PRICING SUPPLEMENT No. WF-35 dated August 31, 2017

(To Prospectus Supplement dated March 28, 2017

and Prospectus dated March 28, 2017)

Canadian Imperial Bank of Commerce

Senior Global Medium-Term Notes (Structured Notes)

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

€	Linked to the EURO STOXX 50® Index								
€	Unlike ordinary debt securities, the securities do not pay interest at a specified rate, do not repay a fixed amount of principal at stated maturity and are subject to potential automatic call upon the terms described below. Any return you receive on the securities and whether they are automatically called will depend on the performance of the Index								
€	If the closing level of the Index on any call date is greater than or equal to the starting level, we will automatically call the securities for the principal amount plus the call premium applicable to that call date								
	<table border="1"> <thead> <tr> <th>Call Date</th> <th>Call Premium</th> </tr> </thead> <tbody> <tr> <td>September 6, 2018</td> <td>7.60% of the principal amount</td> </tr> <tr> <td>September 6, 2019</td> <td>15.20% of the principal amount</td> </tr> <tr> <td>August 31, 2020 (the final calculation day)</td> <td>22.80% of the principal amount</td> </tr> </tbody> </table>	Call Date	Call Premium	September 6, 2018	7.60% of the principal amount	September 6, 2019	15.20% of the principal amount	August 31, 2020 (the final calculation day)	22.80% of the principal amount
Call Date	Call Premium								
September 6, 2018	7.60% of the principal amount								
September 6, 2019	15.20% of the principal amount								
August 31, 2020 (the final calculation day)	22.80% of the principal amount								
€	If the securities are not automatically called prior to the final calculation day, the payment at stated maturity will be based upon the closing level of the Index on the final calculation day and could be greater than, equal to or less than the principal amount per security as follows:								
€	If the closing level of the Index on the final calculation day is greater than or equal to the starting level, the securities will be automatically called for the principal amount plus the call premium applicable to the final calculation day described above								
€	If the closing level of the Index on the final calculation day is less than the starting level, but not by more than 10%, you will receive the principal amount of your securities at stated maturity								
€	If the closing level of the Index on the final calculation day is less than the starting level by more than 10%, you will receive less than the principal amount and have 1-to-1 downside exposure to the decrease in the level of the Index in excess of 10%								

¢	Investors may lose up to 90% of the principal amount
¢	Any positive return on the securities will be limited to the applicable call premium, even if the closing level of the Index on the applicable call date significantly exceeds the starting level. You will not participate in any appreciation of the Index beyond the applicable fixed call premium
¢	All payments on the securities are subject to the credit risk of Canadian Imperial Bank of Commerce and you will have no ability to pursue any securities included in the Index for payment; if Canadian Imperial Bank of Commerce defaults on its obligations, you could lose all or some of your investment
¢	No periodic interest payments or dividends
¢	No exchange listing; designed to be held to stated maturity

The securities have complex features and investing in the securities involves risks not associated with an investment in conventional debt securities. See Risk Factors herein.

The securities are unsecured obligations of Canadian Imperial Bank of Commerce and all payments on the securities are subject to the credit risk of Canadian Imperial Bank of Commerce. The securities will not constitute deposits insured by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other government agency or instrumentality of Canada, the United States or any other jurisdiction.

Neither the Securities and Exchange Commission (the SEC) nor any state or provincial securities commission has approved or disapproved of these securities or determined if this pricing supplement or the accompanying prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Principal amount(1)	Underwriting Discount and Commission(2)	Proceeds to Canadian Imperial Bank of Commerce
Per Security	\$1,000.00	\$28.35	\$971.65
Total	\$2,069,000.00	\$58,656.15	\$2,010,343.85

(1) Our estimated value of the securities on the pricing date, based on our internal pricing models, is \$951.10 per security. The estimated value is less than the principal amount of the securities. See The Estimated Value of the Securities in this pricing supplement.

(2) The agent, Wells Fargo Securities, LLC, will receive an underwriting discount of \$28.35 per security. The agent may resell the securities to other securities dealers at the principal amount less a concession not in excess of \$17.50 per security. Such securities dealers may include Wells Fargo Advisors (WFA) (the trade name of the retail brokerage business of Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC, each an affiliate of Wells Fargo Securities). In addition to the selling concession allowed to WFA, the agent will pay \$0.75 per security of the underwriting discount to WFA as a distribution expense fee for each security sold by WFA. See Use of Proceeds and Hedging and Supplemental Plan of Distribution in this pricing supplement for information regarding how we may hedge our obligations under the securities.

Wells Fargo Securities

ABOUT THIS PRICING SUPPLEMENT

You should read this pricing supplement together with the prospectus dated March 28, 2017 and the prospectus supplement dated March 28, 2017, relating to our Senior Global Medium-Term Notes (Structured Notes), of which these securities are a part, for additional information about the securities. Information included in this pricing supplement supersedes information in the prospectus supplement and prospectus to the extent it is different from that information. Certain defined terms used but not defined herein have the meanings set forth in the prospectus supplement and prospectus.

You should rely only on the information contained in or incorporated by reference in this pricing supplement, the accompanying prospectus supplement and the accompanying prospectus. This pricing supplement may be used only for the purpose for which it has been prepared. No one is authorized to give information other than that contained in this pricing supplement, the accompanying prospectus supplement and the accompanying prospectus, and in the documents referred to in this pricing supplement, the prospectus supplement and the prospectus and which are made available to the public. We have not, and Wells Fargo Securities, LLC (Wells Fargo Securities) has not, authorized any other person to provide you with different or additional information. If anyone provides you with different or additional information, you should not rely on it.

