Forward-Looking Statements

This Quarterly Report on Form 10-Q, other periodic reports filed by Regions Financial Corporation (Regions) under the Securities Exchange Act of 1934, as amended, and any other written or oral statements made by or on behalf of Regions may include forward-looking statements. The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements which are identified as such and are accompanied by the identification of important factors that could cause actual results to differ materially from the forward-looking statements. For these statements, we, together with our subsidiaries, claim the protection afforded by the safe harbor in the Act. Forward-looking statements are not based on historical information, but rather are related to future operations, strategies, financial results or other developments. Forward-looking statements are based on management's expectations as well as certain assumptions and estimates made by, and information available to, management at the time the statements are made. Those statements are based on general assumptions and are subject to various risks, uncertainties and other factors that may cause actual results to differ materially from the views, beliefs and projections expressed in such statements. These risks, uncertainties and other factors include, but are not limited to, those described below:

In October 2008 Congress enacted and the President signed into law the Emergency Economic Stabilization Act of 2008, and on February 17, 2009 the American Recovery and Reinvestment Act of 2009 was signed into law. Additionally, the U.S. Treasury Department and federal banking regulators are implementing a number of programs to address capital and liquidity issues in the banking system, and may announce additional programs in the future, all of which may have significant effects on Regions and the financial services industry, the exact nature and extent of which cannot be determined at this time.

The impact of compensation and other restrictions imposed under the Troubled Asset Relief Program (TARP) until Regions is able to repay the outstanding preferred stock issued under the TARP.

Possible additional loan losses, impairment of goodwill and other intangibles and valuation allowances on deferred tax assets and the impact on earnings and capital.

Possible changes in interest rates may affect funding costs and reduce earning asset yields, thus reducing margins.

Possible changes in general economic and business conditions in the United States in general and in the communities Regions serves in particular.

Possible changes in the creditworthiness of customers and the possible impairment of the collectability of loans.

Possible changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies, and similar organizations, including changes in accounting standards, may have an adverse effect on business.

The current stresses in the financial and real estate markets, including possible continued deterioration in property values.

Regions' ability to manage fluctuations in the value of assets and liabilities and off-balance sheet exposure so as to maintain sufficient capital and liquidity to support Regions' business.

Regions' ability to achieve the earnings expectations related to businesses that have been acquired or that may be acquired in the future.

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Regions' ability to expand into new markets and to maintain profit margins in the face of competitive pressures.

Regions' ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by Regions' customers and potential customers.

Regions' ability to keep pace with technological changes.

Table of Contents

Regions' ability to effectively manage credit risk, interest rate risk, market risk, operational risk, legal risk, liquidity risk, and regulatory and compliance risk.

The cost and other effects of material contingencies, including litigation contingencies.

The effects of increased competition from both banks and non-banks.

The effects of geopolitical instability and risks such as terrorist attacks.

Possible changes in consumer and business spending and saving habits could affect Regions' ability to increase assets and to attract deposits.

The effects of weather and natural disasters such as droughts and hurricanes.

The words believe, expect, anticipate, project, and similar expressions often signify forward-looking statements. You should not place undue reliance on any forward-looking statements, which speak only as of the date made. We assume no obligation to update or revise any forward-looking statements that are made from time to time.

See also Item 1A. Risk Factors of Regions' Annual Report on Form 10-K for the year ended December 31, 2008 and Quarterly Reports on Form 10-Q for the periods ended March 31, 2009 and June 30, 2009.

REGIONS FINANCIAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Three and Nine Months Ended September 30, 2009 and 2008

NOTE 1 Basis of Presentation

Regions Financial Corporation (Regions or the Company) provides a full range of banking and bank-related services to individual and corporate customers through its subsidiaries and branch offices located primarily in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. The Company is subject to competition from other financial institutions, is subject to the regulations of certain government agencies and undergoes periodic examinations by those regulatory authorities.

The accounting and reporting policies of Regions and the methods of applying those policies that materially affect the consolidated financial statements conform with accounting principles generally accepted in the United States (GAAP) and with general financial services industry practices. The accompanying interim financial statements have been prepared in accordance with the instructions for Form 10-Q and, therefore, do not include all information and notes to the consolidated financial statements necessary for a complete presentation of financial position, results of operations and cash flows in conformity with GAAP. In the opinion of management, all adjustments, consisting of only normal and recurring items, necessary for the fair presentation of the consolidated financial statements have been included. These interim financial statements should be read in conjunction with the consolidated financial statements and notes thereto in Regions Form 10-K for the year ended December 31, 2008.

Regions has evaluated all subsequent events for potential recognition and disclosure through November 3, 2009, the date of the filing of this Form 10-Q.

Certain amounts in prior period financial statements have been reclassified to conform to the current period presentation. These reclassifications are immaterial and have no effect on net income, total assets or stockholders equity.

Table of Contents**NOTE 2 Earnings (Loss) per Common Share**

The following table sets forth the computation of basic earnings (loss) per common share and diluted earnings (loss) per common share:

<i>(In millions, except per share amounts)</i>	Three Months Ended September 30		Nine Months Ended September 30	
	2009	2008	2009	2008
Numerator:				
Net income (loss) from continuing operations	\$ (377)	\$ 90	\$ (488)	\$ 633
Preferred stock dividends	(60)		(167)	
Net income (loss) from continuing operations available to common shareholders	(437)	90	(655)	633
Loss from discontinued operations, net of tax		(11)		(11)
Net income (loss) available to common shareholders	\$ (437)	\$ 79	\$ (655)	\$ 622
Denominator:				
Weighted-average common shares outstanding basic	1,189	696	921	696
Common stock equivalents				
Weighted-average common shares outstanding diluted	1,189	696	921	696
Earnings (loss) per share from continuing operations:				
Basic	\$ (0.37)	\$ 0.13	\$ (0.71)	\$ 0.91
Diluted	(0.37)	0.13	(0.71)	0.91
Earnings (loss) per share from discontinued operations:				
Basic		(0.02)		(0.02)
Diluted		(0.02)		(0.02)
Earnings (loss) per share:				
Basic	(0.37)	0.11	(0.71)	0.89
Diluted	(0.37)	0.11	(0.71)	0.89

The effect from the assumed issuance of 65 million common shares upon conversion of mandatorily convertible preferred stock issued in May 2009 for both the three and nine months ended September 30, 2009 was not included in the above computations of diluted earnings (loss) per common share because such amounts would have had an antidilutive effect on earnings (loss) per common share (see Note 3 for further discussion). The effect from the assumed exercise of 55 million stock options for both the three and nine months ended September 30, 2009 and 53 million stock options for both the three and nine months ended September 30, 2008, was not included in the above computations of diluted earnings (loss) per common share because such amounts would have had an antidilutive effect on earnings (loss) per common share.

NOTE 3 Stockholders Equity and Comprehensive Income

On November 14, 2008, Regions completed the sale of 3.5 million shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$1.00 and liquidation preference \$1,000.00 per share (and \$3.5 billion liquidation preference in the aggregate) to the U.S. Treasury as part of the Capital Purchase Program (CPP). Regions will pay the U.S. Treasury on a quarterly basis a 5% dividend, or \$175 million annually, for each of the first five years of the investment, and 9% thereafter unless Regions redeems the shares. Regions performed a discounted cash flow analysis to value the preferred stock at the date of issuance. For purposes of this analysis, Regions assumed that the preferred stock would most likely be redeemed five years from the valuation date based on optimal financial budgeting considerations. Regions used the Bloomberg USD US Bank BBB index to derive the market yield curve as of the valuation date to discount future expected cash flows to the valuation date. The discount rate used to value the preferred stock was 7.46%, based on this yield curve at a 5-year maturity. Dividends were assumed to be accrued until redemption. While the discounting was required

Table of Contents

based on a 5-year redemption, Regions did not have a 5-year security or similarly termed security available. As a result, it was necessary to use a benchmark yield curve to calculate the 5-year value. To determine the appropriate yield curve that was applicable to Regions, the yield to maturity on the outstanding debt instrument with the longest dated maturity (8.875% junior subordinated notes due June 2048) was compared to the longest point on the USD US Bank BBB index as of November 14, 2008. Regions concluded that the yield to maturity as of the valuation date of the debt, which was 11.03%, was consistent with the indicative yield of the curve noted above. The longest available point on this curve was 10.55% at 30 years.

As part of its purchase of the preferred securities, the U.S. Treasury also received a warrant to purchase 48.3 million shares of Regions' common stock at an exercise price of \$10.88 per share, subject to anti-dilution and other adjustments. The warrant expires ten years from the issuance date. Regions used the Cox-Ross-Rubinstein Binomial Option Pricing Model (CRR Model) to value the warrant at the date of issuance. The CRR Model is a standard option pricing model which incorporates optimal early exercise in order to receive the benefit of future dividend payments. Based on the transferability of the warrant, the CRR Model approach that was applied assumes that the warrant holder will not sub-optimally exercise its warrant. The following assumptions were used in the CRR Model:

Stock price(a)	\$ 9.67
Exercise price(b)	\$ 10.88
Expected volatility(c)	45.22%
Risk-free rate(d)	4.25%
Dividend yield(e)	3.88%
Warrant term (in years)(b)	10

- (a) Closing stock price of Regions as of the valuation date (November 14, 2008).
- (b) As outlined in the Warrant to Purchase Agreement, dated November 14, 2008.
- (c) Expected volatility based on Regions' historical volatility, as of November 14, 2008, over a look-back period of 10 years, commensurate with the terms of the warrant.
- (d) The risk-free rate represents the yield on 10-year U.S. Treasury Strips as of November 14, 2008.
- (e) The dividend yield assumption was calculated based on a weighting of 30% on management's dividend yield expectations for the next 3 years and a weighting of 70% on Regions' average dividend yield over the 10 years prior to the valuation date.

The fair value allocation of the \$3.5 billion between the preferred shares and the warrant resulted in \$3.304 billion allocated to the preferred shares and \$196 million allocated to the warrant. Accrued dividends on the preferred shares reduced retained earnings by \$23 million during 2008 and \$131 million during the first nine months of 2009. The unamortized discount on the preferred shares at December 31, 2008 was \$193 million and \$166 million at September 30, 2009. Discount accretion on the preferred shares reduced retained earnings by \$27 million during the first nine months of 2009. Both the preferred securities and the warrant will be accounted for as components of Regions' regulatory Tier 1 Capital.

On May 20, 2009 the Company issued 287,500 shares of mandatory convertible preferred stock, Series B (Series B shares), generating net proceeds of approximately \$278 million. Regions will pay annual dividends at a rate of 10% per share on the initial liquidation preference of \$1,000.00 per share. Series B shares may be converted into common shares: 1) at December 15, 2010 (the mandatory conversion date); 2) prior to December 15, 2010 at the option of the holder; 3) upon occurrence of certain changes in ownership as defined in the offering documents; or 4) prior to December 15, 2010 at the option of the Company. At the mandatory conversion date, the Series B shares are subject to conversion into shares of Regions' common stock with a per share conversion rate of not more than approximately 250 shares of common stock and not less than approximately 227 shares of common stock dependent upon the applicable market price, subject to anti-dilution adjustments. The Series B shares are not redeemable and rank senior to common stock and to each other class of capital stock established in the future, and on parity with the Series A preferred stock previously issued to the U.S. Treasury. If converted at September 30, 2009, approximately 65 million shares of Regions' common stock would have been issued.

Table of Contents

On May 20, 2009, the Company issued 460 million shares of common stock at \$4 per share, generating proceeds of \$1.8 billion, net of issuance costs.

In addition to the offerings mentioned above, the Company also exchanged approximately 33 million common shares for \$202 million of outstanding 6.625% trust preferred securities issued by Regions Financing Trust II (the Trust) in the second quarter of 2009. The trust preferred securities were exchanged for junior subordinated notes issued by the Company to the Trust. The Company recognized a pre-tax gain of approximately \$61 million on the extinguishment of the junior subordinated notes. The increase in shareholders' equity related to the debt for common share exchange was approximately \$135 million, net of issuance costs.

At September 30, 2009, Regions had 23.1 million common shares available for repurchase through open market transactions under an existing share repurchase authorization. There were no treasury stock purchases through open market transactions during the first nine months of 2009. The Company's ability to repurchase its common stock is limited by the terms of the CPP mentioned above.

The Board of Directors declared a \$0.01 cash dividend for the third quarter of 2009, compared to \$0.10 for the third quarter of 2008. Given the current operating environment, the quarterly cash dividend was reduced to further strengthen Regions' capital position. Regions does not expect to increase its quarterly dividend above \$0.01 for the foreseeable future.

Comprehensive income is the total of net income and all other non-owner changes in equity. Items that are to be recognized under accounting standards as components of comprehensive income are displayed in the consolidated statements of changes in stockholders' equity. In the calculation of comprehensive income, certain reclassification adjustments are made to avoid double-counting items that are displayed as part of net income for a period that also had been displayed as part of other comprehensive income in that period or earlier periods.

The following disclosure reflects the components of comprehensive income and any associated reclassification amounts:

<i>(In millions)</i>	Three Months Ended September 30, 2009		
	Before Tax	Tax Effect	Net of Tax
Net income (loss)	\$ (651)	\$ 274	\$ (377)

NOTE 4 Pension and Other Postretirement Benefits

Net periodic pension and other postretirement benefits cost included the following components as follows:

<i>(In millions)</i>	For The Three Months Ended September 30			
	Pension		Other Postretirement Benefits	
	2009	2008	2009	2008
Service cost	\$	\$ 10	\$	\$
Interest cost	22	22		1
Expected return on plan assets	(22)	(30)		
Amortization of prior service cost (credit)		1		
Amortization of actuarial loss	11			
Settlement charge	1			
	\$ 12	\$ 3	\$	\$ 1

<i>(In millions)</i>	For The Nine Months Ended September 30			
	Pension		Other Postretirement Benefits	
	2009	2008	2009	2008
Service cost	\$ 2	\$ 30	\$	\$
Interest cost	65	66	1	2
Expected return on plan assets	(66)	(89)		
Amortization of prior service cost (credit)	1	3	(1)	
Amortization of actuarial loss	33			
Settlement charge	1			
Curtailement gains		(4)		
	\$ 36	\$ 6	\$	\$ 2

The curtailment gains recognized during the first nine months of 2008 resulted from merger-related employment terminations.

Table of Contents

Beginning in March 2009, participant accruals of service in the Regions Financial Corporation Retirement Plan were temporarily suspended resulting in a reduction in service cost. Matching contributions in the 401(k) plan were temporarily suspended beginning in the second quarter of 2009.

NOTE 5 Share-Based Payments

Regions has long-term incentive compensation plans that permit the granting of incentive awards in the form of stock options, restricted stock awards and units, and stock appreciation rights. The terms of all awards issued under these plans are determined by the Compensation Committee of the Board of Directors, but no options may be granted after the tenth anniversary of the plans' adoption. Options and restricted stock usually vest based on employee service, generally within three years from the date of the grant. The contractual life of options granted under these plans ranges from seven to ten years from the date of grant. The number of remaining share equivalents authorized for future issuance under long-term compensation plans was approximately 6.9 million at September 30, 2009.

In 2009, Regions made a stock option grant that vests based upon a service condition and a market condition in addition to awards that were similar to prior grants. The fair value of these stock options was estimated on the date of the grant using a Monte-Carlo simulation method. The simulation generates a defined number of stock price paths in order to develop a reasonable estimate of the range of future expected stock prices and minimize standard error. For all other grants that vest solely upon a service condition, the fair value of stock options is estimated at the date of the grant using a Black-Scholes option pricing model and related assumptions.

The following table summarizes the weighted-average assumptions used and the estimated fair values related to stock options granted during the nine months ended September 30:

	September 30	
	2009	2008
Expected dividend yield	1.85%	6.87%
Expected volatility	67.15%	26.40%
Risk-free interest rate	2.80%	2.91%
Expected option life	6.8 yrs.	5.8 yrs.
Fair value	\$ 1.78	\$ 2.47

During 2009, the expected dividend yield decreased based upon the market's expectation of reduced dividends in the near term. The expected volatility increased based upon increases in the historical volatility of Regions' stock price and the implied volatility measurements from traded options on the Company's stock. The expected option life increased due to changes in the employee grant base and employee exercise behavior.

The following table details the activity during the first nine months of 2009 and 2008 related to stock options:

	For the Nine Months Ended September 30			
	2009		2008	
	Number of Options	Wtd. Avg. Exercise Price	Number of Options	Wtd. Avg. Exercise Price
Outstanding at beginning of period	52,955,298	\$ 28.22	48,044,207	\$ 29.71
Granted	4,063,209	3.29	9,872,751	21.66
Exercised			(90,801)	17.94
Forfeited or cancelled	(2,335,717)	30.38	(4,517,950)	29.28
Outstanding at end of period	54,682,790	\$ 26.29	53,308,207	\$ 28.27
Exercisable at end of period	43,875,821	\$ 28.76	41,375,142	\$ 29.33

Table of Contents

In 2009, Regions granted 2.9 million restricted shares that vest based upon a service condition and a market condition in addition to awards that were similar to prior grants. The fair value of these restricted shares was estimated on the date of the grant using a Monte-Carlo simulation method. The assumptions related to this grant included expected volatility of 84.81%, expected dividend yield of 1.00%, and an expected term of 4.0 years based on the vesting term of the market condition. The risk-free rate is consistent with the assumption used to value stock options. For all other grants that vest solely upon a service condition, the fair value of the awards is estimated based upon the fair value of the underlying shares on the date of the grant.

The following table details the activity during the first nine months of 2009 and 2008 related to restricted share awards and units:

	For the Nine Months Ended September 30 2009		For the Nine Months Ended September 30 2008	
	Shares	Wtd. Avg. Grant Date Fair Value	Shares	Wtd. Avg. Grant Date Fair Value
Non-vested at beginning of period	4,123,911	\$ 27.67	3,651,054	\$ 32.60
Granted	3,100,415	2.87	1,657,573	21.28
Vested	(787,349)	16.02	(514,516)	33.41
Forfeited	(281,524)	21.69	(383,815)	31.22
Non-vested at end of period	6,155,453	\$ 16.94	4,410,296	\$ 28.37

NOTE 6 Securities

The amortized cost, gross unrealized gains and losses, and estimated fair value of securities available for sale and securities held to maturity are as follows:

	\$ 47	\$ 1	\$ (1)	\$ 47

Regions evaluates securities in a loss position for other-than-temporary impairment, considering such factors as the length of time and the extent to which the market value has been below cost, the credit standing of the issuer, Regions' intent to hold the security and the likelihood that the Company will hold the security until its market value recovers. Activity related to the credit loss component of other-than-temporary impairment is recognized in earnings. For debt securities, the portion of other-than-temporary impairment related to all other factors is recognized in other comprehensive income. For the three months ended September 30, 2009, activity related to credit losses for only debt securities where a portion of the other-than-temporary impairment was recognized in other comprehensive income is as follows:

<i>(In millions)</i>	Total
Balance, July 1, 2009	\$ 45
Additions for the credit loss component of other-than-temporary impairments of debt securities recognized in earnings where a portion of the impairment was charged to other comprehensive income	2
Balance, September 30, 2009	\$ 47

Table of Contents

The following table provides details of other-than-temporary impairment charges for the three months and nine months ended September 30, 2009:

	September 30, 2009	
	Three months ended	Nine months ended
	<i>(In millions)</i>	
Non-agency residential mortgage-backed securities		
Gross charges(1)	\$ 2	\$ 238
Non-credit charges to other comprehensive income		(191)
Other-than-temporary impairment, net(2)	2	47
Municipal securities, gross charges(3)	1	16
Equity securities, gross charges(3)		12
Total gross charges(1)	\$ 3	\$ 266
Total other-than-temporary impairment, net(2)	\$ 3	\$ 75

(1) Includes credit portion reported in earnings and non-credit portion reported in other comprehensive income.

(2) Net other-than-temporary impairment reported in earnings.

(3) All impairment for these securities is credit-related; therefore, gross charges equals the net amount reported in earnings.

As of September 30, 2009, non-agency residential mortgage backed securities with other-than-temporary impairment consisted of 30 securities in which credit-related losses totaled approximately \$47 million. This includes credit-related losses of approximately \$2 million on 11 securities for which credit losses were recorded during the second quarter and were further impaired in the third quarter, and one security on which no previous credit-related losses had been recorded. Gross other-than-temporary impairments related to these securities totaled \$2 million and \$238 million for the third quarter and nine months ended September 30, 2009, respectively. The remaining non-credit portion of \$191 million is recognized in other comprehensive income, unchanged from the prior quarter. The Company estimates the amount of losses attributable to credit using a third-party discounted cash flow model that compiles relevant details on borrower and collateral performance on a security-by-security basis. Assumptions including delinquencies, default rates, credit subordination support, prepayment rates, and loss severity based on the underlying collateral characteristics and year of origination are considered to estimate the future cash flows. Assumptions used can vary widely from loan to loan, and are influenced by such factors as interest rates, geography, borrower specific data and underlying collateral. Expected future cash flows are then calculated using a discount rate that management believes a market participant would consider in determining the fair value. Based on the results of the estimated future cash flows, the Company determines the amount of estimated losses related to credit and the remaining unrealized loss for which recovery is expected. Significant weighted-average assumptions specific to non-agency residential mortgage-backed securities with identified expected future credit losses as of September 30, 2009 include a 22.9% collateral default rate projection, 9.2% credit subordination support and 14.2% delinquency rate.

