The amount recorded in the current assets refers to reversal of temporary differences and goodwill amortization expected for the next twelve months.

The deferred taxes were recorded assuming their future realization, as follows:

Tax credit incorporated: represented by the net balance of goodwill and provision for maintenance of the shareholders' equity integrity (note 6.2). Realization will occur in a period from 5 to 10 years. Studies performed by independent consultants hired during the corporate reorganization process support the recovery of such amounts within the above time frame.

Temporary differences: realization will occur upon payment of the provisions, effective loss on bad debts or realization of inventories, as well as reversal of other provisions.

Tax loss and negative tax basis: represents the amount recorded by the Company and its subsidiary, which will be offset up to the limit of 30% of the tax basis computed in the coming fiscal years and subject to no statute of limitations.

The Company and its subsidiary prepared feasibility studies, approved by the Board of Directors, which indicated the full recovery of deferred tax amounts recognized at December 31, 2008, as defined in CVM Instruction No. 371. During the three-month period ended March 31, 2009, no relevant fact occurred that indicated limitations to full recovery of the deferred tax amounts recognized by the Company and its subsidiary.

6.2 Tax credit incorporated Corporate Reorganization

As a result of the Corporate Reorganization process, the Company and its subsidiary incorporated the goodwill paid on the privatization and acquisition of subsidiaries.

Provisions were recorded for maintenance of the shareholders' equity of the merged company and, consequently, the net assets being merged represent, essentially, the tax benefit arising out of possible deduction of the incorporated goodwill.

b) *Considerations on risk factors which may affect the Company's and its subsidiaries' business*

The main market risks which the Company and its subsidiary are exposed to in the conduct of their activities are:

Credit Risk

The credit risk arises out of the potential difficulty to collect the amounts payable for telecommunication services rendered to its customers and for sales of handsets to the distributors network, as well as the risk related to financial statements.

The credit risk involved in the rendering of telecommunications services is minimized by a strict control of the customer base and active management of customers' default, by means of clear policies regarding the sale of post-paid handsets. The customer base of the subsidiary has, predominantly, a prepaid system, which requires the upfront payment and consequently entails no credit risk.

The credit risk in the sale of handsets and pre-activated prepaid cards is managed under a conservative credit policy, by means of modern management methods, including the application of credit scoring techniques, analysis of financial statements and information, and consultation to commercial data bases.

The Company and its subsidiary are also subject to credit risk originating from their financial investments. The Company and its subsidiary act in such a manner as to diversify this exposure among various world-class financial institutions.

Interest and Inflation Rate Risk

The inflation rate risk arises out of the debentures issued, indexed to the IPCA, which may negatively affect the financial expenses by an unfavorable change of this index.

The Company and its subsidiary have their financial investments indexed to the CDI. Should there be an increase in the local interest rate, the financial assets may be positively affected by this effect.

Exchange Rate Risk

At March 31, 2009, the Company and its subsidiary have no foreign currency loans (note 13). At December 31, 2008, the subsidiary recorded balances of US\$83,557 for loans and of US\$80,000 for derivative instruments.

c) *Derivative Transactions and Risk Management Policy*

Pursuant to a corporate policy of risk management, all contracting of derivative financial instruments is intended for protection against foreign exchange risk and variations in foreign and local interest rates arising out of financial debts. Since the Company and its subsidiary had no such loans recorded at March 31, 2009, no derivative instruments contracting was recorded at such date.

TELEMIG CELULAR PARTICIPAÇÕES S.A.**NOTES TO THE QUARTERLY FINANCIAL STATEMENTS****FOR THE THREE-MONTH PERIOD ENDED MARCH 31, 2009****(in thousands of Brazilian Reais, except as otherwise mentioned)***Analysis of sensibility to the risk variables of the Company*

CVM Instruction provides for that publicly-held companies, in addition to the provisions in item 59 of CPC 14 Financial Instruments: Recognition, Measurement and Evidencing, are required to disclose a statement of sensibility analysis, for each type of market risk deemed by the management to be material, originated by financial instruments, to which the entity is exposed at the closing date of each period, including all the transactions with derivative financial instruments.

At March 31, 2009, as the Company and its subsidiary had not any derivative instruments contracted, there is no risk of impact of these instruments on the financial result and, therefore, there is no exposure requiring a risk sensibility analysis.

