BLADEX'S FULL YEAR NET INCOME NEARLY DOUBLES TO \$83.2 MILLION, OR

\$2.25 PER SHARE;

FOURTH QUARTER NET INCOME INCREASES 52% TO \$24.8 MILLION, OR \$0.67

PER SHARE

PANAMA CITY, February 23, 2012 – Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, “Bladex”, or “the Bank”) announced today its results for the fourth quarter and full-year ended December 31, 2011.

Full-year and fourth quarter 2011 Business Highlights

Bladex's full-year 2011 Net Income^(*) totaled \$83.2 million, compared to \$42.2 million in 2010. The \$40.9 million, or 97%, increase was driven by improved performance at each of the Bank's business segments: Commercial Division (+29%), Treasury Division (+37%), and Asset Management Unit (n.m.).

The Bank's fourth quarter 2011 Net Income reached \$24.8 million, a \$9.3 million, or 60%, improvement from the fourth quarter 2010, and a \$8.5 million, or 52%, increase from the third quarter 2011, mainly driven by the Commercial Division's sustained growth in Net Income (\$17.7 million, +57% vs. 4Q 2010, and +22% vs. 3Q 2011). The Treasury Division and Asset Management Unit contributed \$3.3 million and \$3.9 million, respectively, to the quarterly result.

During the fourth quarter, ROE was 13.1% compared to 8.9% a year earlier and 8.7% in the third quarter 2011. 2011 ROE reached 11.4%, compared to 6.2% in 2010.

Net interest income totaled \$102.7 million in 2011, compared to \$74.5 million in 2010. The \$28.2 million, or 38%, increase was mainly attributable to higher average interest-earning asset balances (+30%) and improved net interest margins (+11 bps). Fourth quarter 2011 net interest income was \$29.1 million, an \$8.1 million, or 39%, increase from the fourth quarter 2010, and a \$0.4 million, or 2%, increase from the previous quarter.

As of December 31, 2011, the Commercial Portfolio totaled \$5.4 billion, a \$0.9 billion, or 20%, year-on-year increase. While the average portfolio grew 3% during the fourth quarter, up 26% from the fourth quarter 2010 and 39% year-on-year, end-of-year balances were 4% lower than the previous quarter as the Bank opted to temporarily slow disbursements and increase liquidity position towards the end of the quarter in response to market volatility. Full-year credit disbursements reached \$10.5 billion, a \$3.1 billion, or 42% increase from the previous year.

As the Bank placed greater emphasis on liquidity during the year-end-period, liquid assets ⁽⁹⁾ amounted to \$786 million as of December 31, 2011, compared to \$421 million as of December 31, 2010, and \$532 million as of September 30, 2011. The liquid assets to total assets ratio increased to 12.4%, compared to 8.2% as of December 31, 2010, and 8.5% as of September 30, 2011.

As of December 31, 2011, the non-accrual portfolio was \$32.0 million, or 0.6% of the loan portfolio, compared to 0.7% a year ago. The ratio of credit reserves to the non-accrual portfolio was 304%, compared to 317% in 2010. As of December 31, 2011, the ratio of the allowance for credit losses to the Commercial Portfolio was 1.82%, compared to 2.07% a year ago, and 1.70% as of September 30, 2011.

The efficiency ratio improved to 36% in 2011, compared to 55% in 2010. The fourth quarter 2011 efficiency ratio was 34%, versus 44% in the fourth quarter 2010, and 40% in third quarter 2011.

As of December 31, 2011, the Bank's Tier 1 capital ratio was 18.6%, compared to 20.5% as of December 31, 2010, and 16.9% as of September 30, 2011. The Bank's equity consists entirely of issued and fully paid ordinary common stock.

(*) Net income or loss attributable to Bladex ("Net Income", or "Net Loss").

CEO's Comments

Mr. Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the Bank's results: "Financially, fourth quarter 2011 results capped, in a particularly convincing manner, a remarkable year for Bladex, with fourth quarter ROE exceeding 13%, and Tier 1 capitalization of nearly 19%. As a whole, 2011's average commercial portfolio grew more than 38%, disbursements rose 42%, intermediation margins widened 11 bps, the Asset Management Unit returned to historical levels of profitability, and the Region retained a good deal of momentum despite the global economic slowdown. Taken together, these factors allowed Bladex to nearly double Net Income in 2011. Just as important, given the Bank's view on the sustainability of these results, the decision was recently made to increase the common quarterly dividend from \$0.20 to \$0.25 cents per share, the third time the dividend has been raised in the last two years.

