**Annual Report Pursuant To Section 13 or 15(d) Of The Securities Exchange Act of 1934
For The Fiscal Year Ended December 31, 2015**

or

**Transition Report Pursuant To Section 13 or 15(d) Of The Securities Exchange Act of
1934 For The Transition Period From _____ to _____ .**

Commission file number 1-08789

American Shared Hospital Services

(Exact name of registrant as specified in its charter)

California

94-2918118

(State or other jurisdiction of (IRS Employer
incorporation or organization) Identification No.)

Four Embarcadero Center, Suite 3700, San Francisco, California 94111-4107
(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number, including area code: (415) 788-5300

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock No Par Value	NYSE MKT

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes
No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of “large accelerated filer”, “accelerated filer”, and “smaller reporting company” in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated Filer Non-accelerated Filer Smaller reporting company

Indicate by check mark if the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 30, 2015, the aggregate market value of the common stock held by non-affiliates of the registrant was approximately \$8,525,000.

Number of shares of common stock of the registrant outstanding as of March 25, 2016: 5,364,000.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant’s definitive Proxy Statement for the 2016 Annual Meeting of Shareholders are incorporated by reference into Part III of this report.

FORWARD-LOOKING STATEMENTS

Certain matters discussed in this Annual Report on Form 10-K other than statements of historical information are “forward-looking statements.” The Private Securities Litigation Reform Act of 1995 has established that these statements qualify for safe harbors from liability. Forward-looking statements may include words like we “believe”, “anticipate”, “target”, “expect”, “pro forma”, “estimate”, “intend”, “will”, “is designed to”, “plan” and words of similar meaning. Forward-looking statements describe our future plans, objectives, expectations or goals. Such statements address future events and conditions concerning and include, but are not limited to, such things as:

- capital expenditures
- earnings
- liquidity and capital resources
- financing of our business
- government programs and regulations
- legislation affecting the health care industry
- the development of our proton beam therapy business
- accounting matters
- compliance with debt covenants
- competition
- technology
- interest rates

These forward-looking statements involve known and unknown risks that may cause our actual results in future periods to differ materially from those expressed in any forward-looking statement. Factors that would cause or contribute to such differences include, but are not limited to, such things as:

- our high level of debt
- the limited market for our capital intensive services
- the impact of lowered federal reimbursement rates
- the impact of recent U.S. health care reform legislation
- competition and alternatives to our services
- technological advances and the risk of equipment obsolescence
- our significant investment in development stage company in the proton beam therapy business
- the small and illiquid market for our stock

These lists are not all-inclusive because it is not possible to predict all factors. A discussion of some of these factors is included in this document under the headings “Risk Factors” and “Management’s Discussion and Analysis” “–Summary of Critical Accounting Policies and Estimates” and “–Liquidity and Capital Resources.” This report should be read in its entirety. No one section of this report deals with all aspects of the subject matter. Any forward-looking statement

speaks only as of the date such statement was made, and we are not obligated to update any forward-looking statement to reflect events or circumstances after the date on which such statement was made, except as required by applicable laws or regulations.

PART I

ITEM 1. BUSINESS

GENERAL

American Shared Hospital Services (“ASHS” and, together with its subsidiaries, the “Company”) provides Gamma Knife stereotactic radiosurgery equipment and radiation therapy and related equipment to seventeen (17) medical centers in sixteen (16) states in the United States as of March 1, 2016. The Company provides Gamma Knife services through its 81% indirect interest in GK Financing, LLC, a California limited liability company (“GKF”). The remaining 19% of GKF is owned by GKV Investments, Inc., a wholly-owned U.S. subsidiary of Elekta AG, a Swedish company (“Elekta”). Elekta is the manufacturer of the Leksell Gamma Knife® (the “Gamma Knife”). GKF is a non-exclusive provider of alternative financing services for Elekta Gamma Knife units.

The Company wholly-owns the subsidiaries MedLeader.com, Inc. (“MedLeader”) and American Shared Radiosurgery Services (“ASRS”). ASRS is the majority-owner of GKF.

GKF has established the wholly-owned subsidiaries, GK Financing U.K., Limited (“GKUK”), Instituto de Gamma Knife del Pacifico S.A.C. (“GKPeru”), and the 70% majority owned subsidiary EWRS, LLC (“EWRS”) for the purpose of providing similar Gamma Knife services in England, Peru, and Turkey respectively. The remaining 30% of EWRS is owned by EMKA, LLC, a wholly, owned limited liability company owned by Mert Ozyurek, a Director of American Shared Hospital Services. EWRS owned 100% of EWRS Tibbi Cihazlar Ticaret Ltd Sti (“EWRS Turkey”). EWRS sold EWRS Turkey on June 10, 2014. GKUK is inactive.

GKF also owns a 51% interest in Albuquerque GK Equipment, LLC (“AGKE”) and Jacksonville GK Equipment, LLC (“JGKE”). The remaining 49% in each of these two companies is owned by radiation oncologists.

The Company continues to develop its design and business model for “The Operating Room for the 21st Century”SM (“OR21SM”), through its 50% owned OR21, LLC. The remaining 50% is owned by an architectural design company. OR21 is not expected to generate significant revenue within the next two years.

The Company is also the sole owner of PBRT Orlando, LLC (“Orlando”) and the majority owner of Long Beach Equipment, LLC (“LBE”) formed to provide proton beam therapy services in Long Beach, California and Orlando, FL. A minority ownership in LBE is owned by radiation oncologists.

In April 2006, the Company invested \$2,000,000 for a minority equity interest in Mevion Medical Systems, Inc. (formerly Still River Systems, Inc.) (“Mevion”), a Littleton, Massachusetts company which, in collaboration with scientists from MIT’s Plasma Science and Fusion Center, was developing a medical device for the treatment of cancer patients using proton beam radiation therapy (“PBRT”). In September 2007, December 2011, and June 2012, the Company invested approximately \$617,000, \$70,000 and \$31,000, respectively, for additional equity interests in Mevion. The Company has deposited an additional \$5,000,000 towards the purchase of three MEVION S250 PBRT systems (“MEVION S250”) from Mevion. As of December 31, 2015, the Company recorded an impairment loss of \$2,140,000 on its common stock investment in Mevion. See Item 1A Risk Factors and Item 7 Management’s Discussion and Analysis of Financial Condition and Results of Operations for more information. The first MEVION S250, located at Barnes-Jewish Hospital in St. Louis, MO (“Barnes-Jewish Hospital”), treated its first patient on December 19, 2013. The Company’s first MEVION S250 system was delivered to UF Health Cancer Center at Orlando Health in November 2014 and anticipates patient treatment to begin in second quarter 2016.

The Company was incorporated in the State of California in 1983 and its predecessor, Ernest A. Bates, M.D., Ltd. (d/b/a American Shared Hospital Services), a California limited partnership, was formed in June 1980.

OPERATIONS

Gamma Knife Operations

Gamma Knife stereotactic radiosurgery, a non-invasive procedure, is an alternative to conventional brain surgery or can be an adjunct to conventional brain surgery, radiation therapy, or chemotherapy. Compared to conventional surgery, Gamma Knife radiosurgery usually is an out-patient procedure with lower risk of complications and can be provided at a lower cost. Typically, Gamma Knife patients resume their pre-surgical activities one or two days after treatment. The Gamma Knife treats patients with 201 single doses of gamma rays that are focused with great precision on small and medium sized, well circumscribed and critically located structures in the brain. During 2006, Elekta introduced a new Gamma Knife model, the Perfexion™ unit (“Perfexion”), which treats patients with 192 single doses of gamma rays. The Gamma Knife delivers a concentrated dose of gamma rays from Cobalt-60 sources housed in the Gamma Knife. The Cobalt-60 sources converge at the target area and deliver a dose that is high enough to destroy the diseased tissue without damaging surrounding healthy tissue.

The Gamma Knife treats selected malignant and benign brain tumors, arteriovenous malformations, and functional disorders including trigeminal neuralgia (facial pain). Research is being conducted to determine whether the Gamma Knife can be effective in the treatment of epilepsy, tremors, and other functional disorders.

As of December 31, 2015, there were approximately 130 Gamma Knife sites in the United States and more than 318 units in operation worldwide. Based on the most recent available data, an estimated percentage breakdown of Gamma Knife procedures performed in the U.S. by indications treated is as follows: malignant (49%) and benign (28%) brain tumors, vascular disorders (7%), and functional disorders (16%).

The Company, as of March 1, 2016, had seventeen (17) operating Gamma Knife units located in the United States. The Company’s first Gamma Knife commenced operation in September 1991. The Company’s Gamma Knife units performed approximately 1,947 procedures in 2015 for a cumulative total of approximately 35,000 procedures from commencement through December 31, 2015.

Revenue from Gamma Knife services for the Company during each of the last five (5) years ended December 31, and the percentage of total revenue of the Company represented by the Gamma Knife for each of the last five years, are set forth below:

Year Ended December 31,	Total Gamma Knife Revenue (in thousands)		Gamma Knife % of Total Revenue	
2015	\$ 16,077		97.2	%
2014	\$ 14,521		94.2	%
2013	\$ 16,127		91.7	%
2012	\$ 15,154		88.9	%
2011	\$	21,077 (1)	94.9	%

(1) includes \$4,984,000 of equipment sales revenue from the sale of a Gamma Knife system to an existing Gamma Knife customer at the end of the contract term.

The Company conducts its Gamma Knife business through its 81% indirect interest in GKF. The remaining 19% interest is indirectly owned by Elekta. GKF, formed in October 1995, is managed by its policy committee. The policy committee is composed of one representative from the Company, Ernest A. Bates, M.D., ASHS's Chairman and CEO, and one representative from Elekta. The policy committee sets the operating policy for GKF. The policy committee may act only with the unanimous approval of both of its members. The policy committee selects a manager to handle GKF's daily operations. Craig K. Tagawa, Chief Executive Officer of GKF and Chief Operating and Financial Officer of ASHS, serves as GKF's manager.

GKF's profits and/or losses and any cash distributions are allocated based on membership interests. GKF's operating agreement requires that it have a cash reserve of at least \$50,000 before cash distributions are made to its members. From inception to December 31, 2015, GKF has distributed \$43,659,000 to the Company and \$10,241,000 to the non-controlling member.

Image Guided Radiation Therapy Operations ("IGRT")

The Company's radiation therapy business currently consists of one IGRT system that began operation in September 2007 at an existing Gamma Knife customer site. A second IGRT system located in Turkey was sold in the second quarter of 2014. Revenue generated under IGRT services accounted for approximately 3% of the Company's total revenue in 2015.

IGRT technology integrates imaging and detection components into a state-of-the-art linear accelerator, allowing clinicians to plan treatment, verify positioning, and deliver treatment with a single device, providing faster, more effective radiation therapy with less damage to healthy tissue. IGRT captures cone beam imaging, fluoroscopic and/or x-ray images on a daily basis, creating three-dimensional images that pinpoint the exact size, location and coordinates of tumors. Once tumors are pinpointed, the system delivers ultra-precise doses of radiation which ultimately leads to improved patient outcomes.

Based on the most recently available information, there are approximately 4,000 linear accelerator based radiation therapy units installed in the United States, and it is estimated that a majority of these units provide Intensity-Modulated Radiation Therapy (“IMRT”), IGRT or a combination of this advanced radiation therapy capability. Radiation therapy services are provided through approximately 2,300 hospital based and free-standing oncology centers.

Additional information on our operations can be found in Item 6–“Selected Financial Data”, Item 7–“Management’s Discussion and Analysis of Financial Condition and Results of Operations” and Note 1 of our consolidated financial statements.

CUSTOMERS

The Company’s current business is the outsourcing of stereotactic radiosurgery services and radiation therapy services. The Company typically provides the equipment, as well as planning, installation, reimbursement and marketing support services. The majority of the Company’s customers pay the Company on a fee per use basis. The market for these services primarily consists of major urban medical centers. The business is capital intensive; the total cost of a Gamma Knife or IGRT facility usually ranges from \$3.0 million to \$5.5 million, including equipment, site construction and installation. The Company pays for the equipment and the medical center generally pays for site and installation costs. The following is a listing of the Company’s sites as of March 1, 2016:

Customers (Gamma Knife except as noted)	Original Term of Contract	Year Contract Began	Basis of Payment
Southwest Texas Methodist Hospital San Antonio, Texas	10 years	1998	Fee per use
Yale New Haven Hospital New Haven, Connecticut	10 years	1998	Fee per use
Kettering Medical Center Kettering, Ohio	10 years	1999	Revenue sharing
Tufts Medical Center	10 years	1999	Fee per use

Edgar Filing: AMERICAN SHARED HOSPITAL SERVICES - Form 10-K

Boston, Massachusetts University of Arkansas for Medical Sciences Little Rock, Arkansas	15 years	1999	Revenue sharing
JFK Medical Center Edison, New Jersey	10 years	2000	Fee per use
Sunrise Hospital and Medical Center Las Vegas, Nevada	10 years	2001	Fee per use
Central Mississippi Medical Center Jackson, Mississippi	10 years	2001	Fee per use
OSF Saint Francis Medical Center Peoria, Illinois	10 years	2001	Fee per use
Albuquerque Regional Medical Center Albuquerque, New Mexico	10 years	2003	Fee per use
Northern Westchester Hospital Mt. Kisco, New York	10 years	2005	Fee per use
Mercy Health Center Oklahoma City, Oklahoma	10 years	2005	Revenue Sharing
Tufts Medical Center (IGRT) Boston, Massachusetts	10 years	2007	Revenue Sharing
USC University Hospital Los Angeles, California	10 years	2008	Fee per use
Ft. Sanders Regional Medical Center Knoxville, Tennessee	10 years	2011	Revenue Sharing
St. Vincent's Medical Center Jacksonville, Florida	10 years	2011	Revenue Sharing
Sacred Heart Medical Center Pensacola, Florida	10 years	2013	Revenue Sharing
PeaceHealth Sacred Heart Medical Center at RiverBend Eugene, Oregon	10 years	2014	Revenue Sharing

The Company's typical fee per use agreement is for a ten year term. The fixed fee per use reimbursement amount that the Company receives from the customer is based on the Company's cost to provide the service and the anticipated volume of the customer. The Gamma Knife contracts signed by the Company typically call for a fee ranging from \$6,000 to \$9,300 per procedure. There are no minimum volume guarantees required of the customer. In most cases, GKF is responsible for providing the Gamma Knife and related ongoing Gamma Knife equipment expenses (i.e., personal property taxes, insurance, and equipment maintenance) and also helps fund the customer's Gamma Knife marketing. The customer generally is obligated to pay site and installation costs and the costs of operating the Gamma Knife. The customer can either renew the agreement or terminate the agreement at the end of the contractual term. If the customer chooses to terminate the agreement, then GKF removes the equipment from the medical center for possible placement at another site.

The Company's typical revenue sharing agreements ("retail") are for a period of ten years. Instead of receiving a fixed fee, the Company receives all or a percentage of the reimbursement (exclusive of physician fees) received by the customer. The Company is at risk for any reimbursement rate changes for radiosurgery or radiation therapy services by the government or other third party payors. There are no minimum volume guarantees required of the customer.

In 2015, one customer accounted for approximately 10% of the Company's total revenue. In 2014, no one customer accounted for more than 10% of the Company's total revenue. In 2013, two customers accounted for approximately 10%, each, of the Company's total revenue. At December 31, 2015 and 2014, three customers each accounted for more than 10% of total accounts receivable.

MARKETING

The Company markets its services through its preferred provider status with Elekta and a direct sales effort led by its Vice President of Sales and Business Development and its Chief Operating Officer. The major advantages to a health care provider in contracting with the Company for Gamma Knife services include:

The medical center avoids the high cost of owning the equipment. By not acquiring the Gamma Knife unit or other § medical equipment, the medical center is able to allocate the funds otherwise required to purchase and/or finance the Gamma Knife to other projects.

§ The Company does not have minimum volume requirements, so the medical center avoids the risk of equipment under-utilization. The medical center pays the Company only for each procedure performed on a patient.

For contracts under revenue sharing arrangements, the Company assumes all or a portion of the risk of § reimbursement rate changes. The medical center pays the Company only the contracted portion of revenue received from each procedure.

§ The medical center transfers the risk of technological obsolescence to the Company. The medical center and its physicians are not under any obligation to utilize technologically obsolete equipment.

§ The Company provides planning, installation, operating and marketing assistance and support to its customers.

FINANCING

The Company's Gamma Knife business is operated through GKF. GKF generally finances its U.S. Gamma Knife units, upgrades and additions with loans or capital leases from various finance companies for typically 100% of the cost of each Gamma Knife, plus any sales tax, customs and duties. The financing is predominantly fully amortized over an 84 month period and is collateralized by the equipment, customer contracts and accounts receivable, and is generally without recourse to the Company and Elekta. In addition, the loan to finance the Company's unit in Peru is guaranteed by GKF and collateralized by the Company's stock in the subsidiary, IGKP.

