PROTOKINETIX, INC.
NOTES TO FINANCIAL STATEMENTS

Note 1. Organization and Plan of Operations

ProtoKinetix, Inc. (formerly known as RJV Network, Inc.) (the "Company"), a development stage company, was incorporated under the laws of the State of Nevada on December 23, 1999. The Company was formed for the purpose of developing an internet-based listing site that would provide detailed commercial real estate property listings and related data. In 2002, the Company suspended its original business plan while it considered a potential merger with another company, BioKinetix. In 2003, the Company discontinued its original business plan and entered into the licensing agreement described below. Effective as of the date of the license agreement, the Company became a medical research company in the development stage.

In 2003, the Company entered into an assignment of license agreement (the "Agreement") with BioKinetix, Inc., an Alberta, Canada, corporation. The Agreement provided the Company with an exclusive assignment of all of the rights (the "Rights") that BioKinetix possessed relating to two proprietary technologies that are being developed for the creation and commercialization of "superantibodies," an enhancement of antibody technology that makes ordinary antibodies much more lethal. In consideration, the Company's Board of Directors authorized the Company to issue 16,000,000 shares of its stock to the shareholders of BioKinetix. Also, the Company's existing directors agreed to resign and the Company cancelled 9,325,000 common shares owned by the former president (representing the majority of his shares). New Company directors were installed. In October 2003, 14,000,000 of the committed shares were issued. The remaining 2,000,000 shares are expected to be issued in 2004.

Note 2. Restatement

During 2003 and 2004, the Company acquired license rights to proprietary medical research technologies, which were capitalized at the time of acquisition as intangible assets having indefinite lives. While the Company's management continues to believe the license rights are of probable future benefit to the Company in its continuing efforts to pursue the development of commercially viable products, it was appropriate for accounting purposes to expense the cost of the acquisition of the license rights. Accordingly, the accompanying financial statements have been restated to correct the error and recognize as expense the cost of those acquired license rights at the time of their acquisition.

The effects of the restatement on the June 30, 2004 financial statements are as follows:

Intangible assets decreased by \$2,445,756 and the Accumulated Deficit increased by \$2,445,756.

Expenses for the six months ending June 30, 2004, specifically Licenses, increased by \$45,756 to \$45,756, increasing the Loss from Continuing Operations and the Net Loss by the same amount to (\$1,792,456) for each. There was no effect on the three months ending June 30, 2004. The loss per share did not change from (\$0.02) for the three months ended June 30, 2004 and from (\$0.06) for the six months ended June 30, 2004.

For purposes of the Statement of Cash Flows, the Net Loss for the Period increased to (\$1,792,456) and the Acquisition of Intangible Assets for \$45,756 was eliminated.

The effect of the restatement on the amounts in the Cumulative During the Development Stage period are as follows:

Edgar Filing: ProtoKinetix, Inc. - Form 10QSB/A

Expenses, specifically Licenses, increased by \$2,445,756 to \$2,445,756 increasing total expenses by a net amount of \$2,445,756 to \$5,443,550. The Loss from Continuing Operations increased by \$2,445,756 to (\$5,443,550) and the Net Loss increased by \$2,445,756 to (\$5,487,016).

For purposes of the Statement of Cash Flows, the Net Loss for the Period increased to (\$5,487,016) and the Issuance of Common Stock for Services and Expenses increased by \$2,400,000 to \$5,016,380, and the Acquisition of Intangible Assets for \$45,756 was eliminated.

Note 3. Summary of Significant Accounting Policies

The interim period financial statements have been prepared by the Company pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the "SEC"). Certain information and footnote disclosure normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such SEC rules and regulations. The interim period financial statements should be read together with the audited financial statements and accompanying notes included in the Company's audited financial statements for the years ended December 31, 2003 and 2002. In the opinion of the Company, the unaudited financial statements contained herein contain all adjustments necessary to present a fair statement of the results of the interim periods presented.

