UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2017

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)

OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 0-50765

VILLAGE BANK AND TRUST FINANCIAL CORP.

(Exact name of registrant as specified in its charter)

Virginia
(State or other jurisdiction of
incorporation or organization)

16-1694602
(I.R.S. Employer
Identification No.)

13319 Midlothian Turnpike, Midlothian, Virginia 23113

(Address of principal executive offices) (Zip code)

804-897-3900

(Registrant's telephone number, including area code)

Indicate by check whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer
Non-Accelerated Filer (Do not check if smaller reporting company) Smaller Reporting Company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date.

1,430,854 shares of common stock, \$4.00 par value, outstanding as of October 31, 2017

Village Bank and Trust Financial Corp. and Subsidiary

Notes to Consolidated Financial Statements

Three and Nine Months Ended September 30, 2017 and 2016

(Unaudited)

Note 1 – Principles of presentation

Village Bank and Trust Financial Corp. (the “Company”) is the holding company of Village Bank (the “Bank”). The consolidated financial statements include the accounts of the Company, the Bank and the Bank’s subsidiary. All material intercompany balances and transactions have been eliminated in consolidation.

In the opinion of management, the accompanying condensed consolidated financial statements of the Company have been prepared on the accrual basis in accordance with generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. However, all adjustments that are, in the opinion of management, necessary for a fair presentation have been included. The results of operations for the nine month period ended September 30, 2017 is not necessarily indicative of the results to be expected for the full year ending December 31, 2017. The unaudited interim financial statements should be read in conjunction with the audited financial statements and notes to financial statements that are presented in the Company’s Annual Report on Form 10-K for the year ended December 31, 2016 as filed with the Securities and Exchange Commission (“SEC”).

The Company has evaluated events and transactions occurring subsequent to the consolidated balance sheet date of September 30, 2017 for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

Note 2 – Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the balance sheets and statements of operations for the period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant change include the determination of the allowance for loan losses and its related

provision, the valuation allowance on the deferred tax asset, and the estimate of the fair value of assets held for sale.

Note 3 – Earnings per common share

The following table presents the basic and diluted earnings per common share computation (in thousands, except per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Numerator				
Net income - basic and diluted	\$ 273	\$ 11,932	\$ 926	\$ 12,993
Preferred stock dividend	(113)	(186)	(385)	(547)
Net income available to common shareholders	\$ 160	\$ 11,746	\$ 541	\$ 12,446
Denominator				
Weighted average shares outstanding - basic	1,431	1,430	1,430	1,423
Dilutive effect of common stock options and restricted stock awards	-	-	-	-
Weighted average shares outstanding - diluted	1,431	1,430	1,430	1,423
Earnings per share - basic	\$ 0.11	\$ 8.21	\$ 0.38	\$ 8.74
Earnings per share - diluted	\$ 0.11	\$ 8.21	\$ 0.38	\$ 8.74

Outstanding options and warrants to purchase common stock were considered in the computation of diluted earnings per share for the periods presented. Stock options for 2,337 shares were not included in computing diluted earnings per share for the three and nine months ended September 30, 2017, and stock options for 2,587 and 1,742 were not included in computed diluted earnings per share for the three and nine months ended September 30, 2016, because their effects were anti-dilutive.

Note 4 – Investment securities available for sale

At September 30, 2017 and December 31, 2016, all of our securities were classified as available for sale. The following table presents the composition of our investment portfolio at the dates indicated (dollars in thousands):

	Par Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Average Yield	
September 30, 2017							
US Government Agencies							
One to five years	\$27,400	\$ 27,558	\$ -	\$ (150)	\$ 27,408	1.29	%
Five to ten years	2,000	2,049	-	(4)	2,045	2.00	%
More than ten years	2,548	2,553	-	(15)	2,538	1.78	%
	31,948	32,160	-	(169)	31,991	1.37	%
Mortgage-backed securities							
One to five years	3,595	3,673	-	(12)	3,661	1.44	%
More than ten years	6,967	6,864	1	(8)	6,857	2.41	%
	10,562	10,537	1	(20)	10,518	2.08	%
Corporate debt							
Five to ten years	2,300	2,323	2	-	2,325	5.42	%
Total investment securities	\$44,810	\$ 45,020	\$ 3	\$ (189)	\$ 44,834	1.75	%
December 31, 2016							
US Government Agencies							
One to five years	\$29,400	\$ 29,607	\$ -	\$ (213)	\$ 29,394	1.25	%
More than ten years	2,862	2,868	-	(16)	2,852	1.08	%
	32,262	32,475	-	(229)	32,246	1.24	%
Mortgage-backed securities							
One to five years	3,457	3,524	-	(33)	3,491	1.78	%
More than ten years	8,253	8,170	1	(14)	8,157	2.16	%
	11,710	11,694	1	(47)	11,648	2.05	%
Total investment securities	\$43,972	\$ 44,169	\$ 1	\$ (276)	\$ 43,894	1.45	%

There were no investment securities pledged to secure deposit repurchase agreements at September 30, 2017 and approximately \$1,050,000 at December 31, 2016.

Gross realized gains and losses pertaining to available for sale securities are detailed as follows for the periods indicated (dollars in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2017	2016	2017	2016
Gross realized gains	\$ -	\$ 15	\$ -	\$ 162
Gross realized losses	-	-	(9)	-
	\$ -	\$ 15	\$ (9)	\$ 162

The Company sold approximately \$2 million of investment securities available for sale at a loss of \$9,000 for the nine months ended September 30, 2017. The Company sold approximately \$4 million and \$22 million of investment securities for the three and nine months ended September 30, 2016 resulting in a net gain of \$15,000 and \$162,000, respectively. The sale of these securities, which had fixed interest rates, allowed the Company to decrease its exposure to the anticipated upward movement in interest rates that would result in unrealized losses being recognized in shareholders' equity.

Investment securities available for sale that have an unrealized loss position at September 30, 2017 and December 31, 2016 are detailed below (dollars in thousands):

	Securities in a loss position for less than 12 Months		Securities in a loss position for more than 12 Months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
September 30, 2017						
US Government Agencies	\$ 19,511	\$ (95)	\$ 12,480	\$ (74)	\$ 31,991	\$ (169)
Mortgage-backed securities	7,800	(15)	587	(5)	8,387	(20)
	\$ 27,311	\$ (110)	\$ 13,067	\$ (79)	\$ 40,378	\$ (189)
December 31, 2016						
US Government Agencies	\$ 27,291	\$ (213)	\$ 2,852	\$ (16)	\$ 33,143	\$ (229)
Mortgage-backed securities	9,450	(47)	-	-	9,450	(47)
	\$ 36,741	\$ (260)	\$ 2,852	\$ (16)	\$ 42,593	\$ (276)

All of the unrealized losses are attributable to increases in interest rates and not to credit deterioration. Currently, the Company believes that it is probable that the Company will be able to collect all amounts due according to the contractual terms of the investments. Because the decline in market value is attributable to changes in interest rates and not to credit quality, and because it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, the Company does not consider these investments to be other than temporarily impaired at September 30, 2017.

