PART I

ITEM 1 BUSINESS

A. General Development of Business and History

On January 7, 1983, Penns Woods Bancorp, Inc. (the Company) was incorporated under the laws of the Commonwealth of Pennsylvania as a bank holding company. The Jersey Shore State Bank, a Pennsylvania state-chartered bank, (the Bank) became a wholly owned subsidiary of the Company and each outstanding share of Bank common stock was converted into one share of Company common stock. This transaction was approved by the shareholders of the Bank on April 11, 1983 and was effective on July 12, 1983. The Company's two other wholly-owned subsidiaries are Woods Real Estate Development Company, Inc. and Woods Investment Company, Inc. The Company's business has consisted primarily of managing and supervising the Bank, and its principal source of income has been dividends paid by the Bank and Woods Investment Company, Inc.

The Bank is engaged in commercial and retail banking which includes the acceptance of time, savings, and demand deposits, the funding of commercial, consumer, and mortgage loans, and safe deposit services. Utilizing a branch office network, ATMs, internet, and telephone banking delivery channels, the Bank delivers its products and services to the communities it resides in.

In October 2000, the Bank acquired The M Group, Inc. D/B/A The Comprehensive Financial Group (The M Group). The M Group, which operates as a subsidiary of the Bank, offers insurance and securities brokerage services. Securities are offered by The M Group through ING Financial Partners, Inc., a registered broker-dealer.

Neither the Company nor the Bank anticipates that compliance with environmental laws and regulations will have any material effect on capital expenditures, earnings, or on its competitive position. The Bank is not dependent on a single customer or a few customers, the loss of whom would have a material effect on the business of the Bank.

The Bank employed 194 persons as of December 31, 2012 in either a full-time or part-time capacity. The Company does not have any employees. The principal officers of the Bank also serve as officers of the Company.

Woods Investment Company, Inc., a Delaware holding company, maintains an investment portfolio that is managed for total return and to fund dividend payments to the Company.

Woods Real Estate Development Company, Inc. serves the Company through its acquisition and ownership of certain properties utilized by the Bank.

B. Regulation and Supervision

The Company is subject to the provisions of the Bank Holding Company Act of 1956, as amended (the "BHCA") and to supervision and examination by the Board of Governors of the Federal Reserve System (the "FRB"). The Bank is also subject to the supervision and examination by the Federal Deposit Insurance Corporation (the "FDIC"), as its primary federal regulator and as the insurer of the Bank's deposits. The Bank is also regulated and examined by the Pennsylvania Department of Banking (the "Department").

The insurance activities of The M Group are subject to regulation by the insurance departments of the various states in which The M Group, conducts business including principally the Pennsylvania Department of Insurance. The securities brokerage activities of The M Group are subject to regulation by federal and state securities commissions.

The FRB has issued regulations under the BHCA that require a bank holding company to serve as a source of financial and managerial strength to its subsidiary banks. As a result, the FRB, pursuant to such regulations, may require the Company to stand ready to use its resources to provide adequate capital funds to the Bank during periods of financial stress or adversity. The BHCA requires the Company to secure the prior approval of the FRB before it can acquire all or substantially all of the assets of any bank, or acquire ownership or control of 5% or more of any voting shares of any bank. Such a transaction would also require approval of the Department.

A bank holding company is prohibited under the BHCA from engaging in, or acquiring direct or indirect control of, more than 5% of the voting shares of any company engaged in non-banking activities unless the FRB, by order or regulation, has found such activities to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. Under the BHCA, the FRB has the authority to require a bank holding company to terminate any activity or relinquish control of a non-bank subsidiary (other than a non-bank subsidiary of a bank) upon the FRB's determination that such activity or control constitutes a serious risk to the financial soundness and stability of any bank subsidiary of the bank holding company.

Table of Contents

Bank holding companies are required to comply with the FRB's risk-based capital guidelines. The risk-based capital rules are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies and to minimize disincentives for holding liquid assets. Currently, the required minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) is 8%. At least half of the total capital is required to be Tier 1 capital, consisting principally of common shareholders' equity, less certain intangible assets. The remainder (Tier 2 capital) may consist of certain preferred stock, a limited amount of subordinated debt, certain hybrid capital instruments and other debt securities, 45% of net unrealized gains on marketable equity securities, and a limited amount of the general loan loss allowance. The risk-based capital guidelines are required to take adequate account of interest rate risk, concentration of credit risk, and risks of nontraditional activities.

In addition to the risk-based capital guidelines, the FRB requires each bank holding company to comply with the leverage ratio, under which the bank holding company must maintain a minimum level of Tier 1 capital to average total consolidated assets of 3% for those bank holding companies which have the highest regulatory examination ratings and are not contemplating or experiencing significant growth or expansion. All other bank holding companies are expected to maintain a leverage ratio of at least 4% to 5%. The Bank is subject to similar capital requirements adopted by the FDIC.

Dividends

Federal and state laws impose limitations on the payment of dividends by the Bank. The Pennsylvania Banking Code restricts the availability of capital funds for payment of dividends by the Bank to its additional paid-in capital.

In addition to the dividend restrictions described above, the banking regulators have the authority to prohibit or to limit the payment of dividends by the Bank if, in the banking regulator's opinion, payment of a dividend would constitute an unsafe or unsound practice in light of the financial condition of the Bank.

Under Pennsylvania law, the Company may not pay a dividend, if, after giving effect thereto, it would be unable to pay its debts as they become due in the usual course of business and, after giving effect to the dividend, the total assets of the Company would be less than the sum of its total liabilities plus the amount that would be needed, if the Company were to be dissolved at the time of distribution, to satisfy the preferential rights upon dissolution of shareholders whose rights are superior to those receiving the dividend.

It is also the policy of the FRB that a bank holding company generally only pay dividends on common stock out of net income available to common shareholders over the past year and only if the prospective rate of earnings retention appears consistent with a bank holding company's capital needs, asset quality, and overall financial condition. In the current financial and economic environment, the FRB has indicated that bank holding companies should carefully review their dividend policy and has discouraged dividend pay-out ratios at the 100% level unless both asset quality and capital are very strong. A bank holding company also should not maintain a dividend level that places undue pressure on the capital of such institution's subsidiaries, or that may undermine the bank holding company's ability to serve as a source of strength for such subsidiaries.

C. Regulation of the Bank

The Bank is highly regulated by the FDIC and the Pennsylvania Department of Banking and Securities. The laws that such agencies enforce limit the specific types of businesses in which the Bank may engage, and the products and services that the Bank may offer to customers. Generally, these limitations are designed to protect the insurance fund of the FDIC and/or the customers of the Bank, and not the Bank or its shareholders. From time to time, various types of new federal and state legislation have been proposed that could result in additional regulation of, and restrictions of, the business of the Bank. It cannot be predicted whether any such legislation will be adopted or how such legislation would affect business of the Bank. As a consequence of the extensive regulation of commercial banking activities in the United States, the Bank's business is particularly susceptible to being affected by federal legislation and regulations that may increase the costs of doing business. Some of the major regulatory provisions that affect the business of the Bank are discussed briefly below.

Prompt Corrective Action

The FDIC has specified the levels at which an insured institution will be considered well-capitalized, adequately capitalized, undercapitalized, and critically undercapitalized. In the event an institution's capital deteriorates to the undercapitalized category or below, the Federal Deposit Insurance Act (the FDIA) and FDIC regulations prescribe an increasing amount of regulatory intervention, including: (1) the institution of a capital restoration plan by a bank and a guarantee of the plan by a parent institution and liability for civil money damages for failure to fulfill its commitment on that guarantee; and (2) the placement of a hold on increases in assets, number of branches, or lines of business. If capital has reached the significantly or critically undercapitalized levels, further material restrictions can be imposed, including restrictions on interest payable on accounts, dismissal of management and (in critically undercapitalized situations) appointment of a

Table of Contents

receiver. For well-capitalized institutions, the FDIA provides authority for regulatory intervention where the institution is deemed to be engaging in unsafe or unsound practices or receives a less than satisfactory examination report rating for asset quality, management, earnings or liquidity.

Deposit Insurance

The FDIC maintains the DIF by assessing depository institutions an insurance premium. The amount each institution was assessed is based upon a variety of factors that included the balance of insured deposits as well as the degree of risk the institution possessed to the insurance fund. As a result of the enactment of the Emergency Economic Stabilization Act of 2008, the FDIC temporarily increased the amount of deposits it insures from \$100,000 to \$250,000. This increase has been made permanent. The Bank paid an insurance premium into the DIF based on the quarterly average daily deposit liabilities net of certain exclusions. The FDIC used a risk-based premium system that assessed higher rates on those institutions that posed a greater risk to the DIF. The FDIC placed each institution in one of four risk categories using a two-step process based first on capital ratios (the capital group assignment) and then on other relevant information (the supervisory group assignment). Subsequently, the rate for each institution within a risk category was adjusted depending upon different factors that either enhance or reduce the risk the institution poses to the DIF, including the unsecured debt, secured liabilities and brokered deposits related to each institution. Finally, certain risk multipliers were applied to the adjusted assessment.

Beginning with the second quarter of 2011, as mandated by the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), the assessment base that the FDIC uses to calculate assessment premiums became a bank's average assets minus average tangible equity. As the asset base of the banking industry is larger than the deposit base, the range of assessment rates will change to a low or 2.5 basis points to a high of 45 basis points, per \$100 of assets; however, the dollar amount of the actual premiums is expected to be roughly the same.

The FDIC is required under the Dodd-Frank Act to establish assessment rates that will allow the Deposit Insurance Fund to achieve a reserve ratio of 1.35% of Insurance Fund insured deposits by September 2020. In addition, the FDIC has established a designated reserve ratio of 2.0%, a target ratio that, until it is achieved, will not likely result in the FDIC reducing assessment rates. In attempting to achieve the mandated 1.35% ratio, the FDIC is required to implement assessment formulas that charge banks over \$10 billion in asset size more than banks under that size. Those new formulas began in the second quarter of 2011, but did not affect the Bank. Under the Dodd-Frank Act, the FDIC is authorized to make reimbursements from the insurance fund to banks if the reserve ratio exceeds 1.50%, but the FDIC has adopted the designated reserve ratio of 2.0% and has announced that any reimbursements from the fund are indefinitely suspended.

On November 12, 2009, the FDIC approved a rule to require insured institutions to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011, and 2012. An insured institution's risk-based deposit insurance assessments will continue to be calculated on a quarterly basis, but will be paid from the amount the institution prepaid until the later of the date that amount is exhausted or June 30, 2013, at which point any remaining funds would be returned to the insured institution. Consequently, the Company's prepayment of DIF premiums made in December 2009 resulted in a prepaid asset of \$812,000 at December 31, 2012.

Federal Home Loan Bank System

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

The Bank is a member of the Federal Home Loan Bank of Pittsburgh (the FHLB), which is one of 12 regional Federal Home Loan Banks. Each Federal Home Loan Bank serves as a reserve or central bank for its members within its assigned region. It is funded primarily from funds deposited by member institutions and proceeds from the sale of consolidated obligations of the Federal Home Loan Bank System. It makes loans to members (i.e., advances) in accordance with policies and procedures established by the board of directors of the Federal Home Loan Bank. At December 31, 2012, the Bank had \$92,514,000 in FHLB advances.

As a member, the Bank is required to purchase and maintain stock in the FHLB in an amount equal to the greater of 1% of its aggregate unpaid residential mortgage loans, home purchase contracts or similar obligations at the beginning of each year or 5% of its outstanding advances from the FHLB. At December 31, 2012, the Bank had \$5,251,000 in stock of the FHLB which was in compliance with this requirement.

Other Legislation

The Dodd-Frank Act was enacted on July 21, 2010. This new law will significantly change the current bank regulatory structure and affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new rules and regulations, and to prepare various studies and reports for Congress. The federal agencies are given significant discretion in drafting such rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for some time.

Table of Contents

Certain provisions of the Dodd-Frank Act are expected to have a near term impact on the Company. For example, effective July 21, 2011, a provision of the Dodd-Frank Act eliminated the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on the Company's interest expense.

The Dodd-Frank Act also broadens the base for FDIC insurance assessments. Under the Dodd-Frank Act, the assessment base will no longer be an institution's deposit base, but rather its average consolidated total assets less its average tangible equity during the assessment period. The Dodd-Frank Act also permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008.

Bank and thrift holding companies with assets of less than \$15 billion as of December 31, 2009, such as the Company, will be permitted to include trust preferred securities that were issued before May 19, 2010, as Tier 1 capital; however, trust preferred securities issued by a bank or thrift holding company (other than those with assets of less than \$500 million) after May 19, 2010, will no longer count as Tier 1 capital. Trust preferred securities still will be entitled to be treated as Tier 2 capital.

The Dodd-Frank Act requires publicly traded companies to give shareholders a non-binding vote on executive compensation and so-called "golden parachute" arrangements, and may allow greater access by shareholders to the company's proxy material by authorizing the SEC to promulgate rules that would allow shareholders to nominate their own candidates using a company's proxy materials. The legislation also directs the FRB to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded.

The Dodd-Frank Act creates a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit "unfair, deceptive or abusive" acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets such as the Bank will continue to be examined for compliance with the consumer laws by their primary bank regulators. The Dodd-Frank Act also weakens the federal preemption rules that have been applicable for national banks and federal savings associations, and gives state attorneys general the ability to enforce federal consumer protection laws.

It is difficult to predict at this time the specific impact the Dodd-Frank Act and the yet to be written implementing rules and regulations will have on community banks. Given the uncertainty associated with the manner in which the provisions of the Dodd-Frank Act will be implemented by the various regulatory agencies and through regulations, the full extent of the impact such requirements will have on financial institutions' operations is presently unclear. The changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage ratio requirements or otherwise adversely affect our business. These changes may also require us to invest significant management attention and resources to evaluate and make necessary changes in order to comply with new statutory and regulatory requirements.

The Sarbanes-Oxley Act of 2002 was enacted to enhance penalties for accounting and auditing improprieties at publicly traded companies and to protect investors by improving the accuracy and reliability of corporate disclosures under the federal securities laws. The Sarbanes-Oxley Act generally applies to all companies, including the Company, that file or are required to file periodic reports with the Securities and Exchange Commission under the Securities Exchange Act of 1934, or the Exchange Act. The legislation includes provisions, among other things, governing the services that can be provided by a public company's independent auditors and the procedures for approving such services,

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

requiring the chief executive officer and principal accounting officer to certify certain matters relating to the company's periodic filings under the Exchange Act, requiring expedited filings of reports by insiders of their securities transactions and containing other provisions relating to insider conflicts of interest, increasing disclosure requirements relating to critical financial accounting policies and their application, increasing penalties for securities law violations, and creating a new public accounting oversight board, a regulatory body subject to SEC jurisdiction with broad powers to set auditing, quality control, and ethics standards for accounting firms. In response to the legislation, the national securities exchanges and NASDAQ have adopted new rules relating to certain matters, including the independence of members of a company's audit committee as a condition to listing or continued listing.

Congress is often considering some financial industry legislation, and the federal banking agencies routinely propose new regulations. The Company cannot predict how any new legislation, or new rules adopted by federal or state banking agencies, may affect the business of the Company and its subsidiaries in the future. Given that the financial industry remains under stress and severe scrutiny, and given that the U.S. economy has not yet fully recovered to pre-crisis levels of activity, the Company expects that there will be significant legislation and regulatory actions that may materially affect the banking industry for the foreseeable future.

Table of Contents

Environmental Laws

Environmentally related hazards have become a source of high risk and potential liability for financial institutions relating to their loans. Environmentally contaminated properties owned by an institution's borrowers may result in a drastic reduction in the value of the collateral securing the institution's loans to such borrowers, high environmental clean up costs to the borrower affecting its ability to repay the loans, the subordination of any lien in favor of the institution to a state or federal lien securing clean up costs, and liability to the institution for clean up costs if it forecloses on the contaminated property or becomes involved in the management of the borrower. The Company is not aware of any borrower who is currently subject to any environmental investigation or clean up proceeding which is likely to have a material adverse effect on the financial condition or results of operations of the Company.

Effect of Government Monetary Policies

The earnings of the Company are and will be affected by domestic economic conditions and the monetary and fiscal policies of the United States Government and its agencies. The monetary policies of the FRB have had, and will likely continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order, among other things, to curb inflation or combat a recession. The FRB has a major effect upon the levels of bank loans, investments, and deposits through its open market operations in the United States Government securities and through its regulation of, among other things, the discount rate on borrowing of member banks and the reserve requirements against member bank deposits. It is not possible to predict the nature and impact of future changes in monetary and fiscal policies.

DESCRIPTION OF BANK

History and Business

The Bank was incorporated under the laws of the Commonwealth of Pennsylvania as a state bank in 1934 and became a wholly owned subsidiary of the Company on July 12, 1983.

As of December 31, 2012, the Bank had total assets of \$848,446,000; total shareholders' equity of \$79,653,000; and total deposits of \$647,814,000. The Bank's deposits are insured by the FDIC for the maximum amount provided under current law.

