Forward-Looking Statements

This Form 10-Q, including Management's Discussion and Analysis of Financial Condition and Results of Operations (Item 2), contains forward-looking statements that involve risks and uncertainties, as well as assumptions that, if they never materialize or prove incorrect, could cause our results to differ materially from those expressed or implied by such forward-looking statements. All statements that do not constitute statements of historical fact are deemed forward-looking statements, including any projections or statements of expectations of market conditions, revenue, gross profit, expenses, earnings or losses from operations or other financial items; any discussion of expectations regarding future profitability of operations in particular regions or product lines; any statements of plans, strategies, and objectives of management for future operations; any statements regarding future economic conditions or performance; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. Risks, uncertainties, and assumptions that could cause material differences from expectations include, but are not limited to:

General business and economic conditions globally;

Competitive factors and the cyclical nature of the materials handling industry and lift truck orders;

Risks and complexities associated with international operations, including foreign currency fluctuations and international tax considerations;

Impact of acquisitions;

Environmental matters;

Cost and availability of raw materials; and

Assumptions relating to pension and other postretirement costs.

We undertake no obligation to publicly revise or update forward-looking statements to reflect events or circumstances that arise after the date of this report. See Risk Factors under Item 1A in our Annual Report on Form 10-K for the year ended January 31, 2012, for additional information on risk factors with the potential to impact our financial results and business operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1 Description of Business

Cascade Corporation is an international company engaged in the manufacture of material handling products that are widely used on industrial fork lift trucks and, to a lesser extent, construction, mining and agricultural vehicles. Accordingly, our sales are largely dependent on sales of lift trucks and replacement parts. Our sales are made throughout the world. We are headquartered in Fairview, Oregon, employing approximately 1,900 people and maintaining operations in 17 countries outside the United States.

Note 2 Interim Financial Information

The accompanying consolidated financial statements for the interim periods ended July 31, 2012 and 2011 are unaudited. In the opinion of management, the accompanying consolidated financial statements reflect normal recurring adjustments necessary for a fair statement of the financial position, results of operations and cash flows for those interim periods. Results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year, and these financial statements do not contain the detail or footnote disclosures concerning accounting policies and other matters that would be included in full fiscal year financial statements. Therefore, these statements should be read in conjunction with our audited financial statements included in our Form 10-K for the fiscal year ended January 31, 2012.

Note 3 Segment Information

Our operating units have several similar economic characteristics and attributes, including products, distribution patterns and classes of customers. As a result, we aggregate our operating units related to the manufacturing, distribution and servicing of material handling load engagement products into four geographic operating segments, which we identify as the Americas, Europe, Asia Pacific and China. We evaluate the performance of each of our operating segments based on income or loss before interest, foreign currency gains or losses and income taxes. The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies contained in Note 2 of our consolidated financial statements included in our Form 10-K for the fiscal year ended January 31, 2012.

Table of Contents

Revenues and operating results are classified according to the country of origin. Transfers between areas represent sales between our geographic operating segments. The costs of our corporate office are included in the Americas. Identifiable assets are attributed to the geographic location in which the segments are located. Net sales and transfers, operating results and identifiable assets by geographic operating segment were as follows (in thousands):

Table of Contents**Note 4 Inventories**

During the six months ended July 31, 2012, inventories increased primarily due to additional product needed to meet increased customer demand and a business acquisition in Brazil. Inventories stated at the lower of average cost or market are presented below by major class (in thousands):

	July 31 2012	January 31 2012

Note 5 Goodwill

During the six months ended July 31, 2012, goodwill decreased due to the impact of changes in foreign currencies. We have no goodwill recorded in China. The following table provides a breakdown of goodwill by geographic region (in thousands):

	July 31 2012	January 31 2012
Americas	\$ 74,862	\$ 74,914
Europe	9,781	10,332
Asia Pacific	2,931	2,928

Note 6 Share-Based Compensation Plans

We have granted three types of share-based awards to officers, key managers and directors; stock appreciation rights (SARS), restricted stock and stock options under our share-based compensation plans. The grant prices applicable to SARS and stock options are established by our Board of Directors Compensation Committee at the time the awards are granted. We have issued new common shares upon the exercise of all share-based awards, although we have the option of satisfying SARs exercised with cash.