Note 5 – Loans and allowance for loan losses

The following table presents the composition of our loan portfolio (excluding mortgage loans held for sale) at the dates indicated (dollars in thousands):

	September 30, 2017		December 31, 2016	
	Amount	%	Amount	%
Construction and land development				
Residential	\$ 6,327	1.82 %	\$ 6,770	2.01 %
Commercial	28,721	8.28 %	27,092	8.04 %
	35,048	10.10 %	33,862	10.05 %
Commercial real estate				
Owner occupied	71,834	20.70 %	66,021	19.59 %
Non-owner occupied	61,831	17.82 %	57,944	17.19 %

Deferred loan cost, net	676		660	
Less: allowance for loan losses	(3,243)		(3,373)	
	\$ 344,435		\$ 334,387	

The Bank purchased portfolios of rehabilitated student loans guaranteed by the Department of Education (“DOE”). The guarantee covers approximately 98% of principal and accrued interest. The loans are serviced by a third-party servicer that specializes in handling the special needs of the DOE student loan programs.

Loans pledged as collateral with the Federal Home Loan Bank of Atlanta (“FHLB”) as part of their lending arrangement with the Company totaled \$25,111,000 and \$27,073,000 at September 30, 2017 and December 31, 2016, respectively.

The Company assigns risk rating classifications to its loans. These risk ratings are divided into the following groups:

Risk rated 1 to 4 loans are considered of sufficient quality to preclude an adverse rating. These assets generally are well protected by the current net worth and paying capacity of the obligor or by the value of the asset or underlying collateral;

- Risk rated 5 loans are defined as having potential weaknesses that deserve management's close attention;
- Risk rated 6 loans are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any;
- Risk rated 7 loans have all the weaknesses inherent in substandard loans, with the added characteristics that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable; and

·Loans rated 6 or 7 are considered “Classified” loans for regulatory classification purposes.

The following tables provide information on the risk rating of loans at the dates indicated (dollars in thousands):

	Risk Rated 1-4	Risk Rated 5	Risk Rated 6	Risk Rated 7	Total Loans

Loans greater than 90 days past due are student loans that are guaranteed by the DOE which covers approximately 98% of the principal and interest. Accordingly, these loans will not be placed on nonaccrual status.

Loans are considered impaired when, based on current information and events it is probable the Company will be unable to collect all amounts due in accordance with the original contractual terms of the loan agreement, including scheduled principal and interest payments. Loans evaluated individually for impairment include non-performing loans, such as loans on non-accrual, loans past due by 90 days or more, restructured loans and other loans selected by management. The evaluations are based upon discounted expected cash flows or collateral valuations. If the evaluation shows that a loan is individually impaired, then a specific reserve is established for the amount of impairment. Impairment is evaluated in total for smaller-balance loans of a similar nature and on an individual loan basis for other loans. If a loan is impaired, a specific valuation allowance is allocated, if necessary, so that the loan is reported net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Interest payments on impaired loans are typically applied to principal unless collectability of the principal amount is reasonably assured, in which case interest is recognized on a cash basis. Impaired loans, or portions thereof, are charged off when deemed uncollectible. Impaired loans are set forth in the following table as of the dates indicated (in thousands):

Included in impaired loans are loans classified as troubled debt restructurings (“TDRs”). A modification of a loan’s terms constitutes a TDR if the creditor grants a concession to the borrower for economic or legal reasons related to the borrower’s financial difficulties that it would not otherwise consider. For loans classified as impaired TDRs, the Company further evaluates the loans as performing or nonaccrual. To restore a nonaccrual loan that has been formally restructured in a TDR to accrual status, we perform a current, well documented credit analysis supporting a return to accrual status based on the borrower’s financial condition and prospects for repayment under the revised terms. Otherwise, the TDR must remain in nonaccrual status. The analysis considers the borrower’s sustained historical repayment performance for a reasonable period to the return-to-accrual date, but may take into account payments made for a reasonable period prior to the restructuring if the payments are consistent with the modified terms. A sustained period of repayment performance generally would be a minimum of six months and would involve payments in the form of cash or cash equivalents.

An accruing loan that is modified in a TDR can remain in accrual status if, based on a current well-documented credit analysis, collection of principal and interest in accordance with the modified terms is reasonably assured, and the borrower has demonstrated sustained historical repayment performance for a reasonable period before modification. The following is a summary of performing and nonaccrual TDRs and the related specific valuation allowance by portfolio segment for the periods indicated (dollars in thousands).

The allowance for loan losses at each of the periods presented includes an amount that could not be identified to individual types of loans referred to as the unallocated portion of the allowance. We recognize the inherent imprecision in estimates of losses due to various uncertainties and variability related to the factors used, and therefore a reasonable range around the estimate of losses is derived and used to ascertain whether the allowance is too high. We concluded that the unallocated portion of the allowance was acceptable given the continued higher level of classified assets and was within a reasonable range around the estimate of losses. The allowance for loan losses included an unallocated portion of approximately \$728,000, \$713,000, and \$603,000 at September 30, 2017, December 31, 2016, and September 30, 2016, respectively.

Discussion of the provision for (recovery of) loan losses related to specific loan types are provided following:

The recovery of loan losses totaling \$102,000 for the consumer real estate portfolio for the three months ended September 30, 2017 was attributed to a decline in the general component of the allowance for loan losses as a result of a decrease in the historical loss experience from 0.16% as of June 30, 2017 to 0.13% as of September 30, 2017.

The provision for loan losses totaling \$140,000 for the commercial and industrial loans (except those secured by real estate) for the three months ended September 30, 2017 was attributed to an increase of \$172,000 in the specific reserve associated with loans evaluated individually for impairment.

The recovery of loan losses totaling \$131,000 for the construction and land development portfolio for the nine months ended September 30, 2017 was attributed to a decline in the general component of the allowance for loan losses as a result of a decrease in the historical loss experience from 0.38% as of December 31, 2016 to 0.01% as of September 30, 2017.

The recovery of loan losses totaling \$89,000, \$730,000 and \$571,000 for the commercial real estate portfolio for the nine months ended September 30, 2017, year ended December 31, 2016, and nine months ended September 30, 2016, respectively, was attributable to a decline in the general component of the allowance for loan losses as a result of decreases in the historical loss experience from 0.20% as of September 30, 2016 to a net recovery of 0.04% as of September 30, 2017. In addition, the portfolio was in a net-recovery position of \$13,000 and \$111,000 for the nine months ended September 30, 2017 and year ended December 31, 2016, respectively.

The recovery of loan losses totaling \$55,000 for the consumer real estate portfolio for the nine months ended September 30, 2017 was attributed to a decrease of \$104,000 in the specific reserve associated with loans evaluated individually for impairment. This decrease was offset by an increase in the general component allocated to this portfolio as a result of increases in the historical loss experience from 0.0022% as of year end December 31, 2016 to 0.13% for the nine months ended September 30, 2017. In addition, the portfolio was in a net charge-off position of \$48,000 for the nine months ended September 30, 2017.

