Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class:	Name of each exchange on which registered:
Common stock, represented by CHESSE Units of Foreign Securities	New York Stock Exchange*
CHESSE Units of Foreign Securities	New York Stock Exchange*
American Depositary Shares, each representing five units of CHESSE Units of Foreign Securities	New York Stock Exchange

Table of Contents

* Listed, not for trading, but only in connection with the registered American Depositary Shares, pursuant to the requirements of the Securities and Exchange Commission
Securities registered or to be registered pursuant to Section 12(g) of the Act.

None.

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None.

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 445,033,502 shares of common stock at 31 March 2014.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Note: Checking the box will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See the definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued

Other

by the International Accounting Standards Board

Edgar Filing: James Hardie Industries plc - Form 20-F

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Table of Contents

SECTION 1

INTRODUCTION

The Company is a world leader in manufacturing fibre cement siding and backerboard. Our current primary geographic markets include the United States (US), Australia, New Zealand, the Philippines, Europe and Canada.

Our fibre cement products are used in a number of markets, including new residential construction, manufactured housing, repair and remodelling and a variety of commercial and industrial applications.

We manufacture numerous types of fibre cement products with a variety of patterned profiles and surface finishes for a range of applications, including external siding and soffit lining, internal linings, facades and floor and tile underlay.

We employ approximately 3,100 people and generated net sales of US\$1.5 billion in fiscal year 2014.

SELECTED FINANCIAL DATA

We have included in this annual report the audited consolidated financial statements of the Company, consisting of our consolidated balance sheets as of 31 March 2014 and 2013, and our consolidated statements of operations and comprehensive income, changes in shareholders (deficit) equity and cash flows for each of the years ended 31 March 2014, 2013 and 2012, together with the related notes thereto. The consolidated financial statements included in this annual report have been prepared in accordance with accounting principles generally accepted in the US, or US GAAP.

The selected consolidated financial information summarised below for the five most recent fiscal years has been derived in part from the Company's financial statements. You should read the selected consolidated financial information in conjunction with the Company's financial statements and related notes contained in Section 2, Consolidated Financial Statements and with the information provided in Section 2, Management's Discussion and Analysis. Historic financial data is not necessarily indicative of our future results and you should not unduly rely on it.

Table of Contents

	Fiscal Year ended 31 March				
	2014	2013	2012	2011	2010
(Millions of US dollars)					
Consolidated Balance Sheet Data:					
Net current assets ⁶	\$ 116.0	\$ 373.7	\$ 463.3	\$ 126.9	\$ 50.4
Total assets	\$ 2,106.5	\$ 2,113.2	\$ 2,310.0	\$ 1,960.6	\$ 2,178.8
Total debt ⁷	\$ 47.0	\$ -	\$ 30.9	\$ 59.0	\$ 154.0
Common stock	\$ 230.6	\$ 227.3	\$ 224.0	\$ 222.5	\$ 221.1
Shareholders' equity (deficit)	\$ (199.0)	\$ 18.2	\$ 126.4	\$ (454.5)	\$ (117.9)

¹ The Asia Pacific Fibre Cement segment includes all fibre cement manufactured in Australia, New Zealand and the Philippines and sold in Australia, New Zealand, Asia, the Middle East (Israel, Kuwait, Qatar and United Arab Emirates) and various Pacific Islands.

² Operating income (loss) includes the following asbestos adjustments, Asbestos Injuries Compensation Fund (AICF) SG&A expenses, Australian Securities and Investments Commission (ASIC) related (expenses) recoveries, asset impairment charges, and New Zealand product liability expenses:

	Fiscal Years Ended 31 March				
	2014	2013	2012	2011	2010
(Millions of US dollars)					
(Unfavourable) favourable asbestos adjustments	\$ (195.8)	\$ (117.1)	\$ (15.8)	\$ (85.8)	\$ (224.2)
AICF SG&A expenses	\$ (2.1)	\$ (1.7)	\$ (2.8)	\$ (2.2)	\$ (2.1)
ASIC related (expenses) recoveries	\$ -	\$ (2.6)	\$ (1.1)	\$ 8.7	\$ (3.4)
Asset impairments	\$ -	\$ (16.9)	\$ (14.3)	\$ -	\$ -
New Zealand product liability expenses ⁸	\$ (1.8)	\$ (13.2)	\$ (5.4)	\$ -	\$ -

For additional information on the asbestos adjustments, AICF SG&A expenses, ASIC related (expenses) recoveries, asset impairment charges and New Zealand product liability expenses, see Section 2, Management's Discussion and Analysis and Notes 7, 11 and 13 to our consolidated financial statements in Section 2.

³ Other income (expense) in fiscal years 2014, 2013, 2012 and 2011 are due to changes in the fair value of interest rate swap and foreign exchange forward contracts. Other income in fiscal year 2010 primarily includes a realised gain arising from the sale of restricted short-term investments held by AICF. For additional information see Section 2, Management's Discussion and Analysis Results of Operations.

⁴ Income tax benefit in fiscal year 2012 includes a benefit of US\$485.2 million recognised upon RCI's successful appeal of the Australian Taxation Office's (ATO) disputed 1999 amended tax assessment. Income tax expense in fiscal year 2011 includes a charge of US\$345.2 million resulting from the dismissal by the Federal Court of Australia of RCI's appeal of the ATO's disputed 1999 amended tax assessment.

⁵ Adjusted EBITDA represents income from operations before interest income, interest expense, income taxes, other non-operating income (expense), described in footnote four above, and depreciation and amortisation charges. The following table presents a reconciliation of Adjusted EBITDA to net cash provided by operating activities, as this is the most directly comparable GAAP financial measure to Adjusted EBITDA for each of the periods indicated. Items comprising Net cash provided by operating activities, Adjustments to reconcile net income (loss) to net cash provided by operating activities and Change in operating assets and liabilities, net for fiscal years ended 31 March 2014, 2013, and 2012 are set forth in the consolidated statements of cash flows in Section 2 of this report.

Table of Contents

	Fiscal Years Ended 31 March				
	2014	2013	2012	2011	2010
	(Millions of US dollars)				
Net cash provided by operating activities	\$ 322.8	\$ 109.3	\$ 387.2	\$ 147.2	\$ 183.1
Adjustments to reconcile net income (loss) to net cash provided by operating activities	(189.4)	(145.9)	(114.4)	(136.8)	(312.0)
Change in operating assets and liabilities, net	(33.9)	82.1	331.5	(357.4)	44.0
Net income (loss)	99.5	45.5	604.3	(347.0)	(84.9)
Income tax (benefit) expense	(44.9)	(11.8)	(453.2)	443.6	66.2
Interest expense	4.5	5.5	11.2	9.0	7.7
Interest income	(3.4)	(7.9)	(3.8)	(4.6)	(3.7)
Other (income) expense	(2.6)	(1.8)	(3.0)	3.7	(6.3)
Depreciation and amortisation	61.4	61.2	65.2	62.9	61.7
Adjusted EBITDA	\$ 114.5	\$ 90.7	\$ 220.7	\$ 167.6	\$ 40.7

Adjusted EBITDA is not a measure of financial performance under US GAAP and should not be considered an alternative to, or more meaningful than, income from operations, net income or net cash provided by operating activities, as defined by US GAAP, or as a measure of our profitability or liquidity. Not all companies calculate Adjusted EBITDA in the same manner as we have and, accordingly, Adjusted EBITDA may not be comparable with other companies. We have included information concerning Adjusted EBITDA because we believe that this data is commonly used by investors to evaluate the ability of a company's earnings from its core business operations to satisfy its debt, capital expenditure and working capital requirements. To permit evaluation of this data on a consistent basis from period to period, Adjusted EBITDA has been adjusted for non-cash charges, as well as non-operating income and expense items.

⁶ Total current assets less total current liabilities.

⁷ Total debt at 31 March 2014 and 2012 represents the amount owed by AICF under a secured standby loan facility with the government of New South Wales (Facility). Because the Company consolidates AICF due to pecuniary and contractual interests in AICF as a result of the funding arrangements outlined in the Amended and Restated Final Funding Agreement (AFFA), any drawings, repayments or payments of accrued interest by AICF under the Facility impact the Company's consolidated financial position, results of operations and cash flows. James Hardie Industries plc and its wholly owned subsidiaries are not a party to, guarantor of, or security provider in respect of the Facility.

⁸ The Company began separately disclosing New Zealand product liability expenses in fiscal year 2013 and did so for fiscal year 2012 for comparative purposes only.

INFORMATION ON THE COMPANY**History and Development of the Company**

The Company was established in 1888 as an import business. In 1951, the Company became publicly owned as a listed company on the Australian Stock Exchange. After becoming a listed company, the Company built up a diverse portfolio of building and industrial products including a wide range of asbestos-based products. In the mid-1980s, we pioneered the development of asbestos-free fibre cement technology and began designing and manufacturing a wide range of fibre cement building products that made use of the benefits that came from the products' durability, versatility and strength. Using the technical and manufacturing expertise developed in Australia, we expanded our operations, in particular to the United States, to become a specialised manufacturer of a wide range of fibre cement building materials.

Our legal name was changed to James Hardie Industries N.V. from RCI Netherlands Holdings B.V. in July 2001 when our legal form was converted from a besloten vennootschap met beperkte aansprakelijkheid (B.V.), to a naamloze vennootschap (N.V.), or a Dutch public limited liability company whose stock, unlike a private limited liability company, may be transferred without executing a notarial deed if such company is listed on a recognised stock exchange. In February 2001, the shareholders of James Hardie Industries Limited (JHIL) agreed to exchange their shares for shares in

Table of Contents

James Hardie Industries N.V., which retained its primary listing on the Australian Securities Exchange (ASX). In October 2001, JHIL transferred all of its fibre cement businesses from to James Hardie Industries N.V. In February 2010, our legal name was changed to James Hardie Industries SE when our legal form was converted from a Dutch N.V. to a Dutch Societas Europaea (SE) in connection with the implementation of Stage 1 of a two-stage re-domicile proposal (together, the re-domicile) to change our registered corporate domicile from The Netherlands to Ireland. On 17 June 2010, we implemented Stage 2 of the re-domicile and changed our registered corporate domicile to Ireland to become an Irish SE and became an Irish tax resident on 29 June 2010. On 15 October 2012, we converted from an Irish SE into an Irish public limited company (plc).

We conduct our operations under legislation in various jurisdictions. As an Irish plc we are governed by the Irish Companies Acts. In addition, we operate under the regulatory requirements of numerous jurisdictions and organisations, including the ASX, ASIC, the New York Stock Exchange (NYSE), the United States Securities and Exchange Commission (SEC), the Irish Takeover Panel and various other rulemaking bodies.

Our corporate domicile is located in Ireland. The address of our registered office in Ireland is Europa House, Second Floor, Harcourt Centre, Harcourt Street, Dublin 2, Ireland. The telephone number there is +353 1411 6924. Our agent in the United States is CT Corporation. Its office is located at 3 Winners Circle, 3rd Floor, Albany, New York 12205.

Corporate Restructuring

On 17 May 2011, we announced that we had commenced an internal reorganisation involving the simplification of our corporate structure, including some of the arrangements which were previously part of our Netherlands domicile. This internal reorganisation was made to facilitate the ability to access and distribute surplus cash flows and earnings of our operating subsidiaries more efficiently, including for the purpose of making periodic contributions to AICF. As part of this restructure, the Company incurred a tax charge of US\$32.6 million on undistributed earnings of its US subsidiaries during fiscal year 2011, related to the remittance of US earnings as part of the internal reorganisation.

The following is a simplified diagram of our current corporate structure:

Consolidation of AICF

In February 2007, our shareholders approved the AFFA entered into on 21 November 2006 to provide long-term funding to AICF. JHI plc owns 100% of James Hardie 117 Pty Ltd (the Performing Subsidiary) that funds AICF subject to the provisions of the AFFA. We appoint three of AICF s directors and the New South Wales (NSW) Government appoints two of AICF s directors.

Table of Contents

Under the terms of the AFFA, the Performing Subsidiary has an obligation to make payments to AICF on an annual basis. The amount of these annual payments is dependent on several factors, including our free cash flow (as defined in the AFFA), actuarial estimations, actual claims paid, operating expenses of AICF and the annual cash flow cap. JHI plc guarantees the Performing Subsidiary's obligation. As a result, for purposes of US GAAP, we consider JHI plc to be the primary beneficiary of AICF.

Although we have no legal ownership in AICF, for financial reporting purposes, our interest in AICF is considered variable and we consolidate AICF due to our pecuniary and contractual interests in AICF as a result of the funding arrangements outlined in the AFFA. Our consolidation of AICF results in a separate recognition of the asbestos liability and certain other asbestos-related assets and liabilities on our consolidated balance sheet. Among other items, we record a deferred tax asset for the anticipated future tax benefit we believe is available to us that arises from amounts contributed to the asbestos fund by the Performing Subsidiary. Since fiscal year 2007, movements in the asbestos liability arising from changes in foreign currency or actuarial adjustments are classified as asbestos *adjustments*, and the income tax benefit arising from contributions to AICF is included within *income tax benefit* on our consolidated statements of operations and comprehensive income when realised. See Note 2 to our consolidated financial statements in Section 2.

Business Overview

General Overview of our Business

Based on net sales, we believe we are the largest manufacturer of fibre cement products and systems for internal and external building construction applications in the United States, Australia, New Zealand, and the Philippines. We market our fibre cement products and systems under various Hardie brand names, such as HardieBacker[®] boards, and other brand names such as Artisan[®] Lap and Artisan[™] Accent Trim by James Hardie, Cemplank[®] and Prevail[®] siding (we also formerly marketed siding under the brand name Sentry[™] siding), and Scyon[®] advanced lightweight cement composite products such as Scyon[®] Stria[®] cladding. We believe that, in certain applications, our fibre cement products and systems provide a combination of distinctive performance, design and cost advantages when compared to other fibre cement products and alternative products and systems that use solid wood, engineered wood, vinyl, brick, stucco or gypsum wallboard. The sale of fibre cement products in the United States accounted for 73%, 70% and 67% of our total net sales in fiscal years 2014, 2013 and 2012, respectively.

Our fibre cement products are used in a number of markets, including new residential construction (single and multi-family housing), manufactured housing (mobile and pre-fabricated homes), repair and remodelling and a variety of commercial and industrial applications (stores, warehouses, offices, hotels, motels, schools, libraries, museums, dormitories, hospitals, detention facilities, religious buildings and gymnasiums). We manufacture numerous types of fibre cement products with a variety of patterned profiles and surface finishes for a range of applications, including external siding and soffit lining, internal linings, facades, and floor and tile underlayments.

In contrast to some other building materials, fibre cement provides durability attributes, such as strong resistance to damage from moisture, fire, impact and termites, requires relatively little maintenance and can be used as a substrate to create a wide variety of architectural effects with textured and coloured finishes.

Table of Contents

The breakdown of our net sales by operating segment for each of our last three fiscal years is as follows:

	Fiscal Year Ended 31 March		
	2014	2013	2012
	(Millions of US dollars)		
USA and Europe Fibre Cement	\$ 1,127.6	\$ 951.4	\$ 862.0
Asia Pacific Fibre Cement	366.2	369.9	375.5
Total	\$ 1,493.8	\$ 1,321.3	\$ 1,237.5

Industry Overview**US Housing Industry and Fibre Cement Industry**

In the United States, fibre cement is principally used in the residential building industry. Such usage fluctuates based on the level of new home construction and the repair and remodelling of existing homes. The level of activity is generally a function of interest rates and the availability of financing to homeowners to purchase a new home or make improvements to their existing homes, inflation, unemployment levels, demographic trends, gross domestic product growth and consumer confidence. Demand for building products is also affected by residential housing starts and existing home sales, the age and size of the housing stock and overall home improvement expenditures. According to the US Census Bureau, single family housing starts, which are one of the key drivers of the Company's performance, were up 9% to 615,400 for fiscal year 2014, compared to fiscal year 2013.

In the United States, the largest application for fibre cement products is in the external siding industry. Siding is a component of every building and it usually occupies more square footage than any other external building component, such as windows and doors. Selection of siding material is based on installed cost, durability, aesthetic appeal, strength, weather resistance, maintenance requirements and cost, insulating properties and other features. Different regions of the United States show a decided preference amongst siding materials according to economic conditions, weather, materials availability and local preference. The principal siding materials are vinyl, stucco, fibre cement, solid wood and brick. Vinyl has the largest share of the siding market.

International Fibre Cement Industry

In Australia and New Zealand, fibre cement building products are used in both the residential and commercial building industries with applications in external siding, internal walls, ceilings, floors, soffits and fences. The residential building industry represents the principal market for fibre cement products. We believe the level of activity in this industry is generally a function of interest rates, inflation, unemployment levels, demographic trends, gross domestic product growth and consumer confidence. Demand for fibre cement building products is also affected by the level of new housing starts and renovation activity.

Australia

According to Australian Bureau of Statistics, the total number of dwellings approved for fiscal year 2014 were 186,449, an increase of 21% compared to fiscal year 2013. Further, approvals for detached houses, which are the primary driver of the Asia Pacific business' sales volume, were 104,394 for fiscal year 2014, an increase of 16%, compared to fiscal year 2013.

Former subsidiaries of ABN 60 Pty Limited (ABN 60) developed fibre cement in Australia as a replacement for asbestos cement in the early 1980s. Asbestos cement sheet production ceased in the

Table of Contents

early 1980s and asbestos cement pipe production ceased in 1987. Competition for fibre cement has intensified over the past decade in Australia. In addition to competition from solid wood, engineered wood, wallboard, masonry and brick, two Australian competitors have established fibre cement manufacturing facilities in Australia and fibre cement imports are also growing.

New Zealand

According to Statistics New Zealand, the total number of new dwelling consents excluding apartments, the primary driver of the New Zealand business net sales were 19,768, an increase of 25% compared to fiscal 2013.

Competition continues to intensify in New Zealand as fibre cement imports have become more cost competitive and overseas manufacturers struggling with the global recession look for additional markets to add to their existing ones.

Philippines

In the Philippines and other Asian and Middle Eastern (Israel, Kuwait, Qatar and the United Arab Emirates) markets, fibre cement building products are used in both the residential and commercial building industries with applications in ceilings, internal walls and external siding, facades and soffits. The residential building industry represents the principal market for fibre cement products. In general, fibre cement products have, across a range of product applications, gained broader acceptance in these regions over the last decade. In the Philippines, additional imported fibre cement products have entered the market. However, in some of the developing markets, gypsum usage has increased and penetrated into fibre cement applications. Fibre cement and asbestos cement production facilities are located throughout Asia and exporting between countries is common practice. Unlike some of our competitors in the Asian market, we do not manufacture fibre cement products containing asbestos. We believe that fibre cement has good long-term growth potential because of the benefits of light-weight and framed construction compared to traditional masonry construction. In addition, we believe the opportunity to replace wood-based products, such as plywood, with more durable fibre cement will be attractive to some consumers in some of these markets.

Europe

In Europe, fibre cement building products are used in both residential and commercial building applications in external siding, internal walls, floors, soffits and roofing. We compete in most segments except roofing and promote the use of fibre cement products against traditional masonry, gypsum-based products and wood-based products. Since we commenced selling our products in Europe in fiscal year 2004, we have continued to work to grow demand for our products by building awareness among distributors, builders and contractors. Management believes that the growth outlook for fibre cement in Europe is favourable in light of stricter insulation requirements driving demand for advanced exterior cladding systems as well as better building practices increasing the use of fibre cement in interior applications.

Products

We manufacture fibre cement products in the United States, Australia, New Zealand and the Philippines. Our total product offering is aimed at the building and construction markets, including new residential construction, manufactured housing, repair and remodelling and a variety of commercial and industrial building applications.

We offer a wide range of fibre cement products for both exterior and interior applications. In the United States and elsewhere, our products are typically sold as planks or flat sheets with a variety of

Table of Contents

patterned profiles and finishes. Planks are used for external siding while flat sheets are used for internal and external wall linings and floor and tile underlayments. Outside the United States, we also manufacture fibre cement products for use in other applications such as building facades, lattice, fencing, decorative columns, flooring, soffit lining and ceiling applications, some of which have not yet been introduced into the United States.

We developed a proprietary technology platform that enables us to produce thicker yet lighter-weight fibre cement products that are generally lighter and easier to handle than traditional building products. The first application of this technology in the United States has been our HardieTrim® board. HardieTrim board is a fibre cement trim product that is used on the exterior of residential and commercial construction to replace traditional wood and engineered wood trim. HardieTrim board was launched in fiscal year 1999, with the introduction of HardieTrim HLD board.

We believe that our products provide certain performance, design and cost advantages. The principal fibre cement attributes in exterior applications are durability and low maintenance, particularly when compared to competing wood and wood-based products, while offering comparable aesthetics. Our fibre cement products exhibit resistance to the damaging effects of moisture, fire, impact and termites compared to wood and wood-based products, which we believe has enabled us to gain a competitive advantage over competing products. Vinyl siding products generally have better durability characteristics than wood-based products, but typically cannot duplicate fibre cement's aesthetics and the characteristics necessary for effectively accepting paint applications.

Our fibre cement products provide strength and the ability to imprint patterns that closely resemble patterns and profiles of traditional materials such as wood and stucco. The surface properties provide an effective paint-holding finish, compared to wood and engineered wood products, such that the periods between necessary maintenance and repainting are generally longer. Compared to masonry construction, fibre cement is lightweight, physically flexible and can be cut using readily available tools. This makes fibre cement suitable for lightweight construction across a range of architectural styles. Fibre cement is well suited to both timber and steel-framed construction.

In our interior product range, we believe our ceramic tile underlayment products exhibit better handling and installation characteristics compared to fibreglass mesh cement boards. Compared to wood and wood-based products, our products provide the same general advantages that apply to external applications. In addition, our fibre cement products exhibit less movement in response to exposure to moisture than many alternative competing products, providing a more consistent and durable substrate on which to install tiles. In internal lining applications where exposure to moisture and impact damage are significant concerns, our products provide superior resistance to moisture damage and impact resistance than traditional gypsum wet area wallboard and other competing products.

In the United States, the following new products were released over the last five years:

During fiscal year 2010, we introduced HardieZone® System siding products.

During fiscal year 2011, we introduced new HardieShingle® siding, HardieTrim® NT3® Boards, two new lap siding products, 12 Artisan® Accent Trim and HardieBacker® ProGrid cement board.

During fiscal year 2012, we introduced new profile HZ5® HardiePlank® siding, additional HardieShingle® siding profiles, new Improved Smooth HardieTrim® boards, new HardieTrim® Crown Mouldings and three new colours to the palette for James Hardie® products using ColorPlus® technology.

Table of Contents

During fiscal year 2013, we introduced a new profile HZ10® HardiePlank® siding.

During fiscal year 2014, we introduced an improved touch up accessory to support products using ColorPlus® technology. In Australia and New Zealand, new products released over the past five years in the Scyon lightweight advanced cement composite range include Stria Splayed cladding, and Axent trim. In the James Hardie product range; in Australia and New Zealand over the same timeframe, new products include Invibe panels and Inraw panels; and in New Zealand only, RAB PreClad Lining and Horizon Lining products were released. In both countries, new product launches have been supported by the launch of energy efficiency related accessories such as HardieBreak thermal break tape as well as web based initiatives such as the ACCEL suite of online product information, calculator and application tools, the LookHome and LightHome e-zines as well as the SmarterGreen, SmarterPartner, SmarterDesign and The Smarter Small Home initiatives. In New Zealand, The Drawing Board online design tool provides an aid to smart design using James Hardie products.

In the Philippines, new products released over the past five years include Hardieplank Siding, Hardiefloor Systems and Hardiepattern Boards. The established Hardieflex board range has been extended to include Hardieflex Wet Area lining boards and Hardieflex Pro primarily for wet area application.

In fiscal year 2004, we commenced our European fibre cement business by distributing our fibre cement products in the United Kingdom and France. We also manufacture fibre cement pipes in Australia and previously manufactured fibre cement pipes and roofing products in the United States. In May 2008 and April 2006, we ceased operation of our pipes and roofing businesses, respectively, in the United States.

Seasonality

Our earnings are seasonal and typically follow activity levels in the building and construction industry. In the United States, the calendar quarters ending in December and March generally reflect reduced levels of building activity depending on weather conditions. In Australia and New Zealand, the calendar quarter ending in March is usually affected by a slowdown due to summer holidays. In the Philippines, construction activity diminishes during the wet season from June through September and during the last half of December due to the slowdown in business activity over the holiday period. Also, general industry patterns can be affected by weather, economic conditions, industrial disputes and other factors. See Section 3, Risk Factors.

Raw Materials

The principal raw materials used in the manufacture of fibre cement are cellulose fibre (wood-based pulp), silica (sand), Portland cement and water.

Cellulose Fibre. Reliable access to specialised, consistent quality, low cost pulp is critical to the production of fibre cement building materials. Cellulose fibre is sourced from New Zealand, the United States, Canada, and Chile and is processed to our specifications. It is further processed using our proprietary technology to provide the reinforcing material in the cement matrix of fibre cement. We have developed a high level of internal expertise in the production and use of wood-based pulps. This expertise is shared with our pulp producers, which have access to appropriate raw wood stocks, in order to formulate superior reinforcing pulps. The resulting pulp formulas are typically proprietary and are the subject of confidentiality agreements between the pulp producers and us. Moreover, we have

Table of Contents

obtained patents in the United States and in certain other countries covering certain unique aspects of our pulping formulas and processes that we believe cannot adequately be protected through confidentiality agreements. However, we cannot assure you that our intellectual property and other proprietary information will be protected in all cases. See Section 3, Risk Factors. We have entered into contracts that provide discounted pulp prices relative to various pulp indices and we purchase our pulp from several qualified suppliers in an attempt to mitigate price increases and supply interruptions.

Pulp has historically demonstrated more price sensitivity than other raw materials that we use in our manufacturing process. In fiscal year 2014, the average Northern Bleached Softwood Kraft (NBSK) pulp price relative to our US business was US\$971 per ton, an 11% increase compared to fiscal year 2013.

Silica. High purity silica is sourced locally by the various production plants. In the majority of locations, we use silica sand as a silica source. In certain other locations, however, we process quartz rock and beneficiate silica sand to ensure the quality and consistency of this key raw material.

Cement. Cement is acquired in bulk from local suppliers and is supplied on a just-in-time basis to our manufacturing facilities. The silos at each fibre cement plant hold between one and three days of our cement requirements. We continue to evaluate options on agreements with suppliers for the purchase of cement that can fix our cement prices over longer periods of time.

Water. We use local water supplies and seek to process all wastewater to comply with environmental requirements.

Sales, Marketing and Distribution

The principal markets for our fibre cement products are the United States, Australia, New Zealand, the Philippines, Canada, and in parts of Europe, including the United Kingdom and France. In addition, we sell fibre cement products in many other markets, including Belgium, China, Denmark, France, French Caribbean, Germany, Hong Kong, Hungary, India, Indonesia, Ireland, Italy, Malta, Mexico, the Middle East (Israel, Kuwait, Qatar and the United Arab Emirates), The Netherlands, Norway, various Pacific Islands, South Africa, South Korea, Spain, Sri Lanka, Switzerland, Taiwan, Turkey and Vietnam. Our brand name, customer education in comparative product advantages, differentiated product range and customer service, including technical advice and assistance, provide the basis for our marketing strategy. We offer our customers support through a specialised fibre cement sales force and customer service infrastructure in the United States, Australia, New Zealand, the Philippines and Europe (which is based out of The Netherlands). The customer service infrastructure includes inbound customer service support coordinated nationally in each country (customer service support for Canada is based out of the United States and customer service support for Europe is based out of The Netherlands), and is complemented by outbound telemarketing capability. Within each regional market, we provide sales and marketing support to building products dealers and lumber yards and also provide support directly to the customers of these distribution channels, principally homebuilders and building contractors.

In the United States, we sell fibre cement products for new residential construction predominantly to distributors, which then sell these products to dealers or lumber yards. This two-step distribution process is supplemented with direct sales to dealers and lumber yards as a means of accelerating product penetration and sales. Repair and remodel products in the United States are typically sold through the large home centre retailers and specialist distributors. Our top five US customers accounted for approximately 50% of our total USA and Europe Fibre Cement gross sales in fiscal year 2014. In Australia and New Zealand, both new construction and repair and remodel products are generally sold directly to distributor/hardware stores and lumber yards rather than through the two-step

Table of Contents

distribution process. In the Philippines, a network of thousands of small to medium size dealer outlets sells our fibre cement products to consumers, builders and real estate developers, although in recent years, do-it-yourself type stores have started to enter the Philippines market. Physical distribution of product in each country is primarily by road or sea transport, except in the United States where transportation is primarily by road and, to a lesser extent, by rail. Fibre cement products manufactured in Australia, New Zealand and the Philippines are exported to a number of markets in Asia, the Pacific, and the Middle East (Israel, Kuwait, Qatar and the United Arab Emirates) by sea transport.

We maintain dedicated regional sales management teams in our major sales territories. As of 31 May 2014, the sales teams (including telemarketing staff) consisted of approximately 334 regular and 1 part-time employees in the United States and Canada, 66 people in Australia, 23 people in New Zealand, 38 people in the Philippines, and 31 people in Europe. We also employ one person based in Hong Kong who functions as a regional export salesperson, and who covers markets such as South Korea, Hong Kong, Macau, China and the Middle East (Israel, Kuwait, Qatar and the United Arab Emirates). Our national sales managers and national account managers, together with the regional sales managers and sales representatives, maintain relationships with national and other major accounts. Our sales force includes skilled trades people who provide on-site technical advice and assistance. In some cases, sales forces manage specific product categories.

Despite the fact that distributors and dealers are generally our direct customers, we also aim to increase primary demand for our products by marketing our products directly to homeowners, architects and builders. We encourage them to specify and install James Hardie® products because of the quality and craftsmanship of our products. This pull through strategy, in turn, assists us in expanding sales for our distribution network as distributors benefit from the increasing demand for our products.

Geographic expansion of our fibre cement business has occurred in markets where framed construction is prevalent for residential applications or where there are opportunities to change building practices from masonry to framed construction. Expansion is also possible where there are direct substitution opportunities irrespective of the methods of construction. Our entry into the Philippines is an example of the ability to substitute fibre cement for an alternative product (in this case plywood). With the exception of our current major markets, as well as Japan and certain rural areas in Asia, Scandinavia, and Eastern Europe, most markets in the world principally utilise masonry construction for external walls in residential construction. Accordingly, further geographic expansion depends substantially on our ability to provide alternative construction solutions and for those solutions to be accepted in those markets.

Because fibre cement products were relatively new to the Philippines, the launch of our fibre cement products in the Philippines in fiscal year 1999 was accompanied by strategies to address the particular needs of local customers and the building trade. For example, we established a carpenter training and accreditation program whereby Filipino carpenters who are unfamiliar with our products are taught installation techniques. Our training programs for counter clerks and carpenters are geared not only to educate them but also to develop them as brand advocates. We have also put greater emphasis on building our relationships with new home developers and builders in order to educate the market on the benefits of our products in this particular sector.

Dependence on Trade Secrets and Research and Development

We pioneered the successful development of cellulose reinforced fibre cement and, since the 1980s, have progressively introduced products developed as a result of our proprietary product formulation and process technology. The introduction of differentiated products is one of the core components of our global business strategy. This product differentiation strategy is supported by our significant investment in research and development activities.

Table of Contents

The following table sets forth our research and development expenditures for the three preceding fiscal years:

(Millions of US dollars)	Fiscal Years Ended 31 March		
	2014	2013	2012
Research and Development Expenditures ¹	\$ 35.3	\$ 39.6	\$ 32.4
Research and Development Expenditures as a percentage of total net sales	2.4%	3.0%	2.6%

¹ Included within research and development expenditures for fiscal years 2014, 2013 and 2012 is US\$2.2 million, US\$2.4 million and US\$2.0 million, respectively, classified as selling, general and administrative expenses.

Our current patent portfolio is based mainly on fibre cement compositions, associated manufacturing processes and the resulting products. Our non-patented technical intellectual property consists primarily of our operating and manufacturing know-how, which is maintained as trade secret information. We have enhanced our abilities to effectively create, manage and utilise our intellectual property and have implemented a strategy that increasingly uses patenting, licensing, trade secret protection and joint development to protect and increase our competitive advantage. However, we cannot assure you that our intellectual property and other proprietary information will be protected in all cases. In addition, if our research and development efforts fail to generate new, innovative products or processes, our overall profit margins may decrease and demand for our products may fall.

In addition, the Company owns a variety of patents and licences; industrial, commercial and financial contracts; and manufacturing processes. While the Company is dependent on the competitive advantage that these items provide as a whole, the Company is not dependent on any one of them individually and does not consider any one of them individually to be material. We do not materially rely on intellectual property licensed from any outside third parties. See Section 3, Risk Factors.

Governmental Regulation

As noted above, on 15 October 2012, we converted into an Irish plc from an Irish SE and are now governed by the Irish Companies Acts. Previously, as an Irish SE company, we were governed by the Irish Companies Acts and the SE Regulation, European Union Council Regulations and relevant European Union Directives. We also continue to operate under the regulatory requirements of numerous jurisdictions and organisations, including the ASX, ASIC, the NYSE, the SEC, the Irish Takeovers Panel and various other rulemaking bodies. See Section 3, Memorandum and Articles of Association for information regarding Irish Companies Acts and regulations to which we are subject.

Environmental Regulation

Our operations and properties are subject to extensive federal, state and local and foreign environmental protection and health and safety laws, regulations and ordinances. These environmental laws, among other matters, govern activities and operations that may have adverse environmental effects, such as discharges to air, soil and water, and establish standards for the handling of hazardous and toxic substances and the handling and disposal of solid and hazardous wastes. In the United States, these environmental laws include, but are not limited to the:

Resource Conservation and Recovery Act;
Comprehensive Environmental Response, Compensation and Liability Act;
Clean Air Act;
Occupational Safety and Health Act;

Table of Contents

Mine Safety and Health Act;
Emergency Planning and Community Right to Know Act;
Clean Water Act;
Safe Drinking Water Act;
Surface Mining Control and Reclamation Act;
Toxic Substances Control Act;
National Environmental Policy Act; and
Endangered Species Act,

as well as analogous state, regional and local regulations. Other countries also have statutory schemes relating to the protection of the environment.

Some environmental laws provide that a current or previous owner or operator of real property may be liable for the costs of removal or remediation of environmental contamination on, under, or in that property or other impacted properties. In addition, persons who arrange, or are deemed to have arranged, for the disposal or treatment of hazardous substances may also be liable for the costs of removal or remediation of environmental contamination at the disposal or treatment site, regardless of whether the affected site is owned or operated by such person. Environmental laws often impose liability whether or not the owner, operator or arranger knew of, or was responsible for, the presence of such environmental contamination. Also, third parties may make claims against owners or operators of properties for personal injuries, property damage and/or for clean-up associated with releases of hazardous or toxic substances pursuant to applicable environmental laws and common law tort theories, including strict liability.

Environmental compliance costs in the future will depend, in part, on continued oversight of operations, expansion of operations and manufacturing activities, regulatory developments and future requirements that cannot presently be predicted.

Table of Contents**Organisational Structure**

JHI plc is incorporated and domiciled in Ireland.

The table below sets forth our significant subsidiaries, all of which are wholly-owned by JHI plc, either directly or indirectly, as of 31 May 2014.

Name of Company	Jurisdiction of Establishment
James Hardie 117 Pty Ltd	Australia
James Hardie Aust. Holdings Pty Ltd.	Australia
James Hardie Austrgroup Pty Ltd.	Australia
James Hardie Australia Management Pty Ltd.	Australia
James Hardie Australia Pty Ltd.	Australia
James Hardie Building Products Inc.	United States
James Hardie Europe B.V.	Netherlands
James Hardie Finance Holdings 1 Limited	Bermuda
James Hardie Finance Holdings 3 Limited	Bermuda
James Hardie Holdings Limited	Ireland
James Hardie International Finance Limited.	Ireland
James Hardie International Group Limited.	Ireland
James Hardie International Holdings Limited.	Ireland
James Hardie New Zealand	New Zealand
James Hardie North America Inc.	United States
James Hardie Philippines Inc.	Philippines
James Hardie Technology Limited	Bermuda
James Hardie U.S. Investments Sierra LLC	United States
N.V. Technology Holdings, A Limited Partnership	Australia
RCI Holdings Pty Ltd	Australia

Property, Plants and Equipment

We estimate that our manufacturing plants are among the largest and lowest cost fibre cement manufacturing plants in the United States. We believe that the location of our plants positions us near attractive markets in the United States while minimising our transportation costs for product distribution and raw material sourcing.

