FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 2016

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number: 001-36286

Intrawest Resorts Holdings, Inc.
(Exact Name of Registrant as Specified in Its Charter)

Delaware (State or Other Jurisdiction of Incorporation or Organization)	46-3681098 (I.R.S. Employer Identification No.)
1621 18th Street, Suite 300 Denver, Colorado	80202 (Zip Code)
(303) 749-8200 (Registrant's Telephone Number, Including Area Code)	

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$0.01 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
 Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (Section 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. x

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common equity held by non-affiliates of the registrant, based on the closing price of \$7.82 per share as reported on the New York Stock Exchange Composite Tape on December 31, 2015 (the last business day of the registrant's most recently completed second fiscal quarter) was \$99,295,201.

As of September 2, 2016, 39,770,271 shares of the registrant's common stock were outstanding.

DOCUMENTS
INCORPORATED
BY REFERENCE

Portions of the registrant's Definitive Proxy Statement for its 2016 Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K, to be filed within 120 days of the registrant's fiscal year ended June 30, 2016.

CAUTIONARY NOTE ABOUT FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements contained in this Annual Report on Form 10-K other than statements of historical fact, including statements regarding our future results of operations and financial position, our business strategy and plans, and our objectives for future operations, are forward-looking statements. The words “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “expect,” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including:

- weakness in general economic conditions;
- lack of adequate snowfall and unfavorable weather conditions;
- lack of access to adequate supplies of water to make snow and otherwise conduct our operations;
- adverse events that occur during our peak operating periods;
- our failure to achieve the expected benefits of our strategic alliance, real estate development, acquisition and other growth strategies;
- Steamboat Ski & Resort’s dependence on contracted direct air service;
- risks related to information technology;
- our potential failure to maintain the integrity of our customer or employee data;
- adverse consequences of ongoing legacy litigation or future legal claims;
- our ability to monetize real estate assets;
- a partial or complete loss of Alpine Helicopters Inc.’s services;
- the effects of climate change on our business operations;
- our ability to maintain effective internal control over financial reporting;
- risks of foreign currency fluctuations which could reduce the U.S. dollar value of our Canadian earnings;
- risks associated with the ownership of a majority of our outstanding common stock by entities managed or controlled by Fortress Investment Group, LLC, (collectively “Fortress”), including potential sales of shares held by Fortress, governance rights in our stockholders' agreement with Fortress and potential conflicts of interests;
- our substantial leverage, which could adversely affect our ability to raise additional capital to support our growth strategy; and
- our limited public float and therefore trading volume.

You should carefully consider the risks described in Part I - Item 1A, Risk Factors, of this Annual Report on Form 10-K. Moreover, we operate in a competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the future events and trends discussed in this Annual Report on Form 10-K may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

Table of Contents

PART I

ITEM 1. BUSINESS.

Overview

We are a North American mountain resort, adventure, and real estate company, delivering distinctive vacation and travel experiences to our customers for over three decades. We wholly own and/or operate six four-season mountain resorts geographically diversified across North America's major ski regions with approximately 8,000 skiable acres and over 1,120 acres of land available for real estate development. We also operate an adventure travel business, which includes Canadian Mountain Holidays ("CMH"), a leading heli-skiing adventure company in North America. CMH provides helicopter accessed skiing, mountaineering and hiking over approximately 3.0 million tenured acres. Additionally, we operate a comprehensive real estate business through which we manage condominium hotel properties and sell and market residential real estate.

Intrawest Resorts Holdings, Inc. is a Delaware corporation that was formed on August 30, 2013, and had not, prior to the completion of the restructuring transactions in which it acquired substantially all of the assets, liabilities and operations of Intrawest Cayman L.P. (the "Partnership"), conducted any activities other than those incident to its formation for the preparation of its initial public offering, which was consummated on February 5, 2014. The Partnership was formed on February 22, 2007 as a holding company that operated through various subsidiaries primarily engaged in the operation of mountain resorts, adventure, and real estate businesses, principally throughout North America. See Part II- Item 8, Financial Statements and Supplementary Data, Note 1, "Formation and Business" under "Restructuring".

Unless the context suggests otherwise, references in this document to the "Company", "our", "us", or "we" refer to the Partnership and its consolidated subsidiaries prior to the consummation of the Restructuring, as defined in Part II- Item 8, Financial Statements and Supplementary Data, Note 1, "Formation and Business" under "Restructuring", and to Intrawest Resorts Holdings, Inc. and its consolidated subsidiaries after the consummation of the restructuring transactions.

We operate our business through three segments: Mountain, Adventure and Real Estate.

Mountain Segment

The Mountain segment includes our mountain resort and lodging operations at Steamboat Ski & Resort ("Steamboat") and Winter Park Resort ("Winter Park") in Colorado, Stratton Mountain Resort ("Stratton") in Vermont, Snowshoe Mountain Resort ("Snowshoe") in West Virginia, Mont Tremblant Resort ("Tremblant") in Quebec, and Blue Mountain Ski Resort ("Blue Mountain") in Ontario, of which we owned a 50.0% equity interest for all relevant periods prior to our acquisition of the remaining 50.0% equity interest in September 2014. Our Mountain segment contributed 74.2%, 73.2% and 68.6% of total segment revenue for the years ended June 30, 2016, 2015 and 2014, respectively.

Steamboat Ski & Resort (operating since 1963) is located in the Colorado Rocky Mountains, 157 miles northwest of Denver, with access via direct flights from several major national airports including: New York, Los Angeles, Chicago, Houston, Atlanta, Minneapolis, Seattle, Dallas, San Francisco, and Washington D.C. The town of Steamboat Springs, Colorado, where Steamboat is located, has a strong heritage of winter sports, as evidenced by the 88 winter Olympians that have trained in the town. The resort features a combination of high-end customer services (such as a full service spa and fine dining restaurants), an 1880's western atmosphere and some of the most consistent snowfall in the Rocky Mountain region. Known for its Champagne Powder® snow, the average snowfall at Steamboat is approximately 25% more than the historical Rocky Mountain regional resort average of 239 inches. Steamboat

features 2,965 skiable acres and a maximum vertical drop of 3,668 feet.

Winter Park Resort (operating since 1939) is located in the Colorado Rocky Mountains, 67 miles west of Denver, and is one of the closest resorts to the Denver metropolitan area's nearly 3.0 million residents. The resort, which is comprised of seven unique territories, including Winter Park Mountain, Mary Jane Mountain, Vasquez Cirque and Vasquez Ridge, is the longest operating mountain resort in Colorado. The resort offers more than 3,000 skiable acres, a maximum vertical drop of 3,060 feet, six terrain parks, and "world-class" mogul skiing, as described by Powder Magazine. Each summer, Winter Park transforms into a mountain biking destination, Mountain Bike Capital USA®, with one of the largest bike parks in the United States.

Mont Tremblant Resort (operating since 1939) is located in Quebec, Canada, within a two hour drive from the Montreal metropolitan area's approximately 4.0 million residents and the Ottawa metropolitan area's nearly 1.2 million residents. The resort is consistently ranked as one of the top ski resorts in Eastern North America by Ski Magazine. With 2,116 feet of vertical drop and snowmaking on over 70% of trails, Tremblant offers customers the opportunity to ski down one of the biggest vertical drops in eastern Canada. In the summer, customers can play golf on two 18-hole golf courses, mountain bike, and enjoy the pedestrian village, attractions, and outdoor concerts and events.

Table of Contents

Blue Mountain Ski Resort (operating since 1941), of which we owned a 50.0% equity interest until our acquisition of the remaining 50.0% equity interest in September 2014, is located in Ontario, Canada, approximately 90 miles northwest of the Greater Toronto area's approximately 6.0 million residents. With approximately 360 skiable acres and snowmaking on 93% of trails, Blue Mountain is the largest ski resort in Ontario and one of the most popular four-season resorts in Canada. Blue Mountain also operates year round conference centers and offers a suite of summer amenities, including an 18-hole golf course, an open-air gondola, a mountain coaster, an aerial adventure park, a mountain biking facility and a waterfront park.

Stratton Mountain Resort (operating since 1961) is located in Southern Vermont, approximately 220 miles north of New York City and approximately 150 miles northwest of Boston, whose metropolitan areas have a combined population of more than 24.5 million residents. Situated on one of the tallest peaks in New England, Stratton features a vertical drop of 2,003 feet and snowmaking on 93% of trails. Stratton's summer amenities include 27 holes of golf, a 22-acre golf school and a sports and tennis complex. Winter and summer customers also enjoy Stratton's pedestrian village. For the 2015/2016 ski season, Stratton remodeled the base lodge to modernize facilities, differentiate its food and beverage offerings and add capacity for 354 additional seats.

Snowshoe Mountain Resort (operating since 1974) is located in West Virginia and is one of the largest ski resorts in the Southeast region of the United States. Snowshoe primarily draws customers from the Baltimore-Washington D.C. and Pittsburgh metropolitan areas' combined 11.7 million residents, as well as the Southeastern United States. The resort has the biggest vertical drop in the region (1,500 feet) and 100% snowmaking coverage. The resort's mountaintop village offers a variety of nightlife, dining and retail options.

Competition

There are significant barriers to entry for new ski resort developments in North America resulting from the limited number of remaining suitable sites, the difficulty in obtaining necessary government permits and the significant capital required for development and construction. As such, no major ski resorts have been developed in North America in the past 30 years, with the last major resorts opened being Blackcomb Mountain and Beaver Creek in 1980 and Deer Valley in 1981.

Competition within the ski resort industry is based on multiple factors, including location, price, weather conditions, the quality and location of resorts included in multi-resort pass products, the uniqueness and perceived quality of the terrain for various levels of skill and ability, the atmosphere of the base village, the quality of food and entertainment and ease of travel to the resort (including direct flights by major airlines). We believe we compete effectively and our competitive position is strong, due to the unique attributes and geographic diversity among our portfolio of mountain resorts. We believe that our mountain resorts feature a sufficient quality and variety of terrain and activities to make them highly competitive with other mountain resorts.

Each of our resorts directly competes with other mountain resorts in its respective local and regional markets, as well as with other major destination resorts. Our individual mountain resorts primarily compete as follows:

- Steamboat's primary competition is from Breckenridge Ski Resort in Colorado, Park City Mountain Resort in Utah and other large international ski destinations.

- Winter Park's primary competition is from Copper Mountain Resort, Keystone Resort and other ski resorts located in proximity to Colorado's Front Range.

-

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Tremblant's primary competition is from Mont-Sainte-Anne, Mont Blanc, Le Massif and Mont Saint-Sauveur, all located in Quebec, other resorts in the Laurentian Mountains, and both Jay Peak and Stowe Mountain in Northern Vermont.

Blue Mountain's primary competition is from Horseshoe Valley Resort and Mount St. Louis, both located in Ontario, and Holiday Valley Resort in western New York.

Stratton's primary competition is from other mid-to-large size ski resorts in Southern Vermont, including Okemo Mountain Resort, Mount Snow and Killington Resort.

Snowshoe's primary competition is from ski resorts in the mid-Atlantic, such as Seven Springs Mountain Resort located in Pennsylvania, and Bryce Resort and Wintergreen Resort, both located in Virginia.

Table of Contents

Adventure Segment

The cornerstone of our Adventure segment is CMH, a leading heli-skiing adventure company in North America. CMH has been providing helicopter accessed skiing trips for more than 50 years and currently operates in the Purcell, Selkirk, Monashee and Cariboo mountains of eastern British Columbia from 11 lodges, nine of which we own. CMH's operating area encompasses 3.0 million tenured acres of terrain granted under renewable 10 to 30-year licences from the government of British Columbia for helicopter accessed skiing, mountaineering, and hiking operations. CMH's acreage amounts to more skiable terrain than all lift access mountain resorts in North America combined. Our Adventure segment contributed 18.4%, 16.6% and 20.0% of total segment revenue for the years ended June 30, 2016, 2015 and 2014, respectively.

The majority of CMH's customers for the year ended June 30, 2016 were repeat customers. CMH's client base is geographically diverse as, during the year ended June 30, 2016, 54% of its total customers came from North America, 35% came from Europe and 11% came from Australia, Asia and South America.

To support CMH's skiing, guiding and hospitality operations, we own a modified fleet of 36 Bell helicopters and operate Alpine Aerotech L.P. ("Alpine Aerotech"), a platinum-certified Bell helicopter maintenance, repair and overhaul ("MRO") business. Alpine Aerotech is one of only 11 platinum-certified Bell helicopter MRO businesses in the world and, in addition to servicing our owned helicopters, the business caters to over 500 customers from around the world. We lease a majority of our fleet of helicopters to Alpine Helicopters Inc. ("Alpine Helicopters"), of which we own 20%, which in turn acts as the exclusive provider of helicopter services to CMH. In January 2013, we restructured the Alpine Helicopters business to bring it into compliance with Canadian foreign ownership regulations governing aviation flight services in Canada. Alpine Helicopters has been offering helicopter operations from bases across western Canada for over 50 years and has long-standing relationships with the British Columbia Ministry of Forests, the Alberta Forest Service and Parks Canada. Our integrated operating model enables us to scale the business and increase customer visits with limited reliance on third party providers, which we believe differentiates us from other heli-ski operations. In addition, by utilizing the same pilots each ski season, who have an average of over 7,000 hours of experience and who possess extensive knowledge of the terrain, we believe CMH is able to provide a more consistent high quality customer experience.

To more efficiently utilize our aircraft year round, during the summer months, our partially owned U.S. subsidiary, Eagle Helicopters Inc. ("Eagle Helicopters"), which operates under the name Kachina Aviation, provides fire suppression and other helicopter services under contracts with the U.S. Forest Service ("USFS"), the Bureau of Land Management ("BLM") and various State governments. We also lease aircraft to unaffiliated third parties.

Competition

CMH directly competes with other heli-ski and snowcat operations in Canada and the United States. We believe that there are currently less than 75 heli-ski and catski operators in North America, with most heli-skiing and catskiing occurring in British Columbia due to the vast alpine wilderness and consistent annual snowfall. CMH also competes to a lesser extent with lift-accessed ski resorts in North America and other parts of the world. Additionally, our ancillary aviation businesses compete with small independent operators that are able to bid on certain government contracts that are allocated to small businesses.

Real Estate Segment

Our Real Estate segment is comprised of our real estate management, marketing and sales businesses, as well as our real estate development activities. Our Real Estate segment includes Intrawest Hospitality Management ("IHM"), which manages condominium hotel properties in Maui, Hawaii and in Mammoth Lakes, California, Playground, our

residential real estate sales and marketing business, our 50.0% interest in Mammoth Hospitality Management L.L.C. ("MHM"), our 57.1% economic interest in Chateau M.T. Inc. ("Chateau"), and included Intrawest Resort Club Group ("IRCG"), a vacation club business, until we sold the business on January 29, 2016 (the "Disposition Date"). Our Real Estate segment also includes costs associated with real estate development activities, such as planning activities and land carrying costs. Our Real Estate segment contributed 7.5%, 10.2% and 11.4% of total segment revenue for the years ended June 30, 2016, 2015 and 2014, respectively.

IHM, our hospitality management business, was established in 1998 and is focused on providing management services to properties owned by third parties, including the Honua Kai Resort and Spa in Maui, Hawaii and the Westin Monache Resort at Mammoth Lakes, California.

Playground, our residential real estate sales and marketing business, was established as a stand-alone business in 2001. The Playground brand is used in certain resale and brokerage operations at our mountain resorts. As we develop the land surrounding our mountain resorts, we expect Playground to provide sales and marketing expertise for these properties. Through Playground, we managed the fractional condo sales process at the Four Seasons in Vail on behalf of a third party until June 2014.

Table of Contents

Until the Disposition Date, we derived revenue from four core IRCG activities: selling vacation club points in Club Intrawest, an unaffiliated not-for-profit vacation club; providing financing for the purchase by consumers of vacation club points; managing Club Intrawest's nine properties; and running a private exchange company for Club Intrawest's members.

We own a significant amount of land available for development at our mountain resorts and, through our Real Estate segment, are focused on designing strategies for future development of this land in concert with planning for on-mountain and base village improvements.

Prior to 2010, we were actively engaged in the development of resort real estate. In late 2009, in light of the then-existing poor economic environment for real estate, we ceased new development activities and substantially reduced our related administrative overhead. As a result of our prior development activities, we accumulated a portfolio of core development parcels surrounding the bases of our Steamboat, Winter Park, Tremblant, Stratton and Snowshoe resorts, which we believe will provide us with the ability to increase our revenue through the potential future development of this land. We currently own core entitled land surrounding the base of our resorts totaling more than 1,120 acres, much of which is located adjacent or proximate to the ski trails at our resorts, including ski-in and ski-out parcels.

Finally, we have a 57.1% economic ownership interest in Chateau, which owns a hotel and conference center in Mont-Tremblant, Quebec that is managed by Fairmont. We also have a 50.0% economic interest in MHM, which runs the hospitality and lodging operations at Mammoth Mountain in California.

Competition

We compete with other property management companies in providing management services at IHM's properties. Our managed properties compete with rental management companies, locally owned independent hotels, as well as facilities and timeshare companies that are owned or managed by national and international chains. These properties also compete for convention and conference business across the North American market. Competition within the hotel and lodging industry is generally based on quality and consistency of rooms, restaurants and meeting facilities and services, attractiveness of locations, availability of a global distribution system, price and other factors.

Legacy, Non-Core and Other Items

Certain activities and assets, and the resulting expenses, gains and losses from such activities and assets, are either deemed to be non-core by our Chief Operating Decision Maker ("CODM") when they are not sufficiently related to our ongoing business, we plan to divest or wind them down or they are not reviewed by our CODM in evaluating the performance of our business. Non-core activities and assets that influenced our consolidated results during the financial periods presented but that have not been allocated to our segments include:

• legacy real estate carrying costs and litigation;

• divested non-core operations; and

• remaining non-core operations, including non-core retail revenue, MMSA Investors, LLC and Mammoth Resorts LLC (together with MMSA Investors, LLC, collectively referred to herein as the "Mammoth family of resorts").

We disposed of legacy real estate assets and non-core operations during the years ended June 30, 2015 and 2014. In addition, we recognized an impairment loss of \$0.6 million on the carrying value of our legacy real estate portfolio during the year ended June 30, 2014. There were no comparable charges in fiscal 2015 or 2016. We divested all of our

legacy real estate as of June 30, 2015.

Expenses related to legacy real estate development activities include the carrying costs of legacy real estate assets and legacy litigation consisting of claims for damages related to alleged construction defects, purported disclosure violations and allegations that we failed to construct planned amenities. Many of the claims brought against us were similar to claims brought against residential developers industry-wide in the wake of the 2008 housing market collapse. The vast majority of these claims were filed in 2009 and 2010 when we began litigating hundreds of cases with purchasers who had entered into pre-sale contracts prior to 2010, failed to close on their purchases, and were seeking a return of their security deposits. We have been settling these and other legacy real estate claims on a consistent basis over the past few years. New claims filings relating to legacy real estate litigation are infrequent due to the amount of time that has passed since our last construction project.

We believe expenses associated with our legacy real estate development activities will diminish in future periods though the trend may not continue. We expect any remaining costs and expenses that we incur in future periods to primarily relate to ongoing real estate litigation in which we are either the defendant or plaintiff. We also expect to incur additional remediation expenses related to pre-2009 construction projects.

Table of Contents

We incur additional costs that we do not allocate to our segments because they relate to items that management does not believe are representative of the underlying performance of our ongoing operations. These include items such as non-cash compensation and restructuring costs.

Seasonality

Our business is seasonal in nature. Although our resorts are four-season businesses, we generate the highest revenue between our second and third fiscal quarters, which includes the peak ski season. As a result of the seasonality of our business, our mountain resorts and CMH typically experience operating losses during the first and fourth quarters of each fiscal year. During our peak quarters, we generate the highest daily revenue on weekends, during the Christmas/New Year's and Presidents' Day holiday periods and, in the case of our mountain resorts, during school spring breaks. See Part II - Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, "Factors Affecting our Business—Seasonality and Fluctuations in Quarterly Results".

In an effort to partially counterbalance the concentration of revenue in the winter months, we offer non-ski season attractions at our mountain resorts during the summer months, such as lift accessed sightseeing, mountain biking, guided hiking, mountain coasters and other recreational activities. We also operate golf courses at Stratton, Tremblant, Snowshoe and Blue Mountain. These activities help attract destination conference and group business to our mountain resorts. Similarly, CMH offers helicopter accessed hiking and mountaineering adventures during the summer months.

During seasonally slow times, we control operating costs by reducing operating hours and, in the case of CMH, closing a majority of our lodges. We also lease out a number of the helicopters from our aviation business for fire suppression activities. Employment levels required for peak operations are met largely through part-time and seasonal hiring.

The following table contains selected unaudited segment information for each quarter in the years ended June 30, 2016 and June 30, 2015 (in thousands):

	Three Months Ended			
	June 30, 2016	March 31, 2016	December 31, 2015	September 30, 2015
Mountain revenue	\$36,781	\$255,357	\$79,436	\$49,758
Adventure revenue	18,939	48,835	12,368	24,263
Real Estate revenue	9,245	9,973	11,403	11,812
Total segment revenue	\$64,965	\$314,165	\$103,207	\$85,833

	Three Months Ended			
	June 30, 2015	March 31, 2015	December 31, 2014	September 30, 2014
Mountain revenue	\$36,869	\$258,092	\$94,655	\$36,313
Adventure revenue	19,362	44,579	10,244	22,614
Real Estate revenue	11,416	17,635	15,152	15,071
Total segment revenue	\$67,647	\$320,306	\$120,051	\$73,998

	June 30, 2016	March 31, 2016	December 31, 2015	September 30, 2015
	Mountain Adjusted EBITDA	\$(26,447)	\$136,704	\$(5,136)

Steamboat and Winter Park

Federal Regulations

The 1986 Ski Area Permit Act (the “1986 Act”) allows the USFS to grant Term Special Use Permits (each, a “SUP”) for the operation of ski areas and construction of related facilities on National Forest lands. In addition, the 1986 Act requires a Master Development Plan for each ski area that is granted a SUP. Under the SUPs, the USFS has the right to review and approve the location, design and construction of improvements in the permit area and many operational matters. In addition, each distinct area of National Forest lands is required by the National Forest Management Act of 1976 to develop and maintain a Land and Resource Management Plan (a “Forest Plan”), which establishes standards and guidelines for the USFS to follow and consider in reviewing and approving proposed actions. In November 2011, the Ski Area Recreational Opportunity Enhancement Act amended the 1986 Act to clarify that the USFS is authorized to permit year-round recreational activities on National Forest lands.

A majority of the skiable terrain at Steamboat and substantially all of the skiable terrain at Winter Park is located on USFS land. As a result, each of Steamboat and Winter Park operate under a SUP.

Steamboat operates under a SUP for the use of 3,740 acres that expires on June 30, 2047. Steamboat also operates on 245 acres that it owns, essentially comprising the lower portion of the ski mountain. Winter Park operates under a SUP for the use of approximately 7,555 acres that expires on April 29, 2056.

Each SUP contains a number of requirements, including that we indemnify the USFS from third-party claims arising out of our operations under the SUP and that we comply with applicable federal laws, such as those relating to water quality and endangered or threatened species.

For use of the SUPs, we pay a fee to the USFS. The fee for Steamboat and Winter Park is calculated as a percentage of sales occurring on USFS land and ranges between 1.5% and 4.0% of such sales. The SUPs may be amended by us or by the USFS to change the permit area or permitted uses. The USFS may amend a SUP if the USFS determines that such amendment is in the public interest. While the USFS is required to seek our consent to any amendment, an amendment may be finalized over our objection. Permit amendments must be consistent with the Forest Plan and are subject to the provisions of the National Environmental Policy Act (“NEPA”), both of which are discussed below.

The USFS can also terminate a SUP if it determines that termination is required in the public interest. However, to our knowledge, no SUP has ever been terminated by the USFS over the opposition of the permittee.

Master Development Plans

All improvements that we propose to make on National Forest lands under any of our SUPs must be included in a Master Development Plan (“MDP”). MDPs describe the existing and proposed facilities, developments and area of activity within the permit area. We prepare MDPs, which set forth a conceptual overview of all potential projects at each resort. The MDPs are reviewed by the USFS for compliance with the Forest Plan and other applicable law and, if found to be compliant, are accepted by the USFS. Notwithstanding acceptance by the USFS of the conceptual MDPs, individual projects still require separate applications to be submitted evidencing compliance with NEPA and other applicable laws before the USFS will approve such projects. We update or amend our MDPs for Steamboat and Winter Park on an as needed basis or as required under the terms of the SUPs. Our current MDPs at Steamboat and

Winter Park have been accepted by the USFS for expansion of our total skiable acres at those ski areas, subject to approval of individual applications for each project under NEPA and other applicable laws.

National Forest Plans

Operational and development activities on National Forest lands at Steamboat are subject to the additional regulatory and planning requirements set forth in the 1996 Revision of the Routt National Forest Land and Resource Management Plan. Operational and development activities on National Forest lands at Winter Park are subject to the additional regulatory and planning requirements set forth in the 1997 Revision of the Land and Resource Management Plan for Arapaho/Roosevelt National Forest. When approving our application for development, area expansion and other activities on National Forest lands, the USFS must adhere to the applicable Forest Plan. Any such decision may be subject to judicial review in federal court if a party, with standing, challenges a USFS decision that applies the requirements of a Forest Plan.

Table of Contents

National Environmental Policy Act

NEPA requires the USFS to consider the environmental impact of major proposed actions on National Forest land, such as expansion of a ski area, installation of new lifts or snowmaking facilities, or construction of new trails or buildings. The studies, prepared by the USFS, are subject to public review and comment. An Environmental Impact Statement (“EIS”) is required for projects with significant impacts to the environment and the process can be lengthy to complete. Projects that require an EIS typically take longer to approve than projects that require an Environmental Assessment (“EA”), which is prepared for projects with less significant impacts.

In each study, the USFS is required to analyze alternatives to the proposed action, including not taking the proposed action, as well as impacts that may be unavoidable. Following completion of the study, the USFS may decide not to approve the proposed action or may decide to approve an alternative action. Completion of the NEPA process does not guarantee that a project will be built.

Projects may also be completed under NEPA absent an EIS or an EA if they are eligible under a Categorical Exclusion (“Cat Ex”). Cat Ex projects consist of those projects that are not expected to have a significant environmental impact. The USFS has a list of Cat Ex projects, and some projects at Steamboat and Winter Park are eligible to be completed under a Cat Ex.

Stratton

Act 250 is a land use and development control law enforced by the Vermont Agency of Natural Resources that requires developers to consider impacts to, among other things, waterways, air, wildlife and earth resources using 10 criteria that are designed to safeguard the environment, community life and aesthetic character of Vermont. The State of Vermont Natural Resources Board, District Environmental Commission has the power to issue or deny a permit to real estate developers for any project that encompasses more than 10 acres, or more than one acre for towns that do not have permanent zoning and subdivision bylaws. The law also applies to any development project with more than 10 housing units or housing lots, and may apply for proposed construction above 2,500 feet of elevation. Stratton has a Master Plan detailing the real estate development considerations within the resort boundary. All projects within Stratton’s Master Plan have completed or will need to complete the Act 250 process at the project level.

The Vermont Department of Public Service is the state agency charged with oversight of propane facilities in Vermont for the Federal Government’s Office of Pipeline Safety, which administers the United States Department of Transportation’s Pipeline and Hazardous Materials Safety Administration’s propane pipeline regulatory program. Stratton owns an extensive propane distribution system consisting of three 30,000 gallon above-ground propane storage tanks and related piping, regulators, vaporizers and other equipment for the purpose of providing propane to homes in the Stratton area and to Stratton’s facilities. A third party supplies and operates the system.

Stratton also operates a waste water treatment facility. Operation of the waste water treatment facility requires state and local permits, and we are currently subject to a water quality remediation plan to reduce heat and sediment discharges.

Snowshoe

Snowshoe is home to the Cheat Mountain salamander, a threatened endangered species. Prior to conducting certain development activities at Snowshoe, we must submit a site survey to the U.S. Fish and Wildlife Service demonstrating the impact of the development activities on the Cheat Mountain salamander habitat at Snowshoe.

Snowshoe, through its subsidiary, Cheat Mountain Water Company, Inc., a private utility, owns and operates a potable water facility that is approximately 40 years old and requires state and local permits to operate in Pocahontas County in the State of West Virginia. Due to the age of this facility and increasingly more stringent water discharge standards, we are evaluating our options with respect to the facility, including potentially transferring the facility to a private operator, not-for-profit or municipality in the next few years.

USTs

The federal Solid Waste Disposal Act provides authority to the U.S. Environmental Protection Agency (“EPA”) to regulate underground storage tanks (“USTs”). USTs are present at Steamboat, Winter Park and Stratton and assist in storing fuel for base and mountain operations. In some states, if approved by the EPA, the state UST program will take precedence over the federal regulations.

Canada

Tremblant

Our operations at Tremblant are subject to a variety of federal, provincial and local laws, including environmental laws and health and safety regulations. Our ski operations are also subject to provincial regulations pertaining to the safety of our lifts and of individuals using

Table of Contents

our facilities at Tremblant for downhill activities. In addition, our operations at Tremblant are subject to the Province of Quebec's labor code. At Tremblant, there is one UST and it is regulated by the Ministry of Sustainable Development, Environment, Wildlife and Parks.

Our operations at Tremblant are also subject to municipal bylaws and regulations enacted by the Municipality of Mont-Tremblant that regulate, most notably, zoning, development, commercial advertising and the environment. Furthermore, in 1991, Tremblant entered into a master agreement with the Municipality of Mont-Tremblant. The agreement governs Tremblant's real estate development and the operation of its village, as well as the use of municipal water for the purposes of snow making.

Blue Mountain

Blue Mountain operates under a variety of federal, provincial, and municipal laws and regulations. Land use development is regulated by Grey County and the Town of the Blue Mountains through their respective Official Plan and Zoning By-laws. Furthermore, development activities located along the Niagara Escarpment are regulated by the Niagara Escarpment Commission through the Niagara Escarpment Plan. In terms of environmental laws and regulations, the primary government ministries and agencies regulating Blue Mountain operations include the Ministry of the Environment, Ministry of Natural Resources, and local area conservation authorities, including Grey Sauble Conservation Authority and Nottawasaga Valley Conservation Authority. In terms of health and safety, Blue Mountain is regulated by the Ontario Ministry of Labour and the Workplace Safety and Insurance Board.

