Forward-Looking Statements

This report contains statements about expected future events and financial results that are forward-looking and subject to risks and uncertainties. Actual results could differ materially from those predicted in such forward-looking statements. Factors which may cause actual results to differ materially from those discussed herein include those risk factors set forth in our most recent Annual Report on Form 20-F filed with the Securities and Exchange Commission. CEMIG undertakes no obligation to revise these forward-looking statements to reflect events or circumstances after the date hereof, and claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

BOARD OF DIRECTORS

SUMMARY OF MINUTES OF THE 535TH MEETING

Date, time and place: May 17, 2012 at 4 p.m. at the company's head office,
Av. Barbacena 1200, 21th Floor, Belo Horizonte, Minas Gerais, Brazil.

Meeting Committee: Chairs: Dorothea Fonseca Furquim Werneck,
Guy Maria Villela Paschoal;
Secretary: Anamaria Pugedo Frade Barros

Summary of proceedings:

I **Conflict of interest:** The Chair asked the Board Members present whether any of them had conflict of interest in relation to the matters on the agenda, and all stated there was no such conflict of interest, except:

- the Board member Christiano Miguel Moisés, who said he had conflict of interest in the matter of the transfer of the holdings of Cemig and Cemig GT in the companies of the TBE Group to Transmissora Aliança de Energia Elétrica S.A. - Taesa;

- and the Board members

Dorothea Fonseca Furquim Werneck,	João Camilo Penna,
Djalma Bastos de Moraes,	Maria Estela Kubitschek Lopes,
Antônio Adriano Silva,	Fernando Henrique Schüffner Neto,
Arcângelo Eustáquio Torres Queiroz,	Lauro Sérgio Vasconcelos David, and
Francelino Pereira dos Santos,	Paulo Sérgio Machado Ribeiro,

who said they had conflict of interest in the matter of signature, with the State of Minas Gerais, and with the Cemig Receivables Investment Fund (the Cemig FIDC) of the Term of Agreement and Full Settlement of the CRC Account Balance (the CRC Contract Settlement Agreement).

II Scrutiny: The Chair reported that the Strategy Committee of the Board of Directors had examined all the matters on the agenda, and recommended approval of all of them.

III The Board approved:

a) The proposal of the Board member Saulo Alves Pereira Junior to elect Ms. Dorothea Fonseca Furquim Werneck as Chair of the Board, and Mr. Djalma Bastos de Moraes as Vice-chair, for two years, that is to say, until the first meeting of the Board of Directors after the Annual General Meeting of 2014.

Av. Barbacena 1200 Santo Agostinho 30190-131 Belo Horizonte, MG Brazil Tel.: +55 31 3506-5024 Fax +55 31 3506-5025

This text is a translation, provided for information only. The original text in Portuguese is the legally valid version.

b) The proposal of the Chair to elect the following persons to the following positions as members of the Executive Board, with a period of office of three years, that is to say, up to the first meeting of the Board of Directors held after the Annual General Meeting of 2015:

Chief Executive Officer:	Djalma Bastos de Morais;
Deputy CEO:	Arlindo Porto Neto;
Chief Trading Officer:	José Raimundo Dias Fonseca;
Chief Distribution and Sales Officer:	José Carlos de Mattos;
Finance and Investor Relations Officer:	Luiz Fernando Rolla;
Chief Generation and Transmission Officer:	Luiz Henrique de Castro Carvalho;
Chief Corporate Management Officer:	Frederico Pacheco de Medeiros;
Chief Business Development Officer:	Fernando Henrique Schüffner Neto;
Chief Officer for the Gas Division:	Fuad Jorge Noman Filho;
Chief Counsel:	Maria Celeste Morais Guimarães;
Chief Institutional Relations and Communication Officer:	Luiz Henrique Michalick.

c) The minutes of this meeting.

IV The Board authorized:

a) Signature of the Private Contract for Investment in Transmission Assets under which the minority equity interests held by Cemig and Cemig GT in the share capital of the following holders of public electricity service concessions (the companies of the TBE Group) will be transferred to Transmissora Aliança de Energia Elétrica S.A. Taesa:

Empresa Catarinense de Transmissão de Energia S.A.	ECTE,
Empresa Regional de Transmissão de Energia S.A.	ERTE,
Empresa Norte de Transmissão de Energia S.A.	ENTE,
Empresa Paranaense de Transmissão de Energia S.A.	ETEP,
Empresa Amazonense de Transmissão de Energia S.A.	EATE, and
Empresa Brasileira de Transmissão de Energia S.A.	EBTE.

Within the scope of this transaction (the Stockholding Restructuring), **Taesa** will disburse

- one billion seven hundred thirty two million Reais,

adjusted by the CDI rate from December 31, 2011, less any dividends and/or Interest on Equity declared, whether paid or not, as follows:

- one billion six hundred sixty seven million eight hundred ninety five thousand Reais to **Cemig**; and
- sixty four million one hundred five thousand Reais to **Cemig GT**.

The amount involved was agreed by the companies based on technical evaluations contracted from independent external valuers. The Stockholding Restructuring has been previously submitted to the Board of Directors of Taesa for their approval, and is further subject to approval by the General Meeting of Stockholders of that company. In accordance with Article 155 of the Corporate Law, both Cemig GT, and those members of the Board of Directors of Taesa nominated by it, did not take part in, and will not take part in, any decision on this matter.

The Stockholding Restructuring is in accordance with Cemig's strategic planning, which aims to consolidate the Company's holdings in electricity transmission companies in a single corporate vehicle, and also to optimize assessment of opportunities in future auctions of transmission lines and acquisition of assets in operation, in such a way as to add greater value for stockholders.

With the implementation of the Stockholding Restructuring, Taesa will have an interest in 9,378 km of transmission lines, resulting in an addition of 3,127 km, strengthening its capacity for generation of cash and profits for stockholders. The Stockholding Restructuring will be submitted for approval to the Brazilian antitrust bodies, including CADE (*Conselho Administrativo de Defesa Econômica*) in the form and within the period specified by the respective legislation; and its

Av. Barbacena 1200 Santo Agostinho 30190-131 Belo Horizonte, MG Brazil Tel.: +55 31 3506-5024 Fax +55 31 3506-5025

This text is a translation, provided for information only. The original text in Portuguese is the legally valid version.

conclusion will be subject to obtaining of the relevant prior approvals, which include the consent of the Brazilian National Electricity Agency, Aneel, and of the financing banks, in particular the Brazilian Development Bank (BNDES).

The above named companies have informed the public that implementation of the Stockholding Restructuring will not give the stockholders of Taesa the right to withdraw.

b) Signature, with the State of Minas Gerais and with the Cemig CRC Account Receivables Investment Fund (*Fundo de Investimento em Direitos Creditórios Conta CRC* the Cemig FIDC) of the Term of Agreement and Full Settlement of the CRC Account Balance (the **CRC Contract Settlement Agreement**), which provides for early payment by the State of Minas Gerais of the amount of the debt arising from the **CRC Agreement** (*Termo de Contrato de Cessão de Crédito do Saldo Remanescente da Conta de Resultados a Compensar* CRC), as amended by its five amendments.

The general terms of the **CRC Contract Settlement Agreement** provide for a discount of 35% to be applied to the updated amount of the debtor balance.

For the **CRC Contract Settlement Agreement** to be entered into, the FIDC will require authorization by a General Meeting of its Unit Holders. The Company will take part in this meeting, because it is a holder of subordinated units in that Fund. Once the total early settlement has been made, the senior units of the FIDC will be redeemed in full and the Stockholders' equity of the Fund will be linked to the subordinated units, owned by the Company, which will be able to redeem them.

V Conflict of interest: The Board member Christiano Miguel Moisés withdrew from the meeting room at the time of the debate on the transfer of the holdings of Cemig and Cemig GT in the companies of the TBE Group to Transmissora Aliança de Energia Elétrica S.A. Taesa, since he believed there was a conflict of interest in the matter, returning to the meeting room only after decision on that matter by the other Board members.

VI Conflict of interest: The Board members:

Dorothea Fonseca Furquim Werneck,	João Camilo Penna,
Djalma Bastos de Moraes,	Maria Estela Kubitschek Lopes,
Antônio Adriano Silva,	Fernando Henrique Schüffner Neto,
Arcângelo Eustáquio Torres Queiroz,	Lauro Sérgio Vasconcelos David, and

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Francelino Pereira dos Santos,

Paulo Sérgio Machado Ribeiro

withdrew from the meeting room at the time of discussion of the item relating to the signature, with the State of Minas Gerais and with the Cemig FIDC, of the CRC Contract Settlement Agreement, because they believed there was conflict of interest on the matter, and returned to the meeting room only after the decision on the subject by the other Board members.

The following were present:

Board members:	Dorothea Fonseca Furquim Werneck,	Saulo Alves Pereira Junior,
	Djalma Bastos de Moraes,	Paulo Márcio de Oliveira Monteiro,
	Antônio Adriano Silva,	Newton Brandão Ferraz Ramos,
	Arcângelo Eustáquio Torres Queiroz,	Tarcísio Augusto Carneiro,
	Francelino Pereira dos Santos,	Bruno Magalhães Menicucci,
	Guy Maria Villela Paschoal,	Christiano Miguel Moisés,
	João Camilo Penna,	Fernando Henrique Schüffner Neto,
	Maria Estela Kubitschek Lopes,	José Augusto Gomes Campos,
	Paulo Roberto Reckziegel Guedes,	Lauro Sérgio Vasconcelos David,
	Paulo Sérgio Machado Ribeiro.	
Secretary:	Anamaria Pugedo Frade Barros

6. Summary of Minutes of the 536th Meeting of the Board of Directors, May 24, 2012

COMPANHIA ENERGÉTICA DE MINAS GERAIS CEMIG

LISTED COMPANY

CNPJ 17.155.730/0001-64 NIRE 31300040127

BOARD OF DIRECTORS

SUMMARY OF MINUTES

OF THE 536TH MEETING

Date, time and place: May 24, 2012 at 1.30 p.m., at the Company's head office,
Av. Barbacena 1200, 21st Floor, Belo Horizonte, Minas Gerais, Brazil.

Meeting Committee: Chair: Dorothea Fonseca Furquim Werneck;
Secretary: Anamaria Pugedo Frade Barros.

Summary of proceedings:

I Conflict of interest: The Chair asked the Board members present whether they had any conflict of interest in the matters on the agenda of this meeting, and all said there was no such conflict of interest.

II The Board approved the minutes of this meeting.

III The Board authorized:

a) Signature by the Company, as **guarantor**, of the First Amendment to the Financing Line Agreement for Contracted Onlending with the Brazilian Development Bank (BNDES) between **Norte Energia S.A.** and the Federal Savings Bank (CEF), to change the end of the grace period from June 15 to October 15, 2012, and the period of maturity (amortization) and of concession of a proportional non-joint corporate guarantee related to the obligations of Norte Energia S.A., limited to 7.28% of the amount of the Onlending Contract, from July 15 to November 16, 2012 or until the date of the first disbursement of the credit to be opened by the BNDES for Norte Energia S.A. through a Long-term Financing Agreement, whichever is the earlier.

b) Provision of a **surety guarantee** by the Company in the contracting by Cemig Distribuição S.A. **Cemig D** with **Banco do Brasil S.A.** of a loan transaction under a Bank Lending Note (*Cédula de Crédito Bancário*), on the following terms:

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Amount: R\$ 200 million.
 Tenor: Five years.
 Financial charges: 108.33% of the CDI (Interbank CD) rate, charged annually, with no grace period.
 Amortization of principal: In three annual payments, after a grace period of two years.
 Additional costs: the IOF Tax on Financial Transactions;
 the additional IOF tax (0.0041%/day, limited to 365 days, plus additional 0.38% flat rate, as per the current legislation); and
 structuring fee of 0.15% on the amount released, paid on release of the funds.
 Guarantee: Surety guarantee from Companhia Energética de Minas Gerais Cemig (which has the function of holding company).

IV Discussion: The Chair made comments on a matter of interest to the Company.

The following were present:

Board members:	Dorothea Fonseca Furquim Werneck,	Fernando Henrique Schüffner Neto,
	Djalma Bastos de Morais	Franklin Moreira Gonçalves,
	Antônio Adriano Silva,	Newton Brandão Ferraz Ramos,

7. Summary of Minutes of the 537th Meeting of the Board of Directors, May 24, 2012

COMPANHIA ENERGÉTICA DE MINAS GERAIS CEMIG

LISTED COMPANY

CNPJ 17.155.730/0001-64 NIRE 31300040127

BOARD OF DIRECTORS

SUMMARY OF MINUTES

OF THE 537TH MEETING

Date, time and place: May 24, 2012 at 3.40 p.m. at the company's head office,
Av. Barbacena 1200, 21th Floor, Belo Horizonte, Minas Gerais, Brazil.

Meeting Committee: Chairman: Dorothea Fonseca Furquim Werneck;
Secretary: Anamaria Pugedo Frade Barros

Summary of proceedings:

I Conflict of interest: The Chair asked the Board members present whether they had any conflict of interest in the matters on the agenda of this meeting, and all said there was no such conflict of interest, except the Board members

Eduardo Borges de Andrade,	Paulo Roberto Reckziegel Guedes,
Saulo Alves Pereira Junior,	Newton Brandão Ferraz Ramos,
Bruno Magalhães Menicucci,	José Augusto Gomes Campos and
Tarcísio Augusto Carneiro,	

who stated that they had conflict of interest in relation to the replacement of CPFL Energia S.A. by CPFL Geração de Energia S.A. in the consortium that will take part in the contracting of electricity generated by the São Manoel Hydroelectric Plant.

II The Board approved:

a) The proposal by Board member Lauro Sérgio Vasconcelos David that the members of the Board of Directors should authorize their Chairman to call an Extraordinary General Meeting of Stockholders to be held on June 19, 2012, at 2.30 p.m.; and in the event of there not being a quorum, to make second convocation within the legal period, to decide on the matter in Item IV, below.

b) The proposal by the Chair to change the composition of the following committees:

- the Board of Directors Support Committee;
- the Human Resources Committee;
- the Strategy Committee;
- the Business Development and Subsidiaries and Affiliates Committee; and
- the Finance, Audit and Risks Committee.

c) the minutes of this meeting.

III The Board authorized signature of a Real Estate Rental Agreement with Companhia de Gás de Minas Gerais **Gasmig**, for the property at Rua Dr. José Américo Cançado Bahia, 1009, Cidade Industrial, Contagem, Minas Gerais, for sixty months, able to be extended for the same period by signature of an amendment.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Av. Barbacena 1200 Santo Agostinho 30190-131 Belo Horizonte, MG Brazil Tel.: +55 31 3506-5024 Fax +55 31 3506-5025

This text is a translation, provided for information only. The original text in Portuguese is the legally valid version.

IV The Board submitted to the Extraordinary General Meeting of Stockholders, for approval, the ratification of the Company having, in 2011, exceeded the limits specified in subclauses b and d of Paragraph 7 of Article 11 of the by-laws, corresponding to:

the consolidated ratio {Net debt/(Net debt + Stockholders equity)} being 52.4%; and

the consolidated amount of funds destined to capital expenditure and the acquisition of any assets of the Company being 71.7% of the Company's Ebitda (Earnings before interest, taxes, depreciation and amortization).

V The Board ratified the following target, mentioned in Paragraph 7 of Clause 11 of the Bylaws, having been exceeded in 2011, the provisions of Paragraph 9 of that Clause being complied with:

the Company's consolidated debt being less than or equal to 2.41 times the company's Ebitda (Earnings before interest, taxes, depreciation and amortization).

VI The Board ratified Board Spending Decision (CRCA) 020/2012, to replace CPFL Energia S.A. by CPFL Geração de Energia S.A. as a participant in the Consortium to be constituted with Cemig GT, to take part in the Aneel Auction, and as the case may be to receive the Concession, for the São Manoel Hydroelectric Plant, the other terms of that CRCA remaining unchanged.

VII Withdrawn from the Agenda: The item relating to contracting of group life insurance was withdrawn from the agenda.

VIII Conflict of interest: the Board members

Eduardo Borges de Andrade,	Paulo Roberto Reckziegel Guedes,
Saulo Alves Pereira Junior,	Newton Brandão Ferraz Ramos,
Bruno Magalhães Menicucci,	José Augusto Gomes Campos and
Tarcísio Augusto Carneiro	

withdrew from the meeting room during the discussion of the matter relating to the replacement of CPFL Energia S.A. by CPFL Geração de Energia S.A. in the Consortium related to the São Manoel Hydroelectric Plant, referred to in Item VI above, because they believed there was conflict of interest on the matter, and returned only after the decision on the subject by the other Board members.

IX The following spoke on matters of interest to the Company:

Board members:		
General managers:	Leonardo George de Magalhães,	Emilio Castelar Piris Pereira;
Manager:	Arthur Saraiva Sette e Camara.	

The following were present:

Board members:	Dorothea Fonseca Furquim Werneck, Djalma Bastos de Morais, Antônio Adriano Silva, Eduardo Borges de Andrade, Guy Maria Villela Paschoal, João Camilo Penna, Paulo Roberto Reckziegel Guedes, Saulo Alves Pereira Junior, Adriano Magalhães Chaves,	Fernando Henrique Schüffner Neto, Franklin Moreira Gonçalves, Newton Brandão Ferraz Ramos, Bruno Magalhães Menicucci, Christiano Miguel Moisés, José Augusto Gomes Campos, Lauro Sérgio Vasconcelos David, Paulo Sérgio Machado Ribeiro, Tarcísio Augusto Carneiro;
General managers:	Leonardo George de Magalhães,	Emilio Castelar Piris Pereira;
Manager:	Arthur Saraiva Sette e Camara;	
Secretary:	Anamaria Pugedo Frade Barros.	

Av. Barbacena 1200 Santo Agostinho 30190-131 Belo Horizonte, MG Brazil Tel.: +55 31 3506-5024 Fax +55 31 3506-5025

8. Convocation to the Extraordinary General Meeting of Stockholders to be held on June 19, 2012

COMPANHIA ENERGÉTICA DE MINAS GERAIS CEMIG

LISTED COMPANY

CNPJ 17.155.730/0001-64 NIRE 31300040127

EXTRAORDINARY GENERAL MEETING OF STOCKHOLDERS

CONVOCATION

Stockholders are hereby called to an Extraordinary General Meeting of Stockholders to be held on June 19, 2012 at 2.30 p.m. at the company's head office, Av. Barbacena 1200, 21st floor, in the city of Belo Horizonte, Minas Gerais, Brazil, to decide on the following:

Ratification of the Company having, in 2011, exceeded the limits specified in subclauses b and d of Paragraph 7 of Article 11 of the by-laws for the consolidated ratio {Net debt/(Net debt + Stockholders' equity)}, and for the consolidated amount of funds destined to capital expenditure and acquisition of any assets of the Company.

Any stockholder who wishes to be represented by proxy at the said General Meeting of Stockholders should obey the terms of Article 126 of Law 6406 of 1976, as amended, and of the sole paragraph of Clause 9 of the Company's by-laws, by exhibiting at the time, or depositing, preferably by June 14, 2012, proofs of ownership of the shares, issued by a depositary financial institution, and a power of attorney with specific powers, at Cemig's Corporate Executive Secretariat Office (*Superintendência da Secretaria Geral e Executiva Empresarial*) at Av. Barbacena, 1200 - 19th Floor, B1 Wing, Belo Horizonte, Minas Gerais.

Belo Horizonte, May 24, 2012.

Dorothea Fonseca Furquim Werneck

Chair of the Board of Directors

Av. Barbacena 1200 - Santo Agostinho - 30190-131 Belo Horizonte, MG - Brazil - Tel.: +55 31 3506-5024 - Fax +55 31 3506-5025

9. Proposal by the Board of Directors to the Extraordinary General Meeting of Stockholders to be held on June 19, 2012

PROPOSAL
BY THE BOARD OF DIRECTORS
TO THE EXTRAORDINARY GENERAL MEETING OF STOCKHOLDERS
TO BE HELD ON JUNE 19, 2012.

Dear Stockholders:

The Board of Directors of Companhia Energética de Minas Gerais (Cemig),

WHEREAS:

a) Paragraph 7 of Clause 11 of the by-laws specifies that in managing the Company and in exercising the right to vote in subsidiaries, affiliated companies and consortia, the Board of Directors and the Executive Board shall faithfully obey and comply with certain targets, including:

(subclause b): limiting the consolidated ratio $\{\text{Net debt} / (\text{Net debt} + \text{Stockholders equity})\}$ to 40%; and

(subclause d): limiting the consolidated amount of funds destined to capital expenditure and the acquisition of any assets, in each business year, to 40% of the Company's Ebitda (Earnings before interest, taxes, depreciation and amortization);

b) Paragraph 9 of Article 11 of the by-laws states that such target may be exceeded for reasons related to temporarily prevailing conditions, upon justification by grounds and prior specific approval by the Board of Directors, subject to a limit of 50% for the consolidated ratio $\{\text{Net debt} / (\text{Net debt} + \text{Stockholders equity})\}$;

c) at the end of 2011, the consolidated $\{(Net\ debt) / (Net\ debt\ plus\ stockholders\ equity)\}$ was 52.4%; and the consolidated amount of funds allocated to capital expenditure and to the acquisition of any assets was 71.7% of the company's Ebitda;

d) this exceeding of the limit arose principally from the increase in debt, of R\$ 3.8 billion, to effect the Company's Investment Program in the year 2011, significant elements being acquisition of an interest in the assets of the Abengoa group, in the amount of R\$ 1.2 billion, and investments, also of R\$ 1.2 billion, in the concession of Cemig Distribuição S.A.;

now proposes to you:

Ratification of the Company having exceeded, in 2011, the limits specified in subclauses b and d of Paragraph 7 of Article 11 of the by-laws, to the extent of: the consolidated ratio $\{Net\ debt/(Net\ debt + Stockholders\ equity)\}$ being 52.4%; and the consolidated amount of funds destined to capital expenditure and acquisition of any assets of the Company being equivalent to 71.7% of the Company's Ebitda (Earnings before interest, taxes, depreciation and amortization).

As can be seen, the objective of this proposal is to meet legitimate interests of the stockholders and of the Company, and as a result it is the hope of the Board of Directors that you, the stockholders, will approve it.

10. Market Announcement Reply to CVM Inquiry, June 1, 2012

COMPANHIA ENERGÉTICA DE MINAS GERAIS CEMIG

LISTED COMPANY

CNPJ 17155.730/0001-64 NIRE 31300040127

MARKET ANNOUNCEMENT

Reply to CVM Inquiry CVM/SEP/GEA-1 N°. 461/2012

Question asked by the CVM

The CVM has requested explanation about the news report published in the news medium *Valor Online*, under the headline *Cemig considering purchase of a stake in Celpa*, dated May 31, 2012, containing the following attribution of statements to Mr. Djalma Morais, the company's chief executive officer:

Cemig's CEO, Djalma Morais, stated that the company is studying the purchase of an interest in Celpa, the distributor of the state of Pará controlled by the Rede group, which is in the process of judicial recovery.

We have matters under consideration. We are interested whenever a situation adds value.

[...]

At an event in Rio de Janeiro last week, Cemig's financial director, Luiz Fernando Rolla, said that the purchase of Celpa would not add value for the company.

Morais reaffirmed that Cemig has interest in the assets of Iberdrola in Neoenergia. It seems to me that Iberdrola is going to wait a little longer to make [the sale of] these assets of Neoenergia a proposition, Moraes said.

Reply by CEMIG

Dear Sirs:

In response to your request, made through Official Letter CVM/SEP/GEA-1/Nº461/2012, of May 31, 2012, on the subject of the news reports published in the press referring to our having interest in the acquisition of stake in Celpa and in Neoenergia, we inform you that the Company has evaluated various investment alternatives that could add value to the operation of its present assets. However, up to the present moment there is no concrete interest, nor commitment, even preliminary, in relation to the assets referred to, such as would justify a formal statement to the market.

Cemig reaffirms its commitment to seek investment opportunities that meet the requirements of profitability established by its stockholders and to publish all and any material information as and when it comes into existence.

Belo Horizonte, June 1, 2012

Yours,

Luiz Fernando Rolla

Chief Finance and Investor Relations Officer

REPORT OF MANAGEMENT FOR 2011

Dear Stockholders,

Companhia Energética de Minas Gerais - Cemig (**Cemig**) submits for your consideration the Report of Management, the Financial Statements, and the Opinions of the Audit Board and its external auditors on the business year ended December 31, 2011.

MESSAGE FROM MANAGEMENT

A year of extraordinary addition of value

2011 was a year of major achievements, indeed a landmark in the history of Cemig, which is 60 years old in 2012. The large volume of investments, with the acquisition of new companies; the appreciation in our stock price; the significant payment of dividends; and the highest annual profit since the company's foundation, enable us to conclude that we succeeded in adding value to an extraordinary degree in 2011.

In this context we highlight the performance of our stock. In a year marked by the uncertainties in the international market and a slowdown in Brazil's domestic growth, the prices of Cemig's preferred (PN) and common (ON) stock appreciated by 37.2% and 48.6%, respectively, while the Ibovespa fell by 18.11%

in the same period.

As well as the appreciation in our stock prices, we allocated dividends to stockholders of more than R\$ 2 billion. Summing the stock price and the dividend payments gives a total return to our stockholders of more than 11%.

In our financial results, we reported all-time record profit, of R\$ 2.4 billion, and cash flow, measured as Ebitda, of R\$ 5.4 billion. This was within the financial forecast guidance we published to stockholders at our annual meeting in May in Belo Horizonte.

Our investments were also a highlight of 2011: We made an important acquisition in the transmission sector, for R\$ 1.1 billion, of stockholdings in assets of the **Abengoa Group**. With this acquisition we are now the third largest transmission group in Brazil, with direct and indirect holdings of 12.9% of the Brazilian transmission market.

In generation, we acquired an interest of 9.7% in the **Belo Monte** Plant, the largest plant under construction in Brazil, with installed capacity of 11,233 MW. With the 10.0% interest in the **Santo Antônio** Plant, we can now state that we have significant operations in the Amazon region, which is the new frontier of major Brazilian hydroelectric projects. These interests confirm Cemig's commitment to give priority to renewable sources of electricity in its generation base.

We also increased our stockholding in Light S.A. (**Light**). At the start of the year we held an interest of 26.1%, directly or through subsidiaries, and at the end of the year we held 32.5%, a strategic investment in the distribution sector in Rio de Janeiro, one of the headquarter cities of the World Cup and the 2016 Olympics. This holding consolidates Cemig's position as the largest electricity distribution group on Brazil. Another highlight is the interest held by Light in **Renova Energia**, the first and only BM&FBovespa-listed company dedicated to generating electricity solely from alternative sources. Investments were not only through acquisitions: another highlight is the investment by Cemig Distribuição S.A. (**Cemig D**) of R\$ 1.2 billion in 2011 in its electricity network in the State of Minas Gerais, improving the reliability of the system and expanding its network to serve its more than 7 million consumers.

We are conscious of the importance and responsibilities of our actions for Brazilian society, as an electricity company operating all over the nation, serving not only more than 10 million consumers but also a significant proportion of the country's large industrial groups.

Aware of our responsibility in relation to climate change, in 2011 we launched our statement *Dez Iniciativas para o Clima*, which lists our **Ten 10 Initiatives for the Climate**. This document shows Cemig's preparation for and commitment to a low-carbon economy, and envisages an alignment of the business based on the assessment of climate risks and opportunities, informing society and investors of the lines adopted by the company.

As a consequence of our sustainable actions, we have great pride in being once again included in the **Dow Jones Sustainability World Index** the *DJSI World* completing 12 consecutive years of inclusion in this index. The inclusion represents world recognition of our practices of sustainable management in their economic, social and environmental dimensions. This recognition of Cemig as a sustainable company is also reflected in our inclusion in the **ISE Corporate Sustainability Index** of the São Paulo Stock Exchange (Bovespa). In this index, too, we have been included since it was created (in 2005).

We are indisputably a company that adds value to our country. We generated wealth of more than R\$ 14.3 billion in 2011 of which 58% was paid in taxes to the federal, state and municipal governments, thus making a significant contribution to public activity in the environment that we are a part of.

It is also important to point out that Cemig's results are only possible due to the technical quality and commitment of our body of employees: more than 8,000 people directly employed, in the companies that we directly control and without taking into account the substantial quantities of jobs that are created indirectly by our activities.

It is the capacity of our staff of employees, allied to the quality of our assets, that gives us confidence in the future, and in Cemig's capacity to add value for its stockholders and continue to be the company and the group providing Brazil's Best Energy.

CEMIG

Cemig is a business group with mixed public- and private-sector ownership, controlled by the government of the Brazilian state of Minas Gerais. Its shares are traded on the exchanges of São Paulo, New York and Madrid (Latibex). Its market valuation at the end of 2011 was approximately R\$ 23 billion. Its shares have been in the Dow Jones Sustainability World Index for 11 years. In 2011 it was the only company in the sector in Latin America chosen for the DJSI World, continuing to be the only company in the electricity sector that has been a part of this select group of companies since the DJSI was created in 1999.

The Cemig Group is made up of 114 companies, 15 consortia and 1 equity investment holding fund, with assets and businesses in 20 of Brazil's states, the federal district and Chile. It also has investments in distribution of natural gas, data transmission, and supply of energy solutions.

The Cemig Vision

In 2009, Cemig restated its vision as:

To be, in 2020, one of the two largest electricity groups in Brazil by market value, with a significant presence in the Americas,

and a world leader in sustainability in the sector.

Cemig maintains its focus on expanding its market share in electricity and gas within Brazil, up to the limits laid down by regulation, while at the same time expanding its international presence.

Cemig aims to be a benchmark for growth in the electricity sector. In this process it is constantly looking for opportunities for new acquisitions, seeking to be increasingly active in auctions for expansion of generation and transmission, and zealously working on the operational efficiency of its assets.

Geographical reach

As the map below shows, Cemig operates in many regions of Brazil, with activity most highly concentrated in the country's Southeast. It also shows Cemig's first operation outside Brazil: the Charrúa Nueva Temuco transmission line, in Chile, which began to operate in 2010.

The CEMIG brand

Cemig's brand and reputation has a direct effect in all the group's business in regulatory proceedings, in mergers and acquisitions, in the important impact on choice of supplier by free clients, and in all the company's participation in the daily life of all its consumers.

Research showed that in 2011 the reputation of most companies in Brazil suffered a decline from 2010, and this was also the case for Cemig. The research, by the *Reputation Institute*, attributed this to an atypical factor: the spirit of euphoria and optimism in the country arising mainly from its stability in comparison to the economic crisis in the United States and most of Europe.

A survey by *Brand Finance* gave a similar conclusion: after a strong rise in 2010, the value of the *Cemig* brand fell by 14% in 2011, but still remained above R\$ 1 billion.

PERFORMANCE OF OUR BUSINESSES

(Operational information has not been reviewed by the external auditors)

Generation

Through its subsidiaries and jointly-controlled subsidiaries **Cemig** has 70 plants in operation: 63 hydroelectric plants, 3 thermal generation plants and 4 wind farms. With their aggregate installed capacity of 6,964 MW, they make Cemig Brazil's third largest electricity generation group.

Plant	Generating capacity (MW)	Average output in 2011 (MW)
São Simão	1,710	1,281
Emborcação	1,192	497
Nova Ponte	510	276
Jaguara	424	336
Miranda	408	202
Três Marias	396	239
Volta Grande	380	229
Irapé	360	206
Aimorés	162	84
Other	909	543
Generation by <i>Light</i>	281	209
Wind power	49	20
Thermal plants	184	123
Total	6,964	4,245

Transmission

Transmission has grown strongly in Brazil in recent years making it possible to optimize the dynamic structure of supply, reducing restrictions on serving the whole market efficiently, and mitigating the risk of electricity rationing that resulted in part from incomplete linkage between all sections of the Brazilian electricity system. Market forecasts for the coming years indicate even faster growth, as new lines are

completed to connect the new large projects in the north of the country to the nationwide grid.

The environment of competition and the expansion of the system through tender auctions are causing the transmission sector to be seen with renewed attention. Cemig has followed the trend of the market, seeking opportunities for growth with addition of value, through acquisition of interests in transmission companies. Some highlights are: Cemig's acquisition in 2009 of an equity interest in *Transmissora Aliança de Energia Elétrica S.A. Taesa*; the increase in its holding in both the **TBE Group** and in **Taesa** in 2010; and the acquisition of assets of the **Abengoa** group in 2011.

