PROSPECTUS

1 Million Common Shares

Nuveen Short Duration Credit Opportunities Fund

Nuveen Short Duration Credit Opportunities Fund (the Fund) is a diversified, closed-end management investment company. The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund seeks to achieve its investment objective by investing, under normal circumstances, at least 70% of its Managed Assets (as defined below under Portfolio Contents) in adjustable rate corporate debt instruments, including senior secured loans, second lien loans and other adjustable rate corporate debt instruments. The Fund's portfolio will be invested primarily in below investment grade adjustable corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. In addition, under normal circumstances, the Fund may make limited tactical investments in high yield debt and other debt instruments in an amount of up to 30% of its Managed Assets. Under normal circumstances, no more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any nationally recognized statistical rating organization (NRSRO) that rate such security or are unrated but judged to be of comparable quality by the Fund's sub-adviser, Symphony Asset Management, LLC. The Fund may also, under normal circumstances, enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets. Under normal circumstances, the Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers that are U.S. dollar or non-U.S. dollar denominated, including debt instruments of issuers located, or conducting their business in, emerging markets countries. In addition, the Fund uses leverage to seek to enhance current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective.

Investing in the Fund's common shares involves certain risks that are described in the Risk Factors section of this Prospectus (the Prospectus).

Neither the Securities and Exchange Commission (the SEC) nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information (the SAI), dated November 22, 2013, containing additional information about the Fund, has been filed with the SEC and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the SAI, the table of contents of which is on the last page of this Prospectus, annual and semi-annual reports to shareholders and other information about the Fund, and make shareholder inquiries by calling (800) 257-8787, by writing to the Fund or from the Fund's website (<http://www.nuveen.com>). The information contained in, or that can be accessed through, the Fund's website is not part of this Prospectus. You also may obtain a copy of the SAI (and other information regarding the Fund) from the SEC's web site (<http://www.sec.gov>).

Edgar Filing: Nuveen Short Duration Credit Opportunities Fund - Form 486BPOS

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other governmental agency.

Portfolio Contents. The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate plus a premium. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets (as defined below) in adjustable rate senior loans and second lien loans. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein. The Fund also may enter into tactical short positions consisting primarily of high yield debt. Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality. Such debt instruments are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration).

Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles).

Leverage. The Fund uses leverage to seek to enhance its potential current income and capital appreciation over time. The Fund uses structural leverage obtained through borrowings. The Fund has not, but may in the future, also use structural leverage through the issuance of preferred shares of beneficial interest. The Fund may utilize derivatives such as credit default swaps that have the economic effect of financial leverage by creating additional investment exposure. The effective leverage of the Fund, resulting from the combination of structural leverage and investments in derivatives and other portfolio techniques that have the economic effect of leverage, will not exceed 38% of the Fund's Managed Assets. There can be no assurance that the Fund's leverage strategy will be successful.

Adviser and Sub-Adviser. Nuveen Fund Advisors, LLC, the Fund's investment adviser, is responsible for determining the Fund's overall investment strategies and their implementation. Symphony Asset Management, LLC is the Fund's investment sub-adviser and oversees the day-to-day investment operations of the Fund.

The minimum price on any day at which Common Shares may be sold will not be less than the current net asset value per share plus the per share amount of the commission to be paid to the Fund's distributor, Nuveen Securities, LLC (Nuveen Securities). The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price. The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions. For information on how Common Shares may be sold, see the Plan of Distribution section of this Prospectus.

Common Shares are listed on the New York Stock Exchange (the NYSE). The trading or ticker symbol of the Fund is JSD. The Fund's closing price on the NYSE on November 15, 2013 was \$18.82.

The date of this Prospectus is November 22, 2013

You should rely only on the information contained or incorporated by reference into this Prospectus. The Fund has not authorized anyone to provide you with different information. The Fund is not making an offer of these securities in any state where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus. The Fund will update this Prospectus to reflect any material changes to the disclosures herein.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the Statement of Additional Information (the SAI).

The Fund

Nuveen Short Duration Credit Opportunities Fund (the Fund) is a diversified, closed-end management investment company. See The Fund. The Fund's common shares, \$.01 par value (Common Shares), are traded on the New York Stock Exchange (the NYSE) under the symbol JSD. See Description of Common Shares. As of September 30, 2013, the Fund had 10,095,286 Common Shares outstanding and net assets applicable to Common Shares of \$199,595,836.

Investment Objectives and Policies

The Fund's investment objective is to provide current income and the potential for capital appreciation. The Fund cannot assure you that it will achieve its investment objective.

