Plug Power Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Nature of Operations

Description of Business

Plug Power Inc., together with its subsidiaries, is a development stage enterprise involved in the design, development and manufacture of fuel cell systems for stationary and motive markets worldwide. The Company is a development stage enterprise because substantially all of the Company's resources and efforts are aimed at the discovery of new knowledge that could lead to significant improvement in fuel cell reliability and durability and the establishment of a market for the Company's products. The Company continues to experience significant net outflows of cash from operations and devotes significant efforts towards financial planning in order to forecast future cash spending and the ability to continue product research and development activities. Fuel cell technology within the Company's targeted markets, the mobile industrial equipment market, telecommunications, broadband, utility, and industrial un-interruptible power supply is still early in the technology adoption life cycle.

The Company is organized in the State of Delaware and was originally formed as a joint venture between Edison Development Corporation and Mechanical Technology Incorporated on June 27, 1997. In 2007, the Company merged with and acquired all the assets, liabilities and equity of Cellex Power Products Inc. (Cellex) and General Hydrogen Corporation (General Hydrogen). With the integration of Cellex and General Hydrogen complete, Plug Power now offers GenDrive[®], a line of fuel cell power units for the material handling industry, along with our GenCore[®] product, a line of fuel cell power units used as backup power for multiple industries.

The Company is focused on proton exchange membrane, or PEM, fuel cell and fuel processing technologies, from which multiple products are under development. A fuel cell is an electrochemical device that combines hydrogen and oxygen to produce electricity and heat without combustion. Hydrogen is derived from hydrocarbon fuels such as natural gas, propane, methanol, ethanol or gasoline and can also be obtained from the electrolysis of water or purchased directly from industrial gas providers.

The Company sells its products to commercial and governmental entities worldwide through its direct sales force and value-added resellers.

Although the Company has a significant amount of available-for-sale securities, as described in the Company's most recently filed Form 10-K with the Securities and Exchange Commission, as of September 30, 2008, neither the Company nor any of its subsidiaries was an investment company pursuant to the Investment Company Act of 1940, as amended.

Liquidity

The Company anticipates incurring substantial additional losses over at least the next several years and believes that its current cash, cash equivalents and available-for-sale securities balances will provide sufficient liquidity to fund operations for at least the next twelve months. The Company's cash requirements depend on numerous factors, including completion of our product development activities, our ability to commercialize our on-site energy products, market acceptance of our systems and other factors. The Company expects to devote substantial capital resources to continue its development programs directed at commercializing our energy products for worldwide use, hiring and training production staff, develop and expand manufacturing capacity and continue expanding our production and research and development activities. The Company expects to pursue the expansion of its operations through internal growth and strategic acquisitions and expects that such activities will be funded from existing cash, cash equivalents, available-for-sale securities, and the issuance of additional equity or debt securities or additional borrowings subject to market and other conditions. The failure to raise the funds necessary to finance future cash requirements or consummate future acquisitions could adversely affect the Company's ability to pursue its strategy and could negatively affect its operations in future periods.

Included in available-for-sale securities is \$57.6 million of auction rate securities at September 30, 2008 and \$90.8 million at December 31, 2007. The auction rate securities are secured by student loans, the vast majority of which are guaranteed by the Federal government. These auction rate securities are structured to be tendered at par, at the investor's option, at auctions occurring every 27-30 days. However, due to the liquidity issues in the credit and capital markets, the market for auction rate securities began experiencing auction failures in February 2008 and there have been no successful auctions for the securities held in our portfolio since the failures began. We continue to receive interest on these securities, subject to an interest rate cap formula for each security as periodically adjusted. At September 30, 2008 the interest rates ranged from

Edgar Filing: PLUG POWER INC - Form 10-Q

0.4% to 5.2% on the auction rate securities as compared to the interest rate range at June 30, 2008 from 0% to 2.9%. The Company expects to hold the auction rate securities until there is a successful auction, or the Company may sell these securities on the open market. Given the lack of liquidity in the market for auction rate securities, the estimated

Table of Contents

fair value of these auction rate securities have become lower than their cost and, based on an analysis of other than temporary impairment factors, management has determined that this difference represents a decline in value that is other than temporary. Accordingly, the Company recorded an other than temporary impairment charge of approximately \$789,000 and \$5.3 million, respectively, in the three and nine months ended September 30, 2008 in the condensed consolidated statements of operations. A continuation or worsening of these market conditions could further negatively impact the Company's results of operations and could have a significant negative affect on the Company's liquidity.

2. Basis of Presentation

Principles of Consolidation: The accompanying unaudited condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions have been eliminated in consolidation. It is the Company's policy to reclassify prior period consolidated financial statements to conform to current period presentation.

Interim Financial Statements: The unaudited condensed interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, all adjustments, which consist solely of normal recurring adjustments, necessary to present fairly, in accordance with U.S. generally accepted accounting principles, the financial position, results of operations and cash flows for all periods presented, have been made. The results of operations for the interim periods presented are not necessarily indicative of the results that may be expected for the full year.

Certain information and footnote disclosures normally included in annual consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. These unaudited condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K filed for the fiscal year ended December 31, 2007.

The information presented in the accompanying condensed consolidated balance sheet as of December 31, 2007 has been derived from the Company's December 31, 2007 audited consolidated financial statements. All other information has been derived from the Company's unaudited condensed consolidated financial statements for the periods as of and ending September 30, 2008 and 2007.

Use of Estimates: U.S. generally accepted accounting principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

3. Fair Value Measurements

The Company adopted SFAS No. 157, "Fair Value Measurements" on January 1, 2008, for financial assets and financial liabilities. SFAS No. 157 defines fair value, provides guidance for measuring fair value, and requires certain disclosures. Financial Accounting Standards Board Staff Position (FSP) No. 157-2 amends SFAS No. 157 to delay the effective date of the application of SFAS No. 157 to fiscal years beginning after November 15, 2008 for all nonfinancial assets and nonfinancial liabilities. Nonfinancial assets and nonfinancial liabilities for which the Company has not applied the provisions of SFAS No. 157 include those measured at fair value in goodwill impairment testing.

SFAS No. 157 discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). The statement utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1 Inputs Level 1 inputs are unadjusted quoted prices in active markets for assets or liabilities identical to those to be reported at fair value. An active market is a market in which transactions occur for the item to be fair valued with sufficient frequency and volume to provide pricing information on an ongoing basis.

Table of Contents

Level 2 Inputs Level 2 inputs are inputs other than quoted prices included within Level 1. Level 2 inputs are observable either directly or indirectly. These inputs include: (a) Quoted prices for similar assets or liabilities in active markets; (b) Quoted prices for identical or similar assets or liabilities in markets that are not active, such as when there are few transactions for the asset or liability, the prices are not current, price quotations vary substantially over time or in which little information is released publicly; (c) Inputs other than quoted prices that are observable for the asset or liability; and (d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 Inputs Level 3 inputs are unobservable inputs for an asset or liability. These inputs should be used to determine fair value only when observable inputs are not available. Unobservable inputs should be developed based on the best information available in the circumstances, which might include internally generated data and assumptions being used to price the asset or liability.

When determining the fair value measurements for assets or liabilities required or permitted to be recorded at and/or marked to fair value, the Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability. When possible, the Company looks to active and observable markets to price identical assets. When identical assets are not traded in active markets, the Company looks to market observable data for similar assets. Nevertheless, certain assets are not actively traded in observable markets and the Company must use alternative valuation techniques to derive a fair value measurement.