The recovery of loan losses totaling \$146,000 and \$131,000 for the consumer real estate portfolio for the year ended December 31, 2016 and nine months ended September 30, 2016, respectively, was attributable to a decline in the general component of the allowance for loan losses as a result of decreases in the historical loss experience from 0.07% as of September 30, 2016 to 0.0022% as of December 31, 2016. In addition, the portfolio was in a net-charge off position of \$161,000 and \$176,000 for the year ended December 31, 2016 and the nine months ended September 30, 2016.

The provision for loan losses totaling \$209,000 for the commercial and industrial loans (except those secured by real estate) for the nine months ended September 30, 2017 was attributed to an increase of \$227,000 in the specific reserve associated with loans evaluated individually for impairment.

Loans were evaluated for impairment as follows for the periods indicated (dollars in thousands):

	\$ 407,404	\$ 383,277

Note 7 – Trust preferred securities

During the first quarter of 2005, Southern Community Financial Capital Trust I, a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable securities. On February 24, 2005, \$5.2 million of Trust Preferred Capital Notes were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest (three-month LIBOR plus 2.15%) which adjusts, and is payable, quarterly. The interest rate at September 30, 2017 was 3.47%. The securities were redeemable at par beginning on March 15, 2010 and each quarter after such date until the securities mature on March 15, 2035. No amounts have been redeemed at September 30, 2017 and there are no plans to do so. The principal asset of the Trust is \$5.2 million of the Company's junior subordinated debt securities with like maturities and like interest rates to the Trust Preferred Capital Notes.

During the third quarter of 2007, Village Financial Statutory Trust II, a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable securities. On September 20, 2007, \$3.6 million of Trust Preferred Capital Notes were issued through a pooled underwriting. The securities have LIBOR-indexed floating rate of interest (three-month LIBOR plus 1.4%) which adjusts, and is also payable, quarterly. The interest rate at September 30, 2017 was 2.72%. The securities may be redeemed at par at any time commencing in December 2012 until the securities mature in 2037. No amounts have been redeemed at September 30, 2017 and there are no plans to do so. The principal asset of the Trust is \$3.6 million of the Company's junior subordinated debt securities with like maturities and like interest rates to the Trust Preferred Capital Notes.

The Trust Preferred Capital Notes may be included in Tier 1 capital for regulatory capital adequacy determination purposes up to 25% of Tier 1 capital after its inclusion. The portion of the Trust Preferred Capital Notes not considered as Tier 1 capital may be included in Tier 2 capital.

The obligations of the Company with respect to the issuance of the Trust Preferred Capital Notes constitute a full and unconditional guarantee by the Company of the Trust's obligations with respect to the Trust Preferred Capital Notes. Subject to certain exceptions and limitations, the Company may elect from time to time to defer interest payments on the junior subordinated debt securities, which would result in a deferral of distribution payments on the related Trust Preferred Capital Notes and require a deferral of common dividends. The Company is current on these interest payments.

Note 8 – Stock incentive plan

The Village Bank and Trust Financial Corp. Incentive Plan, which was adopted on February 28, 2006, authorized the issuance of up to 48,750 shares of common stock (after the reverse stock split) (the “2006 Plan”). On May 26, 2015, the Company’s shareholders approved the adoption of the Village Bank and Trust Financial Corp. 2015 Stock Incentive Plan (the “2015 Plan”) authorizing the issuance of up to 60,000 shares of common stock. The 2015 Plan was adopted to replace the 2006 Plan and any new awards will be made pursuant to the 2015 Plan. The prior awards made under the 2006 Plan were unchanged by the adoption of the 2015 Plan and continue to be governed by the terms of the 2006 Plan.

The following table summarizes stock options outstanding under the stock incentive plans at the indicated dates:

	Nine Months Ended September 30,				2016			
	2017						2016	
	Options	Weighted Average Exercise Price	Fair Value Per Share	Intrinsic Value	Options	Weighted Average Exercise Price	Fair Value Per Share	Intrinsic Value
Options outstanding, beginning of period	2,337	\$ 24.21	\$ 12.76		2,929	\$ 24.47	\$ 12.74	
Granted	-	-	-		-	-	-	
Forfeited	-	-	-		-	-	-	
Exercised	-	-	-		-	-	-	
Options outstanding, end of period	2,337	\$ 24.21	\$ 12.76	\$ -	2,929	\$ 24.47	\$ 12.74	\$ -
Options exercisable, end of period	2,337				1,730			

During the second quarter of 2017, we granted certain officers 600 restricted shares of common stock with a weighted average fair market value of \$28.83 at the date of grant. The restricted stock awards vest over two years. During the third quarter of 2017, we granted certain officers 5,450 restricted shares of common stock with a weighted average fair market value of \$31.00 at the date of grant. These restricted stock awards vest over three years. During the second quarter of 2016, we granted certain officers 4,000 restricted shares of common stock with a weighted average fair market value of \$20.00 at the date of grant. These restricted stock awards vest over two years. Prior to vesting, these shares are subject to forfeiture to us without consideration upon termination of employment under certain circumstances. The total number of shares underlying non-vested restricted stock was 28,437 and 51,665 at September 30, 2017 and 2016, respectively.

The fair value of the stock is based on the grant date of the award and the expense is recognized over the vesting period. Unamortized stock-based compensation related to nonvested share based compensation arrangements granted under the stock incentive plan as of September 30, 2017 and 2016, was \$487,374 and \$775,575, respectively. The time based unamortized compensation of \$301,676 is expected to be recognized over a weighted average period of 1.99 years.

Stock-based compensation expense was approximately \$102,000 and \$156,000 for the nine months ended September 30, 2017 and 2016, respectively.

Note 9 – Fair value

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are independent, knowledgeable, able to transact and willing to transact.

Financial Accounting Standards Board (“FASB”) Codification Topic 820: *Fair Value Measurements and Disclosures* establishes a hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair values hierarchy is as follows:

Level 1 Inputs — Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 Inputs — Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 Inputs — Significant unobservable inputs that reflect a company’s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company used the following methods to determine the fair value of each type of financial instrument:

Securities: Fair values for securities available-for-sale are obtained from an independent pricing service. The prices are not adjusted. The independent pricing service uses industry-standard models to price U.S. Government agency obligations and mortgage backed securities that consider various assumptions, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Securities of obligations of state and political subdivisions are valued using a type of matrix, or grid, pricing in which securities are benchmarked against the treasury rate based on credit rating. Substantially all assumptions used by the independent pricing service are observable in the marketplace, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace (Levels 1 and 2).

