REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

or

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended March 31, 2004

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

COMMISSION FILE NUMBER: 1-7239

KABUSHIKI KAISHA KOMATSU SEISAKUSHO

(Exact name of registrant as specified in its charter)

KOMATSU LTD.

(Translation of registrant's name into English)

JAPAN

(Jurisdiction of incorporation or organization)

2-3-6 Akasaka, Minato-ku, Tokyo 107-8414, Japan

(Address of principal executive offices)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

None

Name of each exchange on which registered

N/A

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

Common Stock

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

998,744,060

Edgar Filing: KOMATSU LTD - Form 20-F

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes , No

Indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

Table of Contents

In this document, KOMATSU LTD. is hereinafter referred to as the Company, and together with its consolidated subsidiaries, as Komatsu.

Cautionary Statement with respect to forward looking statements:

This Annual Report contains forward-looking statements that reflect management's views and assumptions in the light of information currently available with respect to certain future events, including expected financial position, operating results and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects, plans, expects and similar terms and expressions that identify events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Any forward-looking statements speak only as of the date of this Annual Report, and the Company assumes no duty to update such statements.

Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for Komatsu's principal products, owing to changes in the economic conditions in Komatsu's principal markets; changes in exchange rates or the impact of increased competition; unanticipated costs or delays encountered in achieving Komatsu's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of Komatsu's research and development efforts and its ability to access and protect certain intellectual property rights; the impact of regulatory changes and accounting principles and practices; and the introduction, success and timing of business initiatives and strategies.

D. Risk Factors

General Background

Komatsu's primary business is the manufacture and sale of Construction and Mining Equipment (72% of 2004 sales), Industrial Machinery, Vehicles and Others (20% of 2004 sales) and Electronics raw materials (primarily silicon wafers and related raw materials, 8% of 2004 sales). Overall 2004 sales were 40% in Japan and 60 % exports and/or foreign produced and sold products. Manufacturing facilities are dispersed geographically but production of most of key components such as engines, hydraulic components and final drives, are concentrated in Japan. Sales (10%) and segment profits (99%) have both improved substantially in 2004 versus 2003, reflecting both improved world economic conditions and this increased demand and internal initiatives. Significant additional detail and commentary is provided in year versus year and segment information provided in Items 4 and 5.

Komatsu has identified the following primary risk factors to its global operations.

Table of Contents

As a global company, Komatsu's results of operations are affected by the economic and market conditions.

Komatsu engages in business globally where market conditions differ depending on the regions. Moreover, depending on different local conditions in market, politics and economy, demand for Komatsu's products and business environment for Komatsu could change substantially.

Both Construction and Mining Equipment business and Industrial Machinery, Vehicles and Others business are generally economy-cyclical in advanced economic regions. Therefore, factors which are beyond control of Komatsu, such as housing starts, industrial production level, public investments in infrastructure development, and private-sector capital outlays, could affect demand for Komatsu's products, bring about an improper balance between inventory level and production capacity, and consequently become a risk in forcing down the sales prices for Komatsu's products. Such changes in the business environment could result in lowered profitability and additional restructuring expenses, and become a risk in generating unfavorable effects on Komatsu's growth strategy and business results.

Electronics business experiences very drastic changes in market conditions and demand. Such changes in the business environment could become a risk in affecting the results of Komatsu's business. Reduced sales volume and lowered sales prices of silicon wafers caused by drastic changes in the semiconductor market and fluctuations in supply and demand could substantially affect the profitability of the Electronics business, and unfavorably affect Komatsu's business results.

As a global company, Komatsu's results of operations are affected by foreign currency exchange fluctuations.

Approximately 60% of Komatsu's total sales come from sales outside Japan, and a substantial portion of overseas sales is affected by foreign currency exchange fluctuations. In general, the Japanese yen's appreciation against other currencies affects business results of Komatsu negatively, while the yen's depreciation affects them positively. Furthermore, foreign exchange fluctuations could also affect the comparative prices of products and costs of materials that Komatsu and foreign competitors produce and sell, respectively, in the same market. To minimize the effects of foreign exchange fluctuations, Komatsu engages in hedging activities. However, when the foreign exchange rate fluctuates more than the projected exchange rate level, there is a risk of negative effects on Komatsu's business results.

Komatsu's results of operations are subject to the fluctuations in the financial markets.

Komatsu is working to improve efficiency of assets to reduce interest-bearing debt as much as possible. Currently, Komatsu has short-and long-term interest-bearing debt of approximately ¥460 billion in total. Interest rates for more than a half of such interest-bearing debt are fixed, and thus effects of interest rate fluctuations are alleviated. However, the increase in interest expenses due to the rise in interest rates may reduce Komatsu's profits.

With regard to Komatsu's pension assets, fluctuations in the financial markets, such as the fair value of marketable securities and interest rates, could increase funding shortages and liabilities of Komatsu's defined pension plans. Such increase in pension costs may adversely affect Komatsu's business results and financial conditions.

Table of Contents

Major changes in the Chinese economy may have a negative effect on Komatsu's results of operations.

In preparation for hosting the Beijing Olympic Games in 2008, the Chinese economy has been expanding rapidly during recent years, and demand for construction equipment has also shown significant growth. Komatsu has been engaging in aggressive business in China by expanding production capacities and reinforcing sales and service capabilities of local subsidiaries. While Komatsu believes that the Chinese demand will continue to expand in a mid to long-range perspective, temporary disruption and stagnation of the Chinese economy could be caused by political and economic factors. In such a case, there is a risk of demand for Komatsu's products declining and thus negatively affecting Komatsu's business results.

The increase in material costs caused by the price rise of steel materials may have a negative effect on Komatsu's results of operations.

Accompanied by Chinese economic expansion, the prices of steel materials have been increasing sharply worldwide. This development will facilitate mining activities and thus lead to an increase in demand for Komatsu's mining equipment, but it will also become a factor in increasing the materials costs for Komatsu's products. To compensate for this increase in costs, Komatsu plans to reduce other production costs and shift the costs to the prices of the products. However, if the current price hike of steel materials continues and is prolonged, there is a risk of negatively affecting Komatsu's business results.

Komatsu operates in a highly competitive industry in which its competitors may offer new or better products and services or lower prices, which could result in a loss of customers and a decrease in Komatsu's revenue and profit.

Komatsu engages in businesses in competitive industries where other companies could provide new products and services with superior advantages or lower-priced products. Through the Spirit of Manufacturers reform, Komatsu is working to realize a high-profitability foundation by providing products that feature both Unique and Unrivaled advantages and substantial cost reductions and by strengthening the superiority of such products. However, when competitors reinforce their products and mark down their sales prices, further intensifying the market competition, there will likely be reduced market shares of Komatsu's products, sales and profits.

Komatsu is subject to local regulations, and the costs relating to complying with future laws and regulations could adversely affect Komatsu's business and results of operations.

Komatsu engages in business in many countries of the world, and is exposed to political and economic risks in each country where it operates. In the future, when the government of a given country enacts new regulations, for example, import/export duties, quotas, currency restrictions and taxation, which are unfavorable for Komatsu, Komatsu might have to bear related costs in order to comply with such regulations. It is impossible for Komatsu to predict such future costs, and they could negatively affect Komatsu's business and results of operations.

Table of Contents

Komatsu is subject to extensive environmental laws and regulations, and the costs relating to complying with existing or future laws and regulations could adversely affect Komatsu's business and results of operations.

Komatsu's operations and products are subject to increasingly stringent environmental laws and regulations in the numerous countries in which Komatsu operates. Such regulations govern, among other things, emissions into the air, discharges into water, the use, handling and disposal of hazardous substances, waste disposal and the remediation of soil and groundwater contamination. Komatsu regularly expends significant amounts of resources to comply with regulations concerning the emissions levels of its manufacturing facilities and its equipment products. Komatsu expects to make additional environmental and related capital expenditures in connection with reducing the emissions of its existing facilities and manufactured equipment in the future, depending on the level and timing of new standards. The costs of complying with these or any other current or future environmental regulation may be significant to Komatsu and could adversely affect Komatsu's business and results of operations.

Komatsu may face product liability claims due to the nature of its business and its products if Komatsu's insurance does not cover these liabilities, Komatsu may incur significant costs which could reduce its profitability.

Komatsu manufactures heavy machinery used by its customers at excavation and construction sites and on roads, and works to sustain and ensure Quality and Reliability of its operations and products based on stringent standards established in-house. Any defect in, or improper operation of, Komatsu's equipment can result in personal injury and death, and damage to or destruction of property, any of which could cause product liability claims to be filed against Komatsu. While Komatsu believes that it has sufficient insurance coverage for these product liability claims, the amount and scope of its insurance coverage may not be adequate to cover all losses or liabilities that Komatsu may incur in the event of a product liability claim, as these claims are unforeseeable. Any liabilities not covered by insurance could reduce Komatsu's profitability or have an adverse effect on its financial condition.

Komatsu's alliances with other entities may not produce successful results.

Komatsu has entered into various alliances with other entities to reinforce its international competitiveness. While Komatsu expects its alliances to be successful, if differences were to arise among the parties due to managerial, financial or other reasons, such alliances may result in losses, which in turn could adversely affect Komatsu's business results and financial conditions.

Item 4. Information on the Company

A. History and Development of the Company

The Company was incorporated in May 1921 under the laws of Japan as Kabushiki Kaisha Komatsu Seisakusho. Its registered office is located at 2-3-6 Akasaka, Minato-ku, Tokyo 107-8414, Japan, and its telephone number is +81-3-5561-2628 (Finance & Treasury Department).

Shortly after its formation in 1921, the Company commenced the production and marketing of sheet-forming presses. In 1931, the Company produced Japan's first crawler-type farm tractor and began production of bulldozers in the 1940s. The Company broadened its product range by beginning production of motor graders and dump trucks in the 1950s and wheel loaders and hydraulic excavators in the 1960s.

Table of Contents

In terms of globalization, history and development of the Company is divided into 3 phases: (1) export; (2) global production; and (3) global consolidated management. Since its first export to Argentina in 1955, the Company gradually increased exports, establishing its first liaison office in India in 1964 and sales companies in Europe, the United States and Asia from 1967 to 1971.

In 1975, the Company marked the first step toward global production by establishing Komatsu Brazil, the first plant outside Japan and increased its global presence by establishing manufacturing plants in Indonesia, the United Kingdom and the United States in the 1980s. In the late 1980s, the Company established Komatsu Dresser Company, a joint venture with Dresser Industries, Inc. of the United States, which is currently known as Komatsu America Corp. and made an equity investment in Hanomag AG of Germany, currently known as Komatsu Hanomag GmbH.

In the 1990s, the Company advanced the globalization of consolidated management by strengthening offshore production and forming business alliances, such as establishment of joint ventures. For instance, the Company established Komatsu Cummins Engine Co. Ltd. in Japan, Cummins Komatsu Engine Company in the United States, and Industrial Power Alliance Ltd. in Japan, with Cummins Engine Company (currently known as Cummins Inc.), 3 joint ventures in China, and Demag Komatsu, currently known as Komatsu Mining Germany GmbH, with Mannesmann Demag of Germany.

The following are important events in the development of Komatsu's business during recent years.

In April 1999, Komatsu MEC Corp., a wholly owned subsidiary of the Company and an unlisted manufacturer of wheel loaders and other construction machines, and Komatsu EST Corp., a majority-owned manufacturer of motor graders, were merged with the Company.

In April 2000, Komatsu sold 65% of the outstanding shares of Komatsu Soft Ltd. to Toyo Information Systems Inc.

In June 2000, the Company acquired the shares of Komatsu Forklift Co., Ltd. (Komatsu Forklift), and converted Komatsu Forklift into its subsidiary.

In October 2000, Komatsu sold its 69.15% equity holdings in Komatsu Construction Co., Ltd. (Komatsu Construction) to Takamatsu Corporation Co., Ltd.

In March 2002, the Company entered into a basic agreement with Volvo Construction Equipment (Volvo CE) for cooperation on production and development of construction equipment components.

In May 2002, the Company reached a global alliance agreement with Linde AG (Linde) of Germany, under which the two companies will transform Komatsu Forklift into their jointly-owned company.

Edgar Filing: KOMATSU LTD - Form 20-F

In October 2002, the Company acquired all of the minority interests, representing 48.5% and 45.7% of the issued and outstanding shares, of its existing consolidated subsidiaries, Komatsu Forklift and Komatsu Zenoah, respectively, through stock for stock exchanges.

Table of Contents

In July 2003, the Company sold to Linde 31,011,000 shares of Komatsu Forklift's common stock, so that Linde holds 35% equity in Komatsu Forklift.

In November 2003, the Company entered into an agreement with KONE Corporation to acquire 100% of the shares of KONE's subsidiaries, Partek Forest AB and Partek Forest Holdings, in order to make a full-scale entry into the forestry equipment market. The acquisition was completed in December 2003 and the two companies and their 12 subsidiaries have been treated as consolidated companies from December 31, 2003.

In December 2003, the Company entered into an agreement with Shimachu Co., Ltd. to sell its land in Kawasaki, Kanagawa, Japan. The contract was concluded in December 2003 and the land was duly delivered in July 2004.

In February 2004, the Company entered into an agreement to sell the land and buildings of Komatsu Silicon America, Inc., a wholly-owned subsidiary located in Hillsboro, Oregon, U.S.A., to the Park Company of Oregon, LLC. The land and buildings were duly delivered to the Park Company of Oregon, LLC, in March 2004.

The Company embarked on the "Move The World. KOMATSU 5-800" mid-range management plan for the year ending March 31, 2006 in November 2003. With "Move The World," the Company expressed its firm determination to "move" the hearts of its customers around the world, as each and every employee of Komatsu remains committed in Quality and Reliability and provides products and services that customers are happy to own. By doing so, Komatsu targeted to accomplish record-high segment profit of ¥800 *Oku* (Japanese denomination for 100 million) or ¥80 billion for the fiscal 2006 ending March 31, 2006. The number "5" means ROA of 5%.

Goals of the "Move The World. KOMATSU 5-800" Plan (Consolidated)

	Fiscal Year 2006
Net sales	¥1,250 billion
Segment Profit	¥80 billion
ROA	5.0%
Net Debt-to Equity Ratio	Below one

Notes:

- 1) Segment Profit stated above is the sum of segment profit. In conformity with Japanese accounting principles, segment profit is obtained by subtracting cost of sales and selling, general and administrative expenses from net sales.
- 2) $ROA = \text{Pre-tax income} / ((\text{Total assets at the beginning of the year} + \text{Total assets at the end of the year}) / 2)$
- 3) $\text{Net DER} = (\text{Interest-bearing debt} - \text{Cash and time deposits}) / \text{Shareholders' equity}$

Management Strategy

Komatsu places the utmost efforts on the following five management tasks.

1) To accelerate the implementation of the New Growth Strategy for the Construction and Mining Equipment Business

Table of Contents

Demand for construction and mining equipment has entered a recovery phase in North America, the largest market in the world. Komatsu anticipates that demand for its equipment will continue to grow steadily in a mid-range in developing markets such as China, Russia, Southeast Asia and the Middle East, where Komatsu has enjoyed a strong market position.

Against this backdrop, Komatsu is going to reinforce its product and regional strategies and demonstrate the advantages of its extensive international networks as a full-line manufacturer in order to enhance its global market position further.

In Japan, Komatsu is accelerating the development of new IT-based, world's pacesetter business models to expand its business in the downstream markets of rental and used equipment, parts and service, as Komatsu takes advantage of a rich stock of Komatsu machines owned and used by its customers.

2) To reinforce the competitiveness based on the Spirit of Manufacturers

Manufacturing is the source of Komatsu's competitiveness. Komatsu will further promote its successful reform efforts based on the Spirit of Manufacturers' commitment. Komatsu will converge its efforts to develop Unique and Unrivaled products, achieve the top cost-competitive level in each region of the world where it operates, and build on its unique manufacturing technologies.

3) To facilitate selective focus on the criteria of technological advantage and profitability

Komatsu will further promote its selective focus by evaluating all business operations by the criteria of progress of differentiation based on technological advantages and above-the-average profitability of the respective industries which they belong to.

For research, which is the key for innovation, Komatsu has shifted its R&D force to the fields of construction and mining equipment from electronics, strengthening its technological capabilities in the core business.

4) To reinforce its competitive foundation based on technological capabilities and financial position

The basics of competitiveness are technological capabilities (future-leading and today's forefront technologies), strong financial structure and flexible and agile organization and groups with the spirit of challenge held by employees.

Komatsu will continue to reinforce its competitive foundation by keeping a specified level of investment in its R&D operation, making its financial structure lean and strong and introducing systems and programs to encourage employees to demonstrate their spirit of challenge.

5) To further strengthen corporate governance

While ensuring neutrality, soundness, transparency and objectivity of management in addition to effectiveness, Komatsu is also going to establish corporate ethics and engage in environmental conservation and safety management even more seriously than before. Komatsu is working to maximize its corporate value to enjoy the greater trust of shareholders and all other stakeholders.

The cornerstone of Komatsu's management lies in its commitment to Quality and Reliability in order to maximize the corporate value of the Company. This commitment is not limited to delivering safe and innovative products and services which incorporate the viewpoints of customers. It is the most important task to constantly enhance the Quality and Reliability, in a broader sense of the term, of all organizations, businesses, employees and management of Komatsu.

Table of Contents

As Komatsu pushes forward the Move The World. KOMATSU 5-800 mid-range management plan, Komatsu remains committed to further enhancing the Quality and Reliability of management and the corporate value of the Company.

Principal Capital Expenditures

Komatsu invests in the development of new products and the rationalization of production infrastructure with particular focus on Construction and Mining Equipment business. Komatsu's capital expenditures (on delivery basis for property, plant and equipment and not including consumption tax) in the fiscal years ended March 31, 2002, 2003 and 2004 were ¥74,468 million, ¥70,473 million and ¥78,049 million, respectively. Capital expenditures made in the fiscal year ended March 31, 2004 (Fiscal 2004) were as follows.

	Millions of Yen	
	Year ended March 31, 2004	% Change as compared to the previous year
Construction and Mining Equipment	56,345	12.4%
Industrial Machinery, Vehicles and Others	8,649	-12.4%
Electronics	13,055	24.6%
Total	78,049	10.8%

* Amounts include certain leased machinery and equipment accounted for as capital leases in conformity with SFAS No. 13 Accounting for leases .

In the Construction and Mining Equipment business, investment in Japan focused on model changes, development of new models such as Unique and Unrivaled products (by Komatsu's definition, the products equipped with one or two overwhelming advantages that no competitor can catch up for a while and at the same time demonstrate a substantial reduction of production costs when compared with the corresponding existing models) and enhancement of production capacity for the components for Chinese market such as hydraulic components, final drives and cylinders. Overseas, Komatsu continued investing on development of new models, model changes and expansion of production capacity to respond to the increased demand in Chinese market.

In the Industrial Machinery, Vehicles and Others business, investment was made to reduce the costs with the focus on replacement of aging facilities and improvement of workplace safety.

In the Electronics business, Komatsu Electronic Metals Co., Ltd. invested in expansion of production capacity for 300 mm silicon wafers and improvement of production facilities to enhance the competitiveness of 200 mm silicon wafers by achieving higher quality and productivity. In addition, Formosa Komatsu Silicon Corporation made investments to enhance production capacity for 200 mm silicon wafers.

Komatsu's investments were financed principally from funds on hand and capital leases.

Table of Contents

B. Business Overview

Komatsu is a worldwide, integrated manufacturing and sales organization engaged in the manufacture, development, marketing and sale of industrial equipment and products. For Fiscal 2004, Komatsu recorded worldwide net sales of ¥1,196,418 million (U.S.\$11,504 million) and a net income of ¥26,963 million (U.S.\$259 million).

Komatsu's business activities are divided into three segments: (1) Construction and Mining Equipment, (2) Industrial Machinery, Vehicles and Others and (3) Electronics. From Fiscal 2004, the Company changed the segment name of Others to Industrial Machinery, Vehicles and Others.

The consolidated net sales of Komatsu for Fiscal 2004 consisted of the following: Construction and Mining Equipment 72.2%, Industrial Machinery, Vehicles and Others 20.2%, Electronics 7.6%. Sales are made principally under the Komatsu brand, and are almost entirely through sales subsidiaries and sales distributors.

These subsidiaries and distributors are responsible for marketing and distribution and primarily sell to retail dealers in their geographical area. Of consolidated net sales for Fiscal 2004, 59.6% were generated outside Japan, with 23.2% in the Americas, 12.7% in Europe, 7.3% in China, 11.3% in Asia (excluding Japan and China) and Oceania, and 5.1% in the Middle East and Africa.

The manufacturing operations of Komatsu are conducted primarily at plants in Japan, United States, Germany, United Kingdom, Indonesia, Brazil, Italy, China and Taiwan.

(1) Construction and Mining Equipment

Main products in Komatsu's Construction and Mining Equipment business are set forth below.

<u>Categories</u>	<u>Main products</u>
Excavating Equipment	Hydraulic excavators, mini excavators and backhoe loaders
Loading Equipment	Wheel loaders, mini wheel loaders and skid steer loaders
Grading and Roadbed Preparation Equipment	Bulldozers, motor graders and vibratory rollers
Hauling Equipment	Rigid-type dump trucks, articulated-type dump trucks and crawler carriers
Recycling Equipment	Mobile debris crushers, mobile soil stabilizers and mobile tub grinders
Application-specific Equipment	Equipment for forestry, demolition, railway maintenance, etc.

Edgar Filing: KOMATSU LTD - Form 20-F

Tunneling Machines

Shield machines, tunnel-boring machines and small-diameter pipe jacking machines

Engines, Components and Casting Products

Diesel engines, diesel generator sets, hydraulic equipment and steel castings and iron castings

* *The construction and mining equipment product line also includes a variety of utility equipment mini to small machines (e.g., mini hydraulic excavators, mini wheel loaders, backhoe loaders, skid steer loaders, and other similar products) for landscaping and general construction.*

Table of Contents

The Construction and Mining Equipment business is Komatsu's largest business segment, representing 72.2% of total net sales. Net sales of Construction and Mining Equipment business totaled ¥863,244 million (U.S.\$8,300 million) for Fiscal 2004, a 12.4% increase from the previous year, and composed of 30.2% Japan and 69.8% overseas sales.

During Fiscal 2004, Komatsu continued to boost sales in the thriving Chinese market. In the world's largest market of North America, Komatsu also expanded sales against the backdrop of recovered demand after four years of slack market conditions. As a result, overseas sales for the year advanced 13.3% over the previous year, to ¥602,536 million (U.S.\$5,794 million), renewing the record-high sales for the second consecutive year. In Japan, demand also improved and Komatsu expanded sales by 10.5% over the previous year, to ¥260,708 million (U.S.\$2,507 million). Segment profit for the Construction and Mining Equipment business totaled ¥53,908 million (U.S.\$518 million) for the year, representing an impressive improvement of 86.0% from Fiscal 2003.

Komatsu launched the market introduction of Unique and Unrivaled products attaining both outstanding competitive advantages and cost reductions as a result of its efforts in the Spirit of Manufacturers reform. The MR-2 mini hydraulic excavator series, introduced as the first Unique and Unrivaled product in July 2003, enjoyed brisk sales in the major utility equipment markets, such as Japan and North America, and contributed to expanded sales of utility equipment. Strong sales of PC400 and 450 hydraulic excavators, as well as the D475A super-large crawler dozers, also helped to increase sales in Japan and other major markets of the world. All new models have enjoyed excellent customer evaluations.

Japan.

While construction investments remained sluggish in Japan, demand for equipment renewals increased, centering on hydraulic excavators and mini excavators, as exports of used equipment from Japan expanded against the backdrop of accelerating overseas demand. Komatsu teamed up with its distributors nationwide, concentrating its efforts on enhancing the product lineup of the GALEO-series equipment*, and launching the Unique and Unrivaled products on the market. As a result, sales in Japan improved from the previous year after two years of decline.

* GALEO: Genuine Answer for Land & Equipment Optimization, Komatsu's international brand of construction and mining equipment

Further reinforcing the burgeoning used equipment business

Komatsu Used Equipment Corp., which is engaged in the sales of used equipment, continued to boost sales for the year and to strengthen its business foundation, by expanding the scale of its centers for used equipment and improving the utilization of its bidding system on the Internet. At three auctions held in its Kobe, Yokohama and Fukuoka centers in March 2004, the company sold over 2,600 units, achieving record highs in the number of units auctioned, the amount of sales, and the percentage of successful bids. To coordinate and manage the operations of used and rental equipment together, Komatsu established the Rental and Used Equipment Division within the Construction & Mining Equipment Marketing Division in January 2004.

