Notes

The term Barclays or Group refers to Barclays PLC together with its subsidiaries. Unless otherwise stated, the income statement analysis compares the twelve months to 31 December 2013 to the corresponding twelve months of 2012 and balance sheet analysis as at 31 December with comparatives relating to 31 December 2012. The abbreviations '£m' and '£bn' represent millions and thousands of millions of Pounds Sterling respectively; the abbreviations '\$m' and '\$bn' represent millions and thousands of millions of US Dollars respectively; '€m' and '€bn' represent millions and thousands of millions of Euros respectively; and 'C\$m' and 'C\$bn' represent millions and thousands of millions of Canadian Dollars respectively.

The comparatives have been restated to reflect the implementation of IFRS 10 Consolidated Financial Statements and IAS 19 Employee Benefits (Revised 2011), the reallocation of elements of the Head Office results to businesses and portfolio restatements between businesses, as detailed in our announcement on 16 April 2013. The consolidated financial statements of the Group included in the joint Annual Report on Form 20-F of Barclays PLC and Barclays Bank PLC for the year ended 31 December 2012 were restated to show the effects of the adoption of IFRS 10 Consolidated Financial Statements and IAS 19 Employee Benefits (Revised 2011) on 1 January 2013 in accordance with their transition guidance and not to reflect events subsequent to 5 March 2013, the date of the approval of the 31 December 2012 financial statements. The Group's segmental disclosures required by IFRS 8 Operating Segments were also restated. The restated consolidated financial statements of the Group were filed with the SEC on Form 6-K on 6 September 2013.

Adjusted profit before tax and adjusted performance metrics have been presented to provide a more consistent basis for comparing business performance between periods. Adjusting items are considered to be significant and not representative of the underlying business performance. Items excluded from the adjusted measures are: the impact of own credit; disposal of the investment in BlackRock, Inc.; the provision for Payment Protection Insurance redress payments and claims management costs (PPI redress); the provision for interest rate hedging products redress and claims management costs (interest rate hedging products redress); and goodwill impairment.

Relevant terms that are used in this document but are not defined under applicable regulatory guidance or International Financial Reporting Standards (IFRS) are explained in the Results glossary that can be accessed at www.Barclays.com/results.

In accordance with Barclays' policy to provide meaningful disclosures that help investors and other stakeholders understand the financial position, performance and changes in the financial position of the Group, and having regard

to the British Bankers' Association Disclosure Code and the Enhanced Disclosure Task Force recommendations, the information provided in this report goes beyond minimum requirements. Barclays continues to develop its financial reporting considering best practice and welcomes feedback from investors, regulators and other stakeholders on the disclosures that they would find most useful.

The Listing Rules of the UK Listing Authority (LR 9.7A.1) require that preliminary statements of annual results must be agreed with the listed company's auditors prior to publication, even though an audit opinion has not yet been issued. In addition, the Listing Rules require such statements to give details of the nature of any likely modification or emphasis of matter that may be contained in the auditors' report to be included with the annual report and accounts. Barclays PLC confirms that it has agreed this preliminary statement of annual results with PricewaterhouseCoopers LLP and that the Board of Directors has not been made aware of any likely modification or emphasis of matter to the auditors' report to be included with the annual report and accounts for the year ended 31 December 2013.

The information in this announcement, which was approved by the Board of Directors on 10 February 2014 does not comprise statutory accounts within the meaning of Section 434 of the Companies Act 2006. Statutory accounts for the year ended 31 December 2012, which included certain information required for the Joint Annual Report on Form 20-F of Barclays PLC and Barclays Bank PLC to the SEC and which contained an unqualified audit report under Section 495 of the Companies Act 2006 and which did not make any statements under Section 498 of the Companies Act 2006, have been delivered to the Registrar of Companies in accordance with Section 441 of the Companies Act 2006.