The Fund's portfolio will be invested primarily in below investment grade adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments. Under normal market circumstances, the Fund invests at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans. Managed Assets means the total assets of the Fund, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the express purpose of creating leverage). Total assets for this purpose shall include assets attributable to the Fund's use of effective leverage (whether or not those assets are reflected in the Fund's financial statements for purposes of generally accepted accounting principles). See The Fund's Investments for additional information on the types of securities in which the Fund may invest. Senior loans and second lien loans are made to U.S. and non-U.S. corporations, partnerships and other business entities (Borrowers) that operate in various industries and geographic regions. Senior loans, second lien loans and other adjustable rate instruments pay interest at rates which are determined periodically at short-term intervals on the basis of an adjustable base lending rate, primarily the London Interbank Offered Rate (LIBOR), plus a premium, and are therefore regarded as having short-term durations. In addition, the Fund may make limited tactical investments in high yield debt and other debt instruments as described herein. The Fund's investment objective and certain investment policies identified as such are considered fundamental and may not be changed without shareholder approval.

The Fund also may enter into tactical short positions consisting primarily of high yield debt. The high yield debt instruments may have intermediate-term or even long-term durations, but investments in those instruments will not be made in a manner that will cause the Fund's average portfolio duration (including the effect of leverage) to exceed two years. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for

delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments.

Substantially all of the Fund's portfolio likely will be invested in corporate debt instruments that are, at the time of investment, rated below investment grade or unrated but judged by the portfolio managers to be of comparable quality. A debt instrument is considered investment grade quality if it is rated within the four highest letter grades (BBB or Baa or better) by at least one nationally recognized statistical rating organization (NRSRO) that rates such instrument (even if it is rated lower by another), or if it is unrated by any NRSRO but judged to be of comparable quality by the portfolio managers. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. See [Risks Issuer Level Risks Issuer Credit Risk](#), [Risks Issuer Level Risks Below Investment Grade Risk](#) and [Risks Security Level Risks Short Exposure Risk](#).

The Fund uses leverage to seek to enhance current income and capital appreciation.

Under normal circumstances:

The Fund invests at least 70% of its Managed Assets in adjustable rate corporate debt instruments, including senior secured loans, second lien loans, and other adjustable rate corporate debt instruments.

The Fund will make limited tactical investments in high yield debt and other debt instruments as described herein in an aggregate amount of up to 30% of its Managed Assets.

No more than 30% of the Fund's Managed Assets may be invested in debt instruments that are, at the time of investment, rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality.

The Fund may enter into tactical short positions, consisting primarily of high yield debt, either directly or through the use of derivatives, including credit default swaps, creating a negative investment exposure or hedging existing long (positive) investment exposure in a notional amount up to 20% of its Managed Assets.

The Fund may invest up to 20% of its Managed Assets in debt instruments of non-U.S. issuers (which term for purposes of this

prospectus includes Borrowers (as defined below)) that are U.S. dollar or non-U.S. dollar denominated. The Fund's investments in debt instruments of non-U.S. issuers may include debt instruments located, or conducting their business, in emerging market countries.

The Fund may invest up to 10% of its Managed Assets in securities of other open- or closed-end investment companies (including exchange traded funds (ETFs)) that invest primarily in securities of the types in which the Fund may invest directly.

See The Fund's Investments Investment Objective, and Investment Policies.

The Fund may enter into certain derivative transactions, such as credit default swaps and interest rate swaps, as a hedging technique to protect against potential adverse changes in the market value of portfolio instruments. The Fund also may use derivatives to attempt to protect the net asset value of the Fund, to facilitate the sale of certain portfolio instruments, to manage the Fund's effective interest rate exposure, and as a temporary substitute for purchasing or selling particular instruments. From time to time, the Fund also may enter into derivative transactions to create investment exposure to the extent such transactions may facilitate implementation of its strategy more efficiently than through outright purchases or sales of portfolio instruments.

Under normal market circumstances, the Fund will maintain an average duration of two years or less for its portfolio (including the effect of leverage, but after the effect of derivatives used to shorten duration). In this prospectus, average duration and average portfolio duration are each defined to be the modified duration of the Fund's portfolio, which is the measure of a debt instrument's or a portfolio's price sensitivity with respect to changes in market yields adjusted to reflect the effect of the Fund's effective leverage. When the average duration of the portfolio is expected to be longer than two years, the Fund will use interest rate swaps, interest rate futures or other derivative instruments to shorten such duration. Prices of instruments with shorter durations tend to be less sensitive to interest rate changes than instruments with longer durations. In general, the value of a portfolio of instruments with a shorter duration can be expected to be less sensitive to interest rate changes than a portfolio with a longer duration. For example, the price of a bond with an effective duration of two years will rise (fall) two percent for every one percent decrease (increase) in its yield, and the price of a five-year duration bond will rise (fall) five percent for a one percent decrease (increase) in its yield. As of October 31, 2013, the effective duration of the Fund's portfolio was 0.77 years.

