Wells Fargo Advantage Funds

The global financial markets throughout most of the past six months may best be defined by the uncertainty about the sustainability of the U.S. economic recovery and ongoing concerns about the Greek debt crisis and the overall health of the eurozone.

Dear Valued Shareholder:

We're pleased to offer you this semi-annual report for the *Wells Fargo Advantage Multi-Sector Income Fund* for the six-month period that ended April 30, 2012.

The global financial markets throughout most of the past six months may best be defined by the uncertainty about the sustainability of the U.S. economic recovery and ongoing concerns about the Greek debt crisis and the overall health of the eurozone. During periods of elevated uncertainty, many global investors sold riskier assets such as high-beta¹ equities, commodities, emerging markets securities, and high-yield bonds in preference for the relative safety of U.S. Treasuries. In periods of lower volatility, investor risk tolerance sharply rose and investors sought out the higher yield and return potential of those riskier investments.

During the first several months of 2012, investor sentiment appeared to be more positive and balanced than earlier in the year. This recent shift in sentiment was the result of improvement in the global macroeconomic backdrop, which we believe contributed to a less volatile market environment and more stable earnings growth expectations. These developments seemed to encourage investors to refocus on underlying fundamentals and a longer-term investment perspective, sparking the first-quarter 2012 U.S. equity rally that was led by stocks and sectors that were shunned at times in 2011, notably retail and higher-growth information technology names. In addition, as investors' risk tolerance increased during the period, corporate bonds, including high-yield bonds, were favored over the relative safety and lower yields offered by U.S. Treasuries.

After struggling in the early part of the six-month period, most global equity markets rallied to post positive total returns on the whole. In fact, during the first three months of 2012, many of the major U.S. equity indexes realized the strongest first-quarter performance in more than 10 years.

During the six-month period, the S&P 500 Index² and the Russell 3000[®] Index³ posted returns of 12.77% and 12.74%, respectively, while the Barclays U.S. Aggregate Bond Index⁴, representing the universe of investment-grade U.S. bonds, posted a total return of 2.44%. By comparison, the Barclays U.S. Corporate High Yield Bond Index⁵ added 6.91% and the Barclays U.S. Treasury Index⁶ returned 1.87%.

On the international front, the MSCI EAFE Index⁷ returned 0.74% during the six-month period, while the BofA Merrill Lynch Global Broad Market Ex. U.S. Index⁸,

1. Beta measures fund volatility relative to general market movements. It is a standardized measure of systematic risk in comparison to a specified index. The benchmark beta is 1.00 by definition. Beta is based on historical performance and does not represent future results.
2. The S&P 500 Index consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value weighted index with each stock's weight in the index proportionate to its market value. You cannot invest directly in an index.
3. The Russell 3000[®] Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S. equity market. You cannot invest directly in an index.
4. The Barclays U.S. Aggregate Bond Index is composed of the Barclays Government/Credit Index and the Mortgage-Backed Securities Index and includes U.S. Treasury issues, agency issues, corporate bond issues, and mortgage-backed securities. You cannot invest directly in an index.
5. The Barclays U.S. Corporate High Yield Bond Index is an unmanaged, U.S. dollar denominated, nonconvertible, non-investment grade debt index. The index consists of domestic and corporate bonds rated Ba and below with a minimum outstanding amount of \$150 million. You cannot invest directly in an index.
6. The Barclays U.S. Treasury Index is an index of U.S. Treasury securities. You cannot invest directly in an index.

representative of the international investment-grade bond market, returned 0.08%.

Wells Fargo Advantage Multi-Sector Income Fund 3

Developed global economies regained some momentum during the period.

Developed global economies showed some positive signs during the period, but ongoing credit issues continued to threaten sustainable growth across most of Europe. The U.S. economy, by comparison, showed more consistent upward momentum, but certain areas namely, the employment situation and the housing market remained a concern.

The U.S. Bureau of Economic Analysis reported that U.S. gross domestic product (GDP) expanded to an annual growth rate of a 3.0% annualized rate in the fourth quarter of 2011, reigniting hopes of a sustainable U.S. economic recovery. Those hopes were buoyed further by the preliminary estimate of first-quarter 2012 GDP, which showed that growth remains positive, with a 1.9% annual rate. While few economists now believe that the U.S. economy is in danger of sliding back into recession seen as a possibility at the beginning of the period many continue to expect a tepid economic growth environment throughout 2012.

Within the eurozone, GDP grew at an annualized rate of 1.5% for 2011, which was modestly weaker from a year earlier when eurozone GDP was reported at an annualized rate of 2.0% in the fourth quarter of 2010. Considering the fiscal challenges that faced European countries throughout 2011 stemming primarily from the re-emergence of the Greek debt crisis most economists had expected weaker economic conditions in 2011. While several steps have been taken by the International Monetary Fund and the European Central Bank (ECB) to address the ongoing fiscal challenges in Europe, economic conditions within many countries in the eurozone are likely to remain weak throughout 2012.

Central banks across the globe remain committed to accommodative policies.

With inflation seeming to be in check, the U.S. Federal Reserve (Fed) held its target range for the federal funds rate a proxy for short-term interest rates steady at 0% to 0.25%. Last summer, the Federal Open Market Committee (FOMC) issued a statement explaining that economic conditions were likely to warrant exceptionally low levels for the federal funds rate through at least mid-2013. That timetable was later revised to late 2014 following the FOMC meeting on January 25, 2012.

The ECB also continued to maintain an accommodative monetary policy throughout the period, primarily in an effort to stave off the contagion risk stemming from the ongoing concerns about the potential of Greece defaulting on its sovereign bonds. Fortunately, Greece received another bailout and was able to restructure its outstanding debt in February 2012, which seemed to alleviate near-term contagion risks and the possibility of the euro currency collapsing. However, the debt agreement did not fully address longer-term structural issues that affect

Developed global economies showed some positive signs during the period, but ongoing credit issues continued to threaten sustainable growth across most of Europe. The U.S. economy, by comparison, showed more consistent upward momentum, but certain areas namely, the employment situation and the housing market remained a concern.