Our manufacturing plants use significant amounts of water which, after internal recycling and reuse, are eventually discharged to publicly owned treatment works. The discharge of process water is monitored by us, as well as by regulators. In addition, we are subject to regulations that govern the air emissions and other waste streams from our plants. In the past, from time to time, we have received notices of alleged discharges in excess of our water and air permit limits. In each case, and in compliance with our Environmental Policy, we have addressed the concerns raised in those notices, in part, through the payment of any associated minor fines and capital expenditures associated with preventing future discharges in excess of permitted levels.

Plants and Process**Fibre Cement Building Products**

We manufacture fibre cement building products in the United States and Asia Pacific. Annual design capacity is based on management's historical experience with our production process and is calculated assuming continuous operation, 24 hours per day, seven days per week, producing 5/16 medium

Table of Contents

density product at a targeted operating speed. Annual design capacity is not necessarily reflective of our actual capacity utilisation rates for our fibre cement plants by region. Annual capacity utilisation is affected by factors such as demand, product mix, batch size, plant availability and production speeds and is usually less than annual design capacity. We manufacture products of varying thicknesses and density.

We currently have an annual flat sheet design capacity of 3,226 mmsf and 520 mmsf in the United States and Asia Pacific, respectively, for our fibre cement building products. Fiscal year 2014 capacity utilisation, based on this annual design capacity, for our fibre cement building products locations was an average of 58% and 76% in the United States and Asia Pacific, respectively. As indicated above, annual flat sheet design capacity is based on management's estimates. No accepted industry standard exists for the calculation of our fibre cement manufacturing facility design and utilisation capacities.

We are expanding production capacity in anticipation of the continued improvement of the operating environment and we expect to incur additional capital expenditures in fiscal year 2015 and beyond to meet anticipated demand increases in major markets. Those capacity expansion projects are as follows:

Fourth sheet machine and ancillary facilities in the Plant City, Florida location with an investment of US\$65.0 million with nominal capacity of 300 mmsf or 9% capacity increase.

Third sheet machine and ancillary facilities at the company's Cleburne, Texas location with an investment of US\$37.0 million with nominal capacity of 200 mmsf or 6% capacity increase.

Production capacity expansion at the company's Carole Park, Queensland location with an investment of A\$89.0 million with a nominal capacity increase of 40%.

Fibre Reinforced Concrete Pipes

We manufacture fibre reinforced concrete pipes in Australia. Our current annual design capacity for our fibre reinforced concrete pipes plant is 50 thousand tons.

Plant Locations

The location of each of our fibre cement plants is set forth below:

Fibre Cement Building Products

United States Plants Operating

Cleburne, Texas
Fontana, California¹
Peru, Illinois
Plant City, Florida

Pulaski, Virginia
Reno, Nevada

Tacoma, Washington
Waxahachie, Texas

United States Plants Suspended

Cabuyao City

Fibre Reinforced Concrete Pipes

Australia

Brisbane, Queensland (Meeandah)³

¹ We suspended production at our Fontana, California location in December 2008. In fiscal year 2013, we announced plans to refurbish and reconfigure the Fontana location and in the fourth quarter of fiscal 2014, we recommenced production. The refurbished plant has a nominal capacity of 250mmsf.

² We suspended production at our Blandon, Pennsylvania and Summerville, South Carolina locations in November 2007 and November 2008, respectively. In the fourth quarter of fiscal year 2013 we announced that we will not re-open the plant in Blandon, Pennsylvania. No decision has been made on the future of the Summerville, South Carolina location.

³ There are two manufacturing locations in Brisbane. Carole Park produces only flat sheets and Meeandah produces only pipes and columns. We completed the purchase of the previously leased land and buildings at the Carol Park location, and in conjunction with the purchase, we are proceeding with an approximately A\$89.0 million capital expenditure and commercial investment program to increase the location's production capacity. While the same basic process is used to manufacture fibre cement building products at each facility, plants are designed to produce the appropriate mix of products to meet each geographic market's specific, projected needs. The facilities were constructed and are operated so production can be efficiently adjusted in response to increased consumer demand by increasing production capacity utilisation, enhancing the economies of scale or adding additional lines to existing facilities, or making corresponding reductions in production capacity in response to weaker demand.

Except for the Waxahachie, Texas location, we own all of our fibre cement manufacturing facilities located in the United States. The lease for the Waxahachie, Texas location expires on 31 March 2020, at which time we have an option to purchase the facility.

Two of our three Australian fibre cement manufacturing facilities (Rosehill, Sydney and Meeandah, Brisbane) are leased by us. The Rosehill lease expires on 23 March 2016, with an option to renew the lease for two further terms of 10 years expiring in March 2036. The Meeandah lease expires on 23 March 2019, and contains options to renew for two further terms of 10 years expiring in March 2039. As previously announced, in May 2013 we purchased the remaining Australian fibre cement manufacturing facility (Carole Park, Brisbane) as part of our Australian manufacturing capacity expansion. Our one New Zealand fibre cement manufacturing facility is leased by us. The lease for our New Zealand facility expires on 22 March 2016, at which time we have an option to renew the lease for two further terms of 10 years expiring in March 2036. There is no purchase option available under our leases related to our Australian and New Zealand facilities.

The land on which our Philippines fibre cement plant is located is owned by Ajempha Holding Inc. (Ajempha), a related party. Ajempha is 40% owned by our operating entity, James Hardie Philippines Inc., and 60% owned by the James Hardie Philippines Retirement Fund. The James Hardie operating entity owns 100% of the fixed assets on the land owned by Ajempha.

Table of Contents*Mines*

We lease silica quartz mine sites in Tacoma, Washington, Reno, Nevada and Victorville, California. The lease for our quartz mine in Tacoma, Washington expires in February 2018 (with options to renew). The lease for our silica quartz mine site in Reno, Nevada expires in January 2019. The lease for our silica mine site in Victorville, California expires in June, 2015. Further, we own rights to an additional property in Victorville, California, however, as of 31 May 2013, we have not begun to mine this site.

As a mine operator, we are required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), and rules promulgated by the Securities and Exchange Commission implementing that section of the Dodd-Frank Act, to provide certain information concerning mine safety violations and other regulatory matters concerning the operation of our mines. During fiscal year 2014, we did not receive any notices, citations, orders, legal action or other communication from the US Department of Labor's Mine Safety and Health Administration that would necessitate additional disclosure under Section 1503(a) of the Dodd-Frank Act.

Capital Expenditures

The following table sets forth our capital expenditures for each year in the three-year period ended 31 March 2014.

	Fiscal Years Ended 31 March		
	2014	2013	2012
	(Millions of US dollars)		
USA and Europe Fibre Cement	\$ 72.4	\$ 43.2	\$ 26.7
Asia Pacific Fibre Cement	40.7	10.7	6.7
Research and Development and Corporate	2.3	7.2	2.4
Total Capital Expenditures	\$ 115.4	\$ 61.1	\$ 35.8

The Company did not have any material divestitures in the fiscal years ended 31 March 2014, 2013 and 2012.

The significant capital expenditure projects over the past three fiscal years in our USA and Europe Fibre Cement segment include:

refurbishment and re-commissioning of our Fontana, California location in the fourth quarter of fiscal 2014. The total cost of this project was US\$35 million;

upgrade of our supply chain management IT systems for US\$4.3 million in fiscal year 2013;

re-commissioning and upgrade of our Waxahachie, Texas plant for US\$5.1 million in fiscal year 2013;

expansion of a warehouse facility at our Pulaski, Virginia plant. As of March 2014, we have incurred US\$4.4 million related to this project;

installation of new packaging technology at our Pulaski, Virginia plant. As of 31 March 2014, we have incurred US\$3.4 million related to this project; and

Edgar Filing: James Hardie Industries plc - Form 20-F

construction of a new warehouse facility at our Cleburne, Texas plant for US\$2.8 million in fiscal year 2013.

Table of Contents

In our Asia Pacific Fibre Cement segment, significant capital expenditures in the last three fiscal years include:

installation of a new ball mill at our Carole Park, Queensland location for US\$4.1 million in fiscal year 2014; and

purchase of the land and buildings at our existing Carole Park, Queensland location in the first quarter of fiscal year 2014 for US\$12.0 million.

In conjunction with the purchase of our Carole Park, Queensland location, the company is proceeding with a capital expenditure and commercial investment program to increase the plant's production capacity at a total cost of approximately A\$89.0 million over the next two fiscal years. Production facilities are projected to be fully operational in the first half of fiscal year 2016. We expect that this capital expenditure will allow us to service expected increases in demand for products and also enable incremental capacity expansions in the Asia Pacific Fibre Cement segment at low capital costs in the medium term, if required to meet future market demand. Production of building materials at our Rosehill plant in Sydney and of pipes at our Meeandah, Brisbane site will continue.

In our Research and Development segment, we purchased and fitted out a building for our new research and development facility in Naperville, Illinois for US\$4.8 million in fiscal year 2013.

We currently expect to incur capital expenditures of approximately US\$200.0 million per year over the next three fiscal years, including facility upgrades and expansions, equipment to enhance environmental compliance, and the implementation of new fibre cement technologies.

Table of Contents

JAMES HARDIE MANAGEMENT TEAM

Our management is overseen by the James Hardie Management Team (JHMT), whose members cover the key areas of fibre cement research and development, production, manufacturing, sales, human resources, investor relations, finance and legal.

Members of the JHMT as at 31 May 2014 (in alphabetical order) are:

Joe Blasko BSFS, JD

General Counsel

Age 47

Joe Blasko joined James Hardie as General Counsel in June 2011. Mr Blasko reports to the Company's Chief Executive Officer (CEO).

Before joining James Hardie, Mr Blasko was Assistant General Counsel, and later, the General Counsel at Liebert Corporation, an Emerson Network Power Systems company and wholly-owned subsidiary of Emerson Electric Co. In his four years with Liebert/Emerson, Mr Blasko was responsible for establishing the legal department in Columbus, Ohio, managing and overseeing all legal matters and working closely with the executive management team. In this role, Mr Blasko also had global responsibilities which required expertise across multiple jurisdictions.

From 2004 to 2006, Mr Blasko was Associate General Counsel at The Scotts Miracle-Gro Company, serving as the effective general counsel to numerous corporate divisions within the organisation. From 1997 to 2004, Mr Blasko gained considerable regulatory and litigation expertise working at Vorys, Slater, Seymour and Pease LLP in Ohio.

Mr Blasko has a Juris Doctor from Case Western Reserve University in Cleveland, Ohio, USA and a Bachelor of Science in Foreign Service from Georgetown University, USA, with a speciality in International Relations, Law and Organisations.

Mark Fisher BSc, MBA

Executive General Manager International

Age 43

Mark Fisher joined James Hardie in 1993 as a Production Engineer. Since then, he has worked for the Company as Finishing Manager, Production Manager and Product Manager at various locations; Sales and Marketing Manager; and as General Manager of our Europe Fibre Cement business. Mr Fisher was appointed Vice President Specialty Products in November 2004, then Vice President Research & Development in December 2005. In February 2008, his role was expanded to cover Engineering & Process Development.

In January 2010, he was appointed Executive General Manager International, responsible for the Company's non-US businesses in Australia, NZ, Philippines and Europe.

Mr Fisher has a Bachelor of Science in Mechanical Engineering and an MBA from University of Southern California, USA.

Table of Contents

Sean Gadd BEng, MBA

Executive General Manager Northern Division

Age 41

Sean Gadd joined James Hardie in 2004 as a Regional Engineering Manager for the Asia Pacific business, and progressed to Plant Manager for both the Carole Park and Rosehill facilities in Australia. Mr Gadd then moved to the US in 2006 to take the role of Manufacturing Manager for Trim and various manufacturing facilities across the US.

In 2009 he ran the US trim business for James Hardie with responsibility for both Manufacturing and Sales, followed by a brief assignment leading Supply Chain. In 2011, Mr Gadd was promoted to the role of Vice President of Sales for the Western USA and Canada. Over the next year, his role was expanded to include the Midwest and Northeast of the USA.

Mr Gadd was appointed Executive General Manager in September 2013 with full P&L responsibility for the Northern Division.

Mr Gadd has a Bachelor of Engineering in Manufacturing Management and an executive MBA from the Australian Graduate School of Management, Australia.

Louis Gries BSc, MBA

Chief Executive Officer

Age 60

Louis Gries joined James Hardie as Manager of the Fontana fibre cement plant in California in February 1991 and was appointed President of James Hardie Building Products, Inc. in December 1993. Mr Gries became Executive Vice President Operations in January 2003, responsible for operations, sales and marketing in our businesses in the Americas, Asia Pacific and Europe.

He was appointed Interim CEO in October 2004 and became CEO in February 2005.

In April 2012, the Company announced that effective June 2012, Mr Gries would again assume responsibility for managing the US business.

Before he joined James Hardie, Mr Gries worked for 13 years for USG Corp, including a variety of roles in research, plant quality and production, and product and plant management.

Mr Gries has a Bachelor of Science in Mathematics from the University of Illinois, USA and an MBA from California State University, Long Beach, USA.

Table of Contents

Matthew Marsh BA, MBA

Chief Financial Officer

Age 39

Matthew Marsh joined James Hardie as Chief Financial Officer (CFO) in June 2013. As CFO he oversees the company's overall financial activities, including accounting, tax, treasury, performance and competitor analysis, internal audit and financial operations. Mr Marsh is also responsible for the company's technology and information systems.

After a 16-year career at General Electric Company (GE), Mr Marsh brings a strong background in financial management. Before joining James Hardie, Mr Marsh most recently served as CFO of GE Healthcare's IT business. Prior to being named CFO of GE Healthcare IT, Mr Marsh oversaw the finance operations for GE Healthcare's U.S. Healthcare Systems and U.S. Diagnostic Imaging businesses.

Prior to those appointments Mr Marsh travelled globally with the GE Internal Audit Staff gaining extensive experience in several industries including appliances, information services, distribution and supply, aviation, plastics, financial services, capital markets and health care, across more than twenty countries. Mr Marsh has graduated from GE's Financial Management Program (FMP).

Mr Marsh has a MBA from University of Chicago's Booth School of Business, USA and a Bachelor of Arts in Economics and Public Affairs from Syracuse University, USA where he graduated Magna Cum Laude.

Sean O Sullivan BA, MBA

Vice President Investor & Media Relations

Age 48

Sean O Sullivan joined James Hardie as Vice President Investor & Media Relations in December 2008. For the eight years prior to joining James Hardie, Mr O Sullivan was Head of Investor Relations at St. George Bank, where he established and led the investor relations function.

Mr O Sullivan's background includes thirteen years as a fund manager for GIO Asset Management, responsible for domestic and global investments. During this period, he spent time on secondment with a McKinsey and Co. taskforce that completed a major study into the Australian financial services industry. Mr O Sullivan's final position at GIO was General Manager of Diversified Investments where his responsibilities included determining the asset allocation for over A\$10 billion in funds under management. After leaving GIO, Mr O Sullivan worked for Westpac Banking Corporation in funds management sales.

Mr O Sullivan has a Bachelor of Arts in Economics from Sydney University, Australia and an MBA from Macquarie Graduate School of Management, Australia.

Table of Contents

Ryan Sullivan BSc, MS, MBA

Executive General Manager Southern Division

Age 40

Ryan Sullivan joined James Hardie in 2004 as the ColorPlus Manufacturing Manager. Since then, he has worked for the Company as Director of Global R&D and Engineering Services and Director of North America Supply Chain. In 2012, he became Director of the ColorPlus Business Unit, with product line responsibility for the North American ColorPlus business. In 2013, he was appointed to the James Hardie Management Team as Executive General Manager of the Southern Division with full P&L responsibility.

Before joining James Hardie, Mr Sullivan was a senior manager at Marconi Communications where he held numerous positions and had global responsibility. He has also worked in the fields of nuclear power and advanced robotics.

Mr Sullivan has a Bachelor of Science in Mechanical Engineering with a minor in Engineering Design from Carnegie Mellon University, USA, a Masters of Science in Electrical Engineering from the University of Pittsburgh, USA and an MBA from the University of Pittsburgh Katz School, USA.

Table of Contents

BOARD OF DIRECTORS

James Hardie's directors have widespread experience, spanning general management, finance, law and accounting. Each director also brings valuable international experience that assists with James Hardie's growth.

Michael Hammes BS, MBA

Age 72

Michael Hammes was elected as an independent Non-Executive Director of James Hardie in February 2007. He was appointed Chairman of the Board in January 2008 and is a member of the Audit Committee, the Remuneration Committee and the Nominating and Governance Committee.

Experience: Mr Hammes has extensive commercial experience at a senior executive level. He has held a number of executive positions in the medical products, hardware and home improvement, and automobile sectors, including CEO and Chairman of Sunrise Medical, Inc. (2000-2007), Chairman and CEO of Guide Corporation (1998-2000), Chairman and CEO of Coleman Company, Inc. (1993-1997), Vice Chairman of Black & Decker Corporation (1992-1993) and various senior executive roles with Chrysler Corporation (1986-1990) and Ford Motor Company (1979-1986).

Directorships of listed companies in the past five years: Current Director of Navistar International Corporation (since 1996) and Director of DynaVox Mayer-Johnson (listed in April 2010).

Other: Resident of the United States.

Last elected: August 2011

Term expires: August 2014

Donald McGauchie AO

Age 64

Donald McGauchie joined James Hardie as an independent Non-Executive Director in August 2003 and was appointed Acting Deputy Chairman in February 2007 and Deputy Chairman in April 2007. He is Chairman of the Nominating and Governance Committee and a member of the Remuneration Committee.

Experience: Mr McGauchie has wide commercial experience within the food processing, commodity trading, finance and telecommunication sectors. He also has extensive public policy experience, having previously held several high-level advisory positions to the Australian Government.

Directorships of listed companies in the past five years: Current Chairman (since 2010) and Director (since 2010) of Australian Agricultural Company Limited; Chairman (since 2010) and Director (since 2003) of Nufarm Limited; Director of GrainCorp Limited (since 2009). Former Chairman of Telstra Corporation Limited (2004-2009).

Other: Chairman of Australian Wool Testing Authority (since 2005) and Director since 1999; Former Director of The Reserve Bank of Australia (2001-2011); resident of Australia.

Table of Contents

Last elected: August 2013

Term expires: August 2016

Brian Anderson BS, MBA, CPA

Age 63

Brian Anderson was appointed as an independent Non-Executive Director of James Hardie in December 2006. He is Chairman of the Audit Committee and a member of the Remuneration Committee.

Experience: Mr Anderson has extensive financial and business experience at both executive and board levels. He has held a variety of senior positions, with thirteen years at Baxter International, Inc., including Corporate Vice President of Finance, Senior Vice President and Chief Financial Officer (1997-2004) and, more recently, Executive Vice President and Chief Financial Officer of OfficeMax, Inc. (2004-2005). Earlier in his career, Mr Anderson was an Audit Partner of Deloitte & Touche LLP (1986-1991).

Directorships of listed companies in the past five years: Current Chairman (since 2010) and Director (since 2005) of A.M. Castle & Co.; Director of Pulte Homes Corporation (since 2005); Director (since 1999) and Lead Director (since April 2011) of W.W. Grainger, Inc.

Other: Resident of the United States.

Last elected: August 2012

Term expires: August 2015

David D. Harrison BA, MBA, CMA

Age 67

David D. Harrison was appointed as an independent Non-Executive Director of James Hardie in May 2008. He is Chairman of the Remuneration Committee and a member of the Audit Committee.

Experience: Mr Harrison is an experienced company director with a finance background, having served in corporate finance roles, international operations and information technology during 22 years with Borg Warner/General Electric Co. His previous experience includes 10 years at Pentair, Inc., as Executive Vice President and Chief Financial Officer (1994-1996 and 2000-2007) and Vice President and Chief Financial Officer roles at Scotts, Inc. and Coltec Industries, Inc. (1996-2000).

Directorships of listed companies in the past five years: Current Director of National Oilwell Varco (since 2003); Former Director of Navistar International Corporation (2007-2012).

Other: Resident of the United States.

Last elected: August 2013

Term expires: August 2016

Table of Contents

Alison Littley BA, FCIPS

Age 52

Alison Littley was appointed as an independent Non-Executive Director of James Hardie in February 2012. She is a member of the Audit Committee.

Experience: Ms Littley has substantial experience in multinational manufacturing and supply chain operations, and she brings a strong international leadership background building effective management teams and third party relationships. She has held a variety of positions, most recently as Chief Executive of Buying Solutions, a UK Government Agency responsible for procurement of goods and services on behalf of UK government and public sector bodies (2006-2011). She has previously held senior management roles in Diageo plc (1999-2006) and Mars, Inc. (1981-1999). She serves on the Board of Weightmans LLP, a UK law firm.

Directorships of listed companies in the past five years: None.

Other: Resident of the United Kingdom.

Last elected: August 2012

Term expires: August 2015

James Osborne BA Hons, LLB

Age 65

James Osborne was appointed as an independent Non-Executive Director of James Hardie in March 2009. He is a member of the Nominating and Governance Committee.

Experience: Mr Osborne is an experienced company director with a strong legal background and a considerable knowledge of international business operations in North America and Europe. His career includes 35 years with the leading Irish law firm, A&L Goodbody, in roles which included opening the firm's New York office in 1979 and serving as the firm's managing partner (1982-1994). He has served as a consultant to the firm since 1994. Mr Osborne also contributed to the listing of Ryanair in London, New York and Dublin and continues to serve on Ryanair's board.

Directorships of listed companies in the past five years: Current Director of Ryanair Holdings plc (since 1996); Former Chairman of Independent News & Media (2011-2012), Chairman of Newcourt Group plc (2004-2009).

Other: Chairman of Eason & Son Ltd (since August 2010), Chairman of Centric Health (since 2006); Chairman of Monaghan Mushrooms (since 2012); resident of Ireland.

Last elected: August 2012

Term expires: August 2015

Table of Contents

Rudolf van der Meer M.Ch.Eng

Age 69

Rudy van der Meer was elected as an independent Non-Executive Director of James Hardie in February 2007. He is a member of the Nominating and Governance Committee.

Experience: Mr van der Meer is an experienced former executive, with considerable knowledge of international business and the building and construction sector. During his 32-year association with Akzo Nobel N.V., he held a number of senior positions including CEO of Coatings (2000-2005), CEO of Chemicals (1993-2000), and member of the five person Executive Board (1993-2005).

Directorships of listed companies in the past five years: Current Director of LyondellBasell Industries N.V. (since August 2010); Former Member of the Supervisory Board of Hagemeyer N.V. (2006-2008); Chairman of the Supervisory Board of Imtech N.V. (2005-2013).

Other: Former Chairman of the Board of Energie Beheer Nederland B.V. (2006 – 2013); Chairman of the Supervisory Board of VGZ Health Insurance (since May 2011); resident of The Netherlands.

Last elected: August 2011

Term expires: August 2014

Table of Contents

REMUNERATION REPORT

This Remuneration Report explains James Hardie's executive remuneration framework, and has been adopted by the Board on the recommendation of the Remuneration Committee.

The Company is not required to produce a remuneration report or to submit it to shareholders under Irish or Australian rules or regulations. However, taking into consideration its large Australian shareholder base, James Hardie has voluntarily produced a remuneration report for non-binding shareholder approval for some years and currently intends to continue to do so. This document reports on the Company's remuneration policies and practices in fiscal year 2014 and also voluntarily includes an outline of the key changes for fiscal year 2015. Further details of these changes are set out in the 2014 Notice of Annual General Meeting (AGM).

Consistent with fiscal year 2013, during fiscal year 2014 the Remuneration Committee retained Aon Hewitt (in the US) and Guerdon Associates (in Australia) as its independent advisers for matters regarding remuneration.

1. APPROACH TO SENIOR EXECUTIVE REMUNERATION

1.1 Remuneration Philosophy

James Hardie's remuneration philosophy is to provide competitive remuneration, compared to US peer group companies exposed to the US housing market. Within this philosophy, the executive remuneration framework emphasises operational excellence and shareholder value creation through incentives which link executive remuneration with the interests of shareholders. The pay-for-performance system continues to serve as the framework for executive remuneration, aligning the remuneration received with the performance achieved.

1.2 Composition of Remuneration Packages

Remuneration packages for senior executives reflect this remuneration philosophy and comprise:

fixed pay and benefits (Fixed Remuneration); and

variable performance pay (Variable Remuneration).

Variable Remuneration is based on both:

short-term incentives (STI); and

long-term incentives (LTI).

The Company's policy is to position senior executive Fixed Remuneration at the market median and total target direct remuneration (comprising Fixed Remuneration and target Variable Remuneration) at the market 75th percentile, if stretch short and long-term target performance goals are met.

Performance goals for target Variable Remuneration are set with the expectation that the Company will deliver results in the top quartile of its listed, US peer group companies. Performance below this level will result in Variable Remuneration payments below target (and potentially zero for poor performance). Performance above this level will result in Variable Remuneration payments above target.

Table of Contents

1.3 Setting Remuneration Packages

Remuneration decisions are based on the executive remuneration framework described in this Remuneration Report. The Remuneration Committee reviews and the Board approves this framework each year.

Each year the Remuneration Committee reviews and approves a list of peer group companies which it uses for comparative purposes in setting remuneration for senior executives. As the Company's main business and all of its senior executives are in the US, the peer group comprises US listed companies exposed to the US housing market. This same peer group is also used to determine relative performance for the year's LTI equity grants. The names of the 25 companies comprising this peer group are provided in section 8 of this Remuneration Report.

Remuneration packages for senior executives are evaluated each year to make sure that they continue to align with the Company's philosophy, are competitive with their US peer group, and are competitive with developments in the market. In making decisions regarding individual senior executives, the Remuneration Committee takes into account:

the senior executive's responsibilities and performance; and

the results of an annual remuneration positioning review provided by the Remuneration Committee's independent advisor.

All aspects of the remuneration package for the CEO and CFO are determined by the Remuneration Committee and ratified by the Board. All aspects of the remuneration package for the remaining senior executives are determined by the Remuneration Committee on the recommendation of the CEO.

1.4 Senior Executives in fiscal year 2014

The Company's senior executives in fiscal year 2014 were:

Louis Gries, Chief Executive Officer

Matthew Marsh, Chief Financial Officer

Mark Fisher, Executive General Manager – International

Ryan Sullivan, Executive General Manager – South

Sean Gadd, Executive General Manager – North

Russell Chenu, Chief Financial Officer, was a senior executive until he retired from the Company on 29 November 2013.

The executive remuneration framework described in this report also applies to the remaining members of the James Hardie Management Team (JHMT), who work with the senior executives to manage the US business.

Table of Contents

2. FISCAL YEAR 2014 COMPANY PERFORMANCE AND LINK WITH REMUNERATION POLICY

2.1 Actual Performance

The Company's five-year EBIT and net income, and five-year A\$ total shareholder return (including dividends and capital returns) mapped against changes in US housing starts are shown in the graphs below:

EBIT¹

(Millions of US dollars)

Net Income²

(Millions of US dollars)

¹ Excludes asbestos, asset impairments, ASIC expenses and New Zealand product liability expenses

² Excludes asbestos, asset impairments, ASIC expenses, New Zealand product liability expenses and tax adjustments

JHX Total Return Index vs US Housing Starts

Readers are referred to Section 4, "Glossary of Abbreviations and Definitions" which includes the reconciliation of EBIT excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability and Net Income excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability to the respective US GAAP equivalent measurements.

2.2 Market Conditions and Company Performance

Operating conditions in the US residential housing market improved during fiscal year 2014. According to the US Census Bureau, single family housing starts, which are one of the key drivers of the Company's performance, were 615,400 for fiscal year 2014, 9% above the prior year. In addition, industry data indicates gains in both single-family and multi-family production.

Overall group operating earnings for fiscal year 2014 increased significantly compared to the prior year, reflecting stronger performance by our USA and Europe Fibre Cement segment and our Asia Pacific Fibre Cement segment. The US and Europe improvement was largely due to improved conditions in the US housing market and higher average net sales price, partially offset by higher production costs and SG&A. The Asia Pacific segment improvement was largely due to increased average net sales price and a reduction in costs achieved in economies of scale, partially offset by depreciation in the exchange rates.

Table of Contents

The Company expects that the improvement in the US operating environment reflects a sustainable recovery in the US housing market, although the recovery is expected to occur over a protracted period. In anticipation of the ongoing recovery, during the year the Company funded capacity expansions and initiatives to support market and organisational development in the US.

2.3 Performance Linkage with Remuneration Policy

The Company sets performance goals and Variable Remuneration in the expectation that the Company will perform at or above a level equivalent to the 75th percentile of the Company's peer group. This approach supports the Company's growth aspirations and provides appropriate alignment with shareholders.

During its annual review, the Remuneration Committee assessed the Company's performance in fiscal year 2014 against the background of the gradual recovery in the US and Asia Pacific markets. This review included reviewing fiscal year 2014 performance against:

the Company's historical performance;

the Company's peer group;

the goals in the Company's STI and LTI Variable Remuneration plans; and

the Scorecard, or key objectives and measures the Board expects to see achieved (the Scorecard).

Based on that review, the Board and Remuneration Committee concluded that management's performance in fiscal year 2014 was:

above target and fiscal year 2013 on earnings and growth measures, resulting in STI Variable Remuneration outcomes being substantially above both target for fiscal year 2014 and amounts paid for fiscal year 2013; and

superior to the 75th percentile of its peer group of companies on long-term measures (when taken together with performance in fiscal years 2012 and 2013), such as those set out in the Scorecard, resulting in LTI Variable Remuneration being above target for fiscal years 2012-2014.

More details about this assessment, including the percentage of the maximum Variable Remuneration awarded to or forfeited by senior executives is set out in Section 3 of this Remuneration Report below.

3. DESCRIPTION OF COMPANY'S REMUNERATION ARRANGEMENTS

This section describes the Company's remuneration arrangements applicable during fiscal year 2014.

3.1 Overview of Fixed Remuneration

Fixed remuneration consists of base salaries, non-cash benefits, participation in a defined contribution retirement plan and superannuation contributions.

3.1.1 Base Salaries

Base salary provides a guaranteed level of income that recognises the market value of the position and internal equities between roles, and the individual's capability, experience and performance. Base

Table of Contents

salaries for senior executives are positioned around the market median for positions of similar responsibility. Base salaries are reviewed by the Remuneration Committee each year, although increases are not automatic.

3.1.2 Non-Cash Benefits

James Hardie's executives may receive non-cash benefits such as a cost of living allowance, medical and life insurance benefits, car allowances, membership of executive wellness programs and an annual financial planning allowance.

3.1.3 Retirement Plan/Superannuation

In every country in which it operates, the Company offers employees access to pension, superannuation or individual retirement savings plans consistent with the laws of the respective country.

We sponsor a US defined contribution plan, the James Hardie Retirement and Profit Sharing Plan, for our employees in the United States and a defined benefit pension plan, the James Hardie Australia Superannuation Plan, for our employees in Australia. The US defined contribution plan is a tax-qualified retirement and savings plan (401(k) Plan) covering all US employees, subject to certain eligibility requirements. Participating employees may elect to reduce their current annual compensation by up to US\$17,500 in calendar year 2014 and have the amount of such reduction contributed to the 401(k) Plan, with a maximum eligible compensation limit of US\$260,000. In addition, we match employee contributions dollar for dollar up to a maximum of the first 6% of an employee's eligible compensation.

The James Hardie Australia Superannuation Plan is funded based on statutory requirements in Australia and is based primarily on the contributions and income derived thereon held by the plan on behalf of the member, and to a lesser degree, on the participants' eligible compensation and years of credited service. Under Australian law, employees do not have to belong to their employer's superannuation fund.

3.2 Overview of Variable Remuneration

The Company's Variable Remuneration incentive plans for senior executives in fiscal year 2014 were:

Duration	Plan Name	Amount	Form Incentive Paid
Short-term (1 year)	Individual Performance Plan (IP Plan)	20% of STI Target	Cash
	Company Performance Plan (CP Plan)	80% of STI Target	Cash
Long-term (3-4.5 years)	Long Term Incentive Plan (LTIP)	40% of LTI Target	Return on Capital Employed (ROCE)
		30% of LTI Target	Restricted Stock Units (RSUs)
		30% of LTI Target	Relative Total Shareholder Return (TSR) RSUs Cash (Scorecard LTI)

Table of Contents

¹ Previously referred to as Executive Incentive Plan (EIP Plan).

3.3 Short-Term Incentive Variable Remuneration**3.3.1 Overview of Short-Term Incentives**

Each year, the Remuneration Committee approves a STI target for all senior executives, which is expressed as a percentage of base salary. The STI target is allocated between company goals (under the CP Plan) and individual goals (under the IP Plan). The STI targets for senior executives in fiscal year 2014 were as follows:

Position	STI target as % of base salary	% of STI target allocated to corporate goals	% of STI target allocated to individual goals
Chief Executive Officer	125%	80%	20%
Chief Financial Officer (Marsh)	60%	80%	20%
Chief Financial Officer (Chenu) ²	33%	0%	100%
Other senior executives	60%	80%	20%

² Retired 29 November 2013.

From fiscal year 2014, the Remuneration Committee approved the introduction of a circuit breaker which, for JHMT members, will prevent payment of any STI under the CP and IP Plans unless JHI plc's performance exceeds a level approved by the Committee each year. The circuit breaker is set at 60% of FY2014 JHI plc plan EBIT (indexed to housing starts) and is calculated after and therefore excludes all of the items JHI plc customarily excludes from its STI calculations, including costs relating to legacy issues such as ASIC proceedings, NZ weathertightness proceedings and changes to the asbestos liability valuation as well as impairment costs the Committee determines should be disregarded.

3.3.2 Short Term Incentives – Company Performance Plan (CP)

Each year, the Remuneration Committee approves a series of Payout Matrices for the US and Asia Pacific segments which provide a range of possible STI payouts depending on the Company's performance against performance hurdles which assess growth above market (Growth Measure) and earnings (Return Measure).

Each senior executive (other than R. Chenu) can receive between 0% and 300% of their STI target allocated to the CP Plan based on the results of the payout matrix the senior executive is tied to. All senior executives are tied to either the US Payout Matrix or a composite multiple derived from the Payout Matrices for the US and Asia Pacific segments.

The Company uses two performance hurdles in the Payout Matrices to ensure that as management increases its top line growth focus, it does not do so at the expense of short- to medium-term returns. Management is encouraged to balance growth and earnings returns since achievement of strong rewards requires management to generate both strong earnings and growth above market. Higher returns on one measure at the expense of the other measure may result in a lower reward or no reward at all.

Table of Contents

The Remuneration Committee believes that the STI Plan Payout Matrices are appropriate because they:

provide management with an incentive to achieve overall corporate goals;

balance growth with returns;

recognise the need to flexibly respond to strategic opportunities depending on our markets' ability to recover from the currently prevailing uncertain economic environment;

incorporate indexing for factors beyond management's control; and

incorporate Remuneration Committee discretion to ensure appropriate outcomes.

Wood-Aesthetic Market Index (WMI)

From fiscal year 2013, the Remuneration Committee determined that the US payout would be adjusted based on the Company's performance against market tracking data from the largest participants in the wood-look products market (collectively, the Wood-Aesthetic Market Index or WMI). In fiscal year 2013 the WMI adjustment was applied to the Growth Measure. The performance requirements for the WMI adjustment remained consistent between fiscal years 2013 and 2014, however for fiscal year 2014, the Remuneration Committee determined the WMI adjustment should instead be applied to the US multiple as determined by the US payout matrix. The WMI adjustment is to be made as follows:

If the Company meets or exceeds the performance of all three WMI participants, 0.2x will be added to the US multiple as determined by the US payout matrix;

If the Company meets or exceeds the performance of two of the three WMI participants, there will be no change to the US multiple as determined by the US payout matrix; and

If the Company fails to meet or exceed the performance of more than one of the three WMI participants, then 0.2x will be subtracted from the US multiple as determined by the US payout matrix.

The purpose of this WMI adjustment is to further focus management on increasing the Company's share of the exterior cladding market at the expense of wood-look competitors, which is one of the Company's key strategies and, if successfully implemented, will create substantial value for shareholders.

Interior Products Business

Beginning in fiscal year 2014, the Remuneration Committee also reserved for itself discretion to increase or decrease the US multiple as determined by the US payout matrix by an additional 0.2x based on the Remuneration Committee's assessment of management's development and implementation of specific plans for the Company's interior products business.

Payout Matrices

To ensure that the Payout Matrices represent genuinely challenging targets aligned with the Company's executive remuneration philosophy, particularly in light of the gradual recovery in the US housing market, the Growth Measure and Return Measure are indexed to take into account changes in the US and Australian new housing starts, the US repair and remodel market and pulp prices. The

Table of Contents

targets for the Return Measure exclude costs related to legacy issues (including the impact of asbestos, ASIC proceedings, certain asset impairment charges and expenses associated with New Zealand weathertightness proceedings) as well as the impact of exchange rate movements on the translation of earnings. The Remuneration Committee has reserved for itself discretion to change the STI paid on the basis of the Payout Matrices. Examples of instances when the Remuneration Committee would consider exercising this discretion include external factors outside of management's control, and for the US CP Plan only, if the general shift toward smaller homes at each segment of the US market is considered sufficiently material. The Remuneration Committee will disclose the reasons for any such exercise of discretion in that year's Remuneration Report.

