WESTERN ALLIANCE BANCORPORATION

(Exact Name of Registrant as Specified in Its Charter)

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Nevada (State or Other Jurisdiction of Incorporation or Organization)	88-0365922 (I.R.S. Employer I.D. Number)
One E. Washington Street, Phoenix, AZ (Address of Principal Executive Offices)	85004 (602) 389-3500 (Zip Code)
(Registrant's telephone number, including area code)	

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of large accelerated filer, large accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common stock issued and outstanding: 86,946,543 shares as of April 30, 2013.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of operations

Western Alliance Bancorporation (WAL or the Company), incorporated under the laws of the state of Nevada, is a bank holding company providing full service banking and related services to locally owned businesses, professional firms, real estate developers and investors, local non-profit organizations, high net worth individuals and other consumers through its three wholly owned subsidiary banks: Bank of Nevada, operating in Southern Nevada, Western Alliance Bank, operating in Arizona and Northern Nevada, and Torrey Pines Bank, operating in California. In addition, two non-bank subsidiaries, Western Alliance Equipment Finance, which offers equipment finance services nationwide, and Las Vegas Sunset Properties, which holds certain non-performing assets. These entities are collectively referred to herein as the Company.

Basis of presentation

The accounting and reporting policies of the Company are in accordance with accounting principles generally accepted in the United States (GAAP) and conform to practices within the financial services industry. The accounts of the Company and its consolidated subsidiaries are included in these Consolidated Financial Statements. All significant intercompany balances and transactions have been eliminated.

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant changes in the near term relate to the determination of the allowance for credit losses; fair value determinations related to acquisitions; fair value of other real estate owned; determination of the valuation allowance related to deferred tax assets; impairment of goodwill and other intangible assets and other than temporary impairment on securities. Although Management believes these estimates to be reasonably accurate, actual amounts may differ. In the opinion of Management, all adjustments considered necessary have been reflected in the financial statements during their preparation.

Principles of consolidation

WAL has 11 wholly-owned subsidiaries: Bank of Nevada (BON), Western Alliance Bank (WAB), Torrey Pines Bank (TPB), which are all banking subsidiaries; Western Alliance Equipment Finance, Inc. (WAEF), which provides equipment finance services; Las Vegas Sunset Properties (LVSP), which holds certain non-performing assets; and six unconsolidated subsidiaries used as business trusts in connection with issuance of trust-preferred securities. In addition, until October 31, 2012, WAL maintained an 80 percent interest in Shine Investment Advisory Services Inc. (Shine), a registered investment advisor. WAL divested its formerly owned 80 percent interest in Shine Investment Advisory Services, Inc. as of October 31, 2012. On April 30, 2013, the Company completed its acquisition of Centennial Bank (Centennial). The Company paid \$57.5 million for all equity interests in Centennial. The Company merged Centennial Bank into WAB effective April 30, 2013. None of the assets or liabilities of Centennial are included in the Company's financials at March 31, 2013. The merger was completed because the purchase price of Centennial was at a discount to tangible book value and is expected to be accretive to capital at close. The combined bank had approximately \$3.27 billion of assets and \$2.78 billion of deposits immediately following the merger and continues to operate as Western Alliance Bank. As of March 31, 2013, acquisition related expenses have been minimal. The Company has undertaken an additional review and valuation of Centennial's assets and liabilities, which will be reflected in the combined entities financial statements as of the acquisition date.

BON has three wholly-owned subsidiaries: BW Real Estate, Inc., which operates as a real estate investment trust and holds certain of BON's real estate loans and related securities; BON Investments, Inc., which holds certain investment securities and commercial leases; and BW Nevada Holdings, LLC, which owns the Company's 2700 West Sahara Avenue, Las Vegas, Nevada location.

WAB has one wholly-owned subsidiary, WAB Investments, Inc., which holds certain investment securities and commercial leases, and TPB has one wholly-owned subsidiary, TPB Investments, Inc., which holds certain investment securities and commercial leases.

The Company does not have any other significant entities that should be considered for consolidation. All significant intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Certain amounts in the consolidated financial statements as of December 31, 2012 and for the three months ended March 31, 2012 have been reclassified to conform to the current presentation. The reclassifications have no effect on net income or stockholders' equity as previously reported.

Table of Contents

Interim financial information

The accompanying unaudited consolidated financial statements as of March 31, 2013 and 2012 have been prepared in condensed format, and therefore do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. These statements have been prepared on a basis that is substantially consistent with the accounting principles applied to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012.

The information furnished in these interim statements reflects all adjustments which are, in the opinion of management, necessary for a fair statement of the results for each respective period presented. Such adjustments are of a normal recurring nature. The results of operations in the interim statements are not necessarily indicative of the results that may be expected for any other quarter or for the full year. The interim financial information should be read in conjunction with the Company's audited financial statements.

Investment securities

Investment securities may be classified as held-to-maturity (HTM), available-for-sale (AFS) or trading. The appropriate classification is initially decided at the time of purchase. Securities classified as held-to-maturity are those debt securities the Company has both the intent and ability to hold to maturity regardless of changes in market conditions, liquidity needs or general economic conditions. These securities are carried at amortized cost. The sale of a security within three months of its maturity date or after the majority of the principal outstanding has been collected is considered a maturity for purposes of classification and disclosure.

Securities classified as AFS or trading are reported as an asset on the Consolidated Balance Sheets at their estimated fair value. As the fair value of AFS securities changes, the changes are reported net of income tax as an element of other comprehensive income (OCI), except for impaired securities. When AFS securities are sold, the unrealized gain or loss is reclassified from OCI to non-interest income. The changes in the fair values of trading securities are reported in non-interest income. Securities classified as AFS are both equity and debt securities the Company intends to hold for an indefinite period of time, but not necessarily to maturity. Any decision to sell a security classified as AFS would be based on various factors, including significant movements in interest rates, changes in the maturity mix of the Company's assets and liabilities, liquidity needs, decline in credit quality, and regulatory capital considerations.

Interest income is recognized based on the coupon rate and increased by accretion of discounts earned or decreased by the amortization of premiums paid over the contractual life of the security using the interest method. For mortgage-backed securities, estimates of prepayments are considered in the constant yield calculations.

In estimating whether there are any other than temporary impairment losses, management considers 1) the length of time and the extent to which the fair value has been less than amortized cost, 2) the financial condition and near term prospects of the issuer, 3) the impact of changes in market interest rates, and 4) the intent and ability of the Company to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value and it is not more likely than not the Company would be required to sell the security.

Declines in the fair value of individual debt securities available for sale that are deemed to be other than temporary are reflected in earnings when identified. The fair value of the debt security then becomes the new cost basis. For individual debt securities where the Company does not intend to sell the security and it is not more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis, the other than temporary decline in fair value of the debt security related to 1) credit loss is recognized in earnings, and 2) market or other factors is recognized in other comprehensive income or loss. Credit loss is recorded if the present value of cash flows is less than amortized cost.

For individual debt securities where the Company intends to sell the security or more likely than not will not recover all of its amortized cost, the other than temporary impairment is recognized in earnings equal to the entire difference between the securities cost basis and its fair value at the balance sheet date. For individual debt securities for which a credit loss has been recognized in earnings, interest accruals and amortization and accretion of premiums and discounts are suspended when the credit loss is recognized. Interest received after accruals have been suspended is recognized on a cash basis.

Derivative financial instruments

Derivatives are recognized on the balance sheet at their fair value, with changes in fair value reported in current-period earnings. These instruments consist primarily of interest rate swaps.

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Certain derivative transactions that meet specified criteria qualify for hedge accounting. The Company occasionally purchases a financial instrument or originates a loan that contains an embedded derivative instrument. Upon purchasing the instrument or originating the loan, the Company assesses whether the economic characteristics of the embedded derivative are clearly and closely related to the economic characteristics of the remaining component of the financial instrument (i.e., the host contract) and whether a separate instrument with the same terms as the embedded instrument would meet the definition of a derivative instrument. When it is determined that (1) the embedded derivative possesses economic characteristics that are not clearly and closely related to the economic characteristics of the host contract, and (2) a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is separated from the host contract and carried at fair value. However, in cases where (1) the host contract is measured at fair value, with changes in fair value reported in current earnings, or (2) the Company is unable to reliably identify and measure an embedded derivative for separation from its host contract, the entire contract is carried on the balance sheet at fair value and is not designated as a hedging instrument.

Table of Contents

Allowance for credit losses

Credit risk is inherent in the business of extending loans and leases to borrowers. Like other financial institutions, the Company must maintain an adequate allowance for credit losses. The allowance for credit losses is established through a provision for credit losses charged to expense. Loans are charged against the allowance for credit losses when Management believes that the contractual principal or interest will not be collected. Subsequent recoveries, if any, are credited to the allowance. The allowance is an amount believed adequate to absorb probable losses on existing loans that may become uncollectable, based on evaluation of the collectability of loans and prior credit loss experience, together with other factors. The Company formally re-evaluates and establishes the appropriate level of the allowance for credit losses on a quarterly basis.

The Company's allowance for credit loss methodology incorporates several quantitative and qualitative risk factors used to establish the appropriate allowance for credit losses at each reporting date. Quantitative factors include our historical loss experience, delinquency and charge-off trends, collateral values, changes in the level of nonperforming loans and other factors. Qualitative factors include the economic condition of our operating markets and the state of certain industries. Specific changes in the risk factors are based on actual loss experience, as well as perceived risk of similar groups of loans classified by collateral type, purpose and term. An internal one-year and five-year loss history are also incorporated into the allowance calculation model. Due to the credit concentration of our loan portfolio in real estate secured loans, the value of collateral is heavily dependent on real estate values in Nevada, Arizona and California, which have declined substantially from their peak. While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are significant changes in economic or other conditions. In addition, the FDIC and state bank regulatory agencies, as an integral part of their examination processes, periodically review our subsidiary banks' allowances for credit losses, and may require us to make additions to our allowance based on their judgment about information available to them at the time of their examinations. Management regularly reviews the assumptions and formulae used in determining the allowance and makes adjustments if required to reflect the current risk profile of the portfolio.

The allowance consists of specific and general components. The specific allowance relates to impaired loans. In general, impaired loans include those where interest recognition has been suspended, loans that are more than 90 days delinquent but because of adequate collateral coverage, income continues to be recognized, and other criticized and classified loans not paying substantially according to the original contract terms. For such loans, an allowance is established when the discounted cash flows, collateral value or observable market price of the impaired loan are lower than the carrying value of that loan, pursuant to FASB ASC 310, *Receivables* (ASC 310). Loans not collateral dependent are evaluated based on the expected future cash flows discounted at the original contractual interest rate. The amount to which the present value falls short of the current loan obligation will be set up as a reserve for that account or charged-off.

The Company uses an appraised value method to determine the need for a reserve on impaired, collateral dependent loans and further discounts the appraisal for disposition costs. Generally, the Company obtains independent collateral valuation analysis for each loan every six to twelve months.

The general allowance covers all non-impaired loans and is based on historical loss experience adjusted for the various qualitative and quantitative factors listed above. The change in the allowance from one reporting period to the next may not directly correlate to the rate of change of the nonperforming loans for the following reasons:

1. A loan moving from impaired performing to impaired nonperforming does not mandate an increased reserve. The individual account is evaluated for a specific reserve requirement when the loan moves to impaired status, not when it moves to nonperforming status, and is reevaluated at each subsequent reporting period. Because our nonperforming loans are predominately collateral dependent, reserves are primarily based on collateral value, which is not affected by borrower performance, but rather by market conditions.
2. Not all impaired accounts require a specific reserve. The payment performance of the borrower may require an impaired classification, but the collateral evaluation may support adequate collateral coverage. For a number of impaired accounts in which borrower performance has ceased, the collateral coverage is now sufficient because a partial charge off of the account has been taken. However, in those instances, although the specific reserve calculation results in no allowance, the Company may record a reserve due to qualitative considerations.

Table of Contents

Other assets acquired through foreclosure

Other assets acquired through foreclosure consist primarily of properties acquired as a result of, or in-lieu-of, foreclosure. Properties or other assets (primarily repossessed assets formerly leased) are classified as other real estate owned and other repossessed property and are initially reported at fair value of the asset less estimated selling costs. Subsequent adjustments are based on the lower of carrying value or fair value, less estimated costs to sell the property. Costs relating to the development or improvement of the assets are capitalized and costs relating to holding the assets are charged to non-interest expense. Property is evaluated regularly to ensure the recorded amount is supported by its current fair value and valuation allowances.

Investments in low income housing credits

Starting in 2012, the Company invested in limited partnerships formed for the purpose of investing in low income housing projects, which qualify for federal low income housing tax credits. These investments are expected to generate tax credits over the next ten years. The investments are accounted for under the equity method of accounting. At March 31, 2013, other assets included \$74.8 million related to these investments and other liabilities include \$46.6 million related to future unconditional equity commitments.

Income taxes

Western Alliance Bancorporation and its subsidiaries, other than BW Real Estate, Inc., file a consolidated federal tax return. Due to tax regulations, several items of income and expense are recognized in different periods for tax return purposes than for financial reporting purposes. These items represent temporary differences. Deferred taxes are provided on an asset and liability method whereby deferred tax assets are recognized for deductible temporary differences and tax credit carry-forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. The most significant source of these timing differences are the credit loss reserve and net operating loss carryforwards, which account for substantially all of the net deferred tax asset. Deferred tax assets are reduced by a valuation allowance when, in the opinion of Management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment.

Although realization is not assured, the Company believes that the realization of the recognized net deferred tax asset of \$54.1 million at March 31, 2013 is more likely than not based on expectations as to future taxable income and based on available tax planning strategies as defined in FASB ASC 740, *Income Taxes* (ASC 740) that could be implemented if necessary to prevent a carryforward from expiring.

Based on its internal analysis, the Company believes that it is more likely than not that the Company will fully utilize deferred federal and state tax assets pertaining to the existing net operating loss carryforwards and any net operating loss (NOL) that would be created by the reversal of the future net deductions that have not yet been taken on a tax return.