The Bank engages in business as a commercial bank, doing business at locations in Lycoming, Clinton, Centre, and Montour Counties, Pennsylvania. The Bank offers insurance, securities brokerage services, annuity and mutual fund investment products, and financial planning through the M Group.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

Services offered by the Bank include accepting time, demand and savings deposits including Super NOW accounts, statement savings accounts, money market accounts, fixed rate certificates of deposit, and club accounts. Its services also include making secured and unsecured business and consumer loans that include financing commercial transactions as well as construction and residential mortgage loans and revolving credit loans with overdraft protection.

The Bank's loan portfolio mix can be classified into three principal categories. These are commercial and agricultural, real estate, and consumer. Real estate loans can be further segmented into residential, commercial, and construction. Qualified borrowers are defined by policy and our underwriting standards. Owner provided equity requirements range from 0% to 30% with a first lien status required. Terms are generally restricted to between 10 and 30 years with the exception of construction and land development, which are limited to one to five years. Real estate appraisals, property construction verifications, and site visitations comply with policy and industry regulatory standards.

Prospective residential mortgage customer's repayment ability is determined from information contained in the application and recent income tax returns. Emphasis is on credit, employment, income, and residency verification. Broad hazard insurance is always required and flood insurance where applicable. In the case of construction mortgages, builders risk insurance is requested.

Agricultural loans for the purchase or improvement of real estate must meet the Bank's real estate underwriting criteria. Agricultural loans made for the purchase of equipment are usually payable in five years, but never more than ten, depending upon the useful life of the purchased asset. Minimum borrower equity ranges from 0% to 20% depending on the purpose. Livestock financing criteria depends upon the nature of the operation. Agricultural loans are also made for crop production purposes. Such loans are structured to repay within the production cycle and not carried over into a subsequent year.

Commercial loans are made for the acquisition and improvement of real estate, purchase of equipment, and for working capital purposes on a seasonal or revolving basis. General purpose working capital loans are also available with repayment expected within one year. Equipment loans are generally amortized over three to ten years. Insurance coverage with the Bank as loss payee is required, especially in the case where the equipment is rolling stock. It is also a general policy to collateralize non-real

Table of Contents

estate loans with the asset purchased and, dependant upon loan terms, junior liens are filed on other available assets. Financial information required on all commercial mortgages includes the most current three years balance sheets and income statements and projections on income to be developed through the project. In the case of corporations and partnerships, the principals are often asked to personally guaranty the entity's debt.

Seasonal and revolving lines of credit are offered for working capital purposes. Collateral for such a loan may vary but often includes the pledge of inventory and/or receivables. Drawing availability is usually 50% of inventory and 80% of eligible receivables. Eligible receivables are defined as invoices less than 90 days delinquent. Exclusive reliance is very seldom placed on such collateral; therefore, other lienable assets are also taken into the collateral pool. Where reliance is placed on inventory and accounts receivable, the applicant must provide financial information including agings on a specified basis. In addition, the guaranty of the principals is usually obtained.

Letter of Credit availability is usually limited to standbys where the customer is well known to the Bank. The credit criteria is the same as that utilized in making a direct loan. Collateral is obtained in most cases.

Consumer loan products include residential mortgages, home equity loans and lines, automobile financing, personal loans and lines of credit, overdraft check lines, and PHEAA referral loans. Our policy includes standards used in the industry on debt service ratios and terms are consistent with prudent underwriting standards and the use of proceeds. Verifications are made of employment and residency, along with credit history.

Second mortgages are confined to equity borrowing and home improvements. Terms are generally fifteen years or less and rates are fixed. Loan to collateral value criteria is 90% or less and verifications are made to determine values. Automobile financing is generally restricted to five years and done on a direct basis. The Bank, as a practice, does not floor plan and therefore does not discount dealer paper. Small loan requests are to accommodate personal needs such as debt consolidation or the purchase of small appliances. Overdraft check lines are usually limited to \$5,000 or less.

The Bank's investment portfolio is analyzed and priced on a monthly basis. Investments are made in U.S. Treasuries, U.S. Agency issues, bank qualified tax-exempt municipal bonds, taxable municipal bonds, corporate bonds, and corporate stocks which consist of Pennsylvania bank stocks. Bonds with BAA or better ratings are used, unless a local issue is purchased that has a lesser or no rating. Factors taken into consideration when investments are purchased include liquidity, the Company's tax position, tax equivalent yield, third party investment ratings, and the policies of the Asset/Liability Committee.

The banking environment in Lycoming, Clinton, Centre, and Montour Counties, Pennsylvania is highly competitive. The Bank operates thirteen full service offices in these markets and competes for loans and deposits with numerous commercial banks, savings and loan associations, and other financial institutions. The economic base of the region is developed around small business, health care, educational facilities (college and public schools), light manufacturing industries, and agriculture.

The Bank has a relatively stable deposit base and no material amount of deposits is obtained from a single depositor or group of depositors, excluding public entities that account for approximately 15% of total deposits. Although the Bank has regular opportunities to bid on pools of funds of \$100,000 or more in the hands of municipalities, hospitals, and others, it does not rely on these monies to fund loans or intermediate or

longer-term investments.

The Bank has not experienced any significant seasonal fluctuations in the amount of its deposits.

Supervision and Regulation

As referenced elsewhere, the banking business is highly regulated, and the Bank is only able to engage in business activities, and to provide products and services, that are permitted by applicable law and regulation. In addition, the earnings of the Bank are affected by the policies of regulatory authorities including the FDIC and the FRB. An important function of the FRB is to regulate the money supply and interest rates. Among the instruments used to implement these objectives are open market operations in U.S. Government Securities, changes in reserve requirements against member bank deposits, and limitations on interest rates that member banks may pay on time and savings deposits. These instruments are used in varying combinations to influence overall growth and distribution of bank loans, investments on deposits, and their use may also affect interest rates charged on loans or paid for deposits.

The policies and regulations of the FRB have had and will probably continue to have a significant effect on the Bank's deposits, loans and investment growth, as well as the rate of interest earned and paid, and are expected to affect the Bank's operation in the future. The effect of such policies and regulations upon the future business and earnings of the Bank cannot accurately be predicted.

Table of Contents

ITEM 1A RISK FACTORS

The following sets forth several risk factors that are unique to the Company.

Changes in interest rates could reduce our income, cash flows and asset values.

Our income and cash flows and the value of our assets depend to a great extent on the difference between the interest rates we earn on interest-earning assets, such as loans and investment securities, and the interest rates we pay on interest-bearing liabilities such as deposits and borrowings. These rates are highly sensitive to many factors which are beyond our control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System. Changes in monetary policy, including changes in interest rates, will influence not only the interest we receive on our loans and investment securities and the amount of interest we pay on deposits and borrowings but will also affect our ability to originate loans and obtain deposits and the value of our investment portfolio. If the rate of interest we pay on our deposits and other borrowings increases more than the rate of interest we earn on our loans and other investments, our net interest income, and therefore our earnings, could be adversely affected. Our earnings also could be adversely affected if the rates on our loans and other investments fall more quickly than those on our deposits and other borrowings.

Economic conditions either nationally or locally in areas in which our operations are concentrated may adversely affect our business.

Deterioration in local, regional, national, or global economic conditions could cause us to experience a reduction in deposits and new loans, an increase in the number of borrowers who default on their loans, and a reduction in the value of the collateral securing their loans, all of which could adversely affect our performance and financial condition. Unlike larger banks that are more geographically diversified, we provide banking and financial services locally. Therefore, we are particularly vulnerable to adverse local economic conditions.

Our financial condition and results of operations would be adversely affected if our allowance for loan losses is not sufficient to absorb actual losses or if we are required to increase our allowance.

Despite our underwriting criteria, we may experience loan delinquencies and losses. In order to absorb losses associated with nonperforming loans, we maintain an allowance for loan losses based on, among other things, historical experience, an evaluation of economic conditions, and regular reviews of delinquencies and loan portfolio quality. Determination of the allowance inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks and future trends, all of which may undergo material changes. At any time there are likely to be loans in our portfolio that will result in losses but that have not been identified as nonperforming or potential problem credits. We cannot be sure that we will be able to identify deteriorating credits before they become nonperforming assets or that we will be able to limit losses on those loans that are identified. We may be required to increase our allowance for loan losses for any of several reasons. Federal regulators, in reviewing our loan portfolio as part of a regulatory examination, may request that we increase our allowance for loan losses. Changes in economic conditions affecting borrowers, new information regarding existing loans, identification of additional problem loans and other factors, both within and outside of our control, may require an increase in our allowance. In addition, if charge-offs in future periods exceed our allowance for loan losses, we will need additional increases in our allowance for loan losses. Any increases in our allowance for loan losses will result in a decrease in our net income and, possibly, our capital, and may materially affect our results of operations in the period in which the allowance is increased.

Many of our loans are secured, in whole or in part, with real estate collateral which is subject to declines in value.

In addition to considering the financial strength and cash flow characteristics of a borrower, we often secure our loans with real estate collateral. Real estate values and the real estate market are generally affected by, among other things, changes in local, regional or national economic conditions, fluctuations in interest rates and the availability of loans to potential purchasers, changes in tax laws and other governmental statutes, regulations and policies, and acts of nature. The real estate collateral provides an alternate source of repayment in the event of default by the borrower. If real estate prices in our markets decline, the value of the real estate collateral securing our loans could be reduced. If we are required to liquidate real estate collateral securing loans during a period of reduced real estate values to satisfy the debt, our earnings and capital could be adversely affected.

Competition may decrease our growth or profits.

We face substantial competition in all phases of our operations from a variety of different competitors, including commercial banks, savings and loan associations, mutual savings banks, credit unions, consumer finance companies, factoring companies, leasing companies, insurance companies, and money market mutual funds. There is very strong competition among financial services providers in our principal service area. Our competitors may have greater resources, higher lending limits, or larger

Table of Contents

branch systems than we do. Accordingly, they may be able to offer a broader range of products and services as well as better pricing for those products and services than we can.

In addition, some of the financial services organizations with which we compete are not subject to the same degree of regulation as is imposed on federally insured financial institutions. As a result, those nonbank competitors may be able to access funding and provide various services more easily or at less cost than we can, adversely affecting our ability to compete effectively.

The value of certain investment securities is volatile and future declines or other-than-temporary impairments could materially adversely affect our future earnings and regulatory capital.

Continued volatility in the market value for certain of our investment securities, whether caused by changes in market perceptions of credit risk, as reflected in the expected market yield of the security, or actual defaults in the portfolio could result in significant fluctuations in the value of the securities. This could have a material adverse impact on our accumulated other comprehensive income/loss and shareholders' equity depending on the direction of the fluctuations. Furthermore, future downgrades or defaults in these securities could result in future classifications of investment securities as other than temporarily impaired. This could have a material impact on our future earnings, although the impact on shareholders' equity will be offset by any amount already included in other comprehensive income/loss for securities where we have recorded temporary impairment.

We may be adversely affected by government regulation.

The banking industry is heavily regulated. Banking regulations are primarily intended to protect the federal deposit insurance funds and depositors, not shareholders. Changes in the laws, regulations, and regulatory practices affecting the banking industry may increase our costs of doing business or otherwise adversely affect us and create competitive advantages for others. Regulations affecting banks and financial services companies undergo continuous change, and we cannot predict the ultimate effect of these changes, which could have a material adverse effect on our profitability or financial condition.

In response to the financial crisis that commenced in 2008, Congress has taken actions that are intended to strengthen confidence and encourage liquidity in financial institutions, and the FDIC has taken actions to increase insurance coverage on deposit accounts. The Dodd-Frank Act provides for the creation of a consumer protection division at the Board of Governors of the Federal Reserve System that will have broad authority to issue regulations governing the services and products we provide consumers. This additional regulation could increase our compliance costs and otherwise adversely impact our operations. That legislation also contains provisions that, over time, could result in higher regulatory capital requirements (including through the implementation of the capital standards of Basel III) and loan loss provisions for the Bank, and may increase interest expense due to the ability granted in July 2011 to pay interest on all demand deposits. In addition, there have been proposals made by members of Congress and others that would reduce the amount delinquent borrowers are otherwise contractually obligated to pay under their mortgage loans and limit an institution's ability to foreclose on mortgage collateral. These proposals could result in credit losses or increased expense in pursuing our remedies as a creditor. Recent regulatory changes impose limits on our ability to charge overdraft fees, which may decrease our non-interest income as compared to more recent prior periods.

The potential exists for additional federal or state laws and regulations, or changes in policy, affecting many aspects of our operations, including capital levels, lending and funding practices, and liquidity standards. New laws and regulations may increase our costs of regulatory compliance and of doing business and otherwise affect our operations, and may significantly affect the markets in which we do business, the markets for and value of our loans and investments, the fees we can charge and our ongoing operations, costs and profitability.

We rely on our management and other key personnel, and the loss of any of them may adversely affect our operations.

We are and will continue to be dependent upon the services of our executive management team. In addition, we will continue to depend on our ability to retain and recruit key commercial loan officers. The unexpected loss of services of any key management personnel or commercial loan officers could have an adverse effect on our business and financial condition because of their skills, knowledge of our market, years of industry experience, and the difficulty of promptly finding qualified replacement personnel.

Environmental liability associated with lending activities could result in losses.

In the course of our business, we may foreclose on and take title to properties securing our loans. If hazardous substances were discovered on any of these properties, we could be liable to governmental entities or third parties for the costs of remediation of the hazard, as well as for personal injury and property damage. Many environmental laws can impose liability regardless of whether we knew of, or were responsible for, the contamination. In addition, if we arrange for the disposal of hazardous or toxic substances at another site, we may be liable for the costs of cleaning up and removing those substances from the site even if we neither own nor operate the disposal site. Environmental laws may require us to incur substantial expenses and may materially limit use of properties we acquire through foreclosure, reduce their value or limit our ability to sell them in the event

Table of Contents

of a default on the loans they secure. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability.

Failure to implement new technologies in our operations may adversely affect our growth or profits.

The market for financial services, including banking services and consumer finance services is increasingly affected by advances in technology, including developments in telecommunications, data processing, computers, automation, internet-based banking, and telebanking. Our ability to compete successfully in our markets may depend on the extent to which we are able to exploit such technological changes. However, we can provide no assurance that we will be able to properly or timely anticipate or implement such technologies or properly train our staff to use such technologies. Any failure to adapt to new technologies could adversely affect our business, financial condition, or operating results.

An investment in our common stock is not an insured deposit.

Our common stock is not a bank deposit and, therefore, is not insured against loss by the FDIC, any other deposit insurance fund, or by any other public or private entity. Investment in our common stock is subject to the same market forces that affect the price of common stock in any company.

The merger agreement with Luzerne National Bank Corporation may be terminated in accordance with its terms and the merger may be terminated, or we may fail to realize all of the anticipated benefits of the merger.

The merger agreement with respect to the pending merger with Luzerne National Bank Corporation is subject to a number of conditions which must be fulfilled in order to complete the merger. Those conditions include the approval of the merger agreement by shareholders of both the Company and Luzerne, regulatory approvals, absence of orders prohibiting the completion of the merger, and the continued accuracy of the representations and warranties by both parties and the performance by both parties of their covenants and agreements as of the closing date, and completion of the merger by July 31, 2013. The conditions to closing of the merger may not be fulfilled and the merger may not be completed. If completed, the success of the merger will depend, in part, on the Company's ability to realize the anticipated benefits and cost savings from combining the businesses of the Company and Luzerne. To realize these anticipated benefits and cost savings, however, the businesses of the Company and Luzerne must be successfully combined. If the Company is not able to achieve these objectives, the anticipated benefits and cost savings of the merger may not be realized fully or at all, or may take longer to realize than expected. If the merger is not completed or if the Company fails to realize the anticipated benefits of the merger, the Company's results of operations could be adversely affected.

ITEM 1B UNRESOLVED STAFF COMMENTS

None.

ITEM 2

PROPERTIES

The Company owns and leases its properties. Listed herewith are the locations of properties owned or leased as of December 31, 2012, in which the banking offices are located; all properties are in good condition and adequate for the Bank's purposes:

Office	Address	Ownership
Main	115 South Main Street	Owned
	P.O. Box 5098	
	Jersey Shore, Pennsylvania 17740	
Bridge Street	112 Bridge Street	Owned
	Jersey Shore, Pennsylvania 17740	
DuBoistown	2675 Euclid Avenue	Owned

ITEM 3 LEGAL PROCEEDINGS

The Company is subject to lawsuits and claims arising out of its business. In the opinion of management, after review and consultation with counsel, any proceedings that may be assessed will not have a material adverse effect on the consolidated financial position of the Company.

ITEM 4 MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5 MARKET FOR THE REGISTRANT'S COMMON STOCK, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

The Company's common stock is listed on the NASDAQ Global Select Market under the symbol PWOD . The following table sets forth (1) the quarterly high and low close prices for a share of the Company's Common Stock during the periods indicated, and (2) quarterly dividends on a share of the common stock with respect to each quarter since January 1, 2010. The following quotations represent prices between buyers and sellers and do not include retail markup, markdown or commission. They may not necessarily represent actual transactions.