The following table summarizes the bases used to measure certain financial assets at fair value on a recurring basis in the condensed consolidated balance sheet:

Basis of Fair Value Measurements

		Quoted Prices in Active Markets for Identical Items (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Balance at September 30, 2008	Total			
Available-for-sale securities	\$ 96,761,583	\$ 39,168,700	\$	\$ 57,592,883

The following table shows a reconciliation of the beginning and ending balances for assets measured at fair value on a recurring basis using significant unobservable inputs:

	Fair Value Measurements Using Significant Unobservable Inputs
Auction rate debt securities (level 3), beginning of period	\$
Transfers into level 3	62,875,000
Sales	
Other than temporary impairment charge included in the condensed consolidated statements of operations for the nine months ended September 30, 2008	(5,282,117)
Fair value of auction rate securities at September 30, 2008	\$ 57,592,883

The following summarizes the valuation technique for assets measured and recorded at fair value:

Available-for-sale securities: For our level 1 securities, which represent Federal treasury securities, fair value is based on quoted market prices. The securities valued using unobservable inputs were the auction rate debt securities as the financial and capital markets have experienced significant dislocation and illiquidity in regard to this type of instrument and there is currently no secondary market for this type of security, and there have been no successful auctions since early 2008. The valuation of these auction rate securities is an estimate based upon factors specific to these securities, including duration, tax status (taxable or tax-exempt), credit quality, the existence of insurance wraps, and the composition of the underlying student loans (Federal Family Education Loan Program or private loans). Assumptions were made about future cash flows based

Edgar Filing: PLUG POWER INC - Form 10-Q

upon interest rate formulas as described above. Also, the valuation included estimates of market data including yields or spreads of similar trading instruments, when available, or assumptions believed to be reasonable for non-observable inputs such as likelihood of redemption. The valuations of the securities were estimates as of the reporting date. Actual transactions involving these securities and/or future valuations could differ from the estimated fair value of these securities at September 30, 2008.

Table of Contents**4. Per Share Amounts**

The Company reports net loss per basic and diluted common share in accordance with SFAS No. 128, Earnings Per Share, which establishes standards for computing and presenting loss per share. Basic earnings per common share are computed by dividing net loss available to common stockholders by the weighted average number of common shares outstanding during the reporting period, adjusted for unvested restricted stock. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock (such as convertible preferred stock, stock options, unvested restricted stock, and warrants) were exercised or converted into common stock or resulted in the issuance of common stock (net of any assumed repurchases) that then shared in the earnings of the Company, if any, computed by dividing net earnings by the combination of dilutive common share equivalents, comprised of shares issuable under outstanding warrants and the Company's share-based compensation plans, and the weighted average number of common shares outstanding during the reporting period. Since the Company is in a net loss position, all common stock equivalents would be considered to be anti-dilutive and are, therefore, not included in the determination of diluted earnings per share. Accordingly, basic and diluted loss per share are the same.

The following table provides the components of the calculations of basic and diluted earnings per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Numerator:				
Net loss	\$ (13,810,258)	\$ (15,176,246)	\$ (57,404,703)	\$ (43,085,963)
Denominator:				
Weighted average number of common shares	88,207,878	86,894,954	88,142,442	86,668,121

The dilutive potential common shares are summarized as follows:

	Nine Months Ended September 30,	
	2008	2007
Stock options	6,228,772	6,695,824
Unvested restricted stock	416,437	821,212
Preferred stock ⁽¹⁾	39,500,000	39,500,000
Warrants ⁽²⁾	571,429	571,429
	46,716,638	47,588,465

⁽¹⁾ The preferred stock amount represents the dilutive potential common shares of the 395,000 shares of Class B capital stock issued on June 29, 2006.

⁽²⁾ The warrants were granted to the shareholders of General Hydrogen as part of the acquisition of that company.

5. Goodwill and Intangible Assets

Goodwill of \$49,361,315 and \$51,399,497 at September 30, 2008 and December 31, 2007, respectively, represents the excess of costs over fair value of Cellex and General Hydrogen net assets acquired during 2007 and H Power net assets acquired during 2003. The decrease in goodwill from December 31, 2007 to September 30, 2008 is related to the impact of foreign currency translation.

Table of Contents

The gross carrying amount and accumulated amortization of the Company's acquired identifiable intangible assets as of September 30, 2008 are as follows:

	Weighted Average Amortization Period	Gross Carrying Amount	Accumulated Amortization	Effect of Foreign Currency Translation	Total
Acquired Technology	8 years	\$ 15,900,000	\$ (3,147,623)	\$ 1,141,700	\$ 13,894,077
Customer Relationships	8 years	1,000,000	(177,083)		822,917
		\$ 16,900,000	\$ (3,324,706)	\$ 1,141,700	\$ 14,716,994

6. Stockholders' Equity

Changes in stockholders' equity for the nine months ended September 30, 2008 are as follows:

	Preferred Stock		Common Stock			Accumulated Other Comprehensive Income (Loss)	Treasury Stock	Deficit Accumulated During the Development Stage	Total Stockholders' Equity	Total Comprehensive Loss
	Shares	Amount	Shares	Amount	Additional Paid-in-Capital					
December 31, 2007	395,000	\$ 3,950	87,882,922	\$ 878,829	\$ 758,169,498	\$ 7,810,558	\$	\$ (517,962,361)	\$ 248,900,474	
Net loss								(57,404,703)	(57,404,703)	(57,404,703)
Unrealized loss on foreign currency translation						(2,222,975)			(2,222,975)	(2,222,975)
Net change in unrealized gain on available-for-sale securities						115,304			115,304	115,304
Total comprehensive loss										(59,512,374)
Stock based compensation			458,434	4,585	4,219,956				4,224,541	
Stock option exercises			3,935	39	3,896				3,935	
Stock issued under employee stock purchase plan			111,402	1,114	306,465				307,579	
Restricted shares, forfeited (57,466 shares)							(99,226)		(99,226)	
Treasury stock (171,545 shares)							(488,567)		(488,567)	
September 30, 2008	395,000	\$ 3,950	88,456,693	\$ 884,567	\$ 762,699,815	\$ 5,702,887	\$ (587,793)	\$ (575,367,064)	\$ 193,336,362	

7. Supplemental Disclosures of Cash Flows Information

The following represents required supplemental disclosures of cash flows information and non-cash financing and investing activities which occurred during the nine months ended September 30, 2008 and 2007:

Edgar Filing: PLUG POWER INC - Form 10-Q

	September 30, 2008	September 30, 2007
Stock-based compensation accrual impact	\$ 124,519	\$
Change in unrealized gain/loss on available-for-sale securities	115,304	229,581
Decrease to broker for security purchase		(5,000,000)
Settlement of repayable government assistance	2,716,598	
Restricted shares forfeited	(99,226)	

Table of Contents**8. Repayable Government Assistance**

During the year ended December 31, 2000, the Company's wholly-owned subsidiary, Plug Power Canada Inc., formerly known as Cellex Power Products Inc., entered into an Industrial Research Assistance Program (IRAP) Repayable Contribution Agreement with the National Research Council of Canada (NRC) under which it received contributions totaling Cdn\$500,000 for certain development activities. The agreement with the NRC provides for payment of royalties of up to 170% of the contributions received subject to certain conditions, payable quarterly, calculated at 3.5% of gross revenues. Plug Power Canada's repayment obligation to the NRC exists from July 1, 2002 to March 31, 2009. If by April 1, 2009, the total amount repaid to the NRC is less than the Cdn\$500,000 contribution, then Plug Power Canada will continue to make the payments to the NRC until either the full Cdn\$500,000 is repaid or until July 1, 2012, whichever comes first. The maximum liability under this repayment obligation is Cdn\$850,000. If at any point Plug Power Canada's repayments reach this amount the obligation shall cease.