Beyond the dollar figures, however, Bladex is especially encouraged as 2011 results validate the soundness of two strategic principles that have underpinned the Bank's actions since 2008: First, Latin America has become an essential and key supplier of much of the food, minerals, energy and, in some cases, manufactured goods an evolving world requires as emerging nations develop and established economies transform. Second, as a result of the Bank's investments over the past two years, Bladex is both ideally and uniquely positioned to profit from the resulting growth in foreign trade that this process has brought about. During 2012, Bladex will continue to execute based on these strategic principles.

In conclusion, Bladex's fourth quarter and full-year 2011 results confirm the essence of the Bank's business: Trade Finance in Latin America. While Latin America is neither immune nor indifferent to events affecting European Union financial institutions, Bladex has effectively positioned its business in one of the sweeter and more resilient spots of

the global economy, Latin America's growing trade flows.”

RESULTS BY BUSINESS SEGMENT ⁽¹⁾

COMMERCIAL DIVISION

The Commercial Division incorporates the Bank's core business of financial intermediation and fee generation activities. Net Income includes net interest income from loans, fee income, allocated operating expenses, reversals or provisions for loan and off-balance sheet credit losses, and any impairment on assets.

The Commercial Portfolio includes the book value of loans, selected deposits placed, equity investments, acceptances, and contingencies (including letters of credit, stand-by letters of credit, and guarantees covering commercial risk and credit commitments).

As of December 31, 2011, the Commercial Division portfolio balances totaled \$5.4 billion, a 4% decrease from the previous quarter, and a 20% increase from the fourth quarter 2010. On an average basis, the Commercial Portfolio increased 3% in the fourth quarter 2011 compared to the previous quarter, 26% from the fourth quarter 2010, and 39% year-on-year. The annual increase was mainly attributable to the Division's portfolio growth and diversification driven by solid demand from the Bank's established client base of corporations (+8%) and financial institutions (+26%), along with the continuing business expansion into the middle market segment (+101%).

The Commercial Portfolio continues to be short-term and trade-related in nature: \$3.7 billion, or 70%, of the Commercial Portfolio matures within one year, and \$1.7 billion, or 32%, within 90 days. Trade financing operations represent 59% of the portfolio, while the remaining balance consists primarily of lending to banks and corporations involved in foreign trade.

The following graphs illustrate the geographic composition of the Bank's Commercial Division by country of risk and the diversification of corporate and middle-market companies across a variety of industry segments:

Fourth quarter 2011 credit disbursements totaled \$2.3 billion, compared to \$2.2 billion in the fourth quarter 2010, and \$2.7 billion in the third quarter 2011. Full-year credit disbursements reached \$10.5 billion, a \$3.1 billion, or 42%, increase due to strong demand from the Bank's established client base, as well as the Bank's expansion of its cross border vendor finance business in the year.

Refer to Exhibit X for additional information relating to the Bank's Commercial Portfolio distribution by country, and Exhibit XII for the Bank's distribution of credit disbursements by country.

Net Income	\$53.4	\$41.5	\$17.7	\$14.5	\$11.3

4Q11 vs. 3Q11

Net Income in the fourth quarter 2011 totaled \$17.7 million, compared to \$14.5 million in the third quarter 2011. The \$3.2 million, or 22%, increase in Net Income was mainly driven by (i) a \$2.2 million increase in net interest income from higher loan margins (+17 bps) and from higher average loan portfolio balances (+5%), and (ii) a \$1.2 million net decrease in provisions for credit losses mainly as a result of prior period loan loss recoveries.

4Q11 vs. 4Q10

Net Income increased \$6.4 million, or 57%, compared to the fourth quarter 2010 primarily due to a \$8.4 million, or 44% increase in net operating revenues mostly attributable to a \$8.6 million, or 54%, increase in net interest income as a result of higher average interest-earning assets (+29%) and improved net interest margins (+14 bps). These results were partially offset by a \$1.8 million net increase in provisions for credit losses mainly due to higher commercial portfolio balances (+20%).

2011 vs. 2010

Full year 2011 Division's accumulated Net Income was \$53.4 million, an \$11.9 million, or 29%, increase compared to the \$41.5 million Net Income in 2010. Net operating revenues amounted to \$92.7 million, a \$27.9 million, or 43%, increase from 2010, mostly attributable to a \$27.2 million, or 50%, increase in net interest income, reflecting higher

average loan portfolio balances (+40%) and improved net interest margins (+11 bps), along with a \$0.7 million, or 7%, increase in non-interest operating income. The revenue increase was partly offset by (i) a \$6.5 million increase in operating expenses, as the Division expanded its sales force and local presence in the Region, and (ii) \$4.4 million in credit provision charges in 2011 related to higher portfolio balances, compared to \$4.8 million in reversals of provisions that took place in 2010.