These results will be furnished as a Form 6-K to the SEC as soon as practicable following their publication. Once filed with the SEC, copies of the Form 6-K will also be available from the Barclays Investor Relations website www.barclays.com/investorrelations and from the SEC's website (www.sec.gov).

Forward-looking statements

This document contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and Section 27A of the US Securities Act of 1933, as amended, with respect to certain of the Group's plans and its current goals and expectations relating to its future financial condition and performance. Barclays cautions readers that no forward-looking statement is a guarantee of future performance and that actual results could differ materially from those contained in the forward-looking statements. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements sometimes use words such as "may", "will", "seek", "continue", "aim", "anticipate", "target", "projected", "expect", "estimate", "intend", "plan", "goal", "believe", "achieve" or other words of similar meaning. Examples of forward-looking statements include, among others, statements regarding the Group's future financial position, income growth, assets, impairment charges and provisions, business strategy, capital, leverage and other regulatory ratios, payment of dividends (including dividend pay-out ratios), projected levels of growth in the banking and financial markets, projected costs, original and revised commitments and targets in connection with the Transform Programme, deleveraging actions, estimates of capital expenditures and plans and objectives for future operations and other statements that are not historical fact. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances. These may be affected by changes in legislation, the development of standards and interpretations under International Financial Reporting Standards (IFRS), evolving practices with regard to the interpretation and application of accounting and regulatory standards, the outcome of current and future legal proceedings and regulatory investigations, future levels of conduct provisions, the policies and actions of governmental and regulatory authorities, geopolitical risks and the impact of competition. In addition, factors including (but not limited to) the following may have an effect: capital, leverage and other regulatory rules (including with regard to the future structure of the Group) applicable to past, current and future periods; UK, United States, Africa, Eurozone and global macroeconomic and business conditions; the effects of continued volatility in credit markets; market related risks such as changes in interest rates and foreign exchange rates; effects of changes

in valuation of credit market exposures; changes in valuation of issued securities; volatility in capital markets; changes in credit ratings of the Group; the potential for one or more countries exiting the Eurozone; the implementation of the Transform Programme; and the success of future acquisitions, disposals and other strategic transactions. A number of these influences and factors are beyond the Group's control. As a result, the Group's actual future results, dividend payments, and capital and leverage ratios may differ materially from the plans, goals, and expectations set forth in the Group's forward-looking statements. Additional risks and factors are identified in our filings with the SEC including our Annual Report on Form 20-F for the fiscal year ended 31 December 2012, and in the Form 6-K (Film No. 131097818) dated 16 September 2013, both of which are available on the SEC's website at <http://www.sec.gov>.

Any forward-looking statements made herein speak only as of the date they are made and it should not be assumed that they have been revised or updated in the light of new information or future events. Except as required by the Prudential Regulation Authority, the Financial Conduct Authority, the London Stock Exchange plc (LSE) or applicable law, Barclays expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in Barclays' expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. The reader should, however, consult any additional disclosures that Barclays has made or may make in documents it has published or may publish via the Regulatory News Service of the LSE and/or has filed or may file with the SEC.

Performance Highlights

"2013 has been a year of considerable change for Barclays. I am pleased with the progress we made in starting to rebuild trust, defining and implementing a common culture, repositioning the business for the future, and strengthening our balance sheet.

A year on from launching our plan to transform Barclays into the Go-To bank for all our stakeholders, we are in a significantly better position and I feel confident about our prospects.

Despite challenging conditions, our underlying performance has been resilient and momentum is building, as evidenced by the results we are reporting this morning.

Our UK Retail and Corporate Banking businesses delivered good results, alongside the continued strong growth of Barclaycard. Within the Investment Bank, an impressive performance in Equities and in Investment Banking has helped to partially offset lower income from our Fixed Income, Currencies and Commodities business. We have also started to make important progress in repositioning our African, European and Wealth businesses to improve returns. This performance has translated into income of £28.2bn in the year, and adjusted profit before tax of £5.2bn.