The Company has recorded the estimate of amounts owed under this arrangement as a debt, which includes accrued interest that is determined based on imputed interest rates. Royalty payments are recorded as a reduction of the debt. Accordingly, liabilities relating to this agreement, including imputed interest, in the amount of \$296,581 and \$353,547, respectively, have been recorded as repayable government assistance and current portion of repayable government assistance (other current liabilities) in the condensed consolidated balance sheets as of September 30, 2008 and \$572,473 and \$213,500, respectively, have been recorded as repayable government assistance and current portion of repayable government assistance (other current liabilities) in the condensed consolidated balance sheets as of December 31, 2007. The imputed interest is recorded as interest expense in the condensed consolidated statement of operations.

General Hydrogen Corporation and its wholly owned subsidiary General Hydrogen (Canada) Corporation, and Cellex Power Products, Inc. each entered into agreements with Technology Partnerships Canada (TPC) during the year ended December 31, 2005 for the development of early market fuel cell applications. On December 31, 2007, General Hydrogen Corporation merged with Plug Power Inc. and, subsequently, Plug Power Inc. contributed the wholly owned subsidiary General Hydrogen (Canada) Corporation to Plug Power Canada Inc. On January 1, 2008, General Hydrogen (Canada) Corporation, Plug Power Canada Inc. and Cellex Power Products, Inc. amalgamated as Plug Power Canada Inc. Under the former Cellex Power Products, Inc.'s TPC agreement (the Cellex TPC Agreement), TPC would contribute the lesser of Cdn\$9.5 million or 33% of eligible costs incurred during the period July 2004 to June 2009. Following the completion of the development project, TPC would be entitled to recover its investment through royalty payments of 2.06% of gross revenues during the period January 1, 2010 to December 31, 2017, or until a Cdn\$42.2 million cap is reached, whichever occurred first. If, as of December 31, 2017, the cumulative royalty paid and owing had not reached Cdn\$28.1 million, royalty payments would continue to be payable until Cdn\$28.1 million was reached or until December 31, 2027, whichever occurred first. Under the former General Hydrogen Corporation and General Hydrogen (Canada) Corporation's TPC agreement (the General Hydrogen TPC Agreement), TPC would contribute the lesser of Cdn\$9.0 million or 32% of eligible costs incurred through June 2008. Following the completion of the development project, TPC would be entitled to recover its investment through royalty payments of 1.98% of revenues during the period January 1, 2009 to December 31, 2016. If, as of December 31, 2016, the cumulative royalty paid and owing has not reached Cdn\$22.9 million, royalty payments would continue to be payable until Cdn\$22.9 million was reached or until December 31, 2026, whichever occurred first.

On September 30, 2008 Plug Power Inc., Plug Power Canada Inc., and TPC entered into Assumption and Termination Agreements related to both the Cellex TPC Agreement and the General Hydrogen TPC Agreement. In consideration of the Assumption and Termination Agreements, Plug Power Inc. and Plug Power Canada Inc. have agreed to pay \$2,716,598 to TPC on or before November 29, 2008. As a result of these Assumption and Termination Agreements, we have recorded the amount owed under this arrangement in current liabilities in the condensed consolidated balance sheet as of September 30, 2008. Prior to the termination, the Company had \$3,974,576 recorded as repayable government assistance related to the Cellex TPC Agreement and the General Hydrogen TPC Agreement on the condensed consolidated balance sheets. The Company has also recorded a gain on the termination of these agreements in the amount of \$1,283,044 in interest and other income and net realized gains (losses) from available-for-sale securities in the condensed consolidated statement of operations in the quarter ended September 30, 2008.

A liability, including imputed interest, in the amount of \$3,815,890 was recorded as repayable government assistance in the condensed consolidated balance sheets as of December 31, 2007. The imputed interest is recorded as interest expense in the condensed consolidated statement of operations.

9. Restructuring Charges

On June 10, 2008, the Company adopted a restructuring plan to become a market and sales driven organization. The Company has refocused on the GenDrive motive power product where there has been significant customer interest in fuel cell power units. As part of the restructuring, the Company has reduced its workforce, cut back discretionary spending, and deferred non strategic projects. As a result of the reduced workforce and contract cancellation, the Company recorded restructuring charges in the amount of \$157,396 and \$3,740,301 within selling, general and administrative expenses in the condensed consolidated statement of operations for the three and nine months ended September 30, 2008,

respectively. At September 30, 2008, \$469,606 remains as accrued expenses on the condensed consolidated balance sheets.

Table of Contents

The accrued restructuring charges are comprised of the following at September 30, 2008:

	Total Amount Expensed Nine Months Ended September 30, 2008	Total Amount Paid Nine Months Ended September 30, 2008	Remaining Accrual at September 30, 2008
Personnel Related	\$ 3,376,201	\$ 3,270,695	\$ 105,506
Contract Cancellation	364,100		364,100
Total	\$ 3,740,301	\$ 3,270,695	\$ 469,606

10. Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of SFAS No. 115* (SFAS No. 159). This new standard permits entities to choose to measure many financial instruments and certain warranty and insurance contracts at fair value on a contract-by-contract basis. The Company adopted SFAS No. 159 on January 1, 2008 and did not choose the fair value option for any financial instruments upon the adoption of this standard. The adoption of this new standard did not have a material effect on its condensed consolidated results of operations, or liquidity.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (SFAS No. 160). This new standard establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. This standard is effective for fiscal years beginning after December 15, 2008. The Company plans to adopt SFAS No. 160 on January 1, 2009 and is currently evaluating the effect, if any, SFAS No. 160 will have on its condensed consolidated financial position, condensed consolidated results of operations, or liquidity.

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), *Business Combinations*, (SFAS No. 141R). This new standard applies to all transactions or other events in which an entity obtains control of one or more businesses, including those sometimes referred to as *true mergers* or *mergers of equals* and combinations achieved without the transfer of consideration. This standard replaces FASB Statement No. 141 and applies to all business entities, including mutual entities that previously used the pooling-of-interests method of accounting for some business combinations. The Company plans to adopt SFAS No. 141R on January 1, 2009 and will apply the provisions of this standard on a prospective basis. The Company is currently evaluating the impact of adopting SFAS No. 141R on its condensed consolidated financial statements.

In December 2007, the FASB's Emerging Issues Task Force (EITF) issued EITF No. 07-01, *Accounting for Collaborative Arrangements Related to the Development and Commercialization of Intellectual Property* (EITF No. 07-01). This new standard prescribes the accounting for collaborations. It requires certain transactions between collaborators to be recorded in the income statement on either a gross or net basis within expenses when certain characteristics exist in the collaboration relationship. The Company adopted EITF No. 07-01 on January 1, 2008 and the adoption did not have a material effect on its condensed consolidated financial position, condensed consolidated results of operations, or liquidity.

In December 2007, the SEC issued Staff Accounting Bulletin No. 110, *Share-Based Payment* (SAB No. 110). SAB No. 110 amends SAB No. 107, *Share-Based Payment*, and allows for the continued use, under certain circumstances, of the *simplified method* in developing an estimate of the expected term on stock options accounted for under the Statement of Financial Accounting Standards (SFAS) No. 123R, *Share-Based Payment* (revised 2004). SAB No. 110 is effective for stock options granted after December 31, 2007. The Company continued to use the *simplified method* in developing an estimate of the expected term on stock options granted in the first nine months of 2008. The Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term due to the limited period of time its shares of Common Stock have been publicly traded.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. This new standard identifies the sources of accounting principles and the framework for selecting the accounting principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States. This new standard mandates the GAAP hierarchy reside in the accounting literature as opposed to the audit literature. This has the practical impact of

Edgar Filing: PLUG POWER INC - Form 10-Q

elevating FASB Statements of Financial Accounting Concepts in the GAAP hierarchy. SFAS No. 162 is effective 60 days after the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles. The Company does not believe adoption of this new standard will have a material effect on its condensed consolidated financial statements, or liquidity.

