Organic movement, net sales (after deducting excise duties) and operating profit before exceptional items are measures not specifically used in the consolidated financial statements themselves (non-GAAP measures). The group's management believe these measures provide valuable additional information for users of the financial statements in understanding the group's performance, since the measures focus on that element of the core brand portfolio that is common across periods and provide information on those elements of performance which local managers are most directly able to influence. However, whilst these measures are important in the management of the business, they should not be viewed as replacements for, but rather as complementary to, the comparable GAAP measures such as turnover and reported (rather than organic) movements in individual profit and loss account captions. For further explanation of these non-GAAP measures and how they are calculated, please see our Annual Report 2004.
