Aberdeen Global Income Fund, Inc.

Notes to Portfolio of Investments (unaudited)

January 31, 2013

Summary of Significant Accounting Policies

(a) Security Valuation:

The Fund is required to value its securities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Long-term debt and other fixed-income securities are valued at the last quoted or evaluated bid price on the valuation date provided by an independent pricing service provider. If there are no current day bids, the security is valued at the previously applied bid. Short-term debt securities (such as commercial paper, and U.S. treasury bills) having a remaining maturity of 60 days or less are valued at amortized cost, which approximates fair value. Debt and other fixed-income securities are determined as Level 2 investments.

Exchange traded derivatives are generally Level 1 investments and over-the-counter derivatives are generally Level 2 investments.

In the event that a security's market quotations are not readily available or are deemed unreliable, the fair value of a security is determined by the Fund's Pricing Committee, taking into account the relevant factors and surrounding circumstances. A security that has been fair valued by the Pricing Committee may be classified as Level 2 or 3 depending on the nature of the inputs.

In accordance with the authoritative guidance on fair value measurements and disclosures under accounting principles generally accepted in the United States of America (GAAP), the Fund discloses the fair value of its investments using a three-level hierarchy that classifies the inputs to valuation techniques used to measure the fair value. The hierarchy assigns Level 1 measurements to valuations based upon unadjusted quoted prices in active markets for identical assets and Level 3 measurements to valuations based upon unobservable inputs that are significant to the valuation. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability, which are based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. A financial instrument's level within the fair value hierarchy is based upon the lowest level of any input that is significant to the fair value measurement. The three-tier hierarchy of inputs is summarized below:

Level 1 quoted prices in active markets for identical investments;

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, and credit risk); or

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

A summary of standard inputs is listed below:

| Security Type | Standard Inputs |
|--|---|
| Debt and other fixed-income securities | Reported trade data, broker-dealer price quotations, benchmark yields, issuer spreads on comparable securities, credit quality, yield, and maturity |
| Forward foreign currency contracts | Forward exchange rate quotations |
| Swap agreements | Market information pertaining to the underlying reference assets, i.e., credit spreads, credit event probabilities, fair values, forward rates, and volatility measures |

Aberdeen Global Income Fund, Inc.

Notes to Portfolio of Investments (unaudited) (continued)**January 31, 2013**

The following is a summary of the inputs used as of January 31, 2013 in valuing the Fund's investments at fair value. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Please refer to the Portfolio of Investments for a detailed breakout of the security types:

| Assets | Level 1 | Level 2 | Level 3 |
|--|-----------|-----------------------|-----------|
| Fixed Income Investments | | | |
| Corporate Bonds | \$ | \$ 30,504,016 | \$ |
| Government Bonds | | 130,843,038 | |
| Total Fixed Income Investments | | 161,347,054 | |
| Short-Term Investment | | 1,296,000 | |
| Total Investments | \$ | \$ 162,643,054 | \$ |
| Other Financial Instruments | | | |
| Forward Foreign Currency Exchange Contracts | \$ | \$ 52,696 | \$ |
| Interest Rate Swap Agreements | | 92,013 | |
| Total Other Financial Instruments | \$ | \$ 144,709 | \$ |
| Total Assets | \$ | \$ 162,787,763 | \$ |
| Liabilities | | | |
| Other Financial Instruments | | | |
| Forward Foreign Currency Exchange Contracts | \$ | \$ (46,846) | \$ |
| Interest Rate Swap Agreements | | (3,307) | |
| Total Liabilities - Other Financial Instruments | \$ | \$ (50,153) | \$ |

Amounts listed as are \$0 or round to \$0.

For movements between the levels within the fair value hierarchy, the Fund has adopted a policy of recognizing transfers at the end of each period. During the period ended January 31, 2013, there were no transfers between Level 1 and Level 2. For the period ended January 31, 2013, there have been no significant changes to the fair valuation methodologies.

(b) Repurchase Agreements:

The Fund may enter into repurchase agreements. It is the Fund's policy that its custodian/counterparty segregate the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. The repurchase price generally equals the price paid by the Fund plus interest negotiated on the basis of current short-term rates. To the extent that any repurchase transaction exceeds one business day, the collateral is valued on a daily basis to determine its adequacy. If the counterparty defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the counterparty of the security, realization of the collateral by the Fund may be delayed or limited. The Fund held a repurchase agreement of \$1,296,000 as of January 31, 2013.