During the third quarter and first nine months of 2009, Regions recognized net other-than-temporary impairments of \$3 million and \$75 million, respectively, related primarily to non-agency residential mortgage-backed securities, equity securities and a single municipal issuer. For all other securities included in the tables below, management does not believe any individual unrealized loss, which was comprised of 188 securities and 1,065 securities at September 30, 2009 and December 31, 2008, respectively, represented an other-than-temporary impairment as of those dates. The unrealized losses related primarily to the impact of lower interest rates and widening of credit and liquidity spreads related to U.S. Treasury securities and mortgage-backed securities.

Table of Contents

The following tables present unrealized loss and estimated fair value of securities available for sale at September 30, 2009 and December 31, 2008. The tables include debt securities where a portion of other-than-temporary impairments have been recognized in other comprehensive income (loss). These securities are segregated between investments that have been in a continuous unrealized loss position for less than twelve months and twelve months or more.

September 30, 2009	Less Than Twelve Months		Twelve Months or More		Total	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses
Federal agency securities	\$	\$	\$ 1	\$	\$ 1	\$
Residential mortgage-backed securities						
Agency	785	(7)	4		789	(7)
Non-Agency	68	(2)	830	(160)	898	(162)
All other securities			8	(3)	8	(3)
	\$ 853	\$ (9)	\$ 843	\$ (163)	\$ 1,696	\$ (172)

December 31, 2008	Less Than Twelve Months		Twelve Months or More		Total	
	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses	Estimated Fair Value	Gross Unrealized Losses
Federal agency securities	\$ 3	\$	\$ 1	\$	\$ 4	\$
Residential mortgage-backed securities						
Agency	370	(2)	212	(1)	582	(3)
Non-Agency	1,040	(345)	132	(49)	1,172	(394)
Commercial mortgage-backed securities	420	(75)	316	(67)	736	(142)

	\$ 2,037	\$ (443)	\$ 799	\$ (121)	\$ 2,836	\$ (564)

The gross unrealized loss on debt securities held to maturity was \$1 million at September 30, 2009 and December 31, 2008, with all loss positions in a continuous loss position of less than twelve months.

Table of Contents

The cost and estimated fair value of securities available for sale and securities held to maturity at September 30, 2009, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

<i>(In millions)</i>	Cost	Estimated Fair Value
Securities available for sale:		
Due in one year or less	\$ 24	\$ 23
Due after one year through five years	199	207
Due after five years through ten years	101	105
Due after ten years	80	94
Residential mortgage-backed securities		
Agency	17,850	18,388
Non-Agency	1,226	1,070
Equity securities	1,135	1,143
	\$ 20,615	\$ 21,030
Securities held to maturity:		
Due in one year or less	\$ 7	\$ 7
Due after one year through five years	11	12
Due after five years through ten years	4	4
Due after ten years		
Residential mortgage-backed securities		
Agency	17	16
	\$ 39	\$ 39

Proceeds from sales of securities available for sale in the first nine months of 2009 were \$3.7 billion, with gross realized gains and losses of \$169 million and \$4 million, respectively. The cost of securities sold is based on the specific identification method.

Equity securities included \$426 million and \$475 million of amortized cost related to Federal Reserve Bank stock and Federal Home Loan Bank (FHLB) stock as of September 30, 2009, respectively, whose estimated fair value approximates its carrying amount.

Securities with carrying values of \$13.0 billion at September 30, 2009, were pledged to secure public funds, trust deposits and certain borrowing arrangements.

Trading account net gains totaled \$27 million and \$50 million for the three and nine months ended September 30, 2009, respectively (including \$12 million of net unrealized gains as of September 30, 2009). Trading account net gains totaled \$12 million for the three months ended September 30, 2008, and net gains totaled \$10 million for the nine months ended September 30, 2008 (including \$3 million of net unrealized losses as of September 30, 2008).

NOTE 7 Business Segment Information

Regions segment information is presented based on Regions key segments of business. Each segment is a strategic business unit that serves specific needs of Regions customers. The Company's primary segment is General Banking/Treasury, which represents the Company's branch network, including consumer and commercial banking functions, and has separate management that is responsible for the operation of that business unit. This segment also includes the Company's Treasury function, including the Company's securities portfolio and other wholesale funding activities. Prior to year-end 2008, Regions had reported an Other segment that

Table of Contents

included merger charges and the parent company. Regions realigned to include the parent company with General Banking/Treasury as parent company transactions essentially support the Treasury function. The 2008 amounts presented below have been adjusted to conform to the 2009 presentation.

In addition to General Banking/Treasury, Regions has designated as distinct reportable segments the activity of its Investment Banking/Brokerage/Trust and Insurance divisions. Investment Banking/Brokerage/Trust includes trust activities and all brokerage and investment activities associated with Morgan Keegan. Insurance includes all business associated with commercial insurance and credit life products sold to consumer customers.

The reportable segment designated Merger Charges and Discontinued Operations includes merger charges related to the AmSouth acquisition and the results of EquiFirst (see Note 13) for the periods presented. These amounts are excluded from other reportable segments because management reviews the results of the other reportable segments excluding these items.

The following tables present financial information for each reportable segment for the period indicated.

<i>(In millions)</i>	General Banking/ Treasury	Investment Banking/ Brokerage/ Trust	Insurance	Merger Charges and Discontinued Operations	Total Company

NOTE 8 Goodwill

Goodwill allocated to each reportable segment as of September 30, 2009, December 31, 2008, and September 30, 2008 is presented as follows:

<i>(In millions)</i>	September 30 2009	December 31 2008	September 30 2008
General Banking/Treasury	\$ 4,691	\$ 4,691	\$ 10,682
Investment Banking/Brokerage/Trust	745	740	733
Insurance	121	117	114
Balance at end of period	\$ 5,557	\$ 5,548	\$ 11,529

The Company's goodwill is tested for impairment on an annual basis, or more often if events or circumstances indicate that there may be impairment. Adverse changes in the economic environment, declining operations, or other factors could result in a decline in the implied fair value of goodwill. A goodwill impairment test includes two steps. Step One, used to identify potential impairment, compares the estimated fair value of a reporting unit with its carrying amount, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not to be impaired. If the carrying amount of a reporting unit exceeds its estimated fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. Step Two of the goodwill impairment test compares the implied estimated fair value of reporting unit goodwill with the carrying amount of that goodwill. In order to determine the implied estimated fair value, a full purchase price allocation is required to be performed in the same manner as if a business combination had occurred. If the carrying amount of goodwill for that reporting unit exceeds the implied fair value of that unit's goodwill, an impairment loss is recognized in an amount equal to that excess.

Table of Contents

During the third quarter of 2009, Regions assessed the indicators of goodwill impairment as of August 31, 2009, and through the date of the filing of our Quarterly Report on Form 10-Q for the quarter ended September 30, 2009. The indicators assessed included:

Recent operating performance,

Changes in market capitalization,

Regulatory actions and assessments,

Changes in the business climate (including legal factors and competition),

Company-specific factors (including changes in key personnel, asset impairments, and business dispositions), and

Trends in the banking industry.

Based on the assessment of the indicators above, quantitative testing of goodwill was required for the General Banking/Treasury and Investment Banking/ Brokerage/Trust reporting units for the September 30, 2009 interim period. The Insurance reporting unit did not require quantitative testing of goodwill as there were no significant changes or indicators that would more likely than not reduce the fair value of the reporting unit below its carrying value since the date of the last quantitative test as of June 30, 2009.

For purposes of performing Step One of the goodwill impairment test, Regions uses both the income and market approaches to value its reporting units. The income approach, which is the primary valuation approach, consists of discounting projected long-term future cash flows, which are derived from internal forecasts and economic expectations for the respective reporting units. The projected future cash flows are discounted using cost of capital metrics for Regions' peer group or a build-up approach (such as the capital asset pricing model) applicable to each reporting unit. The significant inputs to the income approach include expected future cash flows, which are primarily driven by the long-term target tangible equity to tangible assets ratio, and the discount rate, which is determined in the build-up approach using the risk-free rate of return, adjusted equity beta, equity risk premium, and a company-specific risk factor. The company-specific risk factor is used to address the uncertainty of growth estimates and earnings projections of management.

Regions uses the public company method and the transaction method as the two market approaches. The public company method applies a value multiplier derived from each reporting unit's peer group to a financial metric of the reporting unit (e.g. last twelve months of earnings before interest, taxes and depreciation, tangible book value, etc.) and an implied control premium to the respective reporting unit. The control premium is evaluated and compared to similar financial services transactions. The transaction method applies a value multiplier to a financial metric of the reporting unit based on comparable observed purchase transactions in the financial services industry for the reporting unit (where available).

Regions uses the output from these approaches to determine the estimated fair value of each reporting unit. Below is a table of assumptions used in estimating the fair value of each reporting unit at September 30, 2009. The table includes the discount rate used in the income approach, the market multiplier used in the market approaches, and the public company method control premium applied to all reporting units.

As of September 30, 2009	General Banking/ Treasury	Investment Banking/ Brokerage/ Trust
Discount rate used in income approach	18%	14%
Public company method market multiplier(a)	0.8x	1.8x
Public company method control premium	30%	30%

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Transaction method market multiplier(a)

0.9x

2.2x

- (a) For the General Bank/Treasury and Investment Banking/Brokerage/Trust reporting units, these multipliers are applied to tangible book value.

Table of Contents

The Step One analysis performed for the Investment Banking/Brokerage/Trust reporting unit during the third quarter of 2009 indicated that the estimated fair value exceeded its carrying value (including goodwill). Therefore, a Step Two analysis was not required for this reporting unit.

The Step One analysis performed for the General Banking/Treasury reporting unit during the third quarter of 2009 indicated that the carrying value (including goodwill) of the reporting unit exceeded its estimated fair value. Therefore, Step Two was performed for the General Banking/Treasury reporting unit as discussed below.

For purposes of performing Step Two of the goodwill impairment test, Regions compared the implied estimated fair value of the General Banking/Treasury reporting unit goodwill with the carrying amount of that goodwill. In order to determine the implied estimated fair value, a full purchase price allocation was performed in the same manner as if a business combination had occurred. As part of the Step Two analysis, Regions estimated the fair value of all of the assets and liabilities of the reporting unit, including unrecognized assets and liabilities. The fair values of certain material financial assets and liabilities and the valuation methodologies are discussed in Note 11, Fair Value Measurements. Based on the results of the Step Two analysis performed, Regions concluded the General Banking/Treasury reporting unit's goodwill was not impaired as of September 30, 2009.

NOTE 9 Loan Servicing

Effective January 1, 2009, the Company made an election to prospectively change the policy for accounting for residential mortgage servicing rights from the amortization method to the fair value measurement method. Under the fair value measurement method, servicing assets are measured at fair value each period with changes in fair value recorded as a component of mortgage banking income.

The fair value of mortgage servicing rights is calculated using various assumptions including future cash flows, market discount rates, expected prepayment rates, servicing costs and other factors. A significant change in prepayments of mortgages in the servicing portfolio could result in significant changes in the valuation adjustments, thus creating potential volatility in the carrying amount of mortgage servicing rights. Regions uses various derivative instruments to mitigate the effect of changes in the fair value of its mortgage servicing rights in the statement of operations. During the three months ended September 30, 2009 and the first nine months of 2009, Regions recognized a net \$19.1 million gain and a net \$16.3 million gain, respectively, associated with changes in mortgage servicing rights and the aforementioned derivatives, which is included in mortgage income. Additionally, during the third quarter of 2009, Regions adopted an option-adjusted spread (OAS) valuation approach. The OAS represents the additional spread over the swap rate that is required in order for the asset's discounted cash flows to equal its market price. This change to OAS valuation did not materially impact the fair value of the mortgage servicing rights. An analysis of the OAS and its sensitivity to rate fluctuations is presented below.

The tables below present analyses of mortgage servicing rights:

<i>(In millions)</i>	Three Months Ended September 30, 2009	Nine Months Ended September 30, 2009
Carrying value, beginning of period	\$ 202	\$ 161
Additions	31	83
Increase (decrease) in fair value:		
Due to change in valuation inputs or assumptions	(11)	(2)
Other changes(1)	(6)	(26)
Carrying value, end of period	\$ 216	\$ 216

(1) Represents economic amortization associated with borrower repayments.

Table of Contents

Data and assumptions used in the fair value calculation related to residential mortgage servicing rights (excluding related derivative instruments) as of September 30, 2009 are as follows (dollars in millions):

Unpaid principal balance	\$ 23,951
Weighted-average prepayment speed (CPR)	20.36
Estimated impact on fair value of a 10% increase	\$ (13)
Estimated impact on fair value of a 20% increase	\$ (25)
Option-adjusted spread (basis points)	633
Estimated impact on fair value of a 10% increase	\$ (4)
Estimated impact on fair value of a 20% increase	\$ (8)
Weighted-average coupon interest rate	5.81%
Weighted-average remaining maturity (months)	285
Weighted-average servicing fee (basis points)	28.8

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. Changes in fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of an adverse variation in a particular assumption on the fair value of the mortgage servicing rights is calculated without changing any other assumption, while in reality changes in one factor may result in changes in another which may either magnify or counteract the effect of the change. The derivative instruments utilized by Regions would serve to reduce the estimated impacts to fair value included in the table above.

NOTE 10 Derivative Financial Instruments and Hedging Activities

Regions enters into derivative financial instruments to manage interest rate risk, facilitate asset/liability management strategies and manage other exposures. These derivative instruments primarily include interest rate swaps, options on interest rate swaps, interest rate caps and floors, Eurodollar futures, forward rate contracts and forward sale commitments. All derivative financial instruments are recognized on the consolidated balance sheets as other assets or other liabilities at fair value. Regions enters into master netting agreements with counterparties and/or requires collateral based on counterparty credit ratings to cover exposures.

Interest rate swaps are agreements to exchange interest payments based upon notional amounts. Interest rate swaps subject Regions to market risk associated with changes in interest rates, as well as the credit risk that the counterparty will fail to perform. Option contracts involve rights to buy or sell financial instruments on a specified date or over a period at a specified price. These rights do not have to be exercised. Some option contracts such as interest rate floors, involve the exchange of cash based on changes in specified indices. Interest rate floors are contracts to hedge interest rate declines based on a notional amount. Interest rate floors subject Regions to market risk associated with changes in interest rates, as well as the credit risk that the counterparty will fail to perform. Forward rate contracts are commitments to buy or sell financial instruments at a future date at a specified price or yield. Regions primarily enters into forward rate contracts on market instruments, which expose Regions to market risk associated with changes in the value of the underlying financial instrument, as well as the credit risk that the counterparty will fail to perform. Eurodollar futures are futures contracts on Eurodollar deposits. Eurodollar futures subject Regions to market risk associated with changes in interest rates. Because futures contracts are cash settled daily, there is minimal credit risk associated with Eurodollar futures.

Table of Contents

The following table presents the fair value of derivative instruments on a gross basis as of September 30, 2009:

<i>(In millions)</i>	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments				
Interest rate swaps	Other assets	\$ 441	Other liabilities	\$
Interest rate options	Other assets	62	Other liabilities	
Eurodollar futures(1)	Other assets		Other liabilities	
Total derivatives designated as hedging instruments		\$ 503		\$
Derivatives not designated as hedging instruments				
Interest rate swaps	Other assets	\$ 1,722	Other liabilities	\$ 1,678
Interest rate options	Other assets	33	Other liabilities	34
Interest rate futures and forward commitments	Other assets	12	Other liabilities	16
Other contracts	Other assets	31	Other liabilities	31
Total derivatives not designated as hedging instruments		\$ 1,798		\$ 1,759
Total derivatives		\$ 2,301		\$ 1,759

(1) Changes in fair value are cash-settled daily.

HEDGING DERIVATIVES

Derivatives entered into to manage interest rate risk and facilitate asset/liability management strategies are designated as hedging derivatives. Derivative financial instruments that qualify in a hedging relationship are classified, based on the exposure being hedged, as either fair value or cash flow hedges. The Company formally documents all hedging relationships between hedging instruments and the hedged items, as well as its risk management objective and strategy for entering into various hedge transactions. The Company performs periodic assessments to determine whether the hedging relationship has been highly effective in offsetting changes in fair values or cash flows of hedged items and whether the relationship is expected to continue to be highly effective in the future.

When a hedge is terminated or hedge accounting is discontinued because the hedged item no longer meets the definition of a firm commitment, or because it is probable that the forecasted transaction will not occur by the end of the specified time period, the derivative will continue to be recorded in the consolidated balance sheets at its fair value, with changes in fair value recognized currently in other non-interest income. Any asset or liability that was recorded pursuant to recognition of the firm commitment is removed from the consolidated balance sheets and recognized currently in other non-interest expense. Gains and losses that were accumulated in other comprehensive income pursuant to the hedge of a forecasted transaction are recognized immediately in other non-interest expense.

Table of Contents

The following table presents the effect of derivative instruments on the statement of operations for the three months ended September 30, 2009:

Derivatives in Fair Value Hedging Relationships	Location of Gain (Loss) Recognized in Income on Derivatives	Amount of Gain (Loss) Recognized in Income on Derivatives <i>(In millions)</i>	Hedged Items in Fair Value Hedge Relationships	Location of Gain (Loss) Recognized in Income on Related Hedged Item	Amount of Gain (Loss) Recognized in Income on Related Hedged Item

FAIR VALUE HEDGES

Fair value hedge relationships mitigate exposure to the change in fair value of an asset, liability or firm commitment. Under the fair value hedging model, gains or losses attributable to the change in fair value of the derivative instrument, as well as the gains and losses attributable to the change in fair value of the hedged item, are recognized in earnings in the period in which the change in fair value occurs. The corresponding adjustment to the hedged asset or liability is included in the basis of the hedged item, while the corresponding change in the fair value of the derivative instrument is recorded as an adjustment to other assets or other liabilities, as applicable. Hedge ineffectiveness exists to the extent the changes in fair value of the derivative do not offset the changes in fair value of the hedged item as other non-interest expense.

Regions enters into interest rate swap agreements to manage interest rate exposure on the Company's fixed-rate borrowings, which includes long-term debt and certificates of deposit. These agreements involve the receipt of fixed-rate amounts in exchange for floating-rate interest payments over the life of the agreements. As of September 30, 2009, the total notional amount of the Company's interest rate swaps designated in fair value hedges was \$6.1 billion.

CASH FLOW HEDGES

Cash flow hedge relationships mitigate exposure to the variability of future cash flows or other forecasted transactions. For cash flow hedge relationships, the effective portion of the gain or loss related to the derivative instrument is recognized as a component of other comprehensive income. Ineffectiveness is measured by comparing the change in fair value of the respective derivative instrument and the change in fair value of a perfectly effective hypothetical derivative instrument. Ineffectiveness will be recognized in earnings only if it results from an overhedge. The ineffective portion of the gain or loss related to the derivative instrument, if any, is recognized in earnings as other non-interest expense during the period of change. Amounts recorded in other comprehensive income are recognized in earnings in the period or periods during which the hedged item impacts earnings.

Regions enters into interest rate swap agreements to manage overall cash flow changes related to interest rate risk exposure on LIBOR-based loans. The agreements effectively modify the Company's exposure to interest rate risk by utilizing receive fixed/pay LIBOR interest rate swaps. As of September 30, 2009, the total notional amount of the Company's interest rate swaps hedging cash flows on LIBOR loans was \$4.3 billion.

Table of Contents

Regions issues long-term fixed-rate debt for various funding needs. Regions enters into receive LIBOR/pay-fixed forward starting swaps to hedge risks of changes in the projected quarterly interest payments attributable to changes in the benchmark interest rate (LIBOR) during the time leading up to the probable issuance date of the new long term fixed-rate debt. As of September 30, 2009, the total notional amount of the Company's forward-starting swaps was \$1.0 billion.

Regions enters into interest rate option contracts to protect cash flows through the maturity date of the hedging instrument on the designated one-month LIBOR floating-rate loans from adverse extreme market interest rate changes. As of September 30, 2009, the total notional amount of the Company's interest rate options was \$2.0 billion.

Regions purchases Eurodollar futures to hedge the variability in future cash flows based on forecasted resets of one-month LIBOR-based floating rate loans due to changes in the benchmark interest rate. As of September 30, 2009, the total notional amount of the Company's Eurodollar futures was \$40.2 billion.

Regions entered into interest rate swap agreements to manage overall cash flow changes related to interest rate risk exposure on prime-based loans. The agreements effectively modified the Company's exposure to interest rate risk by utilizing receive fixed/pay prime interest rate swaps. During the quarter ended September 30, 2009, Regions terminated its hedges on prime-based loans.