We are not, and Wells Fargo Securities is not, making an offer to sell the securities in any jurisdiction where the offer or sale is not permitted. You should not assume that the information contained in or incorporated by reference in this pricing supplement, the accompanying prospectus supplement or the accompanying prospectus is accurate as of any date other than the date of the applicable document. Our business, financial condition, results of operations and prospects may have changed since that date. Neither this pricing supplement, nor the accompanying prospectus supplement, nor the accompanying prospectus constitutes an offer, or an invitation on our behalf or on behalf of Wells Fargo Securities, to subscribe for and purchase any of the securities and may not be used for or in connection with an offer or solicitation by anyone in any jurisdiction in which such an offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation.

References to CIBC, the Issuer, the Bank, we, us and our in this pricing supplement are references to Canadian Imperial Bank of Commerce or to any of our subsidiaries, unless we state otherwise or the context otherwise requires.

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

INVESTMENT DESCRIPTION

The Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020 (the securities) are senior unsecured debt securities of Canadian Imperial Bank of Commerce that do not pay interest at a specified rate, do not repay a fixed amount of principal at stated maturity and are subject to potential automatic call upon the terms described in this pricing supplement. The return you receive on the securities and whether they are automatically called will depend on the performance of the EURO STOXX 50® Index (the Index). The securities provide:

- (i) the possibility of an automatic early call of the securities at a fixed call premium if the closing level of the Index on either of the first two call dates is greater than or equal to the starting level; and
- (ii) if the securities are not automatically called prior to the final calculation day:
 - (a) the possibility of a return equal to the call premium applicable to the final calculation day if the closing level of the Index on the final calculation day is greater than or equal to the starting level;
 - (b) repayment of principal if, **and only if**, the closing level of the Index on the final calculation day is not less than the starting level by more than 10%; and
 - (c) exposure to decreases in the level of the Index if and to the extent the closing level of the Index on the final calculation day is less than the starting level by more than 10%.

If the closing level of the Index is less than the starting level on each of the three call dates (including the final calculation day), you will not receive any positive return on your investment in the securities. If the closing level of the Index on the final calculation day is less than the starting level by more than 10%, you will receive less, and possibly 90% less, than the principal amount of your securities at stated maturity.

Any positive return on the securities will be limited to the applicable call premium, even if the closing level of the Index on the applicable call date exceeds the starting level by more than the percentage represented by that call premium. You will not participate in any appreciation of the Index beyond the applicable fixed call premium.

All payments on the securities are subject to the credit risk of CIBC.

The Index is designed to track the performance of supersector leaders in the Eurozone.

The Index was developed by STOXX Limited and is calculated, maintained and published by STOXX Limited. EURO STOXX 50® Index is a trademark of STOXX Limited and has been licensed for use by CIBC. The securities are not sponsored, endorsed, sold, or promoted by STOXX Limited and STOXX Limited makes no representation regarding the advisability of investing in the securities. See The EURO STOXX 50® Index in this pricing supplement for additional information.

PRS-3

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

INVESTOR CONSIDERATIONS

We have designed the securities for investors who:

- believe that the closing level of the Index will be greater than or equal to the starting level on one of the three call dates;
- seek the potential for a fixed return if the Index has appreciated at all as of any of the three call dates in lieu of full participation in any potential appreciation of the Index;
- understand that if the closing level of the Index is less than the starting level on each of the three call dates (including the final calculation day), they will not receive any positive return on their investment in the securities, and that if the closing level of the Index on the final calculation day is less than the starting level by more than 10%, they will receive less, and up to 90% less, than the principal amount per security;
- understand that the term of the securities may be as short as approximately one year and that they will not receive a higher call premium payable with respect to a later call date if the securities are called on an earlier call date;
- are willing to forgo periodic interest payments on the securities and dividends on securities included in the Index; and
- are willing to hold the securities until stated maturity.

The securities are not designed for, and may not be a suitable investment for, investors who:

- seek a liquid investment or are unable or unwilling to hold the securities to stated maturity;
- believe that the closing level of the Index will be less than the starting level on each of the three call dates;
- are unwilling to accept the risk that the closing level of the Index will be less than the starting level on each of the three call dates;
- seek a security with a fixed term;
- seek full return at stated maturity of the principal amount of the securities;

- seek uncapped exposure to the upside performance of the Index;
- are unwilling to accept the risk that, if the closing level of the Index is less than the starting level on each of the three call dates (including the final calculation day), they will not receive any positive return on their investment in the securities;
- are unwilling to accept the risk that the closing level of the Index may decrease by more than 10% from the starting level to the ending level;
- are unwilling to purchase securities with an estimated value as of the pricing date that is lower than the principal amount;
- are unwilling to accept the risk of exposure to the Eurozone equity market;
- seek current income (including income in the form of periodic interest payments);
- seek exposure to the upside performance of the Index beyond the applicable call premiums;
- are unwilling to accept the credit risk of CIBC to obtain exposure to the Index generally, or to the exposure to the Index that the securities provide specifically; or
- prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

TERMS OF THE SECURITIES

The information in this Terms of the Securities section is only a summary and is qualified by the more detailed information set forth in this pricing supplement, the prospectus supplement dated March 28, 2017 and the prospectus dated March 28, 2017, each filed with the SEC. See About This Pricing Supplement in this pricing supplement.

Market Measure: EURO STOXX 50® Index (Bloomberg ticker symbol SX5E)

Pricing Date: August 31, 2017

Issue Date: September 6, 2017

Principal Amount: \$1,000 per security. References in this pricing supplement to a security are to a security with a face amount of \$1,000.

Automatic Call: If the closing level of the Index on any call date (including the final calculation day) is greater than or equal to the starting level, the securities will be automatically called, and on the related call settlement date you will be entitled to receive a cash payment per security in U.S. dollars equal to the principal amount per security plus the call premium applicable to the relevant call date. The last call date is the final calculation day, and payment upon an automatic call on the final calculation day, if applicable, will be made on the stated maturity date.

