

EMERSON ELECTRIC CO
Form 10-K
November 21, 2006

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended September 30, 2006

OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission file number 1-278

EMERSON ELECTRIC CO.

(Exact name of registrant as specified in its charter)

Missouri
(State or other jurisdiction of
incorporation or organization)

43-0259330
(I.R.S. Employer
Identification No.)

8000 W. Florissant Ave.

P.O. Box 4100

St. Louis, Missouri
(Address of principal executive offices)

63136
(Zip Code)

Registrant's telephone number, including area code: **(314) 553-2000**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
---------------------	--

Edgar Filing: EMERSON ELECTRIC CO - Form 10-K

Common Stock of \$0.50 par value per share

New York Stock Exchange

Chicago Stock Exchange

Preferred Stock Purchase Rights

Chicago Stock Exchange

Edgar Filing: EMERSON ELECTRIC CO - Form 10-K

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Aggregate market value of the voting stock held by nonaffiliates of the registrant as of close of business on March 31, 2006: \$34.3 billion.

Common stock outstanding at October 31, 2006: 401,184,390 shares.

Documents Incorporated by Reference

1. Portions of Emerson Electric Co. 2006 Annual Report to Stockholders (Parts I and II).
 2. Portions of Emerson Electric Co. Notice of 2007 Annual Meeting of Stockholders and Proxy Statement (Part III).
-

PART I

Item 1. Business

Emerson was incorporated in Missouri in 1890, and has grown from a regional manufacturer of electric motors and fans into a diversified global technology company. Having expanded its product lines through internal growth and acquisition, Emerson today is designing and supplying product technology and delivering engineering services in a wide range of industrial, commercial and consumer markets around the world.

Emerson is organized into the following business segments, based on the nature of the products and services rendered:

Process Management, providing measurement, control and diagnostic capabilities for automated industrial processes producing items such as foods, medicines, power and fuels

Industrial Automation, bringing integrated manufacturing solutions to diverse industries worldwide

Network Power, providing power and environmental conditioning and reliability to help keep telecommunication systems, data networks and critical business applications continuously operating

Climate Technologies, enhancing household and commercial comfort as well as food safety and energy efficiency through air-conditioning and refrigeration technology

Appliance and Tools, providing uniquely designed motors for a broad range of applications, appliances and integrated appliance solutions, and tools for both homeowners and professionals, as well as home and commercial storage systems

Sales, earnings before interest and income taxes, and total assets attributable to each segment for the three years ended September 30, 2006, are set forth in Note 16 of Notes to Consolidated Financial Statements of the 2006 Annual Report, which note is hereby incorporated by reference. Sales by segment were Process Management 23 percent, Industrial Automation 18 percent, Network Power 21 percent, Climate Technologies 17 percent, and Appliance and Tools 21 percent in 2006. Sales by geographic destination were United States 53 percent, Europe 22 percent, Asia 14 percent and other regions 11 percent in 2006. Information with respect to acquisition and divestiture activities by Emerson is set forth in Note 3 of Notes to Consolidated Financial Statements of the 2006 Annual Report, which note is hereby incorporated by reference.

PROCESS MANAGEMENT

The Process Management segment offers customers product technology as well as engineering and project management services for precision control, monitoring and asset optimization of plants that produce power or that process or treat such items as oil, natural gas and petrochemicals; food and beverages; pulp and paper; pharmaceuticals; and municipal water supplies. This array of products and services helps customers optimize their process plant capabilities in the areas of plant safety and reliability, and product quality and output. In 2006, sales by geographic destination for this segment were United States 36 percent, Europe 24 percent, Asia 19 percent and other regions 21 percent.

Process Management Systems and Software

Emerson's Process Management systems and software control plant processes by collecting and analyzing information from measurement devices in the plant, and by using that information to adjust valves, pumps, motors, drives and other control hardware in the plant for maximum product quality and process efficiency.

Measurement and Analytical Instrumentation

Measurement instrumentation measures the physical properties of liquids or gases in a process stream, such as pressure, temperature, level, or rate and amount of flow, and communicates this information to the control system. Measurement technologies provided by Emerson include Coriolis direct mass flow, magnetic flow, vortex flow, ultrasonic flow, differential pressure, ultralow-flow fluid measurement, temperature sensors and radar based tank gauging. Emerson measurement products also are used in custody transfer applications, such as the transfer of gasoline from a storage tank to a tanker truck, where precise metering of the amount of fluid transferred helps ensure accurate asset management.

Analytical instrumentation analyzes the chemical composition of process fluids and emissions to enhance quality and efficiency, as well as environmental compliance. Emerson's analytical technologies include process gas chromatographs, in-situ oxygen analyzers, infrared gas and process fluid analyzers, combustion analyzers and systems, and analyzers that measure pH, conductivity and water quality.

Valves, Actuators and Regulators

Control valves respond to commands from the control system by continuously and precisely modulating the flow of process fluids to provide maximum process efficiency and product quality. Emerson provides sliding stem valves, rotary valves, butterfly valves and related valve actuators and controllers. Emerson also provides a line of industrial and residential regulators, whose function is to reduce the pressure of fluids such as natural gas and liquid petroleum gas for transfer from high-pressure supply lines to lower pressure systems.

PlantWeb® Digital Plant Architecture

Emerson's PlantWeb digital plant architecture combines the technologies described above with the advantages of intelligent plant devices (valves and measurement instruments that have advanced diagnostic capabilities), open communication standards (non-proprietary digital protocols allowing the plant devices and the control system to talk with one another) and integrated modular software, not only to control the process better but also to collect and analyze valuable information about plant assets and processes. This capability gives customers the ability to detect or predict changes in equipment and process performance and the impact they can have on plant operations. The PlantWeb architecture provides the insight to improve plant availability and safety. PlantWeb also furnishes a platform to continually improve asset management and standards compliance, and to reduce startup, operations and maintenance costs.