COMPETITION

Conventional neurosurgery, radiation therapy and other radiosurgery devices are the primary competitors of Gamma Knife radiosurgery. Gamma Knife radiosurgery has gained acceptance as an alternative and/or adjunct to conventional surgery due to its more favorable morbidity outcomes for certain procedures as well as its non-invasiveness. Utilization of the Company's Gamma Knife units is contingent on the acceptance of Gamma Knife radiosurgery by the customer's neurosurgeons, radiation oncologists and referring physicians. In addition, the utilization of the Company's Gamma Knife units is impacted by the proximity of competing Gamma Knife centers and providers using other radiosurgery devices.

The Company's ability to secure additional customers for Gamma Knife services and other radiosurgery and radiation therapy services is dependent on its ability to effectively compete against (i) Elekta, the manufacturer of the Gamma Knife, (ii) manufacturers of other radiosurgery and radiation therapy devices, and (iii) other companies that outsource these services. The Company does not have an exclusive relationship with Elekta or other manufacturers and has previously lost sales to customers that chose to purchase equipment directly from manufacturers. The Company may continue to lose future sales to such customers and may also lose sales to the Company's competitors.

GOVERNMENT PROGRAMS

The Medicare program is administered by the Centers for Medicare and Medicaid Services (“CMS”) of the U.S. Department of Health and Human Services (“DHHS”). Medicare is a health insurance program primarily for individuals 65 years of age and older, certain younger people with disabilities, and people with end-stage renal disease, and is provided without regard to income or assets.

The Medicare program is subject to statutory and regulatory changes, administrative rulings, interpretations and determinations, requirements for utilization review, and federal and state funding restrictions, all of which could materially increase or decrease payments from these government programs in the future, as well as affect the cost of providing services to patients and the timing of payments to our client hospitals.

The Company’s Gamma Knife and radiation therapy customers receive payments for patient care from federal government and private insurer reimbursement programs. Currently in the United States, Gamma Knife services are performed primarily on an out-patient basis. Gamma Knife patients with Medicare as their primary insurer, treated on either an in-patient or out-patient basis, comprise an estimated 35-45% of the total Gamma Knife patients treated nationwide. Radiation therapy patients with Medicare as their primary insurer are treated primarily on an out-patient basis, and comprise an estimated 45% to 50% of the total radiation therapy patients treated. The Company estimates that its percentage of patients with Medicare as their primary insurer approximates these national averages.

Congress enacted legislation in 2013 that significantly reduced the Medicare reimbursement rate for outpatient Gamma Knife treatment by setting it at the same amount paid for linear accelerator-based radio surgery treatment. Prior to April 1, 2013, Medicare's reimbursement rate for Gamma Knife treatment had been relatively stable. Congress's enactment of the American Taxpayer Relief Act of 2012, however, reduced Medicare's Gamma Knife reimbursement rate from approximately \$9,900 to \$5,300, effective April 1, 2013. This change caused a substantial reduction in the Company's revenues during 2013 and 2014. Effective January 1, 2015, the Centers for Medicare and Medicaid (CMS) established a Comprehensive Ambulatory Payment Classification for single session radiosurgery treatments, which increased the reimbursement rate by approximately \$4,100 to \$9,700. CMS has established a 2016 total reimbursement rate of approximately \$8,800 for a Medicare Gamma Knife treatment. The Company's IGRT services are reimbursed by CMS and other insurers. Reimbursement for these services has remained fairly stable. See additional discussion under Item 1A Risk Factors.

The hospital based Medicare delivery code reimbursement rate for PBRT established by CMS is \$506 for simple without compensation and \$1,051 for either simple with compensation, intermediate or complex treatments. Patients typically undergo 25-30 delivery sessions.

We are unable to predict the effect of future government health care funding policy changes on operations. If the rates paid by governmental payers are reduced, if the scope of services covered by governmental payers is limited, or if one or more of our hospital clients are excluded from participation in the Medicare program or any other government health care program, there could be a material adverse effect on our business.

Affordable Care Act

In March 2010, President Obama signed into law the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010, ("Affordable Care Act"), which has resulted in significant changes to the health care industry. The primary goal of the legislation was to extend health care coverage to approximately 32 million uninsured legal U.S. residents through both an expansion of public programs and reforms to private sector health insurance. The expansion of insurance coverage is expected to be funded in part by measures designed to promote quality and cost efficiency in health care delivery and by budgetary savings in the Medicare and Medicaid programs. Because the Company is not a health care provider, we are not directly affected by the law, but we could be indirectly affected principally as follows:

An increase in the number of insured residents could potentially increase the number of patients seeking Gamma Knife or radiation therapy treatment.

The Company's retail contracts are subject to reimbursement rate changes for radiosurgery or radiation therapy services by the government or other third party payors. Any changes to Medicare or Medicaid reimbursement through the implementation of the Affordable Care Act could affect revenue generated from these sites.

GOVERNMENT REGULATION

The payment of remuneration to induce the referral of health care business has been a subject of increasing governmental and regulatory focus in recent years. Section 1128B(b) of the Social Security Act (sometimes referred to as the "federal anti-kickback statute") provides criminal penalties for individuals or entities that offer, pay, solicit or receive remuneration in order to induce referrals for items or services for which payment may be made under the Medicare and Medicaid programs and certain other government funded programs. The Affordable Care Act amended the anti-kickback statute to eliminate the requirement of actual knowledge, or specific intent to commit a violation, of the anti-kickback statute. The Social Security Act provides authorizes the Office of Inspector General through civil proceedings to exclude an individual or entity from participation in the Medicare and state health programs if it is determined any such party has violated Section 1128B(b) of the Social Security Act. The Company believes that it is in compliance with the federal anti-kickback statute. Additionally, the Omnibus Budget Reconciliation Act of 1993, often referred to as "Stark II", bans physician self-referrals to providers of designated health services with which the physician has a financial relationship. On September 5, 2007, the third and final phase of the Stark regulations (Phase III) was published. The term "designated health services" includes, among others, radiation therapy services and in-patient and out-patient hospital services. On January 1, 1995, the Physician Ownership and Referral Act of 1993 became effective in California. This legislation prohibits physician self-referrals for covered goods and services, including radiation oncology, if the physician (or the physician's immediate family) concurrently has a financial interest in the entity receiving the referral. The Company believes that it is in compliance with these rules and regulations.

On August 19, 2008, the CMS published a final rule relating to inpatient hospital services paid under the Inpatient Prospective Payment System for discharges in the Fiscal Year 2009 (the "Final Rule"). Among other things, the Final Rule prohibits "per-click payments" to certain physician lessors for services rendered to patients who were referred by the physician lessor. This prohibition on per-click payments for leased equipment used in the treatment of a patient referred to a hospital lessee by a physician lessor applies regardless of whether the physician himself or herself is the lessor or whether the lessor is an entity in which the referring physician has an ownership or investment interest. The effective date of this prohibition was October 1, 2009. However, referrals made by a radiation oncologist for radiation therapy or ancillary services necessary for, and integral to, the provision of radiation therapy (such as Gamma Knife services) are not subject to this prohibition so long as certain conditions are met. GK Financing's majority owned subsidiaries, Albuquerque GK Equipment, LLC ("AGKE") and Jacksonville GK Equipment, LLC ("JGKE") have minority ownership interests that are held solely by radiation oncologists, who are otherwise exempt from the referral prohibition under the Final Rule. The Company believes it is in compliance with the Final Rule.

A range of federal civil and criminal laws target false claims and fraudulent billing activities. One of the most significant is the Federal False Claims Act, which prohibits the submission of a false claim or the making of a false record or statement in order to secure a reimbursement from a government-sponsored program. In recent years, the federal government has launched several initiatives aimed at uncovering practices which violate false claims or fraudulent billing laws. Claims under these laws may be brought either by the government or by private individuals on behalf of the government, through a "whistleblower" or "qui tam" action. The Company believes that it is in compliance with the Federal False Claims Act; however, because such actions are filed under seal and may remain

secret for years, there can be no assurance that the Company or one of its affiliates is not named in a material qui tam action.

Legislation in various jurisdictions requires that health facilities obtain a Certificate of Need ("CON") prior to making expenditures for medical technology in excess of specified amounts. Four of the Company's existing customers were required to obtain a CON or its equivalent. The CON procedure can be expensive and time consuming and may impact the length of time before Gamma Knife services commence. CON requirements vary from state to state in their application to the operations of both the Company and its customers. In some jurisdictions the Company is required to comply with CON procedures to provide its services and in other jurisdictions customers must comply with CON procedures before using the Company's services. The Company is unable to predict if any jurisdiction will eliminate or alter its CON requirements in a manner that will increase competition and, thereby, affect the Company's competitive position.

The Company's Gamma Knife units contain Cobalt 60 radioactive sources. The medical centers that house the Company's Gamma Knife units are responsible for obtaining possession and user's licenses for the Cobalt 60 source from the Nuclear Regulatory Commission.

Standard linear accelerator equipment utilized to treat patients is regulated by the FDA. The licensing is obtained by the individual medical center operating the equipment.

The Company believes it is in substantial compliance with the various rules and regulations that affect its businesses.

INSURANCE AND INDEMNIFICATION

The Company's contracts with equipment vendors generally do not contain indemnification provisions. The Company maintains a comprehensive insurance program covering the value of its property and equipment, subject to deductibles, which the Company believes are reasonable.

The Company's customer contracts generally contain mutual indemnification provisions. The Company maintains general and professional liability insurance. The Company is not involved in the practice of medicine and therefore believes its present insurance coverage and indemnification agreements are adequate for its business.

PROTON BEAM RADIATION THERAPY BUSINESS

PBRT is an alternative to traditional external beam, photon based radiation delivered by linear accelerators. PBRT, first clinically introduced in the 1950s, has physics advantages compared to photon based systems which allow PBRT to deliver higher radiation doses to the tumor with less radiation to healthy tissue. PBRT currently treats prostate, eye, cranial-spinal, head and neck, lung, liver and breast tumors. In excess of 130,000 patients have been treated with protons worldwide.

Introduction of PBRT in the United States, until recently, has been limited due to the high capital costs of these projects. The Company believes that the current development of one and two treatment room PBRT systems at lower capital costs and the level of reimbursement for PBRT from the CMS will help make this technology available to a larger segment of the market.

There are several competing manufacturers of proton beam systems, including Mevion, IBA Particle Therapy Inc., Hitachi Ltd., Varian Medical Systems, Inc. (Accel), Optivus Proton Therapy Inc., Sumitomo Heavy Industries, ProTom International, Inc. and Mitsubishi Electric. The Company has invested in Mevion and has made deposits towards the purchase of three MEVION S250 systems. The Mevion system potentially provides cancer centers the opportunity to introduce single treatment room PBRT services with cost in the range of approximately \$25 to \$35 million rather than four and five PBRT treatment room programs costing in excess of \$120 million. The MEVION S250 system received FDA approval in the second quarter of 2012 and the first clinical treatment occurred in December 2013 at Barnes-Jewish Hospital. The Company's first MEVION S250 synchrocyclotron (a major component of the MEVION S250 system) was delivered to UF Health Cancer Center at Orlando Health in late 2014. During 2015, the synchrocyclotron was installed and tested and is expected to treat its first patient in second quarter 2016. In January 2016, the Company received financing for its remaining commitment related to the first Mevion S250 system. The Company's second and third PBRT units will not begin construction until the Company identifies satisfactory placement sites.

The Company believes the business model it has developed for use in its Gamma Knife and radiation therapy businesses can be tailored for the PBRT market segment. The Company is targeting large, hospital based cancer programs. The Company's ability to develop a successful PBRT financing entity depends on the decision of cancer centers to self-fund or to fund the PBRT through conventional financing vehicles, the Company's ability to capture market share from competing alternative PBRT financing entities, and the Company's ability to raise capital to fund PBRT projects.

EMPLOYEES

At December 31, 2015, the Company employed eight (8) people on a full-time basis and one (1) on a part-time basis. None of these employees is subject to a collective bargaining agreement and there is no union representation within the Company. The Company maintains various employee benefit plans and believes that its employee relations are good.

EXECUTIVE OFFICERS OF THE COMPANY

The following table provides current information concerning those persons who serve as executive officers of the Company. The executive officers were appointed by the Board of Directors and serve at the discretion of the Board of Directors.

Name:	Age:	Position:
Ernest A. Bates, M.D.	79	Chairman of the Board of Directors and Chief Executive Officer
Craig K. Tagawa	62	Senior Vice President - Chief Operating and Financial Officer
Ernest R. Bates	49	Vice President of Sales and Business Development

Ernest A. Bates, M.D., founder of the Company, has served in the positions listed above since the incorporation of the Company. A board-certified neurosurgeon, Dr. Bates is Emeritus Vice Chairman of the Board of Trustees at Johns Hopkins University and serves on the Johns Hopkins Neurosurgery Advisory Board. He also serves on the boards of Shared Imaging and FasterCures. Dr. Bates previously served on the California Commission for Jobs and Economic Growth and the Magistrate Judge Merit Selection Panel. From 1981-1987 he was a member of the Board of Governors of the California Community Colleges, and he served on the California High Speed Rail Authority from 1997 to 2003. Dr. Bates is a member of the Board of Overseers at the University of California, San Francisco, School of Nursing. He is a graduate of the School of Arts and Sciences of the Johns Hopkins University, and he earned his medical degree at the University of Rochester School of Medicine and Dentistry.

Craig K. Tagawa has served as Chief Operating Officer since February 1999 in addition to serving as Chief Financial Officer since May 1996. Mr. Tagawa also served as Chief Financial Officer from January 1992 through October 1995. Previously a Vice President in such capacity, Mr. Tagawa became a Senior Vice President on February 28, 1993. He is also the Chief Executive Officer of GKF. From September 1988 through January 1992, Mr. Tagawa served in various positions with the Company. He is a former Chair of the Industrial Policy Advisory Committee of the Engineering Research Center for Computer-Integrated Surgical Systems and Technology at The Johns Hopkins University. He received his undergraduate degree from the University of California at Berkeley and his M.B.A. from Cornell University.

Ernest R. Bates joined the Company in January 2007 as Vice President of Sales and Business Development. He was on the Board of Directors of the Company from 2004 through February 2007. Prior to joining the Company, he had been Managing Director, Institutional Fixed Income Sales of HSBC Securities (USA), Inc. since 2003. Mr. Bates has also served as Managing Director, Head of Asian Product for HSBC Securities (USA) Inc. from 1999 to 2003. From 1993 through 1999, Mr. Bates held various positions with Merrill Lynch, last serving as Vice President, European Syndicate for Merrill Lynch International. He received his undergraduate degree from Brown University and a M.B.A. degree from The Wharton Business School. Ernest R. Bates is the son of Chairman of the Board and Chief Executive Officer Dr. Ernest A. Bates.

AVAILABLE INFORMATION

Our Internet address is www.ashs.com. We make available free of charge, through our Internet website under the “Investor Center” tab in the “Corporate” section, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (“Exchange Act”) as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The information contained on our Internet website is not part of this document.

ITEM 1A. RISK FACTORS

In addition to the other information in this report, the following factors could affect our future business, results of operations, cash flows or financial position, and could cause future results to differ materially from those expressed in any of the forward-looking statements contained in this report.

The Federal Reimbursement Rate for Gamma Knife Treatments Has Fluctuated

Congress enacted legislation in 2013 that significantly reduced the Medicare reimbursement rate for outpatient Gamma Knife treatment by setting it at the same amount paid for linear accelerator-based radiosurgery treatment. Prior to April 1, 2013, Medicare’s reimbursement rate for Gamma Knife treatment had been relatively stable. In April 2013, the Medicare reimbursement rate for Gamma Knife treatment was lowered from approximately \$9,900 to \$5,300 per treatment session. This sudden reduction in a rate that had historically been stable resulted in a significant decrease in the Company’s revenues from all of our revenue sharing and some of our fixed fee medical centers. The reimbursement rate was subsequently increased to approximately \$5,600 in 2014. Effective January 1, 2015, CMS established a comprehensive Ambulatory Payment Classification (APC) for both Gamma Knife and LINAC one session cranial radiosurgery at a reimbursement rate of approximately \$9,700. This represents an estimated increase of \$4,100 per Medicare Gamma Knife treatment (exclusive of co-insurance and other adjustments) effective January 1, 2015 compared to the 2014 Medicare reimbursement rate. The 2016 reimbursement level was reduced by CMS to approximately \$8,800. There can be no assurance that CMS reimbursement levels will be maintained at levels providing the Company an adequate return on its investment. Any future reductions in the reimbursement rate would adversely affect the Company’s revenues and financial results.