Table of Contents

In June 2008, the FASB issued the FASB Staff Position (FSP) EITF No. 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities (FSP EITF No. 03-6-1). FSP EITF No. 03-6-1 requires that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) should be classified as participating securities and should be included in the computation of earnings per share pursuant to the two-class method as described in SFAS No. 128, Earnings per Share. FSP EITF No. 03-6-1 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company is currently evaluating the impact of adopting FSP EITF No. 03-6-1 on its condensed consolidated financial statements.

11. Commitments and Contingencies

On October 15, 2007 the Company and Wal-Mart Stores East, LP (Wal-Mart) signed an Early Commercial Purchase Agreement for GenDrive units. Under this agreement, the Company has certain commitments to provide for the maintenance/service of the units sold as well as supply of hydrogen to Wal-Mart for up to seven years from the date of installation and commissioning. The Company also provides indemnification related to this agreement to Wal-Mart. As of September 30, 2008, all units sold to Wal-Mart have been placed in service.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF**FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with our accompanying unaudited condensed consolidated financial statements and notes thereto included within this report, and our audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K filed for the fiscal year ended December 31, 2007. In addition to historical information, this Form 10-Q and following discussion contain statements that are not historical facts and are considered forward-looking within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. These forward-looking statements contain projections of our future results of operations or of our financial position or state other forward-looking information. In some cases you can identify these statements by forward-looking words such as anticipate, believe, could, estimate, expect, intend, may, should, will and would or similar words. We believe that it is important to communicate our future expectations to our investors. However, there may be events in the future that we are not able to accurately predict or control and that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements. Investors are cautioned not to rely on forward-looking statements because they involve risks and uncertainties, and actual results may differ materially from those discussed as a result of various factors, including, but not limited to: the risk that our investments in auction rate securities may cause losses and affect the liquidity of these investments; the risk that the restructuring results in greater restructuring charges or less cost savings; the risk that the FCC does not adopt rules regarding back up power requirements; the risk that unit orders will not ship, be installed and/or convert to revenue, in whole or in part; our ability to develop commercially viable energy products; the cost and timing of developing our energy products; market acceptance of our energy products; our ability to manufacture energy products on a large-scale commercial basis; competitive factors, such as price competition and competition from other traditional and alternative energy companies; the cost and availability of components and parts for our energy products; the cost and availability of fuel and fueling infrastructures for Plug Power's energy products; the ability to raise and provide the necessary capital to develop, manufacture and market our energy products; our ability to establish relationships with third parties with respect to product development, manufacturing, distribution and servicing and the supply of key product components; our ability to protect our Intellectual Property; our ability to lower the cost of our energy products and demonstrate their reliability; the cost of complying with current and future governmental regulations; the impact of deregulation and restructuring of the electric utility industry on demand for our energy products; fluctuations in the trading price and volume of our common stock; and other risks and uncertainties discussed, but are not limited to, those set forth in Item 1A Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2007, as filed on March 17, 2008 updated by Part II, Item 1A of this Form 10-Q. These forward-looking statements speak only as of the date on which the statements were made and are not guarantees of future performance. Except as may be required by applicable law, we do not undertake or intend to update any forward-looking statements after the date of this Form 10-Q.

Overview

Plug Power Inc., together with its subsidiaries, is a development stage enterprise involved in the design, development and manufacture of fuel cell systems for stationary and industrial-motive (forklift) markets worldwide. We are focused on the application of Proton Exchange Membrane, or PEM, fuel cell and fuel processing technologies from which we are developing multiple products. The Company is a development stage enterprise because substantially all of the Company's resources and efforts are aimed at the discovery of new knowledge that could lead to significant improvement in fuel cell reliability and durability and the establishment of a market for the Company's products. The Company continues to experience significant net outflows of cash from operations and devotes significant efforts towards financial planning in order to forecast future cash spending and the ability to continue product research and development activities. Fuel cell technology within the Company's targeted markets, telecommunications, broadband, utility, and industrial un-interruptible power supply, as well as the mobile industrial equipment market is still early in the technology adoption life cycle.

Edgar Filing: PLUG POWER INC - Form 10-Q

We are currently offering our 5kW hydrogen fueled GenCore[®] back-up power product for commercial sale to telecommunications, un-interruptible power (UPS) and utility back-up applications, with a focus on wireless telecommunications. We are collaborating with Ballard Power Systems, under a government contract, to evaluate alternative stack technology for future products.

Table of Contents

We also offer our GenDrive industrial motive power products for sale on commercial terms. We are currently conducting prototype field tests with these hydrogen fueled GenDrive systems that are intended to be a direct replacement for traditional lead-acid battery packs on indoor industrial forklift applications.

Additionally, we continue to develop our GenSys[®] continuous power products. In 2007 we commissioned seventeen (17) 5kW LPG fueled low-temperature off-grid PEM systems in three (3) separate deployments, including a system trial in India with a large wireless carrier.

As an extension of our GenSys[®] development work, we continue to develop technology in support of the automotive fuel cell market under a series of agreements with Honda R&D Co Ltd. of Japan (Honda), a subsidiary of Honda Motor Co., Ltd.

We also form relationships with customers and enter into development and demonstration programs with government agencies and other energy providers. Many of our initial sales of GenCore[®], GenDrive and GenSys[®] are contract-specific arrangements containing multiple obligations that may include a combination of fuel cell systems, continued service, maintenance and other support. The multiple obligations within our contractual arrangements are not accounted for separately based on our limited commercial experience and lack of evidence of fair value for the separate elements. As a result, we defer recognition of product and service revenue and recognize revenue on a straight-line basis over the contractual terms as the continued service, maintenance and other support obligations expire, which are generally for periods of twelve to thirty months. Our distributors have no special right of return, price protection allowances or other sales incentives. We do offer a discount from our manufacturer's suggested retail price to resellers to allow for the mark-up of the reseller.

As we gain commercial experience, including field experience relative to service and warranty of our initial products, the fair values for the multiple elements within our future contracts may become determinable and we may, in future periods, recognize product revenue upon delivery or installation of the product, or we may continue to defer recognition, based on application of appropriate guidance within EITF 00-21,

Accounting for Revenue Arrangements with Multiple Deliverables, or changes in the manner in which we structure contractual agreements, including our agreements with distribution partners.

In October 2008, Peter Woicke resigned from the Company's Board of Directors effective immediately. Also in October 2008, J. Douglas Grant resigned from the Company's Board of Directors to be effective the earlier of December 31, 2008 or the date on which the Board of Directors appoints his replacement. In November 2008, the Board of Directors of the Company appointed Jeffrey Drazan to serve as a director of the Company to replace Peter Woicke.

Results of Operations

Product and service revenue. We defer recognition of product and service revenue at the time of delivery and recognize revenue as the continued service, maintenance and other support obligations expire.

Many of our initial sales of product contain multiple obligations that may include a combination of fuel cell systems, continued service, maintenance and other support. While contract terms generally require payment shortly after delivery and installation of the fuel cell system and are not contingent on the achievement of specific milestones or other substantive performance, the multiple obligations within our contractual arrangements are generally not accounted for separately based on our limited experience and lack of evidence of fair value of the different components. As a result, we defer recognition of product and service revenue and recognize revenue on a straight-line basis as the continued service, maintenance and other support obligations expire, which are generally for periods of twelve to thirty months. In the case of our limited consignment sales, we do not begin recognizing revenue on a deferred basis until the customer has accepted the product, at which time the risks and rewards of ownership have transferred, the price is fixed and we have a reasonable expectation of collecting upon billing.