Industry Services and Solutions

Emerson's array of process automation and asset optimization services can improve automation project implementation time and costs, increase process availability and productivity, and reduce total cost of ownership. Global industry centers offer engineering and project management services to help customers extract maximum performance and reliability from their process equipment and automation assets. These centers serve industries such as oil and gas, pulp and paper, chemical, power, food and beverage, and life sciences. They also assist customers in diagnosing equipment problems and plant inefficiencies.

Distribution

The principal worldwide distribution channel for the Process Management segment is a direct sales force, although a network of independent sales representatives, and to a lesser extent, independent distributors purchasing these products for resale are also utilized. The majority of sales in the United States are made through a direct sales force with the remainder primarily through independent sales representatives. In Europe and Asia, sales are almost exclusively made through a direct sales force with the remainder split evenly between independent sales representatives and distributors.

Brands

Brands, service/trademarks and trade names within the Process Management segment include Emerson Process Management, AMS Suite, Asset Optimization, Baumann, Bettis, Bristol, Brooks Instrument, CSI, Daniel, DeltaV, El-O-Matic, Fisher, Micro Motion, Mobrey, Ovation, PlantWeb, ROC, Rosemount, Saab Rosemount, Smart Process and Tescom.

INDUSTRIAL AUTOMATION

The Industrial Automation segment provides integrated manufacturing solutions to our customers at the source of manufacturing their own products. Products include motors, transmissions, alternators, fluid controls and materials joining equipment. Through these offerings, Emerson brings technology and enhanced quality to the customer's final product. In 2006, sales by geographic destination for this segment were United States 45 percent, Europe 39 percent, Asia 8 percent and other regions 8 percent.

Motors and Drives

Emerson provides a broad line of gear drives that can be coupled to electric motors and used in a wide variety of manufacturing operations and products, from automobile assembly lines to escalators in shopping malls or supermarket checkout stations. Products in this category include alternating current (AC) and direct current (DC) electronic variable speed drives, servo motors, pump motors, drive control systems, integral horsepower motors (1 HP and above), fractional horsepower motors (less than 1 HP) and gear drives.

Power Transmission

Emerson's power transmission products include belt and chain drives, helical and worm gearing, gear motors, motor sheaves, pulleys, mounted and unmounted bearings, couplings, chains and sprockets. They are used to transmit power mechanically in a wide range of manufacturing and material handling operations and products. Our design and application experience enable us to provide both standard and customized automation and power transmission solutions to our customers.

Power Generation

Emerson provides alternators (low, medium and high voltage) for use in diesel or gas powered generator sets, as well as high frequency alternators, AC motor/generator sets, traction generators and wind power generators.

Fluid Power and Fluid Control

Products in this category control and power the flow of fluids (liquids and gases) in manufacturing operations such as automobile assembly, food processing, textile manufacturing and petrochemical processing. They include solenoid and pneumatic valves, valve position indicators, pneumatic cylinders, air preparation equipment, and pressure, vacuum and temperature switches.

Materials Joining and Precision Cleaning

Emerson supplies both plastics joining technologies and equipment, and metal welding and joining processes to a diversified manufacturing customer base, including automotive, medical devices and toys. We also provide precision cleaning and liquid processing solutions to industrial and commercial manufacturers. Products include ultrasonic joining and cleaning equipment, linear and orbital vibration welding equipment, systems for hot plate welding, spin welding, and laser welding, and aqueous, semi-aqueous and vapor cleaning systems.

Electrical Distribution

Emerson's majority-owned EGS Electrical Group joint venture with SPX Corporation manufactures a broad line of components for current- and noncurrent-carrying electrical distribution devices. These products include conduit and cable fittings, plugs and receptacles, industrial lighting, and enclosures and controls. Products in this category are used in hazardous, industrial, commercial and construction environments, such as oil and gas drilling and production sites, pulp and paper mills and petrochemical plants.

Distribution

On a worldwide basis, the primary distribution channel for the Industrial Automation segment is through direct sales forces. Most products sold worldwide to original equipment manufacturers are through a direct sales force. Independent distributors constitute the next significant sales channel, mostly to reach end users; and, to a lesser extent, independent sales representatives are utilized, particularly for electrical distribution products in the United States.

Brands

Brands, service/trademarks and trade names within the Industrial Automation segment include Emerson Industrial Automation, Appleton, ASCO, ASCO Joucomatic, Branson Ultrasonics, Browning, Control Techniques, Emerson Power Transmission, Kato Engineering, Kop-Flex, KVT, Leroy Somer, McGill, Morse, Numatics and O-Z/Gedney.

NETWORK POWER

Emerson's Network Power segment designs, manufactures, installs and maintains products providing grid to chip electric power conditioning, power reliability and environmental control for telecommunications networks, data centers and other critical applications. Products in this segment include power systems, embedded power supplies, precision cooling and inbound power systems, along with 24-hour service. In 2006, sales by geographic destination for this segment were United States 46 percent, Europe 19 percent, Asia 25 percent and other regions 10 percent.

Power Systems

Emerson supplies uninterruptible AC and DC power systems, which provide reliable, conditioned power to telecommunication networks, data centers and other critical equipment in the event of a blackout or line surges and spikes. Power Systems' products range from stand-alone units to complete systems incorporating rectifiers, distribution units, surge protection, batteries and system supervision.