SARS provide the holder the right to receive an amount, payable in our common shares, or at our election in cash, equal to the excess of the market value of our common shares on the date of exercise (intrinsic value) over the base price at the time the right was granted. The base price may not be less than the market price of our common shares on the date of grant. All SARS vest ratably over a four-year period and have a term of ten years.

Restricted stock is a grant of common shares to a recipient, subject to restrictions on transfer until vesting conditions are satisfied. Regardless of vesting, restricted shares have full voting rights and any dividends declared will be paid to the restricted stock recipient free of restrictions. Restricted shares granted to officers vest ratably over a period of three years. Restricted shares granted to directors prior to June 1, 2010 vest ratably over a period of four years and grants after May 31, 2010 vest after one year.

Stock options provide the holder the right to receive our common shares at an established price. No additional stock options can be granted under the terms of our plan. All outstanding stock options are fully vested and have a term of ten years from date of grant.

Table of Contents

The following table provides the number of shares to be issued under our share-based plans, based on outstanding awards as of July 31, 2012 (in thousands):

	Stock Options	SARS and Restricted Stock
Common stock previously issued	1,258	218
Restricted stock previously issued		203
Shares issuable upon exercise of SARS, based on \$47.11 share price at July 31, 2012		233
Shares issuable upon exercise of stock options	93	
Estimated shares to be issued	1,351	654
Maximum shares of common stock to be issued per plan document	1,400	1,000 *

* - The maximum number of shares of common stock to be issued under our SARS and Restricted Stock Plan was increased from 750,000 shares to 1 million shares on June 6, 2012.

A summary of the status of our plans at July 31, 2012, together with changes during the six months then ended, is presented in the following tables (in thousands, except per share amounts):

	Stock Options		SARS	
	Outstanding Awards	Weighted Average Exercise Price Per Share	Outstanding Awards	Weighted Average Exercise Price Per Share

Granted	44	45.42
Vested	(33)	39.44
Unvested restricted stock at July 31, 2012	73	\$ 44.52

Table of Contents

We calculate share-based compensation cost for stock options and SARS using the Black-Scholes option pricing model. The range of assumptions used to compute share-based compensation is as follows:

	Granted in Fiscal 2013	Granted Prior to Fiscal 2013
Risk-free interest rate	1.6%	2.1% - 5.1%
Expected volatility	60.0%	40.0% - 56.0%
Expected dividend yield	2.8%	0.6% - 2.8%
Expected life (in years)	6	5 - 7
Weighted average fair value at date of grant	\$ 22.44	\$4.16 - \$33.31

We calculate share-based compensation cost for restricted stock by multiplying the fair market value of our common shares on the grant date by the number of restricted shares expected to vest. Share-based compensation is expensed ratably over the applicable vesting period. Additional information regarding the assumptions used to calculate fair value under our share-based compensation plans is presented in Note 2 to our consolidated financial statements included in our Form 10-K for the year ended January 31, 2012.

The following table shows the share-based compensation costs to be recognized in future periods for awards granted to date as of July 31, 2012 (in thousands):

Note 7 Commitments and Contingencies**Environmental Matters**

We are subject to environmental laws and regulations, which include obligations to remove or mitigate environmental effects of past disposal and release of certain wastes and substances at various sites. We record liabilities for affected sites when environmental assessments indicate probable cleanup and the costs can be reasonably estimated. Other than for costs of assessments themselves, the timing and amount of these liabilities is determined based on the estimated costs of remediation activities and our commitment to a formal plan of action, such as an approved remediation plan. The reliability and precision of the loss estimates are affected by numerous factors, such as different stages of site evaluation and reevaluation of the degree of remediation required. We adjust our liabilities as new remediation requirements are defined, as information becomes available permitting reasonable estimates to be made and to reflect new and changing facts.