Note 4. Going Concern

As shown in the financial statements, the Company has not developed a commercially viable product, has not generated any revenues to date and has incurred losses since inception resulting in a net accumulated deficit of \$5,487,016 at June 30, 2004. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The Company will need additional working capital to continue its medical research or to be successful in any future business activities and continue to pay its liabilities. Therefore, continuation of the Company as a going concern is dependent upon obtaining the additional working capital necessary to accomplish its objective. Management is presently engaged in seeking additional working capital.

The accompanying financial statements do not include any adjustments to the recorded assets or liabilities that might be necessary should the Company fail in any of the above objectives and is unable to operate for the coming year.

Note 5. Prior Period Adjustment

The number of shares outstanding was restated to correct for an error made in the third quarter of 2003 in an overstatement of shares issued for services in that quarter. The effect of the adjustment was to reduce professional fees expense and net loss for the third quarter of 2003 by \$266,250. Accordingly, the deficit accumulated during the development stage as of September 30, 2003 was reduced by \$266,250. Additional paid-in capital at September 30, 2003, was reduced by \$266,233 and common stock at September 30, 2003, was reduced by \$17.

As a result of this adjustment, total shares outstanding at September 30, 2003, was reduced by 3,225,000 shares which also reduced the weighted average number of shares at September 30, 2003, by 29,670 shares. There was no effect on reported earnings per share at September 30, 2003.

There was no effect on net loss or earnings per share or cash flows for the three or six months ended June 30, 2004 and 2003 as a result of this adjustment.

Note 6. Long-Term Debt, Related Party

On February 1, 2004, the Company executed a subscription agreement under which the Company issued to a corporation owned by a stockholder an 8% secured convertible note in exchange for \$315,000. The note is due February 1, 2005, and is convertible into shares of the Company's common stock at the lower of \$.30 per share or 70% of the average of the three lowest trading prices for the 30 days prior to the conversion date.

Note 7. Earnings per Share

Basic loss per share is computed by dividing the net loss available to common shareholders by the weighted average number of common shares outstanding in the period. The Company's stock split 1:75 on August 24, 2001. In April 2002, the Board of Directors approved a 2.5 for 1 split of the Company's stock. The accompanying financial statements are presented on a post-split basis. The earnings per share for the periods ended June 30, 2004 and 2003, and the period cumulative during the development stage have been adjusted accordingly. Diluted earnings per share takes into consideration common shares outstanding (computed under basic earnings per share) and potentially dilutive securities. The effect of debt convertible into common shares was not included in the computation of diluted earnings per share for all periods presented because it was anti-dilutive due to the Company's losses.

During 2003, the Company obtained certain licensing rights in exchange for 16,000,000 common shares of the Company's stock, 2,000,000 of which shares remain to be issued. For purposes of earnings per share computations, all of these shares have been included as outstanding as of October 2003, the date of the original issuance of the shares to affect the acquisition of the license rights.

Note 8. Discontinued Operations

In 2003, the Company signed the licensing agreement described in Note 1. This agreement changed the Company's business plan to that of a medical research company. Accordingly, the operating results related to the internet-based real estate listing segment have been presented as discontinued operations in these financial statements for all periods presented.

Note 9. Subsequent Event

In July 2004, a total of 109,756 shares valued at \$92,195 were issued in exchange for consulting services rendered.

Item 2. Management's Discussion and Analysis

Please review "Forward Looking Information and Cautionary Statement" section below.

A. Plan of Operation

General

ProtoKinetix Inc., (the "Company," or "PROTOKINETIX") is a biotechnology research and development company focused on the application of SuperAntibody-based products for the treatment and diagnosis of certain cancers.

Plan of Operation . The ProtoKinetix business plan is based primarily on the furtherance of certain intellectual property rights obtained by way of "sub-licenses" of technology from other companies. At present, PROTOKINETIX has no product or products, and has received no patents or FDA approval for any product or diagnostic procedures.

