BLADEX'S ANNOUNCES PROFITS FOR THE FOURTH QUARTER AND FULL-YEAR 2017 OF \$20.6 MILLION, OR \$0.52 PER SHARE, AND \$82.0 MILLION, OR \$2.09 PER SHARE, RESPECTIVELY

PANAMA CITY, REPUBLIC OF PANAMA, February 9, 2018

Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, "Bladex", or "the Bank"), a Panama-based multinational bank originally established by the central banks of 23 Latin-American and Caribbean countries to promote foreign trade and economic integration in the Region, today announced its results for the fourth quarter ("4Q17") and full-year ("FY17") ended December 31, 2017 ("Y/E17").

The consolidated financial information in this document has been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

4Q17 & FY17 Highlights

Reported results:

Profit for the 4Q17 and FY17 totaled \$20.6 million (+1% QoQ, +54% YoY) and \$82.0 million (-6% YoY), respectively.

4Q17 results were positively impacted on a sequential quarterly basis by increased fees (+59%) mostly from two successfully closed syndicated transactions, offset by non-recurring and seasonally higher operating expenses (+32%), while Net Interest Income ("NII") totaling \$28.1 million and Net Interest Margin ("NIM") of 1.78% slightly increased (+1% and +2 bps, respectively) on higher average loan book, reversing the declining trend experienced in recent quarters.

YoY quarterly results benefited mostly from lower provision charges for expected credit losses ("ECL") totaling \$0.8 million in 4Q17 compared to \$17.7 million in 4Q16, together with increased fees from letters of credit and syndication activities (+37%), which more than compensated lower NII (-25%) on lower average loan portfolio and margins.

2017 annual results were 6% lower, impacted by lower average loan volumes and margins, as the Bank de-risked and diversified its portfolio mix, and shortened its average loan tenors. This decline was partly compensated by a 45% increase in Net Other income on seven closed syndication transactions, increased letters of credit activity, the absence of non-core trading losses, and a decline of \$25.7 million in provision charges for ECL.

Total Operating expenses were up 2% for the year. Recurring operating expenses were actually down 4% YoY, as personnel changes non-recurring expenses resulted in \$3.2 million in charges for 2017.

Key performance metrics:

2017 Return on Average Equity (“ROAE”) stood at 8.0%, compared to 8.8% a year ago, as the result of lower profits for 2017 and strong levels of capitalization. Annualized ROAE was 7.9% in 4Q17, unchanged from the 3Q17 and up from 5.3% in 4Q16, on YoY higher profits.

The Efficiency Ratio reached 38% in 4Q17 (+6 pt. QoQ, +10 pts. YoY), and 34% for FY17 (+7 pts. YoY), mainly due to non-recurring operating expenses which surpassed total income improvement QoQ, and lower total income generation YoY both on a quarterly and annual basis.

The Tier 1 Basel III Capital Ratio increased to 21.1% at Y/E17, compared to 20.3% in 3Q17 and 17.9% at Y/E16, reflecting higher levels of capitalization with risk-weighted assets flat QoQ and down 13% YoY.

Commercial Portfolio & Quality:

Commercial Portfolio resumed growth in 4Q17 with EoP balances reaching \$6.0 billion at Y/E17 (+5% QoQ, -7% YoY), and 4Q17 average balances totaling \$5.8 billion (+3% QoQ, -12% YoY) as credit demand recovered lately across the Region with higher volume of origination, while still down YoY on the Bank's focus of de-risking throughout 2017. FY17 average balances reached \$5.9 billion (-14% YoY).

Credit quality improved to 1.07% of Loan Portfolio balances at Y/E17, vs. 1.20% in 3Q17 and 1.09% at Y/E16, as non-performing loans ("NPL") decreased to \$58.8 million at Y/E17, as the net result of write-offs against existing individually allocated reserves, a NPL collection and a credit exposure migration to NPL from underperforming.