Regions realized an after-tax benefit of \$18.8 million in accumulated other comprehensive income at September 30, 2009, related to terminated cash flow hedges of loan and debt instruments which will be amortized into earnings in conjunction with the recognition of interest payments through 2012. Regions recognized pre-tax income of \$30.9 million during the first nine months of 2009 related to this amortization.

Regions expects to reclassify out of other comprehensive income and into earnings approximately \$182.7 million in pre-tax income due to the receipt of interest payments on all cash flow hedges within the next twelve months. Of this amount, \$26.9 million relates to the amortization of discontinued cash flow hedges. The maximum length of time over which Regions is hedging its exposure to the variability in future cash flows for forecasted transactions is approximately two years as of September 30, 2009.

TRADING DERIVATIVES

Derivative contracts that do not qualify for hedge accounting are classified as trading with gains and losses related to the change in fair value recognized in earnings during the period.

The Company maintains a derivatives trading portfolio of interest rate swaps, option contracts, and futures and forward commitments used to meet the needs of its customers. The portfolio is used to generate trading profit and to help clients manage market risk. The Company is subject to the credit risk that a counterparty will fail to perform. The Company is also subject to market risk, which is monitored by the asset/liability management function and evaluated by the Company. Separate derivative contracts are entered into to reduce overall market exposure to pre-defined limits. The contracts in this portfolio do not qualify for hedge accounting and are marked-to-market through earnings and included in other assets and other liabilities. As of September 30, 2009, the total absolute notional amount of the Company's derivatives trading portfolio was \$65.8 billion.

In the normal course of business, Morgan Keegan enters into underwriting and forward and future commitments on U.S. Government and municipal securities. As of September 30, 2009, the contractual amounts of forward and future commitments was approximately \$12.5 million. The brokerage subsidiary typically settles its position by entering into equal but opposite contracts and, as such, the contract amounts do not necessarily represent future cash requirements. Settlement of the transactions relating to such commitments is not expected to have a material effect on the subsidiary's financial position. Transactions involving future settlement give rise to market risk, which represents the potential loss that can be caused by a change in the market value of a

Table of Contents

particular financial instrument. The exposure to market risk is determined by a number of factors, including size, composition and diversification of positions held, the absolute and relative levels of interest rates, and market volatility.

Regions enters into interest rate lock commitments, which are commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding and the customers have locked into that interest rate. Fair value is based on fees currently charged to enter into similar agreements and, for fixed-rate commitments, considers the difference between current levels of interest rates and the committed rates. At September 30, 2009, Regions had \$668.9 million in notional amounts of rate lock commitments. Regions manages market risk on interest rate lock commitments and mortgage loans held for sale with corresponding forward sale commitments, which are recorded at fair value with changes in fair value recorded in mortgage income. At September 30, 2009, Regions had \$1.3 billion in absolute notional amounts related to these forward rate commitments.

On January 1, 2009, Regions made an election to account for mortgage servicing rights at fair market value with any changes to fair value being recorded within mortgage income. Concurrent with the election to use the fair value measurement method, Regions began using various derivative instruments, in the form of forward rate commitments and futures contracts, to mitigate the income statement effect of changes in the fair value of its mortgage servicing rights. As of September 30, 2009, the total notional amount related to these forward rate commitments and futures contracts was \$1.8 billion.

The following table presents information for derivatives not designated as hedging instruments in the statement of operations for the three months ended September 30, 2009:

Derivatives Not Designated as Hedging	Location of Gain (Loss) Recognized in Income on Derivatives	Amount of Gain (Loss) Recognized in Income on Derivatives (In millions)
Instruments		
Interest rate swaps	Brokerage income	\$ (11)
Interest rate options	Brokerage income	
Interest rate options	Mortgage income	5
Interest rate futures and forward commitments	Brokerage income	
Interest rate futures and forward commitments	Mortgage income	13
Other contracts	Brokerage income	
		\$ 7

The following table presents information for derivatives not designated as hedging instruments in the statement of operations for the nine months ended September 30, 2009:

Derivatives Not Designated as Hedging	Location of Gain (Loss) Recognized in Income on Derivatives	Amount of Gain (Loss) Recognized in Income on Derivatives (In millions)

Interest rate futures and forward commitments	Mortgage income	41
Other contracts	Brokerage income	1
		\$ 28

Credit risk, defined as all positive exposures not collateralized with cash or other assets, at September 30, 2009, totaled approximately \$1.2 billion. This amount represents the net credit risk on all trading and other derivative positions held by Regions.

Table of Contents

CREDIT DERIVATIVES

Regions has both bought and sold credit protection in the form of participations on interest rate swaps (swap participations). These swap participations, which meet the definition of credit derivatives, were entered into in the ordinary course of business to serve the credit needs of customers. Credit derivatives, whereby Regions has purchased credit protection, entitle Regions to receive a payment from the counterparty when the customer fails to make payment on any amounts due to Regions upon early termination of the swap transaction and have maturities between 2012 and 2026. Credit derivatives whereby Regions has sold credit protection have maturities between 2009 and 2015. For contracts where Regions sold credit protection, Regions would be required to make payment to the counterparty when the customer fails to make payment on any amounts due to the counterparty upon early termination of the swap transaction. Regions bases the current status of the prepayment/performance risk on bought and sold credit derivatives on recently issued internal risk ratings consistent with the risk management practices of unfunded commitments.

Regions' maximum potential amount of future payments under these contracts is approximately \$55.1 million. This scenario would only occur if variable interest rates were at zero percent and all counterparties defaulted with zero recovery. The fair value of sold protection at September 30, 2009, was immaterial. In transactions where Regions has sold credit protection, recourse to collateral associated with the original swap transaction is available to offset some or all of Regions' obligation.

CONTINGENT FEATURES

Certain Regions' derivative instruments contain provisions that require Regions' debt to maintain an investment grade credit rating from each of the major credit rating agencies. If Regions' debt were to fall below investment grade, it would be in violation of these provisions, and the counterparties to the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position on September 30, 2009, was \$436.0 million, for which Regions had posted collateral of \$403.4 million in the normal course of business. If the credit-risk-related contingent features underlying these agreements were triggered on September 30, 2009, Regions would be required to post an additional \$32.6 million of collateral to its counterparties.

NOTE 11 Fair Value Measurements

Fair value guidance establishes a framework for using fair value to measure assets and liabilities and defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) as opposed to the price that would be paid to acquire the asset or received to assume the liability (an entry price). A fair value measure should reflect the assumptions that market participants would use in pricing the asset or liability, including the assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset and the risk of nonperformance. Required disclosures include stratification of balance sheet amounts measured at fair value based on inputs the Company uses to derive fair value measurements. These strata include:

Level 1 valuations, where the valuation is based on quoted market prices for identical assets or liabilities traded in active markets (which include exchanges and over-the-counter markets with sufficient volume),

Level 2 valuations, where the valuation is based on quoted market prices for similar instruments traded in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market, and

Level 3 valuations, where the valuation is generated from model-based techniques that use significant assumptions not observable in the market, but observable based on Company-specific data. These

Table of Contents

unobservable assumptions reflect the Company's own estimates for assumptions that market participants would use in pricing the asset or liability. Valuation techniques typically include option pricing models, discounted cash flow models and similar techniques, but may also include the use of market prices of assets or liabilities that are not directly comparable to the subject asset or liability.

ITEMS MEASURED AT FAIR VALUE ON A RECURRING BASIS

Trading account assets (net of certain short-term borrowings), securities available for sale, mortgage loans held for sale, and derivatives were recorded at fair value on a recurring basis during 2009 and 2008. Mortgage servicing rights were recorded at fair value on a recurring basis only during 2009 (see Note 9).

The following tables present financial assets and liabilities measured at fair value on a recurring basis as of September 30, 2009 and 2008, respectively:

September 30, 2009	Level 1	Level 2	Level 3	Fair Value
	<i>(In millions)</i>			
Trading account assets, net	\$ 321	\$ 471	\$ 189	\$ 981
Securities available for sale	256	20,687	87	21,030
Mortgage loans held for sale		726		726
Mortgage servicing rights			216	216
Derivatives, net(1)		649	12	661

- (1) Derivatives include approximately \$1.1 billion related to legally enforceable master netting agreements that allow the Company to settle positive and negative positions. Derivative assets and liabilities are also presented excluding cash collateral received of \$101 million and cash collateral posted of \$403 million with counterparties.

September 30, 2008	Level 1	Level 2	Level 3	Fair Value
	<i>(In millions)</i>			
Trading account assets, net	\$ (115)	\$ 336	\$ 246	\$ 467
Securities available for sale	2,686	14,854	93	17,633
Mortgage loans held for sale		495		495
Derivatives, net(1)		383	17	400

- (1) Derivatives include approximately \$1.0 billion related to legally enforceable master netting agreements that allow the Company to settle positive and negative positions. Derivative assets and liabilities are also presented excluding cash collateral received of \$85 million and cash collateral posted of \$111 million with counterparties.

Assets and liabilities in all levels could result in volatile and material price fluctuations. Realized and unrealized gains and losses on Level 3 assets represent only a portion of the risk to market fluctuations in Regions' consolidated balance sheets. Further, net trading account assets and net derivatives included in Levels 1, 2 and 3 are used by the Asset and Liability Management Committee of the Company in a holistic approach to managing price fluctuation risks.

Table of Contents

The following tables illustrate a rollforward for all assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and nine months ended September 30, 2009 and 2008, respectively. The tables do not reflect the change in fair value attributable to any related economic hedges the Company used to mitigate the interest rate risk associated with these assets.

ITEMS MEASURED AT FAIR VALUE ON A NON-RECURRING BASIS

From time to time, certain assets may be recorded at fair value on a non-recurring basis. These non-recurring fair value adjustments typically are a result of the application of lower of cost or fair value accounting or a write-down occurring during the period.

The following table presents the carrying value of those assets measured at fair value on a non-recurring basis, and gains and losses recognized during the period. The carrying values in this table represent only those assets marked to fair value during the quarter ended September 30, 2009.

<i>(In millions)</i>	Carrying Value as of September 30, 2009				Fair value adjustments for the three months ended September 30, 2009
	Level 1	Level 2	Level 3	Total	
Loans held for sale	\$	\$ 132	\$ 16	\$ 148	\$ (79)
Foreclosed property and other real estate		340		340	(78)

FAIR VALUE OPTION

Regions adopted the fair value option for certain financial assets and financial liabilities, as of January 1, 2008. The fair value option allows an entity the irrevocable option to elect fair value for the initial and subsequent measurement for certain financial assets and liabilities on a contract-by-contract basis. Additionally, the fair value option requires the difference between the carrying value before election of the fair value option and the fair value of these financial instruments be recorded as an adjustment to beginning retained earnings in the period of adoption. There was no material effect of adoption on the consolidated financial statements.

Regions elected the fair value option for residential mortgage loans held for sale originated after January 1, 2008. This election allows for a more effective offset of the changes in fair values of the loans and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting. Regions has not elected the fair value option for other loans held for sale primarily because they are not economically hedged using derivative instruments. Fair values of mortgage loans held for sale are based on traded market prices of similar assets where available and/or discounted cash flows at market interest rates, adjusted for securitization activities that include servicing values and market conditions. At September 30, 2009 and 2008, loans held for sale for which the fair value option was elected had an aggregate fair value of \$726 million and \$495 million, respectively, and an aggregate outstanding principal balance of \$702 million and \$488 million, respectively, and were recorded in loans held for sale in the consolidated balance sheets. Interest income on mortgage loans held for sale is recognized based on contractual rates and is reflected in interest income on loans held for sale in the consolidated statements of operations. Net gains resulting from changes in fair value of these loans of \$27 million and net gains resulting from changes in fair value of these loans of \$8 million was

Table of Contents

recorded in mortgage income in the consolidated statements of operations during the third quarter of 2009 and 2008, respectively. Net gains resulting from changes in fair value of these loans of \$10 million and net gains resulting from changes in fair value of these loans of \$7 million was recorded in mortgage income in the consolidated statements of operations during the first nine months of 2009 and 2008, respectively. These changes in fair value are mostly offset by economic hedging activities. An immaterial portion of these amounts was attributable to changes in instrument-specific credit risk.

FAIR VALUE OF FINANCIAL INSTRUMENTS

The methods and assumptions used by the Company in estimating fair values of financial instruments are disclosed in Regions Form 10-K for the year ended December 31, 2008. The carrying amounts and estimated fair values of the Company's financial instruments as of September 30, 2009 and December 31, 2008 are as follows:

<i>(In millions)</i>	September 30, 2009		December 31, 2008	
	Carrying Amount	Estimated Fair Value(2)	Carrying Amount	Estimated Fair Value(2)
Financial assets:				
Cash and cash equivalents	\$ 8,369	\$ 8,369	\$ 10,973	\$ 10,973
Trading account assets	1,388	1,388	1,050	1,050
Securities available for sale	21,030	21,030	18,850	18,850
Securities held to maturity	39	39	47	47
Loans held for sale	1,470	1,470	1,282	1,282
Loans (excluding leases), net of unearned income and allowance for loan losses(1), (3)	87,552	70,693	93,062	79,882
Other interest-earning assets	839	839	897	897
Derivatives, net	661	661	1,002	1,002
Financial liabilities:				
Deposits	94,880	95,434	90,904	91,199
Short-term borrowings	5,286	5,286	15,822	15,822
Long-term borrowings	18,093	17,061	19,231	18,191
Loan commitments and letters of credit	83	968	109	732

- (1) The estimated fair value of portfolio loans assumes sale of the notes to a third-party financial investor. Accordingly, the value to the Company if the notes were held to maturity is not included in the fair value estimate. In the current whole loan market, given the lack of market liquidity, financial investors are generally requiring a much higher rate of return than the return inherent in loans if held to maturity. This divergence accounts for the majority of the difference in carrying amount over fair value.
- (2) Estimated fair values are consistent with an exit price concept. The assumptions used to estimate the fair values are intended to approximate those that a market participant would use in a hypothetical orderly transaction. In estimating fair value, the Company makes adjustments for interest rates, market liquidity and credit spreads as appropriate.
- (3) Excluded from this table is the lease carrying amount of \$2.6 billion for September 30, 2009 and \$3.0 billion for December 31, 2008, which approximates fair value.

NOTE 12 Commitments and Contingencies**COMMERCIAL COMMITMENTS**

Regions issues off-balance sheet financial instruments in connection with lending activities. The credit risk associated with these instruments is essentially the same as that involved in extending loans to customers and is subject to Regions' normal credit approval policies and procedures. Regions measures inherent risk associated

Table of Contents

with these instruments by recording a reserve for unfunded commitments based on an assessment of the likelihood that the guarantee will be funded and the creditworthiness of the customer or counterparty. Collateral is obtained based on management's assessment of the creditworthiness of the customer.

Credit risk associated with these instruments is represented by the contractual amounts indicated in the following table:

<i>(In millions)</i>	September 30 2009	December 31 2008	September 30 2008
Unused commitments to extend credit	\$ 31,993	\$ 37,271	\$ 39,203
Standby letters of credit	5,859	8,012	8,048
Commercial letters of credit	14	20	27

Unused commitments to extend credit To accommodate the financial needs of its customers, Regions makes commitments under various terms to lend funds to consumers, businesses and other entities. These commitments include (among others) revolving credit agreements, term loan commitments and short-term borrowing agreements. Many of these loan commitments have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of these commitments are expected to expire without being funded, the total commitment amounts do not necessarily represent future liquidity requirements. However, the current lack of liquidity in the broader market and the current credit environment has resulted in increased fundings of commitments to extend credit.

Standby letters of credit Standby letters of credit are also issued to customers, which commit Regions to make payments on behalf of customers if certain specified future events occur. Regions has recourse against the customer for any amount required to be paid to a third party under a standby letter of credit. Historically, a large percentage of standby letters of credit expired without being funded. The current lack of liquidity in the broader market and the current credit environment has resulted in increased fundings of standby letters of credit. The contractual amount of standby letters of credit represents the maximum potential amount of future payments Regions could be required to make and represents Regions maximum credit risk. At September 30, 2009, December 31, 2008 and September 30, 2008, Regions had \$88 million, \$118 million and \$111 million, respectively, of liabilities associated with standby letter of credit agreements, with related assets of \$82 million, \$108 million and \$98 million, respectively.

Commercial letters of credit Commercial letters of credit are issued to facilitate foreign or domestic trade transactions for customers. As a general rule, drafts will be drawn when the goods underlying the transaction are in transit.

The reserve for all of these off-balance sheet financial instruments was \$63 million, \$74 million and \$74 million at September 30, 2009, December 31, 2008 and September 30, 2008, respectively.

LEGAL

Regions and its affiliates are subject to litigation, including the litigation discussed below, and claims arising in the ordinary course of business. Punitive damages are routinely claimed in these cases. Regions continues to be concerned about the general trend in litigation involving large damage awards against financial service company defendants. Regions evaluates these contingencies based on information currently available, including advice of counsel and assessment of available insurance coverage. Although it is not possible to predict the ultimate resolution or financial liability with respect to these litigation contingencies, management is currently of the opinion that the outcome of pending and threatened litigation would not have a material effect on Regions' business, consolidated financial position or results of operations, except to the extent indicated in the discussion below.

In late 2007 and during 2008, Regions and certain of its affiliates were named in class-action lawsuits filed in federal and state courts on behalf of investors who purchased shares of certain Regions Morgan Keegan Select

Table of Contents

Funds (the Funds) and shareholders of Regions. The Funds were formerly managed by Morgan Asset Management, Inc. The complaints contain various allegations, including claims that the Funds and the defendants misrepresented or failed to disclose material facts relating to the activities of the Funds. No class has been certified and at this stage of the lawsuits Regions cannot determine the probability of a material adverse result or reasonably estimate a range of potential exposures, if any. However, it is possible that an adverse resolution of these matters may be material to Regions' business, consolidated financial position or results of operations.

Certain of the shareholders in these Funds and other interested parties have entered into arbitration proceedings and individual civil claims, in lieu of participating in the class actions. Although it is not possible to predict the ultimate resolution or financial liability with respect to these contingencies, management is currently of the opinion that the outcome of these proceedings would not have a material effect on Regions' business, consolidated financial position or results of operations.

In July 2009, Morgan Keegan & Company, Inc. (Morgan Keegan), a wholly-owned subsidiary of Regions, Morgan Asset Management, Inc. and three employees each received a Wells notice from the Staff of the Atlanta Regional Office of the Securities and Exchange Commission (SEC) stating that the Staff intends to recommend that the Commission bring enforcement actions for possible violations of the federal securities laws. The potential actions relate to the Staff's investigation of the Funds. Additionally, in July 2009, Morgan Keegan received a Wells notice from the enforcement staff of the Financial Industry Regulatory Authority (FINRA) advising Morgan Keegan that it had made a preliminary determination to recommend disciplinary action against Morgan Keegan for violation of various NASD rules relating to sales of the Funds during 2006 and 2007. A Wells notice is neither a formal allegation nor a finding of wrongdoing. The notices provide the recipients the opportunity to provide their perspective and to address issues raised prior to any formal action being taken by the SEC or FINRA. Responses have been submitted to both the SEC and FINRA notices. Also, a joint state task force has indicated that it is considering charges against Morgan Keegan, related entities and certain of their officers in connection with the sales of the Funds. Discussions are ongoing with the state securities commissioners in the task force about the proposed charges and possible resolutions. Although it is not possible to predict the ultimate resolution or financial liability with respect to these matters, management is currently of the opinion that the outcome of these matters will not have a material effect on Regions' business, consolidated financial position or results of operations.

In March 2009, Morgan Keegan received a Wells notice from the SEC's Atlanta Regional Office related to auction rate securities (ARS) indicating that the SEC staff intended to recommend that the Commission take civil action against Morgan Keegan. On July 21, 2009, the SEC filed a complaint in United States District Court for the Northern District of Georgia against Morgan Keegan alleging violations of the federal securities laws in connection with ARS that Morgan Keegan underwrote, marketed and sold. The SEC is seeking an injunction against Morgan Keegan for violations of the antifraud provisions of the federal securities laws, as well as disgorgement, financial penalties and other equitable relief for customers, including repurchase by Morgan Keegan of all ARS that it sold prior to March 20, 2008. Beginning in February 2009, Morgan Keegan commenced a voluntary program to repurchase ARS that it underwrote and sold to the firm's customers, and extended that repurchase program in the third quarter of 2009 to include ARS that were sold by Morgan Keegan to its customers but were underwritten by other firms. As of September 30, 2009, customers of Morgan Keegan owned approximately \$288 million of ARS and Morgan Keegan held approximately \$137 million of ARS on its balance sheet. On July 21, 2009, the Alabama Securities Commission issued a Show Cause order to Morgan Keegan arising out of the ARS matter that is the subject of the SEC complaint described above. The order requires Morgan Keegan to show cause why its registration as a broker-dealer should not be suspended or revoked in the State of Alabama and also why it should not be subject to disgorgement, repurchasing all ARS sold to Alabama residents and payment of costs and penalties. Although it is not possible to predict the ultimate resolution or financial liability with respect to the ARS matter, management is currently of the opinion that the outcome of this matter will not have a material effect on Regions' business, consolidated financial position or results of operations.