On July 5, 2003, ProtoKinetix, Inc. entered into an assignment of license agreement (the "Agreement") with BioKinetix Research, Inc. ("BioKinetix"). The Agreement provided the Company with a 100% assignment of all of the rights (the "Rights") that BioKinetix possessed relating to two proprietary technologies that are being developed for the creation and commercialization of "super antibodies," an enhancement of antibody technology that makes ordinary antibodies much more lethal.

ProtoKinetix Inc.'s mission is to develop a new generation of medicines and diagnostics for the treatment of malignancies. The Company will be focused on the anti-cancer applications of certain monoclonal antibodies, termed "Super antibodies," that may improve medicinal and treatment potencies and increase sensitivity in use as diagnostics. ProtoKinetix hopes to use this technology to create new antibodies and diagnostic assays that will be able to be used to treat and detect certain cancers.

In particular, ProtoKinetix will attempt to create a SuperAntibody that will attach to RECAF molecules. The RECAF molecules with the SuperAntibody attached are theoretically expected to then attach to cancer cells, with minimal or no harm to non-cancerous cells, so that the SuperAntibody can destroy the cancer cells.

Please note that ProtoKinetix is a development stage company that has not yet begun operations. It is also important to understand that there has been no development of any product (antibodies) to date by the Company, and that such development may never begin, and there can be no certainty that any such antibodies will be developed by the Company, and, even if a product is developed, that the desired results for which it was originally intended will be achieved.

We face exposure to fluctuations in the price of our common stock due to the very limited cash resources we have. For example, the Company has very limited resources to pay legal and accounting professionals. If we are unable to pay a legal or accounting professional in order to perform various professional services for the Company, it may be difficult for the Company to maintain its reporting status under the '34 Exchange Act. If the Company felt that it was likely that it would not be able to maintain its reporting status, it would make a disclosure by filing a Form 8-K with the SEC. In any case, if the Company was not able to maintain its reporting status, it would become "delisted" and this would potentially cause an investor or an existing shareholder to lose all or part of his investment.

Definitions of the terms used above are as follows:

"SuperAntibody" is an industry-adopted term used to describe genetically-engineered antibodies, isolated from a single blood cell, which have been expanded in the laboratory to attack or have a desired effect on certain targeted antigens, such as cancer cells.

"RECAF" - Receptor Alpha Fetaprotein. This is a carbohydrate molecule that is located on the surface of cancer cells.

"Receptor" - A structure exposed on the cell surface used for signaling or transport of molecules into the cell.

Milestone Events during the Quarter Ending June 30, 2004 and Subsequent Events

On May 10, 2004, Dr. Jean-Charles Quiron agreed to serve on the Company's Scientific Board of Advisors. Mr. Quiron's resume is posted on the Company's website or it may be accessed by typing in the following url: http://www.ProtoKinetix.com/Bio/Jean-Charles_Quirion.htm.

On May 20, 2004, the Company announced that it had received a report from the Georges Pompidou Hospital in Paris on the first 40 patients studied with RECAF on mammary tissue. The report stated that there was a constant expression of RECAF on tumoral epithelial cells, mainly strong expression. Based on those results, the Georges Pompidou Hospital is proceeding to test the RECAF antibody on additional cancers. The ProtoKinetix Scientific Advisory Board was sufficiently satisfied that the third-party validation results confirmed the presence of the RECAF receptor site on cancer cells.

On June 28, 2004, the Company announced that it had reached an agreement with Perigene, Inc. to acquire a patented antifreeze glycoprotein technology known as AFGP. The initial executed agreement, which was approved by the Perigene board of directors, calls for a due diligence period. The Company believes that the two companies will be able to reach a set of final negotiated terms within the next 10 days. The final negotiated terms will be memorialized in a Final Agreement. The Company believes that the transaction should ultimately close within 30 days.