Impaired loans: The fair values of impaired loans are measured for impairment using the fair value of the collateral for collateral-dependent loans on a nonrecurring basis. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The vast majority of the Company's collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the property is more than two years old, then a Level 3 valuation is considered to measure the fair value. The value of business equipment is based upon an outside appraisal if deemed significant using observable market data. Likewise, values for inventory and account receivables collateral are based on financial statement balances or aging reports (Level 3). Any fair value adjustments are recorded in the period incurred as provision for loan losses on the Consolidated Statements of Operations.

Real Estate Owned: Real estate owned assets are adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, real estate owned assets are carried at net realizable value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3.

Assets held for sale: Assets held for sale were transferred from premises and equipment at cost less accumulated depreciation at the date of transfer. The Company periodically evaluates the value of assets held for sale and records an impairment charge for any subsequent declines in fair value less selling costs. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the assets held for sale as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the asset held for sale as nonrecurring Level 3.

Assets and liabilities measured at fair value under Topic 820 on a recurring and non-recurring basis are summarized below for the indicated dates (dollars in thousands):

**Fair Value Measurement
at September 30, 2017 Using**

	Quoted Prices in Active Markets for Carrying Identical Assets Value (Level 1)		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

**Fair Value Measurement
at December 31, 2016 Using**

	Quoted Prices in Active Markets for Carrying Identical Assets Value (Level 1)		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Financial Assets - Recurring				
US Government Agencies	\$32,246	\$ 2,103	\$ 30,143	\$ -
Mortgage-backed securities	11,648	9,450	2,198	-
Financial Assets - Non-Recurring				
Impaired loans	15,441	-	14,467	974
Assets held for sale	841	-	-	841
Real estate owned	2,926	-	2,926	-

The following tables present qualitative information about Level 3 fair value measurements for financial instruments measured at fair value at September 30, 2017 and December 31, 2016 (dollars in thousands):

September 30, 2017				
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Impaired loans - real estate secured	\$287	Appraisal (1) or Internal Valuation (2)	Selling costs Discount for lack of marketability and age of appraisal	6%-10% (7%) 6%-30% (10%)
Impaired loans - non-real estate secured	\$1,248	Appraisal (1) or Discounted Cash Flow	Selling costs Discount for lack of marketability or practical life	10% 0%-50% (20%)
Assets held for sale	\$841	Appraisal (1) or Internal Valuation (2)	Selling costs Discount for lack of marketability and age of appraisal	6%-10% (7%) 6%-30% (15%)

(1) Fair Value is generally determined through independent appraisals of the underlying collateral, which generally included various level 3 inputs which are not identifiable

(2) Internal valuations may be conducted to determine Fair Value for assets with nominal carrying balances

December 31, 2016				
	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Impaired loans - real estate secured	\$517	Appraisal (1) or Internal Valuation (2)	Selling costs Discount for lack of marketability and age of appraisal	6%-10% (7%) 6%-30% (10%)
Impaired loans - non-real estate secured	\$457	Appraisal (1) or Discounted Cash Flow	Selling costs Discount for lack of marketability or practical life	10% 0%-50% (20%)
Assets held for sale	\$841	Appraisal (1) or Internal Valuation (2)	Selling costs	6%-10% (7%)

Discount for lack of marketability and 6%-30%
age of appraisal (15%)

- (1) Fair Value is generally determined through independent appraisals of the underlying collateral, which generally included various level 3 inputs which are not identifiable
- (2) Internal valuations may be conducted to determine Fair Value for assets with nominal carrying balances

In general, fair value of securities is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon market prices determined by an outside, independent entity that primarily uses as inputs, observable market-based parameters. Fair value of loans held for sale is based upon internally developed models that primarily use as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Company's monthly and/or quarterly valuation process.

Cash and cash equivalents – The carrying amount of cash and cash equivalents approximates fair value.

Investment securities – The fair value of investment securities available-for-sale is estimated based on bid quotations received from independent pricing services for similar assets. The carrying amount of other investments approximates fair value.

Loans – For variable rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. For all other loans, fair values are calculated by discounting the contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loans, or by using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Assets held for sale – The carrying value of assets held for sale is based on fair value less selling costs. Fair values for assets held for sale are estimated based on appraised values of the asset or management's estimation of the value of the assets.

Deposits – The fair value of deposits with no stated maturity, such as demand, interest checking and money market, and savings accounts, is equal to the amount payable on demand at year-end. The fair value of certificates of deposit is based on the discounted value of contractual cash flows using the rates currently offered for deposits of similar remaining maturities.

Borrowings – The fair value of borrowings is based on the discounted value of contractual cash flows using the rates currently offered for borrowings of similar remaining maturities.

Accrued interest – The carrying amounts of accrued interest receivable and payable approximate fair value.

	Level in Fair Value Hierarchy (In thousands)	September 30, 2017		December 31, 2016	
		Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial assets					
Cash	Level 1	\$ 15,684	\$ 15,684	\$ 10,848	\$ 10,848

Note 10 – Segment Reporting

The Company has two reportable segments: traditional commercial banking and mortgage banking. Revenues from commercial banking operations consist primarily of interest earned on loans and securities and fees from deposit services. Mortgage banking operating revenues consist principally of interest earned on mortgage loans held for sale, gains on sales of loans in the secondary mortgage market, and loan origination fee income.

The commercial banking segment provides the mortgage banking segment with the short-term funds needed to originate mortgage loans through a warehouse line of credit and charges the mortgage banking segment interest based on the commercial banking segment's cost of funds. Additionally, the mortgage banking segment leases premises from the commercial banking segment. These transactions are eliminated in the consolidation process.

The following table presents segment information as of and for the three and nine months ended September 30, 2017 and 2016 (in thousands):

	Commercial Banking	Mortgage Banking	Eliminations	Consolidated Totals
Three Months Ended September 30, 2017

Total assets	\$ 450,043	\$ 10,562	\$ (14,314)	\$ 446,291

Note 11 – Shareholders’ equity and regulatory matters

Preferred Stock

On May 1, 2009, as part of the Capital Purchase Program (the “TARP Program”) established by the U.S. Department of the Treasury (the “Treasury”) under the Emergency Economic Stabilization Act of 2008, the Company entered into a Letter Agreement and Securities Purchase Agreement—Standard Terms (collectively, the “Purchase Agreement”) with the Treasury, pursuant to which the Company sold (i) 14,738 shares of the Company’s Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$4.00 per share, having a liquidation preference of \$1,000 per share (the “preferred stock”) and (ii) a warrant (the “Warrant”) to purchase 499,029 shares of the Company’s common stock at an initial exercise price of \$4.43 per share, subject to certain anti-dilution and other adjustments, for an aggregate purchase price of \$14,738,000 in cash. As a result of the Company’s 1 for 16 reverse stock split completed in August 2014, the number of shares underlying the Warrant and the exercise price per share were adjusted to 31,190 and \$70.88, respectively. The fair value of the preferred stock was estimated using discounted cash flow methodology at an assumed market equivalent rate of 13%, with 20 quarterly payments over a five year period, and was determined to be \$10,208,000. The fair value of the Warrant was estimated using the Black-Scholes option pricing model, with assumptions of 25% volatility, a risk-free rate of 2.03%, a yield of 6.162% and an estimated life of 5 years, and was determined to be \$534,000. The aggregate fair value for both the preferred stock and Warrant was determined to be \$10,742,000 with 95% of the aggregate attributable to the preferred stock and 5% attributable to the Warrant. Therefore, the \$14,738,000 issuance was allocated with \$14,006,000 being assigned to the preferred stock and \$732,000 being allocated to the Warrant. The difference between the \$14,738,000 face value of the preferred stock and the amount allocated of \$14,006,000 to the preferred stock was accreted as a discount on the preferred stock using the effective interest rate method over five years.