The average Medicare reimbursement rate trends from 2012 to 2016 are outlined below:

Average Medicare Reimbursement Rate Trends

2012	2013	2014	2015	2016
\$9,900	\$5,300	\$5,600	\$9,700	\$8,800

The Company’s Capital Investment at Each Site is Substantial

Each radiosurgical or radiation therapy device requires a substantial capital investment. In some cases, we contribute additional funds for capital costs and/or annual operating and equipment related costs such as marketing, maintenance, insurance and property taxes. Due to the structure of our contracts with medical centers, there can be no assurance that these costs will be fully recovered or that we will earn a satisfactory return on our investment.

The Market for the Gamma Knife is Limited

There is a limited market for the Gamma Knife, and the market in the United States may be mature. The Company has begun operation at only four (4) new Gamma Knife sites in the United States since 2011. Due to the substantial costs of acquiring a Gamma Knife unit, we must identify medical centers that possess neurosurgery and radiation oncology departments capable of performing a large number of Gamma Knife procedures. As of December 31, 2015, there were approximately 130 operating Gamma Knife units in the United States, of which 17 units were owned by the Company. The Company has two idle Gamma Knife units with a cumulative net book value of \$1,500,000. The Company plans to trade these units in for new units or place these units at new sites. There can be no assurance that we will be successful in placing these idle units or additional units at any sites in the future. The Company's existing contracts with its customers are fixed in length and there can be no assurance that the customers will wish to extend the contract beyond the end of the term.

The Company Has a High Level of Debt

The Company's business is capital intensive. The Company finances its Gamma Knife units through its GKF subsidiary. The amounts financed through GKF have been generally non-recourse to ASHS. The Company's combined long term debt and capital leases totaled \$23,118,000 as of December 31, 2015 and is collateralized by the Gamma Knife and other assets, including accounts receivable and future proceeds from any contract between the Company and any end user of the financed equipment. This high level of debt may adversely affect the Company's ability to secure additional credit in the future, and as a result may affect operations and profitability. If default on debt occurs in the future, the Company's creditors would have the ability to accelerate the defaulted loan, to seize the Gamma Knife unit or other equipment with respect to which default has occurred, and to apply any collateral they may have at the time to cure the default.

A Small Number of Customers Account for a Major Portion of our Revenues

A limited number of customers have historically accounted for a substantial portion of the Company's total revenue, and the Company expects such customer concentration to continue for the foreseeable future. For example, in 2015, six (6) customers in total accounted for more than 50% of the Company's revenue. The loss of a significant customer or a significant decline in the business from the Company's largest customers could have a material adverse effect on the Company's business and results of operations.

The Market for the Company's Services is Competitive

The Company estimates that there are two other companies that actively provide alternative, non-conventional Gamma Knife financing to potential customers. We believe there are no competitor companies that currently have more than three (3) Gamma Knife units in operation. The Company's relationship with Elekta, the manufacturer of the Leksell Gamma Knife unit, is non-exclusive, and in the past the Company has lost sales to customers that chose to purchase a Gamma Knife unit directly from Elekta. In addition, the Company may continue to lose future sales to such customers and may also lose future sales to its competitors. There can be no assurance that the Company will be able to successfully compete against others in placing future units.

There are Alternatives to the Gamma Knife

Other radiosurgery devices and conventional neurosurgery compete against the Gamma Knife. Each of the medical centers targeted by the Company could decide to acquire another radiosurgery device instead of a Gamma Knife. In addition, neurosurgeons who are primarily responsible for referring patients for Gamma Knife surgery may not be willing to make such referrals for various reasons, instead opting for invasive surgery. There can be no assurance that the Company will be able to secure a sufficient number of future sites or Gamma Knife procedures to sustain its profitability and growth.

International Operations

The Company has plans to install, in 2016, a Gamma Knife in Peru. The Company sold its operations in Turkey on June 10, 2014. International operations can be subject to exchange rate volatility which could have an adverse effect on our financial results and cash flows. In addition, international operations can be subject to legal and regulatory uncertainty and political and economic instability, which could result in problems asserting property or contractual rights, potential tariffs, increased compliance costs, increased regulatory scrutiny, potential adverse tax consequences, the inability to repatriate funds to the United States, and the Company's inability to operate in those locations.

New Technology and Products Could Result in Equipment Obsolescence

There is constant change and innovation in the market for highly sophisticated medical equipment. New and improved medical equipment can be introduced that could make the Gamma Knife technology obsolete and that would make it uneconomical to operate. During 2000, Elekta introduced an upgraded Gamma Knife which cost approximately \$3.6 million plus applicable tax and duties. This upgrade includes an Automatic Positioning System™ ("APS"), and therefore involved less health care provider intervention. In early 2005, Elekta introduced a new upgrade, the Gamma Knife Model 4C ("Model 4C"). The cost to upgrade existing units to the Model 4C with APS was approximately \$200,000 to \$1,000,000, depending on the current Gamma Knife configuration. In 2006 Elekta introduced a new model of the Gamma Knife, the Perfexion, which costs approximately \$4.5 million plus applicable taxes and duties. The Perfexion can perform procedures faster than previous Gamma Knife models and it involves less health care personnel intervention. In 2015, Elekta introduced the Leksell Gamma Knife Icon™. The Perfexion is upgradeable to the Icon platforms which has enhanced imaging capabilities allowing for treatment of larger tumors. Existing models of the

Gamma Knife are not upgradeable to the Perfexion model. As of March 1, 2016, 14 of the Company's Gamma Knife units are Perfexion models; of the Company's remaining Gamma Knife units, five (5) are Model 4C with APS and one is upgradeable to a more advanced Model 4C unit. The failure to acquire or use new technology and products could have a material adverse effect on our business and results of operations.

In addition, there are constant advances made in radiation therapy equipment. The Company purchased IGRT and CT Simulator systems in 2006 with a list price of approximately \$8,300,000. As in the Gamma Knife business, new and improved IGRT equipment can be introduced that could make the existing technology obsolete and that would make it uneconomical to operate.

The Company Has Invested in a Proton Beam Business that is Developmental

We have committed a substantial amount of our financial resources to next-generation proton beam technology. The first MEVION S250 system began treating patients in December 2013. We have committed to purchase three (3) MEVION S250 systems, and have already made deposits of \$5,000,000 towards this commitment. There can be no assurance that we will be able to finance these machines and if we do, that we will recover this investment or future investments, or our \$2,709,000 common stock investment in Mevion, which was written down to approximately \$579,000 as of December 31, 2015. As of January 2016, we have finalized financing for the Company's first MEVION S250 that is starting at UF Health Cancer Center at Orlando Health in the second quarter 2016.

The Trading Volume of Our Common Stock is Low

Although our common stock is listed on the NYSE MKT, our common stock has experienced low trading volume, both historically and recently. Reported average daily trading volume in our common stock for the three-month period ended December 31, 2015 was approximately 3,200 shares. There is no reason to think that a more active trading market in our common stock will develop in the future. Limited trading volume subjects our common stock to greater price volatility and may make it difficult for you to sell your shares in a quantity or at a price that is attractive to you.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company's corporate offices are located at Four Embarcadero Center, Suite 3700, San Francisco, California, where it leases approximately 4,640 square feet for \$25,128 per month with a lease expiration date in May 2016. The Company has subleased approximately 3,500 rentable square feet of the office space for \$16,042 per month. The sublease expires in May 2016. The Company is in the process of procuring new corporate office space and there will be future rent expense associated with this space. The Company also has a satellite office in Fairfield, California, where it leases 895 square feet for \$2,505 per month with a lease expiration date in April 2018.

For the year ended December 31, 2015 the Company's aggregate net rental expenses for all properties were approximately \$295,000, net of sublease income of \$191,000.

ITEM 3. LEGAL PROCEEDINGS

There are no material pending legal proceedings involving the Company or any of its property. The Company knows of no legal or administrative proceedings against the Company contemplated by governmental authorities.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information and Dividend Policy

The Company's common shares, no par value (the "Common Shares"), are currently traded on the New York Stock Exchange. At December 31, 2015, the Company had 5,364,000 issued and outstanding common shares, 614,000 common shares reserved for options, 3,000 unvested restricted stock units issued, 176,000 vested restricted stock units reserved for issuance and warrants to issue 200,000 shares of common stock.

The following table sets forth the high and low closing sale prices of the Common Shares of the Company on the New York Stock Exchange for each full quarter for the last two fiscal years.

Quarter Ending	Prices for Common Shares	
	High	Low
March 31, 2014	\$ 3.35	\$ 2.64
June 30, 2014	\$ 3.15	\$ 2.40
September 30, 2014	\$ 3.00	\$ 2.09
December 31, 2014	\$ 2.82	\$ 2.01
March 31, 2015	\$ 2.98	\$ 2.26
June 30, 2015	\$ 2.83	\$ 2.36
September 30, 2015	\$ 2.72	\$ 1.86
December 31, 2015	\$ 2.05	\$ 1.51

The Company estimates that there were approximately 1,400 beneficial holders of its Common Shares at December 31, 2015.

There were no dividends declared or paid during 2015, 2014, or 2013. Dividends had been paid by the Company from 2001 to 2007, but during 2007 the Board of Directors suspended dividends for the purpose of preserving cash for the development of its PBRT business. The Company did not pay cash dividends prior to 2001.

Stock Repurchase Program

In 1999 and 2001, the Board of Directors approved resolutions authorized the Company to repurchase up to a total of 1,000,000 shares of its common stock on the open market from time to time at prevailing prices, and in 2008 the Board of Directors reaffirmed these authorizations. In 2015, there were no shares repurchased by the Company. In 2014, there were approximately 1,000 shares repurchased at a cost of approximately \$2,000. There were no shares repurchased in 2013. A total of approximately 928,000 shares have been repurchased in the open market pursuant to these authorizations at a cost of approximately \$1,957,000. As of December 31, 2015, there were approximately 72,000 shares remaining under the repurchase authorizations.

Shareholder Rights Plan

On March 22, 1999, the Company adopted a Shareholder Rights Plan (“Plan”). Under the Plan, the Company made a dividend distribution of one Right for each outstanding share of the Company’s common stock as of the close of business on April 1, 1999. The Rights become exercisable only if any person or group, with certain exceptions, becomes an “acquiring person” (acquires 15% or more of the Company’s outstanding common stock) or announces a tender or exchange offer to acquire 15% or more of the Company’s outstanding common stock. The Company’s Board of Directors adopted the Plan to protect shareholders against a coercive or inadequate takeover offer. On March 12, 2009, the Board of Directors approved the First Amendment to the Plan which, among other things, extended the final date on which the Rights are exercisable until the close of business on April 1, 2019.

Equity Compensation Plans

During 2015, one holder of options to acquire 2,000 shares of the Company's common stock exercised his respective rights pursuant to such securities; additionally, 3,000 restricted stock units, 28,000 restricted stock units for deferred compensation and 20,000 options were issued during 2015. Additional information regarding our equity compensation plans is incorporated herein by reference from the 2016 Proxy Statement. Also, see Note 9-"Shareholders' Equity to the Consolidated Financial Statements".

Recent Sales of Unregistered Securities

The Company sold 750,000 shares of common stock to members of the Board of Directors in two private placement transactions in 2014 that were exempt under Section 4(a)(2) of the Securities Act.

ITEM 6. SELECTED FINANCIAL DATA

Summary of Operations	Year Ended December 31,				
	(Amounts in thousands except per share data)				
	2015	2014	2013	2012	2011
Revenue	\$16,548	\$15,417	\$17,584	\$17,048	\$22,221
Costs of revenue	9,833	10,138	10,640	10,118	14,224

Shareholders' equity	\$25,180	\$26,154	\$24,055	\$24,830	\$25,171

See accompanying note (1)

(1) In 1995, the Company entered into an operating agreement granting to American Shared Radiosurgery Services (a California corporation and a wholly-owned subsidiary of the Company) an 81% ownership interest in GKF. During 2010 and 2011, GKF established new operating subsidiaries, EWRS, EWRS Turkey, AGKE, and JGKE, and other subsidiaries that are not yet operational. On June 10, 2014, the Company sold EWRS Turkey. Accordingly, the financial data for the Company presented above include the results of GKF and its subsidiaries for the periods 2011 through 2015.

This financial data as of December 31, 2015, 2014 and 2013 and for the years ended December 31, 2015, 2014 and 2013 should be read in conjunction with our consolidated financial statements and the notes thereto beginning on page A-1 of this report and with Item 7—"Management's Discussion and Analysis of Financial Condition and Results of Operations."

17

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

APPLICATION OF CRITICAL ACCOUNTING POLICIES

The Company's consolidated financial statements are prepared in accordance with generally accepted accounting principles and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates, assumptions and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions and judgments and as such have a greater possibility of producing results that could be materially different than originally reported.

The most significant accounting policies followed by the Company are presented in Note 2 to the consolidated financial statements. These policies along with the disclosures presented in the other financial statement notes and in this discussion and analysis, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts, and the methods, assumptions and estimates underlying those amounts, management has identified revenue recognition and costs of sales for turn-key and revenue sharing arrangements, the determination of the allowance for doubtful accounts, and the carrying value of its Mevion investment to be the areas that required the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available. The following are our critical accounting policies in which management's estimates, assumptions and judgments most directly and materially affect the financial statements:

Revenue Recognition

The Company has one revenue-generating activity, which consists of equipment leasing to hospitals, and includes the operation of Gamma Knife units by GKF and the operation of one IGRT site by ASHS. During 2014, the Company entered into a lease agreement where the lessee gave the Company a piece of equipment for \$1. The Company estimated and recorded the fair market value of the equipment received and recognized deferred revenue. As of December 31, 2014, the fair market value of the equipment received during the year was \$700,000.

Revenue is recognized when services have been rendered and collectability is reasonably assured, on either a fee per use or revenue sharing basis. During 2015, the Company had eleven (11) fee per use arrangements and eight (8) retail service arrangements. Under both of these types of agreements, the hospital is responsible for billing patients and collecting technical component fees for services performed. Revenue associated with installation of the Gamma Knife

and IGRT units, if any, is a part of the negotiated lease amount and not a distinctly identifiable amount. The costs, if any, associated with installation of the units are amortized over the period of the related lease to match revenue recognition of these costs.

For fee per use agreements, revenue is not estimated because these contracts provide for a fixed fee per procedure, and are typically for a ten year term. Revenue is recognized at the time the procedures are performed, based on each hospital's contracted rate. There is no guaranteed minimum payment. Costs related to operating the units are charged to costs of operations as incurred, which approximates the recognition of the related revenue. Revenue under fee per use agreements is recorded in accordance with the contract terms.

During 2015, ASHS had one (1) agreement and GKF had seven (7) agreements that are based on revenue sharing. These can be further classified as either "turn-key" arrangements or "revenue sharing" arrangements. For GKF's four (4) turn-key sites, GKF is solely responsible for the costs to acquire and install the Gamma Knife. In return, GKF receives payment from the hospital in the amount of its reimbursement from third party payors. Revenue is recognized by the Company during the period in which the procedure is performed, and is estimated based on what can be reasonably expected to be paid by the third party payor to the hospital. The estimate is primarily determined from historical experience and hospital contracts with third party payors. These estimates are reviewed on a regular basis and adjusted as necessary to more accurately reflect the expected payment amount. The Company also records an estimate of operating costs associated with each procedure during the period in which the procedure is performed. For two of the turn-key sites, the Company also shares a percentage of net operating profit. The Company records an estimate of net operating profit based on estimated revenues, less estimated operating costs. Costs are determined primarily based on historical treatment protocols and cost schedules with the hospital. The Company's estimated operating costs are reviewed on a regular basis and adjusted as necessary to more accurately reflect the actual operating costs. Revenue for turn-key sites is recorded on a gross basis, and the operating expenses the Company reimburses to the hospital are recorded in other operating costs.

Under revenue sharing arrangements the hospital shares in the responsibility and risk with the Company for the capital investment to acquire and install the equipment. Unlike our turn-key arrangement, the lease payment under a revenue sharing arrangement is a percentage of reimbursed revenue. Payments are made by the hospital, generally on a monthly basis, to the Company based on an agreed upon percentage allocation of cash collected. Revenue is recognized during the period in which procedures are performed, and is estimated based on the reimbursement amount that the Company expects to receive from the hospital for those procedures. This estimate is reviewed on a regular basis and adjusted as necessary to more accurately reflect the expected payment amount.

Revenue from retail arrangements amounted to approximately 47%, 42% and 44% of total revenue for the years ended December 31, 2015, 2014 and 2013, respectively. Because the revenue estimates are reviewed on a quarterly basis, any adjustments required for past revenue estimates would result in an increase or reduction in revenue during the current quarterly period.

Allowance for Doubtful Accounts

The allowance for doubtful accounts is estimated based on possible losses relating to the Company's customers. The Company receives reimbursement from the customer based on the customer's collections from individuals and third-party payors such as insurance companies and Medicare. Receivables are charged against the allowance in the period that they are deemed uncollectible.