Through its subsidiary and affiliate companies operating in electricity transmission, Cemig operates a transmission network which had a total length of 10,060 km in 2011 (8,768 in 2010). It is Brazil's third largest transmission group, present in 13 states of Brazil, and in Chile.

Distribution

Cemig is Brazil's largest electricity distribution group, with leading positions in the States of Minas Gerais and Rio de Janeiro through **Cemig D** (*Cemig Distribuição* Distribution) and **Light**, serving more than 10 million consumers.

Cemig Distribuição

Cemig D (*Cemig Distribuição*) is the largest distribution company in Latin America, with 467,679km of distribution networks (104,482km in urban areas and 363,197km of rural networks), and also 17,367km of high- and medium-voltage sub-transmission lines. It serves 7.1 million consumers.

Cemig D has one of the country's highest indices of service to consumers benefited by the low-income tariff. Of the total of residential consumers invoiced in 2011, 13.3% were classified as low-income, a total of 769,000 consumers.

Light

Cemig's jointly-controlled subsidiary **Light** operates in distribution through *Light Serviços de Eletricidade S.A.* (**Light Sesa**), serving approximately 4.1 million consumers in an area of 10,970 km² of Rio de Janeiro State.

Light divides its concession area into three regions: the Metropolitan Region, Greater Rio de Janeiro, and the Paraíba Valley. This aims to make service more efficient and create a closer relationship to the client.

Sales

The companies of the Cemig Group have the leading share of the Free Market in electricity Brazil. In 2011, the group expanded its area of operation to new states Roraima, Pernambuco, Paraná and Ceará with the addition of new clients in these states. It also consolidated its position with addition of new clients where it already operates, especially Minas Gerais, São Paulo and Bahia.

In terms of volume supplied, Cemig is the market leader in direct service to the largest free clients, with 23%, or twice the total volume supplied by its next-placed competitor in the ranking.

Other businesses

Cemig's principal businesses are generation, transmission and distribution of electricity, but the group also operates in distribution of natural gas in Minas Gerais State, through *Companhia de Gás de Minas Gerais Gasmig*, and also in telecommunications, services and technology and communication infrastructure.

The telecoms subsidiary, **Cemig Telecom S.A.** (previously named *Infovias*), was created to carry telecom signals on fiber optic and coaxial cables installed on Cemig's transmission and distribution networks.

The service company, **Cemig Serviços S.A.**, is a wholly-owned subsidiary formed in 2011, and provides services to the group. In its first year it has absorbed 5 meter reading contracts that were previously outsourced, equivalent to 17% of the current market. A further 9 contracts are expected to be made in 2012, totaling approximately 48% of all Cemig's meter reading services. Among the benefits expected are regulation of the market, improvement in quality of meter reading services, and greater protection of revenue.

In technology and communication infrastructure, the group operates through Ativas Data Center S.A. (**Ativas**), a subsidiary of Cemig Telecom. There is a value-adding partnership between the operations of Cemig Telecom which provides telecommunications infrastructure and Ativas, which provides IT services.

Additionally, through Axxiom Soluções Tecnológicas S.A. (**Axxiom**), the group offers technology and operational management system solutions to companies operating public concessions of all types: in electricity, gas, water supply, water services infrastructure, etc.

FINANCIAL RESULTS OF OUR BUSINESSES

Profit (loss) for the period

Cemig reported net profit of R\$ 2.415 billion in 2011, 6.95% more than its 2010 net profit of R\$ 2.258 billion.

Operational revenue

This is the breakdown of operational revenues:

R\$ million	2011	2010 (Reclassified)	Change %
Revenue from supply of electricity	16,841	14,821	13.63
Revenue from use of the electricity distribution systems (TUSD)	1,974	1,658	19.06
Revenue from use of the transmission grid	1,473	1,197	23.06
Construction revenue	1,533	1,342	14.23
Other operational revenues	990	924	7.14
Deductions from operational revenues	(6,997)	(6,095)	14.80
Net operational revenue	15,814	13,847	14.21

Revenue from supply of electricity

Revenue from electricity sales totaled R\$ 16.841 billion in 2011, compared to R\$ 14.821 billion in 2010 an increase of 13.63%.

Final consumers

Revenue from sales of electricity to final consumers (excluding own consumption) was R\$ 14.959 billion in 2011, 13.16% more than in 2010 (R\$ 13.219 billion).

The main factors in this result are:

<	Volume of energy invoiced to final consumers (excluding Cemig's own consumption) 6.95% higher.
<	Tariff increase for <i>Cemig D</i> with average effects on consumer tariffs of 1.67% and 7.24%, effective from April 8 of 2010 and 2011, respectively.
<	Tariff increases for <i>Light</i> , with average effects on consumer tariffs of 2.20% and 7.82% from November 7, 2010 and 2011, respectively.
<	Price adjustments in contracts for sale of electricity to free consumers, most of which are indexed to the IGP-M inflation index.

The following are some comments on the figures for the main consumer categories:

Residential:

Residential consumption accounted for 15.3% of the total of electricity sold in 2011. The increase of 8.0% in the total amount in the year reflects connection of new consumer units, and also higher consumption by private users due to the favorable situation of the Brazilian economy, with continuing vigor in the employment market, growth in total real wages, and expansion of the supply of credit.

Industrial:

Electricity used by free and captive clients was 37.1% of the volume transacted in 2011, 4.8% more than in 2010, due to the expansion of industrial activity with the growth of exports and production to meet domestic demand, in spite of the signals of slowing growth in the second half of the year.

Commercial:

This category consumed 10.0% of the electricity transacted, totaling 12.2% more in volume than in 2011, reflecting the increased level of domestic demand, that is, both consumption by the various economic sectors and final consumption by families and individuals.

Rural

Rural consumption grew by 7.3% in 2011, with the connection of 121,057 rural properties to electricity supply for the first time, and increased demand for irrigation due to atypical climatic conditions: low rainfall in the rainy season, and higher than expected temperatures in the dry season.

Other consumer categories:

The total of other types of consumption in 2011 by public authorities, public illumination, public services, and Cemig's own consumption was 9.2% higher than in 2010, and represented 5.8% of Cemig's total transactions in electricity in the year.

Revenue from wholesale electricity sales

The volume of electricity sold to other concession holders in 2011 was 1.78% higher, at 14,457,890 MWh in 2011, than in 2010 (14,204,530 MWh), and average price in these sales was 7.24% higher, at R\$ 109.08/MWh in 2011, compared to R\$ 101.72/MWh in 2010. As a result, revenue from wholesale supply to other concession holders was 9.13% higher year-on-year, at R\$ 1.577 billion in 2011, than in 2010 (R\$ 1.445 billion).

Revenue from use of the electricity distribution systems (TUSD)

The revenue of Cemig D and Light from the Tariff for Use of the Distribution Systems (TUSD) was 19.06% higher, at R\$ 1.974 billion, in 2011, than in 2010 (R\$ 1.658 billion). This revenue comes from charges made to Free Consumers on energy sold by other agents of the electricity sector, and its increase arises both from the increases in tariffs and, principally, from a higher volume of transport of energy for free consumers, a consequence of the recovery of industrial activity and of migration of captive clients to the Free Market.

Revenue from use of the transmission grid

Revenue for use of the grid in 2011 was R\$ 1.473 billion, vs. R\$ 1.197 billion in 2010, an increase of 23.06%.

For the long-standing concessions, Revenue from Use of the Transmission Grid refers to the tariff charged to agents in the electricity sector, including Free Consumers connected to the high voltage network, for use of that part of the National transmission Grid that is owned by the Company, less the amounts received that are used to amortize the Financial Assets of the Concession.

For the new concessions, it includes the portion received from agents of the electricity sector for the operation and maintenance of the transmission lines, and also the adjustment to present value of the financial assets of the transmission concession, which is primarily constituted during the period of construction of transmission projects. The rates used for updating of the asset correspond to the remuneration of the capital applied in construction of the projects, which varies according to the type of project and the cost of capital incurred by the investing party.

The increase in this revenue in 2011 arises principally from monetary updating of the Transmission Assets of *Taes*a, with an impact of R\$ 178 million on Cemig's profit. The updating arises from publication of the index for updating of *Taes*a's tariff as from July 2011, by 9.77%.

Other operational revenues

The Company's other operational revenues are:

	Consolidated			
	2011			

			2010 (Reclassified)
Supply of gas	579		398
Charged service	14		16
Telecoms service	158		131
Services provided	105		179
Rental and leasing	77		60
Other	57		140
	990		924

Taxes and sector charges: deductions from operational revenue

The taxes applied to operational revenue in 2011 totaled R\$ 6.997 billion, compared to R\$ 6.095 billion in 2010, an increase of 14.8%. The main variations in these deductions from revenue, between the two years, are as follows:

The Fuel Consumption Account CCC

Expenses on the CCC in 2011 were R\$ 718 million, 34.96% more than their total of R\$ 532 million in 2010. This charge is for the costs of operation of the thermal plants in the national grid and in the isolated systems. It is prorated between electricity concession holders, on a basis set by an Aneel Resolution.

This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment. For the portion relating to transmission services the Company charges the CCC amount to Free Consumers on their invoices and passes it on to Eletrobrás. The variation in this cost arises, principally, from the change in the method of calculation of the charge, which makes good the difference between the total cost of generation of electricity in the isolated systems and the average cost of electricity sold in the Regulated Market.

CDE Energy Development Account

Expenses on the CDE in 2011 were R\$ 516 million, 21.99% more than their total of R\$ 423 million in 2010. These payments are specified by a Resolution issued by the regulator, Aneel.

This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment. For the portion relating to transmission services the Company merely charges the CDE amount to Free Consumers on their invoices for use of the grid, and passes it on to Eletrobrás.

The other deductions from revenue are taxes, calculated as a percentage of amounts invoiced. Hence their variations are substantially proportional to the changes in revenue.

For a breakdown of the taxes applicable to revenues, please see Explanatory Note 24 to the consolidated Financial Statements.

Operational costs and expenses (excluding Financial revenue/expenses)

Operational costs and expenses (excluding Financial revenue (expenses)) totaled R\$ 11.401 billion in 2011, 11.77% more than in 2010 (R\$ 10.200 billion). There is a breakdown of this expense in Explanatory Note 25 to the consolidated financial statements.

The following paragraphs outline the main variations in expenses:

Electricity bought for resale

The expense on electricity bought for resale in 2011 was R\$ 4.278 billion, 14.94% higher than the figure of R\$ 3.722 billion for 2010. The higher figure basically reflects higher sales by *Cemig GT* (Generation and Transmission), and a higher proportional contribution by *Light* to the total figure in 2011, with its increased contribution to the consolidated result due to Cemig's increased ownership stake. This is a non-controllable cost: in the distribution activity, the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment. For more information please see Explanatory Note 25 to the consolidated financial statements.

Charges for use of the transmission grid

The expense on charges for use of the transmission network in 2011 was R\$ 830 million, vs. R\$ 729 million in 2010, an increase of 13.85%.

These charges, set by an Aneel Resolution, are payable by electricity distribution and generation agents for use of the facilities that are components of the national grid. This is a non-controllable cost: the difference between the amounts used as a reference for calculation of tariffs and the cost actually incurred is compensated for in the next tariff adjustment.

Depreciation and amortization

Depreciation and amortization was 4.80% higher year-on-year: R\$ 939 million in 2011, compared to R\$ 896 million in 2010. This mainly reflects the Company's increased investment program, primarily in distribution.

Post-employment obligations

The expense on post-employment obligations in 2011 was R\$ 124 million, compared to R\$ 107 million in 2010, an increase of 15.89%. This expense represents the updating of the obligation, calculated in accordance with an actuarial opinion prepared by external consultants. The significant increase arises from the increased equity interest in the subsidiary *Light*.

Operational provisions

Operational provisions in 2011 totaled R\$ 257 million, 86.23% more than in 2010 (R\$ 138 million). The main elements in the higher figure are:

The provision for doubtful receivables was 55.24% higher, at R\$ 163 million in 2011, vs. R\$ 105 million in 2010.

The provision for Aneel administrative proceedings was R\$ 4 million in 2011, whereas there was *reversal* of provisions of R\$ 47 million in 2010 resulting from dismissal of a case brought by Aneel about the low-income subsidy.

A provision of R\$ 48 million for contingencies for legal actions in general was made in 2011, compared to a *reversal* of provisions of R\$ 54 million in 2010.

On the other hand, provisions for civil actions relating to tariff increases totaled R\$ 9 million in 2011, compared to R\$ 139 million provisioned in 2010. The amounts provisioned in 2010 were substantially from settlement to terminate a legal action brought by an industrial consumer relating to the tariff increase ordered by Ministerial Order 045/86 of the National Water and Electricity Authority (DNAEE) in 1986.

For more information please see Explanatory Note 25 to the consolidated financial statements.

Gas purchased for resale

Expenses on gas bought for resale in 2011 were R\$ 329 million, 46.22% more than their total of R\$ 225 million in 2010. This primarily reflects the increase in the volume purchased, reflecting higher sales of gas by Gasmig in 2011, in turn reflecting increased industrial activity.

Outsourced services

The expense on outsourced services in 2011 was R\$ 1.031 billion, compared to R\$ 923 million in 2010, an increase of 11.70%. The highest increases were in communication services, meter reading services, electricity bill delivery and consultancy, all mainly reflecting increases in prices in service contracts. A detailed breakdown of outsourced services is given in Explanatory Note 25 to the consolidated financial statements.

Employees and managers profit shares

The expense on employees and managers profit shares in 2011 was R\$ 221 million, 32.00% less than in 2010 (R\$ 325 million). The amounts reported arise from the Specific Work Agreement signed with the unions in November of 2010 and 2011. The amount reported for 2010 also contains an element of R\$ 30 million arising under the Collective Employment Agreement for the previous year, 2009.

EBITDA*(Method of calculation not reviewed by external auditors)*

Ebitda R\$ million	2011	2010	Change%
Profit (loss) for the period	2,415	2,258	6.95
+ Provision for income tax and Social Contribution tax	941	564	66.84
+ Financial revenue (expenses)	1,056	825	28.00
+ Amortization and depreciation	939	896	4.80
= EBITDA	5,351	4,543	17.79
Non-recurring items:			
+ Settlement of legal action with industrial client	-	178	-
+ ICMS tax: low-income consumers	-	26	-
= ADJUSTED EBITDA	5,351	4,747	12.72

The higher Ebitda in 2011 reflects revenue 14.21% higher, while operational costs and expenses (not including depreciation) were 12.40% higher.

The main non-recurring items affecting 2011 Ebitda are:

Recognition of an expense of R\$ 178 million in Cemig D, in 2010, arising from the settlement of a legal action brought by an industrial consumer, for reimbursement of the tariff increase introduced by the DNAEE during the Cruzado economic plan (of 1986).

Recognition of an ICMS tax expense in 2010 relating to the subsidy for the discount on tariffs for low-income consumers, in the amount of R\$ 26 million, resulting from the decision to subscribe to the Tax Amnesty program put in place by the government of the Minas Gerais State.

Net financial revenue (expenses)

The company posted net financial expenses of R\$ 1.056 billion in 2011, compared to net financial expenses of R\$ 825 million in 2010. The main factors in this financial result are:

Higher expenses on loans and financings: R\$ 1.311 billion in 2011, compared to R\$ 1.075 billion in 2010, due mainly to the higher variation in the CDI (Interbank CD) rate, the main index for loan and

financing contracts, reflecting the increase of the Selic rate, mainly during the first half of 2011.

Higher monetary updating expense on post-retirement liabilities: R\$ 163 million in 2011, compared to R\$ 142 million in 2010 mainly due to higher variation in the IPCA index, which is used to update the debt agreement between Cemig and the private pension entity, **Forluz**.

Revenue from monetary updating of amounts paid into court in legal proceedings: R\$ 68 million in 2011, from updating of a tax credit for successful final judgment in a legal action on the ITCD (Death Duties/Donations) tax.

Revenue from monetary updating applied to the Finsocial tax: R\$ 68 million in 2011, from an updated receivable from the federal tax authority for taxes paid unduly over the period 1989-91, following final judgment in favor of Cemig.

Expense on monetary updating of an advance against future capital increase (AFAC): R\$ 66 million, in 2011 for the total of the updating on a historic amount of R\$ 27 million that was repaid to Minas Gerais State.

For a breakdown of financial revenues and expenses, please see Explanatory Note 26 to the consolidated financial statements.

Income tax and Social Contribution tax

- **In 2011**, Cemig's expense on income tax and the Social Contribution totaled R\$ 941 million, on profit of R\$ 3.356 billion before tax, representing a percentage of 28.03%.
- **In 2010**, Cemig's expense on income tax and the Social Contribution totaled R\$ 564 million, on profit of R\$ 2.822 billion before tax, a percentage of 19.99%.

These effective rates are reconciled with the nominal rates in Explanatory Note 10 to the consolidated financial statements for 2011.

Note that in 2011 and 2010 the Company posted tax credits that are not explicitly stated in the financial statements, in the amounts of R\$ 120 million and R\$ 289 million, respectively.

Liquidity and capital resources

Our business is capital-intensive. Historically, we have a need for capital to finance the construction of new generation facilities and expansion and modernization of the existing generation, transmission and distribution facilities.

Our demands for liquidity are also related to our dividend policy. We finance our liquidity and capital needs principally with cash generated by operations and, on a lesser scale, with funds from financing. We believe that our present cash reserves, generated by operations and expected funds from financings, will be sufficient to meet our liquidity needs over the next 12 months.

Cash and cash equivalents

Cash and cash equivalents at December 31, 2011 totaled R\$ 2.862 billion, compared to R\$ 2.980 billion on December 31, 2010. On December 31, 2011 neither our cash position nor our cash equivalents were maintained in any other currencies than the Real.

Cash flow from operational activities

Cemig's totals of Net cash generated by operational activities in 2011 and 2010 were, respectively, R\$ 3.898 billion and R\$ 3.376 billion. The increase in cash generated by operational activities in 2011 from 2010 primarily reflects the higher profit in 2011, adjusted for items not affecting cash.

Cash flows from investment activities

The totals of Net cash used in investment activities in 2011 and 2010 were, respectively, R\$ 4.017 billion and R\$ 4.444 billion. The lower amount in 2011 mainly reflects the higher investments in transmission assets in the previous year, while in 2011 expenses were more concentrated in the distribution activity, though the acquisition of transmission assets of the Abengoa Group should also be mentioned.

Net cash arising from financing activities

We are closely involved in lengthening our debt profile through financing vehicles over the long term, and for low interest rates, with maturities and obligations compatible with the nature of our business, which is capital-intensive. We seek to balance the proportions of short- and long-term financings and not to increase our exposures to short-term rates, nor to suffer any pressure on liquidity. More details on our funding policy can be seen in the next item in this report, *Funding and debt management*.

The positive cash flow from financing activities in 2011 was R\$ 1.3 *million*, from: outflow of cash for amortization of R\$ 2.218 billion of financings denominated in Reais and foreign currencies, and payment of R\$ 2.036 billion in dividends and Interest on Equity; almost entirely offset by financings obtained, of R\$ 4.255 billion.

Cash flow consumed by financing activities in 2010 totaled R\$ 377 million, with funding totaling R\$ 6.227 billion, and payments of R\$ 4.775 billion in amortization of loans and financings, and R\$ 1.829 billion in Interest on Equity.

Funding and debt management

In the consolidated view, the total of funding obtained through loans and financings in 2011 was R\$ 3.608 billion, while the total amortized was R\$ 2.219 billion. The Company maintains its commitment to ensure that its credit quality is preserved at satisfactory levels that denote investment grade, that is to say investment of low risk, to enable it to benefit from financial costs that are compatible with the profitability of the business, and to demonstrate that the process of expansion of Cemig's activities has taken place and will take place the future in a sustainable manner.

At the end of the year, to replenish cash used in investments in 2011, and to finance an acquisition of assets planned for the first half of 2012, **Cemig** issued Promissory Notes in the amount of R\$ 1 billion with tenor of 360 days, confirming the receptiveness that the Company enjoys in the local capital market.

Cemig D also had recourse to the capital market at the end of 2011, issuing R\$ 100 million in Promissory Notes for strengthening of working capital. Over the year, a further R\$ 410 million was raised in loans, and a further R\$ 116 million in financings from Eletrobrás for the *Reluz*, *Cresce Minas* and *Light for Everyone (Luz para Todos)* Programs. Also, the Company received R\$ 291 million from the CDE (Energy Development Fund) and from the State of Minas Gerais, on a sinking-fund basis, for the *Light for Everyone* Program; and the economic subsidy/support related to the tariff policy applicable to low-income consumers with the funds of Codemig for the Administrative Center.

Cemig GT, meanwhile, took the opportunity of its comfortable cash position to pay the debt servicing, in the amount of R\$ 1.219 billion (R\$ 689 million being principal), practically without having recourse to new raising of funds, as a way of optimizing its leverage. However, in the consolidated view, the indebtedness of the Company includes the effect of the financings contracted by its subsidiaries to pay for investments in generation, principally the *Santo Antônio* Hydroelectric Plant and the *Belo Monte* Hydroelectric Plant, and in transmission, in which a highlight was the Promissory Notes of **Taesá**, in the amount of R\$1.17 billion (affecting the indebtedness of **Cemig GT** in the amount of R\$ 663 million), for acquisition of the assets of **Abengoa**.

In March 2012, **Cemig GT** completed its 3rd debenture issue a total of 1,350,000 non-convertible, unsecured debentures in 3 series, each with nominal unit value of R\$ 1,000.00 (one thousand Reais) on the issue date (February 15, 2012), for a total of R\$ 1.35 billion. The net proceeds from the issue were used to redeem 100% of the Company's fourth issue of commercial promissory notes (issued January 13, 2012), for their total nominal unit value of R\$ 1,000,000, plus remuneratory interest, and to strengthen the Company's working capital. 480,000 debentures were issued in the first series, 200,000 in the second series and 670,000 in the third series, with respective maturities of 5, 7 and 10 years from the issue date. The debentures of the first series carry remuneratory interest at the rate of CDI + 0.90% p.a., and the debentures of the second and third series will have their nominal unit value adjusted by the IPCA index (published by the IBGE) plus remuneratory interest of 6.00% p.a. and 6.20% p.a., respectively. **Cemig** provided a surety guarantee for the 3rd debenture issue of Cemig GT.

Main indexors of the debt on December 31, 2011

The composition of Cemig's debt is a reflection of the sources of financing that are available to the Company (bank lending used for rollover of debt, and issuance of debentures and promissory notes, in which a significant demand has been allocated in securities indexed to local Brazilian interest rates), and

also of its intention to avoid exposure to foreign currency (currently at 2%). The high concentration of the debt in rates tagged to the CDI rate (59%) will reduce the cost of the debt in a scenario of lower interest rates in the long term. The average cost of Cemig's debt in real terms, in current currency, is 7.21% p.a.

The Company manages its debt with focus on lengthening of maturities, limitation of indebtedness to the levels laid down in the by-laws, reduction of the cost of debt, and preservation of the company's payment capacity, without pressures on cash flow that could indicate a refinancing risk.

The amortization timetable of the Company's debt, at December 31, 2011, was satisfactorily spread out over the years, with an average tenor of 3.1 years, although there is a concentration of debt maturing in 2012, as shown in the chart below, which has been partially refinanced in March 2012, through an issue of debentures by Cemig GT, mentioned in the previous paragraph.

This chart shows the debt amortization timetable:

Debt amortization timetable

Position at December 2011 (R\$ million)

The credit ratings of Cemig and its principal subsidiaries were not changed over 2011, even in a context of the Company's expansion through projects or acquisitions reflecting, as the people rating agencies

report it, a positive perception of healthy profitability and strong cash flow, indicated by solid credit indicators and an appropriate liquidity profile.

THE REGULATORY ENVIRONMENT

Renewal of concessions

One of Cemig's most valuable intangible assets is its portfolio of concessions for commercial operation in generation, transmission and distribution. The periods of the concessions vary depending mainly on the date of the grant.

The Mining and Energy Ministry has formed a technical working group to analyze the criteria that will be applied in renewals of generation, transmission and distribution concessions expiring as from 2015. Suggestions will be submitted to the National Energy Policy Council and, according to statements by participants of that group, will have as their object the reduction of tariffs for consumers.

The federal government is expected to make a decision in 2012 defining the criteria for renewal of concessions after which it will be possible to determine the effect of the criteria on the Company's results.

Electricity auctions

Cemig D took part in three auctions held by the regulator, Aneel, in the **Regulated Market**, for supply over the period 2011 to 2043, making the following purchases:

Auction	Power (MW, average)	Average price (R\$/MWh)
A 3 Auction	389.16	102.07
A 1 Auction	18.13	79.99
Adjustment Auction of the 2nd half of the year	137.00	56.13

Cemig GT took part in three auctions held by the regulator, Aneel, in the **Regulated Market**, for supply over the period 2011 to 2014, making the following sales:

Auction	Power (MW, average)	Average price (R\$/MWh)
A 1 Auction	85.00	80.00
Adjustment Auction of the 1st half of the year	85.00	108.00
Adjustment Auction of the 2nd half of the year	62.00	54.73

In the Free Market Cemig GT held a total of 65 auctions in 2011, including purchases and sales, selling a total of 30,226 GWh, and participated in a total of 96 purchase and sale auctions promoted by others, selling 4,109 GWh.

Cemig GT decides its strategy for activity in the Free Market Auctions based on its own assumptions and premises, including a curve of future price forecasts, approved internally, and on the basis of its Structural Balance Plan, which defines the availability to be directed to the various agents of this market.

Management of Transmission Losses

The overall Loss Index of Cemig D (Distribution) was 10.40% in October 2011. Of these 8.50% were technical losses and 1.90% were non-technical losses.

The investments made in strengthening the electricity system at high, medium and low voltage have helped in the control of technical losses, which are inherent in the process of transport and transformation of electricity.

In the management of non-technical losses, regularization of 35,000 consumers has provided a recovery of energy totaling 181 GWh and an increase of 77 GWh. These amounts correspond to aggregate revenue of R\$ 90 million.

Further to this: improvements were made to the tool for selection of inspection targets; productivity was increased in the process of charging for irregular consumption, revenue from medium- and large-scale consumers was increasingly bullet-proofed ; approximately 177,000 obsolete meters were replaced; and 15,000 public illumination lamps left on during the day were regularized.

RELATIONSHIP WITH CLIENTS

Retail supply quality

Electricity supply quality indicators (SAIDI and SAIFI) of Cemig D (Distribution):

Year	Adjusted		Unadjusted	
	SAIDI	SAIFI	SAIDI	SAIFI
2010	12.99	6.55	15.10	7.40
2011	14.32	7.90	16.86	7.01
Increase / (reduction)	10.2%	20.6%	11.65%	(5.3%)

The adjustment in the figures above relates to days regarded as critical: those in which the number of emergency occurrences exceeds the average for the previous 24 months. Outages on critical days are not included for the calculation of SAIDI and SAIFI indicators.

Cemig had 332,501 outages in the year, of which 82% were accidental and 18% programmed. Around 49% of the outages in 2011 arose from causes external to the system (natural and environmental phenomena), 33% were of internal origin (equipment, human failure, handling errors, etc.), and 18% were programmed outages. The most common external causes were lightning, with 21%, contact between birds or animals and the network, 10%, and contact with trees, 10%.

In 2011 Cemig invested R\$ 105.6 million in preventive maintenance (cleaning of transmission pathways; pruning; maintenance of structures; and replacement of damaged posts, transformers and cables); and a further R\$ 34.13 million in improvements to the network (covering of cables; and refurbishment and interconnection of circuits).

One cause of the fall in quality indicators in 2011 was an increase in rainfall, which was significantly higher than the average of any previously recorded.

Significant investments are planned for 2012 in works to improve operational flexibility, and installation of protection equipment with automatic reconnection, able to help reduce both the frequency and duration of accidental outages, thus improving the quality of electricity supply.

Another important sphere of action is in raising the overall level of technology employed, with systematic investments in automation of the electricity system, which will enable automatic remote re-establishment of supply after outages.

Service policy

Cemig D has numerous existing channels for relationship with clients. They include: the *Speak to Cemig* facility, Service Branches, Relationship Agencies, Virtual Branches and Simplified Service Posts (PASSs). The Company has been working strongly on forging a closer relationship with clients.

In 2011 Cemig D (Distribution) established personal (face-to-face) client service in all the 774 municipalities of its concession area, and also made investments in:

- (i) Cemig's Virtual Branch, increasing the number of services available; and in
- (ii) the Cemig Texting (*Cemig Torpedo*) service, in which the client can use simple text messaging to advise Cemig of an outage, get an update on bills owed, or request an on-premises meter reading, receiving an answer in less than 1 minute.

INVESTMENTS

New acquisitions

Acquisition of new assets is a policy that is in line with Cemig's strategy of becoming an increasingly large player, and a player that is increasingly competitive in the market. These are the principal acquisitions of 2011:

Belo Monte Hydroelectric Plant

In 2011 a 9.77% interest was acquired in the *Belo Monte* Hydroelectric Plant, through acquisition of 9.77% of the share capital of Norte Energia S.A. (**NESA**), the company that has the concession for the plant. A special-purpose company, Amazônia Energia Participações S.A (**Amazônia**), was created for the purpose, in which **Cemig GT** owns 74.5% of the total capital and **Light**, 25.5%.

Increase of stake in Light

Acquisition of additional interest in April 2011

On April 12, 2011 the jointly-controlled subsidiary *Parati S.A. Participações em Ativos de Energia Elétrica* (**Parati**) acquired 54.08% of the share capital of **Redentor**, for R\$ 403,350, corresponding to a price per share of R\$ 6.87. Redentor holds a 13.03% interest in the total and voting stock of Light.

Since the transaction resulted in the transfer of control of Redentor, Parati held an Auction of Public Offer for acquisition of the remaining shares in Redentor.

On September 30, 2011 the auction was settled with payment of R\$ 7.20 per share, corresponding to a total amount of R\$ 334 million, representing 93.04% of the shares in circulation that were held by minority stockholders. This acquisition represented 42.72% of the total of shares in the share capital, and was made for the price of R\$ 6.87, the same price per share paid to the controlling stockholder on May 12, 2011, updated by the variation in the Selic rate from that date to September 30, 2011.

A further Public Offering to Acquire Shares for Cancellation of Listed Company Registration and Exit from the Novo Mercado is planned to take place in the first half of 2012, for acquisition of the common shares remaining in the market, representing 3.20% of the share capital.

Acquisition of additional interest in Light in July 2011

On July 7, 2011 Parati acquired 100% of the holdings in Luce, owner of 75% of the units of the *Luce Brazil Equity Investment Fund (Luce Brasil Fundo de Investimento em Participações, or FIP Luce)*, which in turn is the indirect holder, through Luce Empreendimentos e Participações S.A., of approximately 9.77% of the total and voting capital of Light.

The amount paid for the acquisition was R\$ 516 million. As a result of this transaction and as specified in the Unit Holders Agreement of FIP Luce, **Braslight**, holder of the remaining 25% of the units of FIP Luce, acquired an option, for 60 days, to sell its interest to Parati.

On July 15, 2011 Parati, through Luce, was notified by Braslight that it had exercised its Option to Sell its interest of 25% in FIP Luce, which took place on July 28, 2011. The amount paid to Braslight for this acquisition was R\$ 172 million.

With these acquisitions Parati became holder of 25.68% of the voting stock of Light. Cemig owns 25% of Parati, and Redentor Fundo de Investimento em Participações owns 75%.

Transmission assets of the Abengoa Group

Through its subsidiary **Taesa**, Cemig acquired a concession and an equity interest in a company of the Abengoa group, of Spanish origin, holding four transmission assets.

Taesa acquired:

- (i) 50% of the shares held by Abengoa Concessões Brasil Holding S.A. in the share capital of **Abengoa Participações** Holding S.A. which, in turn, is holder of 100% of the total capital of the transmission companies:

STE Sul Transmissora de Energia S.A.,

ATE Transmissora de Energia S.A.,

ATE II Transmissora de Energia S.A., and

ATE III Transmissora de Energia S.A.

