Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited)

1. Nature of Operations and Significant Accounting Policies

Basis of Presentation

The unaudited interim consolidated financial statements and the accompanying notes include the accounts of the consolidated entity (the Company), which primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries.

The unaudited interim consolidated financial statements have been prepared on the basis of U.S. generally accepted accounting principles (GAAP) for interim financial reporting and with the instructions to Form 10-Q and Regulations S-K, S-X, and other applicable regulations. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. As such, these unaudited interim consolidated financial statements should be read in conjunction with the Company's 2011 Form 10-K as filed with the Securities and Exchange Commission. Management believes that the disclosures are adequate to make the information presented not misleading, and all normal and recurring adjustments necessary to present fairly the financial position at September 30, 2012 and the results of operations for all periods presented have been made. The results of operations for any interim period are not necessarily indicative of the Company's operating results for a full year. Significant intercompany transactions have been eliminated in consolidation and certain immaterial reclassifications have been made to prior period results to conform with the current period's presentation.

The preparation of the unaudited interim consolidated financial statements requires management of the Company to make estimates and assumptions relating to the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements, and the reported amounts of revenue and expenses during the period. These estimates are inherently subject to change and actual results could differ from these estimates.

Immaterial Correction of Errors

During the second quarter of 2012, the Company identified an error in the presentation of treasury stock held for the benefit of the Company's deferred compensation plans. This treasury stock was previously recorded as a component of other assets but should have been recorded in stockholders' equity as treasury stock. Accordingly, the Company reclassified \$6.2 million (188,621 shares) from other assets to treasury stock. This error had no material impact on net income in the current or prior reporting periods.

During the first quarter of 2012, the Company identified an error related to the amortization period for unrecognized actuarial gains and losses for its pension plan resulting in a reduction to net periodic pension expense of \$2.0 million before applicable income taxes and an after-tax increase of \$1.3 million to net income and stockholders' equity. The excess amortization had been previously recorded during 2011. Please refer to Note 11 - Pensions and Other Postretirement Benefits for additional information.

During 2011, the Company identified errors related to the classification of amounts reported in the Consolidated Statement of Cash Flows. The Company has revised the Consolidated Statement of Cash Flows for the nine months ended September 30, 2011. The changes resulted in an increase of \$4.4 million to cash flows from operating activities and a decrease of the same amount to cash flows from financing activities. This change did not impact net income, the balance sheet, or stockholders' equity for the period.

Management has evaluated these errors both quantitatively and qualitatively, and concluded that these corrections were not material to the consolidated financial statements.

Significant Accounting Policies

No significant updates or changes to these policies occurred during the nine months ended September 30, 2012.

For a full discussion of these significant accounting policies, please refer to the Company's 2011 Form 10-K.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

2. New Accounting Pronouncements

For a full discussion of new accounting pronouncements and other regulatory activity and their impact on the Company, please refer to the Company's 2011 Form 10-K.

Accounting Pronouncements Adopted During 2012

In October 2010, the Financial Accounting Standards Board (FASB) issued guidance that modifies the types of costs incurred by insurance entities that can be capitalized when issuing or renewing insurance contracts. The guidance defines allowable deferred acquisition costs as incremental or directly related to the successful acquisition of new or renewal contracts. In addition, certain costs related directly to acquisition activities performed by the insurer, such as underwriting and policy issuance, are also deferrable. This guidance also defines the considerations for the deferral of direct-response advertising costs. This guidance became effective for interim and annual periods beginning after December 15, 2011, with either prospective or retrospective application permitted. The Company adopted this new guidance prospectively on January 1, 2012. Please refer to Note 3 – Change in Accounting Principle and Change in Accounting Estimate for additional information.

In May 2011, the FASB issued new guidance concerning fair value measurements and disclosure. The new guidance is the result of joint efforts by the FASB and the International Accounting Standards Board (IASB) to develop a single, converged fair value framework on how to measure fair value and the necessary disclosures concerning fair value measurements. The guidance became effective for interim and annual periods beginning after December 15, 2011. The Company adopted this new guidance on January 1, 2012 with no material impact to the consolidated financial statements.

In June 2011, the FASB issued new guidance regarding the manner in which entities present comprehensive income in the financial statements. This guidance removes the previous presentation options and provides that entities must report comprehensive income in either a continuous statement of comprehensive income or two separate but consecutive statements. This guidance also includes the requirement for reclassification adjustments for items that are reclassified from other comprehensive income to net income to be presented on the face of the financial statements. This guidance does not change the items that must be reported in other comprehensive income nor does it require any disclosures in addition to those previously required. In December 2011, the FASB deferred the effective date for amendments to the presentation of reclassification adjustments. The guidance became effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company adopted this new guidance on January 1, 2012 with no material impact to the consolidated financial statements.

All other new accounting standards and updates of existing standards issued through the date of this filing were considered by management and did not relate to accounting policies and procedures pertinent to the Company at this time.

3. Change in Accounting Principle and Change in Accounting Estimate

Change in Accounting Principle

The Company adopted Accounting Standards Update (ASU) No. 2010-26, *Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts*, effective January 1, 2012. This guidance modifies the types of costs incurred by insurance entities that can be capitalized when issuing or renewing insurance contracts. The guidance defines allowable deferred acquisition costs as incremental or directly related to the successful acquisition of new or renewal contracts. In addition, certain costs related directly to acquisition activities performed by the insurer, such as underwriting and policy issuance, are also deferrable. This guidance also defines the considerations for the deferral of direct-response advertising costs.

Effective January 1, 2012, the Company prospectively adopted this guidance. Pursuant to this guidance, the Company evaluated the types of acquisition costs it capitalizes. The Company capitalizes agent compensation and benefits and other expenses that are directly related to the successful acquisition of contracts. The Company also capitalizes expenses directly related to activities performed by the Company, such as underwriting, policy issuance, and processing fees incurred in connection with successful contract acquisitions.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Deferred acquisition costs are capitalized as incurred. These costs for life insurance products are generally deferred and amortized over the premium paying period. Policy acquisition costs that relate to interest sensitive and variable insurance products are deferred and amortized in relation to the estimated gross profits to be realized over the lives of the contracts. For interest sensitive and variable insurance products, estimated gross profits are composed of net interest income, net realized investment gains and losses, fees, surrender charges, expenses, and mortality gains and losses. At the issuance of policies,

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

projections of estimated gross profits are made which are then replaced by actual gross profits over the lives of the policies. The Company considers the following assumptions to be of significance when projecting future estimated gross profits: mortality, interest rates and spreads, surrender and withdrawal rates, and expense margins.

The amount of acquisition costs capitalized during the third quarter and nine months ended September 30, 2012 were \$8.8 million and \$27.8 million, respectively. The acquisition costs that would have been capitalized during the third quarter and nine months ended September 30, 2012 if the Company's previous policy had been applied during that period were \$8.2 million and \$25.7 million, respectively. Thus, the adoption of this guidance resulted in increases of \$0.6 million and \$2.1 million in the amount of acquisition costs capitalized during the two respective periods. After consideration of amortization, the net result of the adoption of ASU No. 2010-26 was an increase of \$0.5 million and an increase of \$2.0 million in pretax earnings in the third quarter and nine months ended September 30, 2012, respectively.

Change in Accounting Estimate

During the third quarter of 2012, the Company completed a change in accounting estimate related to a long-lived asset. This asset concluded its initial depreciation schedule in the third quarter of 2012. The Company reassessed this asset and its ongoing use of it and determined that it has a useful life greater than estimated at the time of initial implementation. The Company has the ability and the intent to hold and use this asset over the reassessed useful life. The Company also established an updated residual value, consistent with longer use of the asset. The Company recalculated the depreciation that would have been recognized to date using the reevaluated useful life and residual value resulting in additional depreciation of \$3.7 million being recorded as an operating expense in the third quarter of 2012. The Company evaluated the impact of the change in future depreciation and determined that this change in accounting estimate will not materially impact future comparisons.

Unrealized Losses on Investments

The Company reviews all security investments, with particular attention given to those having unrealized losses. Further, the Company specifically assesses all investments with greater than 10% declines in fair value below amortized cost and, in general, monitors all security investments as to ongoing risk. These risks are fundamentally evaluated through both a qualitative and quantitative analysis of the issuer. The Company also prepares a formal review document no less often than quarterly of all investments where fair value is less than 80% of amortized cost for six months or more and selected investments that have changed significantly from a previous period and that have a decline in fair value greater than 10% of amortized cost.

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

The Company has a policy and process in place to identify securities that could potentially have an impairment that is other-than-temporary. This process involves monitoring market events and other items that could impact issuers. The Company considers relevant facts and circumstances in evaluating whether the impairment of a security is other-than-temporary. Relevant facts and circumstances considered are described in the Valuation of Investments section of Note 1 – Nature of Operations and Significant Accounting Policies of the Company’s 2011 Form 10-K.

To the extent the Company determines that a fixed maturity security is deemed to be other-than-temporarily impaired, the portion of the impairment that is deemed to be due to credit is charged to the Consolidated Statements of Comprehensive Income and the cost basis of the underlying investment is reduced. The portion of such impairment that is determined to be non-credit-related is deducted from net realized loss in the Consolidated Statements of Comprehensive Income and is reflected in other comprehensive income and accumulated other comprehensive income.

There are a number of significant risks and uncertainties inherent in the process of monitoring impairments, determining if an impairment is other-than-temporary, and determining the portion of an other-than-temporary impairment that is due to credit. These risks and uncertainties are described in the Valuation of Investments section of Note 1 of the Company’s 2011 Form 10-K.

Once a security is determined to have met certain of the criteria for consideration as being other-than-temporarily impaired, further information is gathered and evaluated pertaining to the particular security. If the security is an unsecured obligation, the additional research is a top-down approach with particular emphasis on the likelihood of the issuer to meet the contractual terms of the obligation. If the security is secured by an asset or guaranteed by another party, the value of the underlying secured asset or the financial ability of the third-party guarantor is evaluated as a secondary source of repayment. Such research is based upon a top-down approach, narrowing to the specific estimates of value and cash flow of the underlying secured asset or guarantor. If the security is a collateralized obligation, such as a mortgage-backed or other asset-backed instrument, research is also conducted to obtain and analyze the performance of the collateral relative to expectations at the time of acquisition and with regard to projections for the future. Such analyses are based upon historical results, trends, comparisons to collateral performance of similar securities, and analyses performed by third parties. This information is used to develop projected cash flows that are compared to the amortized cost of the security.

If a determination is made that an unsecured security, secured security, or security with a guaranty of payment by a third-party is other-than-temporarily impaired, an estimate is developed of the portion of such impairment that is due to credit. The estimate of the portion of impairment due to credit is based upon a comparison of ratings and maturity horizon for the security and relative historical default probabilities from one or more nationally recognized rating organizations. When appropriate for any given security, sector or period in the business cycle, the historical default probability is adjusted to reflect periods or situations of distress by adding to the default probability increments of standard deviations from mean historical results. The credit impairment analysis is supplemented by estimates of potential recovery values for the specific security, including the potential impact of the value of any secured assets, in the event of default. This information is used to determine the Company’s best estimate, derived from probability-weighted cash flows.

The evaluation of loan-backed and similar asset-backed securities, particularly including residential mortgage-backed securities, with significant indications of potential other-than-temporary impairment requires considerable use of estimates and judgment. Specifically, the Company performs discounted cash flow projections on these securities to evaluate whether the value of the investment is expected to be fully realized. Projections of expected future cash flows are based upon considerations of the performance of the actual underlying assets, including historical delinquencies, defaults, severity of losses incurred, and prepayments, along with the Company’s estimates of future results for these factors. The Company’s estimates of future results are based upon actual historical performance of the underlying assets relative to historical, current and expected general economic conditions, specific conditions related to the underlying assets, industry data, and other factors that are believed to be relevant. If the present value of the projected expected future cash flows is determined to be below the Company’s carrying value, the Company recognizes an other-than-temporary impairment on the portion of the carrying value that exceeds the projected expected future cash flows. To the extent that the loan-backed or other asset-backed securities were high quality investments at the time of acquisition, and they remain high quality investments and do not otherwise demonstrate characteristics of impairment, the Company performs other initial evaluations to determine whether other-than-temporary cash flow evaluations need to be performed.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The discounted future cash flow calculation typically becomes the primary determinant of whether any portion and to what extent an unrealized loss is due to credit on loan-backed and similar asset-backed securities with significant indications of potential other-than-temporary impairment. Such indications typically include below investment grade ratings and significant unrealized losses for an extended period of time, among other factors. The Company identified 17 non-U.S. Agency mortgage-backed securities that had such indications at both September 30, 2012 and December 31, 2011. The discount rate used in calculating the present value of future cash flows was the investment yield at the time of purchase for each security. The initial default rates were assumed to remain constant over a 24-month time frame and grade down thereafter, reflecting the general perspective of a more stabilized residential housing environment in the future.

For loan-backed and similar asset-backed securities, the determination of any amount of impairment that is due to credit is based upon the present value of projected future cash flows being less than the amortized cost of the security. This amount is recognized as a realized loss in the Company's Consolidated Statements of Comprehensive Income and the carrying value of the security is written down by the same amount. The portion of an impairment that is determined not to be due to credit is recorded as a component of accumulated other comprehensive income in the Consolidated Balance Sheets.

As part of the required accounting for unrealized gains and losses, the Company also adjusts the deferred acquisition costs (DAC) and value of business acquired (VOBA) assets to recognize the adjustment to those assets as if the unrealized gains and losses from securities classified as available for sale actually had been realized.

The following table provides information regarding fixed maturity and equity security investments available for sale with unrealized losses by length of time at September 30, 2012.

