Item 8.01 Other Events.

On March 26, 2009, El Paso Electric Company (the Company) completed a refunding transaction related to an aggregate principal amount of \$100,600,000 in pollution control indebtedness.

As part of the refunding, Maricopa County, Arizona Pollution Control Corporation (the Issuer) issued and sold \$63,500,000 principal amount of Pollution Control Refunding Revenue Bonds, 2009 Series A (El Paso Electric Company Palo Verde Project) (the 2009 Series A Bonds) and \$37,100,000 principal amount of Pollution Control Refunding Revenue Bonds, 2009 Series B (El Paso Electric Company Palo Verde Project) (the 2009 Series B Bonds) and together with the 2009 Series A Bonds, the Bonds). Each series of Bonds is governed by a separate Indenture of Trust each dated as of March 1, 2009 (each, an Indenture and collectively, the Indentures), by and between the Issuer and Union Bank, N.A., as trustee. The 2009 Series A Bonds (i) bear interest at an annual rate of 7.25%, (ii) will mature on February 1, 2040, (iii) are unsecured obligations, and (iv) are not supported by any credit enhancement facility. The 2009 Series B Bonds (i) bear interest at an annual rate of 7.25%, (ii) will mature on April 1, 2040, (iii) are unsecured obligations, and (iv) are not supported by any credit enhancement facility.

The 2009 Series A Bonds were issued to provide funds, together with other moneys available from the Company, necessary to redeem and refund the Issuer's Pollution Control Refunding Revenue Bonds, 2005 Series B (El Paso Electric Company Palo Verde Project) in the aggregate principal amount of \$63,500,000 (the 2005 Series B Bonds). The 2009 Series B Bonds were issued to provide funds, together with other moneys available from the Company, necessary to redeem and refund the Company's Pollution Control Refunding Revenue Bonds, 2005 Series C (El Paso Electric Company Palo Verde Project) in the aggregate principal amount of \$37,100,000 (the 2005 Series C Bonds) and, together with the 2005 Series B Bonds, the Prior Bonds). The Prior Bonds were in auction rate mode with interest rates reset weekly. As of March 19, 2009, the interest rates associated with the 2005 Series B Bonds and the 2005 Series C Bonds were 8.00% and 9.15%, respectively.

The Issuer will be obligated to pay the principal of, premium, if any, and interest on each series of Bonds solely out of moneys held in trust under the applicable Indenture and the receipts and revenues of the Issuer under separate Loan Agreements each dated as of March 1, 2009, between the Company and the Issuer (the Loan Agreements). Under each Indenture, the receipts and revenues from the Company pursuant to the related Loan Agreement have been pledged to the applicable trustee as security, equally and ratably, for the payment of the principal of, premium, if any, and interest on the related series of Bonds. The payments required to be made by the Company pursuant to each Loan Agreement are sufficient, together with other funds available for such purpose, to pay the principal of, premium, if any, and interest on the related series of Bonds. The obligations of the Company to make payments under each Loan Agreement will not be secured by any facilities or a pledge of any securities or any other property of the Company.

Each Loan Agreement contains standard representations, covenants and events of default for facilities of this type, including acceleration of indebtedness upon certain events of default. Events of default under each Loan Agreement include (i) a failure by the Company to make when due any payment under such Loan Agreement, which failure results in an event of default by the Issuer related to a payment of principal or interest when due under the related Indenture; (ii) a failure by the Company to pay when due any other payment required under such Loan Agreement or to observe and perform any other covenant, condition or agreement, subject to certain conditions; (iii) certain bankruptcy or insolvency-related conditions relating to the Company; and (iv) the occurrence and continuance of an event of default under the related Indenture.