Non-potable water for snowmaking, golf course irrigation, and landscaping is sourced through a pipeline that connects the resort to Nottawasaga Bay, Georgian Bay and is supplied under a Permit to Take Water (PTTW), issued by the Ministry of the Environment. Permits and/or agreements with the Ministry of Transportation and Grey County permit us to locate our watermain under their respective road allowances. Blue Mountain's water supply system also includes a water intake pipe and pumphouse located on lands owned by the municipality in which Blue Mountain has a 30-year lease agreement that expires on May 31, 2024 (with a 30-year renewal option).

CMH

CMH operates on land tenures issued by the Province of British Columbia in extensive areas inside and outside parks and protected areas. Pursuant to British Columbia's Land Act, tenures are issued by the Ministry of Forests, Lands and Natural Resource Operations as Licences of Occupation or Leases outside park and protected areas, on lands designated as vacant Crown land. Pursuant to British Columbia's Park Act, tenures are issued, in the form of permits, by the same ministry.

Detailed management plans and maps are submitted as a foundation for the applications for tenures. The tenure applications are reviewed by the ministry and shared with a range of other government departments and public groups as referrals. They are also advertised in local newspapers for public comment. Applications must also be referred to local First Nations groups for comment. Most of the tenures that CMH holds are 30 years in length and are renewable at mid-term. CMH is required to renew or replace its tenure applications. While CMH has been able to renew its tenures several times in the past, the province retains the right not to renew all or a portion of the tenures for reasons of non-compliance, environmental protection or when the land is needed for what the province deems to be a "higher and better use."

Currently, CMH is the only helicopter accessed ski and hiking operator operating within its tenured land, although the province has the legal right to issue additional tenures for the same use. The land management environment in British Columbia is such that the tenured operating areas for CMH can and do overlap with a range of other activities, such as forest management, mining and mineral exploration, and public recreation.

Alpine Aerotech

Alpine Aerotech is subject to a variety of federal, provincial and local laws and regulations applicable in the field of manufacturing, maintenance and repair of airframe parts and engines.

Water

We rely on a supply of water to operate our ski areas for domestic use and snowmaking purposes. Availability of water depends on the existence of adequate water rights as well as physical delivery of the water when and where it is needed.

At our mountain resorts in Colorado, we own or have ownership or leasehold interests in water rights individually or through stock ownership in ditch and reservoir companies, groundwater wells and other sources. The primary source of snowmaking water for Steamboat is the Yampa River, in which we have adjudicated absolute water rights granting us access to water in accordance with those rights. The primary water source for Winter Park's snowmaking operations is the Vasquez Canal, which is part of the Denver Water Moffat Collection System located, in part, on the ski area, and owned and operated by the Water Department of the City and County of Denver ("Denver Water"). Through our leasehold interest in water rights obtained by acquisition of shares in the Clinton Ditch and Reservoir Company at

Table of Contents

its formation in 1992 and our subsequent agreements with other water users in the region, we obtained the right to use water from the Denver Water canal in sufficient amounts to support our snowmaking operations at Winter Park. At both of our Colorado resorts, base area water is obtained through municipal suppliers and on-mountain water needs are satisfied primarily from on-mountain wells for which adequate water rights are owned or obtained through leasehold arrangements. We believe we have rights to sufficient quantities of water for the operation of our mountain resorts for the foreseeable future.

Delivery of the snowmaking water to each resort typically comes from water diverted directly into the snowmaking system. The streams that deliver the water are subject to minimum stream flows, freezing and other limitations that may prevent or reduce the amount of water physically available to the resort. Other on-mountain water comes from wells from which water is pumped to on-site storage facilities where it is treated and then supplied to the various facilities where it will be used.

Intellectual Property

To protect the Company and our resorts as branded businesses with strong name recognition, we have registered trademarks in the United States, Canada and internationally. We also rely on a combination of trademark licenses and other contracts, both as licensee and licensor of third party trademarks, as well as common law trademark and trade name rights. Third party policies governing reporting of unauthorized use of trademarks also assist in the protection of our trademark rights. The duration of our trademark registrations varies from country to country; however, trademarks are generally valid and may be renewed indefinitely as long as they are in use and/or their registrations are properly maintained.

Monitoring the unauthorized use of our intellectual property is difficult, and the steps we have taken, including sending demand letters and taking actions against third parties, may not prevent unauthorized use by others in all instances. The failure to adequately build, maintain and enforce our trademark portfolio could impair the strength of our brands.

Employees

Given the seasonal nature of our business, the number of people that we employ varies considerably throughout the fiscal year. We employ significantly more people during the peak ski season than during the summer season. During the peak 2015/2016 ski season, we had approximately 10,900 employees, approximately 2,850 of whom were employed on a full-time basis. As of June 30, 2016, we had approximately 5,350 employees, approximately 2,850 of whom were employed on a full-time basis.

As of June 30, 2016, approximately 200 of Tremblant's year-round employees and the majority of its additional seasonal employees were members of the union Le Syndicat Des Travailleurs(euses) de La Station du Mont Tremblant (CSN). The current contract with the union was recently renegotiated and a five-year agreement was signed in January 2016, and is set to expire in October 2020. In addition, approximately 70 ski patrol employees at Steamboat are members of the Communication Workers of America / Steamboat Professional Ski Patrol Association. In December 2015, the parties approved a new contract with the union, which expired on September 1, 2016. We are currently negotiating a new contract with the union and do not believe it will have a significant impact on our operations at Steamboat during the upcoming 2016/2017 ski season. Other than as noted above, none of our employees are covered by a collective bargaining agreement.

We consider our relations with our employees to be good.

Information about Segment and Geographic Revenue

Information about segment and geographic revenue is set forth in Part II- Item 8, Financial Statements and Supplementary Data, Note 17, "Segment Information".

Corporate Information

Our website can be accessed at <http://www.intrawest.com>. The website contains information about us and our operations. Our principal executive offices are located at 1621 18th Street, Suite 300, Denver, Colorado 80202. Our telephone number is (303) 749-8200. The information posted on or accessible through our website is not incorporated by reference into and does not form a part of this Annual Report on Form 10-K.

Available Information

We file or furnish periodic reports and amendments thereto, including our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, proxy statements and other information with the Securities and Exchange Commission ("SEC"). Such reports, amendments, proxy statements and other information may be obtained by visiting the Public Reference Room of the SEC at 100 F Street, NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room can be obtained by calling the

Table of Contents

SEC at 1-800-SEC-0330. In addition, the SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically. Our reports, amendments thereto, proxy statements and other information are also made available, free of charge, on the investor relations section of our website at <http://ir.intrawest.com> as soon as reasonably practicable after we electronically file or furnish such information with the SEC. The information posted on or accessible through our website is not incorporated by reference into and does not form a part of this Annual Report on Form 10-K.

Table of Contents

ITEM 1A. RISK FACTORS.

Our operations and financial results are subject to various risks and uncertainties that could adversely affect our financial position, results of operations and cash flows. The risks described below should be carefully considered together with the other information contained in this report.

Risks Related to Our Business

Our industry is sensitive to weakness in the economy and we are subject to risks associated with the overall leisure industry.

If economic conditions in the United States and Canada or elsewhere in the world were to weaken, including high unemployment and erosion of consumer confidence, it could have a material adverse effect on our industry. We provide skiing and mountain adventure experiences with a relatively high cost of participation. An economic downturn or weak economic conditions generally could reduce consumer spending on recreational activities, resulting in declines in visits to, and spending at, our mountain resorts and CMH, which could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. In addition, we may be unable to increase the price of our lift products or other offerings during an economic downturn despite our history of being successful in raising such prices under a variety of economic conditions.

Leisure and business travel are particularly susceptible to various factors outside of our control, including terrorism, the uncertainty of military conflicts, outbreaks of contagious diseases and the cost and availability of travel options.

Our business is sensitive to the willingness of our guests to travel. Acts of terrorism, the spread of contagious diseases, political events and developments in military conflicts in areas of the world from which we draw our guests could depress the public's propensity to travel and cause severe disruptions in both domestic and international air travel and consumer discretionary spending, which could reduce the number of visitors to our resorts and have an adverse effect on our results of operations and cash flows. Many of our guests travel by air and the impact of higher prices for commercial airline services and availability of air services could cause a decrease in visitation to our resorts. A significant portion of our guests also travel by vehicle and higher gasoline prices could adversely impact our guests' willingness to travel to our resorts. Higher cost of travel may also affect the amount that guests are willing to spend at our resorts and could negatively impact our revenue, particularly for ancillary services.

Our industry is vulnerable to lack of adequate snowfall or unseasonable weather conditions.

The ability to attract winter customers to mountain resorts is influenced by adequate snowfall and weather conditions. Warm weather may result in rain, snow melt and inadequate natural snowfall and may render snowmaking wholly or partially ineffective in maintaining skiing conditions. For example, the Eastern United States 2015/2016 ski season was marked by some of the warmest temperatures in the past 100 years and we experienced a decline in skier visits during the 2015/2016 ski season compared to prior years. Conversely, extreme weather conditions may adversely affect the customer experience or result in lift closures and may also make it difficult for customers to access mountain resorts. The early season snow conditions and skier perceptions of early season snow conditions influence the momentum and success of the overall ski season, including advance sales of season passes and frequency pass products at our mountain resorts. Although helicopter accessed skiing is less susceptible to customer fluctuations due to weather conditions than our mountain resorts, as most helicopter accessed skiing customers book their visits significantly in advance of the ski season, CMH remains susceptible to risks related to inclement weather because we provide customers with credits, which may be used during future seasons, if weather conditions prevent customers from reaching the guaranteed amount of vertical feet of skiing. As a result, inclement weather at our CMH sites during

any given ski season may materially adversely affect our CMH results of operations. In addition, unseasonable weather or rain can adversely affect summer visits to our mountain resorts and helicopter accessed hiking sites.

Additionally, there is a growing political and scientific consensus that emissions of greenhouse gases continue to alter the composition of the global atmosphere in ways that are affecting and are expected to continue affecting the global climate. The effects of climate change, including any impact of global warming, could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Table of Contents

Our business is highly seasonal and the occurrence of adverse events during our peak periods could have a material adverse effect on our results of operations and cash flows.

Although we operate four-season resorts, we generate the vast majority of our revenue during our third fiscal quarter, which is the peak ski season, followed by the second fiscal quarter. As a result of the seasonality of our business, many of our mountain resorts and CMH typically experience operating losses during the first and fourth fiscal quarters of each fiscal year. In addition, throughout our peak quarters, we generate the highest daily revenue on weekends, during the Christmas/New Year's and Presidents' Day holiday periods and, in the case of our mountain resorts, during school spring breaks. Furthermore, we sell a significant portion of our season pass products, pre-sold destination packages and CMH trips during our first fiscal quarter and the first month of our second fiscal quarter. The seasonality of our revenue and our dependence on peak operating and selling periods increases the impact of certain events on our results of operations. The occurrence of any of the other risk factors discussed herein during these peak operating or selling periods could have a disproportionate and material adverse effect on our results of operations and cash flows.

Variations in the timing of peak holidays and weekends may affect the comparability of our results of operations.

Depending on how peak holidays and weekends fall on the calendar, in any given year we may have more or fewer peak holidays and weekends in any given fiscal quarter compared to prior years, with a corresponding difference in a preceding or subsequent fiscal quarter. These differences can result in material differences in our quarterly results of operations and affect the comparability of our quarterly results of operations from one fiscal year to the next.

We are vulnerable to the risk of natural disasters, including forest fires, avalanches, landslides, drought and hurricanes.

A severe natural disaster, such as a forest fire, avalanche, landslide, drought or hurricane, may not be fully covered by our insurance policies and may interrupt our operations, require evacuations, severely damage our properties and impede access to our properties in affected areas, any of which could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. In addition, our ability to attract customers to our properties is influenced by the aesthetics and natural beauty of the outdoor environment where our properties are located. In the recent past, the combination of drought conditions and a pine-beetle epidemic led to an increase in forest fires in the Western United States, including Colorado. A severe forest fire or other natural disaster could damage our properties or surrounding areas and have a long-term negative impact on customer visitation, as it would take several years for the environment to recover. Our insurance policies may not cover lost revenue due to a decline in visitation caused by damage to our properties or surrounding areas.

There is a risk of accidents occurring at our mountain resorts or competing mountain resorts, which may reduce visitation and negatively impact our operations.

Our ability to attract and retain guests depends, in part, upon the external perceptions of the Company and the industry, the quality and safety of our resorts, services and activities, including summer activities, and our corporate and management integrity. While we maintain and promote an on-mountain safety program, there are inherent risks associated with our resort activities. An accident or injury at any of our resorts or at resorts operated by our competitors, particularly an accident or injury involving the safety of guests and employees that receives media attention, could negatively impact our brand or reputation, cause loss of consumer confidence in the Company, reduce visitation at our resorts, and negatively impact our results of operations. The considerable expansion in the use of social media over recent years has compounded the impact of negative publicity. If any such incident occurs during a time of high seasonal demand, the effect could disproportionately impact our results of operations in a fiscal year.

Table of Contents

A disruption in our water supply would impact our snowmaking capabilities and operations.

Our operations are heavily dependent upon our access to adequate supplies of water to make snow and otherwise conduct our operations. Availability of adequate supplies of water depends on the existence of adequate water rights as well as physical delivery of the water when and where it is needed. Additionally, our mountain resorts are subject to federal, state, provincial and local laws and regulations relating to water rights. Changes in these laws and regulations may adversely affect our operations. In addition, drought conditions may adversely affect our water supply. At our mountain resorts in Colorado, we own or have ownership or leasehold interests in water rights individually or through stock ownership in ditch and reservoir companies, groundwater wells and other sources, and the availability of water through these sources is subject to change. In addition, in recent years the USFS had sought to obtain ownership of certain water rights owned by ski resorts located on USFS land. However, on December 23, 2015, following significant opposition by ski areas, the USFS issued a Final Directive abandoning this position and approving new ski area permit terms that do not require ski resorts to transfer water rights to the federal government as a condition of operating on public land, but focus instead on requiring ski areas to, among other things, (i) demonstrate that they have sufficient water to sustain their operations (which Winter Park has established and we expect Steamboat to also establish) and (ii) offer their water rights of whatever kind they may have to a proposed successor operator of the ski area. This new water provision is included in a new Special Use Permit that was issued for the Winter Park resort on April 28, 2016 and is expected to be included in all other ski area special use permits for use of National Forest lands in the future. Notwithstanding the foregoing, USFS policies are subject to review and change over time, and a significant change in law or policy, or actions by permit administrators under the current policy, that interfere with our access to adequate supplies of water to support our current operations or an expansion of our operations could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

We face significant competition.

Our mountain resorts directly compete with other resorts in their respective local and regional markets, as well as with other major destination resorts and non-ski vacation options. We also compete with other large resort operators for the sale of multi-mountain passes. Competition within the ski resort industry is based on multiple factors, including location, price, weather conditions, the uniqueness and perceived quality of the terrain for various levels of skill and ability, the atmosphere of the base village, the quality of food and entertainment and ease of travel to the resort (including direct flights by major airlines). In our Adventure segment, we face competition from heli-skiing and snowcat operators in Canada and the United States. Our ancillary aviation businesses face increasing competition from small independent operators that have certain advantages, including an ability to bid on certain government contracts that are allocated to small businesses. Within our Real Estate segment, our managed properties compete with rental management companies, locally-owned independent hotels, as well as facilities and timeshare companies that are owned or managed by national and international chains. These properties also compete for convention and conference business across the North American market. Competition within the hotel and lodging industry is generally based on quality and consistency of rooms, restaurants and meeting facilities and services, attractiveness of locations, availability of a global distribution system, price and other factors. Our competitors may have access to greater financial, marketing and other resources and may have access to financing on more attractive terms than us. As a result, they may be able to devote more resources to improving and marketing their offerings or more readily take advantage of acquisitions or other opportunities. If we are unable to compete successfully, our business, prospects, financial condition, results of operations and cash flows will be materially adversely affected.

We are not the sole property manager at our resorts.

We manage a significant portion of the lodging rooms available at our resorts and manage rental properties. We cannot require individuals who purchased condominiums in our U.S. developments to use our rental management

services and, in recent years, third-party services that assist condominium owners in leasing their units without our involvement have become more prevalent. As a result, we have experienced a decline in the number of condominium owners using our rental management services.

In addition, since we are not involved in transactions where the condominium owner uses a third-party manager, we are unable to control the quality of the leased units or the customer experience. If customers are unsatisfied, the reputation of the entire development, including units we manage, may be harmed, as most customers do not distinguish between units managed by us and units managed by third parties. If a development's reputation for a positive customer experience deteriorates, it may become more challenging for us to attract customers to these developments. A decline in customers at a development located at one of our mountain resorts may also lead to a decline in revenue throughout the resort's business.

Table of Contents

We operate on government land pursuant to the terms of governmental permits that may be revoked or not renewed.

We do not own all of the land on which we conduct our operations. Certain of our mountain resorts and CMH operate on federal or Crown land or land owned by other governmental entities pursuant to the terms of governmental permits, leases or other agreements. In many cases, the permits, leases or other agreements give the applicable agency, including the USFS, the right to review and comment on the construction of improvements in the applicable area and on certain other operational matters. Certain permits, leases or other agreements may also be terminated or modified by the applicable agency for specific reasons or in the event we fail to perform our obligations under the applicable permits, leases or other agreements. In addition, the permits, leases or other agreements may not be renewed. A termination or modification of any of our permits, leases or other agreements could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. Finally, British Columbia may issue additional permits or licences to third parties related to the land on which CMH operates, and such additional permits and licences may deteriorate the heli-skiing experience at CMH and increase competition.

Our operations are subject to extensive laws, rules, regulations and policies administered by various federal, state, provincial and other governmental authorities.

Our operations are subject to a variety of federal, state, provincial and local laws and regulations, including those relating to lift operations, emissions to the air, discharges to water, storage, treatment and disposal of fuel, water and waste, land use, remediation of contaminated sites and protection of the environment, natural resources and wildlife. For example, future expansions of certain of our U.S. mountain facilities must comply with applicable forest plans approved under the National Forest Management Act, federal, state and foreign wildlife protection laws or local zoning requirements. In addition, most projects to improve, upgrade or expand our ski areas are subject to environmental review under the NEPA. The NEPA requires the Forest Service, or other governmental entities, to study any proposal for potential environmental impacts and include various alternatives in its analysis. Our ski area improvement proposals may not be approved or may be approved with modifications that substantially increase the cost or decrease the desirability of implementing the project.

We are also subject to worker health and safety laws and regulations. From time to time our operations are subject to inspections by environmental regulators or other regulatory agencies and we may be required to undertake certain remediation activities, including in connection with the onsite use and storage of chemicals and petroleum products that may result in spills or releases. Although to date the costs associated with remediation activities have been immaterial, we may be required to incur material remediation costs in the future. Our efforts to comply with applicable laws and regulations do not eliminate the risk that we may be held liable for breaches of these laws and regulations, which may result in fines and penalties or subject us to claims for damages. Liability for any fines, penalties, damages or remediation costs, or changes in applicable laws or regulations, could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

We are dependent on significant infrastructure and our business and growth plans are capital intensive.

We must regularly expend capital to construct, maintain and renovate our properties in order to remain competitive, maintain the safety, value and brand standards of our properties and comply with applicable laws and regulations. Our infrastructure and equipment, including lifts and helicopters, are costly to maintain, repair and replace and are susceptible to unscheduled maintenance. Much of our infrastructure and equipment will eventually need to be replaced or significantly repaired or modernized, which could result in interruptions to our business. We cannot always predict where capital will need to be expended in a given fiscal year and capital expenditures can increase due to forces beyond our control. In certain cases, the cost of infrastructure or equipment repair or replacement may not be justified by the revenue at the applicable property. As a result, we may close a property, or reduce its offerings, if we determine that it is not cost efficient to replace, maintain or repair our infrastructure and equipment at the property.

We also plan to grow through investments in our revenue-generating infrastructure and acquisitions. We cannot be certain that we will have enough capital or that we will be able to raise capital by issuing equity or debt securities or through other financing methods on reasonable terms, if at all, to execute our business plan. A lack of available funds for capital expenditures could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

In addition, our ability to construct, maintain and renovate our properties is subject to a number of risks, including:

- construction delays or cost overruns, including those related to labor and materials;
- the requirement to obtain zoning, occupancy and other required permits or authorizations;
- governmental restrictions on the size or kind of development;
- force majeure events, including forest fires, avalanches, landslides, drought or hurricanes;

Table of Contents

- design defects; and
- environmental concerns.

If we are not able to complete capital projects on schedule, or if our investments fail to improve the properties in the manner that we expect, our ability to compete effectively would be diminished and our business, prospects, financial condition, results of operations and cash flows could be materially adversely affected.

Our future strategic alliance, acquisitions or other growth opportunities may not be successful.

We evaluate strategic alliance and acquisition opportunities both domestically and internationally where the opportunity would provide a strategic fit within our existing portfolio of businesses and we may actively pursue such opportunities from time to time, some of which could be significant. In addition, we intend to evaluate “capital light” opportunities, such as managing third-party resort assets and entering into real estate development partnerships. We cannot predict whether we will realize all of the anticipated benefits and synergies from businesses we acquire. We may also underestimate the resources and costs required to integrate acquired operations and we may be unable to predict the impact any acquisition will have on our future results of operations. The integration process is inherently unpredictable and subject to delay and unexpected costs.

Acquisitions involve significant risks, including:

- our potential over-valuation of acquired companies, properties or assets;
- delays in realizing or a failure to realize the benefits, revenue, cost savings and synergies that we anticipate;
- failure to retain key personnel or business relationships and maintain the reputation of the acquired company, property or asset;
- the potential impairment of acquired assets;
- insufficient, or no, indemnification for legal liabilities;
- the assumption of known or unknown liabilities and additional risks of the acquired businesses or properties, including environmental liabilities; and
- operating difficulties that require significant financial and managerial resources that would otherwise be available for the ongoing development or expansion of our existing operations.

We may not be able to obtain financing for acquisitions or other transactions on attractive terms, or at all, and the ability to obtain financing may be restricted by the terms of our outstanding indebtedness or other indebtedness we may incur. In addition, our competitors may be able to obtain financing on more attractive terms than us.

Steamboat is highly dependent on contracted direct air service from major hub airports.

A significant portion of Steamboat’s destination customers fly directly from large hub airports to the Yampa Valley Regional Airport, which is approximately 25 miles from the resort. Each ski season, we enter into agreements with major airlines to fly these routes and provide the airlines with subsidies if passenger volume falls below certain pre-established levels. If the routes prove unprofitable to the airlines and any of these airlines decides to stop service to this airport, Steamboat’s skier visits could be materially adversely affected.

We rely on information technology to operate our businesses and maintain our competitiveness, and any failure to adapt to technological developments or industry trends could harm our business.

We depend on the use of information technology and systems, including technology and systems used for reservations, point of sale, e-commerce, accounting, procurement, administration and technologies we make available to our customers. We are currently in the process of updating or replacing many of these systems. Delays or difficulties in implementing these new or enhanced systems may prevent us from achieving the desired results in a timely manner or at all. Additionally, we may face attempts by others to gain unauthorized access through the Internet to our information technology and systems, to intentionally hack, interfere with or cause physical or digital damage to or failure of such systems (such as significant viruses or worms), which attempts we may be unable to prevent. We could be unaware of an incident or its magnitude and effects until after it is too late to prevent it and the damage it may cause. We have experienced minor outages in the past. Any future interruptions, outages or delays in our systems, or deterioration in their performance, could impair our ability to process transactions and could decrease the quality of service that we offer to our customers.

Table of Contents

Our future success depends on our ability to adapt our infrastructure to meet rapidly evolving consumer trends and demands and to respond to competitive service and product offerings. The failure to adopt new technologies and systems in the future may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Non-compliance with Payment Card Industry Data Security Standards (“PCI DSS”) may subject us to fines, penalties and civil liability.

We are subject to compliance with PCI DSS, an information security standard for organizations that handle cardholder information from major debit and credit card companies. Currently, we are generally compliant within our applicable PCI DSS merchant level and its requisite criteria; however, our level and the requisite criteria are subject to change. We continue to take steps to improve our PCI DSS compliance, but our efforts may result in significant expenses and failure to fully comply with PCI DSS may subject us to fines, penalties and civil liability, and other potential enforcement actions, and may result in the loss of our ability to accept debit and credit card payments or prohibit us from processing transactions through American Express, MasterCard, VISA and other card and payment networks. Even if we are compliant with PCI DSS or other applicable standards, we still may not be able to prevent security breaches involving customer transaction data, though we have taken steps to diminish this risk.

Failure to maintain the integrity of customer or employee data or to use data properly could result in damage to our reputation and subject us to fines, penalties and civil liability.

We collect and store personally identifiable information from customers and employees in the course of doing business and use it for a variety of business purposes, including marketing to our customers through various forms of media. State, provincial and federal governments have enacted laws and regulations to protect consumers and employees against unwanted communications and identity theft, including laws governing treatment of personally identifiable information. The regulatory environment and increased threats to the data we store has increased our costs of doing business. Additionally, the regulatory environment, as well as the requirements imposed on us by the payment card industry, governing information, security and privacy laws are increasingly demanding and continue to evolve and, on occasion, may be inconsistent from one jurisdiction to another. Any failure on our part to implement appropriate safeguards or to detect and provide prompt notice of breaches or unauthorized access as required by applicable laws, or failure on our part to comply with applicable laws regarding consent to consumer communications, could result in damage to our reputation, early termination of our contracts, increased processing fees, litigation or regulatory investigations, or subject us to fines, penalties and civil liabilities. If we are required to pay any significant amounts in satisfaction of claims under these laws, or if we are forced to cease our business operations for any length of time as a result of our inability to comply fully with any such law, our business, prospects, financial condition, results of operations and cash flows may be materially adversely affected.

Despite our efforts, information networks and systems are vulnerable to service interruptions or to security breaches from inadvertent or intentional actions by our employees or vendors, or from attacks by malicious third parties. In recent years, there has been a rise in the number of sophisticated cyber-attacks on network and information systems, and as a result, the risks associated with such an event continue to increase. Although we have taken, and continue to take steps to address these concerns by implementing network security and internal controls, there can be no assurance that a system interruption, security breach or unauthorized access will not occur. Any such interruption, breach or unauthorized access to our network or systems could adversely affect our business operations and/or result in the loss of critical or sensitive confidential information or intellectual property, and could result in financial, legal, business and reputational harm to us.

Our business depends on the quality and reputation of our brands, and any deterioration in the quality or reputation of our brands could have an adverse impact on our business.

A negative public image or other adverse events could affect the reputation of one or more of our mountain resorts and other businesses or more generally impact the reputation of our company. If the reputation or perceived quality of our brands declines, our business, prospects, financial condition, results of operations and cash flows could be materially adversely affected. The unauthorized use of our trademarks could also diminish the value of our brands and their market acceptance, competitive advantages or goodwill, which could adversely affect our business. In addition, a negative public image or other adverse event occurring in an industry where we operate or a related industry may harm our reputation even if such image or event does not directly relate to our brands or business.

We are subject to risks related to currency fluctuations.

We present our financial statements in United States dollars ("USD"). Our operating results are sensitive to fluctuations in foreign currency exchange rates, as a significant portion of our revenue and operating expenses are transacted in Canadian dollars. During fiscal 2016, total Canadian dollar denominated revenue comprised approximately 41% of our total revenue. Any negative impact on revenue would be naturally hedged, in part, by our Canadian dollar denominated operating expenses. A significant fluctuation in the Canada/U.S. exchange rate could therefore have a significant impact on our results of operations after translating our Canadian operations into United States dollars. See Part II-Item 7A., Quantitative and Qualitative Disclosures About Market Risk, "Foreign Currency Fluctuations".

Table of Contents

Currency variations can also contribute to variations in sales at our Canadian mountain resorts and CMH because volatility in foreign exchange rates can impact our customers' willingness to purchase lift passes or CMH packages. For example, an increase in the value of the Canadian dollar compared to the United States dollar or euro may make our CMH packages less attractive to American and European skiers, respectively.

Certain circumstances may exist whereby our insurance coverage may not cover all possible losses and we may not be able to renew our insurance policies on favorable terms, or at all.

Although we maintain various property and casualty insurance policies and undertake safety and loss prevention programs to address certain risks, our insurance policies do not cover all types of losses and liabilities and in some cases may not be sufficient to cover the ultimate cost of claims which exceed policy limits. If we are held liable for amounts exceeding the limits of our insurance coverage or for claims outside the scope of our coverage, our business, prospects, financial condition, results of operations and cash flows could be materially adversely affected.

In addition, we may not be able to renew our current insurance policies on favorable terms, or at all. Our ability to obtain future insurance coverage at commercially reasonable rates could be materially adversely affected if we or other companies within or outside our industry sustain significant losses or make significant insurance claims.

We are subject to litigation in the ordinary course of business and related to our legacy real estate development activities.

We are involved in various lawsuits and claims that may include, among other things, claims or litigation relating to personal injury and wrongful death, allegations of violations of laws and regulations relating to our real estate activities, labor and employment, intellectual property and environmental matters, and commercial contract disputes. For example, we are, from time to time, subject to various lawsuits and claims related to injuries occurring at our properties, including due to the use, operation or maintenance of our trails, lifts, aircraft and other facilities.

In addition, we are a defendant in lawsuits related to our pre-2010 legacy real estate development and sales activities, including claims related to alleged construction defects and alleged violations of state and federal laws that require providing purchasers with certain mandated disclosures. Any such claims, regardless of merit, are time consuming and expensive to defend and could divert management's attention and resources and may materially adversely affect our reputation, even if resolved in our favor. Accordingly, the outcome or existence of current or future litigation may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

If we do not retain our key personnel, our business may suffer.