During temporary defensive periods or in order to keep the Fund's cash fully invested, including during the period when the net proceeds of the offering of Common Shares are first being invested, the Fund

may deviate from its investment policies and objective. During such periods, the Fund may invest up to 100% of its Managed Assets in short-term investments, including high quality, short-term securities, or may invest in short-, intermediate-, or long-term U.S. Treasury securities. There can be no assurance that such strategies will be successful. For a more complete discussion of the Fund's portfolio composition, see The Fund's Investments.

Investment Adviser

Nuveen Fund Advisors, LLC (NFALLC), the Fund's investment adviser, is responsible for determining the Fund's overall strategy and its implementation. NFALLC, a registered investment adviser, is a wholly-owned subsidiary of Nuveen Investments, Inc. (Nuveen Investments). Founded in 1898, Nuveen Investments and its affiliates had approximately \$214.9 billion of assets under management as of September 30, 2013. See Management of the Fund Investment Adviser, Sub-Adviser and Portfolio Managers.

Sub-Adviser

Symphony Asset Management LLC (Symphony or Sub-Adviser) is the Fund's sub-adviser and oversees the day-to-day investment operations of the Fund.

Symphony, a registered investment adviser, is an indirect wholly-owned subsidiary of Nuveen Investments. Founded in 1994, Symphony had approximately \$13.9 billion in assets under management as of September 30, 2013. Symphony specializes in the management of both long-only and alternative equity and debt strategies.

Nuveen Securities, LLC (Nuveen Securities), a registered broker-dealer affiliate of NFALLC and Symphony, is involved in the offering of the Fund's Common Shares. See Plan of Distribution-Distribution Through At-the-Market Transactions.

Use of Leverage

The Fund employs financial leverage through borrowing (Borrowing). The Fund has entered into a \$85 million (maximum commitment amount) credit agreement, renewable annually, with Bank of America N.A. (Bank of America). On August 8, 2012, the Fund renewed the Borrowings with Bank of America for an additional 364 days. During the fiscal year ended July 31, 2013, the average daily balance outstanding and the average annual interest rate on the Fund's Borrowings were \$85 million and 1.06%, respectively. On August 9, 2013, subsequent to the reporting period, the Fund increased its maximum commitment amount from \$85 million to \$95 million and renewed its Borrowings with Bank of America for an additional 364 days.

The Fund does not currently, but may in the future, issue preferred shares. See Description of Shares Preferred Shares.

Leverage involves special risks. See Risk Factors Leverage Risk. There is no assurance that the Fund's leveraging strategy will be successful. The Fund will seek to invest the proceeds of any future financial leverage in a manner consistent with the Fund's investment objective and policies. See Use of Leverage.

The Fund pays a management fee to NFALLC (which in turn pays a portion of its fee to the Fund's sub-adviser, Symphony) based on a percentage of Managed Assets. Managed Assets include the proceeds realized and managed from the Fund's use of leverage as set forth in the Fund's investment management agreement. NFALLC will be responsible for using leverage to pursue the Fund's investment objectives, and will base its decision regarding whether and how much leverage to use for the Fund based on its assessment of whether such use of leverage will advance the Fund's investment objectives. However, the fact that a decision to increase the Fund's leverage will have the effect, all other things being equal, of increasing Managed Assets and therefore NFALLC's and Symphony's fees means that NFALLC and Symphony may have a conflict of interest in determining whether to increase the Fund's use of leverage. NFALLC will seek to manage that potential conflict by only increasing the Fund's use of leverage when it determines that such increase is consistent with the Fund's investment objectives, and by periodically reviewing the Fund's performance and use of leverage with the Fund's Board of Trustees.

Offering Methods

The Fund may offer shares using one or more of the following methods: (i) at-the-market transactions through one or more broker-dealers that have entered into a selected dealer agreement with Nuveen Securities, one of the Fund's underwriters; (ii) through an underwriting syndicate; and (iii) through privately negotiated transactions between the Fund and specific investors. See Plan of Distribution.

Distribution Through At-the-Market Transactions. The Fund from time to time may issue and sell its Common Shares through Nuveen Securities, to certain broker-dealers that have entered into selected dealer agreements with Nuveen Securities. Currently, Nuveen Securities has entered into a selected dealer agreement with UBS Securities LLC (UBS) pursuant to which UBS will be acting as Nuveen Securities' sub-placement agent with respect to at-the-market offerings of Common Shares. Common Shares will only be sold on such days as shall be agreed to by the Fund and Nuveen Securities. Common Shares will be sold at market prices, which shall be determined with reference to trades on the NYSE, subject to a minimum price to be established each day by the Fund. The minimum price on any day will not be less than the current net asset value per share plus the per share amount of the commission to be paid to Nuveen Securities. The Fund and Nuveen Securities will suspend the sale of Common Shares if the per share price of the shares is less than the minimum price.