Letter to Shareholders

not only Greece but several other countries across the eurozone. Recognizing the drag the persistent sovereign debt crisis has had on financial stability across the eurozone, the ECB introduced additional liquidity into the European banking system through its Long-Term Refinancing Operation (LTRO). The LTRO program effectively encourages European banks to buy sovereign bonds of the eurozone governments, helping to push yields lower on bonds from financially fragile countries like Spain and Italy. This type of activity helps reduce the near-term risk that those countries would experience funding issues. From a global credit market perspective, this additional liquidity further aims to help alleviate fears of contagion and may cause risk premiums to decline we believe an encouraging scenario for equities and high-yield bonds.

Recent events have not altered our message to shareholders.

The heightened volatility across the global financial markets during 2011 and lingering uncertainties about the outlook going forward have left many investors questioning their resolve and their investments. Yet, it is precisely at such times that the market may present opportunities as well as challenges for prudent investors. For many investors, simply building and maintaining a well-diversified investment plan focused on clear financial objectives is the best long-term strategy.

Thank you for choosing to invest with *Wells Fargo Advantage Funds*. We appreciate your confidence in us and remain committed to helping you meet your financial needs. Fund inception

June 25, 2003

Average annual total returns¹ (%) as of April 30, 2012

	6 Months*	1 Year	5 Year	Since inception
Based on market value	7.07	10.25	8.45	6.96
Based on net asset value (NAV) per share	5.62	5.67	8.29	8.32

* Returns for periods of less than one year are not annualized.

Figures quoted represent past performance, which is no guarantee of future results and do not reflect the deduction of taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of dividends and capital gains. To obtain performance information current to the most recent month-end, please call 1.800.730.6001.

The Fund's annualized expense ratio for the six months ended April 30, 2012, is 1.24%. Expense ratio includes 0.15% of interest expense.

Comparison of NAV vs. market value since inception³

The Fund is leveraged through a secured debt borrowing facility and may issue preferred shares. The use of leverage results in certain risks including, among others, the likelihood of greater volatility of net asset value and the market price of common shares. Foreign investments are especially volatile and can rise or fall dramatically due to differences in the political and economic conditions of the host country. These risks are generally intensified in emerging markets. Derivatives involve additional risks including interest rate risk, credit risk, the risk of improper valuation and the risk of non-correlation to the relevant instruments they are designed to hedge or to closely track. Bond fund values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. In general, when interest rates rise, bond fund values fall and investors may lose principal value. High-yield securities have a greater risk of default and tend to be more volatile than higher-rated debt securities. This Fund is exposed to mortgage- and asset-backed securities risk.

1. Total returns based on market value are calculated assuming a purchase of common stock at the closing market price prior to the first day's opening market price and a sale at the last day's closing market price for the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return do not reflect brokerage commissions or sales charges. If these charges were included, the returns would be lower.
2. Effective June 29, 2012, Christopher Wightman became a Portfolio Manager of the Fund.
3. This chart does not reflect any brokerage commissions or sales charges.

MANAGER'S DISCUSSION

Performance Highlights (Unaudited)

Strategy

The fear of a double-dip U.S. economic recession and a contagion resulting from the ongoing European debt crisis that was priced into the global financial market in late summer 2011 has lessened for now. Much of the fear surrounding the potential of cascading bank failures in Europe was removed in December 2011 when the European Central Bank (ECB)

initiated its Long-Term Refinancing Operation (LTRO). Since then, Greece has, thus far, avoided a disorderly default, and the ECB's LTRO have proved successful in providing liquidity to the banking system, helping to roll over sizable positions of maturing unsecured debt while also encouraging European banks to buy sovereign bonds. The primary beneficiaries have been risk assets such as U.S. equities and high-yield bonds.

During the six-month period, the international/emerging markets fixed-income portion of the Fund moved from a global (excluding U.S.) aggregate style to a more income-oriented style focusing on local developed and emerging markets with higher relative yields and stronger fundamentals. This repositioning had a positive effect on the Fund as emerging markets debt outperformed developed market bonds during the period.

The U.S. high-yield corporate bond market, as measured by the BofA Merrill Lynch U.S. High-Yield Master II Blended Index⁴, posted a six-month total return of 6.45%, buoyed by a strong U.S. equity market and steady improvement of U.S. economic conditions.

The mortgage/corporate sleeve continued to invest in adjustable-rate mortgage-backed securities but also began to invest in investment-grade corporate bonds and fixed-rate mortgages including mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. Within the mortgage and corporate bond markets, higher-beta sectors, such as financials and commercial mortgage-backed securities (CMBS), were the best-performing areas as market sentiment toward risk assets improved.

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

The ten largest holdings are calculated based on the value of the securities divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.

6. The ratings indicated are from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit Quality Ratings: Credit quality ratings apply to underlying holdings of the Fund and not the Fund itself. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of three rating agencies, the lower rating was utilized and if rated by one of the agencies that rating was utilized. Credit quality is subject to change and is calculated based on the total investments of the Fund.

7. Percentages are subject to change and are calculated based on the total long-term investments of the Fund.

Table of Contents

Performance Highlights (Unaudited)

Wells Fargo Advantage Multi-Sector Income Fund 7

Country allocation⁷ as of April 30, 2012**Contributors to performance**

The international/emerging markets bond allocation benefited from an overweight to emerging markets debt and an underweight to sovereign debt. Specifically, concentrations in the bond markets of Australia, Brazil, Hungary, Poland, and Russia were contributors to performance.

The U.S. high-yield bond portion of the Fund benefited from individual credit selection, specifically benefiting from strong market demand for fundamentally sound credits that continue to offer compelling yields.

The mortgage/corporate credit sleeve's focus on credits rated A or BBB added value as lower-rated credits outperformed the highest-quality credits, AAA- and AA-rated, in the period. The sleeve's exposure to CMBS and financial credits also contributed to returns.