- (ii) and 100% of the shares held by Abengoa Concessões Brasil Holding S.A. and by Abengoa Construção Brasil Ltda. in the share capital of

NTE Nordeste Transmissora de Energia S.A.

For the acquisition, Taesa paid R\$ 1.163 billion, settled on November 25, 2011.

Renova Energia

Through **Light Energia** S.A., the group acquired 50 million shares issued by Renova Energia S.A. (**Renova**), injecting approximately R\$ 360 million. This gave Light a 50% interest in the controlling stockholding block of Renova.

Renova is the holding company of a group founded in 2001 and listed on the BM&FBovespa in 2010. It is the first company generating electricity from alternative sources to be listed in Brazil. It operates in generation of electricity from renewable sources, including small hydro plants and wind farms.

Gasmig

On December 27, 2011 the Board of Directors authorized acquisition of nominal preferred shares representing 4.38% of the total capital of **Gasmig**, from the State of Minas Gerais, for R\$ 67 million, corresponding to a price per share of approximately R\$ 3.75. The price is to be adjusted to the amount indicated by an independent valuation opinion, which will be prepared by a specialized institution, to be chosen and contracted by Cemig.

The acquisition will also be conditional on complete conclusion of the transfer to Minas Gerais State of the stockholding interest in Gasmig, currently held in the name of MGI Minas Gerais Participações S.A., in such a way that there is no burden for this transaction for Cemig.

Other investments

As well as the new acquisitions, the group made the following other investments in 2011:

Generation

Cemig GT is carrying out a wide-ranging program of revitalization of its plants, aiming to extend their useful life. There are refurbishment and modernization projects in progress at the *São Simão*, *Volta Grande* and *Salto Grande* hydroelectric plants. The program is planned to continue until 2025, and also includes the *Três Marias*, *Itutinga*, *Camargos*, *Jaguara*, *Emborcação*, *Nova Ponte* and *Miranda* plants, with total planned investment of R\$ 1.664 billion.

At the same time Cemig continues to invest in automation of its facilities. Remote assistance has now been put in place at 13 plants, 12 small hydro plants (PCH s) and 24 transmission substations. With its Automation Master Plan, Cemig will install remote assistance in 17 plants, 14 PCHs and 37 transmission substations. Completion of the whole program is planned for December 2016.

Transmission

Among the many investments made in transmission in 2011 we highlight those by Empresa Amazonense de Transmissão de Energia Elétrica S.A. (**EATE**) in four transmission lines: *Sorriso Sinop* (76km), *Novo Mutum Sorriso* (151km), *Parecis Brasnorte* (111km) and *Brasnorte Juína* (207km).

Cemig GT invested R\$ 38 million in the construction of the *Pimenta* substation (138kV), and expansion of the *Neves 1* substation (500kV).

Distribution

Of the investment programs in the distribution activity, we highlight the following:

Distribution development Plan (PDD)

During the process of the Tariff Review for the 2008-2012 period, Cemig's Distribution and Sales Department (DDC) presented the regulator with a Distribution Development Plan (*Plano de Desenvolvimento da Distribuição*, or PDD), for the related period, specifying amounts totaling R\$ 3.9 billion to be invested by **Cemig D** over 2008-2012.

Completion of the MacroProjects that comprise the PDD plan will facilitate sustainable growth in the market, by making electricity available, and will make a strong contribution to improving supply quality performance in terms of continuity, balance and voltage levels.

The Light for Everyone Program *universalization of access to electricity*

At the end of 2011 Cemig concluded the *Luz para Todos (Light for Everyone)* Program in Minas Gerais for the period of 2004 2011. This covered 774 municipalities of its concession area, and connected no less than 285,913 homes in the rural area to the electricity network for the first time this was almost 3 times the quantitative target of 105,000 homes initially specified by the Mining and Energy Ministry. Approximately R\$ 3 billion was invested, in 633 municipalities, with 23% of the funding coming from the federal government, and 77% from the government of Minas Gerais State and from Cemig, bringing benefits to some 1.5 million people, and serving practically 100% of its concession area.

Natural gas

In 2011 **Gasmig** invested R\$ 11.9 million in the gas pipeline networks of Minas Gerais, building 8.9km of pipeline network in the Metropolitan Region of Belo Horizonte, the South of Minas region (*Sul de Minas*), the Steel Valley (*Vale do Aço*) and the Mantiqueira region (*Juiz de Fora*).

A highlight of 2011 was a series of market studies for the start of works on the South Ring (*Anel Sul*) residential project for a steel pipeline to connect seven districts in the city of Belo Horizonte, to provide service to 66,700 clients by 2015.

As well as the residential segment, branches were completed for connection to vehicle fuel supply stations, industrial clients and commercial clients in the Metropolitan region of Belo Horizonte.

THE CAPITAL MARKET, AND DIVIDENDS

Cemig's shares were first listed on the Minas Gerais stock exchange on October 14, 1960, and were listed on the São Paulo Stock Exchange (Bovespa) in 1972, under the tickers CMIG3 for the ON (common) shares, and CMIG4 for the PN (preferred) shares. Since October 2001, we have been part of the Level 1 Corporate Governance listing of the Bovespa. Cemig's shares have also been traded on the Madrid Stock Exchange (as XCMIG) since 2002, and as ADRs on the New York Stock Exchange since 1993. Since 2001 they have been trading on the NYSE as level 2 ADRs.

Stockholding structure

On December 31, 2011 the Company's registered capital was R\$ 3.412 billion, as shown in the following chart:

Share prices

The following were the closing prices of our shares on the stock exchanges of São Paulo (Bovespa), New York (NYSE) and Madrid (Latibex) at the end of 2010 and 2011:

Name	Ticker	Currency	Close of 2010	Close of 2011
Cemig PN	CMIG4	R\$	24.24	33.27
Cemig ON	CMIG3	R\$	18.36	27.30
ADR PN	CIG	US\$	15.13	17.79
ADR ON	CIG.C	US\$	11.07	14.11
Cemig PN (Latibex)	XCMIG	Euro	12.30	13.33

Source: Economática. Prices adjusted for proceeds, including dividends.

The total trading in Cemig's preferred shares, CMIG4, in 2011 on the São Paulo Stock Exchange was R\$ 10.7 billion, with a daily average of just under R\$ 48 million. This places the stock among the most traded on the Bovespa, providing investors with security and liquidity.

The daily volume traded in ADRs for the preferred shares on the New York Stock Exchange is similar to the trading volume in the Brazilian market further indicating the strength of Cemig as a global investment option.

Cemig's shares outperformed the São Paulo Stock Exchange index: CMIG3 rose 48.62% in the year, and CMIG4 rose 37.23%. This provided a total return to the stockholder, in 2011, of 14% for CMIG3 and 11% for CMIG4.

	CMIG4	CMIG3	CIG	CIG.C	IBOV	DJIA	IEE
2011	37.23%	48.62%	17.60%	27.46%	-18.11%	5.53%	19.72%

The market valuation is calculated as the total of the Company's shares, at the price of the preferred shares on the last trading day of each year, and is twice the Company's stockholders' equity. The Company grew robustly in 2011 from 2010, demonstrating its constant objective of seek to add value and grow in a manner that is sustainable. Over the last five years Cemig's market valuation has increased by 50%:

Source: Economática. Based on non-adjusted share prices.

These charts compare Cemig's share prices over recent years with market indices.

DIVIDEND POLICY

Cemig, through its by-laws, assumes the undertaking to distribute a minimum dividend of 50% of the net profit for each year. Additionally, extraordinary dividends can be distributed each two years, or more frequently, if cash availability permits.

Dividends are paid in two equal installments: by June 30 and by December 30 of the year subsequent to the business year in which they were earned.

Extraordinary dividends

The Company made the following extraordinary payments in 2011 and 2010:

- < In a meeting held on December 16, 2010, the Board of Directors decided to declare an extraordinary dividend, in the amount of R\$ 900 million, or R\$ 1.32 per share, using the profit reserve established under the by-laws for this purpose. The payment of these dividends took place on December 29, 2010.
- < In a meeting held on December 15, 2011, the Board of Directors decided to declare an extraordinary dividend, in the amount of R\$ 850 million, or R\$ 1.25 per share, using the profit reserve established under the By-laws and other Profit Reserves for this purpose. These dividends were paid on December 28, 2011.

Dividend yield, %

PROPOSAL FOR ALLOCATION OF NET PROFIT

The Board of Directors will propose to the Annual General Meeting, to be held in April 2012, that the net profit for the year, of R\$ 2.415 billion, should be allocated as follows:

- < R\$ 1.294 billion (53.58% of net profit) for payment of dividends.
- < R\$ 109 million to the Legal Reserve.

< R\$ 1.012 billion to be retained in Stockholders' equity.

CORPORATE GOVERNANCE

Cemig's Board of Directors has 14 members, appointed by the stockholders. In 2011, 26 meetings were held to decide on subjects ranging from strategic planning to investment projects.

We also have six Committees of Support to the Board of Directors. Their purpose is to ensure objectivity, consistency and quality in the decision process, providing an in-depth analysis of the matters within their specialization and issuing suggestions for decisions or actions, and opinions, to the Board.

The Audit Board is installed permanently, and has five members. In its current form, the Audit Board meets the requirements for exemption from constitution of an audit committee under the *Securities Act* and the *Sarbanes-Oxley Law*. In 2011 the Audit Board held 10 meetings.

Relationship with external auditors

We adopt a system of five-year rotation for our external independent auditors, complying with an order by the CVM (Securities Commission). Our financial statements are audited by KPMG Auditores Independentes. The services provided by independent auditors to Cemig and the majority of its subsidiaries were as follows:

Service	2011 R\$ 000	% vs. auditing	2010 R\$ 000	% vs. auditing
Audit of financial statements	624	100.00	1,113	100.00
Additional services:				
- Diagnostics and evaluation of internal controls SOX	255	40.90	239	21.49
- Review of tax returns and of the quarterly provisions for income tax and Social Contribution tax	121	19.33	76	6.83
- Audit of regulatory assets and liabilities	302	48.44	317	28.51
- Audit of R&D Projects	25	3.98	-	-
- Translation of reports	9	1.37	5	0.44
- Training in Corporate Tax Returns and changes in legislation	6	1.02	6	0.55
- Technical Financial Report for the State and World Bank - Pronoroeste Project	16	2.56	-	-
Overall total	1,358	217.60	1,756	157.82

The additional services do not, in the Board of Directors' assessment, result in loss of independence by the external auditors and are not included in the items prohibited by the Sarbanes-Oxley Law nor by Article 23 of CVM Instruction 308 of May 14, 1999.

RISK MANAGEMENT

The risks within Cemig's corporate structure refer to events that could prevent it from achieving the objectives and the guidelines established by the Company's strategic planning. Risks are evaluated in

terms of their financial impact, and the probability of their occurrence in the various businesses in the value chain.

Cemig manages risk on the basis of four aspects: objectives; risks; internal controls; and alignment.

In 2011 the Company created its Corporate Risk Monitoring Committee (CMRC), with the following remit:

- (i) To propose, for approval by the Executive Board, guidelines, policies and procedures to be adopted in the process of management of corporate risks, to ensure continuous improvements in the process, and to make sure they are disseminated.
- (ii) To select and present to the Executive Board, in its conclusions, priority actions addressing the risks categorized as critical .

- (iii) To submit for approval by the Executive Board operational mechanisms for strategic monitoring of the corporate risks identified, and effective actions to reduce the levels of financial exposure and intangible impacts to an acceptable level, having regard to the mitigating action plans, aligned with the Company's Long-term Strategic Plan.

The Sarbanes-Oxley Law and certification of internal controls

Cemig received unqualified Certification of its Internal Controls for the consolidated financial statements, for the business year 2010, as stated in the Opinion of KPMG Auditores Independentes contained in its Annual Report filed on Form 20-F with the United States Securities and Exchange Commission (SEC) on June 29, 2011. This same result has been obtained since 2006.

Every year, based on an analysis and review of the mapping of risks in the processes at the business process and entity levels, the Company's management documents and tests the effectiveness of the controls, including the controls supported by information technology, in accordance with the rules of the Securities and Exchange Commission (SEC) and based on the criteria of the Public Company Accounting Oversight Board (PCAOB), of the *Committee of Sponsoring Organizations of the Treadway Commission* (Coso) and of the *Control Objectives for Information and Related Technology* (Cobit).

TECHNOLOGICAL MANAGEMENT AND INNOVATION

In 11 years of its research and development program, Cemig has sought to invest in innovative projects on the most varied range of themes related to its business. Under Law 9991 of the year 2000, every year 1% of net operational revenue of its principal subsidiaries is allocated to projects for Research & Development, and Energy Efficiency.

Early in 2011 Cemig and the Minas Gerais Research Support Foundation (*Fundação de Amparo à Pesquisa de Minas Gerais*, or Fapemig) signed a working agreement for R&D projects related to the electricity sector. R\$ 150 million will be invested over the next five years. In this period Cemig will finance

R\$ 100 million, and Fapemig will inject a further R\$ 50 million.

Technology and alternative energy sources

Cemig continues to invest in projects that employ renewable energy sources, such as wind energy and solar energy, and small hydroelectric plants. In harmony with these efforts, there are also investments in projects focused on: rational use and conservation of energy; cogeneration, tri-generation and distributed generation; use of alternative fuels such as hydrogen, alcohol, natural gas, solid waste, industrial process wastes and biodiesel; improvement of electric vehicles; and plans for super-capacitors, intelligent windows and high temperature fuel cells.

In line with the global mobilization of awareness on climate change, Cemig has sought alternatives in energy all the way from the primary source to the final user, in the effort to ensure a sustainable future resulting from better use of electricity, with lower emissions.

Research and development projects

In 2010, 49 research and development projects were selected from a total of 220 received, and begun in 2011. The total investment of all the projects would have been R\$ 480 million; total investment on the projects selected will be R\$ 140 million. They are spread over 12 strategic theme areas of interest to Cemig and the electricity sector.

Following the signature of the working agreement with Fapemig and publication of a tender announcement in 2011, a further 229 proposals were submitted for projects costing a total of approximately R\$ 385 million. The next phase of this process, selection and prioritization, is expected to be completed early in 2012. The expected result of that tender is that approximately R\$ 30 million will be invested in projects to be begun in 2012.

It should also be noted that our R&D projects have successfully attracted tax benefits representing a reduction of R\$ 8 million in Cemig's tax liability in 2011.

SOCIAL RESPONSIBILITY

As a provider of public services, we know that the relationship with the communities where we operate is not restricted to economic development, but also directly relates to the stage of social development.

Today Cemig is recognized for its sustainable activity and for its commitment to promote social development, generation of employment and social dignity through generation of electricity for all the citizens in the areas in which it operates.

Value added

The Value Added Statement (DVA) is an indicator of Cemig's importance for society in general, and its generation of wealth: the added value created in 2011 was measured as R\$ 14.383 billion - compared to R\$ 12.555 billion in 2010.

People

Cemig believes that its human capital is a fundamental element in complying with its commitment to economic, social and environmental sustainability. With this focus, it seeks to adopt best practices in the employment market in its management of people.

Attraction and retention of talents

Bringing together the Company's needs and its employees' career development expectations, Cemig periodically carries out a process of internal mobility between careers, which provides employees with an entry into a professional career they are interested in, with both internal selection and an external competition.

As part of its management of talents for leadership, Cemig has held its Succession Management Program since 2007. The program aims to plan for replacement of leadership positions, and has become an appropriate tool for identifying potential successors with profiles that are appropriate to the competencies required. At present, 37% of the whole of Cemig's leadership has originated from the Succession Management Program. In December 2011 this program was named winner of the Funcoge 2011 award in the "People Training and Development" category.

Leadership Development Program

The Leadership Development program includes a series of education programs, among which we draw attention to: Cemig Leadership in Management (*Celig*), the *Advanced*

Management Program, the Personal Skills Program for Potential Successors, the Paths of Leadership Program, and the International Tracks Program.

Number of employees

Culture and society

In 2011 our sponsorships continued to be aligned with the strategy of maintenance of projects that create and maintain a user public, and develop specific segments, operating jointly with the current public policies to improve the cultural environment in Minas Gerais state.

The Company's two programs *Cemig Cultural*, and *Film it in Minas* supported 144 projects in 21 municipalities, meeting the aim intended by the Minas Gerais state Culture Department, of regionalizing production. The total invested in culture, including sponsorships receiving incentives from federal laws and donations of Cemig's own funds, was R\$ 15.2 million.

Environment

Cemig carries out and manages a group of initiatives that seek to contribute to sustainable development. They include the environmental education program in schools, the environmental reserves, the programs for preservation of flora and fauna, the programs directed to preservation of fish, and programs for urban trees.

Funds invested in environmental activities (R\$ million)

The environmental dimension

Cemig carries out numerous activities in favor of environmental sustainability. The quality of water in its principal reservoirs is monitored regularly. This chart shows the levels of the principal reservoirs of Cemig's power plants in 2011, compared to 2010.

Water storage levels at Cemig reservoirs, 2010 and 2011

Management of waste

The chart below shows the total of materials recycled or reused, and of waste allocated for final disposal, over the period 2008 to 2011, in tons. This includes lamps, insulating mineral oil, materials and equipment.

Fish study programs

Cemig launched its *Peixe Vivo* (*Fish Alive*) Program in 2007, to expand its efforts, in partnership with communities, fishermen and universities, to find and implement solutions to avoid or mitigate impacts on fish populations and create new fish preservation programs. In 2011 the number of fish released was 834,607 a total of 17,131.42kg of fish, released in 83 fish restocking actions.

One of the highlight projects in 2011 is a study of the behavior of fish downstream of dams. Using a technique never before employed in South America, acoustic telemetry,

Cemig aims to obtain information for conservation of species and avoid deaths of fish in power plants during stoppages and start-up of rotors.

Fauna and Flora

To widen the knowledge and availability of information about fauna and flora in its areas of operation, Cemig GT maintains environmental stations with a total of more than 4,000 hectares in two important biomes; the Atlantic Forest and the *Cerrado*.

The ASAS *Forest Animals Release Area* program, developed in a partnership between Cemig and Ibama at the *Peti Environmental Station*, received 638 animals confiscated from animal traffickers in 2011. The project receives the animals, ensures that they recover and reintroduces them to the wild in carefully chosen locations that are similar to the species' natural habitats.

Cemig has two forest nurseries, at the *Itutinga* and *Volta Grande Environmental Stations*, and a seed laboratory. The saplings produced are of native species, produced for planting in cities and towns, and represent one of Cemig's environmental programs in partnership with and for the benefit of society. Cemig produced 430,000 saplings, and a total of 89 hectares of riverbank forest, on seven reservoirs of the Company's generation plants, was replanted.

The quality of the water in Cemig reservoirs is monitored regularly, in a network that includes the main river basins of Minas Gerais, with a total of 43 reservoirs and more than 200 stations for collection of physical, chemical and biological data.

Environmental education

In 2009 Cemig launched its *Integrated Trees and Networks Handling Program (Programa Especial de Manejo Integrado de Árvores e Redes, or Premiar)*, to manage Cemig's policies for handling of urban

trees vis-à-vis electricity systems, to achieve harmonious coexistence between trees and the electricity network.

Since 2001 Cemig and its wholly-owned subsidiaries, in partnership with the **Biodiversitas Foundation**, have provided the *Cemig Program of Environmental Education in Schools (Terra da Gente)*, which signed up 11 schools in 2001, bringing the total in the region of the *Campo das Vertentes* and *Sul de Minas* regions to 429 schools. The program provided teaching material to approximately 16,000 teachers, and involved more than 250,000 pupils.

Climate change

The global importance of debate on climate change leads Cemig to dedicate special attention to consolidation of its energy supply sources as predominantly renewable, and identification of business risks and opportunities, while focusing on a quest for solutions for adaptation and mitigation of the possible effects that could impact the Company's business.

To formalize its commitment on climate change, Cemig issued the document *Cemig 10 Initiatives for the Climate* (*Cemig 10 Iniciativas para o Clima*), which sets out the principal lines of its approach.

As well as giving priority to the participation of renewable energy sources among its sources of supply so far primarily through hydroelectric plants and wind farms Cemig has a large number of initiatives in progress connected with the climate, and also programs that develop more efficient use of energy in interaction with the community.

The publication of the document is testimony to the Company's efforts toward and commitment to a low-carbon economy, informing both society and investors of the lines of action it has undertaken.

RECOGNITION AWARDS

Cemig's efforts in 2011 led to recognition and awards reflecting the excellence of its activities by various sectors of society, among which we highlight the following:

The Dow Jones Sustainability Index

Cemig has once again been selected for inclusion in the *Dow Jones Sustainability World Index* (the DJSI World), for 2011-2012. This brings the number of years that Cemig has been in this index to 12, and it continues to be the only company in the Latin American electricity sector that has been in the DJSI World Index since the creation of index, in 1999. Being part of the Dow Jones Sustainability Index reflects the degree of responsibility in all Cemig's actions and commitment both to the world's population of today and to future generations.

The ISE Corporate Sustainability Index

Cemig was selected, for the seventh year running, for the São Paulo stock exchange's ISE Corporate Sustainability Index for 2011-12. The ISE reflects the return on a portfolio of shares listed on the BM&FBovespa that are recognized as committed to corporate sustainability, that is to say, they generate value for the stockholder in the long term, and are better prepared to maximize corporate opportunities, minimizing the risks associated with their activities.

The accounting profession's Transparency Trophy

Once again the accounting community gave recognition to the quality and clarity of Cemig's financial statements. 2011 was the eighth year running in which Cemig has won the Transparency Trophy (*Troféu Transparência*), awarded by *Anefac*, *Fipecafi*, *Serasa* and *Experian*, and Cemig was especially lauded for its track record in this award. The Company received its prize in the category of *Listed Companies Billing Over*

R\$ 8 billion, as one of the 10 listed companies in Brazil with the best financial statements.

The Coge Foundation Prize

Cemig received this award in 2011 in the *People Training and Development* category, for its Succession Management Program. The award is a recognition of the Company's efforts in training and preparing leaders, and a recognition that people are one of the key factors that make possible the changes that are necessary for the strategic challenges and imperatives that the Company faces.

Electricity sector

Cemig once again received nationwide recognition for its activity in the electricity sector, with second place in electricity in the *As Melhores do Dinheiro* ranking organized by *Isto é Dinheiro* magazine. The award recognized companies that were outstanding in 27 sectors of the economy. In electricity, Cemig received highlight positions in three areas: First place in *Human Resources*; second place in *Corporate Governance*, and third place in *Financial Sustainability*.

The Abap Sustainability Award

Cemig once again won a distinguished position in the *Abap Sustainability Award*, with first place in the *Companies* category, in the third annual award of this prize. This is promoted by the Brazilian Advertising Agencies Association (*Associação Brasileira de Agências de Publicidade*, the Minas Gerais chapter being *Abap-MG*), and recognized the company's work in favor of cultural, social and environmental development of the State. Cemig won the award for the company or institution most remembered for sustainable actions in the cultural, social and environmental areas.

Apimec Award

Cemig's Chief Officer for Finance and Investor Relations, Luiz Fernando Rolla, was elected the *Best Investor Relations Professional of 2010* by the 2011 *Apimec* awards – the 38th annual awards by the Brazilian Association of Capital Markets Investment Analysts and Professionals (*Associação dos Analistas e Profissionais de Investimento do Mercado de Capitais, or Apimec*). The *Investor Relations Professional* category recognizes investor relations professionals in companies that have securities traded in the Brazilian market, and their obligatory information up to date with the Brazilian Securities Commission (CVM).

Sport-Friendly Companies award

Cemig was highlighted in two categories in the second annual *Sport-Friendly Companies award (Prêmio Empresário Amigo do Esporte)*, promoted by the Ministry of Sport in 2011. It also won first place in the *Best Friend of Regional Sport* category, and third place in the category *Dedication and Incentive to Sport*.

The *Best Friend of Regional Sport* category rewards companies that invest in sports and Para Sports projects in 90 states of Brazil.

The *Dedication and Incentive to Sport* category is nationwide, and seeks to reward categories that have fulfilled the maximum of their sports incentive potential, that is to say allocating 1% of the total income tax paid, and have voluntarily declared that percentage in favor of sporting projects.

Best Communication with Journalists

The *Companies that Best Communicate with Journalists* award, promoted by *Negócios da Comunicação (Communications Business)* magazine, attested to the quality of the relationship that Cemig has with the media. In the electricity sector, Cemig was classified among the three best companies, based on a survey of 2,500 journalists from all over Brazil.

12th Annual *Best Annual Report* survey – Honorable Mention

Cemig's Annual Report published in 2011 was highlighted under the *Strategy* criterion of the 12th annual *Abrasca Awards*, given by the Brazilian Listed Companies Association (*Associação Brasileira das Companhias Abertas*, or *Abrasca*). The award aims to encourage optimum quality of information presented to the market, and thus, ever-improving corporate governance mechanisms, among Brazil's listed companies.

National Quality Prize

Cemig was rewarded with two highlight positions in the National Quality Prize (PNQ), the most important prize recognizing management in Brazil. The award is offered by the National Quality Foundation (*Fundação Nacional da Qualidade*, or *FNQ*). Cemig's two wholly-owned subsidiaries, Cemig D (Distribution) and Cemig GT (Generation and Transmission) were highlighted in the awards in two criteria:

Processes and Clients.

The award, now in its 20th year, encourages improvement in quality of management and increase of competitiveness among Brazilian organizations. Last year, Cemig D won the status of Finalist in the awards.

The Leaders of Brazil Prize

In these awards, promoted by the Entrepreneurial Leaders Group (*Grupo de Líderes Empresariais, or LIDE*), *Brasil Econômico* newspaper and the *SBT* television network, **Cemig's CEO, Mr. Djalma Bastos de Moraes**, received the *Leader in Environmental Management in 2011 Award*. This was the first year of these awards, which recognized entrepreneurs and executives who stand out in their sectors and help keep Brazil in the world's headlines.

FINAL REMARKS

Cemig's management is grateful to its majority stockholder, Minas Gerais State, for the trust and support that it has constantly shown during the year. It also thanks the other federal, state and municipal authorities, the communities served by the Company, the stockholders, other investors, and, above all, its highly qualified group of employees, for their dedication.

7 - Other information

- I. Of total funds deployed on the environment in 2011, approximately R\$ 53.7 million refers to the social-environmental programs put in place during the construction of new hydroelectric plants and transmission lines.
- II. Waste generated is quantified, monitored and controlled in accordance with corporate procedures for handling, transport, storage and disposal. These procedures are developing in the direction of setting of annual targets for waste reduction.
- III. We highlight the recycling of fluorescent lamps of the company's concession area, totaling 63 tons of lamps in 2011. Also, Cemig itself regenerated and re-used, in 2011, approximately 143 tons of insulating mineral oil withdrawn from electrical equipment.
- III. Consumption of electricity and fuel is quantified annually; there are no targets for reduction.
- IV. 14,799 tons of materials and equipment were sold or recycled. These materials include porcelain insulating components, scrap metal parts of meters, reactors, cables, wires and batteries.

* Recorded in the account line Investments related to the Company's operations.

NOTES TO THE FINANCIAL STATEMENTS

AS AT DECEMBER 31, 2011 AND 2010

(FIGURES IN THOUSANDS OF R\$, EXCEPT WHERE OTHERWISE INDICATED)

1. OPERATIONS

a) The Company

Companhia Energética de Minas Gerais (CEMIG or the Company) is a listed Brazilian corporation, enrolled on the Brazilian Registry of Corporate Taxpayers (CNPJ) under 17.155.730/0001-64. Its shares are traded at Corporate Governance Level 1 on the BM&FBovespa exchange (Bovespa) and on the New York (NYSE) and Madrid (Latibex) Stock Exchanges. The Company is an entity domiciled in Brazil, with its head office at Avenida Barbacena 1200, Belo Horizonte, Minas Gerais. It operates exclusively as a holding company, with equity interests in individually or jointly controlled subsidiaries. The main objectives of its subsidiaries are the construction and operation of systems for generation, transformation, transmission, distribution and trading of electric power, as well as the development of activities in the different energy fields, for commercial purposes.

CEMIG has equity interests in the following subsidiaries and jointly controlled entities that were in operation at December 31, 2011:

< Cemig Geração e Transmissão S.A. (Cemig Geração e Transmissão) (subsidiary) Electric power generation and transmission, through 52 power plants (46 hydroelectric power plants, 4 wind power plants and 2 thermoelectric power plants) and transmission lines, mostly belonging to the Brazilian national generation and transmission grid system.

Cemig Geração e Transmissão has equity interests in the following subsidiaries and jointly controlled entities:

- Hidrelétrica Cachoeirão S.A. (Cachoeirão) (jointly controlled): Production and sale of electric power as an independent power producer, through the Cachoeirão hydroelectric power plant located at Pocrane, in the State of Minas Gerais. The plant began operating in 2009;

- Baguari Energia S.A. (Baguari Energia) (jointly controlled): Construction, operation, maintenance and commercial operation of the Baguari Hydroelectric Plant, through participation in the UHE Baguari Consortium (Baguari Energia 49.00% and Neoenergia 51.00%), located on the Doce river in Governador Valadares, the State of Minas Gerais. The plant began operation of its units during the period from September 2009 to May 2010;

- Transmissora Aliança de Energia Elétrica S.A (TAESA) (jointly controlled): Construction, operation and maintenance of electric power transmission facilities in 11 states of Brazil. TAESA has the following subsidiaries: Empresa de Transmissão do Alto Uruguai S.A. (ETAU), Brasnorte Transmissora de Energia S.A. (Brasnorte) and Abengoa.

- Central Eólica Praias de Parajuru S.A. (Parajuru) (jointly controlled): Production and sale of electric power through the Parajuru wind farm, in the city of Beberibe, in the State of Ceará. The plant began operating in August 2009;

- Central Eólica Praia do Morgado S.A. (Morgado) (jointly controlled): Production and sale of electric power at the Morgado wind farm in the city of Acaraú in the State of Ceará, Northern Brazil. The plant began operating in May 2010.

- Central Eólica Volta do Rio S.A. (Volta do Rio) (jointly controlled): Production and sale of electric power at the Volta do Rio Wind Farm in the city of Acaraú in the State of Ceará, Northern Brazil. The plant began operating in September 2010.

- Hidrelétrica Pipoca S.A. (Pipoca) (jointly controlled): Independent production of electric power, through construction and commercial operation of the Pipoca PCH (Small Hydro Plant), located on the Manhuaçu River, in the cities of Caratinga and Ipanema, in the State of Minas Gerais. The plant began operating in October 2010.

- Empresa Brasileira de Transmissão de Energia S.A. (EBTE) (jointly-controlled): Holder of a public electric power transmission service concession, through the transmission lines in the State of Mato Grosso. The transmission facility began operating in June 2011;

Subsidiaries and jointly-controlled subsidiaries of Cemig Geração e Transmissão at development stage:

- Guanhões Energia S.A. (Guanhões Energia) (jointly controlled): Production and trade of electric power through construction and commercial operation of the following Small Hydroelectric Plants (PCHs) in the State of Minas Gerais: Dores de Guanhões, Senhora do Porto and Jacaré, in the city of Dores de Guanhões; and Fortuna II, in the city of Virginópolis. It is scheduled to start operating the first turbine in October 2013;

- Cemig Baguari Energia S.A. (Cemig Baguari) (subsidiary): Production and trade of electric power as an independent power producer, in future projects;

- Madeira Energia S.A. (Madeira) (jointly controlled): Implementation, construction, operation and commercial operation through its subsidiary Santo Antônio Energia S.A., of the Santo Antônio hydroelectric power plant located in the Madeira river basin in the State of Rondônia, with commercial operations start-up scheduled for 2012. Madeira incurred certain losses in recent years as it has been in a pre-operating stage, and at December 31, 2011, Madeira had a negative net working capital (current liabilities in excess of current assets) in the amount of R\$1,353,287 in its holding company and R\$1,279,002 when consolidated, R\$127,900 of which rolls up into the financial information of Cemig GT based on its equity interest. Madeira was in a negative net working capital position at December 31, 2011 primarily because its debentures balance is due on September 30, 2012. In order to balance its working capital position, Madeira will receive a capital increase from its shareholders including Cemig GT, estimated at R\$2,881,000 for the year 2012, to meet its short-term obligations. In its balance sheet as at December 31, 2011, Madeira has presented capital expenditures related to the construction and development project for the construction of the plant, which according to financial projections, should be absorbed by future revenue from operations. Madeira's property, plant and equipment balance at December 31, 2011 was approximately R\$11,510,013 (R\$1,151,001 of which rolls up into the financial information of Cemig GT). According to management's expectations, operations are scheduled to commence in the first quarter of 2012.