(c) Restricted Securities:

Restricted securities are privately-placed securities whose resale is restricted under U.S. securities laws. The Fund may invest in restricted securities, including unregistered securities eligible for resale without registration pursuant to Rule 144A and privately-placed securities of U.S. and non-U.S. issuers offered outside the U.S. without registration pursuant to Regulation S under the Securities Act of 1933, as amended (the

Edgar Filing: ABERDEEN GLOBAL INCOME FUND INC - Form N-Q

1933 Act). Rule 144A securities may be freely traded among certain qualified institutional investors, such as the Fund, but resale of such securities in the U.S. is permitted only in limited circumstances.

(d) Foreign Currency Translation:

Foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. Dollars at the exchange rate of said currencies against the U.S. Dollar, as of the Valuation Time, as provided by an independent pricing service approved by the Board. The Valuation Time is as of the close of regular trading on the New York Stock Exchange (usually 4:00 p.m. Eastern Time).

Aberdeen Global Income Fund, Inc.

Notes to Portfolio of Investments (unaudited) (continued)

January 31, 2013

Foreign currency amounts are translated into U.S. Dollars on the following basis:

- (i) market value of investment securities, other assets and liabilities at the exchange rates at the current daily rates of exchange; and
- (ii) purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

The Fund isolates that portion of the results of operations arising from changes in the foreign exchange rates due to the fluctuations in the market prices of the securities held at the end of the reporting period. Similarly, the Fund isolates the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the reporting period.

Net exchange gain/(loss) is realized from sales and maturities of portfolio securities, sales of foreign currencies, settlement of securities transactions, dividends, interest and foreign withholding taxes recorded on the Fund's books. Net unrealized foreign exchange appreciation/(depreciation) includes changes in the value of portfolio securities and other assets and liabilities arising as a result of changes in the exchange rate. The net realized and unrealized foreign exchange gain/(loss) shown in the composition of net assets represents foreign exchange gain/(loss) for book purposes that may not have been recognized for tax purposes.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin, including unanticipated movements in the value of the foreign currency relative to the U.S. Dollar. Generally, when the U.S. Dollar rises in value against foreign currency, the Fund's investments denominated in that currency will lose value because its currency is worth fewer U.S. Dollars; the opposite effect occurs if the U.S. Dollar falls in relative value.

(e) Derivative Financial Instruments:

The Fund is authorized to use derivatives to manage currency risk, credit risk and interest rate risk and to replicate or as a substitute for physical securities. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

Forward Foreign Currency Exchange Contracts:

A forward foreign currency exchange contract (forward contract) involves an obligation to purchase and sell a specific currency at a future date at a price set at the time of the contract. Forward contracts are used to manage the Fund's currency exposure in an efficient manner. They are used to sell unwanted currency exposure that comes with holding securities in a market, or to buy currency exposure where the exposure from holding securities is insufficient to give the desired currency exposure either in absolute terms or relative to the benchmark. The use of forward contracts allows the separation of decision-making between markets and their currencies. The forward contract is marked-to-market daily and the change in market value is recorded by the Fund as unrealized appreciation or depreciation. Forward contracts' prices are received daily from an independent pricing provider. When the forward contract is closed, the Fund records a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts and from unanticipated movements in exchange rates.

Futures Contracts:

The Fund may invest in financial futures contracts (futures contracts) for the purpose of hedging its existing portfolio securities or securities that the Fund intends to purchase against fluctuations in value caused by changes in prevailing market interest rates or prices. Futures contracts may also be entered into for non-hedging purposes; however, in those instances, the aggregate initial margin and premiums required to establish the Fund's positions may not exceed 5% of the Fund's net asset value after taking into account unrealized profits and unrealized losses on any such contract it has entered.

Aberdeen Global Income Fund, Inc.

