consumer electronic devices. We compete with a number of alternative motion picture distribution channels, such as cable, satellite, broadcast, packaged media and the Internet. There are also other forms of entertainment competing for consumers' leisure time and disposable income such as concerts, amusement parks and sporting events. A significant increase in the popularity of these alternative motion picture channels and competing forms of entertainment could reduce the demand for theatrical exhibition of 3D motion pictures, including those viewed with our RealD Cinema Systems, or the use of 3D-enabled consumer electronics devices, any of which would have an adverse effect on our business and operating results.

Our limited operating history in 3D consumer electronics presents risk to our ability to achieve success in this area.

Our 3D technologies have only recently been made available to consumer electronics manufacturers, including Victor Company of Japan, Limited, Panasonic Corporation, Samsung Electronics Company Limited, Sony Electronics, Toshiba Corporation, and VIZIO, Inc., as well as electronics component suppliers such as Broadcom, to enable 3D viewing on high definition televisions, laptops and other displays. To date, we have not generated revenue of any material significance from our arrangements with these and other consumer electronics manufacturers. After having jointly announced with Samsung a license agreement in May 2011 which we had expected to lead to the incorporation of RealD's 3D display technology into LCD panels manufactured by Samsung beginning in early 2012, we have recently learned that Samsung's initiative to manufacture panels under the license agreement with RealD is not

Table of Contents

currently being pursued. 3D consumer electronics technologies are rapidly developing, as manufacturers are working to set standards and content producers and distributors are working on increasing the availability of new 3D content. However, the demand for our 3D technologies and the income potential from 3D consumer electronics is unproven. In addition, because 3D consumer electronics technologies are new and quickly evolving, we have limited insight into trends that may emerge and affect our business. We may make errors in predicting and reacting to relevant business trends. We also may not be able to successfully address these risks on a timely basis or at all.

If consumer electronics manufacturers limit, delay or cease their use of our 3D technologies in high definition televisions, laptops and other displays or such products are not accepted by consumers, our potential growth will be significantly reduced.

We are dependent on consumer electronics manufacturers to use our RealD Display, active and passive eyewear, and RealD Format technologies with their high definition televisions, laptops and other displays, and for content distributors to deliver 3D content via cable, satellite, broadcast, packaged media and the Internet. While we have entered into agreements with some consumer electronics manufacturers regarding the use of our 3D technologies in various consumer electronics products, these agreements are not exclusive, and we can give no assurances that these consumer electronics manufacturers will utilize our 3D technologies or that there will be sufficient consumer demand for 3D electronics products. In addition, since 3D consumer electronics technologies are still emerging, it is unclear if consumers will widely adopt viewing 3D content in the home and elsewhere as an attractive alternative to the 2D viewing experience. After having jointly announced with Samsung a license agreement in May 2011 which we had expected to lead to the incorporation of RealD's 3D display technology into LCD panels manufactured by Samsung beginning in early 2012, we have recently learned that Samsung's initiative to manufacture panels under the license agreement with RealD is not currently being pursued. The cost or lack of consumer interest in 3D technologies may cause consumer electronics manufacturers to limit, delay or cease their use of our 3D technologies. In addition, our competitors in 3D consumer electronics technologies may offer consumers superior technology or lower prices which may reduce the demand for our RealD 3D-enabled consumer electronic devices. As a result, our future prospects could be adversely affected if consumer electronics manufacturers choose not to use our 3D technologies in their devices.

Acquisition activities could result in operating difficulties, dilution to our stockholders and other harmful consequences.

We have built our business, in part, through acquisitions of intellectual property and other assets, including Stereographics in 2005 and ColorLink in 2007. We intend to selectively pursue strategic acquisitions in the future. Future acquisitions could divert management's time and focus from operating our business. In addition, integrating an acquired company, business or technology is risky and may result in unforeseen operating difficulties and expenditures. Foreign acquisitions also involve unique risks related to integration of operations across different cultures and languages, currency risks and the particular economic, political and regulatory risks associated with specific countries.