Table of Contents

In April 2009, Regions, Regions Financing Trust III (the Trust) and certain of Regions' current and former directors, were named in a purported class-action lawsuit filed in the U.S. District Court for the Southern District of New York on behalf of the purchasers of trust preferred securities offered by the Trust. The complaint alleges that defendants made statements in Regions' registration statement, prospectus and year-end filings which were materially false and misleading. No class has been certified and at this stage of the lawsuit Regions cannot determine the probability of a material adverse result or reasonably estimate a range of potential exposures, if any. However, it is possible that an adverse resolution of these matters may be material to Regions' business, consolidated financial position or results of operations.

NOTE 13 Discontinued Operations

On March 30, 2007, Regions sold EquiFirst Corporation (EquiFirst), a wholly-owned non-conforming mortgage origination subsidiary, for approximately \$76 million and recorded an after-tax gain of approximately \$1 million. Consequently, the business related to EquiFirst has been accounted for as discontinued operations and the results are presented separately on the consolidated statements of income following the results from continuing operations. In the third quarter of 2008, an adjustment was recorded based on the anticipated final sales price. Resolution of the sales price was completed in October 2008, and was not materially different from the estimated final sales price.

The results from discontinued operations did not impact the three-month or nine-month periods ending September 30, 2009. The results from discontinued operations for the three-month and nine-month periods ending September 30, 2008 are as follows:

<i>(In millions)</i>	2008
Total non-interest expense	\$ 18
Loss from discontinued operations before income taxes	(18)
Income tax benefit	(7)
Loss from discontinued operations, net of tax	\$ (11)

NOTE 14 Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 157 Fair Value Measurements, codified in the Fair Value Measurements and Disclosures Topic (Fair Value Topic) of the FASB Accounting Standards Codification (ASC), which provides guidance for using fair value to measure assets and liabilities, but does not expand the use of fair value in any circumstance. The guidance also requires expanded disclosures about the extent to which a company measures assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements on an entity's financial statements. The provisions apply when other guidance requires or permits assets and liabilities to be measured at fair value. The Fair Value Topic is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years, with early adoption permitted. Regions adopted the provisions on January 1, 2008, and the effect of adoption on the consolidated financial statements was not material. Additionally, in February 2008, the FASB issued FSP 157-2, Effective Date of FASB Statement No. 157, also codified in the Fair Value Topic, which delays the effective date for non-recurring, non-financial instruments to fiscal years beginning after November 15, 2008. Regions implemented these provisions as of January 1, 2009. Refer to Note 11, Fair Value Measurements for additional information about the impact of the adoption of the Fair Value Topic.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141 (revised 2007), Business Combinations, codified in the Business Combinations Topic of the ASC. The guidance requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition-date fair value as the measurement objective for all assets acquired

Table of Contents

and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information needed to evaluate and understand the nature and financial effect of the business combination. The provisions are effective for fiscal years beginning after December 15, 2008. Regions adopted these provisions as of January 1, 2009, and the adoption did not have a material impact on Regions' consolidated financial statements. However, the adoption of these provisions could have a material impact to the consolidated financial statements for prospective business combinations.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, codified in the *Consolidation* Topic of the ASC, which requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. Additionally, the provisions require that transactions between an entity and noncontrolling interests be treated as equity transactions. The provisions are effective for fiscal years beginning after December 15, 2008. Regions adopted the provisions on January 1, 2009, and the adoption did not have a material impact on the consolidated financial statements.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, codified in the *Derivatives and Hedging* Topic of the ASC. The guidance requires entities to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. The provisions are effective for fiscal years and interim periods beginning after November 15, 2008, with early adoption permitted. Regions adopted the provisions on January 1, 2009. Refer to Note 10, *Derivative Financial Instruments and Hedging Activities* for additional information.

In June 2008, the FASB issued FASB Staff Position No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payments Transactions Are Participating Securities*, codified in the *Earnings Per Share* Topic of the ASC. The guidance requires that instruments granted in share-based payment transactions, that are considered to be participating securities, should be included in the earnings allocation in computing earnings per share (EPS) under the two-class method. The provisions are effective for fiscal years beginning after December 15, 2008 with all prior period EPS data being adjusted retrospectively. Early adoption was not permitted. Regions adopted these provisions on January 1, 2009, and the adoption did not have a material impact on the consolidated financial statements.

In December 2008, the FASB issued FASB Staff Position No. 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*, codified in the *Compensation - Retirement Benefits* Topic of the ASC. The guidance requires annual disclosures about assets held in an employer's defined benefit pension or other postretirement plan. These provisions are generally effective for fiscal years ending after December 15, 2009. Regions is in the process of reviewing the potential impact of these provisions; however, the adoption is not expected to have a material impact to the consolidated financial statements.

In January 2009, the FASB issued FASB Staff Position No. EITF 99-20-1, *Amendments to the Impairment Guidance of EITF Issue No. 99-20*, codified in the *Investments* Topic of the ASC. This FSP amends the impairment guidance in EITF Issue No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets*, to achieve more consistent determination of whether an other-than-temporary impairment has occurred. Additionally, the FSP retains and emphasizes the objective of an other-than-temporary impairment assessment and the related disclosure requirements in FASB Statement No. 115 *Accounting for Certain Investments in Debt and Equity Securities*, and other related guidance. This guidance is effective for interim and annual reporting periods ending after December 15, 2008, and is applied prospectively. Regions adopted this guidance as of December 31, 2008, and the effect of adoption on the consolidated financial statements was not material.

In April 2009, the FASB issued FASB Staff Position No. 141(R)-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies*, codified in the *Business*

Table of Contents

Combinations Topic of the ASC, to address certain implementation issues related to the accounting for assets and liabilities arising from contingencies. The guidance requires that assets acquired and liabilities assumed in a business combination arising from contingencies should be recognized at fair value on the acquisition date if fair value can be determined during the measurement period. These provisions are effective for acquisitions where the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Regions is in the process of reviewing the potential impact of this guidance. The adoption of these provisions could have a material impact on the consolidated financial statements for business combinations entered into after the effective date.

In April 2009, the FASB issued FASB Staff Position No. 157-4, **Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly**, codified in the Fair Value Topic, to provide additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. Additionally, it includes guidance on identifying circumstances that indicate a transaction is not orderly. The guidance emphasizes that even if there has been a significant decrease in the volume and level of activity for the asset or liability and regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. This guidance is effective for interim and annual reporting periods ending after June 15, 2009, and is applied prospectively. Regions adopted these provisions during the second quarter of 2009, and the effect of the adoption on the consolidated financial statements was not material.

In April 2009, the FASB issued FASB Staff Position No. 107-1 and APB 28-1, **Interim Disclosures about Fair Value of Financial Instruments**, codified in the Financial Instruments Topic of the ASC, to require disclosures about fair value of financial instruments for interim reporting periods as well as in annual financial statements. This guidance is effective for interim and annual reporting periods ending after June 15, 2009, and is applied prospectively. Regions adopted these provisions during the second quarter of 2009. Refer to Note 11, **Fair Value Measurements** for additional information.

In April 2009, the FASB issued FSP 115-2 and 124-2, **Recognition and Presentation of Other-Than-Temporary Impairments**, codified in the Investments Topic of the ASC, which modifies and expands other-than-temporary impairment guidance for debt securities. This guidance addresses the unique features of debt securities and clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. Additionally, it requires an entity to recognize the credit component of an other-than-temporary impairment of a debt security in earnings and the noncredit component in other comprehensive income when the entity does not intend to sell the security and it is more likely than not that the entity will not be required to sell the security prior to recovery. The guidance also expands and increases the frequency of existing disclosures about other-than-temporary impairments for debt and equity securities. This guidance is effective for interim and annual reporting periods ending after June 15, 2009, and is applied prospectively. Regions adopted these provisions during the second quarter of 2009. Refer to Note 6, **Securities** for additional information.

In May 2009, the FASB issued Statement of Financial Accounting Standards No. 165, **Subsequent Events**, codified in the Subsequent Events Topic of the ASC, which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. This guidance also requires entities to disclose the date through which subsequent events were evaluated as well as whether that date is the date that the financial statements were issued or were available to be issued. Regions adopted the Subsequent Events Topic during the second quarter of 2009. Refer to Note 1, **Basis of Presentation** for additional information.

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 166, **Accounting for Transfers of Financial Assets** an amendment of FASB Statement No. 140 (FAS 166), which is not yet codified in the ASC. FAS 166 eliminates the concept of a Qualified Special Purpose Entity from FAS 140, changes the requirements for derecognizing financial assets, and requires additional disclosures. This statement is

Table of Contents

effective for fiscal years beginning after November 15, 2009. Regions is in the process of reviewing the potential impact of FAS 166; however, the adoption of FAS 166 is not expected to have a material impact to the consolidated financial statements.

In June 2009, the FASB issued Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R) (FAS 167), which is not yet codified in the ASC. FAS 167 modifies how a company determines when a variable interest entity (VIE) should be consolidated. FAS 167 also requires a qualitative assessment of an entity's determination of the primary beneficiary of a VIE based on whether the entity (1) has the power to direct the activities of a VIE that most significantly impact the entity's economic performance, and (2) has the obligation to absorb losses of the entity that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE. FAS 167 requires an ongoing reassessment of whether a company is the primary beneficiary of a VIE as well as additional disclosures about a company's involvement in VIEs. This statement is effective for fiscal years beginning after November 15, 2009. Regions is in the process of reviewing the potential impact of FAS 167; however, the adoption of FAS 167 is not expected to have a material impact to the consolidated financial statements.

In August 2009, the FASB issued Accounting Standards Update (ASU) 2009-05 Measuring Liabilities at Fair Value (ASU 2009-05). ASU 2009-05 provides further guidance on how to measure the fair value of a liability. ASU 2009-05 is effective for the first reporting period beginning after August 26, 2009. The adoption of ASU 2009-05 is not expected to have a material impact to the consolidated financial statements.

In September 2009, the FASB issued ASU 2009-12 Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) . ASU 2009-12 permits the use of net asset value per share to estimate the fair value of these investments as a practical expedient. The ASU also requires disclosure, by major category of investment, of the attributes of the investments, such as the nature of any restrictions on the investor's ability to redeem its investments at the measurement date, any unfunded commitments, and the investment strategies of the investees. ASU 2009-12 is effective for interim and annual reporting periods ending after December 15, 2009. The adoption of ASU 2009-12 is not expected to have a material impact to the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

The following discussion and analysis is part of Regions Financial Corporation's (Regions or the Company) Quarterly Report on Form 10-Q to the Securities and Exchange Commission (SEC) and updates Regions' Form 10-K for the year ended December 31, 2008, which was previously filed with the SEC. This financial information is presented to aid in understanding Regions' financial position and results of operations and should be read together with the financial information contained in the Form 10-K. Certain prior period amounts presented in this discussion and analysis have been reclassified to conform to current period classifications, except as otherwise noted. The emphasis of this discussion will be on the three and nine months ended September 30, 2009 compared to the three and nine months ended September 30, 2008 for the statement of operations. For the balance sheet, the emphasis of this discussion will be the balances as of September 30, 2009 compared to December 31, 2008.

This discussion and analysis contains statements that may be considered forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. See pages 3 and 4 for additional information regarding forward-looking statements.

CORPORATE PROFILE

Regions is a financial holding company headquartered in Birmingham, Alabama, which operates in the South, Midwest and Texas. Regions provides traditional commercial, retail and mortgage banking services, as well as other financial services in the fields of investment banking, asset management, trust, securities brokerage, insurance and other specialty financing.

Regions conducts its banking operations through Regions Bank, an Alabama chartered commercial bank that is a member of the Federal Reserve System. At September 30, 2009, Regions operated approximately 1,900 full-service banking offices in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas and Virginia. Regions provides brokerage services and investment banking from approximately 340 offices of Morgan Keegan & Company, Inc. (Morgan Keegan), a full-service regional brokerage and investment banking firm. Regions provides full-line insurance brokerage services primarily through Regions Insurance, Inc., one of the 25 largest insurance brokers in the country.

Regions' profitability, like that of many other financial institutions, is dependent on its ability to generate revenue from net interest income and non-interest income sources. Net interest income is the difference between the interest income Regions receives on interest-earning assets, such as loans and securities, and the interest expense Regions pays on interest-bearing liabilities, principally deposits and borrowings. Regions' net interest income is impacted by the size and mix of its balance sheet components and the interest rate spread between interest earned on its assets and interest paid on its liabilities. Non-interest income includes fees from service charges on deposit accounts, securities brokerage, investment banking and trust activities, mortgage servicing and secondary marketing, insurance activities, and other customer services which Regions provides. Results of operations are also affected by the provision for loan losses and non-interest expenses, such as salaries and employee benefits, occupancy and other operating expenses, as well as income taxes.

Economic conditions, competition, and the monetary and fiscal policies of the Federal government significantly affect most financial institutions, including Regions. Lending and deposit activities and fee income generation are influenced by levels of business spending and investment, consumer income, consumer spending and savings, capital market activities, and competition among financial institutions, as well as customer preferences, interest rate conditions and prevailing market rates on competing products in Regions' market areas.

Table of Contents

Regions' business strategy has been and continues to be focused on providing a competitive mix of products and services, delivering quality customer service and maintaining a branch distribution network with offices in convenient locations. Regions delivers this business strategy with the personal attention and feel of a community bank and with the service and product offerings of a large regional bank.

THIRD QUARTER HIGHLIGHTS

Regions reported a net loss available to common shareholders of \$437 million, or \$0.37 loss per diluted share in the third quarter of 2009, compared to third quarter 2008 per diluted share income of \$0.11. High credit costs, primarily the result of focused efforts to identify and address loan portfolio stress, as well as increasing unemployment and ongoing deterioration in real estate values, continued to negatively impact pre-tax earnings. During the third quarter, Regions recorded a \$1.025 billion provision for loan losses, \$608 million higher than the third quarter of 2008. Additionally, several other significant items, which are discussed later in this section, affected net income for the third quarter of 2009.

Net interest income on a fully taxable-equivalent basis for the third quarter of 2009 was \$853 million compared to \$931 million in the third quarter of 2008. The net interest margin (taxable-equivalent basis) was 2.73% in the third quarter of 2009, compared to 3.10% during the third quarter of 2008. The decline in the net interest margin was impacted primarily by factors directly and indirectly associated with the erosion of economic and industry conditions since late 2007. These factors include an unfavorable variation in the general level and shape of the yield curve, Regions' asset sensitive balance sheet, rate increases for new debt issuances, and rising non-performing asset levels. Additionally, declining loan yields have not been offset by similar declines in deposit rates due to the competitive demand for deposits within the industry. Recent increases in non-interest bearing deposit balances as well as the benefits of improving spreads on newly originated and renewed loans should help promote a stable net interest margin going forward.

Net charge-offs totaled \$680 million, or an annualized 2.86% of average loans, in the third quarter of 2009, compared to 1.68% for the third quarter of 2008. Commercial real estate and commercial and industrial net charge-offs drove the increase, reflecting ongoing stress in housing valuations and continued strains in the economy as a whole. The provision for loan losses totaled \$1.025 billion in the third quarter of 2009 compared to \$417 million during the third quarter of 2008. The allowance for loan losses at September 30, 2009 was 2.83% of total loans, net of unearned income, compared to 1.87% at December 31, 2008 and 1.49% at September 30, 2008. Total non-performing assets, including loans held for sale, at September 30, 2009 were \$4.1 billion, compared to \$1.7 billion at December 31, 2008 and \$1.8 billion at September 30, 2008. Residential homebuilder and condominium loans, as well as foreclosed properties, were the primary contributors to the increase since December 31, 2008. Additionally, income-producing commercial real estate, including multi-family and retail, significantly contributed to the third quarter inflows. Also included in non-performing assets were \$380 million of loans held for sale at September 30, 2009 compared to \$423 million at December 31, 2008 and \$129 million at September 30, 2008.

Non-interest income for the third quarter of 2009 increased by \$53 million compared to the third quarter of 2008. Mortgage income was the primary driver of the increase, increasing \$43 million for the third quarter of 2009 as compared to the same period in 2008. The increase was primarily due to customers taking advantage of historically low mortgage rates and the corresponding impact on mortgage originations. Mortgage servicing rights and related hedging valuation adjustments also contributed to the increase in mortgage income. Brokerage, investment banking and capital markets income increased in the third quarter of 2009 by \$11 million as compared to the same period in 2008. The increase was primarily due to increases in fixed income capital markets revenue. These increases were partially offset by a decrease of \$17 million in trust department income for the quarter ended September 30, 2009 as compared to the same period in 2008. This decrease was driven primarily by the impact of lower asset valuations on trust fees. Also, trust department income for the 2008 period included fees from energy-related brokered transactions, which did not repeat in 2009.

Table of Contents

Total non-interest expense, excluding merger-related charges, was \$1.243 billion and \$1.103 billion in the third quarter of 2009 and 2008, respectively. Pre-tax merger charges of \$25 million were incurred in the third quarter of 2008 (see Table 14 GAAP to Non-GAAP Reconciliation). The Company's third quarter decision to consolidate 121 branches into other existing branches and resulting charges of \$41 million contributed to the increase. The increase in non-interest expense was also attributable to increased professional fees, other real estate owned (OREO) expense, and FDIC insurance premiums. Additionally, salaries and employee benefits, excluding merger charges, were higher in the third quarter of 2009 as compared to the corresponding 2008 period.

TOTAL ASSETS

Regions' total assets at September 30, 2009 were \$140 billion, compared to \$146 billion at December 31, 2008. The decrease in total assets from year-end 2008 resulted primarily from a decrease in interest-bearing deposits in other banks. Lower loan balances also contributed to the decrease.

LOANS

At September 30, 2009 and December 31, 2008, loans represented 75% of Regions' interest-earning assets. The following table presents the distribution by loan type of Regions' loan portfolio, net of unearned income:

Table 1 Loan Portfolio

<i>(In millions, net of unearned income)</i>	September 30 2009	December 31 2008	September 30 2008
Commercial and industrial	\$ 21,925	\$ 23,596	\$ 23,511
Commercial real estate non owner-occupied	16,190	14,486	14,151
Commercial real estate owner-occupied	12,103	11,722	11,569
Construction non owner-occupied	6,616	9,029	9,810
Construction owner-occupied	875	1,605	1,810
Residential first mortgage	15,513	15,839	16,191
Home equity	15,630	16,130	15,849
Indirect	2,755	3,854	4,211
Other consumer	1,147	1,158	1,610
	\$ 92,754	\$ 97,419	\$ 98,712

Loans, net of unearned income, totaled \$92.8 billion at September 30, 2009, a decrease of \$4.7 billion from year-end 2008 levels, primarily due to a decline in construction loans, reflecting developers' reluctance to begin new projects or purchase existing projects under current economic conditions. The commercial and industrial category also declined due to decreased utilization of lines of credit. The impact of the recession on loan demand also drove decreases in most other categories. These decreases were partially offset by increases in the commercial real estate portfolios which are attributable to the migration from construction loans as projects are completed. Residential first mortgages also decreased, although production activity was solid as a result of continued refinance activity due to attractive interest rates. The dealer indirect portfolio is an exit portfolio and continues to be in a runoff mode.

CREDIT QUALITY

The loans in the following portfolios may have a greater risk of non-collection than other loans. In the recent past, Regions' pressured portfolios were comprised of residential homebuilder, Florida second lien home equity and the condominium portfolios. Beginning in the second quarter of 2009 and continuing through September 30, 2009, income-producing commercial real estate, including multi-family and retail, also showed

Table of Contents

signs of credit pressure, contributing more significantly to increases in non-accrual loans. Because of the cash flow associated with the income-producing credits, the Company generally can more easily restructure these loans. Accordingly, the loss content is expected to be generally lower than other types of commercial real estate.

RESIDENTIAL HOMEBUILDER PORTFOLIO

During late 2007, the residential homebuilder portfolio came under significant stress. In Table 1 Loan Portfolio, the majority of these loans are reported in the construction non owner-occupied loan category, while a smaller portion is reported as commercial real estate non owner-occupied. This portfolio has decreased by approximately \$1.0 billion from December 31, 2008 to September 30, 2009, and approximately \$3.8 billion since the beginning of 2008. The Company has placed a moratorium on new originations in this portfolio.