The success of our business is heavily dependent on the leadership of key management personnel, including our senior executive officers. If any of these persons were to leave, it could be difficult to replace them, and our business could be harmed. We do not maintain "key-man" life insurance on any of our employees.

We depend on a seasonal workforce.

We recruit year-round to fill thousands of seasonal positions. Because much of this hiring is done months in advance of the start of the applicable season, we may not be able to accurately predict our staffing needs. In addition, we may not be able to recruit and hire adequate seasonal personnel or hire such personnel at costs consistent with our costs in prior years. This risk is heightened in periods of economic strength, as the market for seasonal labor may become more competitive.

We are subject to risks associated with our workforce.

We are subject to various federal, state and provincial laws governing matters such as minimum wage requirements, overtime compensation and other working conditions, citizenship requirements, discrimination and family and medical leave. Changes to any of these laws, including, but not limited to, further potential increases in state and federally mandated minimum wages, could significantly impact our labor costs. Our operations in Canada are also subject to laws that may require us to make severance or other payments to employees upon their termination.

Immigration law reform could also impact our workforce because we recruit and hire foreign nationals as part of our seasonal workforce. If our labor-related expenses increase, our operating expenses would increase and our business, financial condition and results of operations could be harmed.

From time to time, we have also experienced non-union employees attempting to unionize. While only a small portion of our employees are unionized at present, we may experience additional union activity in the future. In addition, future legislation could make it easier

Table of Contents

for unions to organize and obtain collectively bargained benefits, which could increase our operating expenses and negatively affect our business, prospects, financial condition, results of operations and cash flows.

We may be requested to contribute capital to entities in which we own a minority interest, which would reduce our liquidity or dilute our ownership interest.

We own non-controlling interests in several entities, as well as a controlling 20% interest in Alpine Helicopters. From time to time we may need to contribute capital to one or more of these entities to preserve the value of our investment or for other reasons. Historically, we have made contributions to entities in which we own a minority interest and may make additional contributions in future periods. In addition, from time to time we contribute funds to legacy development partnerships to defend claims against those entities to avoid having default judgments entered which could then potentially be asserted against us. In fiscal 2016, we contributed \$0.6 million to these legacy development partnerships. These contributions reduce our cash available for operations and growth initiatives.

Our real estate development strategy may not be successful.

Our real estate development activities are focused on designing strategies for the development of the land surrounding the base areas of our mountain resorts. Prior to 2010, we were actively engaged in the development of residential real estate, primarily in the United States and Canada. Since 2010, our real estate development activities have been limited to the preservation of core development parcels located at our resorts and, more recently, designing strategies for the future development of this land. Our ability to implement any of these strategies and realize the anticipated benefits of future real estate development projects is subject to a number of risks, including:

• lack of improvement, or deterioration, in real estate markets;

• difficulty in selling units or the ability of buyers to obtain necessary funds to close on units;

• escalation in construction costs due to price increases in commodities, unforeseen conditions, cost of insurance, inadequate designs or other causes;

• work stoppages and inadequate internal resources to manage projects;

• shortages in building materials;

• difficulty in financing real estate development projects; and

• difficulty in receiving necessary regulatory approvals.

If these projects are not implemented, in addition to not realizing intended profits from the real estate developments and sales from ancillary products, our customers may choose to go to other resorts that they perceive to have better residential offerings, which could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. In addition, even if we increase the number of units or beds at our mountain resorts, the projects may not be successful and we may be unable to realize incremental visitor growth or profits.

CMH is dependent on Alpine Helicopters.

In January 2013, we restructured our Alpine Helicopters business to comply with Canadian foreign ownership regulations governing aviation flight services in Canada. The restructuring involved the formation of a new flight

services company, Alpine Helicopters. Alpine Helicopters is a variable interest entity for which the Company is the primary beneficiary and is consolidated in the consolidated financial statements. We own a 20% equity interest in Alpine Helicopters and the remaining 80% equity interest is held in trust for the benefit of the management and employees of Alpine Helicopters, including the pilots and crew members that support our helicopter operations, and is reflected as a non-controlling interest in the consolidated financial statements.

Alpine Helicopters employs all the pilots who fly the helicopters in the CMH land tenures. As a result of its reliance on Alpine Helicopters, CMH's business and operations would be negatively affected if Alpine Helicopters were to experience significant disruption affecting its ability to provide helicopter services to CMH. The partial or complete loss of Alpine Helicopter's services, or a significant adverse change in our relationship with Alpine Helicopters, could result in lost revenue and added costs and harm the image and reputation of CMH as well as negatively impact the CMH customer experience.

Table of Contents

We have underfunded pension obligations.

As of June 30, 2016, we had underfunded pension plan liabilities in frozen pension plans in the amount of \$33.6 million. Significant changes in the market values of the investments held to fund the pension obligations or a change in the discount rate used to measure these pension obligations may result in a significant increase or decrease in the valuation of these pension obligations, and these changes may affect the net periodic pension cost in the year the change is made and in subsequent years. We may not generate sufficient cash flow to satisfy these obligations. Any inability to satisfy these pension obligations could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

We may not be able to fully utilize our net operating loss carryforwards.

We have recorded a full valuation allowance against these net operating loss carryforwards because we believe that uncertainty exists with respect to the future realization of the loss carryforwards. Additionally, the amount of the loss carryforwards that will be available in future periods could change in the event of adjustments related to audits by the relevant tax authorities for open years. A portion of these loss carryforwards has been reduced as a result of the Restructuring. To the extent available, we intend to use these net operating loss carryforwards to offset future taxable income associated with our operations. There can be no assurance that we will generate sufficient taxable income in the carryforward period to utilize any remaining loss carryforwards before they expire.

In addition, Section 382 and related provisions of the Internal Revenue Code of 1986, as amended (the "Code"), contain rules that limit for U.S. federal income tax purposes the ability of a company that undergoes an "ownership change" to utilize its net operating losses and certain other tax attributes existing as of the date of such ownership change. Under these rules, such an ownership change is generally an increase in ownership by one or more "five percent shareholders," within the meaning of Section 382 of the Code, of more than 50% of a company's stock, directly or indirectly, within a rolling three-year period. If we undergo one or more ownership changes within the meaning of Section 382 of the Code, or if one has already occurred, our net operating losses and certain other tax attributes existing as of the date of each ownership change may be unavailable, in whole or in part, to offset our income and/or reduce or defer our future taxable income associated with our operations, which could have a negative effect on our financial results. While we believe that we have not undergone such an ownership change as of the date hereof, because such an event is outside of our control, no assurance can be given that an ownership change has not already occurred or that future transactions will not result in an ownership change. Any future offerings of equity securities by us or sales of common stock by entities managed or controlled by Fortress Investment Group, LLC (collectively "Fortress") would increase the likelihood that we undergo an "ownership change" within the meaning of Section 382 of the Code. If an ownership change occurs, the annual utilization of our net operating loss carryforwards and certain other tax attributes may be materially and adversely affected. Our ability to raise future capital by issuing common stock without causing an ownership change may be materially limited.

If we are unable to implement and maintain effective internal control over financial reporting in the future, investors may lose confidence in the accuracy and completeness of our financial reports and the trading price of our common stock may be negatively affected.

We are required to maintain internal control over financial reporting and to report any material weaknesses in such internal controls. We are also required, under Section 404 of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), to furnish a report by management on, among other things, the effectiveness of our internal control over financial reporting. This assessment includes disclosure of any material weaknesses identified by our management in our internal control over financial reporting. Section 404 of the Sarbanes-Oxley Act also generally requires an attestation from our independent registered public accounting firm on the effectiveness of our internal control over financial reporting. However, for as long as we remain an emerging growth company as defined in the JOBS Act, we

intend to take advantage of the exemption permitting us not to comply with the independent registered public accounting firm attestation requirement. Our compliance with Section 404 of the Sarbanes-Oxley Act will require that we incur substantial accounting expense and expend significant management efforts. If we fail to fully implement the requirements of Section 404 of the Sarbanes-Oxley Act in a timely manner, we may be subject to sanctions or investigations by regulatory authorities, including the SEC and the NYSE. Furthermore, if we are unable to conclude that our internal control over financial reporting is effective, we could lose investor confidence in the accuracy and completeness of our financial reports, the market price of our common stock could decline, and we could be subject to sanctions or investigations by regulatory authorities, including the SEC and the NYSE. Failure to remedy any material weakness in our internal control over financial reporting, or to implement or maintain other effective control systems required of public companies, could also restrict our future access to the capital markets.

Table of Contents

Risks Related to Our Organization and Capital Structure

Ownership of our common stock is highly concentrated and Fortress maintains a right to nominate up to a majority, plus two, of our directors, which may prevent stockholders from influencing significant corporate decisions and may result in conflicts of interest.

Fortress beneficially owns approximately 68.0% of our outstanding common stock. As a result, Fortress will beneficially own shares sufficient for the majority vote over all matters requiring a stockholder vote, including:

- the election of directors;
- mergers, consolidations and acquisitions;
- the sale of all or substantially all of our assets and other decisions affecting our capital structure;
- the amendment of our certificate of incorporation and our bylaws; and
- our winding up and dissolution.

In addition, pursuant to the stockholders' agreement with Fortress, Fortress may designate directors for nomination and election to our board of directors. Pursuant to these provisions, Fortress has the ability to appoint up to a majority of the members of our board of directors, plus two directors, for so long as Fortress beneficially owns, directly or indirectly, at least 30% of our issued and outstanding common stock and certain other conditions are met.

This concentration of ownership may delay, deter or prevent acts that would be favored by our other stockholders. The interests of Fortress may not always coincide with our interests or the interests of our other stockholders. Also, Fortress may seek to cause us to take courses of action that, in its judgment, could enhance its investment in us, but which might involve risks to our other stockholders or adversely affect us or our other stockholders. As a result, the market price of our common stock could decline or stockholders might not receive a premium over the then-current market price of our common stock upon a change in control. In addition, this concentration of share ownership and the ability of Fortress to appoint up to a majority of the members of our board of directors, plus two directors, may adversely affect the trading price of our common stock because investors may perceive disadvantages in owning shares in a company with significant stockholders.

We do not anticipate paying dividends on our common stock.

Any declaration and payment of future dividends to holders of our common stock will be at the discretion of our board of directors in accordance with applicable law after taking into account various factors, including our financial condition, our operating results, our current and anticipated cash needs, the impact on our effective tax rate, our indebtedness, legal requirements and other factors that our board of directors deems relevant. Our debt agreements limit our ability to pay dividends.

Because we are a holding company, our ability to pay cash dividends on our common stock will depend on the receipt of dividends or other distributions from our subsidiaries. Under Delaware law, dividends may be payable only out of surplus, which is calculated as our net assets less our capital, or, if we have no surplus, out of our net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. Until such time that we pay a dividend, our investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment.

Future offerings of equity securities by us or sales of our common stock by Fortress may adversely affect us.

In the future, we may issue additional shares of our common stock or other equity securities in connection with financing transactions, our incentive plans or acquisitions. Issuing additional shares of our common stock or other equity securities or securities convertible into equity may dilute the economic and voting rights of our existing stockholders or reduce the market price of our common stock or both. Preferred shares, if issued, could have a preference with respect to liquidating distributions or a preference with respect to dividend payments that could limit our ability to pay dividends to the holders of our common stock. Holders of our common stock bear the risk that our future offerings may reduce the market price of our common stock and dilute their ownership of us.

Table of Contents

In addition, any issuances of stock by us or sales of stock by Fortress would increase the likelihood that we undergo, or may cause, an “ownership change” within the meaning of Section 382 of the Code. If we undergo one or more ownership changes within the meaning of Section 382 of the Code, our net operating losses and certain other tax attributes existing as of the date of each ownership change may be unavailable, in whole or in part, to offset our income and/or reduce or defer our future taxable income associated with our operations, which could have a negative effect on our liquidity. No assurance can be given that any such stock issuance or sale will not cause us to undergo an ownership change within the meaning of Section 382 of the Code. The interests of Fortress may differ from our interests or the interests of our other stockholders and Fortress may decide to sell shares of stock even if such sale would not be favorable to us or our other stockholders or would result in us undergoing an “ownership change” within the meaning of Section 382 of the Code.

We are a party to various joint purchasing agreements with Fortress that enable us to purchase some goods and services used in the normal course of business at reduced or discounted rates. If we were to undergo an ownership change, it may cause us to need to renegotiate purchasing agreements that may result in increased prices on goods and services acquired.

Certain provisions of the stockholders' agreement, our restated certificate of incorporation and our amended and restated bylaws could hinder, delay or prevent a change in control of us, which could adversely affect the price of our common stock.

Our stockholders' agreement with Fortress, our restated certificate of incorporation and our amended and restated bylaws contain provisions that could make it more difficult for a third party to acquire us without the consent of our board of directors and Fortress. These provisions provide:

- for a classified board of directors with staggered three-year terms;

- for removal of directors only for cause and only with the affirmative vote of at least 80% of the voting interest of stockholders entitled to vote (provided, however, that for so long as Fortress beneficially owns, directly or indirectly, at least 30% of our issued and outstanding common stock, directors may be removed with or without cause with the affirmative vote of a majority of the voting interest of stockholders entitled to vote);

- for prohibitions on stockholders in regards to calling special meetings of our stockholders (provided, however, that for so long as Fortress beneficially owns, directly or indirectly, at least 20% of our issued and outstanding common stock, any stockholders that collectively beneficially own at least 20% of our issued and outstanding common stock may call special meetings of our stockholders);

- for advance notice requirements by stockholders with respect to director nominations and actions to be taken at annual meetings;

- certain rights to Fortress with respect to the designation of directors for nomination and election to our board of directors, including the ability to appoint up to a majority of the members of our board of directors, plus two directors, for so long as Fortress beneficially owns, directly or indirectly, at least 30% of our issued and outstanding common stock and certain other conditions are met.

- for no cumulative voting in the election of directors, which means that the holders of a majority of the outstanding shares of our common stock can elect all the directors standing for election;

- that action by our stockholders outside a meeting may only occur by unanimous written consent; provided, however, that for so long as Fortress beneficially owns, directly or indirectly, at least 20% of our issued and outstanding

common stock, our stockholders may act without a meeting by written consent of a majority of our stockholders; and that our board of directors has the authority to cause the issuance of preferred stock from time to time in one or more series and to establish the terms, preferences and rights of any such series of preferred stock, all without approval of our stockholders. Nothing in our restated certificate of incorporation precludes future issuances without stockholder approval of the authorized but unissued shares of our common stock.

In addition, these provisions may make it difficult and expensive for a third party to pursue a tender offer, change in control or takeover attempt that is opposed by Fortress, our management or our board of directors. Public stockholders who might desire to participate in these types of transactions may not have an opportunity to do so, even if the transaction is favorable to stockholders. These anti-takeover provisions could substantially impede the ability of public stockholders to benefit from a change in control or change our management and board of directors and, as a result, may adversely affect the market price of our common stock and the ability to realize any potential change of control premium.

Table of Contents

Fortress has the right to engage or invest in the same or similar businesses as we do and waiver of the corporate opportunity provisions in our restated certificate of incorporation could enable Fortress and certain stockholders to benefit from corporate opportunities that might otherwise be available to us.

Fortress has other investments and business activities in addition to their ownership of us, including in the industries in which we operate. Fortress has the right, and has no duty to abstain from exercising such right, to engage or invest in the same or similar businesses as us, do business with any of our customers or vendors or employ or otherwise engage any of our officers, directors or employees.

Under our restated certificate of incorporation, if Fortress or any of its officers, directors or employees acquire knowledge of a potential transaction that could be a corporate opportunity, they have no duty to offer such corporate opportunity to us, our stockholders or affiliates. In addition, we have renounced any interest or expectancy in, or in being offered an opportunity to participate in, such corporate opportunities and, in the event that any of our directors and officers who is also a director, officer or employee of Fortress, acquires knowledge of a corporate opportunity or is offered a corporate opportunity, provided that this knowledge was not acquired solely in such person's capacity as our director or officer and such person acted in good faith, then such person is deemed to have fully satisfied such person's fiduciary duty and is not liable to us if Fortress pursues or acquires such corporate opportunity or if such person did not present the corporate opportunity to us.

Our restated certificate of incorporation designates the Court of Chancery of the State of Delaware as the exclusive forum for certain litigation that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us.

Pursuant to our restated certificate of incorporation, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will be the sole and exclusive forum for:

any derivative action or proceeding brought on our behalf;

any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers, employees or agents or our stockholders;

any action asserting a claim arising pursuant to any provision of the General Corporation Law of the State of Delaware; or

any action asserting a claim governed by the internal affairs doctrine,

in each such case subject to the Court of Chancery having personal jurisdiction over the indispensable parties named as defendants. In the event that the Court of Chancery lacks jurisdiction over any such action or proceeding, our restated certificate of incorporation provides that the sole and exclusive forum for such action or proceeding will be another state or federal court located within the State of Delaware. Our restated certificate of incorporation further provides that any person or entity purchasing or otherwise acquiring any interest in shares of our common stock is deemed to have notice of and consented to the foregoing provision. The forum selection clause in our amended and restated certificate of incorporation may limit our stockholders' ability to obtain a favorable judicial forum for disputes with us.

Table of Contents

Risks Related to Our Indebtedness

Our credit agreement contains, and future debt agreements may contain, restrictions that may limit our flexibility in operating our business.

Our credit agreement contains, and documents governing our future indebtedness may contain, numerous covenants that limit the discretion of management with respect to certain business matters. These covenants place restrictions on, among other things, our ability and the ability of our subsidiaries to incur or guarantee additional indebtedness, pay dividends and make other distributions and restricted payments, make certain loans, acquisitions and other investments, enter into agreements restricting our subsidiaries' ability to pay dividends, engage in certain transactions with stockholders or affiliates, sell certain assets or engage in mergers, acquisitions and other business combinations, reinvest the proceeds from certain asset sales, amend or otherwise alter the terms of our subordinated indebtedness and create liens. Our credit agreement also requires, and documents governing our future indebtedness may require, us or our subsidiaries to meet certain financial ratios and tests in order to incur certain additional debt, make certain loans, acquisitions or other investments, reinvest the proceeds from certain asset sales, or pay dividends or make other distributions or restricted payments. Our ability and the ability of our subsidiaries to comply with these and other provisions of our debt agreements are dependent on our future performance, which will be subject to many factors, some of which are beyond our control. The breach of any of these covenants or noncompliance with any of these financial ratios and tests could result in an event of default under the applicable debt agreement, which, if not cured or waived, could result in acceleration of the related debt and the acceleration of debt under other instruments evidencing indebtedness that may contain cross-acceleration or cross-default provisions. In addition, variable rate indebtedness, which represents approximately 99.8% of our total outstanding debt, subjects us to the risk of higher interest rates, which could cause our future debt service obligations to increase significantly.

Our substantial leverage could adversely affect our ability to raise additional capital to fund our growth strategy, limit our ability to react to changes in the economy or our industry, expose us to interest rate risk to the extent of our variable rate debt and prevent us from meeting our obligations under our indebtedness.

We are significantly leveraged, which could have important consequences, including the following:

- a substantial portion of our cash flows from operations will be dedicated to the payment of principal and interest on indebtedness, thereby reducing the funds available for operations, future business opportunities and capital expenditures;

- our ability to obtain additional financing for working capital, capital expenditures, debt service requirements, acquisitions and general corporate purposes in the future may be limited;

- we may be required to repay our indebtedness from the proceeds of certain asset sales, rather than reinvesting the proceeds;

- certain of our borrowings are at variable rates of interest, which increase our vulnerability to increases in interest rates;

- we will be at a competitive disadvantage to lesser leveraged competitors;

- we may be unable to adjust rapidly to changing market conditions;

- the debt service requirements of our indebtedness could make it more difficult for us to satisfy our financial obligations; and

we may be vulnerable in a downturn in general economic conditions or in our business and we may be unable to carry out activities that are important to our growth.

Our ability to make scheduled payments of the principal of, to pay interest on or to refinance indebtedness depends on and is subject to our financial and operating performance, which in turn is affected by general and regional economic, financial, competitive, business and other factors beyond our control, including the availability of financing in the international banking and capital markets.

Risks Related to Our Equity

The market price of our common stock could be negatively affected by sales of substantial amounts of our common stock in the public markets.

As of September 2, 2016, there were 39,770,271 shares of our common stock outstanding. All of our issued and outstanding shares are freely tradable, except for any shares held by our “affiliates,” as that term is defined in Rule 144 under the Securities Act of 1933 (the “Securities Act”). Approximately 27,038,250 shares, or 68.0% of our outstanding shares, are held by affiliates and can be resold into the public markets in the future in accordance with the requirements of Rule 144.

Table of Contents

Pursuant to our stockholders' agreement with Fortress, Fortress and permitted third party transferees have the right, in certain circumstances, to require us to register their shares of our common stock under the Securities Act for sale into the public markets. The timing of such sales is uncertain and could be influenced by numerous factors, including the market price of our common stock, economic conditions and the contractual obligations or liquidity needs of Fortress.

The market price of our common stock may decline significantly when Fortress elects to sell a significant number of shares of our common stock. A decline in the price of our common stock might impede our ability to raise capital through the issuance of additional shares of common stock or other equity securities.

The market price and trading volume of our common stock have been and may continue to be volatile, which could result in rapid and substantial losses for our stockholders.

The market price of our common stock may fluctuate or decline significantly in the future. Some of the factors that could negatively affect our share price or result in fluctuations in the price or trading volume of our common stock include:

- quarterly variations in our operating results;
- operating results that vary from the expectations of securities analysts and investors;
- change in valuations;
- changes in the industries in which we operate;
- announcements by us or companies in our industries of significant contracts, acquisitions, dispositions, strategic partnerships, joint ventures, capital commitments, plans, prospects, service offerings or operating results;
- additions or departures of key personnel;
- future sales of our securities;
- our limited public float and therefore trading volume;
- other risk factors discussed herein; and
- other unforeseen events.

Stock markets in the United States have experienced extreme price and volume fluctuations. Market fluctuations, as well as general political and economic conditions such as acts of terrorism, prolonged economic uncertainty, a recession or interest rate or currency rate fluctuations, could adversely affect the market price of our common stock.

Table of Contents

Winter Park Operations

The operations at Winter Park are conducted on land and with operating assets that are beneficially owned by the City and County of Denver. Winter Park Recreational Association ("WPRA") holds the Special Use Permit and Term Special Use Permit issued by the USFS for Winter Park (collectively, the "Permits"). Pursuant to an agreement between the City and County of Denver and WPRA (as amended, the "City Agreement"), WPRA has entered into a Second Amended and Restated Ground Lease Agreement ("Arlberg Club Lease") with the Colorado Arlberg Club under which WPRA leases certain lands used in the operation of the Winter Park ski areas. The Arlberg Club Lease terminates on April 30, 2078. Also pursuant to the terms of the City Agreement, WPRA has entered into a Lease and Operating Agreement (the "Lease") with our subsidiary Intrawest/Winter Park Operations Corporation ("IWPOC") under which IWPOC may be the operator of the Winter Park resort (including the Winter Park ski areas) until 2078. The USFS has given its consent to the Lease and operation of Winter Park by IWPOC. The Colorado Arlberg Club has also given its consent to WPRA's subleasing of the land leased under the Arlberg Club Lease to IWPOC. IWPOC has, subject to the terms of the Permits, the City Agreement, the Arlberg Club Lease and the Lease, the full and legal right to enter into agreements and use the physical assets described in those documents in the operation, maintenance and development of Winter Park.

Tremblant Operations

A portion of Tremblant's lifts and trails, and some of its buildings, are located on land leased to our subsidiary, Mont Tremblant Resorts and Company, LP ("Tremblant LP"), by the Province of Quebec under a ski area agreement that expires in 2051 (the "Ski Area Agreement"). Pursuant to the Ski Area Agreement, Tremblant LP pays a nominal lease payment annually. These payments may be adjusted annually for changes in the Consumer Price Index. The Ski Area Agreement contains ongoing covenants on the part of Tremblant LP, including a requirement that Tremblant LP comply with all applicable laws. Pursuant to the Ski Area Agreement, Tremblant LP has also agreed to indemnify the provincial government from third-party claims arising out of Tremblant LP's operations under the Ski Area Agreement. The Ski Area Agreement may be amended by mutual agreement between Tremblant LP and the provincial government to change the applicable ski area or permitted uses. Tremblant LP must submit to the provincial government for those areas under lease a capital investment program each year as well as a master development plan every five years.

Blue Mountain Operations

A portion of Blue Mountain's lands, including a number of ski lifts and trails, are located on lands leased from Blue Mountain Ski Club (1940) Inc. under a 999-year Lease Agreement dated January 31, 1948 (the "Blue Mountain Lease Agreement"), at a nominal cost. There is also a Lease Amending Agreement dated November 16, 1971 adding Toronto Ski Club as a party to the Blue Mountain Lease Agreement. Blue Mountain also currently has lease agreements for several retail stores it operates in the Blue Mountain Village. Blue Mountain's Georgian Bay Pumphouse is located on lands leased from the Town of the Blue Mountains under a 30-year Lease Agreement, dated July 11, 1994 (the "1994 Lease Agreement") at a nominal rental rate. The 1994 Lease Agreement commenced on June 1, 1994 and may be renewed for a second consecutive 30-year term upon the same terms and conditions and the same monetary consideration. The lands subject to the 1994 Lease Agreement can only be used for the intake of non-potable water, the pumping of non-potable water and the conveying of non-potable water to the resort's recreational operations. The 1994 Lease Agreement also states that Blue Mountain will save harmless the Town of the Blue Mountains against any liability and damages resulting from the operation of the pumphouse building and the related operational facilities.

CMH Operations

CMH's skiing and hiking operations occur on Crown land that is owned by the Government of the Province of British Columbia. As a result, each of CMH's 11 operating areas has a series of land tenures, which are legal contractual documents between CMH and the government, issued under either British Columbia's Land Act or Park Act. Licences of Occupation are the most common form of tenure held by CMH for its operating areas outside provincial parks or protected areas and for its ancillary facilities (such as radio repeaters and remote fuel caches). Licences of Occupation are issued under the Land Act, are normally 30 years in length and are renewable at mid-term. Pursuant to the Licences of Occupation, CMH pays a land rental amount on a per skier-day basis. CMH's Licences of Occupation are non-exclusive and contain provisions whereby they can be amended or revoked by the Province for non-compliance or where the Province requires the land for what it deems to be a "higher and better use." In CMH's existence, the Province has not exercised this right. In some cases, a portion of a CMH operating area lies inside a provincial park or protected area. In those cases, CMH also holds a required Park Use Permit issued under the Park Act. Park Use Permits are normally issued for 10-year terms, are renewable at mid-term and are non-exclusive. CMH also holds a small number of other forms of Land Act tenures, such as leases and rights-of-way for 30 or more years.

Table of Contents

ITEM 3. LEGAL PROCEEDINGS.

We are involved in various lawsuits and claims arising in the ordinary course of business and others arising from our legacy real estate development. These lawsuits and claims may include, among other things, claims or litigation relating to personal injury and wrongful death, allegations of violations of laws and regulations relating to our real estate activities and labor and employment, intellectual property and environmental matters and commercial contract disputes. We operate in multiple jurisdictions and, as a result, a claim in one jurisdiction may lead to claims or regulatory penalties in other jurisdictions.

Due to the nature of the activities at our mountain resorts and CMH, we are exposed to the risk that customers or employees may be involved in accidents during the use, operation or maintenance of our trails, lifts, helicopters and facilities. As a result, we are, from time to time, subject to various lawsuits and claims in the ordinary course of business related to injuries occurring at our properties.

In addition, our pre-2010 legacy real estate development and sales activities, combined with the significant downward shift in real estate asset values that occurred in 2007 and 2008, resulted in claims arising in the ordinary course of business being filed against us by owners and prospective purchasers of residences in our real estate developments. In some instances, we have been named as a defendant in lawsuits alleging construction defects at certain of our existing developments or that we failed to construct planned amenities. In other lawsuits, purchasers are seeking rescission of real estate purchases and/or return of deposits paid on pre-construction purchase and sale agreements. These claims are related to alleged violations of state and federal laws.

We believe that we have adequate insurance coverage or have adequately accrued for loss contingencies for all material matters in which we believe a loss is probable and the amount of the loss is reasonably estimable. Although the ultimate outcome of claims against us cannot be ascertained, current pending and threatened claims are not expected to have a material adverse effect, individually or in the aggregate, on our financial position, results of operations or cash flows. However, regardless of their merits or their ultimate outcomes, such matters are costly, divert management's attention and may affect our reputation, even if resolved in our favor.

ITEM 4. MINE SAFETY DISCLOSURES.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Market Information for Common Stock

Our common stock has been listed on the New York Stock Exchange ("NYSE") under the symbol "SNOW" since January 31, 2014. Prior to that time, there was no public market for our stock. As of September 2, 2016, the closing price of our common stock was \$14.85 per share as reported on the NYSE. The following table sets forth, for the indicated periods, the high and low sales prices per share for our common stock on the NYSE.

	High	Low
Year ended June 30, 2016		
First Quarter	\$12.07	\$8.38
Second Quarter	\$10.24	\$7.81
Third Quarter	\$9.37	\$6.95
Fourth Quarter	\$13.06	\$8.23
Year ended June 30, 2015		
First Quarter	\$12.00	\$9.53
Second Quarter	\$12.14	\$8.86
Third Quarter	\$12.15	\$8.25
Fourth Quarter	\$12.75	\$8.59

Holders of Record

As of September 2, 2016, there were 6 stockholders of record of our common stock. This figure does not include an estimate of the indeterminate number of beneficial holders whose shares may be held of record by brokerage firms and clearing agencies.

Dividend Policy

We have never declared or paid any cash dividend on our common stock. We intend to retain any future earnings and do not expect to pay dividends in the foreseeable future.

Recent Sale of Unregistered Securities

Issuer Purchases of Equity Securities

None.

Stock Performance Graph

This performance graph shall not be deemed "soliciting material" or to be "filed" with the SEC for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (Exchange Act), or otherwise subject to the liabilities under that Section, and shall not be deemed to be incorporated by reference into any filing of Intrawest Resorts Holdings, Inc. under the Securities Act of 1933, as amended, or the Exchange Act.