Product and service revenue for the three months ended September 30, 2008 increased \$71,000, or 6%, to \$1.3 million from \$1.2 million for the three months ended September 30, 2007. The increase is related to increased system shipments and the revenue recognized on those shipments as well as an increase in non-deferred revenue. The non-deferred revenue represents revenue associated with replacement parts or services not covered by service agreements or other similar types of sales where the Company has no continuing obligation after the parts are shipped or services rendered.

In the product and service revenue category, during the three months ended September 30, 2008 we shipped 59 fuel cell systems compared to 25 fuel cell systems during the three months ended September 30, 2007. In the three months ended September 30, 2008, we recognized \$710,000 of revenue for products shipped or services rendered in the three months ended September 30, 2008, which includes \$317,000 of non-deferred revenue as compared to \$653,000 of revenue recognized in the three months ended September 30, 2007 for products shipped or services rendered in the three months ended September 30, 2007, which includes \$79,000 of non-deferred revenue. Additionally, in the three months ended September 30, 2008 we recognized approximately \$561,000 of product and services revenue originally deferred at December 31, 2007,

Edgar Filing: PLUG POWER INC - Form 10-Q

whereas in the three months ended September 30, 2007 we recognized \$547,000 of revenue originally deferred at December 31, 2006.

Table of Contents

Product and service revenue for the nine months ended September 30, 2008 increased \$914,000, or 39%, to \$3.2 million from \$2.3 million for the nine months ended September 30, 2007. The increase is related to increased system shipments and the revenue recognized on those shipments as well as an increase in non-deferred revenue. The non-deferred revenue represents revenue associated with replacement parts or services not covered by service agreements or other similar types of sales where the Company has no continuing obligation after the parts are shipped or services rendered.

In the product and service revenue category, during the nine months ended September 30, 2008 we shipped 207 fuel cell systems compared to 128 fuel cell systems during the nine months ended September 30, 2007. In the nine months ended September 30, 2008, we recognized \$1.5 million of revenue for products shipped or services rendered in the nine months ended September 30, 2008, which includes \$690,000 of non-deferred revenue as compared to \$900,000 of revenue recognized in the nine months ended September 30, 2007 for products shipped or services rendered in the nine months ended September 30, 2007, which includes \$147,000 of non-deferred revenue. Additionally, in the nine months ended September 30, 2008 we recognized approximately \$1.7 million of product and services revenue originally deferred at December 31, 2007, whereas in the nine months ended September 30, 2007 we recognized \$1.4 million of revenue originally deferred at December 31, 2006.

Research and development contract revenue. Research and development contract revenue primarily relates to cost reimbursement research and development contracts associated with the development of PEM fuel cell technology. We generally share in the cost of these programs with our cost-sharing percentages generally ranging from 20% to 71% of total project costs. Revenue from time and material contracts is recognized on the basis of hours expended plus other reimbursable contract costs incurred during the period. Revenue from fixed fee contracts is recognized on the basis of percentage of completion. We expect to continue certain research and development contract work that is directly related to our current product development efforts.

Research and development contract revenue for the three months ended September 30, 2008 decreased to \$2.8 million from \$3.3 million in the three months ended September 30, 2007. This decrease is primarily related to the completion of contracts from prior years. In the research and development contract revenue category, during the three months ended September 30, 2008 we did not ship any fuel cell systems.

Research and development contract revenue for the nine months ended September 30, 2008 increased to \$9.4 million from \$8.8 million in the nine months ended September 30, 2007. This increase was primarily related to our acquisitions in 2007, which increased \$2.2 million as a result of nine full months of operations in 2008 versus 2007, offset by a decrease of \$1.6 million related to a completion of contracts from prior years. In the research and development contract revenue category, during the nine months ended September 30, 2008 we shipped 5 GenSys[®] fuel cell systems.

Cost of product and service revenue. Cost of product and service revenue includes the direct material cost incurred in the manufacture of the products we sell as well as the labor and material costs incurred for product maintenance, replacement parts and service under our contractual obligations. These costs consist primarily of production materials and fees paid to outside suppliers for subcontracted components and services.

Cost of product and service revenue for the three months ended September 30, 2008 decreased approximately \$129,000 to \$1.8 million compared to \$2.0 million in the three months ended September 30, 2007. The increase related to the number of shipments noted above was more than offset by reduced service and warranty costs for existing units in the field.

Cost of product and service revenue for the nine months ended September 30, 2008 decreased approximately \$1.7 million to \$6.3 million compared to \$8.0 million in the nine months ended September 30, 2007. The increase related to the number of shipments noted above was more than offset by the \$2.0 million charge for certain future expected service and warranty costs for existing units in the field recorded in the second quarter of 2007.

Cost of research and development contract revenue. Cost of research and development contract revenue includes costs associated with research and development contracts including: cash and non-cash compensation and benefits for engineering and related support staff, fees paid to outside suppliers for subcontracted components and services, fees paid to consultants for services provided, materials and supplies used and other directly allocable general overhead costs allocated to specific research and development contracts.

Cost of research and development contract revenue for the three months ended September 30, 2008 decreased \$1.4 million to \$3.8 million from \$5.2 million in the three months ended September 30, 2007. Nearly all of this decline is related to the decrease in research and development contract revenue resulting from completing contracts.

Table of Contents

Cost of research and development contract revenue for the nine months ended September 30, 2008 increased \$1.9 million to \$14.5 million from \$12.6 million in the nine months ended September 30, 2007. The acquisitions of Cellex and General Hydrogen contributed approximately \$2.2 million of this increase which was partially offset by a decline of about \$300,000 relating to the decrease in research and development contract revenue resulting from completing contracts.

Research and development expense. Research and development expense includes: materials to build development and prototype units, cash and non-cash compensation and benefits for the engineering and related staff, expenses for contract engineers, fees paid to outside suppliers for subcontracted components and services, fees paid to consultants for services provided, materials and supplies consumed, facility related costs such as computer and network services, and other general overhead costs associated with our research and development activities.

Research and development expense decreased to \$7.7 million for the three months ended September 30, 2008 from \$9.4 million in the three months ended September 30, 2007. This decrease is primarily related to the corporate restructuring plan announced in June 2008, which included a reduced workforce and a reduction in non-strategic research and development projects.

Research and development expense decreased to \$26.6 million for the nine months ended September 30, 2008 from \$27.4 million in the nine months ended September 30, 2007. Approximately \$5.2 million of this decrease was a direct result of the corporate restructuring plan announced in June 2008, which included a reduced workforce and a reduction in non-strategic research and development projects. This decrease was largely offset by an increase of \$4.4 million, primarily due to a full nine month period of expense in 2008 related to the acquisition of Cellex and General Hydrogen, versus a partial nine month period in 2007.

Selling, general and administrative expenses. Selling, general and administrative expenses includes cash and non-cash compensation, benefits and related costs in support of our general corporate functions, including general management, finance and accounting, human resources, selling and marketing, information technology and legal services.

Selling, general and administrative expenses decreased \$412,000 to \$4.8 million for the three months ended September 30, 2008, compared to \$5.2 million for the three months ended September 30, 2007. This decrease is primarily related to the corporate restructuring plan announced in June 2008, which included a reduced workforce, partially offset by \$157,000 in other restructuring charges recorded during the current quarter.

Selling, general and administrative expenses increased \$5.4 million to \$19.6 million for the nine months ended September 30, 2008, compared to \$14.2 million for the nine months ended September 30, 2007. Approximately \$3.7 million of the increase is related to the corporate restructuring plan announced in June 2008. The remainder of the increase is a direct result of a full nine month period of expense in 2008 related to the acquisition of Cellex and General Hydrogen, versus a partial nine month period in 2007.