The following table provides details related to the product breakout of the residential homebuilder portfolio:

Table 2 Residential Homebuilder Portfolio

September 30, 2009	Loan Balance	Year-to-Date Net Charge-Offs <i>(In millions, net of unearned income)</i>	90 Days Past Due	Non-Accruing Loans
Land	\$ 1,134	\$ 101	\$ 9	\$ 306
Residential spec	952	51	3	197
Residential presold	222	12		115
Lots	819	77	1	186
National homebuilders and other	225	11		95
	\$ 3,352	\$ 252	\$ 13	\$ 899

September 30, 2008	Loan Balance	Year-to-Date Net Charge-Offs <i>(In millions, net of unearned income)</i>	90 Days Past Due	Non-Accruing Loans
Land	\$ 1,839	\$ 64	\$	\$ 176
Residential spec	1,506	54	1	170
Residential presold	457	19		42
Lots	1,110	35	6	123
National homebuilders and other	290	14		46
	\$ 5,202	\$ 186	\$ 7	\$ 557

The residential homebuilder portfolio is geographically concentrated in Florida and North Georgia; the balances in these areas total approximately \$1.3 billion of the \$3.4 billion balance at September 30, 2009. The following table provides detail related to the geographic breakout and performing status of the residential homebuilder portfolio:

Table of Contents**Table 3 Geographic Breakout of Residential Homebuilder Portfolio**

September 30, 2009	Non-Accruing	Accruing (In millions)	Total
Central	\$ 326	\$ 728	\$ 1,054
Florida	280	562	842
Midsouth	198	830	1,028

- 2 Midsouth consists of North Carolina, Virginia and Tennessee
- 3 Midwest consists of Arkansas, Illinois, Indiana, Iowa, Kentucky, Missouri and Texas
- 4 Southwest consists of Louisiana and Mississippi

HOME EQUITY PORTFOLIO

The home equity portfolio totaled \$15.6 billion at September 30, 2009. The portfolio has an average original FICO score of 738 as of September 30, 2009 compared with 736 as of September 30, 2008. The main source of continued stress has been in Florida, where residential property values have declined. Further, losses on relationships in Florida where Regions is in a second lien position have been higher than first lien losses.

The following tables provide details related to the home equity portfolio as follows:

Table 4 Selected Home Equity Portfolio Information

<i>(In millions)</i>	Nine Months Ended September 30, 2009								
	Florida			All Other States			Total		
	1st Lien	2nd Lien	Total	1st Lien	2nd Lien	Total	1st Lien	2nd Lien	Total

(1) Net charge-off percentages are calculated on an annualized basis as a percent of average balances.

Table of Contents

CONDOMINIUM PORTFOLIO

Property value declines also led to increased stress in the condominium portfolio. Regions' exposure in this portfolio is \$647 million at September 30, 2009, a \$968 million decrease since the beginning of 2008. The Company has placed a moratorium on new originations in this portfolio.

OTHER PRESSURED PORTFOLIOS

The Company expects continued credit pressure on loans secured by income-producing commercial real estate, including multi-family and retail. Because of the cash flow associated with the income-producing credits, the Company can generally more easily restructure these loans. Accordingly, the loss content is expected to be generally lower than other types of commercial real estate.

Regions does not have any option adjustable rate mortgage (ARM) products, loans with initial teaser rates or other higher-risk residential loans. Regions has approximately \$64 million in book value of sub-prime loans retained from the disposition of EquiFirst, down from the year-end 2008 balance of \$77 million. The credit loss exposure related to these loans is addressed in management's periodic determination of the allowance for credit losses.

ALLOWANCE FOR CREDIT LOSSES

The allowance for credit losses (allowance) represents management's estimate of credit losses inherent in the portfolio. The allowance consists of two components: the allowance for loan losses and the reserve for unfunded credit commitments. Management's assessment of the adequacy of the allowance is based on the combination of both of these components. Regions determines its allowance in accordance with applicable accounting literature as well as regulatory guidance related to receivables and contingencies. Binding unfunded credit commitments include items such as letters of credit, financial guarantees and binding unfunded loan commitments.

Factors considered by management in determining the adequacy of the allowance include, but are not limited to: (1) detailed reviews of individual loans; (2) historical and current trends in gross and net loan charge-offs for the various portfolio segments evaluated; (3) the Company's policies relating to delinquent loans and charge-offs; (4) the level of the allowance in relation to total loans and to historical loss levels; (5) levels and trends in non-performing and past due loans; (6) collateral values of properties securing loans; (7) the composition of the loan portfolio, including unfunded credit commitments; and (8) management's analysis of current economic conditions.

In support of collateral values, Regions obtains updated valuations for non-performing loans on at least an annual basis. For non-performing loans deemed to be in markets of concern (currently defined in general as Florida, Georgia, North Carolina and South Carolina), Regions obtains updated valuations on a semi-annual basis.

Various departments, including Credit Review, Commercial and Consumer Credit Risk Management and Special Assets are involved in the credit risk management process to assess the accuracy of risk ratings, the quality of the portfolio and the estimation of inherent credit losses in the loan portfolio. This comprehensive process also assists in the prompt identification of problem credits. The Company has taken a number of measures to aggressively manage the portfolios and mitigate losses, particularly in the more problematic or stressed portfolios. In addition, a strong Customer Assistance Program is in place which educates customers about options and initiates early contact with customers to discuss solutions when a loan first becomes delinquent.

For the majority of the loan portfolio, management uses information from its ongoing review processes to stratify the loan portfolio into pools sharing common risk characteristics. Loans that share common risk

Table of Contents

characteristics are assigned a portion of the allowance based on the assessment process described above. Credit exposures are categorized by type and assigned estimated amounts of inherent loss based on several factors, including current and historical loss experience for pools of similar loans and management's consideration of current economic conditions and the expected impact on credit performance.

The allowance for credit losses totaled \$2.69 billion at September 30, 2009 and \$1.90 billion at December 31, 2008. The allowance for loan losses as a percentage of net loans was 2.83% at September 30, 2009 compared to 1.87% at December 31, 2008 and 1.49% at September 30, 2008. The increase in the allowance was primarily driven by the result of focused efforts to identify and address loan portfolio stress, as well as deterioration in the residential homebuilder, home equity, condominium and income-producing commercial real estate portfolios. These developments resulted in a significant migration of loans into non-performing status. Residential homebuilder and condominium loans were the primary contributors to the increase in non-accrual loans since December 31, 2008. Additionally, income-producing commercial real estate, including multi-family and retail, significantly contributed to third quarter inflows. Given continuing pressure on residential property values especially in Florida and North Georgia rising unemployment and a generally uncertain economic backdrop, the Company expects credit costs to remain elevated. The reserve for unfunded credit commitments was \$63 million at September 30, 2009 and \$74 million at December 31, 2008. Details regarding the allowance and net charge-offs, including an analysis of activity from the previous year's totals, are included in Table 5 Allowance for Credit Losses .

Net charge-offs as a percentage of average loans (annualized) were 2.19% and 1.03% in the first nine months of 2009 and 2008, respectively. For the first nine months of 2009, net charge-offs on commercial real estate non-owner-occupied and owner-occupied were an annualized 3.13% and 0.49%, respectively, compared to an annualized 0.78% and 0.27%, respectively, for the first nine months of 2008. For the first nine months of 2009, net charge-offs on construction non-owner-occupied and owner-occupied were an annualized 5.70% and 0.99%, respectively, compared to an annualized 3.50% and 0.26%, respectively, for the first nine months of 2008. The increases in commercial real estate non owner-occupied and construction non owner-occupied net charge-offs are in part related to continued deterioration in Regions' homebuilder portfolio.

Net charge-offs were an annualized 2.54% of home equity loans compared to an annualized 1.37% through the first nine months of 2009 and 2008, respectively. Losses in Florida-based credits remained at elevated levels, as unemployment levels remain high and property valuations in certain markets have continued to experience ongoing deterioration. As illustrated in Table 4, these loans and lines represent approximately \$5.8 billion of Regions' total home equity portfolio at September 30, 2009. Of that balance, approximately \$2.2 billion represent first liens, while second liens, which total \$3.6 billion, are the main source of losses. Florida second lien losses were 6.80% annualized through the first nine months of 2009 as compared to 3.33% for the same period of 2008. Through the first nine months of 2009, home equity losses in Florida amounted to an annualized 5.23% of loans and lines versus 1.00% across the remainder of Regions' footprint. This compares to the first nine months of 2008 losses of 2.58% and 0.71% respectively.

Table of Contents

Activity in the allowance for credit losses is summarized as follows:

Table 5 Allowance for Credit Losses

<i>(In millions)</i>	Nine Months Ended September 30	
	2009	2008
Allowance for loan losses at beginning of year	\$ 1,826	\$ 1,321
Loans charged-off:		
Commercial	299	144
Commercial real estate non owner-occupied	378	82
Commercial real estate owner-occupied	49	27
Construction non owner-occupied	329	255
Construction owner-occupied	9	5
Residential first mortgage	149	41
Home equity	324	170
Indirect	52	38
Other consumer	59	57
	1,648	819

Allowance for loan losses at end of period to loans, net of unearned income	2.83%	1.49%
Net charge-offs as percentage of:		
Average loans, net of unearned income	2.19	1.03
Provision for loan losses	66.10	82.81

Table of Contents

Impaired loans are defined as all troubled debt restructurings (TDRs) plus commercial non-accrual loans. Impaired loans totaled approximately \$4.5 billion at September 30, 2009, compared to \$1.4 billion at December 31, 2008. The increase in impaired loans is consistent with the increase in non-performing loans, which is discussed in the Non-Performing Assets section of this report. Non-accrual loans with outstanding balances greater than \$2.5 million are evaluated individually for impairment. For these loans, Regions measures the level of impairment based on the present value of the estimated projected cash flows, the estimated value of the collateral or, if available, observable market prices. For consumer TDRs, Regions measures the level of impairment based on pools of loans stratified by common risk characteristics. If current valuations are lower than the current book balance of the credit, the negative differences are reviewed for possible charge-off. In instances where management determines that a charge-off is not appropriate, a reserve is established for the individual loan in question. The allowance allocated to impaired loans, excluding TDRs, totaled \$402 million and \$130 million at September 30, 2009 and December 31, 2008, respectively. The allowance allocated to TDRs totaled \$27 million at September 30, 2009 and \$9 million at December 31, 2008.

The following table summarizes TDRs for the periods ending September 30, 2009 and December 31, 2008:

Table 6 Troubled Debt Restructurings

<i>(In millions)</i>	September 30 2009	December 31 2008
Accruing:		
Commercial and industrial	\$ 16	\$ 1
Residential first mortgage	1,187	406
Home equity	178	48
Other consumer	35	
	1,416	455
Non-accrual status or 90 days past due:		
Commercial and industrial	26	10
Residential first mortgage	146	67
Home equity	7	1
	179	78
	\$ 1,595	\$ 533

The increase in TDRs since year-end is due to rising unemployment levels and the continued decline in residential property values. Regions continues to work to meet the unique needs of consumer borrowers to stem foreclosures and keep customers in their homes through the Customer Assistance Program. As a result, Regions initiated significantly more extensions and modifications in the first nine months of 2009 than for the same period in 2008. As shown in the table above, the majority of TDR consumer loans are on accrual status at September 30, 2009. There was an immaterial amount of TDRs at September 30, 2008.

Table of Contents**NON-PERFORMING ASSETS**

Non-performing assets are summarized as follows:

Table 7 Non-Performing Assets

<i>(Dollars in millions)</i>	September 30 2009	December 31 2008	September 30 2008
Non-performing loans:			
Commercial and industrial	\$ 381	\$ 176	\$ 215
Commercial real estate non owner-occupied	1,184	292	378
Commercial real estate owner-occupied	450	157	197
Construction non owner-occupied	992	273	523
Construction owner-occupied	47	26	32
Residential first mortgage	162	125	94
Home equity		3	2
Total non-performing loans	3,216	1,052	1,441
Foreclosed properties	503	243	201
Total non-performing assets* excluding loans held for sale	3,719	1,295	1,642
Non-performing loans held for sale	380	423	129
Total non-performing assets* including loans held for sale	\$ 4,099	\$ 1,718	\$ 1,771
Non-performing loans, excluding loans held for sale, to loans, net of unearned income	3.47%	1.08%	1.46%
Non-performing assets* excluding loans held for sale to loans, net of unearned income, and foreclosed properties	3.99%	1.33%	1.66%
Non-performing assets* to loans, net of unearned income, and foreclosed properties	4.40%	1.76%	1.79%
Allowance for loan losses to non-performing loans	0.82x	1.74x	1.02x
Accruing loans 90 days past due:			
Commercial and industrial	\$ 12	\$ 14	\$ 10
Commercial real estate non owner-occupied	30	12	10
Commercial real estate owner-occupied	10	9	5
Construction non owner-occupied	11	12	1
Construction owner-occupied	1	3	7
Residential first mortgage	347	275	241
Home equity	222	214	173
Indirect	4	8	4
Other consumer	6	7	6
	\$ 643	\$ 554	\$ 457
Restructured loans not included in the categories above	\$ 1,416	\$ 455	\$ 139

* Exclusive of accruing loans 90 days past due

Total non-performing assets were \$4.1 billion at September 30, 2009 compared to \$1.7 billion at December 31, 2008 and \$1.8 billion at September 30, 2008. Excluding loans held for sale, non-performing assets at September 30, 2009 were \$3.7 billion compared to \$1.3 billion at December 31, 2008 and \$1.6 billion at September 30, 2008. The increase since year-end was primarily driven by commercial and industrial, commercial real estate and construction loans, including the residential homebuilder and condominium portfolios, due to the continued decline in residential property values. Of the \$3.4 billion residential homebuilder portfolio, approximately \$899 million is non-accruing and \$13 million

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

is 90 days or more past due as of September 30, 2009. Also, Regions has recently been experiencing an inflow of non-performing commercial real estate loans

Table of Contents

secured by income-producing properties, including multi-family and retail. Because of the cash flow associated with the income-producing credits, the Company can generally more easily restructure these loans. Accordingly, the loss content is expected to be generally lower than other types of commercial real estate.

Loans past due 90 days or more and still accruing increased \$89 million from year-end 2008 levels, reflecting continued weak economic conditions and general market deterioration. The increase was due primarily to increases in residential first mortgages particularly in Florida where extended foreclosure timelines are a result of significant backlogs in the court system.

At September 30, 2009 and December 31, 2008, Regions had approximately \$1.2 billion and \$813 million, respectively, of potential problem commercial and commercial real estate loans that were not included in non-accrual loans or in the accruing loans 90 days past due categories, but for which management had concerns as to the ability of such borrowers to comply with their present loan repayment terms.

SECURITIES

The following table details the carrying values of securities:

Table 8 Securities

<i>(In millions)</i>	September 30 2009	December 31 2008	September 30 2008
U.S. Treasury securities	\$ 63	\$ 900	\$ 828
Federal agency securities	54	1,706	1,791
Obligations of states and political subdivisions	314	757	863
Mortgage-backed securities	19,474	14,349	13,005
Other debt securities	21	22	20
Equity securities	1,143	1,163	1,176
	\$ 21,069	\$ 18,897	\$ 17,683

Securities totaled \$21.1 billion at September 30, 2009, an increase of \$2.2 billion from year-end 2008 levels. This increase resulted from deploying interest-bearing deposits in other banks, which were invested primarily in agency mortgage-backed securities as a part of the Company's asset/liability management process. In the first quarter of 2009, Regions sold approximately \$656 million of U.S. Treasury securities available for sale and recognized a gain of approximately \$53 million. The proceeds were reinvested in U.S. government agency mortgage-backed securities classified as available for sale. In the second quarter of 2009, Regions sold approximately \$1.4 billion of federal agency securities and recognized a gain of approximately \$108 million. The proceeds were reinvested in U.S. government agency mortgage-backed securities classified as available for sale. In the third quarter of 2009, Regions sold approximately \$877 million of non-agency commercial mortgage-backed securities and recognized a loss of less than \$1 million. This sale eliminated the exposure to non-agency commercial mortgage-backed securities in the investment portfolio. Also in the third quarter of 2009, Regions sold approximately \$171 million of municipal securities and recognized a gain of approximately \$4.7 million. Proceeds from the third quarter 2009 sales were reinvested in U.S. government agency mortgage-backed securities classified as available for sale. All of these sales were part of Regions' asset/liability management strategy. Also, during the first nine months of 2009, Regions recognized a write-down of securities of approximately \$75 million, representing other-than-temporary impairment, related primarily to non-agency residential mortgage-backed securities, equity securities, and a single municipal issuer (see Note 6 Securities to the consolidated financial statements).

Securities available for sale, which comprise nearly all of the securities portfolio, are an important tool used to manage interest rate sensitivity and provide a primary source of liquidity for the Company (see INTEREST RATE SENSITIVITY, *Exposure to Interest Rate Movements* and LIQUIDITY).

Table of Contents**LOANS HELD FOR SALE**

Loans held for sale totaled \$1.5 billion at September 30, 2009 compared to \$1.3 billion at December 31, 2008. This increase reflects an increase in mortgage origination activity during 2009 due to low interest rates during the period.

OTHER INTEREST-EARNING ASSETS

All other interest-earning assets decreased approximately \$1.8 billion from year-end 2008 to September 30, 2009 primarily due to a decrease in interest-bearing deposits in other banks which were utilized to fund securities purchases described above.

GOODWILL

Goodwill totaled \$5.6 billion at September 30, 2009 and December 31, 2008. Regions performed an interim test of goodwill for impairment during the third quarter of 2009. Regions' Step One analysis indicated that the estimated fair value of the General Banking/Treasury reporting unit was less than its carrying amount. Therefore, Step Two was performed and, based on the full purchase price allocation performed as if a business combination had occurred as outlined in Note 8 Goodwill, goodwill was not impaired as of September 30, 2009.

See Note 8 Goodwill to the consolidated financial statements for a detail of goodwill allocated to each reportable segment and discussion of goodwill impairment testing. See Note 11 Fair Value Measurements to the consolidated financial statements for the fair value measurements of certain assets and liabilities and the valuation methodology of such pricing used for testing goodwill for impairment.

DEPOSITS

Regions competes with other banking and financial services companies for a share of the deposit market. Regions' ability to compete in the deposit market depends heavily on the pricing of its deposits and how effectively the Company meets customers' needs. Regions employs various means to meet those needs and enhance competitiveness, such as providing a high level of customer service, competitive pricing and expanding the traditional branch network to provide convenient branch locations for its customers. Regions also serves customers through providing centralized, high-quality telephone banking services and alternative product delivery channels such as internet banking.

The following table summarizes deposits by category:

Table 9 Deposits

<i>(In millions)</i>	September 30 2009	December 31 2008	September 30 2008
Non-interest-bearing demand	\$ 21,226	\$ 18,457	\$ 18,045
Savings accounts	4,025	3,663	3,709
Interest-bearing transaction accounts	13,688	15,022	14,616
Money market accounts domestic	22,327	19,471	17,098
Money market accounts foreign	941	1,812	2,454
Low-cost deposits	62,207	58,425	55,922
Time deposits	32,582	32,369	29,288
Customer deposits	94,789	90,794	85,210
Time deposits	91	110	1,123
Other			2,888
Treasury deposits	91	110	4,011
Total deposits	\$ 94,880	\$ 90,904	\$ 89,221

Table of Contents

Total deposits at September 30, 2009 increased approximately \$4.0 billion compared to year-end 2008 levels. A key driver was the increased growth in non-interest-bearing demand deposits, savings, and domestic money market accounts. These increases were partially offset by decreasing interest-bearing transaction accounts and foreign money market accounts. Regions continues to grow customer households and deposits by deepening and retaining existing customer relationships as well as developing new relationships through new checking products and money market rate offers. During the first nine months of 2009, Regions opened a record 762,000 new retail and business checking accounts.

During the first quarter of 2009, Regions, in an FDIC-assisted transaction, assumed approximately \$285 million of deposits from FirstBank Financial Services in Henry County, Georgia.

SHORT-TERM BORROWINGS

The following is a summary of short-term borrowings:

Table 10 Short-Term Borrowings

<i>(In millions)</i>	September 30 2009	December 31 2008	September 30 2008
Federal funds purchased	\$ 27	\$ 34	\$ 5,776
Securities sold under agreements to repurchase	2,606	3,108	4,651
Term Auction Facility		10,000	3,000
Federal Home Loan Bank structured advances	1,500	1,500	1,500
Treasury, tax and loan notes	137		1,205
Brokerage customer liabilities	364	431	465
Short-sale liability	408	629	645
Other short-term borrowings	244	120	300
	\$ 5,286	\$ 15,822	\$ 17,542

Federal funds purchased and securities sold under agreements to repurchase totaled \$2.6 billion at September 30, 2009, compared to \$3.1 billion at year-end 2008. The level of these borrowings can fluctuate significantly on a day-to-day basis, depending on funding needs and which sources of funds are used to satisfy those needs.

Short-term borrowings decreased since year-end primarily due to a net decrease of \$10 billion of Term Auction Facility (TAF) funding. The TAF was designed to address pressures in short-term funding markets. Regions repaid all borrowings under the TAF during the third quarter of 2009.