- Lightger S.A. (Lightger) (jointly controlled): Independent electric power production through construction and commercial operation of the hydroelectric powerstation referred to as the Paracambi Small Hydroelectric Power Plant, on the Ribeirão das Lages river in the city of Paracambi, in the State of Rio de Janeiro. The start up of operations is scheduled for the first semester of 2012;

- Amazônia Energia Participações S.A (Amazônia Energia) (jointly controlled) Special Purpose Company (SPC) established by Cemig Geração e Transmissão and Light, for the purpose of acquisition of a 9.77% interest of North Energia SA (NESA), a holding company of the concession of the Belo Monte hydroelectric power plant (Belo Monte Hydroelectric Plant). Cemig Geração e Transmissão holds a 74.5% interest in Amazônia Energia and Light holds 25.5%. The start up of operations is scheduled for February 2015;

< Cemig Distribuição S.A. (Cemig Distribuição) (subsidiary) Distribution of electric power through

distribution grids and lines in practically all of the State of Minas Gerais;

< Light S.A. (Light) (jointly controlled): Holding company that holds direct and indirect interests in other companies for operating electric power services, including generation, transmission, trading or distribution, and other related services. Light has the following subsidiaries and jointly-controlled subsidiaries:

- Light Serviços de Eletricidade S.A. (Light SESA) (subsidiary) listed company in Bovespa: Operating mainly in electric power distribution, in various municipalities of the State of Rio de Janeiro;

- Light Energia S.A. (Light Energia) (private subsidiary): Its main activities are studying, planning, building and commercially operating systems for generation, transmission, trading of electric power and related services. Light Energia has equity interests in Central Eólica São Judas Tadeu Ltda., Central Eólica Fontainha Ltda. and Renova Energia S.A.;

- Light Esco Prestação de Serviços Ltda. (Light Esco) (subsidiary): Its main activity is purchasing, selling, importing and exporting of electric power, and providing of consulting services in the energy sector;

- Itaocara Energia Ltda. (Itaocara Energia) (subsidiary): A company in the development stage its main activities are the planning, construction, installation and commercial operation of electric power plants;

- Lightger Ltda. (Lightger) (jointly controlled): A company in the development stage, set up to participate in auctions of concessions, authorizations and permissions in new power plants. On December 24, 2008, Lightger obtained its installation license, authorizing the start of construction of its Paracambi Small Hydroelectric Plant. It is a jointly-controlled subsidiary of Light S.A. (with 51%) and Cemig GT (with 49%). The start up of operations is scheduled for beginning of 2012;

- Lighthidro Ltda. (Light Hidro) (subsidiary): A company in the development stage, set up to participate in auctions of concessions, authorizations and permissions in new power plants;

- Instituto Light para o Desenvolvimento Urbano e Social (Instituto Light): Its purpose is to participate in social and cultural projects, with a focus on the economic and social development of cities;

- Lightcom Comercializadora de Energia S.A. (Lightcom) (subsidiary): Involved in purchasing, selling, importing and exporting electric power and general consulting services in the free and regulated markets for electric power;

- Axxiom Soluções Tecnológicas S.A. (Axxiom) (jointly controlled): It provides technological solutions and systems for operational management of public service concessions, including electric power, gas, water and waste companies and other utilities. Jointly controlled by Light S.A (51%) and CEMIG (49%);

< Sá Carvalho S.A. (Sá Carvalho) (subsidiary): Production and sale of electric power, as an electric power public service concession holder, through the Sá Carvalho hydroelectric power plant;

< Usina Térmica Ipatinga S.A. (Ipatinga) (subsidiary): Production and sale, as an independent power producer, of thermoelectric power, through the Ipatinga thermoelectric power plant, located on the facilities of Usinas Siderúrgicas de Minas Gerais S.A. USIMINAS;

< Companhia de Gás de Minas Gerais GASMIG (GASMIG) (jointly controlled): Acquisition, transport and distribution of natural gas and related products, through a concession for distribution of gas in the State of Minas Gerais.;

< Cemig Telecomunicações S.A. (Cemig Telecom) (subsidiary): Providing telecommunications services and developing activities related to them, through an integrated system consisting of optical fiber cables, coaxial cables, and electronic and associated equipment (multi-service network). It holds 49% of Ativas Data Center (Ativas) (jointly controlled), the principal activity of which is providing services to supply IT and communications infrastructure, comprising hosting and related services for medium and large-sized corporations;

< Efficientia S.A. (Efficientia) (subsidiary): Providing energy efficiency and optimization services and energy solutions through studies and execution of projects, as well as providing operation and maintenance services in energy supply facilities;

< Horizontes Energia S.A. (Horizontes) (subsidiary): Production and sale of electric power, as an independent power producer, through the Machado Mineiro and Salto do Paraopeba hydroelectric power plants in the the State of Minas Gerais, and the Salto do Voltão and Salto do Passo Velho power plants in the State of Santa Catarina;

< Central Termelétrica de Cogeração S.A. (Cogeração) (subsidiary): Production and sale of thermoelectric

power produced as an independent producer in future projects;

< Rosal Energia S.A. (Rosal) (subsidiary): Production and sale of electric power, as an electric power public service concession holder, through the Rosal hydroelectric power plant located on the border between the States of Rio de Janeiro and Espírito Santo, Brazil;

< Empresa de Serviços e Comercialização de Energia Elétrica S.A. (formerly Central Hidrelétrica Pai Joaquim S.A. (subsidiary): Production and sale of electric power as an independent power producer in future projects;

- < Cemig PCH S.A. (PCH) (subsidiary): Production and sale of electric power as an independent power producer, through the Pai Joaquim hydroelectric power plant;

- < Cemig Capim Branco Energia S.A. (Capim Branco) (subsidiary): Production and sale of electric power as an independent power producer, through the Amador Aguiar I and II hydroelectric power plants, built through a consortium with private sector partners;

- < Usina Termelétrica Barreiro S.A. (Barreiro) (subsidiary): Production and sale of electric power, as an independent thermoelectric power producer, through the construction and operation of the UTE Barreiro thermoelectric power plant, located in the facilities of V&M do Brasil S.A., in the State of Minas Gerais;

- < Cemig Trading S.A. (Cemig Trading) (subsidiary): Sale and brokerage of electric power;

- < Companhia Transleste de Transmissão (Transleste) (jointly controlled): Operation of the transmission line connecting the substation located in Montes Claros and the substation of the Irapé hydroelectric power plant;

- < Companhia Transudeste de Transmissão (Transudeste) (jointly controlled): Construction, operation and maintenance of the Itutinga Juiz de Fora transmission line;

- < Companhia Transirapé de Transmissão (Transirapé) (jointly controlled): Construction, operation and maintenance of the Irapé Araçuaí transmission line;

- < Empresa Paraense de Transmissão de Energia S.A. (ETEP) (jointly controlled): Holder of an electric power public service concession for a transmission line in the State of Pará. ETEP has set up the subsidiary Empresa Santos Dumont de Energia S.A. (ESDE);

< Empresa Norte de Transmissão de Energia S.A. (ENTE) (jointly controlled): Holder of an electric power public service concession for transmission through two transmission lines in the States of Pará and Maranhão;

< Empresa Regional de Transmissão de Energia S.A. (ERTE) (jointly controlled): Holder of an electric power public service concession for a transmission line in the State of Pará;

< Empresa Amazonense de Transmissão de Energia S.A. (EATE) (jointly controlled): Holder of an electric power public service concession for the transmission lines between the substations of Tucuruí, Marabá, Imperatriz, Presidente Dutra and Açailândia. EATE has interests in the following transmission companies: Empresa Brasileira de Transmissão de Energia S.A. (EBTE) (jointly controlled); Sistema de Transmissão Catarinense S.A. (STC) (subsidiary) and Lumitrans Companhia Transmissora de Energia Elétrica S.A. (Lumitrans) (subsidiary);

< Empresa Catarinense de Transmissão de Energia S.A. (ECTE) (jointly controlled): Holder of an electric power public service concession for transmission lines in the State of Santa Catarina;

< Axxiom Soluções Tecnológicas S.A. (Axxiom) (jointly controlled): Providing technological solutions and systems for operational management of public service concessions, including electric power, gas, water and waste companies and other utilities. Jointly controlled by Light S.A (51%) and Cemig (49%);

< Transchile Charrúa Transmisión S.A. (Transchile) (jointly controlled): Implementation, operation and maintenance of the Charrúa Nueva Temuco transmission line and two transmission line sections in the Charrúa and Nueva Temuco substations, in the central region of Chile. The head office of Transchile is in Santiago, Chile. The transmission line began operating in January 2010;

< Companhia de Transmissão Centroeste de Minas (Centroeste) (jointly controlled): Construction, operation and maintenance of the Furnas Pimenta transmission line. The transmission line began operating in April 2010;

< Parati S.A Participações em Ativos de Energia Elétrica (Parati) (jointly controlled): holding company that holds interests in other Brazilian or foreign companies that operate in any activity. Parati holds a 6.42% interest in Light;

< Cemig Serviços (subsidiary): It provides services related to planning, construction, operation and

maintenance of electric power generation, transmission and distribution systems, and provides administrative, commercial and engineering services in the different energy fields.

The joint control investments were made by CEMIG and its subsidiaries through shareholders agreements with the other shareholders of the investee companies.

(b) The electric power sector in Brazil:

The Brazilian electric power sector is regulated by the Federal Government through the Ministry of Mining and Energy (MME), which has exclusive authority over the sector. The regulatory policy for the sector is implemented by the Brazilian National Electric Power Agency (ANEEL).

Retail supply of electric power by the Company and its subsidiaries and jointly-controlled subsidiaries takes place in accordance with the clauses in the long-term electric power sales concession agreements.

Under the distribution concession agreements, the Company is authorized to charge its consumers a rate for supply of electric power that consists of two components: 1) a portion related to the generation, transmission and distribution costs that are non-manageable (Portion A Costs); and (2) a portion of operating costs (Portion B Costs). Both components are established as part of the original concession for given initial periods. Subsequent to the initial periods, and at regular intervals, ANNEL has the authority to review the Company's costs to determine inflation adjustments (or other similar adjustment factors), if any, applicable to the Portion B Costs (the Scaling Adjustment) for the subsequent period. This review may result in a positive, null or negative scaling adjustment.

In addition to the adjustments related to the Portion A and Portion B Costs mentioned above, the electric power supply concessions have an annual tariff adjustment based on various factors, including inflation. Following regulatory changes made in December 2001, the Company may now apply for tariff adjustments arising from significant events that disrupt the economic-financial balance of its business. Other normal or recurring events (such as increases in electricity purchased, taxes on revenue or even local inflation) may also be absorbed through specific tariff increases. When the Company requests a tariff adjustment, it is necessary to prove the financial impact on its operations resulting from these events.

In the generation business, the Company also sells energy through auctions for distribution through the captive market and it also sells energy to free consumers in the free contracting environment. In the free contracting environment, energy is traded through the generation concessionaires, small hydroelectric power plants, self generators, retailers and importers of energy.

Free consumers are those whose demand exceeds 3MW at 69kV or a higher voltage level or any voltage level, if supply started after July 1995.

Once the consumer has opted for the free market, he can only return to the regulated system if he informs the distributor of his area five years in advance. This period of notice ensures that, if necessary, the

distributor may purchase additional energy to meet the re-entry of free consumers in the regulated market. The state generators can sell electricity to free consumers, but contrary to private generators they are required to do so through an auction process.

According to the transmission concession contracts, the Company is authorized to charge the rates for use of the transmission system (TUST). The rates are adjusted annually on the same date as the adjustments of permitted annual revenues (RAP) of the transmission concessionaries. The tariff period begins on July 1 of the year of publication of tariffs until June 30 of the following year.

In Brazil the transport of large amounts of electricity over long distances is done using

a network of transmission lines and substations at voltages equal to or higher than 230 kV, known as the Basic Network.

Any agent of the electricity sector that produces or consumes electricity has the right to use this basic network, as well as consumers that meet certain technical and legal requirements. This is called Open Access, assured by law and guaranteed by ANEEL.

The operation and administration of the basic network is the responsibility of the National Electric System Operator (ONS), a legal entity of private law, regulated and supervised by ANEEL, and integrated by the holders of generation, transmission, distribution and trading rights and also by consumers with a direct connection to the basic network. ONS is responsible for managing the dispatch of electric power from the power plants under optimized conditions, involving the use of the dams of the hydroelectric power plants and the fuel of the national interconnected system.

The payment for the use of transmission also applies to the generation of Itaipu. However, due to the legal characteristics of this power plant, the corresponding charges are assumed by distribution concessionaires, holders of the respective shares of the hydroelectric power plant's power.

2. BASIS OF PREPARATION

2.1 Statement of compliance

The financial statements have been prepared in accordance with Brazilian Accounting Standards (BR GAAP), comprising the Brazilian Corporation Law, based on Law 11638 of 2007 and Law 11941 of 2009, the statements, orientations and interpretations issued by the Accounting Pronouncements Committee (CPC); and the rules of the Brazilian Securities Commission (CVM). These practices differ from International Financial Reporting Standards (IFRS) applicable to separate financial statements with respect to the fact that investments in subsidiaries and jointly-controlled subsidiaries are valued by the equity method under BRGAAP, whereas under IFRS this valuation would be at cost or fair value.

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB) and also in accordance with accounting practices adopted in Brazil.

However, there is no difference, for stockholders' equity and consolidated profit, between the amounts presented in consolidated form and in the individual financial statements. Accordingly, the Group's consolidated financial statements and the parent company's individual financial statements are being presented side-by-side in a single set of financial statements.

On March 6, 2012, the Company's Executive Board authorized the issuing of the Financial Statements for the year ended December 31, 2011, and consequent submission to the Board of Directors.

2.2 Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position:

- < Financial instruments and derivative financial instruments are measured at fair value;

- < Non-derivative financial instruments at fair value through profit or loss are measured;

2.3. Functional and presentation currency

These consolidated financial statements are presented in Reais, which is the Company's functional currency. All financial information is presented in millions of Reais, except where otherwise indicated.

2.4. Use of estimates and judgment

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are reviewed and in any future periods affected.

The Company believes that the following accounting policies reflect management's most critical judgments, estimates and assumptions that are important to its business operations and the understanding of its results:

- < Note 8 Allowance for doubtful accounts;

- < Note 10 Deferred income tax and social contribution;

- < Note 15 Depreciation;

- < Note 16 Amortization;

- < Note 21 Employee post-retirement benefits;

- < Note 22 Provisions;

- < Note 24 Unbilled electric power supplied;

- < Note 29 Fair value measurements and derivative financial instruments.

2.5 Reclassifications of account balances, 2010

The reclassifications presented above were made to provide more relevant information related to the following items:

- < Investments: information not relevant individually, related to the cost of acquisition of interests in audiovisual projects in accordance with the tax incentive law in force;

- < Construction Revenue and Cost: Presented at the net amount in the Consolidated Statements of Income and Value Added in 2010, which were separated to enable evaluation of their amounts and their impacts on revenue and operating expenses;

- < Employee and manager profit sharing, presented as an item of operating costs in 2010 and which was reclassified to other operating expenses as it addresses distribution of results based on overall corporate goals, defined in the specific collective bargaining agreement;

- < Financial Results: presents the results of financial instruments on a net basis, a gain or loss in the period;

- < Financial Assets: reclassification for better presentation of revenue from financial assets from operating activities and investments;

The other items have been reclassified for better presentation of their effects on financial statements.

2.6. Significant accounting policies

The accounting policies described below have been applied consistently to all periods presented in these individual and consolidated financial statements.

The accounting policies have been applied consistently by the entities of the group.

a) Financial instruments

Non-derivative financial assets The Company initially recognizes loans and receivables and deposits on the date that they are originated. All the other financial assets (including assets designated at fair value through profit and loss) are recognized initially on the date of trading, which is the date that the Company becomes one of the parties to the contractual provisions of the instrument.

The Company derecognizes a non-derivative financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction where substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

Financial assets and liabilities are offset and the net amount is presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

The Company has the following non-derivative financial assets: Cash, bank deposits, Cash equivalents and Short-term investments measured at fair value through profit or loss, Consumers and traders, Concession holders transport of energy, Account receivable from the State of Minas Gerais Government and Financial assets of the concession, recognized at their nominal value and similar to their fair values.

Non-derivative financial liabilities The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are recognized initially on the trade date on which is the date the Company becomes a party to the contractual provisions of the instrument. The company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expire.

The Company has the following non-derivative financial liabilities: loans and financing, debentures, suppliers and other obligations. Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortized cost using the effective interest method.

Share Capital Common shares are classified as shareholders equity. Preferred shares are classified as shareholders equity if they are not redeemable, or redeemable only at the Company's option. Owners of preferred shares do not have the right to vote but do have preference in the liquidation of the share capital. The rights to mandatory minimum dividends as established for the preferred shares are described in Note 23.

The mandatory minimum dividends as defined in the by-laws are recognized as a liability in the statement of financial position.

Financial instruments at fair value through profit or loss A financial asset is classified as a financial instrument at fair value through the profit or loss if it is classified as held for trading or is designated as such upon initial recognition. Financial assets are designated at fair value through profit or loss if the Company manages such investments and makes purchase and sale decisions based on their fair value in accordance with the Company's documented risk management or investment strategy. Attributable transaction costs are recognized in the income statement when incurred. Financial assets at fair value through profit or loss are measured at fair value, and changes in the fair value are recognized in the income statement for the period.

The Company holds the following types of financial instruments at fair value through profit or loss: short-term investments and cash equivalents.

Loans and receivables Loans and receivables are financial assets with fixed or calculable payments that are not quoted on an active market. These assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at the amortized cost using the effective interest method, less any impairment losses.

The Company holds the following types of loans and receivables: cash, consumers and traders, concession holders transport of energy, accounts receivable from the Government of the State of Minas Gerais, CRC account securitization fund (FIDC), financial assets of the concession and traders free energy transactions.

Cash and cash equivalents comprise cash balances, financial deposits and short-term investments with original maturity of three months or less from the date of its contract and are subject to an insignificant risk of change in value, classified as loans and receivables. Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

The Company recognizes a financial asset resulting from a service concession agreement when it has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction or upgrading of services provided. These financial assets are measured at fair value upon initial recognition. Subsequent to initial recognition the financial assets are measured at amortized cost and classified as loans and receivables.

Derivative financial instruments and hedging activities - The jointly controlled subsidiary Madeira holds financial hedge derivative instruments to hedge cash flow and regulate the main financial risk exposures, and the subsidiary Cemig Distribuição holds financial hedge derivative instruments to manage their exposures to risks of changes in foreign currency. Derivatives are initially recognized at fair value and attributable transaction costs are recognized in the income statement when incurred. After initial recognition, derivatives are measured at fair value and changes in fair value are recorded in the income statement, except in the circumstances described below for hedge accounting.

The method of accounting for gains and losses of derivatives is subject to the possible classification of the derivative instrument as a cash flow hedge. The effective portion of the changes in fair value of derivatives designated and described as cash flow hedge is recognized in other comprehensive income. The gain or loss related to the ineffective portion is recognized immediately in financial income. The amounts accumulated in equity are realized in the Income Statement in the periods when the hedged item affects the result. For

derivatives that are not classified as cash flow hedge, changes in fair value are recognized as gains or losses in the financial results.

For the use of hedge accounting, Madeira applies its policy classifying the applicable derivatives as cash flow hedge, emphasizing that its management considers the instruments that offset between 80% and 125% of the change in price of the item for which the hedge was taken out as highly effective.

b) Foreign currency

Transactions in foreign currencies are translated into the Company's respective functional currency at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies on the reporting date are retranslated into the functional currency at the exchange rate on that date. The exchange gain or loss on monetary items is the difference between the amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments made during the period, and the amortized cost in foreign currency translated at the exchange rate at the end of the reporting period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated into the functional currency at the exchange rate on the date that the fair value was determined. Foreign currency differences arising on retranslation are recognized in the income statement. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate on the date of the transaction.

Gains and losses arising from changes in foreign currencies related to the jointly-controlled subsidiary Transchile are recognized directly in shareholders' equity as an accumulated foreign currency translation adjustment, and are recognized in the income statement when these investments are sold, in whole or in part. The financial statements of subsidiaries outside Brazil are adjusted to Brazilian and international accounting practices and are subsequently translated into the Company's functional currency at the exchange rate on the reporting date.

c) Consumers and Traders

Accounts receivable from consumers, traders and concessionaires are recorded initially at fair value, whether already invoiced or not, and, subsequently, measured by amortized cost. The receivable balance includes the respective direct taxes that are the Company's tax responsibility, less any applicable tax credits that were withheld at the source.

The allowance for doubtful accounts is recorded at an amount estimated by management as sufficient to cover probable losses as follows: (i) for consumers with material debts, an individual analysis of the balance is made, taking into account the history of default, negotiations in progress and the existence of real guarantees; (ii) for other consumers, the debts that are more than 90 days past due for residential consumers, or more than 180 days past due for commercial consumers, or more than 360 days past due for the other consumer types, are provisioned at 100%. These criteria are the same as those

established by ANEEL.

For large consumers an analysis of individual debtors and the actions underway to receive credits is made.

d) Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the principle of average cost of acquisition and includes expenditures incurred in acquiring the inventories, and other costs incurred in bringing them to their existing location and condition. The materials purchased for inventory purposes are classified in current assets; the materials destined for construction of property, plant and equipment or intangible assets are classified in property, plant and equipment or intangible assets, and are not depreciated or amortized.

Net realizable value is the estimated selling price in the normal course of business, less the estimated costs of completion and selling expenses.

e) Investments

In the individual financial statements of the parent company, the financial information of its subsidiaries and jointly-controlled subsidiaries is recognized by the equity method, initially at cost. The Company's investments include the goodwill identified on the acquisition, net of any accumulated losses through impairment.

f) Operating leases

Payments made under operating lease agreements are recognized as expenses in the income statement on a straight-line basis over the period of the leasing agreement.

g) Assets linked to the concession

Distribution activity

The portion of the assets of the concession that will be fully amortized during the concession period are recorded as intangible assets and are fully amortized during the concession agreement period.

Amortization is calculated on a straight-line basis over the useful lives of the distribution assets, using the distribution amortization rates established by ANEEL, and reflect the estimated useful life of the assets.

The Company assesses the residual value of the distributions assets, which represents the amount that will not be fully amortized by the end of the concession period. The residual value is reported in the consolidated financial statements as a financial asset because it represents an unconditional right to receive cash or another financial asset directly from the grantor at the end of the concession agreement period.

New distribution assets are recorded initially in intangible assets, stated at the cost of acquisition, including the capitalized borrowing costs. When these assets are placed in service, the Company assesses whether there will be any residual value at the end of the concession agreement period and then reclassifies the residual value amount to financial assets, in accordance with the criteria mentioned in the previous paragraphs.

When an asset is replaced, the net book value of the asset is written off as an expense to the income statement.

Transmission activity

For new transmission concessions, granted after the year 2000, the costs related to the construction of the infrastructure are expensed when incurred. The Company recognizes construction revenue by reference to the stage of completion of a contract, which includes the taxes applicable to the revenue and any profit margin.

Only the costs of the infrastructure that will be used during the concession are recorded in the income statement. The portion of the assets that will not be used during the concession is recorded as a financial asset, because there is an unconditional right to receive cash or other financial assets directly from the grantor at the end of the concession agreement period.

For new transmission concessions, granted after the year 2000, the transmission revenue to be received throughout the concession agreement period, adjusted at fair value, is recorded in financial assets, during the construction period of the transmission lines.

For old transmission concessions, granted before the year 2000, the Company has not adopted the IFRIC 12 retrospectively due to the volume and age of the assets. Instead, the net book values of these assets were used and classified as financial assets for purposes of the first-time adoption of IFRS.

As the Company earns transmission revenue through making its transmission network available to users, and there have been no historical issues with respect to the demand for transmission activity, the Company considers there is no significant risk of a shortage of demand for transmission activity. Accordingly, the transmission assets have been classified as financial assets in the consolidated financial statements.

Of the total amounts billed, the portion related to the operation and maintenance of the assets is recorded as revenue, and the portion related to the construction revenue, originally recorded at the time of formation of the assets, is used to recover the financial assets.

Additions for expansion and reinforcement generate additional cash flow from the grantor and, therefore, this new cash flow is incorporated into the balance

of the financial asset.

Gas Activity

The portion of the assets of the concession that will be fully used during the concession period are recorded as intangible assets and are fully amortized during the concession agreement period.

The amortization for the gas related assets is calculated on a straight-line basis over the useful lives of the gas related assets, using the amortization rates based on the useful life estimates made by Management.

The Company has measured the value of the assets which will not be fully amortized by the end of the concession agreement period and reports this amount as a financial asset because it is an unconditional right to receive cash or other financial asset directly from the grantor.

New gas related assets are recorded initially in intangible assets, valued at the cost of acquisition, including capitalized borrowing costs. When these assets are placed in service, the Company assesses whether there will be any residual value at the end of the concession agreement period and then reclassifies the residual value to financial assets, in accordance with the criteria described in the previous paragraphs.

When an asset is replaced, the net book value of the assets is written off as an expense to the income statement.

Wind Power Generation Activity

The costs related to construction of the infrastructure are recorded in the income statement when calculating and recording construction revenue based on the stage of completion of the work performed, including taxes on income and any profit margin.

The balances of assets, used during the concession period, are recognized as Intangible Assets.

h) Intangible assets

Intangible assets are assets related to service concession agreements and software.

The Company recognizes intangible assets either through acquisition from third parties or internally generated. For an intangible asset acquired from third parties, the Company values the asset in the financial statements at its total cost of acquisition, net of accumulated amortization. For an internally-generated intangible asset, the Company recognizes the intangible asset during its development phase only if use of the asset is technically feasible and if the asset is likely to produce future economic benefits. The Company values its internally-generated intangible assets at cost, net of accumulated amortization and accumulated impairment losses.

For intangible assets linked to the concession, the accounting practices as described in the item assets linked to the concession above are applied.

i) Property, plant and equipment

Items of property, plant and equipment are measured at acquisition or formation cost, including deemed cost and borrowing costs, less accumulated depreciation. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of assets built by the Company includes the cost of materials and direct labor, and any other costs directly attributable to bringing the assets to their present location and in working conditions for their intended use.

The subsequent costs are capitalized to the extent that is probable that future benefits associated with the expenses will flow to the Company.

The carrying amount of the replaced asset is written-off, and the repairs and maintenance costs are fully recorded in the the income statement.

Depreciation and amortization are calculated on the balance of property, plant and equipment in service and on the underlying asset balances of investments in consortia, on a straight-line basis, using the rates determined by ANEEL for the assets related to electricity activities, and reflect the estimated useful life of the assets.

The principal depreciation rates applied to the Company's property, plant and equipment assets are shown in Note 15.

Interest and other financing charges incurred on financings linked to the construction in progress during the construction period are capitalized as constructions in progress and consortias.

For borrowings raised for construction purposes of a specific asset of plant, property and equipment, the Company capitalizes all the financial costs related to the borrowings directly to the respective asset constructed. For other borrowings raised that are not linked directly to a specific asset of property, plant and equipment, a weighted average rate is used to capitalize and allocate the borrowing costs of these loans.

j) Impairment

Financial assets

A financial asset not carried at fair value through profit or loss is assessed at each reporting date to determine whether there is objective evidence that it is impaired. A financial asset is impaired if objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

Objective evidence that financial assets are impaired can include default or delinquency by a debtor, restructuring of an amount due to the Company on terms that the Company would not consider otherwise, indications that a debtor or issuer will enter into bankruptcy or the disappearance of an active market for a security. In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

The Company considers evidence of impairment for receivables at both a specific asset and collective level. All individually significant receivables are assessed for specific impairment. All individually significant receivables found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Receivables that are not individually significant are collectively assessed for impairment by grouping together receivables with similar risk characteristics.

When assessing collective impairment, the Company uses past trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted to reflect management's judgment as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical trends.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognized in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognized through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through profit or loss.

Non-financial Assets

The carrying amounts of the Company's non-financial assets, other than inventories and deferred income tax and social contribution, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the recoverable amount of the asset is estimated. The carrying amount of property, plant and equipment and intangible assets is tested if there is evidence that an asset may be impaired.

k) Employee benefits

Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity (pension fund) and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in the income statement in the periods during which services are rendered by employees. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that are due more than 12 months after the end of the period in which the employees render the service are discounted to their present value.

Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their services rendered in the current and prior periods; that benefit is discounted to determine its present value. Any unrecognized past service costs and the fair value of any plan assets are deducted. The discount rate is the yield at the reporting date on well rated bonds that have maturity dates approximating the terms of the Company's obligations and that are denominated in the same currency in which the benefits are expected to be paid. The calculation is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a benefit to the Company, the asset to be recognized is limited to the total of any unrecognized past service costs and net actuarial losses and the present value of the economic benefits available in the form of future reimbursements available in the form of any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of the economic benefits, consideration is given to any minimum funding requirements that apply to any plan in the Company. An economic benefit is available to the Company if it is realizable during the life of the plan, or on settlement of the plan's liabilities.

When the benefits of a plan are improved, the portion of the increased benefit related to the past service of the employees is recognized in the income statement on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognized immediately in the income statement.

The Company recognizes all actuarial gains and losses in excess of 10% of the plan assets or 10% of the plan's liabilities in the income statement over approximately 11 years (the average time of future service of the present active participants), since 2009.

For the Company's defined benefit pension plan obligations, the liability recorded in the statement of financial position is the greater of: a) the debt agreed-upon with the foundation for amortization of the actuarial obligations, and b) the present value of the actuarial obligation after deduction of the fair value of plan assets, as calculated by a qualified actuary and provided in the actuarial opinion. In the years presented, the debt agreed-upon with the foundation is greater than the amounts of the actuarial report. In this case, the annual amount recorded in the income statement corresponds to the charges and monetary variation on that debt, which is recognized as a financial expense of the Company.

Other long-term employee benefits

The Company's net obligation in respect of long-term employee benefits other than pension plans is the amount of the future benefit that employees have earned in return for their service in current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is the yield at the reporting date on well rated bonds that have maturity dates approximating the terms of the Company's obligations. The calculation is performed annually by a qualified actuary using the projected unit credit method. Any actuarial gains and losses are recognized in the income statement in the period in which they arise.

The procedures mentioned above are used for the actuarial obligations related to the Company's employee health plan, life insurance plan, and dental plan.

Termination benefits

Termination benefits are recognized as an expense when the Company is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to either terminate the employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Company has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be reliably estimated reliably.

Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past services provided by the employee, and the obligation can be estimated reliably. Employee profit sharing specified in the Company's by-laws is accrued in accordance with the requirements established in the collective agreements with the employee unions and recorded in employee and manager profit sharing.

l) Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or formal obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

Concessions Contracts A provision for onerous concessions is recognized when the expected benefits to be derived from the contract are lower than the unavoidable cost of meeting the obligations of the concession. The provision is measured at present value at the lower of the expected cost of terminating the concession contract and the expected net cost of continuing with it.

m) Interest on capital

The interest on capital paid in substitution of cash dividends, although recorded for tax purposes as a financial expense, is presented in the consolidated financial statements as an amount reducing shareholders' equity, so as to reflect the essence of the transaction.

n) Income tax and social contribution

Current and deferred income tax and the social contribution are calculated based on the rates of 15%, plus a surcharge of 10% on taxable income exceeding R\$240, for income tax, and 9% on taxable income for the social contribution, and take into account offsetting of tax loss carry forwards and negative balances for calculation of social contribution, limited to 30% of the taxable income.

The income tax and social contribution expense comprises current and deferred taxes. The current tax and the deferred tax are recognized in the income statement unless they are related to a business combination, or items directly recognized in shareholders' equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to the tax payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the rates that are expected to be applied to temporary differences when they are reversed, based on the laws that have been enacted or substantially enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they are related to income taxes levied by the same tax authority on the same taxable entity.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be used.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

o) Revenue

In general, for the Company's business in electric power, gas, telecommunications and other sectors, revenues are recognized when there is persuasive evidence, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the customer on services rendered and goods sold. Its associated costs and possible return from sales can be estimated reliably, and the amount of revenue can be measured reliably.