In addition, the Company also considers as part of its monitoring and evaluation process the length of time the fair value of a security is below amortized cost. At September 30, 2012, the Company had 41 issues in its investment portfolio of fixed maturity and equity securities with unrealized losses. Included in this total, twelve security issues were below cost for less than one year; five security issues were below cost for one year or more and less than three years; and 24 security issues were below cost for three years or more. At December 31, 2011, the Company had 85 issues in its investment portfolio of fixed maturity and equity securities with unrealized losses. Included in this total, 46 security issues were below cost for less than one year; ten security issues were below cost for one year or more and less than three years; and 29 security issues were below cost for three years or more.

Gross realized losses	(44)	(76)	(76)	(1,666)

Mortgage Loans

The Company invests on an ongoing basis in commercial mortgage loans that are secured by commercial real estate and are stated at cost, adjusted for amortization of premium and accrual of discount, less an allowance for potential future losses. This allowance is maintained at a level believed by management to be adequate to absorb estimated credit losses and was \$2.4 million at September 30, 2012 and \$2.8 million at December 31, 2011. The Company had 15% of its invested assets in commercial mortgage loans at September 30, 2012, compared to 17% at December 31, 2011. In addition to the subject collateral underlying the mortgage, the Company typically requires some amount of recourse from borrowers as another potential source of repayment. The recourse requirement is determined as part of the underwriting requirements of each loan. The average loan to value ratio for the overall portfolio was 44% and 46% at September 30, 2012 and December 31, 2011, respectively, and is based upon the current balance relative to the appraisal of value at the time the loan was originated or acquired.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The following table identifies the gross mortgage loan principal outstanding and the allowance for potential future losses at September 30, 2012 and December 31, 2011.

	September 30 2012	December 31 2011
Principal outstanding	\$ 563,214	\$ 604,772
Allowance for potential future losses	(2,442)	(2,849)
Carrying value	\$ 560,772	\$ 601,923

The following table summarizes the amount of gross mortgage loans held by the Company at September 30, 2012 and December 31, 2011, segregated by year of origination. Purchased loans are shown in the year acquired by the Company, although the individual loans may have been initially originated in prior years.

The Company may refinance commercial mortgage loans prior to contractual maturity as a means of originating new loans that meet the Company's underwriting and pricing parameters. The Company refinanced loans with outstanding balances of \$4.5 million during the third quarter of 2012 and did not refinance any loans during the third quarter of 2011. The Company refinanced loans with outstanding balances of \$13.1 million and \$9.7 million during the first nine months of 2012 and 2011, respectively.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

In the normal course of business, the Company commits to fund commercial mortgage loans generally up to 120 days in advance. These commitments typically have fixed expiration dates. A small percentage of commitments expire due to the borrower's failure to deliver the requirements of the commitment by the expiration date. In these cases, the Company retains the commitment fee. For additional information, please see Note 16 - Commitments.

At September 30, 2012, the Company had a construction-to-permanent loan commitment in the amount of \$2.8 million, and \$2.5 million had been disbursed on this loan. At completion and fulfillment of occupancy requirements, the construction loan will convert to a long-term, fixed-rate permanent loan.

5. Fair Value Measurements

Under GAAP, fair value represents the price that would be received to sell an asset (exit price) or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

The Company categorizes its financial assets and liabilities measured at fair value in three levels, based on the inputs and assumptions used to determine the fair value. These levels are as follows:

Level 1 Valuations are based upon quoted prices for identical instruments traded in active markets.

Level 2 Valuations are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market. Valuations are obtained from third-party pricing services or inputs that are observable or derived principally from or corroborated by observable market data.

Level 3 Valuations are generated from techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of discounted cash flow models, spread-based models, and similar techniques, using the best information available in the circumstances.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at fair value but for which fair value is disclosed.

Assets

Securities Available for Sale

Fixed maturity and equity securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon unadjusted quoted prices, if available, except as described in the subsequent paragraphs.

Short-Term Financial Assets

Short-term financial assets include cash and other short-term assets. Cash is categorized as Level 1. Other short-term assets are invested in institutional money market funds. These assets are categorized as Level 2, as the valuation is based upon the net asset value (NAV) of the fund.

Loans

The Company does not record loans at fair value. As such, valuation techniques discussed herein for loans are primarily for estimating fair value for purpose of disclosure.

Fair values of mortgage loans on real estate properties are calculated by discounting contractual cash flows, using discount rates based on current industry pricing or the Company's estimate of an appropriate risk-adjusted discount rate for loans of similar size, type, remaining maturity, likelihood of prepayment, and repricing characteristics. Mortgage loans are categorized as Level 3 in the fair value hierarchy.

The Company also has loans made to policyholders. These loans cannot exceed the cash surrender value of the policy. Carrying value of policy loans approximates fair value. Policy loans are categorized as Level 3.

Separate Accounts

The separate account assets and liabilities, which are equal, are recorded at fair value based upon NAV. They are categorized as Level 2 in the fair value hierarchy, as the Company receives independent prices from external pricing sources to determine the fair value.

Liabilities

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Investment-Type Liabilities Included in Policyholder Account Balances and Other Policyholder Funds

Fair values for liabilities under investment-type insurance contracts are based upon account value. The fair values of investment-type insurance contracts included with policyholder account balances for fixed deferred annuities are estimated to be their cash surrender values. The fair values of supplementary contracts without life contingencies are estimated to be the present value of payments using a market yield. The fair values of deposits with no stated maturity are estimated to be the amount payable on demand at the measurement date. These liabilities are categorized as Level 3.

Guaranteed Minimum Withdrawal Benefits (GMWB)

The Company offers a GMWB rider that can be added to new or existing variable annuity contracts. The rider provides an enhanced withdrawal benefit that guarantees a stream of income payments to an owner or annuitant, regardless of the contract account value. Fair value for GMWB rider contracts is a Level 3 valuation, as it is based on models which utilize significant unobservable inputs. These models require actuarial and financial market assumptions, which reflect the assumptions market participants would use in pricing the contract, including adjustments for volatility, risk, and issuer non-performance.

Notes to Consolidated Financial Statements (Unaudited) Continued

Notes Payable

Fair values for short-term notes payable approximate their carrying value. The carrying amount is a reasonable estimate of the fair value because of the relatively short time between the origination of the loan and its expected repayment.

Determination of Fair Value

The determination of the fair value of the Company's fixed maturity and equity securities is the responsibility of the Company's investment accounting group, which reports to the Principal Accounting Officer. This group manages and creates the policies and processes used to determine the fair value for these assets. This group employs third-party pricing services and obtains selected support from the Company's portfolio managers in order to achieve results for this multi-tiered process. All prices are reviewed by the investment accounting group. The financial reporting group, the Principal Accounting Officer, and the Chief Financial Officer also review the fair value methodologies and the fair values that are obtained each quarter. The results of those reviews are made known to the Company's Disclosure Committee and to the Company's Audit Committee. In addition, any significant policy or process changes made during the quarter are also discussed with the Company's Audit Committee.

The Company utilizes external independent third-party pricing services to determine the majority of its fair values on investment securities available for sale. At September 30, 2012, 96% of the carrying value of these investments was from external pricing services, 1% was from brokers, and 3% was derived from internal matrices and calculations, unchanged from December 31, 2011. In the event that the primary pricing service does not provide a price, the Company utilizes the price provided by a second pricing service. The Company reviews prices received from service providers for reasonableness and unusual fluctuations but generally accepts the price identified from the primary pricing service. In the event that a price is not available from either third-party pricing service, the Company pursues external pricing from brokers. Generally, the Company pursues and utilizes only one broker quote per security. In doing so, the Company solicits only brokers which have previously demonstrated knowledge and experience of the subject security. If a broker price is not available, the Company determines a fair value through various valuation techniques that may include discounted cash flows, spread-based models, or similar techniques, depending upon the specific security to be priced. These techniques are primarily applied to private placement securities. The Company utilizes available market information, wherever possible, to identify inputs into the fair value determination, primarily including prices and spreads on comparable securities. At September 30, 2012, the Company obtained prices for six securities from brokers and internally determined the prices for 18 securities. At December 31, 2011, the Company obtained prices for five securities from brokers and internally determined the prices for 15 securities.

Each quarter, the Company evaluates the prices received from third-party security pricing services and independent brokers to ensure that the prices represent a reasonable estimate of the fair value within the macro-economic environment, sector factors, and overall pricing trends and expectations. The Company corroborates and validates the primary pricing sources through a variety of procedures that include but are not limited to comparison to additional independent third-party pricing services or brokers, where possible; a review of third-party pricing service methodologies; back testing; and comparison of prices to actual trades for specific securities where observable data exists. In addition, the Company analyzes the primary third-party pricing service's methodologies and related inputs and also evaluates the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy. Finally, the Company also performs additional evaluations when individual prices fall outside tolerance levels for prices received from third-party pricing services.

Fair value measurements for assets and liabilities where there exists limited or no observable market data are calculated using the Company's own estimates and are categorized as Level 3. These estimates are based on current interest rates, credit spreads, liquidity premium or discount, the economic and competitive environment, unique characteristics of the asset or liability, and other pertinent factors. Therefore, these estimates cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any valuation technique. Further, changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

The Company's own estimates of fair value of fixed maturity and equity securities are derived in a number of ways, including but not limited to: 1) pricing provided by brokers, where the price indicates reliability as to value; 2) fair values of comparable securities, incorporating a spread adjustment for maturity differences, collateralization, credit quality, liquidity, and other items, if applicable; 3) discounted cash flow models and margin spreads; 4) bond yield curves; 5) observable market prices and exchange transaction information not provided by external pricing

services; and 6) statement values provided to the Company by fund managers.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The determination of the value of the Company's liabilities that are reported at fair value in the financial statements is the responsibility of the Company's valuation actuary group, which reports to the Company's Senior Vice President and Actuary. This group manages and creates the policies and processes used to determine the fair value for these liabilities. This methodology uses internal assumptions and directed third-party inputs to derive a value including a risk-neutral option pricing model that incorporates a third-party-developed index that is consistent with the attributes of the product and provides for an approximate match of the volatility measure with the expected life of the underlying contracts. The fair value methodologies and the fair values are reviewed by the Senior Vice President and Actuary, the Principal Accounting Officer, and the Chief Financial Officer. The results of those reviews are made known to the Company's Disclosure Committee and to the Company's Audit Committee. In addition, any significant policy or process changes made during the quarter are also discussed with the Company's Audit Committee.

Categories Reported at Fair Value

	Year Ended December 31, 2011			Liabilities
	Assets		Total	
	Fixed maturity securities available for sale	Equity securities available for sale		
Beginning balance	\$ 55,801	\$ 1,180	\$ 56,981	\$ (2,799)
Included in earnings	11	92	103	2,500
Included in other comprehensive income	1,385	51	1,436	-
Purchases, issuances, sales and other dispositions:				
Purchases	-	-	-	-
Issuances	-	-	-	163
Sales	-	-	-	-
Other dispositions	(2,977)	(200)	(3,177)	(51)
Transfers into Level 3	8,640	-	8,640	-
Transfers out of Level 3	(19,101)	-	(19,101)	-
Ending balance	\$ 43,759	\$ 1,123	\$ 44,882	\$ (187)
Net unrealized gains	\$ 1,401	\$ 105	\$ 1,506	

The Company did not exclude any realized or unrealized gains or losses on items transferred into Level 3 in any of the periods presented. Depending upon the availability of Level 1 or Level 2 pricing, specific securities may transfer into or out of Level 3. The Company transferred five securities from Level 2 to Level 1 during the third quarter ended September 30, 2012. These securities were approaching maturity and the price was known.

The following table presents quantitative information about material Level 3 fair value measurements as of September 30, 2012.

	Fair Value	Valuation Technique	Unobservable Inputs	Range (in basis points)	Weighted Average of Range
Fixed maturity securities	\$ 51,792	Market comparable	Spread adjustment	69 -353	204

The Company's primary category of Level 3 fair values is fixed maturity securities, totaling \$51.8 million as of September 30, 2012. These assets are valued using comparable security valuations through the unobservable input of estimated discount spreads. Specifically, the Company reviews the values and discount spreads on similar securities for which such information is observable in the market. Estimates of increased discount spreads are then determined based upon the characteristics of the securities being evaluated. The Company estimates that an increased spread of 10 basis points on each of the Level 3 securities would reduce the reported fair value by \$0.2 million as of September 30, 2012.

Other assets and liabilities categorized as Level 3 for purposes of fair value determination are not material to the Company's financial statements, and the sensitivities of such valuations to unobservable inputs are also believed to not be material.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The table below is a summary of fair value estimates at September 30, 2012 and December 31, 2011 for financial instruments. The Company has not included assets and liabilities that are not financial instruments in this disclosure. The total of the fair value calculations presented do not represent, and should not be construed to represent, the underlying value of the Company.

	September 30, 2012		December 31, 2011

6. Financing Receivables

The Company has financing receivables that have both a specific maturity date, either on demand or on a fixed or determinable date, and are recognized as an asset in the Consolidated Balance Sheets.

The table below identifies the Company's financing receivables by classification at September 30, 2012 and December 31, 2011.

	September 30 2012	December 31 2011
Receivables:		
Agent receivables, net (allowance \$2,209; \$2,226 - 2011)	\$ 1,540	\$ 1,708
Investment-related financing receivables:		
Mortgage loans, net (allowance \$2,442; \$2,849 - 2011)	560,772	601,923
Total financing receivables	\$ 562,312	\$ 603,631

The following table details the activity of the allowance for uncollectible accounts on agent receivables at September 30, 2012 and December 31, 2011.

