QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended December 31, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-19291

CORVEL CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

2010 Main Street, Suite 600

Irvine, CA
(Address of principal executive office)

Registrant's telephone number, including area code: (949) 851-1473

33-0282651
(IRS Employer
Identification No.)

92614

(zip code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (check one)

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's Common Stock, \$0.0001 par value per share, as of January 27, 2014 was 20,924,613.

CORVEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note A Basis of Presentation and Summary of Significant Accounting Policies

The unaudited financial statements herein have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. The accompanying interim financial statements have been prepared under the presumption that users of the interim financial information have either read or have access to the audited financial statements for the latest fiscal year ended March 31, 2013. Accordingly, note disclosures which would substantially duplicate the disclosures contained in the March 31, 2013 audited financial statements have been omitted from these interim financial statements.

The Company evaluated all subsequent events or transactions through the date of filing this report. During the period subsequent to December 31, 2013, the Company repurchased 17,754 shares for \$850,000 for an average of \$47.85 per share. These shares were repurchased under the Company's ongoing share repurchase program described in Note C.

Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2013 are not necessarily indicative of the results that may be expected for the fiscal year ending March 31, 2014. For further information, refer to the consolidated financial statements and notes for the fiscal year ended March 31, 2013 included in the Company's Annual Report on Form 10-K.

Basis of Presentation: The consolidated financial statements include the accounts of CorVel and its subsidiaries. Significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates: The preparation of financial statements in compliance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the accompanying financial statements. Actual results could differ from those estimates. Significant estimates include the values assigned to intangible assets, capitalized software development, the allowance for doubtful accounts, accrual for income taxes, share-based payments related to performance based awards, loss contingencies, estimated claims for claims administration revenue recognition, estimates used in stock options valuations, and accrual for self-insurance reserves.

Cash and Cash Equivalents: Cash and cash equivalents consist of short-term highly-liquid investment-grade interest-bearing securities with maturities of 90 days or less when purchased. The carrying amounts of the Company's financial instruments approximate their fair values at March 31, 2013 and December 31, 2013.

Table of Contents

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note A Basis of Presentation and Summary of Significant Accounting Policies (continued)

Fair Value of Financial Instruments: The Company applies Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements with respect to fair value measurements of (a) nonfinancial assets and liabilities that are recognized or disclosed at fair value in the Company s Consolidated Financial Statements on a recurring basis (at least annually) and (b) all financial assets and liabilities. ASC 820 prioritizes the inputs used in measuring fair value into the following hierarchy:

Level 1 Quoted market prices in active markets for identical assets or liabilities;

Level 2 Observable inputs other than those included in Level 1 (for example, quoted prices for similar assets in active markets or quoted prices for identical assets in inactive markets); and

Level 3 Unobservable inputs reflecting management s own assumptions about the inputs used in estimating the value of the asset.

The carrying amount of the Company s financial instruments (i.e. cash, accounts receivable, accounts payable, etc.) are all Level 1 and approximate their fair values at March 31, 2013 and December 31, 2013. The Company has no Level 2 or Level 3 assets.

Goodwill: The Company accounts for its business combinations in accordance with the FASB ASC 805-10 through ASC 805-50, Business Combinations, which requires that the purchase method of accounting be applied to all business combinations and addresses the criteria for initial recognition of intangible assets and goodwill. In accordance with FASB ASC 350-10 through ASC 350-30, goodwill and other intangible assets with indefinite lives are not amortized but are tested for impairment annually, or more frequently if circumstances indicate the possibility of impairment. If the carrying value of goodwill or an intangible asset exceeds its fair value, an impairment loss shall be recognized.

Revenue Recognition: The Company recognizes revenue when there is persuasive evidence of an arrangement, the services have been provided to the customer, the sales price is fixed or determinable, and collectability is reasonably assured. For the Company s services, as the Company s professional staff performs work, they are contractually permitted to bill for fees earned in fraction of an hour increments worked or by units of production. The Company recognizes revenue as the time is worked or as units of production are completed, which is when the revenue is earned and realized. Labor costs are recognized as the costs are incurred. The Company derives its revenue from the sale of Network Solutions and Patient Management services. Network Solutions and Patient Management services may be sold individually or combined. When a sale combines multiple elements, the Company accounts for multiple element arrangements in accordance with the guidance included in ASC 605-25.

Management evaluates agreements with customers in accordance with the provision of the revenue recognition topic ASC 605 that addresses multiple-deliverable revenue arrangements. The multiple-deliverable arrangements entered into consist of bundled managed care which included various units of accounting such as network solutions, and patient management which includes claims administration. Such elements are considered separate units of accounting due to each element having value to the customer on a stand-alone basis. The selling price for each unit of accounting is determined using contract price and management estimates. When the Company's customers purchase several products the pricing of the products sold is generally the same as if the products were sold on an individual basis. Revenue is recognized as the work is performed in accordance with the Company's customer contracts. Based upon the nature of the Company's products, bundled managed care elements are generally delivered in the same accounting period. The Company recognizes revenue for patient management claims administration services over the life of the customer contract. The Company estimates, based upon prior experience in managing claims, the deferral amount from when the claim is received to when the customer contract expires.

CORVEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note A Basis of Presentation and Summary of Significant Accounting Policies (continued)

Recent Accounting Pronouncements: No new accounting pronouncement issued or effective during the fiscal year had or is expected to have a material impact on the Company's Consolidated Financial Statements.

Accounts Receivable: The majority of the Company's accounts receivable are due from companies in the property and casualty insurance industries, self-insured employers, and government entities. Accounts receivable are generally due within 30 days and are stated as amounts due from customers net of an allowance for doubtful accounts. Those accounts outstanding longer than the contractual payment terms are considered past due. The Company determines its allowance by considering a number of factors, including the length of time trade accounts receivable are past due, the Company's previous loss history, the customer's current ability to pay its obligation to the Company and the condition of the general economy and the industry as a whole. No one customer accounted for 10% or more of accounts receivable at either March 31, 2013 or December 31, 2013. No one customer accounted for 10% or more of revenue during the nine months ended December 31, 2012 or 2013.

Property and Equipment: Additions to property and equipment are recorded at cost. Depreciation and amortization are provided using the straight-line method over the estimated useful lives of the related assets, which range from one to seven years. The Company accounts for internally developed software costs in accordance with FASB ASC 350-40, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, which allows for the capitalization of software developed for internal use. These costs are included in computer software in property and equipment and are amortized over a period of five years.

Long-Lived Assets: The carrying amount of all long-lived assets is evaluated periodically to determine if adjustment to the depreciation and amortization period or to the unamortized balance is warranted. Such evaluation is based principally on the expected utilization of the long-lived assets and the projected, undiscounted cash flows of the operations in which the long-lived assets are deployed.

Income Taxes: The Company provides for income taxes in accordance with provisions specified in ASC 740, *Accounting for Income Taxes*. Accordingly, deferred income tax assets and liabilities are computed for differences between the financial statement and tax bases of assets and liabilities. These differences will result in taxable or deductible amounts in the future, based on tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which temporary differences become deductible. In making an assessment regarding the probability of realizing a benefit from these deductible differences, management considers the Company's current and past performance, the market environment in which the Company operates, tax-planning strategies and the length of carry-forward periods for loss carry-forwards, if any. Valuation allowances are established when necessary to reduce deferred tax assets to amounts that are more likely than not to be realized. Further, the Company provides for income tax issues not yet resolved with federal, state and local tax authorities. The balance of

the unrecognized tax benefits as of March 31, 2013 and December 31, 2013 was \$772,000 and \$976,000, respectively.

Earnings Per Share: Earnings per common share-basic is based on the weighted average number of common shares outstanding during the period. Earnings per common share-diluted is based on the weighted average number of common shares and common share equivalents outstanding during the period. In calculating earnings per share, earnings are the same for the basic and diluted calculations. Weighted average shares outstanding decreased in the December 2013 quarter compared to the same quarter of the prior year primarily due to repurchase of shares under the Company's share repurchase program. See also Note D.

Table of Contents

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note A Basis of Presentation and Summary of Significant Accounting Policies (continued)

Stock Split: During the quarter ended June 30, 2013, the Company's Board of Directors declared a two-for-one stock split in the form of a 100% stock dividend with a record date of June 12, 2013 and a distribution date of June 26, 2013. All prior period share and per share calculations in these financial statements and elsewhere in this report have been retroactively adjusted to reflect this split.

Note B Stock Based Compensation and Stock Options

Under the Company's Restated Omnibus Incentive Plan (formerly the Restated 1988 Executive Stock Option Plan) (the Plan) as in effect at December 31, 2013, options for up to 19,365,500 shares of the Company's common stock may be granted over the life of the Plan to key employees, non-employee directors and consultants at exercise prices not less than the fair market value of the stock at the date of grant. Options granted under the Plan are non-statutory stock options and generally vest 25% one year from date of grant and the remaining 75% vesting ratably each month for the next 36 months. The options granted to employees and the board of directors expire at the end of five years and ten years from date of grant, respectively.

The Company records compensation expense for employee stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes option-pricing model with the assumptions included in the table below. The Company uses historical data among other factors to estimate the expected volatility, the expected option life, and the expected forfeiture rate. The risk-free rate is based on the interest rate paid on a U.S. Treasury issue with a term similar to the estimated life of the option. Based upon the historical experience of options cancellations, the Company has estimated an annualized forfeiture rate of 12.85% and 12.40% for the three months ended December 31, 2012 and 2013, respectively. Forfeiture rates will be adjusted over the requisite service period when actual forfeitures differ, or are expected to differ, from the estimate. The following assumptions were used to estimate the fair value of options granted during the three months ended December 31, 2012 and 2013 using the Black-Scholes option-pricing model:

	Three Months Ended December 31,	
	2012	2013
Risk-free interest rate	0.73%	1.35%
Expected volatility	47%	47%
Expected dividend yield	0.00%	0.00%
Expected forfeiture rate	12.85%	12.40%

Expected weighted average life of option in years	4.5 years	4.4 years

CORVEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note B Stock Options and Stock-Based Compensation (continued)

A summary of the status for all outstanding options at December 31, 2013, and changes during the three months then ended, is presented in the table below:

	Number of Options	Weighted Average Exercise Per Share	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value as of December 31, 2013
Options outstanding at October 1, 2013	1,191,251	\$ 20.39		
Granted	142,650	40.24		
Exercised	(69,276)	16.33		
Cancelled forfeited	(2,703)	26.40		
Cancelled expired	(1,354)	12.91		
Ending outstanding	1,260,568	\$ 22.85	3.59	\$ 30,062,229
Ending vested and expected to vest	1,075,586	\$ 21.66	3.46	\$ 26,935,727
Ending exercisable at December 31, 2013	467,790	\$ 15.71	2.73	\$ 14,497,528

The weighted-average grant-date fair value of options granted during the three months ended December 31, 2012 and 2013, was \$17.05 and \$16.70, respectively.

Included in the above-noted stock option grants and stock compensation expense are performance-based stock options under which vesting occurs only upon the Company achieving certain revenue or earnings per shares targets on a calendar year basis as determined by the Company's board of directors. These options were valued in the same manner as the time-vesting options. However, the Company only recognizes stock compensation to the extent that the targets are determined to be achieved which allow the performance options to vest. The Company recognized \$0 and \$285,000 of stock compensation expense for the three months ended December 31, 2012 and 2013, respectively, for performance-based stock options. The Company recognized \$0 and \$448,000 of stock compensation expense for the nine months ended December 31, 2012 and 2013, respectively, for performance-based stock options.

Note C Treasury Stock and Subsequent Event

The Company's Board of Directors initially approved the commencement of a share repurchase program in the fall of 1996. In August 2013, the Board approved a 2,000,000 share expansion of the repurchase program to 34,000,000 shares over the life of the share repurchase program. Since the commencement of the share repurchase program, the Company has spent \$325 million to repurchase 32,080,182 shares of its common stock, equal to 61% of the outstanding common stock had there been no repurchases. The average price of these repurchases was \$10.14 per share. These repurchases were funded primarily from the net earnings of the Company, along with the proceeds from the exercise of common stock options. During the three and nine months ended December 31, 2013, the Company repurchased 105,553 shares for \$4.2 million, and 763,168 shares for \$24 million, respectively. The Company had 20,936,089 shares of common stock outstanding as of December 31, 2013, net of the 32,080,182 shares in treasury. Subsequent to the end of the quarter, through January 21, 2014, the Company repurchased 17,754 shares for \$850,000 for an average of \$47.85 per share. During the quarter ended June 30, 2013, the Company's Board of Directors declared a two-for-one stock split in the form of a 100% stock dividend with a record date of June 12, 2013 and a distribution date of June 26, 2013. All prior period share and per share calculations in these financial statements and elsewhere in this report have been retroactively adjusted to reflect this split.

Table of Contents

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2013

Note D Weighted Average Shares and Net Income Per Share

Weighted average basic common shares decreased from 22,234,000 for the quarter ended December 31, 2012 to 20,936,000 for the quarter ended December 31, 2013. Weighted average diluted common and common equivalent shares decreased from 22,426,000 for the quarter ended December 31, 2012 to 21,256,000 for the quarter ended December 31, 2013. The net decrease in both of these weighted share calculations is due to the repurchase of common stock as noted above, offset by an increase in shares outstanding due to the exercise of stock options under the Company's employee stock option plan.

Table of Contents

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note D Weighted Average Shares and Net Income Per Share (continued)

Net income per common and common equivalent shares was computed by dividing net income by the weighted average number of common and common stock equivalents outstanding during the quarter. During the quarter ended June 30, 2013, the Company's Board of Directors declared a two-for-one stock split in the form of a 100% stock dividend with a record date of June 12, 2013 and a distribution date of June 26, 2013. All prior period share and per share calculations in these financial statements and elsewhere in this report have been retroactively adjusted to reflect this split. The calculations of the basic and diluted weighted shares for the three and nine months ended December 31, 2012 and 2013, are as follows:

	Three Months Ended December 31,	
	2012	2013
Net Income	\$ 5,924,000	\$ 8,775,000
Basic:		
Weighted average common shares outstanding	22,234,000	20,936,000
Net Income per share	\$ 0.27	\$ 0.42
Diluted:		
Weighted average common shares outstanding	22,234,000	20,936,000
Treasury stock impact of stock options	192,000	320,000
Total common and common equivalent shares	22,426,000	21,256,000
Net Income per share	\$ 0.26	\$ 0.41

Treasury stock impact of stock options	210,000	249,000
Total common and common equivalent shares	22,676,000	21,406,000
Net Income per share	\$ 0.84	\$ 1.22

Table of Contents**CORVEL CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****December 31, 2013****Note E Shareholder Rights Plan**

During fiscal 1997, the Company's Board of Directors approved the adoption of a Shareholder Rights Plan. The Shareholder Rights Plan provides for a dividend distribution to CorVel stockholders of one preferred stock purchase right for each outstanding share of CorVel's common stock under certain circumstances. In November 2008, the Company's Board of Directors approved an amendment to the Shareholder Rights Plan to extend the expiration date of the rights to February 10, 2022.

The rights are designed to assure that all shareholders receive fair and equal treatment in the event of any proposed takeover of the Company and to encourage a potential acquirer to negotiate with the Board of Directors prior to attempting a takeover. The rights have an exercise price of \$118 per right, subject to subsequent adjustment. The rights trade with the Company's common stock and will not be exercisable until the occurrence of certain takeover-related events.

Generally, the Shareholder Rights Plan provides that if a person or group acquires 15% or more of the Company's common stock without the approval of the Board, subject to certain exceptions, the holders of the rights, other than the acquiring person or group, would, under certain circumstances, have the right to purchase additional shares of the Company's common stock having a market value equal to two times the then-current exercise price of the right.

In addition, if the Company is thereafter merged into another entity, or if 50% or more of the Company's consolidated assets or earning power are sold, then the right will entitle its holder to buy common shares of the acquiring entity having a market value equal to two times the then-current exercise price of the right. The Company's Board of Directors may exchange or redeem the rights under certain conditions.

Note F Other Intangible Assets

Other intangible assets consist of the following at December 31, 2013:

Item	Life	Cost	Nine Months Ended December 31, 2013 Amortization Expense	Accumulated Amortization at December 31, 2013	Cost, Net of Accumulated Amortization at December 31, 2013
Covenants Not to Compete	5 Years	\$ 775,000	\$ 26,000	\$ 734,000	\$ 41,000
Customer Relationships	18-20 Years	7,922,000	317,000	2,771,000	5,151,000
TPA Licenses	15 Years	204,000	10,000	87,000	117,000
Total		\$ 8,901,000	\$ 353,000	\$ 3,592,000	\$ 5,309,000

Table of Contents

CORVEL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2013

Note G Line of Credit

In September 2013, the Company renewed a line of credit agreement. The line is with a financial institution to provide a revolving credit facility with borrowing capacity of up to \$10 million. Borrowings under this agreement, as amended, bear interest, at the Company's option, at a fixed LIBOR-based rate plus 1.50% or at a fluctuating rate determined by the financial institution to be 1.50% above the daily one-month LIBOR rate. The loan covenants require the Company to maintain the current assets to liabilities ratio of at least 1.25:1, debt to tangible net worth not greater than 1.25:1 and have positive net income. There were no outstanding revolving loans at any time during fiscal 2013 or the nine months ended December 31, 2013, or as of the date hereof, but letters of credit in the aggregate amount of \$8.0 million have been issued separate from the line of credit and therefore do not reduce the amount of borrowings available under the revolving credit facility. The renewed credit agreement expires in September 2014.

Note H Contingencies and Legal Proceedings

The Company is involved in litigation arising in the normal course of business. Management believes that resolution of these matters will not result in any payment that, individually or in the aggregate, would be material to the financial position or results of the operations of the Company.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report may include certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including (without limitation) statements with respect to anticipated future operating and financial performance, growth and acquisition opportunities and other similar forecasts and statements of expectation. Words such as expects, anticipates, intends, plans, predicts, believes, seeks, estimates, potential, continue, strive, ongoing, may, will, variations of these words and similar expressions, are intended to identify these forward-looking statements. Forward-looking statements made by the Company and its management are based on estimates, projections, beliefs and assumptions of management at the time of such statements and are not guarantees of future performance.

The Company disclaims any obligations to update or revise any forward-looking statement based on the occurrence of future events, the receipt of new information or otherwise, except as required by law. Actual future performance, outcomes and results may differ materially from those expressed in forward-looking statements made by the Company and its management as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions, including a decreasing number of national claims due to decreasing number of injured workers; cost of capital and capital requirements; existing and possible litigation and legal liability in the course of operations and the Company's ability to resolve such litigation; competition from other managed care companies; the ability to expand certain areas of the Company's business; shifts in customer demands; the ability of the Company to produce market-competitive software; changes in operating expenses including employee wages, benefits and medical inflation; governmental and public policy changes, including but not limited to legislative and administrative law and rule implementation or change; dependence on key personnel; and the continued availability of financing in the amounts and at the terms necessary to support the Company's future business.

Overview

CorVel Corporation is an independent nationwide provider of medical cost containment and managed care services designed to address the escalating medical costs of workers' compensation and auto policies. The Company's services are provided to insurance companies, third party administrators, (TPAs), governmental entities, and self-administered employers to assist them in managing the medical costs and monitoring the quality of care associated with healthcare claims.

Network Solutions Services

The Company's network solutions services are designed to reduce the price paid by its customers for medical services rendered in workers' compensation cases, auto policies and, to a lesser extent, group health policies. The network solutions offered by the Company include automated medical fee auditing, preferred provider services, retrospective utilization review, independent medical examinations, and inpatient bill review. Network solutions services also includes revenue from the Company's directed care network (CareIQ), including imaging and physical therapy.

Patient Management Services

The Company offers a range of patient management services, which involve working on a one-on-one basis with injured employees and their various healthcare professionals, employers and insurance company adjusters. The services are designed to monitor the medical necessity and appropriateness of healthcare services provided to workers compensation and other healthcare claimants and to expedite return to work. The Company offers these services on a

stand-alone basis, or as an integrated component of its medical cost containment services. Patient management services include the processing of claims for self-insured payors to property and casualty insurance.

Table of Contents

Seasonality

While we are not directly impacted by seasonal shifts, we are affected by the change in working days in a given quarter. There are generally fewer working days for our employees to generate revenue in the third fiscal quarter as we experience vacations, inclement weather and holidays.

Organizational Structure

The Company's management is structured geographically with regional vice-presidents who report to the Chief Executive Officer of the Company. Each of these regional vice-presidents is responsible for all services provided by the Company in his or her particular region and for the operating results of the Company in multiple states. These regional vice-presidents have area and district managers who are also responsible for all services provided by the Company in their given area and district.

Business Enterprise Segments

The Company operates in one reportable operating segment, managed care. The Company's services are delivered to its customers through its local offices in each region and financial information for the Company's operations follows this service delivery model. All regions provide the Company's patient management and network solutions services. FASB ASC 280-10 establishes standards for the way that public business enterprises report information about operating segments in annual and interim consolidated financial statements. The Company's internal financial reporting is segmented geographically, as discussed above, and managed on a geographic rather than service line basis, with virtually all of the Company's operating revenue generated within the United States.

Under FASB ASC 280-10, two or more operating segments may be aggregated into a single operating segment for financial reporting purposes if aggregation is consistent with the objective and basic principles, if the segments have similar economic characteristics, and if the segments are similar in each of the following areas: 1) the nature of products and services; 2) the nature of the production processes; 3) the type or class of customer for their products and services; and 4) the methods used to distribute their products or provide their services. The Company believes each of its regions meet these criteria as each provides similar services and products to similar customers using similar methods of productions and similar methods to distribute the services and products.

Summary of Quarterly Results

The Company generated revenues of \$121.1 million for the quarter ended December 31, 2013, an increase of \$13.8 million, or 12.9%, compared to revenues of \$107.3 million for the quarter ended December 31, 2012. The increase in revenues was primarily due to an increase in both patient management TPA services and network solutions services.

The Company's cost of revenues increased by \$7.8 million, from \$85.6 million in the December 31, 2012 quarter to \$93.4 million in the December 31, 2013 quarter, an increase of 9.2%. The Company's increase in cost of revenue is primarily due to the increase in revenue for the quarter. The cost of revenue did not increase at the same rate as revenue due to economies of scale achieved in our services.

The Company's general and administrative expense increased by \$1.5 million, from \$11.7 million in the December 31, 2012 quarter to \$13.2 million in the December 31, 2013 quarter, an increase of 12.8%. This increase is primarily due to an increase in information technology (IT), costs. Additionally, stock-based compensation expenses increased as the Company has hit targets related to performance stock options.

Table of Contents

The Company's income tax expense increased by \$1.6 million, or 39.7%, from \$4.1 million, in the December 31, 2012 quarter to \$5.7 million in the December 31, 2013 quarter. The increase in income tax expense was primarily due to the increase in income before income taxes from \$10 million to \$14.5 million.

Weighted diluted shares decreased from 22.4 million shares in the December 31, 2012 quarter to 21.3 million shares in the December 31, 2013 quarter, a decrease of 1,170,000 shares, or 5.2%. This decrease was due primarily to the repurchase of 1,153,360 shares of common stock in the twelve months ended December 31, 2013.

Diluted earnings per share increased from \$ 0.26 in the December 31, 2012 quarter to \$ 0.41 in the December 31, 2013 quarter, an increase of \$0.15 per share, or 53.8%. The increase in diluted earnings per share was due to the increase in income before income taxes in addition to a reduction in the number of shares outstanding due to shares repurchased under our stock repurchase program.