Fair values of financial instruments

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities. FASB ASC 820, *Fair Value Measurements and Disclosures* (ASC 820) establishes a framework for measuring fair value, establishes a three-level valuation hierarchy for disclosure of fair value measurement and enhances disclosure requirements for fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The Company uses various valuation approaches, including market, income and/or cost approaches. ASC 820 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the factors market participants would consider in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs, as follows:

Level 1 Observable quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Level 2 Observable quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, matrix pricing or model-based valuation techniques where all significant assumptions are observable, either directly or indirectly in the market.

Level 3 Model-based techniques where all significant assumptions are not observable, either directly or indirectly, in the market. These unobservable assumptions reflect our own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques may include use of discounted cash flow models and similar techniques.

The availability of observable inputs varies based on the nature of the specific financial instrument. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Table of Contents

Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure. When market assumptions are available, ASC 820 requires the Company to make assumptions regarding the assumptions that market participants would use to estimate the fair value of the financial instrument at the measurement date.

FASB ASC 825, *Financial Instruments* (ASC 825) requires disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate that value.

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction at March 31, 2013 or December 31, 2012. The estimated fair value amounts for March 31, 2013 and December 31, 2012 have been measured as of period-end, and have not been reevaluated or updated for purposes of these consolidated financial statements subsequent to those dates. As such, the estimated fair values of these financial instruments subsequent to the reporting date may be different than the amounts reported at the period-end.

The information beginning on page 32 in Note 10, Fair Value Accounting, should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only required for a limited portion of the Company's assets and liabilities.

Due to the wide range of valuation techniques and the degree of subjectivity used in making the estimate, comparisons between the Company's disclosures and those of other companies or banks may not be meaningful.

The following methods and assumptions were used by the Company in estimating the fair value of its financial instruments:

Cash and cash equivalents

The carrying amounts reported in the consolidated balance sheets for cash and due from banks approximate their fair value.

Money market and certificates of deposit investments

The carrying amounts reported in the consolidated balance sheets for money market investments approximate their fair value.

Investment securities

The fair values of U.S. Treasuries, corporate bonds, mutual funds, and exchange-listed preferred stock are based on quoted market prices and are categorized as Level 1 of the fair value hierarchy.

The fair value of other investment securities were determined based on matrix pricing. Matrix pricing is a mathematical technique that utilizes observable market inputs including, for example, yield curves, credit ratings and prepayment speeds. Fair values determined using matrix pricing are generally categorized as Level 2 in the fair value hierarchy.

The Company owns certain collateralized debt obligations (CDOs) for which quoted prices are not available. Quoted prices for similar assets are also not available for these investment securities. In order to determine the fair value of these securities, the Company has estimated the future cash flows and discount rate using observable market inputs adjusted based on assumptions regarding the adjustments a market participant would assume necessary for each specific security. As a result, the resulting fair values have been categorized as Level 3 in the fair value hierarchy.

Restricted stock

The Company's subsidiary banks are members of the Federal Home Loan Bank (FHLB) system and maintain an investment in capital stock of the FHLB. The Company's subsidiary banks also maintain an investment in their primary correspondent bank. These investments are carried at cost since no ready market exists for them, and they have no quoted market value. The Company conducts a periodic review and evaluation of our FHLB stock to determine if any impairment exists. The fair values have been categorized as Level 2 in the fair value hierarchy.

Loans

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Fair value for loans is estimated based on discounted cash flows using interest rates currently being offered for loans with similar terms to borrowers with similar credit quality with adjustments that the Company believes a market participant would consider in determining fair value based on a third party independent valuation. As a result, the fair value for loans disclosed in Note 10, Fair Value Accounting, is categorized as Level 2 in the fair value hierarchy.

Table of Contents

Accrued interest receivable and payable

The carrying amounts reported in the consolidated balance sheets for accrued interest receivable and payable approximate their fair value. Accrued interest receivable and payable fair value measurements are classified as Level 3 in the fair value hierarchy.

Derivative financial instruments

All derivatives are recognized on the balance sheet at their fair value. The fair value for derivatives is determined based on market prices, broker-dealer quotations on similar product or other related input parameters. As a result, the fair values have been categorized as Level 2 in the fair value hierarchy.

Deposit liabilities

The fair value disclosed for demand and savings deposits is by definition equal to the amount payable on demand at their reporting date (that is, their carrying amount), which the Company believes a market participant would consider in determining fair value. The carrying amount for variable-rate deposit accounts approximates their fair value. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on these deposits. The fair value measurement of the deposit liabilities disclosed in Note 10, Fair Value Accounting, is categorized as Level 2 in the fair value hierarchy.

Federal Home Loan Bank and Federal Reserve advances and other borrowings

The fair values of the Company's borrowings are estimated using discounted cash flow analyses, based on the market rates for similar types of borrowing arrangements. The other borrowings have been categorized as Level 3 in the fair value hierarchy. The FHLB and FRB advances have been categorized as Level 2 in the fair value hierarchy due to their short durations.

Junior subordinated debt

Junior subordinated debt and subordinated debt are valued by comparing interest rates and spreads to benchmark indices offered to institutions with similar credit profiles to our own and discounting the contractual cash flows on our debt using these market rates. The junior subordinated debt has been categorized as Level 3 in the fair value hierarchy.

Off-balance sheet instruments

Fair values for the Company's off-balance sheet instruments (lending commitments and standby letters of credit) are based on quoted fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Recent accounting pronouncements

In January 2013, the FASB issued guidance within ASU 2013-01 Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. The amendments in ASU 2013-01 to Topic 210, *Balance Sheet*, clarify that the scope of ASU 2011-11 Disclosures about Offsetting Assets and Liabilities, would apply to derivatives including bifurcated embedded derivatives, repurchase agreements and reverse agreements, and securities borrowing and securities lending transactions that are either offset or subject to a master netting arrangement. The amendments are effective for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. The adoption of this guidance did not have a material impact on the Company's consolidated statement of operations, its consolidated balance sheet, or its consolidated cash flows.

In February 2013, the FASB issued guidance within ASU 2013-02 Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The amendments in ASU 2013-02 to Topic 220, *Comprehensive Income*, update, supersede and replace the presentation requirements for reclassifications out of accumulated other comprehensive income in ASUs 2011-05 and 2011-12. The amendments require an entity to provide additional information about reclassifications out of accumulated other comprehensive income. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. Early adoption is permitted. The adoption of this guidance did not have a material impact on the Company's consolidated statement of operations, its consolidated balance sheet, or its consolidated cash flows and will only impacted the presentation of other comprehensive income in the consolidated financial statements.

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

In February 2013, the FASB issued guidance within ASU 2013-04 – Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation is Fixed at the Reporting Date. The amendments in ASU 2013-04 to Topic 405, *Liabilities*, provide guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the Update is fixed at the reporting date, except for obligations addressed with existing U.S. GAAP. The guidance requires an entity to measure those obligations as the sum of the amount the reporting entity agreed to pay on behalf of its co-obligors. The guidance also requires an entity to disclose the nature and amount of the obligation, as well as other information about those obligations. The amendment is effective retrospectively for reporting periods beginning after December 15, 2013. Early adoption is permitted. The adoption of this guidance is not expected to have a material impact on the Company's consolidated statement of operations, its consolidated balance sheet, or its consolidated cash flows.

Table of Contents**2. DISCONTINUED OPERATIONS**

The Company has discontinued its affinity credit card platform, PartnersFirst, and has presented these activities as discontinued operations. At March 31, 2013 and December 31, 2012, the outstanding credit card loans held for sale were \$27.9 million and \$31.1 million, respectively.

The following table summarizes the operating results of the discontinued operations for the periods indicated:

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Affinity card revenue	\$ 1,139	\$ 295
Non-interest expenses	(1,074)	(678)
Income (loss) before income taxes	65	(383)
Income tax expense (benefit)	27	(161)
Net income (loss)	\$ 38	\$ (222)

3. EARNINGS PER SHARE

Diluted earnings per share is based on the weighted average outstanding common shares during each period, including common stock equivalents. Basic earnings per share is based on the weighted average outstanding common shares during the period.

Basic and diluted earnings per share, based on the weighted average outstanding shares, are summarized as follows:

	Three Months Ended March 31,	
	2013	2012
	(in thousands, except per share amounts)	
Weighted average shares basic	85,324	81,359
Dilutive effect of stock awards	656	868
Weighted average shares diluted	85,980	82,227
Net income (loss) available to common shareholders	\$ 20,611	\$ 9,537
Earnings per share basic	0.24	0.12
Earnings per share diluted	0.24	0.12

The Company had 770,135 and 1,053,045 stock options outstanding as of March 31, 2013 and December 31, 2012, respectively, that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive.

Table of Contents**4. ACCUMULATED OTHER COMPREHENSIVE INCOME**

The following table summarizes the changes in accumulated other comprehensive income by component, net of tax for the period indicated:

	Three Months Ended March 31, 2013		
	Unrealized holding gains (losses)	Unrealized gain on cash flow hedge	Total
	on AFS	(in thousands)	
Beginning balance	\$ 8,209	\$ 17	\$ 8,226
Other comprehensive income before reclassifications	(890)	(34)	(924)
Amounts reclassified from accumulated other comprehensive income	(97)		(97)
Net current-period other comprehensive income	(987)	(34)	(1,021)
Ending Balance	\$ 7,222	\$ (17)	\$ 7,205

The following table presents reclassifications out of accumulated other comprehensive income:

Three Months Ended March 31, 2013		
Details about accumulated other comprehensive income components	Amount reclassified from accumulated other comprehensive income (in thousands)	Affected line item in the statement where net income is presented
Unrealized gains and losses on AFS		
	\$ 147	Realized gain on sale of Investment securities
	(50)	Income tax expense
	\$ 97	Net of tax

5. INVESTMENT SECURITIES

Carrying amounts and fair values of investment securities at March 31, 2013 and December 31, 2012 are summarized as follows:

		March 31, 2013

For additional information on the fair value changes of the securities measured at fair value, see the trading securities table in Note 10 Fair Value Accounting .

The Company conducts an other-than-temporary impairment (OTTI) analysis on a quarterly basis. The initial indication of OTTI for both debt and equity securities is a decline in the market value below the amount recorded for an investment, and the severity and duration of the decline. Another potential indication of OTTI is a downgrade below investment grade. In determining whether an impairment is OTTI, the Company considers the length of time and the extent to which the market value has been below cost, recent events specific to the issuer, including investment downgrades by rating agencies and economic conditions of its industry, and the Company's ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery. For marketable equity securities, the Company also considers the issuer's financial condition, capital strength, and near-term prospects.

For debt securities and for adjustable-rate preferred stock (ARPS) that are treated as debt securities for the purpose of OTTI analysis, the Company also considers the cause of the price decline (general level of interest rates and industry-and issuer-specific factors), the issuer's financial condition, near-term prospects and current ability to make future payments in a timely manner, the issuer's ability to service debt, and any change in agencies' ratings at evaluation date from acquisition date and any likely imminent action. For ARPS with a fair value below cost that is not attributable to the credit deterioration of the issuer, such as a decline in cash flows from the security or a downgrade in the security's rating below investment grade, the Company does not recognize an OTTI charge where it is able to assert that it has the intent and ability to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value.

Gross unrealized losses at March 31, 2013 and December 31, 2012 are primarily caused by interest rate fluctuations, credit spread widening and reduced liquidity in applicable markets. The Company has reviewed securities on which there is an unrealized loss in accordance with its accounting policy for OTTI described above and determined there were no securities impairment charges needed for the three months ended March 31, 2013 and 2012.

The Company does not consider any other securities to be other-than-temporarily impaired as of March 31, 2013 and December 31, 2012. OTTI is reassessed quarterly. No assurance can be made that additional OTTI will not occur in future periods.

Information pertaining to securities with gross unrealized losses at March 31, 2013 and December 31, 2012, aggregated by investment category and length of time that individual securities have been in a continuous loss position follows:

	Less Than Twelve Months		March 31, 2013 More Than Twelve Months		Total

	\$ 416	\$ 40,982	\$ 8,913	\$ 41,782	\$ 9,329	\$ 82,764

The total number of securities in an unrealized loss position at March 31, 2013 was 68 compared to 66 at December 31, 2012. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and industry analysis reports. Since material downgrades have not occurred and management does not intend to sell the debt securities for the foreseeable future, none of the securities described in the above table or in this paragraph were deemed to be other than temporarily impaired.

At March 31, 2013, the net unrealized loss on trust preferred securities classified as AFS was \$6.8 million, compared with \$7.9 million at December 31, 2012. The Company actively monitors its debt and other structured securities portfolios classified as AFS for declines in fair value. At March 31, 2013, the gross unrealized loss on the corporate bond portfolio classified as HTM was \$4.7 million compared to \$6.7 million at December 31, 2012. During last year, the Federal Reserve announced its intention to keep interest rates at historically low levels into 2015. The yields of most of the bonds in the portfolio are tied to LIBOR, thus negatively affecting their anticipated returns. Additionally, Moody's had downgraded certain bonds held in the portfolio during last year. However, all of the bonds remain investment grade.

The amortized cost and fair value of securities as of March 31, 2013 and December 31, 2012, by contractual maturities, are shown below. The actual maturities of the mortgage-backed securities may differ from their contractual maturities because the loans underlying the securities may be repaid without any penalties due to borrowers that have the right to call or prepay obligations with or without call or prepayment penalties. Therefore, these securities are listed separately in the maturity summary.

	March 31, 2013		December 31, 2012

The table below reflects recorded investment in loans classified as impaired:

	March 31, 2013	December 31, 2012
	(in thousands)	
Impaired loans with a specific valuation allowance under ASC 310	\$ 42,284	\$ 51,538
Impaired loans without a specific valuation allowance under ASC 310	154,857	146,617
Total impaired loans	\$ 197,141	\$ 198,155
 Valuation allowance related to impaired loans	 \$ (11,004)	 \$ (12,866)

The following table presents the impaired loans by class:

	March 31, 2013	December 31, 2012
	(in thousands)	
Commercial real estate		
Owner occupied	\$ 60,147	\$ 58,074
Non-owner occupied	58,109	52,146
Multi-family	187	318
Commercial and industrial		
Commercial	16,049	15,531
Leases	1,133	979
Construction and land development		
Construction		
Land	27,532	32,492
Residential real estate	33,373	37,851
Consumer	611	764
Total	\$ 197,141	\$ 198,155

A valuation allowance is established for an impaired loan when the fair value of the loan is less than the recorded investment. In certain cases, portions of impaired loans are charged-off to realizable value instead of establishing a valuation allowance and are included, when applicable in the table above as Impaired loans without specific valuation allowance under ASC 310. The valuation allowance disclosed above is included in the allowance for credit losses reported in the consolidated balance sheets as of March 31, 2013 and December 31, 2012.