Detractors from performance

The international/emerging markets exposures to the Australian dollar, Brazilian real, Indonesian rupiah, and Korean won detracted from performance. The U.S. high-yield allocation's preference for BB- and B-rated credits over CCC- and lower-rated bonds detracted from performance, as the lower-quality credit tiers performed best. While floating-rate bank loans posted positive returns during the quarter, they underperformed the broad high-yield bond market. Consequently, the Fund's increased exposure to bank loans was a drag on performance.

Management outlook

Consensus forecasts for global economic growth particularly into 2013 have firmed up further. Inflationary expectations remain benign and central banks around the globe retain highly accommodative stances. All of these factors have combined to help equity markets, nongovernment bonds, and select currencies recover from their late-November 2011 lows. With a partial resolution to the European Economic and Monetary Union debt crisis or at least a delay of the problems until a later date it looks as if the current strong market can continue through the spring and into the summer. A background of political stability will also remain an important requirement. Against this backdrop, the international/emerging markets portion of the Fund will continue to emphasize emerging markets debt and select developed markets such as Australia and New Zealand.

The U.S. economy is ideal for U.S. high yield, as it shows signs of steady improvement yet is weak enough to encourage extraordinarily accommodative monetary policy. Based on our assessment, although absolute yields remain low, yield spreads are still compensatory for the near- and medium-term default risk. If the Fed were to end some of its liquidity-enhancing programs and let markets have a greater influence on pricing, we would expect rates to rise rather quickly. Rising rates affect pricing across all asset classes, and high yield would likely experience higher average yields as a result. In this environment, the U.S. high-yield fixed-income team will remain focused on bottom-up credit analysis and individual issue selection to manage downside risk while maintaining its allocation toward floating-rate bank loans.

A gradual improvement in U.S. economic conditions remains the mortgage/corporate credit management team's base-case scenario for 2012. Risks to our outlook include the chance of a further spike in energy prices and the political uncertainty associated with the U.S. presidential and congressional elections in November. Against the backdrop of the uncertainty of an election year, it is reasonable to question how much progress will be made toward eliminating or reducing the inevitable impact of fiscal headwinds in January 2013. Some estimate as much as a 4% GDP drag if the 2001 and 2003 tax cuts are allowed to expire and the automatic spending cuts, as legislated in the Budget Control Act of 2011, are allowed to go into effect beginning in 2013. Clearly this is a material risk, and market participants are understandably anxious about it. In this environment, the team will continue to emphasize CMBS and nonagency mortgages relative to adjustable-rate mortgage securities.

144A Security that may be resold to qualified institutional buyers under Rule 144A or securities offered pursuant to Section 4(2) of the Securities Act of 1933, as amended.

Non-income earning security

¥ A payment-in-kind (PIK) security is a security in which the issuer may make interest or dividend payments in cash or additional securities. These additional securities generally have the same terms as the original holdings.

(s) Security is currently in default with regards to scheduled interest and/or principal payments. The Fund has stopped accruing interest on this security.

@ Foreign bond principal is denominated in local currency.

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

- (i) Illiquid security
- ⌘ Security issued in zero coupon form with no periodic interest payments.
- < All or a portion of the position represents an unfunded loan commitment.
- (l) Investment in an affiliate.
- (u) Rate shown is the 7-day annualized yield at period end.
- ## All or a portion of this security is segregated as collateral for unfunded loan commitments.
- * Cost for federal income tax purposes is \$894,138,762 and net unrealized appreciation (depreciation) consists of:

Gross unrealized appreciation	\$ 38,916,007
Gross unrealized depreciation	(16,284,137)
Net unrealized appreciation	\$ 22,631,870

1. Calculated based upon average common shares outstanding

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

2. Total return is calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions or sales charges. Returns for periods of less than one year are not annualized.

3. Interest expense ratio relates to interest associated with borrowings and/or leverage transactions.

4. The net investment income ratio reflects any distributions paid to preferred shareholders.

The accompanying notes are an integral part of these financial statements.

Table of Contents

32 Wells Fargo Advantage Multi-Sector Income Fund

Notes to Financial Statements (Unaudited)

1. ORGANIZATION

Wells Fargo Advantage Multi-Sector Income Fund (the Fund) was organized as a statutory trust under the laws of the state of Delaware on April 10, 2003 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. The primary investment objective of the Fund is to seek a high level of current income consistent with limiting its overall exposure to domestic interest-rate risk.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

Fixed income securities with original maturities exceeding 60 days are valued based on evaluated prices received from an independent pricing service approved by the Board of Trustees which may utilize both transaction data and market information such as yield, prices of securities of comparable quality, coupon rate, maturity, type of issue, trading characteristics and other market data. If valuations are not available from the pricing service or values received are deemed not representative of market value, values will be obtained from a third party broker-dealer or determined based on the Fund's Fair Value Procedures.

Investments in equity securities are valued each business day as of the close of regular trading on the New York Stock Exchange, which is usually 4:00 p.m. (Eastern Time). Securities which are traded on a national or foreign securities exchange are valued at the last reported sales price, except that securities listed on The Nasdaq Stock Market, Inc. (Nasdaq) are valued at the Nasdaq Official Closing Price (NOCP), and if no NOCP is available, then at the last reported sales price. If no sales price is shown on the Nasdaq, the bid price will be used. In the absence of any sale of securities listed on the Nasdaq, and in the case of other securities (including U.S. Government obligations, but excluding debt securities maturing in 60 days or less), the price will be deemed stale and the valuations will be determined in accordance with the Fund's Fair Value Procedures.

Securities denominated in foreign currencies are translated into U.S. dollars using the closing rates of exchange in effect on the day of valuation.

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of securities, then fair value pricing procedures approved by the Board of Trustees are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. As a result of the fair value pricing procedures, these securities which are normally categorized as Level 1 in the fair value hierarchy will represent a transfer from a Level 1 to a Level 2 security and will be categorized as Level 2. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in NAVs that are higher or lower than NAVs based on the closing price or latest quoted bid price. On April 30, 2012, fair value pricing was not used in pricing foreign securities.

Debt securities of sufficient credit quality with original maturities of 60 days or less generally are valued at amortized cost which approximates fair value. The amortized cost method involves valuing a security at its cost, plus accretion of discount or minus amortization of premium over the period until maturity.

