Roni Al-Dor, President and CEO, commented "I am pleased to report on another strong quarter, in which we achieved on-track growth in our revenues, operating profit, and first time net income after several years of losses."

The efficiency measures we implemented in the company and the constant focus on improving our products and offering are coming to fruition resulting in net income of \$803,000 on a Non-GAAP basis for the third quarter after several years of losses. In the last eight quarters, we showed constant improvement in our operational profit, which this quarter reached, on a Non-GAAP basis, a record of over \$1 million.

In the third quarter, we generated \$2 million in cash from operations thereby improving our financial position. Despite the general market climate, we are competing in several major promising opportunities in Israel, USA, UK and Japan which we expect will become signed agreements in the near future. In addition, we see an increased interest in our insurance product line, namely, the Insight for Life and Pension, Insight for Policy and Claims and Insight for Re-Insurance. These achievements reinforce our strategy direction and the improved performance which will allow us to continue the growth momentum.

We have expanded our strategic avenues and are well positioned to pursue options for organic and/or inorganic growth. At the same time, while we are pleased with our financial momentum and remain optimistic regarding the future, we continue to closely monitor the economic climate and to consider ways to address the specific needs of our partners and customers.

Reconciliation between U.S. GAAP and Non-GAAP results is summarized in the following table. For a complete reconciliation, please refer to the tables at the end of this release.

Comment Regarding Non-GAAP

Sapiens' management believes that the presentation of non-GAAP measures can enhance the understanding of the company's ongoing economic performance, and provides useful information to investors regarding financial and business trends relating to the company's financial condition and results of operations. Sapiens therefore uses internally the non-GAAP information to evaluate and manage the Company's operations.

This non-GAAP financial measures are not in accordance with, or an alternative for, generally accepted accounting principles and may be different from non-GAAP financial measures used by other companies. In addition, these non-GAAP financial measures are not based on any comprehensive set of accounting rules or principles. Sapiens believes that non-GAAP financial measures have limitations in that they do not reflect all of the amounts associated with Sapiens' results of operations as determined in accordance with GAAP and that these measures should only be used to evaluate Sapiens' results of operations in conjunction with the corresponding GAAP measures.

Please refer to the Reconciliation of GAAP to Non-GAAP Results at the end of this release.