26. POST-EMPLOYMENT BENEFITS PLAN

The subsidiary individually sponsors a defined retirement benefits plan Plano PBS Telemig Celular. Besides the benefit of supplementation, medical assistance (PAMA) is provided to retired employees and their dependents, at shared cost. Actuarial provisions relating to the defined benefit plans are recorded in Other liabilities (Note 16).

The subsidiary also sponsors the CelPrev, a defined contribution plan, under the same conditions as published for the last fiscal year.

27. TRANSACTIONS WITH RELATED PARTIES

- a) *Communication via local cellular phone and long distance and use of network:* these transactions are carried out with companies of the same controlling group: Vivo S.A., Telecomunicações de São Paulo S.A. TELESP and subsidiaries. 31. CORPORATE REORGANIZATION

On March 20, 2009, the Boards of Directors of Vivo Participações, Telemig Celular and Telemig Participações, in the form and for the purposes of CVM Instructions No. 319/999 and 358/02, approved the proposal to be submitted to the shareholders of Vivo Participações, Telemig Celular and Telemig Participações for Corporate Reorganization through merger of the shares of Telemig Celular and of Telemig Participações into Vivo Participações, by converting Telemig Celular in to a wholly-owned subsidiary of Telemig Participações and, the latter, into a wholly-owned subsidiary of Vivo Participações.

The purpose of the proposed Corporate Reorganization is to simplify the current organizational structure, which includes three publicly-held companies, two of them having ADRs traded abroad. The simplified structure will reduce administrative costs and allow the shareholders of the companies to hold interest in one sole company whose shares are traded both in Brazilian and international stock exchanges, with more liquidity, besides facilitating unification, standardization and rationalization of the general management of the business.

The flow chart below, reproduced in a simple manner, shows the current corporate structure and the structure after implementation of the Corporate Reorganization, emphasizing that the referred transaction will not change the composition of the final share control of the companies involved:

Corporate structure after merger of the shares of Telemig Celular into Telemig Participações and of Telemig Participações into Vivo Participações:

The merger of the shares of Telemig Celular and of Telemig Participações shall not cause any change to the number or breakdown by type of shares, which will ultimately be entirely held by Vivo Participações. Holders of common and preferred shares of Telemig Celular which are merged into Telemig Participações equity will receive new shares in Telemig Participações of the same type, that is, merged preferred shares will be replaced by new preferred shares of Telemig Participações to be issued on behalf of the respective holder, and merged common shares shall be replaced by new common shares of Telemig Participações to be issued on behalf of the respective holder. Cost of services rendered increased by 27.1% over 1Q08 due to higher interconnection cost related to both the growth of outgoing traffic and increase of expenses with Fistel Fee due to increase of the customer base. When compared to 4Q08, which is positively impacted by the co-billing renegotiation, the cost of services rendered increased 12.1%, as a result of the increase in interconnection expenses and Fistel Fee, which effects are associated to the customer base expansion, as well as increase of rent, insurance and condominium expenses.

The **cost of goods sold** recorded an increase of 72.3% in the quarter in relation to 1Q08. This increase was due to the commercial activity in the period and to the foreign exchange devaluation. When compared to 4Q08, it recorded a reduction of 30.4% due to lower activity in the period.

Edgar Filing: TELEMIG CELULAR PARTICIPACOES SA - Form 425

In the 1Q09, **selling expenses** decreased by 7.8% over the 1Q08 due to a decrease in expenses in customer retention efforts, in addition to a decrease in allowance for doubtful accounts. When compared to 4Q08, it recorded a reduction of 13.5% due to the decrease in expenses with customer retention and third-party services, especially publicity and advertising.

When compared to 4Q08, general and administrative expenses recorded an increase of 25.0% due to the growth in expenses with third-party services.

b) *Considerations on risk factors which may affect the Company's business*

The main market risks which the Company is exposed to in the conduct of its activities are:

Credit Risk

The credit risk arises out of the potential difficulty to collect the amounts payable for telecommunication services rendered to its customers and for sales of handsets to the distributors network, as well as the risk related to financial statements.