Investments in open-end mutual funds are valued at net asset value.

Investments which are not valued using any of the methods discussed above, are valued at their fair value, as determined by procedures established in good faith and approved by the Board of Trustees. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary in determining the fair value of portfolio securities, unless the responsibility has been delegated to the Management Valuation Team of Wells Fargo Funds

Table of Contents

Notes to Financial Statements (Unaudited)

Wells Fargo Advantage Multi-Sector Income Fund 33

Management, LLC (Funds Management). The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Fair Value Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees considers for ratification any valuation actions taken by the Valuation Committee or the Management Valuation Team.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market information to assess the continued appropriateness of the fair valuation methodology used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the input factors considered in the valuation process until there is a readily available price provided on the exchange or by an independent pricing service. Valuations received from an independent pricing service or broker quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or sub-adviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. Assets, including investment securities, and liabilities denominated in foreign currency are translated into U.S. dollars at the prevailing rates of exchange at the date of valuation. Purchases and sales of securities, and income and expenses are translated at the prevailing rate of exchange on the respective dates of such transactions. Reported net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting in changes in exchange rates.

The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are recorded with net realized and unrealized gains or losses from investments. Gains and losses from certain foreign currency transactions are treated as ordinary income for U.S. federal income tax purposes.

Reverse repurchase agreements

To obtain short-term financing, the Fund may enter into reverse repurchase agreements with banks and other financial institutions, which are deemed by the investment adviser to be creditworthy. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing qualified assets having a value not less than the repurchase price, including accrued interest. If the counterparty to the transaction is rendered insolvent, the Fund may be delayed or limited in the repurchase of the collateral securities.

Forward foreign currency contracts

The Fund may be subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives. A forward foreign currency contract is an agreement between two parties to purchase or sell a specific currency for an agreed-upon price at a future date. The Fund enters into forward foreign currency contracts to facilitate transactions in foreign-denominated securities and to attempt to minimize the risk to the Fund from adverse changes in the relationship between currencies. Forward foreign currency contracts are recorded at the forward rate and marked-to-market daily. When the contracts are closed, realized gains and losses arising from such transactions are recorded as realized gains or losses on foreign currency related transactions. The Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the foreign currency changes unfavorably. The Fund's maximum risk of loss from counterparty credit risk is the unrealized gains or losses on the contracts. This risk is mitigated by having a master netting arrangement between the Fund and the counterparty.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitments to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Table of Contents

34 Wells Fargo Advantage Multi-Sector Income Fund

Notes to Financial Statements (Unaudited)

Term loans

The Fund may invest in term loans. The loans are marked-to-market daily and the Fund begins earning interest when the loans are funded. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. The Fund assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are reported on the basis of identified cost of securities delivered.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the Fund is informed of the ex-dividend date.

Income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Distributions to shareholders

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with income tax regulations, which may differ from generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

Under the recently enacted *Regulated Investment Company Modernization Act of 2010*, the Fund is permitted to carry forward capital losses incurred in taxable years which began after December 22, 2010 for an unlimited period. However, any losses incurred are required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than be considered all short-term as under previous law. In addition, the Fund may elect to defer any portion of a post-October capital loss or qualified late-year ordinary loss to the first day of the following taxable year. A post-October capital loss is the greatest of the net capital loss, net short-term capital loss or net long-term capital loss for the portion of the taxable year after October 31. A qualified late-year ordinary loss is the net loss comprised of (a) net gain or loss from the sale or other disposition of capital assets for the portion of the taxable year after October 31, and (b) other ordinary income or loss for the portion of the taxable year after December 31.

As of October 31, 2011, the Fund had net capital loss carryforwards, which were available to offset future net realized capital gains, in the amount of \$110,049,569 with \$20,598,096 expiring in 2016 and \$89,451,473 expiring in 2017.

3. FAIR VALUATION MEASUREMENTS

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the

Table of Contents

Notes to Financial Statements (Unaudited)

Wells Fargo Advantage Multi-Sector Income Fund 35

lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- n Level 1 quoted prices in active markets for identical securities

 - n Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

 - n Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)
- The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

As of April 30, 2012, the inputs used in valuing the Fund's assets, which are carried at fair value, were as follows:

	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Investments in Securities				
Agency securities	\$ 0	\$ 69,008,271	\$ 0	\$ 69,008,271
Asset-backed securities	0	723,383	0	723,383
Convertible debentures	0	1,130,688	0	1,130,688
Corporate bonds and notes	0	382,851,650	0	382,851,650
Equity securities				
<i>Common stocks</i>	326,146	0	5,225	331,371
<i>Preferred stocks</i>	646,650	0	0	646,650
Foreign corporate bonds and notes	0	36,523,882	0	36,523,882
Foreign government bonds	0	187,270,753	0	187,270,753
Non-agency mortgage backed securities	0	22,828,952	0	22,828,952
Term loans	0	127,634,485	11,018,263	138,652,748
Yankee corporate bonds and notes	0	52,748,183	0	52,748,183
Yankee government bonds	0	303,494	0	303,494
Short-term investments				
<i>Investment companies</i>	23,750,607	0	0	23,750,607
	\$ 24,723,403	\$ 881,023,741	\$ 11,023,488	\$ 916,770,632

Further details on the major security types listed above can be found in the Portfolio of Investments.

As of April 30, 2012, the inputs used in valuing the Fund's other financial instruments, which are carried at fair value, were as follows:

	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Other financial instruments				
Forward foreign currency contracts+	\$ 0	\$ (405,836)	\$ 0	\$ (405,836)

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

+ Forward foreign currency contracts are presented at the unrealized gains or losses on the instrument.

Transfers in and transfers out are recognized at the end of the reporting period. For the six months ended April 30, 2012, the Fund did not have any significant transfers into/out of Level 1 and Level 2.