The Fund will compensate Nuveen Securities with respect to sales of the Common Shares at a commission rate of up to 1.0% of the gross proceeds of the sale of Common Shares. Nuveen Securities will compensate broker-dealers participating in the offering at a rate of up

to 0.8% of the gross sales proceeds of the sale of Common Shares sold by that broker-dealer. Settlements of Common Share sales will occur on the third business day following the date of sale.

In connection with the sale of the Common Shares on behalf of the Fund, Nuveen Securities may be deemed to be an underwriter within the meaning of the Securities Act of 1933, as amended (the "1933 Act"), and the compensation of Nuveen Securities may be deemed to be underwriting commissions or discounts. Unless otherwise indicated in a further Prospectus supplement, Nuveen Securities will act as underwriter on a reasonable efforts basis.

The offering of Common Shares pursuant to the Distribution Agreement (defined below under "Plan of Distribution - Distribution Through At-the-Market Transactions") will terminate upon the earlier of (i) the sale of all Common Shares subject thereto or (ii) termination of the Distribution Agreement. The Fund and Nuveen Securities each have the right to terminate the Distribution Agreement in its discretion at any time. See "Plan of Distribution - Distribution Through At-the-Market Transactions."

The Fund currently intends to distribute the shares offered pursuant to this Prospectus primarily through at-the-market transactions, although from time to time it may also distribute shares through an underwriting syndicate or a privately negotiated transaction. To the extent shares are distributed other than through at-the-market transactions, the Fund will file a supplement to this Prospectus describing such transactions.

UBS, its affiliates and their respective employees hold or may hold in the future, directly or indirectly, investment interests in Nuveen Investments, Inc. and its funds. The interests held by employees of UBS or its affiliates are not attributable to, and no investment discretion is held by, UBS or its affiliates.

The Fund's closing price on the NYSE on November 15, 2013 was \$18.82.

Distribution Through Underwriting Syndicates. The Fund from time to time may issue additional Common Shares through a syndicated secondary offering. In order to limit the impact on the market price of the Fund's Common Shares, underwriters will market and price the offering on an expedited basis (e.g., overnight or similarly abbreviated offering period). The Fund will launch a syndicated offering on a day, and upon terms, mutually agreed upon between the Fund, Nuveen Securities and the underwriting syndicate.

The Fund will offer its shares at a price equal to a specified discount of up to 5% from the closing market price of the Fund's Common Shares on the day prior to the offering date. The applicable discount will be negotiated by the Fund and Nuveen Securities in consultation with the underwriting syndicate on a transaction-by-transaction basis. The Fund will compensate the underwriting syndicate out of the

proceeds of the offering based upon a sales load of up to 4% of the gross proceeds of the sale of Common Shares. The minimum net proceeds per share to the Fund will not be less than the greater of (i) the Fund's latest net asset value per Common Share or (ii) 91% of the closing market price of the Fund's Common Shares on the day prior to the offering date. See Plan of Distribution Distribution Through Underwriting Syndicates.

Distribution Through Privately Negotiated Transactions. The Fund, through Nuveen Securities, from time to time may sell directly to, and solicit offers from, institutional and other sophisticated investors, who may be deemed to be underwriters as defined in the 1933 Act for any resale of Common Shares.

The terms of such privately negotiated transactions will be subject to the discretion of the management of the Fund. In determining whether to sell Common Shares through a privately negotiated transaction, the Fund will consider relevant factors including, but not limited to, the attractiveness of obtaining additional funds through the sale of Common Shares, the purchase price to apply to any such sale of Common Shares and the investor seeking to purchase the Common Shares.

Common Shares issued by the Fund through privately negotiated transactions will be issued at a price equal to the greater of (i) the net asset value per Common Share or (ii) at a discount ranging from 0% to 5% of the average daily closing market price of the Fund's Common Shares at the close of business on the two business days preceding the date upon which Common Shares are sold pursuant to the privately negotiated transaction. The applicable discount will be determined by the Fund on a transaction-by-transaction basis. See Plan of Distribution Distribution Through Privately Negotiated Transactions.

Special Risk Considerations

Investment in the Fund involves special risk considerations, which are summarized below. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund is not intended to be a complete investment program. See Risk Factors for a more complete discussion of the special risk considerations of an investment in the Fund.

Investment and Market Risk. An investment in the Fund's Common Shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in Common Shares represents an indirect investment in the securities owned by the Fund, substantially all of which are traded on a national securities exchange or in the over-the-counter markets. Your Common Shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions. See Risk Factors Investment and Market Risk.

Recent Market Conditions. The financial crisis in the U.S. and Many foreign economies over the past several years, including the European sovereign debt and banking crises, has resulted, and may continue to result, in an unusually high degree of volatility in the financial markets, both domestic and foreign. Liquidity in some markets has decreased; credit has become scarcer worldwide; and the values of some sovereign debt and of securities of issuers that hold that sovereign debt have fallen. These market conditions may continue or deteriorate further and may add significantly to the risk of short-term volatility in the Fund. In addition, global economies and financial markets are becoming increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact issuers in a different country or region. Because the situation is widespread and largely unprecedented, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these market conditions.