However, profits have been impacted by the restructuring and de-risking activity we completed during the year. This included withdrawing from certain lines of business, investing to transform our operations and resolving legacy conduct and litigation issues. The cost of these actions suppressed statutory profits to £2.9bn in the year but was in the long term interest of our shareholders.

Additionally, we have made significant progress with strengthening of our capital base year over year, through the rights issue and issuance of Additional Tier 1 securities. Combined with our substantial deleveraging actions in the second half of the year, we are ahead of our schedule to achieve the PRA leverage ratio expectation in June 2014.

While we have more work to do to achieve our goal of becoming the Go-To bank, I believe that we begin 2014 in a better position than we have been for many years."

Antony Jenkins, Group Chief Executive

Performance Highlights

Income Statement

- Adjusted profit before tax was down 32% to £5,167m due to costs to achieve Transform and a 4% reduction in income. Q413 adjusted profit before tax was down £1,194m against Q313 to £191m, including the impact of £331m of charges for litigation and regulatory penalties in the Investment Bank, UK bank levy of £504m (Q313: £nil), and £468m of costs to achieve Transform (Q313: £101m)
- Statutory profit before tax improved to £2,868m (2012: £797m), reflecting a reduced own credit charge of £220m (2012: £4,579m)

Income Performance

- Adjusted income decreased 4% to £28,155m, reflecting a reduction of £1,042m in the Investment Bank and £480m in the Head Office
- Investment Bank income was down 9% to £10,733m driven by a decrease in FICC and Exit Quadrant assets income, including a current year reversal of £111m income relating to a litigation matter in Q413. These decreases were partially offset by increases in Equities and Prime Services, and Investment Banking

Credit Impairment

- Credit impairment charges improved 8% to £3,071m, with a loan loss rate of 64bps (2012: 70bps), principally reflecting lower impairments in Corporate Banking and Africa RBB. This was partially offset by higher impairments in Barclaycard and UK RBB, partly due to provision releases in 2012, and acquisitions in Barclaycard

Cost Performance

- Adjusted operating expenses increased £1,331m to £19,893m, reflecting £1,209m of costs to achieve Transform, £220m provisions for litigation and regulatory penalties in Q413 in the Investment Bank, mainly relating to the US residential mortgage-related business, and UK bank levy

Edgar Filing: BARCLAYS PLC - Form 6-K

- Total compensation costs decreased 1% to £9,616m. Total compensation costs in the Investment Bank were broadly flat at £4,634m (2012: £4,667m). The Investment Bank compensation to income ratio rose to 43.2% (2012: 39.6%) primarily due to a decrease in income

Balance Sheet, Leverage and Capital Management

- The estimated Prudential Regulation Authority (PRA) leverage exposure reduced £196bn from 30 June 2013 to £1,363bn. Approximately £55bn of the reduction in PRA leverage exposure relates to foreign exchange movements
- CRD IV risk weighted assets (RWAs) reduced £32bn during the year and £12bn during Q413 to £436bn, primarily driven by reductions in Exit Quadrant RWAs
- CRD IV fully loaded Common Equity Tier 1 (CET1) capital increased £3.0bn from 30 September 2013 to £40.4bn, principally due to the issuance of additional shares through the rights issue, partially offset by foreign currency movements of £0.8bn and increased regulatory deductions including new deductions related to foreseeable dividends
- CRD IV CET1 ratio fully loaded was 9.3% (30 September 2013: 8.4% or 9.6% on a proforma post rights issue basis)
 - The estimated PRA leverage ratio increased to just under 3.0% (30 June 2013: 2.2%), reflecting a reduction in the PRA leverage exposure of £196bn and an increase in eligible PRA adjusted Tier 1 Capital to £40.5bn (30 June 2013: £34.2bn). The increase included £5.8bn share capital through the rights issue, £2.1bn of Additional Tier 1 (AT1) securities and a £1.9bn reduction in PRA adjustments to CET1 capital to £2.2bn, largely driven by a reduction in the additional PRA add-on for prudential valuation adjustment (PVA). The estimated CRD IV fully loaded leverage ratio increased to 3.1% (30 June 2013: 2.5%)
- Net asset value per share was 331p (2012: 414p) and net tangible asset value per share was 283p (2012: 349p). This decrease was mainly attributable to the issuance of shares as part of the rights issue, and decreases in the cash flow hedging reserve and currency translation reserve