Table of Contents

36 Wells Fargo Advantage Multi-Sector Income Fund

Notes to Financial Statements (Unaudited)

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:

	Corporate bonds and notes	Common stocks	Term loans	Yankee corporate bonds and notes	Total
Balance as of October 31, 2011	\$ 5,243,760	\$ 0	\$ 3,971,316	\$ 191	\$ 9,215,267
Accrued discounts (premiums)	1,284	0	14,846	0	16,130

Balance as of April 30, 2012	\$ 0	\$ 5,225	\$ 11,018,263	\$ 0	\$ 11,023,488
Change in unrealized gains (losses) relating to securities still held at April 30, 2012	\$ 0	\$ 0	\$ 27,298	\$ 0	\$ 27,298

4. TRANSACTIONS WITH AFFILIATES AND OTHER EXPENSES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo) is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.55% of the Fund's average daily total assets. Total assets consist of net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain sub-advisers to provide daily portfolio management to the Fund. The fees for sub-advisory services are borne by Funds Management. Wells Capital Management Incorporated, an affiliate of Funds Management, is a sub-adviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.30% of the Fund's average daily total assets. First International Advisors, LLC, an affiliate of Funds Management and an indirect, wholly owned subsidiary of Wells Fargo, is also a sub-adviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.10% of the Fund's average daily total assets.

Administration fee

Funds Management also serves as the administrator to the Fund providing the Fund with facilities, equipment and personnel. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized capital of 100,000,000 shares with no par value. For the six months ended April 30, 2012 and the year ended October 31, 2011, the Fund did not issue any shares.

6. BORROWING AND LEVERAGE TRANSACTIONS

The Fund has borrowed \$230 million through a secured debt financing agreement administered by a major financial institution (the Facility). The Facility has a commitment amount of \$230 million which expires on February 25, 2013, at which point it may be renegotiated and potentially renewed for another one-year term. At April 30, 2012, the Fund had secured borrowings outstanding in the amount of \$230,707,166 (including accrued interest and usage and commitment fees payable).

The Fund's borrowing under the Facility are generally charged interest at a rate based on the rates of the commercial paper notes issued to fund the Fund's borrowings or at the London Interbank Offered Rate (LIBOR) plus 1.0%. During the six months ended April 30, 2012, an effective

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

interest rate of 0.43% was incurred on the borrowings. Interest expense of \$361,039, representing 0.11% of the Fund's average daily net assets, was incurred during the six months ended April 30, 2012.

Table of Contents

Notes to Financial Statements (Unaudited)

Wells Fargo Advantage Multi-Sector Income Fund 37

The Fund has pledged all of its assets to secure the borrowings and currently pays, on a monthly basis, a usage fee an annual rate of 0.40% of the daily average outstanding principal amount of borrowings and a commitment fee at an annual rate of 0.40% of the product of (i) the daily average outstanding principal amount of borrowings and (ii) 1.02. Prior to February 27, 2012, both the usage fee and commitment fee were charged at an annual rate of 0.50%. The secured borrowing fees on the Statement of Operations of \$794,074 represents the usage fee, commitment fee and structuring fees. For the six months ended April 30, 2012, the Fund paid structuring fees in the amount of \$42,582.

During the six months ended April 30, 2012, the Fund entered into reverse repurchase agreements that had an average daily balance outstanding of \$66,056,000 with an effective annual interest rate of 0.20% and paid interest of \$132,112 representing 0.04% of the Fund's average daily net assets. The maximum amount outstanding under reverse repurchase agreements during the six months ended April 30, 2012 was \$99,567,272 (including accrued interest).

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding short-term securities, for the six months ended April 30, 2012 were as follows:

U.S. Government	Purchases at Cost		U.S. Government	Sales Proceeds	
	U.S. Government	Non-U.S. Government		U.S. Government	Non-U.S. Government
\$ 0	\$	503,399,409	\$ 132,718,722	\$	316,697,737

As of April 30, 2012, the Fund had unfunded loan commitments of \$2,772,000.

8. DERIVATIVE TRANSACTIONS

During the six months ended April 30, 2012, the Fund entered into forward foreign currency exchange contracts for economic hedging purposes.

At April 30, 2012, the Fund had forward foreign currency contracts outstanding as follows:

Forward foreign currency contracts to buy:

Exchange Date	Counterparty	Contracts to Receive	U.S. Value at April 30, 2012	In Exchange for U.S. \$	Unrealized Gains (Losses)
06/04/2012	State Street Bank	27,200,000 MYR	\$ 8,967,427	\$ 8,973,936	\$ (6,509)

Forward foreign currency contracts to sell:

Exchange Date	Counterparty	Contracts to Deliver	U.S. Value at April 30, 2012	In Exchange for U.S. \$	Unrealized Gains (Losses)
05/02/2012	State Street Bank	1,220,000,000 HUF	\$ 5,631,784	\$ 5,207,000	\$ (424,784)
05/29/2012	State Street Bank	69,570,000 ZAR	8,915,841	8,941,298	25,457

The Fund had average contract amounts of \$74,427,606 and \$23,219,686 in forward foreign currency contracts to buy and forward foreign currency contracts to sell, respectively, during the six months ended April 30, 2012.

The fair value, realized gains or losses and change in unrealized gains or losses on derivative instruments are reflected in the appropriate financial statements.

9. INDEMNIFICATION

Edgar Filing: WELLS FARGO ADVANTAGE MULTI-SECTOR INCOME FUND - Form N-CSRS

Under the Fund's organizational documents, the officers and directors are indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

Table of Contents

38 Wells Fargo Advantage Multi-Sector Income Fund

Notes to Financial Statements (Unaudited)

10. NEW ACCOUNTING PRONOUNCEMENTS

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11, which amends FASB ASC Topic 210, *Balance Sheet*, creates new disclosure requirements which require entities to disclose both gross and net information for derivatives and other financial instruments that are either offset in the Statement of Assets and Liabilities or subject to an enforceable master netting arrangement or similar agreement. The disclosure requirements are effective for interim and annual reporting periods beginning on or after January 1, 2013. Management is currently assessing the potential impact, in addition to expanded financial statement disclosure, that may result from adopting this ASU.