Any positive return on the securities will be limited to the applicable call premium, even if the closing level of the Index on the applicable call date significantly exceeds the starting level. You will not participate in any appreciation of the Index beyond the applicable call premium.

If the securities are automatically called, they will cease to be outstanding on the related call settlement date and you will have no further rights under the securities after such call settlement date. You will not receive any notice from us if the securities are automatically called.

Call Dates and Premiums:

<u>Call Date</u>	<u>Call Premium</u>	<u>Payment per Security upon an Automatic Call</u>
September 6, 2018	7.60%	\$1,076.00
September 6, 2019	15.20%	\$1,152.00
August 31, 2020	22.80%	\$1,228.00

We refer to August 31, 2020 as the final calculation day.

The call dates are subject to postponement for non-trading days and the occurrence of a market disruption event. See Postponement of a Calculation Day below.

Call Settlement Date: Five business days after the applicable call date (as each such call date may be postponed pursuant to Postponement of a Calculation Day below, if applicable); *provided* that the call settlement date for the last call date will be the stated maturity date.

PRS-5

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

Payment at Stated Maturity:

If the closing level of the Index is less than the starting level on each of the three call dates, the securities will not be automatically called, and on the stated maturity date, you will be entitled to receive a cash payment per security in U.S. dollars determined as follows:

if the ending level is greater than or equal to the threshold level: \$1,000; or

if the ending level is less than the threshold level: \$1,000 *minus*:

If the securities are not automatically called prior to the final calculation day and the ending level is less than the threshold level, you will receive less, and possibly 90% less, than the principal amount of your securities at stated maturity.

All calculations with respect to any payments on the securities (whether upon automatic call or at stated maturity) will be rounded to the nearest one hundred-thousandth, with five one-millionths rounded upward (e.g., 0.000005 would be rounded to 0.00001); and such payment will be rounded to the nearest cent, with one-half cent rounded upward.

Stated Maturity Date: September 8, 2020. If the final calculation day is postponed, the stated maturity date will be the later of (i) September 8, 2020 and (ii) five business days after the final calculation day, as postponed. See Postponement of a Calculation Day below. If the stated maturity date is not a business day, the payment to be made on the stated maturity date will be made on the next succeeding business day with the same force and effect as if it had been made on the stated maturity date. The securities are not subject to redemption at the option of Canadian Imperial Bank of Commerce or repayment at the option of any holder of the securities prior to the stated maturity date.

Closing Level: The closing level of the Index on any trading day means the official closing level of the Index as reported by the Index sponsor (defined below) on such trading day.

Starting Level: 3421.47, the closing level of the Index on the pricing date.

Ending Level: The ending level will be the closing level of the Index on the final calculation day.

Threshold Level: 3079.323, which is equal to 90% of the starting level.

Postponement of a Calculation Day: The call dates (including the final calculation day) are each referred to as a calculation day. If any calculation day is not a trading day, such calculation day will be postponed to the next succeeding trading day. A calculation day is also subject to postponement due to the occurrence of a market disruption event. See Additional Terms of the Securities Market Disruption Events in this pricing supplement.

A trading day means a day, as determined by the calculation agent, on which (i) the Index sponsor is scheduled to publish the level of the Index and (ii) each related futures or options exchange is scheduled to be open for trading for its regular trading session. The relevant stock exchange for any security underlying the Index means the primary exchange or quotation system on which such security is traded, as determined by the calculation agent. The related futures or options exchange for the Index means an exchange or quotation system where trading has a material effect (as determined by the calculation agent) on the overall market for futures or options contracts relating to the Index.

Calculation Agent: Canadian Imperial Bank of Commerce. We may appoint a different calculation agent without your consent and without notifying you.

All determinations made by the calculation agent will be at the sole discretion of it, and, in the absence of

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

manifest error, will be conclusive for all purposes and binding on us and you. All percentages and other amounts resulting from any calculation with respect to the securities will be rounded at the calculation agent's discretion. The calculation agent will have no liability for its determinations.

Business Day:

A Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or obligated by law, regulation or order to close in New York or Toronto.

No Listing:

The securities will not be listed on any securities exchange or quoted on any automated quotation system.

Clearance and Settlement:

The Depository Trust Company (DTC)

Material U.S. Tax Consequences:

By purchasing the securities, each holder agrees to treat them as pre-paid cash-settled derivative contracts for U.S. federal income tax purposes. Assuming this treatment is respected, gain or loss recognized on the securities should be treated as long-term capital gain or loss if the holder has held the securities for more than a year. However, if the Internal Revenue Service were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. As described below under United States Federal Income Tax Considerations, the U.S. Treasury Department and the Internal Revenue Service released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of prepaid forward contracts and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. Both U.S. and non-U.S. persons considering an investment in the securities should review carefully the section of this pricing supplement entitled United States Federal Income Tax Considerations and consult their tax advisers regarding the U.S. federal tax consequences of an investment in the securities (including possible alternative treatments and the issues presented by the notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Benefit Plan Investor Considerations:

For a discussion of benefit plan investor considerations, please see Certain U.S. Benefit Plan Investor Considerations in the accompanying prospectus.

Agent:

Wells Fargo Securities. The agent may resell the securities to other securities dealers, including securities dealers acting as custodians, at the principal amount of the securities less a concession of not in excess of \$17.50 per security. Such securities dealers may include Wells Fargo Advisors (WFA) (the trade name of the retail brokerage business of Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC, each an affiliate of Wells Fargo Securities). In addition to the selling concession allowed to WFA, Wells Fargo Securities will pay \$0.75 per security of the underwriting discount to WFA as a distribution expense fee for each security sold by WFA.