We may not accurately assess the value or prospects of acquisition candidates, and the anticipated benefits from our future acquisitions may not materialize. In addition, future acquisitions or dispositions could result in potentially dilutive issuances of our equity securities, including our common stock, the incurrence of additional debt, contingent liabilities or amortization expenses, or write-offs of goodwill, any of which could materially harm our financial condition.

Our growth may place a strain on our resources, and we may continue to borrow money as our business grows.

Edgar Filing: RealD Inc. - Form 10-Q

We have experienced significant growth since we acquired ColorLink in 2007. The growth that we have experienced in the past, as well as any further growth that we experience, may place a significant strain on our resources and increase demands on our management, our information and reporting systems and our internal controls over financial reporting. Upon becoming a public company in July 2010, we began incurring additional general and administrative expenses to comply with the U.S. Securities and Exchange Commission, or SEC, reporting requirements, the listing standards of the New York Stock Exchange, or NYSE, and provisions of the Sarbanes-Oxley Act of 2002 and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, and will continue to incur additional research and development expenses. If we are unable to manage our growth effectively while maintaining appropriate internal controls, we may experience operating inefficiencies that could increase our costs or otherwise materially and adversely affect our financial position. In addition, as our business grows, we may borrow money to fund various growth initiatives, including accelerated research and product development, acquisitions, capital expenditures or stock repurchases, which will result in debt service payment obligations and will require us to comply with certain financial and operating covenants. For example, we recently drew down \$25.0 million of the \$50.0 million available to us under our Credit Agreement. We may draw the remaining \$25.0 million under the Credit Agreement to fund growth initiatives and we may enter into new debt agreements or amend the Credit Agreement to increase the amount we may borrow. In the event we breach any of the covenants under the Credit Agreement or are unable to pay our obligations to City National or other lenders as they become due, we may be in default under the Credit Agreement which will have a material and adverse effect on our business, results of operations and financial condition.

Table of Contents

We face risks from doing business internationally that could harm our business, financial condition and results of operations.

We are dependent on international business for a portion of our total revenue. International gross revenue accounted for approximately 51% for the six months ended September 23, 2011, 55% in fiscal 2011, 46% in fiscal 2010 and 27% in fiscal 2009. We expect that our international business will continue to represent a significant portion of our total revenue for the foreseeable future. This future revenue will depend to a large extent on the continued use and expansion of our 3D technologies in the motion picture and consumer electronics industries worldwide. As a result, our business is subject to certain risks inherent in international business operations, many of which are beyond our control. These risks include:

- competitive and pricing pressures that vary from market-to-market and place-to-place;

- fluctuating foreign exchange rates;

- laws and policies affecting trade, investment and taxes, including laws and policies relating to customs, duties, the repatriation of funds and withholding taxes and changes in these laws and our compliance with the foregoing;

- changes in local regulatory requirements, including restrictions on content;

- differing cultural tastes and attitudes;

- differing degrees of protection for intellectual property;

- the need to adapt our business model to local requirements;

- the instability of foreign economies and governments; and

- political instability, natural disaster, war or acts of terrorism.

Edgar Filing: RealD Inc. - Form 10-Q

Events or developments related to these and other risks associated with our international business operations could adversely affect our revenue from such operations, which could have a material and adverse effect on our business, financial condition and results of operations.

Our operating results may fluctuate substantially from quarter to quarter, which may be different from analysts' expectations and adversely affect our stock price.

Our operating results may fluctuate from quarter to quarter. Factors that have affected our operating results in the past, and are likely to affect our operating results in the future, include, among other things:

- the timing of when a 3D motion picture is released which tends to be based on specific consumer entertainment dynamics, which results in seasonal patterns, with the largest number of motion pictures being released in summer and early winter;
- the rate of installations of new RealD Cinema Systems.
- the timing of expenses, including depreciation expense of our RealD Cinema Systems deployed at a motion picture exhibitor's premises, digital projector depreciation expenses, RealD eyewear costs (including shipping, handling and recycling costs), field service and support costs, and occupancy costs, which may increase significantly, even in quarters when we do not experience a similar growth in revenue;
- the timing and accuracy of license fee reports which often include positive or negative corrective or retroactive license fees that cover extended periods of time;
- competitive and pricing pressures that vary from market-to-market and place-to-place.