The preferred stock qualifies as Tier 1 capital and accrued cumulative dividends at a rate of 5% until May 1, 2014 and now accrues at a 9% rate. The preferred stock is generally non-voting, other than on certain matters that could adversely affect the preferred stock.

The Warrant was immediately exercisable. The Warrant provides for the adjustment of the exercise price and the number of shares of common stock issuable upon exercise pursuant to customary anti-dilution provisions, such as upon stock splits or distributions of securities or other assets to holders of common stock, and upon certain issuances of common stock at or below a specified price relative to the then-current market price of common stock. The Warrant expires ten years from the issuance date. Pursuant to the Purchase Agreement, the Treasury has agreed not to exercise voting power with respect to any shares of common stock issued upon exercise of the Warrant.

In November 2013, the Company participated in a successful auction of the Company’s preferred stock by the Treasury that resulted in the purchase of the securities by private and institutional investors.

In accordance with the Company's prior Written Agreement with the Federal Reserve Bank of Richmond (the "Reserve Bank"), the Company had been deferring quarterly cash dividends on the preferred stock since May 2011. The Written Agreement was terminated by the Reserve Bank as of July 28, 2016. With the termination of the Written Agreement, the Company is not required to defer the quarterly cash dividends on the preferred stock.

During the first quarter of 2017, the Company received approval from state and federal regulators allowing the Bank to pay a special dividend to the Company for the sole purpose of paying all accrued and unpaid dividends on the preferred stock through February 15, 2017, as well as to redeem 688 shares of the total 5,715 shares outstanding. The accrued and unpaid dividends paid on February 15, 2017 amounted to \$2,911,000. The 688 shares were redeemed on February 24, 2017 at a redemption price of \$1,000 per share plus accrued dividends from February 15, 2017 to the redemption date.

During the second quarter of 2017, the Company received approval from the state regulators allowing the Bank to pay a dividend to the Company.

At September 30, 2017, the aggregate amount of the Company's total accrued dividend payments on the preferred stock was \$56,000 and reflected as a reduction of retained earnings.

Common Stock

On December 4, 2013, the Company issued 67,907 (after the reverse stock split) new shares of common stock through a private placement to directors and executive officers. The sale raised \$1,684,075 in new capital for the Company. The \$24.80 (after the reverse stock split) sale price for the common shares was equal to the stock's book value at September 30, 2013, which represented a 30% premium over the closing price of the stock on December 3, 2013.

On August 6, 2014, the Company filed Articles of Amendment to its Articles of Incorporation with the Virginia State Corporation Commission to affect a reverse stock split of its outstanding common stock which became effective on August 8, 2014. As a result of the reverse split, every sixteen shares of the Company's issued and outstanding common stock were consolidated into one issued and outstanding share of common stock.

On March 27, 2015, the Company completed a rights offering to shareholders (the "Rights Offering") and concurrent standby offering to Kenneth R. Lehman (the "Standby Offering"), in which the Company issued an aggregate of 1,051,866 shares of common stock (the total number of shares offered) at \$13.87 per share for aggregate gross proceeds of \$14,589,381 (including the value of the Company's preferred stock exchanged by Mr. Lehman for shares of common stock of \$4,618,813). In connection with the Rights Offering, 283,293 shares were issued to shareholders upon exercise of their basic subscription rights and 191,773 shares were issued to shareholders upon exercise of their oversubscription privileges (approximately 36.9% of the total number of shares requested pursuant to oversubscription privileges). In connection with the Standby Offering, Mr. Lehman purchased an aggregate of 576,800 shares of the Company's common stock, 333,007 of which were issued in exchange for 9,023 shares of the Company's preferred stock and 243,793 of which were purchased for cash. Also, as part of the Standby Offering, Mr. Lehman forgave \$2,215,009 in accrued and unpaid dividends on the preferred stock.

Regulatory Matters

The Bank is subject to various regulatory capital requirements administered by the federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under the capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures are established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 Capital (as defined in the regulations) to risk-weighted assets, and of Tier 1 Capital to average assets (the Leverage ratio).

In July 2013, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation (“FDIC”) approved the final rules implementing the Basel Committee on Banking Supervision's capital guidelines for U.S. banks (commonly known as Basel III). Under the final rules, which began for the Company and the Bank on January 1, 2015 and are subject to a phase-in period through January 1, 2019, minimum requirements will increase for both the quantity and quality of capital held by the Company and the Bank. The rules include a new common equity Tier 1 capital to risk-weighted assets ratio (“CET1 ratio”) of 4.5% and a capital conservation buffer of 2.5% of risk-weighted assets, which when fully phased-in, effectively results in a minimum CET1 ratio of 7.0%. Basel III raises the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0% (which, with the capital conservation buffer, effectively results in a minimum Tier 1 capital ratio of 8.5% when fully phased-in), effectively results in a minimum total capital to risk-weighted assets ratio of 10.5% (with the capital conservation buffer fully phased-in), and requires a minimum leverage ratio of 4.0%. Basel III also makes changes to risk weights for certain assets and off-balance-sheet exposures. Management expects that the capital ratios for the Company and the Bank under Basel III will continue to exceed the well capitalized minimum capital requirements.

The capital amounts and ratios at September 30, 2017 and December 31, 2016 for the Bank are presented in the table below (dollars in thousands):

	Actual		For Capital Adequacy Purposes		To be Well Capitalized		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
September 30, 2017							
Total capital (to risk- weighted assets) Village Bank	\$46,308	14.23 %	\$ 26,040	8.00 %	\$ 32,550	10.00 %	
Tier 1 capital (to risk- weighted assets) Village Bank	43,065	13.23 %	19,530	6.00 %	26,040	8.00 %	
Leverage ratio (Tier 1 capital to average assets) Village Bank	43,065	9.51 %	18,299	4.00 %	22,873	5.00 %	
Common equity tier 1 (to risk-weighted assets) Village Bank	43,065	13.23 %	14,648	4.50 %	21,158	6.50 %	
December 31, 2016							
Total capital (to risk- weighted assets) Village Bank	\$49,225	15.33 %	\$ 25,693	8.00 %	\$ 32,117	10.00 %	
Tier 1 capital (to risk- weighted assets) Village Bank	45,852	14.28 %	12,847	4.00 %	19,270	6.00 %	
Leverage ratio (Tier 1 capital to average assets) Village Bank	45,852	10.47 %	17,523	4.00 %	21,903	5.00 %	
Common equity tier 1 (to risk-weighted assets) Village Bank	45,852	14.28 %	14,452	4.50 %	20,876	6.50 %	

Note 12 – Commitments and contingencies

Off-balance-sheet risk – The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financial needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amounts recognized in the financial statements. The contract amounts of these instruments reflect the extent of involvement that the Company has in particular classes of instruments.