Denominations:

\$1,000 and any integral multiple of \$1,000.

CUSIP / ISIN:

13605WEX5 / US13605WEX56

Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8,
2020**

HYPOTHETICAL PAYOUT PROFILE

The following profile illustrates the potential payment on the securities for a range of hypothetical percentage changes in the closing level of the Index from the pricing date to the applicable call date (including the final calculation day). The profile is based on a call premium of 7.60% for the first call date, 15.20% for the second call date and 22.80% for the final call date and a threshold level equal to 90% of the starting level. This profile has been prepared for purposes of illustration only. Your actual return will depend on (i) whether the securities are automatically called; (ii) if the securities are automatically called, the actual call date on which the securities are called; (iii) if the securities are not automatically called, the actual ending level of the Index; and (iv) whether you hold your securities to stated maturity or earlier automatic call.

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

RISK FACTORS

The securities have complex features and investing in the securities will involve risks not associated with an investment in conventional debt securities or the securities that comprise the Index. You should carefully consider the risk factors set forth below as well as the other information contained in this pricing supplement and the accompanying prospectus supplement and prospectus, including the documents they incorporate by reference. As described in more detail below, the value of the securities may vary considerably before the stated maturity date due to events that are difficult to predict and are beyond our control. You should reach an investment decision only after you have carefully considered with your advisors the suitability of an investment in the securities in light of your particular circumstances.

If The Securities Are Not Automatically Called And The Ending Level Is Less Than The Threshold Level, You Will Receive At Stated Maturity Less, And Up To 90% Less, Than The Principal Amount Of Your Securities.

We will not repay you a fixed amount on the securities on the stated maturity date. If the closing level of the Index is less than the starting level on each of the three call dates, the securities will not be automatically called, and you will receive a payment at stated maturity that will be equal to or less than the principal amount per security, depending on the ending level (i.e., the closing level of the Index on the final calculation day). Because the level of the Index will be subject to market fluctuations, the payment you receive at stated maturity may be more or less, and possibly significantly less, than the principal amount of your securities.

If the ending level is less than the threshold level, the payment you receive at stated maturity will be reduced by an amount equal to the decline in the level of the Index to the extent it is below the threshold level (expressed as a percentage of the starting level). The threshold level is 90% of the starting level. As a result, you may receive less, and up to 90% less, than the principal amount per security at stated maturity even if the level of the Index is greater than or equal to the starting level or the threshold level at certain times during the term of the securities.

If the securities are not automatically called, your return on the securities will be zero or negative, and your yield on the securities will be less than the yield you would earn if you bought a traditional interest-bearing debt security of CIBC or another issuer with a similar credit rating with the same stated maturity date.

The Potential Return On The Securities Is Limited To The Call Premium.

The potential return on the securities is limited to the applicable call premium, regardless of the performance of the Index. The Index may appreciate by significantly more than the percentage represented by the applicable call premium from the pricing date through the applicable call date, in which case an investment in the securities will underperform a hypothetical alternative investment providing a 1-to-1 return based on the performance of the Index. In addition, you will not receive the value of dividends or other distributions paid with respect to the securities included in the Index. Furthermore, if the securities are called on an earlier call date, you will receive a lower call premium than if the securities

were called on a later call date, and accordingly, if the securities are called on one of the two earlier call dates, you will not receive the highest potential call premium.

You Will Be Subject To Reinvestment Risk.

If your securities are automatically called early, the term of the securities may be reduced to as short as approximately one year. There is no guarantee that you would be able to reinvest the proceeds from an investment in the securities at a comparable return for a similar level of risk in the event the securities are automatically called prior to stated maturity.

Your Return On The Securities Could Be Less Than If You Owned Securities Included In The Index.

Your return on the securities will not reflect the return you would realize if you actually owned the securities included in the Index and received the dividends and other payments paid on those securities. This is in part because any payment on the securities will be determined by reference to the closing levels of the Index, which will be calculated by reference to the prices of the securities in the Index without taking into consideration the value of dividends and other payments paid on those securities.

PRS-10

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

No Periodic Interest Will Be Paid On The Securities.

No periodic interest will be paid on the securities. However, because it is possible that the securities may be classified for U.S. federal income tax purposes as contingent payment debt instruments rather than prepaid forward contracts, you may be required to accrue interest income over the term of your securities. See [United States Federal Income Tax Considerations](#) in this pricing supplement.

The Securities Are Subject To The Credit Risk Of Canadian Imperial Bank of Commerce.

The securities are our obligations exclusively and are not, either directly or indirectly, an obligation of any third party. Any amounts payable under the securities are subject to our creditworthiness, and you will have no ability to pursue any securities included in the Index for payment. As a result, our actual and perceived creditworthiness and actual or anticipated decreases in our credit ratings may affect the value of the securities and, in the event we were to default on our obligations, you may not receive any amounts owed to you under the terms of the securities.

The Value Of The Securities Prior To Stated Maturity Will Be Affected By Numerous Factors, Some Of Which Are Related In Complex Ways.

The value of the securities prior to stated maturity will be affected by the level of the Index at that time, interest rates at that time and a number of other factors, some of which are interrelated in complex ways. The effect of any one factor may be offset or magnified by the effect of another factor. The following factors, among others, are expected to affect the value of the securities. When we refer to the [value](#) of your security, we mean the value you could receive for your security if you are able to sell it in the open market before the stated maturity date.

- **Index Performance.** The value of the securities prior to stated maturity will depend substantially on the level of the Index. The price at which you may be able to sell the securities before stated maturity may be at a discount, which could be substantial, from their principal amount, if the level of the Index at such time is less than, equal to or not sufficiently above its starting level or threshold level.
- **Interest Rates.** The value of the securities may be affected by changes in the interest rates in the U.S. markets.