The credit risk involved in the rendering of telecommunications services is minimized by a strict control of the customer base and active management of customers' default, by means of clear policies regarding the sale of post-paid handsets. The customer base of the Company has, predominantly, a prepaid system, which requires the upfront payment and consequently entails no credit risk.

TELEMIG CELULAR S.A.

NOTES TO THE QUARTERLY FINANCIAL STATEMENTS

FOR THE THREE-MONTH PERIOD ENDED MARCH 31, 2009

(in millions of Brazilian Reais, except as otherwise mentioned)

The credit risk in the sale of handsets and pre-activated prepaid cards is managed under a conservative credit policy, by means of modern management methods, including the application of credit scoring techniques, analysis of financial statements and information, and consultation to commercial databases.

The Company is also subject to credit risk originating from their financial investments. The Company acts in such a manner as to diversify this exposure among various world-class financial institutions.

Interest and Inflation Rate Risk

The inflation rate risk arises out of the debentures issued, indexed to the IPCA, which may negatively affect the financial expenses by an unfavorable change of this index.

The Company has its financial investments indexed to the CDI. Should there be an increase in the local interest rate, the financial assets may be positively affected by this effect.

Exchange Rate Risk

At March 31, 2009, the Company has no foreign currency loans (note 13). At December 31, 2008, the Company recorded balances of US\$83,557 for loans and of US\$80,000 for derivative instruments.

c) *Derivative Transactions and Risk Management Policy*

Pursuant to a corporate policy of risk management, all contracting of derivative financial instruments is intended for protection against foreign exchange risk and variations in foreign and local interest rates arising out of financial debts. Since the Company had no such loans recorded at March 31, 2009, no derivative instruments contracting was recorded at such date.

Analysis of sensibility to the risk variables of the Company

CVM Instruction provides for that publicly-held companies, in addition to the provisions in item 59 of CPC 14 Financial Instruments: Recognition, Measurement and Evidencing, are required to disclose a statement of sensibility analysis, for each type of market risk deemed by the management to be material, originated by financial instruments, to which the entity is exposed at the closing date of each period, including all the transactions with derivative financial instruments.

At March 31, 2009, as the Company has no derivative instruments contracted, there is no risk of impact of these instruments on the financial result and, therefore, there is no exposure requiring a risk sensibility analysis.

25. POST-EMPLOYMENT BENEFITS PLAN

Telemig Celular individually sponsors a defined retirement benefits plan Plano PBS Telemig Celular. Besides the benefit of supplementation, medical assistance (PAMA) is provided to retired employees and their dependents, at shared cost. Actuarial provisions relating to the defined benefit plans are recorded in Other liabilities (Note 15).

Telemig Celular also sponsors the CelPrev, a defined contribution plan, under the same conditions as published for the last fiscal year.

OPERATING COSTS

Cost of service rendered increased by 27.1% over 1Q08.

Cost of services rendered increased by 27.1% over 1Q08 due to higher interconnection cost related to both the growth of outgoing traffic and increase of expenses with Fistel Fee due to increase of the customer base. When compared to 4Q08, which is positively impacted by the co-billing renegotiation, the cost of services rendered increased 12.1%, as a result of the increase in interconnection expenses and Fistel Fee, which effects are associated to the customer base expansion, as well as increase of rent, insurance and condominium expenses.

Higher commercial activity led to the increase on costs of goods sold.

The **cost of goods sold** recorded an increase of 72.3% in the quarter in relation to 1Q08. This increase was due to the commercial activity in the period and to the foreign exchange devaluation. When compared to 4Q08, it recorded a reduction of 30.4% due to lower activity in the period.

Allowance for doubtful accounts recorded a reduction in 1Q09 of 21.7% over 1Q08. The amount of R\$ 6.5 million represents 1.1% of the total gross revenue, a reduction of 0.5 percentile point, a 62.5% increase in comparison with the 4Q08, which is positively impacted by the corporate segment credit recovery for which provisions had been previously recorded and by the individual segment credit recovery due to the campaigns carried out for stimulating a bonus amount.

Reduction of 37.1% in general and administrative expenses in relation to 1Q08

General and administrative expenses decreased by 35.3% when compared to the 1Q08 due, mainly, to the reduction in consulting and other expenses with technical administrative services.