Table of Contents

	Price Range		Dividends Declared
	High	Low	
2012			
First quarter	\$ 41.67	\$ 36.20	\$ 0.47
Second quarter	39.90	36.72	0.47
Third quarter	44.60	37.78	0.47
Fourth quarter	45.27	37.16	0.47
2011			
First quarter	\$ 40.08	\$ 35.46	\$ 0.46
Second quarter	39.30	33.33	0.46
Third quarter	36.56	31.07	0.46
Fourth quarter	39.30	32.01	0.46
2010			
First quarter	\$ 34.03	\$ 30.04	\$ 0.46
Second quarter	34.50	26.76	0.46
Third quarter	33.15	29.41	0.46
Fourth quarter	41.26	31.97	0.46

The Bank has paid cash dividends since 1941. The Company has paid dividends since the effective date of its formation as a bank holding company. It is the present intention of the Company's Board of Directors to continue the dividend payment policy; however, further dividends must necessarily depend upon earnings, financial condition, appropriate legal restrictions, and other factors relevant at the time the Board of Directors of the Company considers dividend policy. Cash available for dividend distributions to shareholders of the Company primarily comes from dividends paid by the Bank to the Company. Therefore, the restrictions on the Bank's dividend payments are directly applicable to the Company. See also the information appearing in Note 19 to Notes to Consolidated Financial Statements for additional information related to dividend restrictions.

Under the Pennsylvania Business Corporation Law of 1988 a corporation may not pay a dividend, if after giving effect thereto, the corporation would be unable to pay its debts as they become due in the usual course of business and after giving effect thereto the total assets of the corporation would be less than the sum of its total liabilities plus the amount that would be needed, if the corporation were to be dissolved at the time of the distribution, to satisfy the preferential rights upon dissolution of the shareholders whose preferential rights are superior to those receiving the dividend.

As of March 1, 2013, the Company had approximately 1,247 shareholders of record.

Following is a schedule of the shares of the Company's common stock purchased by the Company during the fourth quarter of 2012.

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Units) Purchased	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
Month #1 (October 1 - October 31, 2012)		\$		76,776
Month #2 (November 1 - November 30, 2012)				76,776

Set forth below is a line graph comparing the yearly dollar changes in the cumulative shareholder return on the Company's common stock against the cumulative total return of the S&P 500 Stock Index, NASDAQ Bank Index, and NASDAQ Composite for the period of five fiscal years assuming the investment of \$100.00 on December 31, 2007 and assuming the reinvestment of dividends. The shareholder return shown on the graph below is not necessarily indicative of future performance.

ITEM 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION**RESULTS OF OPERATIONS****NET INTEREST INCOME**

Net interest income is determined by calculating the difference between the yields earned on interest-earning assets and the rates paid on interest-bearing liabilities. To compare the tax-exempt asset yields to taxable yields, amounts are adjusted to taxable equivalents based on the marginal corporate federal tax rate of 34%. The tax equivalent adjustments to net interest income for 2012, 2011, and 2010 were \$3,203,000,

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

\$3,122,000, and \$3,018,000, respectively.

2012 vs. 2011

Reported net interest income increased \$2,176,000 or 7.58% to \$30,896,000 for the year ended December 31, 2012 compared to the year ended December 31, 2011, although the yield on earning assets decreased to 5.25% from 5.82%. On a tax equivalent basis, the change in net interest income was an increase of \$2,257,000 or 7.09% to \$34,099,000 for the year ended December 31, 2012 compared to the year ended December 31, 2011. Total interest income increased \$731,000 as the impact of growth in the average balance of the loan and investment portfolios was offset by a decline in the portfolio yields caused by the prolonged low interest rate cycle enacted by the Federal Open Markets Committee (FOMC). Interest income recognized on the loan portfolio increased \$185,000 due to a \$44,768,000 increase in the average balance in the loan portfolio which was partially offset by interest rates repricing downward. Interest and dividend income generated from the investment portfolio and interest bearing cash deposits increased \$546,000. The increase was driven by portfolio growth, which more than compensated for a decrease in yield of 70 basis points (bp).

Interest expense decreased \$1,445,000 to \$6,211,000 for the year ended December 31, 2012 compared to 2011. Leading the decrease in interest expense was a decline of 20.17% or \$921,000 related to deposits. The FOMC actions noted previously together with a strategic focus on core deposits led to a 28 bp decline in the rate paid on interest-bearing deposits from 0.99% for the year ended December 31, 2011 to 0.71% for the year ended December 31, 2012. Leading the significant decline in interest-bearing deposit expense was a decline in the cost of time deposits of 33 bp s and a decline in the cost of money market deposits of 37 bp s. The overall growth in average deposit balances of \$69,838,000 allowed for a reduction in average long-term borrowings of \$4,885,000 while funding the growth in the average loans of \$44,768,000.

2011 vs. 2010

Reported net interest income increased \$2,226,000 or 8.40% to \$28,720,000 for the year ended December 31, 2011 compared to the year ended December 31, 2010, although the yield on earning assets decreased to 5.82% from 6.08% respectively. On a tax equivalent basis, the change in net interest income was an increase of \$2,330,000 or 7.90% to \$31,842,000 for the year ended December 31, 2011 compared to the year ended December 31, 2010. Total interest income remained steady as the impact of growth in the average balance of the loan and investment portfolios was offset by a decline in the portfolio yields caused by the prolonged low interest rate cycle enacted by the Federal Open Markets Committee (FOMC). Interest income recognized on the loan portfolio decreased \$326,000 as a portion of the portfolio repriced downward due to the FOMC actions that have maintained the prime rate at 3.25% dictating that new loan generation occurred at lower rates than the existing portfolio. Interest and dividend income generated from the investment portfolio and interest bearing cash deposits increased \$340,000. The increase was driven by portfolio growth, which more than compensated for a decrease in yield of 35 basis points (bp).

Interest expense decreased \$2,212,000 to \$7,656,000 for the year ended December 31, 2011 compared to 2010. Leading the decrease in interest expense was a decline of 24.59% or \$1,489,000 related to deposits. The FOMC actions noted previously together with a strategic focus on core deposits led to a 39 bp decline in the rate paid on interest-bearing deposits from 1.38% for the year ended December 31, 2010 to 0.99% for the year ended December 31, 2011. Leading the significant decline in interest-bearing deposit expense was a decline in the cost of time deposits of 45 bp s. The overall growth in average deposit balances of \$37,344,000 allowed for a reduction in average long-term borrowings of \$14,022,000 leading to a reduction in borrowed funds interest expense of \$723,000.

AVERAGE BALANCES AND INTEREST RATES

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

The following tables set forth certain information relating to the Company's average balance sheet and reflect the average yield on assets and average cost of liabilities for the periods indicated and the average yields earned and rates paid. Such yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods presented.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

Table of Contents**Rate/Volume Analysis**

The table below sets forth certain information regarding changes in our interest income and interest expense for the periods indicated. For interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in volume (changes in average volume multiplied by old rate) and (ii) changes in rates (changes in rate multiplied by old average volume). Increases and decreases due to both interest rate and volume, which cannot be separated, have been allocated proportionally to the change due to volume and the change due to interest rate. Income and interest rates are on a taxable equivalent basis.

PROVISION FOR LOAN LOSSES**2012 vs 2011**

The provision for loan losses is based upon management's quarterly review of the loan portfolio. The purpose of the review is to assess loan quality, identify impaired loans, analyze delinquencies, ascertain loan growth, evaluate potential charge-offs and recoveries, and assess general economic conditions in the markets served. An external independent loan review is also performed annually for the Bank. Management remains committed to an aggressive program of problem loan identification and resolution.

The allowance is calculated by applying loss factors to outstanding loans by type, excluding loans for which a specific allowance has been determined. Loss factors are based on management's consideration of the nature of the portfolio segments, changes in mix and volume of the

loan portfolio, and historical loan loss experience. In addition, management considers industry standards and trends with respect to nonperforming loans and its knowledge and experience with specific lending segments.

Although management believes that it uses the best information available to make such determinations and that the allowance for loan losses is adequate at December 31, 2012, future adjustments could be necessary if circumstances or economic conditions differ substantially from the assumptions used in making the initial determinations. A downturn in the local economy or employment and delays in receiving financial information from borrowers could result in increased levels of nonperforming assets and charge-offs, increased loan loss provisions and reductions in interest income. Additionally, as an integral part of the examination process, bank regulatory agencies periodically review the Bank's loan loss allowance adequacy. The banking regulators could require the recognition of additions to the loan loss allowance based on their judgment of information available to them at the time of their examination.

While determining the appropriate allowance level, management has attributed the allowance for loan losses to various portfolio segments; however, the allowance is available for the entire portfolio as needed.

The allowance for loan losses increased from \$7,154,000 at December 31, 2011 to \$7,617,000 at December 31, 2012. At December 31, 2012, the allowance for loan losses was 1.49% of total loans compared to 1.64% of total loans at December 31, 2011.

The provision for loan losses totaled \$2,525,000 for the year ended December 31, 2012 compared to \$2,700,000 for the year ended December 31, 2011. The decrease in the provision was appropriate when considering the gross loan growth of \$76,273,000 was concentrated in well collateralized real estate backed loans with the borrowers having strong underlying financial positions. In addition, many of our loan customers are being positively impacted by the economic stimulus being provided by the Marcellus Shale natural gas exploration. Net

Table of Contents

charge-offs of \$2,062,000 represented 0.44% of average loans for the year ended December 31, 2012 compared to \$1,581,000 and 0.37% for the year ended December 31, 2011. In addition, nonperforming loans decreased \$303,000 to \$11,706,000 at December 31, 2012 as charge-offs outpaced an increase in construction nonperforming loans. The nonperforming loans are in a secured position and have sureties with a strong underlying financial position and/or a specific allowance within the allowance for loan losses. Internal loan review and analysis, coupled with the ratios noted previously, dictated a decrease in the provision for loan losses. Utilizing both internal and external resources, as noted, senior management has concluded that the allowance for loan losses remains at a level adequate to provide for probable losses inherent in the loan portfolio.

2011 vs 2010

The allowance for loan losses increased from \$6,035,000 at December 31, 2010 to \$7,154,000 at December 31, 2011. At December 31, 2011, the allowance for loan losses was 1.64% of total loans compared to 1.45% of total loans at December 31, 2010.

The provision for loan losses totaled \$2,700,000 for the year ended December 31, 2011 compared to \$2,150,000 for the year ended December 31, 2010. The increase of the provision was appropriate when considering the gross loan growth experienced during 2011 of \$20,402,000 coupled with net charge-offs of \$1,581,000 to average loans for the year ended December 31, 2011 of 0.37% compared to \$771,000 and 0.16% for the year ended December 31, 2010. In addition, nonperforming loans increased \$5,794,000 to \$12,009,000 at December 31, 2011 primarily due to several commercial real estate loans that continued to have or developed financial difficulties. The loans are in a secured position and have sureties with a strong underlying financial position. In addition, a specific allowance within the allowance for loan losses has been established for these loans. Continued uncertainty surrounding the economy, internal loan review and analysis, coupled with the ratios noted previously, dictated an increase in the provision for loan losses. The increase did not equate to the increase in charge-offs and nonperforming loans due to the collateral status of the nonperforming loans and overall loan portfolio in general, which limits the loan specific allocation of the allowance for loan losses. Utilizing both internal and external resources, as noted, senior management has concluded that the allowance for loan losses remains at a level adequate to provide for probable losses inherent in the loan portfolio.

NON-INTEREST INCOME

2012 vs. 2011

Total non-interest income increased \$1,881,000 from the year ended December 31, 2011 to December 31, 2012. Excluding net security gains, non-interest income increased \$1,217,000 year over year. Service charges decreased as customers continued to migrate to checking accounts having reduced or no service charges, while overdraft income declined due to a decreased number of overdrafts and a change in the maximum number of overdrafts a customer could incur per day. Earnings on bank-owned life insurance increased due to a non-recurring gain on death benefit recognized in 2012. Insurance commissions increased as the distribution channel continued to expand. Management of The M Group continues to pursue new and build upon current relationships. However, the sales cycle for insurance and investment products can take typically from six months to one year or more to complete. The increase in other income was primarily due to increases in revenues from debit/credit card transactions and merchant card commissions as electronic payment methods continue to gain in popularity and an increasing number of merchants use our merchant card services.

2011 vs. 2010

Total non-interest income increased \$760,000 from the year ended December 31, 2010 to December 31, 2011. Excluding net security gains, non-interest income increased \$312,000 year over year. Service charges decreased as customers continued to migrate to checking accounts having reduced or no service charges, while overdraft income declined due to a decreased number of overdrafts. Earnings on bank-owned life insurance decreased due to a non-recurring gain on death benefit recognized in 2010. Insurance and brokerage commissions remained stable as the market for these products begins to rebound. Management of The M Group continues to pursue new and build upon current relationships. However, the sales cycle for insurance and investment products can take typically from six months to one year or more to complete. The increase in other income was primarily due to increases in revenues from debit/credit card transactions and merchant card commissions as electronic payment methods continue to gain in popularity.

NON-INTEREST EXPENSE**2012 vs. 2011**

Total non-interest expenses increased \$2,059,000 from the year ended December 31, 2011 to December 31, 2012. The increase in salaries and employee benefits was attributable to increases in health insurance, bonus accrual, routine annual salary increases, and the addition of our Danville branch. Increased furniture and equipment expense was driven by the additional branch and improvements to existing branches. Other expenses increased primarily due to expenses, such as advertising, associated with the opening of a branch during 2012 and expenses incurred related to the announced plan to acquire Luzerne.

(In Thousands)	2012		2011		Change

Total non-interest expense	\$ 22,023	100.00%	\$ 19,964	100.00%	\$ 2,059	10.31%

2011 vs. 2010

Total non-interest expenses increased \$472,000 from the year ended December 31, 2010 to December 31, 2011. Salaries and employee benefits remained stable as a decrease in pension expense and an increase in deferred costs relating to loan generations limited the impact of several factors including standard cost of living wage adjustments for employees and increased benefit costs. Furniture and equipment expense increased due to an increase in general maintenance costs of technology related systems. FDIC deposit insurance expense decreased due to a change in the FDIC assessment from a deposit to asset based calculation. Other expenses increased primarily due to increases in other real estate expenses, donations, and training.

INCOME TAXES

2012 vs. 2011

The provision for income taxes for the year ended December 31, 2012 resulted in an effective income tax rate of 15.8% compared to 13.4% for 2011. This increase is primarily the result of increased net income.

Table of Contents

The Company currently is in a deferred tax asset position due to the low income housing tax credits earned both currently and previously. Management has reviewed the deferred tax asset and has determined that the asset will be utilized within the appropriate carry forward period and therefore does not require a valuation allowance.

2011 vs. 2010

The provision for income taxes for the year ended December 31, 2011 resulted in an effective income tax rate of 13.4% compared to 11.2% for 2010. This increase is primarily the result of increased revenue from net interest income and net securities gains that outpaced the increase in non-interest expense.

FINANCIAL CONDITION

INVESTMENTS

2012

The fair value of the investment portfolio increased \$19,164,000 from December 31, 2011 to December 31, 2012. The increase was split between an increase in unrealized gain and additions to the portfolio during 2012. The increase in amortized cost was primarily the result of purchasing shorter-term other debt securities or corporate bonds. These bonds were purchased due to their shorter maturity and ability to reduce the duration of the total investment portfolio during the continued period of low interest rates. The municipal portfolio had the largest change in unrealized gains as the portfolio moved from an unrealized gain of \$3,511,000 at December 31, 2011 to an unrealized gain of \$11,381,000 at December 31, 2012 as municipal defaults remained low and the supply of new issues also remained low.

2011

The fair value of the investment portfolio increased \$54,504,000 from December 31, 2010 to December 31, 2011. The increase was split between an increase in unrealized gain and additions to the amortized cost from purchases during 2011. The increase in amortized cost was primarily the result of purchasing shorter-term other debt securities or corporate bonds. These bonds were purchased due to their shorter maturity and ability to reduce the duration of the total investment portfolio during the continued period of low interest rates. In addition, the growth in the other debt securities segment of the portfolio allowed for the implementation of a barbell strategy with the current municipal portfolio serving as the other end of the barbell or long-term maturity portion of the total investment portfolio. The municipal portfolio had the largest change in unrealized gains as the portfolio moved from an unrealized loss of \$15,057,000 at December 31, 2010 to an unrealized gain of \$3,511,000 at December 31, 2011 as fewer defaults than predicted occurred and the supply of new issues decreased.

Total Investment Portfolio Yield					6.27%

All yields represent weighted average yields expressed on a tax equivalent basis. They are calculated on the basis of the cost, adjusted for amortization of premium and accretion of discount, and effective yields weighted for the scheduled maturity of each security. The taxable equivalent adjustment represents the difference between annual income from tax-exempt obligations and the taxable equivalent of such income at the standard 34% tax rate (derived by dividing tax-exempt interest by 66%).