Expanding production capacity in Japan to meet worldwide growth in demand

Against the backdrop of expanding demand for construction equipment around the world, Komatsu's plants in Japan operated in high gear for exports throughout the year. Expecting that the overseas demand will continue to increase into Fiscal 2005, Komatsu expanded production capacity for key components whose production are concentrated in Japan, namely, hydraulic components at Oyama Plant and final drives at

Edgar Filing: KOMATSU LTD - Form 20-F

Osaka Plant that are supplied to Komatsu's assembly plants in Japan and abroad. Keeping pace with the growth in demand around the world, both plants are enhancing their supply capabilities of respective components for medium-size hydraulic excavators as they continue investments to improve and expand their production capacities and streamline the production processes.

Table of Contents

The Americas.

In the United States, after four years of decline, demand for construction and mining equipment upturned, driven by corporate investment incentives coupled with robust housing starts. While working to enhance its product development and customer support capabilities and to strengthen its distributors, Komatsu America Corp., continued its focus on efforts to step-up sales of GALEO-series equipment. In particular, sales of the US-series tight tail swing hydraulic excavators were brisk in response to their outstanding features, including a high level of safety which prevents accidents when the cab body turns, and resultant ease of operations with no worries about the back-end. Launched this year as a Unique and Unrivaled product, the PC400LC medium-sized hydraulic excavators received the keen attention of customers for their outstanding productivity per fuel cost and other features, and helped to increase Komatsu's market share for hydraulic excavators in North America. Komatsu also expanded the product range of its original articulated dump trucks, which were initially introduced on the market in 2001, and expanded sales at a higher rate than that of market demand.

In addition to superb basic performance which had already been proven by its predecessor the MR-1, the MR-2 series mini hydraulic excavators with tight tail swing, introduced as the first Unique and Unrivaled product, have attained the world's highest class of safety and improvements in operator comfort and serviceability. With this new series, Komatsu America Corp. doubled sales of utility equipment from the previous year.

In the Central and South Americas, while demand for construction and mining equipment remained sluggish, Komatsu expanded sales to an iron-ore mine in Brazil during the year.

Developing the autonomous dump truck

During the year, Komatsu developed an autonomous dump truck capable of unmanned operation by inputting the route and task information in the computer program. With test operations already underway in the United States, the commercialization of this dump truck is scheduled for 2005. As full utilization of the high-precision, global positioning system (GPS), ensures safety and enables management and operation of the fleet by a small number of operators, Komatsu expects to see new demand in areas where operators are hard to find, and for deployment at strenuous work sites at high altitudes.

Europe.

In Europe where overall demand recovered from the previous year, Komatsu worked to reinforce its sales and service by consolidating all marketing capabilities at Komatsu Europe International N.V., the European regional headquarters, and expanded the scale of its parts supply center for Europe, the Middle East and Africa. In the Commonwealth of Independent States (CIS or former Soviet Republics), including Russia, demand advanced in the mining industry and from resource development projects, including a petroleum gas development project in Sakhalin. As a full-line manufacturer, Komatsu accelerated sales for the year by providing a diverse range of products and by reinforcing its customer support capabilities. As a result, Komatsu expanded sales over the previous year in Europe, including the CIS.

Table of Contents

Additionally, Komatsu worked to build up sales and service capabilities in Russia by anticipating an increase in demand for equipment in urban areas.

Subsidiaries launching self-developed models

During the year, Komatsu UK Ltd., and Komatsu Utility Europe S.p.A., developed the renewed PW160 wheeled hydraulic excavator and new wheeled handlers, respectively. Both products generated great enthusiasm among the visitors at the bauma 2004, the world's largest class tradeshow for construction equipment held in Munich, Germany, in March of this year. Komatsu has launched sales of these new products and expects they will contribute to an increase in European sales.

Komatsu making full-scale entry into the forestry equipment market

In the second half period, Komatsu acquired Partek Forest AB (renamed as Komatsu Forest AB in January 2004), a Swedish manufacturer of forestry equipment. As the second largest specialized manufacturer of forestry equipment, the former Partek Forest supplied its equipment to some 30 countries particularly in Europe and the United States under the brand name of Valmet. Having inherited its management resources, Komatsu Forest will continue to supply equipment under the well known Valmet brand name, as the company incorporates Komatsu's technologies to further improve the quality and reliability of its equipment. Meanwhile, Komatsu has manufactured and supplied its own forestry equipment based on construction equipment. By adding Komatsu Forest products for full-line offerings, Komatsu has made full-scale entry into the forestry equipment market.

Komatsu receiving a large-lot order from Turkmenistan

In 2002, Komatsu and ITOCHU Corporation signed a long-term supply agreement until 2010 for construction equipment with the government of Turkmenistan. As part of a contract based on this agreement, Komatsu received an order for 250 machines including bulldozers, hydraulic excavators and pipe layers to build and repair pipelines for natural gas. In addition to five service facilities already opened in Turkmenistan, Komatsu has also worked to reinforce its sales and product support capabilities by establishing a training center for operators and service mechanics and a local office.

China.

Demand continued to demonstrate sizable growth, removing some concerns over the adverse effects of credit squeeze and other negative factors. Komatsu focused its efforts on expanding the local production capacity and broadening the product range, and thereby accomplished outstanding growth in sales over the previous year.

Komatsu (China) Ltd. boosted sales for the year, focusing on hydraulic excavators. Making full use of its training center in Changzhou, the company continued to support distributors in their efforts to strengthen sales and service capabilities.

Table of Contents

Komatsu Shantui Construction Machinery Co., Ltd. continued to step up production and sales of hydraulic excavators, especially the mainstay PC200 model. The company also built on sales of smaller PC60 machines which the company embarked on producing during the year.

Komatsu (Changzhou) Construction Machinery Corp. expanded sales of 30 and 40-ton class hydraulic excavators in response to growth in demand for larger equipment. With respect to wheel loaders, Komatsu (Changzhou) Construction Machinery-made models have begun to enjoy excellent customer evaluations, especially from the quarry and harbor transportation industries, which look for high productivity and durability in their equipment. The company has successfully expanded business with China's public corporation of oil and coal mining by delivering a large number of wheel loaders during the year.

Introducing the KOMTRAX machine operations management system in China

In addition to expanding sales of new equipment, Komatsu has proactively been working to strengthen its customer support capability. During the year, Komatsu led the industry by making a full introduction of the GPS-incorporated KOMTRAX machine operations management system on the Chinese market. By locating the position of machines and remotely managing their operating conditions through this system, Komatsu is not only better positioned to improve service efficiency of its distributors, but has also made the strategic move to expand the used equipment and spare parts businesses in the future.

Launching long-term training for service mechanics

In March 2004, Komatsu (China) opened a training program for new service mechanics of its distributors at Shangdong Jiaotong University in Jinan, Shangdong Province. Keeping pace with the expanding market, Komatsu (China) has aggressively been working to reinforce its customer support capability by training service mechanics with advanced technical skills. Designed for 10-month training sessions, including a practical on-the-job training at Komatsu (Changzhou) Construction Machinery, this program has a total of 115 participants from 27 distributors. Their average age is 22.5. After completing the program, they should assume a leadership role in the servicing of Komatsu machines in China.

Asia & Oceania and the Middle East & Africa.

In all these regions, Komatsu's sales increased steadily, supported primarily by demand recovery of mining equipment.

In Southeast Asia, Komatsu teamed up with a powerful distributor, carried out aggressive sales and service activities, and won a large-lot order for mining equipment in Indonesia in the second half period. In Oceania, Komatsu steadily captured growth in demand for construction equipment as housing starts, while meeting increased demand for mining equipment in Australia during the year.

In the Middle East, while there were some concerns over the adverse effects of the Iraqi situation, Komatsu secured sales at about the same level as last year. In Africa, Komatsu expanded sales over the previous year, by seizing upon demand in the mining industry and from infrastructure developments in the Republic of South Africa, the largest market in Africa.

Table of Contents

Demand for mining equipment expanding against the backdrop of increased commodity prices

As commodity prices jumped worldwide, demand for mining equipment began to grow in the last half period of the fiscal year under review. In addition to signing supply contracts with three major mining companies which operate mines around the world, Komatsu focused its efforts on expanding sales of mining equipment in the Central and South Americas, Oceania, Africa and other mining regions of the world. In Indonesia, the development of coalmines took up momentum with their geographical and pricing advantages for exports to China and other Asian countries. Komatsu capitalized on this opportunity and won a large-lot equipment supply order to a leading contractor.

Also during the year, Komatsu began receiving many orders for the WA1200 super-large wheel loaders from around the world and secured a large volume of backlog orders. Komatsu America Corp. and Komatsu Mining Germany GmbH have steadily built on orders for super-large off-highway dump trucks, and super-large hydraulic excavators for mining use, respectively, since the last half period.

While continuing its efforts to secure orders from mining companies around the world, Komatsu is strengthening operations in the CIS where demand for equipment is growing in mining and energy development projects. To expand sales of the mining equipment business, Komatsu is also doubling sales efforts for hydraulic excavators, bulldozers, wheel loaders and other supporting equipment in addition to the main mining equipment of dump trucks.

Reinforcing the spare parts business by introducing competitive products

As an important task, Komatsu engages in sales of spare parts to keep customer demand within the Komatsu Group sales and service networks. PT Komatsu Undercarriage Indonesia manufactures crawler components and spare parts for construction equipment and supplies them to Komatsu Group companies in Asia. During the year, the company expanded production capacity to capture growing demand in Southeast Asia and emphasized the development of cost-competitive spare parts. As a result, the company achieved more-than- doubled sales for the year.

(2) Industrial Machinery, Vehicles and Others

Komatsu's products of Industrial Machinery, Vehicles and Others business are set forth below.

<u>Categories</u>	<u>Main products</u>
Metal Forging and Stamping Presses	Large presses, small and medium-sized presses and forging presses
Sheet-Metal Machines and Machine Tools	Press brakes, shears, laser cutting machines, fine plasma cutting machines and crankshaft millers
Industrial Vehicles and Logistics	Forklift trucks, packing and transport
Others	Defense system (ammunition and armored personnel carriers), outdoor power equipment and prefabricated office structures

Table of Contents

Consolidated net sales of industrial machinery, vehicles and other operations totaled ¥241,991 million (U.S.\$2,327 million) for the year, up 2.2% over the previous year. Of this amount, Japanese sales totaled ¥174,030 million (U.S.\$1,673 million), a 1.9% decline from the previous year, while overseas sales reached ¥67,961 million (U.S.\$653 million), demonstrating an advancement of 14.4%.

Komatsu continued to launch new products with originality in the forklift trucks, industrial machinery, and agricultural and forestry equipment markets, and expanded sales over the previous year. Komatsu Engineering Corp. and Komatsu Logistics Corp. also improved their performance substantially for the year.

Segment profit increased 27.3% over the previous year, to ¥11,251 million (U.S.\$108 million) for the year, reflecting the continued efforts on fixed cost reduction in addition to expanded sales.

Komatsu Forklift

Komatsu Forklift Co., Ltd. carried out aggressive sales and service activities of the LEO-NXT series engine-driven forklift trucks, battery-powered forklift trucks, and Linde-made models, and expanded sales in Japan during the year.

Overseas, the company captured growth in demand in the United States and increased sales of locally produced forklift trucks. The company also expanded export sales of finished units from Japan to the Middle East and CIS. Coupled with continued efforts in fixed cost reduction, the company improved consolidated results from the previous year.

Industrial Machinery Business

In the sheet metal and forging machinery business, demand improved during the year, after having bottomed out during the last fiscal year. This improvement reflects the recovery in capital investments of consumer electronics and general machinery industries, in addition to active investments by the automobile manufacturing industry.

Komatsu Industries Corporation continued to enjoy strong sales of the H1F and H2F Hybrid AC Servo Press series, surpassing the cumulative sum of 400 units since the market introduction about two years ago. The company also focused its efforts on the sales promotion of strategic products such as the twister fine plasma cutting machines, while aggressively engaging in engineering services. As a result, the company advanced both sales and profits for the fourth consecutive year.

Komatsu Machinery Corp. captured opportunities in auto-mobile manufacturers aggressive capital investments, and made an impressive gain in sales of crankshaft millers and other machine tools. The company also improved sales to LCD (liquid crystal display) manufacturers.

Edgar Filing: KOMATSU LTD - Form 20-F

Industrial Machinery Division of the Company improved sales of large presses to automobile manufacturers over the previous year by seizing investments of automobile manufacturers in China and the rest of Asia in particular.

Table of Contents

Komatsu Zenoah

Komatsu Zenoah Co. advanced sales of agricultural and forestry equipment in Japan and abroad for the year. In Japan, the market introduction of originality-emphasized products made contributions to expanded sales, including brisk sales of an innovative knapsack-type brushcutter, that allows for an extended degree of maneuverability, and the G3200EZ chainsaw, which features a unique mechanism for easy tightening of the saw. Overseas, in addition to Europe and Korea, the company increased sales in Australia where it gained a new distributor.

Subsidiaries reinforcing business in the Chinese market

In November 2003, Komatsu Zenoah completed the construction of a new plant for its subsidiary Komatsu Zenoah (Changzhou) Construction Machinery Co., Ltd. Since its establishment in 1999, this subsidiary has engaged in assembly and sales of outdoor power equipment, such as brushcutters and chainsaws. By expanding Chinese production with this new additional plant, Komatsu Zenoah will provide high-quality, cost-competitive products in not only China but also Japan and Europe.

Similarly, Komatsu Forklift established Komatsu Forklift (Shanghai) Co., Ltd., in October 2003, and Komatsu Industries, Komatsu Industries (Shanghai) Ltd., in January of this year, to reinforce their sales and service capabilities in China.

LEO-NXT forklift trucks receives award by the Minister of Economy, Trade and Industry of Japan

In July 2003, Komatsu Forklift's LEO-NXT109 series engine-driven forklift truck received the Award of the Minister of Economy, Trade and Industry, the highest award of the 33rd Machine Design Award. Sponsored by The Nikkan Kogyo Shimbun, Japan's leading industrial newspaper, the Machine Design Award evaluates all possible aspects that are expected from industrial goods, including external design, performance, quality, safety, environmental conservation, economy and marketability. Outstanding appraisals were given to the LEO-NXT109 series for its innovation in compactness. It is the size of a 1-ton class vehicle, but offers the performance of a 2-ton class vehicle.

(3) Electronics

Komatsu's Electronics products are set forth below.

Categories

Electronic Materials
 Temperature-Control and Semiconductor Process Equipment
 Communication Equipment and Control Equipment

Main products

Silicon Wafers, polycrystalline silicon and monosilane gas
 Thermoelectric modules, semiconductor manufacturing-related thermoelectric devices and Excimer laser

Network information terminals, LAN peripheral equipment, mobile tracking and communication terminals and vehicle controllers

The electronics materials business forms the core of Komatsu's Electronics segment. Komatsu produces silicon wafers for the semiconductor industry, polycrystalline silicon used in the production of silicon wafers, and monosilane gas used in the manufacture of polycrystalline silicon and in applications in the electronics and LCD (liquid crystal display) industries. Komatsu also produces temperature control and semiconductor process equipment such as thermoelectric modules and excimer laser, as well as communication Equipment and control equipment.

Table of Contents

Consolidated net sales from the electronics business for the year increased 7.0% over the previous year, to ¥91,183 million (U.S.\$877 million), consisting of Japanese sales of ¥49,011 million (U.S.\$471 million), up 9.5%, and overseas sales of ¥42,172 billion (U.S.\$406 million), up 4.3% over the previous year. Supported by improved business results from Formosa Komatsu Silicon Corporation, a Taiwanese subsidiary of Komatsu Electronic Metals Co., Ltd., segment profit amounted to ¥4,556 million (U.S.\$44 million), regaining a profit from a loss of ¥849 million for the previous fiscal year.

Komatsu Electronic Metals

In the silicon wafers business handled by Komatsu Electronic Metals, demand sustained a note of slow recovery during the year with steady growth for 200mm and 300mm wafers in tandem with the semiconductor market.

Komatsu Electronic Metals and its consolidated subsidiaries conducted aggressive sales efforts in Japan and abroad. With respect to their mainstay 200mm wafers, they worked to enhance the competitiveness of high value-added products centering on the epitaxial and annealed wafers, while striving to expand sales of discrete wafers by responding to customer needs. Concerning 300mm wafers, while operating the production line at the Miyazaki Plant, Komatsu Electronic Metals has steadily strengthened its production capacity by building an integrated production line from a single crystal silicon pulling to the final polishing process at the Nagasaki Plant.

While Komatsu Electronic Metals and subsidiaries experienced difficult conditions for generating profits, including lower prices, the adverse effects of the Japanese yen's appreciation, and a smaller-than-anticipated sales volume of 300mm wafers, they stepped up all-out efforts to further improve operational efficiency and total cost reductions in order to secure profits.

Formosa Komatsu Silicon Corporation in Taiwan increased its prime wafer ratio by including high value-added, annealed wafers in its product portfolio, and implemented customer-tailored sales activities in Taiwan and the rest of Asia. The Taiwanese subsidiary also reinforced its collaboration with Komatsu Electronic Metals in technology, production, sales and all other areas, improved profits by taking full advantage of its production capacity, and built up a solid market position as a leading manufacturer of silicon wafers in Taiwan.

Enhancing competitiveness by utilizing research resources of the Komatsu Group

Komatsu Electronic Metals is proactively engaging in joint research with Komatsu in order to strengthen the competitiveness of its silicon wafer business. For each production process for silicon wafers, the company is working to improve productivity and the resultant reduction of production costs, by introducing the original machinery that incorporates Komatsu's proprietary mechanical controls technology. The company is also making full use of Komatsu's research resources to develop higher value-added products. Komatsu Electronic Metals will continue its collaboration with Komatsu and work to further enhance its competitive edge.

Table of Contents

Advanced Silicon Materials

Advanced Silicon Materials LLC (ASiMI) accelerated sales of monosilane gas to semiconductor and LCD panel manufacturers during the year. Monosilane gas is generated in the process of producing polycrystalline silicon.

Sales of polycrystalline silicon as a raw material for silicon wafers declined from the previous year, as the market environment remained tough with intensified pricing competitions. As a result, total sales of ASiMI declined from the previous year. With respect to profits, however, ASiMI improved profitability substantially with the benefits of a consolidation of plants which was carried out at the end of fiscal 2002.

Making fundamental improvement in profitability

Although its profitability is positioned for recovery, ASiMI anticipates that difficult business conditions, including a belated elimination of the supply-and-demand gap of polycrystalline silicon for semiconductor manufacturing, will remain into the future, and thus revaluated its fixed assets and recorded an impairment loss of ¥17,534 million (U.S.\$169 million). As a result of improved balance sheets, ASiMI should generate a profit in the next fiscal year.

Komatsu Electronics

Komatsu Electronics, Inc. expanded sales of semiconductor manufacturing-related equipment in the second half period against the backdrop of recovered investments by semiconductor manufacturers. Sales of thermoelectric modules for fiber optic communications also made gains for the year, reflecting steady progress in inventory adjustment on the market, while a full recovery of demand was yet to be seen. As a result of continued efforts to reduce fixed and production costs coupled with increased sales, the company has improved profitability to a break-even point.

Table of Contents

Net Sales Information

The financial information (other than net sales figures by geographic segment) as presented in Komatsu's audited consolidated financial statements is reproduced and discussed in this report. Net sales figures by sales destination are presented on the basis of country of purchaser, not selling entity. Net sales data by the geographic origin are set forth in Note 21 to Komatsu's audited consolidated financial statements, included elsewhere in this report. Segment profit by business segment is presented before corporate overhead and inter-segment eliminations.

The following table sets forth Komatsu's net sales by Operating Segments for the years ended March 31, 2004, 2003 and 2002, respectively:

Net Sales by Operating Segments

	Fiscal Year		Fiscal Year		Fiscal Year	
	Ended 3/31/2004		Ended 3/31/2003		Ended 3/31/2002	
	(Millions of Yen)					
Construction and Mining Equipment	¥ 863,244	72.2%	¥ 767,840	70.5%	¥ 731,340	70.6%
Industrial Machinery, Vehicles and Others	241,991	20.2%	236,782	21.7%	227,782	22.0%
Electronics	91,183	7.6%	85,182	7.8%	76,769	7.4%
Total	¥ 1,196,418	100.0%	¥ 1,089,804	100.0%	¥ 1,035,891	100.0%

The following table sets forth Komatsu's net sales recognized by sales destination for the years ended March 31, 2004, 2003 and 2002, respectively:

Net Sales by Geographic Markets

	Fiscal Year		Fiscal Year		Fiscal Year	
	Ended 3/31/2004		Ended 3/31/2003		Ended 3/31/2002	
	(Millions of Yen)					
Japan	¥ 483,749	40.4%	¥ 458,000	42.0%	¥ 478,187	46.2%

Total	¥ 1,196,418	100.0%	¥ 1,089,804	100.0%	¥ 1,035,891	100.0%

Sales and Distribution

Komatsu's international and domestic sales and distribution functions in its Construction and Mining Equipment segment, its principal and largest business segment, are conducted primarily through a network of subsidiaries, affiliates and independent distributors, and to a lesser extent by the partners of jointly-owned companies. While Komatsu's construction and mining equipment sales and distribution operations in Japan focus principally on retail sales to customers, Komatsu uses its extensive Japanese sales distributor network to offer rental programs to its customers, especially within its construction and utility equipment businesses.

Table of Contents

Overseas Markets:

Global Sales and Service Operations

Komatsu's overseas sales of construction and mining equipment are made through a sales and service network consisting of approximately 200 distributors. The distributors around the world are supplied through trading companies and the Company's subsidiaries and affiliated companies, supported by Komatsu's liaison offices. The subsidiaries and affiliated companies are located in Australia, Belgium, Brazil, Chile, China, France, Germany, India, Indonesia, Italy, Mexico, Norway, Poland, Russia, Singapore, South Africa, Sweden, Thailand, the United Arab Emirates, the United Kingdom, the United States of America, etc. The subsidiaries and affiliated companies provide additional inventory and technical assistance to the distributors while facilitating the delivery of emergency spare parts.

Parts Supply Operations

To ensure smooth and efficient parts supply to customers, Komatsu operates P-WINS, a worldwide information network. The service is available on an around-the-clock basis. Each system provides information by a dedicated line to permit on-line real-time processing of customer orders for parts in order to ensure fast delivery.

Reman (Re-manufacturing)

Komatsu offers speedy on-site replacement of major components of construction and mining equipment that have reduced operational rate as a result of failure or aging, with high-quality and reasonably priced remanufactured Reman components. At Komatsu's eight Reman centers around the world, major components and engines for generators are reconditioned into Reman components under rigorous quality control and delivered to many customers.

Training Centers

To fully utilize the potential of Komatsu equipment, Komatsu maintains training centers around the world. These centers provide diversified, advanced training to customers and their operators, Komatsu distributors and Komatsu employees.

Domestic Market:

Sales Operations

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu's construction equipment is sold directly or through distributors or dealers (or sold directly in some cases). In response to strong rental needs from customers, Komatsu also has been committed to enhancing customer satisfaction through the rental companies of its distributors and dealers.

Service Operations

The Komatsu service network covers approximately 400,000 units of equipment sold in Japan. Distributors and dealers form the core of the service network providing total customer-support service that involves before- and after-sales service.

Patents and Licenses

Komatsu owns a substantial number of patents and utility model registrations, as well as applications for patents and utility model registrations in Japan. It also owns a substantial number of patents and applications for patents in other countries where its products are marketed. Moreover, Komatsu manufactures a variety of products under licensing agreements with other various companies.

Table of Contents

While Komatsu considers its patents and licenses, collectively, to be important for the operation of its business, it does not consider any of its patents or licenses or any related group of them to be so important that its expiration or termination would materially affect Komatsu's business as a whole, nor does it believe that any category of its activities is materially dependent upon patents or licenses, or patent or license protection. Komatsu also owns and maintains a substantial number of trademarks and trade names that are registered or otherwise protected under the laws of various jurisdictions.

Competition

Substantially all of the products manufactured by Komatsu face highly competitive conditions both in domestic and overseas markets. Competitors include a large number of companies in and outside Japan, which vary in size, area of distribution and range of products. To address such intense competition, Komatsu places great emphasis on the high quality and performance of its products and related services.

While industry sales statistics for many of Komatsu's products are not available, either for Japan alone or on a worldwide basis, Komatsu believes that on the basis of both sales and production it is the largest manufacturer of construction and mining equipment in Japan and the second largest in the world after Caterpillar Inc. (Caterpillar), a United States corporation. Further, Komatsu believes that it is the largest manufacturer of large-sized presses in Japan.