- **Volatility Of The Index.** Volatility is the term used to describe the size and frequency of market fluctuations. The value of the securities may be affected if the volatility of the Index changes.

- **Time Remaining To Maturity.** The value of the securities at any given time prior to maturity will likely be different from that which would be expected based on the then-current level of the Index. This difference will most likely reflect a discount due to expectations and uncertainty concerning the level of the Index during the period of time still remaining to the maturity date. In general, as the time remaining to maturity decreases, the value of the securities will approach the amount that could be payable at maturity based on the then-current level of the Index.

- **Dividend Yields On Securities Included In The Index.** The value of the securities may be affected by the dividend yields on securities included in the Index.

- **Events Involving Companies Included In The Index.** General economic conditions and earnings results of the companies whose securities are included in the Index and real or anticipated changes in those conditions or results may affect the value of the securities. Additionally, as a result of a merger or acquisition, one or more of the securities in the Index may be replaced with a surviving or acquiring entity's securities. The surviving or acquiring entity's securities may not have the same characteristics as the stock originally included in the Index.

- **Our Credit Ratings, Financial Condition And Results Of Operation.** Actual or anticipated changes in our credit ratings, financial condition or results of operation may affect the value of the securities. However, because the return on the securities is dependent upon factors in addition to our ability to pay our obligations under the securities, such as the level of the Index, an improvement in our credit ratings, financial condition or results of operation will not reduce the other investment risks related to the securities.

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

You should understand that the impact of one of the factors specified above, such as a change in interest rates, may offset some or all of any change in the value of the securities attributable to another factor, such as a change in the level of the Index.

The Estimated Value Of The Securities Is Not An Indication Of The Price, If Any, At Which Wells Fargo Securities Or Any Other Person May Be Willing To Buy The Securities From You In The Secondary Market.

The price, if any, at which Wells Fargo Securities or any of its affiliates may purchase the securities in the secondary market will be based on Wells Fargo Securities' proprietary pricing models and will fluctuate over the term of the securities as a result of changes in the market and other factors described in the preceding risk factor. Any such secondary market price for the securities will also be reduced by a bid-offer spread, which may vary depending on the aggregate principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding any related hedging transactions. Unless the factors described in the preceding risk factor change significantly in your favor, any such secondary market price for the securities will likely be less than the principal amount.

If Wells Fargo Securities or any of its affiliates makes a secondary market in the securities at any time up to the issue date or during the three-month period following the issue date, the secondary market price offered by Wells Fargo Securities or any of its affiliates will be increased by an amount reflecting a portion of the costs associated with selling, structuring, hedging and issuing the securities that are included in the principal amount. Because this portion of the costs is not fully deducted upon issuance, any secondary market price offered by Wells Fargo Securities or any of its affiliates during this period will be higher than it would be if it were based solely on Wells Fargo Securities' proprietary pricing models less the bid-offer spread and hedging unwind costs described above. The amount of this increase in the secondary market price will decline steadily to zero over this three-month period. If you hold the securities through an account at Wells Fargo Securities or one of its affiliates, we expect that this increase will also be reflected in the value indicated for the securities on your brokerage account statement. If you hold your securities through an account at a broker-dealer other than Wells Fargo Securities or any of its affiliates, the value of the securities on your brokerage account statement may be different than if you held your securities at Wells Fargo Securities or any of its affiliates.

Our Estimated Value Of The Securities Is Lower Than The Principal Amount Of The Securities.

Our estimated value is only an estimate using several factors. The principal amount of the securities exceeds our estimated value because costs associated with selling and structuring the securities, as well as hedging the securities, are included in the principal amount of the securities. See "The Estimated Value of the Securities" in this pricing supplement.

Our Estimated Value Does Not Represent Future Values Of The Securities And May Differ From Others' Estimates.

Edgar Filing: CANADIAN IMPERIAL BANK OF COMMERCE /CAN/ - Form 424B2

Our estimated value of the securities was determined by reference to our internal pricing models when the terms of the securities were set. This estimated value was based on market conditions and other relevant factors existing at that time and our assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for the securities that are greater than or less than our estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the securities could change significantly based on, among other things, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which Wells Fargo Securities or any other person would be willing to buy securities from you in secondary market transactions. See [The Estimated Value of the Securities](#) in this pricing supplement.

Our Estimated Value Was Not Determined By Reference To Credit Spreads For Our Conventional Fixed-Rate Debt.

The internal funding rate used in the determination of our estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. If we were to have used the interest rate implied by our conventional fixed-rate credit spreads, we would expect the economic terms of the securities to be more favorable to you. Consequently, our use of an internal funding rate had an adverse effect on the terms of the securities and could have an adverse effect on any secondary market prices of the securities. See [The Estimated Value of the Securities](#) in this pricing supplement.

**Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020**

The Securities Will Not Be Listed On Any Securities Exchange And We Do Not Expect A Trading Market For The Securities To Develop.

The securities will not be listed or displayed on any securities exchange or any automated quotation system. Although Wells Fargo Securities and/or its affiliates may purchase the securities from holders, they are not obligated to do so and are not required to make a market for the securities. There can be no assurance that a secondary market will develop. Because we do not expect that any market makers will participate in a secondary market for the securities, the price at which you may be able to sell your securities is likely to depend on the price, if any, at which Wells Fargo Securities and/or its affiliates are willing to buy your securities.

If a secondary market does exist, it may be limited. Accordingly, there may be a limited number of buyers if you decide to sell your securities prior to stated maturity. This may affect the price you receive upon such sale. Consequently, you should be willing to hold the securities to stated maturity.

Historical Levels Of The Index Should Not Be Taken As An Indication Of The Future Performance Of The Index During The Term Of The Securities.