LOAN PORTFOLIO

2012

Gross loans of \$512,232,000 at December 31, 2012 represented an increase of \$76,273,000 from December 31, 2011. The continued emphasis on well collateralized real estate loans accounted for the majority of the overall increase in loans outstanding with home equity loan and lines leading the way. The success in carrying out this long term strategy played a significant role in limiting net charge-offs for 2012 to 0.44% of average loans. Successful campaigns to increase home equity, multifamily residential, and auto loans were undertaken during 2012 with the increase in residential and commercial being directly correlated to the campaigns.

2011

Gross loans of \$435,959,000 at December 31, 2011 represented an increase of \$20,402,000 from December 31, 2010. The continued emphasis on well collateralized real estate loans accounted for the majority of the overall increase in loans outstanding. The success in carrying out this long term strategy played a significant role in limiting net charge-offs for 2011 to 0.37% of average loans. Successful campaigns to increase home equity and auto loans were undertaken during 2011 with the increase in residential and installment loans to individuals being directly correlated to the campaigns.

The amounts of loans outstanding at the indicated dates are shown in the following table according to type of loan at December 31, 2012, 2011, 2010, 2009, and 2008:

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

- The loan maturity information is based upon original loan terms and is not adjusted for rollovers. In the ordinary course of business, loans maturing within one year may be renewed, in whole or in part, at interest rates prevailing at the date of renewal.
- Scheduled repayments are reported in maturity categories in which the payment is due.

The Bank does not make loans that provide for negative amortization nor do any loans contain conversion features. The Bank does not have any foreign loans outstanding at December 31, 2012.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

ALLOWANCE FOR LOAN LOSSES

2012

The allowance for loan losses represents the amount which management estimates is adequate to provide for probable losses inherent in its loan portfolio, as of the consolidated balance sheet date. All loan losses are charged to the allowance and all recoveries are credited to it per the allowance method of providing for loan losses. The allowance for loan losses is established through a provision for loan losses charged to operations. The provision for loan losses is based upon management's quarterly review of the loan portfolio. The purpose of the review is to assess loan quality, identify impaired loans, analyze delinquencies, ascertain loan growth, evaluate potential charge-offs and recoveries, and

Table of Contents

assess general economic conditions in the markets served. An external independent loan review is also performed annually for the Bank. Management remains committed to an aggressive program of problem loan identification and resolution.

The allowance is calculated by applying loss factors to outstanding loans by type, excluding loans for which a specific allowance has been determined. Loss factors are based on management's consideration of the nature of the portfolio segments, changes in mix and volume of the loan portfolio, and historical loan loss experience. In addition, management considers industry standards and trends with respect to nonperforming loans and its knowledge and experience with specific lending segments.

The allowance for loan losses increased from \$7,154,000 at December 31, 2011 to \$7,617,000 at December 31, 2012. At December 31, 2012, the allowance for loan losses was 1.49% of total loans compared to 1.64% of total loans at December 31, 2011. The decrease in the allowance for loan losses to total loans was appropriate when considering the gross loan growth of \$76,273,000 was concentrated in well collateralized real estate backed loans with the borrowers having strong underlying financial positions. In addition, many of our loan customers are being positively impacted by the economic stimulus being provided by the Marcellus Shale natural gas exploration. This percentage has decreased due to the increase in the loan portfolio and several large charge-offs during 2012 that amounted to net charge-offs of \$2,062,000. Management concluded that the allowance for loan losses is adequate to provide for probable losses inherent in its loan portfolio as of the balance sheet date as noted in the provision for loan losses discussion.

Based on management's loan-by-loan review, the past performance of the borrowers, and current economic conditions, including recent business closures and bankruptcy levels, management does not anticipate any current losses related to nonaccrual, nonperforming, or classified loans above those that have already been considered in its overall judgment of the adequacy of the allowance for loan losses.

2011

The allowance for loan losses increased from \$6,035,000 at December 31, 2010 to \$7,154,000 at December 31, 2011. At December 31, 2011, the allowance for loan losses was 1.64% of total loans compared to 1.45% of total loans at December 31, 2010. This percentage is higher than the Bank's historical experience. Management's conclusion is that the allowance for loan losses is adequate to provide for probable losses inherent in its loan portfolio as of the balance sheet date as noted in the Provision for Loan Losses discussion.

NONPERFORMING LOANS

Nonaccrual loans decreased as several commercial real estate relationships were charged off partially or in total. These loans were primarily development loans and had a specific allowance within the allowance for loan losses.

The following table presents information concerning nonperforming loans. The accrual of interest will be discontinued when the principal or interest of a loan is in default for 90 days or more, or as soon as payment is questionable, unless the loan is well secured and in the process of collection. Consumer loans and residential real estate loans secured by 1 to 4 family dwellings are not ordinarily subject to those guidelines. The reversal of previously accrued but uncollected interest applicable to any loan placed in a nonaccrual status and the treatment of subsequent payments of either principal or interest will be handled in accordance with GAAP. These principles do not require a write-off of previously accrued interest if principal and interest are ultimately protected by sound collateral values. A nonperforming loan may be restored to accruing status when:

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

1. Principal and interest is no longer due and unpaid;
2. It becomes well secured and in the process of collection; and
3. Prospects for future contractual payments are no longer in doubt.

(In Thousands)	Total Nonperforming Loans		
	90 Days Past Due	Nonaccrual	Total
2012	\$ 351	\$ 11,355	\$ 11,706
2011	384	11,625	12,009
2010	557	5,658	6,215
2009	2,565	1,891	4,456
2008	259	1,476	1,735

The level of nonaccruing loans continues to fluctuate annually and is attributed to the various economic factors experienced both regionally

Table of Contents

and nationally. Overall, the portfolio is well secured with a majority of the balance making regular payments or scheduled to be satisfied in the near future. Presently, there are no significant amounts of loans where serious doubts exist as to the ability of the borrower to comply with the current loan payment terms which are not included in the nonperforming categories as indicated above.

Management's judgment in determining the amount of the additions to the allowance charged to operating expense considers the following factors with no single factor being determinative:

1. Economic conditions and the impact on the loan portfolio.
2. Analysis of past loan charge-offs experienced by category and comparison to outstanding loans.
3. Effect of problem loans on overall portfolio quality.
4. Reports of examination of the loan portfolio by the Pennsylvania State Department of Banking and the FDIC.

DEPOSITS

2012 vs. 2011

Total average deposits increased \$69,838,000 or 12.48% from 2011 to 2012. The growth is a result of an emphasis to increase and solidify deposit relationships by focusing on core deposits, not time deposits. In fact, average core deposits, which exclude time deposits, increased \$75,900,000 or 19.97%, while time deposits decreased \$6,062,000 or 3.38% from 2011 to 2012. In addition to the emphasis on growing core deposits by utilizing marketing strategies, the core deposit growth is receiving a lift from the natural gas exploration throughout our market footprint and municipal account gathering efforts. In addition, the Bank has continued to capitalize on its reputation of safety and soundness during this prolonged economic downturn.

2011 vs. 2010

Total average deposits increased \$37,344,000 or 7.15% from 2010 to 2011. The growth is a result of an emphasis to increase and solidify deposit relationships by focusing on core deposits, not time deposits. In fact, average core deposits, which exclude time deposits, increased \$66,282,000 or 21.12%, while time deposits decreased \$28,938,000 or 13.89% from 2010 to 2011. In addition to the emphasis on growing core deposits by utilizing marketing strategies, the core deposit growth is receiving a lift from the natural gas exploration throughout our market footprint and municipal account gathering efforts. In addition, the Bank has continued to capitalize on its reputation of safety and soundness during this prolonged economic downturn.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

The average amount and the average rate paid on deposits are summarized below for the years ended December 31, 2012, 2011, and 2010:

(In Thousands)	2012		2011		2010	
	Average Amount	Rate	Average Amount	Rate	Average Amount	Rate
Noninterest-bearing	\$ 113,431	0.00%	\$ 99,917	0.00%	\$ 84,158	0.00%
Savings	78,724	0.08	70,178	0.17	64,477	0.28
Super Now	118,515	0.51	88,556	0.53	65,080	0.59
Money Market	145,339	0.51	121,458	0.88	100,112	1.17
Time	173,274	1.29	179,336	1.62	208,274	2.07
Total average deposits	\$ 629,283	0.58%	\$ 559,445	0.82%	\$ 522,101	1.16%

SHAREHOLDERS EQUITY

2012

Shareholders' equity increased \$13,266,000 to \$93,726,000 at December 31, 2012 compared to December 31, 2011. The accumulated other comprehensive gain of \$5,357,000 at December 31, 2012 is a result of an increase in unrealized gains on available for sale securities from an unrealized gain of \$2,914,000 at December 31, 2011 to an unrealized gain of \$10,164,000 at December 31, 2012. However, the level of accumulated other comprehensive gain at December 31, 2012 was also impacted by the change in net excess of the projected benefit obligation over the market value of the plan assets of the defined benefit pension plan resulting in an increase in the net loss of \$674,000. The current level of shareholders' equity equates to a book value per share of \$24.42 at December 31, 2012 compared to \$20.97 at December 31, 2011 and an equity to asset ratio of 10.94% at December 31, 2012 compared to 10.53% at December 31, 2011. Excluding accumulated other comprehensive gain/loss, book value per share was \$23.02 at December 31, 2012 compared to \$21.29 at December 31, 2011. Dividends paid to shareholders were \$1.88 for the twelve months ended December 31, 2012 compared to \$1.84 for the twelve months ended December 31, 2011, an increase of 2.17%.

2011

Shareholders' equity increased \$13,840,000 to \$80,460,000 at December 31, 2011 compared to December 31, 2010. The accumulated other comprehensive loss of \$1,219,000 at December 31, 2011 is a result of an increase in unrealized gains on available for sale securities from an

Table of Contents

unrealized loss of \$7,276,000 at December 31, 2010 to an unrealized gain of \$2,914,000 at December 31, 2011. However, the level of accumulated other comprehensive loss at December 31, 2011 was also impacted by the change in net excess of the projected benefit obligation over the market value of the plan assets of the defined benefit pension plan resulting in an increase in the net loss of \$1,720,000. The current level of shareholders' equity equates to a book value per share of \$20.97 at December 31, 2011 compared to \$17.37 at December 31, 2010 and an equity to asset ratio of 10.53% at December 31, 2011 compared to 9.63% at December 31, 2010. Excluding accumulated other comprehensive loss, book value per share was \$21.29 at December 31, 2011 compared to \$19.90 at December 31, 2010. Dividends paid to shareholders were \$1.84 for each of the twelve months ended December 31, 2011 and 2010.

Bank regulators have risk based capital guidelines. Under these guidelines the Company and Bank are required to maintain minimum ratios of core capital and total qualifying capital as a percentage of risk weighted assets and certain off-balance sheet items. At December 31, 2012, both the Company's and Bank's required ratios were well above the minimum ratios as follows:

	Company	Bank	Minimum Standards
Tier 1 capital ratio	9.47%	8.02%	4.00%
Total capital ratio	14.97%	12.84%	8.00%

For a more comprehensive discussion of these requirements, see "Regulations and Supervision" in Item 1 of the Annual Report on Form 10-K. Management believes that the Company will continue to exceed regulatory capital requirements.

RETURN ON EQUITY AND ASSETS

The ratio of net income to average total assets and average shareholders' equity, and other certain equity ratios are presented as follows:

	2012	2011	2010
Percentage of net income to:			
Average total assets	1.70%	1.69%	1.56%
Average shareholders' equity	15.36%	16.60%	15.30%
Percentage of dividends declared to net income	52.08%	57.10%	64.56%
Percentage of average shareholders' equity to average total assets	11.04%	10.18%	10.19%

LIQUIDITY, INTEREST RATE SENSITIVITY, AND MARKET RISK

The asset/liability committee addresses the liquidity needs of the Company to ensure that sufficient funds are available to meet credit demands and deposit withdrawals as well as to the placement of available funds in the investment portfolio. In assessing liquidity requirements, equal consideration is given to the current position as well as the future outlook.

The following liquidity measures are monitored for compliance and were within the limits cited at December 31, 2012:

1. Net Loans to Total Assets, 85% maximum
2. Net Loans to Total Deposits, 100% maximum
3. Cumulative 90 day Maturity GAP %, +/- 20% maximum
4. Cumulative 1 Year Maturity GAP %, +/- 25% maximum

Fundamental objectives of the Company's asset/liability management process are to maintain adequate liquidity while minimizing interest rate risk. The maintenance of adequate liquidity provides the Company with the ability to meet its financial obligations to depositors, loan customers, and shareholders. Additionally, it provides funds for normal operating expenditures and business opportunities as they arise. The objective of interest rate sensitivity management is to increase net interest income by managing interest sensitive assets and liabilities in such a way that they can be repriced in response to changes in market interest rates.

The Company, like other financial institutions, must have sufficient funds available to meet its liquidity needs for deposit withdrawals, loan commitments, and expenses. In order to control cash flow, the Bank estimates future flows of cash from deposits and loan payments. The primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, as well as FHLB borrowings. Funds generated are used principally to fund loans and purchase investment securities. Management believes the Company has adequate resources to meet its normal funding requirements.

Management monitors the Company's liquidity on both a long and short-term basis, thereby, providing management necessary information to react to current balance sheet trends. Cash flow needs are assessed and sources of funds are determined. Funding strategies consider both customer needs and economical cost. Both short and long term funding needs are addressed by maturities and sales of available for sale investment securities, loan repayments and maturities, and liquidating money market investments such as federal funds sold. The use of these resources, in conjunction with access to credit, provides core ingredients to satisfy depositor, borrower, and creditor needs.

Management monitors and determines the desirable level of liquidity. Consideration is given to loan demand, investment opportunities,

Table of Contents

deposit pricing and growth potential, as well as the current cost of borrowing funds. The Company has a current borrowing capacity at the FHLB of \$248,952,000 with \$92,514,000 utilized, leaving \$156,438,000 available. In addition to this credit arrangement, the Company has additional lines of credit with correspondent banks of \$26,606,000. The Company's management believes that it has sufficient liquidity to satisfy estimated short-term and long-term funding needs.

Interest rate sensitivity, which is closely related to liquidity management, is a function of the repricing characteristics of the Company's portfolio of assets and liabilities. Asset/liability management strives to match maturities and rates between loan and investment security assets with the deposit liabilities and borrowings that fund them. Successful asset/liability management results in a balance sheet structure which can cope effectively with market rate fluctuations. The matching process is affected by segmenting both assets and liabilities into future time periods (usually 12 months, or less) based upon when repricing can be effected. Repriceable assets are subtracted from repriceable liabilities, for a specific time period to determine the gap, or difference. Once known, the gap is managed based on predictions about future market interest rates. Intentional mismatching, or gapping, can enhance net interest income if market rates move as predicted. However, if market rates behave in a manner contrary to predictions, net interest income will suffer. Gaps, therefore, contain an element of risk and must be prudently managed. In addition to gap management, the Company has an asset liability management policy which incorporates a market value at risk calculation which is used to determine the effects of interest rate movements on shareholders' equity and a simulation analysis to monitor the effects of interest rate changes on the Company's balance sheet.

The Company currently maintains a gap position of being liability sensitive. The Company has strategically taken this position as it has decreased the duration of the time deposit portfolio over the last several years, while continuing to maintain a primarily fixed rate earning asset portfolio with a duration greater than the liabilities utilized to fund earning assets. Lengthening of the liability portfolio coupled with the addition of limited short-term assets is being undertaken. These actions are expected to reduce, but not eliminate, the liability sensitive structure of the balance sheet.

A market value at risk calculation is utilized to monitor the effects of interest rate changes on the Company's balance sheet and more specifically shareholders' equity. The Company does not manage the balance sheet structure in order to maintain compliance with this calculation. The calculation serves as a guideline with greater emphasis placed on interest rate sensitivity. Changes to calculation results from period to period are reviewed as changes in results could be a signal of future events. As of the most recent analysis, the results of the market value at risk calculation were outside of established guidelines due to the strategic direction being taken.

INTEREST RATE SENSITIVITY

In this analysis the Company examines the result of various changes in market interest rates in 100 basis point increments and their effect on net interest income. It is assumed that the change is instantaneous and that all rates move in a parallel manner. Assumptions are also made concerning prepayment speeds on mortgage loans and mortgage securities.

The following is a rate shock forecast for the twelve month period ended December 31, 2013 assuming a static balance sheet as of December 31, 2012.