Returns

- Adjusted return on average shareholders' equity decreased to 4.5% (2012: 9.0%) principally reflecting the decrease in profit before tax, a £440m write down of deferred tax assets relating to Spain and the £5.8bn of equity raised from the rights issue in Q413. Adjusted return on average tangible shareholders' equity decreased to 5.3% (2012: 10.6%). Statutory return on average shareholders' equity improved to 1.0% (2012: negative 1.2%)

Chief Executive's Statement

It is now twelve months since we set out our Transform programme, which began the process of making Barclays the 'Go-To' bank for all of our stakeholders. In that time we have taken measures to strengthen our capital base and manage risk which places Barclays in a good position to deliver competitive advantage for the bank in the years to come, resulting in higher and more sustainable returns for our shareholders.

In 2013, UK Retail and Business Banking delivered good results, supported by higher income from our mortgage business. Barclaycard also had another good year both in the UK and internationally, delivering attractive returns while still holding further growth potential. The output from our UK business within Corporate Banking, which delivered profit before tax of nearly £1bn for the year as the turnaround continued in the overall business unit. In the Investment Bank, our Equities business saw impressive income growth. Combined with continued improved results in Investment Banking, this partly offset lower income from our Fixed Income Currencies and Commodities business.

Beyond these franchises, we also completed a lot of work during 2013 in repositioning our African, European, and Wealth businesses. These units are in transition, with clear plans being implemented across all three to improve returns, and I am encouraged by the progress I'm seeing.

In aggregate, this performance translated into income of approximately of £28.2bn in the year, and adjusted profit before tax of £5.2bn. This is a resilient performance, though profits have clearly been impacted by the amount of investment and de-risking activity we executed in the period.

We continue to de-risk the business for reputation and conduct risk. In June we took a further £2bn of charges in relation to Payment Protection Insurance and interest rate hedging products redress. We have also exited businesses which are incompatible with Barclays' purpose and values, or where we cannot generate attractive returns for our investors. In late December 2013, we incurred £331m of charges for litigation and regulatory penalties which impacted income and costs, the latter of which drove operating expenses higher than the £18.5bn guidance excluding the cost to achieve Transform, we provided earlier.

Supported by the £5.8bn Rights Issue, we reached a CRD IV fully loaded CET1 ratio of 9.3% at the end of 2013. We remain on track to meet our target of 10.5% during 2015. Alongside the other measures set out in our Leverage Plan in July 2013, including rigorous control around leverage exposure reduction and £2.1bn of AT1 issuance, our estimated CRD IV fully loaded leverage ratio is 3.1% and our PRA leverage ratio is almost 3%, the expectation we were set to meet by June 2014.

Leverage will continue to be a focus for regulators and investors, and today we are setting out important plans to further reduce our exposure and better prepare Barclays for regulatory requirements in the future.

At Barclays we believe in paying for performance and paying competitively. Ensuring that we have the right people in the right roles serving our customers and clients effectively in a highly competitive global environment is vital to our ability to generate sustainable shareholder returns. After careful consideration, we determined that an increase of £210m over the prior year in the incentive pool was required in 2013 in order to build our franchise in the long term interests of shareholders. Notwithstanding this increase we remain committed to our goal of reducing the compensation to net income ratio over the medium term to the mid 30s.

One year on we are making good progress against the Transform financial and non-financial commitments we set out last year, although clearly we have more to do to execute on our plans.