Carrying Value of Mevion Investment

The Company has carried its investment in Mevion at cost and reviews it for impairment on a quarterly basis, or as events or circumstances might indicate that the carrying value of the investment may be below its cost basis on an, other-than-temporary impairment basis. The Company evaluated this investment for impairment at December 31, 2014. In light of available information, the Company determined impairment was not other-than temporary. The Company estimates that there was an unrealized loss (impairment) of approximately \$2.4M, as of December 31, 2014.

Due to Mevion's cancellation of its planned IPO on July 27, 2015 and its announcement on August 4, 2015 of an investment of up to \$200M by new investors, the Company determined that its Mevion common stock investment was impaired on an other-than-temporary basis. The fair value of the Company's investment in Mevion, as of December 31, 2015, is approximately \$579,000 with an impairment loss for the year of \$2,140,000. For additional information, see "Impairment Analysis of Investment in Equity Securities."

2015 Results

For the year ended December 31, 2015, 97% of the Company's revenue was derived from its Gamma Knife business, and the remaining 3% from its IGRT business. For the year ended December 31, 2014, 94% of the Company's revenue was derived from its Gamma Knife business, and the remaining 6% from its IGRT business. For the year ended December 31, 2013, 92% of the Company's revenue was derived from its Gamma Knife business, and the remaining 8% from its IGRT business.

TOTAL REVENUE

(in thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Total revenue	\$ 16,548	7.3	% \$ 15,417	(12.3)% \$ 17,584

Total revenue in 2015 increased 7.3% compared to 2014, due to an increase in Gamma Knife revenue, offset by a decrease in IGRT revenue. Total revenue decreased 12.3% in 2014 compared to 2013 primarily due to the sale of EWRS Turkey which contributed \$999,000 to the decline for 2014.

Gamma Knife Revenue

	2015	Increase (Decrease)	2014	Increase (Decrease)	2013		
Medical services revenue from Gamma Knife (in thousands)	\$ 16,077	10.7	% \$ 14,521	(10.0)% \$ 16,127		
Number of Gamma Knife procedures	1,947	(4.8)%	2,046	(17.6)%	2,482
Average revenue per procedure	\$ 8,257	16.3	% \$ 7,097	9.2	% \$ 6,498		

Total Gamma Knife revenue for 2015 increased 10.7% to \$16,077,000 compared to \$14,521,000 in 2014. Total Gamma Knife revenue for 2014 decreased 10.0% to \$14,521,000 compared to \$16,127,000 in 2013. The increase in revenue in 2015 compared to 2014 was due to an increase in volume and a favorable payor mix at the Company's retail sites. Excluding procedures performed in Turkey in 2014, procedures increased 7% in 2015, compared to prior year. The decrease in revenue in 2014 compared to 2013 was due to the sale of EWRS Turkey which contributed \$642,000 to the decline, and the decrease in number of Gamma Knife procedures at certain of its U.S. sites. The Company had

seventeen, twenty, and nineteen Gamma Knife units in operation at December 31, 2015, 2014 and 2013.

The number of Gamma Knife procedures performed in 2015 increased 125, excluding procedures performed in Turkey in 2014. This increase was due to a new site which treated its first patient in December 2014, and increased volume at existing sites, offset by one contract which ended March 31, 2015. The number of Gamma Knife procedures performed in 2014 decreased by 436 compared to 2013, primarily due to the sale of EWRS Turkey which reported 343 more procedures in 2013. The remaining decline in procedures was due to personnel issues at existing Gamma Knife sites.

Revenue per procedure increased by \$1,160 in 2015 and \$599 in 2014 compared to 2014 and 2013, respectively. For 2015, the increase was due to a favorable payor mix, increased reimbursement for Medicare procedures, effective January 1, 2015, and the sale of EWRS Turkey units which were reimbursed at lower rates compared to the Company's other units. For 2014, this increase was due to a favorable change in payor mix and the sale of the EWRS Turkey units which were reimbursed at lower rates compared to the Company's other units.

IGRT Revenue

(in thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Medical services revenue from IGRT	\$471	(47.4)%	\$896	(38.5)%	\$1,457

Medical services revenue from the Company's IGRT contracts decreased \$425,000 in 2015 compared to 2014. The sale of EWRS Turkey contributed \$208,000 to the decline, in addition to lower volume at the Company's existing site. Medical services revenue from the Company's IGRT contracts decreased by \$561,000 in 2014 compared to 2013. The sale of EWRS Turkey contributed \$357,000 to the decline, in addition to lower volume at the Company's existing site.

COSTS OF REVENUE

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Total costs of revenue	\$9,833	(3.0)%	\$10,138	(4.7)%	\$10,640
Percentage of total revenue	59.4 %		65.8 %		60.5 %

The Company's costs of revenue, consisting of maintenance and supplies, depreciation and amortization, and other operating expenses (such as insurance, property taxes, sales taxes, marketing costs and operating costs from the Company's retail sites) decreased by \$305,000 in 2015 compared to 2014 and decreased \$502,000 in 2014 compared to 2013.

The Company's maintenance and supplies costs were 6.6% of total revenue in 2015, 11.0% of total revenue in 2014 and 10.2% of total revenue in 2013. Maintenance and supplies costs decreased by \$602,000 and \$100,000 in 2015 and 2014 compared to 2014 and 2013, respectively. The decrease in 2015 compared to 2014 was due to the expiration of four fixed fee maintenance contracts at existing sites and the sale of the Company's units in Turkey, which also had fixed fee maintenance contracts. The existing sites with fixed fee maintenance contracts that expired, now receive maintenance on a scheduled and on an as needed basis, which is more cost effective. The decrease in 2014 compared to 2013 is due to the expiration of two fixed fee maintenance contracts at existing sites and the sale of the Company's units in Turkey, which also had fixed fee maintenance contracts. The existing sites with fixed fee maintenance contracts that expired, now receive maintenance on a scheduled and on an as needed basis, which is more cost effective.

Depreciation and amortization costs as a percentage of total revenue were 37.1%, 40.0%, and 35.9% in 2015, 2014 and 2013, respectively. Depreciation and amortization costs decreased \$32,000 and \$138,000 in 2015 and 2014 compared to 2014 and 2013, respectively. The decrease in 2015 compared to 2014 is due to the sale of EWRS Turkey in 2014, offset by increased depreciation in 2015 for the Company's new site, which started in December 2014, and two Cobalt-60 reloads, which occurred during the second and third quarters 2015. The decrease in 2014 compared to 2013 is due to the extension of two customer agreements which spread the remaining depreciation expense over the extended contract term. In addition, the sale of EWRS Turkey lessened depreciation expense.

Other direct operating costs as a percentage of total revenue were 15.7%, 14.8% and 14.4% in 2015, 2014 and 2013, respectively. Other direct operating costs increased by \$329,000 in 2015 compared to 2014 and decreased by \$264,000 in 2014 compared to 2013. The increase in 2015 is due to increased operating costs at the Company's retail sites, offset slightly by lower insurance costs. The decrease in 2014 is due to lower insurance costs and property taxes.

SELLING AND ADMINISTRATIVE EXPENSE

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Selling and administrative costs	\$3,496	(3.7)%	\$3,630	(9.8)%	\$4,025
Percentage of total revenue	21.1 %		23.5 %		22.9 %

The Company's selling and administrative costs decreased \$134,000 in 2015 compared to 2014 and decreased \$395,000 in 2014 compared to 2013. The decrease in 2015 is due to consulting fees that were expensed in 2014, a decrease in state and local taxes paid, offset by an increase in stock-based compensation expense. The decrease in 2014 is due to reduction in payroll expense driven by lower headcount, building rent, travel expense, and legal and consulting fees, partially offset by increased tax and audit fees. Building rent decreased due to accrued rent relating to a sublease of a portion of the Company's office space, recorded in the first quarter of 2013.

INTEREST EXPENSE

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Interest expense	\$1,239	(27.1)%	\$1,699	(5.6)%	\$1,799
Percentage of total revenue	7.5 %		11.0 %		10.2 %

The Company's interest expense decreased \$460,000 and \$100,000 in 2015 and 2014 compared to 2014 and 2013, respectively. The decrease in 2015 compared to 2014 is due, in part, to the sale of EWRS Turkey in 2014, which accounted for approximately \$100,000 of expense in 2014. In addition, the Company had a lower average principal base in 2015, effectively reducing interest expense. The decrease in 2014 compared to 2013 is due to a lower average principal base in 2014, effectively reducing interest expense. In addition, the Company paid off one contract in 2014.

(LOSS) ON WRITE DOWN INVESTMENT IN EQUITY SECURITIES

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
(Loss) on write down investment in equity securities	\$2,140	2,140.0 %	\$0	0.0 %	\$0

Percentage of total revenue	12.9 %	0.0 %	0.0 %
-----------------------------	--------	-------	-------

(Loss) on the write down of the Company’s investment in equity securities is due to the other-than-temporary impairment assessment performed at June 30, 2015. At June 30, 2015, the Company adjusted the carrying value of its investment in Mevion to the determined fair value of \$600,000 and recorded a \$2,114,000 impairment loss. Subsequently, the Company engaged a third party expert to review its assessment of the fair value of the Company’s common stock in Mevion and as a result, adjusted the impairment loss an additional \$26,000. For the year ended December 31, 2015 the impairment loss was \$2,140,000 and the fair value was approximately \$579,000.

This transaction is treated as a capital loss for tax purposes which may be deducted only to the extent the Company has capital gains. The Company is not aware of any event or transaction planned where the Company would generate a capital gain. Therefore a full valuation allowance was recorded against the income tax benefit from the impairment loss, and the net impact to the income tax provision is \$0.

(LOSS) ON SALE OF SUBSIDIARY

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
(Loss) on sale of subsidiary	\$0	572.0	% \$(572)	(572.0))% \$0
Percentage of total revenue	0.0 %		(3.7)%		0.0 %

Loss on sale of subsidiary was \$0 in 2015 compared to \$572,000 in 2014. Effective May 31, 2014 (with closing occurring June 10, 2014) the Company sold EWRS Turkey for EUR 4.2 million (approximately \$6.0M). The proceeds were used to pay-off outstanding debt associated with the Turkey operations and the excess was cash to the Company of \$768,000.

GAIN (LOSS) FOREIGN CURRENCY TRANSACTIONS

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Gain (loss) foreign transactions	\$0	(161.0))% \$161	113.7	% \$1,174)
Percentage of total revenue	0.0 %		1.0 %		(6.7)%

The (loss) gain from foreign currency transactions was \$0 in 2015 compared to \$161,000 in 2014, and increased \$1,335,000 in 2014 compared to 2013. The decrease in 2015 from foreign currency transactions is due to the sale of EWRS Turkey in 2014, which meant that there were no more significant amounts of transactions or held cash in foreign currency as of June 10, 2014. The increase in 2014 from foreign currency transactions is due to the strengthening of the Turkish Lira against the US dollar.

INTEREST AND OTHER INCOME

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Interest and other income	\$18	(35.7))% \$28	12.0	% \$25
Percentage of total revenue	0.1 %		0.2 %		0.1 %

Interest and other income decreased \$10,000 in 2015 compared to 2014 and increased \$3,000 in 2014 compared to 2013. The decrease in 2015 was due to lower interest income because the Company closed out the certificate of deposit on January 2, 2015.

INCOME TAX EXPENSE

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Income tax expense	\$434	236.4	% \$129	53.6	% \$84
Percentage of total revenue	2.6 %		0.8 %		0.5 %
Percentage of (loss) before income taxes	(39.9)%		(15.7)%		(36.8)%

Income tax expense increased \$305,000 in 2015 compared to 2014 and increased \$45,000 in 2014 compared to 2013. The increase in 2015 is due to income from operations of the Company's subsidiaries. The loss incurred on the write-down of the Company's investment in equity securities is a capital loss which is treated as non-deductible expense for income tax provision purposes and as such, a full valuation allowance was recorded against this loss and the net impact to the provision was \$0. The increase in 2014 compared to 2013 is due to income from operations of the Company's subsidiaries. Generally the Company has higher state income taxes because they are calculated at the Company's profitable operating subsidiary level, where in many states, separate state income tax returns are required and net operating loss carryforwards cannot be applied.

The Company anticipates that it will continue to record income tax expense if it operates profitably in the future. Currently there are state income tax payments required for most states in which the Company operates. However, there are minimal current federal income tax payments required due to net operating loss carryforwards and other deferred tax assets available for federal tax purposes.

The Company had a net operating loss carryforward for federal income tax return purposes at December 31, 2015 of approximately \$7,872,000.

NET INCOME ATTRIBUTABLE TO NON-CONTROLLING INTERESTS

(In thousands)	2015	Increase (Decrease)	2014	Increase (Decrease)	2013
Net income attributable to non-controlling interests	\$946	142.6	% \$390	96.0	% \$199
Percentage of total revenue	5.7 %		2.5 %		1.1 %

Net income attributable to non-controlling interests increased \$556,000 and \$191,000 in 2015 and 2014 compared to 2014 and 2013, respectively. Net income attributable to non-controlling interests represents the pre-tax income earned by the 19% non-controlling interest in GKF, and the pre-tax income or losses of the non-controlling interests in various subsidiaries controlled by GKF. The decrease or increase in net income attributable to non-controlling interests reflects the relative profitability of GKF.

NET (LOSS) ATTRIBUTABLE TO AMERICAN SHARED HOSPITAL SERVICES

2015	2014	2013
------	------	------

Edgar Filing: AMERICAN SHARED HOSPITAL SERVICES - Form 10-K

(In thousands, except per share amounts)				Increase (Decrease)			Increase (Decrease)		
Net (loss) income attributable to ASHS	\$(1,522)	(59.9)%	\$(952)	(205.1)%	\$(312)		
Net (loss) income per share attributable to ASHS, diluted	\$(0.28)	(47.3)%	\$(0.19)	(171.4)%	\$(0.07)		

Net loss attributable to American Shared Hospital Services was \$1,522,000 in 2015 and \$952,000 in 2014 compared to a net loss of \$952,000 and \$312,000 in 2014 and 2013, respectively. Excluding the loss on sale of subsidiary of \$572,000 and foreign currency gains of \$161,000 in 2014 and the write-down of the Company's investment in Mevion of \$2,140,000 in 2015, net income increased \$1,159,000 in 2015 compared to 2014. The increase in net income in 2015 compared to 2014 is due to increased volumes and average reimbursement per procedures, in addition to lower costs of revenue. The \$640,000 decrease in net income in 2014 was primarily due to the loss on sale of EWRS Turkey of \$572,000.

IMPAIRMENT ANALYSIS OF INVESTMENT IN EQUITY SECURITIES

The Company has previously participated in several Mevion rounds of financing and has carried its investment at cost. The Company reviews this investment on a quarterly basis for impairment in light of the length of time and extent to which market value has been below cost, the financial condition and near term prospects of Mevion, current market conditions and events, and our ability and intent to retain our investment for a period sufficient to allow for an anticipated recovery in the market value, or as events or circumstances might indicate that the carrying value of the investment may be below its cost basis on an other-than-temporary impairment basis. The Company evaluated its common stock investment in Mevion of \$2,709,000, for impairment at December 31, 2014, and in light of available information, determined that impairment was not other-than temporary.

On July 27, 2015 Mevion cancelled its planned initial public offering (“IPO”) and subsequently announced on August 4, 2015 that it had entered into an investment agreement where up to \$200 million will be invested by HOPU Investments, YuanMing Capital and existing U.S. investors. Concurrent with this investment, Mevion and the lead investors intend to form a joint venture to produce, sell, and service proton therapy systems for the Chinese market. The Company’s investment in the common stock of Mevion represents an approximate 0.46% interest following this latest private placement transaction on a fully diluted basis.

In light of the cancellation of Mevion’s IPO, the Company reviewed its investment in Mevion for impairment. The company determined that its investment was other than temporarily impaired and recognized an impairment loss of \$2,114,000 at June 30, 2015. In determining the fair value of the Company’s common stock in Mevion, the Company engaged a third party expert to review the valuation of its investment in Mevion common stock. The third party utilized the market valuation approach and an option waterfall model calibrated to Mevion’s last round of funding. Each equity class was examined and priced according to its liquidation preferences. Based on the third party analysis, an additional impairment loss of \$26,000 was recognized by the Company. The fair value of the Company’s investment in Mevion, as of December 31, 2015, is approximately \$579,000 with an impairment loss for the year of \$2,140,000.

The \$2,140,000 other than temporary impairment of its investment in Mevion is recorded in other income (loss) on the Company’s Condensed Consolidated Statement of Operations. This transaction is treated as a capital loss for tax purposes which may be deducted only to the extent the Company has capital gains. The Company is not aware of any event or transaction planned where the Company would generate a capital gain. Therefore, a full valuation allowance was recorded against the income tax benefit from the impairment loss, and the net impact to the income tax provision for the year ended December 31, 2015 was \$0.