Agent Receivables

The Company has agent receivables which are classified as financing receivables and are reduced by an allowance for doubtful accounts. These trade receivables from agents are long-term in nature and are specifically assessed as to the collectability of each receivable. The Company's gross agent receivables totaled \$3.7 million at September 30, 2012, and the Company maintained an allowance for doubtful accounts totaling \$2.2 million. Gross agent receivables totaled \$3.9 million with an allowance for doubtful accounts of \$2.2 million at December 31, 2011. The Company had no material troubled debt that was restructured or modified during any of the periods presented. The Company has two types of agent receivables, including:

Agent specific loans. At September 30, 2012, these loans totaled \$1.0 million with an allowance for doubtful accounts of \$0.2 million. At December 31, 2011, agent specific loans totaled \$0.8 million with an allowance for doubtful accounts of \$0.2 million. Various agent commission advances and other commission receivables. Gross agent receivables in this category totaled \$2.7 million, with an allowance for doubtful accounts of \$2.0 million at September 30, 2012. Gross agent receivables totaled \$3.1 million and the allowance for doubtful accounts was \$2.0 million at December 31, 2011.

Mortgage Loans

The Company considers its mortgage loan portfolio to be long-term financing receivables. Mortgage loans are stated at cost, net of an allowance for potential future losses. Loans in foreclosure, loans considered impaired, or loans past due 90 days or more are placed on a non-accrual status.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

If a mortgage loan is determined to be on non-accrual status, the Company does not accrue interest income. The loan is independently monitored and evaluated as to potential impairment or foreclosure. If delinquent payments are made and the loan is brought current, then the Company returns the loan to active status and accrues income accordingly.

Generally, the Company considers its mortgage loans to be a portfolio segment. The Company considers its primary class to be property type. The Company primarily uses loan-to-value as its credit risk quality indicator but also monitors additional secondary risk factors, such as geographic distribution both on a regional and specific state basis. The mortgage loan portfolio segment is presented by property type in a table in Note 3 Investments, as are geographic distributions for both regional and significant state concentrations. These measures are also supplemented with various other analytics to provide additional information concerning mortgage loans and management's assessment of financing receivables.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The following table presents an aging schedule for delinquent payments for both principal and interest at September 30, 2012 and December 31, 2011, by property type.

	Book Value	Amount of Payments Past Due			Total
		30-59 Days	60-89 Days	> 90 Days	
September 30, 2012					
Industrial	\$ -	\$ -	\$ -	\$ -	\$ -
Medical	2,982	-	-	68	68
Office	12,759	85	44	-	129
Other	-	-	-	-	-
Total	\$ 15,741	\$ 85	\$ 44	\$ 68	\$ 197
December 31, 2011					
Industrial	\$ -	\$ -	\$ -	\$ -	\$ -
Office	816	13	-	-	13
Medical	7,019	75	-	-	75
Other	-	-	-	-	-
Total	\$ 7,835	\$ 88	\$ -	\$ -	\$ 88

At September 30, 2012, there were five mortgage loans 30 or more days past due, including one 60 days past due and one 90 days past due. The loan that is 90 days past due is in the process of foreclosure. Subsequently, payment was received on four of the five delinquent loans and three were brought current in October 2012. Two loans remained 30 or more days delinquent.

The allowance for potential future losses on mortgage loans is maintained at a level believed by management to be adequate to absorb estimated credit losses. Management's periodic evaluation and assessment of the adequacy of the reserve is based on known and inherent risks in the portfolio, historical and industry data, current economic conditions, and other relevant factors. The Company assesses the amount it maintains in the mortgage loan allowance through an assessment of what the Company believes are relevant factors at both the macro-environmental level and specific loan basis. A loan is considered impaired if it is probable that contractual amounts due will not be collected. The Company's allowance for potential future losses was \$2.4 million at September 30, 2012 and \$2.8 million at December 31, 2011. For information regarding management's periodic evaluation and assessment of mortgage loans and the allowance for potential future losses, please refer to Note 5 Financing Receivables in the Company's 2011 Form 10-K.

The Company has had four mortgage loan defaults in the current and prior year. One loan was foreclosed in the first quarter of 2012 and an impairment of \$0.2 million was recorded. One of two loan defaults in 2011 resulted in an impairment of \$0.4 million, while the second loan default in 2011 did not result in an impairment based upon the fair value of the property being greater than the loan value. The fourth loan default, which occurred in third quarter of 2012, is currently in the foreclosure process. The Company had no troubled loans that were restructured or modified during 2012 or 2011.

7. Variable Interest Entities

The Company invests in certain affordable housing and real estate joint ventures which are considered to be variable interest entities (VIEs) and are included in Real Estate in the Consolidated Balance Sheets. The assets held in affordable housing real estate joint venture VIEs are primarily residential real estate properties that are restricted to provide affordable housing under federal or state programs for varying periods of time. The restrictions primarily apply to the rents that may be paid by tenants residing in the properties during the term of an agreement to remain in the

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

affordable housing program. Investments in real estate joint ventures are equity interests in partnerships or limited liability corporations that may or may not participate in profits or residual value. In certain cases, the Company may issue fixed-rate senior mortgage loan investments secured by properties controlled by VIEs. These investments are classified as mortgage loans in the Consolidated Balance Sheets, and the income received from such investments is recorded as investment income in the Consolidated Statements of Comprehensive Income. For additional information, please refer to Note 6 Variable Interest Entities in the Company's 2011 Form 10-K.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

The following table presents the carrying amount and maximum exposure to loss relating to VIEs for which the Company holds a variable interest, but is not the primary beneficiary, and which had not been consolidated at September 30, 2012 and December 31, 2011. The table includes investments in eight real estate joint ventures and 27 affordable housing real estate joint ventures at September 30, 2012 and investments in eleven real estate joint ventures and 28 affordable housing real estate joint ventures at December 31, 2011.

	September 30 2012		December 31 2011	
	Carrying Amount	Maximum Exposure to Loss	Carrying Amount	Maximum Exposure to Loss
Real estate joint ventures	\$ 24,033	\$ 24,033	\$ 35,551	\$ 35,551
Affordable housing real estate joint ventures	23,090	60,419	20,749	61,124
Total	\$ 47,123	\$ 84,452	\$ 56,300	\$ 96,675

The maximum exposure to loss relating to the real estate joint ventures and affordable housing real estate joint ventures, as shown in the table above, is equal to the carrying amounts plus any unfunded equity commitments, exposure to potential recapture of tax credits, guarantees of debt, or other obligations of the VIE with recourse to the Company. Unfunded equity and loan commitments typically require financial or operating performance by other parties and have not yet become due or payable but which may become due in the future.

At September 30, 2012 and December 31, 2011, the Company had \$1.7 million and \$7.0 million, respectively, in fixed-rate senior mortgage loan commitments outstanding to the benefit of entities that are also real estate joint venture VIEs. The loan commitments are included in the discussion of commitments in the Notes to Consolidated Financial Statements for both periods. The Company also has contingent commitments to fund additional equity contributions for operating support to certain real estate joint venture VIEs, which could result in additional exposure to loss. However, the Company is not able to quantify the amount of these contingent commitments.

In addition, the maximum exposure to loss on affordable housing joint ventures at September 30, 2012 and December 31, 2011 includes \$12.8 million and \$13.2 million, respectively, of losses which could be realized if the tax credits received by the VIEs were recaptured. Recapture events would cause the Company to reverse some or all of the benefit previously recognized by the Company or third parties to whom the tax credit interests were transferred. A recapture event can occur at any time during a 15-year required compliance period. The principal causes of recapture include financial default and non-compliance with affordable housing program requirements by the properties controlled by the VIE. The potential exposure due to recapture may be mitigated by guarantees from the managing member or managing partner in the VIE, insurance contracts, or changes in the residual value accruing to the Company's interests in the VIEs.

8. Separate Accounts

The Company has a guaranteed minimum withdrawal benefit (GMWB) rider that can be added to new or existing variable annuity contracts. The rider provides an enhanced withdrawal benefit that guarantees a stream of income payments to an owner or annuitant, regardless of the contract account value. The value of variable annuity separate accounts with the GMWB rider was \$100.1 million at September 30, 2012 (December 31, 2011-\$86.6 million) and the guarantee liability was (\$0.4) million at September 30, 2012 (December 31, 2011 - (\$0.2) million). The value of the GMWB rider is recorded at fair value. The change in this value is included in policyholder benefits in the Consolidated Statements of Comprehensive Income. The value of variable annuity separate accounts with the GMWB rider is recorded in separate account liabilities, and the value of the rider is included in other policyholder funds in the Consolidated Balance Sheets.

Guarantees are offered under variable universal life and variable annuity contracts: a guaranteed minimum death benefit (GMDB) rider is available on certain variable universal life contracts, and GMDB riders are provided on all variable annuities. The GMDB rider for variable universal life contracts guarantees the death benefit for specified periods of time, regardless of investment performance, provided cumulative

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

premium requirements are met. The GMDB rider for variable annuity contracts guarantees the death benefit for specified periods of time, regardless of investment performance. The total reserve held for the variable annuity GMDB at September 30, 2012 was \$0.1 million (December 31, 2011 - \$0.2 million).

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued****9. Notes Payable**

The Company had no notes payable at September 30, 2012 or December 31, 2011.

As a member of the Federal Home Loan Bank of Des Moines (FHLB) with a capital investment of \$4.7 million, the Company has the ability to borrow on a collateralized basis from the FHLB. The Company received dividends on the capital investment of less than \$0.1 million in both the third quarter and the nine-month period ended September 30, 2012. Dividends received were less than \$0.1 million in the third quarter and \$0.1 million for the nine-month period ended September 30, 2011.

The Company has unsecured revolving lines of credit of \$60.0 million with two major commercial banks with no balances outstanding and which are at variable interest rates based upon short-term indices. These lines of credit will expire in June of 2013. The Company anticipates renewing these lines as they come due.

10. Income Taxes

The following table provides a reconciliation of the federal income tax rate to the Company's effective income tax rate for the third quarters and nine months ended September 30, 2012 and 2011.

	Quarter Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
Federal income tax rate	35%	35%	35%	35%
Tax credits, net of equity adjustment	1	5	-	1
Permanent differences	(2)	(1)	(1)	(1)
Other	-	1	-	1
Effective income tax rate	34%	40%	34%	36%

The Company did not have any uncertain tax positions at September 30, 2012.

At September 30, 2012, the Company had a \$2.8 million current tax liability and a \$85.6 million deferred tax liability, compared to a \$0.3 million current tax recoverable and a \$68.8 million deferred tax liability at December 31, 2011.

11. Pensions and Other Postretirement Benefits

The following table provides the components of net periodic benefit cost for the third quarters and nine months ended September 30, 2012 and 2011:

	Pension Benefits Quarter Ended September 30		Other Benefits Quarter Ended September 30	
	2012	2011	2012	2011
Service cost	\$ -	\$ -	\$ 199	\$ 161
Interest cost	1,475	1,871	452	387

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Expected return on plan assets	(2,225)	(2,342)	(8)	(9)
Amortization of:				
Unrecognized actuarial loss	575	896	70	4
Unrecognized prior service cost	-	-	(63)	(68)
Net periodic benefit cost (income)	\$ (175)	\$ 425	\$ 650	\$ 475

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

	Pension Benefits Nine Months Ended September 30		Other Benefits Nine Months Ended September 30	
	2012	2011	2012	2011
Service cost	\$ -	\$ -	\$ 598	\$ 482
Interest cost	4,425	5,613	1,354	1,162
Expected return on plan assets	(6,675)	(7,025)	(24)	(28)
Amortization of:				
Unrecognized actuarial (gain) loss	(275)	2,687	211	13
Unrecognized prior service cost	-	-	(189)	(204)
Net periodic benefit cost (income)	\$ (2,525)	\$ 1,275	\$ 1,950	\$ 1,425

During the first quarter of 2012, the Company identified an error related to the amortization period for unrecognized actuarial gains and losses for its pension plan. The Company determined that upon curtailment of the plan on January 1, 2011, the status of the plan participants should have changed from active to inactive. The amortization period was corrected from the average remaining service period of plan participants, approximately ten years, to the average remaining life expectancy of plan participants, approximately 26 years. The Company has recognized a \$2.0 million pre-tax benefit related to the reversal of amortization recorded during 2011.

12. Share-Based Payment

The Company has a long-term incentive plan for senior management that provides a cash award to participants for the increase in the share price of the Company's common stock through units (phantom shares) assigned by the Board of Directors. The cash award is calculated over a three-year interval on a calendar year basis. At the conclusion of each three-year interval, participants will receive a cash award based on the increase in the share price during a defined measurement period, multiplied by the number of units. The increase in the share price will be determined based on the change in the share price from the beginning to the end of the three-year interval. Dividends are accrued and paid at the end of each three-year interval to the extent that they exceed negative stock price appreciation. Plan payments are contingent on the continued employment of the participant unless termination is due to a qualifying event such as death, disability, or retirement. The Company does not make payments in shares, warrants, or options.

No payments were made under this plan during the first nine months ended September 30, 2012 and 2011.

At each reporting period, an estimate of the share-based compensation expense is accrued, utilizing the share price at the period end. The cost of share-based compensation accrued as an operating expense in the third quarters of 2012 and 2011 was \$1.3 million and \$0.1 million, respectively, net of tax. The cost of compensation accrued as an operating expense for the nine months ended September 30, 2012 and September 30, 2011 was \$1.8 million and \$0.1 million, respectively, net of tax.

13. Comprehensive Income

Comprehensive income is comprised of net income and other comprehensive income. Other comprehensive income includes the unrealized investment gains or losses on securities available for sale (net of adjustments for realized investment gains or losses) net of adjustments to DAC, VOBA, future policy benefits, and policyholder account balances. In addition, other comprehensive income includes the change in the liability for benefit plan obligations. Other comprehensive income reflects these items net of tax.