On CRD IV RWAs we are already operating within the £440bn level we targeted for 2015 and our CRD IV fully loaded CET1 ratio is in a strong position. On cost, we remain confident we will reduce operating expenses to £16.8bn excluding costs to achieve Transform in 2015. Our Cost to Income Ratio rose in 2013 mainly as a consequence of reduced income, but we remain committed to achieving a ratio in the mid-50s by 2015. On dividends we expect to target a 40% payout ratio from 2014 as we also focus on capital accretion.

All of this progress on our financial commitments, plus additional work on de-leveraging, means we remain convinced of our ability to deliver a Return on Equity for the Group in excess of the cost of equity during 2016.

On our non-financial commitments there is also progress to report.

Cultural change, particularly embedding our purpose and values throughout the organisation, was a major Transform priority for 2013. As well as every colleague completing a mandatory training programme, we have also now integrated our purpose and values into the day to day management processes covering recruitment, talent management, performance assessment and reward. In the case of our Managing Director population, their 2013 performance has been formally assessed against whether they have exhibited the right values and behaviours, as well as producing the business outcomes we want. These criteria will apply to all employees in 2014. Critically, we have developed and published our new Code of Conduct which every colleague must abide by and attest to annually.

Today, and in fulfilment of our second non-financial commitment, we are publishing our balanced scorecard, the final component in the leadership system which will help us to drive cultural change and measure holistic performance in Barclays. It contains eight specific commitments which we will report on annually going forward. The commitments we have set are intentionally stretching, but we believe achievable. The personal objectives of all colleagues will align to the scorecard.

Finally, looking externally once more, I am proud to say that Barclays continues to play a key role in the UK economy. As a major employer a particular highlight in 2013 was that we have taken on approximately 1,000 apprentices, helping young people into work and addressing an acute social need. Being a strong bank allows Barclays to support the UK economy through lending to our customers and clients. An estimated £88bn of Funding for Lending eligible gross new lending was made to UK households and businesses by us in 2013.

In closing, the plans and targets we have for Barclays are certainly ambitious, and as we deal with unexpected challenges and the wider economic conditions, progress may not always be linear. However, through the disciplined focus of my management team, I am confident we will deliver on our goal of becoming the 'Go-To' bank.

Antony Jenkins, Group Chief Executive

Group Finance Director's Review

"Reflecting on the 2013 financial results for Barclays, I believe progress has been made and momentum is building around the Transform programme. This was the first year of the programme, which necessitated a substantial investment in future cost reduction and repositioning of our balance sheet and capital base.

Within the results, there are two areas that I felt were particularly noteworthy. First, the breadth and diversity of income in the Group, underpinned by our traditional consumer and commercial banking franchises. Similarly, within the Investment Bank, growth in Equities and Investment Banking income provided an offset to the market-led weakness in certain FICC businesses. Second, demonstration of strong financial fundamentals across funding and liquidity, capital, credit risk management and margins should stand the bank in good stead for generating sustainable returns going forward.

In October, I began conducting a detailed balance sheet review, specifically focused on meeting leverage ratio requirements as a priority. We have made strong and quick progress on this. PRA leverage exposure reduced by nearly £200bn from June 2013 which, combined with the £5.8bn rights issue and issuance of £2.1bn of AT1 securities, strengthened our PRA leverage ratio to just under 3%. Our focus on RWA management continued throughout the year, resulting in a 7%, or over £30bn, reduction in CRD IV RWAs. Looking ahead, the balance sheet review will continue but with increased focus on optimising the balance sheet, considering both risk weights and leverage, in order to generate improved returns. I will provide updates on this going forward.

Regulation remains a key variable and, while we have gained clarity in certain areas, there remain a number of outstandings which we will continue to anticipate as best we can in order to 'future proof' the bank.

As I look forward, 2014 will likely be another year of transition, with greater focus on balance sheet optimisation, particularly in the Investment Bank, combined with strict cost control in order to generate higher and more sustainable

returns in the future."