In response to the crisis, the U.S. and other governments and the Federal Reserve and certain foreign central banks have taken steps to support the financial markets. Where economic conditions are recovering, they are nevertheless perceived as still fragile. Withdrawal of government support, failure of efforts in response to the crisis, or investor perception that such efforts are not succeeding could adversely impact the value and liquidity of certain securities.

The severity or duration of these conditions may also be affected by policy changes made by governments or quasigovernmental organizations. Changes in market conditions will not have the same impact on all types of securities.

See Risk Factors Recent Market Conditions.

Market Discount from Net Asset Value. Shares of closed-end investment companies like the Fund have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot predict whether Common Shares will trade at, above or below net asset value. This characteristic is a risk separate and distinct from the risk that the Fund's net asset value could decrease as a result of investment activities. Investors bear a risk of loss to the extent that the price at which they sell their shares is lower in relation to the Fund's net asset value than at the time of purchase, assuming a stable net asset value. Proceeds from the sale of Common Shares in this offering will be reduced by shareholder transaction costs (if applicable, which vary depending on the offering method used). Depending on the premium of the Common Shares at the time of any offering of Common Shares hereunder, the Fund's net asset value may be reduced by an amount up to the offering costs borne by the Fund (estimated to be an additional 0.82% of the offering price assuming a Common Share offering price of \$18.82 (the Fund's closing price on the NYSE on November 15, 2013)).

The net asset value per Common Share will also be reduced by costs associated with any future issuances of Common or preferred shares. The Common Shares are designed primarily for long-term investors, and you should not view the Fund as a vehicle for trading purposes. See [Risk Factors](#) [Market Discount from Net Asset Value](#).

Issuer Level Risks.

Issuer Credit Risk. Issuers of debt instruments in which the Fund may invest may default on their obligations to pay principal or interest when due. This non-payment would result in a reduction of income to the Fund, a reduction in the value of a debt instrument experiencing non-payment and, potentially, a decrease in the net asset value of the Fund. There can be no assurance that liquidation of collateral would satisfy the issuer's obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. In the event of bankruptcy of an issuer, the Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a debt instrument. See [Risks](#) [Issuer Level Risks](#) [Issuer Credit Risk](#).

Below Investment Grade Risk. The Fund may invest without limitation in debt instruments that are rated below investment grade at the time of investment or that are unrated but judged by the portfolio managers to be of comparable quality. No more than 30% of the Fund's Managed Assets may be invested in debt instruments rated CCC+ or Caa1 or below by any NRSRO or that are unrated but judged by the portfolio managers to be of comparable quality. Debt instruments of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds or high yield debt, which implies higher price volatility and default risk than investment grade instruments of comparable terms and duration. Issuers of lower grade instruments may be highly leveraged and may not have available to them more traditional methods of financing. The prices of these lower grade instruments are typically more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher rated instruments. The secondary market for lower rated instruments, including some senior loans, may not be as liquid as the secondary market for more highly rated instruments, a factor which may have an adverse effect on the Fund's ability to dispose of a particular security. Distressed and defaulted securities, including debtor-in-possession loans, generally present the same risks as investments in below investment grade debt instruments. However, in most cases, these risks are of a greater magnitude because of the uncertainties of investing in an issuer undergoing financial distress. See [Risks](#) [Issuer Level Risks](#) [Below Investment Grade Risk](#).

Non-U.S. Issuer Risk. Investments in instruments of non-U.S. issuers may involve special risks not presented by investments in

instruments of U.S. issuers, including the following: (i) less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) possible seizure of a company's assets; (vii) restrictions imposed by non-U.S. countries limiting the ability of non-U.S. issuers to make payments of principal and/or interest due to blockages of foreign currency exchanges or otherwise; and (viii) withholding and other non-U.S. taxes may decrease the Fund's return. These risks are more pronounced to the extent that the Fund invests a significant portion of its assets in companies located in one region and to the extent that the Fund invests in instruments of issuers in emerging markets countries. In addition, economic, political and social developments may significantly disrupt the financial markets or interfere with the Fund's ability to enforce its rights against non-U.S. issuers. The Fund's Managed Assets to be invested in debt instruments of non-U.S. issuers may include debt instruments of issuers located, or conducting their business in, emerging markets countries. See Risks Issuer Level Risks Non-U.S. Issuer Risk.

Security Level Risks.