Results of Operations for the three months ended December 31, 2012 and 2013

The Company derives its revenues from providing patient management and network solutions services to payers of workers' compensation benefits, auto insurance claims and health insurance benefits. Patient management services include claims management, case management, 24/7 nurse triage, utilization management, vocational rehabilitation and life care planning. Network solutions services include medical bill review, PPO management, enhanced bill review, provider reimbursement, professional review, pharmacy services, directed care services, Medicare solutions and clearinghouse services. The percentage of total revenues attributable to patient management and network solutions services for the quarters ended December 31, 2012 and December 31, 2013 are as follows:

Percentage of Revenues	December 31, 2012	December 31, 2013
Patient management services	51.8%	51.5%
Network solutions services	48.2%	48.5%

Table of Contents

The following table sets forth, for the periods indicated, the dollar amounts, dollar and percent changes, share changes, and the percentage of revenues represented by certain items reflected in the Company's consolidated income statements for the three months ended December 31, 2012 and December 31, 2013. The Company's past operating results are not necessarily indicative of future operating results.

	Three Months Ended December 31, 2012	Three Months Ended December 31, 2013	Change	Percentage Change
Revenue	\$ 107,287,000	\$ 121,098,000	\$ 13,811,000	12.9%
Cost of revenues	85,553,000	93,392,000	7,839,000	9.2%
Gross profit	21,734,000	27,706,000	5,972,000	27.5%
Gross profit as percentage of revenue	20.3%	22.9%		
General and administrative	11,710,000	13,204,000	1,494,000	12.8%
General and administrative as percentage of revenue	10.9%	10.9%		
Income before income tax provision	10,024,000	14,502,000	4,478,000	44.7%
Income before income tax provision as percentage of revenue	9.3%	12.0%		
Income tax provision	4,100,000	5,727,000	1,627,000	39.7%
Net income	\$ 5,924,000	\$ 8,775,000	\$ 2,851,000	48.1%
Weighted Shares				
Basic	22,234,000	20,936,000	(1,298,000)	(5.8%)
Diluted	22,426,000	21,256,000	(1,170,000)	(5.2%)
Earnings Per Share				
Basic	\$ 0.27	\$ 0.42	\$ 0.15	55.6%
Diluted	\$ 0.26	\$ 0.41	\$ 0.15	57.7%

Revenues**Change in revenue from the quarter ended December 31, 2012 to the quarter ended December 31, 2013**

Revenues increased from \$107.3 million for the three months ended December 31, 2012 to \$121.1 million for the three months ended December 31, 2013, an increase of \$13.8 million, or 12.9%. The increase in revenues was primarily due to an increase in patient management services which includes all services sold to TPA customers which increased by 23% from \$89.8 million to \$112.1 million. The increase in patient management services was primarily due to an increase in the level of services provided to new TPA customers as the Company continues to expand brand awareness in the marketplace which we expect to continue in the coming year. Additionally, network solutions revenue increased 13.5% from \$154.6 million to \$173.8 million, primarily due to an increase in pharmacy services, CareIQ, and group health bill review.

Cost of Revenues

The Company's cost of revenues consist of direct expenses, costs directly attributable to the generation of revenue, and field indirect costs which are incurred in the field offices of the Company. Direct costs are primarily case manager salaries, bill review analysts, related payroll taxes and fringe benefits, and costs for independent medical examination (IME) and diagnostic imaging providers. Most of the Company's revenues are generated in

Table of Contents

offices which provide both patient management services and network solutions services. The largest of the field indirect costs are manager salaries and bonus, account executive base pay and commissions, administrative and clerical support, field systems personnel, prescription drug costs, PPO network developers, related payroll taxes and fringe benefits, office rent, and telephone expense. Approximately 35% of the costs incurred in the field are costs which support both the patient management services and network solutions operations of the Company's field offices, such as district managers, branch clerical, account executives, related payroll taxes and fringe benefits, rent, and telephone.

Change in cost of revenues from the quarter ended December 31, 2012 to the quarter ended December 31, 2013

The Company's cost of revenues increased from \$85.6 million in the three months ended December 31, 2012 to \$93.4 million in the three months ended December 31, 2013, an increase of \$7.8 million or 9.2%. The Company's increase in cost of revenue is primarily due to the increase in revenue for the quarter. The cost of revenue did not increase at the same rate as revenue due to economies of scale achieved in our services. The increase in cost was due to an increase in direct field operation expenses primarily from salaries increasing \$1.7 million, pharmacy services increasing \$1.6 million, and CareIQ

Notes to the Consolidated Financial Statements

(Unaudited)

1. The Company

RealPage, Inc., a Delaware corporation, and its subsidiaries, (the “Company” or “we” or “us”) is a provider of property management solutions that enable owners and managers of single-family and a wide variety of multi-family rental property types to manage their marketing, pricing, screening, leasing, accounting, purchasing and other property operations. Our on demand software solutions are delivered through an integrated software platform that provides a single point of access and a shared repository of prospect, resident and property data. By integrating and streamlining a wide range of complex processes and interactions among the rental housing ecosystem of owners, managers, prospects, residents and service providers, our platform optimizes the property management process and improves the experience for all of these constituents. Our solutions enable property owners and managers to optimize revenues and reduce operating costs through higher occupancy, improved pricing methodologies, new sources of revenue from ancillary services, improved collections and more integrated and centralized processes.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements and footnotes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Certain information and note disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) have been condensed or omitted pursuant to those rules and regulations. We believe that the disclosures made are adequate to make the information not misleading.

The consolidated financial statements included herein reflect all adjustments (consisting of normal, recurring adjustments) which are, in the opinion of management, necessary to state fairly the results for the interim periods presented. All intercompany balances and transactions have been eliminated in consolidation. The results of operations for the interim periods presented are not necessarily indicative of the operating results to be expected for any subsequent interim period or for the fiscal year.

It is suggested that these financial statements be read in conjunction with the financial statements and the notes thereto included in our Annual Report on Form 10-K filed with the SEC on March 3, 2014 (“Form 10-K”).

Segment and Geographic Information

Our chief operating decision maker is our Chief Executive Officer, who reviews financial information presented on a company-wide basis. As a result, we determined that the Company has a single reporting segment and operating unit structure.

Principally, all of our revenue for the three and nine months ended September 30, 2014 and 2013 was in North America.

Net long-lived tangible assets held were \$65.5 million and \$51.5 million in North America and \$6.0 million and \$3.3 million in our international subsidiaries at September 30, 2014 and December 31, 2013, respectively.

Accounting Policies and Use of Estimates

The preparation of financial statements in conformity with GAAP requires our management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include the allowance for doubtful accounts; the useful lives of tangible and intangible assets and the recoverability or impairment of tangible and intangible asset values; fair value measurements; purchase accounting allocations and related reserves; revenue and deferred revenue; stock-based compensation; and our effective income tax rate and the recoverability of deferred tax assets, which are based upon our expectations of future taxable income and allowable deductions. Actual results could differ from these estimates. For greater detail regarding these accounting policies and estimates, refer to our Form 10-K.

Revenue Recognition

We derive our revenue from three primary sources: our on demand software solutions; our on premise software solutions; and professional and other services. We commence revenue recognition when all of the following

conditions are met:

- there is persuasive evidence of an arrangement;
- the solution and/or service has been provided to the customer;
- the collection of the fees is probable; and

6

DRAFT 11-6-2014 430pm

Table of Contents

the amount of fees to be paid by the customer is fixed or determinable.

If the fees are not fixed or determinable, we recognize revenues when these criteria are met, which could be as payments become due from customers, or when amounts owed are collected. Accordingly, this may materially affect the timing of our revenue recognition and results of operations.

For multi-element arrangements that include multiple software solutions and/or services, we allocate arrangement consideration to all deliverables that have stand-alone value based on their relative selling prices. In such circumstances, we utilize the following hierarchy to determine the selling price to be used for allocating revenue to deliverables as follows:

• Vendor specific objective evidence (VSOE), if available. The price at which we sell the element in a separate stand-alone transaction;

• Third-party evidence of selling price (TPE), if VSOE of selling price is not available. Evidence from us or other companies of the value of a largely interchangeable element in a transaction; and

• Estimated selling price (ESP), if neither VSOE nor TPE of selling price is available. Our best estimate of the stand-alone selling price of an element in a transaction.

Our process for determining ESP for deliverables without VSOE or TPE considers multiple factors that may vary depending upon the unique facts and circumstances related to each deliverable. Key factors primarily considered in developing ESP include prices charged by us for similar offerings when sold separately, pricing policies and approvals from standard pricing and other business objectives.

From time to time, we sell on demand software solutions with professional services. In such cases, as each element has stand-alone value, we allocate arrangement consideration based on our ESP of the on demand software solution and VSOE of the selling price of the professional services.

Taxes collected from customers and remitted to governmental authorities are presented on a net basis.

On Demand Revenue

Our on demand revenue consists of license and subscription fees, transaction fees related to certain of our software-enabled value-added services and commissions derived from us selling certain risk mitigation services.

License and subscription fees are comprised of a charge billed at the initial order date and monthly or annual subscription fees for accessing our on demand software solutions. The license fee billed at the initial order date is recognized as revenue on a straight-line basis over the longer of the contractual term or the period in which the customer is expected to benefit, which we consider to be three years. Recognition starts once the product has been activated. Revenue from monthly and annual subscription fees is recognized on a straight-line basis over the access period.

We recognize revenue from transaction fees derived from certain of our software-enabled value-added services as the related services are performed.

As part of our risk mitigation services to the rental housing industry, we act as an insurance agent and derive commission revenue from the sale of insurance products to individuals. The commissions are based upon a percentage of the premium that the insurance company charges to the policyholder and are subject to forfeiture in instances where a policyholder cancels prior to the end of the policy. If the policy is cancelled, our commissions are forfeited as a percent of the unearned premium. As a result, we recognize the commissions related to these services ratably over the policy term as the associated premiums are earned. Our contract with our underwriting partner provides for contingent commissions to be paid to us in accordance with the agreement. This agreement provides for a calculation that considers, on the policies sold by us, earned premiums less i) earned agent commissions; ii) a percent of premium retained by our underwriting partner; iii) incurred losses; and iv) profit retained by our underwriting partner during the time period. Our estimate of contingent commission revenue considers historical loss experience on the policies sold by us.

On Premise Revenue

Revenue from our on premise software solutions is comprised of an annual term license, which includes maintenance and support. Customers can renew their annual term license for additional one-year terms at renewal price levels. We recognize the annual term license on a straight-line basis over the contract term.

In addition, we have arrangements that include perpetual licenses with maintenance and other services to be provided over a fixed term. We allocate and defer revenue equivalent to the VSOE of fair value for the undelivered elements and recognize the difference between the total arrangement fee and the amount deferred for the undelivered elements as revenue. We have determined that we do not have VSOE of fair value for our customer support and professional services in these specific arrangements. As a result, the elements within our multiple-element sales agreements do not qualify for treatment as separate units of accounting. Accordingly, we account for fees received under multiple-element arrangements with customer

7

DRAFT 11-6-2014 430pm

Table of Contents

support or other professional services as a single unit of accounting and recognize the entire arrangement ratably over the longer of the customer support period or the period during which professional services are rendered.

Professional and Other Revenue

Professional and other revenue is recognized as the services are rendered for time and material contracts. Training revenues are recognized after the services are performed.

Fair Value Measurements

We measure certain financial assets and liabilities at fair value pursuant to a fair value hierarchy based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable. Observable inputs reflect assumptions market participants would use in pricing an asset or liability based on market data obtained from independent sources while unobservable inputs reflect a reporting entity's pricing based upon its own market assumptions. The fair value hierarchy consists of the following three levels:

- Level 1 — Inputs are quoted prices in active markets for identical assets or liabilities.
- Level 2 — Inputs are quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable and market-corroborated inputs which are derived principally from or corroborated by observable market data.
- Level 3 — Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable.

Concentrations of Credit Risk

Our cash accounts are maintained at various financial institutions and may, from time to time, exceed federally insured limits. The Company has not experienced any losses in such accounts.

Concentrations of credit risk with respect to accounts receivable result from substantially all of our customers being in the multi-family rental housing market. Our customers, however, are dispersed across different geographic areas. We do not require collateral from customers. We maintain an allowance for losses based upon the expected collectability of accounts receivable. Accounts receivable are written off upon determination of non-collectability following established Company policies based on the aging from the accounts receivable invoice date.

No single customer accounted for 5% or more of our revenue or accounts receivable for the three or nine months ended September 30, 2014 or 2013.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board ("FASB") issued ASU 2014-09, Revenue from Contracts with Customers. This new standard will replace all current GAAP guidance on this topic and eliminate all industry-specific guidance. The new revenue recognition standard provides a unified model to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. This guidance will be effective for us beginning January 1, 2017 and at that time, can be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting.

In August 2014, the FASB issued ASU No. 2014-15, Presentation of Financial Statements-Going Concern (Subtopic 205-40), Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. This standard sets forth management's responsibility to evaluate, each reporting period, whether there is substantial doubt about our ability to continue as a going concern, and if so, to provide related footnote disclosures. The standard is effective for annual and interim reporting periods ending after December 15, 2016. We are currently evaluating this new standard and expect it to have no impact on our financial position and results of operations.

3. Acquisitions

2014 Acquisitions

In January 2014, we acquired certain assets from Bookt LLC, including the InstaManager product ("InstaManager"). InstaManager is a software-as-a-service vacation rental booking engine used by professional managers of vacation

rental properties. InstaManager offers marketing websites, online pricing and availability, online booking, automated reservations, payment processing and insurance sales. The acquisition of InstaManager expanded our product offerings to include property management software for the vacation rental market. We acquired InstaManager for a preliminary purchase price of \$9.2 million, consisting of a cash payment of \$6.0 million at closing, a deferred cash payment of up to \$1.0 million payable over two years after the acquisition date, and additional cash payments totaling up to \$7.0 million if certain revenue targets are met for

8

DRAFT 11-6-2014 430pm

Table of Contents

the years ended March 31, 2015 and March 31, 2016 (a Level 3 input). The initial fair value of the deferred cash payment and the contingent cash payments was \$0.8 million and \$2.4 million, respectively. The fair value was based on management's estimate of the fair value of the cash payment using a probability weighted discount model on the achievement of certain revenue targets and will be evaluated quarterly. This acquisition was financed from cash flows from operations. Acquired intangibles were recorded at their estimated fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. The trade name acquired has an indefinite useful life as we do not plan to cease using the trade name in the marketplace. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are deductible for tax purposes. The fair value of the deferred cash payment and the contingent cash payments were \$0.8 million and \$3.2 million, respectively, at September 30, 2014, and for the three and nine months ended September 30, 2014, we recognized losses of \$0.6 million and \$0.8 million due to the changes in their estimated fair value.

In March 2014, we acquired certain assets from Virtual Maintenance Manager LLC, including the Virtual Maintenance Manager product ("VMM"). VMM is a software-as-a-service application that facilitates the management of the end-to-end maintenance lifecycle for single-family and multi-family rental properties and provides property managers visibility into their maintenance costs, manages resources, and provides business control for property managers. We integrated VMM into our existing Propertyware products. We acquired the VMM assets for a preliminary purchase price of \$1.2 million, consisting of a cash payment of \$1.0 million at closing, a deferred cash payment of up to \$0.2 million payable over two years after the acquisition date, and additional cash payments of up to \$2.0 million if certain revenue targets are met for the twelve months ended June 30, 2015 and June 30, 2016 (a Level 3 input). The initial fair value of the deferred cash payment and the contingent cash payments was \$0.2 million and less than \$0.1 million, respectively. The fair value was based on management's estimate of the fair value of the cash payment using a probability weighted discount model on the achievement of certain revenue targets and will be evaluated quarterly. This acquisition was financed from cash flows from operations. Acquired intangibles were recorded at their estimated fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Acquired customer relationships have a useful life of five years which will be amortized proportionately to the expected discounted cash flows derived from the asset. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are deductible for tax purposes. The fair value of the contingent cash payments was less than \$0.1 million at September 30, 2014, and for the three and nine months ended September 30, 2014, we recognized a gain of less than \$0.1 million due to the changes in their estimated fair value. In May 2014, we acquired certain assets from Notivus Multi-Family LLC ("Notivus"). Notivus is a software-as-a-service application that provides an outsourced vendor credentialing solution to assist multifamily owners and managers in the credentialing and ongoing monitoring of its current and prospective vendors, suppliers, and independent contractors. We are integrating Notivus into our existing Compliance Depot products. We acquired the Notivus assets for a preliminary purchase price of \$4.4 million, consisting of a cash payment of \$3.6 million at closing and a deferred cash payment of up to \$0.8 million payable over two years after the acquisition date. The initial fair value of the deferred cash payment was approximately \$0.8 million. The fair value was based on management's estimate of the fair value of the cash payment using a probability weighted discount model on working capital targets and will be evaluated quarterly. This acquisition was financed from cash flows from operations. Acquired intangibles were recorded at their estimated fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are deductible for tax purposes.

In June 2014, we acquired all of the issued and outstanding stock of Kigo, Inc. ("Kigo"). Kigo is a software-as-a-service vacation rental booking system headquartered in the United States with operations in Spain. Kigo offers services for vacation rental property management that include vacation rental calendars, scheduling, reservations, accounting, channel management, website design, payment processing and other tasks to aid the management of leads, revenue, resources and lodging calendars. We plan to integrate Kigo with our existing vacation rental products. We acquired Kigo for a preliminary purchase price of \$36.2 million, consisting of a cash payment of \$30.7 million and a deferred cash payment of up to \$5.5 million, to be payable over two and a half years after the acquisition date. This acquisition was financed from proceeds from our revolving line of credit and cash flows from operations. Direct acquisition costs were \$0.5 million and expensed as incurred. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Acquired customer relationships have a useful life of ten years, which will be amortized proportionately to the expected discounted cash flows derived from the asset. The trade name acquired has an indefinite useful life as we do not plan to cease using the trade name in the marketplace. Goodwill and identified intangibles associated with this acquisition are not deductible

DRAFT 11-6-2014 430pm

Table of Contents

for tax purposes. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of this acquisition.

We preliminarily allocated the purchase price for InstaManager, VMM, Notivus and Kigo as follows:

	InstaManager (in thousands)	VMM	Notivus	Kigo	
Intangible assets:					
Developed product technologies	\$4,490	\$671	\$1,840	\$2,570	
Customer relationships	—	200	—	1,120	
Tradenames	527	—	—	602	
Goodwill	4,135	358	2,852	32,996	
Deferred revenue	(33) —	(156) —	
Net deferred taxes	—	—	—	(495)
Net other assets (liabilities)	55	—	(141) (547)
Total purchase price	\$9,174	\$1,229	\$4,395	\$36,246	

2013 Acquisitions

In February 2013, we acquired certain assets of Seniors for Living, Inc. (“SFL”). SFL is a leading performance-based marketing company that provides senior housing communities and home care companies with industry-leading referral and marketing services to help them achieve their occupancy goals. We have integrated SFL with our existing senior living software solutions. We acquired SFL for a purchase price of \$2.7 million which consisted of a cash payment of \$2.3 million and additional cash payments of \$0.2 million each due 6 months and 12 months after the acquisition date. As of September 30, 2014, both payments of \$0.2 million had been made. This acquisition was financed from proceeds from cash flows from operations. Acquired intangibles were recorded at fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Acquired customer relationships have a useful life of five years which will be amortized proportionately to the expected discounted cash flows derived from the asset. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are deductible for tax purposes.

In March 2013, we acquired certain assets from Yield Technologies, Inc., including RentSentinel and RentSocial (together, “RentSentinel”). The RentSentinel software-as-a-service platform is a fully featured apartment marketing management solution for the multi-family industry. RentSocial is an apartment search service that simplifies and incorporates the social marketing platform into the process of finding an apartment. We have integrated RentSentinel with our existing LeaseStar product family. We acquired RentSentinel for a purchase price of \$10.5 million which consisted of a cash payment of \$7.6 million, an issuance of 72,500 shares of our common stock and two tranches of 36,250 shares of our common stock which are issuable 12 months and 24 months after the acquisition date, respectively. As of September 30, 2014, 33,868 shares had been issued. This acquisition was financed from proceeds from cash flows from operations and our common stock. Acquired intangibles were recorded at fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Acquired customer relationships have a useful life of nine years which will be amortized proportionately to the expected discounted cash flows derived from the asset. Direct acquisition costs were \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are not deductible for tax purposes.

In October 2013, we acquired substantially all of the operating assets of Windsor Compliance Services, Inc. (“Windsor Compliance”) for a purchase price of \$2.7 million, which included a cash payment of \$1.3 million at closing and additional cash payments of \$1.0 million and \$0.5 million due 12 months and 24 months after the acquisition date, respectively, which are contingent on Windsor Compliance providing services to a specified number of units on or

before those dates (a Level 3 input). The initial fair value of the cash payments was \$1.3 million . The fair value was based on management's estimate of the fair value of the cash payment using a probability weighted discount model on the achievement of the servicing targets discussed above. Windsor Compliance is a firm specializing in compliance with tax credits and regulations for the affordable housing industry. We have integrated Windsor Compliance with our other affordable HUD products. This acquisition was financed from cash flows from operations. Acquired intangibles were recorded at fair value based on assumptions made by us. Acquired customer relationships have a useful life of ten years which will be amortized proportionately to the expected

DRAFT 11-6-2014 430pm

Table of Contents

discounted cash flows derived from the asset. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are deductible for tax purposes. The fair value of the additional cash payments was \$1.4 million at September 30, 2014, and for the three and nine months ended September 30, 2014, we recognized losses of \$0.1 million due to the changes in their estimated fair value.

In October 2013, we acquired all of the issued and outstanding capital stock of MyBuilding Inc. ("MyBuilding") for a purchase price of \$6.9 million, consisting of a cash payment of \$4.5 million at closing, a deferred cash payment of up to \$1.5 million payable over two years after the acquisition date and additional cash payments totaling up to \$1.1 million if certain revenue targets are met for the years ended December 31, 2014 and December 31, 2015. The initial fair value of the deferred cash payment and the contingent cash payments was \$1.4 million and \$0.3 million, respectively. The fair value was based on management's estimate of the fair value of the cash payment using a probability weighted discount model on the achievement of certain revenue targets (a Level 3 input). MyBuilding provides software-as-a-service solutions that facilitate the creation of online communities that connect residents to multifamily property managers, local vendors, and other residents. We have integrated MyBuilding with our existing LeaseStar software solutions. This acquisition was financed from cash flows from operations. Acquired intangibles were recorded at fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Acquired customer relationships have a useful life of ten years which will be amortized proportionately to the expected discounted cash flows derived from the asset. The trade name acquired has an indefinite useful life as we do not plan to cease using the trade name in the marketplace. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are not deductible for tax purposes. The fair value of the deferred cash payment and the contingent cash payments were \$1.4 million and \$0.3 million, respectively, at September 30, 2014, and for the three and nine months ended September 30, 2014, we recognized losses of less than \$0.1 million, due to the changes in their estimated fair value.

In October 2013, we acquired all of the membership interests of Active Building, LLC ("Active Building") for a purchase price of \$14.4 million, consisting of a cash payment of \$11.3 million at closing, a deferred cash payment of up to \$2.0 million payable over three years after the acquisition date, and additional cash payments totaling up to \$6.5 million if certain revenue targets are met for the years ended December 31, 2014 and December 31, 2015. The initial fair value of the deferred cash payment and the contingent cash payments was \$1.7 million and \$1.3 million, respectively. The fair value was based on management's estimate of the fair value of the cash payment using a probability weighted discount model on the achievement of certain revenue targets (a Level 3 input). Active Building provides software-as-a-service solutions that facilitate the creation of online communities that connect residents to multifamily property managers, local vendors, and other residents. We have integrated Active Building with our existing LeaseStar software solutions. This acquisition was financed from cash flows from operations. Acquired intangibles were recorded at fair value based on assumptions made by us. The acquired developed product technologies have a useful life of three years amortized on a straight-line basis. Acquired customer relationships have a useful life of ten years which will be amortized proportionately to the expected discounted cash flows derived from the asset. The trade name acquired has an indefinite useful life as we do not plan to cease using the trade name in the marketplace. Direct acquisition costs were less than \$0.1 million and expensed as incurred. We included the results of operations of this acquisition in our consolidated financial statements from the effective date of the acquisition. Goodwill and identified intangibles associated with this acquisition are deductible for tax purposes. The fair value of the deferred cash payment and the contingent cash payments was \$1.9 million and \$1.3 million, respectively, at September 30, 2014, and for the three and nine months ended September 30, 2014, we recognized gains of \$0.1 million and \$0.3 million, respectively, due to the changes in their estimated fair value.