Parallel Rate Shock in Basis Points

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

(In Thousands)	-200	-100	Static	+100	+200	+300	+400
Net interest income	\$ 28,867	\$ 29,394	\$ 29,838	\$ 29,858	\$ 29,855	\$ 29,776	\$ 29,479
Change from static	(971)	(444)		20	17	(62)	(359)
Percent change from static	-3.25%	-1.49%		0.07%	0.06%	-0.21%	-1.20%

The model utilized to create the report presented above makes various estimates at each level of interest rate change regarding cash flow from principal repayment on loans and mortgage-backed securities and/or call activity on investment securities. Actual results could differ significantly from these estimates which would result in significant differences in the calculated projected change. In addition, the limits stated above do not necessarily represent the level of change under which management would undertake specific measures to realign its portfolio in order to reduce the projected level of change. Generally, management believes the Company is well positioned to respond expeditiously when the market interest rate outlook changes.

INFLATION

The asset and liability structure of a financial institution is primarily monetary in nature; therefore, interest rates rather than inflation have a more significant impact on the Company's performance. Interest rates are not always affected in the same direction or magnitude as prices of other goods and services, but are reflective of fiscal policy initiatives or economic factors that are not measured by a price index.

CRITICAL ACCOUNTING POLICIES

The Company's accounting policies are integral to understanding the results reported. The accounting policies are described in detail in Note 1 of the Notes to Consolidated Financial Statements. Our most complex accounting policies require management's judgment to ascertain the valuation of assets, liabilities, commitments, and contingencies. We have established detailed policies and control procedures that are intended to ensure valuation methods are well controlled and applied consistently from period to period. In addition, the policies and

Table of Contents

procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The following is a brief description of our current accounting policies involving significant management valuation judgments.

Other Than Temporary Impairment of Debt and Equity Securities

Debt and equity securities are evaluated periodically to determine whether a decline in their value is other than temporary. Management utilizes criteria such as the magnitude and duration of the decline, in addition to the reason underlying the decline, to determine whether the loss in value is other than temporary. The term "other than temporary" is not intended to indicate that the decline is permanent. It indicates that the prospects for a near term recovery of value are not necessarily favorable, or that there is a lack of evidence to support fair values equal to, or greater than, the carrying value of the investment. Once a decline in value is determined to be other than temporary, the value of the security is reduced and a corresponding charge to earnings is recognized. For a full discussion of the Company's methodology of assessing impairment, refer to Note 3 of the Notes to Consolidated Financial Statements.

Allowance for Loan Losses

Arriving at an appropriate level of allowance for loan losses involves a high degree of judgment. The Company's allowance for loan losses provides for probable losses based upon evaluations of known and inherent risks in the loan portfolio.

Management uses historical information to assess the adequacy of the allowance for loan losses as well as the prevailing business environment; as it is affected by changing economic conditions and various external factors, which may impact the portfolio in ways currently unforeseen. The allowance is increased by provisions for loan losses and by recoveries of loans previously charged-off and reduced by loans charged-off. For a full discussion of the Company's methodology of assessing the adequacy of the reserve for allowance for loan losses, refer to Note 1 of the Notes to Consolidated Financial Statements.

Goodwill and Other Intangible Assets

As discussed in Note 7 of the Notes to Consolidated Financial Statements, the Company must assess goodwill and other intangible assets each year for impairment. This assessment involves estimating cash flows for future periods. If the future cash flows were less than the recorded goodwill and other intangible assets balances, we would be required to take a charge against earnings to write down the assets to the lower value.

Deferred Tax Assets

Management uses an estimate of future earnings to support their position that the benefit of their deferred tax assets will be realized. If future income should prove non-existent or less than the amount of the deferred tax assets within the tax years to which they may be applied, the asset

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

may not be realized and the Company's net income will be reduced. The Company's deferred tax assets are described further in Note 11 of the Notes to Consolidated Financial Statements.

Pension Benefits

Pension costs and liabilities are dependent on assumptions used in calculating such amounts. These assumptions include discount rates, benefits earned, interest costs, expected return on plan assets, mortality rates, and other factors. In accordance with GAAP, actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, generally affect recognized expense and the recorded obligation of future periods. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect the Company's pension obligations and future expense. Our pension benefits are described further in Note 12 of the Notes to Consolidated Financial Statements.

CONTRACTUAL OBLIGATIONS

The Company has various financial obligations, including contractual obligations which may require future cash payments. The following table presents, as of December 31, 2012, significant fixed and determinable contractual obligations to third parties by payment date. Further discussion of the nature of each obligation is included in the Notes to Consolidated Financial Statements.

(In Thousands)	Payments Due In				Total
	One Year or Less	One to Three Years	Three to Five Years	Over Five Years	
Deposits without a stated maturity	\$ 472,675	\$	\$	\$	\$ 472,675
Time deposits	100,833	58,781	8,295	1,442	169,351
Repurchase agreements	16,968				16,968
Short-term borrowings, FHLB	16,236				16,236
Long-term borrowings, FHLB	5,528	10,750	50,000	10,000	76,278
Operating leases	439	852	710	1,186	3,187

The Company's operating lease obligations represent short and long-term lease and rental payments for branch facilities and equipment. The Bank leases certain facilities under operating leases which expire on various dates through 2024. Renewal options are available on the majority of these leases.

Table of Contents

CAUTIONARY STATEMENT FOR PURPOSES OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This Report contains certain forward-looking statements including statements concerning plans, objectives, future events or performance and assumptions and other statements which are other than statements of historical fact. The Company wishes to caution readers that the following important factors, among others, may have affected and could in the future affect the Company's actual results and could cause the Company's actual results for subsequent periods to differ materially from those expressed in any forward-looking statement made by or on behalf of the Company herein: (i) the effect of changes in laws and regulations, including federal and state banking laws and regulations, with which the Company must comply, and the associated costs of compliance with such laws and regulations either currently or in the future as applicable; (ii) the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies as well as by the Financial Accounting Standards Board, or of changes in the Company's organization, compensation and benefit plans; (iii) the effect on the Company's competitive position within its market area of the increasing consolidation within the banking and financial services industries, including the increased competition from larger regional and out-of-state banking organizations as well as non-bank providers of various financial services; (iv) the effect of changes in interest rates; (v) the effect of changes in the business cycle and downturns in the local, regional or national economies; and (vi) the successful completion of the Company's pending acquisition of Luzerne National Bank Corporation and integration of the business and operations of Luzerne with those of the Company.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2012 and 2011, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 12, 2013, expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

PENNS WOODS BANCORP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Penns Woods Bancorp, Inc. and its wholly owned subsidiaries, Jersey Shore State Bank (the Bank), Woods Real Estate Development Co., Inc., Woods Investment Company, Inc., and The M Group Inc. D/B/A The Comprehensive Financial Group (The M Group), a wholly owned subsidiary of the Bank (collectively, the Company). All significant intercompany balances and transactions have been eliminated.

Nature of Business

The Bank engages in a full-service commercial banking business, making available to the community a wide range of financial services including, but not limited to, installment loans, credit cards, mortgage and home equity loans, lines of credit, construction financing, farm loans, community development loans, loans to non-profit entities and local government, and various types of time and demand deposits including, but not limited to, checking accounts, savings accounts, clubs, money market deposit accounts, certificates of deposit, and IRAs. Deposits are insured by the Federal Deposit Insurance Corporation (FDIC) to the extent provided by law.

The financial services are provided by the Bank to individuals, partnerships, non-profit organizations, and corporations through its thirteen offices located in Clinton, Lycoming, Centre, and Montour Counties, Pennsylvania.

Woods Real Estate Development Co., Inc. engages in real estate transactions on behalf of Penns Woods Bancorp, Inc. and the Bank.

Woods Investment Company, Inc., a Delaware holding company, is engaged in investing activities.

The M Group engages in securities brokerage and financial planning services, which include the sale of life insurance products, annuities, and estate planning services.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

Operations are managed and financial performance is evaluated on a corporate-wide basis. Accordingly, all financial service operations are considered by management to be aggregated in one reportable operating segment.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses, valuation of net deferred tax assets, impairment of goodwill, other than temporary impairment of debt and equity securities, fair value of financial instruments, and the valuation of real estate acquired through, or in lieu of, foreclosure on settlement of debt.

Cash and Cash Equivalents

Cash equivalents include cash on hand and in banks. Interest-earning deposits mature within 90 days and are carried at cost. Net cash flows are reported for loan, deposit, and short-term borrowing transactions.

Restrictions on Cash and Cash Equivalents

Based on deposit levels, the Company must maintain cash and other reserves with the Federal Reserve Bank of Philadelphia (FRB).

Investment Securities

Investment securities are classified at the time of purchase, based on management's intention and ability, as securities held to maturity or securities available for sale. Debt securities acquired with the intent and ability to hold to maturity are stated at cost, adjusted for amortization of premium and accretion of discount, which are computed using the interest method and recognized as adjustments of interest income. Certain other debt securities have been classified as available for sale to serve principally as a source of liquidity. Unrealized holding gains and losses for available for sale securities are reported as a separate component of shareholders' equity, net of tax, until realized. Realized security gains and losses are computed using the specific identification method for debt securities and the average cost method for marketable equity securities. Interest and dividends on investment securities are recognized as income when earned.

Securities are periodically reviewed for other-than-temporary impairment based upon a number of factors, including, but not limited to, the length of time and extent to which the fair value has been less than cost, the financial condition of the underlying issuer, the ability of the issuer to meet contractual obligations, the likelihood of the security's ability to recover any decline in its fair value,

Table of Contents

whether it is more likely than not that the Company would be required to sell the security before its anticipated recovery in fair value, and a review of the Company's capital adequacy, interest rate risk position, and liquidity. The assessment of a security's ability to recover any decline in fair value, the ability of the issuer to meet contractual obligations, and management's intent and ability requires considerable judgment. A decline in value that is considered to be other-than-temporary is recorded as a loss within non-interest income in the Consolidated Statement of Income.

Investment securities fair values are based on observed market prices. Certain investment securities do not have observed bid prices and their fair value is based on instruments with similar risk elements. Since regulatory stock is redeemable at par, the Company carries it at cost.

Loans

Loans are stated at the principal amount outstanding, net of deferred fees and discounts, unamortized loan fees and costs, and the allowance for loan losses. Interest on loans is recognized as income when earned on the accrual method. The Company's general policy has been to stop accruing interest on loans when it is determined a reasonable doubt exists as to the collectability of additional interest. Income is subsequently recognized only to the extent that cash payments are received provided the loan is not delinquent in payment and, in management's judgment, the borrower has the ability and intent to make future principal payments. Otherwise, payments are applied to the unpaid principal balance of the loan. Loans are restored to accrual status if certain conditions are met, including but not limited to, the repayment of all unpaid interest and scheduled principal due, ongoing performance consistent with the contractual agreement, and the future expectation of continued, timely payments.

Loan origination and commitment fees as well as certain direct loan origination costs are being deferred and amortized as an adjustment to the related loan's yield over the contractual lives of the related loans.

Allowance for Loan Losses

The allowance for loan losses represents the amount which management estimates is adequate to provide for probable losses inherent in its loan portfolio, as of the Consolidated Balance Sheet date. The allowance method is used in providing for loan losses. Accordingly, all loan losses are charged to the allowance and all recoveries are credited to it. The allowance for loan losses is established through a provision for loan losses charged to operations. The provision for loan losses is based upon management's quarterly review of the loan portfolio. The purpose of the review is to assess loan quality, identify impaired loans, analyze delinquencies, ascertain loan growth, evaluate potential charge-offs and recoveries, and assess general economic conditions in the markets served. An external independent loan review is also performed annually for the Bank. Management remains committed to an aggressive program of problem loan identification and resolution.

The allowance is calculated by applying loss factors to outstanding loans by type, excluding loans for which a specific allowance has been determined. Loss factors are based on management's consideration of the nature of the portfolio segments, changes in mix and volume of the loan portfolio, historical loan loss experience, and general economic conditions. In addition, management considers industry standards and trends with respect to nonperforming loans and its knowledge and experience with specific lending segments.

Although management believes that it uses the best information available to make such determinations and that the allowance for loan losses is adequate at December 31, 2012, future adjustments could be necessary if circumstances or economic conditions differ substantially from the assumptions used in making the initial determinations. A downturn in the local economy, rising unemployment, or negative performance trends in financial information from borrowers could be indicators of subsequent increased levels of nonperforming assets and possible charge-offs, which would normally require increased loan loss provisions. An integral part of the periodic regulatory examination process is the review of the adequacy of the Bank's loan loss allowance. The regulatory agencies could require the Bank, based on their evaluation of information available at the time of their examination, to provide additional loan loss provisions to further supplement the allowance.

Impaired loans are commercial and commercial real estate loans for which it is probable the Bank will not be able to collect all amounts due according to the contractual terms of the loan agreement. The Bank individually evaluates such loans for impairment and does not aggregate loans by major risk classifications. The definition of impaired loans is not the same as the definition of nonaccrual loans, although the two categories overlap. The Bank may choose to place a loan on nonaccrual status due to payment delinquency or uncertain collectability, while not classifying the loan as impaired if the loan is not a commercial or commercial real estate loan. Factors considered by management in determining impairment include payment status and collateral value. The amount of impairment for these types of loans is determined by the difference between the present value of the expected cash flows related to the loan, using the original interest rate, and its recorded value, or as a practical expedient in the case of collateralized loans, the difference between the fair value of the collateral and the recorded amount of the loans. When foreclosure is probable, impairment is measured based on the fair value of the collateral.

Mortgage loans on one-to-four family properties and all consumer loans are large groups of smaller-balance homogeneous loans and are measured for impairment collectively. Loans that experience insignificant payment delays, which are defined as 90 days or

Table of Contents

less, generally are not classified as impaired. Management determines the significance of payment delays on a case-by-case basis taking into consideration all circumstances surrounding the loan and the borrower including the length of the delay, the borrower's prior payment record, and the amount of shortfall in relation to the principal and interest owed.

Loan Charge-off Policies

Loans are generally fully or partially charged down to the fair value of collateral securing the asset when:

- management judges the asset to be uncollectible;
- repayment is deemed to be protracted beyond reasonable time frames;
- the asset has been classified as a loss by either the internal loan review process or external examiners;
- the borrower has filed bankruptcy and the loss becomes evident due to a lack of assets; or
- the loan is 180 days past due unless both well secured and in the process of collection.

Troubled Debt Restructurings

In situations where, for economic or legal reasons related to a borrower's financial difficulties, management may grant a concession for other than an insignificant period of time to the borrower that would not otherwise be considered, the related loan is classified as a troubled debt restructuring (TDR). Management strives to identify borrowers in financial difficulty early and work with them to modify to more affordable terms before their loan reaches nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance, and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where borrowers are granted new terms that provide for a reduction of either interest or principal, management measures any impairment on the restructuring as noted above for impaired loans.

In addition to the allowance for the pooled portfolios, management has developed a separate allowance for loans that are identified as impaired through a TDR. These loans are excluded from pooled loss forecasts and a separate reserve is provided under the accounting guidance for loan impairment. Consumer loans whose terms have been modified in a TDR are also individually analyzed for estimated impairment.

Loans Held for Sale

In general, fixed rate residential mortgage loans originated by the Bank are held for sale and are carried at cost due to their short holding period, which can range from less than two weeks to a maximum of thirty days. Sold loans are not serviced by the Bank. Proceeds from the sale of loans in excess of the carrying value are accounted for as a gain. Total gains on the sale of loans are shown as a component of non-interest

income within the Consolidated Statement of Income.

Foreclosed Assets

Foreclosed assets are carried at the lower of cost or fair value less estimated selling costs. Prior to foreclosure, the value of the underlying loan is written down to the fair value of the real estate to be acquired by a charge to the allowance for loan losses, if necessary. Any subsequent write-downs are charged against operating expenses. Net operating expenses and gains and losses realized from disposition are included in non-interest expense and income, respectively.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed using straight-line and accelerated methods over the estimated useful lives of the related assets, which range from five to ten years for furniture, fixtures, and equipment and fifteen to forty years for buildings and improvements. Costs incurred for routine maintenance and repairs are charged to operations as incurred. Costs of major additions and improvements are capitalized.

Bank-Owned Life Insurance

The Company has purchased life insurance policies on certain officers and directors. Bank-owned life insurance is recorded at its cash surrender value, or the amount that can be realized. Increases in the cash surrender value are recognized as a component of non-interest income within the Consolidated Statement of Income.

Goodwill

The Company performs an annual impairment analysis of goodwill for its purchased subsidiary, The M Group. Based on the fair value of this reporting unit, estimated using the expected present value of future cash flows, no impairment of goodwill was recognized in 2012, 2011, or 2010.

Investments in Limited Partnerships

The Company is a limited partner in four partnerships at December 31, 2012 that provide low income elderly housing in the Company's geographic market area. The carrying value of the Company's investments in limited partnerships was \$2,883,000 at December 31, 2012 and \$3,544,000 at December 31, 2011. One investment is fully amortized, while the other three are being amortized over the ten-year tax credit receipt period utilizing the straight-line method. The partnerships are amortized once the projects reach the level of occupancy needed to begin the ten year tax credit recognition period. Amortization of limited partnership investments amounted to \$661,000 in 2012, \$661,000 in 2011, and \$693,000 in 2010.