- (1) Plan of Operation for the Next Twelve Months The Company's short-term goal is to design a research program towards the development of a therapeutic agent . Any long term objectives will be defined by Management's ability to execute on the development of the aforementioned intellectual property rights that were the subject of the Company's public filings.
- (2) Plan of Operation for the Next Quarterly Period The Company's goal is to complete the due diligence pertaining to the AFGP transaction and execute the Final Agreement. Further, the Company will seek to secure additional financing following the execution of the Final Agreement.

Item 3. Controls and Procedures

A. Evaluation of disclosure controls and procedure .

Under the supervision and with the participation of our management, currently consisting of Dr. John Todd, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures within 90 days of the filing date of this quarterly report, and based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company's periodic SEC filings. There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation.

Disclosure controls and procedures are the controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed,

summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

B. Changes in Internal Controls

Not applicable.

FORWARD LOOKING INFORMATION AND CAUTIONARY STATEMENTS

Please note that ProtoKinetix (the "Company") is a development stage company that has not yet sold or marketed any products. The Company had no revenues for the quarter ended June 30, 2004.

It is important to understand that although the Company (as is discussed below) is focused on various efforts related to the use of antibodies and super antibodies in order to identify and treat malignancies, to date, there has been no development of any product (antibodies or super antibodies) by the Company. Although the Company is continuing to conduct research based on the above referred to and below stated theses, such successful research and development and the ultimate commercialization of a viable product may never occur, and there can be no certainty that any such antibodies will be developed by the Company. Further, even if a product or antibody or SuperAntibody is developed, the desired results for which it was originally intended may not be achieved.

The core of the Company's thesis regarding its research and development efforts is that there is a protein receptor site (hereinafter referred to as "RECAF") common to many malignant or cancerous cells. The Company has a license from Biocurex, Inc. to develop SuperAntibody therapies for the RECAF receptor site. As of the date of this report, the Company is engaged in efforts to validate the existence of the RECAF receptor site. However, the Company's efforts to validate the existence of the RECAF receptor site may fail and no such site may be located. If this is the case, the complete foundation of the Company's efforts may be undermined.

The Company faces exposure to fluctuations in the price of our common stock due to the very limited cash resources we have. For example, the Company has very limited resources to pay legal and accounting professionals. If we are unable to pay a legal or accounting professional in order to perform various professional services for the Company, it may be difficult, if not impossible, for the Company to maintain its reporting status as a public company. If the Company felt that it was likely that it would not be able to maintain its reporting status, it would make a disclosure by filing a Form 8-K with the SEC. In any case, if the Company was not able to maintain its reporting status, it would become "delisted" and this could potentially cause an investor or an existing shareholder to lose all or part of his investment.

The foregoing discussion, as well as the other sections of this Quarterly Report on Form 10-QSB, contains forward-looking statements that reflect the Company's current views with respect to future events and financial results. Forward-looking statements usually include the verbs "anticipates," "believes," "estimates," "expects," "intends," "plans," "projects," "understands" and other verbs suggesting uncertainty. The Company reminds shareholders that forward-looking statements are merely predictions and therefore inherently subject to uncertainties and other factors which could cause the actual results to differ materially from the forward-looking statements. Potential factors that could affect forward-looking statements include, among other things, the Company's ability to identify, produce and complete film projects that are successful in the marketplace, to arrange financing, distribution and promotion for these projects on favorable terms in various markets and to attract and retain qualified personnel.

Part II.
Other Information

Item 1. Legal Proceedings

None

Item 2. Changes in Securities

During the quarter ending June 30, 2004, the Company made the following common share issuances:

Issuances during quarter ending June 30, 2004:

On May 12, 2004, the Company issued 500,000 restricted common shares to Mohamed Verjee pursuant to consulting agreement. These issuances were made in lieu of cash payments for services rendered and were considered exempt transactions made under the Securities Act of 1933, Section 4(2).