Embedded Power Supplies

Embedded power supplies are installed by original equipment manufacturers to convert or condition power for microprocessors and peripherals in a wide range of telecommunication, health care, computer and industrial applications using standard or custom AC/DC or DC/DC designs. They are also used in consumer products, in the form of power adaptors for notebook computers and ink jet printers, and in chargers for mobile phones.

Precision Cooling

Emerson's precision cooling products provide temperature and humidity control for computers, telecommunications and other sensitive equipment. These products range from 14,000 to 4 million BTUs in capacity and are available in up flow, down flow and overhead configurations.

Inbound Power Systems

Emerson inbound power technology provides reliable power systems which automatically transfer critical application loads from a utility to emergency back-up generators in the event of a blackout or brownout. Products include automatic transfer switches, paralleling and synchronizing gear and related distribution equipment and control systems.

Service and Site Operations

Emerson staffs Energy Operation Centers in more than 30 countries, and deploys field service personnel worldwide to assist customers in managing their network support systems. Our services include on-site operations management, energy consumption monitoring, preventive maintenance, electrical testing, remote monitoring and management, and 24-hour service capability.

Distribution

The Network Power segment sells primarily through worldwide direct sales force networks, particularly in Europe and Asia. The remainder of sales is handled by independent sales representatives, particularly in the United States, and independent distributors.

Brands

Brands, service/trademarks and trade names within the Network Power segment include Emerson Network Power, Artesyn, ASCO, ASCO Power Technologies, Astec Power, Control Concepts, Emerson Energy Systems, Engineered Endeavors, Knürr, Liebert, Liebert Global Services, Liebert HIROSS, Lorain, Northern Technologies and VORTEX.

CLIMATE TECHNOLOGIES

The Climate Technologies segment provides products and services for all areas of the climate control industry, including residential, commercial and industrial heating and air conditioning, and commercial refrigeration. Our technology enables homeowners and businesses to better control their heating, air-conditioning, and refrigeration systems for improved control and lower energy bills. This segment also digitally controls and remotely monitors refrigeration units in grocery stores and other food distribution outlets to enhance freshness and food safety. In 2006, sales by geographic destination for this segment were United States 64 percent, Europe 13 percent, Asia 14 percent and other regions 9 percent.

Residential, Commercial and Industrial Heating and Air Conditioning

Emerson provides a full range of heating and air-conditioning products that help reduce operational and energy costs and create comfortable environments in all types of buildings. These products include reciprocating and scroll air-conditioning compressors, including an ultra-efficient residential scroll compressor with two stages of cooling capacity so as to run at full capacity only on the hottest days; standard and programmable thermostats; monitoring equipment and electronic flow controls for gas and electric heating systems; gas valves for furnaces and water heaters; nitride ignition systems for furnaces; sensors and thermistors for home appliances; and temperature sensors and controls.

Commercial Refrigeration

Emerson's technology is incorporated into equipment to refrigerate food and beverages in supermarkets, convenience stores, food service operations and refrigerated trucks and transport containers. Our refrigeration products are also used in industrial applications, such as environmental test chambers, and in medical applications, such as magnetic resonance imaging (MRI) machines. These products include compressors; precision flow controls; system diagnostics and controls that provide precise temperature management; and environmental control systems.

Services and Solutions

Emerson's services in this segment assist customers in improving their climate control systems for better control and efficiency relating to new refrigerants, energy efficiency standards, indoor air quality and food safety. We also provide remote monitoring of food refrigeration control systems, 24-hour energy supervision and service dispatch, and a process that audits food store mechanical systems to identify potential energy savings.

Distribution

Climate Technologies segment sales, primarily to original equipment manufacturers and end users, are made predominately through worldwide direct sales force networks. The remaining sales are primarily through independent distributor networks throughout the world.

Brands

Brands, service/trademarks and trade names within the Climate Technologies segment include Emerson Climate Technologies, Alco Controls, Clive Samuels & Associates, Computer Process Controls, Copeland, Design Services Network, Emerson Climate Technologies Distribution Services, Emerson Climate Technologies Educational Services, Emerson Climate Technologies Flow Controls, Emerson Climate Technologies Retail Services, Fusite, Therm-O-Disc and White-Rodgers.

APPLIANCE AND TOOLS

Emerson's Appliance and Tools segment includes a broad range of products and solutions in motors, appliances and components, tools and storage. In 2006, sales by geographic destination for this segment were United States 78 percent, Europe 12 percent, Asia 3 percent and other regions 7 percent.

Motors

Emerson provides a broad range of electric motors, controls and assemblies from fractional to several thousand horsepower output. Each of these products is designed to give our customers the quality, reliability, and energy efficiency needed in their specific applications. Emerson's electric motors are used in a variety of home appliances. They include variable, fixed and multi-speed motors used in horizontal and vertical axis washers, dryers, and dishwashers. Our motors are also used in residential and commercial pumps, such as those provided in spas, pools and golf course irrigation equipment; in HVAC equipment, such as furnaces, compressors, condenser fans, heat pumps, cooling towers and commercial air handlers; and in industrial, farming and mining applications, where we offer products such as explosion-proof motors, paint-free washdown motors and industrial severe duty motors.

Appliances and Appliance Components

Emerson provides a number of appliances and appliance technology solutions, ranging from water valves and controls to heating elements and switches. Our appliance offering includes residential and commercial garbage disposers and ceiling fans, instant hot water dispensers, and compact electric water heaters. Our appliance solutions provide integrated systems, sub-systems and components for appliances that include electronic and electromechanical controls for washers, dryers, dishwashers, refrigerators and other home appliances as well as heating elements for dishwashers, electric ovens and water heaters.