Table of Contents

The following graph shows a comparison from January 31, 2014 (the date our common stock commenced trading on the NYSE) through June 30, 2016 of the cumulative total return for our common stock, the Russell 2000 Index and the Dow Jones U.S. Travel and Leisure Index ("DJ US Travel & Leisure Index"). The graph assumes that \$100 was invested at the market close on January 31, 2014 in the common stock of the Company, the Russell 2000 Index and the DJ US Travel & Leisure Index and the data for the comparative indices assumes reinvestments of dividends. The stock price performance of the following graph is not necessarily indicative of future stock price performance.

Legacy, non-core and other revenue represents legacy and other non-core operations that are not reviewed (1) regularly by the CODM to assess performance and make decisions regarding the allocation of resources. It includes legacy real estate asset sales, divested non-core operations, and non-core retail revenue.

(2) In January 2016, we sold IRCG and recorded a \$40.4 million gain on the disposition, see Part II- Item 8, Financial Statements and Supplementary Data, Note 3, "Acquisitions and Dispositions" under "IRCG Transaction".

(3) In December 2012, we sold our investment in Whistler Holdings and recorded a \$17.9 million gain related to this disposition.

Other income (expense), net, primarily includes gains or losses on currency rate fluctuations and other (4) non-operating expenses that management does not believe are representative of the underlying performance of our ongoing operations.

A Skier Visit represents an individual's use of a paid or complimentary ticket, frequency product or season pass to (5) ski or snowboard at our Steamboat, Winter Park, Tremblant, Stratton, Snowshoe and Blue Mountain resorts for any part of one day.

(6) Mountain Segment Revenue Per Visit is defined as total Mountain revenue recorded during the ski season from November 1st to April 30th divided by total Skier Visits during such period.

(7) Effective ticket price ("ETP") is calculated by dividing lift revenue from November 1st to April 30th by total Skier Visits.

(8) Balance sheet data for the years ended June 30, 2015, 2014, 2013 and 2012 were revised to present the assets and liabilities related to the disposition of IRCG as assets held for sale.

(9) Includes capital lease obligations due within one year and long-term capital lease obligations.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion of our financial condition and results of operations should be read in conjunction with the consolidated financial statements and the notes thereto included in this Annual Report on Form 10-K. In addition to historical consolidated financial information, the following discussion contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. See "Cautionary Note About Forward-Looking Statements" included elsewhere in this Annual Report on Form 10-K.

Overview

We are a North American mountain resort, adventure, and real estate company, delivering distinctive vacation and travel experiences to our customers for over three decades. We wholly own and/or operate six four-season mountain resorts with approximately 8,000 skiable acres and over 1,120 acres of land available for real estate development. Our mountain resorts are geographically diversified across North America's major ski regions, including the Eastern United States, the Rocky Mountains and Canada. Our mountain resorts are located within an average of approximately 160 miles of major metropolitan markets with high concentrations of affluent skiers and several major national airports, including: New York City, Boston, Washington D.C., Denver, Pittsburgh, Montreal and Toronto. We also operate an adventure travel business, which includes CMH, a leading heli-skiing adventure company in North America. CMH provides helicopter accessed skiing, mountaineering and hiking over approximately 3.0 million tenured acres. Additionally, we operate a comprehensive real estate business through which we manage condominium hotel properties and sell and market residential real estate.

Our three segments are as follows:

Mountain: Our Mountain segment includes our mountain resort and lodging operations at Steamboat, Winter Park, Tremblant, Stratton, Snowshoe and Blue Mountain. Our Mountain segment included our 50.0% equity interest in Blue Mountain prior to our acquisition (the "Blue Mountain Acquisition") of the remaining 50.0% equity interest in Blue Mountain on September 19, 2014 (the "Acquisition Date").

Adventure: Our Adventure segment is comprised of CMH, which provides helicopter accessed skiing, mountaineering and hiking in British Columbia, and our ancillary businesses that support CMH and provide commercial aviation services, such as firefighting, leasing, and helicopter maintenance, repair and overhaul ("MRO") services to third parties.

Real Estate: Our Real Estate segment includes our real estate management, marketing and sales businesses, as well as our real estate development activities. Our Real Estate segment includes Intrawest Hospitality Management, Inc. ("IHM"), which manages condominium hotel properties, Playground, our residential real estate sales and marketing business, our 50.0% interest in MHM, our 57.1% economic interest in Chateau, and included Intrawest Resort Club Group ("IRCG"), a vacation club business, until the Disposition Date. Our Real Estate segment also includes costs associated with real estate development activities, such as planning activities and land carrying costs.

In addition to our segments, our consolidated financial results reflect items related to our legacy real estate development and sales activities and non-core assets and operations (referred to herein as "Legacy, non-core and other").

Recent Transactions

Amendment to Credit Agreement

On April 8, 2016, we and certain of our subsidiaries that guarantee our Senior Debt (as defined below) executed the fourth amendment (the "Fourth Amendment") to our existing Credit Agreement, dated as of December 9, 2013 (the "Credit Agreement"). All capitalized terms used in connection with the discussion of the Fourth Amendment but which are not herein defined have the meaning assigned to them in the Credit Agreement and/or the Fourth Amendment. The Fourth Amendment, among other items, increased the applicable margins for base rate loans and Euro dollar rate loans under our facility (the "Term Loan") from 2.75% to 3.00% and from 3.75% to 4.00%, respectively. Additionally, solely for purposes of calculating the permissible amount of Incremental Term Loan borrowings, the amount of Unrestricted Cash to be deducted from our Total Secured Debt was reduced to amounts in excess of \$65.0 million, instead of amounts in excess of \$40.0 million.

The Fourth Amendment also modified the former requirement that the Net Cash Proceeds from any disposition of our property be used solely to reinvest in assets useful in our business or to repay the amounts due under the Term Loan so that the Net Cash Proceeds received from the sale of certain specified assets may now also be used by us for other purposes, including for Restricted Payments, subject to the satisfaction of certain conditions described therein.

Additionally, the Fourth Amendment amended Section 6.1 of the Credit Agreement by deleting the provision thereto in its entirety that provided that we were not subject to the financial covenant defined therein when the outstanding amount of the Revolving Loans plus the Swing Line Loans plus the Revolving Facility Letter of Credit Usage was less than 30% of the aggregate Revolving Commitments. Pursuant to the Fourth Amendment, we will now be subject to the financial covenant defined therein on the last day of each Test Period.

The Fourth Amendment also revised the definition of "Permitted Acquisition" so that, after an acquisition, instead of requiring Pro Forma Compliance with a Total Secured Debt Ratio of 5.50:1:00 or a ratio that is no higher than before the Permitted Acquisition, the Credit Agreement, as amended by the Fourth Amendment, now requires Pro Forma Compliance with a Total Gross Debt Leverage Ratio of 5.50:1.00. Additionally, the definition was further amended to require that any acquisition must be in a substantially related business.

Self-Tender Offer

On January 12, 2016, we announced the commencement of a modified "Dutch auction" self-tender offer (the "Tender Offer") to purchase for cash up to \$50.0 million of shares of our common stock at a price per share not greater than \$10.00 nor less than \$9.00, less applicable withholding taxes and without interest. The Tender Offer expired on February 10, 2016. Pursuant to the Tender Offer, we purchased approximately 5.6 million shares of our common stock at a purchase price of \$9.00 per share. The tendered shares were accounted for as treasury stock, at cost, and resulted in a reduction of the outstanding shares used to calculate the weighted-average common shares outstanding for basic and diluted earnings per share.

IRCG Transaction

On November 24, 2015, we, through our wholly owned indirect subsidiaries, Intrawest U.S. Holdings Inc. and Intrawest ULC, entered into a definitive agreement (the "Purchase Agreement") to sell IRCG to Diamond Resorts Corporation (the "Purchaser") and Diamond Resorts International, Inc. (together with the Purchaser, "Diamond") for a purchase price of approximately \$84.6 million (the "IRCG Transaction"), which included certain purchase price adjustments. IRCG is engaged in the business of developing, selling interests in, and managing (a) Club Intrawest, a points-based timeshare vacation club at certain locations in the United States, Canada and Mexico, (b) a fractional timeshare program with properties located in Zihuatanejo, Mexico, and (c) an internal exchange program for members of the vacation club operated through Extraordinary Escapes Corporation.

The purchase price consisted of cash consideration and the assumption of certain liabilities, including certain lease obligations and certain other continuing contractual obligations. The Purchase Agreement contained customary representations, warranties, covenants and indemnities of the parties.

Upon closing the IRCG Transaction on January 29, 2016, Diamond acquired substantially all of the assets used in the operations of IRCG, including, but not limited to, certain management contracts, accounts receivable, notes and other

amounts receivable, certain real property, the resort points available for sale, and all of the equity interests in certain wholly-owned indirect subsidiaries of IRCG.

Factors Affecting our Business

Economic Conditions

Our results of operations are affected by consumer discretionary spending. Numerous economic trends support the notion that the health of the general economy has improved in recent periods. We believe that if the economy continues to improve, consumers will have more disposable income and a greater inclination to engage in and spend money on leisure activities, which will positively impact our results of operations. We also believe that lower fuel prices experienced in recent periods can, if sustained, benefit the travel and leisure industry.

Snowfall and Weather

The timing and amount of snowfall and other weather conditions can have an impact on visitation and the financial results in our Mountain and Adventure segments. Our resorts are geographically diversified and have strong snowmaking capabilities, which help to partially mitigate the impact of localized snow conditions and weather. In addition, our increasing percentage of revenue derived from season pass and frequency products sold prior to the ski season helps to insulate us from variations in snowfall and weather conditions. Prolonged periods of severe weather at our resorts and helicopter accessed skiing tenures can force us to cancel or suspend operations which may have a negative impact on our financial results. Weather may also have an effect on our summer fire suppression activities and flight hours.

Table of Contents

Season Pass and Frequency Product Usage

Season pass products offer unlimited access to lifts at our resorts, subject to certain exceptions and restrictions, for a fixed upfront payment. Frequency products are valid for a specific period of time or number of visits, providing our customers with flexibility to ski on multiple dates for a fixed price. The number of visits from season pass and frequency product holders is influenced by sales volume and usage levels. In recent ski seasons, season pass and frequency product sales have been increasing, while usage levels vary from one ski season to the next primarily due to changes in weather, snowfall and skiing conditions. A greater proportion of visits from season pass and frequency product holders results in downward pressure on the effective ticket price ("ETP") since these passholders are skiing for a fixed upfront payment, regardless of the number of times they visit. This downward pressure on ETP is more pronounced in ski seasons with higher snowfall, as season pass holders increase their usage. Similarly, a greater proportion of visits from season pass and frequency product holders may result in downward pressure on Revenue Per Visit, as defined in "Key Business Metrics Evaluated by Management". We expect the volume and pricing of season pass and frequency product sales to continue to increase in future ski seasons; however, ETP and Revenue Per Visit in any given ski season may increase or decrease as a result of the mix of visitors and pass products. For the years ended June 30, 2016, 2015 and 2014, 43.1%, 40.2% and 37.5%, respectively, of total lift revenue consisted of season pass and frequency product revenue.

Seasonality and Fluctuations in Quarterly Results

Our business is seasonal in nature. Although we operate four-season resorts, based upon historical results, we generate the highest revenue between our second and third fiscal quarters, which includes the peak ski season. As a result of the seasonality of our business, our mountain resorts and CMH typically experience operating losses during the first and fourth quarters of each fiscal year. In addition, during our peak quarters, we generate the highest daily revenue on weekends, during the Christmas/New Year's and Presidents' Day holiday periods and, in the case of our mountain resorts, during school spring breaks. Depending on how peak periods, holidays and weekends fall on the calendar, in any given year we may have more or fewer peak periods, holidays and weekends in our second fiscal quarter compared to prior years, with a corresponding difference in our third fiscal quarter. These differences can result in material differences in our quarterly results of operations and affect the comparability of our results of operations.

Resort Real Estate Markets

We intend to resume development of residential vacation homes at our mountain resorts when market conditions are favorable. The value and sales volume of vacation homes fluctuate with macroeconomic trends and consumer sentiment. During recent periods we have seen a partial recovery in the market for vacation homes.

Potential for Volatility in Ancillary Services within our Adventure Segment

A significant share of the ancillary firefighting services in our Adventure segment is performed through "as needed" contracts. Revenue from these arrangements is based almost entirely on flight hours, which is largely a function of the level of forest fire activity at any given time, with limited or no minimum flight hour guarantees. Accordingly, our ability to generate ancillary revenue is, in part, dependent on higher forest fire levels and our ability to opportunistically deploy our helicopters in other industries and/or lines of business during the off season.

Currency Fluctuation Risk

We present our financial statements in United States dollars ("U.S. dollars"). Our operating results are sensitive to fluctuations in foreign currency exchange rates, as a significant portion of our revenue and operating expenses is transacted in Canadian dollars, principally at Tremblant, Blue Mountain and within our Adventure segment. A

significant fluctuation in the Canada/U.S. exchange rate could therefore have a significant impact on our results of operations after translating our Canadian operations into U.S. dollars. See Part II-Item 7A., Quantitative and Qualitative Disclosures About Market Risk, "Foreign Currency Fluctuations".

Where we discuss the impact of foreign currency adjustments on our results of operations, the impact is calculated on a constant U.S. dollar basis. We calculate constant U.S. dollar amounts by applying prior period average exchange rates to the current comparable period.

Table of Contents

Results of Operations

The following historical consolidated statements have been derived from the audited consolidated financial statements included in this Annual Report on Form 10-K. Set forth below is a discussion of our consolidated results of operations, followed by a discussion of our segment results.

Comparison of Results of Operations for the Years Ended June 30, 2016, 2015 and 2014 (dollars in thousands)

	Year Ended June 30,			2016 vs. 2015		2015 vs. 2014

Revenue

Revenue decreased in fiscal 2016 compared to fiscal 2015 due to a decrease of \$13.8 million and \$2.8 million in total segment revenue and Legacy, non-core and other revenue, respectively. Total segment revenue in fiscal 2016 included decreases of \$4.6 million and \$16.8 million in Mountain revenue and Real Estate revenue, respectively, partially offset by an increase of \$7.6 million in Adventure revenue. The decrease in Legacy, non-core and other revenue of \$2.8 million in fiscal 2016 was primarily a result of \$2.8 million of non-core real estate sales during fiscal 2015. There were no comparable transactions in fiscal 2016. Revenue in fiscal 2016 was impacted by an unfavorable foreign currency adjustment of \$27.4 million.

Table of Contents

Revenue increased in fiscal 2015 compared to fiscal 2014 due to an increase in fiscal 2015 of \$70.5 million in total segment revenue, partially offset by a decrease of \$8.2 million in Legacy, non-core and other revenue. Total segment revenue in fiscal 2015 included increases of \$75.1 million and \$0.7 million in Mountain revenue and Real Estate revenue, respectively, partially offset by a decrease of \$5.3 million in Adventure revenue. The decrease in Legacy, non-core and other revenue of \$8.2 million in fiscal 2015 was primarily a result of \$10.9 million of non-core real estate sales during fiscal 2014 versus \$2.8 million of non-core real estate sales in fiscal 2015. Revenue in fiscal 2015 was impacted by an unfavorable foreign currency adjustment of \$25.5 million.

Operating expenses

Operating expenses decreased in fiscal 2016 compared to fiscal 2015 as a result of a decrease in fiscal 2016 of \$16.5 million and \$2.0 million in total segment operating expenses and in Legacy, non-core and other expenses, respectively. Total segment operating expenses in fiscal 2016 included decreases of \$0.1 million, \$1.9 million and \$14.4 million in Mountain, Adventure and Real Estate operating expenses, respectively. The decrease in Legacy, non-core and other expenses of \$2.0 million in fiscal 2016 was primarily due to the cost of sales in fiscal 2015 associated with the parcels of non-core real estate sold. There were no comparable transactions in fiscal 2016.

Operating expenses increased in fiscal 2015 compared to fiscal 2014 as a result of an increase in fiscal 2015 of \$50.8 million in total segment operating expenses partially offset by a decrease of \$10.1 million in Legacy, non-core and other expenses. Total segment operating expenses in fiscal 2015 included increases of \$55.2 million in Mountain operating expenses, partially offset by decreases of \$3.9 million and \$0.5 million in Adventure and Real Estate operating expenses, respectively. The decrease in Legacy, non-core and other expenses of \$10.1 million in fiscal 2015 was primarily due to expenses incurred related to the sale of non-core real estate during fiscal 2014.

Depreciation and amortization

The increase in depreciation and amortization expense in fiscal 2016 compared to the prior fiscal year was primarily due to the inclusion of 100% of Blue Mountain's depreciation and amortization for the full year in fiscal 2016 compared to the prior year, which only included 100% of Blue Mountain's depreciation and amortization expense subsequent to the Acquisition Date.

The increase in depreciation and amortization expense in fiscal 2015 compared to the prior fiscal year was primarily due to an increase in fixed assets assumed in the Blue Mountain Acquisition and an increase in assets placed in service within our Mountain segment. These increases were partially offset by a decrease in amortization of customer relationships at CMH that reached the end of their amortizable lives during fiscal 2015.

(Gain) loss on disposal of assets

In fiscal 2016, the gain on disposal of assets of \$1.9 million was primarily due to a non-monetary exchange of helicopter assets with an independent third party in which we acquired four helicopters in exchange for two helicopters. The \$1.7 million gain from that transaction resulted from the fair value of the helicopters received exceeding the net book value of helicopters given. In fiscal 2015, the gain on disposal of assets of \$2.3 million was primarily due to the sale of a helicopter. In fiscal 2014, the loss on disposal of assets was \$0.3 million.

Impairment of real estate and long-lived assets

There were no real estate or long-lived asset impairments in fiscal 2016 or fiscal 2015. In fiscal 2014, we recognized an impairment charge of \$0.6 million on our legacy real estate assets as a result of a decline in the fair value of our legacy real estate holdings.

Table of Contents

Loss on remeasurement of equity method investment

In fiscal 2015, we recognized a \$1.5 million loss on remeasurement of our equity method investment in Blue Mountain in connection with the Blue Mountain Acquisition. There were no comparable transactions in either fiscal 2016 or fiscal 2014.

Interest income

The decrease in interest income in fiscal 2016 compared to the prior fiscal year was primarily due to the closing of the IRCG Transaction in January 2016, which resulted in us no longer recording the interest income from IRCG's financing activities. The decrease in interest income in fiscal 2015 compared to the prior fiscal year was primarily due to a decrease in IRCG interest income as a result of a decline in the average outstanding IRCG long-term receivables balance.

Interest expense on third party debt

Interest expense on third party debt decreased in fiscal 2016 compared to fiscal 2015 due to the repricing of our Senior Debt in April 2015, which lowered the average annual effective rate from approximately 5.5% to approximately 4.75%. Additionally, in fiscal 2016 we reduced the outstanding principal balance of the Term Loan due to an excess cash flow prepayment of \$8.8 million paid in January 2016 and a \$25.0 million principal repayment in April 2016 in conjunction with executing the Fourth Amendment. These decreases were partially offset by an increase in the average annual effective rate from approximately 4.75% to 5.00% as part of the Fourth Amendment.

Interest expense on third party debt decreased in fiscal 2015 compared to fiscal 2014 as a result of refinancing our senior debt facilities in December 2013, which lowered the average annual effective interest rate from approximately 9.0% to approximately 5.5% and reduced the average outstanding principal balance.

Interest expense on notes payable to affiliates

The decrease in interest expense on notes payable to affiliates in fiscal 2016 and fiscal 2015 compared to fiscal 2014 was due to the Restructuring in December 2013, which resulted in notes payable to affiliates, including accrued and unpaid interest, either exchanged for our common stock or canceled, or pursuant to which our subsidiaries were released from their obligations, including guarantor obligations.

Earnings (loss) from equity method investments

The earnings from equity method investments in fiscal 2016 compared to the loss in the prior fiscal year was primarily a result of earnings from our investments in the Mammoth family of resorts. In March 2015, the Mammoth family of resorts added Snow Summit Mountain Resort and Bear Mountain. The Mammoth family of resorts experienced an increase in Skier Visits (as defined below) driven by improved snowfall and better ski conditions compared to the prior fiscal year.

The increase in the loss from equity method investments in fiscal 2015 compared to the prior fiscal year was primarily a result of acquiring the remaining 50.0% equity interest in Blue Mountain that we did not already own on September 19, 2014 and, therefore, no longer accounting for Blue Mountain as an equity method investment. The loss from equity method investments in fiscal 2014 includes Blue Mountain's results for the entire fiscal year, including the peak ski season, in which Blue Mountain experienced operating income, whereas the loss from equity method investments in fiscal 2015 only includes Blue Mountain's results for a portion of the first quarter, in which Blue Mountain experienced operating losses.

Loss on extinguishment of debt

In fiscal 2015, we recognized a \$0.7 million loss on extinguishment of debt as a result of amending our Senior Debt in the fourth quarter of fiscal 2015. In fiscal 2014, we recognized a \$35.5 million loss on extinguishment of debt as a result of refinancing our senior debt facilities in December 2013. There was no comparable transaction in fiscal 2016.

Other income (expense), net

Other income, net, increased by \$3.0 million in fiscal 2016 compared to the prior fiscal year primarily due to a favorable legacy legal settlement partially offset by approximately \$1.7 million of foreign currency transaction losses. Other expense, net, increased by \$0.2 million in fiscal 2015 compared to the prior fiscal year.

Table of Contents

Income tax expense (benefit)

In fiscal 2016, we recognized \$1.8 million of tax expense related to tax paying entities primarily in Canada. The \$3.9 million tax benefit for fiscal 2015 was primarily attributable to our restructuring of the wholly owned interest in Blue Mountain subsequent to the Blue Mountain Acquisition. This benefit was partially offset by income tax expense related to tax paying entities primarily in Canada. The resulting effective tax rates were 4.0% and 43.4% in fiscal 2016 and 2015, respectively. The effective tax rate in fiscal 2016 and 2015 differs from the federal blended statutory rate of 28.2% and 23.5%, respectively, due to changes in recorded valuation allowances for entities in the United States and Canada.

The \$0.7 million tax expense for fiscal 2014 was the result of tax paying entities primarily in Canada. The resulting effective tax rate for fiscal 2014 was (0.4)%. The effective tax rate in fiscal 2014 differs from the federal blended statutory rate of 27.8% due to changes in recorded valuation allowances for entities in the United States and Canada.

Results of Segment Operations (in thousands)

	Year Ended June 30,		
	2016	2015	2014
Mountain revenue	\$421,332	\$425,929	\$350,863
Adventure revenue	104,405	96,799	102,070
Real Estate revenue	42,433	59,274	58,530
Total segment revenue	\$568,170	\$582,002	\$511,463

Real Estate Adjusted EBITDA	6,625	10,423	9,219
Total Adjusted EBITDA	\$113,105	\$112,700	\$101,194

See "Non-GAAP Financial Measures" below for reconciliations between non-GAAP financial measures and the most directly comparable GAAP (as defined below) measures.

Mountain

Revenue and Mountain Adjusted EBITDA

The Mountain segment earns revenue from a variety of business activities conducted at our mountain resorts.

Lift revenue. Lift revenue is derived from a variety of lift pass products, including multi-resort and single-resort passes, season pass products, frequency card products of varying durations and single and multi-day lift tickets. Our season pass products, including our multi-resort products, are predominately sold prior to the start of the ski season. Season pass revenue, although primarily collected prior to each ski season, is recognized in our consolidated financial statements during such fiscal year based on the prior three-year average pass product usage patterns. Frequency product revenue is recognized based on usage, and revenue on unused products is recognized based on the prior three-year average usage for each frequency product. During the summer season, Lift revenue primarily relates to mountain biking and sightseeing lift products.

Lodging revenue. Lodging revenue is derived primarily from our management of rental programs for condominium properties located at or in close proximity to our mountain resorts. We typically receive 25% to 50% of the daily room revenue, with the condominium owners receiving the remaining share. We also earn lodging revenue from hotel properties we own at Winter Park, Stratton and Snowshoe.

Ski School revenue. Ski School revenue is derived from our operation of ski and ride schools at each of our mountain resorts. We are the exclusive provider of these services at each of our resorts. During the summer season, Ski School revenue is derived from mountain bike instruction and child care.

Retail and Rental revenue. Retail and Rental revenue is derived from the rental of ski, snowboard and bike equipment and the sale of ski, snowboard and bike accessories, equipment, apparel, logo wear, gifts and sundries at our on-mountain and base area outlets.

Table of Contents

Food and Beverage revenue. Food and Beverage revenue is derived from our operation of restaurants, bars and other food and beverage outlets at our resorts.

Other revenue. Other revenue is derived from fees earned through a wide variety of activities and ancillary operations, including private clubs, municipal services, call centers, parking operations, golf, summer base area activities, sponsorships, entertainment events and other resort activities.

Mountain Adjusted EBITDA. Mountain Adjusted earnings before interest, taxes, depreciation and amortization (“EBITDA”) is Mountain revenue less Mountain operating expenses, adjusted for our pro rata share of EBITDA for our equity method investment in Blue Mountain for all periods prior to our acquisition of the remaining 50.0% interest in September 2014. Mountain operating expenses include: wages, incentives and benefits for resort personnel; direct costs of food, beverage and retail inventory; general and administrative expenses; and resort operating expenses, such as contract services, utilities, fuel, permit and lease payments, credit card fees, property taxes, and maintenance and operating supplies.

Key Business Metrics Evaluated by Management

“Skier Visits” We measure visitation volume during the ski season, which is when most of our lift revenue is earned, by the number of “Skier Visits” at our resorts, each of which represents an individual’s use of a paid or complimentary ticket, frequency card or season pass product to ski or snowboard at our mountain resorts for any part of one day. The number of Skier Visits, viewed in conjunction with ETP, is an important indicator of our Lift revenue. Changes in the number of Skier Visits have an impact on Mountain revenue. The number of Skier Visits is affected by numerous factors, including the quality of the guest experience, the effectiveness of our marketing efforts, pricing policies, snow and weather conditions, overall industry trends, macroeconomic factors and the relative attractiveness of our resort offerings compared to competitive offerings.

“Revenue per Visit” Revenue per Visit is defined as total Mountain revenue recorded during the ski season divided by total Skier Visits during such period. For each fiscal year, this means total Mountain revenue as used in this calculation only includes revenue from November 1st through April 30th. This metric excludes non-ski season revenue, which is not directly correlated to skier visit growth. Revenue per Visit is influenced by our mix of guests. Destination guests are more likely to purchase ancillary products and services than regional guests and a higher percentage of destination guests in our skier mix typically increases Revenue per Visit.

“ETP” Effective ticket price, or “ETP”, is defined as Lift revenue recorded during the ski season divided by total Skier Visits. For each fiscal year, this means total Mountain revenue as used in this calculation only includes revenue from November 1st through April 30th. ETP is influenced by lift product mix and other factors. Season pass products offer unlimited access, subject to certain exceptions and restrictions, for a fixed upfront payment. As a result, season passholders skiing more frequently in a given fiscal period as compared to the corresponding prior year period will result in downward pressure on ETP. This downward pressure on ETP is more pronounced in ski seasons with higher snowfall, as season pass holders increase their usage. Conversely, single and multi-day lift ticket products are priced per visit, and therefore a greater proportion of use of these products will tend to increase our ETP. Other factors that influence ETP include the number of complimentary or special promotional passes issued by us, the average age of skiers visiting our resorts, the volume of group or promotional sales and the relative volume of products sold through different sales channels, including our call centers, our ecommerce platform and our network of third-party online and traditional travel companies. Products sold at the ticket counter, which has been a declining percentage of Lift revenue in recent years, are typically priced higher relative to other channels because walk-up customers are our least price sensitive guests.

“Revenue per available room” or “RevPAR” is determined by dividing gross room revenue during a given period by the number of units available to guests during such period.

“Average Daily Rate” or “ADR” is determined by dividing gross room revenue during a given period by the number of occupied units under management during such period. ADR is a measure commonly used in the lodging industry, as well as by our management to track lodging pricing trends. ADR trends provide useful information concerning the pricing environment and the nature of the customer base of a lodging operation. ADR is affected by numerous factors, including the quality of the guest experience, the effectiveness of our marketing efforts, snow and weather conditions, overall industry trends, macroeconomic factors and the relative attractiveness of our resort offerings compared to competing offerings.

Mountain Adjusted EBITDA	\$84,334	\$88,972	\$75,417	\$(4,638)	(5.2)%	\$13,555	18.0 %

Mountain revenue

Mountain revenue decreased in fiscal 2016 compared to fiscal 2015 primarily due to an unfavorable foreign currency adjustment of \$14.9 million. Excluding the foreign currency adjustment, Mountain revenue increased \$10.3 million, or 2.4%, in fiscal 2016 compared to fiscal 2015. The increase was primarily attributable to owning Blue Mountain for the entire fiscal 2016 period whereas Mountain revenue in fiscal 2015 only included Blue Mountain revenue subsequent to the Acquisition Date. Prior to the Acquisition Date, Blue Mountain was accounted for under the equity method and therefore the associated revenue was not included in Mountain revenue. Excluding the foreign currency adjustment and Blue Mountain, Mountain revenue increased \$2.2 million, or 0.6%, due to a 10% increase in revenue at our Colorado resorts partially offset by a 9.0% decrease in revenue at our Eastern resorts due to unprecedented warm weather during the 2015/2016 ski season.

Mountain revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$7.5 million, Mountain revenue increased \$24.9 million, or 7.1%, in fiscal 2015 primarily due to increases in season pass and frequency product revenue, Ski School revenue and other guest services revenue compared to the prior fiscal year.