The following table presents average investment in impaired loans by loan class:

Impaired loans with no allowance recorded								
Total loans individually evaluated for impairment	2,815	1,602	2,314	5,448	284	238	165	12,866
Loans collectively evaluated for impairment	15,118	15,447	27,546	9,789	10,270	2,762	1,629	82,561
Loans acquired with deteriorated credit quality								
Total loans held for investment	\$ 17,933	\$ 17,049	\$ 29,860	\$ 15,237	\$ 10,554	\$ 3,000	\$ 1,794	\$ 95,427

As of March 31, 2013, there was \$0.7 million of allowance for credit losses on loans acquired with credit deterioration. At December 31, 2012, there was no allowance for credit losses on loans acquired with credit deterioration.

Changes in the accretable discount for loans purchased with credit quality deterioration follows:

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

	Three Months Ended March 31, 2013 (in thousands)
Balance at the beginning of the period	\$ 7,072
Additions	
Accretion to interest income	(2,079)
Transfers from non-accretable discount to accretable	
Balance at the end of the period	\$ 4,993

In the first quarter of 2012, the Company modified its allowance for credit losses calculation to exclude cash secured loans. Additionally, for internally participated loans, historical loss factors have been revised as follows. Previously the loss factors utilized were based on those of the bank which held the participation. Under the revised methodology, loss characteristics of the originating bank are utilized by the participating bank for the first four quarters after origination, during which time the loan becomes seasoned. The net effect of these changes compared to the calculation method used at December 31, 2011 was to decrease the provision and allowance for credit losses by approximately \$2.6 million. The net effect by portfolio segment was to decrease provision for credit losses for the commercial real estate, commercial and industrial, consumer and residential real estate portfolios by \$1.5 million, \$0.8 million, \$0.2 million and \$41,000, respectively.

Troubled Debt Restructurings (TDR)

A troubled debt restructured loan is a loan on which the bank, for reasons related to a borrower's financial difficulties, grants a concession to the borrower that the bank would not otherwise consider. The loan terms that have been modified or restructured due to a borrower's financial situation include, but are not limited to, a reduction in the stated interest rate, an extension of the maturity or renewal of the loan at an interest rate below current market, a reduction in the face amount of the debt, a reduction in the accrued interest, extensions, deferrals, renewals and rewrites. The majority of the bank's modifications are extensions in terms or deferral of payments which result in no lost principal or interest followed by reductions in interest rates or accrued interest. A troubled debt restructured loan is also considered impaired. Generally, a loan that is modified at an effective market rate of interest may no longer be disclosed as a troubled debt restructuring in years subsequent to the restructuring if it is not impaired based on the terms specified by the restructuring agreement.

Table of Contents

The following table presents information on the financial effects of troubled debt restructured loans by class for the periods presented:

			March 31, 2013			
	Number	Pre-Modification	Forgiven	Lost	Post-Modification	Waived Fees
	of Loans	Outstanding	Principal	Interest	Outstanding	and Other
		Recorded Investment	Balance	Income (1)	Recorded Investment	Expenses
				(dollars in thousands)

Land	2	330	2	976
Residential real estate	2	655	1	280
Consumer			1	375
Total	10	\$ 4,433	12	\$ 14,424

A TDR loan is deemed to have a payment default when it becomes past due 90 days, goes on nonaccrual, or is re-structured again.

At March 31, 2013 and December 31, 2012, loan commitments outstanding on TDR loans were \$1.6 million and \$0.2 million, respectively.

Loan Purchases and Sales

In the first quarter of 2013, the Company had secondary market loan purchases of \$43.0 million consisting of commercial and industrial loans. In addition, the Company periodically acquires newly originated loans at closing through participations or loan syndications. The Company had no significant loan sales in the first three months of 2013 or 2012. The Company held \$27.9 million and \$31.1 million of credit card loans for sale at March 31, 2013 and December 31, 2012, respectively. In the first quarter of 2012, the Company had secondary market loan purchases of \$73.3 million consisting of \$57.9 million of commercial leases and \$15.4 million of commercial and industrial loans.

7. OTHER ASSETS ACQUIRED THROUGH FORECLOSURE

The following table presents the changes in other assets acquired through foreclosure:

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Balance, beginning of period	\$ 77,247	\$ 89,104
Additions	6,930	5,340
Dispositions	(5,240)	(10,745)
Valuation adjustments in the period, net	(1,017)	(2,254)
Balance, end of period	\$ 77,921	\$ 81,445

At March 31, 2013 and 2012, the majority of the Company's repossessed assets were properties located in Nevada.

8. INCOME TAXES

Deferred tax assets and liabilities are included in the financial statements at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or settled. As changes in tax laws or rates are enacted, deferred tax assets and

liabilities are adjusted through the provision for income taxes.

Table of Contents

For the three months ended March 31, 2013, \$11 million of the net deferred tax assets relate to federal Net Operating Losses (NOLs) or other built-in deductions or losses acquired from Western Liberty and which thus are subject to limitation by the application of section 382 of the Internal Revenue Code. In management's opinion, it is more likely that none of the \$11 million in benefits will be limited by section 382 of the Code and will be realized. The reduction in the effective tax rate from the first quarter of 2012 compared to the first quarter of 2013 is primarily due to low income housing tax credits, an increase in tax exempt income from revenue from municipal obligations, as well as a reduction in the deferred tax valuation allowance for capital loss carryovers arising from transactions that generated capital gains.

At March 31, 2013, the company has a deferred tax valuation allowance of \$5.5 million (compared to \$8.0 million at December 31, 2012) relating to net capital losses on ARPS securities sales.

The deferred tax asset related to state net operating loss carryovers outstanding at March 31, 2013 is comprised of \$0.9 million of tax benefits from California state net operating loss carry forwards that will begin to expire in 2029, and \$1.9 million of tax benefits from Arizona state net operating loss carryovers that will begin to expire in 2013. In Management's opinion, it is more likely than not that the results of future operations will generate sufficient taxable income to realize the deferred taxes related to these net operating loss carryovers.

Uncertain Tax Position

The Company files income tax returns in the U.S. federal jurisdiction and in various states. With few exceptions, the Company is no longer subject to U.S. federal, state or local tax examinations by tax authorities for years before 2008.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period in which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above would be reflected as a liability for unrecognized tax benefits in the accompanying consolidated balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

The Company would recognize interest accrued related to unrecognized tax benefits in tax expense. The Company has not recognized or accrued any interest or penalties for the periods ended March 31, 2013 and 2012, respectively.

Management believes that the Company has appropriate support for the income tax positions taken and to be taken on its tax returns and that its accruals for tax liabilities are adequate for all open years based on an assessment of many factors, including past experience and interpretation of tax law applied to the facts of each matter.

9. COMMITMENTS AND CONTINGENCIES

Unfunded Commitments and Letters of Credit

The Company is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. They involve, to varying degrees, elements of credit risk in excess of amounts recognized in the consolidated balance sheets.

Lines of credit are obligations to lend money to a borrower. Credit risk arises when the borrowers' current financial condition may indicate less ability to pay than when the commitment was originally made. In the case of standby letters of credit, the risk arises from the possibility of the failure of the customer to perform according to the terms of a contract. In such a situation, the third party might draw on the standby letter of credit to pay for completion of the contract and the Company would look to its customer to repay these funds with interest. To minimize the risk, the Company uses the same credit policies in making commitments and conditional obligations as it would for a loan to that customer.

Standby letters of credit and financial guarantees are commitments issued by the Company to guarantee the performance of a customer to a third party in borrowing arrangements. The Company generally has recourse to recover from the customer any amounts paid under the guarantees. Typically, letters of credit issued have expiration dates within one year.

Table of Contents

A summary of the contractual amounts for unfunded commitments and letters of credit are as follows:

	March 31, 2013	December 31, 2012
	(in thousands)	
Commitments to extend credit, including unsecured loan commitments of \$165,061 at March 31, 2013 and \$172,002 at December 31, 2012	\$ 1,253,000	\$ 1,096,264
Credit card commitments and financial guarantees	293,861	295,506
Standby letters of credit, including unsecured letters of credit of \$3,915 at March 31, 2013 and \$3,915 at December 31, 2012	31,968	32,757
Total	\$ 1,578,829	\$ 1,424,527

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Company enters into credit arrangements that generally provide for the termination of advances in the event of a covenant violation or other event of default. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the party. The commitments are collateralized by the same types of assets used as loan collateral. The unfunded commitments on the credit cards loans held for sale at March 31, 2013 and December 31, 2012 was \$260.6 million and \$262.6 million, respectively.

The Company has exposure to credit losses from unfunded commitments and letters of credit. As funds have not been disbursed on these commitments, they are not reported as loans outstanding. Credit losses related to these commitments are not included in the allowance for credit losses reported in Note 6, Loans, Leases and Allowance for Credit Losses of these Consolidated Financial Statements and are accounted for as a separate loss contingency as a liability. This loss contingency for unfunded loan commitments and letters of credit was \$1.2 million and \$1.3 million as of March 31, 2013 and December 31, 2012, respectively. Changes to this liability are adjusted through other non-interest expense.

Concentrations of Lending Activities

The Company's lending activities are primarily driven by the customers served in the market areas where the Company has branch offices in the States of Nevada, California and Arizona. The Company monitors concentrations within five broad categories: geography, industry, product, call code, and collateral. The Company grants commercial, construction, real estate and consumer loans to customers through branch offices located in the Company's primary markets. The Company's business is concentrated in these areas and the loan portfolio includes significant credit exposure to the commercial real estate market of these areas. As of March 31, 2013 and December 31, 2012, commercial real estate related loans accounted for approximately 57% and 58% of total loans, respectively, and approximately 3% of commercial real estate related loans are secured by undeveloped land. Substantially all of these loans are secured by first liens with an initial loan to value ratio of generally not more than 75%. Approximately 48% of these commercial real estate loans, excluding construction and land loans, were owner occupied at March 31, 2013 and December 31, 2012, respectively. In addition, approximately 4% of total loans were unsecured as of March 31, 2013 and December 31, 2012, respectively.

Contingencies

The Company is involved in various lawsuits of a routine nature that are being handled and defended in the ordinary course of the Company's business. Expenses are being incurred in connection with defending the Company, but in the opinion of Management, based in part on consultation with legal counsel, the resolution of these lawsuits and associated defense costs will not have a material impact on the Company's financial position, results of operations, or cash flows.

Lease Commitments

The Company leases the majority of its office locations and many of these leases contain multiple renewal options and provisions for increased rents. Total rent expense of \$1.9 million and \$1.5 million was included in occupancy expenses for the three month periods ended March 31, 2013 and 2012, respectively.

10. FAIR VALUE ACCOUNTING

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction occurring in the principal market (or most advantageous market in the absence of a principal market) for such asset or liability. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Such valuation techniques are consistently applied. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability. ASC 825 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under ASC 825 are described below:

Table of Contents

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, prepayment speeds, volatilities, etc.) or model-based valuation techniques where all significant assumptions are observable, either directly or indirectly, in the market;

Level 3 Valuation is generated from model-based techniques where all significant assumptions are not observable, either directly or indirectly, in the market. These unobservable assumptions reflect an entity's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques may include use of matrix pricing, discounted cash flow models and similar techniques.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein. A more detailed description of the valuation methodologies used for assets and liabilities measured at fair value is set forth below. Transfers between levels in the fair value hierarchy are recognized at the end of the reporting period.

Under ASC Topic 825, the Company elected the fair value option (FVO) treatment for the junior subordinated debt and certain investment securities. This election is generally irrevocable and unrealized gains and losses on these items must be reported in earnings at each reporting date. The Company continues to account for these items under the fair value option. Since adoption, there were no financial instruments purchased by the Company which met the ASC 825 fair value election criteria, and therefore, no additional instruments have been added under the fair value option election.

All securities for which the fair value measurement option had been elected are included in a separate line item on the balance sheet entitled securities measured at fair value.

For the three months ended March 31, 2013 and 2012, gains and losses from fair value changes included in the Consolidated Statement of Operations were as follows:

Table of Contents

Description	Changes in Fair Values for Items Measured at Fair Value Pursuant to Election of the Fair Value Option			
	Unrealized Gain/(Loss) on Assets and Liabilities Measured at Fair Value, Net	Interest Income on Securities	Interest Expense on Junior Subordinated Debt	Total Changes Included in Current-Period Earnings
(in thousands)				
Three Months Ended March 31, 2013				
Securities measured at fair value	\$ (2)	\$ 2	\$	\$
Junior subordinated debt	(469)		348	(817)
	\$ (471)	\$ 2	\$ 348	\$ (817)
Three Months Ended March 31, 2012				
Securities measured at fair value	\$ (43)	\$ 4	\$	\$ (39)
Junior subordinated debt	(290)		325	(615)
	\$ (333)	\$ 4	\$ 325	\$ (654)

The following table presents gains and losses from fair value changes on securities measured at fair value:

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Net gains and (losses) for the period on trading securities included in earnings	\$ (2)	\$ (43)
Less: net gains and (losses) recognized during the period on trading securities sold during the period		
Change in unrealized gains or (losses) for the period included in earnings for trading securities held at the end of the reporting period	\$ (2)	\$ (43)

The difference between the aggregate fair value of junior subordinated debt (\$36.7 million) and the aggregate unpaid principal balance thereof (\$66.5 million) was \$29.8 million at March 31, 2013.

Interest income on securities measured at fair value is accounted for similarly to those classified as available-for-sale and held-to-maturity. Any premiums or discounts are recognized in interest income over the term of the securities. For mortgage-backed securities, estimates of prepayments are considered in the constant yield calculations. Interest expense on junior subordinated debt is also determined under a constant yield calculation.

Fair value on a recurring basis

Financial assets and financial liabilities measured at fair value on a recurring basis include the following:

AFS Securities: Adjustable-rate preferred securities, one trust preferred security, corporate debt securities and CRA mutual fund investments are reported at fair value utilizing Level 1 inputs. Other securities classified as AFS are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Securities measured at fair value: All of the Company's securities measured at fair value, the majority of which are mortgage-backed securities, are reported at fair value utilizing Level 2 inputs in the same manner as described above for securities available for sale.