Professional and Do-It-Yourself Tools

Our pipe-working tools are used by plumbing and mechanical professionals to install and repair piping systems. These tools include pipe wrenches, pipe cutters, pipe threading and roll grooving equipment; a time-saving system that joins tubing through mechanical crimping; drain cleaners; diagnostic systems including closed-circuit television pipe inspection and locating equipment; and tubing

tools. Other professional tools include water jetters, wet-dry vacuums, rolling storage boxes, truck work boxes, bolt cutters, and van and truck ladder racks. Do-it-yourself tools, available at home improvement retail outlets, include drain cleaning equipment, pipe and tube working tools, and wet-dry vacuums.

Storage Solutions

Emerson provides a wide variety of freestanding, fixed and mobile storage products for residential, commercial, healthcare and food service applications. Our products for the home include wall-mounted and freestanding shelving systems, cabinet and closet organizers, home office storage, and drawer systems and containers, available in wire, stainless steel and laminate. Our storage solutions also help commercial customers utilize space in the most efficient manner. These solutions include storage and display shelving, stock-picking and kitting carts, cabinets, totes, bins, workstations, and merchandising and inventory storage racks. Products provided to the healthcare industry assist in medical response and treatment; they include emergency and operating room carts, medication carts, polymer and wire shelving systems, and sterile worktables. Our food service equipment helps meet the storage needs of the food service and hospitality industries, such as restaurants and hotels. This equipment includes polymer and wire storage systems, busing carts, pan and tray racks, transport carts and workstations.

Distribution

The principal worldwide distribution channel for the Appliance and Tools segment is direct sales forces. Motors and appliance components and solutions for original equipment manufacturers are sold almost exclusively worldwide through direct sales force networks. Independent distributors constitute the next most significant sales channel, with professional tools sold almost exclusively worldwide through distributors; and, to a lesser extent, independent sales representatives are utilized, particularly for storage solutions.

Brands

Brands, service/trademarks and trade names within the Appliance and Tools segment include Emerson Appliance Solutions, Emerson Heating Products, Emerson Motor Technologies, Emerson Professional Tools, Emerson Storage Solutions, ClosetMaid, Digital Appliance Controls, Do+Able, Emerson, Flo Healthcare, In-Sink-Erator, Knaack, Mallory, METRO, RIDGID, Stack-A-Shelf, U.S. Electrical Motors and Weather Guard.

PRODUCTION

Emerson utilizes various production operations and methods. The principal production operations are metal stamping, forming, casting, machining, welding, plating, heat treating, painting and assembly. In addition, Emerson uses specialized production operations, including automatic and semiautomatic testing, automated material handling and storage, ferrous and nonferrous machining and special furnaces for heat treating and foundry applications. Management believes the equipment, machinery and tooling used in these processes are of modern design and are well maintained.

RAW MATERIALS AND ENERGY

Emerson's major requirements for basic raw materials include steel, copper, cast iron, electronics, aluminum and brass and, to a lesser extent, plastics and other petroleum-based chemicals. Emerson has multiple sources of supply for each of its major requirements and is not significantly dependent on any one or a few suppliers.

The raw materials and various purchased components required for its products have generally been available in sufficient quantities. Emerson uses various forms of energy, principally natural gas and electricity, obtained from public utilities. A majority of the Company's plants have the capability of being converted to use alternative sources of energy.

PATENTS, TRADEMARKS AND LICENSES

The Company has a number of patents, trademarks and licenses, obtained over a number of years and expiring at various times. While proprietary intellectual property is important to the Company, management believes the loss or expiration of any intellectual property right would not materially impact the Company or any of its segments.

BACKLOG

The estimated consolidated order backlog of the Company was \$4,054 million and \$3,229 million at September 30, 2006 and 2005, respectively. Nearly all of the September 30, 2006 consolidated backlog amount is expected to be shipped within one year. The estimated backlog by business segment at September 30, 2006 and 2005 follows:

(dollars in millions)	2005	2006
Process Management	\$ 1,478	1,883
Industrial Automation	390	523
Network Power	645	867
Climate Technologies	412	423
Appliance and Tools	304	358
Consolidated Order Backlog	\$ 3,229	4,054

COMPETITION

Emerson's businesses operate in markets that are highly competitive, and Emerson competes on product performance, quality, service and/or price across the industries and markets served. A significant element of the Company's competitive strategy is to deliver solutions to our customers by manufacturing high quality products at the lowest relevant global cost. Although no single company competes directly with Emerson in all of the Company's product lines, various companies compete in one or more product lines. Some of these companies have substantially greater sales and assets than Emerson, and Emerson also competes with many smaller companies. The number of Emerson's competitors varies by product line, and management believes that Emerson has a market leadership position in many of these product lines.

RESEARCH AND DEVELOPMENT

Costs associated with Company-sponsored research and development activities were \$356 million, \$303 million and \$280 million in 2006, 2005 and 2004, respectively.

ENVIRONMENT

The Company's manufacturing locations generate waste, the treatment, storage, transportation and disposal of which are subject to federal, state and/or local laws and regulations relating to the protection of the environment. Compliance with laws regulating the discharge of materials into the environment or otherwise relating to the protection of the environment has not had a material effect upon Emerson's capital expenditures, earnings or competitive position. It is not anticipated that Emerson will have material capital expenditures for environmental control facilities during the next fiscal year.