In addition, variances in our operating results from analysts' expectations could adversely affect our stock price. See also Management's discussion and analysis of financial condition and results of operations - Seasonality and Quarterly Performance.

Table of Contents

Our RealD eyewear may, in the future, be regulated by the Food and Drug Administration, or FDA, or by other state or foreign governmental or regulatory agencies, which could increase our costs and materially and adversely impact our profitability.

Currently, polarized 3D eyewear, including our RealD eyewear, is not regulated by the FDA, or by state or foreign governmental and regulatory agencies. However, certain eyewear, such as non-prescription reading glasses and sunglasses, are considered to be medical devices by the FDA and are subject to regulations imposed by the FDA and various state and foreign governmental and regulatory agencies. With the rising popularity of polarized 3D eyewear, there has been an increasing level of public scrutiny examining its potential health risks. Polarized 3D eyewear, including our RealD eyewear, may at some point be subject to federal, state or foreign regulations that could potentially restrict how our RealD eyewear is produced, used or marketed, and the cost of complying with those regulations may adversely affect our profitability.

If 3D viewing with active or passive eyewear is found to cause health risks or consumers believe that it does, demand for the 3D viewing experience may decrease or we may become subject to liability, any of which could adversely affect our results of operations, financial condition, business and prospects.

Research conducted by institutions unrelated to us has suggested that 3D viewing with active or passive eyewear may cause vision fatigue, eye strain, discomfort, headaches, motion sickness, dizziness, nausea, epileptic seizures, strokes, disorientation, perceptual after-effects, decreased postural stability or other health risks in some consumers. If these potential health risks are substantiated or consumers believe in their validity, demand for the 3D viewing experience in the theater, the home and elsewhere may decline. As a result, major motion picture studios and other content producers and distributors may refrain from developing 3D content, motion picture exhibitors may reduce the number of 3D-enabled screens (including RealD-enabled screens) they currently deploy or plan to deploy, or they may reduce the number of 3D motion pictures exhibited in their theaters, which would adversely affect our results of operations, financial condition and prospects. A decline in consumer demand may also lead consumer electronics manufacturers and content distributors to reduce or abandon the production of 3D products, which could adversely affect our prospects and financial condition.

In addition, if health risks associated with our RealD eyewear materialize, we may become subject to governmental regulation or product liability claims, including claims for personal injury. Successful assertion against us of one or a series of large claims could materially harm our business. Also, if our RealD eyewear is found to be defective, we may be required to recall it, which may result in substantial expense and adverse publicity that could adversely impact our sales, operating results and reputation. Potential product liability claims may exceed the amount of our insurance coverage or may be excluded under the terms of the policy, which could adversely affect our financial condition. In addition, we may also be required to pay higher premiums and accept higher deductibles in order to secure adequate insurance coverage in the future, which could materially and adversely affect our results of operations, financial condition and business. Even meritless product liability claims could be expensive to resolve and may divert our management's attention.

Our agreements with motion picture studios domestically and motion picture exhibitors internationally require us to manage the supply chain of our RealD eyewear, and any interruption to the supply chain for our RealD eyewear components could adversely affect our results of operations, financial condition, business and prospects.

Our RealD eyewear is an integral part of our RealD Cinema Systems. We have entered into non-exclusive agreements with several manufacturers to produce RealD eyewear. We manage manufacturing, distribution and recycling of RealD eyewear for motion picture studios and exhibitors worldwide. Domestically, we generally provide our RealD eyewear free of charge to motion picture exhibitors and then receive a fee from the motion picture studios for the usage of that RealD eyewear by the motion picture exhibitors' customers. Most international motion picture exhibitors and some domestic motion picture exhibitors purchase RealD eyewear directly from us and sell them to consumers as part of

their admission or as a concession item. Any interruption in the supply of RealD eyewear from manufacturers, increase in shipping cost, logistics or recycling interruption, other disruption to our global supply chain or competitive pricing pressures could adversely affect our results of operations, financial condition, business and prospects. For example, in connection with recent major 3D motion picture releases and increased consumer demand, we have in the past exhausted our inventory of RealD eyewear and incurred increased shipping costs to accelerate delivery.