We allocated the purchase prices for SFL, RentSentinel, Windsor Compliance, MyBuilding and Active Building as follows:

11

DRAFT 11-6-2014 430pm

Table of Contents

	SFL	RentSentinel	Windsor Compliance	My Building	Active Building
	(in thousands)				
Intangible assets:

Other Acquisition-Related Fair Value Adjustments

We have acquired companies in previous years for which acquisition-related contingent consideration was included in the purchase price and recorded at fair value. The liability established for the acquisition-related contingent consideration will continue to be re-evaluated and recorded at an estimated fair value based on the probabilities, as determined by management, of achieving the related targets. This evaluation will be performed until all of the targets have been met or terms of the agreement expire. For the three and nine months ended September 30, 2014, there were no acquisition-related fair value adjustments for acquisitions made prior to January 1, 2013.

Payments made to SeniorLiving.net, acquired in July 2011, and Rent Mine Online, acquired in July 2012, during the three months ended September 30, 2014 totaled \$3.3 million. Payments made to Vigilant, acquired in January 2012, SeniorLiving.net, acquired in July 2011, and Rent Mine Online, acquired in July 2012, during nine months ended September 30, 2014 totaled \$3.8 million.

Pro Forma Results of Acquisitions

The following table presents pro forma results of operations for the three and nine months ended September 30, 2014 and September 30, 2013 as if the Kigo, Notivus, VMM, InstaManager, Active Building, MyBuilding, Windsor Compliance, SFL, and RentSentinel acquisitions had occurred on January 1, 2013. The pro forma information includes the business combination accounting effects resulting from these acquisitions, including interest expense, tax benefit, and additional amortization resulting from the valuation of amortizable intangible assets. We prepared the pro forma financial information for the combined entities for comparative purposes only, and it is not indicative of what actual results would have been if the acquisitions had occurred on January 1, 2013, nor do the pro forma results intend to be a projection of results that may be obtained in the future.

	Three Months Ended September 30, 2014		Nine Months Ended September 30, 2013	
	Pro Forma	Pro Forma	Pro Forma	Pro Forma
	(in thousands, except per share amounts)			
Revenue:

Total revenue	104,536	99,940	301,417	287,826
Net (loss) income	\$(3,257) \$12,098	\$(10,857) \$14,806
Net (loss) income per share				
Basic	\$(0.04) \$0.16	\$(0.14) \$0.20
Diluted	\$(0.04) \$0.16	\$(0.14) \$0.20

4. Property, Equipment and Software

Property, equipment and software consist of the following:

12

	September 30, 2014	December 31, 2013
	(in thousands)	
Leasehold improvements	\$23,425	\$18,756
Data processing and communications equipment	58,321	47,719
Furniture, fixtures, and other equipment	15,015	11,266
Software	48,346	36,750
	145,107	114,491
Less: Accumulated depreciation and amortization	(73,643) (59,716
Property, equipment and software, net	\$71,464	\$54,775

Depreciation and amortization expense for property, equipment and software was \$5.6 million and \$3.6 million for the three months ended September 30, 2014 and 2013, and \$15.0 million and \$10.9 million for the nine months ended September 30, 2014 and 2013, respectively. This includes depreciation for assets purchased through capital leases.

5. Goodwill and Other Intangible Assets

The change in the carrying amount of goodwill for the nine months ended September 30, 2014 is as follows:

	(in thousands)
Balance at December 31, 2013	\$152,422
Goodwill acquired	40,341
Other	705
Balance at September 30, 2014	\$193,468

Other intangible assets consisted of the following at September 30, 2014 and December 31, 2013:

	September 30, 2014			December 31, 2013			
	Amortization Period (in thousands)	Carrying Amount	Accumulated Amortization	Net	Carrying Amount	Accumulated Amortization	Net
Finite-lived intangible assets:							
Developed technologies	3 years	\$54,852	\$(37,009)	\$17,843	\$45,014	\$(29,952)	\$15,062
Customer relationships	1-10 years	86,753	(41,566)	45,187	85,823	(33,503)	52,320
Vendor relationships	7 years	5,650	(5,147)	503	5,650	(4,709)	941
Total finite-lived intangible assets		147,255	(83,722)	63,533	136,487	(68,164)	68,323
Indefinite-lived intangible assets:							
Tradenames		41,659	—	41,659	40,492	—	40,492
Total intangible assets		\$188,914	\$(83,722)	\$105,192	\$176,979	\$(68,164)	\$108,815

Amortization of finite-lived intangible assets was \$5.4 million and \$4.0 million for the three months ended, and \$15.5 million and \$11.9 million for the nine months ended September 30, 2014 and 2013, respectively.

6. Debt

Credit Facility Opened September 2014

On September 30, 2014, we entered into a new agreement for a secured revolving credit facility to refinance our outstanding revolving loans. The new credit facility provides an aggregate principal amount of up to \$200.0 million, with sublimits of \$10.0 million for the issuance of letters of credit and for \$20.0 million of swingline loans. The credit facility also allows us, subject to certain conditions, to request additional term loans or revolving commitments in an aggregate principal amount of up to \$150.0 million, plus an amount that would not cause our consolidated net leverage ratio, which is a ratio of the Company's consolidated funded indebtedness to its consolidated EBITDA, to exceed 3.25 to 1.00. At our option, the revolving loans accrue interest at a per annum rate equal to either LIBOR or Wells Fargo's prime rate (or, if greater, the federal funds rate plus 0.50% or one month LIBOR plus 1.00%) in each case plus a margin ranging from 1.25% to 1.75% in the case of LIBOR loans, and 0.25% to 0.75% in the case of prime rate loans, in each case based upon our consolidated net leverage ratio. The interest is due and payable

quarterly, in arrears, for loans bearing interest at the prime rate and at the end of the applicable

DRAFT 11-6-2014 430pm

Table of Contents

interest period in the case of loans bearing interest at the adjusted LIBOR rate. The credit facility is secured by substantially all of the Company's assets and certain of our existing and future material domestic subsidiaries are required to guaranty our obligations under the credit facility. We are also required to comply with customary affirmative and negative covenants, as well as a consolidated net leverage ratio and an interest coverage ratio. The credit facility matures September 30, 2019.

Previous Credit Facility

Our previous secured revolving credit facility had an aggregate principal amount of up to \$150.0 million, subject to a borrowing formula, with a sublimit of \$10.0 million for the issuance of letters of credit on our behalf. At our option, the borrowings accrued interest at a per annum rate equal to either LIBOR or Wells Fargo's prime rate (or, if greater, the federal funds rate plus 0.50% or three month LIBOR plus 1.00%), in each case plus a margin ranging from 2.00% to 2.50%, in the case of LIBOR loans, and 0.0% to 0.25% in the case of prime rate loans, in each case based upon our senior leverage ratio. The interest was due and payable monthly, in arrears, for loans bearing interest at the prime rate and at the end of the applicable 1-, 2-, or 3-month interest period in the case of loans bearing interest at the adjusted LIBOR rate.

In May 2014, we entered into an amendment to the previous credit facility. Under the terms of the amendment, the restrictive covenants were amended to permit us to repurchase up to \$75 million of our common stock, subject to certain conditions. Additionally, the fixed charge coverage ratio was replaced with a new minimum interest expense coverage ratio and the capital expenditures limitations were increased.

In June 2014, we entered into an amendment to the previous credit facility. Under the terms of the amendment, the parties to the credit facility consented to the acquisition of Kigo and agreed that the acquisition of Kigo would be a "Permitted Acquisition," as defined in the credit facility and would be excluded from the calculation of the Permitted Acquisition limit. Additionally, the amendment increased the value of our equipment that could be in the hands of our employees, consultants, or customers in the ordinary course of business to \$2.5 million and amended the definition of "Aggregate Permitted Acquisition Limit" to \$150.0 million, plus an additional \$100.0 million if certain conditions are met. In June 2014, we borrowed a total of \$25.0 million from our revolving line of credit in order to partially finance our acquisition of Kigo.

As of September 30, 2014 and December 31, 2013, we had \$38.6 million and \$0.0 million, respectively, outstanding under our revolving line of credit. As of September 30, 2014, \$161.4 million was available under our revolving line of credit of which \$10.0 million was available for the issuance of letters of credit. We had unamortized debt issuance costs of \$1.1 million and \$0.3 million at September 30, 2014 and December 31, 2013, respectively. As of September 30, 2014, we were in compliance with the covenants under our credit facility.

7. Share-based Compensation

In February 2014, we granted 1,356,972 options with an exercise price of \$17.75 which vest quarterly over three years. We also granted 681,395 shares of restricted stock at \$17.75 which vest quarterly over three years.

In April 2014, we granted 39,156 shares of restricted stock at \$18.39 which vest quarterly over three years to our Board of Directors.

In May 2014, we granted 159,194 options with an exercise price of \$18.71 which vest quarterly over three years. We also granted 84,620 shares of restricted stock at \$18.71 which vest quarterly over three years and 100,400 shares of restricted stock at \$20.61 which fully vested on August 7, 2014.

In August 2014, we granted 295,615 options with an exercise price of \$15.19 which vest quarterly over three years. We also granted 793,008 shares of restricted stock at \$15.19, of which 151,513 shares vest quarterly over three years and 121,495 shares vest quarterly over one year. The remaining 520,000 shares consist of two tranches that become eligible for vesting if the average closing price per share of our common stock equals or exceeds an the established threshold for each tranche for twenty consecutive days prior to July 1, 2017. The shares vest quarterly over one year following the date they become eligible for vesting.

All stock options and restricted stock were granted under the 2010 Equity Incentive Plan, as amended and restated.

8. Commitments and Contingencies**Lease Commitments**

In the first quarter of 2013, we entered into a capital lease agreement for software that expires in 2016. We recognize lease expense on a straight-line basis over the lease term.

DRAFT 11-6-2014 430pm

Table of Contents

The assets under capital lease are as follows:

	September 30, 2014	December 31, 2013
	(in thousands)	
Software	\$1,977	\$1,977
Less: Accumulated depreciation and amortization	(969) (549
Assets under capital lease, net	\$1,008	\$1,428

Aggregate annual rental commitments at September 30, 2014 under capital lease are as follows:

	(in thousands)
2014	\$147
2015	588
2016	294
Total minimum lease payments	\$1,029
Less amount representing average interest at 2.2%	(21
) 1,008
Less current portion	571
Long-term portion	\$437
Guarantor Arrangements	

We have agreements whereby we indemnify our officers and directors for certain events or occurrences while the officer or director is or was serving at our request in such capacity. The term of the indemnification period is for the officer or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have a director and officer insurance policy that limits our exposure and enables us to recover a portion of any future amounts paid. As a result of our insurance policy coverage, we believe the estimated fair value of these indemnification agreements is minimal. Accordingly, we had no liabilities recorded for these agreements as of September 30, 2014 or December 31, 2013.

In the ordinary course of our business, we enter into standard indemnification provisions in our agreements with our customers. Pursuant to these provisions, we indemnify our customers for losses suffered or incurred in connection with third-party claims that our products infringed upon any U.S. patent, copyright, trademark or other intellectual property right. Where applicable, we generally limit such infringement indemnities to those claims directed solely to our products and not in combination with other software or products. With respect to our products, we also generally reserve the right to resolve such claims by designing a non-infringing alternative, by obtaining a license on reasonable terms, or by terminating our relationship with the customer and refunding the customer's fees.

The potential amount of future payments to defend lawsuits or settle indemnified claims under these indemnification provisions is unlimited in certain agreements; however, we believe the estimated fair value of these indemnification provisions is minimal, and, accordingly, we had no liabilities recorded for these agreements as of September 30, 2014 or December 31, 2013.

Litigation

From time to time, in the normal course of our business, we are a party to litigation matters and claims. Litigation can be expensive and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict and our view of these matters may change in the future as the litigation and events related thereto unfold. We expense legal fees as incurred. Insurance recoveries associated with legal costs incurred are recorded when they are deemed probable of recovery.

We review the status of each matter and record a provision for a liability when we consider both that it is probable that a liability has been incurred and that the amount of the loss can be reasonably estimated. These provisions are reviewed quarterly and adjusted as additional information becomes available. If either or both of the criteria are not met, we assess whether there is at least a reasonable possibility that a loss, or additional losses beyond those already accrued, may be incurred. If there is a reasonable possibility that a material loss (or additional material loss in excess

of any existing accrual) may be incurred, we disclose an estimate of the amount of loss or range of losses, either individually or in the aggregate, as appropriate, if such an estimate can be made, or disclose that an estimate of loss cannot be made. An unfavorable outcome in any legal matter, if material, could have an adverse effect on our operations, financial position, liquidity and results of operations.

DRAFT 11-6-2014 430pm

Table of Contents

On January 24, 2011, Yardi Systems, Inc. ("Yardi") filed a lawsuit in the U.S. District Court for the Central District of California against RealPage, Inc. and DC Consulting, Inc. (the "Yardi Lawsuit"). We answered and filed counterclaims against Yardi, and on July 1, 2012, the Company and Yardi entered into a settlement agreement resolving all outstanding litigation between the parties.

In connection with the Yardi Lawsuit, the Company made claims for reimbursement against each of its primary and excess layer general liability and errors and omissions liability insurance carriers. Each of our primary and excess layer errors and omissions liability insurance carriers other than Homeland Insurance of New York ("Homeland") reimbursed the Company up to each of its policy limits. On July 19, 2012, we became aware of assertions by one of our primary layer errors and omissions insurance carriers, Ace European Group, Ltd. d/b/a Ace European Group, Barbican Syndicate 1995 at Lloyds's ("Ace"), that Ace no longer considered the previously reimbursed \$5.0 million payment covered under such policy, and that Ace demanded reimbursement of the \$5.0 million payment that it had previously reimbursed to us. On August 12, 2012, our first excess layer errors and omissions insurance carrier, Axis Surplus Insurance Company ("Axis"), informed us that if Ace's policy is deemed void, then Axis' first excess layer policy was void on the same basis which would result in the Company's obligation to reimburse to Axis \$5.0 million in payments that Axis had previously reimbursed to us. The Company disputed these assertions by these carriers.

Accordingly, on August 14, 2012, the Company filed a lawsuit in the U.S. District Court for the Eastern District of Texas against Ace and Axis (the "Ace Lawsuit") seeking a declaration by the court that Ace and Axis have no right to, and no lawful reason to demand reimbursement of, the amounts paid to the Company's counsel in connection with the Yardi Lawsuit. On February 25, 2014, RealPage and Axis entered into a confidential settlement and mutual release of claims, as a result of which Axis was dismissed from the Ace Lawsuit. On March 11, 2014, Ace filed its answer, affirmative defenses and counterclaims. On April 1, 2014, RealPage and Ace entered into a confidential settlement agreement and mutual release of claims and on April 7, 2014, the court entered an order granting the joint motion to dismiss all claims and demands asserted in the lawsuit. We expensed \$4.7 million, inclusive of the settlements and other related costs in the first quarter of 2014.

We are involved in other litigation matters not listed above but we believe that any reasonably possible adverse outcome of these matters would not be material either individually or in the aggregate at this time. Our view of the matters not listed may change in the future as the litigation and events related thereto unfold.

9. Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing the net income (loss) by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed by using the weighted average number of common shares outstanding, including potential dilutive shares of common stock assuming the dilutive effect of outstanding stock options and restricted stock using the treasury stock method. Weighted average shares from common share equivalents in the amount of 753,583 and 302,820 for the three months ended September 30, 2014 and 2013, respectively, and 1,549,922 and 795,700 for the nine months ended September 30, 2014 and 2013, respectively, were excluded from the respective dilutive shares outstanding because their effect was anti-dilutive.

DRAFT 11-6-2014 430pm

Table of Contents

The following table presents the calculation of basic and diluted net (loss) income per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(in thousands, except per share amounts)			
Numerator:				
Net (loss) income	\$(3,257) \$12,886	\$(10,384) \$18,514
Denominator:				
Basic:				
Weighted average common shares used in computing basic net (loss) income per share	77,280	75,234	77,075	74,597
Diluted:				
Add weighted average effect of dilutive securities:				
Stock options and restricted stock	—	1,113	—	1,303
Weighted average common shares used in computing diluted net (loss) income per share	77,280	76,347	77,075	75,900
Net (loss) income per common share:				
Basic	\$(0.04) \$0.17	\$(0.13) \$0.25
Diluted	\$(0.04) \$0.17	\$(0.13) \$0.24

10. Income Taxes

We make estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of certain tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes.

Our provision for income taxes in interim periods is based on our estimated annual effective tax rate. We record cumulative adjustments in the quarter in which a change in the estimated annual effective rate is determined. The estimated annual effective tax rate calculation does not include the effect of discrete events that may occur during the year. The effect of these events, if any, is recorded in the quarter in which the event occurs.

Our effective income tax rate was 35.4% and (123.3)% for the three months ended and 28.4% and (16.5)% for the nine months ended September 30, 2014 and 2013, respectively. During 2013, we were able to conclude that, given our performance, the realization of our deferred tax assets was more likely than not and accordingly reversed valuation allowances of approximately \$9.2 million and recorded the reduction in valuation allowances as a tax benefit for the period. This reduction of the valuation allowance is the primary cause of the noted fluctuation of our effective income tax rate between the current and prior periods presented. Our effective tax rate fluctuated from the statutory rate predominantly due to the impact of permanent differences, including stock compensation, and the non-deductibility of contingent consideration, in relation to our results of operations before income taxes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Quarterly Report on Form 10-Q contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (which Sections were adopted as part of the Private Securities Litigation Reform Act of 1995). Statements preceded by, followed by or that otherwise include the words "anticipates," "believes," "could," "seeks," "estimates," "expects," "intends," "may," "plans," "potential," "predicts," "projects," "should," "will," "would" or similar expressions and the negative terms are generally forward-looking in nature and not historical facts. These forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any anticipated results, performance or achievements. Factors that might cause or contribute to such differences include, but are not limited to those discussed in the section entitled "Risk Factors" in Part II, Item 1A of this report. You should carefully review the risks described herein and in the other documents we file from time to time with the Securities and Exchange Commission ("SEC"), including our Annual

Edgar Filing: CORVEL CORP - Form 10-Q

Report on Form 10-K for fiscal year 2013. You should not place undue reliance on forward-looking statements herein, which speak only as of the date of this report. Except as required by law, we disclaim any intention, and undertake no obligation, to revise any forward-looking statements, whether as a result of new information, a future event or otherwise.

17

DRAFT 11-6-2014 430pm

Table of Contents

RealPage, Inc., a Delaware corporation, and its subsidiaries, (the “Company” or “we” or “us”) is a leading provider of on demand software solutions for the rental housing industry. Our broad range of property management solutions enables owners and managers of single-family and a wide variety of multi-family rental property types to manage their marketing, pricing, screening, leasing, accounting, purchasing and other property operations. Our on demand software solutions are delivered through an integrated software platform that provides access and a shared repository of prospect, resident and property data. By integrating and streamlining a wide range of complex processes and interactions among the rental housing ecosystem of owners, managers, prospects, residents and service providers, our platform helps optimize the property management process and improves the experience for all of these constituents. Our solutions enable property owners and managers to increase revenues and reduce operating costs through higher occupancy, improved pricing methodologies, new sources of revenue from ancillary services, improved collections and more integrated and centralized processes. As of September 30, 2014, over 10,400 customers used one or more of our on demand software solutions to help manage the operations of approximately 9.5 million rental housing units. Our customers include each of the ten largest multi-family property management companies in the United States, ranked as of January 1, 2014 by the National Multi Housing Council, based on number of units managed.

We sell our solutions through our direct sales organization. Our total revenues were approximately \$104.5 million and \$98.1 million for the three months ended, and \$300.1 million and \$281.5 million for the nine months ended, September 30, 2014 and 2013, respectively. In the same periods, we had operating (loss) income of approximately \$(4.7) million, \$6.0 million, \$(13.7) million, and \$16.8 million respectively, and net (loss) income of approximately \$(3.3) million, \$12.9 million, \$(10.4) million, and \$18.5 million, respectively.

Our company was formed in 1998 to acquire Rent Roll, Inc., which marketed and sold on premise property management systems for the conventional multi-family rental housing markets. In June 2001, we released OneSite, our first on demand property management system. Since 2002, we have expanded our on demand software solutions to include a number of software-enabled value-added services that provide complementary sales and marketing, asset optimization, risk mitigation, billing and utility management and spend management capabilities. In connection with this expansion, we have allocated greater resources to the development and infrastructure needs of developing and increasing sales of our suite of on demand software solutions. In addition, since July 2002, we have completed 30 acquisitions of complementary technologies to supplement our internal product development and sales and marketing efforts and expand the scope of our solutions, the types of rental housing properties served by our solutions and our customer base.

Recent Acquisitions

In February 2013, we acquired certain assets of Seniors for Living, Inc. (“SFL”). SFL is a leading performance-based marketing company that provides senior housing communities and home care companies with industry-leading referral and marketing services to help them achieve their occupancy goals. We integrated SFL with our existing senior living software solutions. We acquired SFL for a purchase price of \$2.7 million which consisted of a cash payment of \$2.3 million and additional cash payments of \$0.2 million paid 6 months and 12 months after the acquisition date.

In March 2013, we acquired certain assets from Yield Technologies, Inc., including RentSentinel and RentSocial (together, “RentSentinel”). The RentSentinel software-as-a-service platform is a fully featured apartment marketing management solution for the multi-family industry. RentSocial is an apartment search service that simplifies and incorporates the social marketing platform into the process of finding an apartment. We integrated RentSentinel with our existing LeaseStar product family. We acquired RentSentinel for a purchase price of \$10.5 million which consisted of a cash payment of \$7.6 million, issuance of 72,500 shares of our common stock and two tranches of 36,250 shares of our common stock which are issuable 12 months and 24 months after the acquisition date, respectively. As of September 30, 2014, 33,868 shares had been issued.

In October 2013, we acquired substantially all of the operating assets of Windsor Compliance Services, Inc. (“Windsor Compliance”) for a purchase price of \$2.7 million, which consisted of a cash payment of \$1.3 million at closing and additional cash payments of \$1.0 million and \$0.5 million due 12 months and 24 months after the acquisition date, respectively, which are contingent on Windsor Compliance providing services to a specified number

of units on or before those dates. Windsor Compliance is a firm specializing in compliance with tax credits and regulation for the affordable housing industry.

In October 2013, we acquired all of the issued and outstanding capital stock of MyBuilding Inc. ("MyBuilding") for a purchase price of \$6.9 million consisting of a cash payment of \$4.5 million at closing, a deferred cash payment of up to \$1.5 million payable over two years after the acquisition date and a contingent deferred earn out consisting of two additional cash payments totaling \$1.1 million if certain revenue targets are met for the years ended December 31, 2014 and December 31, 2015. A provider of software-as-a-service solutions, MyBuilding products facilitate the creation of online communities that connect residents to multifamily property managers, local vendors, and other residents.

DRAFT 11-6-2014 430pm

Table of Contents

In October 2013, we acquired all of the membership interest of Active Building, LLC ("Active Building") for a purchase price of \$14.4 million, which consisted of a cash payment of \$11.3 million at closing, a deferred cash payment of up to \$2.0 million payable over three years after the acquisition date, and additional cash payments totaling \$6.5 million if certain revenue targets are met for the years ended December 31, 2014 and December 31, 2015. A provider of software-as-a-service solutions, Active Building products facilitate the creation of online communities that connect residents to multifamily property managers, local vendors, and other residents.