Revenue from electric power sales are recorded based on the energy delivered and the tariffs specified in the contractual terms or in effect in the market. Revenues for energy supplied of electric power to end consumers are recorded when the energy is supplied to customers. The invoicing is performed on a monthly basis. Unbilled energy supplied, from the period between the last billing and the end of each month, is estimated based on the billing from the previous month and is accrued at the end of the month. The differences between the amounts accrued and the actual revenues realized, which have not historically been significant, are recorded in the following month.

Revenue from the supply of electric power to the Brazilian grid system is recorded when the supply has taken place and is invoiced to consumers on a monthly basis, in accordance with the payment schedules specified in the concession agreement.

Revenue from other operators and from free consumers that use its transmission (older concessions) and distribution grids is recorded in the month in which the network services are provided.

For newer transmission concessions, the portion of the invoicing related to operation and maintenance of the transmission lines is recorded on a monthly basis as revenues in the income statement. The revenue related to construction services under the contract for service concessions is recognized on a percentage of completion basis.

For the older transmission concessions, the fair value of the operation and maintenance of the transmission lines and the remuneration of the financial asset are recorded as revenue in the income statement each month.

The services provided include charges for connection and other related services

and revenues are recorded when the services are provided.

p) Financial income and financial costs

Financial income includes interest income on funds invested, fee income for consumer payments made late, interest income on financial assets of the concession, interest income on other financial assets. Interest income is recognized in the income statement using the effective interest method.

Financial costs include interest expense on borrowings and foreign exchange and monetary variation on borrowings. Interest expense on the Company's borrowings is recognized using the effective interest method.

q) Earnings per share

Basic earnings per share (EPS) is calculated by dividing the profit or loss attributable to the controlling shareholders and minority interest of the Company by the weighted average number of common and preferred shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to the controlling shareholders and minority interest and the weighted average number of common and preferred shares outstanding, adjusted for own shares held, for the effects of all dilutive potential shares, with the diluted effect in the periods presented.

r) Segment reporting

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses related to transactions with any of the Company's other components. All operating results of operating segments are reviewed regularly by the Company's CEO to make decisions on resources to be allocated to the segment and to assess its performance, and for which individual financial information is available.

Segment results that are reported to the CEO include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly corporate assets, head office expenses and income tax and social contribution assets and liabilities.

Segment capital expenditure is the total cost incurred during the year to acquire property, plant and equipment, and intangible assets other than goodwill.

s) Statements of added value

The Company has prepared individual and consolidated statements of added value in accordance with Technical Pronouncement CPC 09 *Statement of Added Value*, which are presented as an integral part of the financial statements in accordance with BRGAAP applicable to listed companies, whereas under IFRS they are additional financial information

t) New accounting pronouncements not yet adopted

As a result of the process of standardization of Brazilian accounting rules with international standards, there are expectations that the new standards, amendments and interpretations of IFRS to be issued by the IASB will also be approved by the CPC in Brazil before the required date for them to come into effect.

Accordingly, we present below, in the Company's interpretation, the changes in IFRS expected to take place after December 31, 2011 and not yet adopted in Brazil which might impact Cemig's Accounting Statements, and the possible effects of which are still being evaluated by the Management:

< IAS 1 - Presentation of Financial Statements - Presentation of Items of Other Comprehensive Income. This international accounting standard is effective for fiscal years beginning on or after January 1, 2012.

< IAS 19 - Employee Benefits - The objective of IAS 19 is to prescribe the accounting and disclosure of employee benefits (i.e. all forms of consideration given by an entity in exchange for service rendered by employees). This international accounting standard is effective for fiscal years beginning on or after January 1, 2013, with earlier application permitted.

< IAS 27 - Consolidated and Separate Financial Statements (revised in 2011) - Superseded by IFRS 10 and IFRS 12, the main objective of IAS 27 is the accounting for investments in subsidiaries, jointly controlled entities, and affiliated companies when an entity elects, or is required by local regulations, to present separate (non-consolidated) financial statements. This international accounting standard is effective for fiscal years beginning on or after January 1, 2013.

< IAS 28 - Investments in Affiliated companies and joint ventures (revised in 2011) - Superseded by IFRS 11 and IFRS 12, IAS 28 applies to all investments in which an investor has significant influence but not control or joint control except for investments held by a venture capital organization, mutual fund and unit trust. This international accounting standard is effective for fiscal years beginning on or after January 1, 2013.

< IAS 32 The purpose of the changes is to clearly explain the compensation requirements of financial instruments, where the main explanations are related to the meaning of a legally executable right to be settled by the net amount and where some settlement systems at the gross amount may be considered equivalent to settlement at the net amount. This amendment comes into force on or as from January 1, 2014.

- < IFRS 7 Financial Instruments: Effective starting on July 1, 2011. This standard requires certain disclosures to be presented by category of instrument based on the IAS 39 measurement categories. The designation is made at the time of initial recognition. The classification depends on both the entity's business model and the cash flow characteristics of the financial instrument. Regarding financial liabilities, the standard does not change most of the established demands in IAS 39.

- < IFRS 9 - Financial Instruments Effective starting on January 1, 2013 This standard simplifies the model for measurement of financial assets and establishes two main categories of measurement: amortized cost and fair value. Any changes in the fair value of liabilities valued at fair value would not have an effect on the statement of other comprehensive income, because they would be recognized in the statement of other accumulated comprehensive income.

- < IFRS 10 - Consolidated Financial Statements - Effective starting on January 1, 2013. This standard establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. It also defines the principle of control, and establishes control as the basis for consolidation. It establishes how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee.

- < IFRS 11 - Joint arrangements Effective starting on January 1, 2013, but earlier adoption is encouraged. The core principle of IFRS 11 is that a party to a joint arrangement determines the type of joint arrangement in which it is involved by assessing its rights and obligations and accounts for those rights and obligations in accordance with that type of joint agreement. There are two types of joint arrangements: (i) joint operations, a situation in which an operator has assets and contractual obligations and, as a consequence, it recognizes its share in the assets and liabilities, revenues and expenses and (ii) joint control, a situation in which an operator has the right over the contractual net assets and as a consequence it recognizes the investment using the equity method. The main change is that if the type of joint arrangement is not a joint venture, the entities must use the equity method extinguishing the proportional consolidation which will impact consolidation for all jointly controlled entities in the Group.

- < IFRS 12 Disclosure of interests in other entities Effective starting on January 1, 2013. This standard establishes disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, affiliated companies and unconsolidated structured entities and the effects on its financial position, financial performance

and cash flows.

< IFRS 13 Fair Value Measurement - Effective starting on January 1, 2013. This standard defines fair value, set out in a single IFRS framework for measuring fair value and requires disclosures of fair value measurements. The main change is the definition of fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This standard requires using significant unobservable inputs for fair value measurements. To meet the disclosure objective, the following minimum disclosures are required for each class of assets and liabilities measured at fair value (including measurements based on fair value within the scope of this IFRS) in the statement of financial position after initial recognition. (Note that these requirements have been summarized and additional disclosure is required where necessary).

u) Determination of adjustment to present value

The Company applied the adjustment to present value on certain onerous concession contracts and also on the balance of the debentures issued by the Company. The discount rates used were consistent with the cost of raising funds in transactions with the same term on the date of the transactions, which represents, in the Company's estimation, a percentage of 12.50%, including inflation expectations.

3. PRINCIPLES OF CONSOLIDATION

The financial statements of the subsidiaries and jointly-controlled subsidiaries described in Note 1 have been consolidated for purposes of the consolidated financial statements.

(a) **Subsidiaries and jointly-controlled subsidiaries**

The financial statements of subsidiaries and jointly-controlled subsidiaries are included in the consolidated financial statements from the date on which the control, or shared control, begins until the date on which the control or shared control ceases. The assets, liabilities and results of the jointly-controlled subsidiaries

have been consolidated into the consolidated financial statements using proportional consolidation. The accounting policies of subsidiaries and jointly-controlled subsidiaries are aligned with the policies adopted by the Company.

In the individual financial statements of the parent company the financial information of subsidiaries and jointly controlled companies, as well as affiliates, are recognized through the equity method.

The joint control of the Company is established through a shareholders agreement signed previously, whose strategic, financial and operating decisions are taken with unanimous consent between the parties.

In some jointly controlled companies, Cemig has more than 50% of the voting rights, however, there are shareholders' agreements that give the minority shareholders relevant rights that represent the sharing of control.

(b) Consortia

The quota-part of the assets, liabilities and revenues and expenses of consortium operations is registered in the subsidiary that owns the corresponding equity interest.

(c) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated when preparing the consolidated financial statements. Unrealized gains arising from transactions with invested companies recorded under the equity method are eliminated against the investment in proportion to the Company's interest. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of a loss through impairment.

The references made in these financial statements of subsidiaries and jointly controlled companies are performed in proportion to the Company's interest.

Transchile's financial statements, for consolidation purposes, are translated from U.S. dollars (Transchile's functional currency) to Reais based on the exchange rate at the reporting date, since Cemig's functional currency is the Real. Foreign currency differences are recognized in other comprehensive income and are presented in shareholders' equity. Since January 1, 2009, CEMIG's date of transition to IFRS, the Company has applied CPC 02 - The Effects of Changes in Foreign Exchange Rates and these differences have been recognized in the accumulated foreign currency translation adjustment.

The reporting dates of the remaining subsidiaries and jointly-controlled subsidiaries used for consolidation purposes coincide with those of the holding company.

The consolidated financial statements include the balances and transactions of the exclusive investment funds, the only unit holders of which are the Company and its subsidiaries. The funds comprise public and private debt securities and debentures of companies with a minimum Brazilian long-term risk rating of A+(bra), thus ensuring high liquidity of the securities.

The exclusive fund, the financial statements of which are regularly reviewed and audited, is subject to obligations restricted to payment for services rendered for administration of the assets, attributed to the operation of investments, such as custody fees, audit fees and other expenses. There are no significant financial obligations or assets of the unit holders to guarantee these obligations.

As shown in the table below, the Company uses full and proportional consolidation criteria when preparing its consolidated financial statements. The interest in the Company's subsidiaries and jointly-controlled subsidiaries presented in the table below based on the subsidiary's share capital held by Cemig.

Renewal of Concessions

Concessions for exploration of electricity transmission services are expected by Management to be renewed by ANEEL and/or the Mining and Energy Ministry. In case these concessions are not renewed, the Company's profitability and operations could be adversely impacted.

Onerous concessions

When obtaining the concessions for construction of certain generation projects, the Company agreed to make payments to ANEEL during the concession agreement period as compensation for commercial exploration. The information on the Company's concessions and the amounts to be paid, refer to the table below:

Ventures	Carrying amount in 2011	Present value in 2011	Amortization period	Index
Porto Estrela (Consortium)	368,654	115,756	08/2001 to 07/2032	IGPM
Irapé	31,613	10,814	03/2006 to 02/2035	IGPM
Queimado (Consortium)	8,233	3,036	01/2004 to 12/2032	IGPM
Baguari (Consortium)	5,369	1,485	09/2009 to 09/2042	IPCA
Capim Branco (Consortium)	19,962	6,596	09/2007 to 08/2035	IGPM

The Company makes its payments to the grantor on a monthly basis in accordance with the payment schedule agreed upon by both the Company and ANEEL. While the agreed-upon payment schedules may stipulate varying monthly amounts of payment, for accounting purposes the Company used the updated carrying amount and recognized the expenses incurred on a straight-line basis over the concession contract period.

The payments paid to the grantor for the Porto Estrela, Irapé, Queimado, Baguari and Capim Branco plants in 2011 were approximately R\$125, R\$1,300, R\$370, R\$170 and R\$776, respectively

The present value of the payments to be paid in the 12-month period are: R\$5,405, R\$1,279, R\$367, R\$168 and R\$771, respectively (face value amounts of R\$5,919, R\$1,358, R\$389, R\$178 and R\$821).

The rate used by Cemig to discount the face value of its onerous concession liabilities to present value was 12.50%, which represents the average borrowing rate under normal conditions on the transaction date.

5. OPERATING SEGMENTS

The Company has three primary operating segments: Generation, Transmission and Distribution. These primary operating segments are configured separately to reflect the regulatory framework of the Brazilian electric power sector, which has different legislations for each segment.

The segments mentioned above reflect the Company's management and its organizational and monitoring structure. Due to the structure of the regulatory framework, the operating segments were not set up per geographical area.

The Company also operates in the gas, telecommunications and other businesses markets, which have a smaller impact on the results of its operations.

The table below presents the consolidated income statement per operating segment for 2011 and 2010:

FINANCIAL STATEMENTS BY ACTIVITY AT DECEMBER 31, 2011								
DESCRIPTION	ELECTRIC POWER							Total

These short-term investments are transactions contracted with Brazilian institutions and international financial institutions with branches in Brazil for securities at normal market prices and under normal market conditions. All of these investments are readily convertible into known amounts of cash and are subject to an insignificant risk of change in value and there is no restriction on its use. In its short-term investment portfolio, the Company holds Financial Treasury Bonds, National Treasury Bonds, Financial Bonds Banks and Bank Certificates of Deposit (CBDs), which earn interest at fixed and floating rates. The Company also holds Time Deposits with Special Guarantees (DPGEs), which receive a percentage of return based on the CDI rate (which varies from 100% to 110%) published by CETIP (the Clearing House for the Custody and Financial Settlement of Securities).

The Company's exposure to interest rate risk and a sensitivity analysis of the Company's financial assets and liabilities are shown in Note 28.

7. MARKETABLE SECURITIES - SHORT-TERM INVESTMENTS

The Short-term Investments refers to financial investments made in Brazilian and international financial institutions with branches in Brazil at market prices and conditions with original maturity of three months or less from the date of its contract.

Public illumination	58,899	4,466	30,727	94,092	84,638
Public service	125,815	12,491	44,506	182,812	193,987
Subtotal Consumers	1,685,007	410,206	992,851	3,088,064	2,718,300
Wholesale supply to other concession holders	168,091	47,076	26,354	241,521	195,082
Allowance for doubtful accounts receivable	-	-	(621,269)	(621,269)	(555,090)
Total Consumers and traders	1,853,098	457,282	397,936	2,708,316	2,358,292
Current assets				2,549,546	2,262,585
Non-current assets				158,770	95,707

The breakdown of the allowance for doubtful accounts, by consumer category, is as follows:

	Consolidated	
	2011	2010
Residential	316,954	248,835
Industrial	106,255	97,875
Commercial, services and others	152,240	116,476
Rural	16,359	17,334
Governmental entities	5,529	25,683
Public illumination	11,808	18,512
Public service	12,124	30,375
	621,269	555,090

The allowance for doubtful accounts is considered to be sufficient to cover any losses on the recoverability of these assets.

Changes in the allowance for doubtful accounts in 2011 were as follows:

	Consolidated
Balance at December 31, 2010	555,090
Formation of provision	163,629
Write-offs of accounts receivable	(97,450)
Balance at December 31, 2011	621,269

The Company's exposure to credit risk related to accounts receivables from consumers and traders is given in Note 28.

9. RECOVERABLE TAXES

Recoverable Taxes	Consolidated		Parent Company	
	2011	2010	2011	2010
CURRENT				
Recoverable ICMS	153,306	223,395	3,843	3,843
PIS and PASEP	32,828	26,730	-	-
COFINS	156,852	116,723	67,342	-
Other	11,140	7,582	1,385	1,390
	354,126	374,430	72,570	5,233
NON CURRENT				
Recoverable ICMS	243,029	84,746	4,334	426
PIS, PASEP and COFINS	84,919	55,137	-	-
	327,948	139,883	4,334	426
	682,074	514,313	76,904	5,659

PASEP and COFINS credits originate from acquisitions of property, plant and equipment and can be offset against state taxes payable over 48 months.

The recoverable ICMS (VAT) tax credits, recorded in non-current assets, originate from acquisitions of property, plant and equipment and can be used to offset state tax obligations over a 48 month period. The amount reclassified to current assets as of December 31, 2011 was made in accordance with management's estimates of the amounts which will be used on or before December 31, 2012.

Within the current COFINS recoverable tax credit balance at December 31, 2011, the Company holds an amount of R\$67,341 related to tax credits from Federal Revenue Department for restitution of the FINSOCIAL contribution amounts unduly collected during the period from September 1989 to February 1991. This resulted from a judicial decision made which stated that there was no legal foundation requiring the Company to pay its federal tax obligations based on the tax rate increases established in tax code effective during the abovestated period. This amount has been updated by the interest earned through year-end.

10. INCOME TAX AND SOCIAL CONTRIBUTION

a) Income Tax And Social Contribution Recoverable

The balances of income tax and social contribution refer to tax credits in the income tax returns from previous years and advance payments made in 2011, which will be offset against the amount of federal tax payable calculated for the year 2012, recorded under Taxes payable.

	Consolidated		Parent Company	
	2011	2010	2011	2010
CURRENT				
Income tax	171,294	353,196	-	-
Social contribution	49,466	136,617	-	-
	220,760	489,813	-	-
NON CURRENT				
Income tax	21,223	66,439	17,211	63,120
Social contribution	2,382	16,999	2,337	16,997
	23,605	83,438	19,548	80,117
	244,365	573,251	19,548	80,117

b) Deferred Income Tax And Social Contribution

CEMIG and its subsidiaries and jointly-control subsidiaries have income taxes and social contribution calculated at the statutory annual rates of 25% and 9%, respectively. The Company's tax credits for these taxes are comprised as follows:

	Consolidated		Parent Company	
	2011	2010	2011	2010
Tax credits:				
Tax loss carry forwards/negative basis for social contribution	631,801	570,611	337,861	260,966

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Provisions	141,921	125,412	55,697	56,354
Employee post-retirement benefits	369,306	349,989	19,807	18,105
Allowance for doubtful accounts receivable	211,928	191,866	8,629	8,899
Tax credits on absorption of subsidiary	87,835	84,166	-	-
Financial instruments	59,421	33,043	-	-
Foreign exchange variation	127,768	124,957	-	-
Taxes payable suspended liability (1)	180,623	143,109	-	-
Onerous Concession Contract	61,941	57,313	-	-
Other	163,543	120,101	2,455	1,148
	2,036,087	1,800,567	424,449	345,472

(1) Income Tax on PASEP/COFINS.

At a meeting on March 15, 2012, the Board of Directors approved the technical study prepared by Cemig's Financial and Investor Relations Committees on the forecast for future taxable profits, which shows its ability to use the deferred tax assets over a maximum period of 10 years.

Based on the study for realization of tax credits mentioned above, the Company recognized a portion of tax credits related to deferred Income Tax and Social Contribution that were not recorded in its financial statements in the amount of R\$119,850 in 2011 (R\$288,505 in 2010).

The deductible temporary differences and tax loss carry forwards do not expire under current tax law. Deferred tax assets were recognized in relation to these items as it is probable that future taxable income will be available, enabling the Company to use these tax assets.

In accordance with the individual estimates of Cemig, including its subsidiaries and jointly-controlled subsidiaries, future taxable income will allow the Company to make use of its the deferred tax assets existing at December 31, 2011, as follows:

	Consolidated	Parent Company
2012	410,956	63,071
2013	560,488	56,208
2014	366,901	46,171
2015	371,177	50,449
2016 to 2017	128,657	88,655
2018 to 2019	108,413	69,407
2020 to 2021	89,495	50,488
	2,036,087	424,449

For details regarding the Company's deferred tax liabilities, refer to Note 18 to the financial statements.

c) Reconciliation of income tax and social contribution expenses

The following table presents the reconciliation of the nominal income tax (25% tax rate) and social contribution (9% tax rate) expenses with the actual expenses incurred, as shown in the income statement:

	Consolidated		Parent Company	
	2011	2010	2011	2010
Profit before taxes	3,356,374	2,822,286	2,434,225	2,123,374

Effective rate	28.03%	19.99%	0.77%	(6.34%)
Current income tax and social contribution	(1,111,451)	(871,930)	(143,287)	(118,746)
Deferred income tax and social contribution	170,527	307,620	124,512	253,348

Income tax incentives of Transmissora Aliança de Energia Elétrica S.A. - Taesa

The Ministry of National Integration, through the Federal Agency for Development of the Northeast (ADENE) and the Federal Agency for the Development of the Amazon Region (ADA), issued Constitutive Reports 169/2004 and 0260/2003 granting some of Taesa's subsidiaries tax benefits of a 75% reduction to their income tax payable for the activity carried out in the region to which the benefits apply.

This benefit is calculated on a monthly quota of operating profit of the Northeast-Southeast line of 84.48%, which is the effective percentage of the line in the state of Bahia, an area subsidized by SUDENE (Superintendency for the Development of the Northeast).

11. ESCROW DEPOSITS

The escrow deposits refer mainly to tax and labor issues.

The main escrow deposits are mainly comprised of litigation, related to tax obligations referring primarily to withhold income tax on interest on capital, to indemnities and taxes on donations (ITCD), and to PASEP/COFINS related to exclusion of value-added tax (ICMS) from the tax basis of PASEP/COFINS, and others.

	Consolidated		Parent Company	
	2011	2010	2011	2010
Labor obligations	206,971	212,142	24,389	46,142
Tax obligations				
Income tax on interest on shareholders' capital	14,010	13,714	-	-
State inheritance and donation taxes (ITCD)	115,918	-	115,918	48,412
PASEP/COFINS	719,470	550,944	-	-
Other tax obligations	59,209	57,289	34,696	13,180
Others	272,133	193,117	100,718	87,783
	1,387,711	1,027,206	275,721	195,517

Based on a court decision made in the fourth quarter of 2011 in favor of CEMIG which deemed certain state inheritance and donation taxes (ITCD) to be refundable, in 2011 the Company recorded a total escrow deposit balance in the amount of R\$115,918 related to its refundable ITCD taxes. This balance is comprised of the tax principal of R\$48,412 and interest accrued of R\$67,506.

The balances of deposits in court in relation to the PASEP and COFINS taxes have a corresponding provision recorded under taxes payable. For more details, see Note 18.

12. ACCOUNTS RECEIVABLE FROM THE MINAS GERAIS STATE GOVERNMENT AND CRC ACCOUNT SECURITIZATION FUND

The credit balance remaining from the Recoverable Results Account (CRC) was passed on to the Government of the State of Minas Gerais in 1995, through an agreement for assignment of the Recoverable Results Account (the CRC Agreement) pursuant to Law 8724/93 for monthly amortization over seventeen years, as from June 1, 1998, with interest of 6% per year, restated monthly by the Fiscal Reference Unit (UFIR).

The CRC Agreement was modified by certain amendments commencing in 2001 (First Amendment to CRC Agreement) that addressed issues relating to remuneration of the receivable, which replaced the monetary updating unit in the agreement from UFIR to IGP-DI inflation index, backdated to November 2000, due to the abolition of the UFIR in October 2000, and certain guarantees relating to dividend retention by the State Government.

The Second and Third Amendments to the CRC Agreement were signed in October 2002, setting new conditions for amortization of the credits receivable from the Minas Gerais State Government. The main clauses were: (i) monetary updating by the IGP-DI; (ii) amortization of the two amendments by May 2015; (iii) interest rates of 6.00% and 12.00% for the Second and Third Amendments, respectively; and (iv) guarantee of retention, in full, of dividends becoming due to the Minas Gerais State Government for settlement of the Third Amendment.

a) Fourth Amendment to the CRC Agreement

As a result of default in receipt of the receivables specified in the Second and Third Amendments, the Fourth Amendment was signed, with the aim of making possible full receipt of the CRC balance through retention of the dividends due to the State Government. This agreement was approved by the Special General Stockholders Meeting of held on January 12, 2006.

The Fourth Amendment to the CRC Agreement had its effect backdated to the debit balance existing at December 31, 2004, and consolidated the balances receivable of the Second and Third Amendments, corresponding to R\$5,580,195 as at December 31, 2011 (R\$5,070,376 as at December 31, 2010).

The Minas Gerais State Government amortizes the debt in 61 consecutive semi-annual payments, which are due on June 30 and December 31 of each year, over the period from June 2005 to June 2035. The payments for amortization of the principal, restated by the IGP-DI, increase over the period, from R\$28,828 for the first payment to R\$105,336 for the 61st payment, at the values for December 31, 2011.

The Company is recognizing the State Government's payments by withholding 65% of the regular dividends and interest on capital due to the State Government. If the 65% of regular dividends and interest on capital is not sufficient to amortize the installment due in a given month, the Company may increase its withholding to include 65% of all extraordinary dividends as well. The dividends withheld will be applied in the following order: (i) the settlement of past due installments, (ii) the settlement of the semi-annual installments, (iii) the pre-payment of up to 2 installments; and (iv) the payment of the remaining principal balance.

As at December 31, 2011 the installments due for June 30 and December 31, 2012 had already been received.

As part of the Fourth Amendment to the CRC Agreement, in order to ensure complete receipt of the credits, the Company agreed to a requirement in which, on an annual basis, it must maintain compliance with the financial covenants in conformity with its Strategic Plan and as set forth in its by-laws, as follows:

Target	Index required
Debt / EBITDA	Less than 2 (1)
Debt / (Debt + Shareholders' equity)	Less than or equal to 40.00% (2)
Capex on investments and acquisition of assets	Less than or equal to 40.00% of EBITDA

EBITDA = Earnings before interest, taxes on profit, depreciation and amortization.

- (1) Less than 2.5 in certain situations specified in the by-laws.
- (2) 50% or less, in certain temporary situations also specified in the by-laws.

As at December 31, 2011, the Company was not in compliance with the index requirement for CAPEX on investments and acquisition of assets/EBITDA, holding an index of 74.38%. At the Extraordinary Shareholders' General Meeting in 2012, the Company will present a request for to increase the upper limit of the index required.

b) Creation of Cemig CRC Account Securitization Fund

On January 27, 2006, Cemig transferred the accounts receivable from the CRC Account Agreement to a credit securitization investment fund (FIDC). The value of the FIDC was established by the Fund administrator, based on CEMIG's long term financial predictions, estimating the dividends that will be withheld for amortization of the debit balance of the CRC agreement. Based on these projections, the FIDC, on that date, was valued at the total amount of R\$1,659,125, of which R\$900,000 are senior quotas and R\$759,125 are subordinated quotas.

The senior quotas were acquired by financial institutions and are being amortized in 20 semi-annual installments, starting in June 2006, with interest accruing at the rate of CDI plus 1.7% per year, and are guaranteed by CEMIG.

The subordinated quotas were subscribed by Cemig and correspond to the difference between the total value of the FIDC and the senior quotas.

The subordinated quotas are updated for monetary valuation purposes in the amount of the difference between the valuation of the FIDC using a rate of 10% per year and the increase in value of the senior quotas, as calculated based on CDI plus 1.7% per year.

The composition of the CRC Account Securitization at December 31:

	2011	2010
- Senior quotas held by third parties	819,997	890,517
- Subordinated quotas owned by Cemig	1,001,179	938,704
- Dividends retained by the Fund	8,899	7,867
TOTAL	1,830,075	1,837,088

The changes to the amounts receivable in connection with the CRC Account Securitization Fund in 2011 and 2010 were as follows:

	Consolidated and Parent Company
Balance at December 31, 2010	1,837,088
Monetary updating of the senior quotas	102,712
Monetary updating of the subordinated quotas	63,508
Investment in the subordinated quotas	14,075
Amortization of the senior quotas	(187,308)
Balance at December 31, 2011	1,830,075

On December 21, 2011, Cemig set aside R\$86,617 for purposes of paying dividends and R\$9,712 for purposes of making a contribution to the Fund to pay the minimum senior quota amounts payable and other operating expenses of the FIDC. The total cash disbursement in the amount of R\$94,185 for amortization of senior quotas was made in January 2012.

The dividends to be distributed to shareholders arising from net income recorded for the period ended December 31, 2011, as declared by the Executive Board and the Board of Directors, in accordance with the Company's by-laws, are classified as current liabilities in the consolidated financial statements. Of the total dividends to be distributed, R\$265,700 is payable to the Minas Gerais State Government, and R\$172,705 will be retained for settlement of part of the CRC Account Receivable.

c) Criteria for Consolidation of the CRC Account Securitization Fund (FIDC)

As Cemig is the guarantor for the senior quotas, and, in the event that the withholdings for dividends due to the Minas Gerais State Government are not sufficient to cover the installment amounts due, Cemig would be required to issue a dividend payment to the State Government for the difference. As such, the consolidated financial statements present the balance of the FIDC fully recorded in Cemig, and the senior quotas are presented as debt under loans and financing in current and non-current liabilities. Similarly, upon consolidation, the monetary updating of the FIDC has been fully recognized as financial income, and the amount of the monetary updating of the senior quotas is recorded as a financial expense.

d) Negotiation for the advanced payment of account receivable from the Minas Gerais State Government - CRC

On November 9, 2011, the Company reported to shareholders and the market that the Company entered into discussions with representatives from the Minas Gerais State Government to negotiate an early settlement of the CRC account receivable. Negotiations are in progress, and once completed, would also be subject to relevant regulatory approval. It is not yet possible to measure the potential impacts on the Company's financial statements.

13. FINANCIAL ASSETS OF THE CONCESSION

As described in Note 2, Item 2.6 (g), the Company's distribution, transmission, gas and wind generation concession contracts are within the criteria for application of IFRIC 12 Service Concession Arrangements). At the end of the concession period, the grantor will provide indemnity to the Company for the unamortized value of the concession assets according concession agreement between CEMIG and ANEEL and effective legislation and regulatory rules.

The balances of the financial assets as of December 31, 2011 and 2010 are as follows:

	Consolidated	
	2011	2010
Distribution concessions	3,331,311	2,509,339
Gas concessions	304,616	287,425
Newer transmission concessions	5,503,592	4,399,627
Older transmission concessions	758,338	744,697
	9,897,857	7,941,088
Current assets	1,120,035	625,332
Non-current assets	8,777,822	7,315,756

For newer transmission concessions, the internal rate of return of financial assets ranged between 7.8% and 14.48%, in accordance with the specified characteristics of each concession and their investment dates.

14. INVESTMENTS

The balances of our investments in financial assets as of December 31, 2011 and 2010 are as follows:

	Parent Company	
	2011	2010
In subsidiaries and jointly-controlled subsidiaries		
Cemig Geração e Transmissão	5,086,076	5,050,645

b) Less Value of Assets in Acquisitions in Interests of Subsidiaries and Jointly-Controlled Subsidiaries

In the first acquisition of Light, a less value of the concession corresponding to the difference between the amounts paid in 2006 for the acquisition of an interest and the net book value of the interest in the equity of Light is recorded in the amount of R\$91,240. This less value arises from the estimate of future years commercial operating results of electricity distribution and generation concessions throughout the concession period, and is being amortized on a straight-line basis from October 2006 to the concession's expiration date in May 2026. The remaining amount of the deficit value is R\$66,883 at December 31, 2011 (R\$71,523 at December 31, 2010).

c) Added Value of Assets in Acquisitions in Interests of Subsidiaries and Jointly-Controlled Subsidiaries

In accounting for equity interest acquisitions of wholly-owned and jointly-controlled subsidiaries, the Company records an added value to account for the difference between the amount paid and the net book value of the equity interest acquired. This difference arises due to certain intangible asset values of the concessions (added value of concessions) acquired and financial concession asset values acquired. The Company records the amortization of the added value of assets which have defined useful lives on a straight-line basis over the remaining period of the concession contract.

d) Acquisition of Additional Interest in Light

Acquisition of Additional Interest in 2010

On March 25, 2010, the Company executed a Purchase and Sale Agreement and made payment for its acquisition of 25,494,500 common shares in Light from Andrade Gutierrez Concessões (AGC) at R\$29.54 per share, which represented 12.50% of Light's total registered capital and voting shares

outstanding. The purchase price paid by Cemig totaled approximately R\$718,518, which includes the amount stipulated in the contract between the Company and AGC, an adjustment based on the index published by CETIP (Securities Settlement and Custody Center) from December 1, 2009 to March 25, 2010, and a deduction for the dividends that Light declared in the amount of R\$2.12 per share in its Ordinary General Meeting of Stockholders on March 24, 2010.

On November 17, 2010, the Company paid for and obtained an additional 1,081,649 common shares in Light from AGC at approximately R\$30,471, the acquired interest of which represented approximately 0.53% of Light's total registered capital and voting shares outstanding.