Senior Loan Risk. Senior loans hold the most senior position in the capital structure of a business entity, are typically secured with specific collateral and have a claim on the assets and/or stock of the Borrower that is senior to that held by subordinated debt holders and stockholders of the Borrower. Senior loans that the Fund intends to invest in are usually rated below investment grade, and share the same risks of other below investment grade debt instruments.

Although the Fund invests primarily in senior loans that are secured by specific collateral, there can be no assurance the liquidation of such collateral would satisfy a Borrower's obligation to the Fund in the event of Borrower default or that such collateral could be readily liquidated under such circumstances. If the terms of a senior loan do not require the Borrower to pledge additional collateral in the event of a decline in the value of the already pledged collateral, the Fund will be exposed to the risk that the value of the collateral will not at all times equal or exceed the amount of the Borrower's obligations under the senior loan.

In the event of bankruptcy of a Borrower, the Fund could also experience delays or limitations with respect to its ability to realize the benefits of any collateral securing a senior loan. Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the senior loans

to presently existing or future indebtedness of the Borrower or take other action detrimental to lenders, including the Fund. Such court action could under certain circumstances include invalidation of senior loans.

Second Lien Loans and Unsecured Loans Risk. Second lien loans and unsecured loans generally are subject to the same risks associated with investments in senior loans, as discussed above. Because second lien loans and unsecured loans are lower in priority of payment to senior loans, they are subject to the additional risk that the cash flow of the Borrower and property securing the loan, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the Borrower. This risk is generally higher for unsecured loans, which are not backed by a security interest in any specific collateral. Second lien loans and unsecured loans are expected to have greater price volatility than senior loans and may be less liquid. Second lien loans and unsecured loans of below investment grade quality also share the same risks of other below investment grade debt instruments.

Subordinated Loans and Other Subordinated Debt Instruments. Issuers of subordinated loans and other subordinated debt instruments in which the Fund may invest usually will have, or may be permitted to incur, other debt that ranks equally with, or senior to, such subordinated loans or other debt instruments. By their terms, such debt instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which the Fund is entitled to receive payments in respect of subordinated loans or other subordinated debt instruments in which it invests. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of an issuer, holders of debt instruments ranking senior to the Fund's subordinated loans or other debt instruments would typically be entitled to receive payment in full before the Fund receives any distribution in respect of its investment. After repaying such senior creditors, the issuer may not have any remaining assets to use for repaying its obligation to the Fund. In the case of debt ranking equally with subordinated loans or other subordinated debt instruments in which the Fund invests, the Fund would have to share on an equal basis any distributions with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant issuer. In addition, the Fund will likely not be in a position to control any issuer by investing in its debt instruments. As a result, the Fund will be subject to the risk that an issuer in which it invests may make business decisions with which the Fund disagrees and the management of such issuer, as representatives of the holders of their common equity, may take risks or otherwise act in ways that do not serve the Fund's interests as debt investors.

Interest Rate Risk. Interest rate risk is the risk that fixed rate debt instruments will decline in value because of changes in market

interest rates. When market interest rates rise, the market value of such instruments generally will fall. The Fund's investment in such fixed rate instruments means that the net asset value and market price of Common Shares will tend to decline if market interest rates rise. Market interest rates in the U.S. and in certain other countries in which the Fund may invest currently are near historically low levels. NFALLC and Symphony expect the Fund's policy of investing at least 70% of its Managed Assets in adjustable rate senior loans and second lien loans will make the Fund less volatile and its net asset value less sensitive to changes in market interest rates than if the Fund invested exclusively in fixed rate obligations. However, because interest rates on most adjustable rate instruments typically only reset periodically (e.g., monthly or quarterly), a sudden and significant increase in market interest rates may cause a decline in the value of these investments and in the Fund's net asset value. See Risks Security Level Risks Interest Rate Risk.

Risks in Loan Valuation. The Fund utilizes independent pricing services approved by the Board of Trustees to value portfolio instruments at their market value. If the pricing services are unable to provide a market value or if a significant event occurs such that the valuation(s) provided are deemed unreliable, the Fund may value portfolio instrument(s) at their fair value, which is generally the amount an owner might reasonably expect to receive upon a current sale. Valuation risks associated with investing in adjustable rate corporate debt instruments including, but not limited to: a limited number of market participants, a lack of publicly-available information, resale restrictions, settlement delays, corporate actions and adverse market conditions may make it difficult to value or sell such instruments. Because non-U.S. instruments may trade on days when Common Shares are not priced, net asset value can change at times when Common Shares cannot be sold.