In May 2011, FASB issued ASU No. 2011-04 *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. ASU No. 2011-04 amends FASB ASC Topic 820, *Fair Value Measurements*, to establish common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with GAAP. The ASU is effective prospectively for interim and annual periods beginning after December 15, 2011. Management expects that adoption of the ASU will result in additional disclosures in the financial statements, as applicable.

In April 2011, FASB issued ASU No. 2011-03 *Reconsideration of Effective Control for Repurchase Agreements*. ASU No. 2011-03 amends FASB ASC Topic 860, *Transfers and Servicing*, specifically the criteria required to determine whether a repurchase agreement (repo) and similar agreements should be accounted for as sales of financial assets or secured borrowings with commitments. ASU No. 2011-03 changes the assessment of effective control by focusing on the transferor's contractual rights and obligations and removing the criterion to assess its ability to exercise those rights or honor those obligations. This could result in changes to the way entities account for certain transactions including repurchase agreements, mortgage dollar rolls and reverse repurchase agreements. The ASU will become effective on a prospective basis for new transfers and modifications to existing transactions as of the beginning of the first interim or annual period beginning on or after December 15, 2011. Management has evaluated the impact of adopting the ASU and expects no significant changes.

11. SUBSEQUENT DISTRIBUTIONS

The Fund declared the following distributions to common shareholders:

Declaration Date	Record Date	Payable Date	Net Investment Income
April 20, 2012	May 15, 2012	June 1, 2012	\$0.1000
May 18, 2012	June 13, 2012	July 2, 2012	\$0.1000
June 22, 2012	July 16, 2012	August 1, 2012	\$0.1000

These distributions are not reflected in the accompanying financial statements.

BOARD OF TRUSTEES

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers listed below acts in identical capacities for the Wells Fargo Advantage family of funds, which consists of 137 funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). All of the Trustees are also Members of the Audit and Governance Committees of each Trust in the Fund Complex. The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

Name and Year of Birth	Position Held and Length of Service	Principal Occupations During Past Five Years	Other Directorships During Past Five Years
Peter G. Gordon (Born 1942)	Trustee, since 2010; Chairman, since 2010 (Lead Trustee since 2010)	Co-Founder, Retired Chairman, President and CEO of Crystal Geyser Water Company. Trustee Emeritus, Colby College	Asset Allocation Trust
Isaiah Harris, Jr. (Born 1952)	Trustee, since 2010	Retired. Other Information (Unaudited)

BOARD CONSIDERATION OF INVESTMENT ADVISORY AND SUB-ADVISORY AGREEMENTS:

Under Section 15 of the Investment Company Act of 1940 (the 1940 Act), the Board of Trustees (the Board) of Wells Fargo Advantage Multi-Sector Income Fund (the Fund), all the members of which have no direct or indirect interest in the investment advisory and sub-advisory agreements and are not interested persons of the Fund, as defined in the 1940 Act (the Independent Trustees), must determine whether to approve the continuation of the Fund's investment advisory and sub-advisory agreements. In this regard, at an in person meeting held on March 29-30, 2012 (the Meeting), the Board reviewed and re-approved: (i) an investment advisory agreement with Wells Fargo Funds Management, LLC (Funds Management); (ii) an investment sub-advisory agreement with Wells Capital Management Incorporated (Wells Capital Management); and (iii) an investment sub-advisory agreement with First International Advisors, LLC (First International) for the Fund. The investment advisory agreement with Funds Management and the investment sub-advisory agreements with Wells Capital Management and First International (the Sub-Advisers) are collectively referred to as the Advisory Agreements.

At the Meeting, the Board considered the factors and reached the conclusions described below relating to the selection of Funds Management and the Sub-Advisers and the continuation of the Advisory Agreements. Prior to the Meeting, the Trustees conferred extensively among themselves and with representatives of Funds Management about these matters. The Board also met throughout the year and received information that was useful to them in considering the continuation of the Advisory Agreements. The Independent Trustees were assisted in their evaluation of the Advisory Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately from Funds Management.

In providing information to the Board, Funds Management was guided by a detailed set of requests submitted by the Independent Trustees independent legal counsel on their behalf at the start of the Board's annual contract renewal process earlier in 2012. In approving the Advisory Agreements, the Board did not identify any particular information or consideration that was all-important or controlling, and each Trustee likely attributed different weights to various factors.

Nature, extent and quality of services

The Board received and considered various information regarding the nature, extent and quality of services provided to the Fund by Funds Management and the Sub-Advisers under the Advisory Agreements. The Board also received and considered, among other things, information about the background and experience of senior management of Funds Management, and the qualifications, backgrounds, tenures and responsibilities of the portfolio managers primarily responsible for the day-to-day portfolio management of the Fund.

The Board evaluated the ability of Funds Management and the Sub-Advisers, based on their respective financial condition, resources, reputation and other attributes, to attract and retain qualified investment professionals, including research, advisory, and supervisory personnel. The Board further considered the compliance programs and compliance records of Funds Management and the Sub-Advisers. In addition, the Board took into account the administrative services provided to the Fund by Funds Management and its affiliates.

The Board's decision to approve the continuation of the Advisory Agreements was based on a comprehensive evaluation of information provided to it. In considering these matters, the Board considered not only the specific information presented in connection with the Meeting, but also the knowledge gained over time through interaction with Funds Management and the Sub-Advisers about various topics, including Funds Management's oversight of service providers. The above factors, together with those referenced below, are some of the most important, but not necessarily all, factors considered by the Board in concluding that the nature, extent and quality of the investment advisory services provided to the Fund by Funds Management and the Sub-Advisers supported the re-approval of the Advisory Agreements. Although the Board considered the continuation of the Advisory Agreements for the Fund as part of the larger process of considering the continuation of the advisory agreements for all of the funds in the complex, its decision to continue the Advisory Agreements for the Fund was ultimately made on a fund-by-fund basis.