Amortization of intangible assets. Amortization of intangible assets represents the amortization associated with the Company's acquired identifiable intangible assets from Cellex and General Hydrogen, including acquired technology and customer relationships, which are being amortized over eight years.

Amortization of intangible assets decreased to \$563,000 for the three months ended September 30, 2008, compared to \$572,000 for the three months ended September 30, 2007. The decrease is related to foreign currency exchange fluctuations.

Amortization of intangible assets increased to \$1.7 million for the nine months ended September 30, 2008, compared to \$1.0 million for the nine months ended September 30, 2007. The increase is related to a full nine month period of amortization of intangible assets in 2008 as compared to a partial nine month period in 2007.

Table of Contents

Interest and other income and net realized gains/(losses) from available-for-sale securities. Interest and other income and net realized gains/(losses) from available-for-sale securities consists primarily of interest earned on our cash, cash equivalents and available-for-sale securities, other income, and the net realized gain/loss from the sale of available-for-sale securities.

Interest and other income and net realized gains/(losses) from available-for-sale securities decreased to \$1.9 million for the three months ended September 30, 2008 from \$2.8 million for the three months ended September 30, 2007. This decrease is primarily related to lower cash balances, coupled with lower yields on our investments, particularly for the auction rate debt securities. This was partially offset by a \$1.3 million gain relating to the termination of Technology Partnerships Canada (TPC) agreements with Cellex and General Hydrogen, as discussed above.

Interest and other income and net realized gains/(losses) from available-for-sale securities decreased to \$4.6 million for the nine months ended September 30, 2008 from \$9.3 million for the nine months ended September 30, 2007. This decrease is primarily related to lower cash balances, coupled with lower yields on our investments, particularly for the auction rate debt securities. This was partially offset by a \$1.3 million gain relating to the termination of TPC agreements with Cellex and General Hydrogen, as discussed above.

Impairment loss on available-for-sale securities. Included in available-for-sale securities and working capital at September 30, 2008 was \$57.6 million of auction rate debt securities. Due to the liquidity issues in the credit and capital markets, the market for auction rate securities began experiencing auction failures in February 2008 and there have been no successful auctions for the securities held in our portfolio since the failures began. The Company expects to hold these securities until there is a successful auction or the Company sells them in the open market.

Given the lack of liquidity in the market for auction rate securities, the Company concluded that the estimated fair value of these securities has become lower than the cost of these securities, and, based on an analysis of the other than temporary impairment factors, management has determined that this difference represents a decline in fair value that is other than temporary. Accordingly, the Company recorded an other than temporary impairment charge of \$789,000 and \$5.3 million, respectively in the three and nine months ended September 30, 2008 in the condensed consolidated statements of operations.

Interest and other expense. Interest and other expense consists of interest on repayable government assistance amounts related to the activities of Cellex and General Hydrogen, and a foreign currency exchange gain/loss.

Interest and other expense for the three months ended September 30, 2008 was approximately \$286,000, compared to \$209,000 for the three months ended September 30, 2007.

Interest and other expense for the nine months ended September 30, 2008 was approximately \$614,000, compared to \$254,000 for the nine months ended September 30, 2007. The increase is related to the 2007 acquisitions and a full nine month period of expenses in 2008 as compared to a partial nine month period of expenses in 2007.

Income taxes. We did not report a benefit for federal and state income taxes in the condensed consolidated financial statements for the three and nine months ended September 30, 2008 and 2007 as the deferred tax asset generated from our net operating loss has been offset by a full valuation allowance because it is not more likely than not that the tax benefits of the net operating loss carry forward will be realized.

Liquidity and Capital Resources

Our cash requirements depend on numerous factors, including completion of our product development activities, our ability to commercialize our on-site energy products, market acceptance of our systems and other factors. We expect to devote substantial capital resources to continue our development programs directed at commercializing our energy products for worldwide use, hiring and training our production staff, developing and expanding our manufacturing capacity and continuing to expand our production and our research and development activities. We expect to pursue the expansion of our operations through internal growth and strategic acquisitions and expect that such activities will be funded from existing cash, cash equivalents and available-for-sale securities, issuance of additional equity or debt securities or additional borrowings subject to market and other conditions. The failure to raise the funds necessary to finance our future cash requirements or consummate future acquisitions could adversely affect our ability to pursue our strategy and could negatively affect our operations in future periods. We anticipate incurring substantial additional losses over at least the next several years and believe that our current cash, cash equivalents and available-for-sale securities balances will provide sufficient liquidity to fund operations for at least the next twelve months.

Table of Contents

Several key indicators of liquidity are summarized in the following table:

(in thousands)	Nine months ended or at September 30, 2008	Nine months ended or at September 30, 2007	Year ended or at December 31, 2007
Cash and cash equivalents at end of period	\$ 19,568	\$ 18,171	\$ 12,077
Available-for-sale securities at end of period	96,762	162,238	153,624
Working capital at end of period	110,672	180,542	163,906
Net loss	57,405	43,086	60,571
Net cash used in operating activities	42,672	35,689	49,311
Purchase of property, plant and equipment	1,242	2,117	2,944

Included in available-for-sale securities and working capital is \$57.6 million, \$74.8 million and \$90.8 million of auction rate securities at September 30, 2008, September 30, 2007, and December 31, 2007, respectively. The auction rate securities are secured by student loans which are generally guaranteed by the Federal government. These auction rate securities are structured to be tendered at par, at the investor's option, at auctions occurring every 27-30 days. However, due to the liquidity issues in the credit and capital markets, the market for auction rate securities began experiencing auction failures in February 2008 and there have been no successful auctions for the securities held in our portfolio since the failures began. We continue to receive interest on these securities, subject to an interest rate cap formula for each security as periodically adjusted. At September 30, 2008, the interest rates ranged from 0.4% to 5.2% on the auction rate securities as compared to the interest rate range at June 30, 2008 from 0% to 2.9%. The Company expects to hold the auction rate securities until there is a successful auction or the Company may sell these securities in the open market. Given the lack of liquidity in the market for auction rate securities, the estimated fair value of these auction rate securities have become lower than their cost and, based on an analysis of other than temporary impairment factors, management has determined that this difference represents a decline in value that is other than temporary. Accordingly, the Company recorded an other than temporary impairment charge of \$5.3 million for the nine months ended September 30, 2008 in the condensed consolidated statement of operations. A continuation or worsening of these market conditions could further negatively impact the Company's results of operations and could have a significant negative affect on the Company's liquidity.

We continue to monitor the market for auction rate securities and consider the impact, if any, on the fair value of our investment portfolio. If uncertainties in the credit and capital markets continue or these markets deteriorate further, we may be required to record additional impairments or unrealized losses, which could negatively affect our financial condition, liquidity and reported operating results. Further, in the event that we require access to cash and need to sell any of the affected securities, we may suffer additional losses on any such sale.

In May 2008, the Company filed a lawsuit against UBS Financial Services Inc. and UBS AG (collectively, "UBS" or the "Defendant"), the financial advisor that placed the Company in certain auction rate securities held in the Company's investment portfolio. The lawsuit seeks a return of the \$62.8 million of Company funds UBS invested in auction rate securities in contravention to the Company's investment policy, among other damages. On September 17, 2008, the United States District Court for the Northern District of New York denied the Defendant's motion to dismiss the lawsuit and the parties are now proceeding with discovery. On August 8, 2008, UBS entered into settlements in principle with each of the Division of Enforcement of the Securities and Exchange Commission, the New York Attorney General, and other state agencies, to settle investigations of UBS by each of these agencies relating to the sale and marketing of auction rate securities. In connection with these settlements and pursuant to a prospectus issued October 7, 2008, UBS has offered to repurchase, at par, the auction rate securities held by its clients to whom UBS had marketed and sold such securities, including Plug Power. In the case of the auction rate securities held by Plug Power, the offer provides for a repurchase on or after June 30, 2010.