Regulations

Komatsu's business segments are subject to various regulations throughout the world, which include restrictions on noise and emissions from construction and mining equipment, as well as various environmental controls regulating the manufacturing processes. Komatsu's operations and products are designed to comply with all applicable environmental regulations currently in effect for the relevant jurisdictions.

Komatsu expects to remain in substantial compliance with existing applicable environmental control regulations and does not expect that the cost to comply with foreseeable requirements will have a material effect upon its financial position and the results of the operations. Komatsu established the Earth Environment Committee in 1991, and formulated the Earth Environment Charter in 1992. Since then, Komatsu has made progress in efforts such as reduction of industrial waste, energy saving (reduction of CO2 emission), and recycling of materials. Since Fiscal 2000, Komatsu has published an Environment Report, which covers the activities and achievements of Komatsu's manufacturing facilities, specifically 14 facilities in Japan and 17 facilities abroad which is defined as Komatsu Group in Komatsu Earth Environment Charter. The report describes how Komatsu addresses environmental issues and reports the results of its development of new environmental technologies and the status of its environmental activities. Komatsu also introduced its environmental accounting system to its overseas manufacturing facilities in Fiscal 2000. Set forth below is the Komatsu Earth Environment Charter as revised in 2003.

Table of Contents

Komatsu Earth Environment Charter

(2003 revision)

Corporate Principles (Extracted)

1. Contributions to Realization of Sustainable Society

The Komatsu Group recognizes conservation of the earth's environment for a sustainable society as among the most important tasks for mankind in the 21st century. The Komatsu Group endeavors to contribute to this task by actively integrating environmental conservation into all of its business activities. The Komatsu Group reaffirms its long-term commitment to this effort as an important management priority.

2. Simultaneous Realization of Environmental and Economic Performance

The Komatsu Group is committed to improving both environmental performance and economic efficiency, as a group of companies working toward superior manufacturing for customer satisfaction. To this end, the Group constantly takes up the challenge of advancing technologies to develop creative products that improve both environmental performance throughout the product's life cycle and the product's economic performance at the same time.

3. Observance of Corporate Social Responsibility

Each company of the Komatsu Group seeks to be a respected corporate citizen of the host local community in nations around the world. Each company strives to fulfill its corporate social responsibilities, including compliance with applicable laws and regulations on environmental conservation, as well as voluntary involvement and participation in community programs to address environmental concerns, and through dialogue and coordination with regulatory authorities, local leaders, and the public. Each of the individual Komatsu Group companies is responsible for fulfilling its independent legal obligations.

Komatsu manages the energy it consumes for production activities in the form of electric power, gas and fuel oil by using an index that converts production value to units of energy. The original target was to reduce energy consumption by 15% by Fiscal 2011 from the Fiscal 1991 level. During Fiscal 2001, Komatsu raised the reduction of the energy consumption target to 25%.

Komatsu is committed to implementing a program to eliminate all types of waste generated during the production process and reuse it as raw materials in other fields as part of its Zero Emissions activities. Though Komatsu's original plan was to reduce the bury-or burn waste to zero level* by Fiscal 2011, Komatsu accelerated the schedule. The Company's four plants in Japan achieved zero emissions* as early as Fiscal 2001 and Komatsu Forklift Co., Ltd. and Komatsu Electronic Metals Co., Ltd. (Nagasaki and Miyazaki Plants) followed in Fiscal 2003. All the other

domestic manufacturing facilities plan to achieve zero emissions by Fiscal 2006.

* *The recycle rate (recycle volume divided by generated waste) of 99% or more has been defined as the zero level.*

Sources of Supply

The construction equipment and industrial machinery produced by Komatsu are composed of various types of parts and as it is not necessarily efficient in production to manufacture all of such component parts inside Komatsu, Komatsu only produces the major components internally and purchases other parts such as electrical components, tires, hoses, and batteries, etc. from the manufacturers who specialize in manufacturing these products, and Komatsu procures the rest of the parts such as metal forgings, machine components, sheet metal parts and various accessories from Komatsu's business partners. Of Komatsu's consolidated overseas net sales of ¥712,669 million for the fiscal year ended March 31, 2004, export from Japan (including parts and components) accounted for ¥218,077 million (30.6% of total overseas sales). This means that around 30% cost of sales of overseas sales was procured in Japan and the rest was procured overseas. Komatsu believes that it has adequate and reliable supply sources for its material parts and raw materials, and that it has appropriate alternate sources available consistent with prudent business practices. Komatsu does not believe that the prices for material parts and raw materials are particularly volatile.

Table of Contents**C. Organizational Structure**

As of March 31, 2004, Komatsu Ltd. had 141 consolidated subsidiaries and 46 affiliates under the equity method. The following list shows the principal subsidiaries as of March 31, 2004.

Name of Company	Country of Incorporation	Ownership Interest* (%)
Komatsu Forklift Co., Ltd.	Japan	65.0
Komatsu Electronic Metals Co., Ltd.	Japan	62.6
Komatsu Zenoah Co.	Japan	100.0
Komatsu Castex Ltd.	Japan	100.0
Komatsu Kinki Ltd.	Japan	100.0
Komatsu House Co., Ltd.	Japan	89.3
Komatsu Logistics Corp.	Japan	97.1
Komatsu Industries Corporation	Japan	100.0
Komatsu Chugoku Ltd.	Japan	100.0
Komatsu Tokyo Ltd.	Japan	100.0
Komatsu Machinery Corporation	Japan	100.0
Komatsu Hokkaido Ltd.	Japan	100.0
Komatsu Electronics, Inc.	Japan	100.0
Komatsu Used Equipment Corp.	Japan	100.0
Komatsu America Corp.	U.S.A.	100.0
Hensley Industries, Inc.	U.S.A.	100.0
Komatsu do Brasil Ltda.	Brazil	100.0
Advanced Silicon Materials LLC	U.S.A.	100.0
Komatsu Europe International N.V.	Belgium	100.0
Komatsu UK Ltd.	UK	100.0
Komatsu Hanomag GmbH	Germany	100.0
Komatsu Mining Germany GmbH	Germany	100.0
Komatsu Forest AB	Sweden	100.0
Komatsu Utility Europe S.p.A.	Italy	100.0
Komatsu Asia & Pacific Pte Ltd	Singapore	100.0
P T Komatsu Indonesia Tbk	Indonesia	55.1
Bangkok Komatsu Co., Ltd.	Thailand	74.8
Komatsu (China) Ltd.	Republic of China	100.0
Komatsu (Changzhou) Construction Machinery Corp.	Republic of China	85.0
Komatsu Shantui Construction Machinery Corp.	Republic of China	60.0

* Proportion of ownership interest includes indirect ownership and equals to the proportion of voting power.

Table of Contents**D. Property, Plants and Equipment**

Komatsu's manufacturing operations are conducted in 33 principal plants, 12 of which are located in Japan. As of March 31, 2004, the 33 plants had an aggregate manufacturing floor space of 1,592 thousand square meters (17,136 thousand square feet). In addition, Komatsu uses additional floor space at such plants and elsewhere for laboratories, office buildings, and employee housing and welfare facilities. Komatsu could increase its production by, among other methods, requesting that its employees work overtime or by increasing the number of shifts working at its plants.

Komatsu owns most of the manufacturing facilities and the land on which they are located. A portion of the property owned by Komatsu is subject to mortgages or other types of liens which have been established on separate items of property. At March 31, 2004, the net book value of the property owned by Komatsu was ¥367,361 million, of which ¥25,588 million was subject to encumbrances.

The name and location of Komatsu's principal plants, their approximate aggregate floor space, and the principal products manufactured therein as of March 31, 2004 are as follows:

<u>Name and Location</u>	<u>Floor Space</u>		<u>Principal products</u>
	<u>Thousand sq. meter</u>	<u>Thousand sq. ft</u>	
In Japan:			
Awazu Plant Komatsu, Ishikawa	227	2,443	Small and medium-sized bulldozers, Small hydraulic excavators, Mini excavators, Small and medium-sized wheel loaders

* *Komatsu Cummins Engine Co., Ltd and Komatsu Castex Ltd. (Oyama Manufacturing Plant) are located at Oyama Plant of Komatsu Ltd.*

The head office of the Company is located in a ten-story office building in Tokyo, which is leased from Komatsu Building Co., Ltd., a wholly-owned consolidated subsidiary of the Company. In July 2004, the Board of the Company made a resolution to merge Komatsu Building Co., Ltd into Komatsu Ltd. to be effective on October 1, 2004.

Komatsu considers that its manufacturing plants and other facilities are well maintained and believes that its plant capacity is adequate for its current requirements. Komatsu does not believe that there are any environmental issues that may materially affect Komatsu's utilization of its assets. At March 31, 2004, assets pledged as collateral for short-term debt, long-term debt and guarantees for debt are as follows:

	Millions of yen	Thousands of U.S. dollars
Time deposits	¥ 361	\$ 3,471
Trade notes and accounts receivable	947	9,106
Land and buildings held for sale	121	1,163
Property, plant and equipment less accumulated depreciation	25,588	246,039
Total	¥ 27,017	\$ 259,779

The above assets were pledged against the following liabilities:

	Millions of yen	Thousands of U.S. dollars
Liabilities appearing in the consolidated balance sheets as:		
Short-term debt	¥ 947	\$ 9,106
Long-term debt	25,457	244,779
Guarantees for debt	613	5,894

Total	<u>¥ 27,017</u>	<u>\$ 259,779</u>
-------	-----------------	-------------------

Table of Contents

Plans for Installation and Disposal of Equipment

The details of capital investment plans (new installation and retirement on an individual project basis) were not decided as of the end of the reporting term. The plan amount of ¥86,000 million shown below for the next reporting term is the management's estimate of the total for all business segments.

Name of business segment	Capital investment plan amount	Principal objectives	Fund procurement
	at March 31, 2004		
	(Millions of yen)		
Construction and Mining Equipment	63,000	Development investment, capacity enhancement, etc.	Funds on hand Bank borrowings
Industrial Machinery, Vehicles and Others	11,000	Rationalization of production, renewal of obsolete equipment, etc.	Funds on hand Bank borrowings
Electronics	12,000	Capacity enhancement and improvement of productivity	Funds on hand Bank borrowings
Total	86,000		

Notes:

1. Capital investment plan amounts exclude consumption tax, etc.
2. Planned Investments by Segment are as follows:

In the Construction and Mining Equipment business, investments will be made to increase the production capacity with a goal of achieving the mid-range management plan. Such investments in Japan include: enhancement and rationalization of production focusing on the key components such as hydraulic components, final gears, transmissions and axles; model changes of engines to meet the Tier III emission regulation; improvement of quality through inline quality assurance. Outside Japan, investment will be made in development of new models, model changes and global utilization of the production capacity.

In the Industrial Machinery, Vehicles and Others business, investments will also be made in replacement of obsolete facilities and installation of safety and environmental equipment, mainly to rationalize production.

In the Electronics business, the primary investment will be in upgrading capital equipment for increased production of 300mm wafers and measures to strengthen the competitiveness of 200mm-wafer products (quality and productivity improvements).

Edgar Filing: KOMATSU LTD - Form 20-F

As a part of the restructuring of production, Komatsu transferred the production line in Kawasaki, Kanagawa, Japan, to another plant and the Kawasaki facilities were utilized as a base for logistics subsidiaries. In order to improve asset utilization, Komatsu sold the subject land to Shimachu Co., Ltd. in July 2004. The details of the sale are as follows.

Description of the Asset:	Land (73,128 square meters)
Address:	20-1, 3-chome Nakase, Kawasaki-ku, Kawasaki-shi, Kanagawa Prefecture, Japan
Book Value:	1,800 million yen
Sales Price:	11,280 million yen

Table of Contents

Item 5. Operating and Financial Review and Prospects

A. Operating results

The following discussion and analysis provides information that management believes to be relevant to understanding Komatsu's consolidated financial condition and results of operations.

Overview

Komatsu engages in development, manufacture and sale of industrial equipment and products. Komatsu's business activities are divided into three segments: (1) Construction and Mining Equipment, (2) Industrial Machinery, Vehicles and Others and (3) Electronics. From Fiscal 2004, the Company changed the segment name of Others to Industrial Machinery, Vehicles and Others.

Summary of Operating Results

Consolidated net sales advanced 9.8% over the previous year to ¥1,196.4 billion (U.S.\$11,504 million, at U.S.\$1=¥104), renewing the record-high figure achieved in Fiscal 1998. This increase in net sales was primarily due to (1) increased sales of construction and mining equipment especially in China and North America, (2) growth in orders for mining equipment in the second half period of Fiscal 2004, (3) improved sales of industrial machinery, and (4) increased sales of electronics products.

Segment profit* nearly doubled from the previous year, to ¥65.9 billion (U.S.\$634 million), topping the last peak of ¥49.9 billion recorded for the fiscal year ended March 31, 1997.

* *In conformity with Japanese accounting principles, segment profit is obtained by subtracting cost of sales and selling, general and administrative expenses, from net sales.*

Income before income taxes doubled over the previous year to ¥27.0 billion (U.S.\$260 million) mainly due to segment profit increase even after reflecting the impairment loss of ¥17.5 billion (U.S.\$169 million) of Advanced Silicon Materials, LLC (ASiMI) based on the assumption that the business environment will remain unfavorable with oversupply conditions during the fiscal year ended March 31, 2004 for polycrystalline silicon resulting in a downward price trend and intensified pricing competition.

Net income for the year reached ¥26.9 billion (U.S.\$259 million), representing a nine-fold increase as compared to the fiscal year ended March 31, 2003. This impressive growth reflects not only improved pre-tax income but also the recognition of deferred tax asset relating to the investment in Komatsu Silicon America, Inc., reflecting the tax benefit soon to be deductible upon the deduction of the investment for tax purposes.

Edgar Filing: KOMATSU LTD - Form 20-F

The average Yen/U.S. dollar exchange rates were 113 and 121 for the fiscal years ended March 31, 2004 and 2003, respectively. The average Yen/Euro exchange rates were 133 and 121 for the fiscal years ended March 31, 2004 and 2003, respectively. In comparison to the Fiscal 2003, Yen was strong against U.S. dollar and weak against Euro for Fiscal 2004. Due to such currency fluctuations, Komatsu analyses that this year's segment profit for Construction and Mining Equipment business, Komatsu's largest business segment which accounts for 72.2% of net sales, decreased by approximately ¥5.4 billion from the previous fiscal year. The calculation was made after deducting cost of sales and selling, general and administrative expenses from sales in foreign currency transactions, then multiplying the result by the difference in average exchange rates of this year and last year. However, the effects of changes of selling price due to currency fluctuations were not taken into account.

Table of Contents

Business Environment

During Fiscal 2004, the business environment for construction and mining equipment began to improve worldwide, mainly driven by demand recovery in North America and notable increase in demand in China. North America, the world's largest market for construction and mining equipment, has entered a demand recovery phase after the 4-year recession, as a result of corporate investment incentives by the U.S. government coupled with robust housing construction. For the fiscal year ended March 31, 2004, demand of construction equipment has grown substantially in China because of the increased construction investment. In the Commonwealth of Independent States (CIS: the former Soviet republics), the Middle East, Africa and some other regions where Komatsu has built a solid market position, demand for construction equipment has grown in relation to the increased investments in energy-related areas and social infrastructure developments. In Japan, while construction investments remained sluggish during Fiscal 2004, demand for investments to replace used equipment with new equipment against the backdrop of accelerating overseas demand for, and expanded exports of, used equipment.

In addition, as commodity prices soared worldwide, demand for mining equipment began to grow in the last half period of Fiscal 2004 in the Central and South Americas, Oceania, Africa and other mining regions in the world.

The recovery in demand for construction and mining equipment in the above markets and the introduction of the products with unique features such as GALEO-series equipment in recent years are generating synergy effects.

With regard to industrial machinery, vehicles and others, demand for sheet metal and forging machinery equipment improved during Fiscal 2004 due to the recovery in capital investments of consumer electronics and general machinery industries, as well as active investments by the automobile manufacturing industry.

With respect to electronics, the demand for silicon wafers, especially 200mm and 300mm wafers, increased during Fiscal 2004 with the recovery of the semiconductor market in Asia, especially Taiwan, and investment by semiconductor manufacturers for flash memory and DRAM (dynamic random access memory). The market environment for the polycrystalline silicon, which is a raw material for silicon wafers, remained difficult with intensified price competitions between Komatsu and other manufacturers of such products. On the other hand, demand for monosilane gas increased because of increased demand for semiconductors and LCD (liquid crystal display) panels.

Komatsu is subject to various regulations throughout the world, which include restrictions on noise and emissions from construction and mining equipment, as well as various environmental controls regulating the manufacturing processes. Komatsu's operations and products are designed to comply with all applicable environmental regulations currently in effect for the relevant jurisdictions.

Table of Contents

Critical Accounting Policies

Komatsu prepares the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. As such, Komatsu is required to make certain estimates, judgments and assumptions that Komatsu believes are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the periods presented. By their nature, these estimates and assumptions are subject to an inherent degree of uncertainty, and are based on Komatsu's historical experience, terms of existing contracts, Komatsu's observance of trends in the industry, information provided by its customers and information available from other outside sources, as appropriate. For a summary of the significant accounting policies, including the critical accounting policies discussed below, please see Note 1 to the Consolidated Financial Statements.

The significant accounting policies the management believes are the most critical for the full understanding and evaluation of Komatsu's reported financial results are as follows:

(1) Allowance For Doubtful Receivables

Komatsu estimates the collectibility of its trade receivables. A considerable amount of judgment is required in assessing the realization of these receivables, including the current financial position of each customer. Komatsu establishes reserve for expected losses based on the credit information including past experience and collectibility is individually reviewed regarding overdue receivables. While Komatsu believes that the reserve to be adequate, it is possible that accuracy of the estimation process could be materially impacted due to change in the composition of the receivables.

(2) Deferred Income Tax Assets

During the process of preparing the consolidated financial statements, Komatsu estimates income taxes in each of the jurisdictions in which Komatsu operates. This process involves Komatsu estimating the current income tax exposure and assessing net segment loss carryforwards and temporary differences resulting from differing treatment of items for income tax and accounting purposes. These carryforwards and temporary differences result in deferred tax assets and liabilities, which are included within Komatsu's consolidated balance sheet. Komatsu must then assess the likelihood that Komatsu's deferred tax assets will be recovered from future taxable income and available tax planning strategies, and, to the extent Komatsu believes that recovery is not more likely than not, Komatsu must establish a valuation allowance to reduce the amount of asset reflected in the consolidated balance sheet. When the actual results differ from these estimates, Komatsu may need to adjust the valuation allowance which could materially affect Komatsu's financial position and results of operations.

(3) Valuation of Long-Lived Assets

Komatsu's long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to management's best estimate of future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment loss to be recognized is measured by the amount by which the carrying amount of the assets exceed the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. For assets held for use, the

Edgar Filing: KOMATSU LTD - Form 20-F

undiscounted cash flow projections used to make assessment involves significant judgments, such as impairment. Fair value is measured based on the discounted cash flow model or independent appraisal. In the event that there are changes in strategy and market conditions, the assessment of the ability to recover the carrying amount of long-lived assets would change.

Table of Contents

(4) Fair Value of Financial Instruments

The fair values of derivative financial instruments, consisting principally of foreign currency contracts and interest swap agreements, are estimated by obtaining quotes from brokers.

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with absolute precision. Change in assumptions could affect the estimates.

(5) Pension Liabilities and Expenses

The amounts of Komatsu's pension obligation and net period pension cost are dependent on certain assumptions used to calculate such amounts. Those assumptions are described in Note 12 to the consolidated financial statements and include the discount rate, expected rate of return on plan assets and rates of increase in compensation. In accordance with generally accepted accounting principles, actual results that differ from the assumptions are accumulated and amortized over future service years of employees and therefore, generally affect Komatsu's recognized expense and recorded obligation in such future periods. The effect of rise in the discount rate by 0.1 point would be the decrease of projected benefit obligations by approximately ¥1 billion. While Komatsu believes that its assumptions are appropriate, in the event that there are significant differences in the actual results or significant changes in the assumptions, the pension obligation and the future expenses would be impacted.

(6) Securitization

Komatsu has several accounts receivable securitization programs and such securitizations are expected to become an important source of funds for Komatsu in the future. The receivables that are securitized are deducted from the consolidated balance sheet when they are sold. Komatsu has entered into contractual arrangements with special purpose companies solely for the purpose of securitizing its receivables. For key assumptions used in measuring the fair value of retained interests related to securitization transactions, please refer to Item 5.E. Off-Balance Sheet Arrangements .

New Accounting Standards

In January 2003, the FASB issued Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities (VIEs), which addresses consolidation by business enterprises of variable interest entities that either: (1) do not have sufficient equity investment at risk to permit the entity to finance its activities without additional subordinated financial support, or (2) the equity investors lack an essential characteristic of a controlling financial interest.

In December 2003, the Financial Accounting Standards Board issued FASB Interpretation No. 46 (revised December 2003)(FIN 46R), Consolidation of Variable Interest Entities , which addresses how a business enterprise should evaluate whether it has a controlling financial interest in an entity through means other than voting rights and accordingly should consolidate the entity. FIN 46R replaces FIN 46.

Table of Contents

For any VIEs that must be consolidated under FIN 46R that were created before December 31, 2003, the assets, liabilities and non-controlling interests of the VIEs initially would be measured at their carrying amounts at the date the requirements of this Interpretation first apply. If determining the carrying amounts is not practicable, fair value at the date FIN 46R first applies may be used to measure the assets, liabilities and non-controlling interest of the VIEs. Any difference between the net amount added to the balance sheet of the consolidating enterprise and the amount of any previously recognized interest in the newly consolidated entity shall be recognized as the cumulative effect of an accounting change.

Foreign private issuers with variable interests in VIEs created after January 31, 2003 are required to apply FIN 46R immediately.

The mandatory effective dates of FIN 46R for foreign private issuers with variable interests in VIEs created before February 1, 2003 vary depending on the foreign private issuers' year-end and frequency of interim reporting. The companies were required to apply FIN 46R to both special-purpose entities and other VIEs in consolidated financial statements from the periods beginning April 1, 2004.

For any VIEs that must be consolidated under FIN 46R that were created before February 1, 2003, the cumulative effect of the accounting change should be recognized as of April 1, 2004.

The adoption of FIN 46R did not have and is not expected to have a material effect on the Company's consolidated financial position and results of operations.

Table of Contents**Comparison of Fiscal 2004 with Fiscal 2003**

The following table sets forth selected consolidated financial and operating data, including data expressed as a percentage of total consolidated net sales for the periods indicated, and the change in each consolidated financial line item between the indicated fiscal years:

	Millions of Yen				% change 2004 vs. 2003	Thousands of
	Year Ended March 31					U.S. dollars
	2004		2003			2004
Revenues						
Net sales	¥ 1,196,418	100.0%	¥ 1,089,804	100.0%	9.8%	\$ 11,504,019
Interest and other income	11,945	1.0%	13,436	1.2%	-11.1%	114,856
Total	1,208,363	101.0%	1,103,240	101.2%	9.5%	11,618,875
Cost of sales	881,231	73.7%	815,557	74.8%	8.1%	8,473,375
Selling, general and administrative	249,261	20.8%	241,069	22.1%	3.4%	239,674
Segment profit	65,926	5.5%	33,178	3.0%	98.7%	633,904
Interest	14,915		14,693			143,413
Impairment loss on long-lived assets	19,051					183,183
Special termination benefit						
Other	16,869		19,016			162,202

Net sales.

Consolidated net sales for the fiscal year ended March 31, 2004 increased by 9.8% (or ¥106,614 million) from ¥1,089,804 million to ¥1,196,418 million (U.S.\$11,504 million) as compared to the fiscal year ended March 31, 2003, renewing the record-high figure achieved in Fiscal 1998. Sales while sales in overseas increased 12.8% over the previous year, to ¥712,669 million (U.S.\$6,853 million), sales in Japan increased 5.6% over the previous year, to ¥483,749 million (U.S.\$4,651 million). While Komatsu achieved increased sales for all business segments over the previous year, the main factors for the increase are (1) increased sales of construction and mining equipment, especially in China and North America, (2) growth in orders for mining equipment in the second half period of Fiscal 2004, (3) improved sales of industrial machinery, and (4) increased sales of electronics products.

Table of Contents

Komatsu achieved a gain in overseas construction equipment sales by making the most of improved market conditions worldwide, especially in China and North America. Sales in China increased by 66.1% (3.2% contribution to consolidated net sales) compared to Fiscal 2003, primarily due to the expanded demand for construction equipment, especially hydraulic excavators, as a result of (1) the buoyant demand in the construction industry and (2) the effect of consolidation of Komatsu Shantui Construction Machinery Corp. in August 2002. Sales in the Americas increased by 10.3% (2.4% contribution to consolidated net sales) primarily because of demand recovery in the United States supported by the corporate investment incentives by the U.S. government and an increased demand for construction of housing.