The Company does not disclose the Growth Measure and Return Measure targets since these are commercial in confidence. However, achieving a target payment for fiscal year 2014 would have required performance in excess of the average of the performance for the previous three years on both the Growth Measure and the Return Measure.

3.3.3 Individual Short Term Incentives – Individual Performance Plan (IP)

Each year, the Remuneration Committee approves a series of one-year STI goals which are used to assess the performance of senior executives. These include one-year achievement towards the three-year Scorecard goals as well as more specific STI one-year goals.

A senior executive can receive between 0% and 150% of their STI target allocated to individual goals under the IP Plan based on the Remuneration Committee's assessment of their contribution towards the Company's achievements on those one-year STI goals.

The Remuneration Committee believes that the IP Plan is appropriate because it links financial rewards to the senior executive's achievement of specific objectives that have benefited the Company and contributed to shareholder value and are not directly captured by the CP component of the STI.

Board and Remuneration Committee assessment of management performance under STI Plans and for Fiscal Year 2014

The Company's results and the subsequent STI payouts for fiscal year 2014 were above STI target and fiscal year 2013 as a result of:

the US business performing significantly above target on the Growth Measure (which requires performance well above market), due to strong category and market share growth;

the US business performing substantially above the Return Measure due to higher volumes, higher average net sales price, and lower organisational costs as a percentage of revenue;

the US business exceeding volume growth of the other fibre cement manufacturers, vinyl and engineered wood, resulting in the activation of a 0.2x exterior kicker to the US multiple as determined by the US payout matrix;

Asia Pacific performing slightly below target on the Growth Measure, due to the Australia business achieving growth above its target offset by the New Zealand and Philippines businesses achieving growth below their respective targets; and

Asia Pacific performing above target on the Return Measure, due to higher returns in Australia and New Zealand, slightly offset by the lower returns in the Philippines business.

Table of Contents

The percentage of the maximum STI Variable Remuneration awarded to or forfeited by senior executives for (individual and corporate) performance in fiscal year 2014 compared to fiscal year 2013 was:

	Cash STI ¹	
	Awarded	Forfeited
	%	%
<i>L Gries</i>		
Fiscal Year 2014	88	12
Fiscal Year 2013	20	80
<i>M Marsh</i>		
Fiscal Year 2014	88	12
Fiscal Year 2013	N/A	N/A
<i>R Chenu²</i>		
Fiscal Year 2014	67	33
Fiscal Year 2013	75	25
<i>M Fisher</i>		
Fiscal Year 2014	87	13
Fiscal Year 2013	22	78
<i>R Sullivan</i>		
Fiscal Year 2014	99	1
Fiscal Year 2013	29	71
<i>S Gadd</i>		
Fiscal Year 2014	95	5
Fiscal Year 2013	29	71

¹ **Awarded** = % of fiscal year 2013 or 2014 Cash STI maximum actually paid. **Forfeited** = % of fiscal year 2013 or 2014 Cash STI maximum foregone. STI amounts were paid in cash under the CP and IP Plans.

² % of fiscal year 2014 cash STI forfeited for R Chenu is due to his departure from the Company rather than a reduction related to performance.

3.4 Description of LTI Variable Remuneration**3.4.1 Overview of Long-Term Incentives**

Each year, the Remuneration Committee approves a LTI target for all senior executives. The LTI target is allocated between three separate components to ensure that senior executive performance is assessed based on a wide range of factors:

40% to ROCE RSUs – an indicator of growth in the value of the Company's capital efficiency over time;

30% to Relative TSR RSUs – an indicator of the Company's performance relative to its US peers; and

30% to Scorecard LTI – an indicator of each senior executive's contribution to the Company achieving its long-term strategic goals.

Table of Contents

The LTI target amounts for the senior executives in fiscal year 2014 were:

Position	LTI target
Chief Executive Officer	US\$ 3.1 million
Other senior executives	US\$ 250,000-US\$350,000

3.4.2 ROCE RSUs (40% of target LTI)

The Remuneration Committee introduced ROCE RSUs in fiscal year 2013 because the US housing market had stabilised to an extent which permitted the setting of multi-year financial metrics. The Remuneration Committee believes ROCE RSUs are an appropriate component of the LTI Plan because they:

allow the Remuneration Committee to replace the interim one-year metrics previously used during the US housing downturn with three-year financial metrics;

tie the reward's value to share price which provides alignment with shareholder interests;

ensure that the Company earns appropriate returns on the additional capital it spends in response to the improvement in the US housing market; and

allow the Remuneration Committee to disregard items impacting ROCE (both positive and negative) where those items are beyond management's direct influence and control.

In addition, a continuation of the Company's strong ROCE performance will create shareholder value.

Consistent with fiscal year 2013, the maximum payout for the ROCE RSUs is 200% of target LTI. Given the increase in ROCE targets and the existence of negative discretion for the Remuneration Committee based on the quality of the returns balanced against management's delivery of market share growth and performance against the Scorecard, the Remuneration Committee expects that vesting of ROCE RSUs is unlikely to be higher than target (i.e. 50% vesting) in most years.

ROCE is determined by dividing EBIT by Capital Employed.

EBIT will be as reported in the Company's financial results, adjusted by:

deducting the earnings impact of legacy issues (such as asbestos adjustments, including foreign exchange impact on the Company's asbestos provision, New Zealand weathertightness expenses and ASIC expenses);

deducting leasehold expenses, since potential upcoming changes in international accounting standards could cause significant volatility in this component; and

adding back asset impairment charges in the relevant period, unless otherwise determined by the Remuneration Committee. Since management's performance will be assessed on the pre-impairment value of the Company's assets, the Remuneration Committee would not normally deduct the impact of any asset impairments from the Company's EBIT for the purposes of measuring ROCE performance.

Edgar Filing: James Hardie Industries plc - Form 20-F

The earnings component of ROCE performance targets are predicated on assumptions in market growth. Market growth in our primary markets has two main components independent third party sourced data for new housing starts, and an independent third party data sourced index for the Repair

Table of Contents

and Remodel (R&R) market. The two main components are blended for an index of market growth. The corresponding earnings component of ROCE performance targets may then be adjusted for the market growth index if they vary from the original assumptions of market growth. Additionally, Board discretion may also be applied to adjust index outcomes for factors such as external assessments of James Hardie product category market share changes.

Capital Employed will start with net working capital and fixed assets (net of accumulated depreciation), which already excludes legacy issue-related items such as asbestos-related assets and liabilities, as reported in the Company's financial results, adjusted by:

adding back asset impairment charges in the relevant period, unless otherwise determined by the Remuneration Committee, in order to align the Capital Employed with the determination of EBIT;

adding back leasehold assets for manufacturing facilities and other material leased assets, which the Remuneration Committee believes give a more complete measure of the Company's capital base employed in income generation; and

deducting all greenfield construction-in-progress, and any brownfield construction-in-progress projects involving capacity expansion that are individually greater than US\$20 million, until such assets reach commercial production and are transferred to the fixed asset register, in order to encourage management to invest in capital expenditure projects that are aligned with the long-term interests of the Company.

The resulting Capital Employed for each quarter of any fiscal year will be averaged to better reflect Capital Employed through a year rather than at a certain point in time.

ROCE goals for the ROCE RSUs are based on historical results and take into account the expected and forecasted impact of the recovery in the US housing market on EBIT and Capital Employed. Achievement in order to receive awards at LTI target (i.e. 50% vesting) will require improvement on the average of the performance of the Company for fiscal years 2011 to 2013 (after indexing for market improvements). The ROCE result in fiscal years 2013 and 2014 was 17.8% and 25.5%, respectively.

The goals for ROCE RSUs granted in fiscal year 2014 (for performance in fiscal years 2014 to 2016) were increased from the goals for ROCE RSUs granted in fiscal year 2013 as follows:

Fiscal Years 2014-2016	Fiscal Years 2013-2015	% of ROCE RSUs
ROCE	ROCE	to vest
< 19.5%	< 18.5%	0%
³ 19.5%, but < 21.0%	³ 18.5%, but < 19.5%	25%
³ 21.0%, but < 22.5%	³ 19.5%, but < 20.5%	50%
³ 22.5%, but < 24.0%	³ 20.5%, but < 21.5%	75%
³ 24.0%	³ 21.5%	100%

At the conclusion of this three-year performance period, the Remuneration Committee will review management's performance based on the quality of the returns balanced against management's delivery of market share growth and performance against the Scorecard. Following this review, the Remuneration Committee can exercise negative discretion to reduce the number of shares received following vesting of the ROCE RSUs. This discretion can only be applied to reduce the number of shares which will vest.

Table of Contents

3.4.3 Relative TSR RSUs (30% of target LTI)

The Remuneration Committee believes that Relative TSR RSUs are an appropriate component of the LTI Plan because they provide alignment with shareholders – even if macro conditions create substantial shareholder value, senior executives will only receive payouts if the total shareholder return of the Company’s shares exceeds a specified percentage of the Company’s peer group over a performance period.

The Company has used Relative TSR RSUs in its LTI Plan since fiscal year 2009. The Remuneration Committee made the following changes to the Relative TSR RSUs in fiscal year 2014 to bring this component of the LTI plan more in-line with typical plans seen in Australia and the United States:

decreased the number of re-tests from four to three; and

modified the payout threshold to commence at 25% rather than 0% for performance at the 40th percentile.

Total shareholder return measures changes in the share price of the Company and its peer group and assumes all dividends and capital returns are reinvested when paid.

The peer group for Relative TSR RSUs is unchanged from fiscal year 2013 and consists of the same peer group of companies exposed to the US housing market which the Company uses for compensation benchmarking purposes. The Remuneration Committee believes that US companies form a more appropriate peer group than ASX-listed companies as they are exposed to the same macro factors in the US housing market as those faced by the Company. The names of the 25 companies comprising the peer group for each grant of Relative TSR RSUs are set out in section 8 of this Remuneration Report.

The Company’s relative TSR performance will be measured against the peer group over a 36 to 54 month period from grant date, with testing after the 36th month, and then every six months until the end of the 54 month period. To eliminate the impact of short-term price changes, the starting point and each test date are measured using an average 20-day closing price.

Relative TSR RSUs will vest based on the following straight-line schedule:

Performance against Peer Group	% of Relative TSR RSUs vested
<40 th Percentile	0%
40 th – 80 th Percentile	Sliding Scale starting at 25%
80 th Percentile	100%

The Remuneration Committee will continue to monitor the design of the Relative TSR RSU component of the LTI plan for senior executives with the aim of balancing investor preferences with the ability to motivate senior executives.

Table of Contents

3.4.4 Scorecard LTI (30% of target LTI)

The Remuneration Committee believes that the Scorecard LTI is an appropriate component of its LTI Plan because it:

allows the Remuneration Committee to set targets for and reward executives on a balance of longer-term financial, strategic, business, customer and organisational development goals which it believes are important contributors to long-term creation of shareholder value;

ties the reward's value to the Company's share price over the medium-term; and

allows flexibility to apply rewards across different countries, while providing executives with liquidity to pay tax or other material commitments at a time that coincides with vesting of shares (via the other components of the LTI Plan) as payment is in cash.

The Company has used Scorecard LTI in its LTI Plan since fiscal year 2010. Each year, the Remuneration Committee approves a number of key management objectives, including objectives for individual senior executives, and the measures it expects to see achieved in relation to these objectives. These objectives are incorporated into that year's grant of Scorecard LTI. The Remuneration Committee monitors progress against the Scorecard twice each year. At the end of the three-year period, the Remuneration Committee assesses the Company's performance on each key objective and each individual senior executive's contribution to those achievements (with scores between 0 and 100) (and the Board reviews that assessment). Senior executives may receive different ratings depending on the contribution they have made during the three-year period. Although most of the objectives in the Scorecard have quantitative targets, the Company considers some of the targets to be commercial-in-confidence.

No specific weighting is applied to any single objective and the final Scorecard assessment reflects an element of judgment by the Board. The Scorecard can only be applied by the Board to exercise negative discretion (i.e., to reduce the amount of Scorecard LTI that will ultimately vest). It cannot be applied to enhance the maximum reward that can be received.

The amount received by senior executives is based on both the Company's share price performance over the three years from the grant date and the senior executive's Scorecard rating. At the start of the three-year performance period, the Company will calculate the number of shares the senior executives could have acquired if they received a maximum payout on the Scorecard LTI at that time (based on a 20 working day closing average). Depending on the senior executive's rating (between 0 and 100), between 0% and 100% of the senior executive's Scorecard LTI awards will vest at the end of the three-year performance period. Each senior executive will receive a cash payment based on the Company's share price at the end of the period (based on a 20 working day closing average) multiplied by the number of shares they could have acquired at the start of the performance period, adjusted downward in accordance with their Scorecard rating.

Further details related to the Scorecard for fiscal year 2014, including the method of measurement, historical performance against the proposed measures and the Board's expectations, were previously set out in the 2013 AGM Notice of Meeting. An assessment of the Company's Scorecard performance for fiscal years 2012-2014 is set out below. The Company will provide an explanation of the final assessment of performance under the Scorecard for fiscal years 2014-2016 at the conclusion of fiscal year 2016.

Table of Contents

Board and Remuneration Committee assessment of management performance under Scorecard LTI for Fiscal Years 2012-2014

The Remuneration Committee’s review of the Company’s performance over fiscal years 2012-2014 against the Scorecard objectives, and the contribution of individual senior executives, resulted in senior executives receiving an average Scorecard rating of 63% (from a range of 55% to 75%).

The Remuneration Committee’s assessment of the Company’s performance over the fiscal years 2012-2014 based on the Scorecard objectives as determined in mid-2011 is:

Measure	Performance over period	Board Requirement Minimum:	Reasons	Assessment of Management’s Performance
US Primary Demand	FY14: 9.6%	Maintain relative to exterior market	A key strategy for the company is to maximise its market share growth/retention of the exterior cladding market for new housing starts and for Repair & Remodel, which it does by growing fibre cement’s share of the exterior cladding market and by maintaining the company’s share of the fibre cement category.	Growth above stretch target achieved over three year period.
Growth (PDG)	FY13: 6.8%	Stretch: Primary demand growth relative to market		
US Product Mix Shift	FY12: 10.6% ¹ ColorPlus and Artisan penetration flattened out.	Board Minimum: 5% annual improvement in penetration of ColorPlus and Artisan products Stretch: 10% annual improvement in penetration of ColorPlus and Artisan products	The company aims to maintain its leadership position across the fibre cement category of the exterior cladding market by developing new products/marketing/ manufacturing approaches that will result in an improved mix of our products and gross margins.	While improvement flattened over the three-year period, ColorPlus profitability has improved.

¹ Figure restated to reflect updated methodology calculation.

Table of Contents

Measure	Performance over period	Board Requirement	Reasons	Assessment of Management's Performance
Manufacturing	Product and process efficiency improvement over the three year period, material yield remained flat.	Improvement in product and process efficiency and material yield metrics will be reviewed to confirm manufacturing performance and progress is effectively supporting the product leadership strategy.	As our differentiated product position continues to increase, this initiative will be critical to delivering future growth and optimising returns.	The organisation has successfully shifted the business back to an effective high utilisation model.
Reset				
Safety	FY14: 1.33 23.43	No fatalities	Safety of Company employees is an essential ESG measure.	Organisation progressing towards zero harm. Results below 2 IR and 20 SR are now expected.
	FY13: 1.57 28.9	Stretch: 2.0 Incident Rate (IR) and 20 Severity Rate (SR) ²		
Strategic Positioning	FY12: 1.46 18.1 Significant progress with acquisition of fibreglass window assembly assets and organic growth in Europe with expanded product portfolio.	It is not possible to set a specific goal for this measure. However, the Board expects that management will continue to diversify products and geographies to provide more balance with a view towards greater future profit growth opportunities.	Developing and, as appropriate, implementing, alternative strategic actions for sustainable growth beyond the Company's traditional markets will create shareholder value through increased profits and diversification for lower risk.	Fibreglass windows continues to evolve with manufacturing operations running and market work beginning.
Legacy Issues	All major legacy issues known to exist in FY12 concluded.	Minimum: Resolve or address the Dutch domicile and make substantial progress on others	Resolution of these issues is a fundamental component of the Company's ESG goals, paving the way to lower risk and more certainty for all stakeholders.	Performance met stretch goals. All major legacy issues concluded, largely in the Company's favour.
		Stretch: Resolve or address all legacy issues		

² James Hardie considers only the hours of manufacturing facility employees to determine the IR as these employees have the highest safety risk within the organisation. This methodology yields a higher IR than if James Hardie included all of its employees in the calculation in a manner similar to that of other manufacturing companies. In addition, James Hardie does not consider the employee to have returned to work until s/he has returned to their original position and not on a restricted work basis. This methodology yields a higher SR than if James Hardie considered the employee to have returned to work when they were brought back on restricted work basis.

Table of Contents

Measure	Performance over period	Board Requirement	Reasons	Assessment of Management's Performance
Managing	Good result from both a market share and profitability perspective.	Maintain an adequate capital structure.	With the US building materials industry experiencing a downturn unprecedented in the past 60 years, managing the Company through this time so it can emerge at the end of this period in as strong or stronger competitive position in the overall industry is crucial.	Successful progress on capital structure and refinancing.
During the Economic Crisis				
Talent Management/Development	The Company continues to have a strong management team.	It is not possible to set a specific goal for this measure beyond requiring that management capability be retained and grown.	Improving management development and capability is important to the Company's future growth.	Significant improvements in fiscal years 2013 and 2014 offset inadequate outcomes in fiscal year 2012.

3.4.5 Historical performance- Hybrid RSUs

As part of the fiscal year 2012 LTI plan, the Company granted Hybrid RSUs to senior executives. These Hybrid RSUs were granted in June 2012 on the basis of management's performance against EBIT goals in fiscal year 2012. During June 2014, these Hybrid RSUs, which were treated as STI transferred to LTI, vested.

Board and Remuneration Committee assessment of management performance under Hybrid RSU for Fiscal Years 2012-2014

The Remuneration Committee reserved to itself the discretion to review fiscal year 2012 performance with the benefit of another two years trading and assess whether those results were obtained at the expense of long term sustainability. Senior executives were granted 214,356 Hybrid RSUs. For those tied to corporate level EBIT performance, this grant was equivalent to 98% of target (and 32.7% of maximum) Variable Remuneration allocated to the Hybrid RSUs. For those tied to US level EBIT performance, this grant was equivalent to 112% of target (and 37.3% of maximum) Variable Remuneration allocated to the Hybrid RSUs. The Remuneration Committee reviewed the Company's performance in fiscal years 2013 and 2014 as part of the fiscal years 2012-2014 Scorecard LTI assessment, and determined that it would not apply any negative discretion in respect of these grants.

More detailed information on LTI Plans

More detailed information about the Company's LTI plans, including certain information required under applicable US laws, is set out in section 8 of this Remuneration Report.

Table of Contents**3.5 Relative Weightings of Fixed and Variable Remuneration in 2014**

The Company's improved performance in fiscal year 2014 was reflected in an increase in the Variable Remuneration paid to senior executives in fiscal year 2014 compared to fiscal year 2013:

	Fixed Remuneration ¹		Variable Remuneration ³			Total Variable%

¹ Represents annual SG&A expense for Scorecard LTI granted in September 2013. The fair value of each award is adjusted for changes in the Company's common stock price at each balance sheet date until the final Scorecard rating is applied in September 2016, at which time the final value is based on the Company's share price and the senior executive's Scorecard rating at the time of vesting.

² Represents annual SG&A expense for the ROCE RSUs granted in September 2013. The fair value of each RSU is adjusted for changes in the Company's common stock price at each balance sheet date until the Remuneration Committee exercises negative discretion and some, all or none of the awards become vested in September 2016.

³ Represents annual SG&A expense for the Relative TSR RSUs granted in September 2013 with fair market value estimated using the Monte Carlo option-pricing method.

⁴ R Chenu retired 29 November 2013 and did not receive any equity award grants in fiscal year 2014.

4. CHANGES TO REMUNERATION FOR FISCAL YEAR 2015**4.1 Overview of Remuneration for Fiscal Year 2015**

The Board and the Remuneration Committee review the Company's existing remuneration arrangements each year.

CEO Compensation

There will be no increases in the CEO's base salary or target STI. The CEO's target LTI will increase by US\$400,000 to US\$3.5 million in fiscal year 2015. The Board believes this adjustment is required to bring the CEO's total compensation package more in line with the total compensation packages of CEO's in the Company's peer group.

Table of Contents

Other Senior Executive s Compensation

Base pay and target LTI increases in fiscal year 2015 for other senior executives are as follows:

Name	Base Salary		Target LTI	
	Fiscal Year 2014	Fiscal Year 2015	Fiscal Year 2014	Fiscal Year 2015
M Marsh	\$ 480,000	\$ 500,000	\$ 350,000	\$ 500,000
M Fisher	480,000	490,000	350,000	500,000
R Sullivan	330,000	420,000	250,000	500,000
S Gadd	300,000	390,000	250,000	500,000

Base salary increases for M Marsh and M Fisher were made in line with the Company s annual compensation review guidelines and were adjusted as required to maintain positioning relative to market merit increase levels. Base pay increases for R Sullivan and S Gadd were made to properly align base salary pay with the increase in scope and accountability for their respective positions with the shift in management structure during fiscal year 2014 to a three GM structure.

Target LTI for fiscal year 2015 increased for all senior executives to better align the total direct compensation level for each senior executive with the Company s remuneration philosophy and the total direct compensation levels of the Company s peer group.

There were no changes in target STI for senior executives.

STI Variable Compensation Plans

There will be no changes to the Company s STI Variable Compensation plans.

LTI Variable Compensation Plans

The principal changes in the Company s LTI Variable Compensation plan are as follows:

updating the performance hurdles required to achieve vesting of the ROCE RSUs;

eliminating the first of three re-tests for the Relative TSR RSUs. The Company s relative TSR performance will be measured against the peer group over a 36 to 54 month period from grant date, with testing after the 36th month, 48th month and at the end of the 54 month period. The Remuneration Committee will continue to monitor the appropriate number of re-tests each year; and

updating the Scorecard objectives for fiscal year 2015.

The 2014 AGM Notice of Meeting contains further details on the ROCE RSU and Relative TSR RSU grants for fiscal year 2015. Changes to ROCE performance hurdles and Scorecard objectives for fiscal year 2015 are set forth in the following section.

Table of Contents**4.2 Changes to LTI Variable Compensation for Fiscal Year 2015**

4.2.1 ROCE RSUs

The goals for ROCE RSUs to be granted in fiscal year 2015 (for performance in fiscal years 2015 to 2017) were increased from the goals for ROCE RSUs granted in fiscal year 2014 as follows:

Fiscal Years 2015-2017	Fiscal Years 2014-2016	% of ROCE RSUs to vest
ROCE	ROCE	
< 22.0%	< 19.5%	0%
³ 22.0%, but < 24.5%	³ 19.5%, but < 21.0%	25%
³ 24.5%, but < 27.0%	³ 21.0%, but < 22.5%	50%
³ 27.0%, but < 28.5%	³ 22.5%, but < 24.0%	75%
³ 28.5%	³ 24.0%	100%

For fiscal year 2015, the Board has both increased the ROCE performance level at which vesting commences and broadened the ROCE performance hurdles for vesting between 0%-25% and 25%-50%, thereby making it more difficult to achieve at-target vesting. The Board believes this increase in performance hurdles is appropriate given the recovering housing market in the US.

4.2.2 Scorecard LTI

The Remuneration Committee uses the Scorecard to set strategic objectives for which performance can only be assessed over a period of time. These objectives change from year to year in line with the Company's strategic priorities. For fiscal year 2015, the Remuneration Committee has made a number of changes to the Scorecard. These changes include:

adding three new goals relating to customer experience, defending market share and trim market strategy implementation;

renaming one goal relating to manufacturing capacity and efficiency to better reflect organisational targets over the next three years;

broadening the focus of the capacity expansion goal from Australia only to global; and

removing the legacy issues goal as all major legacy issues have been concluded.

Table of Contents

The goals included in the scorecard for fiscal year 2015 are set forth below:

Goal	Importance	Measurement	Board Expectation
Grow exterior cladding market share and maintain category share in the US business	A key strategy for the Company is to maximise its market share growth/retention of the exterior cladding market for new housing starts and for Repair and Remodel markets.	PDG performance of the Company's exterior cladding compared to underlying market (in square feet).	PDG growth above market. Outperformance against key competition.
Build US organisational and leadership capability in support of the 35/90 growth target	The amount of growth that 35/90 entails requires lower turnover levels and an increase in management depth and organisational capability.	A range of factors including the rate of salaried voluntary turnover, survey results of overall satisfaction, execution of programs to build organisational capability and bench strength for key roles and measure of readiness.	Satisfactory progress on turnover, engagement initiatives and programs to build organisational capability build demonstrated by greater bench strength of high performing managers.
Manufacturing effectiveness and sourcing efficiency	The Company operates a national US network of manufacturing facilities.	First pass quality and service, as well as sheet machine product and process efficiency metrics for sheet machines.	Commercial in confidence targets will be reviewed to confirm progress is supporting the Company's product leadership strategy.
Safety	The safety of all employees is an essential objective of the Company.	<p>Manufacturing performance data is commercial in confidence.</p> <p>Incident Rate (IR): Recordable incidents per 200,000 hours worked</p> <p>Severity Rate (SR):</p> <p>Days lost per 200,000 hours worked</p>	<p>Zero fatalities.</p> <p>IR: 2.0 or below and SR: 20.0 or below.</p>

Table of Contents

Goal	Importance	Measurement	Board Expectation
Maintain market position on core products in Australian and New Zealand Markets and grow Scyon to greater proportion of Australian business	Value creating opportunity.	Category share and primary demand growth. Scyon growth will be based on % net sales revenue against total for Australia.	Grow category share on core Australian and New Zealand products. Grow PDG in Australia and New Zealand.
Global capacity expansion	Expansion to support expected growth over the next 20 years.	Approval, construction and start-up of capacity adds.	Achieve growth in Scyon percentage of Australian Business. Completion of building construction, equipment installation and start up at identified sites.
Strategic positioning	Developing sustainable growth beyond the company's traditional markets may create shareholder value through increased profits and diversification for lower risk.	This measure is subjective and achievement can take many different forms, including developing new technologies, expanding into new product categories, or expanding geographically.	Progress against this goal will be reviewed to ensure any progress is supporting the Company's position in the marketplace.
Customer experience	Necessary to support the Company's 35/90 strategy.	Map the current customer experience and identify needs and barriers throughout the experience (for different customer types). Develop strategies to address gaps identified.	Demonstrated improvement in the customer experience based on measures set up in FY15.
Defend market share position against key wood-look competitor	Necessary to support the Company's 35/90 strategy.	The Company's exterior performance relative to key wood-look competitor in specific markets	Outgrow key wood-look competitors in specific markets in the aggregate measured on a calendar year basis.
Trim market strategy implementation	Developing sustainable growth beyond the company's traditional products.	Current market position is commercial in confidence. This measure is subjective and achievement can take many different forms, including developing new technologies, expanding into new product categories, or expanding geographically.	Commercial in confidence targets will be reviewed to confirm progress is supporting the Company's trim market strategy.

¹ L Gries base pay includes US\$155,818 and US\$149,058 in fiscal years 2014 and 2013, respectively, for his services on the JHI plc Board. For fiscal year 2013, Other compensation includes a charge to recognise gross-up and tax paid on equity vested during fiscal years 2013 for which a portion of the vesting period was while L Gries was seconded to The Netherlands.

² Includes STI amounts (paid in cash) under the CP and IP Plans. Fiscal year 2013 includes over/under accruals from fiscal year 2012. Fiscal year 2014 is actual bonus to be paid in June 2014. Per the CP and IP Plans, the cash payments for each fiscal year are paid in June following the end of the fiscal year.

³ Includes the aggregate amount of all noncash benefits received by the executive in the year indicated. Examples of noncash benefits that may be received by executives include medical and life insurance benefits, car allowances, membership in executive wellness programs, financial planning and tax services.

Edgar Filing: James Hardie Industries plc - Form 20-F

- 4 Includes equity award expense for grants of Scorecard LTI awards, Relative TSR RSUs, ROCE RSUs and Hybrid RSUs. Relative TSR RSUs are valued using Monte Carlo simulation method. Hybrid RSUs, ROCE RSUs and Scorecard LTI awards are valued based on the Company's share price at each balance date as well as the Remuneration Committee's current expectation of the percentage of the RSUs or awards which will vest. The fair value of equity awards granted are included in compensation during the period in which the equity awards vest. For Hybrid RSUs, ROCE RSUs and Scorecard LTI awards, this amount excludes the equity award expense in fiscal years 2014 and 2013 resulting from changes in the Company's share price, which is disclosed separately in the Equity Awards' Mark-to-Market' column.

Table of Contents

⁵ The amount included in this column is the equity award expense in relation to Hybrid RSUs, ROCE RSUs and Scorecard LTI resulting solely from changes in the US dollar share price during fiscal years 2014 and 2013. During fiscal year 2014, there was a 29.5% appreciation in the Company's share price from US\$10.20 to US\$13.21.

⁶ Commenced employment 24 June 2013. Upon hire, received cash in the amount of US\$288,666 which is included in the Other compensation column as well as a one-time grant of time-vested RSUs as compensation for foregone compensation and benefits at his prior employer. These RSUs were granted 16 September 2013 and are scheduled to cliff vest on the third anniversary of the grant date. The equity award expense for these time-vested RSUs is included in the Ongoing Vesting column.

⁷ Retired from the Company on 29 November 2013. Ongoing equity award expense reflects awards not lapsed or forfeited following retirement. R Chenu did not receive any equity award grants in fiscal year 2014.

Edgar Filing: James Hardie Industries plc - Form 20-F

- 1 Total Value at Grant = Weighted Average Fair Value per right multiplied by number of rights granted.
- 2 Value at Exercise/right = Market Value of a share of the Company's stock price at Exercise less the Exercise price per right.
- 3 Value at Lapse/right = Fair Market Value of a share of the Company's stock at Lapse less the Exercise price per right.

Table of Contents

- 4 Weighted Average Fair Value per right is estimated on the date of grant using the Black-Scholes option-pricing model or Monte Carlo option pricing method, depending on the plan the options were issued under.
- 5 Options granted under the 2001 JHI plc Equity Incentive Plan (2001 Equity Incentive Plan). All options have vested and become exercisable.
- 6 Options granted under the James Hardie Industries LTIP (LTIP). These options are subject to performance hurdles. The holding as of 31 March 2014 represents all options which have vested and become exercisable.
- 7 Relative TSR RSUs granted under the LTIP. These RSUs are subject to performance hurdles and/or application of negative discretion.
- 8 Hybrid RSUs (formerly Executive Incentive Plan RSUs) are granted under the LTIP. These RSUs are subject to application of negative discretion.
- 9 ROCE RSUs are granted under the LTIP and are subject to performance hurdles and/or application of negative discretion.
- 10 All options granted expire 10 years after the grant date.
- 11 Time vested RSUs granted under the 2001 JHI plc Equity Incentive Plan (2001 Equity Incentive Plan).

Table of Contents**5.3 Relevant Interests in JHI plc for Senior Executives**

The Company's LTI plans and stock ownership guidelines (described below) provide a strong level of alignment between senior executives and shareholders. Changes in relevant interests of senior executives in JHI plc securities between 1 April 2013 and 31 March 2014 are set out below:

	CUFS at	CUFS at	Options at	Options at	RSUs at	RSUs at
	1 April 2013	31 March 2014	1 April 2013	31 March 2014	1 April 2013	31 March 2014
<i>L Gries</i>	469,150	471,501	1,453,058	-	2,271,547	2,185,634
<i>M Marsh</i>	-	-	-	-	-	120,959
<i>R Chenu¹</i>	199,884	255,839	317,044	101,000	289,821	156,746
<i>M Fisher</i>	165,221	204,464	376,278	-	275,463	255,295
<i>R Sullivan</i>	-	-	59,600	-	37,044	83,352
<i>S Gadd</i>	17,532	26,049	-	-	51,480	84,964

¹ Retired from the Company on 29 November 2013.

Based on 445,293,092 shares of common stock outstanding at 31 May 2014 (all of which are subject to CHESSE Units of Foreign Securities (CUFS)), no senior executive beneficially owned 1% or more of the outstanding shares of the Company at 31 May 2014. None of the shares held by senior executives have any special voting rights. The only change in the number of CUFS, options or RSUs held by senior executives between 31 March 2014 and 31 May 2014 is for R Chenu who exercised all of his remaining 101,000 options on 29 and 30 May 2014. This brings his holdings of options as at 31 May 2014 to nil.

5.4 Stock Ownership Guidelines

The Remuneration Committee believes that senior executives should hold James Hardie stock to further align their interests with those of the Company's shareholders. The Company has adopted stock ownership guidelines for the CEO, CFO and remaining senior executives, respectively, which require them to accumulate holdings of 3 times, 1.5 times and 1 times their base salary in the Company over a period of five years from the effective date of the guidelines (1 April 2009) or the date the senior executive first becomes subject to the applicable guideline.

During fiscal year 2014, the Company amended the stock ownership guidelines such that the CFO's holding requirement is 1 times base salary.

Until the stock ownership guidelines have been met, a senior executive is required to retain at least 75% of shares obtained under the Company's LTI Plans (net of taxes and other costs). Once a senior executive has met or exceeded the stock ownership guidelines, they are required to retain at least 25% of shares issued under the Company's long-term equity incentive plans through the vesting of RSUs (net of taxes and other costs) for a period of two years (by way of holding lock), after which time those shares can be sold (provided the senior executive remains above the stock ownership guideline).

The CEO's holdings have exceeded the stock ownership guidelines for some years.

Details of the Company's policy regarding employees hedging James Hardie shares or grants under various equity incentive plans are set out in the Insider Trading section of the Corporate Governance Report within this annual report.

Table of Contents

5.5 Loans

The Company did not grant loans to senior executives during fiscal year 2014. There are no loans outstanding to senior executives.

6. EMPLOYMENT CONTRACTS

Remuneration and other terms of employment for the CEO, CFO and senior executives are formalised in employment contracts. The main elements of these contracts are set out below.

6.1 CEO's Employment Contract

Details of the terms of the CEO's employment contract are as follows:

Components	Details
Length of contract	Indefinite. The CEO is an at-will employee.
Base salary	US\$950,000 for fiscal year 2014 and 2015. Salary reviewed annually by the Board and there will be no base salary increase for fiscal year 2015.
Short-term incentive	Annual STI target is 125% of annual base salary for fiscal year 2014 and 2015. The quantum of STI target is reviewed annually by the Remuneration Committee in May.
Long-term incentive	On the approval of shareholders, a LTI incentive will be granted each year. The recommended value of LTI to be granted will be appropriate for this level of executive in the US. For fiscal year 2014, the LTI target was US\$3.1 million. For fiscal year 2015, the LTI target will increase to US\$3.5 million.
Defined Contribution Plan	The CEO may participate in the US 401(k) defined contribution plan up to the annual US Internal Revenue Service (IRS) limit. The Company will match the CEO's contributions into the plan up to the annual IRS limit.
Resignation	The CEO may cease employment with the Company by providing written notice. If the CEO retires after the age of sixty-five, or with the approval of the Board before age sixty-five, then his unvested RSUs and awards will not be forfeited and will be held until the next test date.
Termination by James Hardie	The Company may terminate the CEO's employment for cause or not for cause. If the Company terminates the CEO's employment, not for cause, or the CEO terminates his employment for good reason the Company will pay the following: <ul style="list-style-type: none"> (a) amount equivalent to 1.5 times the CEO's annual base salary at the time of termination; and (b) amount equivalent to 1.5 times the CEO's average STI actually paid in up to the previous three fiscal years as CEO; and (c) continuation of health and medical benefits at the Company's expense for the duration of the consulting agreement referenced below.
Post-termination Consulting	The Company will request the CEO, and the CEO will agree, to consult to the Company upon termination for a minimum of two years, as long as the CEO maintains the Company's non-compete and confidentiality agreements and executes a release of claims following the effective date of termination. Under the consulting agreement, the CEO will receive the annual base salary and annual target incentive in exchange for this consulting and non-compete. Under the terms of equity incentive grants made to the CEO under the LTIP, the CEO's outstanding options will not expire during any post-termination

Table of Contents

Components

Details

consulting period. In addition, in the event of an agreed separation or agreed retirement, his unvested restricted stock units and awards will not be automatically forfeited. This arrangement is a standard arrangement for US executives and the Board considers that it is an appropriate restraint for Mr. Gries given his intimate involvement in developing the Company's fibre cement business in the United States over the past 23 years.