In January 2014, we acquired certain assets from Bookt LLC, including the InstaManager product ("InstaManager"), for a preliminary purchase price of \$9.2 million, consisting of a cash payment of \$6.0 million at closing, a deferred cash payment of up to \$1.0 million payable over two years after the acquisition date, and additional cash payments totaling up to \$7.0 million if certain revenue targets are met for the years ended March 31, 2015 and March 31, 2016.

InstaManager is a software-as-a-service vacation rental booking system used by professional managers of vacation rental properties. InstaManager offers marketing websites, online pricing and availability, online booking, automated reservations, payment processing and insurance sales.

In March 2014, we acquired certain assets from Virtual Maintenance Manager LLC, including the Virtual Maintenance Manager product ("VMM"), for a preliminary purchase price of \$1.2 million, consisting of a cash payment of \$1.0 million at closing, a deferred cash payment of up to \$0.2 million payable over two years after the acquisition date, and additional cash payments of up to \$2.0 million if certain revenue targets are met for the years ended June 30, 2015 and June 30, 2016. VMM is a software-as-a-service application that facilitates the management of the end-to-end maintenance lifecycle for single-family and multi-family rental properties and provides property managers visibility into their maintenance costs, manages resources, and provides business control for property managers.

In May 2014, we acquired substantially all of the operating assets of Notivus Multi-Family, LLC ("Notivus") for a preliminary purchase price of \$4.4 million, which consisted of a cash payment of \$3.6 million at closing and a deferred cash payment of up to \$0.8 million payable over two years after the acquisition date. The acquisition of Notivus expands our ability to provide vendor risk management and compliance software solutions for the rental housing industry.

In June 2014, we acquired all of the issued and outstanding stock of Kigo, Inc. ("Kigo"). Kigo is a software-as-a-service vacation rental booking system headquartered in the United States with operations in Spain. Kigo offers services for vacation rental property management that include vacation rental calendars, scheduling, reservations, accounting, channel management, website design, payment processing and other tasks to aid the management of leads, revenue, resources and lodging calendars. We plan to integrate Kigo with our existing vacation rental products and further extend our vacation booking system internationally. We acquired Kigo for a preliminary purchase price of \$36.2 million, consisting of a cash payment of \$30.7 million and a deferred cash payment of up to \$5.5 million, to be payable over two and a half years after the acquisition date.

Critical Accounting Policies and Estimates

The preparation of our condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. We base these estimates and assumptions on historical experience or on various other factors that we believe to be reasonable and appropriate under the circumstances. We reconsider and evaluate our estimates and assumptions on an on-going basis. Accordingly, actual results may differ significantly from these estimates.

We believe that the following critical accounting policies involve our more significant judgments, assumptions and estimates, and therefore, could have the greatest potential impact on our condensed consolidated financial statements:

- Revenue recognition;
- Fair value measurements;
- Accounts receivable;
- Business combinations;
- Goodwill and other intangible assets with indefinite lives;
- Impairment of long-lived assets;
- Intangible assets;

• Stock-based compensation;

• Income taxes; and

• Capitalized product development costs.

A full discussion of our critical accounting policies, which involve significant management judgment, appears in our Form 10-K under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical

19

DRAFT 11-6-2014 430pm

Table of Contents

Accounting Policies and Estimates.” For further information regarding our business, industry trends, accounting policies and estimates, and risks and uncertainties, refer to our Form 10-K.

Key Components of Our Results of Operations

Revenue

We derive our revenue from three primary sources: our on demand software solutions; our on premise software solutions; and our professional and other services.

On demand revenue. Revenue from our on demand software solutions is comprised of license and subscription fees relating to our on demand software solutions, typically licensed for one year terms, commission income from sales of renter’s insurance policies, and transaction fees for certain on demand software solutions, such as payment processing, spend management and billing services. Typically, we price our on demand software solutions based primarily on the number of units or beds the customer manages with our solutions. For our insurance based solutions, our agreement provides for a fixed commission on earned premiums related to the policies sold by us. The agreement also provides for a contingent commission to be paid to us in accordance with the agreement. This agreement provides for a calculation that considers, on the policies sold by us, earned premiums less i) earned agent commissions; ii) a percent of premium retained by our underwriting partner; iii) incurred losses; and iv) profit retained by our underwriting partner during the time period. Our estimate of our contingent commission revenue considers historical loss experience on the policies sold by us. For our transaction-based solutions, we price based on a fixed rate per transaction.

On premise revenue. Our on premise software solutions are distributed to our customers and maintained locally on the customers’ hardware. Revenue from our on premise software solutions is comprised of license fees under term and perpetual license agreements. Typically, we have licensed our on premise software solutions pursuant to term license agreements with an initial term of one year that include maintenance and support. Customers can renew their term license agreement for additional one-year terms at renewal price levels.

We no longer actively market our legacy on premise software solutions to new customers, and only license our on premise software solutions to a small portion of our existing on premise customers as they expand their portfolio of rental housing properties. While we intend to support our acquired on premise software solutions, we expect that many of the customers who license these solutions will transition to our on demand software solutions over time.

Professional and other revenue. Revenue from professional and other services consists of consulting and implementation services, training and other ancillary services. We complement our solutions with professional and other services for our customers willing to invest in enhancing the value or decreasing the implementation time of our solutions. Our professional and other services are typically priced as time and material engagements.

Cost of Revenue

Cost of revenue consists primarily of personnel costs related to our operations, support services, training and implementation services, expenses related to the operation of our data center and fees paid to third-party service providers. Personnel costs include salaries, bonuses, stock-based compensation and employee benefits. Cost of revenue also includes an allocation of facilities costs, overhead costs and depreciation, as well as amortization of acquired technology related to strategic acquisitions and amortization of capitalized development costs. We allocate facilities, overhead costs and depreciation based on headcount.

Operating Expenses

We classify our operating expenses into three categories: product development, sales and marketing, and general and administrative. Our operating expenses primarily consist of personnel costs, costs for third-party contracted development, marketing, legal, accounting and consulting services and other professional service fees. Personnel costs for each category of operating expenses include salaries, bonuses, stock-based compensation and employee benefits for employees in that category. In addition, our operating expenses include an allocation of our facilities costs, overhead costs and depreciation based on headcount for that category, as well as amortization of purchased intangible assets resulting from our acquisitions.

Product development. Product development expense consists primarily of personnel costs for our product development employees and executives and fees to contract development vendors. Our product development efforts

are focused primarily on increasing the functionality and enhancing the ease of use of our on demand software solutions and expanding our suite of on demand software solutions. In 2008 and 2011, we established product development and service centers in Hyderabad, India and Manila, Philippines, respectively, to take advantage of strong technical talent at lower personnel costs compared to the United States.

Sales and marketing. Sales and marketing expense consists primarily of personnel costs for our sales, marketing and business development employees and executives, travel and entertainment and marketing programs. Marketing programs consist of amounts paid for search engine optimization (“SEO”) and search engine marketing (“SEM”), renter’s insurance and

DRAFT 11-6-2014 430pm

Table of Contents

other advertising, tradeshows, user conferences, public relations, industry sponsorships and affiliations and product marketing. In addition, sales and marketing expense includes amortization of certain purchased intangible assets, including customer relationships and key vendor and supplier relationships obtained in connection with our acquisitions.

General and administrative. General and administrative expense consists of personnel costs for our executive, finance and accounting, human resources, management information systems and legal personnel, as well as legal, accounting and other professional service fees and other corporate expenses.

Key Business Metrics

In addition to traditional financial measures, we monitor our operating performance using a number of financially and non-financially derived metrics that are not included in our condensed consolidated financial statements. We monitor the key performance indicators as follows:

On demand revenue. This metric represents the license and subscription fees relating to our on demand software solutions, typically licensed for one year terms, commission income from sales of renter's insurance policies and transaction fees for certain of our on demand software solutions. We consider on demand revenue to be a key business metric because we believe the market for our on demand software solutions represents the largest growth opportunity for our business.

On demand revenue as a percentage of total revenue. This metric represents on demand revenue for the period presented divided by total revenue for the same period. We use on demand revenue as a percentage of total revenue to measure our success in executing our strategy to increase the penetration of our on demand software solutions and expand our recurring revenue streams attributable to these solutions. We expect our on demand revenue to remain a significant percentage of our total revenue although the actual percentage may vary from period to period due to a number of factors, including the timing of acquisitions, professional and other revenue and on premise perpetual license sales and maintenance fees.

Ending on demand units. This metric represents the number of rental housing units managed by our customers with one or more of our on demand software solutions at the end of the period. We use ending on demand units to measure the success of our strategy of increasing the number of rental housing units managed with our on demand software solutions. Property unit counts are provided to us by our customers as new sales orders are processed. Property unit counts may be adjusted periodically as information related to our customers' properties is updated or supplemented, which could result in adjustments to the number of units previously reported.

Non-GAAP on demand revenue. This metric represents on demand revenue adjusted to reverse the effect of the write down of deferred revenue associated with purchase accounting for strategic acquisitions. We use this metric to evaluate our on demand revenue as we believe its inclusion provides a more accurate depiction of on demand revenue arising from our strategic acquisitions.

The following provides a reconciliation of non-GAAP on demand revenue to on demand revenue, our most directly comparable GAAP financial measure:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
	(in thousands)			
On demand revenue	\$100,747	\$94,084	\$289,361	\$270,231
Acquisition-related and other deferred revenue adjustments	(392) 1,793	725	1,795
Non-GAAP on demand revenue	\$100,355	\$95,877	\$290,086	\$272,026

Non-GAAP on demand revenue per average on demand unit. This metric represents non-GAAP on demand revenue for the period presented divided by average on demand units for the same period. For interim periods, the calculation is performed on an annualized basis. We calculate average on demand units as the average of the beginning and ending on demand units for each quarter in the period presented. We monitor this metric to measure our success in increasing the number of on demand software solutions utilized by our customers to manage their rental housing units,

our overall revenue and profitability.

Adjusted EBITDA. We define this metric as net income (loss) plus acquisition-related and other deferred revenue, depreciation, asset impairment, and loss on sale of asset; amortization of intangible assets; interest expense, net; income tax expense (benefit); stock-based compensation expense, acquisition-related expense and certain litigation-related expenses. We believe that the use of Adjusted EBITDA is useful in evaluating our operating performance because it excludes certain non-cash expenses, including depreciation, amortization and stock-based compensation. Adjusted EBITDA is not determined in accordance with accounting principles generally accepted in the United States, or GAAP, and should not be considered as a substitute for or superior to financial measures determined in accordance with GAAP. For a reconciliation of Adjusted EBITDA

DRAFT 11-6-2014 430pm

Table of Contents

to net income (loss), refer to the table below. Our Adjusted EBITDA decreased from approximately \$23.7 million and \$65.5 million for the three and nine months ended September 30, 2013, respectively, to approximately \$16.3 million and \$53.3 million for the three and nine months ended September 30, 2014, respectively, as a result of our net loss in 2014.

DRAFT 11-6-2014 430pm

Table of Contents

The changes in total revenue for the three and nine months ended September 30, 2014 and 2013 are due to the following changes in our three revenue components:

On demand revenue. Our on demand revenue increased \$6.7 million and \$19.1 million for the three and nine months ended September 30, 2014, respectively, as compared to the same periods in 2013, primarily due to an increase in rental property units managed with our on demand solutions as a result of our continued investment in our sales force. This increase was offset in part due to a decrease in RPU to \$42.55 and \$41.57 during the respective periods were driven by reduced spending by our customers on marketing and advertising resulting from lower resident turnover rates and higher occupancy rates.

On premise revenue. On premise revenue decreased \$0.1 million and \$0.4 million for the three and nine months ended September 30, 2014, respectively, as compared to the same periods in 2013. We no longer actively market our legacy on premise software solutions to new customers and only market and support our acquired on premise software solutions. We expect on premise revenue to continue to decline over time as we transition acquired on premise customers to our on demand property management solutions.

Professional and other revenue. Professional and other services revenue decreased \$0.1 million and \$0.2 million for the three and nine months ended September 30, 2014, respectively, as compared to the same periods in 2013, primarily due to a decrease in revenue from consulting services.

On demand unit metrics. As of September 30, 2014, one or more of our on demand solutions was utilized in the management of 9.5 million rental property units, representing an increase of 8.8% compared to the same period in 2013. The increase in the number of rental property units managed by one or more of our on demand solutions was due to new customer sales, marketing efforts to existing customers and our 2013 and 2014 acquisitions which contributed 1.7% to total ending on demand units.

For the three and nine months ended September 30, 2014, annualized non-GAAP on demand revenue per average on demand unit decreased compared to the three and nine months ended September 30, 2013, primarily due to a decrease in contingent commission revenues from our renter's insurance products, reduced spending by our customers on marketing and advertising, and lower resident turnover rates.

Cost of Revenue

	Three Months Ended September 30,				Nine Months Ended September 30,				
	2014	2013	Change	% Change	2014	2013	Change	% Change	
	(in thousands)								
Cost of revenue	\$41,018	\$34,975	\$6,043	17.3	% \$114,319	\$100,397	\$13,922	13.9	%
Depreciation and amortization	5,293	3,136	2,157	68.8	14,034	10,418	3,616	34.7	
Total cost of revenue	\$46,311	\$38,111	\$8,200	21.5	\$128,353	\$110,815	\$17,538	15.8	

Cost of revenue. The increase in cost of revenue for the three months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$2.3 million increase in costs related to the increased sales of our solutions, which includes investments in infrastructure and other support services; a \$3.0 million increase in personnel expense primarily related to costs to support our growth initiatives and to a lesser degree increases in headcount added as a result of our 2014 and 2013 acquisitions; a \$0.4 million increase in stock-based compensation related to our professional services personnel and data center operations personnel; a \$2.2 million increase in non-cash amortization of technology; and a \$0.3 million increase in information technology expense.

The increase in cost of revenue for the nine months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$3.8 million increase in costs related to the increased sales of our solutions, which includes investments in infrastructure and other support services; a \$8.9 million increase in personnel expense primarily related to costs to support our growth initiatives and headcount added as a result of our 2014 and 2013 acquisitions; a \$0.8 million increase in stock-based compensation related to our professional services personnel and data center operations personnel; a \$3.6 million increase in non-cash amortization of technology; and a \$0.4 million increase in information technology expense.

Total product development expense	\$17,528	\$13,232	\$4,296	32.5	\$48,310	\$36,997	\$11,313	30.6	

Product development. The increase in product development expense for the three months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$1.6 million increase in personnel expense for product development groups to further develop, test and launch new products and to a lesser degree a result of our 2014 and 2013 acquisitions and offset by a transition of certain expenses to our Philippine and Indian operations; a \$0.4 increase in facility and infrastructure related costs; a \$1.4 million increase in stock-based compensation expense; a \$0.6 million increase in depreciation expense; and a \$0.3 million increase in other product development related expenses.

The increase in product development expense for the nine months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$4.2 million increase in personnel expense for product development groups to further develop, test and launch new products and as a result of our 2014 and 2013 acquisitions and offset by a transition of certain expenses to our Philippine and Indian operations; a \$0.8 increase in facility and infrastructure related costs; a \$3.6 million increase in stock-based compensation expense; a \$1.4 million increase in depreciation expense; and a \$1.3 million increase in other product development related expenses.

	Three Months Ended September 30,				Nine Months Ended September 30,				
	2014	2013	Change	% Change	2014	2013	Change	% Change

Sales and marketing. The increase in sales and marketing expense for the three months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$3.3 million increase in sales and marketing personnel expenses and commission related to our increased investment in sales personnel and personnel acquired as a result of our 2014 and 2013 acquisitions; a \$1.1 million increase in stock-based compensation expense; a \$0.3 million increase in travel-related expenses; and a \$0.6 million increase in amortization expense; partially offset by a \$0.2 million decrease in bad debt expense and a \$1.1 million increase in marketing program expense offset by lower SEM expenses of \$1.4 million.

The increase in sales and marketing expense for the nine months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$6.0 million increase in sales and marketing personnel expense and commission related to our increased investment in sales personnel and personnel acquired as a result of our 2014 and 2013 acquisitions; a \$2.1 million increase in stock-based compensation expense; a \$2.6 million increase in marketing program expense offset by \$1.3 million from reductions in SEM expenses; a \$1.0 million increase in travel-related expenses; and a \$2.2 million increase in amortization expense; partially offset by a \$0.6 million decrease in bad debt expense.

DRAFT 11-6-2014 430pm

Table of Contents

General and administrative. The decrease in general and administrative expense for the three months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$1.1 million decrease in stock-based compensation related to general and administrative personnel and a \$0.4 million decrease in legal expense; partially offset by a \$0.8 million increase in the fair value adjustments of acquisition-related liabilities; and a \$0.6 million increase in other general and administrative costs.

The increase in general and administrative expense for the nine months ended September 30, 2014 as compared to the same period in 2013 was primarily due to: a \$1.2 million increase in personnel expense to support the growth in our business, including increased investment in our offshore operations that support those functions; a \$1.2 million increase in stock-based compensation related to general and administrative personnel; a \$5.8 million increase in litigation expense primarily due to legal fees and the settlement of the Ace Lawsuit in 2014; and a \$0.8 million increase in other general and administrative costs; partially offset by a \$0.7 million decrease in the fair value adjustments of acquisition-related liabilities.

Interest Expense and Other, Net

The increase in interest expense and other, net for the three months ended September 30, 2014, as compared to the same period in 2013, was due to borrowings on our revolving credit facility to partially finance our acquisition of Kigo.

The decrease in interest expense and other, net for the nine months ended September 30, 2014, as compared to the same period in 2013, was due to a decrease in interest expense as a result of lower debt balances for the majority of nine months ended September 30, 2014 and incurring interest charges in conjunction with the settlement of a sales tax and use audit in 2013.

Provision for Taxes

We compute our provision for income taxes on a quarterly basis by applying the estimated annual effective tax rate to income from recurring operations and other taxable income. Our effective income tax rate was 28.4% and (16.5)% for the nine months ended and 35.4% and (123.3)% for the three months ended September 30, 2014 and 2013, respectively. Our effective tax rate fluctuated from the statutory rate predominantly due to the impact of state taxes and permanent differences, including stock compensation and the non-deductibility of contingent consideration, in relation to our results of operations before income taxes. During 2013, we were able to conclude that, given our performance, the realization of our deferred tax assets was more likely than not and accordingly reversed valuation allowances of approximately \$9.2 million and recorded the reduction in valuation allowances as a tax benefit for the period. This reduction of the valuation allowance is the primary cause of the noted fluctuation of our effective income tax rate between the current and prior periods presented.

Reconciliation of Non-GAAP Financial Measures

We define Adjusted EBITDA as net income (loss) plus acquisition-related and other deferred revenue adjustments, depreciation, asset impairment, and loss on sale of asset, amortization of intangible assets, interest expense, net, income tax expense (benefit), stock-based compensation expense, acquisition-related expense, and certain litigation-related expenses. We believe that the use of Adjusted EBITDA is useful to investors and other users of our financial statements in evaluating our operating performance because it provides them with an additional tool to compare business performance across companies and across periods. We believe that:

Adjusted EBITDA provides investors and other users of our financial information consistency and comparability with our past financial performance, facilitates period-to-period comparisons of operations and facilitates comparisons with our peer companies, many of which use similar non-GAAP financial measures to supplement their GAAP results;

it is useful to exclude certain non-cash charges, such as depreciation and asset impairment, amortization of intangible assets and stock-based compensation and non-core operational charges, such as acquisition-related expense and certain litigation-related expenses, from Adjusted EBITDA because the amount of such expenses in any specific period may not directly correlate to the underlying performance of our business operations and these expenses can vary significantly between periods as a result of new acquisitions, full amortization of previously acquired tangible

and intangible assets or the timing of new stock-based awards, as the case may be; and

it is useful to include deferred revenue written down for GAAP purposes under purchase accounting rules and revenue deferred due to a lack of historical experience determining the settlement of the contractual obligations in order to appropriately measure the underlying performance of our business operations in the period of activity and associated expense.

DRAFT 11-6-2014 430pm

Table of Contents

We use Adjusted EBITDA in conjunction with traditional GAAP operating performance measures as part of our overall assessment of our performance, for planning purposes, including the preparation of our annual operating budget, to evaluate the effectiveness of our business strategies and to communicate with our board of directors concerning our financial performance.

We do not place undue reliance on Adjusted EBITDA as our only measure of operating performance. Adjusted EBITDA should not be considered as a substitute for other measures of liquidity or financial performance reported in accordance with GAAP. There are limitations to using non-GAAP financial measures, including that other companies may calculate these measures differently than we do, that they do not reflect our capital expenditures or future requirements for capital expenditures and that they do not reflect changes in, or cash requirements for, our working capital. We compensate for the inherent limitations associated with using the Adjusted EBITDA measures through disclosure of these limitations, presentation of our financial statements in accordance with GAAP and reconciliation of Adjusted EBITDA to the most directly comparable GAAP measure, net (loss) income.

The following provides a reconciliation of net(loss) income to Adjusted EBITDA:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013

DRAFT 11-6-2014 430pm

Table of Contents

Liquidity and Capital Resources

Our primary sources of liquidity as of September 30, 2014 consisted of \$30.7 million of cash and cash equivalents, \$161.4 million available under our revolving line of credit and \$32.8 million of current assets less current liabilities (excluding \$30.7 million of cash and cash equivalents and \$68.3 million of deferred revenue).

Our principal uses of liquidity have been to fund our operations, working capital requirements, capital expenditures, acquisitions and to service our debt obligations. We expect that working capital requirements, capital expenditures and acquisitions will continue to be our principal needs for liquidity over the near term. In addition, through September 30, 2014, we made several acquisitions for which a portion of the cash purchase price is payable at various times through 2017. We expect to fund these obligations from cash provided by operating activities or, in some cases, the issuance of shares of our common stock at our election.

We believe that our existing cash and cash equivalents, working capital (excluding deferred revenue and cash and cash equivalents) and our cash flow from operations, will be sufficient to fund our operations and planned capital expenditures for at least the next 12 months. Our future capital requirements will depend on many factors, including our rate of revenue growth, the timing and size of acquisitions, the expansion of our sales and marketing activities, the timing and extent of spending to support product development efforts, the timing of introductions of new solutions and enhancements to existing solutions and the continuing market acceptance of our solutions. We may enter into acquisitions of complementary businesses, applications or technologies in the future, which could require us to seek additional equity or debt financing. Additional funds may not be available on terms favorable to us, or at all.

As of December 31, 2013, we had federal and state net operating loss carryforwards of \$174.0 million and \$6.9 million, respectively. These carryforwards may be available to offset potential payments of future federal and state income tax liabilities and, if unused, expire at various dates through 2028 for both federal and state income tax purposes.

The following table sets forth cash flow data for the periods indicated therein:

	Nine Months Ended September 30,	
	2014	2013
	(in thousands)	
Net cash provided by operating activities	\$50,054	\$51,609
Net cash used in investing activities	(71,067) (33,132
Net cash provided by (used in) financing activities	17,199	(8,265
Net Cash Provided by Operating Activities		

In the nine months ended September 30, 2014, cash provided by operating activities consisted of a net loss of \$10.4 million, net non-cash charges of \$59.4 million and changes in working capital of \$6.5 million, partially offset by a deferred tax benefit of \$6.0 million and acquisition-related contingent consideration charges of \$0.6 million. Net non-cash charges to income increased \$15.2 million or 34.4%, compared to the same period in 2013, and primarily consisted of depreciation, amortization and stock-based compensation expense. The cash inflow resulting from the changes in working capital was primarily due to changes in accounts receivable, deferred revenue and accounts payable, partially offset by decreases in other assets arising from prepaid expenses related to software license maintenance.