Table of Contents**LONG-TERM BORROWINGS**

Long-term borrowings are summarized as follows:

Table 11 Long-Term Borrowings

<i>(In millions)</i>	September 30 2009	December 31 2008	September 30 2008
Federal Home Loan Bank structured advances	\$ 2,396	\$ 1,628	\$ 1,731
Other Federal Home Loan Bank advances	5,270	6,469	5,219
6.375% subordinated notes due May 2012	598	598	598
7.75% subordinated notes due March 2011	515	523	526
7.00% subordinated notes due March 2011	500	499	499
7.375% subordinated notes due December 2037	300	300	300
6.125% subordinated notes due March 2009		175	176
6.75% subordinated debentures due November 2025	163	163	163
7.75% subordinated notes due September 2024	100	100	100
7.50% subordinated notes due May 2018 (Regions Bank)	750	750	749
6.45% subordinated notes due June 2037 (Regions Bank)	497	497	497
4.85% subordinated notes due April 2013 (Regions Bank)	491	490	489
5.20% subordinated notes due April 2015 (Regions Bank)	346	345	345
3.25% senior bank notes due December 2011	2,001	2,001	
2.75% senior bank notes due December 2010	999	999	
LIBOR floating rate senior bank notes due June 2010	250	250	
LIBOR floating rate senior bank notes due December 2010	500	500	
4.375% senior notes due December 2010	497	495	494
LIBOR floating rate senior notes due June 2012	350	350	350
LIBOR floating rate senior notes due June 2009		250	250
6.625% junior subordinated notes due May 2047	498	700	700
8.875% junior subordinated notes due June 2048	345	345	345
Other long-term debt	459	484	498
Valuation adjustments on hedged long-term debt	268	320	139
	\$ 18,093	\$ 19,231	\$ 14,168

Long-term borrowings decreased \$1.1 billion since year-end 2008 due primarily to decreases in Federal Home Loan Bank (FHLB) advances of approximately \$431 million and the maturities of \$175 million in subordinated notes during the first quarter and \$250 million of senior notes in the second quarter of 2009.

On June 22, 2009, the Company exchanged 33 million common shares for \$202 million of outstanding 6.625% trust preferred securities issued by Regions Financing Trust II (the Trust). The trust preferred securities were exchanged for junior subordinated notes issued by the Company to the Trust. The Company recognized a pre-tax gain of approximately \$61 million on the extinguishment of the junior subordinated notes (see Note 3 Stockholders Equity and Comprehensive Income to the consolidated financial statements).

STOCKHOLDERS EQUITY

Stockholders equity was \$18.5 billion at September 30, 2009 compared to \$16.8 billion at December 31, 2008 with the increase primarily generated from public offerings of common and preferred stock during the second quarter of 2009. During the first nine months of 2009, net losses reduced stockholders equity by \$488 million, cash dividends declared reduced equity by \$94 million for common stock and \$140 million for preferred stock, and changes in accumulated other comprehensive income increased equity by \$165 million.

Table of Contents

On May 7, 2009, the final results of the Federal Reserve's Supervisory Capital Assessment Program (SCAP) were released requiring Regions to submit a capital plan to its regulators detailing the steps to be utilized to increase total Tier 1 common by \$2.5 billion, of which at least \$0.4 billion had to be new Tier 1 equity (see Table 12 and Table 14 for further discussion).

On May 20, 2009, the Company issued 287,500 shares of mandatory convertible preferred stock, Series B (Series B shares), generating net proceeds of approximately \$278 million. Regions will pay annual dividends at a rate of 10% per share on the initial liquidation preference of \$1,000 per share. Series B shares may be converted into common shares: 1) at December 15, 2010 (the mandatory conversion date), 2) prior to December 15, 2010 at the option of the holder, 3) upon occurrence of certain changes in ownership as defined in the offering documents, or 4) prior to December 15, 2010 at the option of the Company. At the mandatory conversion date, the Series B shares are subject to conversion into shares of Regions' common stock with a per share conversion rate of not more than approximately 250 shares of common stock and not less than approximately 227 shares of common stock dependent upon the applicable market price, subject to anti-dilution adjustments. The Series B shares are not redeemable and rank senior to common stock and to each other class of capital stock established in the future, and on parity with the Series A preferred stock previously issued to the U.S. Treasury. If converted at September 30, 2009, approximately 65 million shares of Regions' common stock would have been issued.

The Company's public equity offering of common stock, announced May 20, 2009, resulted in the issuance of 460 million shares at \$4 per share, generating proceeds of approximately \$1.8 billion, net of issuance costs.

In addition to the offerings mentioned above, the Company also exchanged approximately 33 million common shares for \$202 million of outstanding 6.625% trust preferred securities issued by Regions Financing Trust II (the Trust). The trust preferred securities were exchanged for junior subordinated notes issued by the Company to the Trust. The Company recognized a pre-tax gain of approximately \$61 million on the extinguishment of the junior subordinated notes. The increase in shareholders' equity related to the debt for common share exchange was approximately \$135 million, net of issuance costs and income taxes.

These public offerings along with other capital raising efforts result in Regions fully meeting the Tier 1 common equity capital requirements prescribed by the Federal Reserve's SCAP (see Table 14 GAAP to Non-GAAP Reconciliation for further discussion).

Regions' ratio of stockholders' equity to total assets was 13.21% at September 30, 2009, compared to 11.50% at December 31, 2008. Regions' ratio of tangible common stockholders' equity to tangible assets was 6.56% at September 30, 2009, compared to 5.23% at December 31, 2008 (see Table 14 GAAP to Non-GAAP Reconciliation for further discussion).

At September 30, 2009, Regions had 23.1 million common shares available for repurchase through open market transactions under an existing share repurchase authorization. There were no treasury stock purchases through open market transactions during the first nine months of 2009. The Company's ability to repurchase its common stock is limited by the terms of the Purchase Agreement between Regions and the U.S. Treasury entered into on November 14, 2008, pursuant to the U.S. Treasury's Capital Purchase Program. See Part II, Item 2 (Unregistered Sales of Equity Securities and Use of Proceeds).

The Board of Directors declared a \$0.01 cash dividend for the third quarter of 2009, compared to \$0.10 for the third quarter of 2008. Given the current operating environment, the quarterly cash dividend was reduced to further strengthen Regions' capital position. Regions does not expect to increase its quarterly dividend above \$0.01 for the foreseeable future.

REGULATORY CAPITAL REQUIREMENTS

Regions and Regions Bank are required to comply with capital adequacy standards established by banking regulatory agencies. Currently, there are two basic measures of capital adequacy: risk-based measures and a leverage measure.

Table of Contents

The risk-based capital standards are designed to make regulatory capital requirements more sensitive to differences in credit risk profiles among banks and bank holding companies, to account for off-balance sheet exposure and interest rate risk, and to minimize disincentives for holding liquid assets. Assets and off-balance sheet items are assigned to broad risk categories, each with specified risk-weighting factors. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items. Banking organizations that are considered to have excessive interest rate risk exposure are required to maintain higher levels of capital.

The minimum standard for the ratio of total capital to risk-weighted assets is 8%. At least 50% of that capital level must consist of common equity, undivided profits and non-cumulative perpetual preferred stock, less goodwill and certain other intangibles (Tier 1 Capital). The remainder (Tier 2 Capital) may consist of a limited amount of other preferred stock, mandatory convertible securities, subordinated debt, and a limited amount of the allowance for loan losses. The sum of Tier 1 Capital and Tier 2 Capital is total risk-based capital or total capital.

The banking regulatory agencies also have adopted regulations that supplement the risk-based guidelines to include a minimum ratio of 3% of Tier 1 Capital to average assets less goodwill (the Leverage ratio). Depending upon the risk profile of the institution and other factors, the regulatory agencies may require a Leverage ratio of 1% to 2% above the minimum 3% level.

In connection with the SCAP, banking regulators began supplementing their assessment of the capital adequacy of a bank based on a variation of Tier 1 capital, known as Tier 1 common equity. While not codified, analysts and banking regulators have assessed Regions' capital adequacy using the tangible common stockholders' equity and/or the Tier 1 common equity measure. Because tangible common stockholders' equity and Tier 1 common equity are not formally defined by GAAP or codified in the federal banking regulations, these measures are considered to be non-GAAP financial measures and other entities may calculate them differently than Regions' disclosed calculations (see Table 14 GAAP to Non-GAAP Reconciliation for further details).

The following chart summarizes the applicable holding company and bank regulatory capital requirements. Regions' capital ratios at September 30, 2009, December 31, 2008 and September 30, 2008 substantially exceeded all regulatory requirements.

Table 12 Regulatory Capital Requirements

	September 30, 2009 Ratio	December 31, 2008 Ratio	September 30, 2008 Ratio	To Be Well Capitalized
Tier 1 Common (non-GAAP):				
Regions Financial Corporation	7.88%	6.57%	6.51%	NA(1)
Tier 1 Capital:				
Regions Financial Corporation	12.15%	10.38%	7.47%	6.00%
Regions Bank	10.89	8.41	8.51	6.00
Total Capital:				
Regions Financial Corporation	16.28%	14.64%	11.70%	10.00%
Regions Bank	14.10	11.55	11.63	10.00
Leverage:				
Regions Financial Corporation	9.68%	8.47%	6.67%	5.00%
Regions Bank	8.77	6.91	7.67	5.00

- (1) The Board of Governors of the Federal Reserve System has identified 4% as the level of Tier 1 Common capital sufficient to withstand adverse economic scenarios.

Table of Contents

LIQUIDITY

GENERAL

Liquidity is an important factor in the financial condition of Regions and affects Regions' ability to meet the borrowing needs and deposit withdrawal requirements of its customers. Assets, consisting principally of loans and securities, are funded by customer deposits, purchased funds, borrowed funds and stockholders' equity. The challenges of the current market environment demonstrate the importance of having and using various sources of liquidity to satisfy the Company's funding requirements. See Note 12 "Commitments and Contingencies" to the consolidated financial statements for additional discussion of the Company's funding requirements.

The securities portfolio is one of Regions' primary sources of liquidity. Maturities of securities provide a constant flow of funds available for cash needs (see Note 6 "Securities" to the consolidated financial statements). Maturities in the loan portfolio also provide a steady flow of funds. Additional funds are provided from payments on consumer loans and one-to-four family residential mortgage loans. Historically, Regions' high levels of pre-provision earnings have also contributed to cash flow. In addition, liquidity needs can be met by the borrowing of funds in state and national money markets. Since the fourth quarter of 2008 Regions has not been reliant on unsecured funding from the short-term markets. Regions has continued to test those markets and has entered them only when opportunistic trading is available. The Company's funding and contingency planning does not currently include any reliance on unsecured sources. Regions has chosen to focus on using short-term secured sources of funding until longer term organic balance sheet solutions can be implemented.

Historically, Regions' liquidity has been enhanced by its relatively stable deposit base. While this deposit base is significant in size, during most of 2008 deposit disintermediation through a flight to quality, such as Treasury securities, and increased pricing competition from community banks and some large competitors led to a reduction in deposits. However, during the fourth quarter of 2008 and the first nine months of 2009, Regions' customer base grew substantially in response to competitive offers and customers' desire to lock-in rates in the falling rate environment, as well as the introduction of new consumer and business checking products.

Regions' financing arrangement with FHLB Atlanta adds additional flexibility in managing its liquidity position. As of September 30, 2009 Regions' borrowings from FHLB Atlanta totaled \$9.1 billion. The additional amount that could be borrowed under the current borrowing agreement is approximately \$1.7 billion. However, the actual borrowing capacity is contingent on the amount of collateral pledged to FHLB Atlanta. At September 30, 2009, approximately \$10.8 billion in lendable collateral value was pledged to secure borrowings from FHLB Atlanta. This collateral consisted of first mortgage loans on one-to-four family dwellings, home equity lines of credit, commercial real estate loans, and securities held by Regions Bank and its subsidiaries. Investment in FHLB Atlanta stock is required in relation to the level of outstanding borrowings. Regions held \$466 million in FHLB Atlanta stock at September 30, 2009. The FHLB has been and is expected to continue to be a reliable and economical source of funding.

In May 2007, Regions filed a shelf registration statement with the U.S. Securities and Exchange Commission. This shelf registration does not have a capacity limit and can be utilized by Regions to issue various debt and/or equity securities.

At September 30, 2009, Regions Bank had issued the maximum amount of \$5 billion under its previously approved Bank Note program. In July 2008, the Board of Directors approved a new Bank Note program that allows Regions Bank to issue up to \$20 billion aggregate principal amount of bank notes that can be outstanding at any one time. No issuances have been made under this program as of September 30, 2009. Notes issued under the new program may be senior notes with maturities from 30 days to 15 years and subordinated notes with maturities from 5 years to 30 years. These notes are not deposits and they are not insured or guaranteed by the FDIC.

As of September 30, 2009, based on assets available for collateral as of that date, Regions could have borrowed either an additional \$20.8 billion with terms of less than 29 days, or \$16.6 billion with terms of greater

Table of Contents

than or equal to 29 days, from the Federal Reserve Bank through its discount window and/or the TAF program. On October 19, 2009, the Federal Reserve Bank released a new collateral margin table for loans and securities pledged to the discount window. These new margins significantly reduced the lendable collateral value available to all participating banks. As a result of these margin reductions, Regions' borrowing availability after October 19 was changed to \$15 billion for terms of less than 29 days, or \$12 billion with terms of greater than or equal to 29 days. Regions does not currently have any plans to borrow again through the TAF program. However, the program will continue to be a short-term, inexpensive contingency option for the Company until longer term organic solutions can be implemented. Future fundings under commitments to extend credit would increase Regions' borrowing capacity under these programs.

Regions may, from time to time, consider opportunistically retiring our outstanding issued securities, including our subordinated debt, trust preferred securities and preferred shares in privately negotiated or open market transactions for cash or common shares.

Morgan Keegan maintains certain lines of credit with unaffiliated banks to manage liquidity in the ordinary course of business.

See the Stockholders' Equity section for discussion of the Federal Reserve's Supervisory Capital Assessment Program.

RATINGS

The following table reflects the debt ratings information of Regions Financial Corporation and Regions Bank by Standard & Poor's, Moody's Investors Service, Fitch Ratings and Dominion Bond Rating Service as of September 30, 2009:

Table 13 Credit Ratings

	As of September 30, 2009			
	Standard & Poor's	Moody's	Fitch	Dominion
Regions Financial Corporation				
Senior notes	BBB+	Baa3	A-	A
Subordinated notes	BBB	Ba1	BBB+	AL
Junior subordinated notes	BB+	Ba2	BBB	AL
Regions Bank				
Short-term debt	A-2	P-2	F1	R-1M
Long-term bank deposits	A-	Baa1	A	AH
Long-term debt	A-	Baa1	A-	AH
Subordinated debt	BBB+	Baa2	BBB+	A

Table of Contents

On October 22, 2009, Dominion Bond Rating Service downgraded obligations of Regions Financial Corporation and Regions Bank. The following table presents debt ratings information subsequent to the ratings actions:

	As of October 22, 2009 Dominion
Regions Financial Corporation	
Senior notes	AL
Subordinated notes	BBBH
Junior subordinated notes	BBBH
Regions Bank	
Short-term debt	R-1L
Long-term bank deposits	A
Long-term debt	A
Subordinated debt	AL

On November 4, 2009, Standard & Poor's downgraded obligations of Regions Financial Corporation and Regions Bank. The following table presents debt ratings information subsequent to the ratings actions:

	As of November 4, 2009 Standard & Poor's
Regions Financial Corporation	
Senior notes	BBB
Subordinated notes	BBB-
Junior subordinated notes	BB
Regions Bank	
Short-term debt	A-2
Long-term bank deposits	BBB+
Long-term debt	BBB+
Subordinated debt	BBB

During the third quarter of 2009, Moody's Investor Services affirmed their rating of Regions Financial Corporation's junior subordinated notes.

A security rating is not a recommendation to buy, sell or hold securities, and the ratings above are subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.

OPERATING RESULTS

The tables below present computations of earnings and certain other financial measures excluding merger charges, including average tangible common stockholders' equity, end of period tangible common stockholders' equity and Tier 1 common equity all of which are non-GAAP. Merger charges are included in financial results presented in accordance with generally accepted accounting principles (GAAP). Regions believes the exclusion of merger charges in expressing earnings and certain other financial measures, including earnings per common share, excluding merger charges and return on average tangible common stockholders' equity, excluding merger charges provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results of the Company and predicting future performance. These non-GAAP financial measures are also used by management to assess the performance of Regions' business, because management does not consider merger charges to be relevant to ongoing operating results. Management and the Board of Directors utilize these non-GAAP financial measures as follows:

Preparation of Regions' operating budgets

Calculation of performance-based annual incentive bonuses for executives

Table of Contents

Calculation of performance-based multi-year incentive bonuses for executives

Monthly financial performance reporting, including segment reporting

Monthly close-out flash reporting of consolidated results (management only)

Presentations to investors of Company performance

Regions believes that presenting these non-GAAP financial measures will permit investors to assess the performance of the Company on the same basis as that applied by management and the Board of Directors. The third quarter of 2008 was the final quarter for merger charges related to the AmSouth Bancorporation acquisition.

Tangible common stockholders' equity ratios have become a focus of some investors and management believes they may assist investors in analyzing the capital position of the Company absent the effects of intangible assets and preferred stock. Traditionally, the Federal Reserve and other banking regulators have assessed a bank's capital adequacy based on Tier 1 capital, the calculation of which is codified in federal banking regulations. In connection with the SCAP, these regulators began supplementing their assessment of the capital adequacy of a bank based on a variation of Tier 1 capital, known as Tier 1 common equity. While not codified, analysts and banking regulators have assessed Regions' capital adequacy using the tangible common stockholders' equity and/or the Tier 1 common equity measure. Because tangible common stockholders' equity and Tier 1 common equity are not formally defined by GAAP or codified in the federal banking regulations, these measures are considered to be non-GAAP financial measures and other entities may calculate them differently than Regions' disclosed calculations. Since analysts and banking regulators may assess Regions' capital adequacy using tangible common stockholders' equity and Tier 1 common equity, Regions believes that it is useful to provide investors the ability to assess Regions' capital adequacy on these same bases.

Tier 1 common equity is often expressed as a percentage of risk-weighted assets. Under the risk-based capital framework, a bank's balance sheet assets and credit equivalent amounts of off-balance sheet items are assigned to one of four broad risk categories. The aggregated dollar amount in each category is then multiplied by the risk weighting assigned to that category. The resulting weighted values from each of the four categories are added together and this sum is the risk-weighted assets total that, as adjusted, comprises the denominator of certain risk-based capital ratios. Tier 1 capital is then divided by this denominator (risk-weighted assets) to determine the Tier 1 capital ratio. Adjustments are made to Tier 1 capital to arrive at Tier 1 common equity. Tier 1 common equity is also divided by the risk-weighted assets to determine the Tier 1 common equity ratio. The amounts disclosed as risk-weighted assets are calculated consistent with banking regulatory requirements.

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. To mitigate these limitations, Regions has policies in place to address expenses that qualify as merger charges, procedures in place to approve and segregate merger charges from other normal operating expenses and procedures in place to ensure that these measures are calculated using the appropriate GAAP or regulatory components to ensure that the Company's operating results and capital performance are properly reflected for period-to-period comparisons. Although these non-GAAP financial measures are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analyses of results as reported under GAAP. In particular, a measure of earnings that excludes merger charges does not represent the amount that effectively accrues to stockholders' equity (i.e., merger charges are a reduction to earnings and stockholders' equity).

Table of Contents

The following tables provide: 1) reconciliations of GAAP net income (loss) available to common shareholders and earnings per common share to non-GAAP financial measures, 2) a reconciliation of average and ending stockholders' equity (GAAP) to average and ending tangible common stockholders' equity (non-GAAP), and 3) a reconciliation of stockholders' equity (GAAP) to Tier 1 capital (regulatory) and to Tier 1 common equity (non-GAAP).

- (1) Loans, net of unearned income include non-accrual loans for all periods presented.
- (2) Interest income includes net loan fees of \$15,995,000 and \$40,700,000 for the nine months ended September 30, 2009 and 2008, respectively.
- (3) The computation of taxable-equivalent net interest income is based on the statutory federal income tax rate of 35%, adjusted for applicable state income taxes net of the related federal tax benefit.

Table of Contents

For the third quarter of 2009, net interest income (taxable-equivalent basis) totaled \$853 million compared to \$931 million in the third quarter of 2008. The net interest margin (taxable-equivalent basis) was 2.73% in the third quarter of 2009, compared to 3.10% during the second quarter of 2008. For the first nine months of 2009, net interest income (taxable-equivalent basis) totaled \$2.5 billion compared to \$2.9 billion in the first nine months of 2008. The net interest margin (taxable-equivalent basis) was 2.66% in the first nine months of 2009, compared to 3.33% during the same period of 2008.

The decline in the net interest margin is being impacted primarily by factors directly and indirectly associated with the erosion of economic and industry conditions since late 2007. During that period, the Federal Reserve lowered the Federal Funds Rate by approximately 500 basis points. Regions' balance sheet was in an asset sensitive position during 2008, meaning that decreases in interest rates caused contraction in the Company's net interest margin. This period also saw a rapid, industry-wide curtailment of access to wholesale funding markets, which intensified price-based competition for retail deposits, and have kept costs relatively high, despite the precipitous decline in interest rates. Furthermore, the accompanying increases in non-performing loans have negatively impacted asset yields.