The CEO also receives the Other benefits described in the summary of employment agreements for the senior executives (described below).

6.2 CFO's Employment Contract

Details of the CFO's employment contract are as follows:

Components

Details

Length of contract

Indefinite. The CFO is an at-will employee.

Base salary

US\$480,000 for fiscal year 2014. Salary reviewed annually by the Board and will increase to US\$500,000 for fiscal year 2015.

Short-term incentive

Annual STI target is 60% of annual base salary for fiscal year 2014 and 2015. The quantum of STI target is reviewed annually by the Remuneration Committee in May.

Long-term incentive

The CFO will receive a LTI incentive with performance hurdles each year. The value of LTI to be granted will be approved by the Remuneration Committee. For fiscal year 2014, the LTI target was US\$350,000. For fiscal year 2015, the LTI target will increase to US\$500,000.

As a one-time grant upon hire, the CFO received a grant of time-vested RSUs equivalent to US\$500,000 on 16 September 2013, these RSUs will vest on the third anniversary of the grant date.

Defined Contribution Plan

The CFO may participate in the US 401(k) defined contribution plan up to the annual US Internal Revenue Service (IRS) limit. The Company will match the CFO's contributions into the plan up to the annual IRS limit.

Resignation

As an at-will employee, the CFO is not required to provide any notice of resignation.

Termination by James Hardie

The Company may terminate the CFO's employment for cause or not for cause. If the Company terminates the CFO's employment, not for cause, or the CFO terminates his employment for good reason within the CFO's first two years of employment, the Company will pay the CFO his then Annual Base Salary and Targeted Annual Bonus, less applicable withholding, provided that he signs and complies with (i) a resignation letter resigning from all office and director positions held at the time, and (ii) a general release of all claims in a form acceptable to the Company. No other termination payments are payable, except as required under the terms of the applicable STI or LTI plans.

The CFO also receives the Other benefits described in the summary of employment agreements for the senior executives (described below).

Table of Contents

6.3 Other senior executives employment contracts

Details of employment contracts for senior executives are as follows:

Components	Details
Length of contract	Indefinite. Senior executives are at-will employees.
Base salary	Base salary is subject to Remuneration Committee approval and reviewed annually in May.
Short-term incentive	An annual STI target is set at a percentage of the senior executive's salary. The STI target is 60% and reviewed annually.
Long-term incentive	Senior executives will receive a LTI incentive with performance hurdles each year. The value of LTI to be granted will be approved by the Remuneration Committee.
Defined Contribution Plan	US senior executives may participate in the US 401(k) defined contribution plan up to the annual IRS limit. The Company will match the senior executive's contributions into the plan up to the annual IRS limit.
Resignation	As at-will employees, senior executives are not required to provide any notice of resignation except as required by individual contract.
Termination by James Hardie	The Company may terminate the senior executive's employment for cause or not for cause. Other than the post-termination consulting arrangement discussed below for a termination without cause or a resignation for good reason, no other termination payments are payable, except as required under the terms of the applicable STI or LTI plans.
Post-termination Consulting	Depending on the senior executive's individual contract, and the reasons for termination, the Company may request the senior executive, and the senior executive will agree, to consult to the Company for two years upon termination, as long as they sign and comply with 1) a consulting agreement, which will require them to maintain non-compete and confidentiality obligations to the Company, and 2) a release of claims in a form acceptable to the Company. In exchange for the consulting agreement, the Company shall pay the senior executive's annual base salary as of the termination date for each year of consulting.
Other	<p>Health, Welfare and Vacation Benefits: Eligible to receive all health, welfare and vacation benefits offered to all US employees and also eligible to participate in the Company's Executive Health and Wellness program.</p> <p>Business Expenses: Senior executives are entitled to receive reimbursement for all reasonable and necessary travel and other business expenses incurred or paid in connection with the performance of services under their employment.</p> <p>Automobile: The Company will either lease an automobile for business and personal use by the senior executive, or, in the alternative, the executive will be entitled to an automobile allowance not to exceed US\$850 per month.</p> <p>Financial Planning: The Company will reimburse senior executives for financial planning expenses incurred by the senior executive (including preparation of tax returns) up to a specified sum.</p>

Table of Contents**7. REMUNERATION FOR NON-EXECUTIVE DIRECTORS**

Fees paid to non-executive directors are determined by the Board, with the advice of the Remuneration Committee's independent external remuneration advisers, within the maximum total amount of base and Committee fees approved by shareholders from time to time. The current maximum aggregate base and Committee fee pool of US\$2.0 million per annum was approved by shareholders in 2012. The Company is proposing to seek shareholder approval at the 2014 AGM to increase the maximum aggregate fee pool by US\$300,000 to US\$2.3 million per annum. No additional Board fees are paid to executive Board directors.

7.1 Remuneration Structure

Non-executive directors are paid a base fee for service on the Board. Additional fees are paid to the person occupying the positions of Chairman, Deputy Chairman and Board Committee Chairman and during fiscal year 2014, to one of the directors who served on a number of the Company's subsidiary boards. Non-executive directors will not serve on the Company's subsidiary boards during fiscal year 2015 and consequently no fee will be paid for this service.

During fiscal year 2014, the Remuneration Committee reviewed non-executive directors' fees, using market data and taking into consideration the level of fees paid to chairmen and directors of companies with similar size, complexity of operations and responsibilities, workload requirements and reduction in net of tax remuneration for US domiciled directors as a result of the company's re-domicile from The Netherlands to Ireland. As a result of the review, fiscal year 2014 fees were adjusted to partly compensate US domiciled directors for the reduction in net of tax compensation received as a result of the Company's re-domicile from The Netherlands to Ireland. The Remuneration Committee also recommended an increase in non-executive director fees as set out below for fiscal year 2015. The FY2015 annual fee adjustments include a 4% increase in base fees, a market-based fee adjustment for the N&GC Chair committee chair of \$7,500, and a tax equalisation adjustment fee for the US domiciled chairman, audit committee chair and remuneration committee chair of 27%, collectively.

Position	Fiscal Year	Fiscal Year
	2014 (US\$)	2015 (US\$)
Chairman	\$ 394,779	\$ 462,471
Deputy Chairman	\$ 209,775	\$ 218,145
Board member	\$ 155,818	\$ 162,050
Audit Committee Chair	\$ 40,000	\$ 73,750
Remuneration Committee Chair	\$ 32,500	\$ 73,750
N&GC Committee Chair	\$ 12,500	\$ 20,000
Ad-hoc Board sub-committee attendance	\$ 3,000 ¹	-
Non-executive member of subsidiary boards	Euro 24,000	-

¹ Fee is payable in respect of each ad-hoc Board sub-committee meeting attended. The fee is not payable in respect of standing Board committees. As the focus of the Board is on maintaining the long-term direction and well-being of James Hardie, there is no direct link between non-executive directors' remuneration and the short-term results of the Company.

7.2 Board Accumulation Policy

Non-executive directors are expected to accumulate a minimum of 1.5 times (and two times for the Chairman) their total base remuneration (excluding Board Committee fees) in the Company's shares

Table of Contents

(either personally, in the name of their spouse, or through a personal superannuation or pension plan) over a reasonable time following their appointment. The Remuneration Committee monitors non-executive directors' progress against this policy on a periodic basis.

7.3 Director Retirement Benefits

The Company does not provide any benefits for our non-executive Board directors upon termination of employment.

7.4 Total Remuneration for Non-Executive Directors for the Years Ended 31 March 2014 and 2013

The table below sets out the remuneration for those directors who served on the Board during the fiscal years ended 31 March 2014 and 31 March 2013:

(US dollars)	Primary Directors Fees ¹	Other Payments ²	Other Benefits ³	Total
<i>M Hammes</i>				
Fiscal Year 2014	\$ 394,779	\$ 122,958	\$ 24,762	\$ 542,498

Fiscal Year 2013	\$ 149,058	\$ 0	\$ 0	\$ 149,058
<i>R van der Meer</i>				
Fiscal Year 2014	\$ 155,818	\$ 0	\$ 0	\$ 155,818
Fiscal Year 2013	\$ 149,058	\$ 0	\$ 19,127	\$ 168,185
Total Compensation for Non-Executive Directors				
Fiscal Year 2014	\$ 1,536,830	\$ 284,548	\$ 44,020	\$ 1,865,397
Fiscal Year 2013	\$ 1,508,471	\$ 0	\$ 117,877	\$ 1,626,348

Table of Contents

- ¹ Amount includes base, Chairman, Deputy Chairman, Committee Chairman and service as a non-executive member of certain subsidiary boards.
- ² Amount relates to a one-off payment to partially compensate non-executive directors who have received a reduction in net compensation following the Company's re-domicile from the Netherlands to Ireland. The impact of the re-domicile meant that US based non-executive directors incurred an increased income tax burden since the Irish tax rate is significantly higher than the US tax rate. The Board deferred consideration of a tax equalisation measure for the affected non-executive directors until (i) it fully understood the tax implications for the affected directors, and (ii) there was a clear improvement in the U.S. housing market and business results began to improve.
- ³ Other Benefits includes the cost of non-executive directors' fiscal compliance in Ireland and other costs connected with Board-related events.
- ⁴ Resigned from the Board on 12 August 2013.

7.5 Director Remuneration for the years ended 31 March 2014 and 2013

For Irish reporting purposes, the breakdown of director's remuneration between managerial services (which only relate to L Gries) and director services is:

(In US dollars)	Years Ended 31 March	
	2014	2013
Managerial Services ¹	\$ 11,493,638	\$ 7,702,801
Director Services ²	2,021,215	1,775,406
	\$ 13,514,853	\$ 9,478,207

- ¹ Includes cash payments, non-cash benefits (examples include medical and life insurance benefits, car allowances, membership in executive wellness programs, financial planning and tax services), 401(K) benefits, and amounts expensed for outstanding equity awards for L Gries.
- ² Includes compensation for all non-executive directors, which includes base, Chairman, Deputy Chairman, Committee Chairman and service as a non-executive member of certain subsidiary boards fees and cost of non-employee directors' fiscal compliance in Ireland, other costs connected with Board-related events and a proportion of the CEO's remuneration paid as fees for his service on the JHI plc Board in fiscal years 2014 and 2013.

7.6 Non-Executive Directors' Interests in JHI plc

Non-executive directors' relevant interests in JHI plc securities at 1 April 2013 and 31 March 2014 were:

	Number of Shares/CUFS at 1 April 2013	Number of Shares/CUFS at 31 March 2014
M Hammes ¹	37,847	38,444
D McGauchie ²	20,372	20,372
B Anderson ³	14,805	14,805

Edgar Filing: James Hardie Industries plc - Form 20-F

D Dilger ⁴	25,000	-
D Harrison ⁵	12,384	14,934
A Littlely ⁶	-	-
James Osborne	2,551	2,551
Rudy van der Meer	17,290	17,290

¹ 29,444 ordinary shares/CUFS held in the name of Mr and Mrs Hammes. 9,000 ordinary shares/CUFS held as American Depositary Receipts (ADRs) in the name of Mr and Mrs Hammes.

Table of Contents

- 2 6,000 shares held for the McGauchie Superannuation Fund for which Mr McGauchie is a trustee and beneficiary.
- 3 7,170 ordinary shares/CUFS held as ADRs in the name of Mr and Mrs Anderson.
- 4 David Dilger resigned from the Board 12 August 2013.
- 5 2,384 ordinary shares/CUFS held in the name of Mr Harrison. 11,000 ordinary shares/CUFS held as ADRs in the name of Mr Harrison. 1,550 ordinary shares/CUFS in the name of Mr and Mrs Harrison.
- 6 Joined the Board on 27 February 2012.
Based on 445,293,092 shares of common stock outstanding at 31 May 2014 (all of which are subject to CUFS), no director beneficially owned 1% or more of the outstanding shares of the Company at 31 May 2014. None of the shares held by directors have any special voting rights. There were no changes in the number of CUFS or ADS held by directors between 31 March 2014 and 31 May 2014, other than for Mr Anderson, who acquired 390 ordinary shares/CUFS held as ADRs on 2 April 2014.

8. MORE DETAILED INFORMATION ABOUT EQUITY GRANTS

The following additional information about the Company's equity grants includes the information required under Items 6.B and 6.E of the Form 20-F:

At 31 March 2014, we had the following equity award plans:

the Long-Term Incentive Plan 2006 (LTIP); and

the 2001 Equity Incentive Plan.

8.1 LTIP

The Company uses the LTIP as the plan for LTI grants to senior executives and selected members of senior management. Participants in the LTIP receive grants of RSUs and Scorecard LTI, each of which is subject to performance goals. Participants and award levels are approved by the Remuneration Committee based on local market standards, and the individual's responsibility, performance and potential to enhance shareholder value.

The LTIP was first approved at our 2006 AGM, and our shareholders have subsequently approved amendments to the LTIP in 2008, 2009, 2010 and 2012. Grants of options, RSUs and Scorecard LTI are on the same terms as those for the CEO.

Options

Until fiscal year 2008, the Company issued options under the LTIP to members of the (then) Managing Board. The vesting of these options was subject to performance hurdles (all of which have now concluded) as outlined in the LTIP rules. Options which are exercisable as a result of meeting these performance hurdles expire 10 years from the date of issue unless the senior executive ceases employment with the Company. In November 2006 and August 2007, 1,132,000 and 1,016,000 options, respectively, were granted to Executives under the LTIP.

As at 31 May 2014, there were no options outstanding under the LTIP.

Table of Contents*RSUs*

From fiscal year 2009, the Company commenced using RSUs granted under the LTIP. As of 31 May 2014, there were 3,275,703 RSUs outstanding under this plan, divided as follows:

Grant Type	Grant Date	Granted	Restricted Stock Units	
			Vested as of 31 May 2014	Outstanding as of 31 May 2014
TSR	September 2009	522,000	201,298	183,621
TSR	December 2009	181,656	64,808	59,123
TSR	September 2010	951,194	640,931	183,360

The key terms of these RSUs were:

Relative TSR RSUs

Relative TSR RSUs granted September and December 2009 and September 2010, 2011, 2012 and 2013.

Offered to

Senior executives.

Performance period

Three years to five years from the grant date for the 2009 through 2012 grants. Three years to four and a half years from the grant date for the 2013 grant.

Retesting

On the last Business Day of each six month period following three years from grant date and before the end of the performance period.

Exercise period

Until five years from the grant date for the 2009 through 2012 grants. Three years to four and a half years from the grant date for the 2013 grant.

Performance condition

TSR performance against the following peer group of companies: Acuity Brands, Inc., Eagle Materials, Inc., Headwaters, Inc., Lennox International, Inc., Louisiana-Pacific Corp., Martin Marietta Materials, Inc., Masco Corporation, MDU Resources Group, Inc., Mueller Water Products, Inc., NCI Building Systems, Inc., Owens Corning, Quanex Building Products Corp., Sherwin Williams, Simpson Manufacturing Co., Texas Industries, Inc., Trex, USG, Valmont Industries, Valspar Corporation, Vulcan Materials and Watsco, Inc. For 2010 onwards, the following companies were added to the peer group: American Woodmark Corp, Apogee Enterprises, Inc., Armstrong World Enterprises, Inc., Fortune Brands, Inc., Interface, Inc., Mohawk Industries, Inc. and PGT Inc. For 2012 onwards, the following companies were removed from the peer group: PGT Inc., MDU Resources Group and Interface, Inc.

Vesting criteria

For 2009 to 2011:

0% vesting if TSR below 50th percentile of peer group.

33% vesting if TSR at 50th percentile of peer group.

Between 50th and 75th percentile, vesting is on a straight line basis.

100% vesting if TSR is at 75th percentile of peer group.

For 2012:

0% vesting if TSR below 40th percentile of peer group.

Between 40th and 80th percentile, vesting is on a straight line basis (0-100%)

100% vesting if TSR is at 80th percentile of peer group.

Table of Contents

For 2013:

0% vesting if TSR below 40th percentile of peer group.

Between 40th and 80th percentile, vesting is on a straight line basis (starting at 25% to 100%)

100% vesting if TSR is at 80th percentile of peer group.

RSU exercise price

Not applicable.

Expiration date

Five years from grant date for 2009 to 2012 grants, four and a half years from grant date for 2013 grant.

Vesting Performance

The 2009 Relative TSR RSUs vested 52.3% and the 2010 grant vested 77.7%.

Hybrid RSUs

(Previously referred to as Executive Incentive RSUs)

Hybrid RSUs granted June 2012. The number of Hybrid RSUs issued is based on the Company's performance in first year.

Offered to

Senior executives.

Option Exercise Price

Nil.

Vesting schedule

A proportion will vest on the 2nd anniversary of the grant depending on the Board's exercise of negative discretion to allow each between 0 and 100 of the RSUs to vest.

Expiration date

Two years from grant date.

Vesting Performance

Generally, Hybrid RSUs have vested 100%, except in circumstances where individuals have separated from the Company.

ROCE RSUs

ROCE RSUs granted September 2012 and 2013.

Offered to

Senior executives.

Option Exercise Price

Nil.

Vesting schedule

For 2012:

<u>ROCE</u>	<u>% of ROCE vesting</u>
< 18.5%	0%
³ 18.5%, but < 19.5%	25%
³ 19.5%, but < 20.5%	50%
³ 20.5%, but < 21.5%	75%
³ 21.5%	100%

For 2013:

<u>ROCE</u>	<u>% of ROCE vesting</u>
< 19.5%	0%
³ 19.5%, but < 21.0%	25%
³ 21.0%, but < 22.5%	50%

Edgar Filing: James Hardie Industries plc - Form 20-F

³ 22.5%, but < 24.0% 75%

³ 24.0% 100%

Expiration date

A proportion of the resulting number of RSUs (based on the above vesting scales) will actually vest based on the Remuneration Committee's exercise of negative discretion.
Three years from grant date.

James Hardie FY 2014 20-F

Table of Contents*Scorecard LTI*

From fiscal year 2010, the Company commenced using Scorecard LTI units granted under the LTIP. The terms of Scorecard LTI units are described earlier in this Remuneration Report, but vesting is subject to the Remuneration Committee's exercise of negative discretion. The cash payment paid to award recipients is based on JHI plc's share price on the vesting date (which was amended from fiscal year 2013 to be based on a 20 working day closing average price). As of 31 May 2014, there were 1,639,146 Scorecard LTI units outstanding under the LTIP, divided as follows:

Grant Type	Grant Date	Granted	Scorecard LTI	
			Vested as of 31 May 2014	Outstanding as of 31 May 2014
Scorecard	June 2009	1,083,021	501,556	-
TSR	September 2009	6,373	3,332	3,041
Scorecard	June 2010	821,459	324,027	-
Scorecard	June 2011	716,536	-	643,504
Scorecard	September 2012	506,627	-	473,954
Scorecard	September 2013	518,647	-	518,647
Total outstanding				1,639,146

On 1 July 2013, 324,027 of the 821,459 Scorecard LTI units that were previously granted on 29 June 2010 as part of the fiscal year 2011 long-term incentive award became fully vested and the balance lapsed as a result of the Board's exercise of negative discretion. The cash amount paid to award recipients was based on the average closing price of JHI plc's common stock for the 10 days preceeding the vesting date.

Under the terms of the LTIP, 518,647 and 506,627 Scorecard LTI units were granted during the years ended 31 March 2014 and 2013, respectively that provide recipients a cash incentive based on JHI plc's average common stock price for the 20-days prior to the vesting date and each executive's scorecard rating. The vesting of awards is measured on individual performance conditions based on certain performance measures. Compensation expense recognised for awards are based on the fair market value of JHI plc's common stock on the date of grant and recorded as a liability. The liability is adjusted for subsequent changes in JHI plc's common stock price at each balance sheet date.

The key terms of the Scorecard LTI were:

Scorecard LTI (Cash)	Cash-settled Awards granted June 2009, 2010 and 2011 and September 2012 and 2013.
Offered to	Senior executives.
Exercise Price	Not applicable.
Performance period	Three years from the grant date.
Payment schedule	For 2009 to 2011: A cash payment based on the Company's average share price for the 10-days prior to the end of the performance period multiplied by the number of shares that could have been acquired at the start of the performance period and the senior executive's Scorecard rating.

For 2012 and 2013: A cash payment based on the Company's average share price for the 20-days prior to the end of the performance period multiplied by the number of shares that could have been acquired at the start of the performance period and the senior executive's Scorecard rating.

A proportion of the payment will be payable on the 3rd anniversary of the grant depending on each senior executive's Scorecard rating between 0 and 100.

Table of Contents

Expiration date	Three years from the grant date.
Vesting Performance	Individual results based on each senior executive's Scorecard rating. Actual results for each executive are set out earlier in this Remuneration Report.

Other terms

The LTIP provides for plan participants' early exercise of certain benefits or early payout under the plan in the event of a change in control, takeover by certain organisations or liquidation. For options, a change in control is deemed to have occurred if pursuant to a takeover bid or otherwise, any person together with their associates acquire shares, which when aggregated with shares already acquired by such person and their associates, comprise more than 30% of our issued shares. For restricted stock units, a change of control is deemed to occur if (1) a takeover bid is made to acquire all of the shares of the Company and it is recommended by the Board or becomes unconditional, (2) a transaction is announced which would result in one person owning all the issued shares in the Company, (3) a person owns or controls sufficient shares to enable them to influence the composition of the Board, or (4) a similar transaction occurs which the Board determines to be a control event. On a change of control, the Board can determine that all or some restricted stock units have vested on any conditions it determines. Any remaining restricted stock units lapse.

8.2 2001 Equity Incentive Plan

The 2001 Equity Incentive Plan is intended to promote the Company's long-term financial interests by encouraging management below senior executive level to acquire an ownership position in the Company and align their interests with our shareholders. Selected employees under the 2001 Equity Incentive Plan are eligible to receive awards in the form of RSUs, nonqualified stock options, performance awards, restricted stock grants, stock appreciation rights, dividend equivalent rights, phantom stock or other stock-based benefits. Award levels are determined based on the Remuneration Committee's review of local market standards and the individual's responsibility, performance and potential to enhance shareholder value.

The 2001 Equity Incentive Plan was first approved by our shareholders and Board in 2001 and reapproved until September 2021 at the 2011 Annual General Meeting. An aggregate of 45,077,100 shares of common stock were made available for issuance under the 2001 Equity Incentive Plan, subject to adjustment in the event of a number of prescribed events set out on the 2001 Equity Incentive Plan. All of the outstanding options and RSUs granted under the 2001 Equity Incentive Plan vest at the rate of 25% on the 1st anniversary of the grant, 25% on the 2nd anniversary date and 50% on the 3rd anniversary date, with the exception of the September 16, 2013 grant to the CFO which cliff vests on the third anniversary of the grant date.

Options

Until fiscal year 2008, the Company issued options to purchase shares of our common stock issued under the 2001 Equity Incentive Plan. The total number granted and outstanding as of 31 May 2014 is below:

Grant Date	Granted	Options
		Outstanding as of 31 May 2014
December 2004	5,391,100	12,500
December 2005	5,224,100	338,000
November 2006	3,499,490	287,900
December 2007	5,031,310	129,020
Total outstanding		767,420

Table of Contents*RSUs*

Since fiscal year 2009, the Company has issued restricted stock units, which are unfunded and unsecured contractual entitlements for shares to be issued in the future and may be subject to time vesting or performance hurdles prior to vesting. On vesting, restricted stock units convert into shares. We granted 315,749, 265,988 and 285,358 restricted stock units under the 2001 Equity Incentive Plan in the years ended 31 March 2014, 2013 and 2012, respectively. As of 31 May 2014, there were 604,040 restricted stock units outstanding under this plan, divided as follows:

Grant Date	Granted	Restricted Stock Units	
		Vested as of 31 May 2014	Outstanding as of 31 May 2014
December 2011	281,556	135,544	116,512
March 2012	3,802	1,901	1,901
December 2012	265,988	62,331	174,855
September 2013	56,128	-	56,128
December 2013	259,621	-	254,644
Total outstanding			604,040

Other terms

The 2001 Equity Incentive Plan is administered by our Remuneration Committee, and the Remuneration Committee or its delegate is authorised to determine (i) who may participate in the 2001 Equity Incentive Plan, (ii) the number and types of awards made to each participant, and (iii) the terms, conditions and limitations applicable to each award. The Remuneration Committee has the exclusive power to interpret and adopt rules and regulations to administer the 2001 Equity Incentive Plan, including a limited power to amend, modify or terminate the 2001 Equity Incentive Plan to meet any changes in legal requirements or for any other purpose permitted by law.

The purchase or exercise price of any award granted under the 2001 Equity Incentive Plan may be paid in cash or other consideration at the discretion of our Remuneration Committee, including cashless exercises.

The exercise price for all options is the market value of the shares on the date of grant. The Company may not reduce the exercise price of such an option or exchange such an option or stock appreciation right for cash, or other awards or a new option at a reduced exercise price without shareholder approval or as permitted under specific restructuring events.

No unexercised options or unvested RSUs issued under the 2001 Equity Incentive Plan are entitled to dividends or dividend equivalent rights.

Although the 2001 Equity Incentive Plan permits the Remuneration Committee to grant stock options, performance awards, restricted stock awards, stock appreciation rights, dividend equivalent rights or other stock based benefits, no such awards have been made, and the Remuneration Committee currently has no intention to issue such awards in the future.

The 2001 Equity Incentive Plan provides for the automatic acceleration of certain benefits and the termination of the plan under certain circumstances in the event of a change in control. A change in control will be deemed to have occurred if either (1) any person or group acquires beneficial ownership equivalent to 30% of our voting securities, (2) individuals who are currently members of our Board cease to constitute at least a majority of the members of our Board, or (3) there occurs the

consummation of certain mergers (other than a merger that results in existing voting securities

Table of Contents

continuing to represent more than 5% of the voting power of the merged entity or a recapitalisation or reincorporation that does not result in a material change in the beneficial ownership of the voting securities of the Company), the sale of substantially all of our assets or our complete liquidation or dissolution.

9. COMMITTEE ADVISOR INDEPENDENCE

The Remuneration Committee reviews the appointment of its advisors each year. Both Aon Hewitt (in the US) and Guerdon Associates (in Australia) provided the Remuneration Committee with written certification during fiscal year 2014 to support their re-appointment. In those certifications, the advisors:

confirmed that their pay recommendations were made without undue influence from any member of the Company's management;
and

provided detailed responses to the six independence factors a Remuneration Committee should consider under relevant NYSE rules, and confirmed their independence based on these factors.

The Remuneration Committee reviewed these certifications before re-appointing each advisor for fiscal year 2015.

Table of Contents

CORPORATE GOVERNANCE REPORT

These Corporate Governance Principles describe the corporate governance arrangements that have been followed by James Hardie from the commencement of the fiscal year and contain an overview of our corporate governance framework. These Corporate Governance Principles were approved by the Nominating and Governance Committee and the Board in May 2014.

These Corporate Governance Principles, as well as our Articles of Association, Board and Board Committee charters and key Company policies, as updated from time to time, are available from the Investor Relations area of our website (www.ir.jameshardie.com.au) or by requesting a printed copy from the company secretary at the Company's head office at 2nd Floor, Europa House, Harcourt Centre, Harcourt Street, Dublin 2, Ireland.

Corporate Governance at James Hardie

Overview

James Hardie operates under the regulatory requirements of numerous jurisdictions and organisations, including the ASX, ASIC, the NYSE, the SEC, the Irish Takeover Panel and various other rulemaking bodies.

James Hardie's corporate governance framework is reviewed regularly and updated as appropriate to reflect what we believe is in our and our stakeholders' interests, changes in law and current best practices in the context of the regulatory jurisdictions and the industry we operate in.

Our corporate governance framework incorporates processes and policies designed to provide the Board with appropriate assurance about the operations and governance of the Company and thereby protect shareholder value. Further details of these processes and policies are set out in this Corporate Governance Report.

Board Structure

The responsibilities of our Board and Board Committees are formalised in our Articles of Association and our Board Committee charters, respectively. The Board has also reserved certain matters to itself.

Board of Directors

The Board comprises seven non-executive directors and the CEO. The Board must have no less than three and not more than twelve directors, with the precise number to be determined by the Board.

Directors may be elected by our shareholders at general meetings or appointed by the Board and elected at the next general meeting if there is a vacancy. The Board and our shareholders have the right to nominate candidates for the Board. Directors may be dismissed by our shareholders at a general meeting.

Irish law provides that the Board is responsible for the management and operation of James Hardie. The Board can, and has, delegated authority to the CEO to manage the corporation within specified authority levels. The Board has also reserved certain matters to itself, including:

appointing, removing and assessing the performance and remuneration of the CEO and CFO;

Table of Contents

succession planning for the Board and senior management and defining the Company's management structure and responsibilities;

approving the overall strategy for the Company, including the business plan and annual operating and capital expenditure budgets;

convening and monitoring the operation of shareholder meetings and approving matters to be submitted to shareholders for their consideration;

approving annual and periodic reports, results announcements and related media releases, and notices of shareholder meetings;

approving the dividend policy and interim dividends and making recommendations to shareholders regarding the annual dividend;

reviewing the authority levels of the CEO and management;

approving the remuneration framework for the Company;

overseeing corporate governance matters for the Company;

approving corporate-level Company policies;

considering management's recommendations on various matters which are above the authority levels delegated to the CEO or management; and

any other matter which the Board considers appropriate to be approved by the Board.

The full list of those matters reserved to the Board are formalised in our Board reserved powers charter, which is available on our website (www.ir.jameshardie.com.au). The Board Reserved Powers charter was reviewed by the Board during the year.

In discharging its duties, the Board aims to take into account within the context of the industry in which the Company operates, the interests of James Hardie, its enterprise (including the interests of its employees), shareholders, other stakeholders and other parties involved in or with James Hardie.

Operation of the Board

Board Meetings

The Board meets at least four times a year or whenever the Chairman or three or more members have requested a meeting.

Meetings are generally held at the Company's offices in Ireland. At each physical meeting, the Board meets in executive session without management present for at least part of the meeting. The Board may also delegate some of its powers to a sub-committee of the Board or pass resolutions by written consent.

Table of Contents

The number of Board and Board Committee meetings held, and each director's attendance during fiscal year 2014, is set out below:

NAME	BOARD		AUDIT		REMUNERATION		NOMINATING & GOVERNANCE	
	H	A	H	A	H	A	H	A
M Hammes	5	5	6	6	6	6	5	5
B Anderson	5	5	6	6	6	6	-	-
D Dilger	3	1	4	2	4	2	-	-
D Harrison	5	5	6	6	6	6	-	-
A Littley	5	5	6	6	-	-	-	-
D McGauchie	5	5	-	-	6	6	5	5
J Osborne	5	5	-	-	-	-	5	5
R van der Meer	5	5	-	-	-	-	5	5
L Gries	5	4	-	-	-	-	-	-

H = Number of meetings held during the time the Director held office or was a member of the Committee during the fiscal year.

A = Number of meetings attended during the time the Director held office or was a member of the Committee during the fiscal year. Non-Committee members also attend Committee meetings from time to time; these attendances are not shown.

Director Qualifications

Directors have skills, qualifications, experience and expertise which assist the Board in fulfilling its responsibilities and assist the Company in creating shareholder value. The skills, qualifications, experience and relevant expertise of each director, and his or her term of appointment, are summarised in the Board of Directors' biography Section and also appear in the Investor Relations area of our website (www.ir.jameshardie.com.au).

The Board seeks to achieve a mix of skills, experience and expertise to maximize the effectiveness of the Board. The core characteristics desired include, a breadth and depth of executive experience, independent thinking, an ability to exercise independent judgment and strong interpersonal and communication skills. The skills, experience and expertise areas which the Board currently considers to be particularly relevant include those in international business, manufacturing, finance and legal. Information regarding Board diversity can be found in the Workplace Diversity section below.

Directors must be able to devote a sufficient amount of time to prepare for, and effectively participate in, Board and Board Committee meetings. The Nominating and Governance Committee reviews the other commitments of Directors each year.

Succession Planning

The Board, together with the Nominating and Governance Committee, has developed, and periodically reviews with the CEO, management succession plans, policies and procedures for our CEO and other senior executives.

Retirement and Tenure Policy

The Company does not have a retirement and tenure policy. The length of tenure of individual Directors is considered as part of the Board's decision-making process when considering whether a director should be recommended by the Board for re-election. During fiscal year 2014, one Director, David Dilger, retired from the Board and as a director of a number of James Hardies subsidiaries.

Table of Contents

Board Evaluation

The Nominating and Governance Committee supervises the director evaluation process and makes recommendations to the Board. During fiscal year 2014, a purpose-designed survey was used by directors to self-assess the operation of the Board and each Board Committee, and the results were reviewed and discussed by the Nominating and Governance Committee and the Board.

The Chairman and Deputy Chairman discussed with each Director, and the Deputy Chairman discussed with the Chairman, the Chairman's performance and contribution to the effectiveness of the Board. The Nominating and Governance Committee and the Board annually discuss the performance of the CEO and the CEO's direct reports, and the Chairman provides feedback to the CEO. The CEO uses the feedback as part of an annual review of his direct reports.

Director Re-election

The Board's overriding desire is to maximise its effectiveness by appointing the best candidates for vacancies and closely reviewing the performance of directors subject to re-election.

No director (other than the CEO) shall hold office for a continuous period of more than three years, or past the end of the third AGM following his or her appointment, whichever is longer, without submitting him or herself for re-election. A person appointed to the Board must submit him or herself for re-election at the next AGM.

Directors are not automatically nominated for re-election at the end of their term. Nomination for re-election is based on their individual performance and the Company's needs. The Nominating and Governance Committee and the Board discuss the performance of each director due to stand for re-election at the next AGM before deciding whether to recommend their re-election.

As part of this process, the Board and Nominating and Governance Committee considered the desired profile of the Board, including the right number, mix of skills, qualifications, experience, expertise, diversity and geographic location of its directors, to maximise the effectiveness of the Board.

Independence

The Company requires the majority of directors on the Board and Board Committees, as well as the Chairman of the Board and Board Committees, to be independent, unless a greater number is required to be independent under the rules and regulations of the ASX, the NYSE or any other applicable regulatory body.

Each year the Board, with the assistance of the Nominating and Governance Committee, assesses each Director and his or her responses to a lengthy questionnaire, including on matters relevant to his or her independence according to the rules and regulations of Irish law, the NYSE and SEC as well as the Corporate Governance Council Principles and Recommendations published by the ASX Corporate Governance Council. Following this assessment, the Board has determined that each non-executive Director is independent.

All directors are expected to bring their independent views and judgment to the Board and Board Committees and must declare any potential or actual conflicts of interest. The Board has not set materiality thresholds for assessing independence and considers all relationships on a case-by-case basis, considering the materiality of each potential or actual conflict of interest and the rules and regulations of the applicable exchange or regulatory body.

Table of Contents

Related Party Transactions

The Board considered the following specific matter prior to determining that each director was independent:

Brian Anderson is a director of Pulte Homes, a home builder in the United States. Pulte Homes does not buy any James Hardie products directly from the Company, although it does buy James Hardie products through some of the Company's customers. Pulte Homes receives a rebate from the Company or the Company's suppliers in respect of some of its purchases in accordance with a rebate program applicable to similar home builders.

Any transactions mentioned above are conducted on an arm's length basis, are similar to the transactions James Hardie has entered into with other similarly situated home builders and are in accordance with normal terms and conditions and are not material to any of the companies listed above or to James Hardie. The rebate program existed and was disclosed to the Board before Mr Anderson became a director. It is not considered that Mr Anderson had any influence over these transactions.

Further, David Dilger was a director of a number of James Hardie's subsidiaries and received directors' fees for such service approved by the Board of James Hardie Industries plc. During fiscal year 2014, he retired as a director of the James Hardie subsidiaries of which he was a director. Pursuant to Exchange Act Rule 10A-3(b), Mr Dilger's service qualified for an exemption from the listing standards for Audit Committees and is not subject to the disclosure requirements of Exchange Act Rule 10A-3(d).

Induction

The Company has an induction program for new directors. The program includes an overview of the Company's governance arrangements and directors' duties in Ireland, the United States and Australia, plant and market tours to understand the Company's strategic plans and impart relevant industry knowledge, briefings on the Company's risk management and control framework, financial results and key risks and issues, and meeting other Directors, the CEO and members of management. New directors are also provided with comprehensive orientation materials including relevant corporate documents and policies.

Board Continuing Development

The Company operates within a challenging industry and geographical spread and a complex regulatory framework. The Company regularly schedules time at physical Board meetings to develop the Board's understanding of the Company's operations and regulatory environment, including updates on topical developments from management and external experts. An annual plant and market tour forms an important part of the Board's continuing development.