Table of Contents**Kansas City Life Insurance Company****Notes to Consolidated Financial Statements (Unaudited) Continued**

14. Earnings Per Share

Due to the Company's capital structure and the absence of other potentially dilutive securities, there is no difference between basic and diluted earnings per common share for any of the periods reported. The average numbers of shares outstanding for the quarters ended September 30, 2012 and 2011 were 11,056,999 and 11,432,209, respectively. The average numbers of shares outstanding for the nine months ended September 30, 2012 and 2011 were 11,111,490 and 11,453,124, respectively. The number of shares outstanding at September 30, 2012 and December 31, 2011 was 11,057,052 and 11,309,365, respectively.

15. Segment Information

The following schedule provides the financial performance of each of the three reportable operating segments of the Company.

		Individual Insurance	Group Insurance	Old American	Intercompany Eliminations ¹	Consolidated
Insurance revenues:						
Third quarter:	2012	\$ 27,615	\$ 12,316	\$ 17,680	\$ (98)	\$ 57,513
	2011	28,377	12,613	17,048	(135)	57,903
Nine months:	2012	\$ 86,216	\$ 36,580	\$ 52,644	\$ (295)	\$ 175,145
	2011	84,651	37,413	50,655	(404)	172,315
Net investment income:						
Third quarter:	2012	\$ 41,444	\$ 132	\$ 3,069	\$ -	\$ 44,645
	2011	40,031	133	2,929	-	43,093
Nine months:	2012	\$ 122,899	\$ 392	\$ 8,998	\$ -	\$ 132,289
	2011	123,798	420	9,159	-	133,377
Net income (loss):						
Third quarter:	2012	\$ 2,998	\$ (108)	\$ 1,242	\$ -	\$ 4,132
	2011	3,342	40	1,084	-	4,466
Nine months:	2012	\$ 29,189	\$ (322)	\$ 3,103	\$ -	\$ 31,970
	2011	20,384	(512)	558	-	20,430

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

¹ Elimination entries to remove intercompany transactions for life and accident and health insurance that the Company purchases for its employees and agents were as follows: insurance revenues from the Group Insurance segment and operating expenses from the Individual Insurance segment to arrive at Consolidated Statements of Comprehensive Income.

16. Commitments

In the normal course of business, the Company has open purchase and sale commitments. At September 30, 2012, the Company had purchase commitments to fund mortgage loans and other investments of \$16.4 million. Included in this total, the Company had commitments to originate mortgage loans of \$14.2 million at September 30, 2012 with fixed interest rates ranging from 4.125% to 4.750%. At September 30, 2012, the Company also had a commitment to fund one construction-to-permanent loan of \$0.3 million that is subject to the borrower's performance.

Table of Contents

Kansas City Life Insurance Company

Notes to Consolidated Financial Statements (Unaudited) Continued

Subsequent to September 30, 2012, the company entered into commitments to fund additional mortgage loans of \$6.0 million and \$16.5 million for the acquisition and development of real estate investments. In addition, the Company had a commitment to sell its interest in a \$30.0 million joint venture investment, and a gain of approximately \$3.0 million is expected to be realized upon closing of the transaction.

17. Contingent Liabilities

The Company is occasionally involved in litigation, both as a defendant and as a plaintiff. The life insurance industry, including the Company and its insurance subsidiaries, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products.

The Company and its subsidiaries are also subject to regular reviews and inspections by state and federal regulatory authorities and self-regulatory organizations. In addition, these regulatory bodies also conduct, from time to time, investigations into industry practices and into complaints from customers. A regulatory violation discovered during a review, inspection, or investigation can result in the imposition of sanctions against the Company, its subsidiaries, or its employees.

The Company's retail broker-dealer and investment advisory subsidiary is in a business that involves a substantial risk of liability. The subsidiary has been named as a defendant in several cases in recent periods. Additionally, regulatory proceedings, litigation, and FINRA arbitration actions related to registered representative activity and securities products (including mutual funds, variable annuities, and alternative investments such as real estate investment products and oil and gas investments) have continued to increase over the last few years.

In addition to the above, the Company and its subsidiaries are defendants in, or subject to, other claims or legal actions related to insurance and investment products. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these regulatory matters, legal actions, and other claims would not have a material effect on the Company's business, results of operations, or financial position.

In accordance with applicable accounting guidelines, the Company has established an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter develops, it is evaluated on an ongoing basis, often in conjunction with outside counsel, as to whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure. If and when a loss contingency related to litigation or regulatory matters is deemed to be both probable and estimable, the Company establishes an accrued liability. This accrued liability is then monitored for further developments that may affect the amount of the accrued liability.

18. Guarantees and Indemnifications

The Company is subject to various indemnification obligations issued in conjunction with certain transactions, primarily assumption reinsurance agreements, stock purchase agreements, mortgage servicing agreements, tax credit assignment agreements, construction and lease guarantees, and borrowing agreements whose terms range in duration and often are not explicitly defined. Generally, a maximum obligation is not explicitly stated. Therefore, the overall maximum amount of the obligation under the indemnifications cannot be reasonably estimated. The Company is unable to estimate with certainty the ultimate legal and financial liability with respect to these indemnifications. The Company believes that the likelihood is remote that material payments would be required under such indemnifications and therefore such indemnifications would not result in a material adverse effect on the financial position or results of operations.

19. Subsequent Events

On October 22, 2012, the Board of Directors declared a quarterly dividend of \$0.27 per share that will be paid November 7, 2012 to stockholders of record as of November 1, 2012.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Amounts are stated in thousands, except share data, or as otherwise noted.

Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to provide in narrative form the perspective of the management of Kansas City Life Insurance Company (the Company) on its financial condition, results of operations, liquidity, and certain other factors that may affect its future results. The following is a discussion and analysis of the results of operations for the quarters ended September 30, 2012 and 2011 and the financial condition of the Company at September 30, 2012. This discussion should be read in conjunction with the consolidated financial statements and accompanying notes included in this document, as well as the Company's 2011 Form 10-K.

Overview

Kansas City Life Insurance Company is a financial services company that is predominantly focused on the underwriting, sales, and administration of life insurance and annuity products. The consolidated entity (the Company) primarily consists of three life insurance companies. Kansas City Life Insurance Company (Kansas City Life) is the parent company. Sunset Life Insurance Company of America (Sunset Life) and Old American Insurance Company (Old American) are wholly-owned subsidiaries. For additional information, please refer to the Overview included in Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2011 Form 10-K.

Cautionary Statement on Forward-Looking Information

This report reviews the Company's financial condition and results of operations, and historical information is presented and discussed. Where appropriate, factors that may affect future financial performance are also identified and discussed. Certain statements made in this report include forward-looking statements that fall within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include any statement that may predict, forecast, indicate or imply future results, performance, or achievements rather than historical facts and may contain words like believe, expect, estimate, project, forecast, anticipate, plan, will, shall, and other words, phrases, or similar meaning.

Actual results may differ materially from those included in the forward-looking statements as a result of risks and uncertainties. Those risks and uncertainties include, but are not limited to, the risk factors listed in Item 1A. Risk Factors as filed in the Company's 2011 Form 10-K. For additional information, please refer to the Overview included in Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's 2011 Form 10-K.

Table of Contents**Consolidated Results of Operations***Summary of Results*

The Company earned net income of \$4.1 million and \$4.5 million in the third quarters of 2012 and 2011, respectively. Net income per share was \$0.38 in the third quarter of 2012, compared to \$0.39 in the same period in the prior year. Net income for the first nine months of 2012 was \$32.0 million, an increase of \$11.5 million or 56% compared to last year. Net income per share for the nine months was \$2.88, an increase of \$1.10 per share versus the same period one year earlier. The following table presents variances between the results for the third quarters and nine months ended September 30, 2012 and 2011. Additional information on these items is presented below.

	Quarter Ended September 30	Nine Months Ended September 30
	2012 Versus 2011	2012 Versus 2011
Insurance and other revenues	\$ (459)	\$ 2,184
Net investment income	1,552	(1,088)
Net realized investment gains	(104)	14,276
Policyholder benefits and interest credited to policyholder account balances	(277)	4,428
Amortization of deferred acquisition costs	4,426	1,693
Operating expenses	(6,350)	(5,027)
Income tax expense	878	(4,926)
Total variance	\$ (334)	\$ 11,540

Sales

The Company measures sales in terms of new premiums and deposits. Sales of traditional life insurance, immediate annuities, and accident and health products are reported as premium income for financial statement purposes. Deposits received from the sale of interest sensitive products, including universal life insurance, fixed deferred annuities, variable universal life, variable annuities, and supplementary contracts without life contingencies are reflected as deposits in the Consolidated Statements of Cash Flows.

The Company's marketing plan for individual products focuses on three main aspects: providing financial security with respect to life insurance, the accumulation of long-term value, and future retirement income needs. The primary emphasis is on the growth of individual life insurance business, including new premiums for individual life products and new deposits for universal life and variable universal life products.

Sales are primarily made through the Company's existing sales force. The Company emphasizes growth of the sales force with the addition of new general agents and agents. The Company believes that increased sales will result through both the number and productivity of general agents and agents. In addition, the Company places an emphasis on training and direct support to the field force to assist new agents in their start-up phase. Also, the Company provides support to existing agents to stay abreast of the ever-changing regulatory environment and to introduce agents to new products and enhanced features of existing products. On occasion, the Company may also selectively utilize third-party marketing arrangements to enhance its sales objectives. This allows the Company the flexibility to identify niches or pursue unique avenues in the existing market environment and to react quickly to take advantage of opportunities as they occur.

The Company also markets a series of group products. These products include group life, dental, disability, and vision products. The primary growth strategies for these products include increased productivity of the existing group representatives; planned expansion of the group distribution system; and to selectively utilize third-party marketing arrangements. Further, growth is to be supported by the addition of new products to the portfolio, particularly voluntary-type products.

Table of Contents

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the third quarters and nine months ended September 30, 2012 and 2011. New premiums are also detailed by product.

	Quarter Ended September 30			
	2012	% Change	2011	% Change
New premiums:				
Individual life insurance	\$ 4,284	1	\$ 4,249	1

Group accident and health insurance	2,894	(12)	3,301	13
Total new premiums	9,989	-	9,969	(31)
Renewal premiums	37,453	1	37,079	7
Total premiums	47,442	1	47,048	(4)
Reinsurance ceded	(14,393)	(1)	(14,572)	9
Premiums, net	\$ 33,049	2	\$ 32,476	(9)

	Nine Months Ended September 30			
	2012	% Change	2011	% Change
New premiums:				
Individual life insurance	\$ 13,054	1	\$ 12,973	6
Immediate annuities	7,355	30	5,649	(66)
Group life insurance	1,849	26	1,463	(13)
Group accident and health insurance	8,637	(16)	10,292	9
Total new premiums	30,895	2	30,377	(24)
Renewal premiums	111,736	2	109,034	3
Total premiums	142,631	2	139,411	(4)
Reinsurance ceded	(42,673)	-	(42,509)	5
Premiums, net	\$ 99,958	3	\$ 96,902	(8)

Consolidated total premiums increased \$0.4 million or 1% in the third quarter of 2012 versus the same period in the prior year, as total new premiums were essentially flat and total renewal premiums increased \$0.4 million or 1%. New immediate annuity premiums increased \$0.3 million or 15% and new group life premiums increased \$0.1 million or 21%. These were offset by a \$0.4 million decrease in new group accident and health premiums. Immediate annuity receipts can have sizeable fluctuations, as receipts from policyholders largely result from one-time premiums rather than recurring premiums. The decrease in new accident and health premiums resulted from a decrease in the short-term disability line, which was partially offset by an increase in dental premiums. The increase in consolidated renewal premiums reflected an increase in short-term disability renewal premiums that was partially offset by a decrease in dental renewal premiums.

Consolidated total premiums increased \$3.2 million or 2% in the first nine months of 2012 versus one year earlier, reflecting a \$0.5 million or 2% increase in total new premiums and a \$2.7 million or 2% increase in total renewal premiums. The increase in total new premiums was due to a \$1.7 million or 30% increase in new immediate annuity premiums and a \$0.4 million or 26% increase in new group life premiums. These improvements were partially offset by a \$1.7 million or 16% decrease in new group accident and health premiums, primarily in the short-term disability line. The increase in renewal premiums reflected an increase in group accident and health renewal premiums. This increase was largely from the short-term disability line and a partially offsetting decrease in dental renewal premiums. In addition, individual life insurance premiums

increased \$1.4 million, primarily from the Old American segment.

Table of Contents

The following table reconciles deposits with the Consolidated Statements of Cash Flows and provides detail by new and renewal deposits for the third quarters and nine months ended September 30, 2012 and 2011. New deposits are also detailed by product.

	Quarter Ended September 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 2,980	25	\$ 2,391	(39)
Variable universal life insurance	144	(21)	183	(43)
Fixed deferred annuities	11,982	(22)	15,368	(42)
Variable annuities	4,863	18	4,119	44
Total new deposits	19,969	(9)	22,061	(34)
Renewal deposits	34,903	(7)	37,459	6
Total deposits	\$ 54,872	(8)	\$ 59,520	(14)

	Nine Months Ended September 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 9,140	2	\$ 8,953	(14)
Variable universal life insurance	404	(40)	676	(11)
Fixed deferred annuities	43,601	(10)	48,285	(1)
Variable annuities	13,466	(4)	14,098	(2)
Total new deposits	66,611	(8)	72,012	(3)
Renewal deposits	105,120	(4)	109,490	4
Total deposits	\$ 171,731	(5)	\$ 181,502	1

Total new deposits decreased \$2.1 million or 9% in the third quarter of 2012 compared with the third quarter of 2011. This change was due to a \$3.4 million or 22% decrease in new fixed deferred annuity deposits. Partially offsetting this, new variable annuity deposits increased \$0.7 million or 18% and new universal life deposits increased \$0.6 million or 25%. Total renewal deposits decreased \$2.6 million or 7% in the third quarter of 2012 versus last year, reflecting a \$3.0 million or 25% decrease in fixed deferred annuity renewal deposits. Total new deposits decreased \$5.4 million or 8% in the first nine months of 2012 compared with the prior year. This decrease was largely due to a \$4.7 million or 10% decline in new fixed deferred annuity deposits and a \$0.6 million or 4% decrease in new variable annuity deposits. Total renewal deposits decreased \$4.4 million or 4%, reflecting a \$2.2 million or 7% decrease in fixed deferred annuity renewal deposits and a \$1.0 million or 13% decrease in variable annuity renewal deposits. New sales and renewals for deposit products have been negatively affected for the third quarter and the first nine months of 2012 by continuing low interest rates and the uncertain economic environment.