EMPLOYEES

Emerson and its subsidiaries had an average of approximately 127,800 employees during 2006. Management believes that the Company's employee relations are favorable. Some of the Company's employees are represented under collective bargaining agreements, but none of these agreements is considered significant.

DOMESTIC AND FOREIGN OPERATIONS

International sales were \$9,545 million in 2006, \$8,179 million in 2005 and \$7,353 million in 2004, including U.S. exports of \$1,127 million, \$998 million and \$939 million in 2006, 2005 and 2004, respectively. Although there are additional risks attendant to foreign operations, such as possible nationalization of facilities, currency fluctuations and restrictions on the movement of funds, Emerson's financial position has not been materially affected thereby to date. See Note 16 of Notes to Consolidated Financial Statements of the 2006 Annual Report for further information with respect to foreign operations, which note is hereby incorporated by reference.

INTERNET ACCESS

Emerson's Forms 10-K, 10-Q, 8-K and all amendments to those reports are available without charge through Emerson's web site on the Internet as soon as reasonably practicable after they are electronically filed with, or furnished to, the Securities and Exchange Commission. They may be accessed as follows: www.gotoemerson.com, Investor Relations, SEC Filings.

The information set forth under Item 1A. Risk Factors is hereby incorporated by reference.

Item 1A. Risk Factors

Investing in our securities involves risks. We may amend or supplement the risk factors described below from time to time by other reports we file with the SEC in the future.

We Operate In Businesses That Are Subject To Competitive Pressures That Could Affect Prices Or Demand For Our Products

Our businesses operate in markets that are highly competitive, and we compete on the basis of product performance, quality, service and/or price across the industries and markets served. A significant element of our competitive strategy is to deliver solutions to our customers by manufacturing high quality products at the lowest relevant global cost. Some of our competitors have greater sales, assets and financial resources than our Company. Competitive pressures could affect prices or customer demand for our products, impacting our profit margins and/or resulting in a loss of market share.

Our Operating Results Depend In Part On Continued Successful Research, Development And Marketing Of New And/Or Improved Products And Services, And There Can Be No Assurance That We Will Continue To Successfully Introduce New Products And Services

The success of new and improved products and services depends on their initial and continued acceptance by our customers. Our businesses are affected by varying degrees of technological change and corresponding shifts in customer demand, which result in unpredictable product transitions, shortened life cycles and increased importance of being first to market with new products and services. We may experience difficulties or delays in the research, development, production and/or marketing of new products and services which may negatively impact our operating results and prevent us from recouping or realizing a return on the investments required to bring new products and services to market.

We Engage In Acquisitions, And May Encounter Difficulties In Integrating These Businesses And Therefore We May Not Realize The Anticipated Benefits Of The Acquisitions

We are a company that, from time to time, seeks to grow through strategic acquisitions. In the past several years, we have made various acquisitions and entered into joint venture arrangements intended to complement or expand our business, and may continue to do so in the future. The success of these transactions will depend on our ability to integrate assets and personnel acquired in these transactions and to cooperate with our strategic partners. We may encounter difficulties in integrating acquisitions with our operations, and in managing strategic investments. Furthermore, we may not realize the degree, or timing, of benefits we anticipate when we first enter into a transaction. Any of the foregoing could adversely affect our business and results of operations.

Access To Funding Through The Capital Markets Is Essential To The Execution Of Our Business Plan And If We Are Unable To Maintain Such Access We Could Experience A Material Adverse Effect On Our Business And Financial Results

Our ability to invest in our businesses, make strategic acquisitions and refinance maturing debt obligations requires access to the capital markets and sufficient bank credit lines to support short-term borrowings. If we are unable to continue to access the capital markets, we could experience a material adverse effect on our business and financial results.

We Use A Variety Of Raw Materials And Components In Our Businesses, And Significant Shortages Or Price Increases Could Increase Our Operating Costs And Adversely Impact The Competitive Positions Of Our Products

Our major requirements for raw materials include steel, copper, cast iron, electronics, aluminum and brass and, to a lesser extent, plastics and other petroleum based chemicals. Emerson has multiple sources of supply for each of its major requirements and is not significantly dependent on any one or a few suppliers. Significant shortages or price increases could affect the prices our affected businesses charge, their operating costs and the competitive position of their products and services, which could adversely affect our results of operations.

Our Operations Depend On Production Facilities Throughout The World, A Majority Of Which Are Located Outside The United States And Subject To Increased Risks Of Disrupted Production Causing Delays In Shipments And Loss Of Customers And Revenue

We manage businesses with manufacturing facilities worldwide, a majority of which are located outside the United States. Serving a global customer base requires that we place more production in emerging markets to capitalize on market opportunities and maintain our best-cost position. Our international production facilities and operations could be disrupted by a natural disaster, labor strike, war, political unrest, terrorist activity or public health concerns, particularly in emerging countries that are not well-equipped to handle such occurrences.

Our manufacturing facilities abroad also may be more susceptible to changes in laws and policies in host countries and economic and political upheaval than our domestic facilities. Any such disruption could cause delays in shipments of products and the loss of sales and customers, and insurance proceeds may not adequately compensate us.

Our Substantial Sales Abroad Subject Us To Economic Risk As Our Results Of Operations May Be Adversely Affected By Foreign Currency Fluctuations And Changes In Local Government Regulations And Policies

We sell, manufacture, engineer, and purchase products in overseas markets. A significant portion of our sales is outside the United States, and we expect sales from non - U.S. markets to continue to represent a significant portion of our total sales. International sales and operations are subject to changes in local government regulations and policies, including those related to tariffs and trade barriers, investments, taxation, exchange controls, and repatriation of earnings. Changes in the relative values of currencies occur from time to time and could affect our operating results. While we monitor our exchange rate exposures and attempt to reduce this exposure through hedging activities, this risk could adversely affect our operating results.