Letter of Appointment

Each incoming Director receives a letter of appointment setting out the key terms and conditions of his or her appointment and the Company's expectations of them in that role. We do not provide any benefits for our non-executive Directors upon termination of appointment.

Chairman

The Board appoints one of its members as the Chairman. The Chairman must be an independent, non-executive director. The Chairman appoints the Deputy Chairman. The Chairman co-ordinates the Board's duties and responsibilities and acts as the main contact with the CEO.

Table of Contents

The Chairman:

provides leadership to the Board;

chairs Board and shareholder meetings;

facilitates Board discussion;

monitors, evaluates and assesses the performance of the Company's Board and Board Committees; and

is a member of and attends meetings of all Board Committees.

The Chairman may not be the Chairman of the Audit Committee. The current Chairman is Mr Hammes and the current Deputy Chairman is Mr McGauchie.

Remuneration

A detailed description of the Company's remuneration policies for directors and executives, and the link to performance, is set out in the Remuneration Report above.

Indemnification

The Company's Articles of Association provide for indemnification of any person who is (or keep indemnified any person who was) a Director, the company secretary, or an employee or any other person deemed by the Board to be an agent of the Company, who suffers any loss as a result of any action in discharge of their duties, in the absence of wilful act or default and subject to the provisions of the Irish Companies Acts.

The Company and some of its subsidiaries have provided Deeds of Access, Insurance and Indemnity to Directors and senior executives who are officers or directors of the Company or its subsidiaries.

Evaluation of Management

At least once a year, the CEO, the Remuneration Committee and the Board review the performance of each member of the JHMT against performance measures approved by the Remuneration Committee and the Board. The CEO uses this feedback to assist in the annual review of members of the JHMT. This process was followed during the fiscal year.

Information for the Board

Directors receive timely and necessary information to allow them to fulfil their duties, including access to senior executives if required. The Nominating and Governance Committee periodically reviews the format, timeliness and content of information provided to the Board.

In discharging their duties, Directors are provided with direct access to senior executives and outside advisors and auditors. The Board, Board Committees and individual directors may all seek independent professional advice at the Company's expense for the proper performance of their duties.

The Board has regular discussions with the CEO regarding the Company's strategy and performance, including two sessions each year where Board members formally review the Company's strategy and progress. The Board and each Board Committee have also scheduled an annual calendar of topics to be covered to assist them in properly discharging all of their responsibilities.

Table of Contents

Directors receive access to all Board Committee papers and may attend any Board Committee meeting, whether or not they are members of the Board Committee. Directors also receive the minutes which record each Board Committee's deliberations and findings, as well as oral reports from each Board Committee Chairman.

Delegation to the CEO

The Board has delegated to the CEO the power to manage the business of the Company to achieve the mission statement and corporate goals approved by the Board from time to time. This delegation is subject to a specified monetary cap for a range of matters, above which Board approval is required.

Board Committees

The committees of the Board comprise the Audit Committee, the Nominating and Governance Committee and the Remuneration Committee. The Board Committee charters are available from the Investor Relations area of our website (www.ir.jameshardie.com.au). The Board may also delegate some of its powers or specific decisions to ad hoc committees from time to time.

Each Board Committee meets at least quarterly and has scheduled an annual calendar of meeting and discussion topics to assist it to properly discharge all of its responsibilities.

Audit Committee

The Audit Committee oversees the adequacy and effectiveness of the Company's accounting and financial policies and controls. The key aspects of the terms of reference followed by our Audit Committee are set out in this Corporate Governance Report. The Audit Committee meets at least quarterly in a separate executive session with the external auditor and internal auditor, respectively.

Currently, the members of the Audit Committee are Mr Anderson (Chairman), Mr Hammes, Mr Harrison and Ms Littley.

All members of the Audit Committee must be financially literate and must have sufficient business, industry and financial expertise to act effectively as members of the Audit Committee. In addition, in accordance with the SEC rules, the Nominating and Governance Committee and the Board have determined that Mr Anderson and Mr Harrison are also audit committee financial experts and that both individuals are independent.

The Audit Committee provides advice and assistance to the Board in fulfilling its responsibilities and, amongst other matters:

overseeing the Company's financial reporting process and reports on the results of its activities to the Board;

reviewing with management and the external auditor the Company's annual and quarterly financial statements and reports to shareholders;

discussing earnings releases as well as information and earnings guidance provided to analysts;

reviewing and assessing the Company's risk management strategy, policies and procedures;

Table of Contents

exercising general oversight of the appointment and provision of all external audit services to the Company, the remuneration paid to the external auditor, and the performance of the Company's internal audit function;

reviewing the adequacy and effectiveness of the Company's internal compliance and control procedures;

reviewing the Company's compliance with legal and regulatory requirements; and

establishing procedures for complaints regarding accounting, internal accounting controls and auditing matters, including any complaints from whistle-blowers.

Conflicts of interest

The Audit Committee oversees the Company's Code of Business Conduct and Ethics policy and other business-related conflict of interest issues as they arise.

Reporting

The Audit Committee will inform the Board of any general issues that arise with respect to the quality or integrity of the Company's financial statements, the Company's compliance with legal or regulatory requirements, the Company's risk management systems, the performance and independence of the external auditor, or the performance of the internal audit function.

Nominating and Governance Committee

The Nominating and Governance Committee is responsible for:

identifying and recommending to the Board individuals qualified to become Directors;

overseeing the evaluation of the Board and senior management;

assessing the independence of each Director;

reviewing the conduct of the AGM; and

performing a leadership role in shaping the Company's corporate governance policies.

The current members of the Nominating and Governance Committee are Mr McGauchie (Chairman), Mr Hammes, Mr Osborne and Mr van der Meer.

Remuneration Committee

The Remuneration Committee oversees the Company's overall remuneration structure, policies and programs, assesses whether the Company's remuneration structure establishes appropriate incentives for management and employees, and approves any significant changes in the Company's remuneration structure, policies and programs. It also:

Edgar Filing: James Hardie Industries plc - Form 20-F

administers and makes recommendations on the Company's incentive compensation and equity-based remuneration plans;

reviews the remuneration of Directors;

reviews the remuneration framework for the Company; and

Table of Contents

makes recommendations to the Board on the Company's recruitment, retention and termination policies and procedures for senior management.

Members of the Remuneration Committee must qualify as non-employee directors for purposes of Rule 16b-3 under the Securities Exchange Act of 1934, as amended (the Exchange Act), and outside directors for purposes of Section 162(m) of the US Internal Revenue Code.

Further details on the role of the Remuneration Committee are disclosed in the Remuneration Report above.

The current members of the Remuneration Committee are Mr Harrison (Chairman), Mr Anderson, Mr Hammes and Mr McGauchie.

Policies and Processes

As noted at the start of this Corporate Governance Report, we have a number of policies that address key aspects of our corporate governance. These include:

Code of Business Conduct and Ethics;

Complaints/Ethics Hotline;

Continuous Disclosure and Market Communication; and

Insider Trading.

Copies of all these policies are available in the Investor Relations area of our website (www.ir.jameshardie.com.au).

Code of Business Conduct and Ethics

We seek to maintain high standards of integrity and we are committed to ensuring that James Hardie conducts its business in accordance with high standards of ethical behaviour. We require our employees to comply with the spirit and the letter of all laws and other statutory requirements governing the conduct of James Hardie's activities in each country in which we operate. Our Code of Business Conduct and Ethics applies to all of our employees and directors. The Code of Business Conduct and Ethics covers many aspects of Company policy that govern compliance with legal and other responsibilities to stakeholders. All directors and Company employees worldwide are reminded annually of the existence of the Code and asked to confirm that they have read it. The Audit Committee reviewed the Code of Business Conduct and Ethics policy during fiscal year 2014.

We have not granted any waivers from the provisions of our Code of Business Conduct and Ethics during fiscal year 2014.

Complaints/Ethics Hotline

Our Code of Business Conduct and Ethics policy provides employees with advice about who they should contact if they have information or questions regarding potential violations of the policy. James Hardie has an Ethics Hotline operated telephonically (except in France) by an independent external provider which allows employees to report anonymously any concerns. All Company employees worldwide are reminded annually of the existence of the Ethics Hotline.

All complaints, whether to the Ethics Hotline or otherwise, are initially reported directly to the General Counsel, U.S. Employment Counsel and Director of Internal Audit (except in cases where the

Table of Contents

complaint refers to one of them). The most serious complaints are referred immediately to the Chairmen of the Audit Committee and Board. Less serious complaints are reported to the Audit Committee on a quarterly basis.

Interested parties who have a concern about James Hardie's conduct, including accounting, internal accounting controls or audit matters, may communicate directly with the Company's Chairman (or Presiding Director for NYSE purposes), Deputy Chairman, Directors as a group, the Chairman of the Audit Committee or Audit Committee members. These communications may be confidential or anonymous, and may be submitted in writing to the company secretary at the Company's head office at 2nd Floor, Europa House, Harcourt Centre, Harcourt Street, Dublin 2, Ireland or submitted by phone at Telephone +353 (0)1 411 6924. All concerns will be forwarded to the appropriate Directors for their review and will be simultaneously reviewed and addressed by our General Counsel in the same way that other concerns are addressed. Our Code of Business Conduct and Ethics policy, which is described above, prohibits any employee from retaliating or taking any adverse action against anyone for raising or helping to resolve a concern about integrity.

Continuous Disclosure and Market Communication

We strive to comply with all relevant disclosure laws and listing rules in Australia (ASX and ASIC) and the United States (SEC and NYSE).

Our Continuous Disclosure and Market Communication Policy aims to ensure timely communications so that investors can readily:

understand James Hardie's strategy and assess the quality of its management;

examine James Hardie's financial position and the strength of its growth prospects; and

receive any news or information that might reasonably be expected to materially affect the price or market for James Hardie securities.

The CEO is responsible for ensuring the Company complies with its continuous disclosure obligations. A Disclosure Committee comprised of the CEO, CFO, General Counsel and the Vice President – Investor and Media Relations is responsible for all decisions regarding our market disclosure obligations outside of the Company's normal financial reporting calendar. For our quarterly and annual results releases, the CEO and CFO are supported by the Financial Statements Disclosure Committee, which provides assurance regarding our compliance with reporting processes and controls. The CEO, CFO and General Counsel discuss with the Audit Committee any issues arising out of meetings of the Financial Statements Disclosure Committee that affect the quarterly and annual results releases before they are approved by the Board. The Audit Committee reviewed the Company's disclosure practices under the Continuous Disclosure and Market Communication policy during fiscal year 2014. The Nominating and Governance Committee reviewed the Company's Continuous Disclosure and Market Communication policy in May 2014.

Insider Trading

All Company employees and directors are subject to our Insider Trading Policy. Company employees and directors may only buy or sell the Company's securities within four weeks beginning two days after the announcement of quarterly or full year results, or another period designated by the Board for this purpose, provided they are not in possession of material non-public price sensitive information. There are additional restrictions on trading for designated senior employees and directors, including a

Table of Contents

requirement that they receive prior clearance from the Company's compliance officer before dealing with their shares and general prohibitions on hedging any shares or options or selling any shares for short-swing profit. There is a general prohibition on hedging unvested shares, options or RSUs.

The Board recognises that it is the individual responsibility of each James Hardie director and employee to ensure he or she complies with the spirit and the letter of insider trading laws and that notification to the compliance officer in no way implies approval of any transaction.

Risk Management

Overall Responsibility

The Audit Committee and the Board reviewed our risk management strategy and processes during the fiscal year.

The Audit Committee has oversight of the Company's risk management strategy, policies, procedures and controls. The Audit Committee reviews, monitors and discusses these matters with the CEO, CFO, General Counsel, Director of Internal Audit and other senior business leaders. The Audit Committee, CEO, CFO and General Counsel report periodically to the Board on the Company's risk management policies, processes and controls.

The Audit Committee is supported in its oversight role by the policies put in place by management to oversee and manage material business risks, as well as the roles played by the Corporate, US and Asia Pacific Risk Management Committees, as described below, and internal and external audit functions. The internal and external audit functions are separate from and independent of each other and each has a direct reporting line to the Audit Committee.

At a management level, the JHMT (comprised of the CEO, CFO, General Counsel, Executive General Managers for U.S. North, U.S. South and International, Senior Director of Human Resources and Organisational Development, Senior Director of R&D and Centralised Manufacturing, Senior Director of Products and Segments and the Vice President of Investor and Media Relations in fiscal year 2014) is the primary management forum for risk assessment and management within the Company.

Objective

The Company considers that a sound framework of risk management policies, procedures and controls produces a system of risk oversight, risk management and internal control that is fundamental to good corporate governance and compliance and creation of shareholder value. The objective of the Company's risk management policies, procedures and controls is to ensure that:

our principal strategic, operational and financial risks are identified;

effective systems are in place to monitor and manage risks; and

reporting systems, internal controls and arrangements for monitoring compliance with laws and regulations are adequate.

Risk management does not involve avoiding all risks. The Company's risk management policies seek to strike a balance between ensuring that the Company continues to generate financial returns while simultaneously managing risks appropriately by setting appropriate strategies and objectives.

Table of Contents

Policies for Management of Material Business Risks

Management has put in place a number of key policies, processes and independent controls to provide assurance as to the integrity of our systems of internal control and risk management. In addition to the measures described elsewhere in this Corporate Governance Report, the more significant policies, processes or controls adopted by the Company for oversight and management of material business risks are:

quarterly meetings of the corporate, US and Asia Pacific Risk Management Committees to assess the key strategic, operations, reporting and compliance risks facing the Company, the level of risk and the processes implemented to manage each of these key risks over the upcoming twelve months;

quarterly reporting to the JHMT, Audit Committee, and annual reporting to the Board, of the Risk Management Committees assessment regarding the key strategic, operations, reporting and compliance risks facing the Company;

a program for the Audit Committee to review in detail each year the Company's general risk tolerance and all items identified by the Risk Management Committees as high level risks;

quarterly meetings of the Financial Statements Disclosure Committee to review all quarterly and annual financial statements and results;

a planning process involving the preparation of three-year strategic plans and a rolling twelve month forecast;

annual budgeting and monthly reporting to monitor performance;

an internal audit department with a direct reporting line to the Chairman of the Audit Committee;

regular monitoring of the liquidity and status of the Company's finance facilities;

maintaining an appropriate global insurance program;

maintaining policies and procedures in relation to treasury operations, including the use of financial derivatives;

issuing and revising standards and procedures in relation to environmental and health and safety matters and the review and approval of authority of commitments that bind the Company;

a commitment to talent development, to ensure that the Company is developing sufficient employees to execute its business goals;

Edgar Filing: James Hardie Industries plc - Form 20-F

implementing and maintaining training programs in relation to legal and regulatory compliance issues such as trade practices/antitrust, insider trading, foreign corrupt practices and anti-bribery, employment law matters, trade secrecy and intellectual property protection;

issuing procedures requiring significant capital and recurring expenditure to be approved at the appropriate levels; and

Table of Contents

documenting detailed accounting policies, procedures and guidance for the group in a single group finance manual.

A summary of policies, processes and controls that address key aspects of our corporate governance is available in the Investor Relations area of our website (www.ir.jameshardie.com.au).

During the fiscal year, the Audit Committee and, through it, the Board received a number of reports on the operation and effectiveness of the policies, processes and controls described in this section. This included a review of the Company's current disclosure controls and processes, how they compare with best practices and the steps proposed by management to continue cultivating the Company's risk management culture.

Risk Management Committee

The Risk Management Committee is divided into three separate committees, one for Corporate, one for the US business and one for the Asia Pacific business. This structure allows each committee to focus on individual risks in greater detail. Each Committee comprises a cross-functional group of employees who review and monitor the risks facing the Company from the perspective of their area of responsibility. The Risk Management Committees are coordinated by the General Counsel and Senior Manager Corporate Finance and report on a quarterly basis to the JHMT. The General Counsel also provides quarterly reports to the Audit Committee on each Committee's key risks and the procedures in place for identifying, monitoring, managing and reporting on the principal strategic, operational, financial and legal risks facing the Company.

Internal Audit

The Director of Internal Audit heads the internal audit department. The Internal Audit charter sets out the independence of the internal audit department, its scope of work, responsibilities and audit plan. The internal audit department's work plan is approved annually by the Audit Committee. The Director of Internal Audit reports to the Chairman of the Audit Committee and meets quarterly with the Audit Committee in executive sessions.

External Audit

The external auditor reviews each quarterly and half-year consolidated financial statements and audits the full year consolidated financial statements. The external auditor attends each meeting of the Audit Committee, including an executive session where members of the Audit Committee are present. The Audit Committee has approved policies to ensure that all non-audit services performed by the external auditor, including the amount of fees payable for those services, receive prior approval. The Audit Committee also reviews the remuneration paid to the external auditor and makes recommendations to the Board regarding the maximum compensation to be paid to the external auditor.

The Audit Committee reviews and approves management representations made to the external auditor as part of the audit of the full year results.

Financial Statements Disclosure Committee

The Financial Statements Disclosure Committee is a management committee comprising senior finance, accounting, compliance, legal, tax, treasury and investor relations executives in the Company, which meets with the CEO, CFO and General Counsel prior to the Board's consideration of any quarterly or annual results. The Financial Statements Disclosure Committee is a forum for the CEO, CFO and General Counsel to discuss, and, on the basis of those discussions, report to the Audit Committee, about a range of risk management procedures, policies and controls, covering the draft

Table of Contents

results materials, business unit financial performance and the current status of legal, tax, treasury, accounting, compliance, internal audit, complaints and disclosure control matters.

CEO and CFO Certification of Financial Reports

Under SEC rules and the Company's internal control arrangements, our CEO and CFO provide certain certifications with respect to our full year financial statements, disclosure controls and procedures and internal controls over financial reporting. These certifications are more comprehensive and detailed than those required under the Australian Corporations Act and are considered appropriate given that the Company's financial reports are prepared in accordance with US GAAP.

The Board in turn receives quarterly assurance from the Financial Statements Disclosure Committee relating to the Company's disclosure controls and procedures and internal controls over financial reporting. This assurance is supported by written quarterly and annual sub-certifications from the general managers and Finance Directors of each business unit and the Corporate Controller, with annual certifications from the relevant general manager on the JHMT.

Internal Controls and SOX 404

Each fiscal year, key members of the Company's business and corporate functions complete an internal control certificate that seeks to confirm that adequate internal controls are in place and are operating effectively, and evaluate any failings and weaknesses.

Company Books of Accounts

The Company is responsible for ensuring that it keeps proper books of account and appropriate accounting systems. The measures taken by the Directors to secure compliance with the Company's obligation to keep proper books of account are the use of appropriate systems and procedures and employment of competent persons. We have appointed a Chief Financial Officer who makes regular reports to the Board and ensures compliance with the requirements of Section 202 of the Irish Companies Act, 1990. The Company also has a Group Controller, who works closely with the Chief Financial Officer and makes regular reports to our Audit Committee. The books of account are kept at Europa House, Second Floor, Harcourt Center, Harcourt Street, Dublin 2, Republic of Ireland.

Management's Annual Report on Internal Control Over Financial Reporting

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report. In designing and evaluating our disclosure controls and procedures, our management recognises that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and are subject to certain limitations, including the exercise of judgment by individuals, the difficulty in identifying unlikely future events, and the difficulty in eliminating misconduct completely. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, our disclosure controls and procedures were effective at a reasonable assurance level as of 31 March 2014, to ensure the information required to be disclosed in the reports that we file or submit under the Exchange Act were recorded, processed, summarised and reported within the time periods specified in the rules and forms of the SEC and that such information was accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow for timely decisions regarding required disclosures.

Table of Contents

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) of the U.S. Securities Exchange Act of 1934. Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of our internal control over financial reporting as of 31 March 2014. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organisations of the Treadway Commission in *Internal Control - Integrated Framework (1992)*. Based on our assessment using those criteria, we concluded that our internal control over financial reporting was effective as of 31 March 2014.

The effectiveness of our internal control over financial reporting as of 31 March 2014 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report below.

Changes in Internal Control over Financial Reporting

There were no changes in our internal controls over financial reporting that occurred during the period covered by this annual report on Form 20-F that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. However, subsequent to year end, the Company has begun the process of conforming its internal control over financial reporting to align with the criteria set forth by the Committee of Sponsoring Organisations of the Treadway Commission in *Internal Control - Integrated Framework (2013)*.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of James Hardie Industries plc:

We have audited James Hardie Industries plc's internal control over financial reporting as of 31 March 2014, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) (the COSO criteria). James Hardie Industries plc's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, James Hardie Industries plc maintained, in all material respects, effective internal control over financial reporting as of 31 March 2014 based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of James Hardie Industries plc as of 31 March 2014 and 2013, and the related consolidated statements of operations and comprehensive income (loss), changes in shareholders' equity (deficit), and cash flows for each of the three years in the period ended 31 March 2014, and our report dated 22 May 2014 expressed an unqualified opinion thereon.

/s/ Ernst & Young

Irvine, California

22 May 2014

Table of Contents

Limitations of Control Systems

Our management does not expect that our internal risk management and control systems will prevent or detect all error and all fraud. No matter how well it is designed and operated, a control system can provide only reasonable, not absolute, assurance that the control system's objectives will be met.

The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the Company have been detected.

These inherent limitations include the realities that judgments in decision making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Projections of any evaluation of controls' effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

Shareholders' Participation

Listing Information

James Hardie securities trade as CUFS on the ASX and as ADS on the NYSE.

Annual General Meeting

The 2013 AGM was held in Ireland and shareholders were able to view the AGM through a webcast of proceedings on James Hardie's investor relations web site. The 2014 AGM will be held in Ireland, and shareholders not present in Ireland who wish to participate in the meeting, including asking questions, can do so via a teleconference of the meeting. Further details are set out in the 2014 AGM Notice of Meeting.

Each shareholder (other than an ADS holder) has the right to:

attend the AGM either in person or by proxy;

speak at the AGM; and

exercise voting rights, including at the AGM subject to their instructions on the Voting Instruction Form.

While ADS holders cannot vote directly, ADS holders can direct the voting of their underlying shares through the ADS depository.

The external auditor attends the AGM and is available to answer questions.

Table of Contents

Communication

We are committed to communicating effectively with our shareholders through a program that includes:

making management briefings and presentations accessible via a live webcast and/or teleconference following the release of quarterly and annual results;

audio webcasts of other management briefings and webcasts of the annual shareholder meeting;

a comprehensive Investor Relations website that displays all Company announcements and notices (promptly after they have been cleared by the ASX), major management and investor road show presentations;

site visits and briefings on strategy for investment analysts;

an email alert service to advise shareholders and other interested parties of announcements and other events; and

equality of access for shareholders and investment analysts to briefings, presentations and meetings and equality of media access to the Company, on a reasonable basis.

Investor Website

We have a dedicated section on corporate governance as part of the Investor Relations area of our website (www.ir.jameshardie.com.au). Information on this section of the website is progressively updated and expanded to ensure it presents the most up-to-date information on our corporate governance structure. Except where stated, the contents of the website are not incorporated into this annual report.

Compliance with Corporate Governance Requirements

ASX Principles and Recommendations

Listed Australian companies are encouraged to comply with the Principles and Recommendations. Except where otherwise stated, the Company has complied with the Principles and Recommendations for the entire period described in this annual report.

For the benefit of Australian holders, the Investor Relations area of our website (www.ir.jameshardie.com.au) contains more detail about the ways in which we comply with the Principles and Recommendations.

Workplace Diversity

James Hardie recognises the value of having a workforce that reflects the diverse communities and marketplaces in which we operate and serve. James Hardie believes that a skilled and diverse workforce, which encompasses a wealth of different viewpoints, skills, attributes life experiences and the unique strengths of each employee, contributes collectively to the business performance at James Hardie.

James Hardie has implemented a Workplace Diversity Policy that reflects a broader view of diversity than those covered by the ASX Corporate Governance Council's recommendations and supports

Table of Contents

certain of our core organisational values, including Operating with Respect and Building Organizational Advantage. The policy, which is located on the Investor Relations area of our website (www.ir.jameshardie.com.au) applies to all individuals recruited or employed by James Hardie and reflects the organisation's inclusive view of diversity, which includes individual differences related to race, gender, age, national origin, religion, sexual orientation or disability.

The Board, with assistance from management, is responsible for approving and monitoring James Hardie's diversity policy and measurable objectives in the context of the organisation's unique circumstances and industry. The Board assesses the policy and objectives annually and the organisation's progress in achieving them.

The Board has delegated responsibility to the Nominating & Governance Committee for monitoring the effectiveness of this policy to the extent it relates to diversity of the Board's composition, senior leadership, management, and the organisation as a whole and for reviewing and recommending any updates to this policy as deemed necessary.

Details of diversity composition across various levels of the organisation as at the end of FY2014 are set out below:

Level	Percentage of female	
	employees	Percentage of employees with diversity characteristics
JAMES HARDIE BOARD¹	14% (1 of 7)	29% (2 of 7)
	US BUSINESS²	
Senior leadership positions ³	10% (12 of 115)	23% (26 of 115)
All management positions	12% (47 of 390)	25% (97 of 390)
Total workforce	10% (214 of 2170)	35% (769 of 2170)
	NON-US BUSINESSES^{4,5}	
Senior leadership positions	3% (1 of 32)	
All management positions	12% (15 of 130)	
Total workforce	13% (130 of 977)	

¹ Includes gender and race diversity characteristics for the Board.

² Includes gender, race and national origin diversity characteristics for US Business

³ Individuals at senior manager and director level and above who participate in James Hardie's Company and Individual Performance (CIP) Plan

⁴ Includes Canada.

⁵ Race/national origin diversity characteristics vary between countries and are therefore not captured in aggregate for Non-US Business. The Board seeks to achieve a goal of 38% (3 of 8) non-executive directors with diversity characteristics and 25% (2 of 8) women by the FY16 AGM.

With regard to James Hardie's senior leadership, management, and the organisation as a whole, the following table outlines the organisation's five primary objectives in promoting diversity for FY2015, the actions in place to achieve these objectives as well as the progress made against these objectives to date.

Table of Contents

Objectives

To promote a culture of diversity (which includes gender, skills, experience, and cultural background)

Actions in place and progress

All employees receive training on the company's anti-discrimination and harassment and Code of Business Conduct and Ethics policies as part of the employee on-boarding program and on an annual basis.

To ensure that recruitment and selection processes are based on merit

In CY2014, the Board and the Nomination & Governance Committee evaluated and approved the company's diversity measures.

Structured interview evaluation process is in place for sales applicants and designed to mitigate bias in hiring decisions.

To provide talent management and development opportunities which provide equal opportunities for all current employees

MBA Leadership Program recruiting, targeted to bring future general management talent into the organisation, has resulted in 9 hires since its inception in 2011, with 33% female and 33% non-Caucasian hires.

Every employee has an individual development plan as part of the annual review process.

Openings under the Director-level are posted on-line and communicated internally. All current employees who meet the qualifications are invited to participate in the internal interviewing process.

Since January 2014, 18% of internal US applicants were females and 17% (1/6) were offered the role. 9% of all applicants for US internal positions were non-Caucasian (4/45); 17% were offered the role (1/6).

To reward and remunerate fairly

In FY2014, a high potential talent identification process was piloted. This process identifies top talent based on quantitative testing which has been validated to have no adverse impact on employees with diversity characteristics.

In FY2013 and again in FY2014, the organisation communicated pay grades and criteria for promotion across sales to help ensure there is no discrepancy in pay by role.

To provide flexible work practices

Hourly manufacturing wages are tied to completed certifications. All employees are provided access to training to complete certifications.

Flexible working arrangements are discussed with each employee and individual arrangements are offered as job requirements permit.

NYSE Corporate Governance Rules

In accordance with the NYSE corporate governance standards, listed companies that are foreign private issuers (which includes James Hardie) are permitted to follow home-country practice in lieu of the provisions of the corporate governance rules contained in Section 303A of the Listed Company Manual, except that foreign private issuers are required to comply with Section 303A.06, Section 303A.11 and Section 303A.12(b) and (c), each of which is discussed below.

Section 303A.06 requires that all listed companies have an Audit Committee that satisfies the requirements of Rule 10A-3 under the Exchange Act.

Table of Contents

Section 303A.11 provides that listed foreign private issuers must disclose any significant ways in which their corporate governance practices differ from those followed by US companies under the NYSE listing standards.

Section 303A.12(b) provides that each listed company's CEO must promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any material non-compliance with any applicable provisions of Section 303A. Section 303A.12(c) provides that each listed company must submit an executed written affirmation annually to the NYSE about its compliance with the NYSE's corporate governance listing standards and an interim written affirmation to the NYSE as and when required by the interim written affirmation form specified by the NYSE.

James Hardie presently complies with the mandatory NYSE listing standards and many of the non-compulsory standards including, for example, the requirement that a majority of our directors meet the independence requirements of the NYSE. In accordance with Section 303A.11, we disclose in this Corporate Governance Report any significant ways in which our corporate governance practices differ from those followed by US companies under the NYSE listing standards.

Two ways in which our corporate governance practices differ significantly from those followed by US domestic companies under NYSE listing standards should be noted:

In the US, an audit committee of a public company is required to be directly responsible for appointing the company's independent registered public accounting firm. Under Irish law, the independent registered public accounting firm is appointed by the shareholders where there is a new appointment. Otherwise, the appointment is deemed to continue unless the firm retires, is asked to retire or is unable to perform their duties; and

NYSE rules require each issuer to have an audit committee, a compensation committee (equivalent to a remuneration committee) and a nominating committee composed entirely of independent directors. As a foreign private issuer, we do not have to comply with this requirement. In our case, the Board Committee charters reflect Australian and Irish practices, in that we have a majority of independent directors on these committees, unless a higher number is mandatory. Notwithstanding this difference, our Board has determined that all of the current members of our Audit Committee, Remuneration Committee and Nominating and Governance Committee presently qualify as independent in accordance with the rules and regulations of the SEC and the NYSE.

Takeover Rules and Control Over the Company

James Hardie is subject to Irish takeover laws. The Irish Takeover Rules are built on several General Principles which are set out below. Also, the mandatory takeover threshold is set at 30%, meaning that a person (or persons acting in concert) who acquires 30% or more of the Company's voting rights must make a mandatory cash bid for all of the shares in the Company:

All holders of the securities of an offeree of the same class must be afforded equivalent treatment; moreover, if a person acquires control of a company, the other holders of securities must be protected.

The holders of the securities of an offeree must have sufficient time and information to enable them to reach a properly informed decision on the offer; where it advises the holders of securities, the board of the offeree must give its views on the effects of implementation of the offer on employment, conditions of employment and the locations of the offeree's places of business.

Table of Contents

The board of an offeree must act in the interest of the company as a whole and must not deny the holders of securities the opportunity to decide on the merits of the offer.

False markets must not be created in the securities of the offeree, of the offeror or of any other company concerned by the offer in such a way that the rise or fall of the prices of the securities becomes artificial and the normal functioning of the markets is distorted.

An offeror must announce an offer only after ensuring that he or she can pay in full any cash consideration, if such is offered, and after taking all reasonable measures to secure the implementation of any other type of consideration.

An offeree must not be hindered in the conduct of its affairs for longer than is reasonable by any offer for its securities.

A substantial acquisition of securities (whether such acquisition is to be effected by one transaction or a series of transactions) shall take place only at an acceptable speed and shall be subject to adequate and timely disclosure.

In addition to the operation of these rules, the Company may, from time to time, put in place appropriate retention arrangements to ensure that it retains its key employees during periods of corporate change.

SECTION 2

READING THIS REPORT

Forward-Looking Statements

This annual report contains forward-looking statements. James Hardie may from time to time make forward-looking statements in its periodic reports filed with or furnished to the SEC, on Forms 20-F and 6-K, in its annual reports to shareholders, in offering circulars, invitation memoranda and prospectuses, in media releases and other written materials and in oral statements made by the company's officers, directors or employees to analysts, institutional investors, existing and potential lenders, representatives of the media and others. Statements that are not historical facts are forward-looking statements and such forward-looking statements are statements made pursuant to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995.

Examples of forward-looking statements include:

statements about the company's future performance;

projections of the company's results of operations or financial condition;

statements regarding the company's plans, objectives or goals, including those relating to strategies, initiatives, competition, acquisitions, dispositions and/or its products;

expectations concerning the costs associated with the suspension or closure of operations at any of the company's plants and future plans with respect to any such plants;

expectations regarding the extension or renewal of the company's credit facilities including changes to terms, covenants or ratios;

expectations concerning dividend payments and share buy-backs;

statements concerning the company's corporate and tax domiciles and structures and potential changes to them, including potential tax charges;

statements regarding tax liabilities and related audits, reviews and proceedings;

statements regarding the possible consequences and/or potential outcome of the legal proceedings brought against two of the company's subsidiaries by the New Zealand Ministry of Education and the potential product liabilities, if any, associated with such proceedings;

expectations about the timing and amount of contributions to Asbestos Injuries Compensation Fund (AICF), a special purpose fund for the compensation of proven Australian asbestos-related personal injury and death claims;

Edgar Filing: James Hardie Industries plc - Form 20-F

expectations concerning indemnification obligations;

expectations concerning the adequacy of the company's warranty provisions and estimates for future warranty-related costs;

Table of Contents

statements regarding the company's ability to manage legal and regulatory matters (including but not limited to product liability, environmental, intellectual property and competition law matters) and to resolve any such pending legal and regulatory matters within current estimates and in anticipation of certain third-party recoveries; and

statements about economic conditions, such as changes in the US economic or housing recovery or changes in the market conditions in the Asia Pacific region, the levels of new home construction and home renovations, unemployment levels, changes in consumer income, changes or stability in housing values, the availability of mortgages and other financing, mortgage and other interest rates, housing affordability and supply, the levels of foreclosures and home resales, currency exchange rates, and builder and consumer confidence.

Words such as believe, anticipate, plan, expect, intend, target, estimate, project, predict, forecast, guideline, aim, will, may, objective, outlook and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Readers are cautioned not to place undue reliance on these forward-looking statements and all such forward-looking statements are qualified in their entirety by reference to the following cautionary statements.

Forward-looking statements are based on the company's current expectations, estimates and assumptions and because forward-looking statements address future results, events and conditions, they, by their very nature, involve inherent risks and uncertainties, many of which are unforeseeable and beyond the company's control. Such known and unknown risks, uncertainties and other factors may cause actual results, performance or other achievements to differ materially from the anticipated results, performance or achievements expressed, projected or implied by these forward-looking statements. These factors, some of which are discussed under Risk Factors in Section 3 of the Form 20-F filed with the Securities and Exchange Commission on 26 June 2014, include, but are not limited to: all matters relating to or arising out of the prior manufacture of products that contained asbestos by current and former James Hardie subsidiaries; required contributions to AICF, any shortfall in AICF and the effect of currency exchange rate movements on the amount recorded in the company's financial statements as an asbestos liability; governmental loan facility to AICF; compliance with and changes in tax laws and treatments; competition and product pricing in the markets in which the company operates; the consequences of product failures or defects; exposure to environmental, asbestos, putative consumer class action or other legal proceedings; general economic and market conditions; the supply and cost of raw materials; possible increases in competition and the potential that competitors could copy the company's products; reliance on a small number of customers; a customer's inability to pay; compliance with and changes in environmental and health and safety laws; risks of conducting business internationally; compliance with and changes in laws and regulations; the effect of the transfer of the company's corporate domicile from The Netherlands to Ireland, including changes in corporate governance and any potential tax benefits related thereto; currency exchange risks; dependence on customer preference and the concentration of the company's customer base on large format retail customers, distributors and dealers; dependence on residential and commercial construction markets; the effect of adverse changes in climate or weather patterns; possible inability to renew credit facilities on terms favourable to the company, or at all; acquisition or sale of businesses and business segments; changes in the company's key management personnel; inherent limitations on internal controls; use of accounting estimates; and all other risks identified in the company's reports filed with Australian, Irish and US securities agencies and exchanges (as appropriate). The company cautions you that the foregoing list of factors is not exhaustive and that other risks and uncertainties may cause actual results to differ materially from those referenced in the company's forward-looking statements. Forward-looking statements speak only as of the date they are made and are statements of the company's current expectations concerning future results, events and conditions. The company assumes no obligation to update any forward-looking statements or information except as required by law.

Table of Contents

Currency of presentation, exchange rates and certain definitions

The term "fiscal year" refers to our fiscal year ended 31 March of such year; the term "dollars," "US\$" or "\$" refers to US dollars; the term "A\$" refers to Australian dollars; and the term "NZ\$" refers to New Zealand dollars. Unless otherwise stated, all amounts in A\$ have been converted into US\$ at the 31 March 2014 exchange rate of A\$0.9220 to US\$1.0000 (assets and liabilities) and A\$0.9331 to US\$1.0000 (statements of operations and comprehensive income (loss)).