Net Cash Used in Investing Activities

In the nine months ended September 30, 2014, investing activities consisted of acquisition-related payments of \$41.9 million primarily related to the Kigo, InstaManager, Notivus, and VMM acquisitions and \$29.1 million of capital expenditures related to investments in our technology infrastructure and in our Philippine and Indian operations to support our growth initiatives. The increase in cash used in investing activities from the same period in 2013 relates to the consideration paid, net of cash acquired, for our 2014 acquisitions as compared to 2013 combined with an increase in capital spending.

Net Cash Provided by (Used in) Financing Activities

Cash provided by financing activities during the nine months ended September 30, 2014 was primarily due to receiving \$38.6 million in net proceeds from our revolving credit facility, partially offset by capital lease payments of \$0.4 million, \$4.0 million in payments of acquisition-related contingent consideration, deferred financing costs of \$1.0 million and net outflows of \$16.0 million from stock issuances under our stock-based compensation plans. Cash provided by financing

DRAFT 11-6-2014 430pm

Table of Contents

activities increased from the same period in 2013 primarily due to the receipt of \$38.6 million in proceeds from our revolving credit facility in 2014, partially offset by a \$10.0 million payment on our revolving credit facility in 2013.

Contractual Obligations, Commitments and Contingencies

Contractual Obligations

Our contractual obligations relate primarily to borrowings and interest payments under credit facilities, capital leases, operating leases and purchase obligations. On September 30, 2014, we entered into a new credit facility agreement described below. There have been no other material changes outside normal operations in our contractual obligations from our disclosures within our Form 10-K.

Long-Term Debt Obligations

On September 30, 2014, we entered into a new agreement for a secured revolving credit facility to refinance our outstanding revolving loans. The new credit facility provides an aggregate principal amount of up to \$200.0 million, with sublimits of \$10.0 million for the issuance of letters of credit and for \$20.0 million of swingline loans. The credit facility also allows us, subject to certain conditions, to request additional term loans or revolving commitments in an aggregate principal amount of up to \$150.0 million, plus an amount that would not cause our consolidated net leverage ratio to exceed 3.25 to 1.00. At our option, the revolving loans accrue interest at a per annum rate equal to either LIBOR or Wells Fargo's prime rate (or, if greater, the federal funds rate plus 0.50% or one month LIBOR plus 1.00%) in each case plus a margin ranging from 1.25% to 1.75% in the case of LIBOR loans, and 0.25% to 0.75% in the case of prime rate loans, in each case based upon our consolidated net leverage ratio. The interest is due and payable quarterly, in arrears, for loans bearing interest at the prime rate and at the end of the applicable interest period in the case of loans bearing interest at the adjusted LIBOR rate. The credit facility is secured by substantially all of the Company's assets and certain of our existing and future material domestic subsidiaries are required to guaranty our obligations under the credit facility. We are also required to comply with customary affirmative and negative covenants, as well as a consolidated net leverage ratio and an interest coverage ratio.

Our previous secured revolving credit facility had an aggregate principal amount of up to \$150.0 million, subject to a borrowing formula, with a sublimit of \$10.0 million for the issuance of letters of credit on our behalf. At our option, the borrowings accrued interest at a per annum rate equal to either LIBOR or Wells Fargo's prime rate (or, if greater, the federal funds rate plus 0.50% or three month LIBOR plus 1.00%), in each case plus a margin ranging from 2.00% to 2.50%, in the case of LIBOR loans, and 0.0% to 0.25% in the case of prime rate loans, in each case based upon our senior leverage ratio. The interest was due and payable monthly, in arrears, for loans bearing interest at the prime rate and at the end of the applicable 1-, 2-, or 3-month interest period in the case of loans bearing interest at the adjusted LIBOR rate.

In May 2014, we entered into an amendment to the previous credit facility. Under the terms of the amendment, the restrictive covenants were amended to permit us to repurchase up to \$75 million of our common stock, subject to certain conditions. Additionally, the fixed charge coverage ratio was replaced with a new minimum interest expense coverage ratio and the capital expenditures limitations were increased.

In June 2014, we entered into an amendment to the previous credit facility. Under the terms of the amendment, the parties to the credit facility consented to the acquisition of Kigo and agreed that the acquisition of Kigo would be a "Permitted Acquisition," as defined in the credit facility and would be excluded from the calculation of the Permitted Acquisition limit. Additionally, the amendment increased the value of our equipment that could be in the hands of our employees, consultants, or customers in the ordinary course of business to \$2.5 million and amended the definition of "Aggregate Permitted Acquisition Limit" to \$150.0 million, plus an additional \$100.0 million if certain conditions are met. In June 2014, we borrowed a total of \$25.0 million from our revolving line of credit in order to partially finance our acquisition of Kigo.

All of our obligations under the credit facility are secured by substantially all of our assets. All of our existing and future domestic subsidiaries are required to guaranty our obligations under the credit facility, other than certain immaterial subsidiaries, foreign subsidiary holding companies, and our payment processing subsidiaries. Such guarantees by existing and future domestic subsidiaries are and will be secured by substantially all of the assets of such subsidiaries.

Our credit facility contains customary covenants, subject in each case to customary exceptions and qualifications, which limit our and certain of our subsidiaries' ability to, among other things, incur additional indebtedness or guarantee indebtedness of others; create liens on our assets; enter into mergers or consolidations; dispose of assets; prepay certain indebtedness or make changes to our governing documents and certain of our agreements; pay dividends and make other distributions on our capital stock, and redeem and repurchase our capital stock; make investments, including acquisitions; and enter into transactions with affiliates. Our credit facility additionally contains customary affirmative covenants. We are also required to comply with a maximum consolidated net leverage ratio and a minimum interest coverage ratio. The interest coverage ratio, which is a ratio of our four previous fiscal consecutive quarters' consolidated EBITDA to our interest expense,

DRAFT 11-6-2014 430pm

Table of Contents

is to be not less than 3.00 to 1.00 as of the last day of any fiscal quarter. The consolidated net leverage ratio, which is the ratio of funded indebtedness on the last day of each fiscal quarter to the four previous consecutive fiscal quarters' consolidated EBITDA, is not to be greater than 3.50 to 1.00, provided that we can elect to increase the ratio to 3.75 to 1.00 for a specified period following a permitted acquisition. As of September 30, 2014, we were in compliance with the covenants under our credit facility.

The credit facility contains customary events of default, subject to customary cure periods for certain defaults, that include, among others, non-payment defaults, covenant defaults, material judgment defaults, bankruptcy and insolvency defaults, cross-defaults to certain other material indebtedness, ERISA defaults, inaccuracy of representations and warranties, and a change in control default.

In the event of a default on our credit facility, the obligations under the credit facility could be accelerated, the applicable interest rate under the credit facility could be increased, the loan commitments could be terminated, our subsidiaries that have guaranteed the credit facility could be required to pay the obligations in full, and our lenders would be permitted to exercise remedies with respect to all of the collateral that is securing the credit facility, including substantially all of our and our subsidiary guarantors' assets. Any such default that is not cured or waived could have a material adverse effect on our liquidity and financial condition.

Share Repurchase Program

Our Board of Directors approved a \$50 million initial share repurchase program during the second quarter of fiscal 2014 and continuing for a period of up to one year. During the quarter, we repurchased 844,381 shares of our common stock at a weighted average cost of \$15.66 per share and a total cost of approximately \$13.2 million. No shares were purchased from October 1, 2014 through November 4, 2014.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet financing arrangements and we do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily a result of fluctuations in interest rates. We do not hold or issue financial instruments for trading purposes.

We had cash and cash equivalents of \$30.7 million and \$34.5 million at September 30, 2014 and December 31, 2013, respectively.

We hold cash and cash equivalents for working capital purposes. We do not have material exposure to market risk with respect to investments, as our investments consist primarily of highly liquid investments purchased with original maturities of three months or less. We do not use derivative financial instruments for speculative or trading purposes; however, we may adopt specific hedging strategies in the future. Any declines in interest rates, however, will reduce future interest income.

We had \$38.6 million and \$0.0 million outstanding under our revolving credit facility at September 30, 2014 and December 31, 2013, respectively. The interest on this debt is variable and adjusted periodically based on the three-month LIBOR rate. If the LIBOR and Prime rates change by 10% of the September 30, 2014 closing market rates, our annual interest expense would change by less than \$0.1 million.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Pursuant to Rule 13a-15(b) and Rule 15d-15(b) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), we carried out an evaluation, with the participation of our management, and under the supervision of

our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined under Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2014, in ensuring that information required to be disclosed in the reports that we file or

31

DRAFT 11-6-2014 430pm

Table of Contents

submit under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management's assessment of the effectiveness of our disclosure controls and procedures is expressed at the level of reasonable assurance because management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives.

Changes in Internal Controls

There were no changes in the Company's internal control over financial reporting during the nine months ended September 30, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Inherent Limitations of Internal Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

DRAFT 11-6-2014 430pm

Table of Contents

PART II—OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time, we have been and may be involved in various legal proceedings arising from our ordinary course of business.

We believe that there are no claims or actions pending against us, the ultimate disposition of which would have a material adverse impact on us.

Item 1A. Risk Factors

Risks Related to Our Business

Our quarterly operating results have fluctuated in the past and may fluctuate in the future, which could cause our stock price to decline.

Our quarterly operating results may fluctuate as a result of a variety of factors, many of which are outside of our control. Fluctuations in our quarterly operating results may be due to a number of factors, including the risks and uncertainties discussed elsewhere in this filing. Some of the important factors that could cause our revenues and operating results to fluctuate from quarter to quarter include:

- the extent to which on demand software solutions maintain current and achieve broader market acceptance;
- fluctuations in leasing activity by our customers;
- increase in number and/or severity of insurance claims on policies sold by us;
- our ability to timely introduce enhancements to our existing solutions and new solutions;
- our ability to renew the use of our on demand products and services by units managed by our existing customers and
- to increase the use of our on demand products and services for the management of units by our existing and new customers;
- changes in our pricing policies or those of our competitors or new competitors;
- changes in local economic, political and regulatory environments of our international operations;
- the variable nature of our sales and implementation cycles;
- general economic, industry and market conditions in the rental housing industry that impact our current and potential customers;
- the amount and timing of our investment in research and development activities;
- technical difficulties, service interruptions, data or document losses or security breaches;
- Internet usage trends among consumers, and the methodologies Internet search engines utilized to direct those consumers to websites such as our LeaseStar product family;
- our ability to hire and retain qualified key personnel, including the rate of expansion of our sales force and IT department;
- our ability to get ahead of external forces and emergence of new technologies and products;
- our ability to enter into new markets;
- changes in the legal, regulatory or compliance environment related to the rental housing industry or the markets in which we operate, including without limitation fair credit reporting, payment processing, data protection and privacy, social media, utility billing, insurance, the Internet and e-commerce, licensing, telemarketing, electronic communications, the Health Insurance Portability Act of 1996 (“HIPAA”) and the Health Information Technology Economic and Clinical Health Act (“HITECH”);
- the amount and timing of operating expenses and capital expenditures related to the expansion of our operations and infrastructure;
- the timing of revenue and expenses related to recent and potential acquisitions or dispositions of businesses or technologies;
- our ability to integrate acquisition operations in a cost-effective and timely manner;
- litigation and settlement costs, including unforeseen costs;

DRAFT 11-6-2014 430pm

Table of Contents

public company reporting requirements; and

new accounting pronouncements and changes in accounting standards or practices, particularly any affecting the recognition of subscription revenue or accounting for mergers and acquisitions.

Fluctuations in our quarterly operating results or guidance that we provide may lead analysts to change their long-term model for valuing our common stock, cause us to face short-term liquidity issues, impact our ability to retain or attract key personnel or cause other unanticipated issues, all of which could cause our stock price to decline. As a result of the potential variations in our quarterly revenue and operating results, we believe that quarter-to-quarter and year-to-date period comparisons of our revenues and operating results may not be meaningful and the results of any one quarter should not be relied upon as an indication of future performance.

We have a history of operating losses and may not maintain profitability in the future.

We have not been consistently profitable on a quarterly or annual basis and may not be able to sustain our growth or increase our profitability in the future. We expect to make significant future expenditures related to the development and expansion of our business. As a result of increased general and administrative expenses due to the additional operational and reporting costs associated with being a public company, we need to generate and sustain increased revenue to achieve future profitability expectations. We may incur significant losses in the future for a number of reasons, including the other risks and uncertainties described in this filing. Additionally, we may encounter unforeseen operating expenses, difficulties, complications, delays and other unknown factors that may result in losses in future periods. If these losses exceed our expectations or our growth expectations are not met in future periods, our financial performance will be affected adversely.

If we are unable to manage the growth of our diverse and complex operations, our financial performance may suffer.

The growth in the size, dispersed geographic locations, complexity and diversity of our business and the expansion of our product lines and customer base has placed, and our anticipated growth may continue to place, a significant strain on our managerial, administrative, operational, financial and other resources. We increased our number of employees from 922 as of December 31, 2008 to 3,757 as of September 30, 2014. We increased our number of on demand customers from 2,669 as of December 31, 2008 to over 10,400 as of September 30, 2014. We increased the number of on demand product centers that we offer from 29 as of December 31, 2008 to 57 as September 30, 2014. In addition, in the past, we have grown and expect to continue to grow through acquisitions. Our ability to effectively manage our anticipated future growth will depend on, among other things, the following:

- successfully supporting and maintaining a broad range of current and emerging solutions;

- maintaining continuity in our senior management and key personnel;

- attracting, retaining, training and motivating our employees, particularly technical, customer service and sales personnel;

- enhancing our financial and accounting systems and controls;

- enhancing our information technology infrastructure, processes and controls;

- successfully completing system upgrades and enhancements; and

- managing expanded operations in geographically dispersed locations.

If we do not manage the size, complexity and diverse nature of our business effectively, we could experience product performance issues, delayed software releases and longer response times for assisting our customers with implementation of our solutions and could lack adequate resources to support our customers on an ongoing basis, any of which could adversely affect our reputation in the market and our ability to generate revenue from new or existing customers.

The nature of our platform is complex and highly integrated, and if we fail to successfully manage releases or integrate new solutions, it could harm our revenues, operating income and reputation.

We manage a complex platform of solutions that consists of our property management solutions, integrated software-enabled value-added services and web-based advertising and lease generation services. Many of our solutions include a large number of product centers that are highly integrated and require interoperability with other RealPage products, as well as products and services of third-party service providers. Additionally, we typically deploy new releases of the software underlying our on demand software solutions on a bi-weekly, monthly or quarterly

schedule, depending on the solution. Due to this complexity and the condensed development cycles under which we operate, we may experience errors in our software, corruption or loss of our data or unexpected performance issues from time to time. For example, our solutions may face interoperability difficulties with software operating systems or programs being used by our customers, or new releases, upgrades, fixes or the integration of acquired technologies may have unanticipated consequences on the operation and performance of our other solutions. If we encounter integration challenges or discover errors in our solutions late in our

DRAFT 11-6-2014 430pm

Table of Contents

development cycle, it may cause us to delay our launch dates. Any major integration or interoperability issues or launch delays could have a material adverse effect on our revenues, operating income and reputation.

Our business depends substantially on the renewal of our products and services for on demand units managed by our customers and the increase in the use of our on demand products and services for on demand units.

With the exception of some of our LeaseStar and Propertyware solutions, which are typically month-to-month, we generally license our solutions pursuant to customer agreements with a term of one year. The pricing of the agreements is typically based on a price per unit basis. Our customers have no obligation to renew these agreements after their term expires, or to renew these agreements at the same or higher annual contract value. In addition, under specific circumstances, our customers have the right to cancel their customer agreements before they expire, for example, in the event of an uncured breach by us, or in some circumstances, by giving 30 days' notice or paying a cancellation fee. In addition, customers often purchase a higher level of professional services in the initial term than they do in renewal terms to ensure successful activation. As a result, our ability to grow is dependent in part on customers purchasing additional solutions or professional services for their on demand units after the initial term of their customer agreement. Though we maintain and analyze historical data with respect to rates of customer renewals, upgrades and expansions, those rates may not accurately predict future trends in renewal of on demand units. Our customers' on demand unit renewal rates may decline or fluctuate for a number of reasons, including, but not limited to, their level of satisfaction with our solutions, our pricing, our competitors' pricing, reductions in our customers' spending levels or reductions in the number of on demand units managed by our customers. If our customers cancel or amend their agreements with us during their term, do not renew their agreements, renew on less favorable terms or do not purchase additional solutions or professional services in renewal periods, our revenue may grow more slowly than expected or decline and our profitability may be harmed.

Additionally, we have experienced, and expect to continue to experience, some level of on demand unit attrition as properties are sold and the new owners and managers of properties previously owned or managed by our customers do not continue to use our solutions. We cannot predict the amount of on demand unit turnover we will experience in the future. However, we have experienced higher rates of on demand unit attrition with our Propertyware property management system, primarily because it serves smaller properties than our OneSite property management system, and we may experience higher levels of on demand unit attrition to the extent Propertyware grows as a percentage of our revenues. If we experience increased on demand unit turnover, our financial performance and operating results could be adversely affected.

On demand revenue that is derived from products that help owners and managers lease and market apartments, such as certain products in LeaseStar and LeasingDesk, may decrease as occupancy rates rise. We have also experienced, and expect to continue to experience, some number of consolidations of our customers with other parties. If one of our customers consolidates with a party who is not a customer, our customer may decide not to continue to use our solutions for its on demand units. In addition, if one of our customers is consolidated with another customer, the acquiring customer may have negotiated lower prices for our solutions or may use fewer of our solutions than the acquired customer. In each case, the consolidated entity may attempt to negotiate lower prices for using our solutions as a result of the entity's increased size. These consolidations may cause us to lose on demand units or require us to reduce prices as a result of enhanced customer leverage, which could cause our financial performance and operating results to be adversely affected.

Historically, our on demand units managed by our customers have renewed at a rate of 95.3% based on an average of the last two years ending September 30, 2014.

Because we recognize subscription revenue over the term of the applicable customer agreement, a decline in subscription renewals or new service agreements may not be reflected immediately in our operating results.

We generally recognize revenue from customers ratably over the terms of their customer agreements which, with the exception of our month-to-month advertising, lease generation and Propertyware agreements, are typically one year.

As a result, much of the revenue we report in each quarter is deferred revenue from customer agreements entered into during previous quarters. Consequently, a decline in new or renewed customer agreements in any one quarter will not be fully reflected in our revenue or our results of operations until future periods. Accordingly, this revenue recognition

model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, as revenue from new customers must be recognized over the applicable subscription term.

We may not be able to continue to add new customers and retain and increase sales to our existing customers, which could adversely affect our operating results.

Our revenue growth is dependent on our ability to continually attract new customers while retaining and expanding our service offerings to existing customers. Growth in the demand for our solutions may be inhibited and we may be unable to sustain growth in our sales for a number of reasons, including, but not limited to:

- our failure to develop new or additional solutions;

DRAFT 11-6-2014 430pm

Table of Contents

our inability to market our solutions in a cost-effective manner to new customers or in new vertical or geographic markets;

our inability to expand our sales to existing customers;

our inability to compete successfully against our existing and future competitors in pricing strategies;

the inability of our LeaseStar product family to grow traffic to its websites, resulting in lower levels of lead and lease/move-in traffic to customers;

our inability to build and promote our brand; and

perceived or actual security, integrity, reliability, quality or compatibility problems with our solutions.

A substantial amount of our past revenue growth was derived from purchases of upgrades and additional solutions by existing customers. Our costs associated with increasing revenue from existing customers are generally lower than costs associated with generating revenue from new customers. Therefore, a reduction in the rate of revenue increase from our existing customers, even if offset by an increase in revenue from new customers, could reduce our profitability and have a material adverse effect on our operating results.

If we are not able to integrate past or future acquisitions successfully, our operating results and prospects could be harmed.

We have acquired new technology and domain expertise through multiple acquisitions, including our most recent acquisitions of Seniors for Living, Inc. in February 2013, RentSentinel and RentSocial in March 2013, Windsor Compliance Services, Inc., MyBuilding Inc., and Active Building, LLC in October 2013, Bookt, LLC in January 2014, Virtual Maintenance Manager, LLC in March 2014, Notivus Multi-Family, LLC in May 2014, and Kigo, Inc. in June 2014. We expect to continue making acquisitions. The success of our future acquisition strategy will depend on our ability to identify, negotiate, complete and integrate acquisitions. Acquisitions are inherently risky, and any acquisitions we complete may not be successful. Any acquisitions we pursue would involve numerous risks, including the following:

difficulties in integrating and managing the operations and technologies of the companies we acquire;

- diversion of our management's attention from normal daily operations of our business;

our inability to maintain the customers, the key employees, the key business relationships and the reputations of the businesses we acquire;

our inability to generate sufficient revenue from acquisitions to offset our increased expenses associated with acquisitions;

our responsibility for the liabilities of the businesses we acquire, including, without limitation, liabilities arising out of their failure to maintain effective data security, data integrity, disaster recovery and privacy controls prior to the acquisition, or their infringement or alleged infringement of third party intellectual property, contract or data access rights prior to the acquisition;

difficulties in complying with new markets or regulatory standards to which we were not previously subject;

delays in our ability to implement internal standards, controls, procedures and policies in the businesses we acquire; and

adverse effects of acquisition activity on the key performance indicators we use to monitor our performance as a business.

Our current acquisition strategy includes the acquisition of companies that offer property management systems or other systems that may not interoperate with our software-enabled value-added services. In order to integrate and fully realize the benefits of such acquisitions, we expect to build application interfaces that enable such customers to use a wide range of our solutions while they continue to use their legacy management systems. In addition, over time we expect to migrate each acquired company's customers to our on demand property management solutions to retain them as customers and to be in a position to offer them our solutions on a cost-effective basis. These efforts may be unsuccessful or entail costs that result in losses or reduced profitability.

Unanticipated events and circumstances may occur in future periods which may affect the realizability of our intangibles assets recognized through acquisitions. The events and circumstances that we consider include significant

under-performance relative to projected future operating results and significant changes in our overall business and/or product strategies. These events and circumstances may cause us to revise our estimates and assumptions used in analyzing the value of our other intangible assets with indefinite lives, the revision could result in a non-cash impairment charge that could have a material impact on our financial results.

We may be unable to secure the equity or debt funding necessary to finance future acquisitions on terms that are acceptable to us, or at all. If we finance acquisitions by issuing equity or convertible debt securities, our existing stockholders

DRAFT 11-6-2014 430pm

Table of Contents

will likely experience ownership dilution, and if we finance future acquisitions with debt funding, we will incur interest expense and may have to comply with additional financing covenants or secure that debt obligation with our assets.

If we are unable to successfully develop or acquire and sell enhancements and new solutions, our revenue growth will be harmed and we may not be able to meet profitability expectations.

The industry in which we operate is characterized by rapidly changing customer requirements, technological developments and evolving industry standards. Our ability to attract new customers and increase revenue from existing customers will depend in large part on our ability to successfully develop, bring to market and sell enhancements to our existing solutions and new solutions that effectively respond to the rapid changes in our industry. Any enhancements or new solutions that we develop or acquire may not be introduced to the market in a timely or cost-effective manner and may not achieve the broad market acceptance necessary to generate the revenue required to offset the operating expenses and capital expenditures related to development or acquisition. If we are unable to timely develop or acquire and sell enhancements and new solutions that keep pace with the rapid changes in our industry, our revenue will not grow as expected and we may not be able to maintain or meet profitability expectations. We derive a substantial portion of our revenue from a limited number of our solutions and failure to maintain demand for these solutions or diversify our revenue base through increasing demand for our other solutions could negatively affect our operating results.

Historically, a majority of our revenue was derived from sales of our OneSite property management system and our LeasingDesk software-enabled value-added service. If we are unable to develop enhancements to these solutions to maintain demand for these solutions or to diversify our revenue base by increasing demand for our other solutions, our operating results could be negatively impacted. If there is inadequate demand for these new products, our operating results could be negatively impacted.