Our RealD 3D eyewear business model in North America relies on fees from motion picture studios for the usage of RealD eyewear by motion picture exhibitors customers, the uncertainty and any potential dispute between motion picture studios and exhibitors could adversely affect our results of operations, financial condition, business and prospects.

Our RealD eyewear is an integral part of our RealD Cinema Systems. Domestically, we provide our RealD eyewear free of charge to motion picture exhibitors and then receive a fee from the motion picture studios for the usage of that RealD eyewear by the motion picture exhibitors customers. Most international motion picture exhibitors purchase RealD eyewear directly from us and sell them to customers as part of their admission or as a concession. We understand that at least one major motion picture studio is demanding a change to the 3D eyewear business model in North America to resemble the international model, and that May 2012 may be the timeline for the proposed change. While we support multiple business models for our RealD eyewear around the world, the

Table of Contents

uncertainty and any potential dispute between motion picture studios and exhibitors over the domestic eyewear business model could adversely affect our results of operations, financial condition, business and prospects.

Economic conditions beyond our control could reduce consumer demand for motion pictures and consumer electronics using our 3D technologies and, as a result, could materially and adversely affect our business, revenue and growth prospects.

The global economic environment since late 2008 has been volatile and continues to pose risks. The economy could remain significantly challenged for an indeterminate period of time. Present economic conditions could lead to a decrease in discretionary consumer spending, resulting in lower motion picture box office. In the event of declining box office revenue, motion picture studios may be less willing to release 3D motion pictures and motion picture exhibitors may be less willing to license our RealD Cinema Systems. Further, a decrease in discretionary consumer spending may adversely affect future demand for 3D consumer electronics products that may use our 3D technologies and consumer electronics manufacturers may decide to limit, delay or cease their use of our 3D technologies, any of which could cause our business, revenue and growth prospects to suffer.

The loss of members of our management or research and development teams could substantially disrupt our business operations.

Our success depends to a significant degree upon the continued individual and collective contributions of our management and research and development teams. A limited number of individuals have primary responsibility for managing our business, including our relationships with motion picture studios and exhibitors and consumer electronics manufacturers and the research and development of our 3D technologies. The loss of any of these individuals, including Michael V. Lewis, our Chairman and Chief Executive Officer, or our failure to attract and retain other qualified and experienced personnel on acceptable terms, could impair our ability to sustain and grow our business. In addition, because we operate in a highly competitive industry, our hiring of qualified executives, scientists, engineers or other personnel may cause us or those persons to be subject to lawsuits alleging misappropriation of trade secrets, improper solicitation of employees, breach of contract or other claims.

Our ability to use our net operating loss carryforwards could be subject to additional limitation if our ownership has changed or will change by more than 50%, which could potentially result in increased future tax liability.

While currently subject to a full valuation allowance for purposes of preparing our consolidated financial statements (see the discussion above under the heading "Management's discussion and analysis of financial condition and results of operations - Critical accounting policies and estimates - Deferred tax asset valuation and tax exposures"), we intend to use our U.S. net operating loss carryforwards to reduce any future U.S. corporate income tax liability associated with our operations. Section 382 of the U.S. Internal Revenue Code of 1986, as amended, generally imposes an annual limitation on the amount of net operating loss carryforwards that may be used to offset taxable income when a corporation has undergone significant changes in stock ownership. We have not determined whether such ownership change has previously occurred. It is possible that our initial public offering, or IPO, either on a standalone basis or when combined with past or future transactions (including, but not limited to, significant increases during the applicable testing period in the percentage of our stock owned directly or constructively by (i) any stockholder who owns 5% or more of our stock or (ii) some or all of the group of stockholders who individually own less than 5% of our stock), will cause us to undergo one or more ownership changes. In that event, our ability to use our net operating loss carryforwards could be adversely affected. To the extent our use of net operating loss carryforwards is significantly limited under the rules of Section 382 (as a result of our IPO or otherwise), our income could be subject to U.S. corporate income tax earlier than it would if we were able to use net operating loss carryforwards, which could result in lower profits.

Risks related to owning our common stock

The price of our common stock may fluctuate significantly, and you could lose all or part of your investment.