Loan Participation Risk. The Fund may purchase a participation interest in a loan and by doing so acquire some or all of the interest of a bank or other lending institution in a loan to a Borrower. A participation typically will result in the Fund having a contractual relationship only with the lender, not the Borrower. As a result, the Fund assumes the credit risk of the lender selling the participation in addition to the credit risk of the Borrower. By purchasing a participation, the Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the Borrower. In the event of insolvency or bankruptcy of the lender selling the participation, the Fund may be treated as a general creditor of the lender and may not have a senior claim to the lender's interest in the loan. If the Fund only acquires a participation in the loan made by a third party, the Fund may not be able to control the exercise of any remedies that the lender would have under the loan. Such third party participation arrangements are

designed to give loan investors preferential treatment over high yield investors in the event of a deterioration in the credit quality of the Borrower. Even when these arrangements exist, however, there can be no assurance that the principal and interest owed on the loan will be repaid in full.

Prepayment Risk. During periods of declining interest rates or for other purposes, issuers may exercise their option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding instruments. This is known as call or prepayment risk.

Short Exposure Risk. The Fund may enter into tactical short positions, either directly or through derivatives, to create negative investment exposure or to hedge existing investment exposure. Short selling involves selling instruments that may be owned, and if not owned, borrowing the same instruments for delivery to the purchaser, with an obligation to replace the borrowed instruments at a later date. Short selling allows the short seller to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the instruments. A short sale creates the risk of an unlimited loss, in that the price of the underlying instrument could theoretically increase without limit, thus increasing the cost of buying those instruments to cover the short position. There can be no assurance that the instruments necessary to cover a short position will be available for purchase. Purchasing instruments to close out the short position can itself cause the price of the instruments to rise further, thereby exacerbating the loss. The success of the Fund's short selling to create negative investment exposure is dependent on Symphony's ability to correctly determine which investments are likely to decline in value, either in absolute terms or relative to corresponding long positions in the portfolio, which may be different than Symphony's ability to invest in long portfolio positions.

Illiquid Securities Risk. The Fund may invest in securities that, at the time of investment, are illiquid. Illiquid securities are not readily marketable and may include some restricted securities. Illiquid securities involve the risk that the securities will not be able to be sold at the time desired by the Fund or at prices approximating the value at which the Fund is carrying the securities on its books.

Other Risks Associated with Loans. Many senior loans, second lien loans and other loans in which the Fund may invest may not be rated by an NRSRO, generally will not be registered with the SEC and generally will not be listed on a securities exchange. In addition, the amount of public information available with respect to loans generally may be less extensive than that available for registered and exchange-listed securities. The frequency and magnitude of such changes cannot be predicted. No active trading market currently exists for some senior loans and most subordinated loans in which the Fund may invest and, thus, those loans may be illiquid. As a result, such senior loans and subordinated loans generally are more difficult to

value than more liquid securities for which a trading market exists. See [Risks Security Level Risks](#) [Other Risks Associated with Loans](#).

Derivatives Risk, including the Risk of Swaps. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in the investments underlying the derivatives. Whether the Fund's use of derivatives is successful will depend on, among other things, if NFALLC and Symphony correctly forecast market values, interest rates and other applicable factors. If NFALLC and Symphony incorrectly forecast these and other factors, the investment performance of the Fund will be unfavorably affected. In addition, the derivatives market is largely unregulated. It is possible that developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments.

The Fund may enter into debt-related derivatives instruments including credit swap default contracts and interest rate swaps. Like most derivative instruments, the use of swaps is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. In addition, the use of swaps requires an understanding by NFALLC and Symphony of not only of the referenced asset, rate or index, but also of the swap itself. The derivatives market is subject to a changing regulatory environment. It is possible that regulatory or other developments in the derivatives market could adversely affect the Fund's ability to successfully use derivative instruments. See [Risk Factors Derivatives Risk, Including the Risk of Swaps](#), [Risk Factors Counterparty Risk](#), [Risk Factors Hedging Risk](#) and the SAI.

Legislation and Regulatory Risk. At any time after the date of this Prospectus, legislation or additional regulations may be enacted that could negatively affect the assets of the Fund or the issuers of such assets. Changing approaches to regulation may have a negative impact on the entities and/or securities in which the Fund invests. Legislation or regulation may also change the way in which the Fund itself is regulated. There can be no assurance that future legislation, regulation or deregulation will not have a material adverse effect on the Fund or will not impair the ability of the Fund to achieve its investment objectives.

In addition, as new rules and regulations resulting from the passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") are implemented and new international capital and liquidity requirements are introduced under the Basel III Accords ("Basel III"), the market may not react the way NFALLC or Symphony expects. Whether the Fund achieves its investment objectives may depend on, among other things, whether NFALLC or Symphony correctly forecast market reactions to this and other

legislation. In the event NFALLC and Symphony incorrectly forecast market reaction, the Fund may not achieve its investment objectives and a Common Shareholder's shares may be worth less than his or her original investment.

Leverage Risk. The use of financial leverage created through Borrowings or issuing preferred shares in the future creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. The risk of loss attributable to the Fund's use of leverage is borne by Common Shareholders. The Fund's use of financial leverage can result in a greater decrease in net asset values in declining markets. The Fund's use of financial leverage similarly can magnify the impact of changing market conditions on Common Share market prices.