We use a small number of data centers to deliver our solutions. Any disruption of service at our data centers or other facilities could interrupt or delay our customers' access to our solutions, which could harm our operating results.

The ability of our customers to access our service is critical to our business. We host our products and services, support our operations, and service our customers primarily from our Dallas, Texas-based data centers. Some of our products and services derived from recent acquisitions are hosted and supported from data centers in other geographic locations within the continental United States, many of which are operated by third party data vendors. Until such time that migration of these acquired product and services to our Texas-based data centers can be completed, we will not have sole control over the operations of all data center facilities.

We may fail to provide such service as a result of numerous factors, many of which are beyond our control, including, without limitation: mechanical failure, power outage, human error, physical or electronic security breaches, war, terrorism and related conflicts or similar events worldwide, fire, earthquake, hurricane, flood and other natural disasters, sabotage and vandalism. We attempt to mitigate these risks at our Texas-based data centers or other facilities through various business continuity efforts, including redundant infrastructure, 24 x 7 x 365 system activity monitoring, backup and recovery procedures, use of a secure off-site storage facility for backup media, separate test systems and rotation of management and system security measures, but our precautions may not protect against all potential problems. Disaster recovery procedures are in place to facilitate the recovery of our operations, products and services within the stated service level goals. Our secondary data center is equipped with physical space, power, storage and networking infrastructure and Internet connectivity to support the solutions we provide in the event of the interruption of services at our primary data center. Even with this secondary data center, however, our operations would be interrupted during the transition process should our primary data center experience a failure. Moreover, both our primary and secondary data centers are located in the greater metropolitan Dallas area. As a result, any regional disaster could affect both data centers and result in a material disruption of our services. Furthermore, these business continuity efforts do not support our data centers outside of Texas or any centers operated by third party data vendors. Problems at one or more of our data centers, whether or not within our control, could result in service interruptions or delays that could harm our operating results. Disruptions at our data centers or other facilities could cause disruptions in our services and data or document loss or corruption. This could damage our reputation, cause us to issue credits to

customers, subject us to potential liability or costs related to defending against claims or cause customers to terminate or elect not to renew their agreements, any of which could negatively impact our revenues.

We provide service level commitments to our customers, and our failure to meet the stated service levels could significantly harm our revenue and our reputation.

Our customer agreements provide that we maintain certain service level commitments to our customers relating primarily to product functionality, network uptime, critical infrastructure availability and hardware replacement. For example, our service level agreements generally require that our solutions are available 98% of the time during coverage hours (normally 6:00 a.m. through 10:00 p.m. Central time daily) 365 days per year (other than certain permitted exceptions such as

DRAFT 11-6-2014 430pm

Table of Contents

maintenance). If we are unable to meet the stated service level commitments, we may be contractually obligated to provide customers with refunds or credits. Additionally, if we fail to meet our service level commitments a specified number of times within a given time frame or for a specified duration, our customers may terminate their agreements with us or extend the term of their agreements at no additional fee. As a result, a failure to deliver services for a relatively short duration could cause us to issue credits or refunds to a large number of affected customers or result in the loss of customers. In addition, we cannot assure you that our customers will accept these credits, refunds, termination or extension rights in lieu of other legal remedies that may be available to them. Our failure to meet our commitments could also result in substantial customer dissatisfaction or loss. Because of the loss of future revenues through the issuance of credits or the loss of customers or other potential liabilities, our revenue could be significantly impacted if we cannot meet our service level commitments to our customers.

We face intense competitive pressures and our failure to compete successfully could harm our operating results. The market for many of our solutions is intensely competitive, fragmented and rapidly changing. Some of these markets have relatively low barriers to entry. With the introduction of new technologies and market entrants, we expect competition to intensify in the future. Increased competition generally could result in pricing pressures, reduced sales and reduced margins. Often we compete to sell our solutions against existing systems that our potential customers have already made significant expenditures to install.

Our competitors vary depending on our product and service. In the market for accounting software we compete with Yardi Systems, Inc. ("Yardi"), MRI Software LLC, Property Solutions International, Inc. ("Property Solutions"), AMSI Property Management (owned by Infor Global Solutions, Inc.), Intacct Corp, NetSuite Inc., Intuit Inc, Oracle Corporation, PeopleSoft and JD Edwards (each owned by Oracle Corporation), SAP AG, Microsoft Corporation, AppFolio Inc. and various smaller providers of accounting software. High costs are typically associated with switching an organization's accounting software. In the market for property management software, we face competitive pressure from Yardi and its Voyager products, AMSI Property Management (owned by Infor Global Solutions, Inc.), Boston Post (acquired by MRI Software LLC), Jenark (owned by CoreLogic), Entrata (a division of Property Solutions), ResMan and MRI Software LLC. In the single-family market, our accounting and property management systems primarily compete with Yardi, AppFolio Inc., Intuit Inc., DIY Real Estate Solutions (acquired by Yardi), Buildium, LLC, Rent Manager (owned by London Computer Systems, Inc.), and Property Boss Solutions, LLC. In the market for vertically-integrated cloud computing for multi-family real estate owners and property managers, our only substantial competition is from Yardi. We also compete with cloud computing service providers such as Amazon.com Inc., Rackspace Hosting Inc., International Business Machines Corp. and many others.

We offer a number of software-enabled value-added services that compete with a disparate and large group of competitors. In the applicant screening market, our principal competitors are LexisNexis (a subsidiary of Reed Elsevier Group plc), CoreLogic, Inc. (formerly First Advantage Corporation, an affiliate of The First American Corporation), Property Solutions, TransUnion Rental Screening Solutions, Inc. (a subsidiary of TransUnion LLC), Resident Check Inc., Yardi, On-Site.com and many other smaller regional and local screening companies.

In the insurance market, our principal competitors are Assurant, Inc., Bader Company, CoreLogic, Inc., Property Solutions, Yardi and a number of national insurance underwriters (including GEICO Corporation, The Allstate Corporation, State Farm Fire and Casualty Company, Farmers Insurance Exchange, Nationwide Mutual Insurance Company and United Services Automobile Association) that market renters insurance. There are many smaller screening and insurance providers in the risk mitigation area that we encounter less frequently, but they nevertheless present a competitive presence in the market.

In the customer relationship management ("CRM") market, we compete with providers of contact center and call tracking services, including LeaseHawk LLC, Yardi, Property Solutions International, Inc., and numerous regional and local contact centers. In addition, we compete with lead tracking solution providers, including LeaseHawk LLC, Lead Tracking Solutions (acquired by Yardi) and Who's Calling, Inc. In addition, we compete with content syndication providers VaultWare (owned by MRI Software LLC) and rentbits.com, Inc. Finally, we compete with companies providing web portal services, including Apartments24-7.com, Inc., Ellipse Communications, Inc., Property Solutions, G5 Search Marketing, Inc., Spherexx.com, and Yardi. Certain Internet listing services also offer websites for their

customers, usually as a free value add to their listing service.

In the marketing and web portal services market, we compete with G5 Search Marketing, Inc., Spherexx LLC, ReachLocal, Inc., Property Solutions, On-Site.com, Yodle, Inc., Yardi and many local or regional advertising agencies.

In the Internet listing service market, we compete with ForRent (a division of Dominion Enterprises), Apartment Guide (a division of Primedia Inc.), Rent.com (owned by Primedia, Inc.), RentPath, Inc., Apartments.com (a division of CoStar Group, Inc.), Apartment Finder (a division of Network Communications, Inc.), Move, Inc., Property Solutions, Rent Café (a division of Yardi), Zillow (and Trulia, Inc.) and many other companies in regional areas.

DRAFT 11-6-2014 430pm

Table of Contents

In the Senior Living market, we compete against A Place for Mom, Inc., Care.com, Inc., Caring, Inc., Eldermark, Care Patrol Franchise Systems, LLC, Yardi, Aging with Grace, LLC, SeniorHousingNet.com (owned by Move, Inc.), G5 Search Marketing Inc., SeniorHomes.com (owned by Moseo, Corp.), The Right Click LLC, ALMSA Corporation and many other regionally focused companies.

In the utility billing and energy management market, we compete at a national level with American Utility Management, Inc., Conservice, LLC, Yardi (following its acquisitions of ista North America and Energy Billing Systems, Inc.), Property Solutions, Ocius LLC, NWP Services Corporation and Minol USA, L.P. Many other smaller utility billing companies compete for smaller rental properties or in regional areas.

In the revenue management market, we compete with Property Solutions, The Rainmaker Group, Inc. and Yardi.

In the market for multi-family housing market research, we compete with Reis, Inc., Axiometrics, Inc., Pierce-Eislen, Inc. (owned by Yardi), CoStar Group, Inc. and Portfolio Research, Inc.

In the spend management market, we compete with Yardi, AvidXchange, Inc., Nexus Systems, Inc., Ariba, Inc., Oracle Corporation, Buyers Access LLC, PAS Purchasing Solutions and ESS Technologies LLC.

In the payment processing market, we compete with Chase Paymentech Solutions, LLC (a subsidiary of JPMorgan Chase & Co.), First Data Corporation, Fiserv, Inc., MoneyGram International, Inc., NWP Services Corporation, On-Site.com, Property Solutions, PayLease LLC, RentPayment.com (a subsidiary of Yapstone, Inc.), Yardi, a number of national banking institutions and those that take payments directly from tenants.

In the Affordable housing compliance and audit services market, we compete with Zeffert and Associates, Inc., Preferred Compliance Solutions, Inc., Spectrum Enterprises, Inc. and many other smaller local and regional compliance and audit services.

In the vacation rental market, we compete with LiveRez, Inc., HomeAway Software, and many other smaller local and regional companies.

In addition, many of our existing or potential customers have developed or may develop their own solutions that may be competitive with our solutions. We also may face competition for potential acquisition targets from our competitors who are seeking to expand their offerings.

With respect to all of our competitors, we compete based on a number of factors, including total cost of ownership, level of integration with property management systems, ease of implementation, product functionality and scope, performance, security, scalability and reliability of service, brand and reputation, sales and marketing capabilities and financial resources. Some of our existing competitors and new market entrants may enjoy substantial competitive advantages, such as greater name recognition, longer operating histories, larger installed customer bases and larger sales and marketing budgets, as well as greater financial, technical and other resources. In addition, any number of our existing competitors or new market entrants could combine or consolidate to become a more formidable competitor with greater resources. As a result of such competitive advantages, our existing and future competitors may be able to:

- develop superior products or services, gain greater market acceptance and expand their offerings more efficiently or more rapidly;

- adapt to new or emerging technologies and changes in customer requirements more quickly;

- take advantage of acquisition and other opportunities more readily;

- adopt more aggressive pricing policies and devote greater resources to the promotion of their brand and marketing and sales of their products and services; and

- devote greater resources to the research and development of their products and services.

If we are not able to compete effectively, our operating results will be harmed.

We integrate our software-enabled value-added services with competitive property management software for some of our customers. Our application infrastructure, marketed to our customers as the RealPage Cloud, is based on an open architecture that enables third-party applications to access and interface with applications hosted in the RealPage Cloud through our RealPage Exchange platform. Likewise, through this platform our RealPage Cloud services are able to access and interface with other third-party applications, including third-party property management systems. We also provide services to assist in the implementation, training, support and hosting with respect to the integration of some of our competitors' applications with our solutions. We sometimes rely on the cooperation of our competitors

to implement solutions for our customers. However, frequently our reliance on the cooperation of our competitors can result in delays in integration. There is no assurance that our competitors, even if contractually obligated to do so, will continue to cooperate with us or will not prospectively alter their obligations to do so. We also occasionally develop interfaces between our software-enabled value-added services and competitor property management software without their cooperation or consent. There is no assurance that our competitors will

DRAFT 11-6-2014 430pm

Table of Contents

not alter their applications in ways that inhibit or prevent integration or assert that their intellectual property rights restrict our ability to integrate our solutions with their applications. Moreover, regardless of merit, such interface-related activity may result in costly litigation.

On January 24, 2011, Yardi filed a lawsuit in the U.S. District Court for the Central District of California against RealPage, Inc. and DC Consulting, Inc. (the “Yardi Lawsuit”). We answered and filed counterclaims against Yardi, and on July 1, 2012, RealPage and Yardi entered into a comprehensive settlement of all outstanding litigation between them, and the lawsuit was dismissed. As part of the settlement, Yardi and RealPage granted each other perpetual licenses and rights to substantially expanded interfaces so that clients can experience a more full-featured integration between RealPage and Yardi applications. The parties also established ongoing testing environments to facilitate efficient operation of the interfaces. In addition, Yardi granted RealPage a license to certain patents. Under the settlement, RealPage will continue providing hosting services for Yardi software for current clients until July 2017. RealPage also agreed to stop offering hosting services for Yardi software to new customers and to stop providing support or implementation services for Yardi software. While we believe that this settlement comprehensively addressed the matters underlying our dispute with Yardi, if Yardi or other competitors do not cooperate with us, alter their applications in ways that inhibit or restrict the integration of our solutions or assert that their intellectual property rights restrict our ability to integrate our solutions with their applications and we are not able to find alternative ways to integrate our solutions with our competitors’ applications, our business would be harmed.

We face competition to attract consumers to our LeaseStar product websites and mobile applications, which could impair our ability to continue to grow the number of users who use our websites and mobile applications, which would harm our business, results of operations and financial condition.

The success of our LeaseStar product family depends in part on our ability to continue to attract additional consumers to our websites and mobile applications. Our existing and potential competitors include companies that could devote greater technical and other resources than we have available, have a more accelerated time frame for deployment and leverage their existing user bases and proprietary technologies to provide products and services that consumers might view as superior to our offerings. Any of our future or existing competitors may introduce different solutions that attract consumers or provide solutions similar to our own but with better branding or marketing resources. If we are unable to continue to grow the number of consumers who use our website and mobile applications, our business, results of operations and financial condition would be harmed.

We are entering a business environment in which social media integration is playing a significantly increasing role. Social media is a new and rapidly changing industry wherein the rules and regulations related to use and disclosure of personal information is unclear and evolving.

The operation and marketing of multitenant real estate developments is likely to become more dependent upon the use of and integration with social media platforms as communities attempt to reach their current and target customers through applications, such as Facebook, Twitter, LinkedIn and other current and emerging social applications. The use of these applications necessarily involves the disclosure of personal information by individuals participating in social media, and the corresponding utilization of such personal information by our products and services via integration programs and data exchanges. The regulatory framework for social media privacy and security issues is currently in flux and is likely to remain so for the foreseeable future. Practices regarding the collection, use, storage, transmission and security of personal information by companies on social media platforms have recently come under increased public scrutiny as various government agencies and consumer groups have called for new regulation and changes in industry practices. We are also subject to each social media platform’s terms and conditions for use, application development and integration, which may be modified, restricted, or otherwise changed, affecting and possibly curtailing our ability to offer products and services.

These factors, many of which are beyond our control, present a high degree of uncertainty for the future of social media integration. As such, there is no assurance that our participation in social media integration will be risk free, as contractual, statutory or other legal restrictions may be created that limit or otherwise impede our participation in or leverage of social media integration.

We may be unable to compete successfully against our existing or future competitors in attracting advertisers, which could harm our business, results of operations and financial condition.

In our LeaseStar product family, we compete to attract advertisers with media sites, including websites dedicated to providing real estate listings and other rental housing related services to real estate professionals and consumers, and major Internet portals, general search engines and social media sites, as well as other online companies. We also compete for a share of advertisers' overall marketing budgets with traditional media such as television, magazines, newspapers and home/apartment guide publications, particularly with respect to advertising dollars spent at the local level by real estate professionals to advertise their qualifications and listings. Large companies with significant brand recognition have large numbers of direct sales personnel and substantial proprietary advertising inventory and web traffic, which may provide a competitive advantage. To compete successfully for advertisers against future and existing competitors, we must continue to invest resources in

DRAFT 11-6-2014 430pm

Table of Contents

developing our advertising platform and proving the effectiveness and relevance of our advertising products and services. Pressure from competitors seeking to acquire a greater share of our advertisers' overall marketing budget could adversely affect our pricing and margins, lower our revenue, and increase our research and development and marketing expenses. If we are unable to compete successfully against our existing or future competitors, our business, financial condition or results of operations would be harmed.

Variability in our sales and activation cycles could result in fluctuations in our quarterly results of operations and cause our stock price to decline.

The sales and activation cycles for our solutions, from initial contact with a prospective customer to contract execution and activation, vary widely by customer and solution. We do not recognize revenue until the solution is activated. While most of our activations follow a set of standard procedures, a customer's priorities may delay activation and our ability to recognize revenue, which could result in fluctuations in our quarterly operating results. Additionally, certain of our products are offered in suites containing multiple solutions, resulting in additional fluctuation in activations depending on each customer's priorities with respect to solutions included in the suite. Many of our customers are price sensitive, and if market dynamics require us to change our pricing model or reduce prices, our operating results will be harmed.

Many of our existing and potential customers are price sensitive, and recent adverse global economic conditions, as well as decreased leasing velocity, have contributed to increased price sensitivity in the multi-family housing market and the other markets that we serve. As market dynamics change, or as new and existing competitors introduce more competitive pricing or pricing models, we may be unable to renew our agreements with existing customers or customers of the businesses we acquire or attract new customers at the same price or based on the same pricing model as previously used. As a result, it is possible that we may be required to change our pricing model, offer price incentives or reduce our prices, which could harm our revenue, profitability and operating results.

If we do not effectively expand and train our sales force, we may be unable to add new customers or increase sales to our existing customers and our business will be harmed.

We continue to be substantially dependent on our sales force to obtain new customers and to sell additional solutions to our existing customers. We believe that there is significant competition for sales personnel with the skills and technical knowledge that we require. Our ability to achieve significant revenue growth will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of sales personnel to support our growth. New hires require significant training and, in most cases, take significant time before they achieve full productivity. Our recent hires and planned hires may not become as productive as we expect, and we may be unable to hire or retain sufficient numbers of qualified individuals in the markets where we do business or plan to do business. If we are unable to hire and train sufficient numbers of effective sales personnel, or the sales personnel are not successful in obtaining new customers or increasing sales to our existing customer base, our business will be harmed.

Material defects or errors in the software we use to deliver our solutions could harm our reputation, result in significant costs to us and impair our ability to sell our solutions.

The software applications underlying our solutions are inherently complex and may contain material defects or errors, particularly when first introduced or when new versions or enhancements are released. We have, from time to time, found defects in the software applications underlying our solutions, and new errors in our existing solutions may be detected in the future. Any errors or defects that cause performance problems or service interruptions could result in:

- a reduction in new sales or subscription renewal rates;
- unexpected sales credits or refunds to our customers, loss of customers and other potential liabilities;
- delays in customer payments, increasing our collection reserve and collection cycle;
- diversion of development resources and associated costs;
- harm to our reputation and brand; and
- unanticipated litigation costs.

Additionally, the costs incurred in correcting defects or errors could be substantial and could adversely affect our operating results.

Failure to effectively manage the development of our solutions and data processing efforts outside the United States could harm our business.

Our success depends, in part, on our ability to process high volumes of customer data and enhance existing solutions and develop new solutions rapidly and cost effectively. We currently maintain offices in Hyderabad, India and Manila, Philippines where we employ development and data processing personnel. We believe that performing these activities in

41

DRAFT 11-6-2014 430pm

Table of Contents

Hyderabad and Manila increases the efficiency and decreases the costs of our development and data processing efforts. However, managing and staffing international operations requires management's attention and financial resources. The level of cost savings achieved by our international operations may not exceed the amount of investment and additional resources required to manage and operate these international operations. Additionally, if we experience difficulties as a result of political, social, economic or environmental instability, change in applicable law, limitations of local infrastructure, or problems with our workforce or facilities at our or third parties' international operations, our business could be harmed due to delays in product release schedules or data processing services. We rely on third-party technologies and services that may be difficult to replace or that could cause errors, failures or disruptions of our service, any of which could harm our business.

We rely on a number of third-party providers, including, but not limited to, computer hardware and software vendors, database and data providers, to deliver our solutions. We currently utilize equipment, software and services from Akami Inc., Avaya Inc., Brocade Communications Systems, Inc., Cisco Systems, Inc., Dell Inc., EMC Corporation, Microsoft Corporation, Oracle Corporation and salesforce.com, inc., as well as many other smaller providers. Our OneSite Accounting service relies on a software-as-a-service, or SaaS-based, accounting system developed and maintained by a third-party service provider. We host this application in our data centers and provide supplemental development resources to extend this accounting system to meet the unique requirements of the rental housing industry. Our shared cloud portfolio reporting service utilizes software licensed from IBM. We expect to utilize additional service providers as we expand our platform. Although the third-party technologies and services that we currently require are commercially available, such technologies and services may not continue to be available on commercially reasonable terms, or at all. Any loss of the right to use any of these technologies or services could result in delays in the provisioning of our solutions until alternative technology is either developed by us, or, if available, is identified, obtained and integrated, and such delays could harm our business. It also may be time consuming and costly to enter into new relationships. Additionally, any errors or defects in the third-party technologies we utilize or delays or interruptions in the third-party services we rely on could result in errors, failures or disruptions of our services, which also could harm our business.

We depend upon third-party service providers for important payment processing functions. If these third-party service providers do not fulfill their contractual obligations or choose to discontinue their services, our business and operations could be disrupted and our operating results would be harmed.

We rely on several large payment processing organizations to enable us to provide payment processing services to our customers, including electronic funds transfers, or EFT, check services, bank card authorization, data capture, settlement and merchant accounting services and access to various reporting tools. These organizations include Bank of America Merchant Services, Bank of America, N.A., Paymentech, LLC, Fiserv, Inc., Financial Transmission Network, Inc., Jack Henry & Associates, Inc., JPMorgan Chase Bank, N.A. and Wells Fargo, N.A. We also rely on third-party hardware manufacturers to manufacture the check scanning hardware our customers utilize to process transactions. Some of these organizations and service providers are competitors who also directly or indirectly sell payment processing services to customers in competition with us. With respect to these organizations and service providers, we have significantly less control over the systems and processes than if we were to maintain and operate them ourselves. In some cases, functions necessary to our business are performed on proprietary third-party systems and software to which we have no access. We also generally do not have long-term contracts with these organizations and service providers. Accordingly, the failure of these organizations and service providers to renew their contracts with us or fulfill their contractual obligations and perform satisfactorily could result in significant disruptions to our operations and adversely affect operating results. In addition, businesses that we have acquired, or may acquire in the future, typically rely on other payment processing service providers. We may encounter difficulty converting payment processing services from these service providers to our payment processing platform. If we are required to find an alternative source for performing these functions, we may have to expend significant money, time and other resources to develop or obtain an alternative, and if developing or obtaining an alternative is not accomplished in a timely manner and without significant disruption to our business, we may be unable to fulfill our responsibilities to customers or meet their expectations, with the attendant potential for liability claims, damage to our reputation, loss of

ability to attract or maintain customers and reduction of our revenue or profits.

We face a number of risks in our payment processing business that could result in a reduction in our revenues and profits.