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following discussion of our financial condition and results of operations should be read in conjunction with the consolidated financial statements and notes to consolidated financial statements in this annual report.

Overview

We intend this discussion to provide information that will assist in understanding our 31 March 2014 consolidated financial statements, the changes in significant items in those consolidated financial statements from year to year, and the primary reasons for those changes and the factors and trends which are anticipated to have a material effect on our financial condition and results of operations in future periods. This discussion includes information about our critical accounting estimates and how these estimates affect our consolidated financial statements, and information about the consolidated financial results of each business segment to provide a better understanding of how each segment and its results affect our financial condition and results of operations as a whole.

Our consolidated financial statements are prepared in accordance with US GAAP. Our discussion in this section includes several non-GAAP measures to provide additional information concerning our performance. We believe that these non-GAAP measures enhance an investor's overall understanding of our financial performance by being more reflective of our core operational activities and more comparable with our financial results over various periods. In addition, we use non-GAAP financial measures internally for strategic decision making, forecasting future results and evaluating current performance. Non-GAAP financial measures include:

EBIT and EBIT margin excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability

Net operating profit excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability and tax adjustments

Diluted earnings per share excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability and tax adjustments

Effective tax rate on earnings excluding asbestos, asset impairments, New Zealand product liability and tax adjustments

Adjusted EBITDA

General corporate costs excluding ASIC expenses, intercompany foreign exchange gain and recovery of RCI legal costs

Selling, general and administrative expenses excluding New Zealand product liability

Table of Contents

We have reconciled these non-GAAP financial measures to the most directly comparable US GAAP financial measure for fiscal years 2014 and 2013 in the Glossary of Abbreviations and Definitions in Section 4 below. These non-GAAP financial measures are not prepared in accordance with US GAAP; therefore, the information is not necessarily comparable to other companies' financial information and should be considered as a supplement to, not a substitute for, or superior to, the corresponding measures calculated in accordance with US GAAP.

Our pre-tax results for fiscal year 2014 were affected by unfavourable asbestos adjustments of US\$195.8 million, AICF Selling, General and Administrative (SG&A) expenses of US\$2.1 million and New Zealand product liability expenses of US\$1.8 million. For fiscal year 2013, our pre-tax results were affected by unfavourable asbestos adjustments of US\$117.1 million, asset impairments of US\$16.9 million, New Zealand product liability expenses of US\$13.2 million, ASIC expenses of US\$2.6 million, and AICF SG&A expenses of US\$1.7 million. Information regarding our asbestos-related matters, asset impairments, ASIC matters and New Zealand product liability expenses can be found in this discussion and Notes 7, 11 and 13 to our consolidated financial statements.

Fiscal Year 2014 Key Results

Total net sales increased 13% to US\$1,493.8 million in fiscal year 2014. Operating income increased to US\$53.1 million in fiscal year 2014 from US\$29.5 million in fiscal year 2013, primarily due to higher net sales, lower New Zealand product liability expenses and unfavourable asset impairment charges in fiscal year 2013 which did not re-occur in fiscal year 2014. Operating income in fiscal year 2014 was affected by unfavourable asbestos adjustments of US\$195.8 million, AICF SG&A expenses of US\$2.1 million and New Zealand product liability expenses of US\$1.8 million. For fiscal year 2013, operating income was affected by unfavourable asbestos adjustments of US\$117.1 million, New Zealand product liability expenses of US\$13.2 million, asset impairment charges of US\$16.9 million, and AICF SG&A expenses of US\$1.7 million.

Operating income excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability expenses increased 40% to US\$252.8 million in fiscal year 2014 from US\$181.0 million in fiscal year 2013.

Net income increased from US\$45.5 million in fiscal year 2013 to US\$99.5 million in fiscal year 2014. Net income in fiscal year 2013 included, on a pre-tax basis, a US\$5.5 million foreign exchange gain and a US\$2.7 million legal cost recovery from the ATO, as discussed below. Net income excluding asbestos, asset impairments, ASIC expenses, New Zealand product liability expenses and tax adjustments increased 40% to US\$197.2 million in fiscal year 2014 from US\$140.8 million in fiscal year 2013.

Our largest market is North America. During fiscal year 2014, USA and Europe Fibre Cement net sales contributed approximately 75% of total net sales, and operating income from this segment was the primary contributor to the total company results. Net sales for our USA and Europe Fibre Cement business increased 19% due to higher sales volume and higher average net sales price.

USA and Europe Fibre Cement operating income increased 63% from US\$145.6 million in fiscal year 2013 to US\$237.0 million in fiscal year 2014 primarily due to higher sales volume and a higher average net sales price. Excluding asset impairment charges of US\$16.9 million in fiscal 2013, operating income increased from US\$162.5 million in fiscal year 2013 to US\$237.0 million in fiscal year 2014.

During fiscal year 2014, Asia Pacific Fibre Cement net sales decreased 1%. In Australian dollars, net sales increased 9% due to increased sales volume and a higher average net sales price, relative to the prior year. The increase in Australian dollar net sales during the period was unfavourably impacted by an 10% depreciation in the Australian dollar/US dollar average exchange rate, leading to a reduction in US dollar net sales relative to the prior year.

Table of Contents

Asia Pacific Fibre Cement operating income increased 31% from US\$61.7 million in fiscal year 2013 to US\$81.1 million in fiscal year 2014. In Australian dollars, Asia Pacific Fibre Cement operating income increased 45% compared to the prior fiscal year, due to an increase in the Australian dollar average net sales price, and a decrease in production costs driven lower by economies of scale achieved through a 6% increase in volume compared to the prior year. The increase in Australian dollar EBIT excluding New Zealand product liability during the full year was partially offset by the 10% depreciation in the Australian dollar/US dollar average exchange rate, leading to a reduction in US dollar EBIT in the year ended 31 March 2014 compared to the year ended 31 March 2013. Excluding New Zealand product liability expenses, operating income increased 11% from US\$74.9 million in fiscal year 2013 to US\$82.9 million in fiscal year 2014.

We do not believe that general inflation has had a significant impact on our results of operations for the fiscal years ended 31 March 2014, 2013 and 2012.

Critical Accounting Estimates

The accounting policies affecting our financial condition and results of operations are more fully described in Note 2 to our consolidated financial statements. Certain of our accounting policies require the application of judgment by management in selecting appropriate assumptions for calculating financial estimates, which inherently contain some degree of uncertainty. Management bases its estimates on historical experience and other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the reported carrying value of assets and liabilities and the reported amounts of revenues and expenses that may not be readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions. We consider the following policies to be the most critical in understanding the judgments that are involved in preparing our consolidated financial statements and the uncertainties that could impact our results of operations, financial condition and cash flows.

Accounting for Contingencies

We account for loss contingencies arising from contingent obligations when the obligations are probable and the amounts are reasonably estimable. As facts concerning contingencies become known, we reassess our situation and make appropriate adjustments to the consolidated financial statements.

Accounting for the AFFA

Prior to 31 March 2007, the Company recorded an asbestos provision because it believed it was probable it would be obligated to make payments to fund asbestos-related claims on a long-term basis in accordance with the Original Final Funding Agreement.

In February 2007, the AFFA was approved to provide long-term funding to AICF, a special purpose fund that provides compensation for Australian asbestos-related personal injury and death claims for which certain former subsidiaries of the James Hardie Group, including ABN 60, Amaca Pty Ltd (Amaca) and Amaba Pty Ltd (Amaba) are found liable.

The amount of the asbestos liability reflects the terms of the AFFA, which has been recognised by reference to (but is not exclusively based upon) the most recent actuarial estimate of projected future cash flows calculated by KPMG Actuarial (KPMGA). Based on their assumptions, KPMGA arrived at a range of possible total future cash flows and calculated a central estimate, which is intended to reflect a probability-weighted expected outcome of those actuarially estimated future cash flows. The company views the central estimate as the basis for recognising the asbestos liability in the company's financial statements.

Table of Contents

The company considered discounting when determining the best estimate under US GAAP. The company has recognised the asbestos liability by reference to (but not exclusively based upon) the central estimate as undiscounted on the basis that it is the company's view that the timing and amounts of such cash flows are not fixed or readily determinable. The company considered inflation when determining the best estimate under US GAAP. It is the company's view that there are material uncertainties in estimating an appropriate rate of inflation over the extended period of the AFFA. The company views the undiscounted and uninflated central estimate as the best estimate under US GAAP.

Adjustments in the asbestos liability due to changes in the actuarial estimate of projected future cash flows and changes in the estimate of future operating costs of AICF are reflected in the consolidated statements of operations and comprehensive income during the period in which they occur. Claims paid by AICF and claims-handling costs incurred by AICF are treated as reductions in the accrued balances previously reflected in the consolidated balance sheets.

In estimating the potential financial exposure, KPMG Actuarial has made a number of assumptions. These include an estimate of the total number of claims by disease type which are reasonably estimated to be asserted through 2074, the typical average cost of a claim settlement (which is sensitive to, among other factors, the industry in which the plaintiff claims exposure, the alleged disease type and the jurisdiction in which the action is being brought), the legal costs incurred in the litigation of such claims, the proportion of claims for which liability is repudiated, the rate of receipt of claims, the settlement strategy in dealing with outstanding claims, the timing of settlements of future claims and the long-term rate of inflation of claim awards and legal costs.

Due to inherent uncertainties in the legal and medical environment, the number and timing of future claim notifications and settlements, the recoverability of claims against insurance contracts, and estimates of future trends in average claim awards, as well as the extent to which the above-named entities will contribute to the overall settlements, the actual amount of liability could differ materially from that which is currently projected and could result in significant debits or credits to the consolidated balance sheet and statement of operations and comprehensive income (loss).

An updated actuarial assessment is performed as of 31 March each year. Any changes in the estimate will be reflected as a charge or credit to the consolidated statements of operations for the year then ended. Material adverse changes to the actuarial estimate would have an adverse effect on our business, results of operations and financial condition. A copy of KPMGA's actuarial assessment as at 31 March 2014 is available on the Investor Relations area of our website (www.ir.jameshardie.com.au).

Sales Rebates and Discounts

We record estimated reductions to sales for customer rebates and discounts including volume, promotional, cash and other rebates and discounts. Rebates and discounts are recorded based on management's best estimate when products are sold. The estimates are based on historical experience for similar programs and products. Management reviews these rebates and discounts on an ongoing basis and the related accruals are adjusted, if necessary, as additional information becomes available.

Accounts Receivable

We evaluate the collectability of accounts receivable on an ongoing basis based on historical bad debts, customer credit-worthiness, current economic trends and changes in our customer payment activity. An allowance for doubtful accounts is provided for known and estimated bad debts. Although credit losses have historically been within our expectations, we cannot guarantee that we will continue

Table of Contents

to experience the same credit loss rates that we have in the past. Because our accounts receivable are concentrated in a relatively small number of customers, a significant change in the liquidity or financial position of any of these customers could impact their ability to make payments and result in the need for additional allowances which would decrease our net sales.

Inventory

Inventories are recorded at the lower of cost or market. In order to determine market, management regularly reviews inventory quantities on hand and evaluates significant items to determine whether they are excess, slow-moving or obsolete. The estimated value of excess, slow-moving and obsolete inventory is recorded as a reduction to inventory and an expense in cost of sales in the period in which it is identified. This estimate requires management to make judgments about the future demand for inventory, and is therefore at risk to change from period to period. If our estimate for the future demand for inventory is greater than actual demand and we fail to reduce manufacturing output accordingly, we could be required to record additional inventory reserves, which would have a negative impact on our gross profit.

Further, we have distributor arrangements that we maintain with certain customers where we own inventory that is physically located in a customer's or third party's warehouse. As a result, our ability to effectively manage inventory levels may be impaired, which would cause our total inventory turns to decrease. In that event, our expenses associated with excess and obsolete inventory could increase and our cash flow could be negatively impacted.

Accrued Warranty Reserve

We have offered, and continue to offer, various warranties on our products, including a 30-year limited warranty on certain of our fibre cement siding products in the United States. Because our fibre cement products have only been used in North America since the early 1990s, there is a risk that these products will not perform in accordance with our expectations over an extended period of time. A typical warranty program requires that we replace defective products within a specified time period from the date of sale. We record an estimate for future warranty-related costs based on an analysis by us, which includes the historical relationship of warranty costs to installed product. Based on this analysis and other factors, we adjust the amount of our warranty provisions as necessary. Although our warranty costs have historically been within calculated estimates, if our experience is significantly different from our estimates, it could result in the need for additional reserves.

New Zealand Product Liability

We have recognised a liability for certain asserted and unasserted New Zealand product liability claims. There is a risk that the amount of estimated loss will be materially greater or less than the actual expense incurred. These claims often involve multiple parties and the respective liabilities are dependent on a number of factors, including but not limited to, the specific facts and circumstances surrounding each individual claim, the continued solvency of co-defendants, the extent to which the company's New Zealand subsidiaries have had access to third-party recoveries to cover a portion of the costs incurred in defending these claims and the ability of the company's New Zealand subsidiaries to successfully time-bar certain claims based on the statute of limitations. Further, the total number of claims received by the company's New Zealand subsidiaries is unknown and historical claims experience may not be indicative of the future expense to be incurred. Due to the inherent uncertainties associated with estimating the amount of loss incurred for asserted and unasserted claims, as discussed above, and based on information presently available, the company believes it is possible that the ultimate resolution of these legacy claims could result in an additional loss of up to approximately US\$3.6 million in excess of the amount accrued, net of estimated third-party recoveries, at 31 March 2014.

Table of Contents

Recently, the New Zealand High Court delivered a judgment holding that the 10 year longstop under the Building Act did not apply to product liability lawsuits against building materials manufacturers. The Court's judgment has the potential to extend the time period in which claimants can pursue a limited type of claim against such parties for up to an additional five years. The company has historically been successful in resolving such claims for de minimis amounts and as such does not expect the judgment to materially alter the provision for asserted and unasserted New Zealand product liability claims recorded on the company's 31 March 2014 Consolidated Financial Statements.

Accounting for Income Tax

We recognise deferred tax assets and deferred tax liabilities for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts using enacted tax rates in effect for the year in which we expect the differences to reverse. We record a valuation allowance to reduce the deferred tax assets to the amount that we are more likely than not to realise. We must assess whether, and to what extent, we can recover our deferred tax assets. If full or partial recovery is unlikely, we must increase our income tax expense by recording a valuation allowance against the portion of deferred tax assets that we cannot recover. We believe that we will recover all of the deferred tax assets recorded (net of valuation allowance) on our consolidated balance sheet at 31 March 2014. However, if facts later indicate that we will be unable to recover all or a portion of our net deferred tax assets, our income tax expense would increase in the period in which we determine that recovery is unlikely.

We evaluate our uncertain tax positions in accordance with the guidance for accounting for uncertainty in income taxes. We believe that our reserve for uncertain tax positions, including related interest, is adequate. Due to our size and the nature of our business, we are subject to ongoing reviews by taxing jurisdictions on various tax matters, including challenges to various positions we assert on our income tax returns. The amounts ultimately paid upon resolution of these matters could be materially different from the amounts previously included in our income tax expense and therefore could have a material impact on our tax provision, net income and cash flows. Positions taken by an entity in its income tax returns must satisfy a more-likely-than-not recognition threshold, assuming that the positions will be examined by taxing authorities with full knowledge of all relevant information, in order for the positions to be recognised in the consolidated financial statements. Each quarter we evaluate the income tax positions taken, or expected to be taken, to determine whether these positions meet the more-likely-than-not threshold. We are required to make subjective judgments and assumptions regarding our income tax exposures and must consider a variety of factors, including the current tax statutes and the current status of audits performed by tax authorities in each tax jurisdiction. To the extent an uncertain tax position is resolved for an amount that varies from the recorded estimated liability, our income tax expense in a given financial statement period could be materially affected.

Impairment of Long-Lived Assets

Long-lived assets, such as property, plant and equipment, are evaluated each quarter for events or changes in circumstances that indicate that an asset might be impaired because the carrying amount of the asset may not be recoverable. These include, without limitation, a significant adverse change in the extent or manner in which a long-lived asset or asset group is being used, a current period operating or cash flow loss combined with a history of operating or cash flow losses, a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset or asset group and/or a current expectation that it is more likely than not that a long-lived asset or asset group will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. Identifying these events and changes in circumstances, and assessing their impact on the appropriate valuation of the affected assets requires us to make judgments, assumptions and estimates.

Table of Contents

When such indicators of potential impairment are identified, recoverability is tested by grouping long-lived assets that are used together and represent the lowest level for which cash flows are identifiable and distinct from the cash flows of other long-lived assets, which is typically at the production line or plant facility level, depending on the type of long-lived asset subject to an impairment review. Recoverability is measured by a comparison of the carrying amount of the asset group to the estimated undiscounted future cash flows expected to be generated by the asset group. If the carrying amount exceeds the estimated undiscounted future cash flows, an impairment charge is recognised at the amount by which the carrying amount exceeds the estimated fair value of the asset group.

The methodology used to estimate the fair value of the asset group is typically based on a discounted cash flow analysis that considers the asset group's highest and best use that would maximise the value of the asset group. In addition, the estimated fair value of an asset group also considers, to the extent practicable, a market participant's expectations and assumptions in estimating the fair value of the asset group. If the estimated fair value of the asset group is less than the carrying value, an impairment loss is recognised at an amount equal to the excess of the carrying value over the estimated fair value of the asset group.

In fiscal year 2014, we did not record any asset impairment charges. Asset impairment charges of US\$12.5 million recognised in fiscal year 2013 included US\$2.8 million related to redundant equipment that is no longer being utilised to manufacture products and US\$9.7 million related to manufacturing equipment that is in the process of being replaced by plant and equipment with enhanced capability in anticipation of the continued recovery in the US housing market.

In estimating the fair value of the asset group, we are required to make certain estimates and assumptions that include forecasting the useful lives of the assets, selecting an appropriate discount rate that reflects the risk inherent in future cash flows, forecasting market demand for our products and recommissioning idle assets to meet anticipated capacity constraints in the future. We have not made any material changes in the accounting methodology we use to assess impairment loss during the past three fiscal years. However, if actual results are not consistent with our estimates and assumptions used in estimating future cash flows and asset fair values, we may be exposed to material impairment losses in future periods.

Impact of Recent Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board (FASB) issued ASU No. 2014-12, which provides explicit guidance on whether to treat a performance target that could be achieved after the requisite service period as a performance condition that affects vesting or as a nonvesting condition that affects the grant-date fair value of an award. The amendments in ASU No. 2014-12 are effective for fiscal years and interim periods within those years, beginning after 15 December 2015. We are still evaluating the new standard and has not yet determined the potential effects on the consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, which provides guidance requiring companies to recognise revenue depicting the transfer of goods or services to customers in amounts that reflect the payment to which a company expects to be entitled in exchange for those goods or services. The ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognised from costs incurred to obtain or fulfil a contract. This ASU is effective for annual reporting periods beginning after December 15, 2016, and interim periods within those years, and early adoption is not permitted. Companies may use either a full retrospective or a modified retrospective approach to adopt this ASU and management is currently evaluating which transition approach to use. We are still evaluating the new standard and has not yet determined the potential effects on the consolidated financial statements.

Table of Contents

In July 2013, the FASB issued ASU No. 2013-11, which provides explicit guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendments in ASU No. 2013-11 are effective for fiscal years and interim periods within those years, beginning after 15 December 2013. We have evaluated the impact of this ASU and does not expect its adoption to have a material impact on our consolidated financial position, results of operations or cash flows.

Results of Operations**Year Ended 31 March 2014 Compared to Year Ended 31 March 2013**

The following table shows our selected financial and operating data for operations for fiscal years 2014 and 2013, expressed in millions of US dollars, unless otherwise stated.

	Fiscal Years Ended 31 March		Favourable (Unfavourable) Change
	2014	2013	
Net sales:			
USA and Europe Fibre Cement	\$ 1,127.6	\$ 951.4	19 %
Asia Pacific Fibre Cement	366.2	369.9	(1)
Total net sales	1,493.8	1,321.3	13
Cost of goods sold	(987.4)	(902.0)	(9)
Gross profit	506.4	419.3	21
Selling, general and administrative expenses	(224.4)	(218.6)	(3)
Research and development expenses	(33.1)	(37.2)	11
Asset impairments	-	(16.9)	-
Asbestos adjustments	(195.8)	(117.1)	(67)
Operating income	53.1	29.5	80
Net interest income (expense)	(1.1)	2.4	-
Other income	2.6	1.8	44
Income before income taxes	54.6	33.7	62
Income tax benefit	44.9	11.8	-
Net income	\$ 99.5	\$ 45.5	-
Volume (mmsf):			
USA and Europe Fibre Cement	1,696.9	1,488.5	14 %
Asia Pacific Fibre Cement	417.2	393.7	6 %
Average net sale price per unit (per msf):			
USA and Europe Fibre Cement	US\$652	US\$626	4 %
Asia Pacific Fibre Cement	A\$930	A\$901	3 %

Net sales. Total net sales increased 13% from US\$1,321.3 million in fiscal year 2013 to US\$1,493.8 million in fiscal year 2014. The increase in total net sales reflected was favourably impacted by higher sales volumes and higher average net sales prices in both the USA and Europe and the Asia Pacific Fibre Cement segments.

USA and Europe Fibre Cement net sales. Net sales increased 19% from US\$951.4 million in fiscal year 2013 to US\$1,127.6 million in fiscal year 2014 due to higher sales volume and a higher average net sales price.

Table of Contents

Sales volume increased 14% from 1,488.5 million square feet in fiscal year 2013 to 1,696.9 million square feet in fiscal year 2014, reflecting increased activity in the new construction market segment, further market penetration, and modest growth in the repair and remodel market segment, relative to the prior year.

The average net sales price increased 4% from US\$626 per thousand square feet in fiscal year 2013 to US\$652 per thousand square feet in fiscal year 2014.

For fiscal year 2014, the NBSK pulp price was 11% higher at US\$971 per ton, when compared to fiscal year 2013.

According to the US Census Bureau, single family housing starts, which are one of the key drivers of the company's performance, were 615,400 for the fiscal year ended 31 March 2014, 8.7% above the prior year. Industry data for the full year indicates gains in both single-family and multi-family production relative to the prior year.

Asia Pacific Fibre Cement net sales. Net sales decreased 1% from US\$369.9 million in fiscal year 2013 to US\$366.2 million in fiscal year 2014. In Australian dollars, net sales increased 9% due to increased sales volume and a higher average net sales price, relative to the prior year. The increase in Australian dollar net sales during the period was unfavourably impacted by an 10% depreciation in the Australian dollar/US dollar average exchange rate, leading to a reduction in US dollar net sales relative to the prior year.

According to Australian Bureau of Statistics data, for the year ended 31 March 2014, approvals for detached houses, which are the primary driver of the Asia Pacific business' sales volume were 104,394 for the year ended 31 March 2014; an increase of 16%, compared to fiscal year 2013.

Sales volume in the Australian business decreased in fiscal year 2014 compared to fiscal year 2013, reflecting an increasingly competitive operating environment.

During fiscal year 2014, excluding New Zealand product liability expenses, the New Zealand business' earnings increased when compared to fiscal year 2013, reflecting an improved operating environment.

The Philippines business' sales volume increased in fiscal year 2014, compared to fiscal year 2013. The average net sales price for fiscal year 2014 increased compared to fiscal year 2013.

Gross profit. Gross profit increased 21% from US\$419.3 million in the prior year to US\$506.4 million. The gross profit margin increased 2.2 percentage points from 31.7% to 33.9%.

USA and Europe Fibre Cement. Gross profit increased 26% and gross margin increased 2.1 percentage points, compared to the prior year. Gross margin was favourably impacted by 2.5 percentage points due to an increase in the average net sales price; partially offset by an unfavourable 0.4 percentage points due to higher production costs. Production costs were unfavourable due to increases in input and idle facility costs; partially offset by economies of scale achieved through a 14% increase in volume. The increase in idle facility costs was primarily a result of the company's continued efforts to recommence production at the Fontana, California location.

Asia Pacific Fibre Cement. In US dollars, gross profit for the full year increased 6% and gross margin increased 2.4 percentage points compared to the prior year. In Australian dollars, gross profit increased 18% and gross margin increased 2.4 percentage points. Gross margin was favourably impacted by 1.9 percentage points due to lower production costs and 1.1 percentage points due to a higher average net sales price. The production costs were favourable primarily due to economies of scale achieved through an 6% increase in volume; partially offset by higher input costs.

Table of Contents

Selling, general and administrative (SG&A) expenses. SG&A expenses increased US\$5.8 million from US\$218.6 million in the prior year to US\$224.4 million. The increase reflects an increase of US\$9.7 million in general corporate costs and US\$8.5 million in compensation expenses of the business units, partially offset by a decrease of US\$11.4 million in the New Zealand product liability expenses. Compensation expenses were driven higher by company performance-based incentive bonuses and higher headcount to enhance organisational capabilities. New Zealand product liability expenses were driven lower by the combined effects of an increased rate of claim-resolution leading to fewer open cases, substantial reductions in the values of new claims received, and fewer new claims being received.

SG&A expenses for the full year included non-claims handling related operating expenses for AICF of US\$2.1 million, compared to US\$1.7 million in the prior year.

Readers are referred to Note 13 to our consolidated financial statements and Section 3, Legal Proceedings for further information about the New Zealand product liability expenses.

General corporate costs. General corporate costs increased 29% from US\$33.0 million in fiscal year 2013 to US\$42.7 million in fiscal year 2014.

The increase reflects a US\$7.7 million increase in compensation expenses and the net unfavourable impact of US\$5.6 million of prior year non-recurring transactions; partially offset by a US\$2.1 million decrease in professional fees and a US\$1.0 million decrease in other administrative expenses when compared with the prior year. Compensation expenses were driven higher by company performance-based incentive bonuses. The net US\$5.6 million prior year impact was a combination of foreign exchange gains of US\$5.5 million following the conclusion of RCI s disputed fiscal year 1999 amended tax assessment with the ATO and the recovery of legal costs of US\$2.7 million; partially offset by ASIC expenses of US\$2.6 million.

Excluding these items, general corporate costs for full year increased \$4.1 million from US\$38.6 million in the prior year to US\$42.7 million. The increase was primarily due to a US\$7.7 million increase in compensation expenses primarily driven by higher company performance-based incentive bonuses, partially offset by a US\$2.1 million decrease in professional fees and US\$1.0 million in other administrative expense, compared with the prior year.

Research and development (R&D) expenses. Research and development expenses include costs associated with research projects that are designed to benefit all business units. These costs are recorded in the R&D segment rather than attributed to individual business units. For full year, these costs decreased 6% from US\$23.6 million in the prior year to US\$22.2 million.

Other R&D costs associated with commercialisation projects in business units are included in the business unit segment results. In total, these costs were 20% lower for the full year at US\$10.9 million, compared to US\$13.6 million in the prior year.

The research and development segment also included selling, general and administrative expenses of US\$2.2 million and US\$2.4 million for full year 2014 and 2013, respectively.

The decrease in R&D expenses during the full year primarily resulted from the completion of certain projects that were ongoing in the prior year, partially offset by higher R&D headcount and related expenses due to the opening of an R&D facility in Chicago, Illinois in the prior year.

Asset Impairments. The company performs an asset impairment review on a quarterly basis in connection with its assessment of production capabilities and the company s ability to meet market demand. In fiscal year 2014, the company did not record asset impairment charges.

Table of Contents

During fiscal year 2013, the company recorded an asset impairment charge of US\$16.9 million related to machinery and equipment in the USA and Europe Fibre Cement segment.

Readers are referred to Note 7 to the consolidated financial statements for further information on asset impairments.

Asbestos adjustments. The company's asbestos adjustments are derived from an estimate of future Australian asbestos-related liabilities in accordance with the AFFA.

The asbestos-related assets and liabilities are denominated in Australian dollars. Therefore, the reported value of these asbestos-related assets and liabilities in the company's Consolidated Balance Sheet in US dollars is subject to adjustment, with a corresponding effect on the company's Consolidated Statement of Operations and Comprehensive Income, depending on movements in the closing exchange rate between the two currencies at each balance sheet date.

Based on KPMG Actuarial's assumptions for the fiscal year ended 31 March 2014, KPMG Actuarial arrived at a range of possible total cash flows and proposed a central estimate which is intended to reflect an expected outcome. The company has recognised the asbestos liability by reference to (but not exclusively based upon) the central estimate as undiscounted on the basis that it is the company's view that the timing and amounts of such cash flows are not fixed or readily determinable. The company considered inflation when determining the best estimate under US GAAP. It is the company's view that there are material uncertainties in estimating an appropriate rate of inflation over the extended period of the AFFA. The company views the undiscounted and uninflated central estimate as the best estimate under US GAAP.

The undiscounted and uninflated central estimate net of insurance recoveries, of the asbestos liability increased from A\$1.345 billion at 31 March 2013 to A\$1.547 billion at 31 March 2014. The increase in the undiscounted and uninflated central estimate of A\$202 million is primarily due to an increase in the projected future number of claims for mesothelioma reflecting both higher levels of claims volumes and a change in the incidence pattern for mesothelioma, an increased allowance for large claims for mesothelioma resulting from higher numbers of large claims, lower nil settlement rates being assumed for mesothelioma and lung cancer, partially offset by lower average claims sizes and average defence legal cost assumptions for most disease types.

During the 2014 fiscal year, mesothelioma claims reporting activity has been above actuarial expectations for the second consecutive year. One of the critical assumptions is the estimated peak year of mesothelioma disease claims, which was previously assumed to have occurred in 2010/2011. Potential variation in this estimate has an impact much greater than the other assumptions used to derive the discounted central estimate. In performing the sensitivity assessment of the estimated period of peak claims reporting for mesothelioma, KPMGA has determined that if claims reporting does not begin to reduce until after 2018/2019, the discounted central estimate could increase by approximately 22% (in addition to the 17% increase that has already been factored into the 31 March 2014 valuation). At 31 March 2014, KPMG Actuarial has formed the view that the higher claims reporting assumed in the short and medium term is not necessarily indicative of longer term impacts, as at this stage it is too early to form such a conclusion on the basis of one year's experience.

For the full year, the Australian dollar spot exchange rate against the US dollar depreciated 12% to US\$0.92 at 31 March 2014 compared to 31 March 2013.

Table of Contents

The company receives an updated actuarial estimate as of 31 March each year. The last actuarial assessment was performed as of 31 March 2014. The asbestos adjustments for the full years ended 31 March 2014 and 2013 are as follows:

(Millions of US dollars)	Fiscal Years Ended 31 March	
	2014	2013
Change in estimates	\$ (308.2)	\$ (129.2)
Write back of insurance receivables	15.2	11.9
Effect of foreign exchange movements	97.2	0.2
Asbestos adjustments	\$ (195.8)	\$ (117.1)

Claims Data. The number of new claims filed in fiscal year 2014 of 608 is higher than new claims of 542 reported in fiscal year 2013, and above actuarial expectations of 540 for fiscal year 2014.

The number of settled claims in fiscal year 2014 of 604 is higher than claims settled of 519 in fiscal year 2013 and above actuarial expectations of 544 for fiscal year 2014.

The average claim settlement in fiscal year 2014 of A\$253,000 is A\$22,000 higher than fiscal year 2013 and is largely attributable to mesothelioma claims, which are more costly to settle and represented a larger proportion of total claims than in prior year. However, average claim sizes for mesothelioma were slightly below actuarial expectations for fiscal year 2014, with the average cost of settling non-mesothelioma claims being in line with, or below, actuarial expectations for the full year ended 31 March 2014.

Asbestos claims paid of A\$140.4 million for fiscal year 2014 are higher than the actuarial expectation of A\$131.4 million.

All figures provided in this Claims Data section are gross of insurance and other recoveries. Readers are referred to Note 11 to our consolidated financial statements for further information on asbestos adjustments.

AICF Loan Facility. On 25 March 2014, AICF drew down A\$25.3 million under the secured standby loan facility and related agreements (the Facility) with the State of New South Wales, Australia. This is an additional draw down to the A\$25.3 million drawn on 13 December, 2013. AICF had an outstanding balance on the Facility of A\$50.6 million (being US\$47.0 million, based on the prevailing spot exchange rate) reflected on the consolidated balance sheet within Current portion of long-term debt Asbestos at 31 March 2014.

Readers are referred to Note 11 of our consolidated financial statements for further information.

Operating income. Operating income increased 80% to US\$53.1 million in fiscal year 2014, compared to US\$29.5 million in fiscal year 2013. Operating income in fiscal year 2014 included unfavourable asbestos adjustments of US\$195.8 million, AICF SG&A expenses of US\$2.1 million and New Zealand product liability expense of US\$1.8 million. In fiscal year 2013, operating income included unfavourable asbestos adjustments of US\$117.1 million, asset impairments of US\$16.9 million, unfavourable New Zealand product liability expense of US\$13.2 million, ASIC expenses of US\$2.6 million, and AICF SG&A expenses of US\$1.7 million.

USA and Europe Fibre Cement operating income increased 63% from US\$145.6 million in fiscal year 2013 to US\$237.0 million in fiscal year 2014. The increase in operating income was favourably impacted primarily by higher volume, and a higher average net sales price, partially offset by higher

Table of Contents

production costs. Operating income margin was 5.7 percentage points lower at 21.0%. Excluding asset impairment charges, operating income increased from US\$162.5 million in fiscal year 2013 to US\$237.0 million in fiscal year 2014. The USA and Europe Fibre Cement operating income margin excluding asset impairment charges was 3.9 percentage points lower at 21.0%.

Asia Pacific Fibre Cement operating income increased 31% from US\$61.7 million in fiscal year 2013 to US\$81.1 million in fiscal year 2014. In Australian dollars, Asia Pacific Fibre Cement operating income increased 45% compared to the prior year, due to an increase in the Australian dollar average net sales price, and a decrease in production costs driven lower by economies of scale achieved through a 6% increase in volume compared to the prior year. The increase in Australian dollar EBIT excluding New Zealand product liability during the full year was partially offset by the 10% depreciation in the Australian dollar/US dollar average exchange rate, leading to a reduction in US dollar EBIT in the year ended 31 March 2014 compared to the year ended 31 March 2013. Operating income margin was 5.4 percentage points higher at 22.1%. Excluding New Zealand product liability expenses, operating income increased 11% from US\$74.9 million in fiscal year 2013 to US\$82.9 million in fiscal year 2014. The Asia Pacific Fibre Cement operating income margin excluding New Zealand product liability expenses was 2.3 percentage points lower at 22.6%.

Net interest income (expense). Net interest income (expense) moved from income of US\$2.4 million in the prior year to net interest expense of US\$1.1 million. Net interest expense for the year included AICF interest income of US\$2.9 million and other interest income of US\$0.5 million, offset by credit facility fees of US\$3.9 million and a realised loss of US\$0.6 million on interest rate swaps. Net interest income for the full year ended 31 March 2013 included AICF interest income of US\$7.0 million and other interest income of US\$0.9 million, partially offset by interest and borrowing costs relating to the company's external credit facilities of US\$3.4 million and a realised loss of US\$2.1 million on interest rate swaps

Other income. Other income increased from US\$1.8 million in the prior year to US\$2.6 million in the current year.

Income tax (benefit) expense. The company's income tax rate was a benefit of 82.2% for the full year compared to an income tax benefit rate of 35.0% in the prior year. During the full year the effective tax rate was impacted by an unfavourable asbestos adjustment of US\$195.8 million when compared to an unfavourable asbestos adjustment of US\$117.1 million in the corresponding period. In addition, the effective tax rate for the full year was favourably impacted by a A\$17.3 million (US\$15.4 million) refund received from the Australia Taxation Office (ATO) in January 2014, related to the successful appeal by our wholly owned subsidiary RCI Pty Ltd (RCI) of its disputed amended tax assessment.

Income tax expense excluding asbestos-related and other tax adjustments for the full year increased from US\$37.4 million in the prior year to US\$54.2 million. The effective tax rate excluding asbestos, asset impairments, New Zealand liability, and other tax adjustments increased from 21.3% in the prior year to 21.6% primarily due to a higher proportion of taxable earnings in jurisdictions with higher tax rates relative to the prior year.

Tax Adjustments. The company recorded net favourable asbestos-related and other tax adjustments of US\$99.1 million for the full year, compared to net favourable adjustments of US\$49.2 million for the prior year.

Net income. Net income increased from US\$45.5 million in fiscal year 2013 to US\$99.5 million in fiscal year 2014. Net income excluding asbestos, asset impairments, ASIC expenses, New Zealand product liability expenses and tax adjustments increased 40% from US\$140.8 million in fiscal year 2013 to US\$197.2 million in fiscal year 2014.