More recently, however, modest improvement in market conditions has produced some easing in deposit pricing, and has coincided with advantageous gains in non-interest bearing deposit balances. These influences, combined with the benefits of improving spreads on newly originated and renewed loans, should help stabilize the net interest margin even if the Federal Funds Rate were to remain at present levels.

MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates, commodity prices, equity prices or the credit quality of debt securities.

INTEREST RATE SENSITIVITY

Regions' primary market risk is interest rate risk, including uncertainty with respect to absolute interest rate levels as well as uncertainty with respect to relative interest rate levels, which is impacted by both the shape and the slope of the various yield curves that affect the financial products and services that the Company offers. To quantify this risk, Regions measures the change in its net interest income in various interest rate scenarios compared to a base case scenario. Net interest income sensitivity is a useful short-term indicator of Regions' interest rate risk.

Sensitivity Measurement Financial simulation models are Regions' primary tools used to measure interest rate exposure. Using a wide range of sophisticated simulation techniques provides management with extensive information on the potential impact to net interest income caused by changes in interest rates. Models are structured to simulate cash flows and accrual characteristics of Regions' balance sheet. Assumptions are made about the direction and volatility of interest rates, the slope of the yield curve, and the changing composition of the balance sheet that result from both strategic plans and from customer behavior. Among the assumptions are expectations of balance sheet growth and composition, the pricing and maturity characteristics of existing business and the characteristics of future business. Interest rate-related risks are expressly considered, such as pricing spreads, the lag time in pricing administered rate accounts, prepayments and other option risks. Regions considers these factors, as well as the degree of certainty or uncertainty surrounding their future behavior. Financial derivative instruments are used in hedging the values and cash flows of selected assets and liabilities against changes in interest rates. The effect of these hedges is included in the simulations of net interest income.

The primary objective of asset/liability management at Regions is to coordinate balance sheet composition with interest rate risk management to sustain a reasonable and stable net interest income throughout various interest rate cycles. A standard set of alternate interest rate scenarios is compared to the results of the base case scenario to determine the extent of potential fluctuations and to establish exposure limits. The standard set of

Table of Contents

interest rate scenarios includes the traditional instantaneous parallel rate shifts of plus and minus 100 and 200 basis points. In addition, Regions includes simulations of gradual interest rate movements that may more realistically mimic potential interest rate movements. The gradual scenarios include curve steepening, flattening, and parallel movements of various magnitudes phased in over a six-month period.

Exposure to Interest Rate Movements As of September 30, 2009, Regions was asset sensitive in positioning to both gradual and instantaneous rate shifts. The following table demonstrates the estimated potential effects that gradual (over six months beginning at September 30, 2009 and 2008, respectively) and instantaneous parallel interest rate shifts would have on Regions' annual net interest income. Where scenarios would indicate negative interest rates, a minimum of zero is applied.

As evidenced by the change in the sensitivity levels from September 30, 2008 to September 30, 2009, the Company has chosen to shift to a more neutral position for the near term. This movement is a consequence of management's actions to address the short-run risk that interest rates remain low, while preserving a favorable positioning to future rises in interest rates. Accordingly, Regions has moderated interest rate sensitivity for approximately the next twelve months, using a series of short-term derivative instruments, which have little impact on the balance sheet's longer-term asset sensitivity. Specific strategies include execution of interest rate futures and interest rate swaps hedging variable rate loans and fixed rate funding instruments. Beyond the next twelve months as the short-term strategies mature, the Company will be more asset sensitive.

Table 17 Interest Rate Sensitivity

	Estimated Annual % Change in Net Interest Income September 30	
	2009	2008
Gradual Change in Interest Rates		
+200 basis points	1.6%	6.2%
+100 basis points	1.3	3.4
-100 basis points	0.5	(4.3)
-200 basis points	(1.3)	(6.8)
	Estimated Annual % Change in Net Interest Income September 30	
	2009	2008
Instantaneous Change in Interest Rates		
+200 basis points	1.2%	4.6%
+100 basis points	1.4	2.8
-100 basis points	0.4	(4.5)
-200 basis points	(3.0)	(6.2)
DERIVATIVES		

Regions uses financial derivative instruments for management of interest rate sensitivity. The Asset and Liability Committee (ALCO), which consists of members of Regions' senior management team, in its oversight role for the management of interest rate sensitivity, approves the use of derivatives in balance sheet hedging strategies. The most common derivatives Regions employs are forward rate contracts, Eurodollar futures contracts, interest rate swaps, options on interest rate swaps, interest rate caps and floors, and forward sale commitments. Derivatives are also used to offset the risks associated with customer derivatives, which include interest rate, credit and foreign exchange risks. Refer to Note 10, Derivative Instruments and Hedging Activities for further discussion.

Regions manages the credit risk of these instruments in much the same way as it manages credit risk of the loan portfolios by establishing credit limits for each counterparty and through collateral agreements for dealer

Table of Contents

transactions. For non-dealer transactions, the need for collateral is evaluated on an individual transaction basis and is primarily dependent on the financial strength of the counterparty. Credit risk is also reduced significantly by entering into legally enforceable master netting agreements. When there is more than one transaction with a counterparty and there is a legally enforceable master netting agreement in place, the exposure represents the net of the gain and loss positions with and collateral received from and/or posted to that counterparty.

The primary objective of Regions' hedging strategies is to mitigate the impact of interest rate changes, from an economic perspective, on net interest income and the net present value of its balance sheet. The overall effectiveness of these hedging strategies is subject to market conditions, the quality of Regions' execution, the accuracy of its valuation assumptions, counterparty credit risk and changes in interest rates. As a result, Regions' hedging strategies may be ineffective in mitigating the impact of interest rate changes on its earnings.

On January 1, 2009, Regions began accounting for mortgage servicing rights at fair market value with any changes to fair value being recorded within mortgage income. Also, in early 2009, Regions entered into derivative transactions to mitigate the impact of market value fluctuations related to mortgage servicing rights. Derivative instruments entered into in the future could be materially different from the current risk profile of Regions' current portfolio.

BROKERAGE AND MARKET MAKING ACTIVITY

REFERENCES BELOW, AND ELSEWHERE IN THIS FORM 10-Q, TO MORGAN KEEGAN ARE INTENDED TO INCLUDE NOT ONLY MORGAN KEEGAN & COMPANY, INC. BUT ALSO CERTAIN OF ITS AFFILIATES AND SUBSIDIARIES. YOU SHOULD NOT ASSUME OR INFER THAT ANY SPECIFIC ACTIVITY MENTIONED IS CARRIED ON BY ANY PARTICULAR MORGAN KEEGAN ENTITY.

Morgan Keegan's business activities, including its securities inventory positions and securities held for investment, expose it to market risk.

Morgan Keegan trades for its own account in corporate and tax-exempt securities and U.S. Government agency and Government-sponsored securities. Most of these transactions are entered into to facilitate the execution of customers' orders to buy or sell these securities. In addition, it trades certain equity securities in order to "make a market" in these securities. Morgan Keegan's trading activities require the commitment of capital. All principal transactions place the subsidiary's capital at risk. Profits and losses are dependent upon the skills of employees and market fluctuations. In order to mitigate the risks of carrying inventory and as part of other normal brokerage activities, Morgan Keegan assumes short positions on securities.

In the normal course of business, Morgan Keegan enters into underwriting and forward and future commitments. At September 30, 2009, the contract amounts of futures contracts were \$6 million to purchase and \$185 million to sell U.S. Government and municipal securities. Morgan Keegan typically settles its position by entering into equal but opposite contracts and, as such, the contract amounts do not necessarily represent future cash requirements. Settlement of the transactions relating to such commitments is not expected to have a material effect on Regions' consolidated financial position. Transactions involving future settlement give rise to market risk, which represents the potential loss that can be caused by a change in the market value of a particular financial instrument. Regions' exposure to market risk is determined by a number of factors, including the size, composition and diversification of positions held, the absolute and relative levels of interest rates, and market volatility.

Additionally, in the normal course of business, Morgan Keegan enters into transactions for delayed delivery, to-be-announced securities, which are recorded in trading account assets on the consolidated balance sheets at fair value. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from unfavorable changes in interest rates or the market values of the securities underlying the instruments. The credit risk associated with these contracts is typically limited to the cost of replacing all contracts on which Morgan Keegan has recorded an unrealized gain. For exchange-traded contracts, the clearing organization acts as the counterparty to specific transactions and, therefore, bears the risk of delivery to and from counterparties.

Table of Contents

Interest rate risk at Morgan Keegan arises from the exposure of holding interest-sensitive financial instruments such as government, corporate and municipal bonds, and certain preferred equities. Morgan Keegan manages its exposure to interest rate risk by setting and monitoring limits and, where feasible, entering into offsetting positions in securities with similar interest rate risk characteristics. Securities inventories recorded in trading account assets on the consolidated balance sheets, are marked to market, and, accordingly, there are no unrecorded gains or losses in value. While a significant portion of the securities inventories have contractual maturities in excess of five years, these inventories, on average, turn over in excess of twelve times per year. Accordingly, the exposure to interest rate risk inherent in Morgan Keegan's securities inventories is less than that of similar financial instruments held by firms in other industries. Morgan Keegan's equity securities inventories are exposed to risk of loss in the event of unfavorable price movements. Also, Morgan Keegan is subject to credit risk arising from non-performance by trading counterparties, customers and issuers of debt securities owned. This risk is managed by imposing and monitoring position limits, monitoring trading counterparties, reviewing security concentrations, holding and marking to market collateral, and conducting business through clearing organizations that guarantee performance. Morgan Keegan regularly participates in the trading of some derivative securities for its customers; however, this activity does not involve Morgan Keegan acquiring a position or commitment in these products and this trading is not a significant portion of Morgan Keegan's business.

To manage trading risks arising from interest rate and equity price risks, Regions uses a Value at Risk (VAR) model along with other risk management methods to measure the potential fair value the Company could lose on its trading positions given a specified statistical confidence level and time-to-liquidate time horizon. The end-of-period VAR was approximately \$2.1 million as of September 30, 2009 and \$1.1 million at December 31, 2008. Maximum daily VAR utilization during the third quarter of 2009 was \$2.4 million and average daily VAR during the same period was \$1.8 million.

Morgan Keegan has been an underwriter and dealer in auction rate securities. See Note 12 "Commitments and Contingencies" to the consolidated financial statements as well as Item 1. "Legal Proceedings" of Part II "Other Information" for more details regarding regulatory action related to Morgan Keegan auction rate securities. As of September 30, 2009, customers of Morgan Keegan owned approximately \$288 million of auction rate securities, and Morgan Keegan held approximately \$137 million of auction rate securities on the balance sheet.

PROVISION FOR LOAN LOSSES

The provision for loan losses is used to maintain the allowance for loan losses at a level that in management's judgment is adequate to cover losses inherent in the portfolio at the balance sheet date. In the third quarter of 2009, the provision for loan losses was \$1.025 billion and net charge-offs were \$680 million. In the same quarter of 2008, the provision was \$417 million, while net charge-offs were \$416 million. Net charge-offs as a percent of average loans (annualized) were 2.86% for the third quarter of 2009 compared to 1.68% for the corresponding period in 2008. For the first nine months of 2009, the provision for loan losses was \$2.4 billion and net charge-offs were \$1.6 billion. For the same period of 2008, the provision for loan losses was \$907 million and net charge-offs were \$751 million. Net charge-offs as a percent of average loans (annualized) was 2.19% for the first nine months of 2009 compared to 1.03% for the corresponding period in 2008. The increase in the loan loss provision for the third quarter and the first nine months of 2009 was primarily driven by focused efforts to identify and address loan portfolio stress, as well as continued deterioration in the residential homebuilder, condominium and home equity portfolios. The severe economic recession which has been an outgrowth of a protracted national housing slump is continuing to affect the real estate industry. These developments resulted in a significant migration of homebuilder and condominium loans into non-performing status since December 31, 2008. Additionally income-producing commercial real estate, including multi-family and retail, significantly contributed to the third quarter 2009 inflows. The Company considers increases in non-performing loans to be one of the indicators of increased risks inherent in the portfolio. These increased risks drove the need for a higher level of allowance for loan losses, requiring charges to the provision for loan losses.

Table of Contents

Given continuing pressure on residential property values especially in Florida and North Georgia increasing unemployment and a generally uncertain economic backdrop, the Company expects credit costs to remain elevated.

CREDIT RISK

The commercial and industrial loan portfolio primarily consists of loans to middle market commercial customers doing business in Regions geographic footprint. Loans in this portfolio are generally underwritten individually and usually secured with the assets of the company and/or the personal guarantee of the business owners.

The commercial real estate portfolio includes various loan types. A large portion consists of owner-occupied loans to businesses for long-term financing of land and buildings. These loans are generally underwritten and managed in the commercial business line because the primary repayment source is the cash flow from the business. Regions attempts to minimize risk on owner-occupied properties by requiring collateral values that exceed the loan amount, adequate cash flow to service the debt, and, in many cases, the personal guarantees of the principals of the borrowers. Another large component of commercial real estate loans consists of loans to real estate developers and investors for the financing of land or buildings, where the repayment is generated from the sale of the real estate or income generated by the real estate property.

Construction loans are primarily extensions of credit to real estate developers or investors where repayment is dependent on the sale of real estate or income generated from the real estate collateral. A construction loan may also be to a commercial business for the development of land or construction of a building where the repayment is usually derived from revenues generated from the business of the borrower. These loans are generally underwritten and managed by a specialized real estate group that also manages loan disbursements during the construction process. Credit quality of the construction portfolio is sensitive to risks associated with construction loans such as cost overruns, project completion risk, general contractor credit risk, environmental and other hazard risks, and market risks associated with the sale or rental of completed properties.

Loans on one-to-four family residential properties are secured principally by single-family residences. Loans of this type are generally smaller in size and are geographically dispersed throughout Regions market areas, with some guaranteed by government agencies or private mortgage insurers. Equity loans and lines, while not included in this category, are similar in nature to one-to-four family loans, except that approximately 58% of equity loans and lines are in a second lien position. Losses on the residential and equity line and loan portfolios depend, to a large degree, on the level of interest rates, the unemployment rate, economic conditions and collateral values, and thus are difficult to predict.

Loans within the indirect portfolio consist mainly of automobile, marine and recreational vehicle loans originated through third-party business relationships. During the fourth quarter of 2008, Regions ceased originating automobile loans through the retail indirect lending channel. Other consumer loans consist primarily of borrowings for home improvements, student loans, automobiles, overdrafts and other personal household purposes. Losses within this grouping vary according to the specific type of loan. Certain risks, such as a general slowing of the economy, rising unemployment rates and changes in consumer demand, may impact future loss rates.

Table of Contents**NON-INTEREST INCOME**

The following tables present a summary of non-interest income:

Table 18 Non-Interest Income

<i>(In millions)</i>	Three Months Ended September 30		% Change
	2009	2008	
Service charges on deposit accounts	\$ 300	\$ 294	1.96%
Brokerage, investment banking and capital markets	252	241	4.40
Mortgage income	76	33	129.48
Trust department income	49	66	(25.76)
Securities gains, net	4		NM
Insurance commissions and fees	25	26	(2.15)
Leveraged lease termination gains	4		NM
Bank owned life insurance	21	19	13.81
Other miscellaneous income	41	40	1.55
	\$ 772	\$ 719	7.37%

<i>(In millions)</i>	Nine Months Ended September 30		% Change
	2009	2008	
Service charges on deposit accounts	\$ 857	\$ 860	(0.31)%
Brokerage, investment banking and capital markets	732	786	(6.79)
Mortgage income	213	104	103.58
Trust department income	143	182	(21.46)
Securities gains, net	165	92	80.26
Insurance commissions and fees	80	84	(3.97)
Leveraged lease termination gains	517		NM
Visa-related gains	80	63	26.98
Gain on early extinguishment of debt	61		NM
Other miscellaneous income	189	200	(5.51)
	\$ 3,037	\$ 2,371	28.07%

Total non-interest income increased in the first nine months of 2009 compared to the same periods of 2008, due primarily to several items impacting 2009 with no corresponding impact on 2008. These items include gains from terminations of leveraged leases and a gain on extinguishment of debt realized in connection with the Company's issuance of common stock in exchange for trust preferred securities. Higher gains from sales of portfolio securities also contributed to the increases. The impact of the sale of Visa shares in the first nine months of 2009 was partially offset by the redemption of Visa shares in the first nine months of 2008. Additionally, as discussed in detail below, mortgage income was higher in the third quarter and first nine months of 2009 compared to the same periods of 2008. A decrease in trust department income for the quarterly period partially offset the increase. Decreases in non-interest income attributable to brokerage, investment banking and capital markets income and trust department income partially offset the increase for the nine-month period.

Service charges on deposit accounts Service charges on deposit accounts increased in the third quarter of 2009 by \$6 million and decreased in the first nine months of 2009 by \$3 million, respectively, compared to the same periods in 2008. Service charge revenues generally reflect a weakening economy in the first half of 2009 as compared to 2008 with lower transaction volumes and overall activity. However, during the third quarter of 2009, service charge revenue increased as compared to immediately preceding quarters due to a higher level of customer transactions and new account growth.

Table of Contents

Brokerage, investment banking and capital markets The majority of this category of income is generated by Morgan Keegan. Brokerage, investment banking and capital markets income increased in the third quarter of 2009 by \$11 million compared to the same period in 2008. The increase was primarily due to higher fixed income and equity capital markets revenue from Morgan Keegan. However, during the first nine months of 2009, brokerage, investment banking and capital markets income decreased by \$54 million compared to the same period in 2008. The decreases were due primarily to the impact of general economic pressure on capital markets income.

The following table details the components of net income contributed by Morgan Keegan:

Table 19 Morgan Keegan

<i>(In millions)</i>	Three Months Ended September 30		Nine Months Ended September 30	
	2009	2008	2009	2008

Nine months ended						
September 30, 2008:						
Gross revenue	\$ 258	\$ 260	\$ 105	\$ 177	\$ 131	\$ 75
Percent of gross revenue	25.6%	25.8%	10.4%	17.6%	13.0%	7.6%

Mortgage income Mortgage income increased in the third quarter of 2009 and the first nine months of 2009 by \$43 million and \$109 million, respectively, compared to the same periods in 2008. The quarterly and year-to-date increases were due to customers taking advantage of historically low mortgage rates as the Company experienced \$1.8 billion and \$7.7 billion in mortgage originations during the third quarter and first nine months of 2009, respectively. Included in mortgage income during the third quarter and first nine months of 2009 was \$19.1 million and \$16.3 million, respectively, due to the impact of the market valuation adjustment for mortgage servicing rights and related derivatives.

Trust department income Trust department income decreased in the third quarter of 2009 and the first nine months of 2009 by \$17 million and \$39 million, respectively, compared to the same periods in 2008. The decrease during the 2009 periods is primarily due to lower fees which are driven by lower overall asset valuations. Also, trust department income for the 2008 periods included fees from energy-related brokered transactions, which did not repeat in 2009, contributing to the year-over-year decrease.

Securities gains, net Securities gains increased in the third quarter of 2009 and the first nine months of 2009 by \$4 million and \$73 million, respectively, compared to the same periods in 2008. The increases reflect a higher realization on sale of portfolio securities within the available for sale category as part of the Company's asset/liability management strategies. In the first quarter of 2009, Regions sold approximately \$656 million of U.S. Treasury securities available for sale and recognized a gain of approximately \$53 million. The proceeds were reinvested in U.S. government agency mortgage-backed securities classified as available for sale. In the second quarter of 2009, Regions sold approximately \$1.4 billion of agency debentures available for sale and recognized a gain of approximately \$108 million. The proceeds were reinvested in U.S. government agency mortgage-backed securities classified as available for sale, as part of Regions asset/liability management strategy. In the third quarter of 2009, Regions liquidated its approximate \$877 million portfolio of non-agency commercial mortgage-backed securities and recognized a loss of less than \$1 million as a strategy to eliminate

Table of Contents

exposure to commercial real estate in the investment portfolio. Regions is also in the process of liquidating its municipal bond portfolio due to the deteriorating fiscal position of many state and local entities and sold approximately \$171 million at a gain of approximately \$4.7 million prior to quarter-end. An immaterial amount of other-than-temporary impairment was recorded on the remaining portion of the municipal bond portfolio, approximately \$236 million, which will be sold in the fourth quarter.

Leveraged lease termination gains During the third quarter and the first nine months of 2009, non-interest income includes gains of \$4 million and \$517 million, respectively, relating to the Company's termination of certain leveraged lease transactions. A 2008 settlement with the IRS negatively impacted the economics of Regions' leveraged lease portfolio. Consequently, these transactions in the first nine months of 2009 offered Regions the opportunity to redeploy capital at higher returns. The termination gains included in non-interest income were largely offset by increases in income tax expense of \$4 million for the third quarter of 2009 and \$515 million for the first nine months of 2009, resulting in a minimal impact of the leveraged lease terminations to net income.