Insurance Revenues

Insurance revenues consist of premiums, net of reinsurance, and contract charges. In the third quarter of 2012, total insurance revenues decreased \$0.4 million or 1%, primarily due to a \$1.0 million or 4% decrease in contract charges compared to the prior year. Partially offsetting the reduction in contract charges was a \$0.6 million or 2% increase in net premiums. The increase in net premiums largely resulted from a \$0.3 million or 15% increase in total immediate annuity premiums.

Insurance revenues increased \$2.8 million or 2% in the first nine months of 2012 compared with the prior year. This increase was due to a \$3.1 million or 3% increase in net premiums, together with an offsetting \$0.2 million decrease in contract charges. The increase in premiums resulted from a \$1.7 million or 2% increase in total individual life insurance premiums, largely from the Old American segment, and a \$1.4 million or

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

24% increase in total immediate annuity premiums.

Contract charges consist of cost of insurance, expense loads, amortization of unearned revenues, and surrender charges on policyholder account balances. Certain contract charges are not recognized in income immediately but are deferred and amortized into income in proportion to the expected future gross profits of the business, in a manner similar to DAC. Profit expectations are based upon assumptions of future interest spreads, mortality margins, expense margins, and policy and premium persistency experience. At least annually, a review is performed of the assumptions related to profit expectations. If it is determined the assumptions should be revised, the impact is recorded as a change in the revenue reported in the current period as an unlocking adjustment.

Table of Contents

Contract charges are impacted by the sales of new products and the persistency of both existing and closed blocks of business. The closed blocks of business reflect policies and companies that the Company has purchased. While the Company is not actively pursuing marketing efforts to generate new sales for these closed blocks, it has the intent of servicing this business to achieve long-term profit streams.

Total contract charges on all blocks of business decreased \$1.0 million or 4% in the third quarter of 2012 compared to the same period in 2011. The results for the third quarter of 2012 were largely due to a \$0.5 million decrease in the amortization of deferred revenue and a \$0.3 million decrease in cost of insurance charges. The decrease in cost of insurance charges was largely due to the runoff of closed blocks. Amortization of deferred revenue decreased due to lower actual gross profits on certain lines of business, largely related to increased reinsurance resulting from unlocking that occurred in the second quarter of 2012.

Total contract charges on all blocks of business decreased \$0.2 million in the first nine months of 2012 compared to one year earlier. These results reflected a \$0.7 million decrease in cost of insurance charges and a \$0.5 million decrease in expense loads, partially offset by a \$1.2 million increase in the amortization of deferred revenue. In addition to the results discussed above for the quarter, the amortization of deferred revenue increased during 2012 compared to the prior year due to a system upgrade during 2011 that led to enhanced reinsurance modeling capabilities. The decrease in expense loads is attributed to the increased sale of products with lower expense loads in 2012 than the prior year. The decline in cost of insurance charges was largely due to the runoff of closed blocks.

Total contract charges on closed blocks equaled 35% of total consolidated contract charges for both third quarters and 35% and 36% for the first nine months of 2012 and 2011, respectively. Total contract charges on closed blocks decreased 4% in the third quarter and 3% in the first nine months of 2012 compared to the same periods in the prior year. These declines reflect the results discussed above.

The Company uses reinsurance as a means to mitigate its risks and to reduce the earnings volatility from claims. Reinsurance ceded premiums decreased \$0.2 million or 1% in the third quarter of 2012 and increased \$0.2 million or less than 1% in the first nine months of 2012, as compared to the same periods in 2011. Reinsurance ceded for the Group segment increased \$0.5 million or 17% in the third quarter and \$1.3 million or 16% in the nine months, reflecting increased disability sales that were largely reinsured. Reinsurance ceded for the Old American segment declined \$0.1 million or 16% in the third quarter and \$0.3 million or 15% in the first nine months of 2012, reflecting the continued runoff of a large closed block of reinsured business. Reinsurance ceded for the Individual Insurance segment decreased \$0.6 million or 5% in the third quarter and \$0.9 million or 3% in the first nine months of 2012.

Investment Revenues

Gross investment income is largely composed of interest, dividends and other earnings on fixed maturity securities, equity securities, short-term investments, mortgage loans, real estate, and policy loans. Gross investment income increased \$1.4 million or 3% in the third quarter of 2012 compared with the third quarter of 2011, as both average invested assets and yields earned increased. Gross investment income decreased \$1.0 million or 1% in the first nine months of 2012 compared with the prior year, as an increase in average invested assets was more than offset by lower yields earned.

Fixed maturity securities provided a majority of the Company's investment income during both the quarter and nine months ended September 30, 2012. Income on these investments declined \$0.4 million or 1% in the third quarter and \$3.1 million or 3% in the first nine months of 2012 compared to the prior year, reflecting declines in yields earned.

Investment income from mortgage loans increased \$0.1 million or 1% in the third quarter and \$0.7 million or 3% in the first nine months of 2012 compared to the same periods in 2011. The improvement in the nine months was largely the result of prepayment fees received on loans that were paid off prior to maturity.

Investment income from real estate increased \$0.5 million or 27% in the third quarter and \$1.1 million or 17% in the nine months compared to last year. These improvements reflect higher rental income due to an increase in occupancy rates.

In addition, the fair value improved on an alternative investment fund, which resulted in an increase of investment income of \$1.4 million in the third quarter of 2012 and \$0.8 million in the first nine months, compared to the same periods in 2011.

The Company realizes investment gains and losses from several sources, including write-downs of investments and sales of investment securities and real estate. Many securities purchased by the Company contain call provisions, which allow the issuer to redeem the securities at a particular price. Depending upon the terms of the call provision and price at which the security was purchased, a gain or loss may be realized.

Table of Contents

The following table provides detail concerning realized investment gains and losses for the third quarters and nine months ended September 30, 2012 and 2011.

	Quarter Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
Gross gains resulting from:				
Sales of investment securities	\$ 399	\$ 292	\$ 712	\$ 3,944
Investment securities called and other	304	105	1,107	1,355
Sales of real estate	113	-	16,293	-
Total gross gains	816	397	18,112	5,299
Gross losses resulting from:				
Sales of investment securities	(44)	(76)	(76)	(1,666)
Investment securities called and other	(236)	(118)	(440)	(297)
Mortgage loans	-	-	(178)	(3)
Total gross losses	(280)	(194)	(694)	(1,966)
Change in allowance for potential future losses on mortgage loans	75	-	407	-
Amortization of DAC and VOBA	(5)	7	(21)	(218)
Net realized investment gains, excluding impairment losses	606	210	17,804	3,115
Net impairment losses recognized in earnings:				
Total other-than-temporary impairment losses	(697)	(167)	(1,153)	(674)
Portion of loss recognized in other comprehensive income	47	17	197	131
Net impairment losses recognized in earnings	(650)	(150)	(956)	(543)
Net realized investment gains (losses)	\$ (44)	\$ 60	\$ 16,848	\$ 2,572

The Company recorded a net realized investment loss of less than \$0.1 million in the third quarter of 2012, compared with a net realized gain of less than \$0.1 million third quarter of 2011. During the third quarter of 2012, investment gains on sales of real estate totaled \$0.1 million. Net realized investment gains for the first nine months totaled \$16.8 million in 2012 compared to \$2.6 million in 2011, largely reflecting gains on sales of real estate of \$16.3 million. In the above table, investment securities called and other includes, but is not limited to, principal payments and sinking funds.

The Company's analysis of securities for the third quarter ended September 30, 2012 resulted in the determination that seven fixed-maturity residential mortgage-backed securities and one corporate security had other-than-temporary credit impairments and were written down by a combined \$0.6 million. These residential mortgage-backed securities had incremental losses, reflecting deterioration in the present value of expected future cash flows. The additional losses from these residential mortgage-backed securities totaled \$0.2 million in the third quarter of 2012, including less than \$0.1 million that was determined to be non-credit and was recognized in other comprehensive income. The total fair value of the affected securities after the write-downs was \$55.5 million.

Analysis of Investments

The Company seeks to protect policyholders' benefits and achieve a desired level of organizational profitability by optimizing risk and return on an ongoing basis through managing asset and liability cash flows, monitoring credit risk, avoiding high levels of investments that may be redeemed by the issuer, maintaining sufficiently liquid investments and avoiding undue asset concentrations through diversification, among other things.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

The primary sources of investment risk to which the Company is exposed include credit risk, interest rate risk, and liquidity risk. The Company's ability to manage these risks is essential to the success of the organization. In particular, the Company devotes considerable resources to both the credit analysis of each new investment and to ongoing credit positions. A default by an issuer usually involves some loss of principal to the investor. Losses can be mitigated by timely sales of affected securities or by active involvement in a restructuring process. However, there can be no assurance that the efforts of an investor will lead to favorable outcomes in a bankruptcy or restructuring. Credit risk is managed primarily through industry, issuer, and structure diversification.

At December 31, 2011, the Company had \$31.3 million in gross unrealized losses on investment securities which were offset by \$229.5 million in gross unrealized gains. At September 30, 2012, the Company's unrealized losses on investment securities had decreased to \$14.9 million and were offset by \$292.5 million in gross unrealized gains, with 27% of the gross unrealized losses in the category of corporate obligations. The financial sector was the single largest contributor to unrealized losses, reflecting the direct and indirect impact of the troubled residential real estate, mortgage, and auction rate securities markets. At September 30, 2012, 95% of the total fair value of the fixed maturities portfolio had unrealized gains, compared to 89% at December 31, 2011.

Table of Contents

The Company maintains a high quality securities portfolio. The following table identifies fixed maturity securities available for sale by actual or equivalent Standard & Poor's rating at September 30, 2012 and December 31, 2011.

¹ Federal agency securities are not backed by the full faith and credit of the U.S. Government.

Gross unrealized losses on fixed maturity and equity security investments attributable to securities having gross unrealized losses of 12 months or longer were \$14.4 million at September 30, 2012, a decrease of 40% from \$23.9 million at December 31, 2011. The largest component of this decrease was from the corporate private-labeled residential mortgage-backed securities category, which decreased \$8.4 million or 84% during the first nine months of 2012. Certain securities continue to be challenged by the economy and recovering markets, and the Company continues to monitor the cash flows on each of these investments.

Table of Contents

The following table summarizes the Company's investments in securities available for sale with unrealized losses at September 30, 2012.

	Amortized Cost	Fair Value	Gross Unrealized Losses
Securities owned without realized impairment:

The following is a discussion of all non-asset backed securities whose fair value had been less than 80% of amortized cost for at least six consecutive months at September 30, 2012. The Company has considered a wide variety of factors to determine that these positions were not other-than-temporarily impaired.

Security	Description
Financial institutions	Institutions impacted by housing and mortgage crisis. These securities continue to perform within contractual obligations.

The discounted future cash flow calculation typically becomes the primary determinant of whether any portion and to what extent an unrealized loss is due to credit on loan-backed and similar asset-backed securities with significant indications of potential other-than-temporary impairment. Such indications typically include below investment grade ratings and significant unrealized losses for an extended period of time, among other factors. The Company identified 17 non-U.S. Agency mortgage-backed securities that were determined to have such indications at

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

September 30, 2012 and December 31, 2011. Discounted future cash flow analysis was performed for each of these securities to determine if any portion of the impairment was due to credit and deemed to be other-than-temporary. The discount rate used in calculating the present value of future cash flows was the investment yield at the time of purchase for each security. The initial default rates were assumed to remain constant over a 24-month time frame and grade down thereafter, reflecting the general perspective of a more stabilized residential housing environment in the future.

Table of Contents

The following tables present the range of significant assumptions used in projecting the future cash flows at September 30, 2012 and December 31, 2011. The Company believes that the assumptions below are reasonable because they are based upon the actual results of the underlying security collateral.

Vintage	September 30, 2012					
	Initial Default Rate		Initial Severity Rate		Prepayment Speed	
	Low	High	Low	High	Low	High
2003	4.7%	4.7%	40%	40%	18.0%	18.0%
2004	5.7%	7.4%	35%	57%	8.0%	13.0%
2005	3.0%	15.2%	40%	73%	6.0%	15.0%
2006	5.1%	6.3%	46%	85%	8.0%	16.0%
2007	10.2%	10.2%	60%	60%	8.0%	8.0%

Vintage	December 31, 2011					
	Initial Default Rate		Initial Severity Rate		Prepayment Speed	
	Low	High	Low	High	Low	High
2003	3.9%	3.9%	40%	40%	18.0%	18.0%
2004	4.9%	7.7%	40%	56%	8.0%	13.0%
2005	3.5%	13.7%	40%	68%	6.0%	15.0%
2006	4.9%	10.0%	52%	90%	8.0%	18.0%
2007	8.8%	8.8%	66%	66%	8.0%	8.0%

For loan-backed and similar asset-backed securities, the determination of any amount of impairment that is due to credit is based upon the present value of projected future cash flows being less than the amortized cost of the security. This amount is recognized as a realized loss in the Company's Consolidated Statements of Comprehensive Income and the carrying value of the security is written down by the same amount. The portion of an impairment that is determined not to be due to credit is recorded as a component of accumulated other comprehensive income in the Consolidated Balance Sheets.