Table of Contents**Year Ended 31 March 2013 Compared to Year Ended 31 March 2012**

The following table shows our selected financial and operating data for operations for fiscal years 2013 and 2012, expressed in millions of US dollars, unless otherwise stated.

	Fiscal Years Ended 31 March		Favourable (Unfavourable) Change
	2013	2012	
Net sales:			
USA and Europe Fibre Cement	\$ 951.4	\$ 862.0	10 %
Asia Pacific Fibre Cement	369.9	375.5	(2)
Total net sales	1,321.3	1,237.5	7
Cost of goods sold	(902.0)	(830.5)	(9)
Gross profit	419.3	407.0	3
Selling, general and administrative expenses	(218.6)	(191.0)	(14)
Research and development expenses	(37.2)	(30.4)	(22)
Asset impairments	(16.9)	(14.3)	(18)
Asbestos adjustments	(117.1)	(15.8)	-
Operating income	29.5	155.5	(81)
Net interest income (expense)	2.4	(7.4)	-
Other income	1.8	3.0	(40)
Income before income taxes	33.7	151.1	(78)
Income tax benefit	11.8	453.2	(97)
Net income	\$ 45.5	\$ 604.3	(92)
Volume (mmsf):			
USA and Europe Fibre Cement	1,488.5	1,331.8	12 %
Asia Pacific Fibre Cement	393.7	392.3	
Average net sale price per unit (per msf):			
USA and Europe Fibre Cement	US\$ 626	US\$ 642	(3)
Asia Pacific Fibre Cement	A\$ 901	A\$ 906	(1)

Net sales. Total net sales increased 7% from US\$1,237.5 million in fiscal year 2012 to US\$1,321.3 million in fiscal year 2013. The increase in total net sales reflected higher sales volume from the USA and Europe Fibre Cement segment, partially offset by a lower average net sales price in both the USA and Europe segment and the Asia Pacific segment.

USA and Europe Fibre Cement net sales. Net sales increased 10% from US\$862.0 million in fiscal year 2012 to US\$951.4 million in fiscal year 2013 due to higher sales volume, partially offset by a lower average net sales price.

Sales volume increased 12% from 1,331.8 million square feet in fiscal year 2012 to 1,488.5 million square feet in fiscal year 2013, reflecting increased activity in the new construction market and the repair and remodel market in the US, when compared with the prior year.

The average net sales price decreased 3% from US\$642 per thousand square feet in fiscal year 2012 to US\$626 per thousand square feet in fiscal year 2013.

For fiscal year 2013, the NBSK pulp price was 8% lower at US\$878 per ton, when compared to fiscal year 2012.

Edgar Filing: James Hardie Industries plc - Form 20-F

Operating conditions in the US residential housing market improved during fiscal year 2013. According to the US Census Bureau, single family housing starts, which are one of the key drivers of the

Table of Contents

company's performance, were 565,900 for fiscal year 2013, 27% above the prior year. Further, according to the NAHB, repair and remodel activity also increased slightly during fiscal year 2013. Industry data indicates that gains in both single-family and multi-family production are expected to continue to improve during calendar year 2013. These increases in activity in both the new construction and remodelling markets in the US follow consistent gains in builder and consumer confidence. The company continues to expect improvement in the overall US housing market to occur steadily over a protracted period.

Asia Pacific Fibre Cement net sales. Net sales decreased 2% from US\$375.5 million in fiscal year 2012 to US\$369.9 million in fiscal year 2013. Depreciation of Asia Pacific business currencies compared to the US dollar led to a 2% decrease in US dollar net sales. In Australian dollars, net sales remained relatively flat due to a slight increase in sales volume, offset by a decrease in the average net sales price.

According to Australian Bureau of Statistics data, the total number of new dwellings approved for fiscal year 2013 were 155,100, an increase of 4% compared to fiscal year 2012. However, approvals for detached houses, which are the primary driver of the Asia Pacific business' net sales, were 89,700 for the fiscal year 2013, a decrease of 5% in the period, when compared to fiscal year 2012.

Sales volume in the Australian business decreased in fiscal year 2013 compared to fiscal year 2012, reflecting an increasingly competitive operating environment.

During fiscal year 2013, excluding New Zealand product liability expenses, the New Zealand business' earnings increased when compared to fiscal year 2012, reflecting an improved operating environment.

The Philippines business' sales volume increased in fiscal year 2013, compared to fiscal year 2012. The average net sales price for fiscal year 2013 increased slightly compared to fiscal year 2012.

Gross profit. Gross profit increased 3% from US\$407.0 million in fiscal year 2012 to US\$419.3 million in fiscal year 2013. The gross profit margin decreased 1.2 percentage points from 32.9% to 31.7%.

USA and Europe Fibre Cement. Gross profit increased 7% and gross margin decreased 1.0 percentage point in fiscal year 2013 compared to fiscal year 2012. Gross margin was unfavourably impacted by 1.8 percentage points due to lower average net sales price, 1.3 percentage points due to an increase in fixed manufacturing costs and 0.2 percentage points due to an unfavourable shift in product mix, partially offset by 1.7 percentage points due to lower input costs (primarily pulp and freight).

Asia Pacific Fibre Cement. Gross profit decreased 6% in fiscal year 2013 compared to fiscal year 2012 and gross margin decreased 1.5 percentage points. Gross margin was unfavourably impacted by 0.6 percentage points due to an unfavourable shift in plant performance, 0.6 percentage points due to higher fixed manufacturing costs, 0.4 percentage points due to an unfavourable shift in product mix and 0.1 percentage points due to unfavourable foreign currency movements, partially offset by 0.1 percentage points due to an increase in sales volume and 0.1 percentage points due to lower input costs (primarily pulp).

Selling, general and administrative (SG&A) expenses. SG&A expenses increased 14%, from US\$191.0 million in fiscal year 2012 to US\$218.6 million in fiscal year 2013. Compared to fiscal year 2012, SG&A expenses were unfavourably impacted by higher employment and marketing costs to strengthen organisational capabilities in anticipation of higher product demand in the USA & Europe Fibre Cement segment. Additionally, SG&A expenses for fiscal year 2013 included US\$13.2 million related to the provision for certain New Zealand product liability claims that now have reduced access to third-party recoveries to cover a portion of the costs incurred to resolve these claims. These legacy

Table of Contents

product liability claims are related to buildings that were primarily constructed during calendar years 1998 to 2004. During fiscal year 2012 the company incurred US\$5.4 million in expenses associated with these product liability claims. These increases were partially offset by a decrease in general corporate costs (described below). SG&A expenses for fiscal year 2013 were favourably impacted by a US\$5.5 million foreign exchange gain and a recovery of US\$2.7 million (A\$2.6 million) for legal costs associated with the conclusion of RCI Pty Ltd's (RCI) disputed amended tax assessment with the ATO. As a percentage of sales, SG&A expenses increased 1.1 percentage points to 16.5%. As a percentage of sales, SG&A expenses excluding legacy New Zealand product liability expenses increased from 15.0% to 15.5% when compared to fiscal year 2012.

SG&A expenses for fiscal year 2013 included non-claims handling related operating expenses of AICF of US\$1.7 million, compared to US\$2.8 million in fiscal year 2012.

Readers are referred to Note 13 to our consolidated financial statements and Section 3, Legal Proceedings for further information about the New Zealand product liability expenses.

New Zealand Ministry of Education. On 16 April 2013, the New Zealand Ministry of Education filed a representative action in the New Zealand High Court against several building materials manufacturers, including two of the company's New Zealand subsidiaries, in relation to various New Zealand school buildings. The company is not yet able to determine the amount or range of loss, if any, that the company's New Zealand subsidiaries may become liable for in future periods. Accordingly, the company has not recorded a provision for the New Zealand Ministry of Education claim as of 31 March 2013. However, losses and expenses arising from defending and resolving this claim may have a material adverse effect on the company's financial position, results of operations and cash flows in future periods.

Readers are referred to Note 13 to our consolidated financial statements and Section 3, Legal Proceedings for further information about the New Zealand Ministry of Education claim.

ASIC Proceedings. In April 2013, ASIC commenced without prejudice discussions with the company, former non-executive directors and a former officer in relation to the amount of costs payable to ASIC under some of the various costs orders made in these proceedings. In respect of the costs orders made against the company and the related indemnification payments, the company has recorded a provision of US\$2.0 million at 31 March 2013. The company notes that other recoveries may be available, including as a result of repayments by former directors in accordance with the terms of their indemnity agreements. Losses and expenses in future periods from these proceedings are not expected to have a material adverse effect on the company's financial position, results of operations or cash flows.

Readers are referred to Note 13 to our consolidated financial statements and Section 3, Legal Proceedings for further information about the ASIC proceedings.

General corporate costs. General corporate costs decreased 3% from US\$33.9 million in fiscal year 2012 to US\$33.0 million in fiscal year 2013.

General corporate costs for fiscal year 2013 included ASIC expenses of US\$2.6 million, partially offset by a recovery of legal costs of US\$2.7 million and a foreign exchange gain of US\$5.5 million following the conclusion of RCI's disputed amended tax assessment with the ATO. During fiscal year 2012, general corporate costs included ASIC expenses of US\$1.1 million.

General corporate costs excluding ASIC expenses, the recovery of legal costs and foreign exchange gain, increased from US\$32.8 million in fiscal year 2012 to US\$38.6 million in fiscal year 2013, primarily due to an increase in legal costs and an increase in costs related to the company's corporate structure simplification, as announced on 17 May 2011, compared to fiscal year 2012.

Table of Contents

Research and development (R&D) expenses. R&D expenses include costs associated with research projects that are designed to benefit all business units. These costs are recorded in the R&D segment rather than attributed to individual business units. These costs were 26% higher for fiscal year 2013 at US\$23.6 million, compared to US\$18.7 million in fiscal year 2012.

Other R&D costs associated with commercialisation projects in business units are included in the business unit segment results. In total, these costs were 16% higher for fiscal year 2013 at US\$13.6 million, compared to US\$11.7 million in fiscal year 2012.

The increase in R&D expenses during fiscal year 2013 is a result of the company's continued investment in core R&D projects. In addition, R&D headcount increased compared to the prior fiscal year as a result of the company opening a new R&D facility in Chicago, Illinois in fiscal year 2013.

Asset Impairments. The company performs an asset impairment review on a quarterly basis in connection with its assessment of production capabilities and the company's ability to meet market demand. In fiscal year 2013, the company recorded asset impairment charges of US\$16.9 million in the USA and Europe Fibre Cement segment.

During the fourth quarter of fiscal year 2013, the company made the decision that it would not re-open its Blandon, Pennsylvania plant. As a result, the company recorded impairment charges of US\$4.4 million on related building, land and manufacturing equipment at the Blandon plant during the fourth quarter. The remaining asset impairment charges of US\$12.5 million included US\$2.8 million related to redundant equipment that is no longer being utilised to manufacture products and US\$9.7 million related to manufacturing equipment that is in the process of being replaced by plant and equipment with enhanced capability in order to expand production capacity in anticipation of the continued recovery in the US housing market.

During fiscal year 2012, the company recorded an asset impairment charge of US\$14.3 million related to machinery and equipment in the USA and Europe Fibre Cement segment.

Readers are referred to Note 7 to the consolidated financial statements for further information on asset impairments

Asbestos adjustments. The company's asbestos adjustments are derived from an estimate of future Australian asbestos-related liabilities in accordance with the AFFA.

The asbestos-related assets and liabilities are denominated in Australian dollars. Therefore, the reported value of these asbestos-related assets and liabilities in the company's consolidated balance sheet in US dollars is subject to adjustment, with a corresponding effect on the company's consolidated statement of operations and comprehensive income (loss), depending on the closing exchange rate between the two currencies at the balance sheet date.

The undiscounted and uninflated central estimate net of insurance recoveries, of the asbestos liability increased from A\$1.313 billion at 31 March 2012 to A\$1.345 billion at 31 March 2013. The increase in the undiscounted and uninflated central estimate of A\$32 million is primarily due to an increase in the projected future number of claims for mesothelioma reflecting both higher levels of claims volumes and a change in the incidence pattern for mesothelioma, an increased allowance for large claims for mesothelioma resulting from higher numbers of large claims, lower nil settlement rates being assumed for mesothelioma and lung cancer, partially offset by lower average claims sizes and average defence legal cost assumptions for most disease types.

During fiscal year 2013, mesothelioma claims reporting activity has been above actuarial expectations for the first time since fiscal year 2009. One of the critical assumptions used to derive the discounted

Table of Contents

central estimate is the estimated peak year of mesothelioma disease claims, which was targeted for 2010/2011. Potential variation in this estimate has an impact much greater than other assumptions used to derive the discounted central estimate. For example, if the peak year of mesothelioma disease claims were estimated to occur in 2015/2016, the discounted central estimate could increase by approximately 45%.

During fiscal year 2013, the Australian dollar spot rate slightly appreciated against the US dollar, compared to a 1% depreciation in fiscal year 2012.

The asbestos adjustments for fiscal years ended 31 March 2013 and 2012 are as follows:

(Millions of US dollars)	Fiscal Years Ended 31 March	
	2013	2012
Change in estimates	\$ (129.2)	\$ (9.6)
Effect of foreign exchange movements	(11.9)	(6.2)
Asbestos adjustments	\$ (141.1)	\$ (15.8)

Claims Data. The number of new claims filed in fiscal year 2013 of 542 is higher than new claims of 456 reported in fiscal year 2012, and above actuarial expectations of 504 for fiscal year 2013.

The number of settled claims in fiscal year 2013 of 519 is higher than claims settled of 428 in fiscal year 2012 and above actuarial expectations of 504 for fiscal year 2013.

The average claim settlement in fiscal year 2013 of A\$231,000 is A\$12,000 higher than fiscal year 2012 and is largely attributable to mesothelioma claims, which are more costly to settle and represented a larger proportion of total claims than in fiscal year 2012. However, average claim sizes for mesothelioma were below actuarial expectations for fiscal year 2013, with the average cost to settling other claims being in line with, or below, actuarial expectations.

Asbestos claims paid of A\$121.3 million for fiscal year 2013 are consistent with the actuarial expectation of A\$122.2 million.

All figures provided in this Claims Data section are gross of insurance and other recoveries. Readers are referred to Note 11 of our consolidated financial statements for further information on asbestos adjustments.

AICF Loan Facility. On 17 February 2012, AICF made an initial drawdown of A\$29.7 million (being US\$32.0 million translated at the prevailing spot exchange rate at 17 February 2012) under the Facility with The State of New South Wales, Australia. The initial drawing is reflected on the consolidated balance sheet within *Current portion of long-term debt - Asbestos* at 31 March 2012.

On 2 April 2012, in accordance with arrangements agreed with the NSW Government and AICF, the company made an early contribution of US\$138.7 million (A\$132.3 million) to AICF, in respect of the company's free cash flow for the year ended 31 March 2012. A further contribution of US\$45.4 million (A\$45.2 million) was contributed on 2 July 2012. Total contributions for the year ended 31 March 2013 were US\$184.1 million (A\$177.5 million).

Readers are referred to Note 11 to our consolidated financial statements for further information.

Operating income. Operating income decreased 81% to US\$29.5 million in fiscal year 2013, compared to US\$155.5 million in fiscal year 2012. Operating income in fiscal year 2013 included unfavourable asbestos adjustments of US\$117.1 million, asset impairments of US\$16.9 million, New Zealand

Table of Contents

product liability expenses of US\$13.2 million, ASIC expenses of US\$2.6 million and AICF SG&A expenses of US\$1.7 million. In fiscal year 2012, operating income included unfavourable asbestos adjustments of US\$15.8 million, asset impairments of US\$14.3 million, New Zealand product liability expenses of US\$5.4 million, AICF SG&A expenses of US\$2.8 million and ASIC expenses of US\$1.1 million.

USA and Europe Fibre Cement operating income decreased 2% from US\$148.4 million in fiscal year 2012 to US\$145.6 million in fiscal year 2013. The decrease in operating income was primarily driven by increased organisational costs in anticipation of higher activity levels, higher asset impairment charges, a lower average net sales price, an increase in fixed manufacturing costs and an unfavourable shift in product mix, partially offset by lower input costs (primarily pulp and freight). Operating income margin was 1.7 percentage points lower at 15.3%. Excluding asset impairment charges, operating income decreased slightly from US\$162.7 million in fiscal year 2012 to US\$162.5 million in fiscal year 2013. The USA and Europe Fibre Cement operating income margin excluding asset impairment charges was 1.8 percentage points lower at 17.1%.

Asia Pacific Fibre Cement operating income decreased 23% from US\$80.3 million in fiscal year 2012 to US\$61.7 million in fiscal year 2013, of which 1% was attributable to the depreciation of Asia Pacific business currencies compared to the US dollar. In Australian dollars, Asia Pacific Fibre Cement operating income decreased 22% compared to the prior corresponding period, due to higher fixed manufacturing costs, an unfavourable shift in product mix, plant performance and foreign currency translation rates within the Asia Pacific Fibre Cement business and higher SG&A expenses due to an increase in New Zealand product liability expenses during compared to fiscal year 2012. These decreases were partially offset by lower input costs (primarily pulp) and a slight increase in sales volume. Operating income margin was 4.7 percentage points lower at 16.7%. Excluding New Zealand product liability expenses, operating income decreased 13% from US\$85.7 million in fiscal year 2012 to US\$74.9 million in fiscal year 2013. The Asia Pacific Fibre Cement operating income margin excluding New Zealand product liability expenses was 2.5 percentage points lower at 20.3%.

Net interest income (expense). Net interest income (expense) moved from an expense of US\$7.4 million in fiscal year 2012 to income of US\$2.4 million in fiscal year 2013. Net interest income in fiscal year 2013 included AICF interest income of US\$7.0 million and other interest income of US\$0.9 million, partially offset by interest and borrowing costs relating to the company's external credit facilities of US\$3.4 million and a realised loss of US\$2.1 million on interest rate swaps. Net interest expense in fiscal year 2012 included a realised loss of US\$7.5 million on interest rate swaps and interest and borrowing costs relating to the company's external credit facilities of US\$3.7 million, partially offset by AICF interest income of US\$3.3 million and other interest income of US\$0.5 million.

Other income. Other income decreased from US\$3.0 million in fiscal year 2012 to US\$1.8 million in fiscal year 2013. This change is due solely to decreases in the fair value of interest rate swap contracts which were favourably impacted by an increase in medium-term US dollar interest rates in fiscal year 2013.

Income tax (benefit) expense. The company's effective tax benefit rate was 35.0% in fiscal year 2013 compared to an income tax benefit rate of 299.9% in fiscal year 2012. The effective tax benefit rate in fiscal year 2013 was impacted by New Zealand product liability expenses of US\$13.2 million, unfavourable asbestos adjustments of US\$117.1 million and asset impairment charges of US\$16.9 million. During fiscal year 2012, the effective tax benefit rate was materially impacted by RCI's successful appeal of the ATO's disputed 1999 amended tax assessment, resulting in an income tax benefit of US\$453.2 million, compared to an income tax benefit of US\$11.8 million in fiscal year 2013. During fiscal year 2012, the effective tax benefit rate was also impacted by unfavourable asbestos adjustments of US\$15.8 million, asset impairment charges of US\$14.3 million and New Zealand

Table of Contents

product liability expenses of US\$5.4 million. Income tax expense excluding asbestos and tax adjustments decreased from US\$42.9 million in fiscal year 2012 to US\$37.4 million in fiscal year 2013. The effective tax rate excluding asbestos, asset impairments, New Zealand product liability expenses and tax adjustments decreased from 23.1% in fiscal year 2012 to 21.3% in fiscal year 2013 due to a lower proportion of taxable earnings in jurisdictions with higher tax rates.

Tax Adjustments. The company recorded net favourable tax adjustments of US\$16.3 million in fiscal year 2013, compared to US\$493.4 million in fiscal year 2012.

Tax adjustments fiscal year 2013 and 2012 consist of adjustments in the value of provisions for uncertain tax positions and net tax benefits that the company anticipates will eventually become unavailable. Tax adjustments for fiscal year 2013 were also impacted by New Zealand product liability expenses and asset impairment charges, as discussed above. Tax adjustments for fiscal year 2012 also include a net benefit relating to the 1999 disputed amended tax assessment with the ATO, as discussed below.

ATO – 1999 Disputed Amended Assessment

During the year ended 31 March 2012, the company recognised an income tax benefit of A\$452.9 million (US\$485.2 million) within income tax expense, which primarily included amounts refunded by the ATO noted above and the reversal of the provision for the unpaid portion of the amended assessment, partially offset by income taxes payable in respect of the reversal of general interest charges previously recognised as deductible and interest on overpayment of tax.

Net income. Net income decreased from US\$604.3 million in fiscal year 2012 to US\$45.5 million in fiscal year 2013. Net income excluding asbestos, asset impairments, ASIC expenses, New Zealand product liability expenses and tax adjustments decreased 2% from US\$144.3 million in fiscal year 2012 to US\$140.8 million in fiscal year 2013.

Liquidity and Capital Resources

Overview

Our treasury policy regarding our liquidity management, foreign exchange risk management, interest rate risk management and cash management is administered by our treasury department and is centralised in Ireland. This policy is reviewed annually and is designed to ensure that we have sufficient liquidity to support our business activities and meet future business requirements in the countries in which we operate. Counterparty limits are managed by our treasury department and based upon the counterparty credit rating; total exposure to any one counterparty is limited to specified amounts that are approved annually by the CFO.

Excluding AICF's drawdown on its standby loan facility with the NSW Government (which the company is not a party to, guarantor of or security provider in respect of AICF loan facility), we moved to a net cash position of US\$167.5 million at 31 March 2014 compared to US\$153.7 million at 31 March 2013.

Table of Contents

As of 31 March 2014, we had credit facilities totalling US\$355.0 million, of which no amounts were drawn. The credit facilities are all uncollateralised and consist of the following:

Description	Effective Interest Rate	At 31 March 2014	
		Total Facility (Millions of US dollars)	Principal Drawn
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until March 2016	-	\$ 50.0	-
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until April 2016	-	190.0	-
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until March 2017	-	40.0	-
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until April 2017	-	75.0	-
Total		\$ 355.0	

The weighted average interest rate on the company's total outstanding debt was nil at 31 March 2014 and 2013, respectively.

At 31 March 2014, no amounts were drawn under the combined facilities. The weighted average interest rate on the company's total outstanding debt was nil at 31 March 2014 and 2013, and the weighted average term of all debt facilities was 2.4 years at 31 March 2014.

Subsequent to 31 March 2014, the company added term facilities totalling US\$150.0 million; US\$25.0 million of these facilities mature in April 2017, US\$50.0 million mature in April 2019 and US\$75.0 million mature in May 2019. The addition of the new credit facilities increased the total borrowing capacity to US\$505.0 million.

The company has historically met its working capital needs and capital expenditure requirements from a combination of cash flow from operations, credit facilities and other borrowings. Seasonal fluctuations in working capital generally have not had a significant impact on its short-term or long-term liquidity.

The company expects to invest in significant capital expenditures in the near to medium term for upgrades of plant production capabilities to support capacity expansion plans, equipment upgrades to ensure continued environmental compliance, the implementation of new fibre cement technologies, the refurbishment and re-commissioning of idled production assets and the addition of new production assets.

The company anticipates it will have sufficient funds to meet its planned working capital and other expected cash requirements for the next twelve months based on its existing cash balances, anticipated operating cash flows arising during the year and unutilised committed credit facilities

At 31 March 2014, the company was in compliance with all restrictive debt covenants contained in its credit facility agreements. Under the most restrictive of these covenants, the company (i) must not exceed a maximum of net debt to earnings before interest, tax, depreciation and amortisation, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited and excluding assets, liabilities and other balance sheet items

Table of Contents

of the AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, (ii) must meet or exceed a minimum ratio of earnings before interest and taxes to net interest charges, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, and (iii) must ensure that no more than 35% of Free Cash Flow (as defined in the AFFA), in any given financial year (Annual Cash Flow Cap) is contributed to AICF on the payment dates under the AFFA in the next following financial year. The Annual Cash Flow Cap does not apply to payments of interest, if any, to AICF and is consistent with contractual obligations of the Performing Subsidiary and the company under the AFFA.

Cash Flow Year Ended 31 March 2014 compared to Year Ended 31 March 2013

Net operating cash flow increased from US\$109.3 million in fiscal year 2013 to US\$322.8 million in fiscal year 2014. The movement in net operating cash flow was primarily driven by: higher earnings excluding asbestos adjustments; prior year non-recurring tax receipt of US\$81.3 million which arose from the favourable conclusion of RCI s disputed fiscal year 1999 amended tax assessment with the ATO and a decrease in the company s contribution to AICF from US\$45.4 million in the prior year ended 31 March 2013 to nil in the current fiscal year.

Net cash used in investing activities increased from US\$59.7 million in fiscal year 2013 to US\$118.8 million in fiscal year 2014. The increase was primarily due to higher capital expenditures for the purchase of property, plant and equipment of US\$115.4 million in fiscal year 2014 compared to US\$61.1 million in fiscal year 2013.

Net cash used in financing activities increased from US\$158.7 million in fiscal year 2013 to US\$186.3 million in fiscal year 2014 primarily due to common stock repurchased through the company s share buyback program of US\$22.1 million in fiscal year 2014 compared to nil in fiscal year 2013. Additionally, dividends paid increased from US\$188.5 million in fiscal year 2013 to US\$199.1 million in fiscal year 2014.

Capital Requirements and Resources

Our capital requirements consist of expansion, renovation and maintenance of our production facilities and construction of new facilities. Our working capital requirements, consisting primarily of inventory and accounts receivable and payable, fluctuate seasonally during months of the year when overall construction and renovation activity volumes increase.

During the fiscal year ended 31 March 2014, we met our capital expenditure requirements through our internal cash. We currently expect to spend an average of approximately US\$200 million in fiscal years 2015, 2016 and 2017 for capital expenditures, including facility upgrades and expansions, equipment to enhance environmental compliance, and the implementation of new fibre cement technologies.

We anticipate that our cash flows from operations, net of estimated payments under the AFFA, will be sufficient to fund our planned capital expenditure and working capital requirements in the short-term. If we do not generate sufficient cash from operations to fund our planned capital expenditures and working capital requirements, we believe the cash and cash equivalents of US\$167.5 million at 31 March 2014 and the cash that we anticipate will be available to us under credit facilities, will be sufficient to meet any cash shortfalls during at least the next 12 months.

We believe our business is affected by general economic conditions, the availability of financing, mortgage and other interest rates, inflation, unemployment, the inventory of unsold homes, the level of foreclosures, home resale rates, housing affordability, demographic trends, gross domestic product growth and consumer confidence in each of the regions in which we operate. Over the past several

Table of Contents

years, the ongoing sub-prime mortgage fallout, rising unemployment, increased foreclosures, high current inventory of unsold homes, tighter credit and volatile equity markets have materially adversely impacted our business. We expect that business derived from current US forecasts of new housing starts and renovation and remodel expenditures will result in our operations generating cash flow sufficient to fund the majority of our planned capital expenditures. It is possible that a slower recovery than expected in new housing starts in the United States or in other countries in which we manufacture and sell our products would negatively impact our growth and our current levels of revenue and profitability and therefore decrease our liquidity and ability to generate sufficient cash from operations to meet our capital requirements.

Pulp and cement are primary ingredients in our fibre cement formulation, which have been subject to price volatility, affecting our working capital requirements. In fiscal year 2014, the average NBSK pulp price relative to our US business was US\$971 per ton, an increase of 11% compared to fiscal year 2013. Although US dollar pulp prices have fallen from their highs, they are expected to remain at elevated levels compared to previous periods. To minimise additional working capital requirements caused by rising pulp prices, we have entered into various contracts that discount pulp prices in relation to pulp indices and purchase our pulp from several qualified suppliers in an attempt to mitigate price increases and supply interruptions.

Freight costs in the US decreased in fiscal year 2014 and are expected to decrease slightly in fiscal year 2015 as improved processes and project savings offset supply constraints for trucks as the broader economy improves and the cost of fuel remains high.

The collective impact of the foregoing factors, and other factors, including those identified in *Forward-Looking Statements* may materially adversely affect our ability to generate sufficient cash flows from operations to meet our short and longer-term capital requirements. Additionally, we may decide that it is necessary to suspend planned dividend payments and/or share buy-backs, scale back or postpone our expansion plans and/or take other measures to conserve cash to maintain sufficient capital resources over the short and longer-term.

Subject to the terms and conditions of the AFFA, we are required to fund AICF on an annual basis, depending on our net operating cash flow. The initial funding payment of A\$184.3 million (US\$145.0 million at the time of payment) was made to AICF in February 2007 and annual payments will be made each July, unless quarterly payments are elected by the company. The amounts of these annual payments are dependent on several factors, including our free cash flow (as defined in the AFFA), actuarial estimations, actual claims paid, operating expenses of AICF and the annual cash flow cap. From the time AICF was established in February 2007 through to May 2014, we have contributed A\$601.5 million (including interest payments) to the fund. The company anticipates that it will make a contribution of approximately US\$113.0 million to AICF on 1 July 2014. This amount represents 35% of the company's free cash flow for the fiscal year 2014, as defined by the AFFA. Our obligation to make future contributions to AICF continues to be linked under the terms of the AFFA to our long-term financial success, especially our ability to generate net operating cash flow.

To facilitate the ability to access and distribute surplus cash flows and earnings of our operating subsidiaries more efficiently (including for the purpose of making periodic contributions to AICF), we commenced an internal reorganisation involving simplification of our corporate structure including some of the arrangements which were previously part of our Netherlands domicile. As part of this restructure, we incurred a tax charge of approximately US\$32.6 million in fiscal year 2011, which was paid in fiscal year 2012. This amount was offset with the company's early contribution to AICF of US\$138.7 million on 2 April 2012, which was 35% of amounts received from the ATO.

Table of Contents**Capital Expenditures**

Our total capital expenditures for fiscal years 2014, 2013 and 2012 were US\$115.4 million, US\$61.1 million and US\$35.8 million, respectively.

Refer to Property, Plants and Equipment Capital Expenditures in Section 1 of this report for further discussion and a listing of our significant capital expenditures in fiscal years 2014 and 2013.

Capital Management and Dividends

The following table summarises the dividends declared from fiscal 2014 and fiscal 2013 earnings and dividends paid in fiscal 2013 declared from fiscal 2012 earnings:

(Millions of US dollars)	US Cents/Security	US\$ Total Amount	Announcement Date	Record Date	Payment Date
FY 2014 special dividend	0.20	89.0	22 May 2014	12 June 2014	08 August 2014
FY 2014 second half dividend	0.32	142.4	22 May 2014	12 June 2014	08 August 2014
125 year anniversary special dividend	0.28	124.6	28 February 2014	21 March 2014	30 May 2014
FY 2014 first half dividend	0.08	35.5	14 November 2013	19 December 2013	28 March 2014
FY 2013 special dividend	0.24	106.1	23 May 2013	28 June 2013	26 July 2013
FY 2013 second half dividend	0.13	57.5	23 May 2013	28 June 2013	26 July 2013
FY 2013 first half dividend	0.05	22.1	15 November 2012	18 December 2012	25 January 2013
FY 2012 second half dividend	0.38	166.4	21 May 2012	23 July 2012	23 July 2012

In May 2013, the company announced that it would seek to acquire up to 5% of its issued capital via an on-market share buyback during the twelve month period which ended on 21 May 2014. During fiscal year 2014 the company repurchased and cancelled a total of 1,895,214 shares of its common stock, with an aggregate cost of A\$24.5 million (US\$22.1 million), at an average market price of A\$12.92 (US\$11.64).

Subsequent to 31 March 2014 through the end of the announced program on 21 May 2014, the company acquired an additional 715,000 shares of its common stock, with an aggregate cost of A\$9.8 million (US\$9.1 million), at an average market price of A\$13.69 (US\$12.73).

On 22 May 2014, the company announced a new share buyback program to acquire up to 5% of its issued capital. The actual shares that we may buyback will be subject to share price levels, consideration of the effect of the share buyback on return on equity, the weighted average cost of capital and the Company's capital requirements.

If and to the extent that the company does not undertake share buybacks during fiscal year 2015 we will consider further distributions to shareholders over and above those contemplated under our dividend policy subject to:

an assessment of the current and expected industry conditions in the group's major markets of the US and Australia;

an assessment of the group's capital requirements, especially for funding of expansion and growth initiatives;

Table of Contents

global economic conditions and outlook; and

total net operating profit (excluding asbestos adjustments) for fiscal year 2015.

Contractual Obligations

The following table summarises our contractual obligations at 31 March 2014:

(Millions of US dollars)	Payments Due During Fiscal Year Ending 31 March				
	Total	2015	2016 to 2017	2018 to 2019	Beyond 5 Years
Asbestos Liability ¹	\$ 1,706.2	\$ N/A	\$ N/A	\$ N/A	\$ N/A
Long-Term Debt	-	-	-	-	-
Estimated interest payments on Long-Term Debt ²	22.5	4.5	9.1	8.9	-
Long-Term Debt AICF loan facility	47.0	47.0	-	-	-
Estimated interest payments on Long-Term Debt AICF loan facility ⁴	-	-	-	-	-
Operating Leases	68.9	21.1	25.6	11.9	10.3
Purchase Obligations ⁵	-	-	-	-	-
Total	\$ 1,844.6	\$ 72.6	\$ 34.7	\$ 20.8	\$ 10.3

See Notes 9, 11 and 13 to our consolidated financial statements for further information regarding long-term debt, long-term debt asbestos and operating leases, respectively.

¹ The amount of the asbestos liability reflects the terms of the AFFA, which has been calculated by reference to (but is not exclusively based upon) the most recent actuarial estimate of the projected future asbestos-related cash flows prepared by KPMG Actuarial. The asbestos liability also includes an allowance for the future claims-handling costs of AICF. The table above does not include a breakdown of payments due each year as such amounts are not reasonably estimable. See Note 11 to our consolidated financial statements for further information regarding our future obligations under the AFFA.

² Interest amounts are estimates based on debt remaining unchanged from the 31 March 2014 balance and interest rates remaining consistent with the rates at 31 March 2014. Interest paid includes interest in relation to our debt facilities, as well as the net amount paid relating to interest rate swap agreements. The interest on our debt facilities is variable based on a market rate and includes margins agreed to with the various lending banks. Also included in estimated interest payments are commitment fees related to the undrawn amounts of our debt facilities. The interest on our interest rate swaps is set at a fixed rate. There are several variables that can affect the amount of interest we may pay in future years, including: (i) new debt facilities with rates or margins different from historical rates; (ii) expiration of existing debt facilities resulting in a change in the average interest rate; (iii) fluctuations in the market interest rate; (iv) new interest rate swap agreements; and (v) expiration of existing interest rate swap agreements. We have not included estimated interest payments subsequent to fiscal year ending 31 March 2019 as such amounts are not reasonably estimable.

³ JHI plc and its wholly-owned subsidiaries are not a party to, guarantor of, or security provided in respect of the AICF loan facility. However, because we consolidate AICF due to our pecuniary and contractual interest in AICF, any drawings, repayments or payments of accrued interest by AICF under the AICF loan facility impact our consolidated financial position, results of operations and cash flows. The company anticipates the balance outstanding under the AICF loan facility at 31 March 2014 will be repaid on 1 July 2014. Beyond the amount outstanding at 31 March 2014, the company is unable to reasonably estimate the timing and amount of future drawings, if any, on the AICF loan facility. Accordingly, future payments are deemed to be nil.

Edgar Filing: James Hardie Industries plc - Form 20-F

⁴ The company is unable to reasonably estimate the timing and amount of future drawings, if any, on the AICF loan facility. Accordingly, future interest payments are deemed to be nil.

Table of Contents

⁵ Purchase Obligations are defined as agreements to purchase goods or services that are enforceable and legally-binding on us and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transactions.

Off-Balance Sheet Arrangements

As of 31 March 2014 and 2013, we did not have any material off-balance sheet arrangements.

Research and Development

For fiscal years 2014, 2013 and 2012, our expenses for research and development were US\$33.1 million, US\$37.2 million and US\$30.4 million, respectively.

We view research and development as key to sustaining our existing market leadership position and expect to continue to allocate significant funding to this endeavour. Through our investment in process technology, we aim to keep reducing our capital and operating costs, and find new ways to make existing and new products.

Outlook and Trend Information

In the US, although somewhat mixed, industry forecasts remain encouraging, and look beyond the seasonal impact of the severe U.S. winter to discern the true underlying growth momentum in the market. According to the US Census Bureau, single family housing starts, which are one of the key drivers of the company's performance, were 615,400 for the fiscal year ended 31 March 2014, an increase of 13% from the prior year. Multi-family permits were 346,000, an increase of 14% relative to the prior year.