Table of Contents

Independent pricing service: Management independently evaluates all of the fair value measurements received from our third party pricing service through multiple review steps. First, management reviews what has transpired in the market- place with respect to interest rates, credit spreads, volatility, mortgage rates, etc., and makes an expectation on changes to the securities valuations from the previous quarter. Then management compares expected changes to the actual valuation changes provided to it by its pricing service. Next, management compares a robust sampling of safekeeping marks on securities with the marks provided by our third party pricing service and determines whether there are any notable differences. Then, management compares the prices on Level 1 priced securities to publicly available prices to verify those prices are similar. Finally, management discusses the assumptions used for Level 2 priced securities with our pricing service. The pricing service provides management with observable market data including interest rate curves and mortgage prepayment speed grids, as well as dealer quote sheets, new bond offering sheets, and historical trade documentation. Management reviews the assumptions and decides whether they are reasonable. Management may compare interest rates, credit spreads and prepayments speeds used as part of the assumptions to those that management believes are reasonable. Management may price securities using the provided assumptions to determine whether they can develop similar prices on like securities. Any discrepancies with management's review and the prices provided by the vendor are discussed with the vendor and the Company's other valuation advisors. Management has formally challenged the prices on several securities, but has found that the vendor prices are reasonable.

Annually the Company receives a SSAE 16 report from its independent pricing service attesting to the controls placed on the operations of the service from its auditor.

Interest rate swap: Interest rate swaps are reported at fair value utilizing Level 2 inputs. The Company obtains dealer quotations to value its interest rate swaps.

Junior subordinated debt: The Company estimates the fair value of its junior subordinated debt using a discounted cash flow model which incorporates the effect of the Company's own credit risk in the fair value of the liabilities (Level 3). The Company's cash flow assumptions were based on the contractual cash flows as the Company anticipates that it will pay the debt according to its contractual terms. The Company evaluated priced offerings on individual issuances of trust preferred securities and estimated the discount rate based, in part, on that information. The Company estimated the discount rate at 6.430%, which is a 615 basis point spread over 3 month LIBOR (0.283% as of March 31, 2013). As of March 31, 2012, the Company estimated the discount rate at 6.79%, which was a 632 basis point spread over 3 month LIBOR (0.47%). As of December 31, 2012, the Company estimated the discount rate at 6.846%, which was a 654 basis point spread over 3 month LIBOR (0.306%).

Securities sold short: Securities sold short, comprised of entirely U.S. Treasury bonds, are reported at fair value utilizing Level 1 inputs.

The fair value of these assets and liabilities were determined using the following inputs at the periods presented:

Table of Contents

Table of Contents

As of March 31, 2013, two trust preferred securities with a net fair value of \$25.2 million transferred from Level 1 to Level 2 due to the unavailability of active trade information. Per the Company's policy, the transfer is deemed to have occurred at the end of the reporting period.

For the three months ended March 31, 2013, the change in Level 3 liabilities measured at fair value on a recurring basis was as follows:

Fair Value Measurements Using Significant Unobservable Inputs (Level 3)	
	Junior Subordinated Debt (in thousands)
Opening balance	\$ (36,218)
Transfers into Level 3	
Transfers out of Level 3

Closing balance	\$ (36,687)
Change in unrealized gains (losses) for the three month period included in earnings (or changes in net assets) for the period ended March 31, 2013.	\$ (469)
Change in unrealized gains (losses) for the three month period included in earnings (or changes in net assets) for the period ended March 31, 2012.	\$ (290)

(a) Total gains (losses) for the period are included in the non-interest income line, mark to market gains (losses), net. For Level 3 liabilities measured at fair value on a recurring basis, the significant unobservable inputs used in the fair value measurements as of the periods presented, were as follows:

	Fair Value at March 31, 2013	Valuation Technique	Significant Unobservable Inputs (dollars in thousands)	Input Value
Junior subordinated debt	\$ 36,687	Discounted cash flow	Median market spreads on publicly issued trust preferreds with comparable credit risk	6.430%

	Fair Value at December 31, 2012	Valuation Technique	Significant Unobservable Inputs (dollars in thousands)	Input Value
Junior subordinated debt	\$ 36,218	Discounted cash flow	Median market spreads on publicly issued trust preferreds with comparable credit risk	6.846%

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

The significant unobservable inputs used in the fair value measurement of the Company's junior subordinated debt are the calculated or estimated credit spreads on comparable publicly traded company trust preferred issuances which were non-investment grade and non-rated. Significant increases (decreases) in these inputs could result in a significantly higher (lower) fair value measurement.

Fair value on a nonrecurring basis

Certain assets are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an ongoing basis, but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents such assets carried on the balance sheet by caption and by level within the ASC 825 hierarchy:

Table of Contents

	Fair Value Measurements at the End of the Reporting Period Using			
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Active Markets for Similar Assets (Level 2)	Unobservable Inputs (Level 3)
	Total	(in thousands)		
As of March 31, 2013:				
Impaired loans with specific valuation allowance	\$ 31,280	\$	\$	\$ 31,280
Impaired loans without specific valuation allowance	122,540			122,540
Other assets acquired through foreclosure	77,921			77,921
As of December 31, 2012:				
Impaired loans with specific valuation allowance	\$ 38,672	\$	\$	\$ 38,672
Impaired loans without specific valuation allowance	90,632			90,632
Other assets acquired through foreclosure	77,247			77,247

Impaired loans: The specific reserves for collateral dependent impaired loans are based on the fair value of the collateral. The fair value of collateral is determined based on third-party appraisals. Appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Fair value is determined, where possible, using market prices derived from an appraisal or evaluation, which are considered to be Level 2. However, certain assumptions and unobservable inputs are often used by the appraiser; therefore, qualifying the assets as Level 3 in the fair value hierarchy. In some cases, adjustments are made to the appraised values due to various factors, including age of the appraisal (which are generally obtained every six to twelve months), age of comparables included in the appraisal, and known changes in the market and in the collateral. When significant adjustments are based on unobservable inputs, such as when a current appraised value is not available or management determines the fair value of the collateral is further impaired below appraised value and there is no observable market price, the resulting fair value measurement has been categorized as a Level 3 measurement. These Level 3 impaired loans had an aggregate carrying amount of \$42.3 million and specific reserves in the allowance for loan losses of \$11.0 million at March 31, 2013.

Other assets acquired through foreclosure: Other assets acquired through foreclosure consist of properties acquired as a result of, or in-lieu-of, foreclosure. Properties or other assets classified as other assets acquired through foreclosure and other repossessed property and are initially reported at the fair value determined by independent appraisals using appraised value, less cost to sell. Such properties are generally re-appraised every six to twelve months. There is risk for subsequent volatility. Costs relating to the development or improvement of the assets are capitalized and costs relating to holding the assets are charged to expense. The Company had \$77.9 million of such assets at March 31, 2013. Fair value is determined, where possible, using market prices derived from an appraisal or evaluation, which are considered to be Level 2. However, certain assumptions and unobservable inputs are often used by the appraiser; therefore, qualifying the assets as Level 3 in the fair value hierarchy. When significant adjustments are based on unobservable inputs, such as when a current appraised value is not available or management determines the fair value of the collateral is further impaired below appraised value and there is no observable market price, the resulting fair value measurement has been categorized as a Level 3 measurement.

Credit vs. non-credit losses

The Company elected to apply provisions of ASC 320 as of January 1, 2009 to its AFS and HTM investment securities portfolios. The OTTI was separated into (a) the amount of total impairment related to the credit loss, and (b) the amount of the total impairment related to all other factors. The amount of the total OTTI related to the credit loss was recognized in earnings. The amount of the total impairment related to all other factors was recognized in other comprehensive income. The OTTI was presented in the statement of operations with an offset for the amount of the total OTTI that was recognized in other comprehensive income.

If the Company does not intend to sell and it is not more likely than not that the Company will be required to sell the impaired securities before recovery of the amortized cost basis, the Company recognizes the cumulative effect of initially applying this FASB Staff Position (FSP) as an adjustment to the opening balance of retained earnings with a corresponding adjustment to accumulated other comprehensive income, including related tax effects. The Company elected to early adopt ASC 320 on its impaired securities portfolio since it provides more transparency in the consolidated financial statements related to the bifurcation of the credit and non-credit losses.

For the three months ended March 31, 2013 and 2012, the Company determined that no securities contained credit losses.

Table of Contents**Debt Security Credit Losses****Recognized in Other Comprehensive Income/Earnings****For the Three Months Ended March 31, 2013 and 2012**

	Private Label Mortgage- Backed Securities (in thousands)
Beginning balance of impairment losses held in other comprehensive income	\$ (1,811)
Current period other-than temporary impairment credit losses recognized through earnings	
Reductions for securities sold during the period	
Additions or reductions in credit losses due to change of intent to sell	
Reductions for increases in cash flows to be collected on impaired securities	
Ending balance of net unrealized gains and (losses) held in other comprehensive income	\$ (1,811)

FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair value of the Company's financial instruments is as follows:

	Carrying Amount	Level 1	March 31, 2013 Fair Value (in thousands)		Total
			Level 2	Level 3

Interest rate risk

The Company assumes interest rate risk (the risk to the Company's earnings and capital from changes in interest rate levels) as a result of its normal operations. As a result, the fair values of the Company's financial instruments as well as its future net interest income will change when interest rate levels change and that change may be either favorable or unfavorable to the Company.

Table of Contents

Interest rate risk exposure is measured using interest rate sensitivity analysis to determine our change in net portfolio value and net interest income resulting from hypothetical changes in interest rates. If potential changes to net portfolio value and net interest income resulting from hypothetical interest rate changes are not within the limits established by the Board of Directors, the Board of Directors may direct management to adjust the asset and liability mix to bring interest rate risk within board-approved limits. As of March 31, 2013, the Company's interest rate risk profile was within Board-approved limits.

Each of the Company's subsidiary banks has an Asset and Liability Management Committee charged with managing interest rate risk within Board approved limits. Such limits may vary by bank based on local strategy and other considerations, but in all cases, are structured to prohibit an interest rate risk profile that is significantly asset or liability sensitive. There also exists an Asset and Liability Management Committee at the holding company level that reviews the interest rate risk of each subsidiary bank, as well as an aggregated position for the entire Company.

Fair value of commitments

The estimated fair value of standby letters of credit outstanding at March 31, 2013 and December 31, 2012 was insignificant. Loan commitments on which the committed interest rates were less than the current market rate are also insignificant at March 31, 2013 and December 31, 2012.

11. SEGMENTS

The Company provides a full range of banking and investment advisory services through its consolidated subsidiaries. Applicable guidance provides that the identification of reportable segments be on the basis of discreet business units and their financial information to the extent such units are reviewed by the entity's chief decision maker.

At March 31, 2013, the Company consists of the following segments: Bank of Nevada, Western Alliance Bank, Torrey Pines Bank and Other (Western Alliance Bancorporation holding company, Western Alliance Equipment Finance, Las Vegas Sunset Properties, Shine Investment Advisory Services, Inc.[until October 31, 2012], and the discontinued operations.)

The accounting policies of the reported segments are the same as those of the Company as described in Note 1, *Summary of Significant Accounting Policies*. Transactions between segments consist primarily of borrowed funds and loan participations. Federal funds purchased and sold and other borrowed funding transactions that resulted in inter-segment profits were eliminated for reporting consolidated results of operations. Loan participations were recorded at par value with no resulting gain or loss. The Company allocated centrally provided services to the operating segments based upon estimated usage of those services.

Table of Contents

The following is a summary of selected operating segment information as of and for the three month periods ended March 31, 2013 and 2012:

12. STOCKHOLDERS' EQUITYStock-based Compensation

For the three months ended March 31, 2013, 507,825 shares of restricted stock were granted to Company employees. The Company estimates the compensation cost for restricted stock grants based upon the grant date fair value. Generally, these restricted stock grants have a three year vesting period. The aggregate grant date fair value for the restricted stock issued in the three month period ended March 31, 2013 was \$6.2

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

million. In addition, the Company granted 52,902 shares during the three months ended March 31, 2013 to non-employee WAL and subsidiary board of directors that immediately vested.

There were approximately 1,496,542 and 1,608,658 restricted shares outstanding at March 31, 2013 and 2012, respectively. For the three months ended March 31, 2013, the Company recognized stock-based compensation related to restricted stock grants of \$1.0 million compared to \$0.9 million for the three months ended March 31, 2012.

As of March 31, 2013 and 2012, there were 1.4 million and 2.0 million, respectively of stock options outstanding.

Table of Contents**13. OTHER BORROWINGS AND OTHER LIABILITIES**

The following table summarizes the Company's borrowings as of March 31, 2013 and December 31, 2012:

	March 31, 2013	December 31, 2012
	(in thousands)	
Short Term:		
Revolving line of credit	\$ 20,000	\$
Federal Home Loan Bank advances		120,000
Total short term debt	\$ 20,000	\$ 120,000
Long Term:		
Federal Home Loan Bank advance	\$ 200,000	\$
Other long term debt	75,000	75,000
	\$ 275,000	\$ 75,000

The Company maintains lines of credit with the Federal Home Loan Bank (FHLB) and Federal Reserve Bank (FRB). The Company's borrowing capacity is determined based on collateral pledged, generally consisting of investment securities and loans, at the time of the borrowing. The Company also maintains credit lines with other sources secured by pledged securities. The Company had no outstanding short-term FHLB or FRB advances at March 31, 2013.

At March 31, 2013, the Company had a revolving line of credit with another institution, with outstanding advances of \$20.0 million. The interest rate is 30 day LIBOR plus 150 basis points, currently set at 1.7037%.

In 2010, the Company completed a public offering of \$75 million in principal Senior Notes due in 2015 bearing interest of 10%. In the first quarter of 2013, the Company executed a long-term FHLB advance for \$200.0 million, bearing interest of 1.04%, due January 2, 2018. The weighted average cost on all long term debt was 3.65% and 10.81% for the three months ended March 31, 2013 and 2012, respectively.