Significant unrealized losses on securities can continue for extended periods of time, particularly for certain individual securities. While this can be an indication of potential credit impairments, it can also be an indication of illiquidity in a particular sector or security. In addition, the fair value of an individual security can be heavily influenced by the complexities of varying market sentiment or uncertainty regarding the prospects for an individual security. This has been the situation in the non-U.S. Agency mortgage-backed securities market in recent periods. Based upon the process described above, the Company is best able to determine if and to what extent credit impairment may exist in these securities by performing present value calculations of projected future cash flows at the conclusion of each reporting period. By reviewing the most recent data available regarding the security and other relevant industry and market factors, the Company can modify assumptions used in the cash flow projections and determine the best estimate of the portion of any impairment that is due to credit at the conclusion of each period.

The Company closely monitors its investments in securities classified as subprime. Subprime securities include all bonds or portions of bonds where the underlying collateral is made up of home equity loans or first mortgage loans to borrowers whose credit scores at the time of origination were lower than the level recognized in the market as prime. The Company's classification of subprime does not include Alt-A or jumbo loans, unless the collateral otherwise meets the preceding definition. At September 30, 2012, the fair value of investments with subprime residential mortgage exposure was \$15.4 million with a related \$2.7 million unrealized loss. At December 31, 2011, the Company had investments with subprime residential mortgage exposure of \$17.4 million and a related \$3.5 million unrealized loss. This exposure amounted to less than 1% of the Company's invested assets at both September 30, 2012 and December 31, 2011. These investments are included in the Company's process for evaluation of other-than-temporarily impaired securities.

The Company has a significant level of non-U.S. Agency structured securities. Structured securities include asset-backed, residential mortgage-backed securities, along with collateralized debt obligations, collateralized mortgage obligations and other collateralized obligations. The Company monitors these securities through a combination of an analysis of vintage, credit ratings and other factors.

Total structured securities	\$ 250,298	\$ 266,550	\$ (16,252)

¹ This chart accounts for all vintages owned by the Company.

Total unrealized losses on non-U.S. Agency structured securities totaled \$0.5 million at September 30, 2012, compared to \$16.3 million at December 31, 2011. Total unrealized losses on these securities as a percent of total amortized cost totaled less than 1% at September 30, 2012, an improvement from 6% at year-end 2011.

The Company has written down certain investments in previous periods. Securities written down and continuing to be owned at September 30, 2012 had a fair value of \$136.1 million with a net unrealized loss of \$1.2 million.

The Company evaluated the current status of all investments previously written-down to assess the ongoing expectations of amounts to be collected. The Company's evaluation process is similar to its impairment evaluation process. If evidence exists that the Company believes that it will receive all or a materially greater portion of its contractual maturities from securities previously written down, the accretion of income is adjusted. The Company did not change its evaluation of any investments under this process during the first six months of 2012 or 2011.

Table of Contents

The Company maintains a diversified investment portfolio, including 5% of its investment portfolio in municipal bond securities and 6% in bond securities from foreign issuers. Approximately 74% of the Company's foreign securities were from issuers in Canada, Australia, and Great Britain at September 30, 2012. The Company has no holdings in European sovereign debt and all investments are denominated in U.S. dollars. The fair value of the Company's securities from foreign issuers at September 30, 2012 was \$239.4 million with a net unrealized gain of \$17.9 million. This compares to a fair value of \$199.5 million with a net unrealized gain of \$8.7 million at December 31, 2011.

The Company does not have a material amount of direct or indirect guarantees for the securities in its investment portfolio. The Company did not have any direct exposure to financial guarantors at September 30, 2012. The Company's indirect exposure to financial guarantors totaled \$34.8 million, which was approximately 1% of the Company's investments at September 30, 2012. The unrealized gain on these investments totaled \$3.1 million at September 30, 2012. The Company's indirect exposure to financial guarantors at December 31, 2011 totaled \$36.8 million, which was approximately 1% of the Company's investments. Total unrealized gains on these investments totaled \$1.7 million at December 31, 2011.

Other Revenues

Other revenues consist primarily of supplementary contract considerations; policyholder dividends left with the Company to accumulate; income received on the sale of low income housing tax credit (LIHTC) investments by a subsidiary of the Company; and fees charged on products and sales from the Company's broker-dealer subsidiary. Other revenues decreased 3% in the third quarter and 9% in the first nine months of 2012 compared to the same periods one year earlier. The decreases in both periods reflected lower income from the sale of LIHTC investments. In addition, the decrease in the nine months also reflected lower supplementary contract considerations.

Policyholder Benefits

Policyholder benefits consist of death benefits, immediate annuity benefits, accident and health benefits, surrenders, other benefits, and the associated increase or decrease in reserves for future policy benefits. The largest component of policyholder benefits was death benefits for the periods presented. Death benefits reflect mortality results, after consideration of the impact of reinsurance. Mortality will fluctuate from period to period. However, mortality experience has generally remained within pricing expectations for the periods presented. Following is a discussion of significant fluctuations in policyholder benefits during the periods presented.

Policyholder benefits increased \$1.0 million or 2% in the third quarter of 2012 compared to the same period one year earlier. The largest factors were increased death benefits, net of reinsurance, and increased benefit and contract reserves. The increase in reserves was largely due to favorable changes in immediate annuity premiums and benefits and a decrease that occurred during 2011 in benefit and contract reserves that resulted from system changes and refinements. Partially offsetting these was the change in the value of the GMWB rider liability, as discussed below.

Policyholder benefits decreased \$3.4 million or 3% in the first nine months compared to the same period one year ago. The largest single factor in the decrease in policyholder benefits resulted from a decline in death benefits, net of reinsurance. Other contributing factors were reductions in group accident and health benefits, supplementary contract payments, and policy dividends and coupons. Partially offsetting these was an increase in benefit and contract reserves. This increase was the result of several factors, including favorable changes in immediate annuity premiums and benefits and prior year system changes and refinements. Also, the Company recaptured a block of previously reinsured policies in the second quarter of 2012 which also contributed to the increase in reserves. Partially offsetting these items was the change in the value of the GMWB rider liability, as discussed below.

The Company has a GMWB rider for variable annuity contracts that is considered to be a financial derivative and, as such, is accounted for at fair value. The Company determines the fair value of the GMWB rider using a risk-neutral valuation method. The value of the riders will fluctuate depending on market conditions. At September 30, 2012, the fair value of the liability decreased \$0.2 million compared to the fair value at December 31, 2011. The change in this liability resulted in a decrease in reserves of \$0.2 million in the first nine months of 2012 compared to an increase in reserves of \$3.5 million in the first nine months of 2011. These changes resulted in a decrease of \$3.7 million in the year-over-year comparison. This fluctuation can be attributed to favorable capital market returns and a decline in market volatility, partially offset by declines in interest rates and issuer discount spreads.

Interest Credited to Policyholder Account Balances

Interest is credited to policyholder account balances according to terms of the policies or contracts for universal life, fixed deferred annuities, and other investment-type products. There are minimum levels of interest crediting assumed in certain policies or contracts, as well as allowances for adjustments to be made to reflect current market conditions in certain policies

Table of Contents

or contracts. Accordingly, the Company reviews and adjusts crediting rates as necessary and appropriate. Amounts credited are a function of account balances and current period crediting rates. As account balances fluctuate, so will the amount of interest credited to policyholder account balances. Interest credited to policyholder account balances decreased \$0.7 million or 3% in the third quarter and \$1.0 million or 2% in the first nine months of 2012 compared with the same periods one year earlier. While total policyholder account balances have increased during 2012, average crediting rates have declined slightly.

Amortization of Deferred Acquisition Costs

The amortization of deferred acquisition costs decreased \$4.4 million or 38% in the third quarter and \$1.7 million or 8% in the first nine months of 2012 compared with the prior year. Contributing to the decrease in both periods were refinements in estimates made during the third quarter of 2011 that increased the amortization of DAC by \$2.4 million in the third quarter of 2011. In addition, increases in account values decreased the amortization of DAC for certain products. Partially offsetting these was the impact of unlocking during the second quarter of 2012. Unlocking in 2012 resulted in an increase to the DAC asset of \$1.3 million and was primarily attributable to refinements in mortality, interest, and persistency assumptions.

Operating Expenses

Operating expenses consist of incurred commission expense from the sale of insurance products, net of the deferral of certain commissions and certain expenses directly associated with the acquisition of new business; expenses from the Company's operations; the amortization of VOBA; and other expenses. Operating expenses increased \$6.4 million or 26% in the third quarter of 2012 and \$5.0 million or 7% in the first nine months compared to last year. The increase in the third quarter was largely due to increased salaries and employee benefit costs, increased legal fees, and an increase in depreciation on a long-lived asset. The increased depreciation expense of \$3.7 million resulted from a change in accounting estimate for a long-lived asset, as described in Note 3. The increase in the nine months reflected increases in salaries and employee benefit costs, legal fees, and the depreciation on a long-lived asset. These were partially offset by a decline in the amount charged to allowance for doubtful accounts for agent receivables.

The amortization of VOBA decreased \$0.3 million or 19% in the third quarter of 2012 and \$0.1 million or 2% in the first nine months of 2012 compared to the same periods one year earlier. The decrease in the third quarter of 2012 reflected \$0.5 million in less amortization as the traditional life insurance block from the Old American segment became fully amortized at December 31, 2011. The increase in VOBA in the first nine months of 2012 reflected a \$1.4 million decrease resulting from the fully amortized traditional life insurance block from in the Old American segment. Offsetting this, VOBA amortization increased during the nine months due to unlocking that occurred during the second quarter of 2012.

Income Taxes

The third quarter income tax expense was \$2.1 million or 34% of income before tax for 2012, versus \$3.0 million or 40% of income before tax for the prior year period. The income tax expense for the nine months ended September 30, 2012 was \$16.2 million or 34% of income before tax, versus \$11.3 million or 36% of income before tax for the prior year period.

The effective income tax rate was less than the prevailing corporate federal income tax rate of 35% in the third quarter of 2012. Permanent differences, including the dividends-received deduction, resulted in a benefit of approximately 2% of income before tax. Partially offsetting the benefit from permanent differences was tax expense of approximately 1% of income before tax related to investments in affordable housing.

The effective income tax rate was less than the prevailing corporate federal income tax rate of 35% in the nine months ended September 30, 2012, primarily due to permanent differences that resulted in a benefit of approximately 1% of income before tax.

The effective income tax rate in the third quarter of 2011 and for the nine months ended September 30, 2011 was greater than the prevailing corporate federal income tax rate of 35%, primarily due to adjustments related to the Company's investments in affordable housing. The affordable housing adjustments resulted in a tax expense of approximately 5% and 1% of income before tax in the third quarter and nine months ended September 30, 2011, respectively.

Operating Results by Segment

The Company has three reportable business segments, which are defined based on the nature of the products and services offered: Individual Insurance, Group Insurance, and Old American. The Individual Insurance segment consists of individual insurance products for both Kansas City Life and Sunset Life. The Individual Insurance segment is marketed through a nationwide sales force of independent general agents and

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

third-party marketing arrangements. The Group Insurance segment consists of sales of group life, group disability, dental, and vision products. This segment is marketed through a nationwide

Table of Contents

sales force of independent general agents, group brokers, and third-party marketing arrangements. Old American consists of individual insurance products designed largely as final expense products. These products are marketed through a nationwide general agency sales force with exclusive territories, using direct response marketing to supply agents with leads. For more information, refer to Note 15 - Segment Information in the Notes to Consolidated Financial Statements (Unaudited).

Table of Contents**Individual Insurance**

The following table presents financial data of the Individual Insurance business segment for the third quarters and nine months ended September 30, 2012 and 2011:

Table of Contents

The net income for this segment in the third quarter of 2012 was \$3.0 million, compared to \$3.3 million in the third quarter of 2011. This change was primarily the result of lower insurance revenues and higher operating expenses. Partially offsetting these, net investment income increased, along with lower amortization of deferred acquisition costs and interest credited to policyholder account balances.

Net income for this segment was \$29.2 million for the first nine months of 2012, an increase of \$8.8 million from the first nine months of 2011. Contributing to this improvement were increases in net realized investment gains and insurance revenues, along with lower policyholder benefits, amortization of deferred acquisition costs, and interest credited to policyholder account balances. Partially offsetting these changes was a decrease in net investment income and increased operating expenses.

Total insurance revenues for this segment decreased \$0.8 million or 3% in the third quarter of 2012 compared with the same period in the prior year. Total premiums decreased \$0.4 million or 3%, reflecting a \$0.6 million decrease in individual life premiums that was partially offset by a \$0.3 million increase in immediate annuity premiums. Contract charges decreased \$1.0 million or 4%, and reinsurance ceded premiums decreased \$0.6 million or 5%.

Total insurance revenues for this segment increased \$1.6 million or 2% for the first nine months of 2012 compared to one year earlier. Total premiums increased \$0.9 million or 2%, reflecting a \$1.4 million or 24% increase in immediate annuity premiums that was partially offset by a \$0.5 million or 1% decrease in individual life premiums. Contract charges decreased \$0.2 million and reinsurance ceded premiums decreased \$0.9 million or 3%.

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the third quarters and nine months ended September 30, 2012 and 2011. New premiums are also detailed by product.