The first MEVION S250, located at Barnes-Jewish Hospital in St. Louis, MO (“Barnes-Jewish Hospital”), treated its first patient on December 19, 2013. The second MEVION S250, located at the Ackerman Cancer Center in Jacksonville, Florida (“Ackerman Cancer Center”), treated its first patient in April 2015. The third MEVION S250, located at Robert Wood Johnson University Hospital in New Brunswick, New Jersey (“Robert Wood Johnson”), started in May 2015. The Company’s first MEVION S250 system was delivered to UF Health Cancer Center at Orlando Health in November 2014 and is expected to begin treating patients in second quarter 2016.

LIQUIDITY AND CAPITAL RESOURCES

The Company had cash and cash equivalents of \$2,209,000 at December 31, 2015 compared to \$1,059,000 at December 31, 2014, an increase of \$1,150,000. The Company’s expected primary cash needs on both a short and long-term basis are for capital expenditures, business expansion, working capital, and other general corporate purposes.

Restricted cash of \$50,000 at December 31, 2015 reflects cash that may only be used for the operations of GKF.

As of December 31, 2014, the Company had a \$9,000,000 renewable line of credit with a bank secured by a certificate of deposit. The line of credit had been in place since June 2004. The Company's earnings in 2013 were insufficient to satisfy the "profitability" covenant in the line of credit and the Company was not in compliance with the covenant until the Bank waived this default on August 8, 2014 and agreed to change the maturity date of the facility to December 31, 2014. The line was paid-off using the proceeds from the certificate of deposit on January 2, 2015.

Borrowing under the line of credit was subject to interest expense at a rate equal to the bank's prime rate minus 0.5 percentage point, or alternatively at the Company's discretion, the LIBOR rate plus 1.0 percentage point. The weighted average interest rate on money borrowed against the line of credit during 2014 was 1.40%. As of December 31, 2014, there was \$8,780,000 borrowed against the line of credit.

Operating activities provided cash of \$8,548,000 in 2015, which was driven by non-cash charges for depreciation and amortization of \$6,190,000, loss on write down of investment in equity securities of \$2,140,000, deferred income tax of \$298,000, stock-based compensation expense of \$226,000, changes in receivables of \$178,000, and changes in accounts payable and accrued liabilities of \$175,000. These were partially offset by a net loss of \$576,000, other non-cash items of \$31,000, and changes in prepaid expenses and other assets of \$52,000.

The Company's trade accounts receivable decreased by \$154,000 to \$3,038,000 at December 31, 2015 from \$3,192,000 at December 31, 2014, primarily due to increased cash collections on a few customer accounts. The number of days revenue (sales) outstanding ("DSO") in accounts receivable as of December 31, 2015 decreased to 67 days compared to 76 days at December 31, 2014. DSO can and does fluctuate depending on timing of customer payments received and the mix of fee per use versus retail customers. Retail sites generally have longer collection periods than fee per use sites.

Investing activities used \$1,926,000 of cash in 2015 due to payments made towards the purchase of property and equipment of \$1,916,000 and investment in equity securities of \$10,000.

Financing activities used \$5,472,000 of cash during 2015, primarily due to principal payments on long-term debt of \$2,058,000, principal payments towards capital leases of \$4,026,000, and distributions to non-controlling interests of \$670,000. This was partially offset by long term debt financing on equipment of \$1,016,000, capital contributions from non-controlling interests in subsidiaries of the Company of \$46,000, and net proceeds from the Company's certificate of deposit of \$220,000.

The Company had negative working capital at December 31, 2015 of \$2,691,000 compared to negative working capital of \$2,004,000 at December 31, 2014. The \$687,000 decrease in net working capital was due to net increases in the current portion of long term debt and capital leases of \$897,000, increases in other accrued liabilities of \$399,000, decreases in receivables of \$178,000, decreases in current deferred tax asset of \$367,000, and net decrease of \$220,000 from the proceeds from the certificate of deposit and pay-down on the line of credit. This was offset by an increase in cash of \$1,150,000, prepaid expenses of \$155,000, and decreases in accounts payable and employee compensation expenses of \$69,000. The Company believes that its cash flow from cash on hand, operations, and other cash resources are adequate to meet its scheduled debt and capital lease obligations during the next 12 months. See additional discussion below related to commitments.

The Company, in the past, has secured financing for its Gamma Knife and radiation therapy units. The Company has secured financing for its projects from several lenders and anticipates that it will be able to secure financing on future projects from these or other lending sources, but there can be no assurance that financing will continue to be available on acceptable terms. The Company meets all debt covenants required under notes with its lenders, and expects that any covenants required by future lenders will be acceptable to the Company.

IMPACT OF INFLATION AND CHANGING PRICES

The Company does not believe that inflation has had a significant impact on operations because a substantial majority of the costs that it incurs under its customer contracts are fixed through the term of the contract.

CONTRACTUAL OBLIGATIONS, COMMITMENTS, CONTINGENT LIABILITIES AND OFF BALANCE SHEET ARRANGEMENTS

The following table presents, as of December 31, 2015, the Company's significant fixed and determinable contractual obligations by payment date. The payment amounts represent those amounts contractually due to the recipient and do not include any unamortized premiums or discounts, hedge basis adjustments, or other similar carrying value adjustments. Further discussion of the nature of each obligation is included in the notes to the consolidated financial statements referenced below. For purposes of this table, these commitments are listed in the less than 1 year and 1-3 year categories.

Contractual Obligations	Payments Due by Period				
	Total amounts committed	Less than 1 year	1-3 years	4-5 years	After 5 years
Long-term debt (includes interest)	\$ 11,106,000	\$ 3,366,000	\$ 5,375,000	\$ 1,923,000	\$ 442,000
Capital leases (includes interest)	15,080,000	5,169,000	7,670,000	2,241,000	-
Promissory note (includes interest)	1,263,000	150,000	1,113,000	-	-
Future equipment purchases	37,250,000	11,450,000	25,800,000	-	-
Operating leases	158,000	96,000	62,000	-	-
Total contractual obligations	\$ 64,857,000	\$ 20,231,000	\$ 40,020,000	\$ 4,164,000	\$ 442,000

Further discussion of the long-term debt commitment is included in Note 5, capital leases in Note 6, and operating leases in Note 12 of the consolidated financial statements.

As of December 31, 2015, the Company has commitments to purchase three MEVION S250 PBRT systems for \$34,200,000. The Company has \$5,000,000 in non-refundable deposits toward the purchase of these three PBRT systems from Mevion. The non-refundable deposits are recorded in the Condensed Consolidated Balance Sheets as deposits and construction in progress. The Company's first MEVION S250 synchrocyclotron was delivered to UF Health Cancer Center at Orlando Health in late 2014. During 2015, the synchrocyclotron was installed and tested and it is expected that the first patient will be treated in the second quarter 2016. The Company's second and third PBRT units will not begin construction until the Company identifies satisfactory placement sites. There is a cash payment of approximately \$6,700,000 due in January 2016 for the first PBRT system. In January 2016, the Company secured lease financing of approximately \$8,400,000 and payment of \$6,700,000 was remitted to Mevion. The financing company also reimbursed the Company approximately \$1,100,000 in previously remitted progress payments to Mevion and freight costs. An additional payment of approximately \$600,000 is due to Mevion in two installments during 2016 which will be paid using the remaining proceeds from the January 2016 lease financing.

The remaining two PBRT projects do not have anticipated delivery dates. The timing of progress payments for PBRT contracts two and three are dependent upon future events and the Company has some flexibility to delay the due dates of these commitments. Approximately \$25,800,000 of these commitments are not expected to start becoming due until 2017 or later and the Company is in discussions with lenders to finance the remaining two proton systems. There are no anticipated cash requirements for these commitments in the next 12 months.

As of December 31, 2015, the Company has commitments to purchase one Gamma Knife Perfexion system, one Cobalt-60 reload, and is scheduled to install one Gamma Knife Model 4C system, which the Company previously financed and owns. Total Gamma Knife commitments as of December 31, 2015 are \$3,650,000. The Model 4C unit is scheduled to be installed in mid-2016 at the Company's new customer site in Peru. There are cash requirements for the Peru commitment in the next 12 months of approximately \$600,000. The Company believes that cash flow from cash

on hand and operations will be sufficient to cover this payment. The Perfexion unit is for a site yet to be determined and it is the Company's intent to finance this unit. The Cobalt-60 reload is for an existing site and it is the Company's intent to finance this reload. There are no significant cash requirements for the Perfexion system or the Cobalt-60 reload in the next 12 months. There can be no assurance that financing will be available for the Company's current or future projects, or at terms that are acceptable to the Company.

	2016	Thereafter	Total
Proton Beam Units	\$8,400,000	\$25,800,000	\$34,200,000
Gamma Knife Units	3,650,000	-	3,650,000
Total Commitments	\$12,050,000	\$25,800,000	\$37,850,000

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The table below presents information about certain market-sensitive financial instruments as of December 31, 2015. The fair values were determined based on quoted market prices for the same or similar instruments.

(amounts in thousands)	Payments Due by Period					There- after	Total	Fair Value
	2016	2017	2018	2019	2020			
Fixed rate long-term debt and present value of capital leases	\$7,200	\$7,113	\$4,667	\$2,851	\$1,089	\$ 429	\$23,349	\$23,341
Average interest rates	6.7 %	6.7 %	5.9 %	5.7 %	6.0 %	6.3 %	6.5 %	

We do not hold or issue derivative instruments for trading purposes and are not a party to any instruments with leverage or prepayment features.

At December 31, 2015, we had no significant long-term, market-sensitive investments.

We have no affiliation with partnerships, trusts or other entities whose purpose is to facilitate off-balance sheet financial transactions or similar arrangements, and therefore have no exposure to the financing, liquidity, market or credit risks associated with such entities.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See the Index to Consolidated Financial Statements and Financial Statement Schedules included at page A-1 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

Our Chief Executive Officer and our Chief Financial Officer, after evaluating the effectiveness of the Company's "disclosure controls and procedures" (as defined in the Securities Exchange Act of 1934 ("Exchange Act") Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this annual report, have concluded that our disclosure controls and procedures are effective based on their evaluation of these controls and procedures required by paragraph (b) of Exchange Act Rules 13a-15 or 15d-15.

(b) Management's report on internal control over financial reporting.

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system was designed to provide reasonable assurance to its management and Board of Directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2015. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control – Integrated Framework (2013). Based on this assessment management believes that, as of December 31, 2015, the Company's internal control over financial reporting is effective based on those criteria.

(c) Changes in internal controls over financial reporting.

Our Chief Executive Officer and our Chief Financial Officer have evaluated the changes to the Company's internal control over financial reporting that occurred during our last fiscal quarter ended December 31, 2015, as required by paragraph (d) of Exchange Act Rules 13a-15 and 15d-15, and have concluded that there were no such changes that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information regarding directors is incorporated herein by reference from the Company's definitive Proxy Statement for the 2016 Annual Meeting of Shareholders (the "2016 Proxy Statement"). Information regarding executive officers of the Company, included herein under the caption "Executive Officers of the Company" in Part I, Item 1 above, is incorporated herein by reference.

Information concerning the identification of our standing audit committee required by this Item is incorporated by reference from the 2016 Proxy Statement.

Information concerning our audit committee financial experts required by this Item is incorporated by reference from the 2016 Proxy Statement.

Information concerning compliance with Section 16(a) of the Exchange Act required by this Item is incorporated by reference from the 2016 Proxy Statement.

We have adopted a Code of Ethics that is available on our website at www.ashs.com. The information on our website is not part of this report. You may also request a copy of this document free of charge by writing our Corporate Secretary.

ITEM 11. EXECUTIVE COMPENSATION

Information required by this Item is incorporated herein by reference from the 2016 Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by this Item is incorporated herein by reference from the 2016 Proxy Statement.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by this Item is incorporated herein by reference from the 2016 Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information required by this Item is incorporated herein by reference from the 2016 Proxy Statement.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) Financial Statements and Schedules.

The following Financial Statements and Schedules are filed with this Report:

Report of Independent Registered Public Accounting Firm

Audited Consolidated Financial Statements

Consolidated Balance Sheets

Consolidated Statements of Operations

Consolidated Statements of Shareholders' Equity

Consolidated Statements of Cash Flows

Notes to Consolidated Financial Statements

Financial Statement Schedules- no schedules are included since the required information is not present or is not present in amounts sufficient to require submission of the schedule, or because the information required is included in the financial statements and notes thereto.

(b)

Exhibits.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders

American Shared Hospital Services

We have audited the accompanying consolidated balance sheets of American Shared Hospital Services and subsidiaries (the “Company”) as of December 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive (loss), shareholders’ equity, and cash flows for each of the three years in the period ended December 31, 2015. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of American Shared Hospital Services and subsidiaries at December 31, 2015 and 2014, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2015, in conformity with accepted accounting principles generally accepted in the United States of America.

/s/ Moss Adams LLP

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 1 – Business and Basis of Presentation

Business – These consolidated financial statements include the accounts of American Shared Hospital Services (the “Company”) and its subsidiaries as follows: The Company wholly-owns the subsidiaries OR21, Inc. (“OR21”) and MedLeader.com, Inc. (“MedLeader”), PBRT Orlando, LLC (“Orlando”) and American Shared Radiosurgery Services (“ASRS”). The Company is also the majority owner of Long Beach Equipment, LLC (“LBE”). ASRS is the majority-owner of GK Financing, LLC (“GKF”) which wholly-owns the subsidiaries GK Financing U.K., Limited (“GKUK”), and Instituto de Gamma Knife del Pacifico S.A.C. (“GKPeru”). GKF is also the majority-owner of the subsidiaries Albuquerque GK Equipment, LLC (“AGKE”), Jacksonville GK Equipment, LLC (“JGKE”) and EWRS, LLC (“EWRS”), which, prior to its sale in June 2014, wholly-owned the subsidiary, EWRS Tibbi Cihazlar Ticaret Ltd Sti (“EWRS Turkey”).

The Company (through ASRS) and Elekta AB, the manufacturer of the Gamma Knife (through its wholly-owned United States subsidiary, GKV Investments, Inc.), entered into an operating agreement and formed GK Financing, LLC. During 2015 GKF provided Gamma Knife units to seventeen medical centers in the United States in the states of Arkansas, California, Connecticut, Florida, Illinois, Massachusetts, Mississippi, Nevada, New Jersey, New Mexico, New York, Tennessee, Oklahoma, Ohio, Texas, and Washington.

The Company also provided radiation therapy and related equipment directly to a medical center in Massachusetts.

The Company formed the subsidiaries GKUK and GKPeru, for the purposes of expanding its business internationally into the United Kingdom and Peru; LBE and Orlando to provide proton beam therapy services in Long Beach, California and Orlando, Florida; and AGKE and JGKE to provide Gamma Knife services in Albuquerque, New Mexico and Jacksonville, Florida. AGKE began operation in the second quarter 2011 and JGKE began operation in the fourth quarter 2011. Orlando is anticipated to begin operating in second quarter 2016. GKPeru is expected to begin operation in mid-2016. GKUK is inactive and LBE is not expected to generate revenue within the next two years.

The Company continues to develop its design and business model for “The Operating Room for the 21st Century”SM (“OR21SM”), through its 50% owned OR21, LLC. The remaining 50% is owned by an architectural design company.

OR21 is not expected to generate significant revenue within the next two years.

MedLeader was formed to provide continuing medical education online and through videos for doctors, nurses and other healthcare workers. This subsidiary is not operational at this time.

All significant intercompany accounts and transactions have been eliminated in consolidation.

Note 2 – Accounting Policies

Use of estimates in the preparation of financial statements – In preparing the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the consolidated financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Significant accounting estimates reflected in the Company's consolidated financial statements include the allowance for doubtful accounts, estimated useful lives of fixed assets and its salvage values, revenues and costs of sales for turn-key and revenue sharing arrangements, and the carrying value of its Mevion investment. Actual results could differ from those estimates.

Advertising costs – The Company expenses advertising costs as incurred. Advertising costs were \$115,000, \$155,000, and \$119,000 during the years ended December 31, 2015, 2014, and 2013, respectively. Advertising costs are recorded in other direct operating costs and sales and administrative costs in the consolidated statements of operations.

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 2 – Accounting Policies (continued)

Cash and cash equivalents – The Company considers all liquid investments with original maturities of three months or less at the date of purchase to be cash equivalents. Restricted cash is not considered a cash equivalent for purposes of the consolidated statements of cash flows.

Restricted cash – Restricted cash represents the minimum cash that must be maintained in GKF to fund operations, per the subsidiary's operating agreement.