Downturns In The End Markets That We Serve May Negatively Impact Our Segment Revenues And Profitability

Our segment revenues, operating results and profitability have varied in the past and may vary significantly from quarter to quarter in the future. Profitability can be negatively impacted by volatility in the end markets that we serve. Future downturns in any of the markets that we serve could adversely affect our overall sales and operating results.

We Are Subject To Litigation And Environmental Regulations That Could Adversely Impact Our Operating Results

We are, and may in the future be, a party to a number of legal proceedings and claims, including those involving product liability and environmental matters, several of which claim significant damages. Given the inherent uncertainty of litigation, we can offer no assurance that existing litigation or a future adverse development will not have a material adverse impact. We also are subject to various laws and regulations relating to environmental protection and the discharge of materials into the environment, and we could incur substantial costs as a result of the noncompliance with or liability for cleanup or other costs or damages under environmental laws.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

At September 30, 2006, Emerson had approximately 275 manufacturing locations worldwide, of which approximately 170 were located outside the United States, primarily in Europe and to a lesser extent in Asia, Canada and Latin America. The approximate numbers of manufacturing locations by business segment are: Process Management, 55; Industrial Automation, 95; Network Power, 40; Climate Technologies, 35; and Appliance and Tools, 50. The majority of the locations are owned, with the remainder occupied under operating or capital leases. The Company considers its facilities suitable and adequate for the purposes for which they are used.

Item 3. Legal Proceedings

The information regarding legal proceedings set forth in Note 12 of Notes to Consolidated Financial Statements of the 2006 Annual Report is hereby incorporated by reference.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the quarter ended September 30, 2006.

Executive Officers of the Registrant

The following sets forth certain information as of December 2006 with respect to Emerson's executive officers. Fiscal Year column indicates the first year the executive served as an officer of the Company. These officers have been elected or appointed to terms which will expire February 6, 2007:

<u>Name</u>	<u>Position</u>	<u>Age</u>	<u>Fiscal Year</u>
D. N. Farr*	Chairman of the Board, Chief Executive Officer and President	51	1985
W. J. Galvin	Senior Executive Vice President and Chief Financial Officer	60	1984
E. L. Monser	Chief Operating Officer	56	2002
C. A. Peters	Senior Executive Vice President	51	1990
R. J. Schlueter	Vice President and Chief Accounting Officer	52	1992
W. W. Withers	Executive Vice President, Secretary and General Counsel	66	1989

* Also chairman of the Executive Committee of the Board of Directors.

There are no family relationships among any of the executive officers and directors.

David N. Farr has been Chief Executive Officer since October 2000 and was also appointed Chairman of the Board in September 2004 and appointed President in November 2005. Walter J. Galvin was appointed Senior Executive Vice President in October 2004 and has been Chief Financial Officer since 1993. Prior to his current position, Mr. Galvin was Executive Vice President from February 2000 to October 2004. Edward L. Monser was appointed Chief Operating Officer in November 2001. Charles A. Peters has been Senior Executive Vice President since October 2000. Richard J. Schlueter has been Vice President Accounting since 1999 and was also appointed Chief Accounting Officer in February 2003. W. Wayne Withers was appointed Executive Vice President in October 2004. Prior to his current position, Mr. Withers was Senior Vice President from 1989 to October 2004, and he has been Secretary and General Counsel since November 1989.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The information regarding the market for the Company's common stock, quarterly market price ranges and dividend payments set forth in Note 18 of Notes to Consolidated Financial Statements of the 2006 Annual Report is hereby incorporated by reference. There were approximately 27,065 stockholders of record at September 30, 2006.

Repurchases of equity securities during the fourth quarter of 2006 are listed in the following table.

Period	(a) Total Number	(b) Average Price	(c) Total Number of	(d) Maximum Number of
	of Shares	Paid per Share	Shares Purchased as Part of Publicly Announced Plans or Programs (000s)	Shares That May Yet Be Purchased Under the Plans or Programs (000s)
July 2006	1,800	\$ 79.27	1,800	20,662
August 2006	2,125	\$ 80.66	2,125	18,537
September 2006	1,700	\$ 81.91	1,700	16,837
Total	5,625	\$ 80.59	5,625	16,837

The Company's Board of Directors authorized the repurchase of up to 40 million shares under the November 2001 program. The maximum number of shares that may yet be purchased under this program is 16.8 million.

Item 6. Selected Financial Data

Years ended September 30

(dollars in millions, except per share amounts)

	2002 (a)	2003	2004	2005 (b)	2006
Net sales	\$ 13,748	13,958	15,615	17,305	20,133
Earnings from continuing operations	\$ 1,076	1,013	1,257	1,422	1,845
Earnings before cumulative effect of change in accounting principle	\$ 1,060	1,089	1,257	1,422	1,845
Earnings from continuing operations per common share (basic)	\$ 2.57	2.42	3.00	3.43	4.52
Earnings from continuing operations per common share (diluted)	\$ 2.56	2.41	2.98	3.40	4.48
Earnings before cumulative effect of change in accounting principle per common share (diluted)	\$ 2.52	2.59	2.98	3.40	4.48
Cash dividends per common share	\$ 1.55	1.57	1.60	1.66	1.78
Long-term debt	\$ 2,990	3,733	3,136	3,128	3,128
Total assets	\$ 14,545	15,194	16,361	17,227	18,672

The operating results of Dura-Line are classified as discontinued operations for 2002-2003 in the table above. See Note 3 of Notes to Consolidated Financial Statements of the 2006 Annual Report for information regarding the Company's acquisition and divestiture activities. Information presented in the selected financial data does not reflect the impact of a two-for-one stock split declared by the Company's Board of Directors in November 2006. See Note 19 of Notes to Consolidated Financial Statements of the 2006 Annual Report, which note is hereby incorporated by reference.