	Quarter Ended September 30			
	2012	% Change	2011	% Change
New premiums:				
Individual life insurance	\$ 1,119	(6)	\$ 1,194	(7)
Immediate annuities	2,187	15	1,903	(72)
Total new premiums	3,306	7	3,097	(61)
Renewal premiums	10,393	(5)	10,970	4
Total premiums	13,699	(3)	14,067	(24)
Reinsurance ceded	(10,548)	(5)	(11,117)	6
Premiums, net	\$ 3,151	7	\$ 2,950	(63)

	Nine Months Ended September 30			
	2012	% Change	2011	% Change
New premiums:				
Individual life insurance	\$ 3,445	(9)	\$ 3,783	(2)
Immediate annuities	7,355	30	5,649	(66)
Total new premiums	10,800	15	9,432	(54)
Renewal premiums	31,527	(1)	31,998	2
Total premiums	42,327	2	41,430	(20)
Reinsurance ceded	(31,298)	(3)	(32,192)	1

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Premiums, net	\$ 11,029	19	\$ 9,238	(54)
---------------	-----------	----	----------	------

Total new premiums for this segment increased \$0.2 million or 7% in the third quarter of 2012. This improvement resulted from increased sales of immediate annuities. Immediate annuity receipts can have sizeable fluctuations, as receipts from policyholders largely result from one-time premiums rather than recurring premiums. Total renewal premiums decreased \$0.6 million or 5% compared to last year, due to a decline in individual life renewal premiums.

Total new premiums for this segment increased \$1.4 million or 15% in the first nine months of 2012 versus the prior year. This improvement also resulted from increased immediate annuities. Total renewal premiums decreased 1%, reflecting lower individual life and annuity renewal premiums.

Table of Contents

The following table provides detail by new and renewal deposits for the third quarters and nine months ended September 30, 2012 and 2011. New deposits are also detailed by product.

	Quarter Ended September 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 2,980	25	\$ 2,391	(39)
Variable universal life insurance	144	(21)	183	(43)
Fixed deferred annuities	11,982	(22)	15,368	(42)
Variable annuities	4,863	18	4,119	44
Total new deposits	19,969	(9)	22,061	(34)
Renewal deposits	34,903	(7)	37,459	6
Total deposits	\$ 54,872	(8)	\$ 59,520	(14)

	Nine Months Ended September 30			
	2012	% Change	2011	% Change
New deposits:				
Universal life insurance	\$ 9,140	2	\$ 8,953	(14)
Variable universal life insurance	404	(40)	676	(11)
Fixed deferred annuities	43,601	(10)	48,285	(1)
Variable annuities	13,466	(4)	14,098	(2)
Total new deposits	66,611	(8)	72,012	(3)
Renewal deposits	105,120	(4)	109,490	4
Total deposits	\$ 171,731	(5)	\$ 181,502	1

Total new deposits decreased \$2.1 million or 9% in the third quarter of 2012 compared to last year, reflecting a \$3.4 million or 22% decrease in new fixed deferred annuity deposits. Partially offsetting this, new variable annuity deposits increased \$0.7 million or 18% and new universal life deposits increased \$0.6 million or 25%. Total renewal deposits decreased \$2.6 million or 7% in the third quarter of 2012. This decrease was due to a \$3.0 million or 25% decline in fixed deferred annuity renewal deposits. Total new deposits decreased \$5.4 million or 8% in the first nine months of 2012 compared with the prior year. This decrease reflected a \$4.7 million or 10% decline in new fixed deferred annuity deposits and a \$0.6 million or 4% decline in new variable annuity deposits. Total renewal deposits decreased \$4.4 million or 4% in the first nine months of 2012. This decline resulted from a \$2.2 million or 7% decrease in fixed deferred annuity renewal deposits and a \$1.0 million or 13% decrease in variable annuity renewal deposits. New sales and renewals for deposit products have been negatively affected for the third quarter and the first nine months of 2012 by continuing low interest rates and the uncertain economic environment.

Total contract charges decreased \$1.0 million or 4% in the third quarter of 2012 compared to the third quarter of 2011. This largely resulted from decreases in cost of insurance charges and the amortization of deferred revenue. The decrease in cost of insurance charges was largely due to the runoff of closed blocks. Amortization of deferred revenue decreased due to lower actual gross profits on certain lines of business, largely related to increased reinsurance resulting from unlocking that occurred in the second quarter of 2012. Total contract charges on the closed blocks equaled 35% of total consolidated contract charges in both the third quarters of 2012 and 2011. Total contract charges on closed blocks declined 4% in the third quarter of 2012 compared to the same period in 2011. Total contract charges on open blocks of business, where there is ongoing marketing for new sales, decreased 4% in the third quarter of 2012.

Total contract charges decreased \$0.2 million in the first nine months of 2012 compared to one year earlier, reflecting decreases in cost of insurance charges and expense loads. These were partially offset by an increase in the amortization of deferred revenue. In addition to the results

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

discussed above for the quarter, the amortization of deferred revenue increased during 2012 due to a system upgrade that occurred during 2011 and led to enhanced reinsurance modeling capabilities. The decrease in expense loads is attributed to the increased sale of products with lower expense loads in 2012 than the prior year. The decline in cost of insurance charges was largely due to the runoff of closed blocks.

Total contract charges on the closed blocks equaled 35% of total consolidated contract charges in the first nine months of 2012 compared to 36% in the first nine months of 2011. Total contract charges on closed blocks declined 3% in the first nine months of 2012, while total contract charges on open blocks of business increased 1%.

Table of Contents

Net investment income increased \$1.4 million or 4% in the third quarter of 2012 compared to the third quarter of 2011, as both average invested assets and yields earned increased. Net investment income decreased \$0.9 million in the first nine months of 2012 compared to one year earlier, as an increase in average invested assets was offset by a decline in yields earned. Also, this segment had a net realized gain of \$17.0 million in the first nine months of 2012 compared to a net gain of \$2.7 million in the first nine months of 2011.

Please see Consolidated Results of Operations in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for a table that provides securities that were written down through earnings by business segment for the first three quarters of 2012 and 2011.

Other revenues decreased 3% in the third quarter and 9% in the first nine months of 2012 compared to the same periods one year earlier. The decreases in both periods reflected lower income from the sale of LIHTC investments. In addition, the decrease in the nine months also reflected lower supplementary contract considerations.

Policyholder benefits were flat for the third quarter of 2012 compared to the prior year. However, a decrease in supplementary contract payments was partially offset by an increase in benefit and contract reserves. Several factors contributed to the increase in benefit and contract reserves, including favorable changes in immediate annuity premiums and benefits and prior year system changes and refinements. Partially offsetting these items was the change in the value of the GMWB rider liability.

Policyholder benefits decreased \$2.7 million or 4% in the first nine months of 2012 compared to the prior year. The largest factor in this decrease was death benefits, net of reinsurance. Other factors contributing to the decrease in policyholder benefits were reduced supplementary contract payments, dividends, and coupons. Partially offsetting this was an increase in benefit and contract reserves. This increase was the result of several factors, including favorable changes in immediate annuity premiums and benefits and prior year system changes and refinements. Also, the Company recaptured a block of previously reinsured policies in the second quarter of 2012 which also contributed to the increase in reserves. Partially offsetting these items was the change in the value of the GMWB rider liability.

Interest credited to policyholder account balances decreased 3% in the third quarter and 2% in the first nine months of 2012 compared to the same periods one year earlier. While total policyholder account balances increased in 2012, average crediting rates declined slightly.

The amortization of deferred acquisition costs decreased \$4.6 million in the third quarter and \$1.3 million in the first nine months of 2012 compared with the prior year. Contributing to the decrease in both periods were the aforementioned refinements in estimates made during the third quarter of 2011 that increased the amortization of DAC by \$2.4 million in the third quarter of 2011. In addition, increases in account values decreased the amortization of DAC for certain products. Partially offsetting these was the impact of unlocking during the second quarter of 2012. Unlocking in 2012 resulted in an increase to the DAC asset of \$1.3 million and was primarily attributable to refinements in mortality, interest, and persistency assumptions.

Operating expenses consist of incurred commissions, net of the capitalization of commissions, expenses from the Company's operations, the amortization of VOBA, and other expenses. Operating expenses increased \$7.1 million or 51% in the third quarter and \$7.3 million or 16% in the first nine months of 2012 compared with the same periods one year earlier. The increases for both periods were largely attributable to higher salaries and employee benefit costs, legal fees, and depreciation on a long-lived asset.

The amortization of VOBA increased \$0.2 million or 18% in the third quarter and \$1.3 million or 32% in the first nine months of 2012 compared to one year earlier. The increase in the third quarter reflected higher amortization of VOBA on certain policies due to improved mortality. The increase in the nine months was largely due to unlocking that occurred during the second quarter of 2012.

Table of Contents**Group Insurance**

The following table presents financial data of the Group Insurance business segment for the third quarters and nine months ended September 30, 2012 and 2011:

	Quarter Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
Insurance revenues:				
Premiums, net	\$ 12,316	\$ 12,613	\$ 36,580	\$ 37,413

Income (loss) before income tax expense (benefit)	(165)	62	(495)	(787)
Income tax expense (benefit)	(57)	22	(173)	(275)
Net income (loss)	\$ (108)	\$ 40	\$ (322)	\$ (512)

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the third quarters and nine months ended September 30, 2012 and 2011. New premiums are also detailed by product.

	Quarter Ended September 30			
	2012	% Change	2011	% Change
New premiums:				
Group life insurance	\$ 624	21	\$ 516	(5)
Group dental insurance	1,261	51	834	(54)
Group disability insurance	1,605	(34)	2,425	118
Other group insurance	28	(33)	42	500
Total new premiums	3,518	(8)	3,817	10
Renewal premiums	12,156	4	11,672	14
Total premiums	15,674	1	15,489	13
Reinsurance ceded	(3,358)	17	(2,876)	30
Premiums, net	\$ 12,316	(2)	\$ 12,613	9

Table of Contents

	Nine Months Ended September 30			
	2012	% Change	2011	% Change
New premiums:				
Group life insurance	\$ 1,849	26	\$ 1,463	(13)
Group dental insurance	3,226	-	3,213	(47)
Group disability insurance	5,293	(24)	6,967	110
Other group insurance	118	5	112	11
Total new premiums	10,486	(11)	11,755	6
Renewal premiums	35,939	5	34,166	6
Total premiums	46,425	1	45,921	6
Reinsurance ceded	(9,845)	16	(8,508)	30
Premiums, net	\$ 36,580	(2)	\$ 37,413	2

Total new premiums decreased \$0.3 million or 8% in the third quarter of 2012 compared with the prior year. This decrease was driven by a decline in new group disability premiums of \$0.8 million or 34%. Partially offsetting this was a \$0.4 million or 51% increase in new dental premiums and a \$0.1 million or 21% increase in new group life premiums. Renewal premiums increased \$0.5 million or 4% in the third quarter, reflecting an increase in short-term disability renewal premiums that was partially offset by a decline in dental renewal premiums.

Total new premiums decreased \$1.3 million or 11% in the first nine months of 2012, compared to one year earlier. This decrease was largely due to a \$2.0 million or 33% decline in new short-term disability premiums. Partially offsetting this change, new group life premiums increased \$0.4 million or 26%. Renewal premiums increased \$1.8 million or 5% in the nine months, as an increase in disability renewal premiums was partially offset by a decrease in dental renewal premiums.

The Company uses reinsurance in several of its group product lines to help mitigate risk. Reinsurance premiums increased \$0.5 million or 17% in the third quarter and \$1.3 million or 16% in the first nine months of 2012 compared to the prior year. The increase in both periods was largely due to an increase in short-term disability renewal premiums that are highly reinsured.

Policyholder benefits consist of death benefits, accident and health benefits, and the associated increase or decrease in reserves for future policy benefits. Policyholder benefits increased \$0.3 million or 5% in the third quarter and decreased \$1.2 million or 5% in the nine months compared to the prior year. The increase during the third quarter was largely due to higher benefits paid for the dental product line. The decrease in the nine months was largely due to a reduction in the benefits paid for the group life and dental product lines.

The policyholder benefit ratio is derived by dividing policyholder benefits, net of reinsurance, by total net premiums. The ratio for the Group Insurance segment was 54% in the third quarter and 55% for the first nine months of 2012, compared to 50% in the third quarter and 57% first nine months of 2011. The policyholder benefit ratios for the dental product line were approximately 68% in the third quarter and 70% first nine months of 2012, compared to approximately 62% in the third quarter and 72% first nine months of 2011.

Operating expenses consist of commissions, fees to third-party marketing and administrative organizations, and expenses from the Company's operations. Operating expenses decreased \$0.4 million or 6% in the third quarter and were essentially flat in the nine months. The decrease in the third quarter was largely due to lower commission expenses associated with the disability and dental products.

Table of Contents**Old American**

The following table presents financial data for the Old American business segment for the third quarters and nine months ended September 30, 2012 and 2011:

	Quarter Ended September 30		Nine Months Ended September 30	
	2012	2011	2012	2011
Insurance revenues:				
Premiums, net	\$ 17,680	\$ 17,048	\$ 52,644	\$ 50,655
Total insurance revenues	17,680	17,048	52,644	50,655
Investment revenues:				
Net investment income	3,069	2,929	8,998	9,159
Net realized investment gains, excluding impairment losses	(59)	1	(86)	(34)
Net impairment losses recognized in earnings:				
Total other-than-temporary impairment losses	(6)	(10)	(35)	(67)
Portion of impairment losses recognized in other comprehensive income	-	1	-	17
Net impairment losses recognized in earnings	(6)	(9)	(35)	(50)
Total investment revenues	3,004	2,921	8,877	9,075
Other revenues	1	1	12	14
Total revenues	20,685	19,970	61,533	59,744
Policyholder benefits	11,180	10,476	34,947	34,507
Amortization of deferred acquisition costs	3,450	3,310	9,735	10,116
Operating expenses	4,023	4,426	11,812	14,203
Total benefits and expenses	18,653	18,212	56,494	58,826
Income before income tax expense	2,032	1,758	5,039	918
Income tax expense	790	674	1,936	360
Net income	\$ 1,242	\$ 1,084	\$ 3,103	\$ 558

Net income for this segment totaled \$1.2 million in the third quarter of 2012 compared to \$1.1 million in the prior year. The increase in net income for the third quarter reflected a \$0.6 million increase in insurance revenues, a \$0.1 million increase in net investment income, and a \$0.4 million decrease in operating expenses. These were partially offset by a \$0.7 million increase in policyholder benefits. Net income for the first nine months of 2012 was \$3.1 million compared to \$0.6 million for the same period in 2011. The increase in net income in the first nine months of 2012 reflected a \$2.0 million increase in insurance revenues, a \$0.4 million decrease in the amortization of DAC, and a \$2.4 million decrease in operating expenses. These were partially offset by a \$0.2 million decrease in net investment income and a \$0.4 million increase in policyholder benefits.

