#### Note 1. Valuation and Investment Practices

*Portfolio Valuation:* The net asset value of the Fund s common shares is determined by the Fund s co-administrator no less frequently than on the last business day of each week and month. It is determined by dividing the value of the Fund s net assets attributable to common stock by the number of common shares outstanding. The value of the Fund s net assets attributable to common shares is deemed to equal the value of the Fund s total assets less (i) the Fund s liabilities and (ii) the aggregate liquidation value of the outstanding Taxable Auction Market Preferred Stock. Securities listed on a national securities exchange are valued on the basis of the last sale on such exchange or the NASDAQ Official Close Price on the day of valuation. In the absence of sales of listed securities and with respect to securities for which the most recent sale prices are not deemed to represent fair market value, and unlisted securities (other than money market instruments), securities are valued at the mean between the closing bid and asked prices, or based on a matrix system which utilizes information (such as credit ratings, yields and maturities) from independent sources. Investments for which market quotations are not readily available or do not otherwise accurately reflect the fair value of the investment are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund, including reference to valuations of other securities which are considered comparable in quality, maturity and type. Investments in money market instruments, which mature in 60 days or less at the time of purchase, are valued at amortized cost.

The Fund has adopted the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC), issued in June 2009. The Fund follows the provisions of ASC 820, Fair Value Measurements and Disclosures (ASC 820). In accordance with ASC 820, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. Under certain circumstances, fair value may equal the mean between the bid and asked prices. ASC 820 established a three tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity. Unobservable inputs are inputs that reflect the assumptions about the asset or liability developed based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

• Level 1 quoted prices in active markets for identical investments

• Level 2 significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

• Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The valuation techniques used by the Fund to measure fair value during the three months ended February 28, 2010 maximized the use of observable inputs and minimized the use of unobservable inputs. The Fund utilized the following fair value techniques: discounted future cash flow models, weighted average of last available trade prices, multi-dimensional relational pricing model, and underlying security.

The following is a summary of the inputs used as of February 28, 2010 in valuing the Fund s investments carried at fair value:

Investments in Securities at Value	Level 1 - Quoted Prices	Level 2 - Significant Observable Inputs	Level 3 - Significant Unobservable Inputs	Total
Domestic Common Stocks	\$ 133,948,095	\$ 	\$ •	\$ 133,948,095
Foreign Common Stocks	26,361,249		259	26,361,508
Auction Preferred Securities		8,145,000		8,145,000
Foreign Government Bonds		2,672,476		2,672,476
Limited Partnerships			6,318,045	6,318,045
Short Term Investments - Domestic

Total	\$ 189,442,792	\$ 10,817,476	\$ 6,318,304	\$ 206,578,572

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:

Investments in Securities at Value	Balance as ? 11/30/2009	<b>Realized</b> gain/(loss)	u	Change in nrealized preciation	Net purchases/ (sales)	Transfer in and/or out of Level 3	Salance as of 2/28/2010
Foreign Common Stocks	\$ 243		\$	16			\$ 259
Limited Partnerships	6,213,812			104,233			6,318,045
Total	\$ 6,214,055	\$	\$	104,249	\$	\$	\$ 6,318,304

*Foreign Securities*: The Fund may invest a portion of its assets in foreign securities. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks. The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate prevailing at the end of the period, and purchases and sales of investment securities, income and expenses transacted in foreign currencies are translated at the exchange rate on the dates of such transactions.

*Use of Estimates*: The preparation of financial statements is in accordance with generally accepted accounting principles in the United States of America, which requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

### Note 2. Unrealized Appreciation/ (Depreciation)

On February 28, 2010, based on cost of \$174,452,997 for federal income tax purposes, aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$36,001,067 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$3,875,492, resulting in net unrealized appreciation of \$32,125,575.

Note 3. Recently Issued Accounting Pronouncements

In January 2010, the FASB issued Accounting Standards Update Improving Disclosures about Fair Value Measurements that requires additional disclosures regarding fair value measurements. Certain required disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, and other required disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Management is currently evaluating the impact it will have on its financial statement disclosures.

#### Item 2 - Controls and Procedures.

(a) The Registrant's Principal Executive Officer and Principal Financial Officer concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940 17 CFR 270.300-3(c)) were effective as of a date within 90 days of the filing date of this report (the Evaluation Date ), based on their evaluation of the effectiveness of the Registrant's disclosure controls and procedures as of the Evaluation Date.

(b) There were no changes in the Registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940 Act (17 CFR 270.30a-3(d)) that occurred during the Registrant s last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant s internal control over financial reporting.