Mining equipment sales increased primarily due to a large-lot order in Indonesia Komatsu won during the second half of Fiscal 2004 and increased demand in Australia, against the backdrop of the rise in commodity prices worldwide.

Sales in the Industrial Machinery, Vehicles and Others business for Fiscal 2004 increased by 2.2% as compared to the Fiscal 2003, primarily due to aggressive sales and service efforts with a focus on products with unique features.

Sales in the electronics business for Fiscal 2004 improved over Fiscal 2003, mainly due to the expansion of the silicon wafer business in Taiwan.

Interest and Other Income.

Consolidated interest and other income for the fiscal year ended March 31, 2004 decreased by 11.1% (or ¥1,491 million) from ¥13,436 million to ¥11,945 million (U.S.\$115 million) as compared to the fiscal year ended March 31, 2003. This decrease was primarily due to (1) the decrease in dividends income by ¥418 million mainly as a result of decreased dividends income from entities other than consolidated subsidiaries and (2) decrease of gain from the sale of fixed assets by ¥571 million, as compared to the fiscal year ended March 31, 2003.

Total Revenue.

As a result of the above factors, consolidated total revenue for the fiscal year ended March 31, 2004 increased by 9.5% (or ¥105,123 million) from ¥1,103,240 million to ¥1,208,363 million (U.S.\$11,619 million) as compared to the fiscal year ended March 31, 2003.

Cost of Sales.

Consolidated cost of sales for the fiscal year ended March 31, 2004 increased by 8.1% (or ¥65,674 million) from ¥815,557 million to ¥881,231 million (U.S.\$8,473 million) as compared to the fiscal year ended March 31, 2003. This increase was mostly due to increased sales. However, percentage increase of cost of sales (8.1%) was lower than that of net sales (9.8%), primarily due to Komatsu's efforts to manage and reduce production costs consisting of variable production costs, such as procurement costs and engineering costs, as well as manufacturing fixed costs, such as personnel and related costs, rent and depreciation costs.

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu promotes standard variable margin (SVM) management as a framework for cost reduction. SVM is allied with the concept of gross profits and based on the deduction of standard variable costs (SVC), such as procurement and in-house machining costs, as well as direct selling expenses from sales.

Table of Contents

With respect to SVC, Komatsu has positioned its plants with development capabilities as *Mother Plants* responsible for substantially reducing SVC at the time of new product development or model changes. *Mother Plants* also promote the standardization of manufacturing technologies through the concurrent engineering of production and development and by developing a framework to transfer standardized technologies to other plants overseas that are responsible for producing corresponding models.

Mother Plants also support overseas plants in other areas, including production management. For example, when an overseas plant overseas starts the production and sale of new products, the engineers from its mother plant help the launch so that the overseas plant produces steady results in terms of cost reduction.

Komatsu launched the market introduction of *Unique and Unrivaled products* which demonstrate a substantial reduction of production costs compared with the corresponding existing models during Fiscal 2004. The effect of such production cost reduction achieved by *Mother Plants* in the development stage has become visible in the cost of sales for Fiscal 2004, after having transferred the standardized technologies from *Mother Plants* to other plants around the world. Cost of sales to sales ratio for the fiscal year ended March 31, 2004 improved by 1.1 points to 73.7% as compared to 74.8% in the fiscal year ended March 31, 2003, primarily by such efforts to reduce production cost in this manner.

Selling, General and Administrative Expenses.

Consolidated selling, general and administrative expenses (SG&A) for the fiscal year ended March 31, 2004 increased by 3.4% (or ¥8,192 million) from ¥241,069 million to ¥249,261 million (U.S.\$2,397 million) as compared to the fiscal year ended March 31, 2003. As Komatsu continued its efforts to reduce SG&A fixed cost, SG&A to sales ratio fell by 1.3 points from Fiscal 2003 to 20.8%, and thus the increase in SG&A was primarily due to the increase in direct selling expenses and other factors accompanying the increase in net sales.

Consolidated research and development expenses for the fiscal year ended March 31, 2004 increased by 9.2% (or ¥3,575 million) from ¥39,027 million to ¥42,602 million (U.S.\$410 million) as compared to the fiscal year ended March 31, 2003. In terms of a percentage of net sales, the research and development expenses for Fiscal 2004 (3.56%) remained at the same level as Fiscal 2003 (3.58%). For details as to expenditures on research and development activities, see Item 5.C.

Consolidated advertising expenses for the fiscal year ended March 31, 2004 decreased by 1.0% (or ¥34 million) from ¥3,446 million to ¥3,412 million (U.S.\$33 million) as compared to the fiscal year ended March 31, 2003. As a percentage of net sales, advertising expenses accounted for 0.29% in Fiscal 2004 compared to 0.32% in Fiscal 2003. Advertising expenses accounted for 1.4% of the selling, general and administrative expenses during the fiscal year ended March 31, 2004.

Segment Profit.

Segment profit for the year ended March 31, 2004 increased by 98.7% from ¥36,982 million to ¥65,926 million (U.S.\$670 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily due to the increase in segment profit of Construction and Mining Equipment business by 86.0% (or ¥24,918 million) as a result of the increase of sales volume and the decrease in the fixed costs by approximately ¥5,700 million.

Table of Contents

Impairment Loss on Long-Lived Assets.

In accordance with SFAS No. 144 Accounting for the Impairment or Disposal of Long-Lived Assets, which develops a single accounting method, based on the framework established in SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of, the long-lived assets and certain identifiable intangibles to be held and used by Komatsu are reviewed for impairment based on a cash flow analysis of related operations whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Long-lived assets and certain identifiable intangibles to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

In the fiscal year ended March 31, 2004, ASiMI reappraised its fixed assets of the Butte plant, which Komatsu recognized an impairment loss during the fiscal year ended March 31, 2002, using estimated future cash flows and recorded an additional impairment loss of ¥17,534 million (\$169 million) on such assets based on the assumption that the business environment will remain unfavorable with an excess supply in the market of polycrystalline silicon as well as intensified pricing competition in silicon wafers.

Other Expenses.

Consolidated other expenses for the fiscal year ended March 31, 2004 decreased by 11.3% (or ¥2,147 million) from ¥19,016 million to ¥16,869 million as compared to the fiscal year ended March 31, 2003. This decrease primarily consisted of the following factors: (1) decrease in loss on marketable securities by approximately ¥8,400 million as compared to Fiscal 2003 from ¥8,900 million to ¥500 million, (2) increase of loss on disposal or sale of fixed assets by approximately ¥5,200 million (from a gain of approximately ¥1,800 million to a loss of approximately ¥3,400 million) as a result of the sale of the land and buildings of Komatsu Silicon America, Inc., and (3) increase of foreign exchange loss by approximately ¥1,800 million.

Total Expenses.

As a result of the above factors, consolidated total expenses for the fiscal year ended March 31, 2004 increased by 8.3% (or ¥90,992 million) from ¥1,090,335 million to ¥1,181,327 million (U.S.\$11,359 million) as compared to the fiscal year ended March 31, 2003.

Income Before Income Taxes, Minority Interests and Equity in Earnings.

Consolidated income (loss) before income taxes, minority interests and equity in earnings of affiliates for the fiscal year ended March 31, 2004 increased by ¥14,131 million from ¥12,905 million to ¥27,036 million (U.S.\$260 million) as compared to the fiscal year ended March 31, 2003 as total net sales increased at a greater percentage amount than the cost of sales.

Total Income Taxes.

Edgar Filing: KOMATSU LTD - Form 20-F

Total consolidated income taxes for the fiscal year ended March 31, 2004 decreased by ¥9,487 million from an income tax provision of ¥5,968 million to an income tax benefit of ¥3,519 million (U.S.\$34 million).

The decrease was mainly due to the recognition of deferred tax asset of ¥17,504 million (U.S.\$168 million) during the fiscal year ended March 31, 2004 relating to its investment in Komatsu Silicon America, Inc., reflecting the tax benefit soon to be realized upon the deduction of its investment for tax purposes. The loss had previously been recognized for financial reporting in 2002 and 2003. The actual effective tax rate was negative 13.0% for the fiscal year ended March 31, 2004 and a positive 46.2% for the fiscal year ended March 31, 2003. The negative percentage in actual effective tax rate was due primarily to the recognition of such deferred tax asset relating to its investment in KSA.

Table of Contents

Income Before Minority Interests and Equity Earnings.

Consolidated income (loss) before minority interests and equity earnings for the fiscal year ended March 31, 2004 increased by ¥23,618 million from ¥6,937 million to ¥30,555 million (U.S.\$294 million) as compared to the fiscal year ended March 31, 2003. This increase was due to three factors: (1) increased segment profit of ¥65,926 million; (2) negative impact of ¥19,051 million impairment loss in 2004; and (3) a ¥9,487 million decrease of income tax described above.

Minority Interests in Income of Consolidated Subsidiaries.

Consolidated minority interests in income of subsidiaries for the fiscal year ended March 31, 2004 increased by ¥962 million from ¥2,877 million to ¥3,839 million (U.S.\$37 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily attributable to the fact that Komatsu Shantui Construction Machinery Co., Ltd., which produces and sells construction equipment in China, and Formosa Komatsu Silicon Corporation, which manufactures and sells silicon wafers used in semiconductors, enjoyed favorable earnings performances during the fiscal year ended March 31, 2004.

Equity in Earnings and Losses of Affiliated Companies.

Consolidated equity in earnings of affiliated companies for the fiscal year ended March 31, 2004 increased by ¥1,033 million from a loss of ¥786 million to an income of ¥247 million (U.S.\$2 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily due to the improved earnings of affiliated companies which Komatsu accounts for using the equity accounting method.

Cumulative Effect of Accounting Change.

No cumulative effect of accounting change was realized in the fiscal year ended March 31, 2004. On the other hand, by the implementation of the Statement of Financial Accounting Standards No.142 regarding Goodwill and Other Intangible Assets in the fiscal year ended March 31, 2003, a loss of ¥265 million was realized due to the impairment of the goodwill of Komatsu (Changzhou) Foundry Corporation.

Net Income.

As a result of the factors indicated above, the consolidated net income for the fiscal year ended March 31, 2004 increased by ¥23,954 million from ¥3,009 million to ¥26,963 million (U.S.\$259 million), as compared to the fiscal year ended March 31, 2003. Accordingly, the net income per share rose to ¥27.17 in Fiscal 2004 from ¥3.09 in Fiscal 2003. The diluted earnings per share marked ¥27.16 and ¥3.09, respectively.

Table of Contents

Return on Assets.

Return on assets for the fiscal year ended March 31, 2004 increased from 1.0% to 2.0% as compared to the fiscal year ended March 31, 2003. This increase was primarily due to the improvement of income before income taxes, minority interests and equity in earnings, by approximately doubling from ¥12,905 million to ¥ 27,036 million.

Net Debt to Equity Ratio.

Net debt to equity ratio for the fiscal year ended March 31, 2004 decreased from 1.13 to 0.91 as compared to the fiscal year ended March 31, 2003. This decrease was primarily due to (1) the decrease in the net debt by ¥59,728 million from ¥448,326 million to ¥388,598 million and (2) the increase in shareholders' equity by ¥30,141 million from 395,366 million to 425,507 million.

Note:

Transfers between segments are made at estimated arm's-length prices. Segment profit (loss) represents net sales less cost of sales and selling, general and administrative expenses. Identifiable assets are those assets used in the operations of each segment. Unallocated corporate assets consist primarily of cash and cash equivalents and marketable investment securities maintained for general corporate purposes. Other expenses include impairment loss on long-lived assets in the electronics segment of ¥17,534 million (\$168,596 thousand) for the years ended March 31, 2004.

Table of Contents

Construction and Mining Equipment

Net Sales from Construction and Mining Equipment business for the fiscal year ended March 31, 2004 increased by 12.4% (or ¥95,404 million) from ¥767,840 million to ¥863,244 million (U.S.\$8,300 million) as compared to the fiscal year ended March 31, 2003. This 12.4% increase in net sales was primarily attributable to (1) the increase in demand and sales in the overseas market, especially North America and China which contributed 3.5% and 3.9% to the increase, respectively, and (2) growth in orders for mining equipment in the second half period of Fiscal 2004.

In the United States, after four years of decline, demand for construction and mining equipment upturned, fueled by corporate investment incentives by the U.S. Government coupled with an increase in demand for new houses. In addition, Komatsu America Corp. continued to focus its efforts to expand the sales of GALEO series equipment, while working to enhance its product development and customer support capabilities and strengthen its sales force. As a result, Komatsu's net sales of construction and mining equipment in the Americas increased by 13.3% as compared to Fiscal 2003.

In China, demand continued to demonstrate sizable growth for the fiscal year ended March 31, 2004 as a result of buoyant demand in construction industry. Komatsu focused its efforts on expanding the local production capacity and broadening the product range of construction and mining equipment. Komatsu Shantui Construction Machinery Co., Ltd. continued to enhance production and sales of hydraulic excavators, especially the mainstay PC200 model. Sales of smaller PC60 models of which the company started production during the year steadily increased. Komatsu (Changzhou) Construction Machinery Corp. expanded sales of 30 and 40-ton class hydraulic excavators in response to growth in demand for larger equipment. By making full use of its training center in Changzhou, the company continued to support distributors in their efforts to strengthen sales and service capabilities. As a result, Komatsu accomplished growth in sales in China by 66.6% in Fiscal 2004 as compared to Fiscal 2003 mainly due to the increase in demand for hydraulic excavators.

Mining equipment sales increased primarily due to a large-lot order Komatsu won in Indonesia during the second half of Fiscal 2004 and increased demand in Australia, against the backdrop of the rise in commodity prices worldwide.

Segment profit for the Construction and Mining Equipment segment for the fiscal year ended March 31, 2004 increased by 86.0% (or ¥24,918 million) from ¥28,990 million to ¥53,908 million (U.S.\$518 million) as compared to the fiscal year ended March 31, 2003. This increase was primary due to the increase of sales, especially North America and China, and reduction of production cost through launch of new products by utilizing Mother Plants.

Industrial Machinery, Vehicles and Others

Net sales of Industrial Machinery, Vehicles and Others business for the fiscal year ended March 31, 2004 increased by 2.2% (or ¥5,209 million) from ¥236,782 million to ¥241,991 million (U.S.\$2,327 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily due to the improved sales of products such as large presses and crankshaft millers, reflecting increased capital outlays of automobile manufacturers around the world. Komatsu launched of new models in this business segment, which contributed the improvement in sales.

Table of Contents

Segment profit for the Industrial Machinery, Vehicles and Others business for the fiscal year ended March 31, 2004 increased by 27.3% (or ¥2,410 million) from ¥8,841 million to ¥11,251 million (U.S.\$108 million) as compared to the fiscal year ended March 31, 2003. This 27.3% increase in segment profit was substantially higher than the 2.2% increase in net sales, primarily because of (1) Komatsu's continued efforts to reduce both production cost and SG&A fixed cost by approximately ¥1,100 million and (2) market introduction of new products with unique features.

Electronics

Net sales from Electronics business for the fiscal year ended March 31, 2004 increased by 7.0% (or ¥6,001 million) from ¥85,182 million to ¥91,183 million (U.S.\$877 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily due to the fact that Komatsu captured increased demand in the semiconductor industry in Asia, especially Taiwan by providing high quality products to meet the customers' requirement and increasing the prime wafers ratio with a focus on annealed and epitaxial wafers.

Sales in Japan increased by 9.5% to ¥49,011 million (U.S.\$471 million) because of increased demand in semiconductor industry and firm price of products. Sales outside of Japan increased by 4.3% to ¥42,172 million (U.S.\$406 million) supported by improved business results of Formosa Komatsu Silicon Corporation, a Taiwanese subsidiary of Komatsu Electronic Metals Co., Ltd.

Segment profit for the Electronics business for the fiscal year ended March 31, 2004 increased by ¥5,405 million from a loss of ¥849 million to an income of ¥4,556 million (U.S.\$44 million) as compared to the fiscal year ended March 31, 2003. This improvement in profitability resulted primarily from (1) the improved business result of Komatsu Electronics Metals Co., Ltd., especially Formosa Komatsu Silicon Corporation, achieved by meeting customers' requirements for high quality by diligent efforts such as an increase of prime wafers ratio, focusing on annealed and epitaxial wafers and (2) improved profitability of ASiMI by decreasing its loss for the second consecutive years.

Table of Contents**Performance by Geographic Segments**

Net sales recognized by sales destination for the years ended March 31, 2004 and 2003 were as follows, excluding intersegment sales:

	Millions of yen		
	2004	2003	2004 vs. 2003
Japan	¥ 483,749	¥ 458,000	5.6%

Long-lived assets:			
Japan	¥ 318,841	¥ 307,187	3.8%
U.S.A.	72,236	103,504	-30.2%
Europe	21,024	12,857	63.5%
Other	33,378	31,560	5.8%
Total	¥ 445,479	¥ 455,108	-2.1%

Notes:

Edgar Filing: KOMATSU LTD - Form 20-F

- 1) No individual country within Europe or other areas had a material impact on net sales or long-lived assets.

- 2) There were no sales to a single major external customer for the years ended March 31, 2004 and 2003.

- 3) The above long-lived assets consist primarily of land, buildings and equipment.

- 4) The impairment loss of ¥17,534 million resulting from reappraisal of ASiMI's fixed assets of the Butte plant is included in the decrease from Fiscal 2003 to Fiscal 2004 in long-lived assets in the United States.

Table of Contents

The following information regarding geographic segments is derived by the geographic origin from which the sales were made.

Note:

Transfers between segments are made at estimated arm's-length prices. Segment profit (loss) represents net sales less cost of sales and selling, general and administrative expenses.

Japan

Net sales in Japan for the fiscal year ended March 31, 2004 increased by 7.5% (or ¥42,093 million) from ¥558,798 million to ¥600,891 million (U.S.\$5,778 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily due to an increase in exports of used equipment from Japan against the backdrop of accelerating overseas demand for used equipment and subsequent demand for investment in Japan to replace used equipment with new equipment, especially for hydraulic excavators and mini excavators.

Table of Contents

Segment profit for Japan for the fiscal year ended March 31, 2004 increased by 59.9% (or ¥15,427 million) from ¥25,748 million to ¥41,175 million (U.S.\$396 million) as compared to the fiscal year ended March 31, 2003. Segment profit in Japan increased by a substantially higher percentage than the 7.5% increase in net sales primarily due to the increase in export sales of construction equipment noted above and the improved sales of products in the Industrial Machinery, Vehicles and Others business such as large presses and crankshaft millers, as a result of increased capital outlays of automobile manufacturers around the world.

Americas

Net sales in the Americas for the fiscal year ended March 31, 2004 increased by 7.5% (or ¥19,374 million) from ¥257,351 million to ¥276,725 million (U.S.\$2,661 million) as compared to the fiscal year ended March 31, 2003. The major factor that contributed to the 7.5% increase in sales in the Americas was the increase in demand for construction and mining equipment in the United States after four years of decline.

Segment profit for the Americas for the fiscal year ended March 31, 2004 recognized an income after three years of recognizing a loss and increased by ¥9,405 million from a loss of ¥1,913 million to an income of ¥7,492 million (U.S.\$72 million) as compared to the fiscal year ended March 31, 2003. This recovery is primarily due to the increase in construction and mining equipment sales. Improved profitability of ASiMI also contributed segment profit increase through the effort to manufacture and sell higher margin products, such as monosilane gas to semiconductors and LCD panel manufacturers.

Europe

Net sales in Europe for the fiscal year ended March 31, 2004 decreased by 1.2% (or ¥1,637 million) from ¥132,165 million to ¥130,528 million (U.S.\$1,255 million) as compared to the fiscal year ended March 31, 2003. This decrease in net sales was due primarily to (1) the reduction of distribution cost by consolidating all marketing capabilities at Komatsu Europe International N.V. and (2) selective acceptance of orders taking the fierce price competition into account. Segment profit for Europe for the fiscal year ended March 31, 2004 increased by 85.3% (or ¥2,382 million) from ¥2,793 million to ¥5,175 million (U.S.\$50 million) as compared to the fiscal year ended March 31, 2003, as a result of the reduction of distribution cost mentioned above.

Others

Net sales in Other regions for the fiscal year ended March 31, 2004 increased by 33.1% (or ¥46,784 million) from ¥141,490 million to ¥188,274 million (U.S.\$1,810 million) as compared to the fiscal year ended March 31, 2003. This increase was primarily due to an increase in demand (1) for mining equipment in mining regions such as Indonesia, Australia and South Africa, and (2) for construction equipment in China, Southeast Asia and Oceania. Mining equipment sales increased primarily due to a large-lot order in Indonesia Komatsu won during the second half of Fiscal 2004 and increased demand in Australia, against the backdrop of the rise in commodity prices worldwide. The impressive demand growth in China over the previous year particularly contributed to the increase in net sales in Other regions.

Table of Contents

Segment profit for Other regions for the fiscal year ended March 31, 2004 increased by ¥5,696 million from ¥8,971 million to ¥14,667 million (U.S.\$141 million) as compared to the fiscal year ended March 31, 2003, primarily due to the increase in demand for construction equipment in China, Southeast Asia and Oceania. The increase was also supported by the improved business results of Formosa Komatsu Silicon Corporation by ¥1,479 million.

Table of Contents**Comparison of Fiscal 2003 with Fiscal 2002**

The following table sets forth selected consolidated financial and operating data, including data expressed as a percentage of total consolidated net sales for the periods indicated, and the change in each consolidated financial and operating data between the indicated fiscal years:

	Millions of Yen				% change 2003 vs. 2002	Thousands of
	Year Ended March 31					U.S. dollars

Return on Assets (ROA)	1.0%		-7.8%			
Net debt to equity ratio	1.13		1.09			

Net sales.

Consolidated net sales for the fiscal year ended March 31, 2003 increased by 5.2% (or ¥53,913 million) from ¥1,035,891 million to ¥1,089,804 million (U.S.\$9,236 million) as compared to the fiscal year ended March 31, 2002. This increase was primarily due to increased overseas sales of construction and mining equipment (which was partially offset by decreases in domestic sales resulting from the downturn in the Japanese economy), as Komatsu gained overseas market share by launching new excavator products in the GALEO-series and improving its sales and services activities by aggressively engaging in marketing activities that focused on the needs of its customers in each overseas region through its regional headquarters. In North America, Komatsu established a training center to provide specialized training to end users and distributors. In Europe, Komatsu established wholly-owned subsidiaries in Italy and Germany for the purpose of distributing its products. In China, Komatsu attended the construction equipment trade show *bauma* to increase its exposure in such region.

The average Yen/U.S. dollar exchange rates were 121 and 126 for the fiscal years ended March 31, 2003 and 2002, respectively. The average Yen/Euro exchange rates were 121 and 111 for the fiscal years ended March 31, 2003 and 2002, respectively. As the appreciation of the Yen to U.S. dollar was substantially offset by the depreciation of the Yen to the Euro, foreign currency exchange rates did not materially affect Komatsu's net sales in Fiscal 2003 as compared to Fiscal 2002.

Table of Contents

Interest and Other Income.

Consolidated interest and other income for the fiscal year ended March 31, 2003 decreased by 60.8% (or ¥20,842 million) from ¥34,278 million to ¥13,436 million (U.S.\$114 million) as compared to the fiscal year ended March 31, 2002. This decrease was primarily due to the decrease on gain on sale of primarily real property.

Total Revenue.

As a result of the above factors, consolidated total revenue for the fiscal year ended March 31, 2003 increased by 3.1% (or ¥33,071 million) from ¥1,070,169 million to ¥1,103,240 million (U.S.\$9,349 million) as compared to the fiscal year ended March 31, 2002.

Cost of Sales.

Consolidated cost of sales for the fiscal year ended March 31, 2003 increased by 2.9% (or ¥22,809 million) from ¥792,748 million to ¥815,557 million (U.S.\$6,912 million) as compared to the fiscal year ended March 31, 2002. This 2.9% increase in cost of sales was lower than the 5.2% increase in net sales, primarily due to Komatsu's efforts to manage and reduce production costs consisting of variable production costs, such as procurement costs and engineering costs, as well as manufacturing fixed costs, such as personnel and related costs, rent and depreciation costs.

Selling, General and Administrative Expenses.