The trading prices of the securities included in the Index will determine the closing levels of the Index and, therefore, whether the securities will be automatically called on any of the call dates (including the final calculation day) or the payment at stated maturity. As a result, it is impossible to predict whether the closing levels of the Index will fall or rise compared to its starting level. Trading prices of the securities included in the Index will be influenced by complex and interrelated political, economic, financial and other factors that can affect the markets in which those securities are traded and the values of those securities themselves. Accordingly, any historical levels of the Index do not provide an indication of the future performance of the Index.

Changes That Affect The Index May Adversely Affect The Value Of The Securities And The Amount You Will Receive At Stated Maturity.

The policies of STOXX Limited (the Index sponsor or STOXX) concerning the calculation of the Index and the addition, deletion or substitution of securities comprising the Index and the manner in which the Index sponsor takes account of certain changes affecting such securities may affect the level of the Index and, therefore, may affect the value of the securities and the amount payable to you. The Index sponsor may discontinue or suspend calculation or dissemination of the Index or materially alter the methodology by which it calculates the Index. Any such actions could adversely affect the value of the securities.

We Cannot Control Actions By Any Of The Unaffiliated Companies Whose Securities Are Included In The Index.

Actions by any company whose securities are included in the Index may have an adverse effect on the price of its security, the closing levels of the Index and the value of the securities. We are not affiliated with any of the companies whose securities are included in the Index. These companies will not be involved in the offering of the securities and will have no obligations with respect to the securities, including any obligation to take our or your interests into consideration for any reason. These companies will not receive any of the proceeds of the offering of the securities and will not be responsible for, and will not have participated in, the determination of the timing of, prices for, or quantities of, the securities to be issued. These companies will not be involved with the administration, marketing or trading of the securities and will have no obligations with respect to the amount to be paid to you.

We, Wells Fargo Securities, And Our Respective Affiliates Have No Affiliation With The Index Sponsor And Have Not Independently Verified Its Public Disclosure Of Information.

We, Wells Fargo Securities, and our respective affiliates are not affiliated in any way with the Index sponsor and have no ability to control or predict its actions, including any errors in or discontinuation of disclosure regarding the methods or policies relating to the calculation of the Index. We have derived the information about the Index sponsor and the Index contained herein from publicly available information, without independent verification. You, as an investor in the securities, should make your own investigation into the Index and the Index sponsor. The Index sponsor is not involved in the offering of the securities made hereby in any way and has no obligation to consider your interest as an owner of securities in taking any actions that might affect the value of the securities.

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

An Investment In The Securities Is Subject To Risks Associated With Investing In International Securities Markets.

Your return on these securities and the value of these securities may be affected by factors affecting the international securities markets, specifically changes within the Eurozone. The United Kingdom has voted to leave the European Union (popularly known as Brexit). The effect of Brexit is uncertain, and Brexit has and may continue to contribute to volatility in the prices of securities of companies located in Europe and currency exchange rates, including the valuation of the euro and British pound in particular.

A foreign stock exchange may impose trading limitations intended to prevent extreme fluctuations in individual security prices and may suspend trading in certain circumstances. These actions could limit variations in the closing level of the Index, which could, in turn, adversely affect the value of the securities. Investments in securities linked to the value of foreign equity securities involve particular risks. The foreign securities markets whose stocks comprise the Index may have less liquidity and may be more volatile than U.S. or other securities markets and market developments may affect foreign markets differently from U.S. or other securities markets. Direct or indirect government intervention to stabilize the foreign securities markets, as well as cross-shareholdings in foreign companies, may affect trading prices and volumes in those markets. Also, there is generally less publicly available information about foreign companies than about those U.S. companies that are subject to the reporting requirements of the U.S. SEC, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements that differ from those applicable to U.S. reporting companies.

Securities prices in foreign countries are subject to political, economic, financial and social factors that apply in those geographical regions. These factors, which could negatively affect those securities markets, include the possibility of recent or future changes in a foreign government's economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to foreign companies or investments in foreign equity securities and the possibility of fluctuations in the rate of exchange between currencies, the possibility of outbreaks of hostility and political instability and the possibility of natural disasters or adverse public health developments in the region. Moreover, foreign economies may differ favorably or unfavorably from the U.S. economy in important respects such as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

Any one of these factors, or the combination of more than one of these factors, could negatively affect such foreign securities market and the price of securities therein. In addition, you will not obtain the benefit of any increase in the value of the euro against the U.S. dollar which you would have received if you had owned the securities included in the Index during the term of these securities, although the level of the Index may be adversely affected by general exchange rate movements in the market.

A Call Settlement Date And The Stated Maturity Date May Be Postponed If A Calculation Day Is Postponed.

A calculation day (including the final calculation day) will be postponed if the applicable originally scheduled calculation day is not a trading day or if the calculation agent determines that a market disruption event has occurred or is continuing on that calculation day. If such a postponement occurs with respect to a calculation day other than the final calculation day, then the related call settlement date will be postponed. If such a postponement occurs with respect to the final calculation day, the stated maturity date will be the later of (i) the initial stated maturity date and (ii) five business days after the postponed final calculation day.

We Or One Of Our Affiliates Will Be The Calculation Agent And, As A Result, Potential Conflicts Of Interest Could Arise.

We or one of our affiliates will be the calculation agent for purposes of determining, among other things, the closing levels of the Index on each calculation day and whether the securities are automatically called and may be required to make other determinations that affect the return you receive on the securities. In making these determinations, the calculation agent may be required to make discretionary judgments, including determining whether a market disruption event has occurred on a scheduled calculation day, which may result in postponement of that calculation day; determining the closing level of the Index if a calculation day is postponed to the last day to which it may be postponed and a market disruption event occurs on that day; if publication of the Index is discontinued, selecting a successor or, if no successor is available, determining the closing level on the applicable calculation day; and determining whether to adjust the closing level of the Index on a calculation day in the event of certain changes in or modifications to the Index. Although the calculation agent will exercise its judgment in good faith when performing its functions, potential conflicts of interest may exist between the calculation agent and you.