Table of Contents

The following table presents gross premiums by new and renewal business, less reinsurance ceded, as included in insurance revenues for the third quarters and nine months ended September 30, 2012 and 2011.

	Quarter Ended September 30			
	2012	% Change	2011	% Change
New individual life premiums	\$ 3,165	4	\$ 3,055	5
Renewal premiums	15,002	3	14,572	3
Total premiums	18,167	3	17,627	3
Reinsurance ceded	(487)	(16)	(579)	(12)
Premiums, net	\$ 17,680	4	\$ 17,048	4

	Nine Months Ended September 30			
	2012	% Change	2011	% Change
New individual life premiums	\$ 9,609	5	\$ 9,190	10
Renewal premiums	44,565	3	43,274	2
Total premiums	54,174	3	52,464	3
Reinsurance ceded	(1,530)	(15)	(1,809)	(12)
Premiums, net	\$ 52,644	4	\$ 50,655	4

Total new premiums increased \$0.1 million or 4% in the third quarter and \$0.4 million or 5% in the nine months, while total renewal premiums increased \$0.4 million or 3% in the third quarter and \$1.3 million or 3% in the nine months. The increases in premiums reflect a combination of expanded distribution efforts and improved agency productivity. Old American continues to focus on the recruitment and development of new agencies and agents, along with improved production from existing agencies and agents. In addition, proactive territorial management by agencies and the home office have contributed to the increased sales.

Net investment income increased \$0.1 million or 5% in the third quarter as both average invested assets and yields earned increased. Net investment income decreased \$0.2 million or 2% in the first nine months as an increase in average invested assets was more than offset by lower yields earned.

Please see Consolidated Results of Operations in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for a table that provides securities that were written down through earnings by business segment for the first three quarters of 2012 and 2011.

Policyholder benefits increased \$0.7 million or 7% in the third quarter versus last year. The increase was largely due to a \$0.6 million increase in death benefits, net of reinsurance, and a \$0.3 million increase in benefit and contract reserves. Policyholder benefits increased \$0.4 million or 1% in the first nine months of 2012 compared with the prior year. This increase was due to a \$1.0 million increase in benefit and contract reserves. Partially offsetting this change was a \$0.4 million decrease in death benefits and a \$0.2 million decrease in life surrenders. The increase in reserves occurred in both the third quarter and nine months of 2012, can largely be attributed to the increase in both sales and retention of business. Mortality fluctuations occur each period, and the Company monitors these fluctuations in relation to its pricing expectations. While death benefits decreased during the first nine months of 2012, the results remained within pricing expectations.

Amortization of DAC increased \$0.1 million or 4% in the third quarter but decreased \$0.4 million or 4% in the nine months compared to one year earlier. The decline in the nine months was primarily due to the implementation of ASU No. 2010-26, as described in Note 7 Change in Accounting Principle and Change in Accounting Estimate.

Edgar Filing: KANSAS CITY LIFE INSURANCE CO - Form 10-Q

Operating expenses decreased \$0.4 million or 9% in the third quarter and \$2.4 million or 17% in the nine months compared to one year earlier. The decreases in both periods were largely due to reduced agent meeting costs. In addition, salaries and benefits decreased in the nine months. Also contributing to the decreases for both periods was lower amortization of VOBA, due to the traditional life insurance block being fully amortized at December 31, 2011. This resulted in less VOBA amortization of \$0.5 million and \$1.4 million in the third quarter and first nine months of 2012, respectively, compared to the same periods in the prior year. Capitalized commissions increased in the nine months, primarily related to the implementation of ASU No. 2010-26, as described in Note 3.

Table of Contents**Liquidity and Capital Resources***Liquidity*

Statements made in the Company's 2011 Form 10-K remain pertinent, as the Company's liquidity position is materially unchanged from year-end 2011.

Net cash provided by operating activities was \$1.7 million in the nine months ended September 30, 2012. The primary sources of cash from operating activities in the first nine months of 2012 were premium receipts and net investment income. The primary uses of cash from operating activities in the first nine months of 2012 were for the payment of policyholder benefits and operating expenses. Net cash used for investing activities was \$33.1 million. The primary sources of cash were sales, maturities, calls, and principal paydowns of investments totaling \$293.1 million. Offsetting these, the Company's new investments totaled \$348.1 million. Net cash provided by financing activities was \$28.1 million, primarily including \$42.2 million of deposits net of withdrawals from policyholder account balances, and reflecting the payment of stockholder dividends.

Debt and Short-Term Borrowing

The Company and certain subsidiaries have access to borrowing capacity through their membership affiliation with the Federal Home Loan Bank of Des Moines (FHLB). At September 30, 2012, there were no outstanding balances with the FHLB, and there were no outstanding balances at year-end 2011. The Company has access to unsecured revolving lines of credit of \$60.0 million with two major commercial banks with no balances outstanding. These lines of credit will expire in June of 2013. The Company anticipates renewing these lines of credit as they come due.

Capital Resources

The Company considers existing capital resources to be adequate to support the current level of business activities. In addition, the Company's statutory equity exceeds the minimum capital deemed necessary to support its insurance business, as determined by the risk-based capital calculations and guidelines established by the National Association of Insurance Commissioners. The Company believes these statutory limitations impose no practical restrictions on its dividend payment plans.

The following table shows the capital adequacy for the Company.

	September 30 2012	December 31 2011
Total assets, excluding separate accounts	\$ 4,186,447	\$ 4,081,633
Total stockholders' equity	756,422	710,705
Ratio of stockholders' equity to assets, excluding separate accounts	18%	17%

The ratio of equity to assets less separate accounts increased from 17% at December 31, 2011 to 18% at September 30, 2012. Unrealized investment gains on available for sale securities, which are included as a part of stockholders' equity (net of securities losses, related taxes, policyholder account balances, future policy benefits, and DAC), totaled \$112.1 million at September 30, 2012. This represents an increase of \$31.0 million in net unrealized gains from the \$81.1 million in net unrealized investment gains at December 31, 2011. Stockholders' equity increased \$45.7 million from year-end 2011, largely due to growth in retained earnings from increased net income experienced in the first nine months of 2012. In addition, the Company experienced growth in accumulated other comprehensive income, reflecting the increase in net unrealized gains.

The stock repurchase program was extended by the Board of Directors through January 27, 2013 to permit the purchase of up to one million of the Company's shares on the open market. During the first nine months of 2012, the Company purchased 72,126 shares under the stock repurchase program for \$2.3 million. Through the nine months ended September 30, 2011, the Company purchased 121,241 shares of stock under the stock repurchase program for \$3.7 million.

During the nine months ended September 30, 2012, the Company purchased 2,669 shares and sold 660 shares of treasury stock from the Company's employee stock ownership plan for a net increase in treasury stock of \$0.1 million. During the six months ended June 30, 2012, the Company purchased 8,098 shares and sold 18,588 shares of treasury stock from the Company's deferred compensation plans for a net decrease in

treasury stock of \$0.5 million.

Table of Contents

During the second quarter of 2012, the Company reclassified 188,621 shares from other assets to treasury stock. Please see the discussion of the immaterial correction in Note 1 Nature of Operations and Significant Accounting Policies for additional information.

On October 22, 2012, the Board of Directors declared a quarterly dividend of \$0.27 per share, unchanged from the prior year, which will be paid November 7, 2012 to stockholders of record as of November 1, 2012. Total stockholder dividends paid were \$9.1 million and \$9.3 million in the first nine months ended September 30, 2012 and 2011, respectively.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

In the most recent reporting periods, financial market volatility and liquidity have shown continued improvement. While the improvement has been fairly broad-based, normal market conditions have not yet returned in all sectors or markets. Periods of volatility and market uncertainty represent a heightened risk for all financial institutions. Such events could negatively affect the Company and policyholder activity, such as a reduction in sales, increased policy surrenders, increased policy loans and reduced earnings. The Company has factored these risks into its risk management processes and its disclosures of financial condition.

Please refer to the Company's 2011 Form 10-K for a more complete discussion of quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

As required by Exchange Act Rule 13a-15(b), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation as of the end of the period covered by this report, of the effectiveness of the Company's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. As required by Exchange Act Rule 13a-15(d), Kansas City Life Insurance Company management, including the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the period covered by this report materially affected, or are reasonably likely to materially affect the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

Part II: Other Information

Item 1. Legal Proceedings

The life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation in recent years. Such litigation has been pursued on behalf of purported classes of insurance purchasers, often questioning the conduct of insurers in the marketing of their products.

Similarly, the Company's retail broker-dealer subsidiary is in an industry that also involves substantial risks of liability. In recent years, litigation and arbitration proceedings involving actions against registered representatives and securities products (including mutual funds, variable annuities, and alternative investments, such as real estate investment products and oil and gas investments) have continued to increase. Given the significant decline in the major market indices beginning in 2008, and the generally poor performance of investments that have historically been considered safe and conservative, there is the potential for an increase in the number of proceedings to which a broker-dealer may be named as a party.

In addition to the above, the Company and its subsidiaries are defendants in, or subject to, other claims or legal actions related to insurance and investment products. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages.

Although no assurances can be given and no determinations can be made at this time, management believes that the ultimate liability, if any, with respect to these other claims and legal actions would not have a material effect on the Company's business, results of operations or financial position.

Item 1A. Risk Factors

The operating results of life insurance companies have historically been subject to significant fluctuations. The factors which could affect the Company's future results include, but are not limited to, general economic conditions and the known trends and uncertainties that are discussed more fully in the Company's Risk Factors included in Part I, Item 1A of the Company's 2011 Form 10-K.

For Immediate Release: October 26, 2012, press release reporting financial results for the third quarter of 2012.

Kansas City Life Announces Third Quarter 2012 Results

Kansas City Life Insurance Company recorded net income of \$4.1 million or \$0.38 per share in the third quarter of 2012, down slightly from prior year third quarter earnings of \$4.5 million or \$0.39 per share. The third quarter 2012 results were favorably impacted by improved net investment income of \$1.6 million but offset by increased benefits and expenses of \$2.2 million.

Net income through the first nine months of 2012 was \$32.0 million or \$2.88 per share, an increase of \$11.5 million or \$1.10 per share over the prior year. The increase was largely the result of net realized investment gains of \$16.8 million in 2012, primarily from the sale of real estate during the first quarter. Also contributing to the favorable results year to date were higher insurance revenues of \$2.8 million and lower benefits and expenses of \$1.1 million.

Insurance revenues declined \$0.4 million or 1% in the third quarter of 2012, largely due to a \$1.0 million decrease in contract charges. The change in contract charges was primarily the result of lower universal life balances. Partially offsetting this change was a \$0.3 million increase in immediate annuity premiums. Insurance revenues increased \$2.8 million or 2% in the nine months of 2012, reflecting increases in immediate annuity and individual life premiums.

Total deposits on the Company's interest sensitive products decreased \$4.7 million or 8% for the third quarter, as increased variable annuity deposits were offset by lower fixed deferred annuity deposits. Total deposits decreased \$9.8 million or 5% in the nine months, largely due to declines in fixed deferred annuity and variable life and annuity deposits.

Total investment revenues, which includes net investment income and net realized investment gains and losses, increased \$1.4 million or 3% in the third quarter. The improved investment revenues were the result of both increased invested assets and higher yields earned. Total investment revenues in the nine months increased \$13.2 million over the prior year, largely from gains on real estate sales. Net investment income decreased \$1.1 million or 1% for the nine months, primarily due to a decline in yields.

Policyholder benefits increased \$1.0 million or 2% for the third quarter of 2012, primarily due to increased policy reserves and net death benefits. However, policyholder benefits declined by \$3.4 million or 3% for the nine month period. The reduction year to date reflected reduced net death benefits, partially offset by an increase in benefit and contract reserves.

The amortization of deferred acquisition costs (DAC) decreased \$4.4 million in the third quarter of 2012 and \$1.7 million for the nine months. The decrease for the comparative third quarters was due to unlocking and system refinements that increased DAC amortization in 2011, while the reduction in DAC amortization year to date was primarily due to unlocking that occurred during the second quarter of 2012.

Operating expenses increased \$6.4 million in the third quarter and \$5.0 million for the nine months. The increase in the third quarter was due to increased depreciation, salaries and employee benefit costs, and legal fees. The increase in the nine months was reflective of the same items, but these were partially offset by a decline in pension expense and a reduction in allowances for doubtful accounts earlier in the year.

On October 22, 2012, the Kansas City Life Board of Directors declared a quarterly dividend of \$0.27 per share that will be paid on November 7, 2012 to stockholders of record on November 1, 2012.

Kansas City Life Insurance Company (NASDAQ: KCLI) was established in 1895 and is based in Kansas City, Missouri. The Company's primary business is providing financial protection through the sale of life insurance and annuities. The Company's revenues were \$419.0 million in 2011, and assets and life insurance in force were \$4.4 billion and \$29.2 billion, respectively, as of December 31, 2011. The Company operates in 49 states and the District of Columbia. For more information, please visit www.kclife.com.