Consolidated selling, general and administrative expenses for the fiscal year ended March 31, 2003 decreased by 6.0% (or ¥15,295 million) from ¥256,364 million to ¥241,069 million (U.S.\$2,043 million) as compared to the fiscal year ended March 31, 2002, due primarily to reductions in (i) fixed costs, such as personnel, rent and depreciation, (ii) research and development expenses and (iii) advertising expenses. As a percentage of net sales, selling, general and administrative expenses decreased by 2.6% to 22.1% for the fiscal year ended March 31, 2003 from 24.7% for the fiscal year ended March 31, 2002.

Consolidated research and development expenses for the fiscal year ended March 31, 2003 decreased by 11.5% (or ¥5,056 million) from ¥44,083 million to ¥39,027 million (U.S.\$331 million) as compared to the fiscal year ended March 31, 2002. This decrease in consolidated research and development expenses during Fiscal 2003 resulted primarily from the fact that during its previous fiscal year Komatsu had substantially completed its research and development activities to develop construction and mining equipment in the GALEO-series. For additional detail as to expenditures on research and development activities, see Item 5.C.

Advertising expenses accounted for 1.4% of consolidated selling, general and administrative expenses during the fiscal year ended March 31, 2003 as compared with 2.0% for the fiscal year ended March 31, 2002. Consolidated advertising expenses for the fiscal year ended March 31, 2003 decreased by 32.7% (or ¥1,673 million) from ¥5,119 million to ¥3,446 million (U.S.\$29 million) as compared to the fiscal year ended March 31, 2002. This decrease in consolidated advertising expenses resulted primarily from Komatsu's cost management efforts and the fact that no advertising expenses were incurred in connection with Komatsu's 80th anniversary during Fiscal 2003.

Table of Contents

Segment Profit.

Segment profit for the year ended March 31, 2003 increased by ¥46,399 million from a loss of ¥13,221 million to a profit of ¥33,178 million (U.S.\$281 million) as compared to the fiscal year ended March 31, 2002. This increase was primarily due to (1) the increase in segment profit of the Construction and Mining Equipment business by ¥28,109 million from ¥881 million to ¥28,990 million (U.S.\$246 million) primarily due to cutbacks of capacity costs and substantial reduction of production cost, (2) increase of segment profit of the Industrial machinery, Vehicles and Others business by ¥3,865 million from ¥4,976 million to ¥8,841 million (U.S.\$75 million) mainly resulting from capacity cost and production cost reduction by restructuring, and (3) decrease in segment loss of the Electronics business by ¥14,076 million from ¥14,925 million to ¥849 million (U.S.\$7 million) primarily due to the silicon wafer business recovery.

Impairment loss on long-lived assets.

No consolidated impairment loss on long-lived assets was incurred for the fiscal year ended March 31, 2003 while impairment loss of ¥52,242 million was incurred for the fiscal year ended March 31, 2002. In Fiscal 2002, Komatsu's management decided to sell or dispose of these facilities instead of holding them for future use. In connection therewith, Komatsu recorded impairment losses of ¥24,983 million. In addition, Komatsu recorded impairment losses of ¥27,259 million on production facilities operated by another electronics subsidiary, ASiMI, due to the decline in market demand for electronic equipment.

In the fiscal year ended March 31, 2002, Komatsu recorded an impairment loss of ¥24,983 million, on long-lived assets related to certain production facilities at its wholly owned subsidiary, Komatsu Silicon America, Inc. which is in the electronics segment. The reason for this impairment is that management changed its policy to sell or dispose of these facilities instead of holding them for future use. The impairment loss was calculated based on an estimated fair value less cost to sell of the facilities under current market conditions utilizing independent appraisal of the facilities.

Additionally, in the fiscal year ended March 31, 2002, Komatsu, due to the decline in the market demand, recorded impairment losses of ¥27,259 million on production facilities being operated by a consolidated subsidiary, Advanced Silicon Materials LLC (ASiMI) which is also in the electronics segment. Specifically, an impairment loss of ¥13,411 million for its Butte plant in Montana was calculated using the best estimate of discounted future cash flows based on the decision to continue its operation, and one of ¥13,848 million for its Moses Lake plant in Washington was calculated using the estimate of realizable value based on the decision to discontinue its production.

Special termination benefit.

No consolidated special termination benefit was incurred for the fiscal year ended March 31, 2003 while ¥30,131 million was incurred for the fiscal year ended March 31, 2002 due primarily to the fact that Komatsu did not incur any costs for voluntary retirement of its employees or transfer of its employees to affiliated companies in Japan during Fiscal 2003 as it did in Fiscal 2002.

Table of Contents

Other Expenses.

Consolidated other expenses for the fiscal year ended March 31, 2003 decreased by 33.4% (or ¥9,550 million) from ¥28,566 million to ¥19,016 million as compared to the fiscal year ended March 31, 2002. Other expenses include expenses such as loss on marketable securities, loss on disposal or sale of its fixed assets, foreign exchange loss, etc. This decrease was primarily due to the decrease in loss on marketable securities and loss on disposal or sale of fixed assets.

Total Expenses.

As a result of the above factors, consolidated total expenses for the fiscal year ended March 31, 2003 decreased by 7.4% (or ¥86,558 million) from ¥1,176,893 million to ¥1,090,335 million (U.S.\$9,240 million) as compared to the fiscal year ended March 31, 2002.

Income (loss) Before Income Taxes, Minority Interests and Equity in Earnings.

Consolidated income (loss) before income taxes, minority interests and equity in earnings of affiliates for the fiscal year ended March 31, 2003 increased by ¥119,629 million from a loss of ¥106,724 million to an income of ¥12,905 million (U.S.\$109 million) as compared to the fiscal year ended March 31, 2002 as a result of the significant reduction in operating costs such as impairment losses and special termination benefits.

Total Income Taxes.

Total consolidated income taxes for the fiscal year ended March 31, 2003 increased by ¥27,898 million from a negative tax provision of ¥21,930 million to a positive tax provision of ¥5,968 million (U.S.\$51 million). This increase was due primarily to the fact that Komatsu recognized a positive income before income taxes in Fiscal 2003 in contrast to Fiscal 2002 when significant losses were recognized by Komatsu. The actual effective tax rate for the year ended March 31, 2003 was 46.2% while the standard tax rate was 41.7%. The higher percentage in actual effective tax rate was due mainly to permanent non-deductible expenses.

Income (loss) Before Minority Interests and Equity Earnings.

Consolidated income (loss) before minority interests and equity earnings for the fiscal year ended March 31, 2003 increased by ¥91,731 million from a loss of ¥84,794 million to an income of ¥6,937 million (U.S.\$59 million) as compared to the fiscal year ended March 31, 2002. This increase was due primarily to the decrease in total expenses.

Minority Interests.

Edgar Filing: KOMATSU LTD - Form 20-F

Consolidated minority interests for the fiscal year ended March 31, 2003 decreased by ¥6,652 million from ¥3,775 million to a loss of ¥2,877 million (U.S.\$24 million) as compared to the fiscal year ended March 31, 2002. This decrease was primarily attributable to the fact that Komatsu's subsidiaries in the electronics business realized a profit during Fiscal 2003.

Equity in Earnings of Affiliated Companies.

Consolidated equity in earnings of affiliated companies for the fiscal year ended March 31, 2003 decreased by ¥1,184 million from ¥398 million to a loss of ¥786 million (U.S.\$7 million) as compared to the fiscal year ended March 31, 2002. This decrease was primarily due to losses generated by certain affiliated companies in Japan that are accounted for by the equity method, as the economic conditions in Japan failed to improve in Fiscal 2003 and governmental and corporate spending for construction projects requiring products manufactured by Komatsu's affiliated companies decreased.

Table of Contents

Net Income.

As a result of the factors indicated above, the consolidated net income for the fiscal year ended March 31, 2003 increased by ¥83,630 million from a loss of ¥80,621 million to an income of ¥3,009 million (U.S.\$26 million) as compared to the fiscal year ended March 31, 2002.

Return on Assets.

Return on assets for the fiscal year ended March 31, 2003 increased from -7.8% to 1.0% as compared to the fiscal year ended March 31, 2002. This increase was primarily due to the improvement of income (loss) before income taxes, minority interests and equity in earnings by 119,629 million from a loss of ¥106,724 million to an income of ¥12,905 million (U.S.\$109 million).

Net Debt to Equity Ratio.

Net debt to equity ratio for the fiscal year ended March 31, 2003 increased from 1.09 to 1.13 as compared to the fiscal year ended March 31, 2002. This decrease was primarily due to (1) the increase in net debt by ¥17,897 million from ¥430,429 million to ¥448,326 million mainly resulting from interest bearing debt increase of newly consolidated companies and (2) the shareholders' equity which remained at the same level, from ¥395,143 million to ¥395,366 million.

Table of Contents

Construction and Mining Equipment

Sales in the Construction and Mining Equipment segment for the fiscal year ended March 31, 2003 increased by 5.0% (or ¥36,500 million) from ¥731,340 million to ¥767,840 million (U.S.\$6,507 million) as compared to the fiscal year ended March 31, 2002. This increase was due primarily to increased sales in the overseas market. Construction and mining equipment net sales accounted for 70.5% of Komatsu's worldwide net sales in Fiscal 2003, down 0.1% from 70.6% as compared to Fiscal 2002. While sales in Japan decreased by 9.4% to ¥235,851 million (U.S.\$1,999 million) in Fiscal 2003 from ¥260,351 million in Fiscal 2002, sales outside Japan increased by 13.0% to ¥531,989 million (U.S.\$4,508 million) in Fiscal 2003. Sales in Japan represented 30.7% of total sales of construction and mining equipment, down 4.9% from the previous fiscal, while the proportion of sales outside Japan increased by 4.9% to 69.3%.

The 5.0% increase in net sales in the Construction and Mining Equipment was primarily due to the 13.0% increase in overseas sales. This 13.0% increase in overseas sales resulted from Komatsu's gain in overseas market share reflecting the successful launch of new excavator products in the GALEO-series and the launch of various regionally tailored sales and service activities in the overseas market.

By contrast, in Japan, demand for construction equipment fell sharply from the previous year, because of continuing reductions in public investments. Given this situation, the Company introduced model replacements in its mainstay lines with the intention of expanding sales and promoted the reassessment of its sales operations. These efforts and expanded sales of used equipment fell short of making up for the large drop in demand.

In North America, one of Komatsu's major market, demand for construction and mining equipment continued to slide for the fourth consecutive year, affected particularly by a sharp drop in demand for mining equipment. However, overseas sales for the year increased over the previous fiscal year, supported by an increase in sales in China, Southeast Asia and Oceania of excavator products in the GALEO-series, an increase in sales of construction equipment in the Middle East resulting from the increase in construction of roadways and dams and an increase in sale of mining equipment in Africa.

Segment profit for the Construction and Mining Equipment segment for the fiscal year ended March 31, 2003 increased by ¥28,109 million from ¥881 million to ¥28,990 million (U.S.\$246 million) as compared to the fiscal year ended March 31, 2002. Segment profit in this segment increased by a substantially higher percentage than the 5.0% increase in net sales primarily because of (i) the reductions in various personnel expenses, procurement costs and engineering costs of Komatsu in Japan, and (ii) the increase in overseas sales of higher value-added construction and mining equipment.

Industrial Machinery, Vehicles and Others

Sales in the Industrial Machinery, Vehicles and Others segment for the fiscal year ended March 31, 2003 increased by 4.0% (or ¥9,000 million) from ¥227,782 million to ¥236,782 million (U.S.\$2,007 million) as compared to the fiscal year ended March 31, 2002. This increase was due primarily to increased sales of sheet metal forming machinery, agricultural and forestry machines and forklift trucks.

In the industrial machinery business, sales of large-scale metal forging and stamping presses used in automobile factories to form automobile roofs and doors declined, reflecting intensified global competition among Japanese and foreign press manufacturers.

Table of Contents

Meanwhile, in the sheet metal forming machinery business and the agricultural and forestry machine business, sales increased for products with unique features, such as the knapsack-type brushcutters in the forestry machine business that feature a rotating swivel gear case and an engine unit that allows for greater maneuverability and the H1F series presses in the sheet metal forming machinery business that incorporate a hybrid mechanism that combines the AC servo drive and a link mechanism thereby offering a large pressing capability with a smaller capacity motor. Also, sales of forklift trucks increased over the previous year supported by the launch of new models and aggressive sales activities.

Segment profit for the Industrial Machinery, Vehicles and Others segment for the fiscal year ended March 31, 2003 increased by 77.7% (or ¥3,865 million) from ¥4,976 million to ¥8,841 million (U.S.\$75 million) as compared to the fiscal year ended March 31, 2002. This increase in segment profit was due primarily to increased sales of improved competitive products and Group-wide cost reduction efforts. This 77.7% increase in segment profit was substantially higher than the 4.0% increase in net sales, primarily because of the reduction in fixed costs such as personnel expenses, rent and depreciation, as well as the successful launch by Komatsu of higher value-added products, such as forklift trucks.

Electronics

Sales in the Electronics segment for the fiscal year ended March 31, 2003 increased by 11.0% (or ¥8,413 million) from ¥76,769 million to ¥85,182 million (U.S.\$722 million) as compared to the fiscal year ended March 31, 2002. This increase was due primarily to increased silicon wafers sales as semiconductor manufacturers restocked their supply of such products during Fiscal 2003. Sales in Japan increased by 3.9% to ¥44,758 million (U.S.\$379 million), and sales outside Japan increased by 20.0% to ¥40,424 million (U.S.\$343 million). Electronics accounted for 7.8% of Komatsu's net sales in Fiscal 2003, compared with 7.4% in fiscal 2002.

In the overseas and Japanese electronics industry, demand for thermoelectric modules for use in fiber optic communication networks was low as it was during Fiscal 2002, and the sales of temperature-control equipment for semiconductor manufacturing declined due to reductions in investment. Although the silicon wafers market did not show clear signs of recovery generally, Komatsu's sales of silicon wafers increased primarily due to expanded distribution of more competitive higher value-added products and improved production efficiencies. More specifically, Komatsu expanded its sales distribution channels in Taiwan and other Asian regions and included higher-value added silicon wafers in its product offerings. In the Japanese electronics segment, Komatsu improved its production technology and supply capabilities for silicon wafer products.

Segment losses for the Electronics segment for the fiscal year ended March 31, 2003 decreased significantly by 94.3% (or ¥14,076 million) from ¥14,925 million to ¥849 million (U.S.\$7 million) as compared to the fiscal year ended March 31, 2002. This decrease in segment losses was primarily due to improved production efficiencies, product shift to prime silicon wafers and other higher value-added silicon wafers and reductions in Komatsu's overall costs resulting from the recognition of significant impairment losses during the prior fiscal year and the integration of production lines in ASiMI. Formosa Komatsu Silicon broke even for the first time and recorded a profit during the second half of Fiscal 2003.

Table of Contents**Performance by Geographic Segments**

Net sales recognized by sales destination for the years ended March 31, 2003 and 2002 are as follows, excluding intersegment sales:

	Millions of yen		% Change
	2003	2002	2003 vs. 2002
Japan	¥ 458,000	¥ 478,187	-4.2%
Americas	251,371	262,341	-4.2%
Europe	145,455	128,029	13.6%
China	52,465	27,555	90.4%
Asia (excluding Japan, China) and Oceania	123,712	98,808	25.2%
Middle East and Africa	58,801	40,971	43.5%
Consolidated net sales	¥ 1,089,804	¥ 1,035,891	5.2%

Net sales recognized by geographic origin and long-lived assets at March 31, 2003 and 2002, and for the years then ended are as follows, excluding intersegment sales:

	Millions of yen		% Change
	2003	2002	2003 vs. 2002
Net sales:			
Japan	¥ 558,798	¥ 564,537	-1.0%
U.S.A.	257,027	266,701	-3.6%
Europe	132,165	108,191	22.2%
Other	141,814	96,462	47.0%
Total	¥ 1,089,804	¥ 1,035,891	5.2%
Long-lived assets:			
Japan	¥ 307,187	¥ 309,315	-0.7%
U.S.A.	103,504	115,812	-10.6%
Europe	12,857	13,913	-7.6%
Other	31,560	31,701	-0.4%
Total	¥ 455,108	¥ 470,741	-3.3%

Notes:

- 1) No individual country within Europe or other areas had a material impact on net sales or long-lived assets.

Edgar Filing: KOMATSU LTD - Form 20-F

- 2) There were no sales to a single major external customer for the years ended March 31, 2003 and 2002.
- 3) The above long-lived assets consist primarily of land, buildings and equipment.

Table of Contents

The following information regarding geographic segments is derived by the geographic origin from which the sales were made. For example, if a product were manufactured in Japan but were sold to a customer in the Americas, net sales derived from such transactions would be recorded in Japan (*i.e.*, the origin from which such product was sold.)

	Millions of yen		% Change	Millions of U.S. dollars
	2003	2002	2003 vs. 2002	2003
Net sales:				
Japan				
Customers	¥ 558,798	¥ 564,537	-1.0%	\$ 4,736

Japan

Sales in Japan for the fiscal year ended March 31, 2003 decreased by 1.0% (or ¥5,739 million) from ¥564,537 million to ¥558,798 million (U.S.\$4,736 million) as compared to the fiscal year ended March 31, 2002. Net sales remained essentially unchanged primarily due to the continuing decline in demand for construction equipment in Japan which was almost equally offset by the increase in overseas sales of products manufactured in Japan.

Table of Contents

Segment profit for Japan for the fiscal year ended March 31, 2003 increased by ¥25,618 million from ¥130 million to ¥25,748 million (U.S.\$218 million) as compared to the fiscal year ended March 31, 2002. Although net sales remained substantially the same, segment profit increased as Komatsu reduced its various personnel expenses, procurement costs and engineering costs.

Americas

Sales in the Americas for the fiscal year ended March 31, 2003 decreased by 3.7% (or ¥9,760 million) from ¥267,111 million to ¥257,351 million (U.S.\$2,181 million) as compared to the fiscal year ended March 31, 2002.

Fiscal 2003 was the fourth consecutive year in which demand for construction and mining equipment declined in North America. This decrease in demand led to decreased sales in mining equipment, which was substantially offset by increased sales of construction equipment. However, due to the appreciation of the Yen, Yen-equivalent of U.S. dollar-denominated sales in the Americas resulted in this 3.7% decrease in sales during Fiscal 2003.

Segment losses for the Americas for the fiscal year ended March 31, 2003 decreased by 81.9% (or ¥8,649 million) from ¥10,562 million to ¥1,913 million (U.S.\$16 million) as compared to the fiscal year ended March 31, 2002, primarily due to the substantial improvement in segment profit in the electronic segment resulting from a larger percentage of net sales being derived from higher value-added products and the reduction in fixed costs through the consolidation of its plants.

Europe

Sales in Europe for the fiscal year ended March 31, 2003 increased by 22.2% (or ¥23,974 million) from ¥108,191 million to ¥132,165 million (U.S.\$1,120 million) as compared to the fiscal year ended March 31, 2002. This 22.2% increase in net sales was due primarily to Komatsu's successful introduction of new construction equipment in Europe, such as hydraulic excavators and wheel loaders, notwithstanding the overall decrease in demand for construction equipment in the European market generally, and the increase in the Yen equivalent of Euro-denominated sales resulting from the appreciation of the Euro as compared to the Yen during this period. The average Yen/Euro exchange rates were 121 and 111 for the fiscal years ended March 31, 2003 and 2002, respectively.

Segment profit for Europe for the fiscal year ended March 31, 2003 decreased by 9.2% (or ¥284 million) from ¥3,077 million to ¥2,793 million (U.S.\$24 million) as compared to the fiscal year ended March 31, 2002, primarily due to the fact that a smaller percentage of net sales were derived from higher value-added construction equipment products.

Others

Sales in the Other regions for the fiscal year ended March 31, 2003 increased by 47.3% (or ¥45,438 million) from ¥96,052 million to ¥141,490 million (U.S.\$1,199 million) as compared to the fiscal year ended March 31, 2002. This increase was due primarily to the increase in demand for construction equipment in China, Southeast Asia, Oceania and the Middle East.

Table of Contents

Segment profit (loss) for the Other regions for the fiscal year ended March 31, 2003 increased by ¥9,325 million from a loss of ¥354 million to a income of ¥8,971 million (U.S.\$76 million) as compared to the fiscal year ended March 31, 2002, due primarily to the increase in demand for construction and mining equipment in China and the steady increase in demand for such equipment in Southeast Asia, Oceania, and the Middle East. In the electronics segment, Formosa Komatsu Silicon broke even for the first time and recorded a profit during the second half of Fiscal 2003.

Table of Contents**B. Liquidity and Capital Resources***Funding and Liquidity Management*

Komatsu's principal financial policy is to keep sufficient capital resources over the foreseeable future and to retain an appropriate level of liquidity necessary for its business. Komatsu funds the future capital expenditures and working capital through cash generated through its operations and funding activities, such as bank borrowings, commercial paper and medium and long-term notes.

Komatsu's interest bearing debt as of March 31, 2004 totaled ¥460,068 million (U.S.\$4,424 million), down ¥64,941 million from the previous fiscal year end, and Komatsu's net interest bearing debt after deducting cash and deposits also decreased by ¥59,728 million to ¥388,598 million (U.S.\$3,737 million). This decrease in interest bearing debt reflected Komatsu's efforts to repay outstanding interest bearing debt using cash generated through its operating and investment activities. As a result, Komatsu's net debt to equity ratio as of March 31, 2004 decreased to 0.91 points, a 0.22 point improvement from the previous fiscal year end.

Komatsu's short-term debt as of March 31, 2004 as compared to March 31, 2003 decreased by ¥14,936 million to ¥97,057 million (U.S.\$933 million), while long-term debt including current maturities (less than one year) decreased by ¥50,005 million to ¥363,011 million (U.S. \$3,490 million) over the same period. Short-term debt primarily consists of short-term bank loans and is used as working capital by the group companies.

Long-term debt as of March 31, 2004 consisted of ¥182,463 million in loans from banks, insurance companies and other financial institutions, ¥67,186 million in Euro Medium Term Notes (EMTN), ¥7,504 million in Senior Notes due 2005 (payable in U.S. dollars), ¥35,000 million in unsecured bonds due 2006, ¥20,000 million in unsecured bonds due 2007, ¥10,000 million in unsecured bonds due 2009, and ¥40,858 million in capital lease obligations, most of which are used primarily for capital expenditures and long-term working capital. The Company has been registering a program to issue ¥100 billion in new bonds in Japan and the Company, Komatsu Finance America Inc., Komatsu Finance (Netherlands) B.V., Komatsu Europe Coordination Center N.V., and Komatsu Australia Holdings Pty. Ltd. have a group EMTN programme in which such companies may issue in the aggregate up to U.S.\$1.2 billion EMTN Notes to satisfy the medium to long-term funding demands of Komatsu.

The Company and certain of its consolidated subsidiaries have established a program to securitize trade notes and accounts receivables for the purpose of accelerating the receipt of cash related to its finance receivables and diversifying the funding source. As of March 31, 2004 the balance of securitized receivables was ¥136,149 million (U.S.\$1,309 million) and such securitized receivables were not reflected in the consolidated balance sheet.

Komatsu makes an effort to keep the appropriate level of the liquidity with cash flows from its operating activities, bank loans, securitized receivables, and commercial paper issue. The Company has a ¥50,000 million (U.S.\$481 million) commercial paper program of which ¥35,000 million remained unused as of March 31, 2004. Komatsu and certain consolidated subsidiaries have committed credit lines with financial institutions which total ¥46,826 million (U.S.\$450 million) to secure the liquidity of which ¥38,691 million remained unused as of March 31, 2004.

Table of Contents

Working capital in Fiscal 2004 increased by ¥23,608 million to ¥260,549 million (U.S.\$2,505 million) due to an increase in receivables and inventories accompanying the expansion of sales, as well as the repayment of short-term debt and long-term debt due within one year. The current ratio in Fiscal 2004 rose 4.1 points from the previous year to 150.1%. Upon review of the current levels of the working capital and the current ratio, the Management of Komatsu believes that Komatsu maintains an adequate level of liquidity.

Cash-flow

Set forth below is the condensed consolidated statements of cash flows for the years ended March 31, 2004, 2003 and 2002:

	Millions of yen			Thousands of U.S. dollars
	2004	2003	2002	2004
Net cash provided by operating activities	117,290	48,257	60,321	1,127,789
Net cash used in investing activities	(40,931)	(36,018)	(16,933)	(393,568)
Net cash provided by (used in) financing activities	(78,971)	18,846	(40,455)	(759,337)
Effect of exchange rate change on cash and cash equivalents	(2,134)	(325)	881	(20,519)
Net increase (decrease) in cash and cash equivalents	(4,746)	30,760	3,814	(45,635)
Cash and cash equivalents, beginning of year	76,152	45,392	39,760	732,231
Adjustment for change of fiscal period on consolidated subsidiaries			1,818	
Cash and cash equivalents, end of year	¥ 71,406	¥ 76,152	¥ 45,392	\$ 686,596

Due to the improved business results, net cash provided by operating activities totaled ¥117,290 million (U.S.\$1,128 million), an increase of ¥69,033 million compared with the previous fiscal year. The increase in net cash provided by operating activities was also due to the fact that no cash was required in the fiscal year ended March 31, 2004 for the payment of early retirement benefits as compared to the fiscal year ended March 31, 2003.