Our Economic Interests And Those Of Any Dealer Participating In The Offering Of Securities Will Potentially Be Adverse To Your Interests.

PRS-14

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside

Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

You should be aware of the following ways in which our economic interests and those of any dealer participating in the distribution of the securities, which we refer to as a participating dealer, will potentially be adverse to your interests as an investor in the securities. In engaging in certain of the activities described below, our affiliates or any participating dealer or its affiliates may take actions that may adversely affect the value of and your return on the securities, and in so doing they will have no obligation to consider your interests as an investor in the securities. Our affiliates or any participating dealer or its affiliates may realize a profit from these activities even if investors do not receive a favorable investment return on the securities.

- ***Research reports by our affiliates or any participating dealer or its affiliates may be inconsistent with an investment in the securities and may adversely affect the level of the Index.*** Our affiliates or any dealer participating in the offering of the securities or its affiliates may, at present or in the future, publish research reports on the Index or the companies whose securities are included in the Index. This research will be modified from time to time without notice and may, at present or in the future, express opinions or provide recommendations that are inconsistent with purchasing or holding the securities. Any research reports on the Index or the companies whose securities are included in the Index could adversely affect the level of the Index and, therefore, adversely affect the value of and your return on the securities. You are encouraged to derive information concerning the Index from multiple sources and should not rely on the views expressed by us or our affiliates or any participating dealer or its affiliates. In addition, any research reports on the Index or the companies whose securities are included in the Index published on or prior to the pricing date could result in an increase in the level of the Index on the pricing date, which would adversely affect investors in the securities by increasing the level at which the Index must close on the calculation day in order for investors in the securities to receive a favorable return.

- ***Business activities of our affiliates or any participating dealer or its affiliates with the companies whose securities are included in the Index may adversely affect the level of the Index.*** Our affiliates or any participating dealer or its affiliates may, at present or in the future, engage in business with the companies whose securities are included in the Index, including making loans to those companies (including exercising creditors remedies with respect to such loans), making equity investments in those companies or providing investment banking, asset management or other advisory services to those companies. These business activities could adversely affect the level of the Index and, therefore, adversely affect the value of and your return on the securities. In addition, in the course of these business activities, our affiliates or any participating dealer or its affiliates may acquire non-public information about one or more of the companies whose securities are included in the Index. If our affiliates or any participating dealer or its affiliates do acquire such non-public information, we and they are not obligated to disclose such non-public information to you.

- ***Hedging activities by our affiliates or any participating dealer or its affiliates may adversely affect the level of the Index.*** We expect to hedge our obligations under the securities through one or more hedge counterparties, which may include our affiliates or any participating dealer or its affiliates. Pursuant to such hedging activities, our hedge counterparty may acquire securities included in the Index or listed or over-the-counter derivative or synthetic

instruments related to the Index or such securities. Depending on, among other things, future market conditions, the aggregate amount and the composition of such positions are likely to vary over time. To the extent that our hedge counterparty has a long hedge position in any of the securities included in the Index, or derivative or synthetic instruments related to the Index or such securities, they may liquidate a portion of such holdings at or about the time of a calculation day or at or about the time of a change in the securities included in the Index. These hedging activities could potentially adversely affect the level of the Index and, therefore, adversely affect the value of and your return on the securities.

- ***Trading activities by our affiliates or any participating dealer or its affiliates may adversely affect the level of the Index.*** Our affiliates or any participating dealer or its affiliates may engage in trading in the securities included in the Index and other instruments relating to the Index or such securities on a regular basis as part of their general broker-dealer and other businesses. Any of these trading activities could potentially adversely affect the prices of the securities included in the Index and, therefore, adversely affect the value of and your return on the securities.

- ***A participating dealer or its affiliates may realize hedging profits projected by its proprietary pricing models in addition to any selling concession or any distribution expense fee, creating a further incentive for the participating dealer to sell the securities to you.*** If any participating dealer or any of its affiliates conducts hedging activities for us in connection with the securities, that participating dealer or its affiliates will expect to realize a projected profit from such hedging activities, and this projected profit will be in addition to any concession or distribution expense fee that the

**Market Linked Securities Auto-Callable with Fixed Percentage

The U.S. Federal Tax Consequences Of An Investment In The Securities Are Unclear.

There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service. Consequently, significant aspects of the tax treatment of the securities are uncertain, and the Internal Revenue Service or a court might not agree with the treatment of the securities as pre-paid cash-settled derivative contracts. If the Internal Revenue Service were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. As described below under United States Federal Income Tax Considerations, the U.S. Treasury Department and the Internal Revenue Service released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of prepaid forward contracts and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

Furthermore, Section 871(m) of the Internal Revenue Code imposes a withholding tax of up to 30% on dividend equivalents paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. Since the EURO STOXX 50® Index does not have any U.S. Underlying Equities, as of the date of this pricing supplement the securities should not be subject to withholding under Section 871(m).

Both U.S. and non-U.S. persons considering an investment in the securities should review carefully the section of this pricing supplement entitled United States Federal Income Tax Considerations and consult their tax advisers regarding the U.S. federal tax consequences of an investment in the securities (including possible alternative treatments and the issues presented by the notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

There Can Be No Assurance That The Canadian Federal Income Tax Consequences Of An Investment In The Securities Will Not Change In The Future.