The Fund may use derivatives, such as interest rate swaps, to fix the effective rate paid on all or a portion of the Fund's leverage, in an effort to lower leverage costs over an extended period. Accordingly, the Fund cannot assure you that the use of leverage will result in a higher yield or return to Common Shareholders. The income benefit from leverage will be reduced to the extent that the difference narrows between the net earnings on the Fund's portfolio securities and its cost of leverage. Because of the costs of leverage, the Fund may incur losses even if the Fund has positive returns, if they are not sufficient to cover the costs of leverage. The Fund's cost of leverage includes interest on borrowing or dividends paid on preferred shares, if issued in the future as well as any one-time costs (e.g., issuance costs) and ongoing fees and expenses associated with such leverage.

The Fund has issued preferred shares in the past, but does not currently have any preferred shares outstanding. The Fund may issue preferred shares in the future to increase the Fund's leverage.

Furthermore, the amount of fees paid to NFALLC (which in turn pays a portion of its fees to Symphony) for investment advisory services will be higher if the Fund uses leverage because the fees will be calculated based on the Fund's Managed Assets this may create an incentive for NFALLC and Symphony to leverage the Fund.

The Fund may invest in the securities of other investment companies, which may themselves be leveraged and therefore present similar risks to those described above and magnify the Fund's leverage risk.

See Risk Factors Leverage Risk and Use of Leverage.

Counterparty Risk. Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives or other transactions supported by another party's credit may affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant losses and financial hardships, including

bankruptcy, as a result of exposure to sub-prime mortgages and other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced these entities' capital and called into question their continued ability to perform their obligations under such transactions. By using such derivatives or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. See Risk Factors Counterparty Risk.

Potential Conflicts of Interest Risk. NFALLC and Symphony each provide a wide array of portfolio management and other asset management services to a mix of clients and may engage in ordinary course activities in which their respective interests or those of their clients may compete or conflict with those of the Fund. For example, NFALLC and Symphony may provide investment management services to other funds and accounts that follow investment objectives similar to those of the Fund. In certain circumstances, and subject to its fiduciary obligations under the Investment Advisers Act of 1940, Symphony may have to allocate a limited investment opportunity among its clients, which include closed-end funds, open-end funds and other commingled funds. NFALLC and Symphony have each adopted policies and procedures designed to address such situations and other potential conflicts of interests. For additional information about potential conflicts of interest, and the way in which NFALLC and Symphony address such conflicts, please see the SAI.

Other Risks.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Share's market price or your overall returns. See Risk Factors Reinvestment Risk.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. See Risk Factors Inflation Risk.

Hedging Risk. The Fund's use of derivatives or other transactions to reduce risks involves costs and will be subject to NFALLC and Symphony's ability to predict correctly changes in the relationships of such hedge instruments to the Fund's portfolio holdings or other factors. No assurance can be given that NFALLC and Symphony's judgment in this respect will be correct. In addition, no assurance can be given that the Fund will enter into hedging or other transactions at times or under circumstances in which it may be advisable to do so. See Risk Factors Hedging Risk.

Anti-Takeover Provisions. The Fund's Declaration of Trust (the Declaration) and the Fund's By-Laws (the By-Laws) include provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See Certain Provisions in the Declaration of Trust and Risk Factors Anti-Takeover Provisions.

Reliance on Investment Adviser. The Fund is dependent upon services and resources provided by its investment adviser, NFALLC, and therefore NFALLC's parent, Nuveen Investments. Nuveen Investments has a substantial amount of indebtedness. Nuveen Investments, through its own business or the financial support of its affiliates, may not be able to generate sufficient cash flow from operations or ensure that future borrowings will be available in an amount sufficient to enable it to pay its indebtedness with scheduled maturities beginning in 2014 or to fund its other liquidity needs. Nuveen Investments failure to satisfy the terms of its indebtedness, including covenants therein, generally may have an adverse effect on the financial condition of Nuveen Investments.

In addition, an investment in the Fund's Common Shares raises other risks, which are more fully disclosed in the Risk Factors section of this Prospectus.

Distributions

The Fund pays monthly distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors, including dividends payable on preferred shares, if issued in the future. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could change. For each taxable year, the Fund will distribute all or substantially all of its net investment income (after it pays accrued dividends on any outstanding preferred shares). In addition, the Fund intends to distribute, at least annually, the net capital gain (which is the excess of net long-term capital gain over net short-term capital loss) and taxable ordinary income, if any, to Common Shareholders so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any preferred shares, if issued in the future. While not currently anticipated, if the Fund makes total distributions during a given calendar year in an amount that exceeds the Fund's net investment income and net capital gain for that calendar year, the excess would generally be treated by Common Shareholders as a return of capital fo