It is reasonably possible that changes in estimates will occur in the near term and the related adjustments to environmental liabilities may have a material impact on our operating results. Unasserted claims are not currently reflected in our environmental remediation liabilities. It is also reasonably possible that these claims may also have a material impact on our operating results if asserted. We cannot predict when the additional expense will be necessary or the amount of any additional loss or range of loss that may reasonably be possible.

Table of Contents

Our specific environmental matters consist of the following:

Fairview, Oregon

In 1996, the Oregon Department of Environmental Quality issued two Records of Decision affecting our Fairview, Oregon manufacturing facility. The records of decision required us to initiate remediation activities related to the cleanup of groundwater contamination at and near the facility. Remediation activities have been conducted since 1996 and current estimates provide for some level of activity to continue through 2019. Costs of certain remediation activities at the facility are shared with The Boeing Company, with Cascade paying 70% of these costs. The recorded liability for ongoing remediation activities at our Fairview facility was \$1.9 million at July 31, 2012 and \$2.4 million at January 31, 2012.

Springfield, Ohio

In March 2010, we signed a Facility Lead Corrective Action Agreement (Action Agreement) with the Ohio Environmental Protection Agency, which outlines a more comprehensive remediation plan at our Springfield, Ohio facility. We had previously been performing our remediation activities under a consent order signed in 1994, which had required the installation of remediation systems for the cleanup of groundwater contamination. The Action Agreement specifies an action plan that would allow us to be more proactive in our environmental cleanup efforts. The current estimate is that the remediation activities will continue through 2019. The recorded liability for ongoing remediation activities in Springfield was \$1.1 million at July 31, 2012 and January 31, 2012.

As of July 31, 2012 and January 31, 2012, a total of \$1.3 million of environmental costs are included on the consolidated balance sheet as a component of other accrued expenses.

Legal Proceedings

We are subject to legal proceedings, claims and litigation, in addition to the environmental matters previously discussed, arising in the ordinary course of business. While the outcome of these matters is currently not determinable, management does not expect the ultimate costs to be material to our consolidated financial position, results of operations, or cash flows.

Table of Contents**Note 11 Recent Accounting Pronouncements****Other Comprehensive Income**

In June 2011, a pronouncement was issued that eliminates the option of presenting other comprehensive income as part of the statement of changes in stockholders' equity and provides an entity with the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This guidance also requires presentation of items on the face of the financial statements that are reclassified from other comprehensive income to net income. This guidance does not change the items that must be reported in other comprehensive income, when an item of other comprehensive income must be reclassified to net income or how tax effects of each item of other comprehensive income are presented. This guidance is effective for interim and annual reporting periods beginning after December 15, 2011 and should be applied retrospectively. We have adopted this guidance by presenting a separate statement of comprehensive income.

Note 12 Warranty Obligations

We record a liability on our consolidated balance sheet for costs related to warranties with the sales of our products. This liability is estimated through historical customer claims, product failure rates, material usage and service delivery costs incurred in correcting defective products. Our warranty obligations, which are recorded in other accrued expenses on the consolidated balance sheets, were as follows (in thousands):

	2012	2011
Balance at January 31	\$ 1,723	\$ 1,339
Accruals for warranties issued during the period	1,283	1,226

Note 13 Accumulated Other Comprehensive Income

During the six months ended July 31, 2012, accumulated other comprehensive income decreased due to fluctuations in foreign currencies, primarily the Euro. The following table presents the changes in and the components of accumulated other comprehensive income (in thousands):

Note 14 Income Taxes

The effective tax rate for the six months ended July 31, 2012 was 31% compared to 32% for the six months ended July 31, 2011 and 27% for the fiscal year ended January 31, 2012. For the first six months of fiscal 2013, our effective tax rate was less than the US tax rate of 35% primarily due to lower tax rates in foreign jurisdictions where we earned income and the first quarter release of a \$1.7 million valuation allowance recorded against deferred tax assets in The Netherlands. The effective tax for the six months ended July 31, 2012 is higher than the effective tax rate for the full year ended January 31, 2012 mostly due to the release of a \$3.6 million valuation allowance relating to improved financial performance in The Netherlands in fiscal 2012.