CEO's Comments

Mr. Rubens V. Amaral Jr., Bladex's Chief Executive Officer, stated the following regarding the Bank's 4Q17 and FY17 results: *"2017 proved yet another challenging year for Bladex. Nevertheless, the fourth quarter has confirmed the positive trends of our business as alluded to in the third quarter's earnings release. We increased the end-of-period portfolio balances reversing a stretch of declining activity in previous quarters. Fee income increased in 2017, and we delivered a ROE of 8.0% for the year. The projections for 2018 for economic growth in Latin America have been revised up by the World Bank and the IMF which bodes well for our business this year.*

Our credit quality remains resilient, with NPL levels reduced to 1.07% of total loans at the end of the year, as the Bank continued to finalize agreements on a limited number of exposures that have been closely monitored and had undergone restructuring negotiations for several quarters. During the fourth quarter, the Bank successfully collected a remaining deteriorated exposure in Panama, and wrote off certain non-performing exposures against existing specific provisions.

On the other hand, we have adjusted the size of the Bank to reflect the reality of our business, and our determination to improve productivity and efficiency across the organization. This organizational restructuring produced a non-recurring impact on our operating expenses in the fourth quarter related to severance costs. We are confident that with a leaner organization and more efficient processes we have positioned the Bank to achieve our target of excellence throughout the organization, setting the basis to return to higher levels of profitability.

Our Board of Directors approved to maintain a dividend of US\$ 0.385 for the fourth quarter confirming their favorable view of our financial strength and our ability to resume portfolio growth with sustainable double-digit ROEs moving forward. The Bank has a cleaner and stronger balance sheet and has left behind a negative credit cycle which impacted our financial performance in the last two years, and it is ready to resume growth on a sustainable basis.” Mr. Amaral concluded.

RESULTS BY BUSINESS SEGMENT

The Bank’s activities are managed and executed in two business segments, Commercial and Treasury. The business segment results are determined based on the Bank’s managerial accounting process as defined by IFRS 8 – Operating Segments, which assigns consolidated statement of financial positions, revenue and expense items to each business segment on a systemic basis.

COMMERCIAL BUSINESS SEGMENT

The Commercial Business Segment encompasses the Bank's core business of financial intermediation and fee generation activities developed to cater to corporations, financial institutions and investors in Latin America. These activities include the origination of bilateral and syndicated credits, short-term and medium-term loans, customers' liabilities under acceptances, loan commitments and financial guarantee contracts. Profits from the Commercial Business Segment include (i) net interest income from loans; (ii) Fees and Other Income from the issuance, confirmation and negotiation of letters of credit, guarantees and loan commitments, and through loan structuring and syndication activities; and (iii) gain on the sale of loans generated through loan intermediation activities, such as sales in the secondary market and distribution in the primary market; (iv) impairment loss (recovery) from ECL on loans, loan commitments and financial guarantee contracts; and (v) direct and allocated operating expenses.

The Commercial Portfolio resumed growth in the 4Q17 as EoP and average portfolio balances reached \$6.0 billion and \$5.8 billion, respectively, resulting in QoQ increases of 5% and 3%, respectively, as credit demand recovered lately across the Region with higher volume of origination, while still down 7% and 12% compared to a year ago, on the Bank's focus of de-risking throughout 2017. On an annual basis, FY17 average Commercial Portfolio balances were \$5.9 billion, a 14% YoY decrease compared to \$6.8 billion a year ago. As of December 31, 2017, 81% of the Commercial Portfolio was scheduled to mature within a year, the same level from a quarter ago and up from 77% a year ago, while trade finance transactions represented 60% of the Commercial Portfolio at Y/E17, down from 66% a quarter and year ago, but still focused on trade-related operations.

The following graphs illustrate the geographic distribution of the Bank's Commercial Portfolio, highlighting the portfolio's diversification by country of risk, and across industry segments:

Refer to Exhibit X for additional information relating to the Bank's Commercial Portfolio distribution by country, and Exhibit XII for the Bank's distribution of credit disbursements by country.