In its acquisition of the interest in Light from AGC, the Company recognized a premium in the amount of R\$359,184 for the added value of the concession acquired.

Acquisition of Additional Interest in April 2011

On April 12, 2011 Parati S.A. Participações em Ativos e Energia Elétrica (Parati) made payment for its acquisition of 54.08% of the total registered capital of Redentor Energia S.A. (Redentor). The purchase price paid totaled R\$403,350 for the shares at a price of R\$6.87 per share. Redentor holds 13.03% of the total registered capital and voting shares of Light.

As this transaction resulted in the transfer of the control of Redentor, Parati made a public offer to acquire the remaining shares of Redentor.

On September 30, 2011, Parati made a public offer and through an auction acquired 93.04% of the outstanding shares from the minority shareholders. In this acquisition, Parati paid R\$7.20 per share, corresponding to the total amount of R\$333,775. This acquisition represented 42.72% of the shares of the capital, and the price of R\$6.87 represented the same price per share paid to the controlling shareholder on May 12, 2011, updated by the Selic rate from that date until September 30, 2011.

In the first semester of 2012 Parati plans to make another public offering in order to acquire the remaining common shares (representing 3.20% of the total capital) of Redentor's capital. In doing so, Redentor will be de-register from its status as a publicly-held company and will exit from the free market.

Acquisition of Additional Interest in July 2011

On July 7, 2011 Parati acquired a 100% interest in Luce, owner of 75% of the shares of Luce Brasil Fundo de Investimento em Participações (FIP Luce), which through Luce Empreendimentos e Participações S.A. indirectly holds 9.77% of the total and voting capital of Light.

The amount paid for Parati's acquisition was R\$515,946. In accordance with FIP Luce's Shareholders' Agreement, after Parati acquired a controlling ownership in FIP Luce, Braslight (Foundation Braslight

Social Security) had an option valid for 60 days in which it could exercise a right to sell its remaining 25% interest to Parati.

On July 15, 2011, Parati was notified through Luce that Braslight decided to exercise its right to sell its 25% interest in FIP Luce. On July 28, 2011, the sale transaction was executed and Parati acquired the remaining 25% interest in FIP Luce for R\$171,982.

As a result of the above acquisitions, Parati now holds 25.68% of Light's voting capital. Cemig holds a 25% interest in Parati, and Redentor Fundo de Investimento em Participações holds the remaining 75% interest.

At Cemig's Extraordinary General Meeting of the Shareholders held on March 24, 2011, the shareholders granted a put option to Fundo de Investimento em Participações Redentor (FIP Redentor), in which FIP Redentor will

have the right to sell to CEMIG the totality of its shares in Parati S.A. Participações em Ativos de Energia Elétrica (Parati) at the end of the 60th month from the date of the shares were issued to FIP Redentor on March 24, 2011. Cemig will have the obligation to buy them or to indicate a third party to purchase them. The exercise price will be the amount originally paid by FIP Redentor for the shares, plus other expenses for constitution and administration of FIP Redentor, updated by the CDI rate plus 0.9% per year.

e) Acquisitions of equity interests - Renova

On July 9, 2011, the Company, through Light, approved a partnership with Renova Energia, a publicly traded company which invests in small hydroelectric power plants (PCHs) and wind power plants.

Light, as a new investor, and Renova, as the investee, signed an Investment Agreement under which Light will pay R\$360,000 to acquire common shares and an equity interest in Renova. Renova will conduct a new common share issuance, and Light's acquisition will be executed under the following terms:

Through this investment, Light will hold 35.1% of the common shares of Renova and 26.2% of its total capital. Additionally, all shareholders with individual equity interests of more than 5% of Light's capital have agreed to freely renounce their rights of first refusal in the increase in Renova's capital in favor of Light.

The investment does not result in a forfeiture of control by RR Participações S.A. (controlling shareholder of Renova) for purposes of Article 254-A of the Brazilian Corporate Law nor an acquisition of a controlling ownership in Renova by Light.

f) Acquisitions in equity interests - CR Zongshen E- Power Fabricadora de Veículos S.A. (E-Power)

On September 9, 2011, Light acquired 20% of the registered common shares issued by E-Power for R\$120. Through a shareholders' agreement, joint control was established between Light and E-Power. There was no difference between the fair value and the amount paid by Light for its 20% equity interest.

g) Acquisition of equity interests - ABENGOA

On June 2, 2011, TAESA signed two Share Purchase Agreements with the ABENGOA Group:

- The first is for acquisition of 50% of the shares held by Abengoa Concessões Brasil Holding S.A. in the registered capital of Abengoa Participações Holding S.A., which on the closing date of the transaction owned 100% of the recorded capital of the following transmission companies:

STE Sul Transmissora de Energia S.A.;

ATE Transmissora de Energia S.A.;

ATE II Transmissora de Energia S.A.;

ATE III Transmissora de Energia S.A.;

- The second is for acquisition of 100% of the shares held by Abengoa Concessões Brasil Holding S.A. and by Abengoa Construção Brasil Ltda. in the recorded capital of NTE - Nordeste Transmissora de Energia S.A.

On November 29, 2011, TAESA concluded its execution of the above purchase transactions and paid a total of R\$1.17 billion in exchange for the equity interests acquired. This operation increased TAESA's share in the electricity transmission market from 6.5% to 8.6% in terms of Permitted Annual Revenue (RAP).

h) Acquisitions of equity interests - Norte Energia S.A.

In October 2011, the Boards of Directors of Cemig and Light approved the acquisition of 9.77% of the capital of North Energia S.A., a company holding the concession for the construction and operation of the Belo Monte hydroelectric power plant. The acquisition was made by Amazon Energy, a company in which Light holds 51% of the common shares, and Cemig Geração e Transmissão holds 49% of the common shares and 100% of the preferred shares. The total price paid by Amazon Energy on November 1, 2011 to acquire these shares in NESA was R\$88,424, and refers to the reimbursement of the total capital investments made by the sellers, increased by the IPCA (Amplified Consumer Price Index) until October 26, 2011.

i) Acquisition of additional equity interest in Gasmig

On December 27, 2011, the Board of Directors approved the acquisition of registered preferred shares in Gasmig, representing 4.38% of Gasmig's total capital, from the Minas Gerais State Government for

R\$67,223. The Board approved this acquisition to be made at a price per share of approximately R\$3.75. The execution of this acquisition is subject to the following conditions:

- An independent appraisal to determine the fair value of Gasmig's capital, which will be made by a specialized institution chosen and contracted by CEMIG.
- MGI-Minas Gerais Participações S.A. must complete in its entirety the transfer its equity interest in Gasmig to the Minas Gerais State Government.

j) Acquisition of an interest in EATE and ETEP

In 2011, the Company acquired from Eletrobrás the preferred shares of EATE and ETEP corresponding to 11.45% and 8.02% of the capital of these companies, respectively. The total amount paid for those additional interests were R\$91,060 and R\$13,145, respectively, resulting in a total amount paid of R\$104,205. In connection with this acquisition, a less value of R\$99,771 was recorded which represents the excess value of EATE and ETEP's book value over the amount paid. This value will be amortized on a straight-line basis over the remaining term of the concessions.

15. PROPERTY, PLANT AND EQUIPMENT

Consolidated	December 31, 2011			December 31, 2010		
	Historical Cost	Accumulated depreciation	Net value	Historical Cost	Accumulated depreciation	Net value

Buildings, works and improvements	2,319,093	(1,560,550)	758,543	2,286,827	(1,441,734)	845,093
Machinery and equipment	8,233,445	(5,362,640)	2,870,805	7,663,881	(4,940,785)	2,723,096
Vehicles	25,775	(16,017)	9,758	17,590	(6,753)	10,837
Furniture and fixtures	58,741	(47,930)	10,811	18,860	(11,311)	7,549
In progress	1,632,103	-	1,632,103	1,231,133	-	1,231,133
Assets under construction	1,632,103	-	1,632,103	1,231,133	-	1,231,133
Total Property, Plant and Equipment	20,684,229	(12,022,438)	8,661,791	19,272,267	(11,043,754)	8,228,513

The changes in property, plant, and equipment from December 31, 2010 to December 31, 2011 are as follows:

Consolidated	Balance at 12/31/2010	Additions / transfers	Write-off	Accumulated depreciation	Balance at 12/31/2011
In Service	6,997,380	523,374	(15,159)	(475,907)	7,029,688
Land	411,000	13,751	(23)	-	424,728
Reservoirs, dams and water courses	2,999,805	105,673	(10)	(150,425)	2,955,043
Buildings, works and improvements	845,093	(27,893)	(69)	(58,588)	758,543
Machinery and equipment	2,723,096	418,927	(12,868)	(258,350)	2,870,805
Vehicles	10,837	5,304	(2,184)	(4,199)	9,758
Furniture and fixtures	7,549	7,612	(5)	(4,345)	10,811
In progress	1,231,133	400,970	-	-	1,632,103
Total Property, Plant, and Equipment	8,228,513	924,344	(15,159)	(475,907)	8,661,791

The Company has not identified any indications of impairment with regards to its property, plant, and equipment. The concession contracts specify that, at the end of the concession contract period of each concession, the grantor will decide the amount to be indemnified to the Company. Management believes that the undepreciated book value of property, plant and equipment at the end of the concession period will be the amount to be reimbursed to the Company by the granting authority.

ANEEL, in conformity with the Brazilian regulatory framework, is responsible for establishing and periodically reviewing the estimates of useful economic life for generation and transmission assets in the electricity sector. The estimates of useful life established by the ANEEL are used in the processes for reviewing tariff rates and calculating the indemnification due to the concessionaires at the end of the concession period. These are recognized by the Company as reasonable and were used as the basis for depreciation of the Company's property, plant and equipment.

The average annual depreciation rate is 2.31%. The main rates applied to the subsidiaries for the year ended December 31, 2011 are as follows:

Generation	
Hydroelectric power plants	2.54%
Thermoelectric power plants	4.09%
Management and other	9.53%
Telecommunications	7.33%

Under Articles 63 and 64 of Decree 41019 of February 26, 1957, goods and facilities used in generation and transmission are entailed to these services and cannot be withdrawn, disposed of, assigned or given in mortgage guarantees without the express, prior authorization of the Regulator. ANEEL Resolution 20/99 provides regulations for disposition of assets of public electricity service concessions. These include granting prior authorization for disposition of assets that are not appropriate for serving the concession and are earmarked for disposal, but they require the proceeds to be deposited in a blocked bank account, to be invested in the concession.

Some of the Company's land and buildings recorded as Property, plant and equipment - Administration, were pledged in guarantee for court proceedings involving tax, labor, civil and other contingencies in the amount, net of depreciation, of R\$850 at December 31, 2011.

Consortia

Cemig is a partner in concession consortia for electricity generation projects. Each partner has the right to take electric power generated by the power plant in an amount proportional to its investment. These projects are governed by executor contracts which establish the rights and obligations of each party. Cemig's participation in consortia, represented by amounts invested in the projects and which are included in the previous table, is as follows:

	Share in the electricity generated	Average annual rate of depreciation %	2011	2010
In service:				
Porto Estrela Power Plant	33.33%	2.48	38,715	38,627
Igarapava Power Plant	14.50%	2.58	57,017	55,554
Funil Power Plant	49.00%	2.55	183,124	182,360
Queimado Power Plant	82.50%	2.62	208,618	206,729
Aimorés Power Plant	49.00%	2.62	551,310	549,537
Baguari Power Plant	34.00%	2.56	181,416	-
Consórcio Capim Branco Energia S.A.	21.05%	2.60	56,240	56,240
Accumulated depreciation			(193,372)	(171,321)
Total, in service			1,083,068	917,726
In progress:				
Baguari Power Plant			75	181,416
Queimado Power Plant	82.50%		3,388	1,579
Funil Power Plant	49.00%		-	648
Aimorés Power Plant	49.00%		700	1,187

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Igarapava Power Plant	14.50%	461	1,171
Porto Estrela Power Plant	33.33%	119	156
Consórcio Capim Branco Energia S.A.		1,083	1,264
Total in progress		5,826	187,421
Total, consortia		1,088,894	1,105,147

The depreciation of the assets in the property, plant and equipment of the consortia is calculated by the straight-line method, based on rates established by ANEEL.

In 2008 the Company transferred its interest in the Baguari Plant to the jointly-controlled subsidiary Baguari Energia S.A. ANEEL approved the transfer of the concession on February 2, 2010.

The table below shows, by project, the interests of the other partners in the electric power generated by the consortia:

Consortium - Power Plants	Consortium participants, other than Cemig	Interest (%)
Porto Estrela Power Plant	Companhia de Tecidos Norte de Minas Gerais Coteminas	33.34
	Vale S.A.	33.33
Igarapava Power Plant	Vale S.A.	38.15
	Companhia Mineira de Metais CMN	23.93
	Companhia Siderúrgica Nacional CSN	17.92
	Mineração Morro Velho MMV	5.50
Funil Power Plant	Vale S.A.	51.00
Queimado Power Plant	Companhia Energética de Brasília	17.50
Aimorés Power Plant	Vale S.A.	51.00
Baguari Power Plant	Furnas Centrais Elétricas S.A.	15.00
	Baguari I Geração de Energia Elétrica S.A.	51.00
Amador Aguiar I and II Power Plants	Vale S.A.	48.43
	Comercial e Agrícola Paineiras Ltda	17.89
	Companhia Mineira de Metais CMM	12.63

DEEMED COST OF THE GENERATION ASSETS

Cemig, in compliance with Technical Interpretation ICPC 10 Property, plant and equipment, revalued its generation assets, defining their fair value by the replacement cost on initial adoption of international accounting standards on January 1, 2009. This revaluation process did not change the estimated useful life of the assets, as the estimates are determined and established by ANEEL.

This new revaluation resulted in an increase in the value of those assets, which was recorded in a specific shareholders' equity account called Equity Valuation Adjustments with the adjusted also reflected in the Company's shareholders' equity.

Fully Depreciated Assets

As at December 31, 2011, Cemig GT held a gross carrying amount of R\$3,623,645 related to fully depreciated assets that are still in operation.

16. INTANGIBLE ASSETS

Parent Company	2011			2010		
	Historical cost	Accumulated amortization	Residual value	Historical cost	Accumulated amortization	Residual value

Concession Assets

In conformity with Technical Interpretation ICPC 01, accounting for concessions, the portion of the distribution infrastructure that will be used during the concession period, consisting of the distribution assets, net of consumer interests (special obligations), was recorded in Intangible Assets.

ANEEL, in conformity with the Brazilian regulatory framework, is responsible for establishing the economic useful life of distribution assets in the electricity sector, periodically establishing a review of the valuation assessment of these rates. The rates established by the Agency are used in the tariff review process and the calculation of compensation at the end of the concession and they are recognized as a reasonable estimate of the useful life of the concession's asset. Accordingly, these rates were used as the basis for evaluation and amortization of the intangible assets.

The easement, onerous concession, concession assets and other intangible assets, are amortized on a straight-line basis and the rates used are those defined by ANEEL. The Company has not identified evidence of loss through impairment of its intangible assets, which have a definite useful life. The Company has no intangible assets with an indefinite useful life.

Fully amortized assets

As at December 31, 2011, Cemig Distribuição has a gross carrying amount of R\$1,551,819 related to fully amortized assets that are still in operation. It should be noted that these assets are not considered for determining the Company's tariffs.

17. SUPPLIERS

	2011	Consolidated	2010
Supply and transport of electricity			
Eletrobrás - Power from Itaipu	198,280		150,953
Furnas Centrais Elétricas S.A.	55,464		30,555

UTE Norte Fluminense	38,392		19,200
Purchase of electricity at auctions	63,904		39,155
Others	364,907		345,361
	761,273		712,313
Materials and services	428,575		408,696
	1,189,848		1,121,009

18. TAXES PAYABLES

a) Taxes payable

The non-current liabilities for PASEP and COFINS refer to the legal action challenging the constitutionality of the inclusion of ICMS in the calculation basis for these taxes, and, the offsetting of the amounts paid in the last 10 years has been requested. The Company and its subsidiaries Cemig Distribuição and Cemig Geração e Transmissão have obtained a Court injunction enabling them not to make the payment and authorizing payment in Court from 2008 until August, 2011. Thereafter, the Company opted to pay the new taxes each month.

	Consolidated		Parent Company	
	2011	2010	2011	2010
Current				
ICMS (Value-added tax)	329,696	277,202	18,091	18,095

TOTAL	non-convertible into shares	6,038,550				

(1) With no renegotiation clause and no debentures in cash.

(2) Complied fully with the covenants.

a) Covenants

Cemig and its subsidiaries Cemig Distribuição and Cemig Geração e Transmissão have contracts for loans and financing which contain covenants, requiring compliance on a semi-annual basis at the end of June and December each year.

At December 31, 2011, one of Cemig's clauses was not complied with. However, the company obtained consent from its creditors prior to the stipulated date that they would not exercise their rights to demand immediate or early payment of amounts owed before December 31, 2012.

As of December 31, 2011, two clauses of Cemig Geração e Transmissão were not complied with. The formal consent (waiver) that its creditors will not exercise their rights to demand early or immediate payment of the total amount was obtained on March 14, 2012, after the closing date of the financial statements; Accordingly, the contracts whose clauses were not complied with are recognized in current liabilities. The amount reclassified to the current liabilities as a result of the covenants was R\$1,917,347.

The covenants of contracts for loans and financings of the other subsidiaries and jointly-controlled subsidiaries were fully complied with as of December 31, 2011 and 2010.

The following are the main covenants:

Description of the covenant	Index required
Debt/EBITDA;	Less than or equal to 2.5
Debt/EBITDA;	Less than or equal to 3.36
Net Debt /EBITDA	Less than or equal to 4.00
Current Debt/EBITDA	Less than or equal to 105%
Debt/Shareholders' Equity + Debt	Less than or equal to 65%
EBITDA/Debt Charges	Greater than or equal to 2.8
EBITDA/Juros	Greater than or equal to 3.0
EBITDA/Financial Result	Greater than or equal to 2.0
Investment/EBITDA	Less than or equal to 75%

Net debt = Total debt less the sum of (the cash balance plus tradable securities).

EBITDA = Earnings before interest, taxes (on profit), depreciation and amortization. Specific criteria for the calculation of EBITDA are made in some contracts, with some variations with respect to this formula.

Three covenants were not complied with as of and for the year ended December 31, 2011, as follows:

Description of the covenant	Index required	Actual index as at Dec 31, 2011
Cemig		
Debt / EBITDA	Less than or equal to 2.5	2.75
Cemig Geração e Transmissão		
Current Debt/ EBITDA	Less than or equal to 105%	133.40%
Debt / (Shareholders' equity + Debt)	Less than or equal to 61%	62.14%

b) Debentures

The debentures issued by the Company's subsidiaries and jointly-controlled subsidiaries are simple, non-convertible.

c) Commercial promissory notes

On December 28, 2011 the Company concluded the 4th issuance of commercial promissory notes in the total amount of R\$1,000,000 through a public offering for distribution with restricted placement efforts, under the regime of a firm guarantee of subscription through a public offering, in the terms of CVM Instruction 476/09.

The Company issued 100 (one hundred) of notes, with a nominal unit value of R\$10,000 each one, with maturity on December 22, 2012. The nominal unit value will not be updated. The notes will be remunerated at the effective rate of 106% of the interbank deposit rate (DI), calculated by CETIP S.A. Mercados Organizados. The total amount raised will be used for acquisition of asset and replenishment of cash due to investments made by the Company.

d) Issuance of debentures of Light SESA

In May, 2011 Light SESA concluded its 7th issuance of unsecured debentures, non-convertible into shares, in the total amount of R\$650,000 through a public offering, for distribution with restricted placement efforts, under the regime of a firm guarantee of subscription, in the terms of CVM Instruction 476/09.

The debentures were issued on May 2, 2011, with an entry of funds in cash on May 5, 2011, and they will be remunerated at the effective rate of 100% of the CDI plus a spread of 1.35% p.a. defined in a bookbuilding process, with half-yearly payments of interest and final maturity on May 2, 2016.

In May 2011 Light Energia concluded its 1st issuance of unsecured debentures, non-convertible into shares, in the total amount of R\$170,000 through a public offering, for distribution with restricted placement efforts, under the regime of a firm guarantee of subscription, in the terms of CVM Instruction 476/09.

The debentures were issued on April 10, 2011, with an entry of funds in cash on May 12, 2011, and they will be remunerated at the effective rate of 100% of CDI plus a spread of 1.45% p.a. with half-yearly payments of interest and final maturity on April 10, 2016.

21. EMPLOYEE POST-RETIREMENT BENEFITS

The Forluz Pension Fund

The Company sponsors a pension plan, administered by Fundação Forluminas de Seguridade Social (Forluz) covering substantially all its employees. The purpose of the pension plan is to provide the plan's members and participants, and their dependents, with additional financial income to complement their retirement.

On December 31, 2004, the actuarial liabilities and the plan's assets were separated and allocated between Cemig, Cemig Geração and Transmissão and Cemig Distribuição, based on the proportion of employees in each of these Companies.

FORLUZ provides the following supplementary pension benefit plan for its participants:

Mixed Benefits Pension Plan (Plan B): This plan operates as a defined-contribution plan during the phase of accumulation of funds for retirement benefits for normal time. The plan operates as a defined-benefit plan, providing disability and life insurance benefits for active employees and receipt of benefits for time contributed. The sponsors match the basic monthly contributions of the participants. Plan B is the only plan open for enrollment by new participants.

The sponsors' contribution to this plan is 27.52% for the portion with defined benefit characteristics, related to the coverage for disability or death for the active participant, and this is used for amortization of the defined obligation through actuarial calculations. The remaining 72.48%, related to the portion of the plan with defined-contribution characteristics, goes to the nominal accounts of the participants and is recognized in the current income statement as and when the Company makes payments, under Personnel expenses.

Paid-off Benefits Pension Plan (Plan A): This plan includes all currently employed and assisted participants

who elected to migrate from the Company's previously sponsored defined benefit plan, and who are entitled to a proportional paid-off benefit. For active employees, this benefit has been deferred until the date of retirement.

Cemig, Cemig Geração e Transmissão and Cemig Distribuição also maintain, independently of the plans made available by FORLUZ, payments of part of the life insurance premium for the retirees, and contribute to a health plan and a dental plan for the active employees, retired employee and dependents, administered by FORLUZ.

Separation of the Health Plan into Cemig Saúde

On August 26, 2008, FORLUZ's Executive Council, complying with orders issued by the Department of Supplementary Pensions (SPC), decided to transfer the management of Cemig's Integrated Health Plan (PSI), to another entity to be created for this purpose, called Cemig Saúde. The reasoning as to why SPC issued such orders was that it believed it would be difficult if not impossible for health plans to retain participants that were not also participants in the companies' pension and retirement plans. The dental and pension plans are still managed by FORLUZ. The process of separating PSI into Cemig Saúde was concluded in 2010, and all existing benefits and coverages were kept.

Amortization of Deficit in Actuarial Reserves

In this Note the Company presents its actuarial obligations and expenses incurred for purposes of the Retirement Plan, Health Plan, Dental Plan and Life Insurance Plan in accordance with the standards set forth in CPC 33 (Employee Benefits) and an independent actuarial report prepared as of December 31, 2011.

The Company recognized an obligation for post-employment benefits, in the amount of R\$846,572 as at December 31, 2011 (R\$868,178 as at December 31, 2010) related to actuarial losses from prior years related to the pension fund. These obligations are being amortized in monthly installments, until June 2024, and are calculated under the fixed-installment system (Price Table). After the Third Amendment to the FORLUZ Agreement, the amounts began to be adjusted only by the Amplified National Consumer Price Index (IPCA) published by IBGE (Brazilian Institute of Geography and Statistics), plus 6% per year.

The post-employment obligation, as included in the Company's consolidated statement of financial position, represents the difference between the amount of debt as agreed-upon with FORLUZ for amortization of the actuarial obligations and the actuarial liability to the pension fund, as calculated by an independent actuary. Because the Company is required to pay this debt even if FORLUZ has a surplus, the Company recorded the debt in full against shareholders' equity on the transition date and then recorded the impacts related to monetary updating and interest in the financial result.

The Braslight Pension Fund

Light is a sponsor of *Fundação de Segurança Social Braslight* (Braslight), a non-profit private pension plan entity whose purpose is to guarantee retirement revenue for Light employees subscribed with the Foundation, and a pension to their dependents.

Braslight was established in April 1974, and has four plans A, B, C and D implemented in 1975, 1984, 1998 and 2010, respectively. Around 96% of the active participants that were formerly in plans A and B have migrated to plan C.

While Plan A and Plan B are defined-benefit plans, Plan C is a mixed plan in which the specified benefits (retirement not arising from disability, and the respective pension reversal), during the capitalization phase are treated as a defined-contribution, without any connection with the INSS (National Institute of Social Security), and the risk benefits (health care assistance, retirement for disability, and life insurance benefits), as well as those of continued post-retirement income, once granted, are treated as a defined benefit. In Plan D, the benefits are the defined contributions before and after their concession.

On October 2, 2001, the Department of Supplementary Pensions approved a resolution with regards to the actuarial deficit and refinancing of the Braslight amortizable pension plan reserve, which were then fully recognized. Based on this resolution, the reserve is being amortized on a straight-line basis in 300 monthly installments, starting in July 2001. The installments are monetarily updated for variations in the IGP-DI plus 6% interest per year. As of December 31, 2011, the Braslight pension plan reserve totaled to R\$1,095,211 (R\$1,016,185 as of December 31, 2010). The proportion of the reserve, amortization, and related accumulated amortization, consolidated into Cemig's consolidated financial statements was 32.48% based on its percentage ownership in Light as of December 31, 2011 (26.06% in 2010).

The liabilities and expenses recognized by Light in connection with the supplementary retirement plan are adjusted in accordance with the terms of CPC 33 (Employee Benefits) and in conformity with the information as provided in a report by independent actuaries. The 2011 independent actuarial valuation was performed as of December 31, 2011.

Independent Actuarial Information

The tables below present Cemig's consolidated actuarial information for the years ended December 31, 2011, which includes the additional amount related to the proportional consolidation of Light, as mentioned above:

	Pension plans and retirement supplement plans	Health Plan	Dental Plan	Life Insurance
Present value of funded obligations	7,253,700	626,357	18,048	539,695
Fair value of the plan's assets	(6,893,141)	-	-	-
Present value of unfunded obligations	360,559	626,357	18,048	539,695
Unrecognized actuarial gains (losses)	95,948	(58,963)	12,670	(53,190)
Net liabilities	456,507	567,394	30,718	486,505
Addition amount related to the debt to Forluz	390,074	-	-	-
Total net liabilities	846,581	567,394	30,718	486,505

As previously mentioned, the Company records an additional obligation corresponding to the difference between the obligation for supplementing the retirement pensions stated in the actuarial report and the debt agreed upon with FORLUZ.

The unrecognized actuarial gains and losses that exceeded 10% of the total post-employment benefit obligations will be recognized in the income statement over approximately 11 years, which is the average time of future service of present active participants, since 2009.

The changes in the present value of the Company's defined-benefit obligations from December 31, 2010 to December 31, 2011 were as follows:

	Pension plans and retirement supplement plans	Health Plan	Dental Plan	Life Insurance
Defined-benefit obligation as of 12/31/2010	6,656,772	574,778	17,018	466,303
Cost of current service	7,437	10,577	319	4,692
Interest on the actuarial obligation	673,159	57,998	1,715	48,241
Employee Contributions	31	-	-	-
Actuarial losses (gains) recognized	420,907	38,193	(201)	31,201
Benefits paid	(504,606)	(55,189)	(803)	(10,742)
Defined-benefit obligation as of 12/31/2011	7,253,700	626,357	18,048	539,695

The changes in the fair value of the plan assets of the plans from December 31, 2010 to December 31, 2011 were as follows:

	Pension plans and retirement supplement plans
Fair value of the plan assets of the plan as of 12/31/2010	6,540,232
Expected return	729,648
Employer Contributions	127,836
Employee Contributions	31
Benefits paid	(504,606)
Fair value of the plan assets of the plans as of 12/31/2011	6,893,141

The amounts recognized in the income statement for the year ended December 31, 2011 were as follows:

	Pension plans and retirement supplement plans	Health Plan	Dental Plan	Life Insurance
Current service cost	7,437	10,577	319	4,692

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Interest on the actuarial obligation	673,159	57,998	1,715	48,241
Expected return on plan assets	(732,227)	-	-	-
Actuarial losses (gains) recognized	-	339	(645)	315
Expense in 2011 as per the actuarial report	(51,631)	68,914	1,389	53,248
Adjustment related to debt with FORLUZ	157,870	-	-	-
Total expense recorded in 2011	106,239	68,914	1,389	53,248

The changes in net liabilities from December 31, 2010 to December 31, 2011 are as follows:

Parent Company	Pension plans and retirement supplement plans				Life Insurance	Total
	FORLUZ	Health Plan	Dental Plan			
Net liabilities as at December 31, 2010	42,805	28,029	1,555		23,663	96,052
Expenses incurred	5,235	4,432	112		3,892	13,671
Contributions paid	(6,343)	(2,751)	(42)		(636)	(9,772)
Net liabilities December 31, 2011	41,697	29,710	1,625		26,919	99,951
Current liabilities	3,706	-	-		-	3,706
Non current liabilities	37,991	29,710	1,625		26,919	96,245

Consolidated	Pension plans and retirement supplement plans				Life Insurance	Total
	FORLUZ	BRASLIGHT	Health Plan	Dental Plan		
Net liabilities as at December 31, 2010	868,178	264,850	553,669	30,132	443,999	2,160,828
Expenses incurred	106,239	56,788	68,914	1,392	53,248	286,578
Contributions paid	(127,836)	(30,945)	(55,189)	(803)	(10,742)	(225,515)
Acquisition of equity interest in Light	-	65,268	-	-	-	65,268
Net liabilities on December 31, 2011	846,581	355,961	567,394	30,718	486,505	2,287,159
Current liabilities	74,441	26,150	-	-	-	100,591
Non current liabilities	772,140	329,811	567,394	30,718	486,505	2,186,568

The expenses with pension funds are recorded in financial result as they represent the interest and monetary adjustments related to the debt with Forluz, as mentioned previously in this Note. The expenses related to the health, dental, and life insurance plans are recorded as other operating expenses.

The independent actuary's estimate for the expense to be recognized for 2012 is as follows:

	Pension plans and retirement supplement plans Forluz			Life Insurance
	Health Plan	Dental Plan		
Current service cost	7,534	11,302	332	5,803
Interest on the actuarial obligation	703,270	60,667	1,745	53,703
Expected return on plan assets	(734,701)	-	-	-
Actuarial losses (gains) recognized	-	525	(637)	551
Estimated expense in 2012	(23,897)	72,494	1,440	60,057

The independent actuary's estimate for the payment of benefits during 2012 is as follows:

	Pension plans and retirement supplement plans	Health Plan	Dental Plan	Life Insurance
Estimated payment of benefits in 2012	539,783	47,801	1,425	15,968

The Company and its subsidiaries Cemig Geração e Transmissão and Cemig Distribuição expect to make contributions totaling R\$194,377 to the pension fund during 2012.

The main categories of the plan's assets, as a percentage of the plan's total assets, are as follows:

	CEMIG, Cemig Geração e Transmissão e Cemig Distribuição	
	2011	2010
Shares in Brazilian companies	16.31%	15.00%
Fixed income securities	83.69%	85.00%
	100.00%	100.00%

The Company's consolidated pension plan assets include the following assets, valued at fair value, held by both Cemig and Light:

	2011	2010
Non-convertible debentures issued by the sponsors	367,019	450,107
Shares issued by the sponsors	12,062	9,684
Real estate properties of FORLUZ, occupied by the sponsors	191,606	184,914
	570,687	644,705

The table below presents the key assumptions used by the Company for its defined benefit pension plans for the years ended December 31, 2010, and December 31, 2011:

	2011	2010
Annual discount rate	10.07%	10.50%

22. PROVISIONS AND CONTINGENCIES

Cemig and its subsidiaries and jointly-controlled subsidiaries are parties to various legal proceedings in Brazil arising from the normal course of business, regarding tax, labor, civil and other issues.