In recent years, we have recorded significant deferred tax assets related to net operating losses in Europe. In assessing the realizability of these deferred tax assets, we considered whether it is more-likely-than-not that some portion or all of our deferred tax assets will not be realized through the generation of future taxable income. Management quarterly assesses the need for valuation allowances on deferred tax assets based on all available positive and negative evidence. The primary negative evidence is continuing operating losses. Positive evidence consists of improved financial performance over time due to market conditions, restructuring activities and expected future taxable income. If the estimates of future taxable income vary from actual results, our assessment regarding the realization of these deferred tax assets could change. Future changes in the estimated amount of deferred taxes expected to be realized will be reflected in the Company's financial statements in the period the estimate is changed, with a corresponding adjustment to operating results. Changes in estimates may occur often and can have a significant favorable or unfavorable impact on the Company's operating results period-to-period.

At July 31, 2012, we continue to provide valuation allowances of \$23.6 million against deferred tax assets relating to net operating loss carryforwards generated in Europe that we currently do not expect to realize.

As of July 31, 2012, our liability for uncertain tax positions was \$5.7 million, excluding interest and penalties. We recognize interest and penalties related to uncertain tax positions in income tax expense. As of July 31, 2012, we had approximately \$2.2 million of accrued interest and penalties related to uncertain tax positions.

We are subject to taxation primarily in the jurisdictions where we have operations. As of July 31, 2012, we remain subject to examination in various state and foreign jurisdictions for the 2003 - 2011 fiscal tax years.

Note 15 Australia Flood

Our operations in Brisbane, Australia, were significantly disrupted in January 2011 due to damage from flooding caused by heavy rainfall in the Queensland, Australia region. During fiscal 2012, we restored our operations to pre-flood conditions.

The flood resulted in charges of \$2.6 million during the first six months of fiscal 2012. We have not incurred any charges during fiscal 2013. We received \$5.1 million of insurance proceeds during the first six months of fiscal 2012. During fiscal 2013, we expect to receive additional insurance proceeds of up to \$3 million for capital expenditures related to equipment not yet placed in service; however, we have not yet received any insurance proceeds during the current year.

Note 16 Fair Value of Financial Assets and Liabilities

The fair value of our financial instruments represents the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation. The carrying amount of our cash equivalents, trade receivables and payables and notes payable to banks approximates fair value due to the short maturity of these instruments. The long-term debt balance recorded on the Company's balance sheet as of July 31, 2012 and January 31, 2012 approximates fair value, due to the variable interest rate on the debt and consideration of credit risk, and is a level 2 liability in the fair value hierarchy.

Note 17 Acquisition

In March 2012, we purchased the assets, including inventory, accounts receivable and intangible assets, of our exclusive distributor located in Santos, Brazil. The total purchase price was \$1.2 million.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Our businesses globally manufacture and distribute material handling load engagement products primarily for the lift truck industry and to a lesser extent the construction industry. We operate in four geographic segments: Americas, Europe, Asia Pacific and China. The Americas region includes activity in North, Central and South America.

All references to fiscal years are defined as the year ended January 31, 2012 (fiscal 2012) and the year ending January 31, 2013 (fiscal 2013).

RECENT TRENDS AND DEVELOPMENTS AFFECTING OUR RESULTS**Global Economic & Lift Truck Market Conditions**

Volatility in the global lift truck market is continuing. The Americas, Europe and Asia Pacific markets experienced flat to moderate growth. China's shipments were well below prior year shipments, which were at record levels.