Lift revenue

Lift revenue decreased in fiscal 2016 compared to fiscal 2015 primarily due to an unfavorable foreign currency adjustment of \$4.7 million. Excluding the foreign currency adjustment, Lift revenue increased \$2.3 million, or 1.2%, primarily due to higher revenue at our Colorado resorts driven by increased season pass sales and increased pricing on paid tickets. Season pass and frequency product revenue for the 2015/2016 ski season increased 5.6% compared to the prior fiscal year and comprised 43.1% and 40.2% of Lift revenue in fiscal 2016 and 2015, respectively. Season pass revenue, for which cash is generally collected prior to the ski season, is recognized based on historical usage patterns. Frequency product revenue is recognized as used, and unused portions ("breakage") are recognized based on historical usage patterns for each frequency product. During the summer season, Lift revenue primarily relates to mountain

biking and sightseeing products, which increased in fiscal 2016 compared to fiscal 2015 primarily due to higher summer visitation.

Lift revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$3.1 million, Lift revenue increased \$13.9 million, or 9.2%, in fiscal 2015 compared to the prior fiscal year primarily due to a 14.2% increase in season pass and frequency product sales across our resorts, select price increases primarily at our Colorado resorts and modest skier visit growth. Excluding Blue Mountain, season pass and frequency product revenue comprised 39.9% and 37.5% of Lift revenue for fiscal 2015 and fiscal 2014, respectively.

Table of Contents

Lodging revenue

Lodging revenue increased in fiscal 2016 compared to fiscal 2015 primarily due to the inclusion of revenue from owning 100% of Blue Mountain during all of fiscal 2016 compared to fiscal 2015, which only included revenue from Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$1.9 million, Lodging revenue decreased \$1.0 million, or 2.2%, in fiscal 2016 compared to the prior fiscal year. The decrease was primarily due to a 7.2% decrease in revenue at our Eastern resorts driven by a 9.4% decrease in room nights, which was partially offset by a 12.9% increase in lodging revenue at our Colorado resorts due to higher ADR and a 4.9% increase in room nights.

Lodging revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$1.4 million, Lodging revenue increased \$1.5 million, or 3.7%, in fiscal 2015 compared to the prior fiscal year primarily due to higher RevPAR at Tremblant.

Ski School revenue

Ski School revenue decreased in fiscal 2016 compared to fiscal 2015 primarily due to a decrease in Skier Visits at our Eastern resorts. Ski School revenue decreased 20.8% at our Eastern resorts, partially offset by an increase in Ski School revenue of 4.1% at our Colorado resorts. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$0.4 million, Ski School revenue decreased \$1.2 million, or 3.7%, in fiscal 2016 compared to fiscal 2015. During the summer season, Ski School revenue is derived from mountain bike instruction and child care, which increased slightly in fiscal 2016 compared to fiscal 2015.

Ski School revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$0.4 million, Ski School revenue increased \$2.8 million, or 9.6%, in fiscal 2015 compared to the prior fiscal year due to a higher yield per Skier Visit offset slightly by decreases in mountain bike instruction and child care revenue.

Retail and Rental revenue

Retail and Rental revenue decreased in fiscal 2016 compared to fiscal 2015 primarily due to a 14.2% decrease in Retail and Rental revenue at our Eastern resorts as a result of decreased retail sales and rental volume attributable to the unprecedented warm weather during the 2015/2016 ski season. The decrease at our Eastern resorts was partially offset by a 9.6% increase at our Colorado resorts driven by higher retail and rental sales from strong summer visitation and higher retail sales due to snowy conditions during the 2015/2016 ski season and the positive impact of owning Blue Mountain for all of fiscal 2016. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$1.7 million, Retail and Rental revenue decreased \$2.4 million, or 4.9%, in fiscal 2016 compared to the prior fiscal year.

Retail and Rental revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$1.4 million, Retail and Rental revenue increased \$4.9 million, or 10.8%, compared to the prior fiscal year primarily due to select price increases, increased retail sales volume in the East due to periods of unusually cold weather, an increase in mountain bike rentals and sales and successful summer liquidation sales.

Table of Contents

Food and Beverage revenue

Food and Beverage revenue increased in fiscal 2016 compared to fiscal 2015 primarily due to higher Revenue per Visit at our Colorado resorts and the inclusion of revenue from owning 100% of Blue Mountain during all of fiscal 2016 compared to fiscal 2015, which only included results of Blue Mountain since the Acquisition Date, partially offset by decreases in Food and Beverage revenue at our Eastern resorts. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$1.0 million, Food and Beverage revenue increased \$0.4 million, or 0.9%, in fiscal 2016 compared to fiscal 2015 driven by higher revenue at our Colorado resorts, higher summer visitation and an increase in group business revenue.

Food and Beverage revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$0.8 million, Food and Beverage revenue increased \$2.2 million, or 4.7%, in fiscal 2015 compared to the prior fiscal year due to an increase in yield per Skier Visit and an increase in weddings and banquets, primarily at our Colorado resorts.

Other revenue

Other revenue increased in fiscal 2016 compared to fiscal 2015 primarily due to the inclusion of revenue from owning 100% of Blue Mountain during all of fiscal 2016 compared to fiscal 2015, which only included results of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$0.9 million, Other revenue increased \$0.3 million, or 0.7%, in fiscal 2016 compared to the prior fiscal year.

Other revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to the inclusion of revenue from owning 100% of Blue Mountain since the Acquisition Date. Excluding Blue Mountain and an unfavorable foreign currency adjustment of \$0.5 million, Other revenue decreased \$0.5 million, or 1.2%, in fiscal 2015 compared to the prior fiscal year.

Mountain Adjusted EBITDA

Mountain Adjusted EBITDA decreased in fiscal 2016 compared to fiscal 2015 primarily due to a \$4.6 million decrease in Mountain revenue, partially offset by a \$0.1 million decrease in Mountain operating expenses. The decrease in Mountain operating expenses from \$337.1 million in fiscal 2015 to \$337.0 million in fiscal 2016 was primarily due to a favorable foreign currency adjustment of \$13.0 million partially offset by the inclusion of 100% of Blue Mountain during all of fiscal 2016 compared to fiscal 2015, which only included results of Blue Mountain since the Acquisition Date. Prior to the Acquisition Date, Blue Mountain was accounted for under the equity method and, therefore, the associated operating expenses were not included in Mountain operating expenses. Mountain Adjusted EBITDA in the prior year period included \$0.3 million of our pro rata share of EBITDA from Blue Mountain for the period from July 1, 2014 through the Acquisition Date. Excluding Blue Mountain and unfavorable foreign currency adjustments, Mountain revenue increased \$2.2 million, or 0.6%, in fiscal 2016, partially offset by a \$1.5 million, or 0.5%, increase in Mountain operating expenses, resulting in an increase to Mountain Adjusted EBITDA of \$0.8 million, or 1.0%.

Mountain Adjusted EBITDA increased in fiscal 2015 compared to fiscal 2014 primarily due to a \$75.1 million increase in Mountain revenue, partially offset by a \$55.2 million increase in Mountain operating expenses. The increase in Mountain operating expenses from \$281.9 million in fiscal 2014 to \$337.1 million in fiscal 2015 was primarily due to the inclusion of \$44.5 million of Blue Mountain operating expenses as well as increases in staffing at our resorts, health and medical coverage expense, compensation expense, and higher IT service costs. In fiscal 2015, Mountain operating expenses included 100% of Blue Mountain's operating expenses subsequent to the Acquisition

Date, whereas prior to the Blue Mountain Acquisition, Blue Mountain was accounted for under the equity method. In fiscal 2014, Mountain Adjusted EBITDA included \$6.6 million of our pro rata share of EBITDA from Blue Mountain while fiscal 2015 included 100% of Blue Mountain's revenue and operating expenses, which were \$57.7 million and \$44.5 million, respectively, following the Acquisition Date. Excluding Blue Mountain and unfavorable foreign currency adjustments, Mountain revenue increased \$24.9 million, or 7.1%, in fiscal 2015, partially offset by a \$16.5 million increase in Mountain operating expenses, resulting in an increase to Mountain Adjusted EBITDA of \$8.4 million.

Same Store Comparison of Mountain Results for the Year Ended June 30, 2016

Given the impact that the foreign currency adjustments, the disposition of IRCG in fiscal 2016 and the acquisition of Blue Mountain in fiscal 2015 had on our results, we believe same store metrics are useful in analyzing the underlying performance of our business. Same store growth is calculated in constant currency, as if we owned 100% of Blue Mountain during all of fiscal 2015 and excluding IRCG in both fiscal 2015 and fiscal 2016 ("Same Store"). We calculate constant U.S. dollar amounts by applying prior period average exchange rates to the current comparable period. The following table presents the percentage change of Mountain results as reported and on a Same Store basis from the prior year period:

Table of Contents

	Change in Fiscal		2016 vs. Fiscal	
	2015

Mountain Adjusted EBITDA	(5.2)%	(2.9)%		

Adventure

Revenue and Adventure Adjusted EBITDA

Revenue. The Adventure segment earns revenue from a variety of activities conducted at CMH. CMH revenue is derived primarily from the sale of adventure packages that include helicopter accessed skiing, mountaineering or hiking, lodging at facilities owned or leased by CMH and food and beverage services. In addition to package revenue, CMH earns ancillary revenue from the sale of additional vertical meters of skiing, retail merchandise, alcoholic beverages, spa services and the sale of other products and services not included in the vacation package.

The Adventure segment also generates ancillary revenue relating to performance of fire suppression services during the summer months in the Western United States and Western Canada. These activities are performed on an as-needed basis or pursuant to contracts that have a term of one to five years. Ancillary revenue is also derived from MRO services performed by Alpine Aerotech LP on third-party aircraft, as well as from leasing aircraft to unaffiliated third parties.

Adventure Adjusted EBITDA. Adventure Adjusted EBITDA is Adventure revenue less Adventure operating expenses, adjusted for Adjusted EBITDA attributable to noncontrolling interests. Adventure operating expenses consist primarily of compensation and benefits, fuel, aircraft and facility maintenance and manufacturing expenses, insurance, utilities, permit and lease payments, credit card fees, food and beverage costs, and general and administrative expenses.

Comparison of Adventure Results for the Years Ended June 30, 2016, 2015 and 2014 (dollars in thousands)

	Year Ended June 30,			2016 vs. 2015		2015 vs. 2014	
	2016	2015	2014	\$	%	\$	%
				Change	Change	Change	Change

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Adventure Adjusted EBITDA \$22,146 \$13,305 \$16,558 \$8,841 66.4 % \$(3,253) (19.6)%

Table of Contents

Adventure revenue

Adventure revenue increased in fiscal 2016 compared to fiscal 2015 primarily due to a \$6.6 million increase in CMH revenue and a \$1.0 million increase in ancillary service revenue. Excluding the impact of an unfavorable foreign currency adjustment of \$11.5 million, CMH and ancillary services revenue would have been \$13.0 million, or 26.2%, and \$6.1 million, or 12.9%, higher than the prior fiscal year, respectively. The increase in CMH revenue was primarily driven by an increase in guest nights, higher yields and operating one additional lodge for summer operations. The increase in ancillary services revenue was primarily due to an increase in fire suppression related activities as a result of above average forest fire activity in the first quarter of fiscal 2016 and an increase in helicopter MRO services and part sales.

Adventure revenue decreased in fiscal 2015 compared to fiscal 2014 primarily due to a decrease of \$7.8 million in CMH revenue, partially offset by an increase of \$2.5 million in ancillary services. Excluding the impact of an unfavorable foreign currency adjustment of \$5.8 million, CMH revenue would have been \$2.0 million, or 3.5%, lower than the prior fiscal year. The decrease in CMH revenue was primarily due to poor snowfall and warm temperatures resulting in deferred or canceled trips. Excluding the impact of an unfavorable foreign currency adjustment of \$4.1 million, in fiscal 2015, ancillary services would have been \$6.7 million, or 15.0%, higher than the prior fiscal year. The increase in revenue from ancillary services was primarily attributable to an increase in fire suppression activities as a result of above average forest fire activity in Western Canada in the fourth quarter of fiscal 2015.

Adventure Adjusted EBITDA

Adventure Adjusted EBITDA increased in fiscal 2016 compared to fiscal 2015 primarily due to a \$7.6 million increase in Adventure revenue coupled with a \$1.9 million decrease in Adventure operating expenses, from \$81.0 million in fiscal 2015 to \$79.1 million in fiscal 2016. After removing \$3.2 million of Adjusted EBITDA attributable to the 80.0% interest in Alpine Helicopters that is owned by a third party, Adventure Adjusted EBITDA increased \$8.8 million. The decrease in Adventure operating expenses in fiscal 2016 compared to fiscal 2015 was primarily attributable to an \$8.3 million favorable foreign currency adjustment. Excluding the foreign currency adjustment, Adventure operating expenses increased \$6.4 million, or 7.9%, in fiscal 2016 compared to fiscal 2015, primarily due to higher variable expenses associated with the increase in CMH guest nights and fire suppression activities.

Adventure Adjusted EBITDA decreased in fiscal 2015 compared to fiscal 2014 primarily due to a \$5.3 million decrease in Adventure revenue, partially offset by a \$3.9 million decrease in Adventure operating expenses, from \$84.9 million in fiscal 2014 to \$81.0 million in fiscal 2015. The decrease in operating expenses is primarily attributable to lower helicopter operational expenses at CMH as a result of fewer helicopter flight hours and favorable changes in fuel costs. After removing \$2.5 million of Adjusted EBITDA attributable to the third party's interest in Alpine Helicopters, Adventure Adjusted EBITDA decreased by \$3.3 million in fiscal 2015 compared to fiscal 2014. Excluding an unfavorable foreign currency adjustment of \$2.5 million, Adventure Adjusted EBITDA decreased by \$0.8 million in fiscal 2015 compared to the prior year.

Same Store Comparison of Adventure Results for the Year Ended June 30, 2016

The following table presents the percentage change of Adventure results as reported and on a Same Store basis from the prior year period:

Change in
Fiscal 2016
vs. Fiscal
2015

	As Reported	Same Store
Adventure revenue	7.9 %	19.7 %
Adventure Adjusted EBITDA	66.4 %	90.5 %

Real Estate

Revenue and Real Estate Adjusted EBITDA

Revenue. The Real Estate segment primarily earns revenue from IHM and Playground. IHM generates revenue from managing rental operations at the Honua Kai Resort and Spa in Maui, Hawaii and the Westin Monache Resort in Mammoth Lakes, California. Playground earns revenue primarily from commissions on the sales of real estate. During the fiscal periods presented, we did not have any active development projects. We also manage commercial real estate for our properties and third parties through our Real Estate segment. The Real Estate segment also included revenue generated by IRCG until the Disposition Date.

Table of Contents

Real Estate Adjusted EBITDA. Real Estate Adjusted EBITDA is Real Estate revenue less Real Estate operating expenses, adjusted for our pro rata share of EBITDA for our equity method investments in MHM and Chateau. Real Estate operating expenses include: compensation and benefits; insurance; general and administrative expenses; and land carrying costs and development planning and appraisal expenses related to the core entitled land surrounding the bases of our Steamboat, Winter Park, Tremblant, Stratton and Snowshoe resorts. Until the Disposition Date, Real Estate Adjusted EBITDA also included interest income earned from receivables related to IRCG operations.

Comparison of Real Estate Results for the Years Ended June 30, 2016, 2015 and 2014 (dollars in thousands)

	Year Ended June 30,			2016 vs. 2015		2015 vs. 2014	
	2016	2015	2014	\$ Change	% Change	\$ Change	% Change
Real Estate revenue	\$42,433	\$59,274	\$58,530	\$(16,841)	(28.4)%	\$744	1.3 %
Real Estate Adjusted EBITDA	\$6,625	\$10,423	\$9,219	\$(3,798)	(36.4)%	\$1,204	13.1 %

Real Estate revenue

Real Estate revenue decreased in fiscal 2016 compared to fiscal 2015 primarily due to decreases of \$17.1 million and \$0.7 million at IRCG and Playground, respectively, partially offset by an increase of \$1.0 million at IHM. The decrease in revenue at IRCG was primarily due to lower sales volume, an unfavorable foreign currency adjustment of \$1.0 million and the closing of the IRCG Transaction subsequent to which we no longer recorded any activity associated with the business of IRCG. The decrease in Playground revenue was primarily due to \$2.2 million of revenue from the sale of a parcel of land at Tremblant in March 2015, compared to \$1.9 million of revenue from the sale of a parcel of land at Tremblant in June 2016.

Real Estate revenue increased in fiscal 2015 compared to fiscal 2014 primarily due to \$2.2 million of revenue from the sale of a parcel of land at Tremblant in March 2015, partially offset by a decrease in revenue at IRCG. Excluding an unfavorable foreign currency adjustment of \$1.5 million, IRCG revenue increased \$1.2 million, or 4.4%, in fiscal 2015 compared to fiscal 2014. At IRCG, sales of vacation club products may be made in exchange for cash or be financed. For sales where we provide financing, we defer revenue recognition until we receive an executed agreement and a minimum down payment equal to 10.0% of the purchase price plus the fair value of any sales incentives provided to the purchaser. In fiscal 2015, we had a higher volume of financed sales with at least 10.0% of the purchase price paid as compared to fiscal 2014, which increased the amount of previously deferred revenue recognized.

Real Estate Adjusted EBITDA

Real Estate Adjusted EBITDA decreased in fiscal 2016 compared to fiscal 2015 due to a \$16.8 million decrease in Real Estate revenue partially offset by a \$14.4 million decrease in Real Estate operating expenses, from operating expenses of \$55.7 million in fiscal 2015 to \$41.3 million in fiscal 2016. We also recognized a \$0.6 million increase in our pro rata share of EBITDA from our equity method investments in MHM and Chateau during fiscal 2016. Excluding a favorable foreign currency adjustment of \$1.2 million, in fiscal 2016, Real Estate operating expenses decreased \$13.2 million, or 23.6%, of which \$7.6 million was due to the closing of the IRCG Transaction, subsequent to which we no longer recorded any activity associated with the business of IRCG. Real Estate operating expenses also decreased by \$4.4 million in fiscal 2016 due to lower sales volume and associated selling costs at IRCG prior to the Disposition Date.

Real Estate Adjusted EBITDA increased in fiscal 2015 compared to fiscal 2014 due to a \$0.7 million increase in Real Estate revenue and a \$0.5 million decrease in Real Estate operating expenses, from operating expenses of \$56.2 million in fiscal 2014 to \$55.7 million in fiscal 2015. Additionally, in fiscal 2015, Real Estate Adjusted EBITDA was

impacted by a \$0.4 million increase in our pro rata share of EBITDA from our equity method investment in MHM, partially offset by a \$0.5 million decrease in interest income earned from IRCG receivables.

Same Store Comparison of Real Estate Results for the Year Ended June 30, 2016

The following table presents the percentage change of Real Estate results as reported and on a Same Store basis from the prior year period:

Table of Contents

	Change in Fiscal 2016 vs. Fiscal 2015	
	As Reported	Same Store
Real Estate revenue	(28.4)%	0.9 %
Real Estate Adjusted EBITDA	(36.4)%	90.9%

Non-GAAP Financial Measures

We use Adjusted EBITDA as a measure of our operating performance. Adjusted EBITDA is a supplemental non-GAAP financial measure. Adjusted EBITDA is not a substitute for net income (loss), income (loss) from continuing operations, cash flows from operating activities or any other measure prescribed by accounting principles generally accepted in the United States of America ("GAAP").

Our board of directors and management team focus on Adjusted EBITDA as a key performance and compensation measure. Adjusted EBITDA assists us in comparing our performance over various reporting periods because it removes from our operating results the impact of items that our management believes do not reflect our core operating performance. The compensation committee of our board of directors will determine the annual variable compensation for certain members of our management team based, in part, on Adjusted EBITDA.

There are limitations to using non-GAAP measures such as Adjusted EBITDA. Although we believe that Adjusted EBITDA can make an evaluation of our operating performance more consistent because it removes items that do not reflect our core operations, other companies in our industry may define Adjusted EBITDA differently than we do. As a result, it may be difficult to use Adjusted EBITDA to compare the performance of those companies to our performance. Adjusted EBITDA should not be considered as a measure of the income generated by our business or discretionary cash available to us to invest in the growth of our business. Our management compensates for these limitations by reference to our GAAP results and by using Adjusted EBITDA as a supplemental measure. The Company's definition of Adjusted EBITDA is generally consistent with the definition of Consolidated EBITDA in the Credit Agreement, with exceptions related to not adjusting for recurring public company costs and foreign currency translation adjustments related to operational activities and adjusting for executive management restructuring costs.

The following table reconciles net loss attributable to the Company to total Adjusted EBITDA for the periods presented (in thousands):

	Year Ended June 30,		
	2016	2015	2014
Net income (loss) attributable to Intrawest Resorts Holdings, Inc.	\$40,873	\$(6,920)	\$(189,417)

Income attributable to noncontrolling interest	2,193	1,821	369
Total Adjusted EBITDA	\$113,105	\$112,700	\$101,194

See Part II- Item 8, Financial Statements and Supplementary Data, Note 17, “Segment Information” for definition and detailed discussion of our Adjusted EBITDA measure.

Liquidity and Capital Resources

Overview

Our primary goal as it relates to liquidity and capital resources is to maintain an appropriate level of debt and cash to fund operations, expansions, maintenance projects and other capital investments and to ensure that we are poised for growth in our businesses. Our principal sources of liquidity are cash generated from operations, existing cash on hand and our revolving credit facility. Our principal uses of cash include the funding of working capital obligations, capital expenditures and servicing our debt.

Due to the seasonality of our business, there are significant fluctuations in our cash and liquidity throughout the year. Our cash balances are typically at their highest at the end of our third fiscal quarter, following the peak ski season, and at their lowest toward the middle of our second fiscal quarter, before the start of the ski season.

Significant Sources of Cash

Historically, we have financed our capital expenditures and other cash needs through cash generated from operations. We generated \$65.2 million, \$79.1 million, and \$42.9 million of cash from operating activities during the years ended June 30, 2016, 2015 and 2014, respectively. We currently anticipate that our ongoing operations will continue to provide a significant source of future operating cash flows with the third fiscal quarter generating the highest cash flows due to the seasonality of our business.

In the fiscal year ended June 30, 2016, we received \$84.6 million of gross proceeds as a result of the IRCG Transaction.

As part of the refinancing in December 2013, we entered into the Credit Agreement, which provided for a \$540.0 million term loan facility ("Term Loan"), a \$55.0 million senior secured first-lien line of credit facility ("LC Facility"), and a \$25.0 million senior secured first-lien revolving loan facility (the "Revolver" and, together with the Term Loan and LC Facility, collectively referred to herein as our "Senior Debt"). In September 2014, pursuant to the Incremental Amendment, we borrowed an incremental \$60.0 million under the Term Loan,

Table of Contents

primarily to finance the Blue Mountain Acquisition, as described in Part II - Item 8, Financial Statements and Supplementary Data, Note 3, "Acquisitions and Dispositions". The proceeds were also used to pay certain fees, commissions and expenses related to the Blue Mountain Acquisition and for working capital. The incremental borrowing has the same terms and maturity date as the original Term Loan. While the Fourth Amendment resulted in certain changes to our incremental borrowing capacity, we continue to have the ability to increase the borrowings on the Term Loan under certain circumstances and subject to certain criteria as outlined in the Fourth Amendment; so long as, after giving effect to any additional amounts borrowed, we remain compliant with all covenants of the Credit Agreement.

As of June 30, 2016, we had available capacity of \$12.2 million under the LC Facility and \$25.0 million under the Revolver. The Credit Agreement contains affirmative and negative covenants that restrict, among other things, the ability of our subsidiaries to incur indebtedness, dispose of property, reinvest the proceeds from certain asset sales, and make investments or distributions. We were in compliance with the covenants of the Credit Agreement as of June 30, 2016.

On February 5, 2014, we completed our initial public offering and sold 3,125,000 shares of common stock at an offering price of \$12.00 per share. After deducting underwriting discounts and commissions and offering expenses payable by us, we received net proceeds of \$28.5 million. We used the proceeds for working capital and other general corporate purposes.

Our cash and cash equivalents balance as of June 30, 2016 was \$107.1 million. We expect that our liquidity needs for at least the next 12 months will be met by continued utilization of operating cash flows and borrowings under the Revolver, if needed.

Significant Uses of Cash

Our current cash requirements include providing for our working capital obligations, capital expenditures and servicing our debt.

In the fiscal year ended June 30, 2016, pursuant to the Tender Offer, we paid \$50.6 million to purchase approximately 5.6 million shares of our common stock at a purchase price of \$9.00 per share. In the fiscal year ended June 30, 2015, we paid \$54.8 million as cash consideration for the Blue Mountain Acquisition, which included a \$3.0 million payment for a working capital adjustment.

We make capital expenditures to maintain the safety and quality of our operations within our Mountain, Adventure and Real Estate segments. Many of these capital expenditures are related to maintenance capital, including lift maintenance, snow grooming machine replacement, snowmaking equipment upgrades and building refurbishments. We also make growth capital expenditures that are discretionary in nature and intended to generate new revenue, improve our level of service, or increase the scale of our operations. Capital expenditures were \$51.1 million, \$41.9 million and \$45.2 million for the years ended June 30, 2016, 2015 and 2014, respectively, or 8.9%, 7.1% and 8.6% of total revenue for the respective periods. We manage our capital spend on a calendar year basis and expect to spend between \$32.0 million and \$34.0 million on maintenance related capital projects and between \$11.0 million and \$14.0 million on growth capital projects in calendar year 2016.

We paid principal, interest and fees to our lenders of \$75.3 million, \$48.7 million and \$646.2 million for the years ended June 30, 2016, 2015 and 2014, respectively. The payments in fiscal 2016 included an excess cash flow prepayment of \$8.8 million, as defined in the Credit Agreement, as well as a \$25.0 million principal repayment in conjunction with executing the Fourth Amendment. The payments in fiscal 2014 included the principal payments related to the refinancing of our Senior Debt in December 2013. The majority of principal payments on our long-term

debt under the Term Loan are not due until 2020.

Our current applicable margin is 4.00% under the Term Loan, 3.75% under the Revolver and 4.50% under the LC Facility.

Our debt service requirements can be impacted by changing interest rates as we had \$554.5 million of variable rate debt outstanding as of June 30, 2016. As of June 30, 2016, the three month LIBOR was 0.65%. As our variable rate borrowings have a LIBOR floor of 1.0%, a 100-basis point decrease in the 3 month LIBOR would not impact our annual interest payments. By contrast, a 100-basis point increase in the 3 month LIBOR would cause our annual interest payments to increase by approximately \$3.7 million.

Table of Contents

Cash Flows for the Years Ended June 30, 2016, 2015 and 2014

The table below sets forth for the periods indicated our net cash flow from operating, investing and financing activities, as well as the effect of exchange rates on cash:

	Year Ended June 30,			2016 vs.	2015 vs.
	2016	2015	2014	2015	2014
	(in thousands)			\$ Change	\$ Change
Net cash provided by (used in):					
Operating activities	\$65,181	\$79,137	\$42,884	\$(13,956)	\$36,253
Investing activities	39,400	(82,604)	(53,686)	122,004	(28,918)
Financing activities	(94,569)	45,829	7,863	(140,398)	37,966
Effect of exchange rate on cash	6,474	(7,802)	(816)	14,276	(6,986)
Net increase (decrease) in cash and cash equivalents	\$16,486	\$34,560	\$(3,755)	\$(18,074)	\$38,315

Operating Activities

The \$14.0 million decrease in cash provided by operating activities in fiscal 2016 compared to fiscal 2015 was primarily related to the IRCG Transaction and the removal of IRCG's working capital accounts partially offset by favorable changes in working capital, primarily in deferred revenue and deposits.

The \$36.3 million increase in cash provided by operating activities in fiscal 2015 compared to fiscal 2014 was primarily related to the cash generated from increased income from operations and favorable changes in working capital, primarily due to an increase in deferred revenue and deposits.

Investing Activities

The \$122.0 million increase in cash provided by investing activities in fiscal 2016 compared to fiscal 2015 was primarily related to the proceeds received in the IRCG Transaction and lower contributions to equity method investments. These increases in cash provided by investing activities were partially offset by an increase in capital expenditures in fiscal 2016 compared to the prior year period.

The \$28.9 million increase in cash used in investing activities in fiscal 2015 compared to fiscal 2014 was primarily related to the Blue Mountain Acquisition partially offset by a decrease in capital expenditures.

Financing Activities

The \$140.4 million increase in cash used in financing activities in fiscal 2016 compared to fiscal 2015 was primarily related to higher principal repayments of debt in fiscal 2016 compared to fiscal 2015 coupled with the Tender Offer. In fiscal 2016, we made an excess cash flow prepayment of \$8.8 million, as defined in the Credit Agreement, and repaid \$25.0 million principal in conjunction with executing the Fourth Amendment. We also acquired approximately 5.6 million shares of our common stock, at a purchase price of \$9.00 per share, for \$50.6 million. In fiscal 2015, we borrowed an incremental \$60.0 million under the Term Loan, primarily to finance the Blue Mountain Acquisition.

The \$38.0 million increase in cash provided by financing activities in fiscal 2015 compared to fiscal 2014 was primarily related to lower principal repayments of debt in fiscal 2015 compared to fiscal 2014. In fiscal 2014, the proceeds from the Term Loan, together with cash on hand and \$48.3 million contributed to us by entities managed or controlled by Fortress, were used to refinance and extinguish existing debt under the First Lien Credit Agreement

dated December 4, 2012 and the Second Lien Credit Agreement, also dated December 4, 2012.

Contractual Obligations

As part of our ongoing operations, we enter into arrangements that obligate us to make future payments under contracts such as debt agreements, lease agreements and construction agreements in conjunction with our resort capital expenditures. A summary of our contractual obligations as of June 30, 2016 is set forth below (in thousands):

Contractual Obligations ⁽¹⁾	Total	Fiscal 2017	2-3 years	4-5 years	More than 5 years
Debt principal and interest	\$682,739	\$28,654	\$68,843	\$584,951	\$291
Capital lease obligations	91,095	4,848	11,174	11,081	63,992
Operating leases	32,736	9,321	12,111	6,321	4,983
Employee benefit plan obligations ⁽²⁾	27,976	3,285	6,259	5,491	12,941
Purchase obligations and service contracts ⁽³⁾	8,628	4,953	3,358	317	—
Total contractual obligations	\$843,174	\$51,061	\$101,745	\$608,161	\$82,207

(1) We do not expect any significant cash payments related to uncertain tax positions.