Net cash used in investing activities for Fiscal 2004 amounted to ¥40,931 million (U.S.\$394 million), an increase of ¥4,913 million compared with the previous fiscal year, largely due to investments in production and sales facilities, and the acquisition of Partek Forest AB and Partek Forest Holdings, LLC.

Net cash used in financing activities for Fiscal 2004 amounted to ¥78,971 million (U.S.\$759 million), a decrease of ¥97,817 million compared with the previous fiscal year, mainly due to the reduction of interest bearing debt.

As a result, cash and cash equivalents as of March 31, 2004 totaled ¥71,406 million (U.S. \$687 million), a decrease of ¥4,746 million compared with the previous fiscal year.

Capital Expenditure

With a focus on the Construction and Mining Equipment business, Komatsu carried out investments in the development and production of new products, as well as in the rationalization of production operations, for the purpose of improving the competitiveness of the product lines. In addition, Komatsu responded to the rising level of demand on a global scale by bolstering its domestic production capacity in the area of the main components of its equipment, such as hydraulics and braking systems.

Table of Contents

Additionally, leased construction equipment was replaced with the aim of optimizing operating assets. In the Electronics business, in addition to increasing its production capacity in 300-millimeter silicon wafers, Komatsu also invested in improving productivity and in shifting to higher-quality products, particularly 200-millimeter wafers.

As a result of the above figures, Komatsu's capital expenditure, on a consolidated basis, for the fiscal year ended March 31, 2004 was ¥78,049 million (U.S.\$750 million), an increase of ¥7,576 million from the previous fiscal year end.

C. Research and Development, Patents and Licenses, etc.

Komatsu promotes R&D activities in its business domains, including construction and mining equipment, industrial machinery, and electronics for the targets of (1) improving customers' productivity and (2) substantially enhancing the functionality and cost of its products through the development of technologies designed to preserve or improve the earth's environment and social environs.

Positioned as the central R&D base for the entire Komatsu Group, the Research Division conducts R&D activities for the Group by working closely with research and development departments of business divisions such as construction and mining equipment, industrial machinery, vehicles and electronics.

Komatsu's R&D organizational structure consists of: the Research Division of the Company; the Development Division of the Company which focuses on construction and mining equipment; the Industrial Machinery Division of the Company; and the technology departments of the subsidiaries and affiliates of the Company.

The following table presents Komatsu's R&D expenses for the years ended March 31, 2004, 2003 and 2002. R&D expenses are charged as an expense when incurred.

R&D expenses

	Millions of yen					Thousands of U.S. dollars
	2004	Changes % 2004 vs. 2003	2003	Changes % 2003 vs. 2002	2002	2004
Construction and Mining Equipment	27,326	15.8%	23,602	-14.7%	27,667	262,750
Industrial Machinery, Vehicles and Others	9,511	-1.5%	9,659	-10.8%	10,831	91,452
Electronics	5,765	0.0%	5,766	3.2%	5,585	55,433
Total	¥ 42,602	9.2%	¥ 39,027	-11.5%	¥ 44,083	\$ 409,635

The objectives, results, and costs of R&D by operating segment for Fiscal 2004 are described below:

(1) Construction and Mining Equipment business

Komatsu has set up R&D centers in Japan and overseas with the objective of developing construction and mining equipment capable of adapting to climatic and terrain conditions anywhere in the world. Joint research programs are conducted by these R&D centers, and the exchange of personnel is actively carried out. Under the overriding mission of helping to raise the customers' productivity, research and development is being conducted with the following medium-to-long-term themes.

Table of Contents*Information technology*

Research is being conducted into such aspects of information technology as machine positioning and working status utilizing state-of-the-art sensors and telecommunications technologies, remote-control technologies for machine diagnosis, and artificial intelligence.

Environmental preservation technology

In addition to meeting the Tier II emission control regulations for diesel engines, the Komatsu Group aims to contribute to the reduction of environmental load and to implement mechanisms to effectively utilize natural resources while at the same time realizing cost-efficiency. To this end, Komatsu conducted R&D in energy conservation, component recycling and reuse, and the evaluation of environmental load through lifecycle assessment (LCA) techniques. In addition, from the perception that environmental considerations should apply not only to ecology but also to people's living and work environment, Komatsu also placed considerable effort on researching methods of developing safer machines, reducing noise and vibration, and other means of improving working conditions for machine operators.

The principal products that were improved due to these R&D activities during the fiscal year ended March 31, 2004 are listed below:

1. Komatsu Ltd. (the parent company):

Hydraulic excavators:	PC130-7, PC400-7, PC450-7, PC600-7, PC650-7, PC750-7, PC800-7, PC128UU-2, PC128-6, PC138-6
Bulldozers:	D20-8, D21-8, D31-21, D37-21, D39-21, D65PX-15, D155AX-5, D375-5, D475-5
Wheel loaders:	WA120-5, WA150-5, WA200-5, WA250-5, WA320-5, WA80-3, WA100M-3
Dump trucks:	HD255-5
Motor grader:	GD555-3, GD655-3, GD675-3
Mobile debris crushers:	BR380-JG-1, BR100JG-1
Engines:	Engines conforming to the Tier II emission control regulations; Marine engines conforming to IMO emission regulation of nitrogen oxides

2. Komatsu Zenoah Co.:

Mini and medium-sized hydraulic excavators:	PC78MR-6, PC27MR-2, PC30MR-2, PC35MR-2, PC40MR-2, PC50MR-2, PC58UU, PC78US
Mini wheel loaders:	WA30, WA40, WA50

3. Komatsu UK Ltd.:

Hydraulic excavators:	PW160-7
-----------------------	---------

4. Komatsu Hanomag GmbH:

Skid steer loaders:	SK714, SK815

Table of Contents

(2) Industrial Machinery, Vehicles and Others business

In this business segment, research and development is conducted principally in the fields of large presses and sheet-metal forging machines (by Komatsu Industries Corporation), machine tools (by Komatsu Machinery Corporation), industrial vehicles for logistics use (by Komatsu Forklift Co., Ltd.) and agricultural and forestry equipment (by Komatsu Zenoah Co.).

In the field of industrial machinery, to respond to the growing user needs for increased productivity and flexibility in large presses and sheet-metal forging equipment, research and development was focused on functional enhancements and the automation of peripheral equipment. As a result, Komatsu enhanced the product range of tandem press lines, high-speed transfer press line (H4TL), medium and large-sized AC Servo Presses (H2F series) and small AC Servo Presses (H1F series). Komatsu also implemented a model change of the AC Servo drive press-brake bending eye. In the field of plasma cutting machines, Komatsu developed twister fine plasma-cutting machines (TFP3051, TFPL6082/ TFPL6084) and an additional type of crankshaft miller (GPM240F).

As for industrial vehicles, Komatsu developed forklift trucks such as 1-ton class AC battery-powered reach trucks, 2-ton class AC battery-powered counterbalanced lift trucks and 10-ton class engine-powered lift trucks.

In the field of agricultural and forestry equipment, Komatsu Zenoah Co. developed new environmental-friendly products such as chipper shredders (SR3000) and chainsaws equipped with a unique mechanism for easy tightening of the saw.

(3) Electronics business

In this business segment, research and development is conducted in materials and equipment for use mainly in the field of semiconductors and telecommunication. In the field of semiconductors, to respond to the growing demand from device makers for higher-grade silicon wafers that can enable greater chip density, capacity, and design rule shrinking in semiconductors, Komatsu conducted research and development of polycrystalline silicon, high-purity silicon single crystals, heat treatment of silicon, high-quality epitaxial wafers, wafer evaluation techniques and various activities for the development and production of the next-generation wafers including 300 mm (12-inch) wafers. Through such research, Komatsu (principally Komatsu Electronics Metals Co., Ltd.) sought to produce single-crystal silicon wafers with a lower defect rate, high-quality epitaxial annealed wafers, and super-flat, high-purity wafers.

Meanwhile, research was also conducted by Komatsu Electronics, Inc. in the field of semiconductor production, including the development of temperature control equipment such as high-temperature chemical circulators, low-temperature equipment for etchers and the essential components of high-performance thermoelectric module heat-exchange units. In the telecommunications field, Komatsu Electronics carried out research in micro thermo-modules for use in optical communications.

Table of Contents**D. Trend information**

During the fiscal year ended March 31, 2004, the business environment for construction and mining equipment, industrial machinery, vehicles and other industrial-use equipment began to improve worldwide. While there are concerns over the further appreciation of Japanese yen, the sharp price hike in steel materials and political instability in the Middle East region, Komatsu is shifting its stance from defensive to offensive.

In China, the market for hydraulic excavators has expanded by over 50 percent annually in the last two years. In an effort to control this bubble economy at an early stage, the Chinese government enforced the credit squeeze measure to the cement, aluminum, steel and real estate industries. Inevitably, the construction industry has experienced the adverse effects, and this trend has negative impact to Komatsu. However, Komatsu considers that, in a medium-term prospect, development projects for roadways and other infrastructure should continue for the Beijing Olympics in 2008 and the Shanghai Expo in 2010. In the long run, Komatsu expects that there will be large-scale government projects such as the Western Region Development Strategy. Komatsu has been engaging in aggressive business efforts in China by expanding production capacities and reinforcing sales and service capabilities of its local subsidiaries. While Komatsu believes that the demand for construction and mining equipment in China will continue to expand in a mid to long-range perspective, temporary disruption and stagnation of the Chinese economy could occur due to political and economic factors, thereby negatively affecting Komatsu's business results.

Accompanied by the economic expansion in China, the prices of steel materials and primary commodity such as crude oil, coal, iron ore, non-ferrous metal have been increasing sharply worldwide. This development will facilitate mining activities and thus lead to an increase in demand for Komatsu's mining equipment, but it will also lead to an increase in the cost of materials for Komatsu's products. To compensate for this increase in costs, Komatsu plans to reduce other production costs and shift the costs to the prices of the products. However, if the current price hike of steel materials continues and is prolonged, it may negatively affect Komatsu's business results.

Set forth below is the latest projections for the consolidated business results for Fiscal 2005 that the Company announced on July 29, 2004.

	Millions of yen		
	Net sales	Income before income taxes	Net income
For the first half of fiscal year	645,000	34,000	17,500
The full fiscal year	1,300,000	72,000	37,000
Projected net income per share (Basic)	¥ 37.28		

E. Off-Balance Sheet Arrangements

Komatsu has several accounts receivable securitization programs and such securitizations are expected to become an important source of funds for Komatsu in the future. As of March 31, 2004, Komatsu had securitized accounts receivable totaling ¥136,149 million (U.S.\$1,309 million) (or 27.8% of total accounts receivable at that date). Of this amount, ¥28,183 million related to receivables generated by Komatsu's Japanese operations and ¥107,785 million related to receivables generated by Komatsu's North American operations. As of March 31, 2003, Komatsu had securitized accounts receivable totaling ¥135,670 million (or 28.7% of total accounts receivable at that date). Of this amount, ¥29,344 million related to receivables generated by Komatsu's Japanese operations and ¥106,326 million related to receivables generated by Komatsu's North American operations.

Table of Contents

The receivables that are securitized are deducted from the consolidated balance sheet when they are sold. Komatsu has entered into contractual arrangements with special purpose companies solely for the purpose of securitizing its receivables.

A downgrading or worsening of the quality of Komatsu's receivables portfolio could prevent it from using the receivables securitization program.

Trade and notes receivable at March 31, 2004 and 2003 are summarized as follows:

	Millions of yen		Thousands of U.S. dollars
	2004	2003	2004
Trade notes	¥ 114,323	¥ 122,470	\$ 1,099,259
Accounts receivable	255,083	223,994	2,452,721
Total	369,406	346,464	3,551,980
Less: allowance	(15,222)	(9,063)	(146,365)
Net trade receivables	¥ 354,184	¥ 337,401	\$ 3,405,615

The Company and certain of its consolidated subsidiaries follow the practice of including the portion of installment and lease receivables due after one year (less unearned interest) in current assets. Receivables due after one year (less unearned interest) amounted to ¥68,869 million (\$662,202 thousand) and ¥61,177 million at March 31, 2004 and 2003, respectively.

Lease receivables are included in accounts receivable above and represent receivables from customers for equipment leased by Komatsu Forklift Co., Ltd. These leases are accounted for as sales-type leases in conformity with SFAS No. 13. Equipment sales revenue from sales-type leases are recognized at the inception of the lease.

At March 31, 2004 and 2003, lease receivables comprised the followings:

	Millions of yen		Thousands of U.S. dollars
	2004	2003	2004
Minimum lease payments receivable	¥ 11,384	¥ 11,925	\$ 109,462
Unearned income	(913)	(967)	(8,779)

Edgar Filing: KOMATSU LTD - Form 20-F

Net lease receivables	¥ 10,471	¥ 10,958	\$ 100,683
-----------------------	-----------------	----------	-------------------

Cash flows received for all securitization activities for the years ended March 31, 2004 and 2003 were ¥294,210 million (\$2,828,942 thousand) and ¥255,342 million from the sales of trade notes and accounts receivable. The Company and its consolidated subsidiaries retain servicing responsibilities, however contractual servicing fees are not received from the third parties separately. The investors and the securitization trusts have no or limited recourse rights to the Company and its consolidated subsidiaries' assets in case of debtors' default. Appropriate reserves have been established for potential losses relating to the limited recourse of the sold receivables.

Table of Contents

Also the Company and its consolidated subsidiaries, except for a certain U.S. subsidiary, as transferor do not retain any interest in the receivables sold.

The components of securitized trade receivables and other assets managed together at March 31, 2004 and 2003 were as follows:

	Millions of yen		Thousands of U.S. dollars
	2004	2003	2004
Total amount of trade receivables that are managed and securitized	¥ 505,555	¥ 482,134	\$ 4,861,105
Assets transferred	(136,149)	(135,670)	(1,309,125)
Total amount of trade receivables on B/S	¥ 369,406	¥ 346,464	\$ 3,551,980

A certain U.S. subsidiary's retained interests, which are included in the recourse provisions, are subordinate to investor's interests and their value are subject to certain key assumptions.

Key assumptions used in measuring the fair value of retained interests related to securitization transactions completed during the year ended March 31, 2004 and 2003 were as follows:

	2004	2003
Weighted-average life	48 months	48 months
Prepayment speed over the life	2.3%	2.3%
Expected credit losses over the life	1.6%	2.2%
Discount rate on cash flow	1.6-2.1%	2.2-3.5%

The carrying value of retained interest was ¥ 5,822 million (\$55,981 thousand) and ¥4,174 million as of March 31, 2004 and 2003, respectively. The impacts of 10% and 20% changes to the key assumptions on the fair value of retained interest as of March 31, 2004 are immaterial.

At March 31, 2004, Komatsu was contingently liable for discounted and transferred receivables on a recourse basis with the financial institutions of ¥14,098 million (\$135,558 thousand). The Financial Accounting Standards Board issued FASB Interpretation No. 45 (FIN 45), Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others in November 2002. The Interpretation addresses the disclosures to be made by a guarantor in its financial statements about its obligations under the guarantees. This Interpretation also clarifies the requirements related to the recognition of a liability by guarantor at the inception of a guarantee for the obligations the guarantor has undertaken in issuing guarantee. The initial recognition and measurement provisions of FIN 45 were applicable to guarantees issued or modified after December 31, 2002.

Komatsu provides guarantees to third parties of loans of the employees, affiliated companies and other companies. The guarantees relating to the employees are mainly made for their housing loans. The guarantees of loans relating to the affiliated companies and other companies are made to enhance the credit of those companies.

For each guarantee provided, Komatsu would have to perform under a guarantee, if the borrower defaults on a payment within the contract terms. The contract terms are from 10 years to 30 years in the case of employees with housing loans, and from 1 year to 15 years in the case of loans relating to the affiliated companies and other companies. The maximum amount of undiscounted payments the companies would have had to make in the event of default is ¥26,226 million (\$252,173 thousand) at March 31, 2004.

Table of Contents

The carrying amounts of the liabilities recognized for Komatsu's obligations as guarantors under those guarantees at March 31, 2004 were insignificant. Certain of those guarantees were secured by collateral and insurance issued to the Company.

With regard to sale of a subsidiary, the Company guarantees to the purchaser to pay up to ¥4,258 million (\$40,942 thousand) as of March 31, 2004 relating to the credit risk of subsidiary's outstanding receivables at the time of the sale. Management of the Company believes that losses from those contingent liabilities, if any, would not have a material effect on the consolidated financial statements.

Commitments for capital expenditures outstanding at March 31, 2004, aggregated approximately ¥4,000 million (\$ 38,462 thousand).

Komatsu is involved in certain legal actions and claims arising in the ordinary course of its business. It is the opinion of management and legal counsel that such litigation and claims will be resolved without material effect on the companies' financial position.

Komatsu has business activities with customers, dealers and associates around the world and its trade receivables from such parties are well diversified to minimize concentrations of credit risks. Management does not anticipate incurring losses on their trade receivables in excess of established allowances.

Komatsu also issues contractual product warranties under which they generally guarantee the performance of products delivered and services rendered for a certain period or term. Change in accrued product warranty cost for the years ended March 31, 2004 and 2003 is summarized as follows:

	Millions of yen		Thousands of U.S. dollars
	2004	2003	2004
Balance at beginning of year	¥ 11,794	¥ 11,193	\$ 113,404
Addition	17,015	12,624	163,606
Utilization	(13,612)	(11,815)	(130,885)
Other	709	(208)	6,817
Balance at end of year	¥ 15,906	¥ 11,794	\$ 152,942

Table of Contents**F. Contractual Obligations**

The following tables set forth Komatsu's contractual obligations as of March 31, 2004.

	Millions of yen				
	Total	Less than			More than
		1 year	1-3 years	3-5 years	5 years
Short-term Debt Obligations	96,787	96,787			
Long-term Debt Obligations (excluding Capital Lease Obligations)	315,746	41,160	188,342	68,320	17,924
Capital (Finance) Lease Obligations (including amounts representing interest)	44,370	13,064	19,984	8,561	2,761
Operating Lease Obligations	8,106	2,148	2,447	1,402	2,109
Total	465,009	153,159	210,773	78,283	22,794

	Millions of U.S. dollars				
	Total	Less than			More than
		1 year	1-3 years	3-5 years	5 years
Short-term Debt Obligations	931	931			
Long-term Debt Obligations (excluding Capital Lease Obligations)	3,036	396	1,811	657	172
Capital (Finance) Lease Obligations (including amounts representing interest)	427	126	192	82	27
Operating Lease Obligations	78	21	24	13	20
Total	4,472	1,474	2,027	752	219

Notes:

- 1) Short-term and long-term debt obligations exclude SFAS No.133 market value adjustments of ¥270 million (U.S.\$3 million) and ¥6,407 million (U.S.\$62 million), respectively.
- 2) Commitments for capital expenditures outstanding at March 31, 2004 aggregated approximately ¥4,000 million (U.S.\$38 million).

Table of Contents**Item 6. Directors, Senior Management and Employees****A. Directors and Senior Management**

All Directors and Statutory Auditors are elected by a general meeting of shareholders to serve terms of approximately one year and four years, respectively, according to the statutory maximum. However, a Director or a Statutory Auditor may serve any number of consecutive terms.

The Board of Directors elects from its members a number of Representative Directors who have the power severally to represent the Company in all matters, and from among them, a President. At its discretion, the Board of Directors may also elect a Chairman, Executive Vice Presidents, Executive Managing Directors and Managing Directors from among its members. At the present time, the Chairman and the President are Representative Directors.

The Statutory Auditors of the Company are not required to be, and are not, certified public accountants. Each Statutory Auditor audits the performance of duties by Directors, and may at any time request the Directors to report on the business activities of the Company, and may investigate the business as well as the financial situation of the Company. Certain powers are provided under the Commercial Code of Japan to enable the Statutory Auditors to carry out these functions. Further, each Statutory Auditor continues to perform the function of examining the annual financial documents and the rendering of an opinion thereon for the general meeting of shareholders. The Statutory Auditors may not at the same time be Directors, managers or employees of the Company or of any of its subsidiaries.

Set forth below are the Directors and Statutory Auditors of the Company, their date of birth, their current position with the Company, prior positions, the dates when they assumed such positions, and other principal business activities performed outside the Company as of June 25, 2004.

Board of Directors**Toshitaka Hagiwara**

Date of Birth: June 15, 1940
 Director Since: Jun. 1990
 Current Position (s): Chairman of the Board and Representative Director (since Jun.2003)

Prior Positions:

Jun.1999	Executive Vice President and Representative Director
Jun.1997	Executive Managing Director
Jun.1995	Managing Director
Jun.1990	Director
May.1988	General Manager, Legal Dept., Corporate Planning Dept.
Dec.1969	Joined the Company

Principal Business Activities outside the Company:

President and Representative Director, Komatsu Building Co., Ltd.

2. Statutory Auditors Masahiro Yoshiike and Takaharu Dohi satisfy the requirements for outside auditors provided in Article 18-1 of the Law for Special Exceptions to the Commercial Code Concerning Audit, etc. of Kabushiki-Kaisha .
3. The Company introduced an executive officer system in June 1999, and as of June 30, 2004, has 22 officers including 5 persons simultaneously holding the post of directors whose name are marked with asterisk in the above table.
4. There are no family relationships between any of the Directors or Statutory Auditors of the Company.

Table of Contents

Basic Stance on Corporate Governance and Progress in Implementation

Basic Stance on Corporate Governance

To enjoy an ever larger trust of its shareholders and all other stakeholders by maximizing its corporate value, Komatsu is working to improve management efficiency, strengthen corporate governance, advocate corporate ethics and ensure sound management on a Groupwide basis.

To further improve transparency of the management to shareholders and investors, Komatsu discloses information in a fair and timely manner and actively engages in investor relations activities by holding meetings in Japan and abroad to explain business results.

Current State of Progress Concerning Corporate Governance

(1) Current Conditions Concerning Management Organizations Related to Decision-Making, Execution and Supervisory and Other Corporate Governance Functions

a. Organizational Framework

In 1999 Komatsu introduced the executive officer system and has since worked to separate management decision-making and supervisory functions from executive functions within the confines of the law. At the same time, the Company reduced the number of members of the Board of Directors so that directors would become able to discuss important management matters thoroughly and make decisions promptly.

The Board of Directors meets every month, discusses and makes resolutions concerning important matters and decisions on management policies of the Komatsu Group. The Board of Directors also supervises and oversees the execution of management duties by representative and other directors strictly. Two external directors are included in the Board of Directors (eight persons as of June 30, 2004) to ensure management transparency and objectivity.

With respect to statutory auditors (four persons as of June 30, 2004), Komatsu has consistently made sure that a half of them are represented by external auditors. Each auditor attends Board of Directors meetings and other important meetings and audits the execution of duties by directors. The Board of Statutory Auditors conducts appropriate auditing by meeting every month, making decisions concerning audit policies, duty assignments among themselves and hearing the conditions of execution of management duties from the directors.

Concerning the compensation of directors, Komatsu established the Compensation Council with a majority of external experts in 1999 and has since utilized the results of discussions for revisions of the compensation system for directors.

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu has entered into an audit contract with an independent audit firm and receives strict audits of accounts of both non-consolidated and consolidated financial statements. The Company has also entered into consultation contracts with a multiple number of law firms, receives advice on important legal issues as needed, and thus works to reduce legal risks.

Table of Contents

b. Current Conditions Concerning Compliance

Komatsu works to strengthen compliance so that each and every employee of the Komatsu Group observes the laws and regulations, correctly understands and implements the business rules stipulated in Komatsu's Code of Worldwide Business Conduct (revised four times since its establishment in 1998). The Compliance Committee, established at the head office of Komatsu Ltd., is staffed by the President and CEO, other key officers and the representative of the labor union and is participated in by auditors as observers. The Committee makes decisions on compliance-related policies, structure and other pertinent matters of the Komatsu Group, and discusses important matters. Furthermore, having assigned the duty of compliance to a director and established the Compliance Department, Komatsu ensures continuous management and guidance, and aggressively promotes activities designed to improve corporate ethics on a Groupwide basis. Specifically, the Company has established the Business Rule Consultation Office to promptly respond to consultation requests and reports from employees of Komatsu Group companies.

c. Current Conditions of Internal Control System

Applicable to the Sarbanes-Oxley Act of the United States of America, Komatsu is steadily improving the internal control system required for financial reporting and timely disclosure of information.