Visa-related gains In the first quarter of 2008, Visa executed an initial public offering (IPO) of common stock and, in connection with the IPO, Regions' ownership interest in Visa was converted into Class B common stock of approximately 3.8 million shares. Regions recognized a \$63 million gain upon the redemption of a portion of its Visa Class B common stock which increased non-interest income for the nine months ended September 30, 2008. In the second quarter of 2009, Regions sold its remaining Visa Class B common stock referred to above to a third party. The sale resulted in a gain of \$80 million, increasing non-interest income for the first nine months of 2009.

Gain on early extinguishment of debt In the second quarter of 2009, Regions settled its offer to exchange common shares for outstanding 6.625% Trust Preferred Securities issued by Regions Financing Trust II (the Trust). In connection with this exchange, the Company recognized a gain on extinguishment of junior subordinated debt issued to the Trust. The extinguishment resulted in an increase to non-interest income of \$61 million for the first nine months of 2009, with no corresponding increase for the same period in 2008. For further details, see Note 3 Stockholders' Equity and Comprehensive Income to the consolidated financial statements.

NON-INTEREST EXPENSE

Table 21 Non-Interest Expense (including Non-GAAP reconciliation) presents a summary of non-interest expense, as well as a detail of merger charges (see Table 14 GAAP to Non-GAAP Reconciliation). Regions incurred merger-related expenses during the third quarter and first nine months of 2008 in connection with the integration of Regions and AmSouth. For expanded discussion of certain significant non-interest expense items, refer to the discussion of each component following the tables presented.

Table of Contents**Table 21 Non-Interest Expense (including Non-GAAP reconciliation)**

	\$ 3,532	\$ 3,519	\$ 201	\$ 3,318	6.42%

(1) No merger charges were recorded during 2009.

(2) Includes \$266 million for the nine months ended September 30, 2009 of gross charges, net of \$191 million non-credit portion reported in other comprehensive income (loss).

Edgar Filing: REGIONS FINANCIAL CORP - Form 10-Q

Salaries and employee benefits During the third quarter of 2009 and the first nine months of 2009, salaries and benefits (excluding merger charges) increased \$51 million and \$43 million, respectively, compared to the same periods of 2008 due primarily to incentives tied to mortgage and deposit growth which increased during the same periods. The increases were partially offset by a reduced level of expense due to lower headcount. As of September 30, 2009, Regions employed 28,995 associates compared to 30,673 at September 30, 2008.

Table of Contents

Net occupancy expense During the third quarter of 2009 and the first nine months of 2009, net occupancy expense increased \$11 million and \$16 million, respectively, compared to the same periods of 2008. The increase in both periods is primarily due to branch consolidation charges of \$9 million in the third quarter of 2009.

Furniture and equipment expense During the third quarter and first nine months of 2009, furniture and equipment expense decreased \$5 million and \$13 million, respectively, compared to the same periods of 2008, primarily due to lower depreciation. Branch consolidation charges of \$7 million partially offset the decreases.

Impairment / Recapture of mortgage servicing rights, net During the third quarter of 2009 non-interest expense decreased when compared to the same period in 2008 by \$11 million due to 2008 impairment of mortgage servicing rights. During the first nine months of 2009, non-interest expense increased when compared to the same periods in 2008 by \$14 million due to the 2008 recapture of mortgage servicing rights. In January 2009, Regions began accounting for mortgage servicing rights at fair market value with any changes to fair value being recorded in mortgage income. Accordingly, there is no similar impact to non-interest expense for the corresponding 2009 periods.

Professional fees Professional fees for the third quarter and first nine months of 2009 increased \$47 million and \$68 million compared to the same periods in 2008 (excluding merger charges) primarily due to higher legal expenses at Morgan Keegan and credit-related legal costs.

Other real estate owned (OREO) expense OREO expense increased in the third quarter of 2009 and the first nine months of 2009 as compared to the corresponding periods in 2008 by \$17 million and \$40 million, respectively. The increased expense in both periods is related to the continued decline in the housing market as well as an increase in volume of OREO properties held on the balance sheet.

FDIC premiums FDIC premiums increased in the third quarter of 2009 and the first nine months of 2009 as compared to the corresponding periods in 2008 by \$52 million and \$100 million, respectively. The increases resulted from higher insured deposit balances and higher premium rates. Additionally, during 2009 Regions utilized its remaining assessment credits, which contributed further to the increase in premiums in 2009.

FDIC premiums special assessment Regions incurred a \$64 million premium during the second quarter of 2009 to replenish the Deposit Insurance Fund. It is possible that additional special assessments will be incurred in the future.

The FDIC has proposed that all institutions prepay, on December 30, 2009, estimated assessments for the fourth quarter of 2009 (typically paid one quarter in arrears), and for all of 2010, 2011, and 2012. For purposes of calculating the prepaid amount, the base assessment rate in effect at September 30, 2009 would be used for 2010. That rate would be increased by 3 basis points for 2011 and 2012 assessments. The prepayment calculation would also assume a 5 percent annual growth rate through the end of 2012.

Other-than-temporary impairments, net (OTTI) OTTI decreased in the third quarter of 2009 by \$6 million and increased in the first nine months of 2009 as compared to the corresponding periods in 2008 by \$65 million. See Note 6 Securities to the consolidated financial statements and Table 8 Securities for further details.

Other miscellaneous expenses Other miscellaneous expenses decreased in the third quarter of 2009 and the first nine months of 2009 as compared to the corresponding periods in 2008 (excluding merger charges) by \$34 million and \$125 million, respectively. The decreases in both periods were attributable to several factors. As discussed above, in January 2009, Regions began accounting for mortgage servicing rights at fair market value with any changes to fair value being recorded in mortgage income. At that time, Regions was no longer required to adjust non-interest expense for amortization of mortgage servicing rights. The impact of the amortization expense for the third quarter of 2008 and the first nine months of 2008 was \$13 million and \$59 million, respectively. There was no corresponding impact for the same periods in 2009, resulting in a decrease to other

Table of Contents

non-interest expense. Additionally, included in other non-interest expense for the third quarter and first nine months of 2008 were \$9 million and \$47 million of write-downs on investments in two Morgan Keegan mutual funds, respectively, with no similar expense during 2009. The impact of these items on the change in other miscellaneous expenses for the first nine months of 2009 as compared to the corresponding period in 2008 was partially offset by a first quarter 2008 reduction in litigation expense related to the Visa IPO of \$28 million.

INCOME TAXES

Regions' third quarter and year-to-date 2009 provision for income taxes from continuing operations decreased \$280 million and \$115 million, respectively, compared to the same periods in 2008. The effective tax rate from continuing operations for the third quarter and first nine months of 2009 was 42.1% and 31.2%, respectively, compared to 6.1% and 26.7% in the third quarter and first nine months of 2008, respectively. The third quarter 2009 effective tax rate generally resulted from the pre-tax loss and anticipated permanent differences. The year-to-date 2009 effective tax rate was unusually high due to the tax expense generated by leveraged lease terminations even though there was a pre-tax loss for the period.

Income taxes from continuing operations for financial reporting purposes differs from the amount computed by applying the statutory federal income tax rate of 35% for the three and nine months ended September 30, for the reasons below:

Table 22 Income Taxes

<i>(In millions)</i>	Three Months Ended September 30

Table of Contents

Periodically, Regions invests in pass-through investment vehicles that generate tax credits, principally low-income housing, which directly reduce Regions' federal income tax liability. Congress has legislated these tax credit programs to encourage capital inflows to these investment vehicles. The amount of tax benefit recognized from these tax credits was \$20 million and \$60 million in the third quarter and first nine months of 2009, respectively, compared to \$15 million and \$43 million in the third quarter and first nine months of 2008, respectively.

Regions has segregated a portion of its investment securities and intellectual property into separate legal entities in order to, among other business purposes, maximize the return on such assets by the professional and focused management thereof. Regions has recognized state tax benefits related to these legal entities of \$6 million and \$20 million in the third quarter and first nine months of 2009, respectively, compared to \$10 million and \$31 million in the third quarter and first nine months of 2008, respectively.

Management's determination of the realization of deferred tax assets is based upon management's judgment of various future events and uncertainties, including the timing, nature and amount of future income earned by certain subsidiaries and the implementation of various plans to maximize realization of deferred tax assets in addition to taxable income within the carryback period. Management believes that the subsidiaries will generate sufficient operating earnings to realize the deferred tax benefits. However, management does not believe that it is more-likely-than-not that all of its state net operating loss carryforwards will be realized. Accordingly, a valuation allowance has been established in the amount of \$25 million against such benefits at September 30, 2009, compared to \$26 million at September 30, 2008.

Regions and its subsidiaries file income tax returns in the United States, as well as in various state jurisdictions. As the successor of acquired taxpayers, Regions is responsible for the resolution of audits from both federal and state taxing authorities. In December 2008, the Company reached an agreement with the Internal Revenue Service Appeals Division on the Federal tax treatment of a broad range of uncertain tax positions. The agreement covered the Federal tax returns of Regions Financial Corporation, Union Planters Corporation and AmSouth Bancorporation for tax years 1999-2006. With a few exceptions in certain state jurisdictions, the Company is no longer subject to state and local income tax examinations by taxing authorities for years before 2003, which would include audits of acquired entities. Certain states have proposed various adjustments to the Company's previously filed tax returns. Management is currently evaluating those proposed adjustments; however, the Company does not anticipate the adjustments would result in a material change to its financial position or results of operations.

As of September 30, 2009 and December 31, 2008, the liability for gross unrecognized tax benefits was approximately \$35 million and \$55 million, respectively. Essentially, all of the Company's liability for gross unrecognized tax benefits as of September 30, 2009 would reduce the Company's effective tax rate, if recognized. As of September 30, 2009, the Company recognized a liability of approximately \$5 million for interest, on a pre-tax basis.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Reference is made to pages 70 through 73 included in Management's Discussion and Analysis.

Item 4. Controls and Procedures

Based on an evaluation, as of the end of the period covered by this Form 10-Q, under the supervision and with the participation of Regions management, including its Chief Executive Officer and Chief Financial Officer, the Chief Executive Officer and Chief Financial Officer have concluded that Regions' disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) are effective. During the quarter ended September 30, 2009, there have been no changes in Regions' internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, Regions' internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Regions and its affiliates are subject to litigation, including the litigation discussed below, and claims arising in the ordinary course of business. Punitive damages are routinely claimed in these cases. Regions continues to be concerned about the general trend in litigation involving large damage awards against financial service company defendants. Regions evaluates these contingencies based on information currently available, including advice of counsel and assessment of available insurance coverage. Although it is not possible to predict the ultimate resolution or financial liability with respect to these litigation contingencies, management is currently of the opinion that the outcome of pending and threatened litigation would not have a material effect on Regions' business, consolidated financial position or results of operations, except to the extent indicated in the discussion below.

In late 2007 and during 2008, Regions and certain of its affiliates were named in class-action lawsuits filed in federal and state courts on behalf of investors who purchased shares of certain Regions Morgan Keegan Select Funds (the Funds) and shareholders of Regions. The Funds were formerly managed by Morgan Asset Management, Inc. The complaints contain various allegations, including claims that the Funds and the defendants misrepresented or failed to disclose material facts relating to the activities of the Funds. No class has been certified, and at this stage of the lawsuits Regions cannot determine the probability of a material adverse result or reasonably estimate a range of potential exposures, if any. However, it is possible that an adverse resolution of these matters may be material to Regions' business, consolidated financial position or results of operations.

Certain of the shareholders in these Funds and other interested parties have entered into arbitration proceedings and individual civil claims, in lieu of participating in the class actions. Although it is not possible to predict the ultimate resolution or financial liability with respect to these contingencies, management is currently of the opinion that the outcome of these proceedings would not have a material effect on Regions' business, consolidated financial position or results of operations.

In July 2009, Morgan Keegan & Company, Inc. (Morgan Keegan), a wholly-owned subsidiary of Regions, Morgan Asset Management, Inc. and three employees each received a Wells notice from the Staff of the Atlanta Regional Office of the Securities and Exchange Commission (SEC) stating that the Staff intends to recommend that the Commission bring enforcement actions for possible violations of the federal securities laws. The potential actions relate to the Staff's investigation of the Funds. Additionally, in July 2009, Morgan Keegan received a Wells notice from the enforcement staff of the Financial Industry Regulatory Authority (FINRA) advising Morgan Keegan that it had made a preliminary determination to recommend disciplinary action against Morgan Keegan for violation of various NASD rules relating to sales of the Funds during 2006 and 2007. A Wells notice is neither a formal allegation nor a finding of wrongdoing. The notices provide the recipients the opportunity to provide their perspective and to address issues raised prior to any formal action being taken by the SEC or FINRA. Responses have been submitted to both the SEC and FINRA notices. Also, a joint state task force has indicated that it is considering charges against Morgan Keegan, related entities and certain of their officers in connection with sales of the Funds. Discussions are ongoing with the state securities commissioners in the task force about the proposed charges and possible resolutions. Although it is not possible to predict the ultimate resolution or financial liability with respect to these matters, management is currently of the opinion that the outcome of these matters will not have a material effect on Regions' business, consolidated financial position or results of operations.

In March 2009, Morgan Keegan received a Wells notice from the SEC's Atlanta Regional Office related to auction rate securities (ARS) indicating that the SEC staff intended to recommend that the Commission take civil action against Morgan Keegan. On July 21, 2009, the SEC filed a complaint in United States District Court for the Northern District of Georgia against Morgan Keegan alleging violations of the federal securities laws in connection with ARS that Morgan Keegan underwrote, marketed and sold. The SEC is seeking an injunction against Morgan Keegan for violations of the antifraud provisions of the federal securities laws, as well as

Table of Contents

disgorgement, financial penalties and other equitable relief for customers, including repurchase by Morgan Keegan of all ARS that it sold prior to March 20, 2008. Beginning in February 2009, Morgan Keegan commenced a voluntary program to repurchase ARS that it underwrote and sold to the firm's customers, and extended that repurchase program in the third quarter of 2009 to include ARS that were sold by Morgan Keegan to its customers but were underwritten by other firms. As of September 30, 2009, customers of Morgan Keegan owned approximately \$288 million of ARS and Morgan Keegan held approximately \$137 million of ARS on its balance sheet. On July 21, 2009, the Alabama Securities Commission issued a Show Cause order to Morgan Keegan arising out of the ARS matter that is the subject of the SEC complaint described above. The order requires Morgan Keegan to show cause why its registration as a broker-dealer should not be suspended or revoked in the State of Alabama and also why it should not be subject to disgorgement, repurchasing all ARS sold to Alabama residents and payment of costs and penalties. Although it is not possible to predict the ultimate resolution or financial liability with respect to the ARS matter, management is currently of the opinion that the outcome of this matter will not have a material effect on Regions' business, consolidated financial position or results of operations.

In April 2009, Regions, Regions Financing Trust III (the Trust) and certain of Regions' current and former directors, were named in a purported class-action lawsuit filed in the U.S. District Court for the Southern District of New York on behalf of the purchasers of trust preferred securities offered by the Trust. The complaint alleges that defendants made statements in Regions' registration statement, prospectus and year-end filings which were materially false and misleading. No class has been certified, and at this stage of the lawsuit Regions cannot determine the probability of a material adverse result or reasonably estimate a range of potential exposures, if any. However, it is possible that an adverse resolution of these matters may be material to Regions' business, consolidated financial position or results of operations.

Item 1A. Risk Factors

The following is an additional risk factor for Regions, to be read in conjunction with Item 1A., Risk Factors in Regions' Annual Report on Form 10-K for the year ended December 31, 2008 and in Regions' Quarterly Reports on Form 10-Q for the periods ended March 31, 2009 and June 30, 2009.

Ratings agencies recently downgraded our securities and the deposit ratings of Regions Bank; these downgrades and any subsequent downgrades could adversely impact the price and liquidity of our securities and could have an adverse impact on our businesses and results of operations.

The ratings assigned to Regions' debt securities and the debt securities of Regions Bank have recently been downgraded. On May 18, 2009, Regions' senior notes, subordinated notes and junior subordinated notes and Regions Bank's financial strength, long-term deposits and short-term deposits were downgraded, by Moody's Investors Service (Moody's). Moody's maintains a negative outlook on Regions. On June 17, 2009, in connection with an industry-wide review of the financial sector, Standard & Poor's downgraded Regions' senior notes, subordinated notes and junior subordinated notes, and Regions Bank's short-term deposits, senior notes and subordinated notes. As part of a similar industry-wide review of the financial sector, on June 16, 2009, Fitch Ratings (Fitch) downgraded Regions' senior notes, subordinated notes and junior subordinated notes, and Regions Bank's senior notes and subordinated notes. Regions Bank's short-term deposit rating of F1 was affirmed by Fitch. Fitch maintains a negative outlook on Regions. On October 22, 2009, Dominion Bond Rating Service downgraded Regions' senior notes, subordinated notes and junior subordinated notes, and Regions Bank's short-term debt, long-term bank deposits, long-term debt and subordinated debt. On November 4, 2009, Standard & Poor's announced an additional downgrade of Regions' senior notes, subordinated notes and junior subordinated notes and Regions Bank's long-term bank deposits, long-term debt and subordinated debt. Standard & Poor's maintains a negative outlook on Regions. See Table 13 Credit Ratings in Management's Discussion and Analysis for a tabular presentation of ratings as of September 30, 2009, as well as tabular presentations of the recent downgrades. The ratings assigned to Regions' debt securities and the debt securities of Regions Bank remain subject to change at any time and it is possible that any of the ratings agencies will further downgrade these obligations.

Table of Contents

In general, ratings agencies base their ratings on many quantitative and qualitative factors, including capital adequacy, liquidity, asset quality, business mix and level and quality of earnings, and Regions may not be able to maintain its current credit ratings. In addition, ratings agencies have themselves been subject to scrutiny arising from the financial crisis such that the rating agencies may make or may be required to make substantial changes to their ratings policies and practices. Such changes may, among other things, adversely affect the ratings of Regions securities or other securities in which Regions has an economic interest. Any decrease, or potential decrease, in credit ratings could impact Regions' access to the capital markets or short-term funding and/or increase our financing costs, and thereby adversely affect Regions' liquidity and financial condition. Where Regions Bank is providing forms of credit support such as letters of credit, standby lending arrangements or other forms of credit support, a decline in short-term credit ratings may require that customers of Regions Bank seek replacement credit support from a higher rated institution. We cannot predict whether customer relationships or opportunities for future relationships could be adversely affected by customers who choose to do business with a higher rated institution.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Information concerning Regions' repurchases of its outstanding common stock during the three-month period ended September 30, 2009, is set forth in the following table:

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 - 31, 2009				23,072,300
August 1 - 31, 2009				23,072,300
September 1 - 30, 2009				23,072,300
Total				23,072,300

On January 18, 2007, Regions' Board of Directors authorized the repurchase of 50 million shares of Regions' common stock through open market or privately negotiated transactions and announced the authorization of this repurchase. As indicated in the table above, approximately 23.1 million shares remain available for repurchase under the existing plan.

Restrictions on Dividends and Repurchase of Stock

Holders of Regions common stock are only entitled to receive such dividends as Regions' board of directors may declare out of funds legally available for such payments. Furthermore, holders of Regions common stock are subject to the prior dividend rights of any holders of Regions preferred stock then outstanding. As of September 30, 2009, there were 3,500,000 shares of Regions' Fixed Rate Cumulative Perpetual Preferred Stock Series A (the Series A Preferred Stock) and 287,500 shares of Regions' 10% Mandatory Convertible Preferred Stock, Series B (the Mandatorily Convertible Preferred Stock), each with liquidation amount of \$1,000 per share, issued and outstanding. Under the terms of the Series A Preferred Stock and the Mandatorily Convertible Preferred Stock, Regions' ability to declare and pay dividends on or repurchase Regions common stock will be subject to restrictions in the event Regions fails to declare and pay (or set aside for payment) full dividends on the Series A Preferred Stock or the Mandatorily Convertible Preferred Stock.

Regions has reduced its quarterly common stock dividend to \$0.01 per share. Furthermore, as long as the Series A Preferred Stock or the Mandatorily Convertible Preferred Stock are outstanding, dividend payments and repurchases or redemptions relating to certain equity securities, including Regions common stock, are prohibited until all accrued and unpaid dividends are paid on such preferred stock, subject to certain limited exceptions. In

Table of Contents

addition, prior to November 14, 2011, unless Regions has redeemed all of the Series A Preferred Stock or the U.S. Treasury has transferred all of the Series A Preferred Stock to third parties, the consent of the U.S. Treasury will be required for Regions to, among other things, increase its common stock dividend above \$0.10 except in limited circumstances. Regions does not expect to increase its quarterly dividend above \$0.01 for the foreseeable future. Also, Regions is a bank holding company, and its ability to declare and pay dividends is dependent on certain federal regulatory considerations, including the guidelines of the Federal Reserve regarding capital adequacy and dividends.

In addition, the terms of Regions' outstanding junior subordinated debt securities prohibit it from declaring or paying any dividends or distributions on Regions' capital stock, including its common stock, or purchasing, acquiring, or making a liquidation payment on such stock, if Regions has given notice of its election to defer interest payments but the related deferral period has not yet commenced or a deferral period is continuing.