(2) For discussion of the closed employee benefit plan obligations, see Part II-Item 8, Financial Statements and Supplementary Data, Note 15, "Employee Benefit Plans."

(3) For obligations with cancellation provisions, the amounts were limited to the non-cancelable portion of the agreement terms or the minimum cancellation fee.

Off-Balance Sheet Arrangements

As of June 30, 2016, we did not have off balance sheet transactions that are expected to have a material effect on our financial condition, revenue, expenses, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, and related disclosures. These estimates form the basis of judgments we make about the carrying values of our assets and liabilities, which are not readily apparent from other sources. We base our estimates and judgments on historical experience and on various other assumptions that we believe are reasonable under the circumstances. On an ongoing basis, we evaluate our estimates and assumptions. Our actual results may differ from these estimates under different assumptions or conditions.

We have identified the policies and estimates below as critical to our current and future business operations and the understanding of our results of operations. For a detailed discussion on the application of these and other significant accounting policies see Part II- Item 8, Financial Statements and Supplementary Data, Note 2, "Significant Accounting Policies". These policies and estimates are considered "critical" because they either had a material impact or they have the potential to have a material impact on our financial statements, and because they require significant judgments, assumptions or estimates.

Revenue Recognition

We earn revenue from a variety of sources. Revenue is recognized when the following criteria have been met: persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the fee is fixed or determinable and the collection of funds is reasonably assured. The following describes revenue recognition for our three segments:

Mountain segment revenue is derived from a wide variety of sources, including sales of lift products (including season passes), ski school operations, retail sales, equipment rentals, lodging operations and food and beverage operations. Persuasive evidence is obtained and collection of funds is assured through cash transactions or credit card validation at the point of sale. Revenue is recognized as goods are delivered or services are performed. Season (i) pass revenue, although primarily collected prior to the ski season, is recognized in our consolidated financial statements during the ski season based on the estimated average number of visits by season pass holders in each month during the ski season, which is based on historical three-year average visitation by season pass holders at our resorts. Frequency product revenue is recognized as used, and unused portions are recognized based on the prior three-year average usage for each frequency product.

Adventure segment revenue is derived from a variety of sources, primarily from all-inclusive packages for stays and tours for helicopter accessed skiing, mountaineering and hiking at our owned and leased lodges, as well as ancillary revenue from helicopter maintenance, repair, and overhaul services, leasing, and off-season fire (ii) suppression services. Revenue is recognized as goods are delivered or services are performed. For CMH adventure vacation packages, payments in advance are recognized as revenue as goods are delivered or services are performed.

The Real Estate segment earns revenue from IHM and Playground, as well as from IRCG prior to the Disposition Date. IHM generates revenue from managing rental operations at the Honua Kai Resort and Spa in Maui, Hawaii and the Westin Monache Resort in Mammoth Lakes, California. Playground earns revenue from the commissions on the sales of real estate. We also manage commercial real estate for owned properties and third parties. IRCG generated revenue from the sale of vacation points, management of properties for Club Intrawest, an unaffiliated, not-for-profit entity, management of a private exchange company, and income on the receivables portfolio. (iii) Vacation points revenue associated with membership in the vacation ownership business of IRCG was recognized when the purchaser paid the amount due on closing, all contract documentation had been executed and all other significant conditions of sale were met. We followed real estate time-sharing accounting principles, which set out specific guidelines for assessing whether the buyer's initial and continuing investments were adequate to demonstrate a commitment to pay for the property. Such a demonstration was required for the seller of a time-sharing arrangement to recognize profit by the full accrual method. Sales were recorded upon closing when profitability could be determined and collectability could be reasonably assured. Buyers could finance a portion of the sales price through nonrecourse loans.

Commission revenue from brokerage operations for our owned real estate is included in Real Estate revenue and is recognized at the time an offer of sale is closed by the purchaser or all other contractual obligations have been satisfied. Commission revenue for third-party projects from real estate brokerage operations is included in Real Estate revenue and is recognized when the deal's listing agreement is executed.

Property, Plant and Equipment

Property, plant and equipment is recorded at cost less accumulated depreciation less any impairment loss. Repairs and maintenance are expensed as incurred. Expenditures that improve the service capacity or extend the useful life of an asset are capitalized. When property, plant and equipment is retired or otherwise disposed of, the related gain or loss is included in operating income (loss). Depreciation is calculated using the straight-line method over the estimated useful life of each asset. The estimated useful lives of each asset category are as follows:

Asset Category	Estimated Life in Years
Buildings and building improvements	5-40
Ski lifts and area improvements	5-30
Automotive, helicopters and other equipment	2-20
Golf course improvements	20

Certain buildings, area improvements and equipment are located on leased or licensed land and are amortized over the lesser of the lease or license term or the assets' estimated useful life.

Goodwill and Intangible Assets

51

Table of Contents

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination. Goodwill is not amortized, but is tested for impairment annually as of June 30th and at any time when events or circumstances suggest impairment may have occurred. We have reporting units with allocated goodwill in both the Mountain and Real Estate segments.

The testing for impairment consists of a comparison of the fair value of the reporting unit with its carrying amount. If the carrying amount of the reporting unit, including goodwill, exceeds the fair value, an impairment will be recognized equal to the difference between the carrying value of the reporting unit goodwill and the implied fair value of the goodwill. In testing goodwill for impairment, we determine the estimated fair value of our reporting units based upon a discounted future cash flow analysis.

Goodwill is our only indefinite-lived intangible asset. Definite-lived intangible assets are amortized using the straight line method over the shorter of their contractual term or estimated useful lives.

Our major definite-lived intangible asset categories and estimated useful lives are as follows:

Intangible Asset Category	Estimated Life in Years
Permits and licenses	20-45
Trademarks and trade names	10-20
Customer relationships	4-8
Other	8-20

Long-lived Assets

We evaluate potential impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. An impairment will be recognized as the amount by which the carrying amount of a long-lived asset exceeds its fair value.

Income Taxes

Deferred tax assets and liabilities are recorded for the estimated future tax effects of temporary differences between tax basis of assets and liabilities and book basis reported in the consolidated balance sheets and for operating loss and tax credit carryforwards. The change in deferred tax assets and liabilities for the period measures the deferred tax provision or benefit for the period. Effects of changes in enacted tax laws on deferred tax assets and liabilities are reflected as adjustments to the tax provision or benefit in the period of enactment. To the extent that it is considered to be more likely than not that some or all of the deferred tax assets will not be realized, a valuation allowance is provided.

We recognize accrued interest related to uncertain tax positions as a component of income tax expense. Penalties, if incurred, are recorded in operating expenses in the consolidated statements of operations.

Recent Accounting Pronouncements

For a discussion of the recent accounting pronouncements relevant to our business operations, see the information provided under Part II- Item 8, Financial Statements and Supplementary Data, Note 2, "Significant Accounting Policies".

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Interest Rate Fluctuations

Our exposure to market risk is limited primarily to the fluctuating interest rates associated with variable rate indebtedness. At June 30, 2016, we had approximately \$554.5 million of variable rate indebtedness, representing approximately 99.8% of our total debt outstanding, at an average interest rate for the year ended June 30, 2016 of approximately 4.8%. As of June 30, 2016, the 3 month LIBOR was 0.65%. As our variable rate borrowings have a LIBOR floor of 1.0%, a 100-basis point decrease in the 3 month LIBOR would not impact our annual interest payments. By contrast, a 100-basis point increase in the 3 month LIBOR would cause our annual interest payments to increase by approximately \$3.7 million.

Foreign Currency Fluctuations

In addition to our operations in the United States, we conduct operations in Canada from which we receive revenue in Canadian dollars. Because our reporting currency is in U.S. dollars, fluctuations in the value of the Canadian dollar against the U.S. dollar have had and will continue to have an effect, which may be significant, on our reported financial results. A decline in the value of the Canadian dollar, or in any other foreign currencies in which we receive revenue against the U.S. dollar, will reduce our reported revenue, expenses, and Adjusted EBITDA from operations in foreign currencies, while an increase in the value of any such foreign currencies against the U.S. dollar will tend to increase our reported revenue, expenses, and Adjusted EBITDA from operations in foreign currencies. Total Canadian dollar denominated revenue comprised approximately 41%, 41%, and 38% of total revenue for the years ended June 30, 2016, 2015 and 2014, respectively. Based upon our ownership of Canadian subsidiaries, holding all else constant, a 10% unfavorable change in foreign currency exchange rates would have reduced our reported revenue by approximately \$22.1 million for the year ended June 30, 2016. Any negative impact on revenue would be naturally hedged, in part, by our Canadian dollar denominated operating expenses. Variations in exchange rates can significantly affect the comparability of our financial results between reported periods. We do not currently engage in any foreign currency hedging activities related to this exposure.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Intrawest Resorts Holdings, Inc.:

We have audited the accompanying consolidated balance sheets of Intrawest Resorts Holdings, Inc. and subsidiaries as of June 30, 2016 and 2015, and the related consolidated statements of operations and comprehensive income (loss), equity, and cash flows for each of the years in the three year period ended June 30, 2016. In connection with our audits of the aforementioned consolidated financial statements, we also have audited the related consolidated financial statement schedule, Schedule II - Valuation and Qualifying Accounts and Reserves, for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Intrawest Resorts Holdings, Inc. and subsidiaries as of June 30, 2016 and 2015, and the results of their operations and their cash flows for each of the years in the three year period ended June 30, 2016, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, Schedule II - Valuation and Qualifying Accounts and Reserves, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Notes to Consolidated Financial Statements

1. Formation and Business

Formation of the Company

Intrawest Resorts Holdings, Inc. is a Delaware corporation that was formed on August 30, 2013, and had not, prior to the completion of the restructuring transactions in which it acquired substantially all of the assets, liabilities and operations of Intrawest Cayman L.P. (the "Partnership"), which is described below under "Restructuring", conducted any activities other than those incident to its formation for the preparation of its initial public offering, which was consummated on February 5, 2014. The Partnership was formed on February 22, 2007 as a holding company that operated through various subsidiaries primarily engaged in the operation of mountain resorts, adventure, and real estate businesses, principally throughout North America.

Unless the context suggests otherwise, references in the notes to consolidated financial statements to the "Company", "our", "us", or "we" refer to the Partnership and its consolidated subsidiaries prior to the consummation of the restructuring transactions described below under "Restructuring" and to Intrawest Resorts Holdings, Inc. and its consolidated subsidiaries after the consummation of the restructuring transactions described below under "Restructuring".

Business Operations

The Company conducts business through three segments: Mountain, Adventure and Real Estate. The Mountain segment includes the Company's mountain resort and lodging operations at Steamboat Ski & Resort ("Steamboat") and Winter Park Resort ("Winter Park") in Colorado, Stratton Mountain Resort ("Stratton") in Vermont, Snowshoe Mountain Resort ("Snowshoe") in West Virginia, Mont Tremblant Resort ("Tremblant") in Quebec, and Blue Mountain Ski Resort ("Blue Mountain") in Ontario, of which the Company owned a 50.0% equity interest for all relevant periods prior to the Company's acquisition of the remaining 50.0% equity interest on September 19, 2014 (the "Blue Mountain Acquisition"). The Mountain segment derives revenue mainly from sales of lift products, lodging, ski school services, retail and rental merchandise, food and beverage, and other ancillary services.

The Adventure segment includes Canadian Mountain Holidays ("CMH"), which provides helicopter accessed skiing, mountaineering and hiking at eleven lodges in British Columbia, Canada. In support of CMH's operations, the Company owns a fleet of 36 Bell helicopters that are also used in the off-season for fire suppression activities and other commercial uses in the United States and Canada. The Company's subsidiary, Alpine Aerotech L.P., provides helicopter maintenance, repair and overhaul services to the Company's fleet of helicopters as well as to aircraft owned by unaffiliated third parties.

The Real Estate segment is comprised of Intrawest Hospitality Management, Inc. ("IHM"), which principally manages condominium hotel properties in Maui, Hawaii and Mammoth Lakes, California, Playground, a residential real estate sales and marketing business, the Company's 50.0% interest in Mammoth Hospitality Management L.L.C., the Company's 57.1% economic interest in Chateau M.T. Inc. ("Chateau") and included Intrawest Resort Club Group ("IRCG"), a vacation club business, until the business was sold on January 29, 2016. The Real Estate segment is also comprised of real estate development activities and includes costs associated with these activities, such as planning activities and land carrying costs.

Restructuring

On December 9, 2013, the Company was party to a series of transactions in which the Partnership caused its indirect subsidiaries to contribute 100% of their equity interest in both Intrawest U.S. Holdings Inc., a Delaware corporation ("Intrawest U.S."), and Intrawest ULC, an unlimited liability company organized under the laws of the Province of Alberta ("Intrawest ULC"), to an indirect subsidiary of the Company. Concurrently, \$1.1 billion of notes payable to affiliates, including \$723.8 million of accrued and unpaid interest thereon, were exchanged for 42,999,900 shares of the Company's common stock (or 41,881,903 shares after giving effect to the 0.974-for-1 reverse stock split) and subsequently canceled. The Company's subsidiaries were released from all obligations, including guarantor obligations, in respect of an additional \$355.6 million of notes payable to affiliates (the "Third Lien Loan"), including \$145.6 million of accrued and unpaid interest thereon. These transactions are collectively referred to as the "Restructuring". The accompanying consolidated statements of operations include interest expense related to the notes payable to affiliates of \$119.9 million for the year ended June 30, 2014.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

The Restructuring was accounted for as a transaction among entities under common control as Intrawest Resorts Holdings, Inc. and the Partnership was and continue to be under the common control of entities managed or controlled by Fortress Investment Group, LLC, (collectively "Fortress"). After the Restructuring and the completion of the Company's initial public offering in February 2014, Fortress beneficially owned 60.1% of the voting and economic equity interest of the Company. As of June 30, 2016, Fortress beneficially owned approximately 68.0% of the Company's outstanding shares. The Company is the parent holding company of the businesses conducted by Intrawest U.S. and Intrawest ULC and their respective subsidiaries. Due to the entities being under common control, the assets, liabilities and equity contributed to the Company were recorded at their historical carrying values on the consolidated balance sheet. The accompanying consolidated statements of operations include the historical results of the Partnership combined with the results of the Company since the Restructuring. The consolidated statements of equity include \$2.8 billion of accumulated net losses attributable to the partners, which were converted to and reflected as an accumulated deficit of the Company. The historical contributed capital from partners of \$1.4 billion, combined with the debt to equity conversion from the Restructuring was converted to and reflected as additional paid-in capital ("APIC"). The consolidated statement of cash flows for the year ended 2014 reflects the activity of the historical Partnership balances combined with those of the Company since the Restructuring. As a result of the Restructuring, the accompanying consolidated balance sheet as of June 30, 2014 reflects the removal of approximately \$4.1 million in total assets as the European operations of the Partnership were not contributed to the Company in connection with the Restructuring. In addition, the accompanying consolidated balance sheet as of June 30, 2014 reflects an additional \$1.5 billion of APIC related to the conversion of the \$1.1 billion of affiliate debt and the removal of the principal balance and accrued and unpaid interest of the Third Lien Loan.

2. Significant Accounting Policies

Basis of Presentation and Use of Estimates

The accompanying consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during each reporting period. Actual results could differ from those estimates. Certain previously reported amounts have been reclassified to conform to the current period financial statement presentation.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company, its majority-owned subsidiaries and a variable interest entity ("VIE") for which the Company is the primary beneficiary. All significant intercompany transactions are eliminated in consolidation. Investments in which the Company does not have a controlling interest or is not the primary beneficiary, but over which the Company is able to exercise significant influence, are accounted for under the equity method. Under the equity method, the original cost of the investment is adjusted for the Company's share of post-acquisition earnings or losses increased by contributions less distributions received.

The Company owns a 20.0% equity interest in Alpine Helicopters, Inc. ("Alpine Helicopters"). Alpine Helicopters employs all the pilots that fly the helicopters supporting CMH operations. Alpine Helicopters leases 100% of its

helicopters from Intrawest ULC, a consolidated subsidiary of the Company, creating economic dependence and therefore giving Intrawest ULC a variable interest in Alpine Helicopters. Alpine Helicopters is a VIE for which the Company is the primary beneficiary and is consolidated in the accompanying consolidated financial statements. The remaining 80.0% equity interest in Alpine Helicopters is held by a trust for the benefit of the employees of Alpine Helicopters and is reflected as a noncontrolling interest in the accompanying consolidated financial statements. As of June 30, 2016, Alpine Helicopters had total assets of \$11.5 million and total liabilities of \$5.0 million.

On September 19, 2014 (the "Acquisition Date"), the Company acquired the remaining 50.0% equity interest in Blue Mountain that the Company did not already own from Blue Mountain Resorts Holdings Inc. ("Blue Mountain Holdings") as described in Note 3, "Acquisitions and Dispositions". The accompanying consolidated financial statements reflect the Company's equity method investment in Blue Mountain prior to the Blue Mountain Acquisition and the consolidated results for the period from the Acquisition Date through June 30, 2016.

On January 29, 2016 (the "Disposition Date"), the Company, through its wholly owned indirect subsidiaries, Intrawest U.S. Holdings Inc. and Intrawest ULC, entered into a definitive agreement (the "Purchase Agreement") to sell IRCG to Diamond Resorts Corporation (the "Purchaser") and Diamond Resorts International, Inc. (together with the Purchaser, "Diamond") as described in Note 3, "Acquisitions and Dispositions". The results of IRCG were included in the Company's consolidated financial statements until the Disposition Date. Subsequent to the Disposition Date, IRCG was no longer consolidated in the Company's consolidated financial statements.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Cash and Cash Equivalents

Cash and cash equivalents are held in highly liquid investments, primarily demand deposit accounts with highly rated U.S. and Canadian financial institutions, with remaining terms to maturity of three months or less at acquisition.

Restricted Cash

Restricted cash is comprised primarily of deposits to settle future claims related to self-insurance. Additionally, restricted cash includes guest lodging deposits in jurisdictions that require down payments or deposits to be retained in a trust account, and deposits to secure certain letters of credit.

Receivables

Trade receivables are recorded in the normal course of business related to the sale of products or services and presented net of an allowance for doubtful accounts. In the determination of the allowance, the Company considers specific accounts, accounts receivable aging reports, customer past repayment history, the economic environment, and other factors that could affect collectability. Write-offs are evaluated on a case by case basis.

Interest income on notes receivables is recognized on an accrual basis when earned. Interest income was \$2.9 million, \$4.2 million and \$4.7 million for the years ended June 30, 2016, 2015 and 2014, respectively.

Inventories

Inventories consisting of retail goods, food and beverage products are recorded at the lower of cost or net realizable value, determined using the weighted-average cost method. The Company records an estimate for shrinkage and obsolete or unusable inventory. Aviation part inventories are recorded at the lower of cost or net realizable value, determined using the specific identification method.

Vacation points inventories are stated at the lower of cost or market value less cost to sell. Inventory costs are allocated to cost of point sales using a method that approximates the relative sales value method. The Company periodically reviews the carrying value of the inventory for impairment.

Property, Plant and Equipment

Property, plant and equipment is recorded at cost less accumulated depreciation less any impairment loss. Repairs and maintenance are expensed as incurred. Expenditures that improve the service capacity or extend the useful life of an asset are capitalized. When property, plant and equipment is retired or otherwise disposed of, the related gain or loss is included in operating income (loss). Depreciation is calculated using the straight-line method over the estimated useful life of each asset. The estimated useful lives of each asset category are as follows:

Asset Category	Estimated Life in Years
Buildings and building improvements	5-40
Ski lifts and area improvements	5-30

Automotive, helicopters and other equipment 2-20
Golf course improvements 20

Certain buildings, area improvements and equipment are located on leased or licensed land and are amortized over the lesser of the lease or license term or the assets' estimated useful life.

65

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Real Estate Held for Development

Real estate held for development is recorded at the lower of cost or net realizable value. Land and infrastructure development costs include all expenditures incurred in connection with the acquisition, development and construction of real estate. These expenditures consist of all direct costs, interest on specific debt, interest on total costs financed by the Company's pooled debt and property taxes during the development period. The Company expenses costs directly related to the acquisition of new real estate properties and resort businesses. Costs incurred in connection with operating properties classified as real estate held for development, including indirect and general and administrative overhead costs, are recorded to operating expenses when incurred. Sales commission expenses are recorded in the same period that the related revenue is recorded.

Real estate held for development is reviewed for impairment whenever events or changes in circumstances indicate that the carrying value of a particular real estate property exceeds the estimated net realizable value. The Company recorded an impairment charge of \$0.6 million in the year ended June 30, 2014 primarily related to legacy and non-core operations. The Company did not incur comparable charges in either of the years ended June 30, 2016 or 2015.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in a business combination. Goodwill is not amortized, but is tested for impairment annually as of June 30th and at any time when events or circumstances suggest impairment may have occurred. The Company has reporting units with allocated goodwill in both the Mountain and Real Estate segments.

The testing for impairment consists of a comparison of the fair value of the reporting unit with its carrying amount. If the carrying amount of the reporting unit, including goodwill, exceeds the fair value, an impairment will be recognized equal to the difference between the carrying value of the reporting unit goodwill and the implied fair value of the goodwill. In testing goodwill for impairment, the Company determines the estimated fair value of its reporting units based upon a discounted future cash flow analysis.

Goodwill is the Company's only indefinite-lived intangible asset. Definite-lived intangible assets are amortized using the straight line method over the shorter of their contractual term or estimated useful lives.

The Company's major finite-lived intangible asset categories and estimated useful lives are as follows:

Intangible Asset Category	Estimated Life in Years
Permits and licenses	20-45
Trademarks and trade names	10-20
Customer relationships	4-8
Other	8-20

Long-lived Assets

The Company evaluates potential impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual

disposition of the asset. An impairment will be recognized as the amount by which the carrying amount of a long-lived asset exceeds its fair value.

Deferred Revenue and Deposits

Deferred revenue and deposits are comprised primarily of season pass revenue, lodging and tour deposits, deposits on real estate sales and mountain club initiation deposits. Deferred revenue relating to the sale of season passes is recognized throughout the season based on historical usage patterns. Lodging and tour deposits deferred revenue is recognized when the related service is provided. Deferred revenue relating to real estate deposits is recognized upon closing of the sale or upon fulfillment of any future obligations. Deferred revenue relating to mountain club initiation deposits is recognized on a straight-line basis over the estimated life of the club.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Self-Insured Liabilities

The Company has a policy of self-insuring when the expected losses from self-insurance are low relative to the cost of purchasing third-party insurance at various deductible levels. The self-insurance program includes workers' compensation benefits in the United States and medical, property, automobile and general liability coverage in the United States and Canada. An accrual for self-insured liabilities is recorded based on management's best estimate of the ultimate cost to settle claims considering historical claims experience, claims filed and the advice of actuaries and plan administrators.

Liabilities for insurance-related assessments are not discounted. As of June 30, 2016 and 2015, \$1.9 million and \$1.6 million of the liability balances are included in accounts payable and accrued liabilities, respectively, on the consolidated balance sheets and \$8.2 million and \$6.5 million, respectively, are included in other long-term liabilities.

Revenue Recognition

The Company earns revenue from a variety of sources. Revenue is recognized when the following criteria have been met: persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the fee is fixed or determinable and the collection of funds is reasonably assured. The following describes revenue recognition for the Company's three segments:

Mountain segment revenue is derived from a wide variety of sources, including sales of lift products (including season passes), ski school operations, retail sales, equipment rentals, lodging operations and food and beverage operations. Persuasive evidence is obtained and collection of funds is assured through cash transactions or credit card validation at the point of sale. Revenue is recognized as goods are delivered or services are performed. Season (i) pass revenue, although primarily collected prior to the ski season, is recognized in our consolidated financial statements during the ski season based on the estimated average number of visits by season pass holders in each month during the ski season, which is based on historical three-year average visitation by season pass holders at our resorts. Frequency product revenue is recognized as used, and unused portions are recognized based on the prior three-year average usage for each frequency product.

Adventure segment revenue is derived from a variety of sources, primarily from all-inclusive packages for stays and tours for helicopter accessed skiing, mountaineering and hiking at Company owned and leased lodges, as well as ancillary revenue from helicopter maintenance, repair, and overhaul services, leasing, and off-season fire (ii) suppression services. Revenue is recognized as goods are delivered or services are performed. For CMH adventure vacation packages, payments in advance are recognized as revenue as goods are delivered or services are performed.

(iii) The Real Estate segment earns revenue from IHM and Playground, as well as from IRCG prior to the Disposition Date. IHM generates revenue from managing rental operations at the Honua Kai Resort and Spa in Maui, Hawaii and the Westin Monache Resort in Mammoth Lakes, California. Playground earns revenue from the commissions on the sales of real estate. The Company also manages commercial real estate for owned properties and third parties. IRCG generated revenue from the sale of vacation points, management of properties for Club Intrawest, an unaffiliated, not-for-profit entity, management of a private exchange company, and income on the receivables portfolio. Vacation points revenue associated with membership in the vacation ownership business of IRCG was recognized when the purchaser paid the amount due on closing, all contract documentation had been executed and all other significant conditions of sale were met. The Company followed real estate time-sharing accounting

principles, which set out specific guidelines for assessing whether the buyer's initial and continuing investments were adequate to demonstrate a commitment to pay for the property. Such a demonstration was required for the seller of a time-sharing arrangement to recognize profit by the full accrual method. Sales were recorded upon closing when profitability could be determined and collectability could be reasonably assured. Buyers could finance a portion of the sales price through nonrecourse loans.

Commission revenue from brokerage operations for the Company owned real estate is included in Real Estate revenue and is recognized at the time an offer of sale is closed by the purchaser or all other contractual obligations have been satisfied. Commission revenue for third-party projects from real estate brokerage operations is included in Real Estate revenue and is recognized when the deal's listing agreement is executed.

Advertising Costs

The Company expenses advertising costs at the time such advertising occurs. Advertising costs are classified in operating expenses on the consolidated statements of operations and were \$17.0 million, \$17.4 million and \$16.5 million for the years ended June 30, 2016, 2015 and 2014, respectively.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Income Taxes

Deferred tax assets and liabilities are recorded for the estimated future tax effects of temporary differences between tax basis of assets and liabilities and book basis reported in the consolidated balance sheets and for operating loss and tax credit carryforwards. The change in deferred tax assets and liabilities for the period measures the deferred tax provision or benefit for the period. Effects of changes in enacted tax laws on deferred tax assets and liabilities are reflected as adjustments to the tax provision or benefit in the period of enactment. To the extent that it is considered to be more likely than not that some or all of the deferred tax assets will not be realized, a valuation allowance is provided.

The Company recognizes accrued interest related to uncertain tax positions as a component of income tax expense. Penalties, if incurred, are recorded in operating expenses in the consolidated statements of operations.

Foreign Currency

The consolidated financial statements are presented in United States dollars (“USD”). The Company’s Canadian subsidiaries generally have the Canadian dollar (“CAD”) as their functional currency.

The accounts of entities where the USD is not the functional currency are translated into USD using the exchange rate in effect at the balance sheet date for asset and liability amounts and at the monthly average rate in effect for the period for amounts included in the determination of income. Cumulative unrealized gains or losses arising from the translation of the financial position of these subsidiaries into USD are included in equity as a component of accumulated other comprehensive income (loss) (“AOCI”).

Exchange gains or losses arising from transactions that are denominated in foreign currencies into the applicable functional currency are included in the determination of income and are classified in other income (expense), net in the consolidated statements of operations.

Share-Based Compensation

On January 30, 2014, the Company’s compensation committee of the board of directors approved the terms of the 2014 Omnibus Incentive Plan (the “Plan”), which allows the Company to grant share-based compensation awards in a variety of forms such as options, stock appreciation rights, restricted stock, restricted stock units, stock bonuses, other stock-based awards and cash awards as part of the Company’s long-term incentive compensation plan.

Awards granted under the Plan generally vest based on a service condition as defined in each award. Unless otherwise determined or evidenced in an award agreement, in the event that (i) a change in control occurs, as defined in the Plan, and (ii) a participant’s employment or service is terminated without cause within 12 months following the change in control, then (a) any unvested or unexercisable portion of any award carrying a right to exercise shall become fully vested and exercisable, and (b) the restrictions, deferral limitations, payment conditions and forfeiture conditions applicable to any award will lapse and such unvested awards will be deemed fully vested and any performance conditions imposed with respect to such awards will be deemed to be fully achieved.

Compensation expense is measured based on the fair value of the award on the date of grant, net of estimated forfeitures, and is recognized as expense on a straight-line basis over the requisite service period.

Employee Benefit Plans

Substantially all of the Company's employees are covered by Company-sponsored defined contribution plans in the U.S. and Canada. The Company's contributions to these plans are based on a percentage of employee compensation. These plans are funded on a current basis.

In addition, certain current and former employees are covered by noncontributory defined benefit pension plans. These plans are funded in conformity with the funding requirements of applicable government regulations. Generally, benefits are based on age, years of service and level of compensation during the final years of employment. The Company accounts for these defined benefit plans by accruing its obligations under the employee benefit plans and the related costs as the underlying services are provided. The Company has frozen the plans and no further service benefits are being earned by plan participants in the defined benefit plans.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

The funded status of defined benefit plans is recognized entirely on the consolidated balance sheets. The amount recognized as an asset or liability for pension and other postretirement benefit plans is measured as the difference between the benefit obligation and the fair value of plan assets. Overfunded plans are aggregated and recognized as an asset while underfunded plans are aggregated and recognized as a liability. Actuarial gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net pension expense are recognized in AOCI, net of income tax effects. Actuarial gains and losses are comprised of changes in the amount of either the projected benefit obligation (for pension plans), the accumulated benefit obligation (for other postretirement plans) or differences between actual and expected return on plan assets and from changes in assumptions. The Company measures its pension assets and liabilities as of June 30th of each year.

Fair Value of Financial Instruments

Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. A three-tier fair value hierarchy, which is described below, prioritizes the inputs used in measuring fair value:

Level 1 – Quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations, in which all significant inputs are observable in active markets.