Net other income ⁽¹³⁾	18.9	16.3	16%	6.5	3.7	4.7	75%	39%
Total income	139.5	156.7	-11%	35.4	32.1	39.7	11%	-11%
Impairment loss from ECL on loans and loan commitments and financial guarantees contracts	(9.9)	(35.1)	72%	(0.9)	(0.6)	(18.0)	-55%	95%
Operating expenses	(35.9)	(34.6)	-4%	(9.7)	(7.7)	(9.2)	-26%	-6%
Profit for the period	\$93.7	\$87.0	8%	\$24.9	\$23.8	\$12.5	5%	98%

4Q17 and FY17 Commercial Business Segment's results were mainly impacted by:

- i. YoY lower net interest income and margins as the Bank shortened its tenors, and experienced margin pressures from high USD liquidity in key markets, partly compensated by the increase in LIBOR-based market rates;
- ii. Higher net other income mostly from improved activity in the letters of credit business in the 4Q17 and FY17, and increased commissions from the syndication business, which successfully closed two more structured transactions in 4Q17, for a total of seven transactions for FY17;
- iii. YoY decreased provisions for ECL mostly reflecting finalized restructurings and lower requirements from reduced portfolio levels; and
- iv. Higher allocated operating expenses, mainly due to personnel changes non-recurring expenses incurred in 4Q17 and during 2017.

TREASURY BUSINESS SEGMENT

The Treasury Business Segment is responsible for the Bank's funding and liquidity management, along with the management of its activities in investment securities, and the Bank's interest rate, liquidity, price and currency positions. Interest-earning assets managed by the Treasury Business Segment include liquidity positions (cash and cash equivalents), and financial instruments related to the investment management activities, consisting of financial instruments at fair value through OCI and securities held-to-maturity ("Investment Securities Portfolio"). The Treasury Business Segment also manages the Bank's interest-bearing liabilities, which constitute its funding sources, mainly deposits, short- and long-term borrowings and debt.

Profit from the Treasury Business Segment includes net interest income derived from the above mentioned treasury assets and liabilities, and related net other income (net results from derivative financial instruments and foreign currency exchange, gain (loss) per financial instruments at fair value through profit or loss, gain (loss) per financial instruments at fair value through OCI, and other income), impairment loss from ECL on investment securities, and direct and allocated operating expenses.

As of December 31, 2017, the Treasury Business Segment totaled \$0.8 billion, down 15% from a quarter ago and 36% from a year ago, mainly on lower cash and cash equivalent balances, as the Bank reverts to its historical adequate levels of prudent liquidity management. The Bank establishes and monitors requirements for internal liquidity management through limits and policies based on the Basel III Liquidity Coverage Ratio ("LCR"). Liquidity balances amounted to \$0.6 billion as of December 31, 2017, of which 98% of the Bank's liquid assets were held in deposits with the Federal Reserve Bank of New York, compared to \$0.8 billion, or 99% of liquid assets, at the end of 3Q17, and compared to \$1.0 billion, or 59% of liquid assets, at the end of 4Q16. As of these quarter-end dates, the liquid assets to total assets ratio was 9.9%, 12.2%, and 14.0%, respectively, while the liquid assets to total deposits ratio was 21.1%, 25.2%, and 36.0%, respectively.

The Investment Securities Portfolio balances of \$94 million at the end of the 4Q17 accounted for 1% of total assets at the end of 4Q17, compared to \$88 million, or the same level of total assets, a quarter ago, and compared to \$108 million, or 2% of total assets, a year ago, as the Bank aims to reduce market risk. The Investment Securities Portfolio mostly consisted of readily-quoted Latin American securities, 79% of which represented sovereign or state-owned risk (refer to Exhibit XI for a per-country risk distribution of the Investment Securities Portfolio).