Business and credit risk – The Company maintains its cash balances, which exceed federally insured limits, in financial institutions. Until January 2015, most of the Company's cash was invested in a certificate of deposit. The Company has not experienced any losses and believes it is not exposed to any significant credit risk on cash, cash equivalents and securities. The Company monitors the financial condition of the financial institutions it uses on a regular basis.

All of the Company's revenue was provided by seventeen, twenty, and nineteen customers in 2015, 2014, and, 2013, and these customers constitute accounts receivable at December 31, 2015 and 2014, respectively. The Company performs credit evaluations of its customers and generally does not require collateral. The Company has not experienced significant losses related to receivables from individual customers or groups of customers in any particular geographic area.

Accounts receivable and doubtful accounts – Accounts receivable are recorded at net realizable value. An allowance for doubtful accounts is estimated based on historical collections plus an allowance for probable losses. Receivables are considered past due based on contractual terms and are charged off in the period that they are deemed uncollectible. Recoveries of receivables previously charged off are recorded as revenue when received.

Non-controlling interests - The Company reports its non-controlling interests as a separate component of shareholders' equity. The Company also presents the consolidated net income and the portion of the consolidated net income and other comprehensive income allocable to the non-controlling interests and to the shareholders of the Company separately in its consolidated statements of operations and comprehensive (loss).

Property and equipment – Property and equipment are stated at cost less accumulated depreciation. Depreciation is determined using the straight-line method over the estimated useful lives of the assets, which for medical and office equipment is generally 3 – 10 years, and after accounting for salvage value on the equipment where indicated. Salvage value is based on the estimated fair value of the equipment at the end of its useful life. The Company capitalized interest of \$431,000, \$371,000, and \$390,000 in 2015, 2014, and 2013, respectively, as costs of medical equipment.

The Company capitalizes interest incurred on property and equipment that is under construction, for which deposits or progress payments have been made. When a rate is not readily available, imputed interest is calculated using the Company's incremental borrowing rate. The interest capitalized for property and equipment is the portion of interest cost incurred during the acquisition periods that could have been avoided if expenditures for the equipment had not been made.

The Company leases Gamma Knife and radiation therapy equipment to its customers under arrangements typically accounted for as operating leases. At December 31, 2015, the Company held equipment under operating lease contracts with customers with an original cost of \$83,267,000 and accumulated depreciation of \$47,198,000. At December 31, 2014, the Company held equipment under operating lease contracts with customers with an original cost of \$82,151,000 and accumulated depreciation of \$46,138,000.

Certificate of deposit – As of December 31, 2014, the Company had a \$9,000,000 investment in a certificate of deposit with a bank. On January 2, 2015 proceeds from the certificate of deposit were used to pay-off the Company's line of credit agreement with the same bank who issued the certificate of deposit.

Investment in equity securities – As of December 31, 2015 the Company had common stock representing an approximate 0.46% interest in Mevion Medical Systems, Inc. ("Mevion"), and accounts for this investment under the cost method. The carrying value of the Company's investment in Mevion was \$579,000 and \$2,709,000 as of December 31, 2015 and December 31, 2014, respectively. The Company reviews its investment in Mevion for impairment on a quarterly basis, or as events or circumstances might indicate that the carrying value of the investment may not be recoverable. See Note 4 – Investment in Equity Securities for further discussion regarding impairment of the investment.

American Shared Hospital Services**Notes to Consolidated Financial Statements****Note 2 – Accounting Policies (continued)**

Fair value of financial instruments – The Company’s disclosures of the fair value of financial instruments is based on a fair value hierarchy which prioritizes the inputs to the valuation techniques used to measure fair value into three levels. Level 1 inputs are unadjusted quoted market prices in active markets for identical assets and liabilities that the Company has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for assets or liabilities, and reflect the Company’s own assumptions about the assumptions that market participants would use in pricing the asset or liability.

The estimated fair value of the Company’s assets and liabilities as of December 31, 2015 and December 31, 2014 were as follows (in thousands):

	Level 1	Level 2	Level 3	Total	Carrying Value
December 31, 2015					
Assets:					
Cash, cash equivalents, restricted cash	\$2,259	\$ -	\$-	\$2,259	\$2,259
Investment in equity securities	-	-	579	579	579
Total	\$2,259	\$ -	\$579	\$2,838	\$2,838
Liabilities					
Debt obligations	\$-	\$ -	\$9,744	\$9,744	\$9,597
Total	\$-	\$ -	\$9,744	\$9,744	\$9,597
December 31, 2014					
Assets:					
Cash, cash equivalents, restricted cash	\$1,109	\$ -	\$-	\$1,109	\$1,109
Certificate of deposit	9,000	-	-	9,000	9,000
Investment in equity securities	-	-	330	330	2,709
Total	\$10,109	\$ -	\$330	\$10,439	\$12,818

Liabilities

Advances on line of credit	\$8,780	\$ -	\$-	\$8,780	\$8,780
Debt obligations	-	-	10,658*	10,658	10,591
Total	\$8,780	\$ -	\$10,658	\$19,438	\$19,371

*Subsequent to the prior year Form 10K filing, management reviewed the inputs to fair value its debt at December 31, 2014 and determined that it misclassified these as Level 2 and the Company has correctly reclassified these as Level 3 at December 31, 2014. The disclosure reclassification adjustment is not material to previously reported consolidated financial statements.

Revenue recognition - Revenue is recognized when services have been rendered and collectability is reasonably assured, on either a fee per use or revenue sharing basis. As of December 31, 2015, there are no guaranteed minimum payments. The Company's contracts are typically for a ten year term and are classified as either fee per use or retail. Retail arrangements are further classified as either turn-key or revenue sharing.

Revenue from fee per use contracts is determined by each hospital's contracted rate. Revenue is recognized at the time the procedures are performed, based on each hospital's contracted rate. Under revenue sharing arrangements, the Company receives a contracted percentage of the reimbursement received by the hospital. The amount the Company expects to receive is recorded as revenue and estimated based on historical experience. Under turn-key arrangements, the Company receives payment from the hospital in the amount of its reimbursement from third party payors, and the Company is responsible for paying all the operating costs of the Gamma Knife. The Company also records an estimate of net operating profit based on estimated revenues, less estimated operating costs. The gross amount the Company expects to receive from the hospital, in the amount of its reimbursement from third party payors, is recorded as revenue and estimated based on historical experience and hospital contracts with third party payors. Revenue estimates are reviewed periodically and adjusted as necessary. The operating costs of the Gamma Knife and estimated net operating profit are recorded as other direct operating costs in the consolidated statement of operations. Revenue recognition is consistent with guidelines provided under the applicable accounting standards for revenue recognition.

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 2 – Accounting Policies (continued)

Stock-based compensation – The Company measures all stock-based compensation awards at fair value and records such expense in its consolidated financial statements over the requisite service period of the related award. See Note 9 for additional information on the Company’s stock-based compensation programs.

Costs of revenue – The Company's costs of revenue consist primarily of maintenance and supplies, depreciation and amortization, and other operating expenses (such as insurance, property taxes, sales taxes, marketing costs and operating costs from the Company’s retail sites). Costs of revenues are recognized as incurred.

Sales and Marketing – The Company markets its services through its preferred provider status with Elekta and a direct sales effort led by its Vice President of Sales and Business Development and its Chief Operating Officer. The Company’s current business is the outsourcing of stereotactic radiosurgery services and radiation therapy services. The Company typically provides the equipment, as well as planning, installation, reimbursement and marketing support services.

Income taxes – The Company accounts for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. See Note 8 for further discussion on income taxes.

Comprehensive (loss) – Comprehensive (loss) encompasses all changes in shareholders’ equity other than those arising from transactions with stockholders, and consists of net loss and foreign currency translation adjustments.

Functional currency – Based on guidance provided in accordance with Accounting Standards Codification (“ASC”) 830, *Foreign Currency Matters* (“ASC 830”), the Company analyzes its operations outside the United States to determine the functional currency of each operation. Management has determined that these operations are initially

accounted for in U.S. dollars since the primary transactions incurred are in U.S. dollars and the Company provides significant funding towards the startup of the operation. When Management determines that an operation has become predominantly self-sufficient, the Company will change its accounting for the operation to the local currency from the U.S. dollar.

Gains and losses from foreign currency transactions and remeasurement are listed in the Company's consolidated statements of operations. The net foreign currency loss was \$0 in 2015, compared to a gain for 2014, prior to the sale of EWRS Turkey, of \$161,000, and a loss in 2013 of \$1,174,000.

American Shared Hospital Services

Notes to Consolidated Financial Statements

Note 2 – Accounting Policies (continued)

Cumulative translation adjustment – Based on guidance provided in accordance with Accounting Standards Update (“ASU”) No 2013-05 *Parent’s Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries of Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity* (“ASU 2013-05”), the Company no longer holds a financial interest in EWRS Turkey. As such, the cumulative translation adjustments previously recognized under accumulated other comprehensive (loss) were released into net income as a component of the loss for the sale of EWRS Turkey in the statement of operations. The total cumulative translation adjustment of \$779,000, previously recognized under accumulated other comprehensive income (loss), was included as a component of the loss calculation for the sale of EWRS Turkey, reported in the statement of operations for the year ended 2014.

Discontinued Operations – Based on guidance provided in accordance with ASU No. 2014-08 *Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity* (“ASU 2014-08”), the Company has analyzed the factors that define a discontinued operation and determined that the sale of EWRS Turkey is considered the sale of a significant component, but does not represent a major shift in the business, and therefore is not a discontinued operation.

Effective May 31, 2014 (with closing occurring June 10, 2014) the Company sold EWRS Turkey for EUR 4.2 million (approximately \$6.0M). The proceeds were used to reduce outstanding debt and the excess was cash to the Company of \$768,000. The Company recorded a loss on sale of subsidiary of \$572,000. The Company was also eligible for an earn-out in fiscal years 2014 and 2015 based on future revenue derived from the units sold to Euromedic. The Company did not meet its earn-out milestone for 2014 or 2015.

Earnings per share – Basic earnings per share excludes dilution and is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the year. The fully vested restricted stock units not issued and outstanding, are also included therein. Diluted earnings per share reflect the potential dilution that could occur if common shares were issued pursuant to the exercise of options or warrants. The following table illustrates the computations of basic and diluted earnings per share for the years ended December 31, 2015, 2014, and 2013.

Edgar Filing: AMERICAN SHARED HOSPITAL SERVICES - Form 10-K

	2015	2014	2013
Numerator for basic and diluted (loss) earnings per share	\$(1,522,000)	\$(952,000)	\$(312,000)
Denominator:			
Denominator for basic and diluted (loss) earnings per share – weighted-average shares	5,519,000	5,028,000	4,608,000
(Loss) earnings per common share – basic and diluted	\$(0.28)	\$(0.19)	\$(0.07)

In 2015, options outstanding to purchase 614,000 shares of common stock at an exercise price range of \$2.05 - \$3.15 per share, and warrants to purchase 200,000 shares of common stock, issued with promissory notes, at an exercise price of \$2.20, were not included in the calculation of diluted earnings per share because they would be anti-dilutive.

In 2014, options outstanding to purchase 633,000 shares of common stock at an exercise price range of \$2.43 - \$6.16 per share, and warrants to purchase 200,000 shares of common stock, issued with promissory notes, at an exercise price of \$2.20, were not included in the calculation of diluted earnings per share because they would be anti-dilutive.

American Shared Hospital Services**Notes to Consolidated Financial Statements****Note 2 – Accounting Policies (continued)**

In 2013, options outstanding to purchase 576,000 shares of common stock at an exercise price range of \$2.30 - \$6.50 per share were not included in the calculation of diluted earnings per share because they would be anti-dilutive.

Business segment information - Based on the guidance provided in accordance with ASC 280 *Segment Reporting* (“ASC 280”), the Company has analyzed its subsidiaries which are all in the business of leasing radiosurgery and radiation therapy equipment to health care providers, and concluded there is one reportable segment, Medical Services Revenue. The Company provides Gamma Knife and IGRT equipment to seventeen hospitals in the United States as of December 31, 2015. These seventeen locations operate under different subsidiaries of the Company, but offer the same service, radiosurgery and radiation therapy. The operating results of the subsidiaries are reviewed by the Company’s Chief Executive Officer and Chief Financial Officer, who are also deemed the Company’s Chief Operating Decision Makers (“CODMs”) and this is done in conjunction with all of the subsidiaries and locations.

The Company did not have any international operations as of December 31, 2015, but the Company’s unit in Peru is expected to begin operations in 2016 and is reflected in the property and equipment table below for 2015.

The following table provides a break out of domestic and foreign allocations of medical services revenues and net property and equipment:

	2015	2014	2013
Medical services revenues			
Domestic	100 %	97 %	91 %
Foreign	0 %	3 %	9 %
Total	100 %	100 %	100 %

	2015	2014	2013
Property and equipment, net			
Domestic	93 %	94 %	84 %
Foreign	7 %	6 %	16 %
Total	100 %	100 %	100 %

Nonmonetary transactions – Based on guidance provided in accordance with ASC No. 845 *Nonmonetary Transactions* (“ASC 845”), barter transactions with commercial substance are recorded at the estimated fair value of the products exchanged, unless the products received have a more readily determinable estimated fair value. The Company entered into a lease agreement in December 2014 where the lessee exchanged certain medical services equipment for a nominal amount and more beneficial contract terms related to the revenue sharing arrangement. The Company estimated and recorded the fair value of the equipment received and recognized deferred revenue. The fair value of the equipment received during the year ended December 31, 2014 was \$700,000.

Long lived asset impairment – The Company assesses the recoverability of its long-lived assets when events or changes in circumstances indicate their carrying value may not be recoverable. Such events or changes in circumstances may include: a significant adverse change in the extent or manner in which a long-lived asset is being used, significant adverse change in legal factors or in the business climate that could affect the value of a long-lived asset, an accumulation of costs significantly in excess of the amount originally expected for the acquisition or development of a long-lived asset, current or future operating or cash flow losses that demonstrate continuing losses associated with the use of a long-lived asset, or a current expectation that, more likely than not, a long-lived asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. The Company performs impairment testing at the asset group level that represents the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. The Company assesses recoverability of a long-lived asset by determining whether the carrying value of the asset group can be recovered through projected undiscounted cash flows over their remaining lives. If the carrying value of the asset group exceeds the forecasted undiscounted cash flows, an impairment loss is recognized, measured as the amount by which the carrying amount exceeds estimated fair value. An impairment loss is charged to the consolidated statement of operations in the period in which management determines such impairment. No such impairment has been noted as of December 31, 2015 and 2014.

Out-of-Period Adjustment: During the fourth quarter of 2014, the Company reclassified \$400,000 to non-controlling interests and \$235,000 to additional paid-in capital that were incorrectly classified as liabilities. The corrections were not material to any previously reported financial periods or to the year ended December 31, 2014.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 2 – Accounting Policies (continued)

Recently issued accounting pronouncements – In January 2015, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2015-01, *Income Statement - Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items* (“ASU No. 2015-01”), which eliminates from United States Generally Accepted Accounting Principles (“GAAP”) the concept of extraordinary items and requires that an entity separately classify, present, and disclose extraordinary events and transactions. This ASU will also align more closely GAAP income statement presentation guidance with International Accounting Standards (“IAS”) 1, *Presentation of Financial Statements*, which prohibits the presentation and disclosure of extraordinary items. The new standard is effective for the Company on January 1, 2016. Early application is permitted. The standard permits the use of either the retrospective or prospective application. The Company is evaluating the effect that ASU 2015-01 will have on its consolidated financial statements and related disclosures and has not yet selected a transition method.

In February 2015, the FASB issued ASU No. 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis* (“ASU No. 2015-02”), which is intended to improve targeted areas of consolidation guidance for legal entities. The ASU focuses on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. In addition to reducing the number of consolidation models from four to two, the new standard simplifies the FASB ASC and improves current GAAP. The new standard is effective for the Company on January 1, 2016. Early adoption is permitted. The Company has evaluated the effect that ASU 2015-02 will have on its consolidated financial statements and related disclosures and determined the impact is not material.

In April 2015, the FASB issued ASU No. 2015-03, *Interest—Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs* (“ASU 2015-03”), which requires that debt issuance costs related to a recognized debt liability, be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. The new standard is effective for the Company on January 1, 2016. Early adoption is permitted. The amendments should be applied on a retrospective basis, wherein the balance sheet of each individual period presented should be adjusted to reflect the period-specific effects of applying the new guidance. The Company has evaluated the effect that ASU 2015-03 will have on its consolidated financial statements and related disclosures and determined the impact is not material.