Proceedings in which the Company is a debtor

The Company and its subsidiaries and jointly-controlled subsidiaries have recorded provisions for contingencies for the proceedings where the expectation of loss is considered as more likely than not and that an outflow of resources will be required to settle the obligation, as follows:

	Balance in 2010	Additions (-) Reversals	Consolidated Updates	Write-off	Balance in 2011
Labor claims					
Sundry	115,301	7,218	6,002	-	128,521
Civil lawsuits					
Personal injury	20,075	66,619	-	-	86,694
Rate increase Cruzado Plan	25,715	9,672	2,437	-	37,824
Environmental	3,596	52,842	197	-	56,635
Other	90,466	(824)	9,755	(13,289)	86,108
Tax					
FINSOCIAL	21,807	-	330	-	22,137
PIS and COFINS	8,083	1,308	189	-	9,580

Total	187,553	(12,442)	10,841	-	185,952

The management of Cemig believes that any disbursements in excess of the amounts accrued after the outcome of the respective processes will not have a material effect on the result of operations and the individual and consolidated financial position and of the Company.

Details on the principals, provisions and contingent liabilities are as follows:

Provisions recorded for processes with the expectation of loss that is more likely than not and contingent liabilities connected to processes with the expectation of loss that are more likely not to happen.

Labor claims

The grievances under the labor laws are basically disputes regarding overtime, allowances for dangerous work, property damages and pain and suffering.

The total amount of this contingency is approximately R\$523,697, of which R\$128,521 was provisioned.

Civil lawsuits Personal injury

Cemig is party to various civil actions related to compensation for moral damages arising mainly from incidents during the normal course of business, in the amount of R\$189,088, of which R\$86,694 were provisioned.

A reassessment of the likelihood of loss of various processes, based on the opinion of the Company's legal counsel, was the main reason for provisions made in 2011, totaling R\$66,619, which changed to losses more likely than not that it will be required to outlay financial resources to settle the obligation.

Among these actions there are processes related to the accident on February 27, 2011 in the town of Bandeira do Sul. The Company emphasizes that the most significant impact of these actions are not financial, but the exposure of the Company's image.

Rate increase Cruzado Plan

A number of industrial consumers brought legal actions against the Company seeking refunds of amounts paid to Cemig as a result of a rate increase that became effective during the Brazilian government's economic stabilization plan (Cruzado Plan) in 1986, alleging that these increases violated the price controls instituted as part of that plan. The exposure for these rate increase claims is approximately R\$47,127 as of December 31, 2011, and R\$37,824 was recorded as a provision.

Environmental Matters

The Company and its subsidiaries are party to a number of administrative and judicial proceedings and claims involving environmental matters, regarding protected areas, environmental licenses and recuperation of environmental damage in the amount of approximately R\$79,468, of which R\$56,635 has been recorded as a provision.

The Company is challenging in court the environmental compensation, established in 2011, calculated based on Law 9985 of 2000 and Decree 6848 of 2009, which corresponds to 0.5% of the reference value of the project for implementation of the Santo Antônio hydroelectric power plant and its transmission system in stretch of the Madeira River, established in Installation Permit 540 of 2008 and defined in Operating License 1044, 2011, issued by the Brazilian Institute of Environment and Natural Renewable Resources (IBAMA). These features are intended to compensate the environmental impacts caused by the work, are updated by the Special IPCA and at December 31, 2011 amount to R\$52,262. This compensation is being considered as a priority by the Federal Environmental Compensation Committee to set the allocation of resources. The environmental expenses recorded as provisions were recorded as cost of Construction in progress - Reservoirs, dams and water courses.

The Company and its wholly-owned subsidiaries are defendants in various other public civil actions where the amounts involved cannot be assessed accurately, due to the fact that most of these lawsuits are related to alleged environmental damages and require indemnity, recuperation of damaged areas and compensation measures that will be defined in the course of the proceedings, often requiring experts to verify the amounts. Also, class actions may benefit third parties not originally involved in the proceedings, who may be entitled to further damages or compensations. Hence, we can not specify the amount involved in these proceedings.

Value-added tax

Since 1999, Light has been inspected a number of times by the tax authorities of the state of Rio de Janeiro for ICMS (value-added tax) infringements. As of December 31, 2011, the Company had received but had yet to make payment on certain infringement notices received from the tax authorities. Based on review of the infringement notices and on consultations with its legal department, Management believes that only part

of the infringement amounts claimed represent a probable risk of loss for which the existence of a present obligation on the date of the financial statements is more likely than not, provisioned in the amount of R\$104,938. Cemig percentage of that amount is R\$34,092.

Gasrig recorded a provision related to ICMS credits on purchase of fixed assets used in the network in the amount of R\$21,612, and Cemig s percentage of represents a quota share of R\$11,928.

Adicionally, the Company is a defendant in various administrative and legal proceedings brought by the State Tax Department of Minas Gerais, claiming ICMS and, in the event that the Company has to pay the tax on these transactions, it will be able to request reimbursement by the consumer to recover the value of the tax plus any penalties. The main proceedings are: the non payment of the ICMS on TUSD since the amount of the tax due has been divided in compliance with preliminary injunctions granted under a writ of security issued by those consumers and the demand contracted and not used that was billed during the period from January 2005 to December 2010, since the value of tax was excluded from the electric power bills, in compliance with the injunction granted; IMIDEC (the Institute for Defense of the Consumer of Minas Gerais) ciled a civil lawsuit against Cemig Distribuição, questioning the ICMS on the total invoice and not only on the service provided; Cemig was notified, as joint obligor, in sales operations of the surplus electricity made to industrial consumers during the period rationing of rationing power, when the Department of Finance Scretary of the State of Minas Gerais demanded the payment of ICMS on these transactions. No provision was recorded and the estimated amount of the contingency is R\$434,004.

Contingent liabilities, whose expected loss is considered as more likely than not that out flows of financial resources will be required to settle the obligation

Taxes and other contributions

The Company and its subsidiaries and jointly-controlled subsidiaries are parties to various administrative and judicial proceedings relating to Taxes. The details of the main lawsuits are as follows:

Indemnity of the additional pay for year worked (*Anuênio*)

The Company and its subsidiaries Cemig Geração e Transmissão and Cemig Distribuição paid an indemnity to the employees in 2006, in the amount of R\$177,686, in exchange for the rights to future payments of additional pay for yaer worked (*Anuênio*) which would be incorporated into salaries. The Company and its subsidiaries did not make the payments of income tax and social security contribution on this amount because it considered that these obligations are not applicable to amounts paid as indemnity. However, to avoid the risk of a future fine arising from a different interpretation by the Federal Tax Authorities, the Company and its subsidiaries decided to file for writs of security to enable payment in court of the amount of any obligations, in the amount of R\$191,770 as of December 31, 2011 posted under

Deposits connected to legal actions in Long term assets.

Employee Profit sharing

In 2006, Cemig was notified by the National Social Security Institute, INSS, as a result of the non-payment of the social security contribution on the amounts paid as profit sharing during the period from 2000 to 2004, representing R\$140,875 as at December 31, 2011. The Company appealed at the administrative level against the decision. No provision has been recorded since Cemig believes it has arguments on the merit for defense, and an adverse outcome in this action is considered to be possible, but not probable.

Social security contributions

The Brazilian Federal Revenue Department filed administrative proceedings against Cemig, Cemig Geração e Transmissão and Cemig Distribuição, in respect of pension contributions under various headings: profit sharing, worker food program (PAT), education allowance, payments for overtime, exposure to risk in the workplace, SEST / Senat, a fine for breach of accessory obligations. The Company has presented its defenses and is awaiting a hearing.

The expectation of loss in these actions is considered more likely that there is no cash outflow to settle an obligation and the amount of the contingency is approximately R\$780,723.

Federal Contribution - FINSOCIAL

The Federal Government filed a lawsuit against the Company, in order to rescind the judgment in the rescission action filed previously by Cemig, where it challenges the FINSOCIAL contribution, arguing that the action filed by Cemig was filed after the statute of limitations of two years. On December 31, 2011, the amount involved in this action was, approximately, R\$67,926.

Offsetting of federal taxes credits

The Federal Revenue Department Company did not ratify the declaration of offsetting of credits resulting from undue payment , or overpayment, by the Company related to various tax administrative processes with respect to proceedings regarding offsetting of federal taxes. Cemig is contesting the related tax postings made by the federal tax authority. The amount of the contingency is R\$423,856.

Consolidated tax return (DIPJ) restitution and compensation

The Company is a party to administrative proceedings involving claims for restitution and compensation arising from negative balances presented in the DIPJs for calendar years 1997 to 2000, and overpayments, identified by the corresponding documents for

receipt of payment of federal revenue (DARF) and declarations of federal taxes and contributions (DCTF) . The amount of the contingency is R\$296,377.

PIS/COFINS tax rate

Cemig was notified for underpayment of PIS / COFINS due to incorrect exclusions of financial expenses from the base for calculating contributions. Although the Company collected PIS / COFINS on financial income, the Federal Revenue Department considers that the amount was underpaid. The amount of the contingency is R\$81,112.

The Company is a defendant in various legal proceedings in which the plaintiffs demand suspension of payment of PIS and COFINS, on the grounds that the imposition of such contributions in the context of electricity invoices is illegal. The amount of the contingency is R\$41.039.

Regulatory matters

CRC Account

Prior to 1993 Brazilian electricity concession holders were guaranteed, by law, a rate of return on investment in assets used in the providing of electricity services to clients. The rates charged to users were uniform throughout the country, and the profits generated by the more profitable concession holders were reallocated to less profitable concession holders, in such a way that the rate of return for all the companies was equal to the national average. The deficits which the majority of the Brazilian electricity concession holders suffered were recorded in the CRC Account of each company. When the CRC Account and the guaranteed-return concept were abolished, Cemig used its positive balances in the CRC Account to offset its liabilities to the Federal Government.

Aneel filed an administrative action against the Company, contesting credit related to these positive balances and on October 31, 2002 it issued a final administrative decision. On January 9, 2004, the

National Treasury issued a collection notice in the amount of R\$516. Cemig filed a writ of security to suspend inclusion of the credit in the register of delinquent debtors of credits to the federal government (Cadin). Although the writ was denied by the lower court, an appeal was made to the Federal Court of the First Region, which granted Cemig a temporary injunction suspending inclusion in Cadin. On December 31, 2011, the amount involved in this action was R\$1.014.905, and no provision has been recorded.

Contracts for public illumination (CIP)

The Company is defendant in several public class actions challenging the clause in the Electricity Supply Contracts for public illumination, signed between the Company and the various municipalities of its concession area, and restitution by the Company of the difference representing the amounts charged in the last 20 years, in the event that the courts recognize that these amounts were unduly charged. The actions are grounded on a supposed mistake by Cemig in the estimate of time used for the calculation of the consumption of electricity by public illumination paid for by the Public Illumination Contribution (CIP). On December 31, 2011, the amount involved in this action was, approximately, R\$1,183,402.

Regulatory contingency CCEE

In an action dating from August 2002, AES Sul Distribuidora has challenged in the courts the criteria for accounting of electricity transactions on the wholesale electricity market during the period of rationing. It obtained a decision in its favor in February 2006, which ordered the CCEE to recalculate the transactions during the period of rationing disregarding Dispatch 288/2002. This was to be put into effect in the CCEE in November 2008, resulting in an additional disbursement for CEMIG, referring to the expense on purchase of power in the short-term market, in the CCEE, in the amount of approximately R\$123,900 as of December 31, 2011. On November 9, 2008 the Company obtained an injunction in the Regional Federal Court suspending the obligatory nature of the requirements to pay in court the amount owed arising from the Special Financial Settlement carried out by the CCEE. No provision has been constituted since Cemig believes it has arguments on the merit for defense.

Civil lawsuits low-income consumers

Exclusion of some consumers as low-income

The Federal Public Prosecutor filed a public civil action against the Company and ANEEL, to prevent the exclusion of some consumers classified in the low-income residential rate sub-class, requesting condemnation of the Company to pay double the amount paid in excess by the consumers. The request

was upheld, however, the Company and ANEEL appealed the decision and are awaiting a hearing. The total amount of the contingency is R\$122,531.

Tariff adjustment Neutrality of Parcel A

The Municipal Association for Protection of the Consumer and the Environment (AMPROCOM) and the Brazilian Association of Consumers (ABC) filed lawsuits against the Company and ANEEL, aiming at identifying all consumers who were adversely affected in the periodic review process and annual tariff adjustment in the period from 2002 to 2009, and the refund through a credit in the electricity bills, of the amounts for which they were incorrectly charged, through not disregarding the impact of future changes in demand for power consumption of non manageable cost components (Portion A) and the incorrect incorporation of these gains in the manageable costs of the distributor (Portion B), causing the economic-financial imbalance of the contract. The estimated value of the contingency is R\$1,061,084, where all consumers in the Cemig Distribuição concession area are considered.

Tax contingencies of Light SESA

The tax contingencies with a probability of loss considered more likely than not that an outflow of financial resources will be required to settle the obligation as at December 31, 2011 recognized by Light SESA, correspond to: the demand for income tax and social contribution on the earnings of the LIR and LOI since 1996; non ratification of compensation for claims of withholding income tax credits on financial investments and withholding tax on payments of power bills made by public bodies; a fine for alleged breach of accessory obligations related to the delivery of electronic files related to calendar years 2003 to 2005; tax assessment notice drawn up for the collection of ICMS on the amounts of economic subsidies targeted to low-income consumers; ICMS on commercial losses; Inspection Fee for Occupation and Permanence in Public Area, Streets and Roads (TFOP), levied by the Municipality of Barra Mansa; withholding tax on amounts paid by Light SESA as dividends, on the argument that they result from non-existent income; tax assessment for charge ICMS, due to the use of accumulated ICMS credits of Rheem Embalagens Ltda. on the acquisition of inputs and raw materials within the State of Rio de Janeiro. These lawsuits come to the total amount of R\$859,568, the amount corresponding to Cemig's interest in the capital of Light at December 31, 2011.

Claims in the Ordinary Course of Business

Additionally, the Company is involved as plaintiff or defendant in other, less relevant, litigation related to the

normal course of its operations, in the amount of R\$515,825. Management believes it has adequate defense for these disputes and does not expect material losses related to these issues, that may have an adverse effect on the financial position and results of operations.

Proceedings in which the Company is a creditor and with probable entry of economic benefitsPASEP and COFINS Expansion of the Base for Tax Calculation Purposes

The Parent company filed a legal suit challenging the expansion of the taxable base for PIS and COFINS tax calculation purposes on financial revenue and on other non-operating revenues during the period from 1999 to 2004, through Law 9718 of November 27, 1998. In the event of a favorable judgment in the final instance (subject to no further appeal) and we point out that the Federal Supreme Court has ruled on similar cases in favor of the taxpayer the gain to be recorded in the income statement will be R\$195,263, net of income tax and social contribution.

23. SHAREHOLDERS' EQUITY**(a) Share Capital**

The fully paid-in shares, each with a par value of R\$5.00, are distributed as follows:

Shareholders	Number of shares as of December 31, 2011								
	Common		%		Preferred		%	Total	%
The State of Minas Gerais	151,993,292		51		-		-	151,993,292	22
Other entities of The State of Minas Gerais	40,197		-		7,057,472		2	7,097,669	1

Total	298,269,668	100	384,144,914	100	682,414,582	100		

Earnings Per Share

Considering that each class of shares participates equally in the income presented, the earnings per share in 2011 and 2010, of R\$3.54 and R\$3.41, respectively, were calculated based on the weighted average of the Company's shares outstanding in each of the abovementioned years.

The weighted average number of shares used in calculating basic and diluted earnings per share is as follows:

Weighted average of shares	2011	2010
Balance at January 1,		
Common shares	298,269,668	271,154,243
Preferred shares	384,144,914	349,222,649
	682,414,582	620,376,892
Effects of share issues in April 2010		
Common shares		27,115,425
Preferred shares		34,922,265
		62,037,690
Weighted average of shares at December 31		
Common shares	298,269,668	289,231,193
Preferred shares	384,144,914	372,504,159
	682,414,582	661,735,352

Shareholders Agreement

On August 1, 2011, the Government of the State of Minas Gerais signed a Shareholders Agreement with AGC Energia S.A. with intervention and consent of BNDES Participações S.A. with validity for fifteen years. The agreement maintains the state of Minas Gerais as a hegemonic, isolated and sovereign controller of the Company and attributes a few prerogatives to AGC Energia in order to contribute to the Company's continued sustainable growth, amongst other contractual terms.

Return of Advance for Future Capital Increase (AFAC)

In 1995, 1996 and 1998, by the State of Minas transferred financial resources intended for a capital increase in the historical amount of R\$27,124. In 2011, the Ministry of Finance requested the return of the amounts of these resources for future capital increases of AFAC, monetarily updated, since the aforementioned year the funds had not been used for the payment of shares in a capital increase.

In response to this request, the Board of Directors, on December 27, 2011, decided to return the Advance

for Future Capital Increase (AFAC_) to the State of Minas Gerais, in the amount of R\$93,259, corresponding to the historical amount of R\$27,124, adjusted by the IGP-M (General Index of Market Price) for the period and the financial expense corresponding to the monetary update of the future capital increase, in the amount of R\$66,136, was recorded in 2011.

Capital increase to be proposed to the Annual Shareholders Meeting in April 2012

Cemig's Board of Directors will propose a capital increase to the Annual Shareholders' Meeting mainly through the use of its Profit reserves.

The approval of an increase in Cemig's capital from R\$3,412,073 to R\$4,265,091 through the issuing of 170,603,646 new shares, through the capitalization of R\$821,527 of the balance of the Profit Retention Reserve and R\$31,491 originating from the incorporation of portions of the Loan Assignment Agreement of the remaining balance of the CRC, distributing to shareholders as a result, a bonus of 25% in new shares, of the same kind as the priorly held shares and with a par value of R\$5.00, will be proposed.

(b) Reserves

The breakdown of Capital Reserves and Profit Reserves is presented as follows:

	2011	2010
Capital Reserves		
Interest on investments in fixed assets in progress – Own capital	1,313,220	1,313,220
Donations and subsidies for investment	2,572,526	2,572,526
Additional paid-in capital	69,230	69,230
Monetary adjustment of the capital	6	6
Treasury Shares	(1,132)	(1,132)
	3,953,850	3,953,850

The reserve for interest on investments in fixed assets in progress – own capital refers to the interest on the shareholders' equity used in constructing assets and facilities, which is recorded in property, plant, and equipment as corresponding entries against shareholders' equity. Cemig decided to stop forming this reserve as from 1999.

The reserve for Donations and Subsidies for Investments refers basically to the compensation by the Federal Government of the difference between the profitability obtained by CEMIG up to March 1993 and the minimum return guaranteed by the legislation in effect at the time. The funds were used in the amortization of various obligations payable to the Federal Government, and the remaining balance originated the CRC contract.

Treasury shares refer to the shares transferred from FINOR originating from funds invested in Cemig's projects in the area covered by SUDENE (Superintendency for the development of the Northeast) due to

tax incentives.

	2011	2010
Profit Reserves		
Statutory Reserve	1,141,178	1,433,549
Profit retention Reserve	1,382,962	799,413
Proposal for distribution of additional dividends	86,316	67,086
Legal Reserve	682,415	573,205
	3,292,871	2,873,253

Statutory Reserve

The Statutory reserve is for future payment of extraordinary dividends, in accordance with Article 28 of the by-laws.

Profit Retention Reserve

The Profit Retention Reserve refers to profits not distributed in previous years to ensure the implementation of the Company's Investment Program, and the retentions supported by capital budgets approved by the Board of Directors in the periods in question. The main acquisitions of interests in other companies are a result of the retention of the aforementioned funds which more detail is presented in Note 14.

Proposal for distribution of additional dividends

The Company recorded R\$86,316 in the Profit Reserve related to the portion of dividends proposed by management which exceeds the required minimum annual dividend distribution of 50% of net profit for the year, established in the Company's by-laws.

Legal Reserve

This reserve is a requirement for all Brazilian corporations and represents the appropriation of 5% of annual net income up to a limit of 20% of share capital as established by Article 193 of Brazilian Corporate Law 6,404. Accordingly, the Company opted to appropriate 4.52% of the net income as at December 31, 2011, in the amount of R\$109,210 in order to comply with the law.

(c) Dividends

Ordinary dividends

50% of the net income for the year must be used for distribution as a mandatory dividend to the Company's shareholders, as established in the Company's by-laws.

Preferred shares have priority in the reimbursement of capital and participate in the profit under equal conditions with common shares. Preferred shares have a right to an annual minimum dividend equal to the greater value between 10% of their par value; or 3% of the shareholders' equity associated with the shares.

Under the by-laws, CEMIG's shares held by private individuals have the right to a minimum dividend of 6% per year on their par value in all years when Cemig does not obtain sufficient profits to pay dividends to its shareholders. This guarantee is given by the State of Minas Gerais in the terms of Article 9 of State Law 828 of December 14, 1951 and Article 1 of State Law 8796 of April 29, 1985.

The declared dividends shall be paid in two equal installments, the first not later than June 30 and the second not later than December 30 of each year following the generation of profit. The Board of Directors is responsible for observing these deadlines and determining the place of payment and the process for payment.

The calculation of the dividends proposed for distribution to shareholders based on the Company's profit for the year-ended December 31, 2011 is as follows:

Minimum Dividend Distribution Calculation as required by the by-laws	Parent company 2011
Par value of preferred shares	1,920,724
Percentage applied to the par value of preferred shares	10.00%
Amount of dividends per first payment criteria	192,072
Shareholders' equity	11,744,948
Preferred shares as a percentage of Shareholders' equity (net of shares held in Treasury)	56.29%
Portion of Shareholders' equity represented by preferred shares	6,611,231
Percentage applied to the portion of Shareholders' equity represented by preferred shares	3.00%
Value of the dividends per second payment criteria	198,337
Minimum obligatory dividends required by the by-laws for preferred shares	198,337
Mandatory Dividend Calculation

Extraordinary dividends

Cemig's Bylaws establishes that, without prejudice to the mandatory dividend, each year, or more frequently if the availability of cash permits, the Company will use the specific profit reserve for the distribution of extraordinary dividends, up to the limit of the cash available, as decided by the Board of Directors subject to compliance with the Company's Strategic Plan and the dividend policy specified therein.

The following extraordinary dividends were paid by the Company in 2011 and 2010:

In a meeting held on December 16, 2010, the Board of Directors decided to declare an extraordinary dividend in the amount of R\$900 million, or R\$1.32 per share, using the profit reserve established under the Bylaws for this purpose. The payment of these dividends took place on December 29, 2010.

In a meeting held on December 9, 2011, the Board of Directors decided to declare an extraordinary dividend, in the amount of R\$850 million, or R\$1.25 per share, using the profit reserve established under the Bylaws for this purpose. The payment of these dividends took place on December 28, 2011.

(d) Accumulated Foreign Currency Translation Adjustments and Other Comprehensive Income

	2011	2010
Accumulated Foreign Currency Translation Adjustments and Other Comprehensive Income		
Deemed Cost of the Generation Assets	1,080,233	1,209,212
Foreign Currency Translation Adjustments	5,354	(772)
Cash Flow Hedge Instruments	567	1,393
	1,086,154	1,209,833

The translation adjustments refer to the foreign exchange difference calculated on the translation of Transchile's financial statements based on the exchange rates for assets and liabilities at the end of the year, recorded directly in the abovementioned Shareholders' Equity account.

The amounts recorded as deemed cost of generation assets are due to a new valuation of the generation assets, with the definition of their fair value by their replacement cost at the first time adoption of IFRSs as at January 1, 2009. The new valuation of the generation assets resulted in an increase in the value of these assets, recorded in a specific shareholders' equity account, net of tax effects.

24. REVENUE

	Consolidated	
	2011	2010 (Reclassified)
Supply of electric power (a)	16,840,743	14,821,015
Revenue from use of the electricity distribution grid - TUSD (b)	1,974,032	1,658,286
Revenue from use of the transmission system (c)	1,473,347	1,197,182
Construction revenue (d)	1,532,577	1,341,386
Other operating income (e)	990,030	923,792
Taxes on revenue (f)	(6,996,502)	(6,094,727)
Net operating revenue	15,814,227	13,846,934

(a) Supply of electric power

The breakdown of the supply of electric power by consumer class is as follows:

	MWh (*)		R\$	
	2011	2010	2011	2010 (Reclassified)
Residential	10,742,297	9,944,272	5,451,747	4,832,622
Industrial	26,028,775	24,826,143	4,366,107	3,935,703
Commerce, services and others	6,984,941	6,227,336	3,045,417	2,717,686
Rural	2,646,475	2,466,451	707,958	631,984
Governmental entities	1,191,280	1,082,741	531,496	467,376
Public lighting	1,371,091	1,220,491	356,667	309,816
Public service	1,439,200	1,360,002	424,407	394,995
Subtotal	50,404,059	47,127,436	14,883,799	13,290,182
Own consumption	57,098	53,417	-	-
Unbilled, net	-	-	74,830	(71,204)
	50,461,157	47,180,853	14,958,629	13,218,978
Wholesale supply to other concession holders (**)	14,457,890	14,204,530	1,577,128	1,444,828
Power transactions on CCEE	5,138,453	4,785,039	268,970	133,432
Sales under the PROINFA program	120,827	84,771	36,016	23,777
Total	70,178,327	66,255,193	16,840,743	14,821,015

(*) The MWh column includes of the total electricity sold by Light, proportional to the Company's equity interest.

(**) Includes Contract for Trading of Electricity on the Regulated Market Sale (CCEAR) and bilateral contracts with other agents.

Tariff Review Cemig Distribuição

On April 8, 2011, ANEEL approved the tariff adjustment rate of Cemig Distribuição S.A. The result ratified by ANEEL represents a rate increase of 10.47%, consisting of two components: (i) Structural component of 8.08% for non-manageable costs (Portion A) and manageable (Portion B) and (ii) Financial component of 2.39%, effective until April 2012. With the removal of the financial components considered in the tariff process in 2010, of 3.23%, the average effect felt by the Company's captive customers is 7.24%.

Tariff Review Light

On November 1, 2011, ANEEL approved the tariff adjustment of Light SESA for 2011. The result ratified by ANEEL represents a rate increase of 6.57%, consisting of two components: (i) Structural component of 7.21% for non-manageable (Portion A) and manageable (Portion B) costs and (ii) Financial component, which be effective until October 2012, of -0.64%. Considering the removal of the financial component present in Light s rates in effect until this date, of -1.33%, the proposal represents an average rate increase for consumers of 7.82%.

(b) Revenue from use of the electricity distribution grid TUSD

A representative portion of the Large Industrial Consumers in the concession area of Cemig Distribuição and Light that are allowed to choose their power suppliers such as Cemig Geração e Transmissão and other power generating companies, also referred to as free consumers. Accordingly, the charges for the use of the distribution network (TUSD) of these free consumers are charged separately and recorded under this caption.

(c) Revenue from use of the transmission system

	Consolidated	
	2011	2010
Revenue from use of the basic transmission system	1,293,299	1,090,391
Revenue from connection system	180,048	106,791
	1,473,347	1,197,182

For the old concessions, Revenue from use of the basic transmission system refers to the rate charged from the electric sector agents, including free consumers connected to the high tension system, for use of the basic transmission system, owned by the Company, together with the interconnected Brazilian system after deducting the amounts received that are used for amortization of the financial assets.

For the new concessions, including the portion received from the agents from the electric sector referring to the operation and maintenance of transmission lines and also the adjustment to present value of the financial assets of established transmission, for the most part during the period of construction of transmission enterprises. The rates used for restating the assets correspond to the remuneration of the capital invested in the projects, varying in accordance with the model of the enterprise and the cost of the investor's capital.

(d) Construction Revenue

Construction Revenue is fully offset by the construction costs and corresponds to the Company's investments in the period in assets of the concession, where the operating income, in some cases, also includes the profit margin involved in the operation. More details are presented in note 25 of the consolidated Financial Statements.

(e) Other operational revenues

	Consolidated	
	2011	2010 (Reclassified)
Supply of gas	578,830	397,659
Charged services	13,957	16,495

Retirement Incentive Program (PDP)

In November 2011, Cemig implemented its Retirement Incentive Program (PDP), which is permanent and available for free, voluntary rescissions of work contracts, pursuant to the Law 12506 issued in October 2011, which addresses prior notice of 1 to 3 months and thus closed the former Voluntary Retirement Program (PDV).

Among the program's main financial incentives are payments of one gross monthly wage and 6 months of contributions for health insurance after termination, the deposit of the 40% fine on the balance of the employee's accumulated severance funds (FGTS), payment of prior notice corresponding to at least one month's wages (30 days) up to a maximum of 3 months' wages (90 days), as determined by Law 12506 of 2011, and the payment of up to 24 months of contributions to the Pension Fund and Social Security (INSS) - after termination, in conformity with certain criteria established in the program's regulations. Until December 31, 2011, 38 employees had adhered to the program.

The main conditions with respect to the business dealings between related parties are presented below:

- (1) Technical cooperation agreement between Cemig, Cemig Distribuição and Cemig Geração e Transmissão established by ANEEL Instruction 3924/2008;
- (2) Reimbursement of personnel expenses assigned by Cemig's to the companies of the Group;
- (3) Sale of electric power to the the Government of the State of Minas Gerais, where the transactions made in terms equivalent to those which prevail in the transactions with independent parties, considering that the price of the power is the price defined by ANEEL through a resolution referring to the Company's annual tariff adjustment;
- (4) The transactions with ICMS recorded in the financial statements refer to transactions for sale of electricity and are carried out in conformity with the specific legislation of the the State of Minas Gerais;
- (5) Injection of the credits from the CRC into a Receivables Fund in senior and subordinated quotas. For more information please see Note 12;
- (6) A substantial portion of the amount refers to the renegotiation of a debt originating from the sale of electricity to Copasa, with a forecast for payment not later than September 2012, and financial updating by the IGP M + 0.5% per month;
- (7) Private issue of non-convertible debentures for R\$120,000, restated by the IGP M, for completion of the Irapé hydroelectric power station, with redemption after 25 years from the date of issue. The amount at December 31, 2010 was adjusted to present value;
- (8) Financing of the subsidiaries Transudeste and Transirapé with maturity in 2019 (long-term interest rate (TJLP) + 4.5% p.a. and UMBndes 4.54% p.a.), and of Transleste, in 2017 and 2025 (rates of 5% p.a. and 10% p.a.);
- (9) Part of the contracts of FORLUZ is adjusted by the IPCA (Amplified Consumer Price Index) of IBGE (Brazilian Institute of Geography and Statistics), and part is adjusted based on the Salary Adjustment Index of the employees of CEMIG, Cemig Geração e Transmissão and Cemig Distribuição, excluding productivity factors, plus 6% p.a., with amortization up to 2024. For more information please see Note 21;
- (10) Cemig's contributions to the Pension Fund related to the employees participating in the Mixed Plan (see Note 21), calculated on the monthly payroll and salary expenses incurred in accordance with the fund's regulations;
- (11) Funds for annual current administrative costs of the Pension Fund in accordance with the specific legislation for the sector. The amounts are estimated as a percentage of the Company's total payroll;
- (12) Cemig's contributions to the employees' health and dental plans;
- (13) Contract related the Rural Electrification Program Light for All in the Cemig Concession Area, signed between Cemig Distribuição and the Iluminas Consortium, which Andrade Gutierrez is part of.

Remuneration of Key Management Personnel

The total remuneration paid to the members of the Board of Directors and the Chief Officers during 2011 and 2010 years is as follows:

	2011	2010
Remuneration	3,921	2,329
Profit sharing	849	611
Post-retirement benefits	306	189
Assistance benefits	44	614
Total	7,131	5,753

For more information on the main transactions, see Notes 9, 12, 18, 19, 21, 24 and 25

28. FINANCIAL INSTRUMENTS

The financial instruments of the Company, its subsidiaries and jointly-controlled subsidiaries are restricted to Cash and cash equivalents, marketable securities, accounts receivable from consumers and traders, accounts receivable from the Government of the State of Minas Gerais, financial assets of the concession, loans and financing, obligations with debentures and derivatives, where the gains and losses obtained in the transactions are fully recorded on an accrual basis.