As of March 31, 2013 and December 31, 2012, the Company had additional available credit with the FHLB of approximately \$993.3 million and \$952.8 million, respectively, and with the FRB of approximately \$609.3 million and \$600.6 million, respectively.

During the first quarter of 2013 the Company entered into a Treasury short transaction to mitigate the Company's modest liability sensitive interest rate risk profile. The Company sold short fixed rate Treasury securities and invested the proceeds in a short term repurchase agreement. This action reduced the Company's interest margin approximately five basis points during the quarter, primarily from the increase in earning assets at a very low yield. The balance was \$132.6 million at March 31, 2013.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion is designed to provide insight into Management's assessment of significant trends related to the Company's consolidated financial condition, results of operations, liquidity, capital resources and interest rate sensitivity. This Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2012 and unaudited interim consolidated financial statements and notes hereto and financial information appearing elsewhere in this report. Unless the context requires otherwise, the terms "Company," "we," and "our" refer to Western Alliance Bancorporation and its wholly-owned subsidiaries on a consolidated basis.

Forward-Looking Information

This report contains certain forward-looking statements, within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. In addition, the words "anticipates," "expects," "believes," "estimates" and "intends" or the negative of these terms or other comparable terminology constitute forward-looking statements. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. Except as required by law, the Company disclaims any obligation to update any such forward-looking statements or to publicly announce the results of any revisions to any of the forward-looking statements contained herein to reflect future events or developments.

Forward-looking statements contained in this Quarterly Report on Form 10-Q involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond the control of the Company and may cause our actual results to differ significantly from historical results and those expressed in any forward-looking statement. Risks and uncertainties include those set forth in our filings with the Securities and Exchange Commission and the following factors that could cause actual results to differ materially from those presented:

conditions in the financial markets and the economy may adversely impact financial performance;

dependency on real estate and events that negatively impact real estate;

high concentration of commercial real estate, construction and development and commercial and industrial loans;

actual credit losses may exceed expected losses in the loan portfolio;

the geographic concentrations of our assets increase risks related to economic conditions;

the effects of interest rates and interest rate policy;

exposure of financial instruments to certain market risks may cause volatility in earnings;

dependence on low-cost deposits;

ability to borrow from Federal Home Loan Bank ("FHLB") or Federal Reserve Bank ("FRB");

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

events that further impair goodwill;

increase in the cost of funding as the result of changes to our credit rating;

expansion strategies may not be successful,

our ability to control costs,

risk associated with changes in internal controls and processes;

our ability to compete in a highly competitive market;

our ability to recruit and retain qualified employees, especially seasoned relationship bankers;

the effects of terrorist attacks or threats of war;

perpetration of internal fraud;

risk of operating in a highly regulated industry and our ability to remain in compliance;

possible need to revalue our deferred tax assets if stock transactions result in limitations on deductibility of net operating losses or loan losses;

exposure to environmental liabilities related to the properties we acquire title;

legislative and regulatory changes including Emergency Economic Stabilization Act of 2008, or EESA, the American Recovery and Reinvestment Act of 2009, or ARRA, and the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 and the rules and regulations that might be promulgated thereunder;

cyber security risks; and

risks related to ownership and price of our common stock.

For additional information regarding risks that may cause our actual results to differ materially from any forward-looking statements, see Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2012 and in item 1A of Part II of this Quarterly Report.

Table of Contents

Financial Overview and Highlights

Western Alliance Bancorporation is a multi-bank holding company headquartered in Phoenix, Arizona that provides full service banking and lending through its subsidiaries.

Financial Result Highlights for the First Quarter of 2013

Net income for the Company of \$21.0 million, or \$0.24 per diluted share, for the first quarter of 2013 compared to net income of \$11.3 million, or \$0.12 per diluted share, for the first quarter of 2012.

The significant factors impacting earnings of the Company during the first quarter of 2013 were:

Net income available to common shareholders of \$20.6 million for the first quarter of 2013 compared to \$9.5 million for the first quarter 2012.

Net interest income increased by 8.7% to \$76.2 million for the first quarter of 2013 compared to \$70.1 million for the first quarter of 2012.

Net interest margin for the first quarter of 2013 was 4.36% compared to 4.53% for the first quarter of 2012.

Provision for credit losses decreased to \$5.4 million for the first quarter of 2013 compared to \$13.1 million for the first quarter of 2012.

The Company experienced net loan growth in the first quarter of 2013 of \$146 million to \$5.86 billion. This increase was driven by growth in commercial and industrial loans and commercial real estate loans. Total loans increased \$929 million over the last twelve months from \$4.93 billion at March 31, 2012.

Total deposits increased during the quarter by \$280 million to \$6.73 billion at March 31, 2013, with growth primarily in money market accounts and interest-bearing demand deposits partially offset by declines in non-interest bearing demand and certificates of deposits. Deposits increased \$836 million over the last twelve months from \$5.90 billion at March 31, 2012.

Net charge-offs (annualized) to average loans outstanding declined to 0.38% in the first quarter of 2013 from 1.18% in the first quarter of 2012.

Nonperforming assets (nonaccrual loans and assets acquired through foreclosure) decreased to 2.1% of total assets for 2.7% in the first quarter 2012.

Other assets acquired through foreclosure declined to \$77.9 million at March 31, 2013 from \$81.4 million at March 31, 2012. The impact to the Company from these items, and others of both a positive and negative nature, will be discussed in more detail as they pertain to the Company's overall comparative performance for the three months ended March 31, 2013 throughout the analysis sections of this report.

A summary of our results of operations and financial condition and select metrics is included in the following table:

	Three Months Ended	
	March 31,	
	2013	2012
	(in thousands, except per share amounts)	
Net income available to common stockholders	\$ 20,611	\$ 9,537
Basic earnings per share	0.24	0.12
Diluted earnings per share	0.24	0.12
Total assets	\$ 8,174,104	\$ 6,925,292
Gross loans	\$ 5,855,356	\$ 4,926,223
Total deposits	\$ 6,734,914	\$ 5,899,054
Net interest margin	4.36%	4.53%
Return on average assets	1.08%	0.67%
Return on average stockholders' equity	10.92%	6.97%

Table of Contents

As a bank holding company, management focuses on key ratios in evaluating the Company's financial condition and results of operations. In the current economic environment, key ratios regarding asset credit quality and efficiency are more informative as to the financial condition of the Company than those utilized in a more normal economic environment such as return on equity and return on assets.

Asset Quality

For all banks and bank holding companies, asset quality plays a significant role in the overall financial condition of the institution and results of operations. The Company measures asset quality in terms of nonaccrual loans as a percentage of gross loans, and net charge-offs as a percentage of average loans. Net charge-offs are calculated as the difference between charged-off loans and recovery payments received on previously charged-off loans. The following table summarizes asset quality metrics:

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Non-accrual loans	\$ 93,748	\$ 103,486
Non-performing assets	267,840	289,951
Non-accrual loans to gross loans	1.60%	2.10%
Net charge-offs (annualized) to average loans	0.38%	1.18%

Asset and Deposit Growth

The ability to originate new loans and attract new deposits is fundamental to the Company's asset growth. The Company's assets and liabilities are comprised primarily of loans and deposits. Total assets increased to \$8.17 billion at March 31, 2013 from \$7.62 billion at December 31, 2012. Total gross loans including net deferred fees and unearned income, increased by \$146 million, or 2.6%, to \$5.86 billion as of March 31, 2013 compared to December 31, 2012. Total deposits increased \$280 million, or 4.2%, to \$6.73 billion as of March 31, 2013 from \$6.46 billion as of December 31, 2012.

RESULTS OF OPERATIONS

The following table sets forth a summary financial overview for the comparable three months ended March 31, 2013 and 2012:

	Three Months Ended March 31,		Increase (Decrease)
	2013	2012	
(in thousands, except per share amounts)			
Consolidated Income Statement Data:			
Interest income	\$ 83,108	\$ 77,437	\$ 5,671
Interest expense	6,905	7,380	(475)
Net interest income	76,203	70,057	6,146
Provision for credit losses	5,439	13,081	(7,642)
Net interest income after provision for credit losses	70,764	56,976	13,788
Other non-interest income	3,899	5,884	(1,985)

Income (loss) from discontinued operations, net of tax benefit	38	(222)	260

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Net income	\$ 20,964	\$ 11,300	\$ 9,664
Net income available to common stockholders	\$ 20,611	\$ 9,537	\$ 11,074
Income per share basic	\$ 0.24	\$ 0.12	\$ 0.12
Income per share diluted	\$ 0.24	\$ 0.12	\$ 0.12

Net Interest Margin

The net interest margin is reported on a tax equivalent basis (TEB). A tax equivalent adjustment is added to reflect interest earned on certain municipal securities and loans that are exempt from Federal income tax. The following tables set forth the average balances and interest income on a tax equivalent basis and tax expense for the periods indicated:

Net interest spread (5)			4.21%			4.34%

- (1) Yields on loans and securities have been adjusted to a tax-equivalent basis. Interest income has not been adjusted to a tax-equivalent basis. The tax-equivalent adjustments for the three months ended March 31, 2013 and 2012 were \$3,382 and \$1,761 respectively.
- (2) Net loan fees of \$2.6 million and \$1.4 million are included in the yield computation for the three months ended March 31, 2013 and 2012, respectively.
- (3) Includes nonaccrual loans.

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

- (4) Net interest margin is computed by dividing net interest income by total average earning assets.
- (5) Net interest spread represents average yield earned on interest-earning assets less the average rate paid on interest-bearing liabilities.
- (6) Annualized.

Table of Contents

The table below sets forth the relative impact on net interest income of changes in the volume of earning assets and interest-bearing liabilities and changes in rates earned and paid by the Company on such assets and liabilities. For purposes of this table, nonaccrual loans have been included in the average loan balances.

	Three Months Ended March 31 2013 versus 2012		
	Increase (Decrease) Due to Changes in ⁽¹⁾⁽²⁾

(1) Changes due to both volume and rate have been allocated to volume changes.

(2) Changes due to mark-to-market gains/losses under ASC 825 have been allocated to volume changes.

Comparison of interest income, interest expense and net interest margin

The Company's primary source of revenue is interest income. Interest income for the three months ended March 31, 2013 was \$83.1 million, an increase of 7.4% when comparing interest income for the three months ended March 31, 2012. This increase was primarily from interest income from loans. Interest income from loans increased by \$7.0 million for the three months ended March 31, 2013 compared to the three months ended March 31, 2012. Interest income from investment securities decreased by \$1.4 million to \$8.2 million for the three month period ended March 31, 2013 compared to \$9.6 million for the three months ended March 31, 2012. Other interest income increased slightly by \$0.1 million for the comparable three month periods. Despite the increased interest income, average yield on interest earning assets dropped 26 basis points to 4.74% for the three months ended March 31, 2013 compared to 2012, primarily the result of decreased yields on loans of 26 basis points.

Interest expense for the three months ended March 31, 2013 compared to 2012 decreased by \$0.5 million to \$6.9 million from \$7.4 million. This decline was primarily due to decreased average cost of deposits, which declined 14 basis points to 0.32% for the three months ended March 31, 2013 compared to the same period in 2012. Interest paid on borrowings increased to \$3.2 million for the three months ended March 31, 2013 compared to \$2.6 million for the three months ended March 31, 2012 as the Company extended its fixed rate funding to mitigate future margin contraction.

Net interest income was \$76.2 million for the three months ended March 31, 2013 compared to \$70.1 million for the first quarter 2012, an increase of \$6.1 million, or 8.7%. The increase in net interest income reflects a \$962.3 million increase in average earning assets, offset by a \$670.7 million increase in average interest bearing liabilities. Net interest margin was 4.36% for the three months ended March 31, 2013

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

compared to 4.53% for the three months ended March 31, 2012. The decreased net interest margin of 17 basis points was mostly due to a decrease in yields on loans partially offset by a decrease in average cost of funds primarily as a result of downward repricing of deposits.

Table of Contents

Provision for Credit Losses

The provision for credit losses in each period is reflected as a charge against earnings in that period. The provision is equal to the amount required to maintain the allowance for credit losses at a level that is adequate to absorb probable credit losses inherent in the loan portfolio. The provision for credit losses decreased by \$7.7 million to \$5.4 million for the three months ended March 31, 2013, compared with \$13.1 million for the three months ended March 31, 2012. The provision decrease for the three month comparable periods was mostly due to decreased provision of \$3.2 million on construction and land development loans, \$2.1 million on consumer loans, \$1.6 million on commercial and industrial loans, and \$1.4 million on commercial real estate loans. Provision for credit losses on residential real estate loans increased by \$0.6 million for the comparable first quarter 2013 to 2012. The Company has been experiencing a downward trend in net charge-offs and increased credit quality, which released some reserves due to improved quantitative factors. The Company may establish an additional allowance for credit losses for the purchased credit impaired (PCI) loans through a charge to provision for loan losses when impairment is determined as a result of lower than expected cash flows. For the three months ended March 31, 2013, the Company held additional allowance for the PCI loans of \$0.7 million.

Non-interest Income

The Company earned non-interest income primarily through fees related to services, services provided to loan and deposit customers, bank owned life insurance, investment securities gains, mark to market gains (losses) and other.

The following table presents a summary of non-interest income for the periods presented:

	Three Months Ended March 31,		Increase (Decrease)
	2013	2012	
	(in thousands)		
Gain on sales of investment securities, net	\$ 147	\$ 361	\$ (214)
Unrealized gain (loss) on assets and liabilities measured at fair value, net	(471)	(333)	(138)
Service charges and fees	2,534	2,285	249
Income from bank owned life insurance	1,036	1,123	(87)
Other fee revenue	957	1,000	(43)
Investment advisory fees		619	(619)
Operating lease income	195	273	(78)
Amortization of affordable housing investments	(900)		(900)
Other	401	556	(155)
Total non-interest income	\$ 3,899	\$ 5,884	\$ (1,985)

Total non-interest income for the three months ended March 31, 2013 compared to 2012 decreased by \$2.0 million, or 33.7%, primarily from increased amortization of affordable housing investments of \$0.9 million which the Company did not participate in these investments in the first quarter of 2012 and the decline in investment advisory fees due to the Company's exit from this business line in the third quarter of 2012.