Tushar Morzaria, Group Finance Director

Group Finance Director's Review

Income Statement

- Adjusted profit before tax was down 32% to £5,167m driven by costs to achieve Transform and a reduction in income. Q413 adjusted profit before tax was down £1,194m against Q313 to £191m, including the impact of £331m of charges against litigation and regulatory penalties in the Investment Bank, UK bank levy of £504m (Q313: £nil), and £468m of costs to achieve Transform (Q313: £101m)

- Statutory profit before tax improved to £2,868m (2012: £797m), reflecting a reduced own credit charge of £220m (2012: £4,579m)

Income Performance

- Adjusted income decreased 4% to £28,155m, reflecting reductions in the Investment Bank, the Head Office and Africa RBB, partially offset by growth in Barclaycard and UK RBB

- Investment Bank income was down 9% to £10,733m driven by a decrease in FICC income of £1,141m, partially offset by increases in Equities and Prime Services of £489m, and Investment Banking of £63m. Income from Exit Quadrant assets also decreased £309m due to accelerated disposals and a £111m reversal of income relating to a litigation matter in Q413. Income in Q413 increased 2% on Q313 to £2,149m due to higher activity in Macro Products, particularly in the Currency business, and Investment Banking, offset by a reduced performance in Credit Products, and Equities and Prime Services

- Total net interest income was broadly stable at £11,600m, with lower net interest income in Head Office, Africa RBB and the Investment Bank offset by increases in Barclaycard, UK RBB and Corporate Banking. Customer net interest income for RBB, Barclaycard, Corporate Banking and Wealth and Investment Management increased to £10,365m (2012: £9,839m) driven by growth in customer assets, partially offset by contributions from Group structural hedging activities

Credit Impairment

- Credit impairment charges improved 8% to £3,071m, with a loan loss rate of 64bps (2012: 70bps)

Edgar Filing: BARCLAYS PLC - Form 6-K

- This reflected lower impairments in the wholesale businesses, mainly Corporate Banking in Europe and UK
- In the RBB and Barclaycard businesses, Africa RBB arrears rates improved, particularly for South Africa home loans, however, impairment was higher in UK RBB and Barclaycard partly due to the non-recurrence of provision releases in 2012, and the Edcon acquisition in Barclaycard
- Higher impairment in Europe reflected exposure to the renewable energy sector in Spain and weaker performance in European mortgages

Cost Performance

- Adjusted operating expenses increased £1,331m to £19,893m, reflecting £1,209m of costs to achieve Transform, £220m provisions for litigation and regulatory penalties in Q413 in the Investment Bank, mainly relating to the US residential mortgage-related business and UK bank levy of £504m (2012: £345m). The Group's cost target for 2015 remains at £16.8bn excluding costs to achieve Transform
- Total compensation costs decreased 1% to £9,616m. Total compensation costs in the Investment Bank were broadly flat at £4,634m (2012: £4,667m). The Investment Bank compensation to income ratio rose to 43.2% (2012: 39.6%) primarily due to a decrease in income

Taxation

- The effective tax rate on adjusted profit before tax increased to 39.0% (2012: 28.4%), mainly due to a charge of £440m reflecting the write down of deferred tax assets in Spain. The adjusted effective tax rate excluding the write down was 30.5% (2012: 28.4%), which primarily reflected profits outside of the UK taxed at local statutory tax rates that are higher than the UK statutory tax rate of 23.25% (2012: 24.5%) and the impact of the increase in the non deductible UK bank levy to £504m (2012: £345m). The effective tax rate on statutory profit before tax decreased to 54.8% (2012: 77.3%)

Returns

- Adjusted return on average shareholders' equity decreased to 4.5% (2012: 9.0%) principally reflecting the decrease in profit before tax, £440m write down of deferred tax assets relating to Spain and the rights issue equity raised of £5.8bn. Adjusted return on average tangible shareholders' equity decreased to 5.3% (2012: 10.6%). Statutory return on average shareholders' equity improved to 1.0% (2012: negative 1.2%)