Table of Contents

Off-Balance Sheet Financial Instruments

In the ordinary course of business, the Company enters into off-balance sheet financial instruments. Those instruments consist of commitments to extend credit and standby letters of credit. When those instruments are funded or become payable, the Company reports the amounts in its financial statements.

Advertising Cost

Advertising costs are generally expensed as incurred.

Income Taxes

The Company prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Benefits from tax positions should be recognized in the financial statements only when it is more likely than not that the tax position will be sustained upon examination by the appropriate taxing authority that would have full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not recognition threshold should be derecognized in the first subsequent financial reporting period in which that threshold is no longer met.

Deferred tax assets and liabilities result from temporary differences in financial and income tax methods of accounting, and are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. The Company analyzed its deferred tax asset position and determined that there was not a need for a valuation allowance due to the Company's ability to generate future ordinary and capital taxable income.

The Company when applicable recognizes interest and penalties on income taxes as a component of income tax provision.

Earnings Per Share

The Company provides dual presentation of basic and diluted earnings per share. Basic earnings per share is calculated utilizing net income as reported in the numerator and weighted average shares outstanding in the denominator. The computation of diluted earnings per share differs in that the dilutive effects of any stock options are adjusted in the denominator.

Employee Benefits

Pension and employee benefits include contributions, determined actuarially, to a defined benefit retirement plan covering the eligible employees of the Bank. The plan is funded on a current basis to the extent that it is deductible under existing federal tax regulations. Pension and other employee benefits also include contributions to a defined contribution Section 401(k) plan covering eligible employees. Contributions matching those made by eligible employees are funded throughout the year. In addition, an elective contribution is made annually at the discretion of the Board of Directors.

The M Group Products and Income Recognition

The M Group product line is comprised primarily of annuities, life insurance, and mutual funds. The revenues generated from life insurance sales are commission only, as The M Group does not underwrite the policies. Life insurance sales include permanent and term policies with the majority of the policies written being permanent. Term life insurance policies are written for 10, 15, 20, and 30 year terms with the majority of the policies being written for 20 years. None of these products are offered as an integral part of lending activities.

Commissions from the sale of annuities are recognized at the time notice is received from the third party broker/dealer or an insurance company that the transaction has been accepted and approved, which is also the time when commission income is received.

Life insurance commissions are recognized at varying points based on the payment option chosen by the customer. Commissions from monthly and annual payment plans are recognized at the start of each annual period for the life insurance, while quarterly and semi-annual premium payments are recognized quarterly and semi-annually when the earnings process is complete. For example, semi-annual payments on the first of January and July would result in commission income recognition on the first of January and July, while payments on the first of January, April, July, and October would result in commission income recognition on those dates. The potential for chargebacks only exists for those policies on a monthly payment plan since income is recognized at the beginning of the annual coverage period versus at the time of each monthly payment. No liability is maintained for chargebacks as these are removed from income at the time of the occurrence.

Stock Options

The Company maintained a stock option plan for directors and certain officers and employees with the last option grant being in

Table of Contents

2000. All options granted under the stock option plan were either exercised or forfeited as of December 31, 2010. All options were granted when the exercise price of the Company's stock options was greater than or equal to the market price of the underlying stock on the date of the grant, therefore, no compensation expense was recognized in the Company's financial statements.

Accumulated Other Comprehensive Income

The Company is required to present accumulated other comprehensive income in a full set of general-purpose financial statements for all periods presented. Accumulated other comprehensive income is comprised of unrealized holding gains (losses) on the available for sale securities portfolio and the unrecognized components of net periodic benefit costs of the defined benefit pension plan.

The components of accumulated other comprehensive income, net of tax, as of year-end were as follows:

(In Thousands)	Year Ended December 31,		
	2012	2011	2010
Net unrealized gain on available for sale securities	\$ 10,164	\$ 2,914	\$ (7,276)
Defined benefit plan	(4,807)	(4,133)	(2,413)
Total	\$ 5,357	\$ (1,219)	\$ (9,689)

Segment Reporting

The Company has determined that its only reportable segment is Community Banking.

Reclassification of Comparative Amounts

Certain items previously reported have been reclassified to conform to the current year's reporting format. Such reclassifications did not affect net income or shareholders' equity.

Recent Accounting Pronouncements

In December 2011, the FASB issued ASU 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*. The amendments in this update affect all entities that have financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement. The

requirements amend the disclosure requirements on offsetting in Section 210-20-50. This information will enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments in the scope of this update. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. This ASU is not expected to have a significant impact on the Company's financial statements.

In January 2013, the FASB issued ASU 2013-01, Balance Sheet (Topic 210): *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*. The amendments clarify that the scope of Update 2011-11 applies to derivatives accounted for in accordance with Topic 815, *Derivatives and Hedging*, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with Section 210-20-45 or Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement. An entity is required to apply the amendments for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the required disclosures retrospectively for all comparative periods presented. The effective date is the same as the effective date of Update 2011-11. This ASU is not expected to have a significant impact on the Company's financial statements.

In February 2013, the FASB issued ASU 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. The amendments in this update require an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles (GAAP) to be reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. For public entities, the amendments are effective prospectively for reporting periods beginning after December 15, 2012. The Company is currently evaluating the impact that these disclosures will have on its financial statements.

NOTE 2 - PER SHARE DATA

There are no convertible securities which would affect the denominator in calculating basic and dilutive earnings per share; therefore, net income as presented on the consolidated statement of income will be used as the numerator. The following table sets

Table of Contents

forth the composition of the weighted average common shares (denominator) used in the basic and dilutive per share computation.

	Year Ended December 31,		
	2012	2011	2010
Weighted average common shares issued	4,018,347	4,016,632	4,014,248
Average treasury stock shares	(180,596)	(180,596)	(179,993)
Weighted average common shares and common stock equivalents used to calculate basic earnings per share	3,837,751	3,836,036	3,834,255
Additional common stock equivalents (stock options) used to calculate diluted earnings per share			139
Weighted average common shares and common stock equivalents used to calculate diluted earnings per share	3,837,751	3,836,036	3,834,394

Options were outstanding during 2010; however, prior to December 31, 2010 all options were either exercised or forfeited. No options were outstanding during 2011 or 2012.

NOTE 3 - INVESTMENT SECURITIES

The amortized cost and fair values of investment securities at December 31, 2012 and 2011 are as follows:

(In Thousands)	Amortized Cost	2012		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Available for sale (AFS)				
U.S. Government and agency securities	\$ 24,475	\$ 1,384	\$ (19)	\$ 25,840

Total equity securities	767	(29)	268	(22)	1,035	(51)
Total	\$ 21,809	\$ (553)	\$ 9,642	\$ (1,200)	\$ 31,451	\$ (1,753)

(In Thousands)	Less than Twelve Months		2011 Twelve Months or Greater		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
State and political securities	\$ 1,142	\$ (6)	\$ 28,260	\$ (4,881)	\$ 29,402	\$ (4,887)
Other debt securities	35,858	(2,048)	82	(18)	35,940	(2,066)
Total debt securities	37,000	(2,054)	28,342	(4,899)	65,342	(6,953)
Financial institution equity securities	1,140	(116)	273	(116)	1,413	(232)
Other equity securities	263	(65)	130	(10)	393	(75)
Total equity securities	1,403	(181)	403	(126)	1,806	(307)
Total	\$ 38,403	\$ (2,235)	\$ 28,745	\$ (5,025)	\$ 67,148	\$ (7,260)

At December 31, 2012 and 2011 there were 29 and 50 individual securities in a continuous unrealized loss position for less than twelve months and 21 and 71 individual securities in a continuous unrealized loss position for greater than twelve months, respectively.

The Company reviews its position quarterly and has asserted that at December 31, 2012 and 2011, the declines outlined in the above table represent temporary declines and the Company does not intend to sell and does not believe they will be required to sell these securities before recovery of their cost basis, which may be at maturity. The Company has concluded that any impairment of its investment securities portfolio is not other than temporary but is the result of interest rate changes that are not expected to result in the noncollection of principal and interest during the period.

The amortized cost and fair value of debt securities at December 31, 2012, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities since borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

(In Thousands)	Amortized Cost		Fair Value	
Due in one year or less	\$	6,424	\$	6,465
Due after one year to five years		43,624		44,746
Due after five years to ten years		35,637		36,605
Due after ten years		177,741		189,847
Total	\$	263,426	\$	277,663

Total gross proceeds from sales of securities available for sale were \$48,460,000, \$13,454,000, and \$3,700,000 for 2012, 2011, and 2010, respectively. The following table represents gross realized gains and losses on those transactions:

Table of Contents

(In Thousands)	Year Ended December 31,		
	2012	2011	2010
Gross realized gains:			
U.S. Government and agency securities	\$ 138	\$ 4	\$
State and political securities	327	114	
Other debt securities	426	8	117
Financial institution equity securities	609	316	102
Other equity securities	587	294	
Total gross realized gains	\$ 2,087	\$ 736	\$ 219
Gross realized losses:			
U.S. Government and agency securities	\$	\$	\$
State and political securities	440	100	3
Other debt securities	53	15	15
Financial institution equity securities	67		28
Other equity securities	242		
Total gross realized losses	\$ 802	\$ 115	\$ 46

There were no impairment charges included in gross realized losses for the years ended December 31, 2012, 2011, and 2010.

Investment securities with a carrying value of approximately \$137,870,000 and \$113,611,000 at December 31, 2012 and 2011, respectively, were pledged to secure certain deposits, repurchase agreements, and for other purposes as required by law.

There is no concentration of investments that exceed ten percent of shareholders' equity for any individual issuer, excluding those guaranteed by the U.S. Government.

NOTE 4 - FEDERAL HOME LOAN BANK STOCK

The Bank is a member of the Federal Home Loan Bank (FHLB) of Pittsburgh and as such, is required to maintain a minimum investment in stock of the FHLB that varies with the level of advances outstanding with the FHLB. The stock is bought from and sold to the FHLB based upon its \$100 par value. The stock does not have a readily determinable fair value and as such is classified as restricted stock, carried at cost and evaluated for impairment as necessary. The stock's value is determined by the ultimate recoverability of the par value rather than by recognizing temporary declines. The determination of whether the par value will ultimately be recovered is influenced by criteria such as the following: (a) the significance of the decline in net assets of the FHLB as compared to the capital stock amount and the length of time this situation has persisted (b) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance (c) the impact of legislative and regulatory changes on the customer base of the FHLB and (d) the liquidity position of the FHLB.

The FHLB had incurred losses in 2009 and for parts of 2010 due primarily to other-than-temporary impairment credit losses on its private-label mortgage-backed securities portfolio. These securities were the most effected by the extreme economic conditions in place during the previous several years. As a result, in 2009, 2010, and 2011 the FHLB had suspended the payment of dividends and limited the amount of excess capital stock repurchases. However, the FHLB has reported net income for the year ended 2010, 2011, and 2012 and paid dividends during 2012.

Management evaluated the stock and concluded that the stock was not impaired for the periods presented herein. More consideration was given

to the long-term prospects for the FHLB as opposed to the stress caused by the extreme economic conditions in 2009 and 2010. Management also considered that the FHLB maintains regulatory capital ratios in excess of all regulatory capital requirements, liquidity appears adequate, new shares of FHLB stock continue to change hands at the \$100 par value, and the resumption of dividends.

NOTE 5 LOAN CREDIT QUALITY AND RELATED ALLOWANCE FOR LOAN LOSSES

Management segments the Bank's loan portfolio to a level that enables risk and performance monitoring according to similar risk characteristics. Loans are segmented based on the underlying collateral characteristics. Categories include commercial and agricultural, real estate, and installment loans to individuals. Real estate loans are further segmented into three categories: residential, commercial, and construction.

The following table presents the related aging categories of loans, by segment, as of December 31, 2012 and 2011:

Table of Contents

(In Thousands)	2012					Total
	Current	Past Due 30 To 89 Days	Past Due 90 Days Or More & Still Accruing		Non- Accrual	
Commercial and agricultural	\$ 48,322	\$ 133	\$	\$	\$	\$ 48,455
Real estate mortgage:						
Residential	245,674	4,888	351	1,229		252,142
Commercial	177,539	443		4,049		182,031
Construction	13,813	177		6,077		20,067
Installment loans to individuals	10,550	109				10,659
	495,898	\$ 5,750	\$ 351	\$ 11,355		513,354
Net deferred loan fees and discounts	(1,122)					(1,122)
Allowance for loan losses	(7,617)					(7,617)
Loans, net	\$ 487,159					\$ 504,615

(In Thousands)	2011					Total

Allowance for loan losses	(7,154)					(7,154)
Loans, net	\$ 415,012					\$ 428,805

The following table presents the interest income if interest had been recorded based on the original loan agreement terms and rate of interest for non-accrual loans and interest income recognized on a cash basis for non-accrual loans as of December 31, 2012, 2011, and 2010:

(In Thousands)	Year Ended December 31,					
	2012		2011		2010	
	Interest Income That Would Have Been Recorded Based on Original Term and Rate	Interest Income Recorded on a Cash Basis	Interest Income That Would Have Been Recorded Based on Original Term and Rate	Interest Income Recorded on a Cash Basis	Interest Income That Would Have Been Recorded Based on Original Term and Rate	Interest Income Recorded on a Cash Basis
Real estate mortgage:						
Residential	\$ 67	\$ 37	\$ 42	\$ 25	\$ 39	\$ 35
Commercial	281	172	87	9	142	33
Construction	377	74	439	37	256	57
	\$ 725	\$ 283	\$ 568	\$ 71	\$ 437	\$ 125

Impaired Loans

Impaired loans are loans for which it is probable the Bank will not be able to collect all amounts due according to the contractual terms of the loan agreement. The Bank individually evaluates such loans for impairment and does not aggregate loans by major risk classifications. The definition of impaired loans is not the same as the definition of non-accrual loans, although the two categories overlap. The Bank may choose to place a loan on non-accrual status due to payment delinquency or uncertain collectability, while not classifying the loan as impaired. Factors considered by management in determining impairment include payment status and collateral value. The amount of impairment for these types of loans is determined by the difference between the present value of the expected cash flows related to the loan, using the original interest rate, and its recorded value, or as a practical

Table of Contents

expedient in the case of collateralized loans, the difference between the fair value of the collateral and the recorded amount of the loan. When foreclosure is probable, impairment is measured based on the fair value of the collateral.

Management evaluates individual loans in all of the commercial segments for possible impairment if the loan is greater than \$100,000 and if the loan is either on non-accrual status or has a risk rating of substandard. Management may also elect to measure an individual loan for impairment if less than \$100,000 on a case by case basis.

Mortgage loans on one-to-four family properties and all consumer loans are large groups of smaller-balance homogeneous loans and are measured for impairment collectively. Loans that experience insignificant payment delays, which are defined as 90 days or less, generally are not classified as impaired. Management determines the significance of payment delays on a case-by-case basis taking into consideration all circumstances surrounding the loan and the borrower including the length of the delay, the borrower's prior payment record, and the amount of shortfall in relation to the principal and interest owed. Interest income for impaired loans is recorded consistent to the Bank's policy on non-accrual loans.

The following table presents the recorded investment, unpaid principal balance, and related allowance of impaired loans by segment as of December 31, 2012 and 2011:

(In Thousands)	Recorded Investment	2012 Unpaid Principal Balance	Related Allowance
With no related allowance recorded:

Construction	4,686	181	
Installment loans to individuals	3		
	\$ 8,424	\$ 233	\$ 57

Additional funds totaling \$287,000 are committed to be advanced in connection with impaired loans.

Modifications

The loan portfolio also includes certain loans that have been modified in a Troubled Debt Restructuring (TDR), where economic concessions have been granted to borrowers who have experienced or are expected to experience financial difficulties. These concessions typically result from loss mitigation activities and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance, or other actions. Certain TDRs are classified as nonperforming at the time of restructure and may only be returned to performing status after considering the borrower's sustained repayment performance for a reasonable period, generally six months.

Loan modifications that are considered TDRs completed during the twelve months ended December 31, 2012 and 2011 were as follows:

(In Thousands, Except Number of Contracts)	Year Ended December 31,					
	Number of Contracts	2012		Number of Contracts	2011	
		Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment		Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment
Commercial and agricultural	1	\$ 498	\$ 498		\$	\$
Real estate mortgage:						
Residential	3	254	254	6	609	609
Commercial	2	2,403	2,403	10	4,779	4,779
Construction	2	26	26	9	11,372	11,372
Installment loans to individuals				3	20	20
Total	8	\$ 3,181	\$ 3,181	28	\$ 16,780	\$ 16,780

There were no loan modifications considered troubled debt restructurings made during the twelve months previous to December 31, 2012 that defaulted during the twelve month period ending December 31, 2012. Loan modifications considered troubled debt restructurings made during the twelve months previous to December 31, 2011, that have defaulted during the twelve month period ending December 31, 2011 were as follows:

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

(In Thousands, Except Number of Contracts)	Year Ended December 31, 2011	
	Number of Contracts	Recorded Investment
Commercial and agricultural		\$
Real estate mortgages - residential	2	127
Real estate mortgages - commercial	1	154
Real estate mortgages - construction	2	251
Installment loans to individuals	1	7
Total	6	\$ 539

Troubled debt restructurings amounted to \$16,217,000 and \$17,478,000 as of December 31, 2012 and 2011.

