On a sequential basis, second quarter results represent a 15.4% increase in revenue, and an increase of 35.3% both in net income and in diluted EPS. All figures were prepared in accordance with R.O.C. GAAP on a consolidated basis. Second quarter results were in-line with the guidance given on April 26. Advanced process technologies (0.13-micron and below) accounted for 53% of wafer revenues with 90-nanometer process technology accounting for 26% and 65-nanometer reaching 3% of total wafer sales. Gross margin was 43%, operating margin was 33%, and net margin increased 5 percentage points to 34% from the previous quarter.

The recovery of our business, which started in March, has continued through the second quarter, and the momentum is expected to last through the third quarter, said Lora Ho, VP and Chief Financial Officer of TSMC. Relative to the second quarter, the computer segment shows the strongest growth while the communication and consumer segments growth will also continue, albeit at a lower pace, said Ho. Based on our current business outlook, management's expectations for third quarter 2007 performance are as follows :

Revenue is expected to be between NT\$85 billion and NT\$87 billion;

Gross profit margin is expected to be between 43% and 45%;