In connection with our electronic payment processing services, we process resident payments and subsequently submit these resident payments to our customers after varying clearing times established by RealPage. These payments are settled through our sponsoring clearing banks, and in the case of EFT, our Originating Depository Financial Institutions, or ODFIs. Currently, we rely on Bank of America, N.A., Wells Fargo, N.A. and JPMorgan Chase Bank, N.A. as our sponsoring clearing banks. In the future, we expect to enter into similar sponsoring clearing bank relationships with one or more other national banking institutions. The resident payments that we process for our customers at our sponsoring clearing banks are identified in our consolidated balance sheets as restricted cash and the corresponding liability for these resident payments is

DRAFT 11-6-2014 430pm

Table of Contents

identified as customer deposits. Our electronic payment processing business and related maintenance of custodial accounts subjects us to a number of risks, including, but not limited to:

- liability for customer costs related to disputed or fraudulent transactions if those costs exceed the amount of the customer reserves we have during the clearing period or after resident payments have been settled to our customers;
- electronic processing limits on the amount of custodial balances that any single ODFI, or collectively all of our ODIFIs, will underwrite;
- reliance on clearing bank sponsors, card payment processors and other service payment provider partners to process electronic transactions;
- failure by us or our bank sponsors to adhere to applicable laws and regulatory requirements or the standards of the electronic payments rules and regulations and other rules and regulations that may impact the provision of electronic payment services;
- continually evolving and developing laws and regulations governing payment processing and money transmission, the application or interpretation of which is not clear in some jurisdictions;
- incidences of fraud, a security breach or our failure to comply with required external audit standards; and
- our inability to increase our fees at times when electronic payment partners or associations increase their transaction processing fees.

If any of these risks related to our electronic payment processing business were to materialize, our business or financial results could be negatively affected. Although we attempt to structure and adapt our payment processing operations to comply with these complex and evolving laws and regulations, our efforts may not guarantee compliance. In the event that we are found to be in violation of these legal requirements, we may be subject to monetary fines, cease and desist orders, mandatory product changes, or other penalties that could have an adverse effect on our results of operations. Additionally, with respect to the processing of EFTs, we are exposed to financial risk. EFTs between a resident and our customer may be returned for various reasons such as insufficient funds or stop payment orders. These returns are charged back to the customer by us. However, if we or our sponsoring clearing banks are unable to collect such amounts from the customer's account or if the customer refuses or is unable to reimburse us for the chargeback, we bear the risk of loss for the amount of the transfer. While we have not experienced material losses resulting from chargebacks in the past, there can be no assurance that we will not experience significant losses from chargebacks in the future. Any increase in chargebacks not paid by our customers may adversely affect our financial condition and results of operations.

We entered into a Service Provider Agreement with Wells Fargo Merchant Services, LLC and Wells Fargo Bank, NA ("Wells Fargo"), effective January 1, 2014. Under the Service Provider Agreement, RealPage, Inc. is a registered independent sales organization ("ISO") of Wells Fargo. Wells Fargo will act as a merchant acquiring bank for processing RealPage client credit card and debit card payments ("Card Payments"), and RealPage will serve as an ISO. As an ISO, RealPage will assume the underwriting risk for processing Card Payments on behalf of its clients. If RealPage experiences excessive chargebacks, either RealPage or Wells Fargo has the authority to cease client card processing services, and such events could result in a material adverse effect on our revenues, operating income, and reputation.

Evolution and expansion of our payment processing business may subject us to additional regulatory requirements and other risks, for which failure to comply or adapt could harm our operating results.

The evolution and expansion of our payment processing business may subject us to additional risks and regulatory requirements, including laws covering money transmission and anti-money laundering. These requirements vary throughout the markets in which we operate, and several jurisdictions lack clarity in the application and interpretation of these rules. In order to maintain flexibility in the growth and expansion of our payments operations, we have begun the process of applying for certain money transmitter licenses in jurisdictions throughout the United States, and expect to expand the licensure as needed to accommodate new product development. Our efforts to obtain this licensure could result in significant management time, effort, and cost, and may still not guarantee compliance given the constant state of change in these regulatory frameworks. While we maintain a compliance program focused on applicable laws and regulations throughout the payments industry, there is no guarantee that we will not be subject to

finer or other regulatory actions in one or more jurisdictions, or be required to adjust business practices to accommodate future regulatory requirements.

If our security measures are breached and unauthorized access is obtained to our software platform and infrastructure, or our customers' or their residents' or prospects' data, we may incur significant liabilities, third parties may misappropriate our intellectual property, our solutions may be perceived as not being secure and customers may curtail or stop using our solutions.

DRAFT 11-6-2014 430pm

Table of Contents

Maintaining the security of our software platform and service infrastructure is of paramount importance to us and our customers, and we devote significant resources to this effort. Breaches of the security measures we take to protect our software platform and service infrastructure and our and our customers' confidential or proprietary information that is stored on and transmitted through those systems could disrupt and compromise the security of our internal systems and on-demand applications, impair our ability to provide products and services to our customers and protect the privacy of their data, compromise our confidential or technical business information harming our competitive position, result in theft or misuse of our intellectual property, or otherwise adversely affect our business.

The solutions we provide involve the collection, storage and transmission of confidential personal and proprietary information regarding our customers and our customers' current and prospective residents and business partners. Specifically, we collect, store and transmit a variety of customer data such as demographic information and payment histories of our customers' prospective and current residents and business partners. Additionally, we collect and transmit sensitive financial data such as credit card and bank account information. Treatment of certain types of data, such as personally identifiable information, protected health information and sensitive financial data may be subject to federal or state regulations requiring heightened privacy and security. If our data security or data integrity measures are breached or otherwise fail or prove to be inadequate for any reason, as a result of third-party actions or our employees' or contractors' errors or malfeasance or otherwise, and unauthorized persons obtain access to this information, or the data is otherwise compromised, we could incur significant liability to our customers and to their prospective or current residents or business partners, significant costs associated with internal regulatory investigations and litigation, or significant fines and sanctions by payment processing networks or governmental authorities. Any of these events or circumstances could result in damage to our reputation and material harm to our business.

We also rely upon our customers as users of our system to promote security of the system and the data within it, such as administration of customer-side access credentialing and control of customer-side display of data. On occasion, our customers have failed to perform these activities in such a manner as to prevent unauthorized access to data. To date, these breaches have not resulted in claims against us or in material harm to our business, but we cannot be certain that the failure of our customers in future periods to perform these activities will not result in claims against us, which could expose us to potential litigation, damage to our reputation and material harm to our business.

There can be no certainty that the measures we have taken to protect our software platform and service infrastructure, our confidential and proprietary information, and the privacy and integrity of our customers' and their current or prospective residents' and business partners' data are adequate to prevent or remedy unauthorized access to our system. Because techniques used to obtain unauthorized access to, or to sabotage, systems change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventive measures. Experienced computer programmers seeking to intrude or cause harm, or hackers, may attempt to penetrate our service infrastructure from time to time. Hackers may consist of sophisticated organizations, competitors, governments or individuals who launch targeted attacks to gain unauthorized access to our systems. A hacker who is able to penetrate our service infrastructure could misappropriate proprietary or confidential information or cause interruptions in our services. We might be required to expend significant capital and resources to protect against, or to remedy, problems caused by hackers, and we may not have a timely remedy against a hacker who is able to penetrate our service infrastructure. In addition to purposeful breaches, inadvertent actions or the transmission of computer viruses could expose us to security risks. If an actual or perceived breach of our security occurs or if our customers and potential customers perceive vulnerabilities, the market perception of the effectiveness of our security measures could be harmed, we could lose sales and customers and our business could be materially harmed.

If we are unable to cost-effectively scale or adapt our existing architecture to accommodate increased traffic, technological advances or changing customer requirements, our operating results could be harmed.

As we continue to increase our customer base and the number of products used by our customers to manage units, the number of users accessing our on demand software solutions over the Internet will continue to increase. Increased traffic could result in slow access speeds and response times. Since our customer agreements typically include service availability commitments, slow speeds or our failure to accommodate increased traffic could result in breaches of our

customer agreements. In addition, the market for our solutions is characterized by rapid technological advances and changes in customer requirements. In order to accommodate increased traffic and respond to technological advances and evolving customer requirements, we expect that we will be required to make future investments in our network architecture. If we do not implement future upgrades to our network architecture cost-effectively, or if we experience prolonged delays or unforeseen difficulties in connection with upgrading our network architecture, our service quality may suffer and our operating results could be harmed.

Because certain solutions we provide depend on access to customer data, decreased access to this data or the failure to comply with applicable privacy laws and regulations or address privacy concerns applicable to such data could harm our business.

DRAFT 11-6-2014 430pm

Table of Contents

Certain of our solutions depend on our continued access to our customers' data regarding their prospective and current residents, including data compiled by other third-party service providers who collect and store data on behalf of our customers. Federal and state governments and agencies have adopted, or are considering adopting, laws and regulations regarding the collection, use and disclosure of such data. Any restrictions on the use of or decrease in the availability of such data from our customers, or other third parties that collect and store such data on behalf of our customers, and the costs of compliance with, and other burdens imposed by, applicable legislative and regulatory initiatives may limit our ability to collect, aggregate or use this data. Any limitations on our ability to collect, aggregate or use such data could reduce demand for certain of our solutions. Additionally, any inability to adequately address privacy concerns, even if unfounded, or comply with applicable privacy laws, regulations and policies, could result in liability to us or damage to our reputation and could inhibit sales and market acceptance of our solutions and harm our business.

The market for on demand software solutions in the rental housing industry continues to develop, and if it does not develop further or develops more slowly than we expect, our business will be harmed.

The market for on demand SaaS software solutions in the rental housing industry delivered via the Internet through a web browser is rapidly growing but still relatively immature compared to the market for traditional on premise software installed on a customer's local personal computer or server. It is uncertain whether the on demand delivery model will achieve and sustain high levels of demand and market acceptance, making our business and future prospects difficult to evaluate and predict. While our existing customer base has widely accepted this new model, our future success will depend, to a large extent, on the willingness of our potential customers to choose on demand software solutions for business processes that they view as critical. Many of our potential customers have invested substantial effort and financial resources to integrate traditional enterprise software into their businesses and may be reluctant or unwilling to switch to on demand software solutions. Some businesses may be reluctant or unwilling to use on demand software solutions because they have concerns regarding the risks associated with security capabilities, reliability and availability, among other things, of the on demand delivery model. If potential customers do not consider on demand software solutions to be beneficial, then the market for these solutions may not further develop, or it may develop more slowly than we expect, either of which would adversely affect our operating results.

If use of the Internet and mobile technology, particularly with respect to online rental housing products and services, does not continue to increase as rapidly as we anticipate, our business could be harmed.

Our future success is substantially dependent on the continued use of the Internet and mobile technology as effective media of business and communication by our customers and consumers. Internet and mobile technology use may not continue to develop at historical rates, and consumers may not continue to use the Internet or mobile technology as media for information exchange or we may not keep up with the latest technology. Further, these media may not be accepted as viable long-term outlets for rental housing information for a number of reasons, including actual or perceived lack of security of information and possible disruptions of service or connectivity. If consumers begin to access rental housing information through other media and we fail to innovate, our business may be negatively impacted.

Economic trends that affect the rental housing market may have a negative effect on our business.

Our customers include a range of organizations whose success is intrinsically linked to the rental housing market. Economic trends that negatively or positively affect the rental housing market may adversely affect our business. The downturn in the global economy which began in 2008 has caused volatility in the real estate markets, generally, including the rental housing market, and increases in the rates of mortgage defaults and bankruptcy. Continued instability or downturns affecting the rental housing market may have a material adverse effect on our business, prospects, financial condition and results of operations by:

- decreasing demand for leasing and marketing solutions;
- reducing the number of occupied sites and units on which we earn revenue;
- preventing our customers from expanding their businesses and managing new properties;
- causing our customers to reduce spending on our solutions;
- subjecting us to increased pricing pressure in order to add new customers and retain existing customers;

causing our customers to switch to lower-priced solutions provided by our competitors or internally developed solutions;

delaying or preventing our collection of outstanding accounts receivable; and

causing payment processing losses related to an increase in customer insolvency.

In addition, economic trends that reduce the frequency of renter turnover or the quantity of new renters may reduce the number of rental transactions completed by our customers and may, as a result, reduce demand for our rental, leasing or marketing transaction specific services.

DRAFT 11-6-2014 430pm

Table of Contents

If customers and other advertisers reduce or end their advertising spending on our LeaseStar products and we are unable to attract new advertisers, our business would be harmed.

Some components of our LeaseStar product family depend on advertising generated through sales to real estate agents and brokerages, property owners and other advertisers relevant to rental housing. Our ability to attract and retain advertisers, and ultimately to generate advertising revenue, depends on a number of factors, including:

- increasing the number of consumers of our LeaseStar products and services;
- competing effectively for advertising dollars with other online media companies;
- continuing to develop our advertising products and services;
- keeping pace with changes in technology and with our competitors; and
- offering an attractive return on investment to our advertiser customers for their advertising spending with us.

Reductions in lead generation could have a negative effect on our operating results.

We could face reductions in leads generated for our clients if third party originators of such leads were to elect to suspend sending leads to us or our sources for such leads were reduced. Reductions in leads generated could reduce the value of our lead generation services, make it difficult for us to add new lead generation services customers, retain existing lead generation services customers and maintain or increase sales levels to our existing lead generation services customers and could adversely affect our operating results.

We may require additional capital to support business growth, and this capital might not be available.

We intend to continue to make investments to support our business growth and may require additional funds to respond to business challenges or opportunities, including the need to develop new solutions or enhance our existing solutions, enhance our operating infrastructure or acquire businesses and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock. Debt financing secured by us in the future could involve additional restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. In addition, we may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges or opportunities could be significantly limited.

Our debt obligations contain restrictions that impact our business and expose us to risks that could adversely affect our liquidity and financial condition.

On September 30, 2014, we entered into a new agreement for a secured revolving credit facility to refinance our outstanding revolving loans. The new credit facility provides an aggregate principal amount of up to \$200.0 million, with sublimits of \$10.0 million for the issuance of letters of credit and for \$20.0 million of swingline loans. The credit facility also allows us, under certain conditions, to request additional term loans or revolving commitments in an aggregate principal amount of up to \$150.0 million, plus an amount that would not cause our consolidated net leverage ratio to exceed 3.25 to 1.00. As of September 30, 2014, we had \$38.6 million of debt outstanding under our revolving line of credit and \$10.0 million was available for the issuance of letters of credit. Advances under the credit facility may be voluntarily prepaid and reborrowed.

All of our obligations under the credit facility are secured by substantially all of our assets. All of our existing and future domestic subsidiaries are required to guaranty our obligations under the credit facility, other than certain immaterial subsidiaries, foreign subsidiary holding companies, and our payment processing subsidiaries. Such guarantees by existing and future domestic subsidiaries are and will be secured by substantially all of the assets of such subsidiaries.

Our credit facility contains customary covenants, subject in each case to customary exceptions and qualifications, which limit our and certain of our subsidiaries' ability to, among other things:

- incur additional indebtedness or guarantee indebtedness of others;
- create liens on our assets;

- enter into mergers or consolidations;
- dispose of assets;
- prepay certain indebtedness;
- make changes to our governing documents and certain of our agreements;
- pay dividends and make other distributions on our capital stock, and redeem and repurchase our capital stock;

46

DRAFT 11-6-2014 430pm

Table of Contents

•make investments, including acquisitions; and
•enter into transactions with affiliates.

Our credit facility also contains, subject in each case to customary exceptions and qualifications, customary affirmative covenants. We are also required to comply with a maximum consolidated net leverage ratio and a minimum consolidated interest coverage ratio. The interest coverage ratio, which is a ratio of our four previous consecutive fiscal quarters' consolidated EBITDA to our interest expense, is to be not less than 3.00 to 1.00 as of the last day of any fiscal quarter. The consolidated net leverage ratio, which is the ratio of funded indebtedness on the last day of each fiscal quarter to the four previous consecutive fiscal quarters' consolidated EBITDA, is not to be greater than 3.50 to 1.00, provided that we can elect to increase the ratio to 3.75 to 1.00 for a specified period following a permitted acquisition. As of September 30, 2014, we were in compliance with the covenants under our credit facility. The credit facility contains customary events of default, subject to customary cure periods for certain defaults, that include, among others, non-payment defaults, covenant defaults, material judgment defaults, bankruptcy and insolvency defaults, cross-defaults to certain other material indebtedness, ERISA defaults, inaccuracy of representations and warranties, and a change in control default.

If we experience a decline in cash flow due to any of the factors described in this "Risk Factors" section or otherwise, we could have difficulty paying interest and principal amounts due on our indebtedness and meeting the financial covenants set forth in our credit facility. If we are unable to generate sufficient cash flow or otherwise obtain the funds necessary to make required payments under our credit facility, or if we fail to comply with the requirements of our indebtedness, we could default under our credit facility. Any default that is not cured or waived could result in the acceleration of the obligations under the credit facility, an increase in the applicable interest rate under the credit facility and a requirement that our subsidiaries that have guaranteed the credit facility pay the obligations in full, and would permit our lender to exercise remedies with respect to all of the collateral that is securing the credit facility, including substantially all of our and our subsidiary guarantors' assets. Any such default could have a material adverse effect on our liquidity and financial condition.

Even if we comply with all of the applicable covenants, the restrictions on the conduct of our business could adversely affect our business by, among other things, limiting our ability to take advantage of financings, mergers, acquisitions and other corporate opportunities that may be beneficial to the business. Even if the credit facility was terminated, additional debt we could incur in the future may subject us to similar or additional covenants.

Assertions by a third party that we infringe its intellectual property, whether successful or not, could subject us to costly and time-consuming litigation or expensive licenses.

The software and technology industries are characterized by the existence of a large number of patents, copyrights, trademarks and trade secrets and by frequent litigation based on allegations of infringement, misappropriation, misuse and other violations of intellectual property rights. We have received in the past, and may receive in the future, communications from third parties claiming that we have infringed or otherwise misappropriated the intellectual property rights or terms of use of others. Our technologies may not be able to withstand any third-party claims against their use. Since we currently have no patents, we may not use patent infringement as a defensive strategy in such litigation. Additionally, although we have licensed from other parties proprietary technology covered by patents, we cannot be certain that any such patents will not be challenged, invalidated or circumvented. If such patents are invalidated or circumvented, this may allow existing and potential competitors to develop products and services that are competitive with, or superior to, our solutions.

Many of our customer agreements require us to indemnify our customers for certain third-party claims, such as intellectual property infringement claims, which could increase our costs of defending such claims and may require that we pay damages if there were an adverse ruling or settlement related to any such claims. These types of claims could harm our relationships with our customers, may deter future customers from purchasing our solutions or could expose us to litigation for these claims. Even if we are not a party to any litigation between a customer and a third party, an adverse outcome in any such litigation could make it more difficult for us to defend our intellectual property in any subsequent litigation in which we are a named party.

Litigation could force us to stop selling, incorporating or using our solutions that include the challenged intellectual property or redesign those solutions that use the technology. In addition, we may have to pay damages if we are found to be in violation of a third party's rights. We may have to procure a license for the technology, which may not be available on reasonable terms, if at all, may significantly increase our operating expenses or may require us to restrict our business activities in one or more respects. As a result, we may also be required to develop alternative non-infringing technology, which could require significant effort and expense. There is no assurance that we would be able to develop alternative solutions or, if alternative solutions were developed, that they would perform as required or be accepted in the relevant markets. In some instances, if we are unable to offer non-infringing technology, or obtain a license for such technology, we may be required to refund some or the entire license fee paid for the infringing technology by our customers.

DRAFT 11-6-2014 430pm

Table of Contents

Our exposure to risks associated with the use of intellectual property may be increased as a result of acquisitions, as we have a lower level of visibility into the development process with respect to acquired technology or the care taken to safeguard against infringement risks. Such risks include, without limitation, patent infringement risks, copyright infringement risks, or the inclusion of open source software subject to onerous license provisions or violations of terms of use that could even require the disclosure of our proprietary source code. Third parties may make infringement and similar or related claims after we have acquired technology that had not been asserted prior to our acquisition.

Any failure to protect and successfully enforce our intellectual property rights could compromise our proprietary technology and impair our brands.

Our success depends significantly on our ability to protect our proprietary rights to the technologies we use in our solutions. If we are unable to protect our proprietary rights adequately, our competitors could use the intellectual property we have developed to enhance their own products and services, which could harm our business. We rely on a combination of copyright, service mark, trademark and trade secret laws, as well as confidentiality procedures and contractual restrictions, to establish and protect our proprietary rights, all of which provide only limited protection. We currently have no issued patents or pending patent applications and may be unable to obtain patent protection in the future. In addition, if any patents are issued in the future, they may not provide us with any competitive advantages, may not be issued in a manner that gives us the protection that we seek and may be successfully challenged by third parties. Unauthorized parties may attempt to copy or otherwise obtain and use the technologies underlying our solutions. Monitoring unauthorized use of our technologies is difficult, and we do not know whether the steps we have taken will prevent unauthorized use of our technology. If we are unable to protect our proprietary rights, we may find ourselves at a competitive disadvantage to others who have not incurred the substantial expense, time and effort required to create similar innovative products.

We cannot assure you that any future service mark or trademark registrations will be issued for pending or future applications or that any registered service marks or trademarks will be enforceable or provide adequate protection of our proprietary rights. If we are unable to secure new marks, maintain already existing marks and enforce the rights to use such marks against unauthorized third-party use, our ability to brand, identify and promote our solutions in the marketplace could be impaired, which could harm our business.

We customarily enter into agreements with our employees, contractors and certain parties with whom we do business to limit access to and disclosure of our proprietary information. The legal and technical steps we have taken, however, may not prevent unauthorized use or the reverse engineering of our technology. Moreover, we may be required to release the source code of our software to third parties under certain circumstances. For example, some of our customer agreements provide that if we cease to maintain or support a certain solution without replacing it with a successor solution, then we may be required to release the source code of the software underlying such solution. In addition, others may independently develop technologies that are competitive to ours or infringe our intellectual property. Moreover, it may be difficult or practically impossible to detect copyright infringement or theft of our software code. Enforcement of our intellectual property rights also depends on our legal actions being successful against these infringers, but these actions may not be successful, even when our rights have been infringed.

Furthermore, the legal standards relating to the validity, enforceability and scope of protection of intellectual property rights in Internet-related industries are uncertain and still evolving.

Additionally, if we sell our solutions internationally in the future, effective patent, trademark, service mark, copyright and trade secret protection may not be available or as robust in every country in which our solutions are available. As a result, we may not be able to effectively prevent competitors outside the United States from infringing or otherwise misappropriating our intellectual property rights, which could reduce our competitive advantage and ability to compete or otherwise harm our business.

We may be unable to halt the operations of websites that aggregate or misappropriate data from our LeaseStar websites.

From time to time, third parties have misappropriated data from our LeaseStar websites through website scraping, software robots or other means and aggregated this data on their websites with data from other companies. In addition,

copycat websites have misappropriated data on our network and attempted to imitate our brand or the functionality of our website. When we have become aware of such websites, we have employed technological or legal measures in an attempt to halt their operations. However, we may be unable to detect all such websites in a timely manner and, even if we could, technological and legal measures may be insufficient to halt their operations. In some cases, particularly in the case of websites operating outside of the United States, our available remedies may not be adequate to protect us against the impact of the operation of such websites. Regardless of whether we can successfully enforce our rights against the operators of these websites, any measures that we may take could require us to expend significant financial or other resources, which could harm our business, results of operations or financial condition. In addition, to the extent that such activity creates confusion among consumers or advertisers, our brand and business could be harmed.

DRAFT 11-6-2014 430pm

Table of Contents

Legal proceedings against us could be costly and time consuming to defend.

We are from time to time subject to legal proceedings and claims that arise in the ordinary course of business, including claims brought by our customers in connection with commercial disputes, claims brought by our customers' current or prospective residents, including class action lawsuits based on asserted statutory or regulatory violations, employment-based claims made by our current or former employees, administrative agencies, government regulators, or insurers. In November, the Company was named in a purported class action lawsuit in the Eastern District of Virginia, *Jenkins v. RealPage, Inc.*, Case No. 3:14cv758. This case is at an early stage and the Company is in the process of analyzing the case and preparing a response. Litigation, enforcement actions, and other legal proceedings, regardless of their outcome, may result in substantial costs and may divert management's attention and our resources, which may harm our business, overall financial condition and operating results. In addition, legal claims that have not yet been asserted against us may be asserted in the future. Although we maintain insurance, there is no guarantee that such insurance will be available or sufficient to cover any such legal proceedings or claims. For example, insurance may not cover such legal proceedings or claims or may withhold or dispute coverage of such legal proceedings or claims on various grounds, including by alleging such coverage is beyond the scope of such policies, that we are not in compliance with the terms of such insurance policies or that such policies are not in effect, even after proceeds under such insurance policies have been received by us. In addition, insurance may not be sufficient for one or more such legal proceedings or claims and may not continue to be available on terms acceptable to us, or at all. A legal proceeding or claim brought against us that is uninsured or underinsured could result in unanticipated costs, thereby harming our operating results.