Table of Contents**Internal Risk Ratings**

Management uses a ten point internal risk rating system to monitor the credit quality of the overall loan portfolio. The first six categories are considered not criticized, and are aggregated as Pass rated. The criticized rating categories utilized by management generally follow bank regulatory definitions. The Special Mention category includes assets that are currently protected but are potentially weak, resulting in an undue and unwarranted credit risk, but not to the point of justifying a Substandard classification. Loans in the Substandard category have well-defined weaknesses that jeopardize the liquidation of the debt, and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. All loans greater than 90 days past due are considered Substandard. Loans in the Doubtful category exhibit the same weaknesses found in the Substandard loans, however, the weaknesses are more pronounced. Such loans are static and collection in full is improbable. However, these loans are not yet rated as loss because certain events may occur which would salvage the debt. Loans classified Loss are considered uncollectible and charge-off is imminent.

To help ensure that risk ratings are accurate and reflect the present and future capacity of borrowers to repay a loan as agreed, the Bank has a structured loan rating process with several layers of internal and external oversight. Generally, consumer and residential mortgage loans are included in the pass category unless a specific action, such as bankruptcy, repossession, or death occurs to raise awareness of a possible credit event. An external annual loan review of all commercial relationships \$800,000 or greater is performed, as well as a sample of smaller transactions. Confirmation of the appropriate risk category is included in the review. Detailed reviews, including plans for resolution, are performed on loans classified as Substandard, Doubtful, or Loss on a quarterly basis.

The following table presents the credit quality categories identified above as of December 31, 2012 and 2011:

(In Thousands)	2012						Totals
	Commercial and Agricultural	Residential	Real Estate Mortgages		Construction	Installment Loans to Individuals	
Pass	\$ 46,805	\$ 250,161	\$ 167,463	\$ 13,944	\$ 10,659	\$ 489,032	
Special Mention	1,480		1,630			3,110

Pass	\$ 51,663	\$ 177,916	\$ 152,994	\$ 19,652	\$ 11,291	\$ 413,516	
Special Mention	1,198	89	5,804			7,091	
Substandard	268	1,378	5,490	9,805	6	16,947	
Total	\$ 53,129	\$ 179,383	\$ 164,288	\$ 29,457	\$ 11,297	\$ 437,554	

Allowance for Loan Losses

An allowance for loan losses (ALL) is maintained to absorb losses from the loan portfolio. The ALL is based on management's continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated future loss experience, and the amount of non-performing loans.

The Bank's methodology for determining the ALL is based on the requirements of ASC Section 310-10-35 for loans individually evaluated for impairment (previously discussed) and ASC Subtopic 450-20 for loans collectively evaluated for impairment, as well as the Interagency Policy Statements on the Allowance for Loan and Lease Losses and other bank regulatory guidance. The total of the two components represents the Bank's ALL.

Loans that are collectively evaluated for impairment are analyzed with general allowances being made as appropriate. Allowances are segmented based on collateral characteristics previously disclosed, and consistent with credit quality monitoring. Loans that are collectively evaluated for impairment are grouped into two classes for evaluation. A general allowance is determined for Pass rated credits, while a separate pool allowance is provided for Criticized rated credits that are not individually evaluated for impairment.

For the general allowances, historical loss trends are used in the estimation of losses in the current portfolio. These historical loss amounts are modified by other qualitative factors. A historical charge-off factor is calculated utilizing a twelve quarter moving average. Management has identified a number of additional qualitative factors which it uses to supplement the historical charge-off factor because these factors are likely to cause estimated credit losses associated with the existing loan pools to differ from

Table of Contents

historical loss experience. The additional factors that are evaluated quarterly and updated using information obtained from internal, regulatory, and governmental sources are: national and local economic trends and conditions; levels of and trends in delinquency rates and non-accrual loans; trends in volumes and terms of loans; effects of changes in lending policies; experience, ability, and depth of lending staff; value of underlying collateral; and concentrations of credit from a loan type, industry, and/or geographic standpoint.

Loans in the criticized pools, which possess certain qualities or characteristics that may lead to collection and loss issues, are closely monitored by management and subject to additional qualitative factors. Management also monitors industry loss factors by loan segment for applicable adjustments to actual loss experience.

Management reviews the loan portfolio on a quarterly basis in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

Activity in the allowance is presented for the twelve months ended December 31, 2012 and 2011:

(In Thousands)	2012							Totals
	Commercial and Agricultural	Residential	Real Estate Mortgages		Construction	Installment Loans to Individuals	Unallocated

The Company grants commercial, industrial, residential, and installment loans to customers throughout north-central Pennsylvania. Although the Company has a diversified loan portfolio at December 31, 2012 and 2011, a substantial portion of its debtors' ability to honor their contracts is dependent on the economic conditions within this region.

The Company has a concentration of loans at December 31, 2012 and 2011 as follows:

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

	2012	2011
Owners of residential rental properties	18.54%	13.86%
Owners of commercial rental properties	13.80%	16.83%

The following table presents the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment method as of December 31, 2012 and 2011:

NOTE 6 - PREMISES AND EQUIPMENT

Major classifications of premises and equipment are summarized as follows at December 31, 2012 and 2011:

(In Thousands)		2012		2011
Land	\$	1,505	\$	1,480
Premises		7,574		7,440
Furniture and equipment		7,073		7,325
Leasehold improvements		1,061		967
Total		17,213		17,212
Less accumulated depreciation and amortization		8,865		9,505
Net premises and equipment	\$	8,348	\$	7,707

Depreciation and amortization charged to operations for the years ended 2012, 2011, and 2010 was \$762,000, \$701,000, and \$731,000, respectively.

NOTE 7 - GOODWILL

As of December 31, 2012 and 2011 goodwill had a gross carrying value of \$3,308,000 and accumulated amortization of \$276,000 resulting in a net carrying amount of \$3,032,000.

The gross carrying amount of goodwill is tested for impairment in the third quarter of each fiscal year. Based on the fair value of the reporting unit, estimated using the expected present value of future cash flows, there was no evidence of impairment of the carrying amount at December 31, 2012 or 2011.

NOTE 8 - TIME DEPOSITS

Time deposits of \$100,000 or more totaled approximately \$70,119,000 on December 31, 2012 and \$62,130,000 on December 31, 2011. Interest expense related to such deposits was approximately \$874,000, \$965,000, and \$1,461,000, for the years ended December 31, 2012, 2011, and 2010, respectively.

At December 31, 2012, the scheduled maturities on time deposits of \$100,000 or more are as follows:

(In Thousands)	2012	
Three months or less	\$	15,479
Three months to six months		11,063
Six months to twelve months		16,105
Over twelve months		27,472
Total	\$	70,119

Total time deposit maturities are as follows at December 31, 2012:

Table of Contents

(In Thousands)		2012
2013	\$	100,833
2014		39,681
2015		19,100
2016		6,754
2017		1,541
Thereafter		1,442
Total	\$	169,351

NOTE 9 - SHORT-TERM BORROWINGS

Short-term borrowings consist of securities sold under agreements to repurchase and primarily FHLB advances, which generally represent overnight or less than six month borrowings. In addition to the outstanding balances noted below, the Bank also had additional lines of credit totaling \$26,606,000 available from correspondent banks other than the FHLB. The outstanding balances and related information for short-term borrowings are summarized as follows at December 31, 2012, 2011, and 2010:

(In Thousands)		2012		2011		2010
Repurchase Agreements:						
Balance at year end	\$	16,968	\$	13,153	\$	13,289
Maximum amount outstanding at any month end		21,609		17,920		20,815
Average balance outstanding during the year		16,951		15,555		14,305
Weighted-average interest rate:						
At year end		0.65%		1.02%		1.58%
Paid during the year		0.73%		1.21%		1.80%
Open Repo Plus:						
Balance at year end	\$	16,236	\$	16,445	\$	14,010
Maximum amount outstanding at any month end		20,175		16,445		14,010
Average balance outstanding during the year		4,009		2,480		1,066
Weighted-average interest rate:						
At year end		0.25%		0.34%		0.62%
Paid during the year		0.31%		0.57%		0.65%
Short-Term FHLB:						
Balance at year end	\$		\$		\$	
Maximum amount outstanding at any month end				1,000		
Average balance outstanding during the year				82		
Weighted-average interest rate:						
At year end						
Paid during the year				0.17%		

Table of Contents**NOTE 10 LONG-TERM BORROWINGS**

The following represents outstanding long-term borrowings with the FHLB by contractual maturities at December 31, 2012 and 2011:

(In Thousands)

Description	Maturity	Weighted-Average Interest Rate 2012	Weighted-Average Interest Rate 2011	Stated Interest Rate Range		2012	2011
				From	To

Total		2.74%	4.01%			\$ 76,278	\$ 61,278

(In Thousands)

Year Ending December 31,	Amount	Weighted-Average Rate
2013	\$ 5,528	3.94%
2014		
2015	10,750	4.18%
2016	5,000	0.75%
2017	45,000	2.38%
Thereafter	10,000	3.18%
	\$ 76,278	2.74%

The terms of the convertible borrowings allow the FHLB to convert the interest rate to an adjustable rate based on the three month London Interbank Offered Rate (LIBOR) at a predetermined anniversary date of the borrowing s origination, ranging from three months to five years. If the FHLB converts the interest rate on one of the predetermined dates, the Bank has the ability to pay off the debt on the conversion date and quarterly thereafter without incurring the customary pre-payment penalty.

The Bank maintains a credit arrangement which includes a revolving line of credit with the FHLB. Under this credit arrangement, the Bank has a remaining borrowing capacity of \$156,438,000 at December 31, 2012, which is subject to annual renewal, and typically incurs no service

charges. Under terms of a blanket agreement, collateral for the FHLB borrowings must be secured by certain qualifying assets of the Bank which consist principally of first mortgage loans and mortgage-backed securities.

NOTE 11 - INCOME TAXES

The following temporary differences gave rise to the net deferred tax asset position at December 31, 2012 and 2011:

Table of Contents

(In Thousands)	2012	2011
Deferred tax assets:		
Allowance for loan losses	\$ 2,590	\$ 2,432
Deferred compensation	484	477
Pension	2,384	2,258
Loan fees and discounts	153	409
Investment securities allowance	782	1,292
Low income housing credit carryforward	3,528	3,250
Capital loss carryforward	230	
Other	1,182	963
Total	11,333	11,081
Deferred tax liabilities:		
Unrealized gain on available for sale securities	5,236	1,501
Bond accretion	170	483
Depreciation	369	355
Amortization	827	751
Total	6,602	3,090
Deferred tax asset, net	\$ 4,731	\$ 7,991

The current low income housing credit carryforward and capital loss carryforward will expire in ten and three years, respectively. The Company fully anticipates being able to use the carryforwards.

No valuation allowance was established at December 31, 2012 and 2011, because of the Company's ability to carry back capital losses to recover taxes paid in previous years and certain tax strategies, together with the anticipated future taxable income as evidenced by the Company's earning potential.

The provision or benefit for income taxes is comprised of the following for the year ended December 31, 2012, 2011, and 2010:

(In Thousands)	2012	2011	2010
Currently payable	\$ 2,726	\$ 2,370	\$ 1,625
Deferred provision	(128)	(457)	(243)
Total provision	\$ 2,598	\$ 1,913	\$ 1,382

A reconciliation between the expected income tax or benefit and the effective income tax rate on income before income tax provision or benefit follows for the year ended December 31, 2012, 2011, and 2010:

(In Thousands)	2012		2011		2010	
	Amount	%	Amount	%	Amount	%
Provision at expected rate	\$ 5,592	34.00%	\$ 4,854	34.00%	\$ 4,186	34.00%
Decrease in tax resulting from:						
Tax-exempt income	(2,235)	(13.59)	(2,141)	(15.00)	(2,061)	(16.74)
Tax credits	(737)	(4.48)	(737)	(5.16)	(705)	(5.73)
Other, net	(22)	(0.13)	(63)	(0.44)	(38)	(0.31)

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

Effective income tax provision and rate	\$	2,598	15.80%	\$	1,913	13.40%	\$	1,382	11.22%
---	----	-------	--------	----	-------	--------	----	-------	--------

NOTE 12 - EMPLOYEE BENEFIT PLANS

Defined Benefit Pension Plan

The Company has a noncontributory defined benefit pension plan (the Plan) for all employees meeting certain age and length of service requirements that were hired prior to January 1, 2004, at which time entrance into the Plan was frozen. Benefits are based primarily on years of service and the average annual compensation during the highest five consecutive years within the final ten years of employment.

The following table sets forth the obligation and funded status as of December 31, 2012 and 2011:

Table of Contents

(In Thousands)	2012		2011	
Change in benefit obligation:				
Benefit obligation at beginning of year	\$	16,165	\$	13,448
Service cost		542		396
Interest cost		746		712
Actuarial loss (gain)		726		(262)
Benefits paid		(562)		(370)
Other, change in actuarial assumptions		1,456		2,241
Benefit obligation at end of year		19,073		16,165
Change in plan assets:				
Fair value of plan assets at beginning of year		9,525		9,034
Actual return on plan assets		1,503		(109)
Employer contribution		1,675		960
Benefits paid		(644)		(398)
Adjustment to fair value of plan assets		19		38
Fair value of plan assets at end of year		12,078		9,525
Funded status	\$	(6,995)	\$	(6,640)
Accounts recognized on balance sheet as:				
Total liabilities	\$	(6,995)	\$	(6,640)
Amounts not yet recognized as a component of net periodic pension cost:				
Amounts recognized in accumulated other comprehensive income consist of:				
Net transition asset	\$		\$	(2)
Prior service cost		26		51
Net loss		7,257		6,213
Total	\$	7,283	\$	6,262

The accumulated benefit obligation for the Plan was \$16,642,000 and \$14,450,000 at December 31, 2012 and 2011, respectively.

Components of Net Periodic Cost and Other Amounts Recognized in Other Comprehensive Income as of December 31, 2012, 2011, and 2010 are as follows:

(In Thousands)	2012		2011		2010	
Net periodic pension cost:						
Service cost	\$	624	\$	424	\$	527
Interest cost		746		712		682
Expected return on plan assets		(820)		(742)		(642)
Amortization of transition asset		(2)		(3)		(3)
Amortization of prior service cost		25		26		25
Amortization of unrecognized net loss		436		164		146
Net periodic benefit cost	\$	1,009	\$	581	\$	735

The estimated net transition asset and prior service cost for the defined benefit pension plan that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost over the next fiscal year are \$2,000 and \$25,000, respectively.

Assumptions

Weighted-average assumptions used to determine benefit obligations at December 31, 2012, 2011, and 2010:

	2012	2011	2010
Discount rate	4.00%	4.50%	5.50%
Rate of compensation increase	3.00%	3.00%	3.00%

Weighted-average assumptions used to determine net periodic cost for years ended December 31, 2012, 2011, and 2010:

	2012	2011	2010
Discount rate	4.50%	5.50%	6.00%
Expected long-term return on plan assets	8.00%	8.00%	8.00%
Rate of compensation increase	3.00%	3.00%	3.00%

Table of Contents

The expected long-term rate of return was estimated using market benchmarks by which the plan assets would outperform the market value in the future, based on historical experience adjusted for changes in asset allocation and expectations for overall lower future returns on similar investments compared to past periods.

Plan Assets

The Plan's weighted-average asset allocations at December 31, 2012 and 2011 by asset category are as follows:

Asset Category	2012	2011
Cash	2.27%	3.24%
Fixed income securities	30.24%	36.30%
Equity	67.49%	60.46%
Total	100.00%	100.00%

The investment objective for the Plan is to maximize total return with tolerance for slightly above average risk, meaning the fund is able to tolerate short-term volatility to achieve above-average returns over the long term.

Asset allocation favors equities, with target allocation of approximately 60% equity securities, 37.5% fixed income securities and 2.5% cash. Due to volatility in the market, the target allocation is not always desirable and asset allocations will fluctuate between the acceptable ranges. The equity portfolio's exposure is primarily in mid and large capitalization domestic equities with limited exposure to small capitalization and international stocks.

It is management's intent to give the investment managers flexibility, within the overall guidelines, with respect to investment decisions and their timing. However, certain investments require specific review and approval by management. Management is also informed of anticipated, significant modifications of any previously approved investment, or anticipated use of derivatives to execute investment strategies.