There can be no assurance that Canadian federal income tax laws, the judicial interpretation thereof, or the administrative policies and assessing practices of the Canada Revenue Agency will not be changed in a manner that adversely affects investors. For a discussion of the Canadian federal income tax consequences of investing in the securities, please read the section entitled Certain Canadian Federal Income Tax Considerations in this pricing supplement as well as the section entitled Material Income Tax Consequences Canadian Taxation in the accompanying prospectus dated March 28, 2017. You should consult your tax advisor with respect to your own particular situation.

HYPOTHETICAL RETURNS

If the securities are automatically called:

Assuming that the securities are automatically called, the following table illustrates, for each hypothetical call date on which the securities are automatically called:

- the payment per security on the related call settlement date;
- the total pre-tax rate of return; and
- the pre-tax annualized rate of return.

Hypothetical Call Date on which Securities are Automatically Called	Hypothetical Payment Per Security on Related Call Settlement Date	Hypothetical Pre-Tax Total Rate of Return	Hypothetical Pre-Tax Annualized Rate of Return ⁽¹⁾
1st call date	\$1,076.00	7.60%	7.32%
2nd call date	\$1,152.00	15.20%	7.13%
3rd call date	\$1,228.00	22.80%	6.95%

(1) The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

If the securities are not automatically called:

Assuming that the securities are not automatically called, the following table illustrates, for a range of hypothetical ending levels of the Index:

- the hypothetical percentage change from the starting level to the hypothetical ending level, using the starting level of 3421.47;
- the hypothetical payment at stated maturity per security;
- the hypothetical pre-tax total rate of return; and
- the hypothetical pre-tax annualized rate of return.

Hypothetical Ending Level	Hypothetical Percentage Change From the Starting Level to the Hypothetical Ending Level	Hypothetical Payment at Stated Maturity Per Security	Hypothetical Pre-Tax Total Rate of Return	Hypothetical Pre-Tax Annualized Rate of Return(1)
3421.13	-0.01%	\$1,000.00	0.00%	0.00%
3250.40	-5.00%	\$1,000.00	0.00%	0.00%
3079.32	-10.00%	\$1,000.00	0.00%	0.00%
3045.11	-11.00%	\$990.00	-1.00%	-0.33%
2737.18	-20.00%	\$900.00	-10.00%	-3.47%
2566.10	-25.00%	\$850.00	-15.00%	-5.33%
1710.74	-50.00%	\$600.00	-40.00%	-16.28%
855.37	-75.00%	\$350.00	-65.00%	-32.02%
0.00	-100.00%	\$100.00	-90.00%	-63.60%

(1) The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

**Market Linked Securities Auto-Callable with Fixed Percentage
Buffered Downside**

**Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8,
2020**

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you will receive upon an automatic call or at stated maturity and the resulting pre-tax rate of return will depend on (i) whether the securities are automatically called; (ii) if the securities are automatically called, the actual call date on which the securities are called; and (iii) if the securities are not automatically called, the actual ending level.

PRS-19

Market Linked Securities Auto-Callable with Fixed Percentage Buffered Downside
Principal at Risk Securities Linked to the EURO STOXX 50® Index due September 8, 2020

HYPOTHETICAL PAYMENTS AT STATED MATURITY

If the closing level of the Index is less than the starting level on each of the first two call dates, the securities will not be automatically called prior to the final calculation day, and you will receive a payment at stated maturity that will be greater than, equal to or less than the principal amount per security, depending on the ending level (i.e., the closing level of the Index on the final calculation day). Set forth below are three examples of calculations of the payment at stated maturity, assuming that the securities have not been automatically called on either of the first two call dates, reflecting a call premium applicable to the final calculation day of 22.80% and assuming ending levels indicated in the examples. These examples are for purposes of illustration only and the values used in the examples may have been rounded for ease of analysis.

Example 1. Ending level is greater than the starting level, the securities are automatically called on the final calculation day and the payment at stated maturity is equal to the principal amount plus the applicable call premium:

Starting level: 3421.47

Hypothetical ending level: 4447.91

Since the hypothetical ending level is greater than the starting level, the securities are automatically called on the final calculation day and you will receive the principal amount of your securities plus a call premium of 22.80% of the principal amount per security. Even though the Index appreciated by 30% from its starting level to its ending level in this example, your return is limited to the call premium of 22.80% that is applicable to the final calculation day.

On the stated maturity date, you would receive \$1,228.00 per security.

Example 2. Ending level is less than the starting level but greater than the threshold level and the payment at stated maturity is equal to the principal amount:

Starting level: 3421.47

Hypothetical ending level: 3250.40

Threshold level: 3079.323, which is 90% of the starting level

Since the hypothetical ending level is less than the starting level, but not by more than 10%, you would not lose any of the principal amount of your securities.

On the stated maturity date, you would receive \$1,000.00 per security.

Example 3. Ending level is less than the threshold level and the payment at stated maturity is less than the principal amount:

Starting level: 3421.47

Hypothetical ending level: 2566.10

Threshold level: 3079.323, which is 90% of the starting level

Since the hypothetical ending level is less than the starting level by more than 10%, you would lose a portion of the principal amount of your securities and receive a payment at stated maturity equal to:

On the stated maturity date you would receive \$850.00 per security, resulting in a loss of 15%.

ADDITIONAL TERMS OF THE SECURITIES

Canadian Imperial Bank of Commerce will issue the securities as part of a series of senior unsecured debt securities entitled Senior Global Medium-Term Notes (Structured Notes), which is more fully described in the accompanying prospectus supplement and prospectus. Information included in this pricing supplement supersedes information in the prospectus supplement and prospectus to the extent that it is different from that information.

Payment on the Securities

In the event that any call settlement date or the stated maturity date is not a business day, then the relevant payment will be made on the next business day (Following Business Day Convention).