The financial instruments of the Company, its subsidiaries and jointly-controlled subsidiaries were recognized at fair value and are classified as follows:

- < Loans and receivables: Cash, Receivables from consumers and traders, Concessionaires transport of Power, Receivables from the Government of the State of Minas Gerais and financial assets of the concession are encountered in this category. They are recognized at their face realization value and are similar to their fair values.
- < Financial instruments at fair value through profit or loss: In this category cash and cash equivalents, marketable securities and derivative instruments (mentioned in item b) are encountered. They are stated at fair value, and the gains or losses are recognized directly in the income statement.
- < Loans and financing, and obligations with debentures and suppliers. They are measured at amortized, using the effective interest rate method;
- < Derivative financial instruments: These instruments are stated at fair value, and the gains or losses are recognized directly in the income statement.

Financial instruments categories	2011		2010	
	Book value	Fair value	Book value	Fair value

a) Risk management

Corporate risk management is a management tool that is part of the Company's corporate governance practices and is aligned with the planning process which defines the Company's strategic business objectives.

The Company has a Financial Risks Management Committee, the purpose of which is to implement guidelines and monitor the financial risk of transactions that could negatively affect the Company's liquidity and profitability, recommending hedge strategies to control the Company's exposures to foreign exchange rate, interest rate and inflation risks. These strategies are aligned with the Company's overall strategy.

One of the most important objectives of the Financial Risks Management Committee is and to provide reasonable predictability to the Company's cash flow for a maximum future period of 12 months, considering the economic scenario disclosed by an external consultant.

The principal risks to which the Company is exposed are as follows:

Exchange Rate Risk

Cemig and its subsidiaries and jointly-controlled subsidiaries are exposed to market risk from adverse changes in foreign currency rates, especially the U.S. Dollar against the Brazilian Real, which could potentially have a significant impact on their indebtedness, profit and cash flow. In order to reduce its exposure to adverse changes in foreign currency rates, as at December 31, 2011 the Company held certain hedge contracts, which are described in more detail in item b below.

The tables below provide summary information regarding the exposure to the exchange rate risk:

EXCHANGE RATES EXPOSURE	2011	Consolidated	2010
U.S. Dollar			
Loans and Financing	318,947		175,963
(+/-) Contracted hedge/swap	(32,312)		(45,426)
	286,635		130,537
Other foreign currencies			
Loans and Financing Euro	37,299		12,626
Others	2,661		
	39,960		15,301
Net liabilities exposed to exchange rate risk	326,595		145,838

Exchange Rate Sensitivity Analysis

Based on information received from its financial consultants, the Company estimates that in a probable scenario the depreciation of the exchange rates of foreign currencies against the Brazilian Real as at December 31, 2012 will be 11.82% for the U.S. Dollar (to US\$1=R\$1.654) and 8.22% for the Euro (to 1 = R\$2.234). In the table below, the Company has performed a sensitivity analysis to demonstrate the adverse financial effects which would occur in scenarios assuming an additional 25% appreciation and a 50% appreciation of the foreign currencies as compared to the increase assumed in the probable scenario. The Company has designated these alternative appreciation scenarios as Possible and Remote, respectively.

Foreign Exchange Rate Exposure	Base scenario Dec 31, 2011	Probable scenario	Possible scenario: Foreign currency appreciation of 25%	Remote scenario: Foreign currency appreciation of 50%
U.S. Dollar				
Loans and Financing	318,947	281,253	351,566	421,880
() Contracted hedge/swap	(32,312)	(28,493)	(35,617)	(42,740)
	286,635	252,760	315,949	379,140
Other Foreign Currencies				
Loans and Financing Euro	37,299	34,234	46,624	55,949
Euro	2,661	2,442	3,326	3,992
Net liabilities exposed to exchange rate risk	326,595	289,436	365,899	439,081
Net effect		37,159	(76,463)	(149,645)

Interest Rate Risk

The Company and its subsidiaries and jointly-controlled subsidiaries is exposed to the risk of increase in international interest rates, affecting loans and financings in foreign currency with floating interest rates, especially the Libor, in the amount of R\$207,489 (R\$58,905 on December 31, 2010).

The table below presents the Company's net assets and liabilities exposed to a risk of an increase in domestic interest rates as of December 31, 2011 and December 31, 2010:

EXPOSURE TO CHANGES IN DOMESTIC INTEREST RATES	Consolidated	
	2011	2010
Assets		
Cash and cash equivalents (Note 6)	2,704,600	2,885,088
Marketable securities (Note 7)	358,987	321,858
	3,063,587	3,206,946
Liabilities		
Loans, financing and debentures (Note 19)	(9,274,474)	(7,655,139)
Contracted hedge/swap (interest rates)	(600,000)	-
Contracted hedge/swap (exchange rates)	(32,312)	(45,426)
	(9,906,786)	(7,700,565)
Net liabilities exposed to domestic interest rate risk	(6,843,199)	(4,493,619)

Interest Rate Sensitivity Analysis

The Company estimates that, under a Probable scenario, the SELIC rate as at December 31, 2012 will be 9.5%. The Company has performed a sensitivity analysis to demonstrate the adverse financial effects which would occur in scenarios assuming an additional 25% and 50% increase assumed in the probable scenario. The Company has designated these alternative scenarios as Possible and Remote, respectively. The CDI rate follows the increase in the SELIC rate.

The following scenarios as of December 31, 2012 are presented in conformity with the Company's base, optimistic and pessimistic scenarios, as described in the Company's hedge policy.

Domestic Interest Rate Risk Exposure	2011 Base scenario: SELIC 11%	Probable scenario: SELIC 9.5%	2012 Possible scenario: SELIC 11.88%	Remote scenario: SELIC 14.25%
Assets				
Cash and cash equivalents (Note 6)	2,704,600	2,961,537	3,313,220	3,383,556
Marketable securities (Note 7 Error! Reference source not found.)	358,987	393,091	439,770	449,106
	3,063,587	3,354,628	3,752,990	3,832,662
Liabilities				
Loans, Financings and Debentures (Note 19)	(9,274,474)	(10,155,549)	(11,361,520)	(11,602,715)
Contracted hedge/swap (interest rates)	(600,000)	(654,720)	(732,468)	(748,018)
Contracted hedge swap (exchange rates)	(32,312)	(35,382)	(39,583)	(40,424)
	(9,906,786)	(10,845,651)	(12,133,571)	(12,391,156)
Net liabilities exposed to interest rate risk	(6,843,199)	(7,491,023)	(8,380,559)	(8,558,495)
Net effect		(647,824)	(889,558)	(1,067,472)

Credit Risk

The risk resulting from the possibility of losses on doubtful receivables for CEMIG and its subsidiaries and jointly-controlled subsidiaries, arising from difficulties in receiving the amounts billed from its clients, is considered low. The Company has follow-up procedures that seek to reduce default on an individual basis. Negotiations are also established to make receipt of overdue receivable feasible.

The Allowance for Doubtful Accounts recorded in 2011, considered adequate in relation to overdue receivables of the Company and its subsidiaries and jointly controlled companies, was R\$163,629.

With regards to the risk of losses resulting from insolvency of the financial institutions at which the Company and its subsidiaries and jointly-controlled subsidiaries have deposits, a Cash Investment Policy was approved and has been effective since 2004, where each institution is analyzed for risk purposes according to criteria of current liquidity, degree of leverage, degree of default, profitability, and costs. Additionally, the Company takes into consideration the ratings given to the financial institutions by three financial risk rating agencies. The Company assigns each financial institution a maximum limit for allocation of funds, which is reviewed for appropriateness both periodically and also in the event of any change in the macroeconomic scenarios of the Brazilian economy.

Cemig manages the counterparty risk of financial institutions based on an internal policy approved by the Company's Financial Risk Management Committee.

This policy measures and scales not only the credit risks of the institutions, but also the liquidity risk and market risk of the investment portfolio and the operational risk of the Treasury.

All investments are made in fixed income financial securities that are always linked to the CDI. The Company does not perform operations that incorporate risk of volatility in their financial statements.

As a management tool, Cemig divides the investment of its funds in direct purchases of securities (own portfolio) and two investment funds, which total about 20% of the total portfolio. The investment funds invest the funds exclusively in fixed income products, where the only companies of the group are shareholders. They follow the same policy adopted for investments in their own portfolio.

The minimum assumptions for lending to financial institutions focus on three items:

1. Risk rating of two agencies
2. Minimum net equity exceeding R\$400 million
3. Basel index of more than 12.

Having passed these cutoffs, the banks are classified into three groups according to the value of their equity. From this classification, concentration limits are established by group and by institution:

Group	Shareholder's equity	Concentration	Bank limit (% of shareholder's equity)**
A1	Over R\$3.5 billion	Minimum of 80%	7.0%
A2	Between R\$1.0 billion and R\$3.5 billion	Maximum of 20%	Between 2.8% and 7.0%
B	Between R\$400 million and R\$1.0 billion	Maximum of 20%	Between 1.6% and 4.2%

** The percentage granted to each bank Will dependo n na individual examination of indexes, such as liquidity and quality of the credit portfólio, amongst others.

In addition to these points, Cemig also establishes two concentration limits:

1. No bank can have more than 30% of the Group's portfolio;

2. No bank can have more than 50% of a company's portfolio.

Risk of Scarcity of Power

The Company primarily sells electricity that is generated by hydroelectric power stations. A prolonged period of drought could result in reduced water levels in the reservoirs of the power stations, compromising recovery of their volumes and resulting in losses due to increased costs or reduced revenues in the event of adoption of another rationing program, as occurred in 2001.

Risk of Early Maturity of Debt

The Company, its subsidiaries and jointly-controlled subsidiaries have contracts for loans and financings that include covenants, normally applicable to these types of transactions, related to complying with economic and/or financial indices, cash generation and other indexes. Non-compliance with these covenants could result in early maturity of debts.

As of December 31, 2011, the Company was not in compliance with three covenants. The Company obtained consent from its creditors, affirming that they would not exercise their rights to demand immediate or early payment of amounts owed. See Note 19.

Risk of Non-Renewal of Concessions

The Company, its subsidiaries and jointly-controlled subsidiaries hold concessions for commercial operation of generation and transmission of electric power, and its Management expects that the concessions will be renewed by the regulatory bodies, ANEEL and/or the Ministry of Mines and Energy. If the regulatory bodies do not grant the Company renewal rights for these concessions, or if they decide to renew the Company's concessions under conditions which would impose additional costs (onerous concessions), or if they set a price ceiling for power sales, the future levels of profitability and operational activity could be adversely impacted when compared to those experienced in prior years.

A definition by the Federal Government of the criteria for the renewal of concessions is expected for 2012, when it will be possible to determine the impact of these criteria on the Company's results.

The Company has not suffered any significant adverse impacts resulting from events related to the risks related to concession renewals as described above.

Liquidity Risk

Cemig's cash generation is sufficient to cover its short-term requirements and for its program for acquisitions and investments.

At December 31, 2011, the Company presented a greater balance of current liabilities compared to assets in the consolidated amount of R\$3,637,697. This results basically from debts recorded in the short term, whose representative portion is being paid off in the 1st quarter of 2012 through its own resources

generated in the period and also through the use of funds raised by issuing debentures of its subsidiary Cemig Geração e Transmissão on March 9, 2012, in the amount of R\$1,350,000, with maturities of more than seven years. For additional information see Note 35.

Just as important as the quality of the business's operating cash generation is the Company's liquidity risk management, which is performed using a set of methodologies, procedures and instruments that are aligned with the complexity of the business and are applied in permanent control of the financial processes, so as to guarantee appropriate risk management.

The corporate risk management processes interact with other management cycles, such as the Corporate Governance, Budget Prioritization, Power Risks Management, the Insurable Risks, Control and Management and Financial Risks Management Committees in compliance with the Sarbanes-Oxley Act and the Internal Audit.

The purpose of the Financial Risk Management Committee, in particular, is to implement guidelines for controlling the financial risk of transactions that could compromise the Company's liquidity and profitability.

Cemig manages its liquidity risk by permanently monitoring its cash flow, in a conservative manner, from a budget-based perspective and it forecasts the monthly balances for each of its companies over a period of 12 months, and for the daily liquidity, which forecasts the daily balances for 180 days.

Short-term investments must also comply with rigid principles established in the Investment Policy, investing up to 20% of its funds in exclusive private credit investment funds, with no market risks, with the surplus margin invested directly in bank certificates of deposit (CDB) or repurchase operations which earn interest at the CDI rate.

When managing its investments, the Company seeks to obtain profitability on its transactions through a rigid analysis of the financial institutions' credit, in accordance with operating limits with banks based on assessments of the financial institutions' ratings, risk exposures and equity position. It also seeks greater returns on investments by strategically investing in securities with longer investment maturities, while bearing in mind the Company's minimum liquidity control requirements.

The cash outflows from the Company's loans, financing and debentures, at floating and fixed interest rates, as of December 31, 2012 were as follows:

Consolidated	1 month or less	1 to 3 months	3 months to 1 year	1 to 5 years	Over 5 years	Total
Financial instruments at:						
- Floating interest rates						
Loans, financings and debentures	533,445	758,582	4,649,119	7,192,149	1,938,978	15,072,273
Concessions payable	235	697	7,058	47,644	82,053	137,687

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

	533,299	758,135	4,766,381	7,837,910	2,021,031	15,916,756

Parent Company	1 month or less	1 to 3 months	3 months to 1 year	1 to 5 years	Over 5 years	Total
Financial instruments at:						
- Floating interest rates						
Loans, financing and debentures	-	-	1,211,747	638,476	-	1,850,223

*Cost of Transaction (CPC 08), to be allocated monthly in the contractual period contract, where in these intervals there will be no payment of interest or principal.

b) Financial Instruments Derivatives

Cemig, its subsidiaries and jointly-controlled subsidiaries use derivative financial instruments to hedge its operations against exchange rate risk. Derivative financial instruments are not used for speculative purposes.

The amounts of the principal of operations with derivatives are not presented in the balance sheet, since they refer to transactions that do not require cash principal payments to be made. Only the gains or losses related to these instruments are actually recorded. As at December 31, 2011 the net result on these operations was a gain of R\$16,120 (loss of R\$6,072 at December 31, 2010) recorded under financial results.

The Company has a Financial Risk Management Committee, which was created to monitor the financial risks with respect to volatility and trends of the inflation indices, exchange rates and interest rates that affect its financial transactions and which could adversely affect liquidity and profitability. The committee implements action plans and sets guidelines to control the financial risk environment.

Methodology of calculation of the fair value of positions

The fair value of financial instruments has been calculated taking into consideration the market values of each security, or market information available to perform this calculation, as well as the future interest rates and foreign exchange rates of similar securities. The market value of the security corresponds to its value at maturity, discounted to present value using the factor obtained from the market yield curve in Reais.

The table below shows the derivative instruments contracted by the subsidiaries Cemig Distribuição and Madeira Energia as of December 31, 2011.

Cemig s right	Cemig s obligation	Maturity period	Trading market	Value of principal contracted		Amount according to contract		Unrealized loss		Accumulated effect Amount

Cemig Distribuição and Madeira Energia hold these contracted foreign exchange hedge and swap derivative instruments with Banco Santander-ABN.

Derivative Exposure Sensitivity Analysis

The derivative instrument described above shows that the Company is exposed to variations in the CDI rate, which is directly related to the SELIC rate. The Company estimates that, under a Probable scenario, the SELIC rate at December 31, 2012 will be 9.5%. The Company performed a sensitivity analysis to demonstrate the adverse financial effects which would occur in scenarios assuming an additional 25% and 50% increase in the SELIC rate. The Company has designated these alternative SELIC rate increase scenarios as Possible and Remote, respectively.

The Company estimates that in the Possible and Remote scenario the CDI rate at December 31, 2012 will be 11.88% and 14.25% respectively.

a) Risk: effect of changes in the CDI rate in relation to changes in US dollar

	Base scenario: Dec 31, 2011 11%	Probable scenario: SELIC 9.5%	Possible scenario: SELIC 11.88%	Remote scenario: SELIC 14.25%
Risk: Increase in Brazilian domestic interest rates				
Contracts updated at 100,00% of CDI rate	32,312	35,382	36,149	36,916
Net effect of the change in the CDI rate		(3,070)	(3,837)	(4,604)
Risk: Increase in US\$ exchange rate				
Contracts updated at 100,00% of CDI rate	32,312	28,493	35,617	42,740
Net effect of change in US\$		3,819	(3,305)	(10,428)
Net effect		(6,889)	(532)	5,824

b) Risk: effect of changes in the CDI rate in relation to changes in fixed rate of 11.47% p.a.

	Base scenario: Dec 31, 2011	Probable scenario:	Possible scenario:	Remote scenario:
Risk: Increase in Brazilian domestic interest rates				
Contracts updated at 96% of CDI rate	600,000	654,720	668,400	682,080
Net effect of the change in the CDI rate		(54,720)	(68,400)	(82,080)
Risk - Fixed interest rate				
Contracts updated at 11.47% p.a.	600,000	668,820	668,820	668,820
Net effect of change in the interest rate		(68,820)	(68,820)	(68,820)
Net effect		14,100	420	(13,260)

Value and type of margins given in guarantee

The Company does not make margin deposits for derivative instruments.

c) Capital Management

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

This table below shows the ratio of net debt to adjusted capital as of December 31, 2011 and December 31, 2010:

	2011	2010
Total liabilities	25,612,798	22,079,701
(-) Cash and cash equivalents	(2,862,490)	(2,979,693)
(-) Marketable securities	(358,987)	(321,858)
Net liabilities	22,391,321	18,778,150
Total Shareholders' equity	11,744,948	11,476,133
(-) Amounts accumulated in equity related to cash flow hedges	(5,354)	772
Adjusted Capital	11,739,594	11,476,905
Net liabilities / Adjusted Capital	1.91	1.66

29. MEASUREMENT AT FAIR VALUE

The Company measures its financial assets and liabilities at fair value. Fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability, the fair value hierarchy prioritizes the inputs used in measuring into three broad levels as follows:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs, other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Unobservable inputs for which there is little or no market data, which require the reporting entity to develop its own assumptions.

A summary of the instruments that are measured at fair value as of December 31, 2011 is presented below:

Item	Balance at December 31, 2011	Fair value at December 31, 2011		
		Active market quoted price (Level 1)	No active market Valuation technique (Level 2)	No active market Share capital (Level 3)
Assets

	2,612,668	266,791	2,345,877	-
Short-term investments				
Bank certificates of deposit	358,987	-	358,987	-
Liabilities				
Swap contracts	25,143	-	25,143	-

Methodology for calculating the fair value

a) The fair value of financial investments is calculated taking into consideration the market quotations of the security, or market information that makes this calculation possible, and future interest rates and FX rates applicable to similar securities. The market value of the security corresponds to its maturity value discounted to present value using the risk free interest rate by the discount factor obtained from the market yield curve in Reais.

b) Swap Contracts: The criteria for marking to market of derivative operations consists of establishing the present value of a transaction contracted in the past in such a way that its replacement provides the same results as a new operation. Swaps are priced by calculating the difference between the market values of each one of their end points, adjusted by their index. A swap contract based on the CDI (Interbank Certificates of Deposit) rate is priced as calculated from the start date of the transaction up to the specified future date, considering the future forecast for this index. Pricing of the dollar side of the swap is adjusted by the variation in the exchange rate, using a future expectation and an embedded risk premium.

30. INSURANCE

Cemig, its subsidiaries and jointly-controlled subsidiaries have insurance policies to cover damages to certain assets, in accordance with orientation by specialists, as listed below, taking into account the nature and the degree of risk, for amounts considered sufficient to cover any significant losses related to its assets and legal responsibilities. The assumptions for the risks involved, due to their nature were not part of the scope of the audit of the financial statements and, consequently, were not examined by the independent auditors.

Assets Insured		Coverage	Effective period of coverage	Amount insured	Annual premium
Cemig, Cemig Distribuição and Cemig Geração e Transmissão					
Air transport	Aircraft	Fuselage	29/04/2011 to 29/04/2012	US\$8,508

Third party liability directors and officers	Third party liability	15/08/2011 to 15/08/2012	R\$50,000	R\$205,32

(1) The maximum limit for compensation is R\$170,000.

(2) The maximum limit for compensation is R\$300.000.

(3) R\$10,000 for civil liability, R\$12,718,975 for engineering risks All Risk, R\$1,630,155 for ALOP (Loss of income for delays in the work due to loss from damage to property), R\$991,829 for Operational Risks: all the power station s permanent services.

(4) Amounts included only in the NVT, TSN, ETEO concessions and Taesa

(5) Amounts included for Taesa, NTE, BRASNORTE and ETAU.

(6) The maximum limit for compensation is R\$20 million, except for a policy for R\$231 million of the subsidiary NTE which R\$50 million.

(7) The maximum limit for compensation is R\$50 million.

Cemig does not have general third-party liability insurance covering accidents, except for its aircraft, and has not requested proposals related to this type of insurance. The Company has not requested proposals for, nor does it carry, insurance coverage for major catastrophes affecting its facilities such as earthquakes and floods, for business interruption risks or system failures.

The Company has not undergone significant losses arising from the aforementioned risks.

31. COMMITMENTS

Cemig and its subsidiaries have contractual obligations and commitments which include amortization of loans and financing, contracts with contractors for construction of new ventures and purchase of electricity from Itaipu, amongst others, as presented in the following table:

	2012	2013	2014	2015	2016	2017 and after	Total
Loans and financings	5,903,713	3,050,705	2,502,993	1,596,271	786,411	1,938,976	15,779,069
Purchase of electricity from Itaipu	742,317	750,683	605,620	629,081	603,223	27,933,563	31,264,487

Debt to pension plan FORLUZ	74,441	48,541	51,453	54,541	57,813	559,792	846,581
Total	9,993,501	7,297,893	6,640,034	5,874,348	5,081,703	133,547,630	168,435,109

32. REVIEWS OF TRANSMISSION TARIFFS OF CEMIG GERAÇÃO E TRANSMISSÃO

On June 8, 2010, ANEEL homologated the result of the Company's second Tariff Review. In it, ANEEL reassessed the RAP at a decrease of 15.88%, backdated to June 2009. Accordingly, a restitution of R\$75,568 to the users of the transmission system during the tariff cycle from July 2010 to July 2011 was calculated.

33. STATEMENT OF ADDED VALUE

As required by the Brazilian Securities Commission (CVM) applicable to publically-held companies, and as additional information for IFRS purposes, the Company has prepared individual and consolidated statements of added value.

These statements, based on macroeconomic concepts, seek to present the contribution of the Group in the formation of GDP through calculating the respective values added both by the Group and received by other entities, and the distribution of these amounts to their employees, spheres of government, lessors assets, creditors under loans, financings and debt securities, controlling and non-controlling stockholders, and other remunerations that constitute transfer of wealth to third parties. The aforementioned added value represents the wealth created by the Group, in general, measured by the revenues from sales of

goods and services provided, less the respective inputs acquired from third parties, also including the added value produced by third parties and transferred to the entity.

35. SUBSEQUENT EVENTS

a) Acquisition of Gás Brasileiro Distribuidora

On February 9, 2012, Cemig and Gaspetro signed, an investment agreement, under which the Cemig will make new capital investments in Gas Brasileiro Distribuidora (GBD) and acquire a 40% equity interest. Prior to this investment, GBD was fully owned by Gaspetro, which is a company controlled by Petrobras. Furthermore, the implementation of the agreement and the execution of the resulting contracts are subject to approval by the regulatory authorities. The conclusion of the investment transaction is forecasted to occur by the end of the year 2012.

b) Light's acquisition of a 51% interest in four Small Hydroelectric Power Plants in Minas Gerais

On February 10, 2012, Light acquired 51% of the capital of Guanhães Energia for R\$25,000, resulting in joint control with Cemig Geração e Transmissão, which holds 49% of the shares. The total estimated investment in the construction of power plants is R\$269,200, of which R\$118,000 will be a transfer of the capital of the shareholders of Guanhães. Financial resources in the amount of R\$60,200 will be paid in by Light.

The closing of the transaction is subject to prior approval by the National Agency of Electric Power (ANEEL) and will be submitted to the Council for Economic Defense. Light, which bought an interest in Investminas Participações will be a partner with Cemig Geração e Transmissão, which holds 49% of Guanhães.

c) Light set up a consortium for a solar plant in Maracanã stadium

On February 10, 2012, Light announced that it approved the establishment of a joint venture between its subsidiary Light Esco and EDF Consultoria em Projetos de Geração de Energia Elétrica Ltda. (EDF

Consultoria), with interests of 51% and 49%, respectively, for the development, construction and operation of a photovoltaic plant with a capacity of 391 kW, to be installed on the roof of the Maracana stadium. The total estimated investment for the project is R\$7,000 and the power generated will be sold on the free market. After the recovery of invested capital, Light Esco and EDF Consultoria will donate the assets of the plant to the State of Rio de Janeiro. The construction of the plant is forecasted to be completed no later than December 2012.

d) Debenture issued by Cemig Geração e Transmissão

In March 2012, Cemig Geração e Transmissão S.A. concluded its 3rd issuance of debentures in which 1,350,000 non-convertible, unsecured debentures were issued in three series with a unit par value of R\$1 on the date of issuance. The net proceeds obtained from the issuance of the debentures were used to pay debts from the Company's fourth issuance of promissory notes, issued on January 13, 2012, at their total face value of R\$1,000,000, plus compensatory interest. The Company issued 480,000 first series debentures, 200,000 second series debentures, and 670,000 third series debentures with maturities of 5, 7 and 10 years from the date of issuance, respectively. Owners of the first series debentures are entitled to interest of CDI + 0.90%, and owners of the second and third series debentures will have their unit face value updated for inflation (using IPCA-IBGE) and are entitled to interest of 6.00% and 6.20% per year, respectively. This third public issuance of debentures is guaranteed by Cemig.

e) Madeira Energia S.A. (Madeira)

In the Extraordinary General Meeting on January 18, 2012, Madeira's shareholders approved its capital increase in the amount of R\$350,000. After the increase the Company's fully subscribed and paid-in capital is R\$2,531,100. There was no dilution of the capital.

f) Santo Antônio Energia (SAESA)

In the Extraordinary General Meeting on January 18, 2012, the capital increase of the Company in the amount of R\$350 million was approved. After the increase the Company's fully subscribed and paid-in capital is R\$4,074,640. There was no dilution of the capital.

g) Review of useful life

On February 7, 2012, ANEEL established Regulatory Resolution 474, which set the new depreciation rates for granted assets in service in the electric sector. The new depreciation rates are to be used starting on January 1, 2012. The Company is currently assessing the impacts of this change on their financial assets and intangible assets.

INDEPENDENT AUDITORS REPORT ON THE FINANCIAL STATEMENTS

(A free translation of the original report in /Portuguese, as filed with the Brazilian Securities and Exchange Commission (CVM), prepared in accordance with the accounting practices adopted in Brazil, rules of the CVM and the International Financial Reporting Standards (IFRS))

To

The Board of Directors and Shareholders

Companhia Energética de Minas Gerais (CEMIG)

Belo Horizonte - MG

We have examined the individual and consolidated financial statements of Companhia Energética de Minas Gerais (CEMIG) (Company), identified as Holding Company and Consolidated, respectively, which comprise the balance sheet as of December 31, 2011 and the respective statements of operations, of comprehensive income, of changes in shareholders' equity and of cash flows for the year then ended, as well as a summary of the significant accounting policies and other notes to the financial statements.

Management responsibility for the financial statements

The Company's management is responsible for the preparation and fair presentation of the individual financial statements in accordance with the accounting practices adopted in Brazil and of the consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board (IASB) and in accordance with the accounting practices adopted in Brazil as well as for the internal controls, which they deemed necessary to enable the preparation of these financial statements free of material misstatement, regardless of whether due to fraud or error.

Independent auditors responsibility

Our responsibility is to express an opinion on these financial statements based on our audit, carried out in accordance with Brazilian and international Standards on Auditing. These standards require compliance of ethical requirements by the auditors and that the audit be planned and performed for the purpose of obtaining reasonable assurance that the financial statements are free from material misstatement.

An audit involves performing selected procedures to obtain evidence with respect to the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, regardless of whether due to fraud or error. In the assessment of these risks, the auditor considers relevant internal controls for the preparation and fair presentation of the Company's financial statements, in order to plan the audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion about the effectiveness of the Company's internal controls. An audit also includes evaluating the adequacy of accounting practices used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements taken as a whole.

We believe that the audit evidence obtained is sufficient and appropriate for expressing our opinion.

Opinion on the individual financial statements

In our opinion, the aforementioned individual financial statements present fairly, in all material respects, the financial position of Companhia Energética de Minas Gerais – CEMIG as of December 31, 2011, and of financial performance and its cash flows for the year then ended, in accordance with accounting practices adopted in Brazil.

Opinion on the consolidated financial statements

In our opinion, the aforementioned consolidated financial statements present fairly, in all material respects, the consolidated financial position of Companhia Energética de Minas Gerais – CEMIG as of December 31, 2011, its consolidated financial performance and its cash flows for the year then ended, in accordance with International Financial Reporting Standards (IFRS) issued by International Accounting Standards Board IASB and accounting practices adopted in Brazil.

Emphasis

As mentioned in note 2.1, the individual financial statements were prepared in accordance with accounting practices adopted in Brazil. In the case of Companhia Energética de Minas Gerais – CEMIG, these practices differ from the IFRS applicable to the separate financial statements, only with respect to the

valuation of investments in subsidiaries, associated companies and joint ventures by the equity accounting method, while for IFRS purposes it would be valued at cost or fair value. Our opinion is not qualified due to this issue.

As described in the note 1, the indirect jointly controlled subsidiary Madeira Energia S.A. presented losses for the year ended December 31, 2011 and a net working capital deficit in the amount of R\$ 1.353.287 thousand (R\$ 1.279.002 thousand in consolidated financial statements) as of December 31, 2011. The proportional effects in the consolidated financial statements of the Company amount R\$ 127,900. In the same note, Madeira Energia S.A. management describes the plan to resolve the net working capital deficit situation. Our opinion is not qualified due to this issue.

Also as described in the note 1, the indirect jointly controlled subsidiary Madeira Energia S.A. - MESA and its subsidiary Santo Antônio Energia S.A. have incurred expenses related to development of the construction project of the Santo Antônio hydro power plant, in which, in accordance with financial projections prepared by its management, should be absorbed by revenues from operations. The recoverability of the consolidated fixed assets formed by these expenses, which on September 30, 2010 totalized R\$11,510,013 thousand, in accordance with management's estimates, will occur from the start of its operations, expected to occur in the first quarter 2012. The proportional balance recorded in the fixed assets of the Company is R\$1,151,001 thousand. Our opinion is not qualified due to this issue.

Other Matters

Statement of added value

We have also examined the individual and consolidated statements of added value (DVA) for the year ended December 31, 2011, which are the responsibility of management, for which presentation is required by the Brazilian corporation Law for publicly-held companies and presented as supplementary information under IFRS, as these standards do not require the presentation of a Statement of Added Value. These statements were submitted to the same audit procedures previously described and, in our opinion, are presented fairly, in all material respects, in relation to the financial statements taken as a whole.

NOTICE TO STOCKHOLDERS

First dividend payment for 2011

We hereby advise stockholders that **Cemig** will make payment of the first part of the stockholder remuneration for the business year of 2011 on **June 27, 2012**. This payment, of R\$ 647,020,000, equivalent to R\$ 0,948538419 per share, is 50% of the amount decided by the Ordinary and Extraordinary General Meetings of Stockholders held concurrently on April 27, 2012.

We also advise stockholders that the fractional quantities of shares arising from the stock dividend authorized by those meetings were merged and sold, on May 29, 2012, for average prices of R\$ 29.358865492 per ON share and R\$ 34.116094301 per PN share, and that the proceeds of that sale will be paid, proportionately, together with the first installment of the dividends, on June 27, 2010.

The stockholders entitled to these payments are those whose names were on the Company's Nominal Share Registry on April 27, 2012.

Stockholders whose bank details are up-to-date with the Custodian Bank for Cemig's nominal shares (Banco Bradesco S.A.) will have their credits posted automatically on the day of payment, on which occasion they will receive the advice of the corresponding credit. In the event of not receiving the notice of credit, the stockholder should visit a branch of Banco Bradesco S.A. to update his/her registry details. Proceeds from shares deposited in custody at CBLC (*Companhia Brasileira de Liquidação e Custódia* - the Brazilian Settlement and Custody Company) will be credited to that entity, and the Depository Brokers will be responsible for passing the amounts through to stockholders.