Table of Contents*Non-interest Expense*

The following table presents a summary of non-interest expenses for the periods indicated:

	Three Months Ended March 31,		Increase (Decrease)
	2013	2012	
	(in thousands)		
Non-interest expense:			
Salaries and employee benefits	\$ 26,574	\$ 26,664	\$ (90)
Occupancy	4,846	4,722	124
Legal, professional and director fees	2,784	1,572	1,212
Insurance	2,370	2,050	320
Data processing	1,865	995	870
Marketing	1,764	1,371	393
Loan and repossessed asset expense	1,596	1,684	(88)
Net loss on sales/valuations of repossessed assets and bank premises, net	519	2,651	(2,132)
Intangible amortization	597	890	(293)
Customer service	643	591	52
Merger/restructure expense	195		195
Other	3,176	3,707	(531)
Total non-interest expense	\$ 46,929	\$ 46,897	\$ 32

Total non-interest expense for the three months ended March 31, 2013 compared to the same period in 2012 increased slightly. The most significant changes for the first quarter 2013 compared to 2012 are an increase in legal, professional and directors fees of \$1.2 million and an increase in data processing expenses of \$0.9 million mostly offset by a decrease in net loss on sales/valuations of repossessed assets and bank premises, net of \$2.1 million. The increase in legal, professional and director fees primarily relates to increased directors fees as a result of a first quarter grant that immediately vested. The increase in data processing expenses is mostly related to increased investment in our information technology infrastructure and regulatory compliance. The decline in net loss on sales/valuations of repossessed assets and bank premises is the result of decreased valuation losses on OREO of \$1.5 million and net gains from OREO and other assets sales of \$0.2 million in the first quarter of 2013 compared to net losses on sales of \$0.5 million for the first quarter of 2012.

Discontinued Operations

The Company has discontinued its affinity credit card platform, Partners First, and has presented these activities as discontinued operations. At March 31, 2013 and December 31, 2012, the outstanding credit card loans held for sale were \$27.9 million and \$31.1 million, respectively.

The following table summarizes the operating results of the discontinued operations for the periods indicated:

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Affinity card revenue	\$ 1,139	\$ 295
Non-interest expenses	(1,074)	(678)
Income (loss) before income taxes	65	(383)
Income tax expense (benefit)	27	(161)
Net income (loss)	\$ 38	\$ (222)

Business Segment Results

Bank of Nevada reported net income of \$10.7 million and \$1.0 million for the three months ended March 31, 2013 and 2012, respectively. The \$9.7 million increase in net income for the comparable three month periods was primarily due to decreased provision for credit losses of \$13.1 million as credit quality has improved, partially offset by increased income tax expense of \$5.4 million. Total deposits at Bank of Nevada grew by \$37.4 million during the quarter to \$2.61 billion at March 31, 2013 compared to \$2.57 billion at December 31, 2012. Total loans increased by \$118.0 million to \$2.30 billion at March 31, 2013 from \$2.18 billion at December 31, 2012, mostly due to net affiliate loan sales and participations.

Table of Contents

Western Alliance Bank (WAB), which consists of Alliance Bank of Arizona operating in Arizona and First Independent Bank operating in Northern Nevada, reported net income of \$8.5 million and \$9.8 million for the three month periods ended March 31, 2013 and 2012, respectively. The decrease in net income of \$1.3 million for the three months ended March 31, 2013 compared to 2012 is mostly due to increased provision for credit losses of \$4.6 million partially offset by increased net interest income of \$3.6 million. Total loans grew by \$78.9 million to \$2.12 billion at March 31, 2013 compared to \$2.04 billion at December 31, 2012. In addition, total deposits increased by \$217 million to \$2.44 billion at March 31, 2013 from \$2.22 billion at December 31, 2012.

Torrey Pines Bank segment, which excludes discontinued operations, reported net income for the three months ended March 31, 2013 and 2012 of \$6.3 million and \$5.8 million, respectively. The increase in net income of \$0.5 million for the first quarter 2013 compared 2012 was mostly due to increased net interest income after provision for credit losses of \$1.0 million and decreased income tax expense of \$1.0 million partially offset by increased non-interest expense of \$0.9 million and decreased non-interest income of \$0.6 million. Total loans at Torrey Pines Bank declined by \$78.3 million to \$1.43 billion at March 31, 2013 from \$1.48 billion at December 31, 2012. Total deposits increased by \$19.2 million to \$1.70 billion at March 31, 2013 compared to \$1.68 billion at December 31, 2012.

The other segment, which includes the holding company, Shine (until October 31, 2012), Western Alliance Equipment Finance, the discontinued operations related to the affinity credit card platform excluding loans held for sale (which are included in TPB), and Las Vegas Sunset Properties, reported a net loss of \$4.5 million and \$5.3 million for the three months ended March 31, 2013 and 2012, respectively. The decrease in the net loss for the comparable three months is primarily due to increased net interest margin of 1.6 million, decreased non-interest expense of \$0.8 million, and increased tax benefit of \$0.8 million, partially offset by provision for credit losses of \$2.3 million as the other segment now holds loans of \$50.9 million at March 31, 2013.

Balance Sheet Analysis

Total assets increased \$551.5 million, or 7.2%, to \$8.17 billion at March 31, 2013 compared to \$7.62 billion at December 31, 2012. The majority of the increase was increased cash and cash equivalents of \$351.7 million, primarily interest-bearing deposits in other financial institutions of \$233.9 million and increased loans of \$146.0 million, or 2.6%, to \$5.83 billion and increased investment securities of \$65.6 million.

Total liabilities increased \$529.8 million, or 7.7%, to \$7.39 billion at March 31, 2013 from \$6.86 billion at December 31, 2012. Total deposits increased by \$279.7 million, or 4.3%, to \$6.73 billion at March 31, 2013 from \$6.46 billion at December 31, 2012. Non-interest bearing demand deposits were \$1.93 billion at March 31, 2013 and at December 31, 2012.

Total stockholders' equity increased by \$21.7 million to \$781.3 million at March 31, 2013 from \$759.6 million at December 31, 2012.

The following table shows the amounts of loans held for investment by type of loan at the end of each of the periods indicated.

	March 31, 2013	December 31, 2012
	(in thousands)	
Commercial real estate - owner occupied	\$ 1,414,257	\$ 1,396,797

	5,827,414	5,678,194
Allowance for credit losses	(95,494)	(95,427)
Total	\$ 5,731,920	\$ 5,582,767

Table of Contents*Concentrations of Lending Activities*

The Company's lending activities are primarily driven by the customers served in the market areas where the Company has branch offices in the States of Nevada, California and Arizona. The Company monitors concentrations within five broad categories: geography, industry, product, call code, and collateral. The Company grants commercial, construction, real estate and consumer loans to customers through branch offices located in the Company's primary markets. The Company's business is concentrated in these areas and the loan portfolio includes significant credit exposure to the commercial real estate market in these areas. As of March 31, 2013 and December 31, 2012, commercial real estate related loans accounted for approximately 57% and 58% of total loans, respectively, and approximately 3% of commercial real estate related loans are secured by undeveloped land. Substantially all of these loans are secured by first liens with an initial loan to value ratio of generally not more than 75%. Approximately 48% of these commercial real estate loans excluding construction and land loans were owner occupied at March 31, 2013 and December 31, 2012, respectively. In addition, approximately 4% of total loans were unsecured as of March 31, 2013 and December 31, 2012, respectively.

Impaired Loans

A loan is identified as impaired when it is probable that interest and principal will not be collected according to the contractual terms of the original loan agreement. Generally, impaired loans are classified as nonaccrual. However, in certain instances, impaired loans may continue on an accrual basis, such as loans classified as impaired due to doubt regarding collectability according to contractual terms, that are both fully secured by collateral and are current in their interest and principal payments. Impaired loans are measured for reserve requirements in accordance with ASC Topic 310, *Receivables*, based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral less applicable disposition costs if the loan is collateral dependent. The amount of an impairment reserve, if any, and any subsequent changes are charged against the allowance for credit losses. In addition to our own internal loan review process, the Federal Deposit Insurance Corporation (FDIC) may from time to time direct the Company to modify loan grades, loan impairment calculations or loan impairment methodology. During the first quarter 2012, in conjunction with an examination, the FDIC directed Management to substitute the collateral dependent impairment method for the net present value impairment method on certain TDRs.

Total nonaccrual loans and loans past due 90 days or more and still accruing decreased by \$10.7 million, or 10.1%, at March 31, 2013 to \$95.4 million from \$106.1 million at December 31, 2012.

The following table summarizes nonperforming assets:

	March 31, 2013	December 31, 2012
	(in thousands)	
Nonaccrual loans	\$ 93,748	\$ 104,716

Total nonperforming loans	189,919	190,713
Foreclosed collateral	77,921	77,247
Total nonperforming assets	\$ 267,840	\$ 267,960

Table of Contents

The following table summarizes the loans for which the accrual of interest has been discontinued, loans past due 90 days or more and still accruing interest, restructured loans, and other impaired loans:

	March 31, 2013	December 31, 2012
	(dollars in thousands)	
Total nonaccrual loans	\$ 93,748	\$ 104,716
Loans past due 90 days or more on accrual status	1,640	1,388
Total nonperforming loans	95,388	106,104
Troubled debt restructured loans	94,531	84,609
Other impaired loans	7,222	30,866
Total impaired loans	\$ 197,141	\$ 221,579
Other assets acquired through foreclosure, net	\$ 77,921	\$ 77,247
Nonaccrual loans to gross loans	1.60%	1.83%
Loans past due 90 days or more on accrual status to total loans	0.03	0.02
Interest income received on nonaccrual loans	\$ 277	\$ 191
Interest income that would have been recorded under the original terms of nonaccrual loans	\$ 1,241	\$ 5,469

The composite of nonaccrual loans were as follows as of the dates indicated:

	At March 31, 2013			At December 31, 2012		
	Nonaccrual Balance	%	Percent of Total Loans	Nonaccrual Balance	%	Percent of Total Loans
	(dollars in thousands)					
Construction and land	\$ 6,325	6.75%	0.11%	\$ 11,093	10.59%	0.19%
Residential real estate	21,910	23.37%	0.37%	26,722	25.52%	0.47%
Commercial real estate	59,343	63.30%	1.01%	59,975	57.28%	1.05%
Commercial and industrial	6,170	6.58%	0.11%	6,722	6.42%	0.12%
Consumer		0.00%	0.00%	204	0.19%	0.00%
Total nonaccrual loans	\$ 93,748	100.00%	1.60%	\$ 104,716	100.00%	1.83%

As of March 31, 2013 and December 31, 2012, nonaccrual loans totaled \$93.7 million and \$104.7 million, respectively. Nonaccrual loans by bank at March 31, 2013 were \$46.7 million at Bank of Nevada, \$22.7 million at Western Alliance Bank and \$5.5 million at Torrey Pines Bank, compared to \$73.5 million at Bank of Nevada, \$23.6 million at Western Alliance Bank and \$7.6 million at Torrey Pines Bank at December 31, 2012. Nonaccrual loans held at the parent and Las Vegas Sunset Properties were \$18.8 million at March 31, 2013. Nonaccrual loans as a percentage of total gross loans were 1.6% and 1.83% at March 31, 2013 and December 31, 2012, respectively. Nonaccrual loans as a percentage of each bank's total loans at March 31, 2013 were 2.03% at Bank of Nevada, 1.07% at Western Alliance Bank, and 0.23% at Torrey Pines Bank, compared to 3.37% at Bank of Nevada, 1.16% at Western Alliance Bank and 0.51% at Torrey Pines Bank at December 31, 2012. Total lost interest on nonaccrual loans for the three months ended March 31, 2013 and 2012 was \$1.2 million and \$1.3 million, respectively. The Company recognized \$0.3 million and \$25,000 of cash interest on non-accrual loans for the three months ended March 31, 2013 and 2012, respectively.

Troubled Debt Restructured Loans

A troubled debt restructured loan is a loan on which the Bank, for reasons related to a borrower's financial difficulties, grants a concession to the borrower that the Bank would not otherwise consider. The loan terms that have been modified or restructured due to a borrower's financial situation include, but are not limited to, a reduction in the stated interest rate, an extension of the maturity or renewal of the loan at an interest rate below current market, a reduction in the face amount of the debt, a reduction in the accrued interest, extensions, deferrals, renewals and

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

rewrites. A troubled debt restructured loan is also considered impaired. Generally, a loan that is modified at an effective market rate of interest may no longer be disclosed as a troubled debt restructuring in years subsequent to the restructuring if it is not impaired based on the terms specified by the restructuring agreement.

Table of Contents

As of March 31, 2013 and December 31, 2012, the aggregate amount of loans classified as impaired was \$197.1 million and \$198.2 million, respectively, a net decrease of 0.51%. The total specific allowance for loan losses related to these loans was \$11.0 million and \$12.9 million for March 31, 2013 and December 31, 2012, respectively. As of March 31, 2013 and December 31, 2012, the Company had \$94.5 million and \$84.6 million, respectively, in loans classified as accruing restructured loans. The net decrease in impaired loans is primarily attributable to decreased construction and land development, residential real estate and consumer impaired loans, by \$5.0 million, \$4.5 million and \$0.2 million, respectively compared to December 31, 2012. Impaired commercial real estate and commercial and industrial loans increased by \$7.9 million and \$0.7 million, respectively to \$118.4 million and \$17.2 million, respectively, at March 31, 2013. Impaired loans by bank (excluding purchased credit impaired loans) at March 31, 2013 were \$92.4 million at Bank of Nevada, \$43.1 million at Western Alliance Bank, and \$21.1 million at Torrey Pines Bank compared to \$123.4 million at Bank of Nevada, \$43.49 million at Western Alliance Bank, and \$18.8 million at Torrey Pines Bank at December 31, 2012. Additionally, Western Alliance Bancorporation held \$40.5 million of impaired loans at March 31, 2013 compared to \$12.7 million at December 31, 2012.