The following tables show the quarter-over-quarter percent change in global lift truck shipments and orders by region:

	Lift Truck Shipments	Lift Truck Orders
	Q2 Fiscal 2013 vs 2012	Q2 Fiscal 2013 vs 2012
Americas	2%	3%
Europe	4%	(7%)
Asia Pacific	14%	7%
China	(19%)	(17%)
Global	(2%)	(5%)

Currently, the lift truck market is the only direct economic or industrial indicator we have available for our markets. While results across this market do not correlate exactly with our business levels over the short term, since customers in the various end markets use our products to differing degrees, it does give us a good indication of trends over the year.

Additional information on lift truck industry trends can be found at www.cascorp.com/investor/industrytrends. This website address is intended to provide an inactive, textual reference only. The information at this website is not part of this Form 10-Q and is not incorporated by reference.

Total	\$ 768	1%

The following is an overview for the three months ended July 31, 2012 and 2011. All percentage change comparisons to the prior year exclude the impact of foreign currencies:

Consolidated net sales increased 4% due to higher sales volumes of products related to the construction industry and strong lift truck markets in the Asia Pacific region.

Our consolidated gross profit percentage decreased slightly during the second quarter of fiscal 2013. The prior year gross profit includes net flood insurance proceeds of \$1.3 million. Without these insurance proceeds, the gross profit percentage would have been 31% for both years.

During the second quarter of fiscal 2012, we received \$1.6 million of insurance proceeds related to the Australia flood, which was offset by \$.7 million of flood related costs incurred during the quarter. The after-tax impact of the flood recovery was \$.7 million (\$.06 per diluted share).

The effective tax rate of 36% in the second quarter of fiscal 2013 was higher than the effective tax rate in the second quarter of fiscal 2012 primarily due to a \$.7 million increase in our accrual for state tax matters during the current quarter.

The following summarizes financial results for the Americas for the second quarter of fiscal 2013. All percentage change comparisons to the prior year exclude the impact of foreign currencies:

Net sales increased 14% primarily due to higher sales volumes of products to the construction industry.

Our gross profit percentage remained consistent with the prior year as the benefit of higher sales volumes was offset by increased sales of lower margin products to the construction industry.

Selling and administrative costs increased due primarily to consulting, personnel, product liability and other general costs.

The following summarizes financial results for Europe for the second quarter of fiscal 2013. All percentage change comparisons to the prior year exclude the impact of foreign currencies:

Net sales decreased 10% primarily as a result of a weakening lift truck market, due to economic conditions in Europe.

The decrease in our gross profit percentage is a result of lower cost absorption due to decreased sales volumes and higher product costs from changes in foreign currency rates.

Selling and administrative costs decreased during the current year primarily due to foreign currency rate changes.

During the first six months of fiscal 2012, we received net insurance proceeds related to the Australia flood of \$2.4 million. These proceeds increased net income by \$1.7 million (\$0.15 diluted share).

Operating income was impacted during the current year by an 8% increase in selling and administrative costs primarily due to higher personnel costs, professional and legal expenses, consulting fees, product liability costs and warranty charges.

The following summarizes financial results for Europe for the first six months of fiscal 2013. All percentage change comparisons to the prior year exclude the impact of foreign currencies:

Net sales decreased 4% primarily as a result of a weakening lift truck market, due to uncertain economic conditions in the region.

The decrease in our gross profit percentage is a result of lower cost absorption due to decreased sales volumes and higher product costs from changes in foreign currency rates.

The following summarizes financial results for Asia Pacific for the first six months of fiscal 2013. All percentage change comparisons to the prior year exclude the impact of foreign currencies:

Net sales increased 10% primarily due to higher sales volumes as a result of a strong lift truck market throughout the region.

Our prior year gross profit percentage included net insurance proceeds of \$2.0 million related to the Australia flood. Without these insurance proceeds, the gross profit percentage would have been 28% for both years.

During the first six months of fiscal 2012, operating income reflects \$2.4 million from net flood insurance proceeds related to the Australia flood. We did not receive any insurance proceeds and did not incur any significant flood related costs during the first six months of fiscal 2013.