In November 2015, the FASB issued ASU No. 2015-17 *Income Taxes - Balance Sheet Classification of Deferred Taxes* (“ASU 2015-17”), as part of its Simplification Initiative. The amendments eliminate the guidance in ASC 740 *Income Taxes*, that required an entity to separate deferred tax liabilities and assets between current and noncurrent

amounts in a classified balance sheet. Rather, deferred taxes will be presented as noncurrent under the new standard. The new guidance is effective for the Company in 2017. The standard permits the use of either retrospective or prospective application. Early adoption is permitted, including for December 31, 2015 year-end financial statements. The Company has elected to early adopt as of December 31, 2015, on a prospective basis, with respect to balance sheet classification, and the impact was a reclassification of \$367,000 of current deferred tax assets to non-current deferred tax liabilities at December 31, 2015.

In January 2016, the FASB issued ASU No. 2016-01 *Recognition and Measurement of Financial Assets and Financial Liabilities* ("ASU 2016-01") which requires equity investments, except those accounted for under the equity method of accounting or those that result in consolidation of the investee, to be measured at fair value with changes in fair value recognized in net income. The new guidance is effective for the Company on January 1, 2018. Early adoption is permitted. The standard permits the use of cumulative-effect transition method. The Company is evaluating the effect that ASU 2016-01 will have on its consolidated financial statements and related disclosures.

In February 2016, the FASB issued ASU No. 2016-02 *Leases* ("ASU 2016-02"), which requires lessees to recognize, for all leases, at the commencement date, a lease liability and a right-of-use asset. Under the new guidance, lessor accounting is largely unchanged. The new guidance is effective for the Company on January 1, 2019. Early adoption is permitted. The Company is evaluating the effect that ASU No. 2016-02 will have on its consolidated financial statements and related disclosures.

In August 2014, the Financial Accounting Standards Board ("FASB") issued ASU 2014-15, *Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern* ("ASU 2014-15"), which provides guidance on determine when and how to disclose going-concern uncertainties in financial statements. The new standard requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued. An entity must provide certain disclosures if conditions or events raise substantial doubt about the entity's ability to continue as a going concern. ASU 2014-15 applies to all entities and is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The Company is currently evaluating the impact of this update on future disclosures concerning its liquidity position.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers* (Topic 606), ("ASU 2014-09"), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. In July 2015, the FASB voted to delay the effective date of this standard until the first quarter of 2018. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures and has not yet selected a transition method.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 3 – Property and Equipment

Property and equipment consists of the following:

	DECEMBER 31,	
	2015	2014
Medical equipment and facilities	\$83,267,000	\$82,151,000
Office equipment	721,000	721,000
Deposits and construction in progress	5,796,000	8,736,000
Deposits towards purchase of proton beam systems	5,000,000	5,000,000
	94,784,000	96,608,000
Accumulated depreciation	(47,661,000)	(46,572,000)
Net property and equipment	\$47,123,000	\$50,036,000

The Company has equipment that is secured under capitalized leases, which is included in Medical equipment and facilities, with a total cost of \$31,025,000 and associated accumulated depreciation of \$13,417,000 as of December 31, 2015 and a total cost of \$29,548,000 and associated accumulated depreciation of \$11,269,000 as of December 31, 2014. As of December 31, 2015, the Company has two idle Gamma Knife units with a cumulative net book value of \$1,500,000. The Company plans to trade these units in for new units or place these units at new sites.

As of December 31, 2015, the Company has \$5,796,000 in construction in progress. Approximately \$3,300,000 of this balance relates to the Company's unit in Peru which has been under construction and is expected to be installed at a new customer site in 2016. The remaining construction in progress consists of deposits on Gamma Knife units, capitalized and imputed interest, and other costs associated with on-going projects of the Company.

As of December 31, 2015, the Company has \$5,000,000 in deposits toward the purchase of three MEVION S250 proton beam radiation therapy ("PBRT") systems from Mevion. The Company has a commitment for the remaining balance for each system. The Company's first synchrocyclotron (a major component of the MEVION S250 system) was delivered to UF Health Cancer Center at Orlando Health in late 2014. During 2015, the MEVION S250 synchrocyclotron was installed and tested and it is expected that the first patient will be treated in the second quarter 2016. The Company's second and third PBRT units will not begin construction until the Company identifies

satisfactory placement sites. The Company has entered into a partnership agreement (LBE) with a radiation oncology physician group, which has contributed \$400,000 towards the deposits on the third machine. The Company reviews the carrying value of these deposits for impairment on a quarterly basis, or as events or circumstances might indicate that the carrying value may not be recoverable. The Company has reviewed the deposits, in light of available information, as of December 31, 2015 and has not identified any impairment. See Note 12-Commitments and Contingencies for additional discussion on purchase commitments.

Note 4 – Investment in Equity Securities

The Company has previously participated in several Mevion rounds of financing and has carried its investment at cost. The Company reviews this investment on a quarterly basis for impairment in light of the length of time and extent to which market value has been below cost, the financial condition and near term prospects of Mevion, current market conditions and events, and our ability and intent to retain our investment for a period sufficient to allow for an anticipated recovery in the market value, or as events or circumstances might indicate that the carrying value of the investment may be below its cost basis on an other-than-temporary impairment basis. The Company evaluated its common stock investment in Mevion of \$2,709,000, for impairment at December 31, 2014, and in light of available information, determined that impairment was not other-than temporary.

On July 27, 2015 Mevion cancelled its planned initial public offering (“IPO”) and subsequently announced on August 4, 2015 that it had entered into an investment agreement where up to \$200 million will be invested by HOPU Investments, YuanMing Capital and existing U.S. investors. Concurrent with this investment, Mevion and the lead investors intend to form a joint venture to produce, sell, and service proton therapy systems for the Chinese market. The Company’s investment in the common stock of Mevion represents an approximate 0.46% interest following this latest private placement transaction on a fully diluted basis.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 4 – Investment in Equity Securities (continued)

In light of the cancellation of Mevion's IPO, the Company reviewed its investment in Mevion for impairment. The company determined that its investment was other than temporarily impaired and recognized an impairment loss of \$2,114,000 at June 30, 2015. In determining the fair value of the Company's common stock in Mevion, the Company engaged a third party expert to review and corroborate its assessment of the fair value of the investment. The third party utilized the market approach and an option waterfall model calibrated to Mevion's last round of funding. Each equity class was examined and priced according to its liquidation preferences. Based on the third party analysis, an additional impairment loss of \$26,000 was recognized by the Company during the three months ended December 31, 2015. The fair value of the Company's investment in Mevion, as of December 31, 2015, is approximately \$579,000 with an impairment loss for the year then ended of \$2,140,000.

The \$2,140,000 other than temporary impairment of its investment in Mevion is recorded in other income (loss) on the Company's Condensed Consolidated Statement of Operations. This transaction is treated as a capital loss for tax purposes which may be deducted only to the extent the Company has capital gains. The Company is not aware of any event or transaction planned where the Company would generate a capital gain. Therefore, a full valuation allowance was recorded against the income tax benefit from the impairment loss, and the net impact to the income tax provision for the year ended December 31, 2015 was \$0.

The first MEVION S250, located at Barnes-Jewish Hospital in St. Louis, MO ("Barnes-Jewish Hospital"), treated its first patient on December 19, 2013. The second MEVION S250, located at the Ackerman Cancer Center in Jacksonville, Florida ("Ackerman Cancer Center"), treated its first patient in April 2015. The third MEVION S250, located at Robert Wood Johnson University Hospital in New Brunswick, New Jersey ("Robert Wood Johnson"), started in May 2015. The Company's first synchrocyclotron was delivered to UF Health Cancer Center at Orlando Health in November 2014 and is expected to begin treating patients in second quarter 2016.

Note 5 – Long-Term Debt

Long-term debt consists primarily of seven notes with financing companies collateralized by the Gamma Knife equipment having an aggregate net book value of \$8,597,000, the individual customer contracts and related accounts receivable at December 31, 2015. In addition, the loan to finance the Company's unit in Peru is guaranteed by GKF and collateralized by the Company's stock in the subsidiary, IGKP. These notes are payable in 12 to 84 fully amortizing monthly installments, mature between May 2016 and December 2020, and are collateralized by the

respective Gamma Knife units. The notes accrue interest at fixed annual rates between 3.95% and 10.01%.

Long term debt as of December 31, 2015 and 2014 also includes \$1,000,000 in promissory notes funded by four members of the Company's Board of Directors. The promissory notes were issued with common stock warrants. The fair value of the warrants was estimated at \$145,000 and were reported as capital contributed. As of December 31, 2015 the amount of the unamortized debt discount that is short and long term is \$48,000 and \$37,000, respectively. The promissory notes are reported net of the amount allocated to the warrants, or debt discount, which is amortized over the term of the obligation. See Note 13-Note, Warrant, & Common Stock Purchase Agreement for additional discussion on promissory notes and warrants with the Board.

As of December 31, 2014 long-term debt consisted of eight notes totaling \$9,724,000 and \$1,000,000 in promissory notes funded by four members of the Company's Board of Directors.

The following are contractual maturities of long-term debt by year at December 31, 2015:

Year ending December 31,	Principal	Interest
2016	\$2,674,000	\$585,000
2017	2,893,000	430,000
2018	1,823,000	191,000
2019	1,185,000	101,000
2020	593,000	45,000
Thereafter	429,000	14,000
	\$9,597,000	\$1,366,000

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 6 – Obligations Under Capital Leases

The Company has eleven capital lease obligations with four financing companies, collateralized by Gamma Knife equipment having an aggregate net book value of \$17,608,000, the individual customer contracts and related accounts receivable at December 31, 2015. These obligations have stated interest rates ranging between 5.00% and 10.36%, are payable in 36 to 89 monthly installments, and mature between June 2017 and June 2020. As of December 31, 2014, the Company had ten capital lease obligations with four finance companies with an aggregate net book value of \$18,279,000. At the end of each lease term, the Company has a bargain purchase option to purchase the equipment.

Future minimum lease payments, together with the present value of the net minimum lease payments under capital leases at December 31, 2015, are summarized as follows:

<u>Year ending December 31,</u>	Net Present Value of Minimum Lease Payments
2016	\$ 5,080,000
2017	4,621,000
2018	3,051,000
2019	1,739,000
2020	501,000
Thereafter	-
Total capital lease payments	14,992,000
Less imputed interest	1,471,000
	13,521,000
Less current portion	4,331,000
	\$ 9,190,000

Note 7 – Line of Credit

As of December 31, 2014 the Company had a \$9,000,000 renewable line of credit with a bank secured by a certificate of deposit. The line of credit had been in place since June 2004. The Company's earnings in 2013 were insufficient to satisfy the "profitability" covenant in the line of credit and the Company was not in compliance with the covenant until the bank waived this default on August 8, 2014 and agreed to change the maturity date of the facility to December 31,

2014. The line was paid-off using the proceeds from the certificate of deposit on January 2, 2015.

Borrowing under the line of credit was subject to interest expense at a rate equal to the bank's prime rate minus 0.5 percentage point, or alternatively at the Company's discretion, the LIBOR rate plus 1.0 percentage point. The weighted average interest rate on money borrowed against the line of credit during 2014 was 1.40%. As of December 31, 2014, there was \$8,780,000 borrowed against the line of credit.

Note 8 – Income Taxes

As of December 31, 2015, 2014 and 2013 the Company recorded income tax provision expense of \$434,000, \$129,000 and \$84,000, respectively. The increase in 2015 is due to income from operations of the Company's subsidiaries. The loss incurred on the write-down of the Company's investment in equity securities is a capital loss which is treated as non-deductible expense for income tax provision purposes and as such, a full valuation allowance was recorded against this loss and the net impact to the provision was \$0. The increase in 2014 compared to 2013 is due to income from operations of the Company's subsidiaries.

The components of the provision for income taxes as of December 31, 2015, 2014 and 2013 consist of the following:

	YEARS ENDED DECEMBER 31,		
	2015	2014	2013
Current:			
Federal	\$35,000	\$-	\$-
State	103,000	54,000	23,000
Foreign	-	-	-
Total current	138,000	54,000	23,000
Deferred:			
Federal	353,000	(131,000)	184,000
State	(57,000)	40,000	12,000
Foreign	-	166,000	(135,000)

	\$434,000	\$129,000	\$84,000

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 8 – Income Taxes (continued)

Significant components of the Company's deferred tax liabilities and assets as of December 31, 2015 and 2014 are as follows:

	DECEMBER 31,	
	2015	2014
Deferred tax liabilities:		
Property and equipment	\$(6,831,000)	\$(7,145,000)
Total deferred tax liabilities	(6,831,000)	(7,145,000)
Deferred tax assets:		
Net operating loss carryforwards	2,859,000	3,424,000
Accruals and allowances	172,000	173,000
Tax credits	356,000	319,000
Other – net	163,000	235,000
Capital loss carryover	1,217,000	437,000
Total deferred tax assets	4,767,000	4,588,000
Valuation allowance	(1,340,000)	(549,000)
Deferred tax assets net of valuation allowance	3,427,000	4,039,000
Net deferred tax liabilities	\$(3,404,000)	\$(3,106,000)

These amounts are presented in the financial statements as follows:

	DECEMBER 31,	
	2015	2014
Current deferred tax assets	\$-	\$367,000
Deferred income taxes (non-current)	(3,404,000)	(3,473,000)
	\$(3,404,000)	\$(3,106,000)

The provision for income taxes differs from the amount computed by applying the U.S. federal statutory tax rate (34% in 2015, 2014 and 2013) to income before taxes as follows:

	YEARS ENDED DECEMBER 31,		
	2015	2014	2013
Computed expected federal income tax	\$(360,000)	\$(280,000)	\$(92,000)
State income taxes, net of federal benefit	(55,000)	66,000	120,000
Non-deductible expenses	40,000	21,000	28,000
Change in valuation allowance	792,000	416,000	(68,000)
Other	17,000	(94,000)	96,000
	\$434,000	\$129,000	\$84,000

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 8 – Income Taxes (continued)

At December 31, 2015, the Company has a net operating loss carryforward for federal income tax return purposes of approximately \$7,872,000 which expire between 2021 and 2034. The Company has net operating loss carryforwards for state income tax purposes of approximately \$1,057,000 that begin to expire in 2017. The Company has net operating loss carryforwards for Peru and UK income tax purposes of approximately \$453,000 that begin to expire in 2017.

At December 31, 2015, the Company has a capital loss carryforward for federal income tax return purposes of approximately \$1,176,000 which starts to expire in 2018. The Company has capital loss carryforwards for state income tax purposes of approximately \$150,000 which expires in 2018.

The Company's ability to utilize its net operating loss carryforwards and other deferred tax assets may be limited in the event of a 50% or more ownership change within any three-year period.

The tax return years 2011 through 2015 remain open to examination by the major domestic taxing jurisdictions to which the Company is subject. Net operating losses generated on a tax return basis by the Company for calendar years 1999 through 2004, 2009, 2010, 2012, 2014, and 2015 remain open to examination by the major domestic taxing jurisdictions.

Due to uncertainty surrounding the realization of impairment losses, capital losses and foreign operating losses in future years, the Company has placed a valuation allowance against a portion of its net domestic and foreign deferred tax assets. The net valuation allowance increased by \$792,000, increased by \$416,000, and decreased by \$68,000 for the tax years ended December 31, 2015, 2014, and 2013, respectively.

The Company has adopted accounting standards which prescribe a recognition threshold and measurement attribute for the financial statement recognition and measurement of uncertain tax positions taken or expected to be taken in a company's income tax return, and also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. Additionally, these accounting standards specify that tax positions for which the timing of the ultimate resolution is uncertain should be recognized as long-term liabilities. The Company has made no reclassifications between current taxes payable and long term taxes payable under this

guidance. Also, the Company had no amounts of unrecognized tax benefits that, if recognized, would affect its effective income tax rate for the years ended December 31, 2015, 2014 and 2013.

The Company's policy for deducting interest and penalties is to treat interest as interest expense and penalties as taxes. As of December 31, 2015, the Company had no amount accrued for the payment of interest and penalties related to unrecognized tax benefits.

Notes to Consolidated Financial Statements**

Note 9 – Shareholders’ Equity

Incentive Compensation Plan

In June 2010 shareholders approved an amendment and restatement of the Company’s stock incentive plan, renaming it the Incentive Compensation Plan (the “Plan”), and among other things, increasing the number of shares of the Company’s common stock reserved for issuance under the Plan to 1,630,000. The Plan provides that the shares reserved under the Plan are available for issuance to officers of the Company, other key employees, non-employee directors, and advisors. The Plan is a successor to the Company’s previous plans, and any shares awarded and outstanding under those plans were transferred to the Plan. No further grants or share issuances will be made under the previous plans. On June 16, 2015, the Company’s shareholders approved an amendment and restatement of the Plan in order to extend the term of the Plan by two years. As of December 31, 2015, approximately 734,000 shares remain available for grant under the Plan.

The Plan provides for nonqualified stock options, qualified (or incentive) stock options and stock grants. The Plan has a provision to reduce the number of shares reserved for award and issuance under the Plan by a ratio of 1.59 shares of common stock for each share of common stock that is issued pursuant to a Full Value Award (stock grant).