Level 3 – Unobservable inputs in which there is little or no market data, which requires the reporting entity to develop its own assumptions.

The Company has various short-term financial instruments, including cash and cash equivalents, restricted cash, receivables, accounts payable and accrued liabilities. Due to their short-term nature, the instruments' book value approximates fair value.

The fair value of the Senior Debt (as defined in Note 9, "Long-Term Debt") was estimated using quoted prices for the Company's instruments in markets that are not active and was considered a Level 2 measure. The fair value of other debt obligations was estimated based on Level 3 inputs using discounted cash flow analyses based on assumptions that management believes are consistent with market participant assumptions.

The Company's long-term debt obligations are not measured and carried at fair value on a recurring basis. The Company's debt is initially recorded based upon historical cost. The fair value of debt does not represent the amounts that will ultimately be paid upon the maturities of the loans.

Concentration of Credit Risk

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash and cash equivalents and restricted cash. The Company places its cash and temporary cash investments in high quality credit institutions, but these investments may be in excess of regulatory insurance limits. The Company does not enter into financial instruments for trading or speculative purposes. Concentration of credit risk with respect to trade and notes receivables is limited due to the large number of customers and small transactions associated with the Company's

consumer and retail operations and the wide variety of customers and markets in which the Company transacts business. No customer represented 10% or more of total revenue or receivables during the years ended June 30, 2016, 2015 and 2014. Where the Company provides financing, the Company performs ongoing credit evaluations of its customers and generally does not require collateral, but does require advance deposits on certain transactions.

Recent Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This update replaces the incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. This update is effective for interim and annual periods beginning after December 15, 2019, with a modified-retrospective approach. The Company is currently evaluating the impact that this update will have on its consolidated financial statements and related disclosures.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

In May 2016, the FASB issued ASU No. 2016-12, Revenue from Contracts with Customers (Topic 606) - Narrow-Scope Improvements and Practical Expedients ("ASU No. 2016-12"), which clarifies the guidance in Topic 606 on assessing collectability, presentation of sales taxes, noncash consideration, and completed contracts and contract modifications at transition. The amendments in ASU No. 2016-12 do not change the core principles of the guidance in Topic 606. This update is effective for the Company beginning July 1, 2018, the same date as the effective date and transition requirements for Topic 606. The Company is currently evaluating the impact that this update will have on its ongoing financial reporting.

In April 2016, the FASB issued ASU No. 2016-10, Revenue from Contracts with Customers (Topic 606) - Identifying Performance Obligations and Licensing ("ASU No. 2016-10"), which clarifies the identification of performance obligations and the licensing implementation guidance in Topic 606. The amendments in ASU No. 2016-10 do not change the core principles of the guidance in Topic 606. This update is effective for the Company beginning July 1, 2018, the same as the effective date and transition requirements for Topic 606. The Company is currently evaluating the impact that this update will have on its ongoing financial reporting.

In March 2016, the FASB issued ASU No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting ("ASU 2016-09"). This update is part of the FASB's simplification initiative and is intended to simplify accounting for stock-based compensation. The guidance requires that excess tax benefits or deficiencies be recognized in income tax expense or benefit in the income statement, rather than recognized in additional paid-in capital. The guidance allows the Company to elect whether to recognize forfeitures as they occur or use an estimated forfeiture assumption in estimating the number of awards that are expected to vest. ASU 2016-09 is effective for annual periods beginning after December 15, 2016, with early adoption permitted. The Company is currently in the process of evaluating the impact that ASU 2016-09 will have on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) ("ASU 2016-02"). ASU 2016-02 supersedes existing guidance in Leases (Topic 840). The revised standard requires lessees to recognize the assets and liabilities arising from leases with lease terms greater than twelve months on the balance sheet, including those currently classified as operating leases, and to disclose key information about leasing arrangements. Lessees will be required to recognize a lease liability and a right-of-use asset on their balance sheets, while lessor accounting will remain largely unchanged. The guidance is effective for annual periods beginning after December 15, 2018, with early adoption permitted. The Company is currently evaluating the impact the adoption of ASU 2016-02 will have on its consolidated financial statements and related disclosures.

In April 2015, the FASB issued ASU 2015-05, Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement ("ASU 2015-05"). This update is intended to reduce diversity in practice by providing explicit guidance to customers about whether a cloud computing arrangement includes a software license. For public business entities, the guidance is effective for annual periods beginning after December 15, 2015, with early adoption permitted. The Company adopted ASU 2015-05 as of July 1, 2016 and will apply the guidance prospectively for all arrangements entered into or materially modified after July 1, 2016. The Company will include the related disclosure requirements, as applicable, in the fiscal 2017 first quarter filing.

In February 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis ("ASU 2015-02"). This update (i) amends the criteria for determining which entities are considered VIEs or voting interest entities, (ii) amends the criteria for evaluating fees paid to a decision maker or service provider as a variable interest, (iii) amends the effect of fee arrangements and related parties on the primary beneficiary determination, and (iv) ends the deferral previously granted to certain investment companies for application of the

VIE consolidation model. The guidance is effective for public business entities for annual reporting periods beginning after December 15, 2015, with early adoption permitted. The Company adopted ASU 2015-02 as of July 1, 2016. The adoption did not have a material impact on the Company's consolidated financial statements. The Company will include the related disclosure requirements, as applicable, in the fiscal 2017 first quarter filing.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606) (“ASU 2014-09”), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in GAAP when it becomes effective. The new standard is effective for the Company beginning July 1, 2018. In August 2015, the FASB issued a one-year deferral to the effective date with an option to permit adoption as early as the original effective date of July 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is currently in the process of evaluating the impact that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

3. Acquisitions and Dispositions

IRCG Transaction

On November 24, 2015, the Company, through Intrawest U.S. and Intrawest ULC, entered into a definitive agreement to sell IRCG, its vacation club business, to Diamond for gross proceeds of \$84.6 million, which included certain purchase price adjustments (the "IRCG Transaction"). The purchase price consisted of cash consideration and the assumption of certain liabilities, including certain lease obligations and certain other continuing contractual obligations.

Upon closing the IRCG Transaction on January 29, 2016, Diamond acquired substantially all of the assets used in the operations of IRCG and all of the equity interests in certain wholly-owned subsidiaries of the Company. The accompanying consolidated balance sheet as of June 30, 2016 reflects the removal of the assets and liabilities sold in the IRCG Transaction. The IRCG Transaction resulted in a pre-tax gain of \$40.4 million, which is included in the gain on sale of IRCG line item in the accompanying consolidated statement of operations for the year ended June 30, 2016. Due to the Company's net operating losses for tax purposes in the U.S. and Canada, there were no cash taxes or any impact on the effective tax rate as a result of the IRCG Transaction.

The following table shows the components of assets and liabilities of IRCG classified as held for sale in the Company's consolidated balance sheet as of June 30, 2015 (in thousands):

	June 30, 2015
Restricted cash	\$228
Receivables, net	6,592
Inventories	14,329
Other current assets	2,007
Property, plant and equipment, net of accumulated depreciation	2,071
Real estate held for development	3,085
Long-term receivables and other assets, net	24,803
Total assets classified as held for sale	\$53,115
Accounts payable and accrued liabilities	\$4,334
Deferred revenue and deposits	5,621
Total liabilities classified as held for sale	\$9,955

Prior to the IRCG Transaction, IRCG allowed deferred payment terms that exceeded one year for customers purchasing vacation points. A note receivable existed when all contract documentation had been executed. Notes receivable primarily consisted of nonrecourse installment loans. The Company performed a credit review of its notes receivable individually each reporting period to determine if an allowance for credit losses was required. As of June 30, 2015, gross notes receivable were \$29.9 million, of which \$5.1 million was included in current receivables on the consolidated balance sheet prior to being classified as held for sale. As of June 30, 2015, the allowance for credit losses on the notes receivable was \$1.9 million, of which \$0.9 million was included in current receivables on the consolidated balance sheet prior to being classified as held for sale.

Blue Mountain Acquisition

On September 19, 2014, the Company acquired the remaining 50.0% equity interest in Blue Mountain that the Company did not already own from Blue Mountain Resorts Holdings Inc. The Company has included the financial results of Blue Mountain in the accompanying condensed consolidated financial statements since the Acquisition Date. The total consideration transferred to acquire Blue Mountain was \$109.6 million, which consisted of \$54.8 million in cash and \$54.8 million for the previously held equity interest. The valuation of the Company's previously held equity interest resulted in a loss of \$1.5 million included within loss on remeasurement of equity method investment in the accompanying consolidated statements of operations for the year ended June 30, 2015.

The primary assets acquired and liabilities assumed as of the Acquisition Date included \$85.8 million of property, plant and equipment, \$13.8 million of accounts payable and accrued liabilities, \$13.3 million of cash and cash equivalents, \$8.7 million of identifiable intangibles and \$13.2 million of residual goodwill. The goodwill recorded is primarily attributable to economies of scale, opportunities for synergies and any intangible assets that do not qualify for separate recognition. None of the goodwill is deductible for tax purposes.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

4. Earnings (Loss) Per Share

Basic earnings (loss) per share ("EPS") is calculated by dividing net income (loss) attributable to the Company by the weighted average number of shares of common stock outstanding. Diluted EPS is calculated by dividing net income (loss) attributable to the Company by the weighted average number of shares of common stock outstanding, plus potentially dilutive securities. Potentially dilutive securities include unvested restricted common stock, restricted stock units, and stock options, the dilutive effect of which is calculated using the treasury stock method.

On January 12, 2016, the Company announced the commencement of a modified "Dutch auction" self-tender offer ("Tender Offer") to purchase for cash up to \$50.0 million of shares of its common stock at a price per share not greater than \$10.00 nor less than \$9.00, less applicable withholding taxes and without interest. The Tender Offer expired on February 10, 2016. The Company purchased approximately 5.6 million shares of its common stock at a purchase price of \$9.00 per share. The tendered shares were accounted for as treasury stock, at cost including \$0.6 million of transaction related expenses paid to third parties, and resulted in a reduction of the outstanding shares used to calculate the weighted-average common shares outstanding for basic and diluted earnings per share.

As of June 30, 2016, 2015 and 2014, the effect of 1.2 million, 1.0 million and 0.1 million potentially dilutive securities, respectively, were not included in the calculation of EPS as the effect would be anti-dilutive. The calculation of basic and diluted EPS is presented below (in thousands, except per share data):

	Year Ended June 30,		
	2016	2015	2014
Basic earnings (loss) per share:			
Net income (loss) attributable to Intrawest Resorts Holdings, Inc.	\$40,873	\$(6,920)	\$(189,417)
Weighted average common shares outstanding	43,236	45,099	43,132
Basic earnings (loss) per share	\$0.95	\$(0.15)	\$(4.39)
Diluted earnings (loss) per share:			
Net income (loss) attributable to Intrawest Resorts Holdings, Inc.	\$40,873	\$(6,920)	\$(189,417)
Weighted average common shares outstanding	43,236	45,099	43,132
Dilutive effect of share-based payment awards	34	—	—
Weighted average dilutive shares outstanding	43,270	45,099	43,132
Diluted earnings (loss) per share	\$0.94	\$(0.15)	\$(4.39)

5. Supplementary Balance Sheet Information

Current receivables

Current receivables as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30,	
	2016	2015
Trade receivables	\$37,441	\$36,458
Loans, mortgages and notes receivable	50	435
Allowance for doubtful accounts	(831)	(717)
Total current receivables	\$36,660	\$36,176

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Prepaid expenses and other assets

Prepaid expenses and other assets as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30,	
	2016	2015
Capital spares	\$11,628	\$11,640
Prepaid insurance	4,813	5,345
Prepaid expenses and other assets	4,640	4,716
Total prepaid expenses and other assets	\$21,081	\$21,701

Accounts payable and accrued liabilities

Accounts payable and accrued liabilities as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30,	
	2016	2015
Trade payables	\$48,353	\$52,372
Accrued liabilities	16,516	10,518
Total accounts payable and accrued liabilities	\$64,869	\$62,890

Current deferred revenue and deposits

Current deferred revenue and deposits as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30,	
	2016	2015
Season pass and other deferred revenue	\$42,343	\$39,216
Lodging and tour deposits	25,548	23,178
Deposits on real estate sales	46	47
Total current deferred revenue and deposits	\$67,937	\$62,441

Other long-term liabilities

Other long-term liabilities as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30,	
	2016	2015
Pension liability, net of funded assets	\$33,550	\$33,150
Forgivable government grants	7,719	8,950
Other long-term liabilities	19,391	18,021
Total other long-term liabilities	\$60,660	\$60,121

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

6. Property, Plant and Equipment

Property, plant and equipment, net, including capital lease assets, as of June 30, 2016 and 2015, consisted of the following (in thousands):

	June 30,	
	2016	2015
Land	\$47,257	\$47,856
Buildings and building improvements	310,344	300,942
Ski lifts and area improvements	276,343	272,032
Automotive, helicopters and other equipment	292,776	284,271
Golf course improvements	23,757	23,638
Gross property, plant and equipment	950,477	928,739
Less: accumulated depreciation	(438,991)	(401,553)
Property, plant and equipment, net	\$511,486	\$527,186

As of June 30, 2016 and 2015, the carrying value of leased assets was \$32.2 million and \$31.9 million, respectively, net of accumulated amortization of \$8.0 million and \$6.8 million, respectively. Amortization of assets under capital leases is included in depreciation and amortization expense in the accompanying consolidated statements of operations.

Depreciation expense for property, plant and equipment for the years ended June 30, 2016, 2015 and 2014 was \$55.1 million, \$53.1 million and \$48.9 million, respectively.

During the year ended June 30, 2014, certain asset groups related to legacy and non-core operations experienced deteriorated financial performance, reduced profitability, and forecasted future losses, which were indicators of potential impairment. The Company tested the recoverability of certain asset groups using projected future undiscounted cash flows and recorded an impairment charge of \$0.2 million. There were no comparable charges in the years ended June 30, 2016 or 2015.

7. Equity Method Investments

The Company had the following ownership interest in its equity method investments as of June 30, 2016:

Equity Method Affiliates	Ownership Interest	
Chateau M.T. Inc.	49.5	%
Mammoth Hospitality Management, LLC	50.0	%
MMSA Investors, LLC	14.8	%
Mammoth Resorts LLC	14.9	%

The Company holds less than a 20% ownership interest in MMSA Investors, LLC and Mammoth Resorts LLC, (together with MMSA Investors, LLC collectively referred to herein as the "Mammoth family of resorts"); however, the equity method is used to account for these investments because the Company believes it exercises significant influence over the Mammoth family of resorts in part by holding a seat on each of the boards of directors, which have eight members and three members, respectively.

The Company holds a 49.5% voting interest in Chateau with a non-voting debt interest that can be converted to voting interest, resulting in up to a 57.1% economic interest in Chateau.

Financial information for the Company's equity method investments in the aggregate is summarized below and includes the Company's 50.0% equity investment in Blue Mountain Resorts Limited prior to the Blue Mountain Acquisition for all relevant periods presented (in thousands):

74

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

	Year Ended June 30,		
	2016	2015	2014
Revenue	\$251,766	\$163,992	\$213,082
Operating expenses	19,282	19,438	16,785
Gross profit	232,484	144,554	196,297
Income (loss) from operations	11,433	(21,297)	(7,377)
Net income (loss)	10,443	(21,484)	(7,176)
Income (loss) attributable to noncontrolling interest	8,510	(17,674)	(6,905)
Net income (loss) attributable to Intrawest Resorts Holdings, Inc.	\$1,933	\$(3,810)	\$(271)

	June 30,	
	2016	2015
Current assets	\$110,054	\$45,461
Noncurrent assets	423,671	455,994
Total assets	533,725	501,455
Current liabilities	79,929	59,054
Noncurrent liabilities	271,868	251,172
Total liabilities	351,797	310,226
Equity attributable to shareholders of investees	172,870	183,695
Equity attributable to noncontrolling interest	9,058	7,534
Total equity	181,928	191,229
Intrawest Resorts Holdings, Inc. equity investment	\$26,398	\$25,394

The Company's carrying amount of its equity method investments reflects its expectation of cash to be realized from its interests in the net assets of the affiliate, taking into account the return order of equity distribution per the respective agreements. The difference between the carrying value and the underlying equity in net assets is primarily comprised of goodwill.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

8. Goodwill and Intangible Assets

Goodwill

The goodwill balance as of June 30, 2016 and 2015 was \$106.0 million and \$106.5 million, respectively. Goodwill of \$104.8 million and \$1.2 million is included in the Mountain and Real Estate segment, respectively. Goodwill is not amortized. There is no goodwill for income tax purposes with the exception of the goodwill recorded as a result of the Blue Mountain Acquisition. This goodwill is included in the cost basis for income tax purposes. The Company did not record any impairment charges related to goodwill in the years ended June 30, 2016, 2015 and 2014.

Intangible Assets Other Than Goodwill

Finite-lived intangible assets as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30, 2016		
	Cost	Accumulated Amortization	Net Book Value
Permits and licenses	\$12,732	\$ 4,866	\$7,866
Trademarks and trade names	73,561	33,388	40,173
Customer relationships	18,331	16,159	2,172
Other	8,906	8,891	15
	\$113,530	\$ 63,304	\$50,226

	June 30, 2015		
	Cost	Accumulated Amortization	Net Book Value
Permits and licenses	\$13,278	\$ 4,558	\$8,720
Trademarks and trade names	74,645	30,183	44,462
Customer relationships	18,987	15,700	3,287
Other	9,172	9,140	32
	\$116,082	\$ 59,581	\$56,501

Amortization expense for intangible assets for the years ended June 30, 2016, 2015 and 2014 was \$5.0 million, \$6.0 million and \$6.5 million, respectively.

Amortization expense for intangible assets for the next five fiscal years is estimated to be as follows (in thousands):

2017 \$5,170
2018 5,155
2019 4,387
2020 4,174
2021 4,174

Notes to Consolidated Financial Statements

9. Long-Term Debt

Long-term debt, net of original issue discount ("OID") and debt issuance costs, as of June 30, 2016 and 2015 consisted of the following (in thousands):

		June 30,	
	Maturity	2016	2015
Senior Debt	2020	\$554,480	\$591,297
Other debt obligations	2016-2023	1,172	2,096
Less: unamortized OID and debt issuance costs		(17,860)	(19,552)
Total		537,792	573,841
Less: Long-term debt due within one year		497	6,919
Total long-term debt		\$537,295	\$566,922

Senior Debt

In conjunction with the Restructuring, one of the Company's subsidiaries, as borrower, and several of the Company's U.S. subsidiaries, as guarantors, entered into a credit agreement (the "Credit Agreement") with a syndicate of lenders, Goldman Sachs Bank USA, as issuing bank, and Goldman Sachs Lending Partners LLC, as administrative agent, providing for a \$540.0 million term loan facility (the "Term Loan"), a \$25.0 million senior secured first-lien revolving loan facility (the "Revolver"), and a \$55.0 million senior secured first-lien letters of credit facility (the "LC Facility" and, together with the Term Loan and Revolver, collectively referred to herein as the "Senior Debt"). Pursuant to an Incremental Amendment to the Credit Agreement, dated September 19, 2014 (the "Incremental Amendment"), the Company borrowed an incremental \$60.0 million under the Term Loan, primarily to finance the Blue Mountain Acquisition described in Note 3, "Acquisitions and Dispositions". The proceeds were also used to pay certain fees, commissions and expenses related to the Blue Mountain Acquisition and for working capital. The Incremental Amendment has the same terms and maturity date as the original Term Loan. While the Fourth Amendment resulted in certain changes to the Company's incremental borrowing capacity, the Company continues to have the ability to increase the borrowings on the Term Loan under certain circumstances and subject to certain criteria as outlined in the Fourth Amendment; so long as, after giving effect to any additional amounts borrowed, the Company remains compliant with all covenants of the Credit Agreement.

On April 29, 2015, certain of the subsidiaries of the Company that guarantee the Company's Senior Debt executed the second amendment (the "Second Amendment") to the Company's existing Credit Agreement. The Second Amendment adjusted the Company's Term Loan to reduce the applicable margin for borrowings under the Term Loan from 4.50% to 3.75% for Eurodollar rate loans. All other terms and conditions of the Second Amendment are consistent with the Credit Agreement.

On June 1, 2015, certain of the subsidiaries of the Company that guarantee the Company's Senior Debt entered into the third amendment (the "Third Amendment") to the Company's existing Credit Agreement. The Third Amendment adjusted the terms of the Company's Revolver to decrease the Company's applicable margin for Eurodollar rate loans from 4.50% to 3.75%, if the total secured debt leverage ratio is greater than or equal to 4.50:1.00, and from 4.25% to 3.50% if the total secured debt leverage ratio is less than 4.50:1.00. The Third Amendment also decreased the Company's applicable margin for base rate loans from 3.50% to 2.75%, if the total secured debt leverage ratio is greater than or equal to 4.50:1.00, and from 3.25% to 2.50% if the total secured debt leverage ratio is less than

4.50:1.00. All other terms and conditions of the Third Amendment are consistent with the Credit Agreement. On April 8, 2016, certain of the Company's subsidiaries, that are borrowers or guarantors of the Company's Senior Debt, entered into the Fourth Amendment (the "Fourth Amendment") to the Company's existing Credit Agreement. Upon execution of the Fourth Amendment, the Company repaid \$25.0 million of Term Loan borrowings with cash on hand. The Fourth Amendment secured financial and strategic flexibility for the Company, among other items, and increased the applicable margins for base rate loans and Eurodollar rate loans under the Term Loan from 2.75% to 3.00% and from 3.75% to 4.00%, respectively. The Term Loan has a maturity date of December 9, 2020. Borrowings under the Credit Agreement, including the Term Loan, LC Facility and Revolver, bear interest, at the Company's option, at a rate equal to either a Eurodollar rate loan or a base rate, in each case plus the applicable margin. The Term Loan currently bears interest based upon the LIBOR-based rate subject to a LIBOR floor of 1.00%. The Credit Agreement requires scheduled quarterly principal payments in the amount of \$1.5 million. On January 29, 2016, the Company made an excess cash flow prepayment of \$8.8 million as defined in the Credit Agreement. Due to the excess cash flow prepayment, the Company does not expect to make another scheduled principal payment until the fourth quarter of fiscal 2017.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

The Company's current applicable margin is 4.00% under the Term Loan, 3.75% under the Revolver and 4.50% under the LC Facility.

The net cash proceeds from the Term Loan were reduced by an OID of 0.9%, or \$5.5 million, after giving effect to the Incremental Amendment. The OID is amortized into interest expense using the effective interest method. There was \$3.6 million and \$4.3 million of unamortized OID remaining as of June 30, 2016 and 2015, respectively.

The Company has incurred \$21.4 million of debt issuance costs in connection with the Senior Debt, which is presented as a direct reduction of the carrying value of the long-term debt on the accompanying consolidated balance sheets. These costs are amortized into interest expense using the effective interest method. There was \$14.2 million and \$15.2 million of unamortized costs remaining as of June 30, 2016 and 2015, respectively.

The borrower's obligations under the Credit Agreement are supported by guarantees of substantially all of the Company's material U.S. subsidiaries. The guarantees are further collateralized by mortgages and other security interests in certain properties and assets held by U.S. subsidiaries of the Company. The collateral includes both general and specific assets.

The Credit Agreement provides for affirmative and negative covenants that the Company believes are usual and customary for a senior secured credit agreement. The negative covenants restrict, among other things, the ability of the Company's subsidiaries to incur indebtedness, dispose of property, reinvest the proceeds from certain asset sales, or make investments or distributions. It also includes customary cross-default provisions with respect to certain other borrowings of the Company's subsidiaries. Additionally, the Credit Agreement requires the borrower to comply with a total secured debt leverage ratio on the last day of each fiscal quarter. The Company was in compliance with the covenants of the Credit Agreement at June 30, 2016.

The LC Facility and the Revolver each have a maturity date of December 9, 2018. The LC Facility includes fronting fees of 25 basis points and a commitment fee of 37.5 basis points on the first 15% of unutilized commitments. There were \$42.8 million and \$45.4 million of irrevocable standby letters of credit outstanding under the LC Facility at June 30, 2016 and 2015, respectively. The Revolver includes commitment fees of 37.5 basis points. There were no outstanding borrowings under the Revolver or draws on our outstanding letters of credit under the LC facility as of June 30, 2016 and 2015.

Other Debt Obligations

Other debt obligations include various lending agreements, including a government loan agreement and a bank loan related to employee housing. The weighted average interest rate for other debt obligations is 5.3% for the year ended June 30, 2016.

Maturities

Current maturities represent principal payments due in the next 12 months. As of June 30, 2016, the long-term debt aggregate maturities for the 12 month period ended June 30 of each of the following years are set forth below (in thousands):

2017	\$ 497
------	--------

2018	6,131
2019	6,140
2020	6,147
2021	536,442
Thereafter	295

Interest Expense

The Company recorded interest expense of \$40.4 million, \$43.9 million, and \$172.9 million in the consolidated statements of operations for the years ended June 30, 2016, 2015 and 2014, respectively, of which \$3.6 million, \$3.2 million, and \$5.5 million, respectively, was amortization of deferred financing costs and the OID.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

In October 2006, the Company entered into interest rate swap contracts to minimize the impact of changes in interest rates on its cash flows for certain of the Company's floating bank rates and other indebtedness. The outstanding swap contracts were terminated on October 11, 2008. The fair value of the swap contracts at October 11, 2008 was a liability of \$111.4 million. The remaining terminated swap liability of \$0.7 million as of June 30, 2016 is recorded in AOCI and will be recognized periodically through March 31, 2017 through interest expense. The portion included in interest expense in the consolidated statements of operations for the years ended June 30, 2016, 2015 and 2014 was \$1.2 million, \$1.5 million, and \$3.4 million, respectively.

10. Fair Value Measurements

As of June 30, 2016 and 2015, the fair value of cash and cash equivalents, restricted cash, net receivables and accounts payable approximated their carrying value based on the short-term nature of these instruments. Estimates of fair value may be affected by assumptions made and, accordingly, are not necessarily indicative of the amounts the Company could realize in a current market exchange.

A summary of the carrying amount and fair value of the Company's financial instruments for which there is a difference between the carrying value and fair value is as follows (in thousands):

	June 30, 2016		June 30, 2015	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Senior Debt	\$554,480	\$555,173	591,297	\$595,362
Other debt obligations	1,172	971	2,096	1,793

11. Accumulated Other Comprehensive Income (Loss)

Accumulated Other Comprehensive Income

The following table presents the changes in AOCI, by component, for the years ended June 30, 2016, 2015 and 2014 (in thousands):

	Realized portion on cash flow hedge ^(a)	Actuarial loss on pensions ^(b)	Foreign currency translation adjustments	Total
As of June 30, 2013	\$(6,704)	\$(10,453)	\$ 166,544	\$ 149,387
Restructuring transactions on December 9, 2013	—	—	52,670	52,670
Other comprehensive income (loss) before reclassifications	—	(4,530)	—	(4,530)
Amounts reclassified from AOCI	3,398	814	—	4,212
Foreign currency translation adjustments	(41)	85	(4,060)	(4,016)
Net current period other comprehensive income (loss)	3,357	(3,631)	48,610	48,336
As of June 30, 2014	\$(3,347)	\$(14,084)	\$ 215,154	\$ 197,723
Other comprehensive income (loss) before reclassifications	—	(209)	—	(209)
Amounts reclassified from AOCI	1,486	985	—	2,471
Foreign currency translation adjustments	(58)	1,358	(55,906)	(54,606)
Net current period other comprehensive income (loss)	1,428	2,134	(55,906)	(52,344)
As of June 30, 2015	\$(1,919)	\$(11,950)	\$ 159,248	\$ 145,379
Other comprehensive income (loss) before reclassifications	—	(3,409)	—	(3,409)
Amounts reclassified from AOCI	1,195	817	—	2,012
Foreign currency translation adjustments	(9)	300	(12,353)	(12,062)
Net current period other comprehensive income (loss)	1,186	(2,292)	(12,353)	(13,459)
As of June 30, 2016	\$(733)	\$(14,242)	\$ 146,895	\$ 131,920

(a) Amounts reclassified from AOCI are included in interest expense on third party debt in the accompanying consolidated statements of operations.

(b) Amounts reclassified from AOCI are included in operating expenses in the accompanying consolidated statements of operations.

12. Share-Based Compensation

In connection with the Company's initial public offering, 4,500,700 shares of the Company's common stock were reserved for issuance under the Intrawest Resorts Holdings, Inc. 2014 Omnibus Incentive Plan (the "Plan") upon the exercise of awards that were or will be issued to the Company's employees, non-employee directors, independent contractors and consultants. The Plan allows share-based compensation awards to be granted in a variety of forms including options, stock appreciation rights, restricted stock, restricted stock units, stock bonuses, other stock-based awards and cash awards. The terms and conditions of the awards granted are established by the compensation committee of the board of directors of the Company (the "Board of Directors"), who administers the Plan.

A total of 1,294,645 shares of common stock were available for future grant under the Plan at June 30, 2016.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Restricted Stock Awards

As of June 30, 2016, the Board of Directors had granted 955,809 restricted stock units to the Company's officers and employees, and 25,000 shares of restricted stock to the Company's non-employee directors (collectively referred to herein as the "Restricted Stock Awards"). Restricted Stock Awards generally vest ratably upon the satisfaction of a defined service condition. The restricted stock is legally outstanding upon grant subject to restrictions that lapse as the award vests. Upon vesting, each restricted stock unit is exchanged for one share of the Company's common stock or cash, at the Company's discretion. The grant date fair values of these awards are determined based on the closing price of the Company's common stock on the grant date. The related compensation expense is recognized over the applicable requisite service period.

A summary of Restricted Stock Awards activity during the years ended June 30, 2016 and 2015 is as follows:

	Number of Awards	Weighted Average Grant Date Fair Value
Total unvested awards - June 30, 2014	784,727	\$ 11.97
Granted	97,470	10.26
Vested	(276,199)	11.97
Forfeited	(269,493)	12.00
Total unvested awards - June 30, 2015	336,505	\$ 11.45
Granted	25,000	7.82
Vested	(142,111)	11.58
Forfeited	(41,700)	11.78
Total unvested awards - June 30, 2016	177,694	\$ 10.75

The total fair value of Restricted Stock Awards vested for the years ended June 30, 2016 and 2015 was \$1.4 million and \$3.0 million, respectively.