The Company's exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit, and to potential credit loss associated with letters of credit issued, is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for loans and other such on-balance sheet instruments.

The Company had outstanding the following approximate off-balance-sheet financial instruments whose contract amounts represent credit risk at the dates indicated (dollars in thousands):

	September 30, 2017	December 31, 2016
Undisbursed credit lines	\$ 55,999	\$ 55,315
Commitments to extend or originate credit	17,481	16,467
Standby letters of credit	4,213	4,397
Total commitments to extend credit	\$ 77,693	\$ 76,179

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. Historically, many commitments expire without being drawn upon; therefore, the total commitment amounts shown in the above table are not necessarily indicative of future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, as deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include personal or income-producing commercial real estate, accounts receivable, inventory and equipment.

Standby letters of credit are written conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in

extending loans to customers.

Concentrations of credit risk – All of the Company’s loans, commitments to extend credit, and standby letters of credit have been granted to customers in the Company’s market area. Although the Company is building a diversified loan portfolio, a substantial portion of its clients’ ability to honor contracts is reliant upon the economic stability of the Richmond, Virginia area, including the real estate markets in the area. The concentrations of credit by type of loan are set forth in Note 5. The distribution of commitments to extend credit approximates the distribution of loans outstanding.

Approximately 14% of the Company’s loan portfolio consists of student loans that are guaranteed by the DOE and covers approximately 98% of the principal and interest in the event of default. The Company utilizes a third party vendor with significant experience and expertise to service these loans. In the unlikely event that the third party servicer does not service the loans in accordance with the DOE requirements and could not reimburse the Company for losses sustained as a result of servicing errors, the Company could sustain additional losses beyond what has been factored in the allowance for loan losses.

Prior Agreements with Regulators – In February 2012, the Bank entered into a Stipulation and Consent to the Issuance of a Consent Order with the FDIC and the Virginia Bureau of Financial Institutions (the “Supervisory Authorities”), and the Supervisory Authorities issued the related Consent Order effective February 3, 2012 (the “Consent Order”). In June 2012, the Company entered into a similar written agreement (the “Written Agreement”) with the Reserve Bank. As a result of the steps the Company and the Bank took to, among other things, improve asset quality, increase capital, augment management and board oversight, and increase earnings, the Consent Order was terminated effective December 14, 2015. In place of the Consent Order, the Bank’s Board of Directors made certain written assurances to the Supervisory Authorities in the form of a Memorandum of Understanding (“MOU”) that became effective November 17, 2015. Due to further improvements by the Company and the Bank in asset quality and earnings, and the correction of a prior Regulation W violation, the MOU was terminated effective May 12, 2016, and the Written Agreement was terminated effective July 28, 2016. With the terminations of the MOU and the Written Agreement, neither the Company nor the Bank is under any formal or informal agreements with its regulators.

Note 13 – Income Taxes

The net deferred tax asset is included in other assets on the balance sheet. Accounting Standards Codification Topic 740, *Income Taxes*, requires that companies assess whether a valuation allowance should be established against their deferred tax assets based on the consideration of all available evidence using a “more likely than not” standard. Management considers both positive and negative evidence and analyzes changes in near-term market conditions as well as other factors which may impact future operating results. In making such judgments, significant weight is given to evidence that can be objectively verified. The deferred tax assets are analyzed quarterly for changes affecting realization.

In assessing the Company’s ability to realize its net deferred tax asset, management considers whether it is more likely than not that some portion or all of the net deferred tax asset will or will not be realized. The Company’s ultimate realization of the net deferred tax asset is dependent upon the generation of future taxable income during the periods in which temporary differences become deductible. Management considers the nature and amount of historical and projected future taxable income, the scheduled reversal of deferred tax assets and liabilities, and available tax planning strategies in making this assessment. The amount of net deferred taxes recognized could be impacted by changes to any of these variables.

Each quarter, the Company weighs both the positive and negative information with respect to realization of the net deferred tax asset and analyzes its position as to whether or not a valuation allowance is required. Over the past several quarters, the positive information has been increasing while the negative information has been decreasing. Over the last eight quarters, the Company has demonstrated consistent earnings while its level of non-performing assets, which was the primary cause of the Company’s losses, has steadily decreased. Additionally, the Reserve Bank, the FDIC and the Virginia Bureau of Financial Institutions have terminated their formal agreements with the Company and the Bank, reducing regulatory risk.

Given the consistent earnings and improving asset quality, the Company's analysis concluded that, it is more likely than not that the Company will generate sufficient taxable income within the applicable carry-forward periods to realize its net deferred tax asset.

There was a \$106,000 and \$333,000 income tax expense recorded for the three and nine month periods ended September 30, 2017, respectively, compared to an \$11,352,000 income tax benefit recorded for each of the three and nine month periods ended September 30, 2016. The Company recognized an income tax benefit of \$11,172,000 for the year ended December 31, 2016. The income tax benefit in 2016 was due to the reversal of the valuation allowance previously recorded against the net deferred tax asset as of September 30, 2016, offset by tax on pretax earnings for 2016 of \$825,000.

The net operating losses available to offset future taxable income amounted to \$23,028,000 at September 30, 2017 and begin expiring in 2028; \$1,257,000 of such amount is subject to a limitation by Section 382 of the Internal Revenue Code of 1986, as amended, to \$908,000 per year.

Commercial banking organizations conducting business in Virginia are not subject to Virginia income taxes. Instead, they are subject to a franchise tax based on bank capital. The Company recorded franchise tax expense of approximately \$85,000 and \$256,000 for the three and nine months ended September 30, 2017, respectively, compared to \$19,000 and \$56,000 for the three and nine months ended September 30, 2016, respectively.

Note 14 – Recent accounting pronouncements

In May 2014, the FASB issued ASU No. 2014-09, “Revenue from Contracts with Customers: Topic 606.” This ASU revised guidance for the recognition, measurement, and disclosure of revenue from contracts with customers. The original guidance has been amended through subsequent accounting standard updates that resulted in technical corrections, improvements, and a one-year deferral of the effective date to January 1, 2018. The guidance, as amended, is applicable to all entities and, once effective, will replace significant portions of existing industry and transaction-specific revenue recognition rules with a more principles-based recognition model. Most revenue associated with financial instruments, including interest income, loan origination fees, and credit card fees, is outside the scope of the guidance. Gains and losses on investment securities, derivatives, and sales of financial instruments are similarly excluded from the scope. Entities can elect to adopt the guidance either on a full or modified retrospective basis. Full retrospective adoption will require a cumulative effect adjustment to retained earnings as of the beginning of the earliest comparative period presented. Modified retrospective adoption will require a cumulative effect adjustment to retained earnings as of the beginning of the reporting period in which the entity first applies the new guidance. The Company plans to adopt this guidance on the effective date, January 1, 2018 via the modified retrospective approach. The Company performed its assessment of the adoption of this ASU and the related subsequent technical corrections issued. Based on the completed contracts reviewed thus far, the adoption of this accounting guidance is not expected to have a material impact on the Company's consolidated financial statements.