Fund performance and expenses

The Board considered the performance results for the Fund over various time periods ended December 31, 2011. The Board also considered these results in comparison to the median performance of a universe of relevant funds (the Universe) that was determined by Lipper Inc. (Lipper) to be similar to the Fund and to other comparative data. The

Table of Contents

Other Information (Unaudited)

Wells Fargo Advantage Multi-Sector Income Fund 43

Board noted that Lipper did not provide data comparing the Fund's performance to a benchmark index. Lipper is an independent provider of investment company data. The Board received a description of the methodology used by Lipper to select the funds in the Universe. The Board noted that the performance of the Fund was in range of or higher than the median performance of the Universe for the periods under review.

The Board received and considered information regarding the Fund's contractual advisory fee and net operating expense ratio and its various components, including actual management fees (which reflect fee waivers, if any), transfer agent, custodian and other non-management fees. The Board also considered the ratio in comparison to the median ratio of an expense Universe and a narrower expense group of funds (each, an Expense Group) that was determined by Lipper to be similar to the Fund. The Board received a description of the methodology used by Lipper to select the funds in the Fund's Expense Group. The Board noted that the net operating expense ratio of the Fund was lower than the Fund's Expense Group's median net operating expense ratio.

Based on the above-referenced considerations and other factors, the Board concluded that the overall performance and expense structure of the Fund supported the re-approval of the Advisory Agreements for the Fund.

Investment advisory and sub-advisory fee rates

The Board reviewed and considered the contractual investment advisory fee rate that is payable by the Fund to Funds Management for investment advisory services (the Advisory Agreement Rate), both on a stand-alone basis and on a combined basis with the Fund's administration fee rate. The Board took into account the separate administrative and other services covered by the administration fee rate. The Board also reviewed and considered the contractual investment sub-advisory fee rate that is payable by Funds Management to each Sub-Adviser for investment sub-advisory services (the Sub-Advisory Agreement Rate). In addition, the Board reviewed and considered the existing fee waiver/cap arrangements applicable to the Advisory Agreement Rate and considered the Advisory Agreement Rate after taking the waivers/caps into account (the Net Advisory Rate).

The Board received and considered information comparing the Advisory Agreement Rate and Net Advisory Rate with that of other funds in the Fund's Expense Group median. The Board noted that the Advisory Agreement Rate and Net Advisory Rate for the Fund were in range of the median rates of the Fund's Expense Group.

The Board also received and considered information about the nature and extent of services offered and fee rates charged by Funds Management and the Sub-Advisers to other types of clients. In this regard, the Board received information about differences between the services, and the compliance, reporting, and other legal burdens and risks of providing investment advice to registered funds and those associated with providing advice to non-registered fund clients such as collective funds or institutional separate accounts.

The Board determined that the Advisory Agreement Rate for the Fund, both before and after waivers, was reasonable in light of the Fund's Expense Group information, the net expense ratio commitments, the services covered by the Advisory Agreements and other information provided. The Board also reviewed and considered each Sub-Advisory Agreement Rate and concluded that each Sub-Advisory Agreement Rate was reasonable in light of the services covered by each sub-advisory agreement and other information provided.

Profitability

The Board received and considered a profitability analysis of Funds Management, as well as an analysis of the profitability to the collective Wells Fargo businesses that provide services to the Fund. It considered that the information provided to it was necessarily estimated, and that the profitability information provided to it, especially on a fund-by-fund basis, did not necessarily provide a precise tool for evaluating the appropriateness of the Fund's Advisory Agreement Rate in isolation. It noted that the levels of profitability reported on a fund-by-fund basis varied widely, depending on, among other things, the size and type of fund. The Board concluded that the profitability reported by Funds Management was not unreasonable.

The Board did not consider separate profitability information with respect to the Sub-Advisers, because, as affiliates of Funds Management, their profitability information was subsumed in the collective Wells Fargo profitability analysis provided by Funds Management.

Table of Contents

44 Wells Fargo Advantage Multi-Sector Income Fund

Other Information (Unaudited)

Economies of scale

The Board considered that, in light of the fact that the Fund was not making a continuous offering of its shares, the likelihood of realizing economies of scale following the Fund's initial offering was relatively low, although the Board determined to continue to monitor the Fund's expense ratio and the profitability of the investment advisory agreement to Funds Management in light of future growth of the Fund.

Other benefits to Funds Management and the Sub-Advisers

The Board received and considered information regarding potential fall-out or ancillary benefits received by Funds Management and its affiliates, including the Sub-Advisers, as a result of their relationship with the Fund. Ancillary benefits could include, among others, benefits directly attributable to the relationship of Funds Management and the Sub-Advisers with the Fund and benefits potentially derived from an increase in Funds Management's and the Sub-Advisers' business as a result of their relationship with the Fund (such as the ability to market to shareholders other financial products offered by Funds Management and its affiliates, including the Sub-Advisers).

Other factors and broader review

As discussed above, the Board reviews detailed materials received from Funds Management and the Sub-Advisers annually as part of the re-approval process under Section 15 of the 1940 Act and also reviews and assesses information about the quality of the services that the Fund receives throughout the year. In this regard, the Board has reviewed reports of Funds Management at each of its quarterly meetings, which include, among other things, portfolio reviews and performance reports. In addition, the Board confers with portfolio managers at various times throughout the year.

Conclusion

After considering the above-described factors and based on its deliberations and its evaluation of the information described above, the Board unanimously approved the continuation of the Advisory Agreements for an additional one-year period.

Table of Contents

Automatic Dividend Reinvestment Plan

Wells Fargo Advantage Multi-Sector Income Fund 45

AUTOMATIC DIVIDEND REINVESTMENT PLAN

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan (Plan Agent), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in shares of common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (newly issued common shares) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value or market premium (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 43010, Providence, Rhode Island 02940-3010 or by calling 1-800-730-6001.

MATERIAL CONFLICTS OF INTEREST

The Portfolio Managers face inherent conflicts of interest in their day-to-day management of the Funds and other accounts because the Funds may have different investment objectives, strategies and risk profiles than the other accounts managed by the Portfolio Managers. For instance, to the extent that the Portfolio Managers manage accounts with different investment strategies than the Funds, they may from time to time be inclined to purchase securities, including initial public offerings, for one account but not for a Fund. Additionally, some of the accounts managed by the Portfolio Managers may have different fee structures, including performance fees, which are or have the potential to be higher or lower, in some cases significantly higher or lower, than the fees paid by the Funds. The differences in fee structures may provide an incentive to the Portfolio Managers to allocate more favorable trades to the higher-paying accounts.