The following table includes the breakdown of total impaired loans and the related specific reserves:

	Impaired Balance	Percent	At March 31, 2013			
			Percent of Total Loans (dollars in thousands)	Reserve Balance	Percent	Percent of Total Allowance
Construction and land development	\$ 27,532	13.97%	0.47%	\$ 1,152	10.47%	1.21%

Total	\$ 95,494	100.00%	100.00%

Table of Contents

	Amount	Allowance for Credit Losses at December 31, 2012 (dollars in thousands)	
		% of Total Allowance For Credit Losses	% of Loans in Each Category to Gross Loans
Construction and land development	\$ 10,554	11.06%	6.90%
Commercial real estate	34,982	36.66%	51.10%
Residential real estate	15,237	15.97%	7.20%
Commercial and industrial	32,860	34.43%	34.30%
Consumer	1,794	1.88%	0.50%
Total	\$ 95,427	100.00%	100.00%

The allowance for credit losses as a percentage of total loans decreased to 1.63% at March 31, 2013 from 1.67% at December 31, 2012. The Company's credit loss reserve at March 31, 2013 increased slightly to \$95.5 million from \$95.4 million at December 31, 2012. Although the Company has increased the size of its loan portfolio, the total balance of the allowance for credit losses has stayed flat due to improving credit quality.

Potential Problem Loans

The Company classifies loans consistent with federal banking regulations using a nine category grading system. These loan grades are described in further detail in the Company's Annual Report on Form 10-K for 2012, Item 1 Business. The following table presents information regarding potential problem loans, consisting of loans graded watch, substandard doubtful and loss, but still performing:

	Number of Loans	At March 31, 2013		Percent of Total Loans
		Loan Balance (dollars in thousands)	Percent	
Construction and land development	9	\$ 30,532	22.39%	0.52%
Commercial real estate	62	73,790	54.11%	1.26%

Total	197	\$ 118,930	100.00%	2.07%

Investment Securities

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

Investment securities are classified at the time of acquisition as either held-to-maturity, available-for-sale, or trading based upon various factors, including asset/liability management strategies, liquidity and profitability objectives, and regulatory requirements. Held-to-maturity securities are carried at amortized cost, adjusted for amortization of premiums or accretion of discounts. Available-for-sale securities are securities that may be sold prior to maturity based upon asset/liability management decisions. Investment securities identified as available-for-sale are carried at fair value. Unrealized gains or losses on available-for-sale securities are recorded as accumulated other comprehensive income in stockholders equity. Amortization of premiums or accretion of discounts on mortgage-backed securities is periodically adjusted for estimated prepayments. Investment securities measured at fair value are reported at fair value, with unrealized gains and losses included in current period earnings.

Table of Contents

The investment securities portfolio of the Company is utilized as collateral for borrowings, required collateral for public deposits and customer repurchase agreements, and to manage liquidity, capital and interest rate risk.

The carrying value of investment securities at March 31, 2013 and December 31, 2012 was as follows:

	March 31, 2013	December 31, 2012
	(in thousands)	
U.S. government sponsored agency securities	\$ 18,568	\$
Direct obligations and GSE residential mortgage-backed securities	704,480	668,265
Private label residential mortgage-backed securities	33,500	35,607
Municipal obligations	279,555	265,073
Adjustable-rate preferred stock	77,101	75,555
Mutual funds	33,888	37,961
CRA investments	25,778	25,816
Trust preferred securities	25,200	24,135
Collateralized debt obligations	50	50
Private label commercial mortgage-backed securities	5,657	5,741
Corporate bonds	97,780	97,781
Total investment securities	\$ 1,301,557	\$ 1,235,984

Gross unrealized losses at March 31, 2013 are primarily caused by interest rate fluctuations, credit spread widening and reduced liquidity in applicable markets. The Company has reviewed investment securities on which there is an unrealized loss in accordance with its accounting policy for OTTI described above in Note 5, *Investment Securities*, and determined there was no OTTI for the three months ended March 31, 2013 and 2012.

The Company does not consider any securities, other than those impaired in prior periods, to be other-than-temporarily impaired as of March 31, 2013 and December 31, 2012. However, without recovery in the near term such that liquidity returns to the applicable markets and spreads return to levels that reflect underlying credit characteristics, additional OTTI may occur in future periods.

Goodwill and Intangibles

Goodwill is created when a company acquires a business. When a business is acquired, the purchased assets and liabilities are recorded at fair value and intangible assets are identified. Excess consideration paid to acquire a business over the fair value of the net assets is recorded as goodwill. The Company's annual goodwill impairment testing is October 1. The Company determined that there was no triggering event or other factor to indicate an interim test of goodwill impairment was necessary for the first quarter of 2013.

Deferred Tax Asset

Western Alliance Bancorporation and its subsidiaries, other than BW Real Estate, Inc., file a consolidated federal tax return. Due to tax regulations, several items of income and expense are recognized in different periods for tax return purposes than for financial reporting purposes. These items represent temporary differences. Deferred taxes are provided on an asset and liability method whereby deferred tax assets are recognized for deductible temporary differences and tax credit carry-forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of Management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment.

Although realization is not assured, the Company believes that the realization of the net deferred tax asset is more likely than not based on expectations as to future taxable income and based on available tax planning strategies as defined in FASB ASC 740, *Income Taxes* (ASC 740) that could be implemented if necessary to prevent a carryforward from expiring.

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

The most significant source of these timing differences are the credit loss reserve and net operating loss carryovers, which account for substantially all of the net deferred tax asset.

Table of Contents

See Note 8, *Income Taxes* to the Consolidated Financial Statements for further discussion on income taxes.

Deposits

Deposits have been the primary source for funding the Company's asset growth. At March 31, 2013, total deposits were \$6.73 billion, compared to \$6.46 billion at December 31, 2012. The deposit growth of \$279.7 million or 4.3% was primarily driven by increased money market deposits of \$260.3 million and interest-bearing demand deposits of \$37.3 million. This growth was partially offset by decreased certificates of deposits of \$8.1 million, savings deposits of \$7.1 million and non-interest-bearing demand deposits of \$2.7 million. In addition, the bank subsidiaries are members of Certificate of Deposit Registry Service (CDARS) and Insured Cash Sweep Service (ICS). CDARS and ICS provide mechanisms for obtaining FDIC insurance on large deposits. At March 31, 2013, the Company had \$402.2 million of CDARS deposits and \$192.9 million ICS deposits. At December 31, 2012 the Company had \$386.3 million of CDARS deposits and \$107.6 million ICS deposits. At March 31, 2013 and December 31, 2012, the Company had \$185.7 million and \$99.8 million, respectively of wholesale brokered deposits.

The following table provides the average balances and weighted average rates paid on deposits:

	Three Months Ended March 31,			
	2013 Average Balance/Rate		2012 Average Balance/Rate	
	(dollars in thousands)			
Interest checking (NOW)	\$ 608,663	0.20%	\$ 504,261	0.25%
Savings and money market	2,620,874	0.29	2,233,563	0.39
Time	1,449,535	0.42	1,424,291	0.64
Total interest-bearing deposits	4,679,072	0.32	4,162,115	0.46
Noninterest bearing demand deposits	1,855,070		1,645,737	
Total deposits	\$ 6,534,142	0.23%	\$ 5,807,852	0.33%

Other Assets Acquired Through Foreclosure

The following table presents the changes in other assets acquired through foreclosure:

	Three Months Ended March 31,	
	2013	2012
	(in thousands)	
Balance, beginning of period	\$ 77,247	\$ 89,104
Additions	6,930	5,340
Dispositions	(5,240)	(10,745)
Valuation adjustments in the period, net	(1,017)	(2,254)
Balance, end of period	\$ 77,921	\$ 81,445

Other assets acquired through foreclosure consist primarily of properties acquired as a result of, or in-lieu-of, foreclosure. Properties or other assets are classified as other real estate owned and other repossessed property and are reported at the lower of carrying value or fair value, less estimated costs to sell the property. Costs relating to the development or improvement of the assets are capitalized and costs relating to holding the assets are charged to expense. The Company had \$77.9 million and \$77.2 million, respectively, of such assets at March 31, 2013 and December 31, 2012. At March 31, 2013, the Company held approximately 74 other real estate owned properties compared to 75 at December 31, 2012. When significant adjustments were based on unobservable inputs, such as when a current appraised value is not available or management determines the fair value of the collateral is further impaired below appraised value and there is no observable market price, the

resulting fair value measurement has been categorized as a Level 3 measurement.

Table of Contents

Junior Subordinated Debt

The Company measures the balance of the junior subordinated debt at fair value, which was \$36.7 million at March 31, 2013 and \$36.2 million at December 31, 2012. The difference between the aggregate fair value of junior subordinated debt and the aggregate unpaid principal balance of \$66.5 million was \$29.8 million at March 31, 2013.

Short-Term Borrowed Funds

The Company from time to time utilizes short-term borrowed funds to support short-term liquidity needs generally created by increased loan demand. The majority of these short-term borrowed funds consist of advances from the FHLB and FRB and customer repurchase agreements. The Company's borrowing capacity at FHLB and FRB is determined based on collateral pledged, generally consisting of securities and loans. In addition, the Company has borrowing capacity from other sources pledged by securities, including securities sold under agreements to repurchase, which are reflected at the amount of cash received in connection with the transaction, and may require additional collateral based on the fair value of the underlying securities. At March 31, 2013, total short-term borrowed funds consisted of customer repurchases of \$64.7 million and a \$20 million credit line advance. No short-term advances were outstanding from the FHLB or the FRB at March 31, 2013. At December 31, 2012, total short-term borrowed funds consisted of \$79.0 million of customer repurchases and \$120.0 million of FHLB advances. The decrease in short-term borrowed funds of \$114.3 million was the result of increased liquidity from customer deposits and a change in funding duration to longer term to mitigate margin compression.

Long-Term Debt

In 2010, the Company completed a public offering of \$75 million in principal Senior Notes due in 2015 bearing interest of 10%. At March 31, 2013 the net principal balance was \$73.8 million. In the first quarter of 2013, the Company entered into a long-term fixed rate advance with the FHLB for \$200 million at an interest rate of 1.04% due in January 2018.

Securities sold short

During the first quarter 2013, the Company entered into a Treasury short transaction to mitigate the Company's modest liability sensitive interest rate risk profile. The Company sold short fixed rate Treasury securities and invested the proceeds in a short term repurchase agreement. This action reduced the interest margin approximately five basis points during the quarter, primarily from the increase in earning assets at a very low yield. The balance was \$132.6 million at March 31, 2013.

Other liabilities

The increase of \$31.2 million to \$130.1 million at March 31, 2013 compared to December 31, 2012 was primarily due to asset purchases not yet settled.

Critical Accounting Policies

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. The critical accounting policies upon which our financial condition and results of operation depend, and which involve the most complex subjective decisions or assessments, are included in the discussion entitled "Critical Accounting Policies" in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012, and all amendments thereto, as filed with the Securities and Exchange Commission. There were no material changes to the critical accounting policies disclosed in the Annual Report on Form 10-K.

Liquidity

Liquidity is the ongoing ability to accommodate liability maturities and deposit withdrawals, fund asset growth and business operations, and meet contractual obligations through unconstrained access to funding at reasonable market rates. Liquidity management involves forecasting funding requirements and maintaining sufficient capacity to meet the needs and accommodate fluctuations in asset and liability levels due to changes in our business operations or unanticipated events.

The ability to have readily available funds sufficient to repay fully maturing liabilities is of primary importance to depositors, creditors and regulators. Our liquidity, represented by cash and amounts due from banks, federal funds sold and non-pledged marketable securities, is a result

Edgar Filing: WESTERN ALLIANCE BANCORPORATION - Form 10-Q

of our operating, investing and financing activities and related cash flows. In order to ensure funds are available when necessary, on at least a quarterly basis, we project the amount of funds that will be required, and we strive to maintain relationships with a diversified customer base. Liquidity requirements can also be met through short-term borrowings or the disposition of short-term assets. The Company has unsecured borrowing lines at correspondent banks totaling \$120.0 million. In addition, loans and securities are pledged to the FHLB providing \$1.32 billion in borrowing capacity with outstanding borrowings and letters of credit of \$200.0 million and \$130.0 million, respectively, leaving \$993.3 million in available credit as of March 31, 2013. Loans and securities pledged to the FRB discount window provided \$609.3 million in borrowing capacity. As of March 31, 2013, there were no outstanding borrowings from the FRB, thus our available credit totaled \$609.3 million.

Table of Contents

The Company has a formal liquidity policy, and in the opinion of management, our liquid assets are considered adequate to meet cash flow needs for loan funding and deposit cash withdrawals for the next 90-120 days. At March 31, 2013, there was \$903.2 million in liquid assets comprised of \$422.3 million in cash and cash equivalents and \$480.1 million in unpledged marketable securities. At December 31, 2012, the Company maintained \$702.7 million in liquid assets comprised of \$205.3 million of cash and cash equivalents and \$445.6 million of unpledged marketable securities.

The holding company maintains additional liquidity that would be sufficient to fund its operations and certain nonbank affiliate operations for an extended period should funding from normal sources be disrupted. Since deposits are taken by the bank operating subsidiaries and not by the parent company, parent company liquidity is not dependent on the bank operating subsidiaries' deposit balances. In our analysis of parent company liquidity, we assume that the parent company is unable to generate funds from additional debt or equity issuance, receives no dividend income from subsidiaries, and does not pay dividends to shareholders, while continuing to meet nondiscretionary uses needed to maintain operations and repayment of contractual principal and interest payments owed by the parent company and affiliated companies. Under this scenario, the amount of time the parent company and its nonbank subsidiaries can operate and meet all obligations before the current liquid assets are exhausted is considered as part of the parent company liquidity analysis. Management believes the parent company maintains adequate liquidity capacity to operate without additional funding from new sources for over 12 months. The Banks maintain sufficient funding capacity to address large increases in funding requirements, such as deposit outflows. This capacity is comprised of liquidity derived from a reduction in asset levels and various secured funding sources.

On a long-term basis, the Company's liquidity will be met by changing the relative distribution of our asset portfolios, for example by reducing investment or loan volumes, or selling or encumbering assets. Further, the Company can increase liquidity by soliciting higher levels of deposit accounts through promotional activities and/or borrowing from correspondent banks, the FHLB of San Francisco and the FRB. At March 31, 2013, our long-term liquidity needs primarily relate to funds required to support loan originations and commitments and deposit withdrawals which can be met by cash flows from investment payments and maturities, and investment sales if necessary.