We could be sued for contract, warranty or product liability claims, and such lawsuits may disrupt our business, divert management's attention and our financial resources or have an adverse effect on our financial results.

We provide warranties to customers of certain of our solutions and services relating primarily to product functionality, network uptime, critical infrastructure availability and hardware replacement. General errors, defects, inaccuracies or other performance problems in the software applications underlying our solutions or inaccuracies in or loss of the data we provide to our customers could result in financial or other damages to our customers. Additionally, errors associated with any delivery of our services, including utility billing, could result in financial or other damages to our customers. There can be no assurance that any limitations of liability set forth in our contracts would be enforceable or would otherwise protect us from liability for damages. We maintain general liability insurance coverage, including coverage for errors and omissions, in amounts and under terms that we believe are appropriate. There can be no assurance that this coverage will continue to be available on terms acceptable to us, or at all, or in sufficient amounts to cover one or more large product liability claims, or that the insurer will not deny coverage for any future claim or dispute coverage of such legal proceedings or claims even after proceeds under such insurance policies have been received by us. The successful assertion of one or more large product liability claims against us that exceeds available insurance coverage, could have a material adverse effect on our business, prospects, financial condition and results of operations.

If we fail to develop our brands cost-effectively, our financial condition and operating results could be harmed.

We market our solutions under discrete brand names. We believe that developing and maintaining awareness of our brands is critical to achieving widespread acceptance of our existing and future solutions and is an important element in attracting new customers and retaining our existing customers. Additionally, we believe that developing these brands in a cost-effective manner is critical in meeting our expected margins. In the past, our efforts to build our brands have involved significant expenses and we intend to continue to make expenditures on brand promotion. Brand promotion activities may not yield increased revenue, and even if they do, any increased revenue may not offset the expenses we incurred in building our brands. If we fail to cost-effectively build and maintain our brands, we may fail to attract new customers or retain our existing customers, and our financial condition and results of operations could be harmed.

If we fail to maintain proper and effective internal controls, our ability to produce accurate and timely financial statements could be impaired, which could harm our operating results, our ability to operate our business and investors' views of us.

Ensuring that we have adequate internal financial and accounting controls and procedures in place so that we can produce accurate financial statements on a timely basis is a costly and time-consuming effort that needs to be re-evaluated frequently. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with United States generally accepted accounting principles. We are required to comply with Section 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, which requires annual management assessment of the effectiveness of our internal control over financial reporting and a report by our independent auditors. If we fail to maintain proper and effective internal controls, our ability to produce accurate and timely financial statements could be impaired, which could harm our operating results, harm our ability to operate our business and reduce the trading price of our stock.

Changes in, or errors in our interpretations and applications of, financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and affect our reported results of operations.

DRAFT 11-6-2014 430pm

Table of Contents

A change in accounting standards or practices can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices or errors in our interpretations and applications of financial accounting standards or practices may adversely affect our reported financial results or the way in which we conduct our business.

We have incurred, and will incur, increased costs and demands upon management as a result of complying with the laws and regulations affecting public companies, which could harm our operating results.

As a public company, we have incurred, and will incur, significant legal, accounting, investor relations and other expenses that we did not incur as a private company, including costs associated with public company reporting requirements. We also have incurred and will incur costs associated with current corporate governance requirements, including requirements under Section 404 and other provisions of the Sarbanes-Oxley Act, as well as rules implemented by the Securities Exchange Commission and The NASDAQ Stock Market LLC. We expect these rules and regulations to increase our legal and financial compliance costs substantially and to make some activities more time-consuming and costly. As a public company, it is more expensive for us to obtain director and officer liability insurance and it may be more difficult for us to attract and retain qualified individuals to serve on our board of directors or as our executive officers.

Government regulation of the rental housing industry, and services provided to the rental housing industry, including background screening services, utility billing, affordable housing compliance and audit services, insurance and payments, the Internet and e-commerce is evolving, and changes in regulations or our failure to comply with regulations could harm our operating results.

The rental housing industry is subject to extensive and complex federal, state and local laws and regulations. Our services and solutions must work within the extensive and evolving legal and regulatory requirements applicable to our customers and third-party service providers, including, but not limited to, those under the Fair Credit Reporting Act, the Fair Housing Act, the Deceptive Trade Practices Act, the Drivers Privacy Protection Act, the Gramm-Leach-Bliley Act, the Fair and Accurate Credit Transactions Act, the United States Tax Reform Act of 1986 (TRA86), which is an IRS law governing tax credits, the Privacy Rules, Safeguards Rule and Consumer Report Information Disposal Rule promulgated by the Federal Trade Commission, or FTC, the FTC's Telemarketing Sales Rule, the Telephone Consumer Protection Act (TCPA), the CAN-SPAM Act, the Electronic Communications Privacy Act, the regulations of the United States Department of Housing and Urban Development, or HUD, HIPAA/HITECH, rules and regulations of the Consumer Financial Protection Bureau (CFPB) and complex and divergent state and local laws and regulations related to data privacy and security, credit and consumer reporting, deceptive trade practices, discrimination in housing, telemarketing, electronic communications, call recording, utility billing and energy and gas consumption. These regulations are complex, change frequently and may become more stringent over time. Although we attempt to structure and adapt our solutions and service offerings to comply with these complex and evolving laws and regulations, we may be found to be in violation. If we are found to be in violation of any applicable laws or regulations, we could be subject to administrative and other enforcement actions as well as class action lawsuits or demands for client reimbursement. Additionally, many applicable laws and regulations provide for penalties or assessments on a per occurrence basis. Due to the nature of our business, the type of services we provide and the large number of transactions processed by our solutions, our potential liability in an enforcement action or class action lawsuit could be significant. In addition, entities such as HUD, the FTC and the CFPB have the authority to promulgate rules and regulations that may impact our customers and our business. We believe increased regulation is likely in the area of data privacy, and laws and regulations applying to the solicitation, collection, processing or use of personally identifiable information or consumer information could affect our customers' ability to use and share data, potentially reducing demand for our on demand software solutions.

Some of our LeaseStar products operate under the real estate brokerage laws of numerous states and require maintaining licenses in many of these states. Brokerage laws in these states could change, affecting our ability to provide some LeaseStar, or if applicable, other products in these states.

We deliver our on demand software solutions over the Internet and sell and market certain of our solutions over the Internet. As Internet commerce continues to evolve, increasing regulation by federal, state or foreign agencies becomes more likely. Taxation of products or services provided over the Internet or other charges imposed by government agencies or by private organizations for accessing the Internet may also be imposed. Any regulation imposing greater fees for Internet use or restricting information exchange over the Internet could result in a decline in the use of the Internet and the viability of on demand software solutions, which could harm our business and operating results.

Our business is subject to the risks of international operations.

Compliance with complex foreign and U.S. laws and regulations that apply to our international operations increases our cost of doing business. These numerous and sometimes conflicting laws and regulations include internal control and disclosure rules, data privacy and filtering requirements, anti-corruption laws, such as the Foreign Corrupt Practices Act,

DRAFT 11-6-2014 430pm

Table of Contents

and other local laws prohibiting corrupt payments to governmental officials, and antitrust and competition regulations, among others.

Violations of these laws and regulations could result in fines and penalties, criminal sanctions against us, our officers, or our employees, prohibitions on the conduct of our business and on our ability to carry on operations in one or more countries, and could also materially affect our brand, our international expansion efforts, our ability to attract and retain employees, our business, and our operating results. Although we have implemented policies and procedures designed to ensure compliance with these laws and regulations, there can be no assurance that our employees, contractors, or agents will not violate our policies.

In addition, we are subject to a variety of risks inherent in doing business internationally, including:

- political, social, economic, or environmental instability, terrorist attacks and security concerns in general;
- limitations of local infrastructure;
- fluctuations in currency exchange rates;
- higher levels of credit risk and payment fraud;
- reduced protection for intellectual property rights in some countries;
- difficulties in staffing and managing global operations and the increased travel, infrastructure and legal compliance costs associated with multiple international locations;
- compliance with statutory equity requirements and management of tax consequences; and
- outbreaks of highly contagious diseases.

If we are unable to manage the complexity of our international operations successfully, our financial results could be adversely affected.

Our LeasingDesk insurance business is subject to governmental regulation which could reduce our profitability or limit our growth.

Through our wholly owned subsidiary, Multifamily Internet Ventures LLC, we hold insurance agent licenses from a number of individual state departments of insurance and are subject to state governmental regulation and supervision in connection with the operation of our LeasingDesk insurance business. Furthermore, state insurance departments conduct periodic examinations, audits and investigations of the affairs of insurance agents. This state governmental supervision could reduce our profitability or limit the growth of our LeasingDesk insurance business by increasing the costs of regulatory compliance, limiting or restricting the solutions we provide or the methods by which we provide them or subjecting us to the possibility of regulatory actions or proceedings. Our continued ability to maintain these insurance agent licenses in the jurisdictions in which we are licensed depends on our compliance with the rules and regulations promulgated from time to time by the regulatory authorities in each of these jurisdictions.

In all jurisdictions, the applicable laws and regulations are subject to amendment or interpretation by regulatory authorities. Generally, such authorities are vested with relatively broad discretion to grant, renew and revoke licenses and approvals and to implement regulations, as well as regulate rates that may be charged for premiums on policies. Accordingly, we may be precluded or temporarily suspended from carrying on some or all of the activities of our LeasingDesk insurance business or fined or penalized in a given jurisdiction. No assurances can be given that our LeasingDesk insurance business can continue to be conducted in any given jurisdiction as it has been conducted in the past.

We generate commission revenue from the insurance policies we sell as a registered insurance agent and if insurance premiums decline or if the insureds experience greater than expected losses, our revenues could decline and our operating results could be harmed.

Through our wholly owned subsidiary, Multifamily Internet Ventures LLC, a managing general insurance agency, we generate commission revenue from offering liability and renter's insurance. Through Multifamily Internet Ventures LLC we also sell additional insurance products, including auto and other personal lines insurance, to residents that buy renter's insurance from us. These policies are ultimately underwritten by various insurance carriers. Some of the property owners and managers that participate in our programs opt to require residents to purchase rental insurance policies and agree to grant to Multifamily Internet Ventures LLC exclusive marketing rights at their properties. If demand for residential rental housing declines, property owners and managers may be forced to reduce their rental

rates and to stop requiring the purchase of rental insurance in order to reduce the overall cost of renting. If property owners or managers cease to require renter's insurance, elect to offer policies from competing providers or insurance premiums decline, our revenues from selling insurance policies will be adversely affected.

Additionally, one type of commission paid by insurance carriers to Multifamily Internet Ventures LLC is contingent commission, which is affected by claims experienced at the properties for which the residents purchase insurance. In

DRAFT 11-6-2014 430pm

Table of Contents

the event that the severity or frequency of claims by the insureds increase unexpectedly, the contingent commission we typically earn will be adversely affected. As a result, our quarterly, or annual, operating results could fall below the expectations of analysts or investors, in which event our stock price may decline.

Multifamily Internet Ventures LLC is required to maintain a 50-state general agency insurance license as well as individual insurance licenses for each sales agent involved in the solicitation of insurance products. Both the agency and individual licenses require compliance with state insurance regulations, payment of licensure fees, and continuing education programs. In the event that regulatory compliance requirements are not met, Multifamily Internet Ventures LLC could be subject to license suspension or revocation, state Department of Insurance audits, and regulatory fines. As a result, our ability to engage in the business of insurance could be restricted, and our operating revenue will be adversely affected.

Our ability to use net operating losses to offset future taxable income may be subject to certain limitations.

In general, under Section 382 of the Internal Revenue Code of 1986, as amended, or the Internal Revenue Code, a corporation that undergoes an “ownership change” is subject to limitations on its ability to utilize its pre-change net operating losses, or NOLs, to offset future taxable income. Our ability to utilize NOLs of companies that we may acquire in the future may be subject to limitations. Future changes in our stock ownership, some of which are outside of our control, could result in an ownership change under Section 382 of the Internal Revenue Code. For these reasons, we may not be able to utilize a material portion of the NOLs reflected on our balance sheet, even if we maintain profitability.

If we are required to collect sales and use taxes on the solutions we sell in additional taxing jurisdictions, we may be subject to liability for past sales and our future sales may decrease.

States and some local taxing jurisdictions have differing rules and regulations governing sales and use taxes, and these rules and regulations are subject to varying interpretations that may change over time. We review these rules and regulations periodically and currently collect and remit sales taxes in taxing jurisdictions where we believe we are required to do so. However, additional state and/or local taxing jurisdictions may seek to impose sales or other tax collection obligations on us, including for past sales. A successful assertion that we should be collecting additional sales or other taxes on our solutions could result in substantial tax liabilities for past sales, discourage customers from purchasing our solutions or may otherwise harm our business and operating results. This risk is greater with regard to solutions acquired through acquisitions.

We may also become subject to tax audits or similar procedures in jurisdictions where we already collect and remit sales taxes. A successful assertion that we have not collected and remitted taxes at the appropriate levels may also result in substantial tax liabilities for past sales. Liability for past taxes may also include very substantial interest and penalty charges. Our customer contracts provide that our customers must pay all applicable sales and similar taxes. Nevertheless, customers may be reluctant to pay back taxes and may refuse responsibility for interest or penalties associated with those taxes. If we are required to collect and pay back taxes and the associated interest and penalties, and if our customers fail or refuse to reimburse us for all or a portion of these amounts, we will incur unplanned expenses that may be substantial. Moreover, imposition of such taxes on our solutions going forward will effectively increase the cost of such solutions to our customers and may adversely affect our ability to continue to sell those solutions to existing customers or to gain new customers in the areas in which such taxes are imposed.

Changes in our effective tax rate could harm our future operating results.

We are subject to federal and state income taxes in the United States and various foreign jurisdictions, and our domestic and international tax liabilities are subject to the allocation of expenses in differing jurisdictions. Our tax rate is affected by changes in the mix of earnings and losses in jurisdictions with differing statutory tax rates, including jurisdictions in which we have completed or may complete acquisitions, certain non-deductible expenses arising from the requirement to expense stock options and the valuation of deferred tax assets and liabilities, including our ability to utilize our net operating losses. Increases in our effective tax rate could harm our operating results.

We rely on our management team and need additional personnel to grow our business, and the loss of one or more key employees or our inability to attract and retain qualified personnel could harm our business.

Our success and future growth depend on the skills, working relationships and continued services of our management team. The loss of our Chief Executive Officer or other senior executives could adversely affect our business. Our future success also will depend on our ability to attract, retain and motivate highly skilled software developers, marketing and sales personnel, technical support and product development personnel in the United States and internationally. All of our employees work for us on an at-will basis. Competition for these types of personnel is intense, particularly in the software industry. As a result, we may be unable to attract or retain qualified personnel. Our inability to attract and retain the necessary personnel could adversely affect our business. Our corporate culture has contributed to our success, and if we cannot maintain this culture as we grow, we could lose the innovation, creativity and teamwork fostered by our culture, and our business may be harmed.

DRAFT 11-6-2014 430pm

Table of Contents

We believe that a strong corporate culture that nurtures core values and philosophies is essential to our long-term success. We call these values and philosophies the “RealPage Promise” and we seek to practice the RealPage Promise in our actions every day. The RealPage Promise embodies our corporate values with respect to customer service, investor communications, employee respect and professional development and management decision-making and leadership. As our organization grows and we are required to implement more complex organizational structures, we may find it increasingly difficult to maintain the beneficial aspects of our corporate culture which could negatively impact our future success.

Risks Related to Ownership of our Common Stock

The concentration of our capital stock owned by insiders may limit your ability to influence corporate matters. Our executive officers, directors, and entities affiliated with them together beneficially owned approximately 34.3% of our common stock as of September 30, 2014. Further, Stephen T. Winn, our President, Chief Executive Officer and Chairman of the Board, and entities beneficially owned by Mr. Winn held an aggregate of approximately 32.9% of our common stock as of September 30, 2014. This significant concentration of ownership may adversely affect the trading price for our common stock because investors often perceive disadvantages in owning stock in companies with controlling stockholders. Mr. Winn and entities beneficially owned by Mr. Winn may control our management and affairs and matters requiring stockholder approval, including the election of directors and the approval of significant corporate transactions, such as mergers, consolidations or the sale of substantially all of our assets. Consequently, this concentration of ownership may have the effect of delaying or preventing a change of control, including a merger, consolidation or other business combination involving us, or discouraging a potential acquirer from making a tender offer or otherwise attempting to obtain control, even if that change of control would benefit our other stockholders.

The trading price of our common stock price may be volatile.

The trading price of our common stock could be subject to wide fluctuations in response to various factors, including, but not limited to, those described in this “Risk Factors” section, some of which are beyond our control. Factors affecting the trading price of our common stock include:

- variations in our operating results or in expectations regarding our operating results;
- variations in operating results of similar companies;
- announcements of technological innovations, new solutions or enhancements, strategic alliances or agreements by us or by our competitors;
- announcements by competitors regarding their entry into new markets, and new product, service and pricing strategies;
- marketing, advertising or other initiatives by us or our competitors;
- increases or decreases in our sales of products and services for use in the management of units by customers and increases or decreases in the number of units managed by our customers;
- threatened or actual litigation;
- major changes in our board of directors or management;
- recruitment or departure of key personnel;
- changes in the estimates of our operating results or changes in recommendations by any research analysts that elect to follow our common stock;
- market conditions in our industry and the economy as a whole;
- the overall performance of the equity markets;
- sales of our shares of common stock by existing stockholders;
- volatility in our stock price, which may lead to higher stock-based compensation expense under applicable accounting standards; and
- adoption or modification of regulations, policies, procedures or programs applicable to our business.

In addition, the stock market in general, and the market for technology and specifically Internet-related companies, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may harm the market price of our common stock regardless of our actual operating performance. In addition, in the past, following periods of volatility

in the overall market and the market price of a particular company's securities, securities class action litigation has often been instituted against these companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and our resources, whether or not we are successful in such litigation.

DRAFT 11-6-2014 430pm

Table of Contents

Our stock price could decline due to the large number of outstanding shares of our common stock eligible for future sale.

Sales of substantial amounts of our common stock in the public market, or the perception that these sales could occur, could cause the market price of our common stock to decline. These sales could also make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate.

As of September 30, 2014, we had 78,849,752 shares of common stock outstanding. Of these shares, 74,481,577 were immediately tradable without restriction or further registration under the Securities Act, unless these shares are held by “affiliates,” as that term is defined in Rule 144 under the Securities Act.

As of September 30, 2014, holders of 25,575,280 shares, or approximately 32.4%, of our outstanding common stock were entitled to rights with respect to the registration of these shares under the Securities Act. If we register their shares of common stock, these stockholders could sell those shares in the public market without being subject to the volume and other restrictions of Rule 144 and Rule 701.

In 2012, we registered a total of 4,694,073 shares of our outstanding common stock held by affiliates pursuant to a registration statement on Form S-3, which shares are now freely tradable in the public market.

In addition, we have registered approximately 22,134,259 shares of common stock that have been issued or reserved for future issuance under our stock incentive plans. Of these shares, 2,514,311 shares were eligible for sale upon the exercise of vested options as of September 30, 2014.

Our charter documents and Delaware law could prevent a takeover that stockholders consider favorable and could also reduce the market price of our stock.

Our amended and restated certificate of incorporation and our amended and restated bylaws contain provisions that could delay or prevent a change in control of our company. These provisions could also make it more difficult for stockholders to elect directors and take other corporate actions. These provisions include:

- a classified board of directors whose members serve staggered three-year terms;
- not providing for cumulative voting in the election of directors;
- authorizing our board of directors to issue, without stockholder approval, preferred stock with rights senior to those of our common stock;
- prohibiting stockholder action by written consent; and
- requiring advance notification of stockholder nominations and proposals.

These and other provisions of our amended and restated certificate of incorporation and our amended and restated bylaws, and under Delaware law, could discourage potential takeover attempts, reduce the price that investors might be willing to pay in the future for shares of our common stock and result in the market price of our common stock being lower than it would be without these provisions.

If securities analysts do not continue to publish research or reports about our business or if they publish negative evaluations of our stock, the price of our stock could decline.

We expect that the trading price for our common stock may be affected by research or reports that industry or financial analysts publish about us or our business. If one or more of the analysts who cover us downgrade their evaluations of our stock, the price of our stock could decline. If one or more of these analysts cease coverage of our company, we could lose visibility in the market for our stock, which in turn could cause our stock price to decline.

We do not anticipate paying any dividends on our common stock.

We do not anticipate paying any cash dividends on our common stock in the foreseeable future. If we do not pay cash dividends, you would receive a return on your investment in our common stock only if the market price of our common stock has increased when you sell your shares. In addition, the terms of our credit facilities currently restrict our ability to pay dividends.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Purchases of Equity Securities.

The following table provides information with respect to repurchases of our common stock made during the three months ended September 30, 2014, by RealPage, Inc. or any "affiliated purchaser" of RealPage, Inc. as defined in Rule 10b-18(a)(3) under the Exchange Act:

Period	Total Number of Shares Purchased	Average Price Paid per Share (including fees)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
July 1, 2014 through July 31, 2014	—	\$—	—	\$—
August 1, 2014 through August 31, 2014	698,986	15.60	698,986	36,776,460
September 1, 2014 through September 30, 2014	145,395	15.97	145,395	34,454,871
	844,381	\$15.66	844,381	\$34,454,871

⁽¹⁾ On May 6, 2014, the Board of Directors approved a stock repurchase program authorizing repurchase of up to \$50.0 million of our common stock. The stock repurchase program continues for a period of up to one year beginning May 8, 2014. During the periods covered by the table, no determination was made by us to terminate or suspend the stock repurchase program.

No shares were purchased from the end of the third quarter through November 4, 2014. In total, we have repurchased 966,595 shares at a weighted average cost of \$16.06 per share and a total cost of \$15.5 million.

Item 5. Other Information

CEO Stock Ownership Guidelines Policy

In order to more closely align our Chief Executive Officer's financial interests with those of the Company and its stockholders, effective October 23, 2014, our Board of Directors (at the recommendation of our Nominating and Governance Committee) adopted a Stock Ownership Guidelines Policy that suggests minimum stock ownership guidelines for our Chief Executive Officer. The minimum stock ownership target suggested by the guidelines is based on a multiple of five times the Chief Executive Officer's annual base salary. The Stock Ownership Guidelines Policy also suggests that the Chief Executive Officer achieve the suggested minimum stock ownership target within three years of assuming this position. Our Chief Executive Officer's stock ownership currently exceeds the suggested minimum stock ownership threshold. "Stock ownership" is defined to include shares of common stock held outright, shares and share equivalents held in benefit plans, and unvested RSUs. Unvested performance units and unexercised stock options are not included in this calculation.

Director Retirement Policy

Effective October 23, 2014, our Board of Directors (at the recommendation of our Nominating and Governance Committee) adopted a Director Retirement Policy that, unless waived by our Nominating and Governance Committee and Board of Directors, requires non-employee directors to retire as a member of our Board of Directors at the expiration of his or her elected term following the date of his or her 75th birthday.

Item 6. Exhibits.

The exhibits required to be furnished pursuant to Item 6 are listed in the Exhibit Index filed herewith, which Exhibit Index is incorporated herein by reference.