(a) Fiscal 2002 earnings and per share amounts are before a cumulative effect of a change in accounting principle of \$938 million (\$2.24 per basic share, or \$2.23 per diluted share) related to the adoption of FAS 142.

(b) Fiscal 2005 includes a tax expense of \$63 million (\$0.15 per share) related to the one-time opportunity to repatriate foreign earnings under the American Jobs Creation Act of 2004. See Note 13 of Notes to Consolidated Financial Statements of the 2006 Annual Report for additional information, which note is hereby incorporated by reference.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Information appearing under Results of Operations, Financial Position, Capital Resources and Liquidity, Critical Accounting Policies and the Safe Harbor Statement in the 2006 Annual Report are hereby incorporated by reference.

Fiscal 2007 Outlook

The outlook for Emerson remains positive moving into fiscal 2007. Many of Emerson's end markets remain strong, but a moderation in growth rates is expected when compared to 2006. Underlying sales growth for fiscal 2007 is expected to be in the range of 5 to 7 percent, excluding the expected 2 to 4 percent favorable impact from foreign currency translation, acquisitions and divestitures. Reported sales growth is expected to be in the range of 7 to 11 percent. Based on this level of sales growth, the Company expects to generate 2007 earnings per share growth in the range of 12 to 15 percent above the \$4.48 per share earned in 2006.

Non-GAAP Financial Measures

To supplement Emerson's financial information presented in accordance with generally accepted accounting principles (GAAP), management uses additional measures, including non-GAAP financial measures as such term is defined in Regulation G under the rules of the Securities and Exchange Commission, to clarify and enhance understanding of past performance and prospects for the future. Generally, a non-GAAP financial measure is a numerical measure of a company's financial performance, financial position or cash flows that exclude (or include) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP. For example, these financial measures may exclude the impact of certain unique items such as acquisitions, divestitures, one-time gains and losses or items outside of management's control (e.g., foreign currency exchange rates). Management believes that the following non-GAAP financial measures provide investors and analysts useful insight into Emerson's financial position and performance.

Underlying sales, which exclude the impact of acquisitions and divestitures during the periods presented, and fluctuations in foreign currency exchange rates, are provided to facilitate relevant period-to-period comparisons of sales growth by excluding these unique items that impact the overall comparability. Underlying sales should be viewed in addition to, and not as an alternative to net sales as determined in accordance with U.S. GAAP.

Operating profit (defined as net sales less cost of sales and selling, general and administrative expenses) and operating profit margin (defined as operating profit divided by net sales) are indicative of short-term operational performance and ongoing profitability.

Management closely monitors operating profit and operating profit margin of each business to evaluate past performance and actions required to improve profitability. Operating profit and operating profit margin should be viewed in addition to, and not as an alternative to pretax earnings or profit margin as determined in accordance with U.S. GAAP.

Earnings, earnings per share, return on equity and return on total capital excluding one-time gains and losses (for example, 2005 tax expense for earnings repatriation or 2003 gains from divestitures) provide additional insight into the underlying, ongoing operating performance of the Company and facilitate period-to-period comparisons by excluding the earnings impact of these items. Given the unique nature of these items, management believes that presenting earnings, earnings per share, return on equity and return on total capital excluding them is more representative of the Company's operational performance and may be more useful for investors. However, these financial measures are not intended to replace earnings, earnings per share, return on equity or return on total capital as determined in accordance with U.S. GAAP.

Free cash flow (operating cash flow less capital expenditures) is an indicator of the Company's cash generating capabilities after considering investments in capital assets which are necessary to maintain and enhance existing operations. Operating cash flow adds back non-cash depreciation expense to earnings and thereby does not reflect a charge for necessary capital expenditures. Although management believes that free cash flow is useful to both management and investors as a measure of the Company's ability to generate cash, it is not intended to replace operating cash flow as determined in accordance with U.S. GAAP.

Overall, while Emerson believes these non-GAAP financial measures are useful in evaluating the Company, this information should be considered as supplemental in nature and not as a substitute for or superior to the related financial information prepared in accordance with GAAP. Further, the calculation of these non-GAAP financial measures may differ from the calculation of similarly titled financial measures presented by other companies, and therefore they may not be comparable among companies.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Information appearing under "Financial Instruments" in the 2006 Annual Report is hereby incorporated by reference.

Item 8. Financial Statements and Supplementary Data

The consolidated financial statements of the Company and its subsidiaries and the report thereon of KPMG LLP in the 2006 Annual Report are hereby incorporated by reference.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Emerson maintains a system of disclosure controls and procedures which are designed to ensure that information required to be disclosed by the Company in the reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and is accumulated and communicated to management, including the Company's certifying officers, as appropriate to allow timely decisions regarding required disclosure. Based on an evaluation performed, the Company's certifying officers have concluded that the disclosure controls and procedures were effective as of September 30, 2006, to provide reasonable assurance of the achievement of these objectives.

Notwithstanding the foregoing, there can be no assurance that the Company's disclosure controls and procedures will detect or uncover all failures of persons within the Company and its consolidated subsidiaries to report material information otherwise required to be set forth in the Company's reports.