In January 2016, the FASB issued ASU No. 2016-01, “Recognition and Measurement of Financial Assets and Financial Liabilities.” This ASU requires an entity to: (i) measure equity investments at fair value through net income,

with certain exceptions; (ii) present in Other Comprehensive Income the changes in instrument-specific credit risk for financial liabilities measured using the fair value option; (iii) present financial assets and financial liabilities by measurement category and form of financial asset; (iv) calculate the fair value of financial instruments for disclosure purposes based on an exit price and; (v) assess a valuation allowance on deferred tax assets related to unrealized losses of AFS debt securities in combination with other deferred tax assets. The ASU provides an election to subsequently measure certain nonmarketable equity investments at cost less any impairment and adjusted for certain observable price changes. The ASU also requires a qualitative impairment assessment of such equity investments and amends certain fair value disclosure requirements. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is only permitted for the provision related to instrument-specific credit risk. The Company does not expect ASU 2016-01 to have a material impact on the Company's financial position, results of operations, or cash flows.

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842)”. This ASU requires lessees to recognize assets and liabilities arising from most operating leases on the statement of financial position. ASU 2016-02 will be effective for the Company for the fiscal years beginning after December 15, 2018 with early adoption permitted. The Company has determined that the provisions of ASU-2016-02 may result in an increase in assets to recognize the present value of the lease obligations with a corresponding increase in liabilities, however, the Company does not expect this to have a material impact on the Company’s financial position, results of operations or cash flows.

In March 2016, the FASB issued ASU No. 2016-09, “Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting.” This ASU simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Early adoption is permitted; however if the Company elects to early adopt, then all amendments must be adopted in the same period. The Company has concluded the adoption of ASU No. 2016-09 has not had a material impact on its consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, “Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” This ASU amends guidance on reporting credit losses for assets held at amortized cost basis and available-for-sale debt securities by eliminating the probable initial recognition threshold (incurred loss methodology) and requiring entities to reflect its current estimate of all expected credit losses. The amendments in the ASU are effective beginning after December 15, 2019 and for interim periods within that year. Early adoption is permitted beginning after December 15, 2018. Entities will apply the amendments in this ASU through a cumulative-effect adjustment to retained earnings in the first period effective. While the Company is currently evaluating the provisions of ASU No. 2016-13 to determine the potential impact the new standard will have on the Company’s Consolidated Financial Statements, it has taken steps to prepare for the implementation when it becomes effective, such as forming an internal task force, gathering pertinent data, consulting with outside professionals, and evaluating its current IT systems.

In August 2016, the FASB issued ASU No. 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Payments (a consensus of Merging Issues Task Force).” This ASU attempts to clarify how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The purpose of this update is to reduce existing diversity in practice in eight areas addressed by the update. The amendment will be effective for the Company for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted. The Company has concluded the adoption of ASU No. 2016-15 will not have a material impact on its consolidated financial statements.

In March 2017, the FASB issued ASU No. 2017-08, “Receivables – Nonrefundable Fees and Other Cost (Subtopic 310-20), Premium Amortization on Purchased Callable Debt Securities.” These amendments shorten the amortization period for certain callable debt securities held at a premium. Specifically, the amendments require the premium to be amortized to the earliest call date. The amendments do not require an accounting change for securities held at a discount; the discount continues to be amortized to maturity. The guidance is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted including adoption in an interim period. If an entity early adopts in an interim period, any adjustments should be reflected as of the beginning of the fiscal year that includes the interim period. The amendments should be applied on a modified retrospective basis, with a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The Company does have exposure and is assessing the impact of ASU 2017-08 and may choose early adoption. Overall, the Company does not expect it to have a material impact on its accounting.

In May 2017, the FASB issued ASU No. 2017-09, “Scope of Modification Accounting.” The amendment clarifies Topic 718, *Compensation – Stock Compensation*, such that an entity must apply modification accounting to changes in the terms or conditions of a share-based payment award unless all of the following criteria are met: (1) the fair value of the modified award is the same as the fair value of the original award immediately before the modification, provided that the ASU indicates that if the modification does not affect any of the inputs to the valuation technique used to value the award, the entity is not required to estimate the value immediately before and after the modification; (2) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the modification; and (3) the classification of the modified award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the modification. The ASU is effective for all entities for fiscal years beginning after December 15, 2017, including interim periods within those years. Early adoption is permitted, including adoption in an interim period. The Company has concluded the adoption of ASU No. 2017-09 will not have a material impact on its consolidated financial statements.

Item 2 - Management's Discussion and Analysis OF Financial condition and results of operations

Caution about forward-looking statements

In addition to historical information, this report may contain forward-looking statements. For this purpose, any statement that is not a statement of historical fact may be deemed to be a forward-looking statement. These forward-looking statements may include statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy and financial and other goals. Forward-looking statements often use words such as "believes," "expects," "plans," "may," "will," "should," "projects," "contemplates," "anticipates," "forecasts" or other words of similar meaning. You can also identify them by the fact that they do not relate strictly to historical or current facts. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, and actual results could differ materially from historical results or those anticipated by such statements.

There are many factors that could have a material adverse effect on the operations and future prospects of the Company including, but not limited to:

- changes in assumptions underlying the establishment of allowances for loan losses, and other estimates;
- the risks of changes in interest rates on levels, composition and costs of deposits, loan demand, and the values and liquidity of loan collateral, securities, and interest sensitive assets and liabilities;
- the effects of future economic, business and market conditions;
- legislative and regulatory changes, including the Dodd-Frank Wall Street Reform and Consumer Protection Act and other changes in banking, securities, and tax laws and regulations and their application by our regulators, and changes in scope and cost of FDIC insurance and other coverages;
- our inability to maintain our regulatory capital position;
- the Company's computer systems and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance, or other disruptions despite security measures implemented by the Company;
- changes in market conditions, specifically declines in the residential and commercial real estate market, volatility and disruption of the capital and credit markets, soundness of other financial institutions we do business with;
- risks inherent in making loans such as repayment risks and fluctuating collateral values;
- changes in operations of Village Bank Mortgage Corporation as a result of the activity in the residential real estate market;
- exposure to repurchase loans sold to investors for which borrowers failed to provide full and accurate information on or related to their loan application or for which appraisals have not been acceptable or when the loan was not underwritten in accordance with the loan program specified by the loan investor;
- governmental monetary and fiscal policies;
- changes in accounting policies, rules and practices;
- reliance on our management team, including our ability to attract and retain key personnel;
- competition with other banks and financial institutions, and companies outside of the banking industry, including those companies that have substantially greater access to capital and other resources;

· demand, development and acceptance of new products and services;

problems with technology utilized by us;
changing trends in customer profiles and behavior; and
other factors described from time to time in our reports filed with the SEC.