Shares of our common stock were sold in our IPO in July 2010 at a price of \$16.00 per share, and, as of October 28, 2011, our common stock has subsequently traded as high as \$35.60 and as low as \$8.74. An active, liquid and orderly market for our common stock may not be sustained, which could depress the trading price of our common stock.

Volatility in the market price of our common stock may prevent you from being able to sell your shares at or above the price you paid for your shares or at all. The market price of our common stock could fluctuate significantly for various reasons, which include:

- our quarterly or annual earnings or those of our competitors;
- the public's reaction to our press releases, our other public announcements and our filings with the SEC;
- changes in earnings estimates or recommendations by research analysts who track our common stock or the stock of our competitors;

Table of Contents

- new laws or regulations or new interpretations of laws or regulations applicable to our business;
- changes in accounting standards, policies, guidance, interpretations or principles;
- changes in general conditions in the domestic and global economies or financial markets, including those resulting from war, incidents of terrorism or responses to such events;
- litigation involving our company or investigations or audits by regulators into the operations of our company or our competitors;
- strategic action by our competitors; and
- sales of common stock by our directors, executive officers and significant stockholders.

In addition, the stock market in general, and the market for technology and media companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may seriously affect the market price of our common stock, regardless of actual operating performance. In addition, in the past, following periods of volatility in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. If litigation is instituted against us, it could result in substantial costs and a diversion of our management's attention and resources even if such litigation is without merit.

Sales of outstanding shares of our common stock (or shares of our common stock issued upon exercise of stock options) into the market in the future could cause the market price of our stock to drop significantly, even if our business is doing well.

As of October 28, 2011, we had 54,449,804 shares of common stock outstanding which are freely tradable, subject to prior registration or qualification for an exemption from registration, including, in the case of shares held by affiliates, compliance with the volume, manner of sale, notice and availability of public information provisions of Rule 144 under the Securities Act of 1933, as amended, or the Securities Act. Our co-founders and certain other pre-IPO stockholders also have registration rights which enable them to cause us to register for sale shares held by them in the public markets. If our existing security holders sell, or indicate an intention to sell, substantial amounts of our common stock in the public market, the trading price of our common stock could decline.

In addition, as of September 23, 2011, there are 8,386,885 shares underlying options and restricted stock that were issued and outstanding, and we have an aggregate of 607,581 shares of common stock reserved for future issuance under our equity incentive plan. These shares will become eligible for sale in the public market to the extent permitted by the provisions of various option and warrant agreements, maintenance of

Edgar Filing: RealD Inc. - Form 10-Q

applicable registration statements and Rules 144 and 701 under the Securities Act. If additional shares are sold, or if it is perceived that they will be sold in the public market, the trading price of our stock could decline.

Our co-founders, directors, executive officers and principal stockholders have substantial control over us and could delay or prevent a change in corporate control.

As of September 23, 2011, our directors and executive officers, together with their affiliates, beneficially owned approximately 19.19% of our outstanding common stock. Of this 19.19%, approximately 9.63% was beneficially owned by Michael V. Lewis, our chairman and chief executive officer, and approximately 9.32% was beneficially owned by Joshua Greer, our co-founder and member of our board of directors.

These stockholders, acting together, have the ability to control, or have significant influence over, the outcome of matters submitted to our stockholders for approval, including the election of directors and any merger, consolidation or sale of all or substantially all of our assets. In addition, these stockholders, acting together, have the ability to control, or have significant influence over, the management and affairs of our company. Accordingly, this concentration of ownership might harm the market price of our common stock by:

- delaying, deferring or preventing a change in corporate control;
- impeding a merger, consolidation, takeover or other business combination involving us; or
- discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control of us.

Table of Contents

As a public company, we are required to assess our internal control over financial reporting on an annual basis, and any future adverse results from such assessment could result in a loss of investor confidence in our financial reports and have an adverse effect on our stock price.