The Company's liquidity is comprised of three primary classifications: (i) cash flows provided by operating activities; (ii) cash flows used in investing activities; and (iii) cash flows provided by financing activities. Net cash provided by or used in operating activities consists primarily of net income, adjusted for changes in certain other asset and liability accounts and certain non-cash income and expense items, such as the loan loss provision, investment and other amortization and depreciation. For the three months ended March 31, 2013 and 2012, net cash provided by operating activities was \$66.7 million and \$36.4 million, respectively.

Our primary investing activities are the origination of real estate, commercial and consumer loans and purchase and sale of securities. Our net cash provided by and used in investing activities has been primarily influenced by our loan and securities activities. The net increase in loans for the three months ended March 31, 2013 and 2012 was \$155.2 million and \$168.6 million, respectively.

Net cash provided by financing activities has been impacted significantly by increased deposit levels. During the three months ended March 31, 2013 and 2012, deposits increased \$279.7 million and \$240.5 million, respectively.

Fluctuations in core deposit levels may increase our need for liquidity as certificates of deposit mature or are withdrawn before maturity and as non-maturity deposits, such as checking and savings account balances, are withdrawn. Additionally, we are exposed to the risk that customers with large deposit balances will withdraw all or a portion of such deposits, due in part to the FDIC limitations on the amount of insurance coverage provided to depositors. To mitigate the uninsured deposit risk, we have joined the Certificate of Deposit Account Registry Service (CDARS) and Insured Cash Sweep Service (ICS), a program that allows customers to invest up to \$50.0 million in certificates of deposit or money market accounts through one participating financial institution, with the entire amount being covered by FDIC insurance. As of March 31, 2013, we had \$402.2 million of CDARS and \$192.9 million of ICS deposits.

As of March 31, 2013, the Company had \$185.7 million of wholesale brokered deposits outstanding. Brokered deposits are generally considered to be deposits that have been received from a third party that is acting on behalf of that party's customer. Often, a broker will direct a customer's deposits to the banking institution offering the highest interest rate available. Federal banking law and regulation places restrictions on depository institutions regarding brokered deposits because of the general concern that these deposits are at a greater risk of being withdrawn and placed on deposit at another institution offering a higher interest rate, thus posing liquidity risk for institutions that gather brokered deposits in significant amounts. The Company does not anticipate using brokered deposits as a significant liquidity source in the near future.

Table of Contents

Federal and state banking regulations place certain restrictions on dividends paid by the Banks to Western Alliance. The total amount of dividends which may be paid at any date is generally limited to the retained earnings of each Bank. Dividends paid by the Banks to the Company would be prohibited if the effect thereof would cause the respective Bank's capital to be reduced below applicable minimum capital requirements. In addition, the memorandum of understanding at Bank of Nevada presently requires prior regulatory approval of the payments of dividends to Western Alliance. Western Alliance Bank, Torrey Pines Bank, and Las Vegas Sunset Properties have paid dividends in the amount of \$3.5 million, \$3.0 million, and \$4.5 million, respectively, in the first quarter 2013 to Western Alliance Bancorporation.

Capital Resources

The Company and the Banks are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements could trigger certain mandatory or discretionary actions that, if undertaken, could have a direct material effect on the Company's business and financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Banks must meet specific capital guidelines that involve qualitative measures of their assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Banks to maintain minimum amounts and ratios of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I leverage (as defined) to average assets (as defined). As of March 31, 2013 and December 31, 2012, the Company and the Banks met all capital adequacy requirements to which they are subject.

As of March 31, 2013 and December 31, 2012, the Company and each of its subsidiaries met the minimum capital ratio requirements necessary to be classified as well-capitalized, as defined by the banking agencies. To be categorized as well-capitalized, the Banks must maintain minimum total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the table below. In addition, the Memorandum of Understanding to which Bank of Nevada is subject requires it to maintain a higher Tier I leverage ratio than otherwise required to be considered well-capitalized. At March 31, 2013 and December 31, 2012, the capital levels at Bank of Nevada exceeded this elevated requirement.

Federal banking regulators have proposed revisions to the bank capital requirement standards known as Basel III. Basel III strengthens bank capital requirements and introduces new regulatory requirements on bank liquidity and bank leverage. Based on the Company's assessment of these proposed regulations, as of March 31, 2013 and December 31, 2012, the Company and each of its subsidiaries met the requirements necessary to be classified as well-capitalized under the proposed regulation.

The actual capital amounts and ratios for the Company are presented in the following table:

	Actual		Adequately-Capitalized Requirements		Minimum For Well-Capitalized Requirements	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of March 31, 2013						
			(dollars in thousands)			
Total Capital (to Risk Weighted Assets)	882,811	12.6%	560,919	8.0%	701,149	10.0%
Tier I Capital (to Risk Weighted Assets)	792,072	11.3	280,460	4.0	420,689	6.0
Leverage ratio (to Average Assets)	792,072	10.1	314,463	4.0	393,079	5.0
As of December 31, 2012						
			(dollars in thousands)			
Total Capital (to Risk Weighted Assets)	856,199	12.6%	543,618	8.0%	679,523	10.0%
Tier I Capital (to Risk Weighted Assets)	768,687	11.3	272,102	4.0	408,152	6.0
Leverage ratio (to Average Assets)	768,687	10.1	304,430	4.0	380,538	5.0

Table of Contents**ITEM 3. Quantitative and Qualitative Disclosures About Market Risk**

Market risk is the risk of loss in a financial instrument arising from adverse changes in market prices and rates, foreign currency exchange rates, commodity prices and equity prices. Our market risk arises primarily from interest rate risk inherent in our lending, investing and deposit taking activities. To that end, management actively monitors and manages our interest rate risk exposure. We generally manage our interest rate sensitivity by evaluating re-pricing opportunities on our earning assets to those on our funding liabilities.

Management uses various asset/liability strategies to manage the re-pricing characteristics of our assets and liabilities, all of which are designed to ensure that exposure to interest rate fluctuations is limited to within our guidelines of acceptable levels of risk-taking. Hedging strategies, including the terms and pricing of loans and deposits and management of the deployment of our securities, are used to reduce mismatches in interest rate re-pricing opportunities of portfolio assets and their funding sources.

Interest rate risk is addressed by each Bank's respective Asset and Liability Management Committee, or ALCO (or its equivalent), which includes members of executive management, senior finance and operations. ALCO monitors interest rate risk by analyzing the potential impact on the net economic value of equity and net interest income from potential changes in interest rates, and considers the impact of alternative strategies or changes in balance sheet structure. We manage our balance sheet in part to maintain the potential impact on economic value of equity and net interest income within acceptable ranges despite changes in interest rates.

Our exposure to interest rate risk is reviewed on at least a quarterly basis by the ALCO. Interest rate risk exposure is measured using interest rate sensitivity analysis to determine our change in economic value of equity in the event of hypothetical changes in interest rates. If potential changes to net economic value of equity and net interest income resulting from hypothetical interest rate changes are not within the limits established by each Bank's Board of Directors, the respective Board of Directors may direct management to adjust the asset and liability mix to bring interest rate risk within board-approved limits.

Net Interest Income Simulation. In order to measure interest rate risk at March 31, 2013, we used a simulation model to project changes in net interest income that result from forecasted changes in interest rates. This analysis calculates the difference between net interest income forecasted using an immediate increase and decrease in interest rates and a net interest income forecast using a flat market interest rate environment derived from spot yield curves typically used to price our assets and liabilities. The income simulation model includes various assumptions regarding the re-pricing relationships for each of our products. Many of our assets are floating rate loans, which are assumed to re-price immediately, and proportional to the change in market rates, depending on their contracted index. Some loans and investments include the opportunity of prepayment (embedded options), and accordingly the simulation model uses estimated market speeds to derive prepayments and reinvests proceeds at modeled yields. Our non-term deposit products re-price more slowly, usually changing less than the change in market rates and at our discretion.

This analysis indicates the impact of changes in net interest income for the given set of rate changes and assumptions. It assumes the balance sheet remains static and that its structure does not change over the course of the year. It does not account for all factors that could impact our results, including changes by management to mitigate interest rate changes or secondary factors such as changes to our credit risk profile as interest rates change.

Furthermore, loan prepayment rate estimates and spread relationships change regularly. Interest rate changes create changes in actual loan prepayment speeds that will differ from the market estimates incorporated in this analysis. Changes that vary significantly from the modeled assumptions may have significant effects on our actual net interest income.

This simulation model assesses the changes in net interest income that would occur in response to an instantaneous and sustained increase or decrease (shock) in market interest rates. At March 31, 2013, our net interest margin exposure for the next twelve months related to these hypothetical changes in market interest rates was within our current guidelines.

Sensitivity of Net Interest Income

(in 000 \$)	Interest Rate Scenario (change in basis points from Base)					
	Down 100	Base	UP 100	UP 200	Up 300	Up 400
Interest Income	\$ 329,792	\$ 331,884	\$ 352,551	\$ 378,105	\$ 405,326	\$ 433,084
Interest Expense	\$ 27,284	\$ 27,284	\$ 45,765	\$ 64,250	\$ 82,735	\$ 101,225
Net Interest Income	\$ 302,508	\$ 304,600	\$ 306,786	\$ 313,855	\$ 322,591	\$ 331,859

Economic Value of Equity. We measure the impact of market interest rate changes on the net present value of estimated cash flows from our assets, liabilities and off-balance sheet items, defined as economic value of equity, using a simulation model. This simulation model assesses the changes in the market value of interest rate sensitive financial instruments that would occur in response to an instantaneous and sustained increase or decrease (shock) in market interest rates.

At March 31, 2013, our economic value of equity exposure related to these hypothetical changes in market interest rates was within the current guidelines established by us. The following table shows our projected change in economic value of equity for this set of rate shocks at March 31, 2013.

Economic Value of Equity

Present Value (000 \$)	Interest Rate Scenario (change in basis points from Base)					
	Down 100	Base	UP 100	UP 200	Up 300	Up 400
Assets	\$ 8,254,136	\$ 8,189,977	\$ 8,024,750	\$ 7,853,982	\$ 7,687,047	\$ 7,533,541
Liabilities	\$ 7,317,611	\$ 7,302,138	\$ 7,125,257	\$ 6,961,483	\$ 6,798,941	\$ 6,636,673
Net Present Value	\$ 936,525	\$ 887,839	\$ 899,493	\$ 892,499	\$ 888,106	\$ 896,868
% Change	5.5%		1.3%	0.5%	0.0%	1.0%

The computation of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, asset prepayments and deposit decay, and should not be relied upon as indicative of actual results. Further, the computations do not contemplate any actions we may undertake in response to changes in interest rates. Actual amounts may differ from the projections set forth above should market conditions vary from the underlying assumptions.

Derivative Contracts. In the normal course of business, the Company uses derivative instruments to meet the needs of its customers and manage exposure to fluctuations in interest rates. The following table summarizes the aggregate notional amounts, market values and terms of the Company's derivative positions with derivative market makers as of March 31, 2013.

Outstanding Derivatives Positions		
Notional	Net Value	Weighted Average Term (in yrs)
9,253,459	(691,326)	2.7

The following table summarizes the aggregate notional amounts, market values and terms of the Company's derivative positions with derivative market makers as of December 31, 2012:

Outstanding Derivatives Positions		
Notional	Net Value	Weighted Average Term (in yrs)
9,361,464	(777,703)	2.9

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, the Chief Executive Officer and Chief Financial Officer have concluded that the disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) are effective to ensure that information required to be disclosed by the Company in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission (SEC) rules and forms. Additionally, our disclosure controls and procedures were also effective in ensuring that information required to be disclosed by the Company in the reports we file or subject under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures.

Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting during the quarter ended March 31, 2013, which have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

There are no material pending legal proceedings to which the Company is a party or to which any of our properties are subject. There are no material proceedings known to us to be contemplated by any governmental authority. From time to time, we are involved in a variety of litigation matters in the ordinary course of our business and anticipate that we will become involved in new litigation matters in the future.

As previously disclosed in our Annual Report on Form 10-K, one of the Company's banking subsidiaries, Bank of Nevada, continues to operate under informal supervisory oversight by banking regulators in the form of a memorandum of understanding. The memorandum requires enhanced management of such matters as asset quality, credit administration, repossessed property, and information technology. The bank is prohibited from paying dividends or making other distributions to the Company without prior regulatory approval and is required to maintain higher levels of Tier 1 capital than otherwise would be required to be considered well-capitalized under federal capital guidelines. In addition, the bank is required to obtain prior regulatory approval of certain severance and similar payments to institution affiliated parties, and to provide regulators with prior notice of certain management and director changes. The Company believes Bank of Nevada is in full compliance with the requirements of the memorandum of understanding.

Item 1A. Risk Factors

There have not been any material changes to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits

- 2.1 Agreement and Plan of Merger, dated as of January 18, 2013, by and among Western Alliance Bank, Land America Financial Group, Inc., Orange County Bancorp, and Centennial Bank (incorporated by reference to Exhibit 2.1 to Western Alliance Bancorporation's Form 8-K filed with the Securities and Exchange Commission on January 22, 2013).
- 31.1 *CEO Certification Pursuant to Rule 13a-14(a)/15d-14(a).
- 31.2 *CFO Certification Pursuant to Rule 13a-14(a)/15d-14(a).
- 32 **CEO and CFO Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to section 906 of the Sarbanes Oxley Act of 2002.

* Filed herewith.

** Furnished herewith

101. INS XBRL Instance Document

The following materials from the Registrant's Quarterly Report on Form 10-Q for the quarter ended March 31, 2013, formatted in Extensible Business Reporting Language (XBRL), include: (i) Consolidated Balance Sheets at March 31, 2013 and December 31, 2012 (ii) Consolidated Income Statements and Comprehensive Income for the three months ended March 31, 2013 and 2012, (iii) Consolidated Statement of Stockholders' Equity at March 31, 2013, (iv) Consolidated Statements of Cash Flows for the three months ended March 31, 2013 and 2012, and (v) Notes to (Unaudited) Condensed Consolidated Financial Statements****.

****Furnished herewith. Pursuant to Rule 406T of Regulation S-T, the Interactive Data Files on Exhibit 101 hereto are deemed not filed or part of a registration statement or prospectus for purposes of Sections 11 or 12 of the Securities Act of 1933, as amended, are deemed not filed for purposes of Section 18 of the Securities and Exchange Act, as amended, and otherwise are not subject to liability under those sections.