The Plan also provides for an Incentive Bonus Program with incentive bonus opportunities through performance unit awards and special cash incentive programs tied to the attainment of pre-established performance milestones.

Provisions of the Plan include an automatic annual grant to each non-employee director of options to purchase up to 2,000 shares on the date of the Company’s Annual Shareholder Meeting, at an exercise price equal to the market price of the Company’s common shares on that date, an automatic annual grant of 500 restricted stock units of the Company’s common shares and an annual cash retainer fee for Board or Board Committee service, which may be converted to restricted stock unit awards. Options and restricted stock units awarded under the automatic annual grant program for non-employee directors vest after one year. Restricted stock units awarded in lieu of retainer fees vest quarterly, over a one year period. These awards become outstanding upon the conclusion of the individual Board members service on the Company’s Board of Directors. Other options may vest fully and immediately, or over periods of time as determined by the Plan Administrator, but no longer than seven years from the grant date. Discretionary options currently awarded under the Plan vest over a period of 5 years.

Under the Plan, a total of 179,000 restricted stock units have been granted, consisting of 26,000 of annual automatic grants to non-employee directors and the corporate secretary, 143,000 of deferred retainer fees to non-employee members of the Board, and 10,000 grants issued in lieu of commission, to one employee of the Company. Of the total restricted stock units granted under the Plan 176,000 of them are fully vested but not yet deemed issued and outstanding as of December 31, 2015. The Company granted 3,000 shares of restricted stock and 28,000 shares of restricted stock in lieu of retainer fees in 2015 with a fair value of \$2.90 per share. For the year ended December 31, 2015, total compensation expense recorded in the consolidated statements of operations related to restricted stock units in lieu of retainer fees was \$80,000. For the year ended December 31, 2015, total compensation expense recorded in the consolidated statements of income for annual restricted stock units awarded was \$8,000, with an offsetting tax benefit of \$3,000, as this expense is deductible for income tax purposes. As of December 31, 2015, there was \$4,000 of total unrecognized compensation cost related to annual restricted stock units which is expected to be recognized over a period of .5 years. During 2015, 2014, and 2013 shares of restricted stock units totaling 3,000 each year, with a fair value of approximately \$7,000, \$6,000 and \$9,000, respectively, vested and became unrestricted.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 9 – Shareholders’ Equity (continued)

Changes in stock options outstanding under the Incentive Compensation Plans during 2015 are as follows :

Options	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance at December 31, 2014	659,000	\$ 3.13	5.57	
Granted	20,000	\$ 2.48		
Exercised	(2,000)	\$ 2.30		
Forfeited	(63,000)	\$ 5.54		
Balance at December 31, 2015	614,000	\$ 2.86	5.10	\$ -
Exercisable at December 31, 2015	82,000	\$ 2.74	2.74	\$ -

The weighted average grant-date fair value of the options granted during the years 2015, 2014 and 2013 was \$1.15, \$1.23, and \$1.28 respectively. There was no total intrinsic value of options exercised during any of the years ended December 31, 2014 and 2013 and 2012.

There was no cash received from options exercised under any share-based payment arrangements for the years ended December 31, 2015, 2014 and 2013, and as a result, there was no actual tax benefit realized for tax deductions from option exercises in any of those years.

Total stock-based compensation expense recognized for stock options for the years ended December 2015, 2014, and 2013 was \$138,000, \$51,000, and \$88,000, respectively.

A summary of the status of the Company’s non-vested stock options as of December 31, 2015, and changes during the year ended December 31, 2015 is presented below:

Edgar Filing: AMERICAN SHARED HOSPITAL SERVICES - Form 10-K

Nonvested Options	Number of Options	Weighted Average Grant-Date Fair Value
Nonvested at December 31, 2014	536,000	\$ 1.23
Granted	20,000	\$ 1.15
Vested	(15,000)	\$ 1.10
Forfeited	(9,000)	\$ 1.23
Nonvested at December 31, 2015	532,000	\$ 1.18

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 9 – Shareholders’ Equity (continued)

At December 31, 2015, there was approximately \$479,000 of unrecognized compensation cost related to non-vested share-based compensation arrangements granted under the Plan. This cost is expected to be recognized over a period of approximately four years.

The Company’s stock-based awards to employees are calculated using the Black-Scholes options valuation model. The Black-Scholes model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, the Black-Scholes model requires the input of highly subjective assumptions including the expected stock price volatility. The Company’s stock-based awards have characteristics significantly different from those of traded options, and changes in the subjective input assumptions can materially affect the present value estimates. For these reasons, management believes that the existing models do not necessarily provide a reliable single measure of the fair value of its stock-based awards to employees.

The fair value of the Company’s option grants issued during 2015, 2014 and 2013 were estimated using assumptions for expected life, volatility, dividend yield, forfeiture rate, and risk-free interest rate which are specific to each award as summarized in the following table. The estimated fair value of the Company’s options is amortized over the period during which the optionee is required to provide service in exchange for the award, usually the vesting period.

The fair value of the Company’s option grants under the Plan in 2015, 2014 and 2013 was estimated using the following assumptions:

	2015	2014	2013	
Expected life (years)	7.0	7.0	7.0	
Expected forfeiture rate	0.0 %	0.0 %	0.0	%
Expected volatility	41 %	40 %	49	%
Dividend yield	0 %	0 %	0	%
Risk-free interest rate	2.0 %	2.0 %	2.6 - 3.0	%

Repurchase of Common Stock, Common Stock Warrants and Stock Options

In 1999 and 2001, the Board of Directors approved resolutions authorizing the Company to repurchase up to a total of 1,000,000 shares of its own stock on the open market, which the Board reaffirmed in 2008. There were no shares of the Company repurchased during 2015. During 2014, the Company repurchased approximately 1,000 shares of its stock on the open market. There were no shares of the Company repurchased during 2013. There are approximately 72,000 shares remaining under this repurchase authorization.

Note 10 – Retirement Plan

The Company has a defined-contribution retirement plan (the “Retirement Plan”) that allows for a matching safe harbor contribution. For 2015, the Board of Directors elected to match participant deferred salary contributions up to a maximum of 4% of the participant’s annual compensation. Discretionary profit sharing contributions are allowed under the Retirement Plan in years that the Board does not elect a safe harbor match. The Company has accrued approximately \$27,000 for the estimated safe harbor matching contribution for the year ended December 31, 2015. The Company contributed \$39,000 and \$41,000 to the Retirement Plan for the safe harbor match for the years ended December 31, 2014 and December 31, 2013, respectively.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 11 – Operating Leases

The Company leases office space and equipment under operating leases expiring at various dates through 2016 and 2018. The Company is in the process of procuring new office space and there will be future rent expense associated with this space. Future minimum payments under non-cancelable operating leases, net of expected sublease income, having initial terms of more than one year consisted of the following:

Year ending December 31,

2016	\$96,000
2017	30,000
2018	32,000
Thereafter	-
	\$158,000

Payments for repair and maintenance agreements incorporated in operating lease agreements are not included in the future minimum operating lease payments shown above.

Net rent expense was \$295,000, \$301,000, and \$549,000 for the years ended December 31, 2015, 2014 and 2013, respectively, and includes the above operating leases as well as month-to-month rental and certain executory costs. Total rent expense was recognized net of sublease income of \$191,000, \$173,000, and \$116,000 for the years ended December 31, 2015, 2014 and 2013. In 2013, the Company subleased a portion of its existing office space through the remainder of its lease term at a rate lower than its lease rate, resulting in a cumulative loss of \$115,000. This loss will be amortized against total rent expense over the term of the sublease and it is included in total rent expense for 2015.

Note 12 – Commitments and Contingencies

As of December 31, 2015, the Company has commitments to purchase three MEVION S250 PBRT systems for \$34,200,000. The Company has \$5,000,000 in non-refundable deposits toward the purchase of these three PBRT systems from Mevion. The non-refundable deposits are recorded in the Consolidated Balance Sheets as deposits and construction in progress. The Company's first synchrocyclotron was delivered to UF Health Cancer Center at Orlando

Health in late 2014. During 2015, the synchrocyclotron was installed and tested and it is expected that the first patient will be treated in second quarter 2016. The Company's second and third PBRT units will not begin construction until the Company identifies satisfactory placement sites. There is a cash payment of approximately \$6,700,000 due in January 2016 for the first PBRT system. In January 2016, the Company secured lease financing of approximately \$8,400,000 and payment of \$6,700,000 was remitted to Mevion. The financing company also reimbursed the Company approximately \$1,100,000 in previously remitted progress payments to Mevion and freight costs. An additional payment of approximately \$600,000 is due to Mevion in two installments during 2016 which will be paid using the remaining proceeds from the January 2016 lease financing.

The remaining two PBRT projects do not have anticipated delivery dates. The timing of progress payments for PBRT contracts two and three are dependent upon future events and the Company has some flexibility to delay the due dates of these commitments. Approximately \$25,800,000 of these commitments are not expected to start becoming due until 2017 or later and the Company is in discussions with lenders to finance the remaining two proton systems. There are no cash requirements for these commitments in the next 12 months.

As of December 31, 2015, the Company has commitments to purchase one Gamma Knife Perfexion system, one Cobalt-60 reload, and is scheduled to install one Gamma Knife Model 4C system, which the Company previously financed and owns. Total Gamma Knife commitments as of December 31, 2015 are \$3,650,000. The Model 4C unit is scheduled to be installed in mid-2016 at the Company's new customer site in Peru. There are cash requirements for the Peru commitment in the next 12 months of approximately \$600,000. The Company believes that cash flow from cash on hand and operations will be sufficient to cover this payment. The Perfexion unit is for a site yet to be determined and it is the Company's intent to finance this unit. The Cobalt-60 reload is for an existing site and it is the Company's intent to finance this reload. There can be no assurance that financing will be available for the Company's current or future projects, or at terms that are acceptable to the Company.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 12 – Commitments and Contingencies (continued)

The Company estimates the following commitments for each of the equipment systems, with expected timing of payments as follows as of December 31, 2015:

	2016	Thereafter	Total
Proton Beam Unit	\$8,400,000	\$25,800,000	\$34,200,000
Gamma Knife Units	3,650,000	-	3,650,000
Total Commitments	\$12,050,000	\$25,800,000	\$37,850,000

Note 13 – Note, Warrant, & Common Stock Purchase Agreement

The Company entered into a common stock purchase agreement (the “Purchase Agreement”) with three members of the Company’s Board of Directors, to sell, in a private offering, an aggregate of 650,000 shares of the Company’s common stock, no par value, for gross proceeds of approximately \$1,600,000. The private offering closed on June 12, 2014. The Shares are restricted securities and may not be offered or sold absent registration under the Securities Act of 1933. Pursuant to the terms of the Purchase Agreement, the Company has agreed to provide demand registration rights with respect to the Shares, with certain limited exceptions. The Company filed its Form S-3 registration statement on May 29, 2015. Pursuant to the terms of the Purchase Agreement, the Company has also granted the Investors a one-year preemptive right to participate pro rata in future issuances of the Company’s common stock.

In October 2014, the Company entered into a Note and Warrant Purchase Agreement (the “Note and Warrant Purchase Agreement”) with four members of the Company’s Board of Directors to issue an aggregate of \$1,000,000 in principal amount of promissory notes (the “Notes”) and warrants (the “Warrants”) to purchase an aggregate of 200,000 shares of the common stock, no par value (the “Common Stock”), of the Company (the “Notes and Warrants Offering”). The Notes will bear interest at a rate of 15.0% per annum and mature October 22, 2017. Interest only payments are due monthly with the option to prepay the outstanding principal on or after December 31, 2015. The Company is required to prepay the outstanding principal within five days of the next milestone payment to Mevion, if that occurs before the maturity date. The Warrants expire three years after their initial issuance date and may be exercised for a purchase price equal to \$2.20 per share of Common Stock, the closing price per share of the Company’s Common Stock on the New York Stock Exchange MKT on the date preceding the date of the Note and Warrant Purchase Agreement. The Company,

upon funding of its milestone payment to Mevion, paid-off the Notes in February 2016.

Concurrently with the Note and Warrant Purchase Agreement, the Company entered into a common stock purchase agreement (the “Common Stock Purchase Agreement”) with one member of the Company’s Board of Directors to sell, in a private offering, 100,000 shares of the Company’s Common Stock (the “Private Placement Shares”), for gross proceeds of \$220,000 (the “Common Stock Offering” and, together with the Notes and Warrants Offering, the “Private Offering”). The Common Stock Purchase Agreement contains terms and conditions that are customary for a transaction of this type.

The Company received gross proceeds of \$1,220,000 in the Private Offering, which were used, together with cash on hand, to make two payments of \$1,000,000 each to Mevion as deposits pursuant to the terms of purchase commitments with Mevion.

Note 14 –Related Party Transactions

The Company’s Gamma Knife and IGRT businesses in Turkey were operated through EWRS Turkey. GKF owned indirectly 70% of EWRS Turkey, through its 70% ownership of EWRS LLC. The remaining 30% ownership of EWRS LLC was held by EMKA LLC (“EMKA”). EMKA is owned and operated by Mert Ozyurek (“Mr. Ozyurek”) who also sits on the Board of Directors of the Company. Mr. Ozyurek operates a foreign company called Ozyurek A.S. Prior to the sale of EWRS Turkey in 2014, the Company purchased its two Gamma Knife units from Ozyurek A.S. and had contracts for service and maintenance on the machines. In addition, the Company reimbursed EMKA its share of marketing fees in its attempt to achieve the earn-out from the sale of EWRS Turkey. The Company believes all its transactions with Mr. Ozyurek were arm’s-length transactions.

American Shared Hospital Services
Notes to Consolidated Financial Statements

Note 14 – Significant Related Party Transactions (continued)

The Company's Gamma Knife business is operated through its 81% indirect interest in its GKF subsidiary. The remaining 19% of GKF is owned by a wholly owned U.S. subsidiary of Elekta, which is the manufacturer of the Gamma Knife. Since the Company purchases its Gamma Knife units from Elekta, there are significant related party transactions with Elekta such as equipment purchases, commitments to purchase equipment, deposits for such equipment purchases, and costs to maintain the equipment. The Company believes that all its transactions with Elekta are arm's-length transactions. At December 31, 2015, the Company had commitments to purchase one Gamma Knife Perfexion system and one Cobalt-60 reload from Elekta, as discussed in Note 12 – Commitments and Contingencies.

The Company entered into a Purchase Agreement in 2014 to sell 650,000 shares of the Company's common stock for proceeds of approximately \$1,600,000 with three members of the Company's Board of Directors. Also in 2014, the Company entered into a Note and Warrant Purchase Agreement with four members of the Company's Board of Directors to issue \$1,000,000 in principal amount of Notes and Warrants to purchase 200,000 shares of the Company's common stock. Concurrently with the Note and Warrant Purchase Agreement, the Company entered into Common Stock Purchase Agreement with one member of the Company's Board of Directors to sell 100,000 shares of the Company's Common Stock for \$220,000. The Company believes all its transactions with the members of the Company's Board of Directors were arm's-length transactions. See Note 13 – Note, Warrant, & Common Stock Purchase Agreement for additional information.

The Company has a common stock investment in Mevion which is recorded on the balance sheet as of December 31, 2015 at its fair value of approximately \$579,000. In addition to the equity interest, the Company has purchased one MEVION S250 PBRT machine from Mevion, and has \$2,000,000 in non-refundable deposits towards the purchase of two additional MEVION S250 machines. The Company believes all of its transactions with Mevion were arm's-length transactions. See Note 4 – Investment in Equity Securities for additional information.

Note 15 – Major Customers

The Company's revenue was provided by seventeen customers in 2015, twenty customers in 2014 and nineteen customers in 2013. In 2015, one customer accounted for more than 10% of total revenue. In 2014 no one customer accounted for more than 10% of revenue. In 2013, two customers each accounted for approximately 10% of total revenue. At December 31, 2015 and 2014, three customers each accounted for more than 10% of total accounts receivable.

Note 16 – Subsequent Events

On January 14, 2016 the Company entered into a definitive lease agreement for financing of its MEVION S250 at UF Health Cancer Center at Orlando Health. The proceeds of this financing of approximately \$8,400,000 were used to pay down the \$1,000,000 Note with four members of the Company's Board of Directors, reimburse the Company for freight costs associated with the MEVION S250, and to fund one of the remaining milestone payments of approximately \$6,700,000. An additional payment of approximately \$600,000 is due to Mevion in 2016 which will be paid using the remaining proceeds from the lease financing – See Note 12, Commitments and Contingencies and Note 13, Note Warrant, & Common Stock Purchase Agreement. The customer contract, ownership interest in Orlando, and receivables of the MEVION S250 are pledged as collateral for the lease agreement. The lease agreement is guaranteed by the Company and there are certain restrictions on cash distributions from Orlando to the Company.