Holders of auction rate securities have until Friday, November 14, 2008 to accept the settlement offer, unless extended by UBS. In the event that Plug Power accepts the UBS offer, the Company would be required to discontinue all or part of its suit against UBS. The Company is carefully reviewing the terms of the offer. Plug Power believes that its position in the litigation is very strong and, should it not accept the settlement, it will aggressively pursue its litigation.

Our cash requirements depend on numerous factors, including completion of our product development activities, ability to commercialize our fuel cell systems, market acceptance of our systems and other factors. We expect to pursue the expansion of our operations through internal growth and strategic acquisitions. As of September 30, 2008, we had cash and cash equivalents of \$19.6 million, available-for-sale securities of \$96.8 million and working capital of \$110.7 million.

Table of Contents

During the nine months ended September 30, 2008, cash used for operating activities was \$42.7 million, consisting primarily of a net loss of \$57.4 million offset, in part, by non-cash expenses in the amount of \$13.2 million, including \$5.0 million for amortization and depreciation, \$4.2 million for stock based compensation, a \$5.3 million other than temporary impairment loss on available-for-sale securities and a \$1.3 million gain on termination of repayable government assistance. Cash provided by investing activities for the nine months ended September 30, 2008 was \$50.5 million, consisting of \$51.7 million of maturities, net of purchases, of available-for-sale securities, offset by \$1.2 million used to purchase property, plant and equipment. Cash used in financing activities was approximately \$323,000.

We have financed our operations from inception through September 30, 2008 primarily from the sale of equity (including those related to stock-based compensation), which has provided cash in the amount of \$635.8 million since inception. Also since inception, cumulative net cash used in operating activities has been \$440.3 million, and cash used in investing activities has been \$170.1 million, including our purchase of property, plant and equipment of \$38.2 million, our net investments in available-for-sale securities in the amount of \$101.9 million, and cash used for acquisitions of \$19.3 million, net of cash received.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to bad debts, inventories, intangible assets, equity investments, unbilled revenue, income taxes and contingencies. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We refer to the policies and estimates set forth in the section "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Estimates" of our Annual Report on Form 10-K for the fiscal year ended December 31, 2007. There have been no material changes or modifications to the policies since December 31, 2007, other than the adoption of SFAS No. 157, "Fair Value Measurements," as discussed in Note 3 to the unaudited condensed consolidated financial statements.

Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of SFAS No. 115" (SFAS No. 159). This new standard permits entities to choose to measure many financial instruments and certain warranty and insurance contracts at fair value on a contract-by-contract basis. The Company adopted SFAS No. 159 on January 1, 2008 and did not choose the fair value option for any financial instruments upon the adoption of this standard. The adoption of this new standard did not have a material effect on its condensed consolidated results of operations, or liquidity.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements - an amendment of Accounting Research Bulletin No. 51" (SFAS No. 160). This new standard establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. This standard is effective for fiscal years beginning after December 15, 2008. The Company plans to adopt SFAS No. 160 on January 1, 2009 and is currently evaluating the effect, if any, SFAS No. 160 will have on its condensed consolidated financial position, condensed consolidated results of operations, or liquidity.

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), "Business Combinations," (SFAS No. 141R). This new standard applies to all transactions or other events in which an entity obtains control of one or more businesses, including those sometimes referred to as "true mergers" or "mergers of equals" and combinations achieved without the transfer of consideration. This standard replaces FASB Statement No. 141 and applies to all business entities, including mutual entities that previously used the pooling-of-interests method of accounting for some business combinations. The Company plans to adopt SFAS No. 141R on January 1, 2009 and will apply the provisions of this standard on a prospective basis. The Company is currently evaluating the impact of adopting SFAS No. 141R on its condensed consolidated financial statements.

In December 2007, the FASB's Emerging Issues Task Force (EITF) issued EITF No. 07-01, "Accounting for Collaborative Arrangements Related to the Development and Commercialization of Intellectual Property" (EITF No. 07-01). This new standard prescribes the accounting for collaborations. It requires certain transactions between collaborators to be recorded in the income statement on either a gross or net basis within

Edgar Filing: PLUG POWER INC - Form 10-Q

expenses when certain characteristics exist in the collaboration relationship. The Company adopted EITF No. 07-01 on January 1, 2008 and the adoption did not have a material effect on its condensed consolidated financial position, condensed consolidated results of operations, or liquidity.

Table of Contents

In December 2007, the SEC issued Staff Accounting Bulletin No. 110, *Share-Based Payment* (SAB No. 110). SAB No. 110 amends SAB No. 107, *Share-Based Payment*, and allows for the continued use, under certain circumstances, of the *simplified method* in developing an estimate of the expected term on stock options accounted for under the Statement of Financial Accounting Standards (SFAS) No. 123R,

Share-Based Payment (revised 2004). SAB No. 110 is effective for stock options granted after December 31, 2007. The Company continued to use the *simplified method* in developing an estimate of the expected term on stock options granted in the first nine months of 2008. The Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term due to the limited period of time its shares of Common Stock have been publicly traded.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*. This new standard identifies the sources of accounting principles and the framework for selecting the accounting principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (GAAP) in the United States. This new standard mandates the GAAP hierarchy reside in the accounting literature as opposed to the audit literature. This has the practical impact of elevating FASB Statements of Financial Accounting Concepts in the GAAP hierarchy. SFAS No. 162 is effective 60 days after the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*. The Company does not believe adoption of this new standard will have a material effect on its condensed consolidated financial statements, or liquidity.

In June 2008, the FASB issued the FASB Staff Position (FSP) EITF No. 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities* (FSP EITF No. 03-6-1). FSP EITF No. 03-6-1 requires that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) should be classified as participating securities and should be included in the computation of earnings per share pursuant to the two-class method as described in SFAS No. 128,

Earnings per Share. FSP EITF No. 03-6-1 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. The Company is currently evaluating the impact of adopting FSP EITF No. 03-6-1 on its condensed consolidated financial statements.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We invest our excess cash in government, government backed and interest-bearing investment-grade securities that we generally hold for the duration of the term of the respective instrument. We do not utilize derivative financial instruments, derivative commodity instruments or other market risk sensitive instruments, positions or transactions in any material fashion. Accordingly, other than with respect to auction rate securities, we believe that, while the investment-grade securities we hold are subject to changes in the financial standing of the issuer of such securities, we are not subject to any material risks arising from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices or other market changes that affect market risk sensitive instruments.

The auction rate securities we hold are secured by student loan debt securities issued by various states, in the United States, or state agencies. The Federal government guarantees \$55.3 million of these student loan debt securities. These auction rate securities are structured to be tendered at par, at the investor's option, at auctions occurring every 27-30 days. The auctions that occurred in January of 2008 were successful. However, due to the liquidity issues in the credit and capital markets, the market for auction rate securities began experiencing auction failures in February 2008 and there have been no successful auctions for the securities held in our portfolio since the failures began. We will continue to receive interest on these securities, subject to an interest rate cap for each security, until there is a successful auction or we sell the securities in the open market.