The outstanding unvested Restricted Stock Awards at June 30, 2016 are scheduled to vest in each fiscal year as follows:

Vesting Date	Number of Awards
2017	128,464
2018	40,880
2019	8,350
Total	177,694

Stock Options

During the year ended June 30, 2015, the Board of Directors granted the Company's current Chief Executive Officer ("CEO") an option to purchase 2,700,000 shares (the "Options") under the Plan with a contractual term of 10 years. The Options have a weighted average exercise price of \$11.25 and will become vested and exercisable over a three-year period, provided that the CEO remains in continuous employment with the Company. The related

compensation expense is recognized over the applicable requisite service period.

The fair value of the Options was estimated at the grant date using a Black-Scholes option pricing model with the following assumptions:

Expected stock price volatility	32.5 %
Expected term (in years)	6.3
Risk-free interest rate	1.8 %
Dividend yield	0.0 %
Weighted average fair value per option	\$3.46

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

The risk-free interest rate is based on the United States Treasury yield in effect at the time of grant for zero coupon United States Treasury bonds with maturities that approximate the expected term. The Company used the simplified method to estimate the expected term as it does not have sufficient historical exercise data given its limited history of employee grants. The simplified method, permitted by the Securities and Exchange Commission ("SEC"), is calculated as the average of the vesting period and the contractual term of the options.

The expected stock price volatility is derived from historical volatilities of several public companies within industries related to the Company. The historical volatility of selected peer companies is weighted based on certain qualitative factors including size, industry, and availability of historical data and combined to produce a single volatility factor.

The outstanding unvested Options at June 30, 2016 are scheduled to vest in each fiscal year as follows:

Vesting Date	Number of Options
2017	1,350,000
2018	1,350,000
Total	2,700,000

Share-Based Compensation Expense

For the years ended June 30, 2016 and 2015, there was \$1.6 million and \$2.7 million, respectively, of compensation expense related to the Restricted Stock Awards and \$2.3 million and \$1.4 million, respectively, of compensation expense related to the Options. Compensation expense related to the Restricted Stock Awards and Options is included in operating expenses in the accompanying consolidated statements of operations.

As of June 30, 2016, there was \$1.0 million and \$3.2 million of unrecognized compensation expense related to the unvested Restricted Stock Awards and the Options, respectively, both of which are expected to be recognized over a weighted average period of approximately 1.4 years.

13. Income Taxes

The United States and foreign components of income tax expense (benefit) consisted of the following (in thousands):

	Year Ended June 30,		
	2016	2015	2014
United States	\$ 119	\$(1,147)	\$ 57
Foreign	1,654	(2,755)	620
	\$1,773	\$(3,902)	\$ 677

The components of income tax expense (benefit) from continuing operations consisted of the following (in thousands):

	Year Ended June 30,		
	2016	2015	2014
Current income taxes:			
United States	\$ 119	\$(1,147)	\$ 57
Foreign	1,584	1,031	515
Total current income tax (benefit) expense	1,703	(116)	572

Deferred income taxes:

United States	—	—	—
Foreign	70	(3,786)	105
Total deferred income tax (benefit) expense	70	(3,786)	105
	\$1,773	\$(3,902)	\$677

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

In the year ended June 30, 2016, we recognized \$1.8 million of tax expense related to tax paying entities primarily in Canada. In the year ended June 30, 2015, as a result of the acquisition of the remaining 50.0% equity interest in Blue Mountain, and the subsequent restructuring of the wholly owned interest, the Company was able to reverse \$3.1 million of a deferred tax liability and \$0.7 million of income tax payable, both of which were reflected in the deferred tax provision.

For all years presented, the reconciliation of income taxes is calculated at the blended statutory federal rates of the United States and Canada. The reconciliation of income taxes to the actual income tax expense (benefit) is as follows (in thousands):

	Year Ended June 30,		
	2016	2015	2014
Income tax at blended statutory federal rate	\$12,618	\$(2,119)	\$(52,141)
State tax, net of federal benefit	(246)	197	(4,296)
Foreign exchange rate differential	6,571	26,630	2,191
Nondeductible impairments and expenses	619	634	642
Unrealized foreign exchange impact	(6,091)	(3,928)	(10,538)
Change in tax laws and rates	(7,375)	(2,080)	(476)
Change in valuation allowance	5,935	(21,213)	65,295
Other one-time items	(10,258)	(2,023)	—
Income tax expense (benefit)	\$1,773	\$(3,902)	\$677

There were certain one-time tax benefits that impacted the income tax provision. In the year ended June 30, 2016, \$10.3 million related to tax basis differences recognized on the sale of IRCG in the U.S. and Canada. In the year ended June 30, 2015, in the U.S., there was a reversal of a previously accrued tax expense and a revised estimate of the income taxes payable, which resulted in a combined benefit of \$1.3 million. In Canada, there was a reversal of \$0.7 million of income taxes payable as a result of the acquisition of the remaining 50.0% equity interest in Blue Mountain and the subsequent restructuring of the wholly owned interest.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Deferred tax assets and liabilities as of June 30, 2016 and 2015 consisted of the following (in thousands):

	June 30,	
	2016	2015
Deferred tax assets:		
Real estate held for development	\$38,579	\$37,582
Loss carryforwards	499,229	500,485
Differences in working capital deductions for tax and accounting purposes	15,905	16,113
Bank and other indebtedness	4,359	2,303
Intangible assets	6,507	7,189
Investments	3,429	3,598
Property, plant and equipment	12,988	8,273
Other	14,213	18,948
Total gross deferred tax assets	595,209	594,491
Valuation allowance	(592,027)	(586,092)
Net deferred tax assets	3,182	8,399
Deferred tax liabilities		
Property, plant and equipment	159	3,227
Investments	3,161	2,927
Intangible assets	11	2,324
Total gross deferred tax liabilities	3,331	8,478
Net deferred tax liabilities	\$149	\$79

As of each of the years June 30, 2016 and 2015, net deferred tax liabilities of \$0.1 million are included within other long-term liabilities on the consolidated balance sheets. The gross deferred tax liability is noncurrent and the deferred tax asset, net of the valuation allowance, is also noncurrent. There is no current deferred tax asset due to the valuation allowance.

The increase in the net deferred tax liability from fiscal 2015 to fiscal 2016 is primarily the result of certain Canadian operations. The Company has net operating loss carryforwards for income tax purposes of approximately \$1,436 million and \$1,465 million as of June 30, 2016 and 2015, respectively, that are available to offset future taxable income and will expire in varying amounts over the next 20 years.

The Company's net operating loss carryforwards pertaining to federal and foreign jurisdictions will primarily expire after 2025 and consisted of the following (in thousands):

	June 30,	
	2016	2015
United States	\$954,351	\$951,713
Canada	481,714	513,580
	\$1,436,065	\$1,465,293

The Company believes that uncertainty exists with respect to the future realization of the loss carryforwards and a full valuation allowance has been established for the net operating loss carryforwards. The Company has concluded that it is not more likely than not that the benefit of these losses will be utilized prior to their expiration date.

The Company, or one of its subsidiaries, files income tax returns in the U.S. federal jurisdiction, various states, Canada federal jurisdiction and various provinces. With few exceptions, the Company is no longer subject to federal, state and local examinations by the tax authorities in most jurisdictions for years ending before June 30, 2013. There

are currently no ongoing tax examinations in any of the jurisdictions in which the Company files income tax returns.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

A reconciliation of unrecognized tax benefits is as follows (in thousands):

	2016	2015	2014
Balance as of July 1	\$6,737	\$9,576	\$19,821
Additions based on tax positions related to the current year	—	—	—
Additions for tax positions of prior years	—	—	—
Reductions due to Restructuring	—	—	(293)
Reductions for tax positions of prior years	(2,530)	(2,839)	(9,952)
Balance as of June 30	\$4,207	\$6,737	\$9,576

The remaining uncertain tax benefits balance at June 30, 2016, if recognized, would only reduce net operating losses in the United States and would have no impact on the annual effective tax rate.

Included in the unrecognized tax benefits balance as of June 30, 2016 were \$2.9 million of tax positions, which the Company expects will change within 12 months due to settlement or expiration of statutes of limitation.

14. Commitments and Contingencies

Letters of Credit

The Company issued letters of credit of \$42.8 million and \$45.4 million at June 30, 2016 and 2015, respectively, mainly to secure the Company's commitments under the three closed noncontributory defined benefit pension plans covering certain of the Company's former executives and self-insurance claims. These outstanding letters of credit will expire in November 2018.

Legal

The Company is involved in various lawsuits and claims arising in the ordinary course of business and others arising from legacy real estate development. These lawsuits and claims may include, among other things, claims or litigation relating to personal injury and wrongful death, allegations of violations of laws and regulations relating to real estate activities and labor and employment, intellectual property and environmental matters and commercial contract disputes. The Company operates in multiple jurisdictions and, as a result, a claim in one jurisdiction may lead to claims or regulatory penalties in other jurisdictions.

Due to the nature of the activities at the Company's mountain resorts and CMH, the Company is exposed to the risk that customers or employees may be involved in accidents during the use, operation or maintenance of our trails, lifts, helicopters and facilities. As a result, the Company is, from time to time, subject to various lawsuits and claims in the ordinary course of business related to injuries occurring at the Company's properties.

In addition, the Company's pre-2010 legacy real estate development and sales activities, combined with the significant downward shift in real estate asset values that occurred in 2007 and 2008, resulted in claims arising in the ordinary course of business being filed against the Company by owners and prospective purchasers of residences of the Company's real estate developments. In some instances, the Company has been named as a defendant in lawsuits alleging construction defects at certain of the Company's existing developments or that the Company failed to construct planned amenities. In other lawsuits, purchasers are seeking rescission of real estate purchases and/or return of deposits paid on pre-construction purchase and sale agreements. These claims are related to alleged violations of

state and federal laws that require providing purchasers with disclosures mandated under the Interstate Land Sales Act and similar state laws.

The Company believes that it has adequate insurance coverage or has adequately accrued for loss contingencies for all material matters in which it believes a loss is probable and the amount of the loss is reasonably estimable. Although the ultimate outcome of claims cannot be ascertained, current pending and threatened claims are not expected to have a material adverse effect, individually or in the aggregate, on the Company's financial position, results of operations or cash flows.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Government Grants and Loans

The federal government of Canada and the provincial government of Quebec have granted financial assistance to certain subsidiaries of the Company in the form of reimbursable loans and forgivable grants for the construction of specified tourist facilities at Tremblant. The unamortized balance of forgivable government grants received is included in other long-term liabilities in the accompanying consolidated balance sheets and recorded as a reduction in depreciation expense of the related fixed asset or a reduction in cost of sales for property under development at the time a sale is recognized. Reimbursable government loans are included in long-term debt and long-term debt due within one year in the accompanying consolidated balance sheets. The reimbursable government loans have a weighted average borrowing rate of 6.4%.

Reimbursable government loans and forgivable grants as of June 30, 2016 and 2015 in CAD and USD equivalent are as follows (in thousands):

	June 30, 2016		2015	
	CAD	USD Equivalent	CAD	USD Equivalent
Loans	\$241	\$ 185	\$1,237	\$ 992
Grants				
Received	\$89,298	\$ 68,643	\$89,298	\$ 71,587
Future advances	31,421	24,153	31,421	25,189
Total grants	\$ 120,719	\$ 92,796	\$ 120,719	\$ 96,776

Commitments

The following summarizes our principal contractual commitments, excluding open orders for purchases that support normal operations, as of June 30, 2016 (in thousands):

	2017	2018	2019	2020	2021	Thereafter	Total
Debt principal and interest	\$28,654	\$34,229	\$34,614	\$35,333	\$549,618	\$ 291	\$682,739
Capital leases obligations	4,848	5,595	5,579	5,572	5,509	63,992	91,095
Operating leases	9,321	6,601	5,510	3,791	2,530	4,983	32,736
Purchase obligations and service contracts	4,953	2,445	913	317	—	—	8,628
Total commitments	\$47,776	\$48,870	\$46,616	\$45,013	\$557,657	\$ 69,266	\$815,198

Capital lease obligations above includes total minimum lease payments of \$91.1 million and amounts representing interest of approximately \$52.6 million, resulting in a present value of net minimum lease payments of \$38.5 million. Capital lease obligations are primarily for equipment except for the lease of Winter Park ski resort. The Winter Park capital lease requires annual payments, a portion of which are contingent on future annual gross revenue levels. As such, the obligation associated with the contingent portion of the payments is not readily determinable and has not been recorded. The Company is contractually obligated to make certain debt service payments on behalf of Winter Park Recreational Association ("WPRA") as a requirement of the lease agreement. Subsequent to June 30, 2016, the WPRA refinanced its debt obligation resulting in the debt becoming due August 31, 2021. As a result, the Company reclassified the related portion of its capital lease obligation from short-term to long-term in the consolidated balance sheet as of June 30, 2016 as well as reflected the revised cash flow obligations in the Commitments table above.

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

The leases have remaining terms ranging from 1 years to 36 years and have a weighted average interest rate of 10.0%. Total interest expense related to capital leases for the years ended June 30, 2016, 2015 and 2014 was \$3.1 million, \$3.3 million and \$2.8 million.

Total rent expense recorded in operating expenses in the accompanying consolidated statements of operations for the years ended June 30, 2016, 2015 and 2014 was \$15.5 million, \$15.5 million and \$15.1 million, respectively.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Other

The Company holds forestry licenses and land leases with respect to certain of its resort operations. These leases expire at various times between 2017 and 2047 and provide for annual payments of approximately 2.0% of defined gross revenue. Payments for forestry licenses and land leases for the years ended June 30, 2016, 2015 and 2014 were \$3.6 million, \$3.1 million and \$2.8 million, respectively.

15. Employee Benefit Plans

The Company has three closed noncontributory defined benefit pension plans, one registered and two nonregistered, covering certain of its former executives ("Executive plans"). In addition to these plans, one of the Company's mountain resorts has two closed defined benefit pension plans covering certain employees ("Employee plans"). There are no additional service costs to the Company on any of the plans.

Benefit Obligations and Funded Status

A summary of the funded status of the Company's pension plans at June 30, 2016 and 2015 is as follows (in thousands):

	Executive plans		Employee plans	
	2016	2015	2016	2015
Change in benefit obligations:				
Benefit obligation at beginning of year:	\$34,547	\$40,730	\$11,161	\$11,530
Interest cost	1,199	1,358	417	419
Actuarial (gains) losses	1,981	(89)	1,080	(36)
Benefits paid	(1,810)	(2,025)	(448)	(752)

Change in plan assets:				
Fair value of plan assets at beginning of year:	\$5,550	\$6,256	\$7,008	\$6,906
Actual return of assets	56	91	(68)	57
Employer contributions	1,887	2,145	1,202	797
Benefits paid	(1,810)	(2,025)	(448)	(752)
Foreign currency translation	(225)	(917)	—	—
Fair value of plan assets at end of year	\$5,458	\$5,550	\$7,694	\$7,008
Funded status as of June 30:				
Fair value of plan assets	\$5,458	\$5,550	\$7,694	\$7,008
Benefit obligations	34,492	34,547	12,210	11,161
Funded status	\$(29,034)	\$(28,997)	\$(4,516)	\$(4,153)
Amounts recognized in Statements of Financial Position:				
Noncurrent liabilities	\$29,034	\$28,997	\$4,516	\$4,153

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Net amount recognized	\$29,034	\$28,997	\$4,516	\$4,153
Amounts recognized in Accumulated Other Comprehensive Income:				
Net actuarial loss	\$9,584	\$8,273	\$4,656	\$3,676

The net liability of all pension plans is included in other long term liabilities on the consolidated balance sheets (see Note 5, "Supplementary Balance Sheet Information"). The accumulated benefit obligation for all pension plans was \$46.7 million and \$45.7 million as of June 30, 2016 and 2015, respectively.

The Company has issued letters of credit aggregating \$32.5 million and \$33.9 million as of June 30, 2016 and 2015, respectively, as security for its obligations under the Executive plans.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Components of Net Periodic Benefit Cost

The net periodic benefit cost of the Company's pension plans for the years ended June 30, 2016, 2015 and 2014 was as follows (in thousands):

	Executive plans			Employee plans		
	2016	2015	2014	2016	2015	2014

Total recognized in net periodic cost and other comprehensive income	\$2,824	\$(181)	\$5,012	\$1,566	\$326	\$909

As of June 30, 2016, there is approximately \$0.9 million of previously unrecognized actuarial losses in AOCI expected to be recognized in net periodic benefit cost during fiscal year 2017. There are no prior service costs.

Assumptions

The discount rates used to determine the obligations of the Executive and Employee plans at the measurement date of June 30, 2016 were based on hypothetical yield curves using high quality corporate bonds in Canada and the U.S. The average timing of benefit payments was compared to average timing of cash flows from the long-term bonds to assess potential timing adjustments. The resulting discount rates were 3.3%, 3.8%, and 3.2% as of June 30, 2016 for the Canadian Executive plans, U.S. Executive plans, and Employee plans, respectively.

The expected long-term rate of return assumption for plan assets, for both the Executive and Employee plans, employs a building block approach based on historical markets and historical relationship between equities and fixed income investments. Current market factors are also evaluated.

The weighted average assumptions used to determine the Company's benefit obligations at June 30 were as follows:

	Executive plans		Employee plans	
	2016	2015	2016	2015
Discount rate	3.3%	3.8%	3.2%	3.9%
Expected rate of return on plan assets	1.9%	2.0%	4.2%	4.1%

The weighted average assumptions used to determine the Company's net periodic benefit cost for the years 2016, 2015 and 2014 were as follows:

	Executive plans			Employee plans		
	2016	2015	2014	2016	2015	2014
Discount rate	3.8%	3.8%	4.3%	3.9%	3.8%	4.4%
Expected rate of return on plan assets	2.0%	2.4%	2.0%	4.1%	6.1%	6.0%

---------------------	-------	----------	---------

- (1) This category is cash held in Canadian dollars used to pay benefits and the fair value is the carrying amount.
- (2) This category includes funds that are held in a non-interest bearing refundable tax account by the Receiver General of Canada.
 Certain investments that are measured at fair value using the net asset value ("NAV") per share practical expedient have not been categorized in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to total plan assets, which is presented net of the benefit obligation on the consolidated balance sheets. Within the Executive plan, investments measured at NAV include:
- (3) •Canadian equity pooled funds: Investments in pooled funds that invest in diversified portfolio of equity securities of Canadian companies. The funds are benchmarked against the S&P/TSX Total Return index.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

Within the Employee plan, investments measured at NAV include:

- Large cap growth funds: Investments in pooled funds with the aim to achieve capital appreciation by investing primarily in equity securities of all market capitalizations, including high quality companies with larger market capitalizations. The funds are benchmarked to the Russell 1000 Value index and the Russell 3000 Growth index.
- Large cap value funds: Investments in pooled funds with the aim to achieve long-term capital appreciation by investing in the common stocks of well-established companies. The funds invest a majority of the fund's net assets in equity securities of large capitalization companies and may also invest assets in equities of foreign issuers through ADRs and similar investments. The funds are benchmarked to the Russell 1000 Value index.
- Large cap blended funds: Investments in pooled funds with the aim to achieve capital appreciation by investing primarily in equity securities of companies that compose the S&P 500 index. The funds are benchmarked to the S&P 500 index.
- Small cap funds: Investments in pooled funds with the aim to achieve long-term capital appreciation. The funds invest a majority of the fund's net assets in equity securities of U.S. small-cap companies and may also invest its net assets in foreign securities or derivatives including futures contracts, options and swaps and exchange traded funds. The funds are benchmarked to the Russell 2000 Growth and Value index.
- Mid cap funds: Investments in pooled funds with the aim to achieve capital appreciation by investing primarily in equity securities of companies that compose the S&P mid-cap 400 index. The funds are benchmarked to the S&P 400 mid-cap index.
- International equities: Investments in pooled funds with the aim to achieve long-term total return, principally from growth of capital. The funds invest primarily in common and preferred stocks of foreign companies, including those located in emerging market countries. The majority of the funds' net assets are invested in stocks of international companies that fall within the market capitalization of the MSCI EAFE index. The funds are benchmarked to the MSCI EAFE index.
- Total return bond funds: Funds seeks total return, consisting of income and capital appreciation. Under normal circumstances, the funds invest at least 80% of their net assets in investment-grade bonds or fixed grade income securities, up to 25% of the funds' total assets in asset-backed securities, and up to 20% of the funds' total assets in U.S. dollar denominated debt securities of foreign issuers. The funds are benchmarked to the Barclays Capital U.S. Aggregate Bond index.

This category includes investments in short term U.S. denominated money market instruments of domestic and (4) foreign issuers. The fund is benchmarked to Lipper Institutional Money Market Funds Average and the Citigroup 3-months T-bill.

Transfers between levels of the fair value hierarchy are recognized at the end of the fiscal year, which generally coincides with the Company's valuation process. During the years ended June 30, 2016 and 2015, there were no pension asset transfers between the levels of the fair value hierarchy.

The Executive and Employee plans employ a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long term return of plan assets for a prudent level of risk. Risk tolerance is established through careful consideration of plan liabilities and plan funded status. The investment portfolio contains a diversified blend of equity and fixed income investments. Furthermore, equity investments are diversified across U.S. and non U.S. stocks, as well as growth, value, and small and large capitalizations. Investment risk and surplus risk (i.e., plan assets minus plan liabilities) are measured and monitored on an ongoing basis through quarterly investment portfolio reviews, annual liability measurements and periodic asset/liability studies.

The asset allocation strategy varies by plan. The following table reflects the 2016 target asset allocation, as well as the actual asset allocations, by asset category, for the Company's pension plans as of June 30, 2016 and 2015:

2016	Executive	2016	Employee
Target	plans	Target	plans

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Asset Category	Allocation	2016	2015	Allocation	2016	2015
Equity securities	3 %	4 %	4 %	40 %	41 %	43 %
Fixed income securities	12 %	11 %	13 %	57 %	55 %	54 %
Cash	84 %	85 %	83 %	3 %	4 %	3 %

Estimated Future Benefit Payments

As of June 30, 2016, the estimated undiscounted future benefit payments for the next 10 fiscal years are as follows (in thousands):

	Executive Employee plans	Executive Employee plans
2017	\$ 1,880	\$ 1,405
2018	1,946	1,256
2019	1,965	1,092
2020	1,955	853
2021	1,945	738
2022 – 2026	19,523	3,418

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

The estimated benefit payments above are based on the same assumptions used to measure the Company's benefit obligation as of June 30, 2016. The Company expects to contribute \$2.5 million to the pension plans in fiscal year 2017.

16. Related Party Transactions

For the year ended June 30, 2016, the Company provided immaterial legal, tax advisory and bookkeeping services to various entities controlled by Fortress.

17. Segment Information

The Company currently manages and reports operating results through three segments: Mountain, Adventure and Real Estate. The Mountain segment includes the operations of the Company's mountain resorts and related ancillary activities. The Mountain segment earns revenue from a variety of activities, including lift revenue, lodging revenue, ski school revenue, retail and rental revenue, food and beverage revenue, and other revenue. The Adventure segment generates revenue from the sale of helicopter accessed skiing, mountaineering and hiking adventure packages, and ancillary services, such as fire suppression services, leasing, and maintenance, repair and overhaul of aircraft. The Real Estate segment includes management of condominium hotel properties and real estate management, including marketing and sales activities, as well as real estate development activities. The Real Estate segment includes the results of IRCG, a vacation club business, prior to the Disposition Date.

Each of the Company's segments offers distinctly different products and services and requires different types of management focus. As such, these segments are managed separately. In deciding how to allocate resources and assess performance, the Company's Chief Operating Decision Maker ("CODM") regularly evaluates the performance of the Company's segments on the basis of revenue and earnings, which are adjusted for certain items set forth in the reconciliation below, including interest, taxes, depreciation and amortization ("Adjusted EBITDA"). The Company also evaluates Adjusted EBITDA as a key compensation measure. The compensation committee of the board of directors determines the annual variable compensation for certain members of the management team based, in part, on Adjusted EBITDA. Adjusted EBITDA is useful when comparing the segment performance over various reporting periods because it removes from the operating results the impact of items that the Company's management believes do not reflect the core operating performance.

Adjusted EBITDA should not be considered an alternative to, or more meaningful than, net income (loss) or other measures of financial performance or liquidity derived in accordance with GAAP. Adjusted EBITDA may not be comparable to similarly titled measures of other companies because other entities may not calculate Adjusted EBITDA in the same manner as the Company. The Company's definition of Adjusted EBITDA is generally consistent with the definition of Consolidated EBITDA in the Credit Agreement, with exceptions related to not adjusting for recurring public company costs and foreign currency translation adjustments related to operational activities and adjusting for executive management restructuring costs.

The Company defines Adjusted EBITDA as net income (loss) attributable to Intrawest Resorts Holdings, Inc. before interest expense, net (excluding interest income earned from receivables related to IRCG operations through the Disposition Date), income tax benefit or expense and depreciation and amortization, further adjusted to exclude certain items, including, but not limited to: (i) impairments of goodwill, real estate and long-lived assets; (ii) gains and losses on asset dispositions; (iii) earnings and losses from equity method investments; (iv) gains and losses from

remeasurement of equity method investments; (v) gains and losses on extinguishment of debt; (vi) other income or expense; (vii) earnings and losses attributable to noncontrolling interest; (viii) discontinued operations, net of tax; and (ix) other items, which include revenue and expenses of legacy and other non-core operations, restructuring charges and associated severance expenses, non-cash compensation and other items. For purposes of calculating Adjusted EBITDA, the Company also adds back to net income (loss) attributable to Intrawest Resorts Holdings, Inc., the pro rata share of Adjusted EBITDA related to equity method investments included within the segments and removes from Adjusted EBITDA the Adjusted EBITDA attributable to noncontrolling interests for entities consolidated within the segments. Asset information by segment, except for capital expenditures as shown in the table below, is not included in reports used by the CODM in monitoring of performance and, therefore, is not disclosed.

The accounting policies of the segments are the same as those described in Note 2, "Significant Accounting Policies". Transactions among segments are accounted for as if the sales or transfers were to third parties, or, in other words, at current market prices.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.

(1)Lift revenue outside of the ski season is derived from mountain biking and sightseeing lift products.

Table of Contents INTRAWEST RESORTS HOLDINGS, INC.
Notes to Consolidated Financial Statements

(2) Ski School revenue outside of the ski season is derived from mountain bike instruction at various resorts.

(3) Legacy, non-core and other revenue represents legacy and other non-core operations that are not reviewed regularly by the CODM to assess performance and make decisions regarding the allocation of resources. It includes legacy real estate asset sales, divested non-core operations, and non-core retail revenue. Included in the year ended June 30, 2014 was \$10.9 million of revenue from sales of non-core real estate held for development.

(4) Legacy and other non-core expenses, net represents revenue and expenses of legacy and other non-core operations that are not reviewed regularly by the CODM to assess performance and make decisions regarding the allocation of resources. Revenue and expenses related to legacy and other non-core operations include retail operations not located at the Company's properties and legacy litigation consisting of claims for damages related to alleged construction defects, purported disclosure violations in real estate marketing sales and documents, and allegations that the Company failed to construct planned amenities.

(5) Includes costs related to the Company's initial public offering, non-cash compensation, reduction in workforce severance, executive management restructuring costs, lease payments pursuant to the lease at Winter Park and other expenses.

(6) Includes interest income unrelated to IRCG financing activities.

(7) Represents the losses from equity method investments, including: Chateau M.T. Inc., Mammoth Hospitality Management L.L.C., the Mammoth family of resorts, and Blue Mountain prior to the Blue Mountain Acquisition.

(8) Includes the Company's pro rata share of Adjusted EBITDA from its equity method investment in Blue Mountain prior to the Blue Mountain Acquisition. The pro rata share of Adjusted EBITDA represents the share of Adjusted EBITDA from the equity method investment based on the Company's economic ownership percentage.

(9) Includes the Company's pro rata share of EBITDA from its equity method investments in Mammoth Hospitality Management L.L.C. and Chateau M.T. Inc. The pro rata share of Adjusted EBITDA represents the Company's share of Adjusted EBITDA from these equity method investments based on the Company's economic ownership percentages.

(10) Adventure segment Adjusted EBITDA excludes Adjusted EBITDA attributable to noncontrolling interest.

(11) Real Estate segment Adjusted EBITDA includes interest income earned from receivables related to the IRCG operations in the amount of \$1.9 million, \$3.9 million, and \$4.4 million for the years ended June 30, 2016, 2015 and 2014, respectively.

Capital Expenditures

The following table presents capital expenditures for each segment, reconciled to consolidated amounts for the years ended June 30, 2016, 2015 and 2014 (in thousands):

Year Ended June 30,		
2016	2015	2014

Capital expenditures:

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K

Mountain	\$35,285	\$33,004	\$32,707
Adventure	9,994	4,425	6,891

ITEM 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Annual Report on Form 10-K. Based on that evaluation, management, with the participation of the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures, as of the end of the period covered by this Annual Report on Form 10-K, are functioning effectively to provide reasonable assurance that the information required to be disclosed by the Company in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. A controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934, as amended. Management has assessed the effectiveness of our internal control over financial reporting as of June 30, 2016 based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. As a result of this assessment, management concluded that, as of June 30, 2016, the Company's internal control over financial reporting was effective in providing reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Change in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during the quarter ended June 30, 2016 that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

The information required by this Item 10 of Form 10-K will be included in our 2016 Proxy Statement to be filed with the SEC in connection with the solicitation of proxies for our 2016 Annual Meeting of Stockholders ("2016 Proxy Statement") and is incorporated herein by reference. The 2016 Proxy Statement will be filed with the SEC within 120 days after the end of the fiscal year to which this report relates.

ITEM 11. EXECUTIVE COMPENSATION.

Edgar Filing: Intrawest Resorts Holdings, Inc. - Form 10-K