Group Finance Director's Review

Balance Sheet and Leverage

Balance Sheet

- Total assets decreased by 12% to £1,312bn from 31 December 2012, primarily reflecting decreases in derivative assets, due to increases in forward interest rates and exposure reduction initiatives with central clearing parties and a reduction in cash and balances at central banks due to a decrease in the liquidity pool

- Total loans and advances were £468bn (2012: £464bn) with an increase of £8.4bn in UK RBB including those acquired through Barclays Direct (previously ING Direct UK, acquired during Q113), £1.8bn growth within Barclaycard across the UK and international business and a £1.8bn increase within Wealth and Investment Management. These were offset by a £5.7bn decrease within Africa RBB primarily due to the depreciation of ZAR against GBP, with growth of 2% on a constant currency basis

- Customer accounts increased by 11% to £428bn due to a £19.5bn increase in UK RBB deposits, a £9.6bn increase within Wealth and Investment Management, primarily reflected in the High Net Worth business, and a £9.1bn increase in Corporate Banking, from UK deposit growth

- Total shareholders' equity including non-controlling interests, was £64bn (2012: £60bn). Excluding non-controlling interests, shareholders' equity increased £4.8bn to £55bn, reflecting a £7.4bn increase in share capital and share premium including £5.8bn from the issuance of 3.2bn additional shares through the rights issue and the issuance of £2.1bn equity accounted AT1 securities. These increases were partially offset by decreases in the cash flow hedging reserve of £1.8bn, due to increases in forward interest rates, the currency translation reserve of £1.2bn, driven by strengthening of GBP against USD and ZAR, dividends paid of £0.9bn, and a £0.5bn reduction due to an increase in retirement benefit liabilities

- Net asset value per share was 331p (2012: 414p) and net tangible asset value per share was 283p (2012: 349p). This decrease was mainly attributable to the issuance of shares, as part of the rights issue, and decreases in the cash flow hedging reserve and currency translation reserve

- As at 31 December 2013 the provision held for PPI redress was £971m (2012: £986m) and for interest rate hedging products redress was £1,169m (2012: £814m). There has been no significant change to the estimates of future expected costs since June 2013

Leverage

- Estimated PRA leverage exposure reduced £196bn from 30 June 2013 to £1,363bn driven by a reduction in derivative replacement costs, potential future exposures on derivatives and cash and balances at central banks. Approximately £55bn of the reduction in PRA leverage exposure, related to foreign exchange movements

Capital Management

- CRD IV fully loaded CET1 capital increased £3.0bn from 30 September 2013 to £40.4bn, principally due to the issuance of additional shares through the rights issue, partially offset by foreign currency movements of £0.8bn and increased regulatory deductions related to foreseeable dividends. CRD III Core Tier 1 capital was £46.8bn (30 September 2013: £42.0bn)

- CRD IV RWAs reduced £32bn during the year and £12bn during Q413 to £436bn, primarily driven by reductions in Exit Quadrant RWAs of £39bn and reductions in trading book exposures, partially offset by methodology changes. This reduction was primarily in the Investment Bank, where Exit Quadrant RWAs reduced £37bn to £42bn. CRD III RWAs reduced £32bn to £355bn during the year

- CRD IV CET1 ratio on a fully loaded basis was 9.3% (30 September 2013: 8.4% or 9.6% on a proforma post rights issue basis). This movement was mainly as a result of the rights issue and a decrease in RWAs offset by new regulatory deductions primarily related to foreseeable dividends. CRD III Core Tier 1 ratio strengthened to 13.2% (30 September 2013: 11.3%)

- The estimated PRA leverage ratio increased to just under 3.0% (30 June 2013: 2.2%), reflecting a reduction in the PRA leverage exposure of £196bn and an increase in eligible PRA adjusted Tier 1 Capital to £40.5bn (30 June 2013: £34.2bn). The increase included £2.1bn of AT1 securities and a £1.9bn reduction in PRA adjustments to CET1 to £2.2bn largely driven by an elimination of the additional PRA add-on for PVA. Refer to page 55 for further details. The estimated CRD IV fully loaded leverage ratio increased to 3.1% (30 June 2013: 2.5%)