The valuation of these auction rate securities is an estimate based upon factors specific to these securities, including duration, tax status (taxable or tax-exempt), credit quality, the existence of insurance wraps, and the composition of the underlying student loans (FFELP or private loans). Assumptions are made about future cash flows based upon interest rate formulas. Also, the valuation includes estimates of market data including yields or spreads of similar trading instruments, when available, or assumptions believed to be reasonable on non-observable inputs such as likelihood of redemption. The valuations of each individual security are estimates as of the reporting date. Actual transactions involving these securities and/or future valuations could differ from the estimated fair value at September 30, 2008.

A portion of the Company's total revenue was attributable to our operations in Canada. Our exposure to changes in foreign currency rates primarily arises from short-term inter-company transactions with our Canadian subsidiaries and from client receivables in different currencies. Foreign sales are mostly made by our Canadian subsidiaries in their respective countries and are typically denominated in Canadian dollars. Our foreign subsidiaries incur most of their expenses in their local currency as well, which helps minimize our risk of exchange rate fluctuations. Accordingly, the Company's financial results are affected by risks such as currency fluctuations, particularly between the U.S. dollar and the Canadian dollar. As exchange rates vary, the Company's results can be materially affected.

Edgar Filing: PLUG POWER INC - Form 10-Q

In addition, the Company may source inventory among its worldwide operations. This practice can give rise to foreign exchange risk resulting from the varying cost of inventory to the receiving location as well as from the revaluation of intercompany balances. The Company mitigates this risk through local sourcing efforts.

Table of Contents

ITEM 4 CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures

As required by Rule 13a-15(b) under the Securities and Exchange Act of 1934, our management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

(b) Changes in internal controls over financial reporting

As required by Rule 13a-15(d) under the Securities Exchange Act of 1934, our management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

PART II OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

In May 2008, the Company filed a lawsuit against UBS Financial Services Inc. and UBS AG (collectively, "UBS" or the "Defendant"), the financial advisor that placed the Company in certain auction rate securities held in the Company's investment portfolio. The lawsuit seeks a return of the \$62.8 million of Company funds UBS invested in auction rate securities in contravention to the Company's investment policy, among other damages. On September 17, 2008, the United States District Court for the Northern District of New York denied the Defendant's motion to dismiss the lawsuit and the parties are now proceeding with discovery.

On August 8, 2008, UBS entered into settlements in principle with each of the Division of Enforcement of the Securities and Exchange Commission, the New York Attorney General, and other state agencies, to settle investigations of UBS by each of these agencies relating to the sale and marketing of auction rate securities. In connection with these settlements and pursuant to a prospectus issued October 7, 2008, UBS has offered to repurchase, at par, the auction rate securities held by its clients to whom UBS had marketed and sold such securities, including Plug Power. In the case of the auction rate securities held by Plug Power, the offer provides for a repurchase on or after June 30, 2010.

Holders of auction rate securities have until Friday, November 14, 2008 to accept the settlement offer, unless extended by UBS. In the event that Plug Power accepts the UBS offer, the Company would be required to discontinue all or part of its suit against UBS. The Company is carefully reviewing the terms of the offer. Plug Power believes that its position in the litigation is very strong and, should it not accept the settlement, it will aggressively pursue its litigation.

ITEM 1A RISK FACTORS

The following risk factors are in addition to those included in our Annual Report on Form 10-K filed for the year ended December 31, 2007:

If we do not realize the expected benefits from our restructuring plans, our business prospects may suffer and our operating results and financial condition would be adversely affected.

On June 10, 2008, the Company adopted a restructuring plan to become a market and sales driven organization. If we are unable to realize the benefits from our restructuring plan, our business prospects may suffer and our operating results and financial condition would be adversely affected.

Our financial results could be negatively impacted by impairments of goodwill or other intangible assets required by SFAS 142 and the application of future accounting policies or interpretations of existing accounting policies.

In accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* referred to as "SFAS 142", we perform an annual assessment on goodwill and other intangible assets for impairment and also an assessment if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. A downward revision in the fair value

Edgar Filing: PLUG POWER INC - Form 10-Q

of one of our acquired businesses could result in impairments of goodwill under SFAS 142 and non-cash charges. Any charge resulting from the application of SFAS 142 could have a significant negative effect on our reported net loss. In addition, our financial results could be negatively impacted by the application of existing and future accounting policies or interpretations of existing accounting policies, any continuing impact of SFAS 142 or any negative impact relating to the application of Statement of Financial Accounting Standards No. 144, *Accounting for the Improvement and Disposal of Long-Lived Assets*.

Table of Contents**NASDAQ may lift the temporary suspension of its continued listing requirements related to bid price and market value of shares, and we may not be able to comply with such requirements, which could result in our common stock being delisted from The NASDAQ Global Market.**

On October 17, 2008, the NASDAQ Stock Market, citing almost unprecedented turmoil in U.S. and world financial markets issued a release temporarily suspending through January 16, 2009 its continued listing requirements related to minimum bid price set forth in Marketplace Rule 4310(c)(4) and market value of shares set forth in Marketplace Rule 4310(c)(7). There can be no assurance that the temporary suspension of such rules will be extended beyond January 16, 2009. If the suspension of such rules is lifted, there can be no assurance that we will be able to maintain compliance with the listing requirements. On October 31, 2008, the per share price of our common stock closed at \$0.98 on the NASDAQ Global Market. If we are not able to maintain compliance with such continuing listing requirements after January 16, 2009, our stock may be delisted from The NASDAQ Global Market, which could have a negative effect on the price of our common stock, as well as on our ability to raise additional funds.

Adverse changes in general economic conditions in the United States or any of the major countries in which we do business could adversely affect our operating results.

As a global company, we are subject to the risks arising from adverse changes in global economic conditions. For example, as a result of the recent financial crisis in the credit markets, softness in the housing markets, difficulties in the financial services sector and continuing economic uncertainties, the direction and relative strength of the U.S. economy has become increasingly uncertain. If economic growth in the United States and other countries' economies is slowed, our current or potential customers may delay or reduce technology purchases. This could result in reductions in sales of our products, longer sales cycles, slower adoption of new technologies and increased price competition, which could materially and adversely affect our business, results of operations and financial condition.

We may be unable to liquidate our investments in auction rate debt securities due to recent disruptions in the financial markets.

Included in available-for-sale securities is \$57.6 million of auction rate securities at September 30, 2008 and \$90.8 million at December 31, 2007. The auction rate securities are secured by student loans which are generally guaranteed by the Federal government. These auction rate securities are structured to be tendered at par, at the investor's option, at auctions occurring every 27-30 days. However, due to the liquidity issues in the credit and capital markets, the market for auction rate securities began experiencing auction failures in February 2008 and there have been no successful auctions for the securities held in our portfolio since the failures began. We continue to receive interest on these securities, subject to an interest rate cap formula for each security as periodically adjusted. At September 30, 2008 the interest rates ranged from 0.4% to 5.2% on the auction rate securities. The Company expects to hold the auction rate securities until there is a successful auction or the Company may sell these securities on the open market. Given the lack of liquidity in the market for auction rate securities, the estimated fair value of these auction rate securities have become lower than their cost and, based on an analysis of other than temporary impairment factors, management has determined that this difference represents a decline in value that is other than temporary. Accordingly, the Company recorded an other than temporary impairment charge of approximately \$789,000 and \$5.3 million, respectively, in the three and nine months ended September 30, 2008 in the condensed consolidated statements of operations. A continuation or worsening of these market conditions could further negatively impact the Company's results of operations and could have a significant negative affect on the Company's liquidity.

ITEM 2 UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the nine months ended September 30, 2008, we issued 227,760 shares of our common stock in connection with matching contributions under our 401(k) Savings & Retirement Plan. The issuance of these shares is exempt from registration under Section 3(a)(2) of the Securities Act of 1933, as amended.