To minimize the effects of these inherent conflicts of interest, the Sub-Advisers have adopted and implemented policies and procedures, including brokerage and trade allocation policies and procedures, that they believe address the potential conflicts associated with managing portfolios for multiple clients and ensure that all clients are treated fairly and equitably. Additionally, some of the Sub-Advisers minimize inherent conflicts of interest by assigning the Portfolio Managers to accounts having similar objectives. Accordingly, security block purchases are allocated to all accounts with similar objectives in proportionate weightings. Furthermore, the Sub-Advisers have adopted a Code of Ethics under Rule 17j-1 of the 1940 Act and Rule 204A-1 under the Investment Advisers Act of 1940 (the Advisers Act) to address potential conflicts associated with managing the Funds and any personal accounts the Portfolio Managers may maintain.

Table of Contents

First International Advisors

First International Advisors' Portfolio Managers often provide investment management for separate accounts advised in the same or similar investment style as that provided to mutual funds. While management of multiple accounts could potentially lead to conflicts of interest over various issues such as trade allocation, fee disparities and research acquisition, First International Advisors has implemented policies and procedures for the express purpose of ensuring that clients are treated fairly and that potential conflicts of interest are minimized.

Wells Capital Management

Wells Capital Management's Portfolio Managers often provide investment management for separate accounts advised in the same or similar investment style as that provided to mutual funds. While management of multiple accounts could potentially lead to conflicts of interest over various issues such as trade allocation, fee disparities and research acquisition, Wells Capital Management has implemented policies and procedures for the express purpose of ensuring that clients are treated fairly and that potential conflicts of interest are minimized.

COMPENSATION

The Portfolio Managers were compensated by their employing sub-adviser from the fees the Adviser paid the Sub-Adviser using the following compensation structure:

First International Advisors Compensation. The compensation structure for First International Advisors' Portfolio Managers includes a competitive fixed base salary plus variable incentives (First International Advisors utilizes investment management compensation surveys as confirmation). Incentive bonuses are typically tied to pretax relative investment performance of all accounts under his or her management within acceptable risk parameters. Relative investment performance is generally evaluated for 1, 3, and 5 year performance results, with a predominant weighting on the 3- and 5- year time periods, versus the relevant benchmarks and/or peer groups consistent with the investment style. This evaluation takes into account relative performance of the accounts to each account's individual benchmark and/or the relative composite performance of all accounts to one or more relevant benchmarks consistent with the overall investment style. In the case of each Fund, the benchmark(s) against which the performance of the Fund's portfolio may be compared for these purposes generally are indicated in the Performance sections of the Prospectuses.

Wells Capital Management Compensation. The compensation structure for Wells Capital Management's Portfolio Managers includes a competitive fixed base salary plus variable incentives (Wells Capital Management utilizes investment management compensation surveys as confirmation). Incentive bonuses are typically tied to pretax relative investment performance of all accounts under his or her management within acceptable risk parameters. ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASES

Not applicable.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Governance Committee (the Committee) of the Board of Trustees of the registrant (the Trust) has adopted procedures by which a shareholder of any series of the Trust may submit properly a nominee recommendation for the Committee's consideration.

The shareholder must submit any such recommendation (a Shareholder Recommendation) in writing to the Trust, to the attention of the Trust's Secretary, at the address of the principal executive offices of the Trust.

The Shareholder Recommendation must be delivered to, or mailed and received at, the principal executive offices of the Trust not less than forty-five (45) calendar days nor more than seventy-five (75) calendar days prior to the date of the Committee meeting at which the nominee would be considered.

The Shareholder Recommendation must include: (i) a statement in writing setting forth (A) the name, age, date of birth, business address, residence address and nationality of the person recommended by the shareholder (the candidate); (B) the series (and, if applicable, class) and number of all shares of the Trust owned of record or beneficially by the candidate, as reported to such shareholder by the candidate; (C) any other information regarding the candidate called for with respect to director nominees by paragraphs (a), (d), (e) and (f) of Item 401 of Regulation S-K or paragraph (b) of Item 22 of Rule 14a-101 (Schedule 14A) under the Securities Exchange Act of 1934, as amended (the Exchange Act), adopted by the Securities and Exchange Commission (or the corresponding provisions of any regulation or rule subsequently adopted by the Securities and Exchange Commission or any successor agency applicable to the Trust); (D) any other information regarding the candidate that would be required to be disclosed if the candidate were a nominee in a proxy statement or other filing required to be made in connection with solicitation of proxies for election of directors pursuant to Section 14 of the Exchange Act and the rules and regulations promulgated thereunder; and (E) whether the recommending shareholder believes that the candidate is or will be an interested person of the Trust (as defined in the Investment Company Act of 1940, as amended) and, if not an interested person, information regarding the candidate that will be sufficient for the Trust to make such determination; (ii) the written and signed consent of the candidate to be named as a nominee and to serve as a Trustee if elected; (iii) the recommending shareholder's name as it appears on the Trust's books; (iv) the series (and, if applicable, class) and number of all shares of the Trust owned beneficially and of record by the recommending shareholder; and (v) a description of all arrangements or understandings between the recommending shareholder and the candidate and any other person or persons (including their names) pursuant to which the recommendation is being made by the recommending shareholder. In addition, the Committee may require the candidate to interview in person and furnish such other information as it may reasonably require or deem necessary to determine the eligibility of such candidate to serve as a Trustee of the Trust.

ITEM 11. CONTROLS AND PROCEDURES

(a) The President and Treasurer have concluded that the Wells Fargo Advantage Multi-Sector Income Fund (the Trust) disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940) provide reasonable assurances that material information relating to the Trust is made known to them by the appropriate persons, based on their evaluation of these controls and procedures as of a date within 90 days of the filing of this report.

(b) There were no significant changes in the Trust's internal controls over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940) that occurred during the second quarter of the period covered by this report that materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
