**1. Organization and Significant Accounting Policies**

The Real Estate Income Fund Inc. ( Fund ), a Maryland corporation, is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed end management investment company.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles ( GAAP ).

**(a) Investment Valuation.** Securities traded on national securities markets are valued at the closing price on such markets or, if there were no sales during the day, at the mean between the quoted bid and asked prices; securities listed on the NASDAQ National Market System for which market quotations are available are valued at the official closing price or, if there is no official closing price on that day, at the last sale price; securities traded in the over-the-counter market are valued at prices based on market quotations for securities of similar type; U.S. government agencies and obligations are valued at the mean between the last reported bid and asked prices. When market quotations or official closing prices are not readily available, or are determined not to reflect accurately fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these investments at fair value as determined in accordance with the procedures approved by the Fund's Board of Directors. Short term obligations maturing within 60 days are valued at cost plus accreted discount or minus amortized premium, which approximates value.

**(b) Repurchase Agreements.** When entering into repurchase agreements, it is the Fund's policy that a custodian takes possession of the underlying collateral securities, the value of which at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market to ensure the adequacy of the collateral. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

**(c) Swap Contracts.** The Fund enters into interest rate swap agreements, which involve the exchange by the Fund with another party of their respective commitments to pay or receive interest (e.g., an exchange of floating rate payments for fixed rate payments) with respect to a notional amount of principal. Swaps are marked to market daily based upon quotations from market makers and the change, if any, is recorded as an unrealized gain or loss in the Statements of Operations. Net payments of interest are recorded as realized gains. Entering into these agreements involves, to varying degrees, elements of credit and market risk in excess of the amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counter-party to the agreement may default on its obligation to perform and there may be unfavorable changes in the fluctuation of interest and/or exchange rates.

**(d) Investment Transactions.** Security transactions are accounted for on a trade date basis.