Deposit balances amounted to \$2.9 billion at the end of 4Q17, down 2% QoQ and up 4% YoY, representing 57% of total funding sources, compared to 59% and 46%, at the end of 3Q17 and 4Q16, respectively. Deposits placed by

central banks or designees (i.e.: Class A shareholders of the Bank) represented 67% of total deposits as of December 31, 2017. At that same date, short-term borrowings and debt increased 46% QoQ while long-term borrowings and debt decreased 16% QoQ, (-27% and -36% YoY, respectively), to reach each one \$1.1 billion at the end of the 4Q17, increasing the short-term composition of the overall funding sources, aligned with the lending book moving towards shorter tenors. The 4Q17 and FY17 weighted average funding cost was 2.10% (up 4 bps QoQ and 60 bps YoY) and 1.95% (up 56 bps YoY), respectively, mainly reflecting the increase in LIBOR-based market rates, partly compensated by decreasing funding spreads.

"n.m." means not meaningful.

4Q17 and FY17 Treasury Business Segment's results were mainly impacted by:

- i. An increase in funding rates on higher LIBOR-based market rates (also impacting interest-earning assets lending rates), partly compensated with lower funding spreads; and
- ii. A relatively stable funding mix source YoY (i.e. medium- and long-term borrowings and debt) despite higher short-term trade finance lending book, limited gap income.

NET INTEREST INCOME AND MARGINS

(US\$ million, except percentages)	2017	2016	YoY (%)	4Q17	3Q17	4Q16	QoQ (%)	YoY (%)
Net Interest Income ("NII") by Business Segment								
Commercial Business Segment	\$120.6	\$140.4	-14 %	\$28.9	\$28.3	\$35.0	2 %	-17 %

Net Interest Margin	1.85 %	2.08 %	-11 %	1.78%	1.76%	2.05%	1 %	-13 %

4Q17 and FY17 Net Interest Income and margins were mainly impacted by:

- i. Higher NIM in 4Q17 (+2 bps QoQ) with increased average lending balances (+1% QoQ);
- ii.

YoY reductions on average loan portfolio balances as a result of the Bank's efforts to de-risk and diversify its portfolio towards short-term trade finance exposures;

Tighter net lending spreads in 2017 as the Bank shifted towards shorter tenor lending and experienced margin

iii. pressures from high USD liquidity in key markets, partly compensated by the effects of increased lending LIBOR-based rates; and

iv. YoY increased funding rates on higher LIBOR-based market rates, partly compensated with lower funding spreads.

FEES AND OTHER INCOME

Fees and Other Income includes the fee income associated with letters of credit and other contingent credits, such as guarantees and credit commitments, as well as fee income derived from loan structuring and syndication activities, together with loan intermediation and distribution activities in the primary and secondary markets.

(US\$ million)	2017	2016	YoY (%)	4Q17	3Q17	4Q16	QoQ (%)	YoY (%)

Fees and Other Income	\$19.4	\$16.5	18 %	\$6.6	\$3.8	\$4.8	76 %	40 %

* Net of commission expenses

4Q17 and FY17 Fees and Other Income were mainly impacted by:

- i. Increased commissions from the syndication business, which successfully closed two more structured transactions in 4Q17, for a total of seven transactions for FY17; and
- ii. Higher fees from improved activity in the letters of credit business in the 4Q17 and FY17.

PORTFOLIO QUALITY AND ALLOWANCE FOR ECL ON LOANS, LOAN COMMITMENTS AND FINANCIAL GUARANTEE CONTRACTS

Total allowance for ECL to NPL (times)	1.5		1.8		1.9		1.8		1.7	

The total allowance for ECL amounted to \$88.1 million at December 31, 2017, representing 1.47% of the total Commercial Portfolio, compared to \$116.6 million and 2.04%, respectively, as of September 30, 2017, and compared to \$111.8 million and 1.73%, respectively, as of December 31, 2016. The QoQ and YoY decreases of \$28.5 million and \$23.7 million, respectively, were mostly attributable to write-offs against existing individually allocated reserves following finalized restructuring processes.