Komatsu also has a system to carefully control and supervise management transparency and efficiency of Komatsu Group companies. Under this system, Komatsu appoints directors, executive officers and high-rank employees of Komatsu Ltd. as directors and auditors of major Group companies in Japan and abroad as needed, while they maintain their current positions at the Company.

With respect to internal audit, audit teams are formed under the leadership of the Internal Audit Department and joined by staff members of the Legal Department and compliance-related sections, and are working to strengthen compliance on a Groupwide basis.

d. Current Conditions of Risk Management

Under the basic policy of risk management, Komatsu safekeeps human, physical, financial, credit and all other resources related to corporate activities, works to predict a variety of risks surrounding companies and prevent them from surfacing, and should a risk occur, minimizes the damage therefrom.

The Risk Management Committee devises Groupwide risk management policies, and checks and follows up on risk management measures in normal times. Should a risk surface, it establishes an emergency headquarters and conducts every possible activity to minimize the damage.

e. Concerning Director's Remuneration System

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu has made a decision to reassess the director's remuneration system in order to link more directly with business performance of the Company. Concerning the auditor's remuneration, in light of his/her independence of management, Komatsu has also made a decision to discontinue the business performance-linked bonus and pay only the basic remuneration, starting with the payment in the fiscal year ending March 31, 2006. Komatsu has decided to reduce and eliminate the retirement bonus system for directors, auditors and executive officers in phases.

Table of Contents

(2) Outline of Personal, Capital or Business Relationships or Other Vested Interests Between the Company and External Directors and Auditors

Two directors among all the directors of Komatsu are external directors as stipulated in Article 188, Paragraph 2, Item 7-2 of the Commercial Code, and neither of the two has any special vested relationship with the Company. One of the two external directors is Chairman of T&D Holdings, Inc., and Komatsu has a business relationship with TAIYO LIFE INSURANCE COMPANY, a subsidiary of T&D Holdings, in the form of receiving long-term loans and other matters.

(3) Actions Taken during Fiscal 2004 to Strengthen Corporate Governance

a. Appointment of External Director

In June 2003, Komatsu appointed another external director, increasing the number of external directors to two in the total of eight directors on the Board. Komatsu believes it can further enhance the soundness and neutrality of the Board of Directors as a result of this increase in the number of external directors.

b. Establishment of the Information Disclosure Committee

In 2003, Komatsu created the Information Disclosure Committee to reinforce control procedures for accurate production, reviews and reporting of legally required information. The Committee meets prior to the announcement of quarterly and interim business results. It also meets when other matters so necessitate, and ensures the disclosure of information in a fair and timely manner according to the rules.

Interest of Management in Certain Transactions

None

Table of Contents**B. Compensation**

The aggregate compensation, including bonuses but excluding retirement allowances, paid by the Company in Fiscal 2004 to all Directors and Statutory Auditors for services in all capacities, was ¥421 million. The breakdown of the Compensation is set forth below.

Remuneration

	<u>Number of Persons Paid</u>	<u>Amount Paid (JPY million)</u>
Directors	9	295
Statutory Auditors	4	50
Total	13	345
<u>Bonuses</u>		
Directors	8	65
Statutory Auditors	4	11
Total	12	76
<u>Retirement Allowance</u>		
The retired Director	1	396
Total	1	396

Bonuses

In accordance with customary Japanese business practices, annual bonuses are paid to the Directors and Statutory Auditors of the Company out of the profit of the Company available for dividends, as such profit is determined in accordance with the Commercial Code of Japan. Such bonuses are approved by the shareholders of the Company at a ordinary general meeting of shareholders held in June each year. Bonuses so paid are not deductible by the Company for tax purposes and, for financial reporting purposes, are reported under selling, general and administrative expenses as a charge against income for the year in which they are paid.

Retirement Allowance

Edgar Filing: KOMATSU LTD - Form 20-F

The Company has a severance payment plan for Directors and Statutory Auditors. The retirement payment scheme for Directors and Statutory Auditors is accrued along the pertinent rules of the Company. The amount of provision made for such severance payments, as charged to operating income, for Fiscal 2004 was ¥198 million.

Revision of the Compensation Program

The compensation program applicable to Directors and Statutory Auditors has subsequently been revised. As a result, bonuses referred to above for Auditors will be abolished starting in Fiscal 2005 to reinforce the auditors' independence, the incentive program for auditors will be abolished and the retirement payment for Directors and Statutory Auditors will gradually be reduced for total abolition in three years.

Options to Purchase Securities from Registrant or Subsidiaries

On June 26, 2003, the shareholders of the Company authorized the acquisition by the Company of 10 million shares of its common stock, for a total consideration of up to ¥5,000 million, through the period ending on the date of the Company's next annual general meeting of shareholders. The Company intends to transfer such treasury shares to the Directors and certain employees, under agreements granting such Directors or such employees the right to acquire a certain number of the treasury shares, at a contractually fixed price. The purchase price will be equal to the amount obtained by multiplying 1.05 by the average of closing prices applicable to ordinary transactions of Company shares on Tokyo Stock Exchange during the month immediately preceding the month in which the date of grant of the rights occurs provided that the exercise price shall not be less than the closing price of Company shares on Tokyo Stock Exchange as of the date of the grant. According to the agreement, the option price is ¥595 per share and the option exercise period runs from August 1, 2004 to July 31, 2009.

Table of Contents

None of the Company's common stock was allocated to the Company's Directors under the Company's stock option plan during Fiscal 2004.

The following table shows the common stock option plan.

Years granted (Year ended March 31)	Total number of shares to be called for Common stock (in thousands)	Exercise price per share
2002	1,100	559
2003	950	445
2004	1,280	595

Option to exercise the issuance of common stocks warrant

On June 25, 2004, the shareholders of the Company authorized the Company to issue rights to acquire new shares to the Directors and certain employees in the form of stocks options. This issuance of common stock warrants of the Company is up to a maximum of 1,430 rights (each right is for 1,000 shares), resulting in a total of 1,430,000 possible shares being issued.

Regarding the above compensation plans, refer to Note 13(4) of Notes to Consolidated Statements.

Notes:

1. Numbers in parentheses refer to average number of temporary employees, which is not included in the total numbers of employees in each business segment. The average number of temporary employees in the fiscal years ended March 31, 2003 and 2002 are not available.
2. Number of employees under Corporate refers to employees working for administrative departments who cannot be classified into specific business segments.

The Company has a labor contract with the Komatsu Labor Union (KLU) covering conditions of employment. This contract, which provides that all employees except management and certain other enumerated personnel must become union members, has been renegotiated every two years and its present term runs until July 31, 2005. The employees of the Company's principal Japanese subsidiaries are covered by separate labor contracts between such subsidiaries and the unions representing their employees. These contracts contain provisions generally similar to those contained in the Company's contract with KLU. Certain overseas employees of the Company and subsidiaries are also covered by labor contracts between the employer and unions in the relevant locale representing the employees.

E. Share Ownership

The following table lists the number of shares owned by the Directors and Statutory Auditors of the Company as of March 31, 2004. This table does not include the shares related to unexercised stock options.

<u>Name</u>	<u>Position</u>	<u>Number of shares (in thousands)</u>
Toshitaka Hagiwara	Chairman of the Board Representative Director	61

Top 10 Shareholders Total	326,845	34.09

The Company's major shareholders do not have any different voting rights than other shareholders.

Table of Contents

As of March 31, 2004, 96 residents of the United States held approximately 14.3% of the outstanding shares of record.

The number and the percentage of the Company shares held by Brandes Investment Partners and Franklin Templeton Investment Group who are beneficial owners of 5% or more of the Company shares are not contained in the foregoing table because the Company was unable to identify the owners of record of the shares reported to be held by them.

B. Related Party Transactions

Since the beginning of Komatsu's last full fiscal year, Komatsu has not transacted with, nor does Komatsu currently plan to transact with a related party. In this paragraph, a related party includes:

(a) enterprises that directly or indirectly through one or more intermediaries, control or are controlled by, or are under common control with, Komatsu;

(b) associates;

(c) individuals owning, directly or indirectly, an interest in the voting power of Komatsu that gives them significant influence over Komatsu, and close members of any such individual's family;

(d) key management personnel, namely those persons having authority and responsibility for planning, directing and controlling the activities of Komatsu, including directors and senior management of Komatsu and close members of such individual's families;

(e) enterprises for which a substantial interest in the voting power is owned, directly or indirectly, by any person described in (c) or (d) or over which such a person is able to exercise significant influence.

This item includes enterprises owned by directors or known major shareholders of Komatsu and enterprises that have a member of key management personnel in common with Komatsu. Close members of an individual's family are those that may be expected to influence, or be influenced by, that person in their dealings with Komatsu. An associate is an unconsolidated enterprise in which Komatsu has a significant influence or which has significant influence over Komatsu. Significant influence over an enterprise is the power to participate in the financial and operating policy decisions of the enterprise but is less than control over those policies. Shareholders beneficially owning a 10% interest in the voting power of Komatsu are presumed to have a significant influence on Komatsu.

C. Interests of Experts and Counsel

None

Table of Contents

Item 8. Financial Information

A. Consolidated Statements and Other Financial Information

Refer to Consolidated Financial Statements and Notes to Consolidated Financial Statements included in the Company's Financial Report to Shareholders for the year ended March 31, 2004 attached hereto and incorporated herein by reference.

Legal Proceedings

Komatsu is involved in certain legal actions and claims arising in the ordinary course of its business. It is the opinion of management and legal counsel that such litigation and claims will be resolved without material effects on Komatsu's financial position.

Dividend Policy

The Company maintains a basic policy of redistributing profits to Shareholders in the form of cash dividends, by taking payout ratios into account and linking returns more directly with business results, while ensuring sufficient internal reserves for reinvestment. Based on this policy, the Company has set Fiscal 2004 year-end per share dividends at ¥4.0 for the second half, with total annual per share dividends to be set at ¥7.0.

Retained earnings will be used to expand the scale of Komatsu's business and strengthen its business base through effective investments in the fields where Komatsu enjoys technological superiority in global operations in construction and mining equipment and development and launch of new products to meet more sophisticated customer needs.

B. Significant Changes

No significant change has occurred since the date of the annual financial statements.

Item 9. The Offer and Listing

A. Offer and Listing Details

Edgar Filing: KOMATSU LTD - Form 20-F

The shares of common stock of the Company are listed on Tokyo Stock Exchange (TSE) and four other stock exchanges in Japan: Osaka, Nagoya, Fukuoka and Sapporo.

In the United States, the Company's American Depositary Shares, each representing 4 shares of common stock, are traded on the over-the-counter market in the form of American Depositary Receipts and are issued and exchanged by CITIBANK of New York as Depositary.

In Europe, European Depositary Receipts are listed on the Luxemburg Stock Exchange and Global Bearers Certificates are listed on the Frankfurt Stock Exchange.

As of June 30, 2004, 998,744,060 shares of common stock were outstanding. This incorporates 17,005,856 equivalent shares evidenced by 4,251,464 ADSs (equivalent to 17,005,856 shares of common stock, held by 13 record holders, or approximately 1.7% of the total number of shares of common stock outstanding).

Table of Contents

The following table sets forth for the periods indicated the reported high and low sales prices of the Company's stock on TSE and the reported high and low sales prices of ADSs.

B. Memorandum and Articles of Association

I. Organization and Registration

The Company is a joint stock corporation (kabushiki kaisha) incorporated in Japan under the Commercial Code of Japan. It is registered in the Commercial Register (Shogyo Tokibo) maintained by the Minato Branch Office of Tokyo Legal Affairs Bureau, which has the jurisdiction over the district in which the Company's head office is currently located.

II. Objectives and Purposes

The objectives and purposes of the Company, provided in Article 2 of the Company's Articles of Incorporation, shall be to engage in the following businesses:

1. Manufacture, repair, sale and purchase of construction machinery, agricultural machinery, industrial machinery, automobiles, internal combustion engines and various other machinery and equipment and parts thereof.
2. Manufacture, sale and purchase of various iron and steel goods.
3. Smelting, processing, sale and purchase of various types of iron and steel, pig-iron, ferroalloys and other special metals.
4. Manufacture, sale and purchase of various types of electric materials and equipment.
5. Manufacture, sale and purchase of various synthetic resin products.
6. Manufacture, repair, sale and purchase of various arms and parts thereof.
7. Mining industry, and sale and purchase of minerals.

8. Designing, executing, supervising and contracting various types of civil engineering and construction work for plants, dwelling houses, and other structures.
9. Sale and purchase of lumber, processed lumber products and various types of civil engineering and construction materials, machinery and equipment.
10. Sale, purchase and lease of real property.
11. Manufacture, sale and repair of industrial waste and general waste treatment device.
12. Collection, transportation, treatment and recycling of industrial wastes and general wastes, sale of the recycled products, and consulting on these matters.
13. Development, creation, sales and consulting on the computer software and computer systems.
14. Electronic commerce using networks such as the internet.
15. Information processing and information providing service.
16. Financing services
17. All business incidental to each and every one of the preceding item.

Table of Contents

18. Investing in other companies or promoting organization of other companies.

The objectives and purposes of other companies in which the Company may invest may not necessarily be restricted by the objectives and purposes of the Company.

III. Directors

The Commercial Code of Japan provides that the Directors must refrain from engaging in any business competing with the Company (Art. 264) or effecting a transaction involving a conflict of interest (Art. 265) unless approved by the Board of Directors. It also provides that any Director who has a material interest in the subject matter of a resolution to be taken by the Board of Directors cannot vote in such resolution (Art.260-2, Paragraph 2). Neither the Articles of Incorporation nor the Rules of the Board of Directors of the Company have any additional provisions with regard to a Director's power to vote on a proposal, arrangement or contract in which the Director is materially interested. The Commercial Code of Japan does not have an explicit provision concerning a director's obligation not to use the corporation's opportunity for his or her personal benefit or for the benefit of a third party, although such a conduct may be restricted by the duty of faithfulness (Art. 254-3).

The Commercial Code of Japan provides that, unless otherwise specified in the Articles of Incorporation (which specification does not exist in the case of the Company), the compensation for directors of companies, in respect of its amount (if the amount is fixed), the calculation method (if the amount is unfixed) or its substance (in the case of non-cash benefits) shall be determined at a general meeting of shareholders (Art.269, Paragraph 1).

The Commercial Code of Japan provides that the incurrence by a company of a significant amount of borrowings from a third party needs approval of the company's board of directors (Art.260, Paragraph 2). The Company's Regulations of the Board of Directors contain corresponding provisions. (The Articles of Incorporation of the Company have no specific provisions as to a borrowing power exercisable by the directors.)

There is no mandatory retirement age for the Directors of the Company under the Commercial Code of Japan or the Articles of Incorporation or the Rules of the Board of Directors of the Company.

There is no requirement concerning the number of shares an individual must hold in order to qualify as a Director of the Company under the Commercial Code of Japan or the Articles of Incorporation or the Rules of the Board of Directors of the Company.

IV. Common Share

Set forth below is information relating to the Company's common share, including brief summaries of the relevant provisions of its Articles of Incorporation and Share Handling Regulations, as currently in effect, and of the Commercial Code of Japan and related legislation.

General

The Company's authorized share capital is 3,955,000,000 shares, of which 998,744,060 shares were issued and outstanding as of June 30, 2004. Under the Commercial Code, shares must be registered and are transferable by delivery of share certificates. In order to assert shareholders' rights against the Company, a shareholder must have its name and address registered on the shareholder register under the Commercial Code, in accordance with the Company's Share Handling Regulations.

Table of Contents

A holder of shares may choose, at its discretion, to participate in the central clearing system for share certificates under the Law Concerning Central Clearing of Share Certificates and Other Securities of Japan. Participating shareholders must deposit certificates representing all of the shares to be included in this clearing system with the Japan Securities Depository Center. If a holder is not a participating institution in the Securities Center, it must participate through a participating institution, such as a securities company or bank having a clearing account with the Securities Center. All shares deposited with the Securities Center will be registered in the name of the Securities Center on the Company's shareholder register. Each participating shareholder will in turn be registered on the Company's register of beneficial shareholders and be treated in the same way as shareholders registered on the shareholder register. For the purpose of transferring deposited shares, delivery of share certificates is not required. Entry of the share transfer in the books maintained by the Securities Center for participating institutions, or in the book maintained by a participating institution for its customers, has the same effect as delivery of share certificates. The registered beneficial owners may exercise the rights attached to the shares, such as voting rights, and will receive dividends (if any) and notices as shareholders directly from the Company. The shares held by a person as a registered shareholder and those held by the same person as a registered beneficial owner are aggregated for these purposes. Beneficial owners may at any time withdraw their shares from deposit and receive share certificates, subject to the limitations caused by the Japanese unit share system described below.

The registered beneficial holder of deposited shares underlying the ADSs is the depository for the ADSs. Accordingly, holders of ADSs will not be able to directly assert shareholders' rights.

Rights of Shareholders

-Dividends

Under the Company's Articles of Incorporation, its financial accounts will be closed on March 31 of each year and dividends, if any, will be distributed to shareholders (or pledgees) written or recorded in the shareholder register as of the close of business on that date following approval at its ordinary general meeting of shareholders. In addition, by resolution of the Board of Directors, the Company may distribute interim dividends to the shareholders (or pledgees) written or recorded in the shareholder register as of September 30 each year. Dividends will be distributed in cash.

The Commercial Code requires that, until the aggregate amount of the Company's legal reserve and additional paid-in capital is at least one-quarter of its stated capital, it set aside in its legal reserve an amount equal to at least one-tenth of any amount that it pays out as an appropriation of retained earnings, including any payment by way of annual or interim dividends, bonuses to directors and corporate auditors and others. The Commercial Code will permit the Company to distribute profits by way of dividends out of the excess of the net assets, on a non-consolidated basis, over the aggregate of:

- (1) the stated capital;
- (2) the additional paid-in capital;
- (3) the accumulated legal reserve;

Table of Contents

(4) the legal reserve to be set aside in respect of the fiscal year concerned; and

(5) other matters specified in the Implementation Ordinance of the Commercial Code.

In the case of interim dividends, the net assets are calculated by reference to the non-consolidated balance sheet as at the last closing of the Company's accounts, but adjusted to deduct (i) any subsequent payment by way of appropriation of retained earnings and transfer to legal reserve in respect thereof, (ii) any subsequent transfer of retained earnings to stated capital and (iii) if it has been authorized, pursuant to a resolution of a general meeting of shareholders, to purchase shares (see "Repurchase by the Company of Shares" below) the total amount of the purchase price of such share so authorized by such resolution that may be paid by the Company, add (iv) the balance of the amounts of the additional paid-in capital and the legal reserve that have been reduced after the last closing of the Company's accounts (deducting the amounts to be refunded to the shareholders and the amounts to be appropriated to replenish the capital deficiency) and (v) the balance of the amount of capital reduction after the last closing of the Company's accounts (deducting the amounts to be refunded to the shareholders, the amounts to be required for the cancellation of shares and the amounts to be appropriated to replenish the capital deficiency) and reflect (vi) other matters specified in the Implementation Ordinance of the Commercial Code. Interim dividends may not be paid where there is a risk that at the end of the fiscal year there might not be any excess of net assets over the aggregate of the amounts referred to in (1) through (5) above.

-Stock Splits

The Commercial Code permits the Company, by resolution of its Board of Directors, to make stock splits, regardless of the value of net assets (as appearing in its latest non-consolidated balance sheet) per share.

Under the Commercial Code, by resolution of the Company's Board of Directors, the Company may increase the authorized shares up to the number reflecting the rate of stock splits and amend its Articles of Incorporation by resolution of its Board of Directors to this effect without the approval of a shareholders' meeting.

-Japanese Unit Share System

The Company's Articles of Incorporation provided that 1,000 shares of common stock constitute one unit. The Commercial Code of Japan permits the Company, by resolution of its Board of Directors, to reduce the number of shares which constitutes one unit or abolish the unit share system, and amend its Articles of Incorporation to this effect without the approval of a shareholders' meeting.

-Transferability of Shares Representing Less than One Unit.

The Company may not issue share certificates for a number of shares not constituting an integral number of units, except in limited circumstances. Because the transfer of shares normally requires delivery of the share certificates for the shares being transferred, shares constituting a fraction of a unit and for which no share certificates are issued may not be transferable. Because transfer of ADRs does not require a change in the ownership of the underlying shares, holders of ADRs evidencing ADSs that constitute less than one unit of shares are not

affected by these restrictions in their ability to transfer the ADRs. However, because transfers of less than one unit of the underlying shares are normally prohibited under the unit share system, the deposit agreement provides that the right of ADR holders to surrender their ADRs and withdraw the underlying shares for sale in Japan may only be exercised as to whole units.

Table of Contents

-Right of a Holder of Shares Representing Less than One Unit to Require the Company to Purchase Its Shares.

A holder of shares representing less than one unit may at any time require the Company to purchase its shares. These shares will be purchased at (a) the closing price of the shares of the Company reported by the Tokyo Stock Exchange on the day on which the application for the purchase reached the handling office, multiplied by the number of shares or (b) in case that no trading is effected at the Tokyo Stock Exchange on that day, the price of the first trade effected thereafter, multiplied by the number of shares. However, because holders of ADRs representing less than one unit are not able to withdraw the underlying shares from deposit, these holders will not be able to exercise this right as a practical matter.

-Right of a Holder of Shares Representing Less than One Unit to Purchase from the Company its Shares up to a Whole Unit.

The Articles of Incorporation of the Company provide that in the case that a shareholder or beneficial owner holding Less-Than-One-Unit Shares requests that the Company sell a certain number of Less-Than-One-Unit Shares so that the shares owned by such shareholder or beneficial owner combined with such additional shares may constitute one unit. These shares will be sold at (a) the closing price of the share of the Company reported at a market operated by the Tokyo Stock Exchange on the day on which the application for additional purchase become effective, multiplied by the number of shares applied for additional purchase or (b) in the case that no trading is effected on such day or if the Tokyo Stock Exchange is closed on such day, the price at which the share of the Company is first traded thereafter, multiplied by the number of shares applied for additional purchase.

-Voting Rights of a Holder of Shares Representing Less than One Unit.

A holder of shares representing less than one unit cannot exercise any voting rights pertaining to those shares. In calculating the quorum for various voting purposes, the aggregate number of shares representing less than one unit will be excluded from the number of outstanding shares. A holder of shares representing one or more whole units will have one vote for each whole unit represented.

A holder of shares representing less than one unit does not have any rights relating to voting, such as the right to participate in a demand for the resignation of a director, the right to participate in a demand for the convocation of a general meeting of shareholders and the right to join with other shareholders to propose an agenda item to be addressed at a general meeting of shareholders. In addition, a holder of shares constituting less than one unit does not have the right to require the Company to issue share certificates for those shares under the Company's Articles of Incorporation.

However, a holder of shares constituting less than one unit has all other rights of a shareholder in respect of those shares, including the following rights:

to receive annual and interim dividends,

to receive shares and/or cash by way of retirement, consolidation, subdivision, conversion, exchange or transfer of shares, company split or merger,

Table of Contents

to be allotted rights to subscribe for new shares and other securities when such rights are granted to shareholders,

to participate in any distribution of surplus assets upon liquidation,

to institute a representative action by shareholders, and

to demand that a director suspend illegal and certain other acts.

-Ordinary and Extraordinary General Meeting of Shareholders

The Company normally holds its ordinary general meeting of shareholders in June of each year in Minato-ku, Tokyo or in a neighboring district. In addition, the Company may hold an extraordinary general meeting of shareholders whenever necessary by giving at least two weeks' advance notice. Under the Commercial Code and the Company's Articles of Incorporation, notice of any shareholders' meeting must be given to each shareholder having voting rights or, in the case of a non-resident shareholder, to his resident proxy or mailing address in Japan, at least two weeks prior to the date of the meeting.

-Voting Rights

A shareholder is generally entitled to one vote per one unit of shares as described in this paragraph and under Japanese Unit Share System above. In general, under the Commercial Code, a resolution can be adopted at a general meeting of shareholders by a majority of the shares having voting rights represented at the meeting. The Commercial Code and the Company's Articles of Incorporation require a quorum for the election of directors and statutory auditors of not less than one-third of the total number of outstanding shares having voting rights. The Company's shareholders are not entitled to cumulative voting in the election of directors under the Company's Articles of Incorporation. A corporate shareholder whose outstanding shares are in turn more than one-quarter directly or indirectly owned by the Company does not have voting rights. Shareholders may exercise their voting rights through proxies in accordance with the Company's Articles of Incorporation, provided that those proxies are also shareholders who have voting rights.

