- Attached: Press Release

LG DISPLAY REPORTS THIRD QUARTER 2011 RESULTS

SEOUL, Korea 20 October, 2011 LG Display [NYSE: LPL, KRX: 034220], a leading innovator of TFT-LCD technology, reported today unaudited earnings results based on consolidated IFRS (International Financial Reporting Standards) for the three-month period ending September 30, 2011.

Sales in the third quarter of 2011 increased by 4% to KRW 6,269 billion from KRW 6,047 billion in the second quarter of 2011, and decreased by 6% compared with KRW 6,698 billion in the third quarter of 2010.

Operating loss in the third quarter of 2011 was KRW 492 billion. This compares with a loss of KRW 48 billion in the second quarter of 2011 and operating profit of KRW 182 billion in the third quarter of 2010.

EBITDA in the third quarter of 2011 was KRW 456 billion, a decrease of 46% from KRW 845 billion in the second quarter of 2011 and a year-on-year decrease of 54% from KRW 986 billion in the third quarter of 2010.

Net loss was 688 billion in the third quarter of 2011 compared with net income of KRW 21 billion in the second quarter of 2011 and net income of KRW 224 billion in the third quarter of 2010.

Due to sharp rise in the exchange rate at the end of the quarter, net foreign exchange loss associated with factors such as customer advances and liabilities denominated in foreign currency, deepened the deficit in the income statement. However, due to low portion of these liabilities nearing their maturity date for the next three months, it is highly likely that the net foreign exchange loss can be reverted into the net foreign exchange gain if we factored in the projected foreign exchange movement.

LG Display has been building differentiated competencies to gain market share, cost competitiveness and product superiority. As a result, we were able to maintain our competitive position despite the challenges in the economy such as the global recession. It is regretful that there was an increased deficit in the income statement due to exchange rate rise at the end of the quarter which translated to foreign exchange losses. noted Mr. Young Soo Kwon, CEO of LG Display. Improvement of business structure through measures such as cost reduction, adjustment of inventory and utilization appears to be effective and based on efficient operation strategies we have been implementing; we re committed to making a rapid recovery ahead of our peers when the market situation improves.

The company shipped a total of 8.10 million square meters of net display area in the third quarter of 2011, an increase of 9% quarter-on-quarter.

TFT-LCD panels for TVs, monitors, notebook PCs, smartbooks and mobile applications accounted for 47%, 19%, 14%, 11% and 9%, respectively, on a revenue basis in the third quarter.

With KRW 2,032 billion of cash and cash equivalents and 143% of liability to equity ratio as of September 30, 2011, the financial structure of the company remains stable.

Outlook

The following expectations are based on information as of September 30, 2011. The Company does not expect to update its expectations until next quarter's earnings announcement. However, the Company reserves the right to update its full business outlook, or any portion thereof, at any time and for any reason.

LG Display expects total display shipments to increase by a low single digit percentage in the fourth quarter compared to the third quarter. Also, further decline in panel prices is expected to be limited. said James Jeong, CFO of LG Display. Although uncertainty over market demand is expected to persist in the fourth quarter LG Display will expand the portion of its premium products based on differentiated technology. Meanwhile, we will continue aggressive cost reduction efforts and work under tighter cash flow management to improve profitability while fostering future growth for long term shareholder value.

Earnings Conference and Conference Call

LG Display will hold a Korean language earnings conference on October 20, 2011, at 4 p.m. Korea Standard Time at the Hall (4F), Korea Investment & Securities Building, Yeouido, Seoul, Korea.