These risks and uncertainties should be considered in evaluating the forward-looking statements contained herein, and readers are cautioned not to place undue reliance on such statements. Any forward-looking statement speaks only as of the date on which it is made, and the Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made. In addition, past results of operations are not necessarily indicative of future results.

General

The Company's primary source of earnings is net interest income, and its principal market risk exposure is interest rate risk. The Company is not able to predict market interest rate fluctuations and its asset/liability management strategy may not prevent interest rate changes from having a material adverse effect on the Company's results of operations and financial condition.

Although we endeavor to minimize the credit risk inherent in the Company's loan portfolio, we must necessarily make various assumptions and judgments about the collectability of the loan portfolio based on our experience and evaluation of economic conditions. If such assumptions or judgments prove to be incorrect, the current allowance for loan losses may not be sufficient to cover loan losses and additions to the allowance may be necessary, which would have a negative impact on net income.

Results of operations

The following presents management's discussion and analysis of the financial condition of the Company at September 30, 2017 and December 31, 2016 and the results of operations for the Company for the three and nine months ended September 30, 2017 and 2016. This discussion should be read in conjunction with the Company's consolidated financial statements and the notes thereto appearing elsewhere in this Quarterly Report.

Summary

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

For the three months ended September 30, 2017, the Company had net income of \$273,000 and net income available to common shareholders of \$160,000, or \$0.11 per fully diluted share, compared to net income of \$11,932,000 and net income available to common shareholders of \$11,932,000, or \$8.21 per fully diluted share, for the same period in 2016. For the nine months ended September 30, 2017, the Company had net income of \$926,000 and net income available to common shareholders of \$541,000, or \$0.38 per fully diluted share, compared to net income of \$12,993,000 and net income available to common shareholders of \$12,446,000, or \$8.74 per fully diluted share, for the same period in 2016. The decrease in net income for both the three and nine months ended September 30, 2017 is due to recording an income tax benefit of \$11,352,000 due to the reversal in the third quarter of 2016 of the \$11,997,000 valuation allowance previously recorded against the net deferred tax asset.

There were significant changes in income and expense items when comparing 2017 and 2016 results. The more significant changes are reflected in the following table (in thousands):

	Q3 2017 Compared to Q3 2016	Nine Months 2017 Compared to Nine Months 2016
Increase (decrease) in		
Net interest income	\$ 248	\$ 774
Gains on loan sales	(648)	(435)
Gain on sale of assets	-	(504)
Gain on sale of investments	(15)	(171)
Rental income	-	(582)
(Increase) decrease in		
Salaries and benefits	60	(579)
Commissions	102	(17)
Occupancy	55	367
Writedown of assets held for sale	-	220
Cease use lease obligation	-	125
Expenses related to foreclosed real estate	68	401
FDIC premium	21	80
Income tax expense	(11,458)	(11,685)
	\$ (11,567)	\$ (12,006)

Net interest income

Net interest income, which represents the difference between interest earned on interest-earning assets and interest incurred on interest-bearing liabilities, is the Company's primary source of earnings. Net interest income can be affected by changes in market interest rates as well as the level and composition of assets, liabilities and shareholders' equity. Net interest spread is the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities. The net yield on interest-earning assets ("net interest margin") is calculated by dividing tax equivalent net interest income by average interest-earning assets. Generally, the net interest margin will exceed the net interest spread because a portion of interest earning assets are funded by various noninterest-bearing sources, principally noninterest-bearing deposits and shareholders' equity.

For the Three Months Ended September 30, 2017 2016 Change (dollars in thousands)

Average interest-earning assets	\$ 415,015		\$ 391,763		\$ 23,252	
Interest income	\$ 4,380		\$ 4,104		\$ 276	
Yield on interest-earning assets	4.19	%	4.17	%	0.02	%
Average interest-bearing liabilities	\$ 315,505		\$ 305,641		\$ 9,864	
Interest expense	\$ 688		\$ 660		\$ 28	
Cost of interest-bearing liabilities	0.87	%	0.86	%	0.01	%

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

Net interest income	\$ 3,692		\$ 3,444		\$ 248	
Net interest margin	3.53	%	3.50	%	0.03	%

The increase in net interest income of \$248,000 in the third quarter of 2017 was a result of positive movements in interest income. Interest income increased by \$276,000, with interest income on loans increasing by \$215,000 and interest income on investment securities increasing by \$106,000. The increase in interest income on loans was attributable to an increase in average loans outstanding of \$9,430,000. The increase in interest income on investment securities was due to an increase in average investments securities of \$18,355,000. The third quarter 2017 net interest margin increased 3 basis points to 3.53% compared to 3.50% in the third quarter of 2016. The increase in net interest margin was driven by an increase in interest-earning asset yields as a result of the purchase of a \$7.4 million student loan portfolio in August 2017 with an expected yield of 4.64%.

	For the Nine Months Ended September 30,				
	2017	2016	Change		
	(dollars in thousands)				
Average interest-earning assets	\$ 405,320	\$ 372,514	\$ 32,806		
Interest income	\$ 12,703	\$ 11,890	\$ 813		
Yield on interest-earning assets	4.19	% 4.26	% (0.07)%	
Average interest-bearing liabilities	\$ 310,417	\$ 304,086	\$ 6,331		
Interest expense	\$ 1,997	\$ 1,958	\$ 39		
Cost of interest-bearing liabilities	0.86	% 0.86	% 0.00	%	
Net interest income	\$ 10,706	\$ 9,932	\$ 774		
Net interest margin	3.53	% 3.56	% (0.03)%	

The increase in net interest income of \$774,000 for the nine months ended September 30, 2017 was a result of positive movements in interest income. Interest income increased by \$813,000, with interest income on loans increasing by \$660,000 and interest income on investment securities increasing by \$245,000. The increase in interest income on loans was attributable to an increase in average loans outstanding of \$21,149,000. The increase in interest income on investment securities was due to an increase in average investment securities of \$17,321,000. The nine months ended September 30, 2017 net interest margin decreased 3 basis points to 3.53% compared to 3.56% in the third quarter of 2016. The decrease in net interest margin was driven by lower loan yields, as new and renewed loans were originated and re-priced at lower rates.

The following table illustrates average balances of total interest-earning assets and total interest-bearing liabilities for the periods indicated, showing the average distribution of assets, liabilities, shareholders' equity and related income, expense and corresponding weighted-average yields and rates (dollars in thousands). The average balances used in these tables and other statistical data were calculated using daily average balances. We had no tax exempt assets for the periods presented.