There was no change in the Company's internal control over financial reporting during the quarter ended September 30, 2006, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's report on internal control over financial reporting, and the related report of the Company's auditor, KPMG LLP, an independent registered public accounting firm, appearing in the 2006 Annual Report are hereby incorporated by reference.

Item 9B. Other Information

None.

PART III

Item 10. Directors and Executive Officers of the Registrant

Information regarding nominees and directors appearing under "Nominees and Continuing Directors" in the Emerson Electric Co. Notice of Annual Meeting of Stockholders and Proxy Statement for the February 2007 annual stockholders' meeting (the "2007 Proxy Statement") is hereby incorporated by reference. Information regarding executive officers is set forth in Part I of this report. Information appearing under "Section 16(a) Beneficial Ownership Reporting Compliance" in the 2007 Proxy Statement is hereby incorporated by reference. Information regarding the Audit Committee and Audit Committee Financial Expert appearing under "Board of Directors and Committees" in the 2007 Proxy Statement is hereby incorporated by reference.

Emerson has adopted a Code of Ethics that applies to the Company's chief executive officer, chief financial officer, chief accounting officer and controller; has posted such Code of Ethics on its Internet web site; and intends to satisfy the disclosure requirement under Item 5.05 of Form 8-K by posting such information on its Internet web site. Emerson has adopted Charters for its Audit Committee, Compensation Committee and Corporate Governance and Nominating Committee and a Code of Business Ethics for directors, officers and employees, which are available on its Internet web site and are available in print to any shareholder who requests them. Emerson has also adopted Corporate Governance Principles and Practices, which are available on its Internet web site and are available in print to any shareholder who requests them. The Company's Internet web site may be accessed as follows: www.gotoemerson.com, Investor Relations, Corporate Governance.

Item 11. Executive Compensation

Information appearing under "Director Compensation" and "Executive Compensation" in the 2007 Proxy Statement is hereby incorporated by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information regarding beneficial ownership of shares by nominees and continuing directors, named executive officers and by all directors and executive officers as a group appearing under "Nominees and Continuing Directors" in the 2007 Proxy Statement is hereby incorporated by reference.

Equity Compensation Plan Information

The following table sets forth aggregate information regarding the Company's equity compensation plans as of September 30, 2006:

Plan Category	Number of Securities	Weighted-Average	Number of Securities
	to be Issued upon	Exercise Price	Remaining Available for
	Exercise of	of	Future Issuance under
	Outstanding Options,	Outstanding	Equity Compensation
	Warrants and Rights	Options, Warrants	Plans (Excluding
	(a)	and Rights	Securities Reflected in
		(b)	Column (a)
			(c)
Equity compensation plans approved by security holders(1)	10,257,930	\$ 57.30	18,631,499
Equity compensation plans not approved by security holders(2)			
Total	10,257,930	\$ 57.30	18,631,499

(1) Includes the Company's Stock Option and previously approved Incentive Shares Plans. Included in column (a) are 2,364,630 shares reserved for performance share awards (awarded primarily in 2004), which represent the right to receive common shares contingent upon the Company achieving certain financial objectives by the end of fiscal year 2007. As provided by the Company's Incentive Shares Plans, performance share awards represent a commitment to issue such shares without cash payment by the employee, contingent upon achievement of such objectives and the performance of services by the employee. The price in column (b) represents the weighted-average exercise price for outstanding options. Included in column (c) are 10,653,447 shares remaining available for award under the previously approved 2006 Incentive Shares Plan and 227,048 shares remaining available under the previously approved Restricted Stock Plan for Non-Management Directors.

(2) Excludes 10,355 outstanding options assumed in connection with acquisitions with a weighted-average exercise price of \$35.27. Information regarding stock option plans and incentive shares plans set forth in Note 14 of Notes to Consolidated Financial Statements of the 2006 Annual Report is hereby incorporated by reference.

Item 13. Certain Relationships and Related Transactions

Information appearing under Certain Business Relationships and Transactions in the 2007 Proxy Statement is hereby incorporated by reference.

Item 14. Principal Accounting Fees and Services

Information appearing under Fees Paid to KPMG LLP in the 2007 Proxy Statement is hereby incorporated by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

A) Documents filed as a part of this report:

1. The consolidated financial statements of the Company and its subsidiaries and the report thereon of KPMG LLP in the 2006 Annual Report.
2. Financial Statement Schedules

All schedules are omitted because they are not required, not applicable or the information is given in the financial statements or notes thereto contained in the 2006 Annual Report.

3. Exhibits (Listed by numbers corresponding to the Exhibit Table of Item 601 in Regulation S-K).
 - 3(a) Restated Articles of Incorporation of Emerson Electric Co., incorporated by reference to Emerson Electric Co. Form 10-Q for the quarter ended March 31, 2001, File No. 1-278, Exhibit 3(a); Termination of Designated Shares of Stock and Certificate of Designation, Preferences and Rights of Series B Junior Participating Preferred Stock, incorporated by reference to Emerson Electric Co. 1998 Form 10-K, File No. 1-278, Exhibit 3(a).
 - 3(b) Bylaws of Emerson Electric Co., as amended through October 4, 2005, incorporated by reference to Emerson Electric Co. Form 8-K dated October 4, 2005, Exhibit 3.1.
 - 4(a) Indenture dated as of April 17, 1991, between Emerson Electric Co. and The Boatmen's National Bank of St. Louis, Trustee, incorporated by reference to Emerson Electric Co. Registration Statement on Form S-3, File No. 33-62545, Exhibit 4.1.