Group Finance Director's Review

Funding and Liquidity

- In 2013, we reduced the liquidity pool by £23bn to £127bn. This was consistent with reducing the large Liquidity Risk Appetite (LRA) and Liquidity Coverage Ratio (LCR) surpluses to support the leverage plan and to optimise the cost of liquidity, while maintaining compliance with internal liquidity risk appetite and external regulatory requirements.

- The liquidity pool consists of cash and deposits with central banks and high quality government bonds, which together accounted for 83% (2012: 87%) of the pool

- The estimated LCR was 102% (2012: 126%) based upon the latest standards published by the Basel Committee. This is equivalent to a surplus of £2bn above the 100% ratio (2012: £32bn)

- The estimated Net Stable Funding Requirement (NSFR) was 110% (2012: 112%), resulting in a £40bn (2012: £49bn) excess above the 100% ratio requirement

- The loan to deposit ratio for the Group decreased to 101% (2012: 110%) as a result of strong growth in customer deposits in UK RBB, Corporate Banking and Wealth and Investment Management

- Total wholesale funding outstanding (excluding repurchase agreements) was £186bn (2012: £240bn), of which £82bn (2012: £102bn) matures in less than one year and £20bn matures within one month (2012: £29bn)

- The Group issued £1bn of net term funding during 2013, including \$1bn of CRD IV compliant Tier 2 capital. Barclays has £24bn of term funding maturing in 2014 and £22bn in 2015. We expect to issue more public wholesale debt in 2014 than in 2013, albeit at lower levels than amounts maturing

Dividends

- A final dividend for 2013 of 3.5p per share will be paid on 28 March 2014 resulting in a total 6.5p dividend per share for the year. Total dividends paid to ordinary shareholders were £859m (2012: £733m), reflecting the additional shares issues as part of the rights issue

Outlook

- 2014 will be another year of transition, as we continue to make investments and focus on balance sheet optimisation and cost reduction.

Updated guidance on capital, leverage and dividends

- Barclays' current regulatory target is to meet a fully loaded CET1 ratio of 9% by 2019, plus a Pillar 2A add-on. Under current PRA guidance, Pillar 2A will need to be met with 56% CET1 from 2015, which would equate to approximately 1.4% of RWAs if the requirement were to be applied today. The Pillar 2A add-on would be expected to vary over time according to the PRA's individual capital guidance

- The Group expects to achieve a 10.5% CRD IV CET1 ratio on a fully loaded basis in 2015. As Barclays builds capital over the transitional period to its end state structure, the Group would estimate reaching a range of 11.5-12.0% for the CRD IV CET1 ratio, once an internal management buffer, Pillar 2A and other regulatory considerations are taken into account. This indication is based on certain assumptions (refer page 55 for details) and does not include any Counter-Cyclical Capital Buffer, additional Sectoral Capital Requirement or Systemic Risk Buffer

- The Group estimates reaching a PRA leverage ratio of at least 3.5% by the end of 2015 and a range of 3.5% to 4% beyond 2015, with an expected net reduction in leverage exposure of approximately £60bn, excluding foreign currency effects. Barclays expects the reduction in leverage exposure to below £1,300bn by 2015 to result in a minimal impact on current revenues but result in foregone revenue of around £300m in 2015

- Based on an initial high level impact analysis of the January 2014 Basel Committee on Banking Supervision (BCBS) proposal, we have estimated the changes could decrease the PRA leverage ratio by approximately 20 basis points, prior to management actions and any further rule changes

- The Group remains committed to a 40-50% dividend payout ratio over time, calculated as a proportion of adjusted earnings per share as determined by the Board. We expect to be at 40% from 2014 to allow focus on capital accretion