As a public company, the Sarbanes-Oxley Act requires, among other things, that we maintain effective internal control over financial reporting and disclosure controls and procedures. In particular, we need to perform system and process evaluation and testing of our internal control over financial reporting to allow management and our independent registered public accounting firm to report on the effectiveness of our internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act. Our testing, or the subsequent testing by our independent registered public accounting firm, may reveal deficiencies in our internal control over financial reporting that are deemed to be material weaknesses. Our compliance with Section 404 requires that we expend significant management time on compliance-related issues. Moreover, if we are not able to comply with the requirements of Section 404 in a timely manner, or if we or our independent registered public accounting firm identify deficiencies in our internal control over financial reporting that are deemed to be material weaknesses, the market price of our common stock could decline and we could be subject to sanctions or investigations by the SEC or other regulatory authorities, which could require additional financial and management resources.

Our internal control over financial reporting does not currently meet the standards set forth in Internal Control Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The adequacy of our internal control over financial reporting must be assessed by our management for each fiscal year. We do not currently have comprehensive documentation of our internal control over financial reporting, nor do we document or test our compliance with these controls on a periodic basis in accordance with Section 404 of the Sarbanes-Oxley Act, with which we must come into compliance before filing our Annual Report on Form 10-K for the fiscal year ending March 23, 2012.

Your percentage ownership in us may be diluted by future issuances of capital stock, which could reduce your influence over matters on which stockholders vote.

Our board of directors has the authority, without action or vote of our stockholders, to issue all or any part of our authorized but unissued shares of common stock, including shares issuable upon the exercise of options, shares that may be issued to satisfy our obligations under our equity incentive plans, shares that may be issued in connection with our acquisition of other companies, assets or technology, or shares of our authorized but unissued preferred stock. Issuances of common stock or preferred voting stock could reduce your influence over matters on which our stockholders vote and, in the case of issuances of preferred stock, likely could result in your interest in us being subject to the prior rights of holders of that preferred stock. In addition, any future issuance of capital stock by us will dilute your economic interest in our company.

We currently do not intend to pay dividends on our common stock and, consequently, your only opportunity to achieve a return on your investment is if the price of our common stock appreciates.

We do not expect to pay dividends on shares of our common stock in the foreseeable future, and we intend to use cash generated from operations to continue to grow our business. Consequently, your only opportunity to achieve a positive return on your investment in us will be if the market price of our common stock appreciates.

If securities or industry analysts cease to publish research or publish inaccurate or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. If one or more of the analysts who cover us downgrade our stock or publish inaccurate or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, demand for our stock could decrease, which might cause our stock price and trading volume to decline.

Provisions in our certificate of incorporation and bylaws and Delaware law may discourage, delay or prevent a change of control of our company or changes in our management and, therefore, may depress the trading price of our stock.

Our certificate of incorporation and bylaws contain provisions that could depress the trading price of our stock by acting to discourage, delay or prevent a change of control of our company or changes in our management that some of the stockholders of our company may deem advantageous. Some of these provisions:

- authorize the issuance of blank check preferred stock that our board of directors could issue to increase the number of outstanding shares to discourage a takeover attempt;

Table of Contents

- provide for a classified board of directors (three classes) where only one-third of our board of directors is up for re-election at the annual stockholders meeting each year;
- provide that stockholders may only remove directors for cause
- provide that stockholders may only remove directors prior to the expiration of their term upon a supermajority vote of at least 80% of our outstanding common stock;
- provide that any vacancy on our board of directors, including a vacancy resulting from an increase in the size of the board, may only be filled by the affirmative vote of a majority of our directors then in office, even if less than a quorum;
- provide that a special meeting of stockholders may only be called by our board of directors or by our chief executive officer;
- provide that action by written consent of the stockholders may be taken only if the board of directors first approves such action; provided that, notwithstanding the foregoing, we will hold an annual meeting of stockholders in accordance with NYSE rules, for so long as our shares are listed on NYSE, and as otherwise required by the bylaws;
- provide that the board of directors is expressly authorized to make, alter or repeal our bylaws; and
- establish advance notice requirements for nominations for elections to our board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings.

We may also adopt a poison pill stockholder rights plan at any time in response to a potentially hostile bid or for any or no reason due to our available blank check preferred stock. Additionally, we are subject to Section 203 of the Delaware General Corporation Law, which generally prohibits a Delaware corporation from engaging in any of a broad range of business combinations with any interested stockholder for a period of three years following the date on which the stockholder became an interested stockholder.