Pursuant to the Commercial Code and the Company's Articles of Incorporation, a quorum of, not less than one-third of the outstanding shares with voting rights must be present at a shareholders' meeting to approve any material corporate actions such as:

a reduction of stated capital,

amendment of the articles of incorporation (except amendments which the board of directors are authorized to make under the Commercial Code as described in "Stock Splits" and "Japanese Unit Share System" above),

the removal of a director or corporate auditor,

establishment of a 100% parent-subsidary relationship by way of share exchange or share transfer,

a dissolution, merger or consolidation,

a corporate separation,

the transfer of the whole or an important part of the Company's business,

the taking over of the whole of the business of any other corporation,

any issuance of new shares at a specially favorable price, bonds or debentures with warrants to subscribe for new shares with specially favorable conditions or warrants to subscribe for new shares with specially favorable conditions to persons other than shareholders, and

At least two-thirds of the outstanding shares having voting rights present at the meeting must approve these actions.

The voting rights of holders of ADSs are exercised by the depositary based on instructions from those holders.

Table of Contents

-Subscription Rights

Holders of shares have no preemptive rights under the Company's Articles of Incorporation when it issues new shares. Under the Commercial Code, the board of directors may, however, determine that shareholders be given subscription rights in connection with a particular issue of new shares. In this case, such rights must be given on uniform terms to all shareholders as of a specified record date by at least two weeks prior public notice to shareholders of the record date. Public or individual notice must be given to each of these shareholders at least two weeks prior to the payment date.

Subscription rights may be made transferable or nontransferable by the resolution of the board of directors under the Commercial Code.

-Share Purchase Warrants

A Share Purchase Warrant shall mean the right under which, upon the exercise thereof against the Company by a person who has such right (hereinafter referred to as a Share Purchase Warrants Holder), the Company shall be obliged to issue new shares, or in lieu of such issuance, to transfer the shares that it owns, to such Share Purchase Warrants Holder.

The Company may issue Share Purchase Warrants as Share Purchase Warrants on their own or attached to bonds or debentures to any persons by the resolution of its board of directors. Holders of shares do not have the right to receive, upon the exercise thereof against the Company, an allotment of Share Purchase Warrants to be issued by the Company (hereinafter referred to as a Right to Subscribe for Share Purchase Warrants) under the Company's Articles of Incorporation when it issues Share Purchase Warrants. Under the Commercial Code, the board of directors may, however, determine that shareholders be given Right to Subscribe for Share Purchase Warrants in connection with a particular issue of Share Purchase Warrants. In the case of an issue of Share Purchase Warrants, public or individual notice must be given to each of the shareholders at least two weeks prior to the payment date (or the date of issuance of the Share Purchase Warrants if such Share Purchase Warrants are issued without consideration).

Share Purchase Warrants may be made transferable or nontransferable by the resolution of the board of directors under the Commercial Code.

-Liquidation Rights

In the event of liquidation, the assets remaining after payment of all debts, liquidation expenses and taxes will be distributed among the shareholders in proportion to the number of shares they own.

-Liability to Further Calls or Assessments

All of the Company's currently outstanding shares, including shares represented by the ADSs, are fully paid and nonassessable.

-Transfer Agent

UFJ Trust Bank Limited is the transfer agent for the Company's shares. UFJ Trust's office is located at 4-3, Marunouchi 1-chome, Chiyoda-ku, Tokyo, Japan. UFJ Trust maintains the Company's register of shareholders and records transfers of record ownership upon presentation of share certificates.

Table of Contents

-Record Date

The close of business on March 31 is the record date for the Company's year-end dividends, if payable. September 30 is the record date for interim dividends, if payable. A holder of shares constituting one or more whole units who is registered as a holder on the Company's register of shareholders at the close of business as of March 31 is also entitled to exercise shareholders' voting rights at the ordinary general meeting of shareholders with respect to the fiscal year ending on March 31. In addition, the Company may set a record date for determining the shareholders entitled to the rights by giving at least two weeks' public notice.

The shares generally trade ex-dividend or ex-rights in the Japanese stock exchanges on the third business day before a record date (or if the record date is not a business day, the fourth business day prior thereto), for the purpose of dividends or rights offerings.

-Repurchase by the Company of Shares

Under the Commercial Code, the Company may acquire its shares for any purposes subject to the authorization of shareholders at an ordinary general shareholders meeting. In addition, the Company is authorized to purchase its shares pursuant to a resolution of the board of directors pursuant to its Articles of Incorporation. The acquisition is subject to the condition that the aggregate amount of the purchase price must not exceed the amount of the retained earnings available for dividend payments less the sum of any amount paid or to be paid by way of appropriation of related earnings or any transfer of retained earnings to stated capital.

In the case of shares listed on a Japanese stock exchange or traded in the over-the-counter market, acquisition shall be made through the market or by way of tender offer by the close of the following ordinary general meeting, unless acquisition of the shares from a specified person is authorized by the approval of two-thirds of outstanding shares having voting rights present at the shareholders' meeting at which a quorum of at least one-third of the outstanding shares having voting rights must be present.

In addition, the Company may acquire its shares by means of repurchase of any number of shares constituting less than one unit upon the request of the holder of those shares, as described under "Japanese Unit Share System" above.

-Holding of Shares by Foreign Investors

Other than the Japanese unit share system that is described in "Rights of Shareholders - Japanese Unit Share System" below, there are no limitations on the rights of non-residents or foreign shareholders to hold or exercise voting rights on the Company's shares imposed by the laws of Japan or the Company's Articles of Incorporation or other constituent documents.

C. Material Contracts

Edgar Filing: KOMATSU LTD - Form 20-F

- (1) In November 2003, the Company entered into an agreement with KONE Corporation to acquire 100% of the shares or ownership interest of KONE's subsidiaries, namely, Partek Forest AB and Partek Forest Holdings, LLC, both engaging in the Forestry Equipment business. The acquisition was completed in December 2003, based upon this agreement.

Table of Contents

- (2) In December 2003, the Company entered into an agreement with Shimachu Co., Ltd. to sell a piece of land. The land was duly delivered on July 30, 2004. The details of the sale are as follows.

Description of the Asset:	Land (73,128 square meters)
Address:	20-1, 3-chome Nakase, Kawasaki-ku, Kawasaki-shi, Kanagawa Prefecture, Japan
Book Value:	1,800 million yen
Sales Price:	11,280 million yen

- (3) In February 2004, the Company entered into an agreement with the Park Company of Oregon, LLC to sell the fixed assets of Komatsu Silicon America, Inc., a wholly-owned subsidiary of the Company located in Hillsboro, Oregon, U.S.A. The fixed assets were duly delivered on March 15, 2004. The details of the sale are as follows.

Description of the Asset:	Land: 378,880 square meters or 93.62 acre Buildings: 39,245 square meters or 422,427 square feet (total floor space)
Location:	Hillsboro, Oregon, U.S.A.
Book Value:	U.S.\$35 million
Sales Price:	U.S.\$5 million

D. Exchange Controls

The Foreign Exchange and Foreign Trade Law of Japan, as amended (Foreign Exchange Law), and the cabinet orders and ministerial ordinances thereunder, regulate certain transactions involving a non-resident of Japan or a foreign investor, including issuance of securities by a resident of Japan outside of Japan, transfer of securities between a resident of Japan and a non-resident of Japan, inward direct investment by a foreign investor, and a payment from Japan to a foreign country or by a resident of Japan to a non-resident of Japan.

Non-residents of Japan include individuals who are not resident in Japan and corporations whose principal offices are located outside of Japan. Generally, branches and other offices of Japanese corporations located outside of Japan are regarded as non-residents of Japan, but branches and other offices of non-resident corporations located within Japan are regarded as residents of Japan. Foreign investors are defined to be: (i) individuals not resident in Japan; (ii) corporations which are organized under the laws of foreign countries or whose principal offices are located outside of Japan; (iii) corporations of which not less than 50 percent of the voting rights are held directly or indirectly by (i) or (ii) above; and (iv) any corporation in which: (a) a majority of the officers are non-resident individuals; or (b) a majority of the officers having the power to represent the corporation are non-resident individuals.

The following is a summary of the pertinent regulations under the Foreign Exchange Law insofar as they affect debt securities of the Company, shares of the Company's Common Stock or Depositary Receipts representing such shares.

Table of Contents

Debt Securities

The Foreign Exchange Law requires that a resident of Japan whose debt securities are being issued or offered outside of Japan file a post facto report of capital transaction with the Minister of Finance. Under the Foreign Exchange Law, payment of the principal of and interest on these debt securities (including any additional amounts payable pursuant to the terms of the securities) may in general be made by the issuer without any restrictions. The Foreign Exchange Law gives the Minister of Finance the power in certain limited and exceptional circumstances to require prior approval for any such capital transaction (or for such payment).

On March 28, 1996, the Company, Komatsu Finance America Inc. and Komatsu Finance (Netherlands) B.V. (the Issuers) established and registered the U.S.\$1,000 million EMTN Program on the London Stock Exchange. The aggregate nominal amount of the Notes under the Program was increased to U.S.\$1,200 million on April 1, 1999, Komatsu Australia Holdings Pty. Ltd. joined the Program as an additional Issuer on March 31, 2000 and Komatsu Europe Coordination Center NV joined the Program as another additional Issuer on October 14, 2003. Under this program, each of the Issuers may from time to time issue notes denominated in any currency.

Acquisition of Shares

The Foreign Exchange Law requires that a resident of Japan whose shares are being issued or offered outside of Japan file a post facto report of capital transaction with the Minister of Finance.

In general, the acquisition of shares in a Japanese corporation listed on any stock exchange in Japan or traded on the over-the-counter market in Japan (the listed shares) from a resident of Japan by a non-resident of Japan requires the resident of Japan to file a post facto report with the Minister of Finance of the transaction. The Foreign Exchange Law gives the Minister of Finance the power in certain limited and exceptional circumstances to require prior approval for any such acquisition.

If a foreign investor intends to acquire the listed shares and as a result of such acquisition the aggregate of the shares in the relevant corporation already held by that foreign investor and certain related parties (as specified under the Foreign Exchange Law) and the number of such shares proposed to be acquired by that foreign investor would be 10 percent or more of the total issued shares, such foreign investor will generally be subject to a post facto reporting requirement or a prior notification requirement to the Minister of Finance and any other competent Minister, depending on the business purposes of the issuer. According to the Komatsu's business purposes stipulated in its Articles of Incorporation, the foreign investor who acquires 10 percent or more of the total issued shares will be subject to the prior notification requirement. In case the prior notification requirement is applicable, the Minister of Finance and the competent Minister will ultimately have a power to order the alternation or suspension of the acquisition in certain special circumstances.

Under the Foreign Exchange Law and the regulations thereunder currently in effect, a holder of bonds with share acquisition rights or share acquisition rights which were issued or offered outside of Japan may acquire the listed shares upon the conversion or exercise of such share acquisition rights without being subject to any of the aforesaid prior notification and/or post facto reporting requirements.

Table of Contents

Dividends and Proceeds of Sale

Under the Foreign Exchange Law and regulations thereunder, dividends paid on the shares of a Japanese corporation (including those in the form of Depository Receipts) held by non-residents of Japan and the proceeds of any sale of such shares within Japan may in general be converted into any foreign currency and repatriated abroad. The acquisition of shares by non-resident shareholders by way of stock splits is not subject to any of the prior notification and/or post facto reporting requirements. See Taxation Section for information about the applicable withholding tax.

Exercise or Transfer of Subscription Rights

The acquisition by a foreign investor of shares in a Japanese corporation upon the exercise of subscription rights in respect of share subscription rights or bonds with share subscription rights issued in Japan is subject to the formalities and restrictions described in the second paragraph under Acquisitions of Shares above. However, if a foreign investor wishes to dispose of, rather than exercise, any subscription rights, he may sell the rights inside or outside of Japan without material restriction.

Depository Receipts

When shares are deposited with a Depository located outside of Japan and Depository Receipts are issued in exchange therefor, the Depository is treated like any other foreign investor acquiring Shares.

E. Taxation

Debt Securities

Except as mentioned below, under the Japanese tax laws currently in effect, the interest on debt securities or corporate bonds (shasai) issued by a Japanese corporation is generally subject to the withholding of Japanese income tax and, in the case of a corporation (other than a non-Japanese corporation having no permanent establishment in Japan), to corporation tax, and premium (if any) on such debt securities is generally subject to Japanese income or corporation tax, depending on the status of the recipient.

Under Japanese tax laws currently in effect, the payment of interest on debt securities issued outside Japan by a Japanese corporation (on or after April 1, 1998 and on or before March 31, 2006) and the difference, if any, between the issue price and the amount payable upon redemption of such debt securities (hereinafter referred to as Redemption Profit) will not be subject to the withholding of Japanese income tax, if such interest or difference is payable outside of Japan to a non-resident of Japan or non-Japanese corporation (hereinafter referred to as Non-Residents or Non-Resident collectively) which (in the case of interest) has submitted documents certifying its non-Japanese residency in accordance with the requirements set out in Japanese tax laws, provided that certain conditions are also met at the time of offering. Furthermore, such payment will not be subject to any other Japanese income or corporation tax, unless Non-Resident has a permanent establishment in Japan and the payment is attributable to the business of such Non-Resident carried on in Japan through such permanent establishment.

The Convention Between the Government of Japan and the United States of America for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income, as presently in effect (as for withholding taxes, from July 1, 2004 and as for other taxes than withholding taxes, from January 1, 2005) (the Tax Convention), provides that the interest income (including Redemption Profit) of a United States resident or corporation from debt securities may be taxable by Japan if and to the extent that interest is paid by a resident of Japan or otherwise is from sources within Japan. Under the Tax Convention, the maximum rate of Japanese tax on interest income of United States residents or corporations is 10 percent unless the recipient has a permanent establishment in Japan and the debt securities in respect of which such interest is paid are effectively connected with such permanent establishment, in which case such income will be taxed at the normal rates provided by the Japanese income or corporate tax laws.

Table of Contents

There are no Japanese taxes payable on conversion of convertible bonds into shares of Common Stock or Depositary Receipts.

Gains derived from the sales of debt securities of the Company outside of Japan by Non-Residents, will not be subject to Japanese income or corporation taxes. Gains derived by a Non-Resident from the sale in Japan of debt securities of the Company will be exempt from Japanese taxes on income if the Non-Resident does not have a permanent establishment in Japan.

Japanese inheritance and gift taxes at progressive rates may be payable by an individual who has acquired debt securities of the Company as legatee, heir or donee.

Common Stock and Depositary Receipts

Generally, Non-Residents are subject to Japanese withholding tax (at the rate of 7 percent from January 1, 2004 through March 31, 2008 and thereafter at the rate of 15 percent) on dividends paid by Japanese corporations. Stock splits are not subject to Japanese income tax.

Pursuant to the Tax Convention the maximum rate of Japanese withholding tax that may be imposed on dividends paid by a Japanese corporation to a United States resident individual or, subject to certain limited exceptions, a United States corporation is 10 percent unless such United States resident individual or United States corporation has a permanent establishment in Japan and the shares with respect to which the dividends are paid are effectively connected with the permanent establishment. The Tax Convention between United States and Japan will be amended in the near future and the amendment may affect the treatment of dividends stated above.

Gains derived from the sale outside of Japan of Common Stock or Depositary Receipts by a Non-Resident, will not be in general subject to Japanese taxes on income.

Gains derived from the sale in Japan of Common Stock or Depositary Receipts by Non-Residents are in general exempt from Japanese income or corporation taxes, unless the Non-Resident has a permanent establishment in Japan.

Japanese inheritance and gift taxes, at progressive rates, may be payable by an individual who acquires Common Stock or Depositary Receipts as a legatee, heir or donee.

Table of Contents**Item 11. Quantitative and Qualitative Disclosures About Market Risk**

Market Risk Exposure

Komatsu is exposed to market risk primarily from changes in foreign currency exchange rates and interest rates with respect to international operations and foreign currency denominated credits and debts. In order to manage these risks that arise in the normal course of business, Komatsu enters into various derivative financial transactions pursuant to their policies and procedures. Komatsu do not enter into derivative financial transactions for trading or speculative purposes. Komatsu is exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. However, because of the counterparties' satisfactory credit ratings, none are expected to fail to meet their obligations.

Foreign Exchange Risk

To reduce foreign exchange risks against foreign currency denominated assets and liabilities, Komatsu executes forward exchange contracts and option contracts in a range of 50% to 100% based on their projected cash flow in foreign currencies.

The following table provides information concerning derivative financial instruments of Komatsu in relation to foreign currency exchange transactions existing as of March 31, 2004, which are translated into yen at the rate used on that date, together with the related weighted average contractual exchange rates as of March 31, 2004. As of March 31, 2004, the notional amount of option contracts is ¥1,061 million (U.S.\$10,202 thousand).

Interest Rate Risk

To reduce risks and hedge the volatility of cash flow due to changes in interest rates, Komatsu engages in certain interest rate swaps, cross-currency swaps and cap option transactions for interest payment and interest receipt. Certain interest rate swap contracts are not qualified as hedges for accounting purposes and are recorded at the fair value and the resultant gains are recognized as income.

The following tables provide information concerning debt obligations (excluding capital lease obligations) and derivatives and other financial instruments of Komatsu which are sensitive to changes in interest rates, mainly including interest rate swaps and cross-currency swaps. For debt obligations, the tables present principal cash flows and related weighted average interest rates by expected maturity dates. For interest rate and cross-currency swaps, the following tables present notional amounts and weighted average receive and pay interest rates. As of March 31, 2004, the notional amount and its average strike rate of interest cap transactions are ¥29,039 million (U.S.\$279,221 thousand) and 3.77%, respectively.

Table of Contents

Derivative Financial Instruments

Risk Management Policy

Komatsu is exposed to market risk primarily from changes in foreign currency exchange and interest rates with respect to debt obligations, international operations and foreign currency denominated credits and debts. In order to manage these risks that arise in the normal course of business, Komatsu enters into various derivative transactions for hedging pursuant to their policies and procedures. Komatsu does not enter into derivative financial transactions for trading or speculative purposes.

Komatsu has entered into interest rate swap and cap agreements, partly concurrent with currency swap agreements for the purpose of managing the risk resulting from changes in cash flow or fair value that arise in their interest rate and foreign currency exposure with respect to certain short-term and long-term debts.

Komatsu operates internationally, which exposes Komatsu to the foreign exchange risk against existing assets and liabilities and transactions denominated in foreign currencies (principally the U.S. dollar and the Euro). In order to reduce these risks, Komatsu executes forward exchange contracts and option contracts based on its projected cash flow in foreign currencies.

Komatsu is exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments, but does not expect any counterparties to fail to meet their obligations because of the high credit rating of the counterparties.

Fair Value Hedges

Komatsu uses derivative financial instruments designated as fair value hedges to manage primarily interest rate and foreign exchange risks associated with debt obligations. Principally cross-currency swaps and interest rate swaps are used to hedge such risk for debt obligations. Changes in fair value of the hedged debt obligations and derivative instruments designated as fair value hedge are offset and recognized in other expense.

For the year ended March 31, 2004, hedge ineffectiveness resulting from fair value hedging activities was not material to Komatsu's result of operations. During the same period, no fair value hedges were discontinued.

Cash Flow Hedges

Komatsu uses derivative financial instruments designated as cash flow hedges to manage its foreign exchange risks associated with forecasted transactions and interest risks associated with debt obligations. For transactions denominated in foreign currencies, Komatsu typically hedges forecasted and firm commitment exposures to the variability in cash flow basically up to one year. For the variable rate debt obligations,

Edgar Filing: KOMATSU LTD - Form 20-F

Komatsu enters into interest rate swap contracts to manage the changes in cash flows. Komatsu records the changes in fair value of derivative instruments designated as cash flow hedges in other comprehensive income (loss).

These amounts are reclassified into earnings through interest and other income or expense when the hedged items impact earnings.

Approximately ¥213 million (\$2,048 thousand) of existing loss included in accumulated other comprehensive income (loss) at March 31, 2004 will be reclassified into earnings within twelve months from that date. No cash flow hedges were discontinued during the year ended March 31, 2004 as a result of anticipated transactions that are no longer probable of occurring.

Table of Contents*Undesignated Derivative Instruments*

Komatsu has entered into interest rate swap contracts not designated as hedging instruments under SFAS No. 133 as a means of managing Komatsu's interest rate exposures for short-term and long-term debts.

Forward contracts and option contracts not designated as hedging instruments under SFAS No. 133 are also used to hedge certain foreign currency exposures. The changes in fair value of such instruments are recognized currently in earnings.

Notional principal amounts of derivative financial instruments outstanding at March 31, 2004 and 2003 are as follows.

	Millions of yen		Thousands of U.S.dollars
	2004	2003	2004
Forwards and options:

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

Not applicable.

Item 15. Controls and Procedures

Komatsu's management performed an evaluation under the supervision and with the participation of its Chief Executive Officer and Chief Financial Officer of the effectiveness of the design and operation of its disclosure controls and procedures. Based on Komatsu's evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that as of March 31, 2004, the end of the period covered by this report, the disclosure controls and procedures were adequate and effective.

No changes were made in Komatsu's internal control over financial reporting during the fiscal year ended March 31, 2004 that has materially affected, or is reasonably likely to materially affect Komatsu's internal control over financial reporting.

Item 16. [Reserved]

A. Audit Committee Financial Expert

The Board of Corporate Auditors of the Company has determined that Mr. Masafumi Kanemoto qualifies as an audit committee financial expert as defined by the rules of the SEC. Since Mr. Kanemoto joined the Company in 1970, he has worked in the field of accounting and finance. From 1994 to 1996, he served as the senior manager of Controlling Dept., Accounting Division and from 1999 to 2002 as the general manager of Internal Audit Department. Mr. Kanemoto was elected as one of the Statutory Auditors of the Company at the ordinary general meeting of shareholders held in June 2002. See Item 6.A. for additional information regarding Mr. Kanemoto.

B. Code of Ethics

Edgar Filing: KOMATSU LTD - Form 20-F

In order to ensure that Komatsu's business is conducted honestly, ethically and in compliance with the law by its senior officers (including directors, executive officers, presidents of divisions, general managers of administrative departments at the Head Office as well as managers of the Finance & Treasury and Corporate Accounting), Komatsu has adopted Code of Ethics for Senior Officers that stipulates the ethical duties and rules of conduct for its senior officers to obey. Code of Ethics for Senior Officers is incorporated herein as Exhibit 11.

In addition, in 1998, Komatsu started to publish a booklet of Komatsu's Code of Worldwide Business Conduct and distribute it to all employees and management officers of Komatsu all over the world in order to ensure that they understand how important it is to observe the rules of the business community. The content of the latest edition of this booklet published in February 2003 is available at:

Table of Contents**C. Principal Accountant Fees and Services**

Audit and Non-Audit Fees

KPMG AZSA & Co., formerly known as Asahi & Co. by December 31, 2003, has served as Komatsu's principal accountant for the fiscal years ended March 31, 2003 and 2004. Set forth below is the fees for audit and other services rendered by KPMG AZSA & Co. for the fiscal years ended March 31, 2003 and 2004.

	Year ended March 31, 2004	Year ended March 31, 2003
	(Millions of Yen)	
Audit fees	457	391
Audit-related fees	31	7
Tax fees	91	123
All other fees	45	28
Total	624	549

Audit fees include fees billed for services rendered for Komatsu's annual and semiannual consolidated financial statements, review of consolidated quarterly financial statements, documents filed with regulatory organizations.

Audit-related fees include fees billed for due diligence services related to merger and acquisitions, agreed-upon or expanded audit procedures, and review of internal control.

Tax fees include fees billed for tax compliance, review of tax return documents, documentation relating to transfer pricing, International and domestic indirect tax, tax preparation, tax due diligence, tax advice and others.

All other fees consist of fees for all other services not included in any of the other categories noted above. One of the fees under this category for the year ended March 31, 2004 was billed for advice in connection with Komatsu's voluntary preparation of its Environmental Report.

Audit Committee's Pre-Approval Policies and Procedures

In accordance with the U. S. Securities and Exchange Commission rules regarding auditor independence, the Board of Statutory Auditors of the Company has established Pre-Approval Policies and Procedures for Audit and Non-Audit Services Provided by Independent Auditor. The rules apply to the Company and its consolidated subsidiaries engaging any accounting firms for audit services and the SEC Auditor for permissible non-audit services.

When engaging an accounting firm for audit services, pre-approval is required prior to the commencement of such services. Similarly, when engaging the SEC Auditor for permissible non-audit services (audit-related services, tax services, and all other services), pre-approval must be obtained prior to the commencement of the services.