The following summarizes financial results for China for the first six months of fiscal 2013. All percentage change comparisons to the prior year exclude the impact of foreign currencies:

Net sales decreased 14% primarily due to a slowdown in the Chinese economy and the lift truck industry.

Our gross profit percentage remained consistent with the prior year as sales volumes of lower margin product decreased during the current year.

CASH FLOWS**Statements of Cash Flows**

The statements of cash flows reflect the changes in cash and cash equivalents for the three and six months ended July 31, 2012 and July 31, 2011 by classifying transactions into three major categories of activities: operating, investing and financing.

The following table presents a summary of our cash flows:

Table of Contents**Operating Activities**

Our primary source of liquidity is cash generated from operating activities, which is measured as net income adjusted for changes in working capital and non-cash operating items such as depreciation, amortization and share-based compensation.

The following are operating activity highlights:

Net income was lower during fiscal 2013 compared to fiscal 2012 primarily due to flood insurance proceeds received in the prior year.

Inventories increased \$3 million during fiscal 2013 primarily due to product needed to meet customer demand and a business acquisition in Brazil, compared to an increase of \$12 million during fiscal 2012 as a result of a significant increase in customer demand.

During the first six months of fiscal 2013 and fiscal 2012, accounts receivable increased primarily as a result of higher sales. However, the accounts receivable increase during fiscal 2012 was significantly higher.

Investing Activities

Our primary investing activity is capital expenditures, which are primarily for equipment and tooling related to product improvements, more efficient production methods and replacement for normal wear and tear. Capital expenditures by geographic segment were as follows (in thousands):

	Three Months Ended July 31		Six Months Ended July 31	
	2012	2011	2012	2011
Americas	\$ 1,266	\$ 1,221	\$ 3,017	\$ 2,095
Europe	432	447	641	772
Asia Pacific	421	636	1,153	1,150
China	535	1,102	946	1,691
	\$ 2,654	\$ 3,406	\$ 5,757	\$ 5,708

The following are investing activity highlights:

We expect capital expenditures for the remainder of fiscal 2013 to be approximately \$11 million. This includes \$9 million for routine expenditures and \$2 million to replace equipment damaged in the Australia flood last year.

We acquired the assets, primarily inventory, accounts receivable and intangible assets, of our Brazilian distributor during the first quarter of fiscal 2013 for \$1.2 million.

Financing Activities

The following are financing activity highlights:

We declared and paid dividends totaling \$7.8 million (\$0.70 per share) during fiscal 2013 and \$4.4 million (\$0.40 per share) during fiscal 2012.

FINANCIAL CONDITION AND LIQUIDITY

The following are highlights regarding our financial condition and liquidity for the first six months of fiscal 2013:

Total outstanding debt at July 31, 2012, was \$15 million, an increase of approximately \$9 million compared to our January 31, 2012 debt balance. Our cash balance at July 31, 2012 was \$39 million, an increase of \$14 million compared to our January 31, 2012 cash balance. We anticipate paying down debt during the remainder of fiscal 2013, as we are able to repatriate funds from certain foreign subsidiaries without adverse tax consequences.

As of July 31, 2012, outstanding borrowings under our \$100 million credit facility totaled \$15 million with an additional \$.6 million used to issue letters of credit. Based on these borrowings, the additional amount that may be borrowed under our credit facility is \$84.4 million.

We were in compliance with our debt covenants at July 31, 2012. We believe our cash and cash equivalents, existing credit facilities and cash flows from operations will be sufficient to satisfy our expected working capital, capital expenditures and debt payment requirements for at least the next twelve months.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's discussion and analysis of financial condition and results of operations is based on our consolidated financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP). The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities. We evaluate our estimates and judgments on an on-going basis, including those related to inventory reserves, impairment of long-lived assets, impairment of goodwill, environmental liabilities, benefit plans, share-based compensation and income taxes. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. A description of our critical accounting policies and related judgments and estimates that affect the preparation of our consolidated financial statements is set forth in our Annual Report on Form 10-K for the year ended January 31, 2012.