Notes to Portfolio of Investments (unaudited) (continued)

January 31, 2013

Upon entering into a futures contract, the Fund is required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount. Subsequent payments, known as variation margin, are calculated each day, depending on the daily fluctuations in the fair value/market value of the underlying assets. An unrealized gain/(loss) equal to the variation margin is recognized on a daily basis. Futures contracts are valued daily at their last quoted sale price on the exchange on which they are traded.

A sale of a futures contract means a contractual obligation to deliver the securities or foreign currency called for by the contract at a fixed price at a specified time in the future. A purchase of a futures contract means a contractual obligation to acquire the securities or foreign currency at a fixed price at a specified time in the future.

Should market conditions change unexpectedly, the Fund may not achieve the anticipated benefits of the futures contracts and may realize a loss. The use of futures transactions for hedging purposes involves the risk of imperfect correlation in movements in the price of futures contracts, interest rates and the value/market value of the underlying hedged assets.

Swaps:

A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or notional principal amount. The Fund will enter into swaps only on a net basis, which means that the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the difference between the two payments. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interest payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying reference asset or index. The Fund records unrealized gains/(losses) on a daily basis representing the value and the current net receivable or payable relating to open swap contracts. Net amounts received or paid on the swap contract are recorded as realized gains/(losses). Fluctuations in the value of swap contracts are recorded for financial statement purposes as unrealized appreciation or depreciation of swap contracts. Realized gains/(losses) from terminated swaps are included in net realized gains/(losses) on swap contracts transactions.

The Fund is a party to International Swap Dealers Association, Inc. Master Agreements (ISDA Master Agreements). These agreements are with select counterparties and they govern transactions, including certain over-the-counter derivative and foreign exchange contracts, entered into by the Fund and the counterparty. The ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral, and events of default or termination. The occurrence of a specified event of termination may give a counterparty the right to terminate all of its contracts and affect settlement of all outstanding transactions under the applicable ISDA Master Agreement.

(f) Security Transactions, Investment Income and Expenses:

Securities transactions are recorded on the trade date. Realized and unrealized gains/(losses) from security and currency transactions are calculated on the identified cost basis. Interest income is recorded on an accrual basis. Discounts and premiums on securities purchased are accreted or amortized on an effective yield basis over the estimated lives of the respective securities. Expenses are accrued on a daily basis.

(g) Distributions:

The Fund has a managed distribution policy to pay distributions from net investment income supplemented by net realized foreign exchange gains, net realized short-term capital gains and return of capital distributions, if necessary, on a monthly basis. The managed distribution policy is subject to regular review by the Board. The Fund will also declare and pay distributions at least annually from net realized gains on investment transactions and net realized foreign exchange gains, if any. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Aberdeen Global Income Fund, Inc.

Notes to Portfolio of Investments (unaudited) (concluded)

January 31, 2013

Dividends and distributions to shareholders are determined in accordance with federal income tax regulations, which may differ from GAAP. These differences are primarily due to differing treatments for foreign currencies, loss deferrals and recognition of market discount and premium.

(h) Federal Income Taxes:

At January 31, 2013, the identified cost for federal income tax purposes, as well as the gross unrealized appreciation from investments for those securities having an excess of value over cost, gross unrealized depreciation from investments for those securities having an excess of cost over value and the net unrealized appreciation from investments were as follows:

| | | | Net Unrealized |
|-----------------------|---------------------|---------------------|-----------------------|
| Tax Cost Basis | Appreciation | Depreciation | Appreciation |
| \$154,359,709 | \$ 10,687,749 | \$ (2,404,404) | \$ 8,283,345 |

Aberdeen Global Income Fund, Inc.

Item 2 Controls and Procedures

- (a) It is the conclusion of the Registrant's principal executive officer and principal financial officer that the effectiveness of the Registrant's current disclosure controls and procedures (such disclosure controls and procedures having been evaluated within 90 days of the date of this filing) provide reasonable assurance that the information required to be disclosed by the Registrant has been recorded, processed, summarized and reported within the time period specified in the Commission's rules and forms and that the information required to be disclosed by the Registrant has been accumulated and communicated to the Registrant's principal executive officer and principal financial officer in order to allow timely decisions regarding required disclosure.

- (b) There have been no changes in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the Registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3 Exhibits

- (a) Certifications required pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are filed as Exhibit 99.CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