TREASURY DIVISION

The Treasury Division incorporates the Bank's liquidity management, and investment securities activities. Net Income is presented net of allocated operating expenses, and includes net interest income on Treasury activities and net other income (loss) relating to Treasury activities.

Liquid assets ⁽⁹⁾ amounted to \$786 million as of December 31, 2011, compared to \$532 million as of September 30, 2011, and \$421 million as of December 31, 2010, as the Bank maintained proactive liquidity management, increasing its liquidity position in response to market volatility.

As of December 31, 2011, the securities available-for-sale portfolio totaled \$416 million, compared to \$412 million as of September 30, 2011, and \$353 million as of December 31, 2010. As of December 31, 2011, the available-for-sale portfolio consisted entirely of readily quoted Latin American securities, 79% of which were sovereign or state-owned risk in nature (refer to Exhibit XI for a per country distribution of the Treasury portfolio).

The available-for-sale portfolio is marked-to-market, with the impact recorded in stockholders' equity through the Other Comprehensive Income (Loss) Account ("OCI"), which improved to (\$3.1) million in the fourth quarter 2011, compared to (\$12.7) million in the third quarter 2011, and (\$6.4) million in the fourth quarter 2010, mainly as the net result of improved valuations of the securities and/or the interest rate hedging instruments associated with such securities.

Funding costs improved year-on-year, as the weighted average funding cost in 2011 was 1.12%, a decrease of 14 bps, or 11%, compared to 2010, while in the fourth quarter 2011, weighted average funding cost increased 17 bps to 1.22%, compared to the third quarter 2011, and 5 bps compared to the fourth quarter 2010, reflecting volatile capital market conditions.

As of December 31, 2011, deposit balances were \$2.3 billion, a 27% year-on-year increase, and an 8% decrease versus the historic highs recorded in the previous quarter. Deposits originate from central banks, financial institutions and corporations throughout the Latin America, represent 41% of total liabilities. Borrowings and securities sold under repurchase agreement reached \$3.2 billion, a 10% increase from the third quarter 2011, and up 31% year-on-year.

Net Income	\$14.7	\$10.7	\$3.3	\$5.3	\$5.8

4Q11 vs. 3Q11

The Division's Net Income in the fourth quarter 2011 was \$3.3 million, compared to Net Income of \$5.3 million in the third quarter 2011. The \$2.0 million decrease was mostly driven by (i) a \$1.3 million decrease in net interest income mainly attributable to higher interest expense as a result of 17 bps increase in funding costs, and (ii) a \$0.8 million decrease in non-interest operating income as the positive net effect of valuations on trading securities and related hedging instruments was more than offset by lower gains on sale of securities available for sale.

4Q11 vs. 4Q10

The Division's quarterly Net Income of \$3.3 million represented a decrease of \$2.5 million from the \$5.8 million Net Income reported in the fourth quarter 2010, due to the combined effects of: (i) a \$0.9 million decrease in non-interest operating income primarily as a result of lower gains on sale of securities available for sale, (ii) a \$1.0 million decrease in net interest income mainly attributable to increased interest expenses reflecting primarily higher short-term borrowing balances, and (iii) a \$0.6 million increase in operating expenses.

2011 vs. 2010

Full year 2011 Division's accumulated Net Income totaled \$14.7 million, a \$4.0 million, or 37%, increase compared to Net Income of \$10.7 million in 2010, primarily as a result of a \$4.9 million increase in non-interest operating income attributable to higher gains on sale of securities available for sale and the positive year-on-year net variation on the valuation of trading securities and its associated trading derivatives.

ASSET MANAGEMENT UNIT

The Asset Management Unit incorporates the Bank's asset management activities. The Unit's Investment Fund primarily follows a Latin America macro strategy, utilizing a combination of products (foreign exchange, equity indices, interest rate swaps, and sovereign credit products) to establish long and short positions in the markets.

The Unit's Net Income includes net interest income on the Investment Fund, as well as net gains (losses) from investment fund trading, other related income (loss), allocated operating expenses, and Net Income attributable to the redeemable non-controlling interest.