OFF BALANCE SHEET ARRANGEMENTS

At July 31, 2012, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, that would have been established for the purpose of facilitating off-balance sheet arrangements or for other contractually narrow or limited purposes. As such, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships.

RECENT ACCOUNTING PRONOUNCEMENTS

Other Comprehensive Income

In June 2011, a pronouncement was issued that eliminates the option of presenting other comprehensive income as part of the statement of changes in stockholders' equity and provides an entity with the option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. This guidance also requires presentation of items on the face of the financial statements that are reclassified from other comprehensive income to net income. This guidance does not change the items that must be reported in other comprehensive income, when an item of other comprehensive income must be reclassified to net

income or how tax effects of each item of other comprehensive income are presented. This guidance is effective for interim and annual reporting periods beginning after December 15, 2011 and should be applied retrospectively. We have adopted this guidance by presenting a separate statement of comprehensive income.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential loss arising from adverse changes in market rates and prices, such as foreign currency exchange rate and interest rate fluctuations. A significant portion of our net sales and expenses are denominated in foreign currencies. As a result, our operating results could become subject to significant fluctuations based upon changes in the exchange rates of the foreign currencies in relation to the U.S. Dollar.

The following table represents the three-month percentage change from April 30, 2012 to July 31, 2012 and the six-month percentage change from January 31, 2012 to July 31, 2012 in the end of month foreign currency rates compared to the U.S. dollar used by our significant operations. As a result of these changes, foreign currency translation adjustments increased shareholders' equity by \$4.7 million during the quarter ended July 31, 2012 and \$4.0 million during the first six months of fiscal 2013.

Currency	Change for Three Months Ended July 31, 2012	Change for Six Months Ended July 31, 2012
Japanese Yen	2%	(2%)
Australian Dollar	1%	(1%)
Korean Won	0%	(1%)
Chinese Yuan	(1%)	(1%)
Canadian Dollar	(2%)	0%
British Pound	(3%)	(1%)
Euro	(7%)	(6%)

The table below illustrates the hypothetical increase in net sales for the second quarter of fiscal 2013 resulting from a 10% weaker U.S. dollar against foreign currencies which impact our operations (in millions):

Euro	\$ 1.7
Chinese Yuan	1.6
Japanese Yen	0.8
Australian Dollar	0.8
Canadian Dollar	0.7
Korean Won	0.5
British Pound	0.5
Other currencies (representing 2% of consolidated net sales)	0.3
	\$ 6.9

A 10% weaker U.S. dollar during the quarter, measured against foreign currencies that affect our operations, would have increased our operating income by approximately \$1.5 million.

We enter into foreign currency forward exchange contracts to offset the impact of currency fluctuations on certain nonfunctional currency assets and liabilities. The principal currencies hedged are denominated in Japanese Yen, Canadian Dollars, Euros, Australian Dollars and British Pounds. Our foreign currency forward exchange contracts have terms lasting up to three months, but generally less than one month. We do not enter into derivatives or other financial instruments for trading or speculative purposes and we do not record our derivatives under hedge accounting.

A majority of our products are manufactured using specialty steel. As such, our cost of goods sold is sensitive to fluctuations in specialty steel prices, either directly through the purchase of raw materials or indirectly through the purchase of components. However, due to the nature of specialty steel, we are not impacted by changes in commodity steel prices as directly as others might be.

Presuming that the full impact of steel price increases is reflected in all steel and steel based component purchases, we estimate our gross profit percentage would decrease by approximately 0.4% for each 1.0% increase in steel prices. Based on our statement of income for the three months ended July 31, 2012, a 1.0% increase in steel prices would have decreased consolidated gross profit by approximately \$0.5 million.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, our chief executive officer and chief financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective in ensuring that information required to be disclosed in our Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner, and (2) accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There has been no change in the internal control over financial reporting that occurred during the three months ended July 31, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