At the end of 4Q17, NPL balances decreased to \$58.8 million, representing 1.07% of Loan Portfolio balances, compared to \$64.1 million, or 1.20% of Loan Portfolio in 3Q17, and \$65.4 million, or 1.09% of Loan Portfolio in 4Q16, as the net result of write-offs against existing individually allocated reserves, a NPL collection and a credit exposure migration to NPL from underperforming. The ratio of the total allowance for ECL to NPLs stood at 1.5 times as of the end of December 31, 2017, compared to 1.8 times from the previous quarter, and 1.7 times a year ago.

OPERATING EXPENSES

Operating expenses reflect the following line items of the consolidated statements of profit or loss:

(US\$ million, except percentages)	2017	2016	YoY (%)	4Q17	3Q17	4Q16	QoQ (%)	YoY (%)
Salaries and other employee expenses	\$27.7	\$25.2	10%	\$7.3	\$5.8	\$6.2	26%	19%

Efficiency Ratio	34 %	27 %	24%	38 %	32 %	28 %	19%	35%

4Q17 and FY17 Operating Expenses were mainly impacted by:

- i. Higher salaries and other employee expenses due to personnel changes non-recurring expenses incurred in 4Q17;
- and
- ii. YoY reduction in other operating expenses mostly from lower administrative, maintenance and professional services expenses, as a result of the Bank's focus on cost reduction and high productivity throughout the organization.

The Bank's Efficiency Ratios reached 38% in 4Q17 (+6 pt. QoQ, +10 pts. YoY), and 34% for FY17 (+7 pts. YoY), mainly due to non-recurring operating expenses which surpassed total income improvement QoQ, and lower total income generation YoY both on a quarterly and annual basis.

SAFE HARBOR STATEMENT

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the growth of the credit portfolio, including the trade portfolio, the increase in the number of the Bank's corporate clients, the positive trend of lending spreads, the increase in activities engaged in by the Bank that are derived from the Bank's client base, anticipated operating profit and return on equity in future periods, including income derived from the Treasury Business Segment, the improvement in the financial and performance strength of the Bank and the progress the Bank is making. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: the anticipated growth of the Bank's credit portfolio; the continuation of the Bank's preferred creditor status; the impact of increasing/decreasing interest rates and of the macroeconomic environment in the Region on the Bank's financial condition; the execution of the Bank's strategies and initiatives, including its revenue diversification strategy; the adequacy of the Bank's allowance for expected credit losses; the need for additional allowance for expected credit losses; the Bank's ability to achieve future growth, to reduce its liquidity levels and increase its leverage; the Bank's ability to maintain its investment-grade credit ratings; the availability and mix of future sources of funding for the Bank's lending operations; potential trading losses; the possibility of fraud; and the adequacy of the Bank's sources of liquidity to replace deposit withdrawals.

The Bank's activities are managed and executed in two business segments, Commercial and Treasury. The business segment results are determined based on the Bank's managerial accounting process as defined by IFRS 8 - Operating Segments, which assigns consolidated statement of financial positions, revenue and expense items to each business segment on a systematic basis.

(1) Interest income on interest-earning assets, net of allocated cost of funds.

(2) Net other income (loss) by Business Segment consists of the following items: - Commercial Business Segment: net fees and commissions, gain on sale of loans, and net related other income. - Treasury Business Segment: net other income from derivative financial instruments and foreign currency exchange, gain (loss) per financial instruments at fair value through profit or loss, gain (loss) per financial instruments at fair value through OCI, and net related other income.

(3) Operating Expenses allocation methodology assigns overhead expenses based on resource consumption by business segment. Total operating expenses includes the following line items of the consolidated statements of profit or loss: salaries and other employee expenses, depreciation of equipment and leasehold improvements, amortization of intangible assets, and other expenses.

(4) Includes loans, net of unearned interest and deferred fees.

(5) Includes cash and cash equivalents, financial instruments at fair value through profit or loss, financial instruments at fair value through OCI and securities held-to-maturity, gross of the allowance for expected credit losses.