Net Income (Loss)	\$15.1	\$(10.0)	\$3.9	\$(3.4)	\$(1.6)

4Q11 vs. 3Q11

In the fourth quarter 2011, the Asset Management Unit reported Net Income of \$3.9 million, compared to a Net Loss of \$3.4 million in the third quarter 2011. The \$7.3 million quarterly increase was mainly due to gains from investments in the Investment Fund.

4Q11 vs. 4Q10

The Unit's Net Income of \$3.9 million in the fourth quarter 2011 represented a \$5.5 million increase from the \$1.6 million in Net Loss reported in the fourth quarter 2010, mostly attributable to gains from investments in the Investment Fund.

2011 vs. 2010

In 2011, the Asset Management Unit contributed Net Income of \$15.1, compared to a Net Loss of \$10.0 million in 2010. The \$25.1 million year-over-year increase was due to the combined effects of: (i) a \$27.7 million increase in non-interest operating income attributable to gains from investments in the Investment Fund, (ii) a \$1.0 million increase in net interest income, and (iii) a \$0.5 million increase in operating expenses as a result of higher provisions for variable compensation tied to the performance of the Investment Fund, partially offset by a \$3.1 million increase in net income attributable to the redeemable non-controlling interest.

As of December 31, 2011, the Investment Fund's asset value totaled \$120 million, compared to \$136 million as of September 30, 2011, and \$167 million as of December 31, 2010. As of the same dates, Bladex's ownership of the Bladex Offshore Feeder Fund was 95.84%, 96.22% and 88.67%, respectively, with the remaining balance owned by

third party investors.

10

In 2011, the Bank redeemed \$50 million of its participation in the Fund, following the decision to gradually reduce its exposure to the business to mitigate volatility.

Net Interest Margin*	1.81 %	1.70 %	1.84 %	1.90 %	1.70 %

* Net interest income divided by average balance of interest-earning assets.

Net interest margin was 1.84% in the fourth quarter 2011, compared to 1.90% in the third quarter 2011, and 1.70% in the fourth quarter 2010 as low yielding liquid assets were increased in the midst of tightened liquidity in the international markets, and as increased short-term funding costs were only partially offset by higher average loan rates.

Full-year net interest margin improved to 1.81% in 2011, compared to 1.70% in 2010, as average interest-earning asset rates increased 4 bps, while average interest-bearing liability rates decreased 14 bps.

4Q11 vs. 3Q11

In the fourth quarter 2011, net interest income amounted to \$29.1 million, an increase of \$0.4 million, or 2%, compared to \$28.7 million in the third quarter 2011, primarily as a result of:

A \$0.7 million increase in net interest income from higher average interest-earning assets, primarily average loan (i) portfolio balances (+5%), which resulted in a \$1.6 million overall increase in interest income, partially offset by a \$0.9 million increase in interest expense associated with an increase in average interest-bearing liabilities (+5%).

Higher average interest rates for the Bank's interest-earning assets and liabilities, which resulted in a \$0.3 million (ii) decrease in net interest income. The average yields on interest-earning assets increased 9 bps to 2.87%, more than offset by a 17 bps increase in average yield paid on interest-bearing liabilities (1.22%).

4Q11 vs. 4Q10

Net interest income increased \$8.1 million, or 39%, when compared to the fourth quarter 2010. This increase primarily reflects:

(i) A \$4.2 million increase in net interest income as the result of higher average interest-earning assets, primarily average loan portfolio balances (+28%), which resulted in a \$8.8 million overall increase in interest income, partially offset by a \$4.6 million increase in interest expense associated with an increase in average interest-bearing liabilities (+33%).

- (ii) A \$3.9 million increase in net interest income as a result of higher average interest rates on the Bank's interest-earning assets (+23 bps), while the average yield paid on interest-bearing liabilities decreased 5 bps.

2011 vs. 2010

Year-on-year, net interest income amounted to \$102.7 million, compared to \$74.5 million in 2010. The \$28.2 million, or 38%, increase of net interest income during the period mainly reflects the following:

- (i) Higher average interest-earning assets, primarily average loan portfolio balances (+40%), which resulted in a \$36.7 million overall increase in interest income, partially offset by a \$12.8 million increase in interest expense associated with an increase in average interest-bearing liabilities (+37%), resulting in a \$23.9 million overall increase in net interest income.

- (ii) Average interest rates on the Bank's interest-earning assets increased 4 bps to 2.73%, while the average rate paid on the Bank's interest-bearing liabilities decreased 14 bps to 1.12%, resulting in a \$4.3 million overall increase in net interest income.