The following table sets forth by level, within the fair value hierarchy detailed in Note 20 - Fair Value Measurements, the Plan's assets at fair value as of December 31, 2012 and 2011:

(In Thousands)	2012			
	Level I	Level II	Level III	Total
Assets:				
Cash and cash equivalents	\$ 274	\$	\$	\$ 274
Mutual funds - taxable fixed income	3,653			3,653
Mutual funds - domestic equity	5,321			5,321
	2,830			2,830

Mutual funds - international equity					
Total assets at fair value	\$	12,078	\$	\$	\$ 12,078

(In Thousands)	2011				Total
	Level I	Level II	Level III		
Assets:					
Cash and cash equivalents	\$	304	\$	\$	\$ 304
Mutual funds - taxable fixed income		3,451			3,451
Mutual funds - domestic equity		4,432			4,432
Mutual funds - international equity		1,338			1,338
Total assets at fair value	\$	9,525	\$	\$	\$ 9,525

The following future benefit payments that reflect expected future service, as appropriate, are expected to be paid:

(In Thousands)	
2013	\$ 585
2014	633
2015	644
2016	673
2017	701
Thereafter	4,537
	\$ 7,773

The company expects to contribute a minimum of \$400,000 to its Pension Plan in 2013.

401(k) Savings Plan

The Company also offers a 401(k) savings plan in which eligible participating employees may elect to contribute up to a maximum

Table of Contents

percentage allowable not to exceed the limits of Code Sections 401(k), 404, and 415. The Company may make matching contributions equal to a discretionary percentage that is determined by the Board of Directors. Participants are at all times fully vested in their contributions and vest over a period of five years regarding the employer contribution. Contribution expense was approximately \$118,000, \$101,000, and \$117,000 for the years ended December 31, 2012, 2011, and 2010, respectively.

Deferred Compensation Plan

The Company has a deferred compensation plan whereby participating directors elect to forego directors' fees paid in cash. Under this plan, the Company will make payments for a ten-year period beginning at the later of age 65 or ceasing to be a director in most cases or at death, if earlier, at which time payments would be made to their designated beneficiaries.

To fund benefits under the deferred compensation plan, the Company has acquired bank-owned life insurance policies on the lives of the participating directors for which insurance benefits are payable to the Company. The Company incurred expenses related to the plan of \$84,000, \$114,000, and \$254,000 for the years ended December 31, 2012, 2011, and 2010, respectively. Benefits paid under the plan were approximately \$140,000, \$160,000, and \$160,000 in 2012, 2011, and 2010, respectively.

NOTE 13 - EMPLOYEE STOCK PURCHASE PLAN

The Company maintained the Penns Woods Bancorp, Inc. 2006 Employee Stock Purchase Plan (Plan). The Plan is intended to encourage employee participation in the ownership and economic progress of the Company. The Plan allows for up to 1,000,000 shares to be purchased by employees. The purchase price of the shares is 95% of market value with an employee eligible to purchase up to the lesser of 15% of base compensation or \$12,000 in market value annually. There were 1,435 and 1,924 shares issued under the plan for the years ended December 31, 2012 and 2011, respectively.

NOTE 14 - STOCK OPTIONS

The Company maintained the 1998 Stock Option Plan (1998 Plan) for key employees and directors. Incentive stock options and nonqualified stock options were granted to eligible employees of the Bank and nonqualified options were granted to directors of the Company. Incentive nonqualified stock options granted under the 1998 Plan were exercisable not later than ten years after the date of grant. Each option granted under the 1998 Plan was exercisable only after six months following the date of grant of such options. All options issued under the 1998 Plan were either forfeited or exercised as of December 31, 2010.

NOTE 15 - RELATED PARTY TRANSACTIONS

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

Certain directors and executive officers of the Company and the Bank, including their immediate families and companies in which they are principal owners (more than ten percent), are indebted to the Company. Such indebtedness was incurred in the ordinary course of business on the same terms and at those rates prevailing at the time for comparable transactions with others.

A summary of loan activity with executive officers, directors, principal shareholders, and associates of such persons is listed below for the years ended December 31, 2012 and 2011:

(In Thousands)	Beginning Balance	Additions	Repayments	Resigned	Ending Balance
2012	\$ 8,644	\$ 1,764	\$ (926)	\$ (6,299)	\$ 3,183
2011	8,366	3,877	(3,599)		8,644

Deposits from related parties held by the Bank amounted to \$3,525,000 at December 31, 2012 and \$5,668,000 at December 31, 2011.

NOTE 16 COMMITMENTS AND CONTINGENT LIABILITIES

The following schedule shows future minimum rental payments under operating leases with noncancellable terms in excess of one year as of December 31, 2012:

(In Thousands)	
2013	\$ 439
2014	444
2015	408
2016	352
2017	358
Thereafter	1,186
Total	\$ 3,187

The Company's operating lease obligations represent short and long-term lease and rental payments for facilities and equipment. Total rental expense for all operating leases for the years ended December 31, 2012, 2011, and 2010 were \$425,000, \$399,000 and \$387,000.

The Company is subject to lawsuits and claims arising out of its business. There are no such legal proceedings or claims currently pending or threatened other than those encountered during the normal course of business.

Table of Contents**NOTE 17 - OFF-BALANCE SHEET RISK**

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit, interest rate, or liquidity risk in excess of the amount recognized in the Consolidated Balance Sheet. The contract amounts of these instruments express the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to credit loss from nonperformance by the other party to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The Company may require collateral or other security to support financial instruments with off-balance sheet credit risk.

Financial instruments whose contract amounts represent credit risk are as follows at December 31, 2012 and 2011:

(In Thousands)	2012	2011
Commitments to extend credit	\$ 90,503	\$ 80,320
Standby letters of credit	3,768	1,180

Commitments to extend credit are legally binding agreements to lend to customers. Commitments generally have fixed expiration dates or other termination clauses and may require payment of fees. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future liquidity requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company, on an extension of credit is based on management's credit assessment of the counterparty.

Standby letters of credit represent conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These instruments are issued primarily to support bid or performance related contracts. The coverage period for these instruments is typically a one year period with an annual renewal option subject to prior approval by management. Fees earned from the issuance of these letters are recognized upon expiration of the coverage period. For secured letters of credit, the collateral is typically Bank deposit instruments or customer business assets.

NOTE 18 - CAPITAL REQUIREMENTS

Federal regulations require the Company and the Bank to maintain minimum amounts of capital. Specifically, each is required to maintain certain minimum dollar amounts and ratios of Total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average total assets.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

In addition to the capital requirements, the Federal Deposit Insurance Corporation Improvement Act (FDICIA) established five capital categories ranging from well capitalized to critically undercapitalized. Should any institution fail to meet the requirements to be considered adequately capitalized, it would become subject to a series of increasingly restrictive regulatory actions.

As of December 31, 2012 and 2011, the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be classified as a well capitalized financial institution, Total risk-based, Tier 1 risk-based, and Tier 1 leverage capital ratios must be at least 10%, 6%, and 5%, respectively.

The Company's and the Bank's actual capital ratios are presented in the following tables, which shows that both met all regulatory capital requirements.

Consolidated Company

(In Thousands)	2012		2011	
	Amount	Ratio	Amount	Ratio
Total Capital (to Risk-weighted Assets)				
Actual	\$ 85,377	14.97%	\$ 77,863	15.27%
For Capital Adequacy Purposes	45,641	8.00	40,796	8.00
To Be Well Capitalized	57,051	10.00	50,995	10.00
Tier I Capital (to Risk-weighted Assets)

Tier I Capital (to Average Assets)				
Actual	\$ 65,323	8.02%	\$ 60,454	8.24%
For Capital Adequacy Purposes	32,570	4.00	29,342	4.00
To Be Well Capitalized	40,713	5.00	36,678	5.00

NOTE 19 - REGULATORY RESTRICTIONS

The Pennsylvania Banking Code restricts the availability of capital funds for payment of dividends by all state-chartered banks. Accordingly, at December 31, 2012, the balance in the additional paid in capital account totaling \$11,657,000 is unavailable for dividends.

The Bank is subject to regulatory restrictions, which limit its ability to loan funds to Penns Woods Bancorp, Inc. At December 31, 2012, the regulatory lending limit amounted to approximately \$10,941,000.

Cash and Due from Banks

Included in cash and due from banks are reserves required by the district Federal Reserve Bank of \$208,000 and \$1,131,000 at December 31, 2012 and 2011, respectively. The required reserves are computed by applying prescribed ratios to the classes of average deposit balances. These are held in the form of cash on hand and a balance maintained directly with the Federal Reserve Bank.

NOTE 20 - FAIR VALUE MEASUREMENTS

The following disclosures show the hierarchal disclosure framework associated with the level of pricing observations utilized in measuring assets and liabilities at fair value. The three broad levels of pricing observations are as follows:

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

- Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.
- Level II: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities includes items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.
- Level III: Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires the use of observable market data when available.

The following table presents the assets reported on the balance sheet at their fair value on a recurring basis as of December 31, 2012 and 2011, by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(In Thousands)	2012			Total
	Level I	Level II	Level III	
Assets measured on a recurring basis:				
Investment securities, available for sale:				
U.S. Government and agency securities	\$	\$ 25,840	\$	\$ 25,840
State and political securities		180,224		180,224
Other debt securities		71,599		71,599
Financial institution equity securities	9,548			9,548
Other equity securities	2,105			2,105
Total assets measured on a recurring basis	\$ 11,653	\$ 277,663	\$	\$ 289,316

Table of Contents

(In Thousands)	2011				Total
	Level I	Level II	Level III		
Assets measured on a recurring basis:					
Investment securities, available for sale:					
U.S. Government and agency securities	\$	\$ 28,671	\$	\$	28,671
State and political securities		178,301			178,301
Other debt securities		49,514			49,514
Financial institution equity securities		10,802			10,802
Other equity securities		2,809			2,809
Total assets measured on a recurring basis	\$	13,611	\$ 256,486	\$	270,097

The following table presents the assets reported on the balance sheet at their fair value on a non-recurring basis as of December 31, 2012 and 2011, by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(In Thousands)	2012				Total
	Level I	Level II	Level III		
Assets measured on a non-recurring basis:					
Impaired loans	\$	\$	\$ 14,435	\$	14,435
Other real estate owned			1,449		1,449
Total assets measured on a non-recurring basis	\$	\$	\$ 15,884	\$	15,884

(In Thousands)	2011				Total
	Level I	Level II	Level III		
Assets measured on a non-recurring basis:					
Impaired loans	\$	\$	\$ 14,142	\$	14,142
Other real estate owned			2,144		2,144
Total assets measured on a non-recurring basis	\$	\$	\$ 16,286	\$	16,286

The following table provides a listing of significant unobservable inputs used in the fair value measurement process for items valued utilizing level III techniques as of December 31, 2012:

(In Thousands)	Fair Value	Quantitative Information About Level III Fair Value Measurements			Weighted Average
		Valuation Technique(s)	Unobservable Inputs	Range	
Impaired loans	\$ 14,435	Discounted cash flow	Temporary reduction in payment amount	0 to -55%	-27%
			Probability of default	0%	
		Appraisal of collateral	Appraisal adjustments (1)	0 to -20%	-11%
	\$ 1,449	Appraisal of collateral (1)			

Other real estate
owned

(1) Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses.

The significant unobservable inputs used in the fair value measurement of the Company's impaired loans using the discounted cash flow valuation technique include temporary changes in payment amounts and the probability of default. Significant increases (decreases) in payment amounts would result in significantly higher (lower) fair value measurements. The probability of default is 0% for impaired loans using the discounted cash flow valuation technique because all defaulted impaired loans are valued using the appraisal of collateral valuation technique.

The significant unobservable input used in the fair value measurement of the Company's impaired loans using the appraisal of collateral valuation technique include appraisal adjustments, which are adjustments to appraisals by management for qualitative factors such as economic conditions and estimated liquidation expenses. The significant unobservable input used in the fair value measurement of the Company's other real estate owned are the same inputs used to value impaired loans using the appraisal of collateral valuation technique.

NOTE 21 - FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company is required to disclose fair values for its financial instruments. Fair values are made at a specific point in time, based on relevant market information and information about the financial instrument. These fair values do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Also, it is the Company's general practice and intention to hold most of its financial instruments to maturity and not to engage in trading or sales activities. Because no market exists for a significant portion of the Company's financial instruments, fair values are based on judgments regarding future expected

Table of Contents

loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These fair values are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions can significantly affect the fair values.

Fair values have been determined by the Company using historical data and an estimation methodology suitable for each category of financial instruments. The Company's fair values, methods, and assumptions are set forth below for the Company's other financial instruments.

As certain assets and liabilities, such as deferred tax assets, premises and equipment, and many other operational elements of the Company, are not considered financial instruments but have value, the fair value of financial instruments would not represent the full market value of the Company.

The fair values of the Company's financial instruments are as follows at December 31, 2012 and 2011:

(In Thousands)	Carrying Value	Fair Value	Fair Value Measurements at December 31, 2012		
			Quoted Prices in Active Markets for Identical Assets (Level I)	Significant Other Observable Inputs (Level II)	Significant Unobservable Inputs (Level III)
Financial assets:

Noninterest-bearing deposits	111,354	111,354
Short-term borrowings	29,598	29,598
Long-term borrowings, FHLB	61,278	65,848
Accrued interest payable	536	536

Cash and Cash Equivalents, Loans Held for Sale, Accrued Interest Receivable, Short-term Borrowings, and Accrued Interest Payable:

The fair value is equal to the carrying value.

Investment Securities:

The fair value of investment securities available for sale and held to maturity is equal to the available quoted market price. If no quoted market price is available, fair value is determined by using the quoted market price for similar securities. Regulatory stocks fair value is equal to the carrying value.

Table of Contents

Loans:

Fair values are determined for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, commercial real estate, residential real estate, construction real estate, and other consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories.

The fair value of performing loans is calculated by discounting scheduled cash flows through the estimated maturity using market discount rates that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Company's historical experience with repayments for each loan classification, modified, as required, by an estimate of the effect of current economic and lending conditions.

Fair value for significant nonperforming loans is based on recent external appraisals. If appraisals are not available, estimated cash flows are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows, and discounted rates are judgmentally determined using available market information and specific borrower information.

Bank-Owned Life Insurance:

The fair value is equal to the cash surrender value of the life insurance policies.

Deposits:

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings, NOW, and money market accounts, is equal to the amount payable on demand as of December 31, 2012 and 2011. The fair value of certificates of deposit is based on the discounted value of contractual cash flows.

The fair values above do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market, commonly referred to as the core deposit intangible.

Long Term Borrowings, FHLB:

The fair value of long term borrowings is based on the discounted value of contractual cash flows.

Commitments to Extend Credit, Standby Letters of Credit, and Financial Guarantees Written:

There is no material difference between the notional amount and the fair value of off-balance sheet items at December 31, 2012 and 2011. The contractual amounts of unfunded commitments and letters of credit are presented in Note 17.

NOTE 24 PENDING ACQUISITION

On October 18, 2012, the Company entered into a definitive merger agreement with Luzerne National Bank Corporation (Luzerne) under which the Company will acquire Luzerne in a stock and cash transaction. Under the terms of the merger agreement, the Company will acquire all of the outstanding shares of Luzerne for a total purchase price of approximately \$44.5 million as of the date of the agreement. Luzerne shareholders will have the opportunity to elect to receive for each outstanding share of Luzerne common stock either 1.5534 shares of the Company's common stock, \$61.86 in cash or a combination of cash or stock. All shareholder elections will be subject to allocation and proration procedures set forth in the merger agreement that are designed to ensure that no more than 10% of the outstanding Luzerne shares are exchanged for cash. The transaction is expected to be a tax-free exchange to the extent that shareholders of Luzerne receive stock in exchange for their shares. The transaction is expected to close in the second quarter of 2013 subject to customary closing conditions, including receipt of regulatory approvals and approvals by shareholders of both the Company and Luzerne.

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A CONTROLS AND PROCEDURES

The Company, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Chief Financial Officer, conducted an evaluation of the effectiveness as of December 31, 2012 of the design and operation of the Company's disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based upon that evaluation, the Company's President and Chief Executive Officer along with the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of December 31, 2012.

There have been no changes in the Company's internal control over financial reporting during the fourth quarter of 2012 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a significant deficiency (as defined in Public Company Accounting Oversight Board Auditing Standard No. 2), or a combination of significant deficiencies, that results in there being more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis by management or employees in the normal course of performing their assigned functions.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2012. Management's assessment did not identify any material weaknesses in the Company's internal control over financial reporting.

In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Because there were no material weaknesses discovered, management believes that, as of December 31, 2012, the Company's internal control over financial reporting was effective.

S.R. Snodgrass, A.C. an independent registered public accounting firm, has audited the consolidated financial statements included in this Annual Report on Form 10-K, as part of the audit, has issued a report, which appears below, on the effectiveness of the Company's internal control over financial reporting as of December 31, 2012.

Date: March 12, 2013 /s/ Richard A. Grafmyre

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders

Penns Woods Bancorp, Inc.

We have audited Penns Woods Bancorp, Inc. and subsidiaries (the Company) internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Penns Woods Bancorp, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report on Management's Assessment of Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Edgar Filing: PENNS WOODS BANCORP INC - Form 10-K

In our opinion, Penns Woods Bancorp, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Penns Woods Bancorp, Inc. and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2012, and our opinion dated March 12, 2013, expressed an unqualified opinion.