Fees and commissions income amounted to \$3.0 million in the fourth quarter 2011, compared to \$3.7 million in the previous quarter, and \$3.1 million in the fourth quarter 2010. The quarterly decreases of \$0.7 million and \$0.1 million, respectively, were mostly attributable to lower transactional fees, partially offset by the increased commission income from letter of credit transactions (+\$0.1 million and +\$0.9 million, respectively).

For 2011, fees and commissions income amounted to \$10.7 million, compared to \$10.3 million in 2010, representing a \$0.4 million increase, mainly as a result of increased commission income from higher average volumes in the letter of credit business (+28%).

Total Allowance for Credit Losses	\$ 92.0	\$ 92.2	\$ 92.7	\$ 95.2	\$ 97.4

The allowance for loan and off-balance sheet credit losses amounted to \$97.4 million as of December 31, 2011, compared to \$95.2 million as of September 30, 2011, and \$92.0 million as of December 31, 2010. The \$2.2 million quarter-on-quarter net increase in the total allowance for credit losses was mainly attributable to a shift in the mix of both loan and off-balance sheet exposure, higher reserves relating to the non-accrual portfolio, and recoveries related to prior period losses. The \$5.4 million year-on-year increase in the total allowance for credit losses was mainly driven by the increase of the Bank's commercial portfolio balances, partially offset by a year-on-year improvement in client specific and country risk levels in the Region. The ratio of the allowance for credit losses to the Commercial Portfolio was 1.8% as of December 31, 2011, compared to 1.7% as of September 30, 2011, and 2.1% as of December 31, 2010.

As of December 31, 2011, the non-accrual portfolio balances totaled \$32.0 million, representing 0.6% of the loan portfolio, compared to \$33.1 million in the previous quarter, and \$29.0 million as of December 31, 2010 (0.7% of the loan portfolio). Credit provision levels represented 304% and 317% of non-accrual balances in December 31, 2011, and December 31, 2010, respectively.

Quarterly Variation

Operating expenses in the fourth quarter 2011 totaled \$13.3 million, a \$0.9 million, or 8%, increase compared to \$12.4 million in the third quarter 2011, mainly as a result of higher performance-related expenses from the Investment Fund. The \$1.7 million, or 14%, increase compared to the same period 2010 was primarily due to professional services and other operating expenses mostly related to the Commercial Division's business expansion and higher performance-related expenses from the Investment Fund.

The Bank's fourth quarter 2011 efficiency ratio improved to 34%, compared to 40% in the third quarter 2011, and 44% in the fourth quarter 2010, mostly as a result of increased operating revenues from the Commercial Division and the Asset Management Unit.

The operating expenses to average assets ratio was 83 bps in the fourth quarter 2011, compared to 81 bps in the previous quarter, and 94 bps in the fourth quarter 2010.

2011 vs. 2010

During 2011, operating expenses totaled \$50.0 million, compared to \$42.1 million in 2010. The \$8.0 million, or 19%, increase in operating expenses was primarily attributable to salary and other employee expenses associated with higher average headcount in support of the expanding Commercial Division, as well as the risk management function, along with higher performance-related expenses from the Investment Fund, and to the costs associated with the new representative offices in Monterrey, Mexico, Porto Alegre, Brazil, Lima, Peru and Bogota, Colombia, established in support of the Commercial Division.

During 2011, the Bank's efficiency ratio improved to 36%, compared to 55% in 2010, mainly as the result of the \$61.5 million year-on-year increase in net operating revenues across all business segments, which exceeded the \$8.0 million

operating expense growth.

As of December 31, 2011, the Bank's operating expenses to average assets ratio decreased to 88 bps on improving economies of scale, compared to 97 bps as of December 31, 2010.

The Bank's common shares outstanding totaled 37.1 million as of December 31, 2011, nearly unchanged from levels as of September 30, 2011, and compared to 36.7 million as of December 31, 2010.

RECENT EVENTS

Quarterly dividend payment: At the Board of Director's Meeting held January 17, 2012, the Bank's Board § reaffirmed its commitment to a dividend approach that reflects Bladex's growing core business. Consequently, the Bank's quarterly common dividend was increased from \$0.20 to \$0.25 per share.

Ratings affirmed: Following a Standard & Poor's review based on recently revised banking criteria published § November 9, 2011, S&P affirmed the Bank's credit rating at 'BBB/A-2', with a "Stable" Outlook on December 6, 2011.

Note: Various numbers and percentages set forth in this press release have been rounded and, accordingly, may not total exactly.

Footnotes:

In the fourth quarter 2011, the Bank made the following changes in the measurement methods used to determine segment profit or loss: (i) The interest expense allocation methodology reflects funding costs allocated on a matched-funded basis, net of the risk adjusted capital determined for each business segment, (ii) The operating (1) expenses allocation methodology allocates overhead expenses based on actual resource usage determined for business segment. The approach utilized in prior periods allocated interest and overhead expenses based on each segment's average portfolio balances. Comparative amounts for the previous quarters in 2011 and 2010 have been reclassified to conform to the current period presentation.

(2) Non-interest operating income (loss) refers to net other income (expense) excluding reversals (provisions) for credit losses and recoveries (impairment) on assets. By business segment, non-interest operating income includes: Commercial Division: Net fees and commissions and Net related other income (expense).

Treasury Division: net gain (loss) on sale of securities available-for-sale, impact of derivative hedging instruments, gain (loss) on foreign currency exchange, and gain (loss) on trading securities.

Asset Management Unit: Gain from Investment Fund trading and related other income (expense).

(3) Net Operating Revenues refers to net interest income plus non-interest operating income.

(4) Net Operating Income (Loss) refers to net interest income plus non-interest operating income, minus operating expenses.

(5) Treasury Division's net operating income includes: (i) interest income from interest bearing deposits with banks, investment securities and trading assets, net of allocated cost of funds; (ii) other income (expense) from derivative financial instrument and hedging; (iii) net gain (loss) from trading securities; (iv) net gain (loss) on sale of securities available for sale; (v) gain (loss) on foreign currency exchange; and (vi) allocated operating expenses.

(6) Net Income per Share calculations are based on the average number of shares outstanding during each period.

(7) Operating ROE: Annualized net operating income divided by average stockholders' equity.

(8) Efficiency ratio refers to consolidated operating expenses as a percentage of net operating revenues.

(9) Liquid assets consist of investment-grade 'A' securities, and cash and due from banks, excluding pledged regulatory deposits. Liquidity ratio refers to liquid assets as a percentage of total assets.

(10) Tier 1 Capital is calculated according to Basel I capital adequacy guidelines, and is equivalent to stockholders' equity excluding the OCI effect of the available for sale portfolio. Tier 1 Capital ratio is calculated as a percentage of risk weighted assets. Risk-weighted assets are, in turn, also calculated based on Basel I capital adequacy guidelines.

(11) Total Capital refers to Tier 1 Capital plus Tier 2 Capital, based on Basel I capital adequacy guidelines. Total Capital ratio refers to Total Capital as a percentage of risk weighted assets.

(12) Leverage corresponds to assets divided by stockholders' equity.

SAFE HARBOR STATEMENT

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the growth of the credit portfolio, including the trade portfolio, the increase in the number of the Bank's corporate clients, the positive trend of lending spreads, the increase in activities engaged in by the Bank that are derived from the Bank's client base, anticipated operating income and return on equity in future periods, including income derived from the Treasury Division and Asset Management Unit, the improvement in the financial and performance strength of the Bank and the progress the Bank is making. These forward-looking statements reflect the expectations of the

Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: the anticipated growth of the Bank's credit portfolio; the continuation of the Bank's preferred creditor status; the impact of increasing/decreasing interest rates and of the macroeconomic environment in the Region on the Bank's financial condition; the execution of the Bank's strategies and initiatives, including its revenue diversification strategy; the adequacy of the Bank's allowance for credit losses; the need for additional provisions for credit losses; the Bank's ability to achieve future growth, to reduce its liquidity levels and increase its leverage; the Bank's ability to maintain its investment-grade credit ratings; the availability and mix of future sources of funding for the Bank's lending operations; potential trading losses; the possibility of fraud; and the adequacy of the Bank's sources of liquidity to replace deposit withdrawals.

The bank has aligned its operations into three major business segments, based on the nature of clients, products and on credit risk standards.

Interest expenses are allocated based on average credits.

(1) Interest income on interest-earning assets, net of allocated cost of funds.

(2) Non-interest operating income consists of net other income (expense), excluding reversals of provisions for credit losses and impairment on assets.

(3) Operating expenses are calculated based on average credits.

(4) Net operating income refers to net income excluding reversals of provisions for credit losses and impairment on assets.

(5) Includes selected deposits placed, and loans, net of unearned income and deferred loan fees.

(6) Includes cash and due from banks, interest-bearing deposits with banks, securities available for sale and held to maturity, trading securities and the investment fund.