The company continues to expect improvement in the US operating environment during Fiscal Year 2015, though cautions that this remains predicated upon the strength of employment and consumer confidence, as well as continued improvement in the broader US economy. If the underlying market demand improves as expected, the company anticipates that EBIT margin for fiscal 2015 will increase as contribution margin exceeds spending on organisational costs and research and development. These gains are once again expected to result in an operating income to revenue margin above 20% in the USA and Europe Fibre Cement segment.

In Australia, net sales are expected to track in line with any growth in the detached housing market, and be impacted by positive/negative movements in the repair and remodel market. In New Zealand, business continues to improve, particularly in the Auckland and Christchurch areas.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of

James Hardie Industries plc

We have audited the accompanying consolidated balance sheets of James Hardie Industries plc as of 31 March 2014 and 2013, and the related consolidated statements of operations and comprehensive income (loss), changes in shareholders' equity (deficit), and cash flows for each of the three years in the period ended 31 March 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of James Hardie Industries plc at 31 March 2014 and 2013, and the consolidated results of its operations and its cash flows for each of the three years in the period ended 31 March 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), James Hardie Industries plc's internal control over financial reporting as of 31 March 2014, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated 22 May 2014 expressed an unqualified opinion thereon.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements

1. Background and Basis of Presentation

On 15 October 2012, the Company was transformed from an Irish Societas Europaea (SE) to an Irish public limited company (plc) and now operates under the name of James Hardie Industries plc.

Nature of Operations

James Hardie Industries plc (formerly James Hardie Industries SE) manufactures and sells fibre cement building products for interior and exterior building construction applications, primarily in the United States, Australia, New Zealand, the Philippines and Europe.

Basis of Presentation

The consolidated financial statements represent the financial position, results of operations and cash flows of James Hardie Industries plc and its wholly-owned subsidiaries and a special purpose entity, collectively referred to as either the Company or James Hardie and JHI plc , together with its subsidiaries as of the time relevant to the applicable reference, the James Hardie Group, unless the context indicates otherwise.

2. Summary of Significant Accounting Policies

Reclassifications

Certain prior year balances have been reclassified to conform to the current year presentation. The reclassifications do not impact shareholders equity (deficit).

Accounting Principles

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP). The US dollar is used as the reporting currency. All subsidiaries and qualifying special purpose entities are consolidated and all intercompany transactions and balances are eliminated.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Foreign Currency Translation

All assets and liabilities are translated into US dollars at current exchange rates while revenues and expenses are translated at average exchange rates in effect for the period. The effects of foreign currency translation adjustments are included directly in other comprehensive income in shareholders equity. Gains and losses arising from foreign currency transactions are recognised in income currently.

The Company has recorded on its balance sheet certain assets and liabilities, including asbestos-related assets and liabilities under the terms of the AFFA, that are denominated in Australian dollars and subject to translation into US dollars at each reporting date.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

Unless otherwise noted, the exchange rates used to convert Australian dollar denominated amounts into US dollars in the consolidated financial statements are as follows:

(US\$1 = A\$)	2014	31 March 2013	2012
Assets and liabilities	1.0845	0.9597	0.9614
Statements of operations	1.0716	0.9694	0.9573
Cash flows beginning cash	0.9597	0.9614	0.9676
Cash flows ending cash	1.0845	0.9597	0.9614
Cash flows current period movements	1.0716	0.9694	0.9573

Restricted Cash and Cash Equivalents

Restricted cash and cash equivalents generally relate to amounts subject to letters of credit with insurance companies, which restrict the cash from use for general corporate purposes.

Inventories

Inventories are valued at the lower of cost or market. Cost is generally determined under the first-in, first-out method, except that the cost of raw materials and supplies is determined using actual or average costs. Cost includes the costs of materials, labour and applied factory overhead. On a regular basis, the Company evaluates its inventory balances for excess quantities and obsolescence by analysing demand, inventory on hand, sales levels and other information. Based on these evaluations, inventory costs are written down, if necessary.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Property, plant and equipment of businesses acquired are recorded at their estimated fair value at the date of acquisition. Depreciation of property, plant and equipment is computed using the straight-line method over the following estimated useful lives:

	Years
Buildings	40
Building improvements	5 to 40
Manufacturing machinery	10 to 20
General equipment	5 to 10
Computer equipment, software, and software development	3 to 7
Office furniture and equipment	3 to 10

Depreciation and Amortisation

The Company records depreciation and amortisation under both cost of goods sold and selling, general and administrative expenses, depending on the asset's business use. All depreciation and amortisation related to plant building, machinery and equipment is recorded in cost of goods sold.

Impairment of Long-Lived Assets

Long-lived assets, such as property, plant and equipment, are evaluated each quarter for events or changes in circumstances that indicate that an asset might be impaired because the carrying amount of the asset may not be recoverable. These include, without limitation, a significant adverse change in

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

the extent or manner in which a long-lived asset or asset group is being used, a current period operating or cash flow loss combined with a history of operating or cash flow losses, a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset or asset group and/or a current expectation that it is more likely than not that a long lived asset or asset group will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

When such indicators of potential impairment are identified, recoverability is tested by grouping long-lived assets that are used together and represent the lowest level for which cash flows are identifiable and distinct from the cash flows of other long-lived assets, which is typically at the production line or plant facility level, depending on the type of long-lived asset subject to an impairment review.

Recoverability is measured by a comparison of the carrying amount of the asset group to the estimated undiscounted future cash flows expected to be generated by the asset group. If the carrying amount exceeds the estimated undiscounted future cash flows, an impairment charge is recognised at the amount by which the carrying amount exceeds the estimated fair value of the asset group.

The methodology used to estimate the fair value of the asset group is based on a discounted cash flow analysis that considers the asset group's highest and best use that would maximise the value of the asset group. In addition, the estimated fair value of an asset group also considers, to the extent practicable, a market participant's expectations and assumptions in estimating the fair value of the asset group. If the estimated fair value of the asset group is less than the carrying value, an impairment loss is recognised at an amount equal to the excess of the carrying value over the estimated fair value of the asset group.

The Company recorded asset impairment charges of nil, US\$16.9 million and US\$14.3 million during the years ended 31 March 2014, 2013 and 2012, respectively. Readers are referred to Note 7 for additional information.

Environmental Remediation and Compliance Expenditures

Environmental remediation and compliance expenditures that relate to current operations are expensed or capitalised, as appropriate. Expenditures that relate to an existing condition caused by past operations, and which do not contribute to current or future revenue generation, are expensed. Liabilities are recorded when environmental assessments and/or remedial efforts are probable and the costs can be reasonably estimated. Estimated liabilities are not discounted to present value. Generally, the timing of these accruals coincides with completion of a feasibility study or the Company's commitment to a formal plan of action.

Revenue Recognition

The Company recognises revenue when the risks and obligations of ownership have been transferred to the customer, which generally occurs at the time of delivery to the customer. The Company records estimated reductions in sales for customer rebates and discounts including volume, promotional, cash and other discounts. Rebates and discounts are recorded based on management's best estimate when products are sold. The estimates are based on historical experience for similar programs and products. Management reviews these rebates and discounts on an ongoing basis and the related accruals are adjusted, if necessary, as additional information becomes available.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

A portion of our revenue is made through distributors under a Vendor Managed Inventory (VMI) agreement whereby revenue is recognised upon the transfer of title and risk of loss, following the customer s acknowledgement of the receipt of goods.

Advertising

The Company expenses the production costs of advertising the first time the advertising takes place. Advertising expense was US\$9.5 million, US\$8.9 million and US\$8.6 million during the years ended 31 March 2014, 2013 and 2012, respectively.

Accrued Product Warranties

An accrual for estimated future warranty costs is recorded based on an analysis by the Company, which includes the historical relationship of warranty costs to installed product.

Income Taxes

The Company accounts for income taxes under the asset and liability method. Under this method, deferred income taxes are recognised by applying enacted statutory rates applicable to future years to differences between the tax bases and financial reporting amounts of existing assets and liabilities. The effect on deferred taxes of a change in tax rates is recognised in income in the period that includes the enactment date. A valuation allowance is provided when it is more likely than not that all or some portion of deferred tax assets will not be realised. Interest and penalties related to uncertain tax positions are recognised in income tax expense.

Financial Instruments

The Company calculates the fair value of financial instruments and includes this additional information in the notes to the consolidated financial statements when the fair value is different from the carrying value of those financial instruments. The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realise in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Periodically, interest rate swaps, commodity swaps and forward exchange contracts are used to manage market risks and reduce exposure resulting from fluctuations in interest rates, commodity prices and foreign currency exchange rates. Where such contracts are designated as, and are effective as, a hedge, changes in the fair value of derivative instruments designated as cash flow hedges are deferred and recorded in other comprehensive income. These deferred gains or losses are recognised in income when the transactions being hedged are recognised. The ineffective portion of these hedges is recognised in income currently. Changes in the fair value of derivative instruments that are not designated as hedges for accounting purposes are recognised in income. The Company does not use derivatives for trading purposes.

Stock-based Compensation

Stock-based compensation expense represents the estimated fair value of equity-based and liability-classified awards granted to employees, adjusted for estimated forfeitures, and recognised as an expense over the vesting period. Stock-based compensation expense is included in the line item *Selling, general and administrative expenses* on the consolidated statements of operations and comprehensive income.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

Equity awards with vesting based solely on a service condition are typically subject to graded vesting, in that the awards vest 25% after the first year, 25% after the second year and 50% after the third year. For equity awards subject to graded vesting, the Company has elected to use the accelerated recognition method. Accordingly, each vesting tranche is valued separately, and the recognition of stock-based compensation expense is more heavily weighted earlier in the vesting period. Stock-based compensation expense for equity awards that are subject to performance or market vesting conditions are typically recognised rateably over the vesting period. The Company issues new shares to award recipients upon exercise of stock options or when the vesting condition for restricted stock units has been satisfied.

The Company estimates the fair value of stock options on the date of grant using the Black-Scholes option-pricing model.

For restricted stock units subject to a service vesting condition, the fair value is equal to the market value of the Company's common stock on the date of grant, adjusted for the fair value of dividends as the restricted stock holder is not entitled to dividends over the vesting period. For restricted stock units subject to a scorecard performance vesting condition, the fair value is adjusted for changes in JHI plc's common stock price at each balance sheet date until the end of the performance period. For restricted stock units subject to a market vesting condition, the fair value is estimated using the Monte Carlo Simulation.

Compensation expense recognised for liability-classified awards are based on the fair market value of JHI plc's common stock on the date of grant and recorded as a liability. The liability is adjusted for subsequent changes in JHI plc's common stock price at each balance sheet date.

Earnings Per Share

The Company discloses basic and diluted earnings per share (EPS). Basic EPS is calculated using net income divided by the weighted average number of common shares outstanding during the period. Diluted EPS is similar to basic EPS except that the weighted average number of common shares outstanding is increased to include the number of additional common shares calculated using the Treasury Method that would have been outstanding if the dilutive potential common shares, such as stock options and restricted stock units (RSUs), had been issued.

Accordingly, basic and dilutive common shares outstanding used in determining net income per share are as follows:

	Years Ended 31 March		
(Millions of shares)	2014	2013	2012
Basic common shares outstanding	442.6	439.2	436.2
Dilutive effect of stock awards	2.0	1.4	1.7
Diluted common shares outstanding	444.6	440.6	437.9

	2014	2013	2012
(US dollars)			
Net income per share - basic	\$ 0.22	\$ 0.10	\$ 1.39
Net income per share - diluted	\$ 0.22	\$ 0.10	\$ 1.38

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

Potential common shares of 1.9 million, 4.4 million and 11.1 million for the years ended 31 March 2014, 2013 and 2012, respectively, have been excluded from the calculation of diluted common shares outstanding because the effect of their inclusion would be anti-dilutive.

Unless they are anti-dilutive, RSUs which vest solely based on continued employment are considered to be outstanding as of their issuance date for purposes of computing diluted EPS and are included in the calculation of diluted EPS using the Treasury Method. Once these RSUs vest, they are included in the basic EPS calculation on a weighted-average basis.

RSUs which vest based on performance or market conditions are considered contingent shares. At each reporting date prior to the end of the contingency period, the Company determines the number of contingently issuable shares to include in the diluted EPS, as the number of shares that would be issuable under the terms of the RSU arrangement, if the end of the reporting period were the end of the contingency period. Once these RSUs vest, they are included in the basic EPS calculation on a weighted-average basis.

Asbestos

At 31 March 2006, the Company recorded an asbestos provision based on the estimated economic impact of the Original Final Funding Agreement (Original FFA) entered into on 1 December 2005. The amount of the net asbestos provision of US\$715.6 million was based on the terms of the Original FFA, which included an actuarial estimate prepared by KPMG Actuarial Pty Limited (KPMG Actuarial) as of 31 March 2006 of the projected future cash outflows, undiscounted and uninflated, and the anticipated tax deduction arising from Australian legislation which came into force on 6 April 2006. The amount represented the net economic impact that the Company was prepared to assume as a result of its voluntary funding of the asbestos liability which was under negotiation with various parties.

In February 2007, the shareholders approved the AFFA entered into on 21 November 2006 to provide long-term funding to the Asbestos Injuries Compensation Fund (AICF), a special purpose fund that provides compensation for Australian-related personal injuries for which certain former subsidiary companies of James Hardie in Australia (being Amaca Pty Ltd (Amaca), Amaba Pty Ltd (Amaba) and ABN 60 Pty Limited (ABN 60) (collectively, the Former James Hardie Companies)) are found liable.

Amaca and Amaba separated from the James Hardie Group in February 2001. ABN 60 separated from the James Hardie Group in March 2003. Upon shareholder approval of the AFFA in February 2007, shares in the Former James Hardie Companies were transferred to AICF, which manages Australian asbestos-related personal injury claims made against the Former James Hardie Companies and makes compensation payments in respect of those proven claims.

AICF

In February 2007, the Company's shareholders approved a proposal pursuant to which the Company provides long-term funding to AICF. The Company owns 100% of the Performing Subsidiary that funds the AICF subject to the provisions of the AFFA. The Company appoints three of the AICF directors and the New South Wales Government (NSW) appoints two of the AICF directors.

Under the terms of the AFFA, the Performing Subsidiary has an obligation to make payments to AICF on an annual basis. The amount of these annual payments is dependent on several factors, including

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

the Company's free cash flow (as defined in the AFFA), actuarial estimations, actual claims paid, operating expenses of AICF and the Annual Cash Flow Cap. JHI plc guarantees the Performing Subsidiary's obligation. As a result, the Company considers itself to be the primary beneficiary of AICF.

The Company's interest in AICF is considered variable because the potential impact on the Company will vary based upon the annual actuarial assessments obtained by AICF with respect to asbestos-related personal injury claims against the Former James Hardie Companies.

Although the Company has no legal ownership in AICF, for financial reporting purposes the Company consolidates AICF due to its pecuniary and contractual interests in AICF as a result of the funding arrangements outlined in the AFFA. The Company's consolidation of AICF results in a separate recognition of the asbestos liability and certain other asbestos-related assets and liabilities on its consolidated balance sheet. Among other items, the Company records a deferred tax asset for the anticipated future tax benefit the Company believes is available to it that arise from amounts contributed to AICF by the Performing Subsidiary. Since fiscal year 2007, movements in the asbestos liability arising from changes in foreign currency or actuarial adjustments are classified as asbestos adjustments and the income tax benefit arising from contributions to AICF is included within income tax benefit (expense) on the consolidated statements of operations and comprehensive income when realised.

For the year ended 31 March 2014, the Company did not provide financial or other support to AICF that it was not previously contractually required to provide. Future funding of AICF by the Company continues to be linked under the terms of the AFFA to the Company's long-term financial success, specifically the Company's ability to generate net operating cash flow.

AICF has operating costs that are claims related and non-claims related. Claims related costs incurred by AICF are treated as reductions in the accrued asbestos liability balances previously reflected in the consolidated balance sheets. Non-claims related operating costs incurred by AICF are expensed as incurred in the line item *Selling, general and administrative expenses* in the consolidated statements of operations and comprehensive income. AICF earns interest on its cash and cash equivalents and on its short-term investments; these amounts are included in the line item *Interest income* in the consolidated statements of operations and comprehensive income.

See Asbestos-Related Assets and Liabilities below and Note 11 for further details on the related assets and liabilities recorded in the Company's consolidated balance sheet under the terms of the AFFA.

Asbestos Adjustments

Adjustments in insurance receivables due to changes in the Company's assessment of recoverability are reflected as asbestos adjustments on the consolidated statements of operations and comprehensive income during the period in which the adjustments occur.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

Asbestos-Related Assets and Liabilities

The Company has recorded on its consolidated balance sheets certain assets and liabilities under the terms of the AFFA. These items are Australian dollar-denominated and are subject to translation into US dollars at each reporting date. These assets and liabilities are referred to by the Company as *Asbestos-related assets and liabilities* and include:

Asbestos Liability

The amount of the asbestos liability reflects the terms of the AFFA, which has been recognised by reference to (but is not exclusively based upon) the most recent actuarial estimate of projected future cash flows calculated by KPMG Actuarial. Based on their assumptions, KPMGA arrived at a range of possible total future cash flows and calculated a central estimate, which is intended to reflect a probability-weighted expected outcome of those actuarially estimated future cash flows. The Company views the central estimate as the basis for recognising the asbestos liability in the Company's financial statements.

The Company considered discounting when determining the best estimate under US GAAP. The Company has recognised the asbestos liability by reference to (but is not exclusively based upon) the central estimate as undiscounted on the basis that it is the Company's view that the timing and amounts of such cash flows are not fixed or readily determinable. The Company considered inflation when determining the best estimate under US GAAP. It is the Company's view that there are material uncertainties in estimating an appropriate rate of inflation over the extended period of the AFFA. The Company views the undiscounted and uninflated central estimate as the best estimate under US GAAP.

Adjustments in the asbestos liability due to changes in the actuarial estimate of projected future cash flows and changes in the estimate of future operating costs of AICF are reflected in the consolidated statements of operations and comprehensive income during the period in which they occur. Claims paid by AICF and claims-handling costs incurred by AICF are treated as reductions in the accrued balances previously reflected in the consolidated balance sheets.

Insurance Receivable

There are various insurance policies and insurance companies with exposure to the asbestos claims. The insurance receivable determined by KPMG Actuarial reflects the recoveries expected from all such policies based on the expected pattern of claims against such policies less an allowance for credit risk based on credit agency ratings. The insurance receivable generally includes these cash flows as undiscounted and uninflated. The Company records insurance receivables that are deemed probable of being realised.

Adjustments in insurance receivable due to changes in the actuarial estimate, or changes in the Company's assessment of recoverability are reflected in the consolidated statements of operations and comprehensive income during the period in which they occur. Insurance recoveries are treated as a reduction in the insurance receivable balance.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

Workers Compensation

Workers compensation claims are claims made by former employees of the Former James Hardie Companies. Such past, current and future reported claims were insured with various insurance companies and the various Australian State-based workers compensation schemes (collectively workers compensation schemes or policies). An estimate of the liability related to workers compensation claims is prepared by KPMG Actuarial as part of the annual actuarial assessment. This estimate contains two components, amounts that will be met by a workers compensation scheme or policy, and amounts that will be met by the Former James Hardie Companies.

The portion of the estimate that is expected to be met by the Former James Hardie Companies is included as part of the *Asbestos liability*. Adjustments to this estimate are reflected in the consolidated statements of operations and comprehensive income during the period in which they occur.

The portion of the estimate that is expected to be met by the workers compensation schemes or policies of the Former James Hardie Companies is recorded by the Company as a workers compensation liability. Since these amounts are expected to be paid by the workers compensation schemes or policies, the Company records an equivalent workers compensation receivable.

Adjustments to the workers compensation liability result in an equal adjustment in the workers compensation receivable recorded by the Company and have no effect on the consolidated statements of operations and comprehensive income.

Asbestos-Related Research and Education Contributions

The Company agreed to fund asbestos-related research and education initiatives for a period of 10 years, beginning in fiscal year 2007. The liabilities related to these agreements are included in *Other liabilities* on the consolidated balance sheets.

Restricted Cash and Cash Equivalents

Cash and cash equivalents of AICF are reflected as restricted assets, as the use of these assets is restricted to the settlement of asbestos claims and payment of the operating costs of AICF. The Company classifies these amounts as a current asset on the face of the consolidated balance sheet since they are highly liquid.

Restricted Short-Term Investments

Short-term investments consist of highly liquid investments held in the custody of major financial institutions. All short-term investments are classified as available for sale and are recorded at market value using the specific identification method. Unrealised gains and losses on the market value of these investments are included as a separate component of accumulated other comprehensive income. Realised gains and losses on short-term investments are recognised in *Other income* on the consolidated statements of operations and comprehensive income.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

Long-Term Debt

The AICF may draw funds under a long term credit facility to fund the payment of asbestos claims and certain operating and legal costs of AICF, Amaca, Amaba and ABN 60. The Facility is available to be drawn up to 9 December 2020 (being the tenth anniversary of signing) and must be repaid on or by 1 November 2030. Interest accrues daily on amounts outstanding and is calculated based on a 365-day year and is payable monthly. The borrowings under the credit facility are classified as current as AICF intends to repay the debt within one year.

AICF Other Assets and Liabilities

Other assets and liabilities of AICF, including fixed assets, trade receivables and payables are included on the consolidated balance sheets under the appropriate captions and their use is restricted to the operations of AICF.

Deferred Income Taxes

The Performing Subsidiary is able to claim a tax deduction for its contributions to AICF over a five-year period commencing in the year the contribution is incurred. Consequently, a deferred tax asset has been recognised equivalent to the anticipated tax benefit over the life of the AFFA. The current portion of the deferred tax asset represents Australian tax benefits that will be available to the Company during the subsequent twelve months.

Adjustments are made to the deferred income tax asset as adjustments to the asbestos-related assets and liabilities are recorded.

Foreign Currency Translation

The asbestos-related assets and liabilities are denominated in Australian dollars and thus the reported values of these asbestos-related assets and liabilities in the Company's consolidated balance sheets in US dollars are subject to adjustment depending on the closing exchange rate between the two currencies at the balance sheet date. The effect of foreign exchange rate movements between these currencies is included in *Asbestos adjustments* in the consolidated statements of operations and comprehensive income.

Recent Accounting Pronouncements

In February 2013, the FASB issued ASU No. 2013-02, which requires the presentation of significant amounts reclassified out of accumulated other comprehensive income (loss) by the respective line items of net income, either on the face of the statement where net income is presented or in the notes, but only if the amount reclassified is required under US GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under US GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under US GAAP that provide additional detail about those amounts. The amendments in ASU No. 2013-02 were effective for fiscal years and interim periods within those years, beginning after 15 December 2012. The adoption of this ASU did not result in a material impact on the Company's consolidated financial position, results of operations or cash flows.

In July 2013, the FASB issued ASU No. 2013-11, which provides explicit guidance on the financial statement presentation of an unrecognised tax benefit when a net operating loss carryforward, a

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

similar tax loss, or a tax credit carryforward exists. The amendments in ASU No. 2013-11 are effective for fiscal years and interim periods within those years, beginning after 15 December 2013. The Company has evaluated the impact of this ASU and does not expect its adoption to have a material impact on the Company's consolidated financial position, results of operations or cash flows.

3. Cash and Cash Equivalents

Cash and cash equivalents include amounts on deposit in banks and cash invested temporarily in various highly liquid financial instruments with original maturities of three months or less when acquired.

Cash and cash equivalents consist of the following components:

(Millions of US dollars)	2014	31 March	2013
Cash at bank and on hand	\$ 70.9		\$ 55.5
Short-term deposits	96.6		98.2
Total cash and cash equivalents	\$ 167.5		\$ 153.7

4. Restricted Cash and Cash Equivalents

Included in restricted cash and cash equivalents is US\$5.0 million related to an insurance policy at 31 March 2014 and 2013, which restricts the cash from use for general corporate purposes.

5. Accounts and Other Receivables

Accounts and other receivables consist of the following components:

(Millions of US dollars)	2014	31 March	2013
Trade receivables	\$ 135.5		\$ 134.1
Other receivables and advances	4.7		17.0
Allowance for doubtful accounts	(1.0)		(2.1)
Total accounts and other receivables	\$ 139.2		\$ 149.0

The collectability of accounts receivable, consisting mainly of trade receivables, is reviewed on an ongoing basis. An allowance for doubtful accounts is provided for known and estimated bad debts by analysing specific customer accounts and assessing the risk of uncollectability based on insolvency, disputes or other collection issues.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

The following are changes in the allowance for doubtful accounts:

(Millions of US dollars)	2014	31 March	2013
Balance at beginning of period	\$ 2.1		\$ 2.3
Charged to expense	0.2		1.0
Write-offs, net of recoveries	(1.3)		(1.2)
Balance at end of period	\$ 1.0		\$ 2.1

6. Inventories

Inventories consist of the following components:

(Millions of US dollars)	2014	31 March	2013
Finished goods	\$ 135.5		\$ 115.8
Work-in-process	6.6		7.6
Raw materials and supplies	56.5		55.1
Provision for obsolete finished goods and raw materials	(7.9)		(6.4)
Total inventories	\$ 190.7		\$ 172.1

As of 31 March 2014 and 2013, US\$18.3 million and US\$19.2 million, respectively, of our finished goods inventory balance was held at third-party locations.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)****7. Property, Plant and Equipment**

Property, plant and equipment consist of the following components:

(Millions of US dollars)	Land	Buildings	Machinery and Equipment	Construction in Progress ^{1,2}	Total
Cost or valuation:					
At 31 March 2012	\$ 18.3	\$ 210.5	\$ 984.9	\$ 50.9	\$ 1,264.6

At 31 March 2014	\$ -	\$ (93.3)	\$ (574.5)	\$ -	\$ (667.8)
Net book amount:					
At 31 March 2013	\$ 18.5	\$ 125.0	\$ 454.3	\$ 61.1	\$ 658.9
At 31 March 2014	\$ 30.2	\$ 134.8	\$ 430.3	\$ 115.9	\$ 711.2

Edgar Filing: James Hardie Industries plc - Form 20-F

¹ Construction in progress consists of plant expansions and upgrades.

² Construction in progress balance is presented net of assets transferred into service. Depreciation expense for the years ended 31 March 2014 and 2013 was US\$61.3 million and US\$60.0 million, respectively. Included in property, plant and equipment are restricted assets of AICF with a net book value of US\$1.7 million and US\$2.1 million as of 31 March 2014 and 2013, respectively.

Impairment of Long-Lived Assets

The Company performs an asset impairment review on a quarterly basis in connection with its assessment of production capabilities and the Company's ability to meet market demand. During the year ended 31 March 2014, there were no asset impairment charges recorded.

During the year ended 31 March 2013, the Company recorded asset impairment charges of US\$16.9 million in the USA and Europe Fibre Cement segment. In addition, the Company made the decision that it would not re-open its Blandon, Pennsylvania plant. As a result the Company recorded impairment charges of US\$4.4 million for buildings, land and manufacturing equipment at the Blandon plant. The remaining impairment charges of US\$12.5 million included US\$2.8 million related to

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

redundant equipment that is no longer utilised to manufacture products and US\$9.7 million related to manufacturing equipment that is in the process of being replaced by plant and equipment with enhanced capability in order to expand production capacity in anticipation of the continued recovery in the US housing market. The estimated fair value for the impaired property, plant and equipment was based on a discounted cash flow analysis that considered, to the extent practicable, a market participant's expectations and assumptions and the impaired assets' highest and best use.

During the year ended 31 March 2012, the Company recorded an asset impairment charge of US\$14.3 million related to machinery and equipment no longer in service that was utilised to produce materials for certain of the Company's products. The asset impairment charge was recorded in the USA and Europe Fibre Cement segment. The impaired assets were reduced to a net book value of nil, which was the estimated fair value based on a discounted cash flow analysis that considered, to the extent practicable, a market participant's expectations and assumptions and the impaired assets' highest and best use.

8. Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities consist of the following components:

(Millions of US dollars)	31 March	
	2014	2013
Trade creditors	\$ 94.0	\$ 75.2
Other creditors and accruals	48.0	28.5
Total accounts payable and accrued liabilities	\$ 142.0	\$ 103.7

9. Long-Term Debt

At 31 March 2014, the Company's credit facilities consisted of:

Description (US\$ millions)	Effective Interest Rate	Total Facility	Principal Drawn
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until March 2016	-	\$ 50.0	\$ -
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until April 2016	-	190.0	-
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until March 2017	-	40.0	-
Term facilities, can be drawn in US\$, variable interest rates based on LIBOR plus margin, can be repaid and redrawn until April 2017	-	75.0	-

Edgar Filing: James Hardie Industries plc - Form 20-F

Total	\$ 355.0	\$ -
--------------	-----------------	-------------

At 31 March 2014, no amounts were drawn under the combined facilities. The weighted average interest rate on the Company's total outstanding debt was nil at 31 March 2014 and 2013, and the weighted average term of all debt facilities is 2.4 years at 31 March 2014. The weighted average fixed interest rate on the Company's interest rate swap contracts is set forth in Note 12.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

For all facilities, the interest rate is calculated two business days prior to the commencement of each draw-down period based on the US\$ London Interbank Offered Rate (LIBOR) plus the margins of individual lenders and is payable at the end of each draw-down period.

At 31 March 2014, the Company was in compliance with all restrictive debt covenants contained in its credit facility agreements. Under the most restrictive of these covenants, the Company (i) must not exceed a maximum of net debt to earnings before interest, tax, depreciation and amortisation, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited and excluding assets, liabilities and other balance sheet items of the AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, (ii) must meet or exceed a minimum ratio of earnings before interest and taxes to net interest charges, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, and (iii) must ensure that no more than 35% of Free Cash Flow (as defined in the AFFA), in any given financial year (Annual Cash Flow Cap) is contributed to AICF on the payment dates under the AFFA in the next following financial year. The Annual Cash Flow Cap does not apply to payments of interest, if any, to AICF and is consistent with contractual obligations of the Performing Subsidiary and the Company under the AFFA.

Subsequent to 31 March 2014, the Company added term facilities totalling US\$150.0 million; US\$25.0 million of these facilities mature in April 2017, US\$50.0 million mature in April 2019 and US\$75.0 million mature in May 2019. The addition of the new credit facilities increased the total borrowing capacity to US\$505.0 million.

10. Product Warranties

The Company offers various warranties on its products, including a 30-year limited warranty on certain of its fibre cement siding products in the United States. A typical warranty program requires the Company to replace defective products within a specified time period from the date of sale. The Company records an estimate for future warranty related costs based on a trend analysis of actual historical warranty costs as they relate to sales. Based on this analysis and other factors, the adequacy of the Company's warranty provisions is adjusted as necessary. While the Company's warranty costs have historically been within its calculated estimates, it is possible that future warranty costs could differ from those estimates.

The following are the changes in the product warranty provision:

(Millions of US dollars)	Years Ended 31 March		
	2014	2013	2012
Balance at beginning of period	\$ 27.1	\$ 27.0	\$ 26.2
Accruals for product warranties	14.0	12.1	13.1
Settlements made in cash or in kind	(9.7)	(12.0)	(12.3)
Balance at end of period	\$ 31.4	\$ 27.1	\$ 27.0

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)****11. Asbestos**

The AFFA was approved by shareholders in February 2007 to provide long-term funding to AICF. The accounting policies utilised by the Company to account for the AFFA are described in Note 2.

Asbestos Adjustments

The asbestos adjustments included in the consolidated statements of operations and comprehensive income comprise the following:

(Millions of US dollars)	Years Ended 31 March		
	2014	2013	2012
Change in estimates:			
Change in actuarial estimate asbestos liability	\$ (340.3)	\$ (163.0)	\$ (67.8)
Change in actuarial estimate insurance receivable	31.2	27.9	49.8
Change in estimate AICF claims-handling costs	0.9	5.9	8.4
Subtotal Change in estimates	(308.2)	(129.2)	(9.6)
Recovery of Insurance Receivables	15.2	11.9	-
Gain (loss) on foreign currency exchange	97.2	0.2	(6.2)
Total Asbestos Adjustments	\$ (195.8)	\$ (117.1)	\$ (15.8)

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)***Asbestos-Related Assets and Liabilities*

The Company has included on its consolidated balance sheets certain asbestos-related assets and liabilities under the terms of the AFFA. These amounts are detailed in the table below, and the net total of these asbestos-related assets and liabilities is referred to by the Company as the Net AFFA Liability.

(Millions of US dollars)	31 March	
	2014	2013
Asbestos liability current	\$ (134.5)	\$ (135.0)
Asbestos liability non-current	(1,571.7)	(1,558.7)
Asbestos liability Total	(1,706.2)	(1,693.7)
Insurance receivable current	28.0	22.2
Insurance receivable non-current	198.1	209.4
Insurance receivable Total	226.1	231.6
Workers compensation asset current	4.3	0.9
Workers compensation asset non-current	47.6	60.7
Workers compensation liability current	(4.3)	(0.9)
Workers compensation liability non-current	(47.6)	(60.7)
Workers compensation Total	-	-
Loan facility	(47.0)	-
Other net liabilities	(0.8)	(1.6)
Restricted cash and cash equivalents and restricted short-term investment assets of the AICF	60.3	133.5
Net AFFA liability	\$ (1,467.6)	\$ (1,330.2)
Deferred income taxes current	16.5	18.6
Deferred income taxes non-current	455.2	434.1
Deferred income taxes Total	471.7	452.7
Income tax payable	16.7	25.9
Net Unfunded AFFA liability, net of tax	\$ (979.2)	\$ (851.6)

Edgar Filing: James Hardie Industries plc - Form 20-F

On 2 April 2012, in accordance with arrangements agreed with the NSW Government and AICF, the Company contributed US\$138.7 million (A\$132.3 million) to AICF. A further contribution of US\$45.4 million (A\$45.2 million) was contributed on 2 July 2012, in accordance with the terms of the AFFA. Total contributions for the year ended 31 March 2013 were US\$184.1 million (A\$177.5 million).

Restricted cash and cash equivalents at 31 March 2012 reflected the early contribution to AICF of US\$138.7 million (A\$132.3 million). The determination of any contribution to AICF in respect of the year ended 31 March 2013 will reverse the effect of the increase in the Company's free cash flow resulting from the movement in restricted cash and cash equivalents to 31 March 2013 related to the early contribution. The Company's adjusted free cash flow for these purposes is net cash used by operating activities for the year ended 31 March 2013 of US\$29.4 million (A\$28.2 million). In accordance with the terms of the AFFA, and the arrangements agreed with the NSW Government and

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

AICF for an early contribution based on the Company's free cash flow for the year ended 31 March 2012, the Company did not make a contribution to AICF in respect of the year ended 31 March 2013.

Asbestos Liability

The amount of the asbestos liability reflects the terms of the AFFA; the asbestos liability has been recognised by reference to (but is not exclusively based upon) the most recent central estimate calculated by KPMG Actuarial, which is intended to reflect a probability-weighted expected outcome of projected future asbestos-related cash flows, which the Company reflects on an undiscounted and uninflated basis. The asbestos liability also includes an allowance for the future claims-handling costs of AICF. The Company receives an updated actuarial estimate as of 31 March each year. The most recent actuarial assessment was performed as of 31 March 2014.

The changes in the asbestos liability for the year ended 31 March 2014 are detailed in the table below:

	A\$	A\$ to US\$	US\$
	Millions	rate	Millions
Asbestos liability 31 March 2013	A\$(1,625.4)	0.9597	\$ (1,693.7)
Asbestos claims paid ¹	140.4	1.0716	131.0
AICF claims - handling costs incurred ¹	2.7	1.0716	2.5
Change in actuarial estimate ²	(369.1)	1.0845	(340.3)
Change in claims handling cost estimate ²	1.0	1.0845	0.9
Effect of foreign exchange			\$ 193.4
Asbestos liability 31 March 2014	A\$(1,850.4)	1.0845	\$ (1,706.2)

Insurance Receivable - Asbestos

The changes in the insurance receivable for the year ended 31 March 2014 are detailed in the table below:

	A\$	A\$ to US\$	US\$
	Millions	rate	Millions
Insurance receivables 31 March 2013	A\$222.3	0.9597	\$ 231.6
Insurance recoveries ¹	(27.5)	1.0716	(25.7)
Recovery of Insurance Receivables ²	16.5	1.0845	15.2
Change in actuarial estimate ²	34.0	1.0845	31.2
Effect of foreign exchange			(26.2)
Insurance receivables 31 March 2014	A\$245.3	1.0845	\$ 226.1

Edgar Filing: James Hardie Industries plc - Form 20-F

Included in insurance receivable is US\$2.6 million recorded on a discounted basis because the timing of the recoveries has been agreed with the insurer.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)***Deferred Income Taxes – Asbestos*

The changes in the deferred income taxes – asbestos for the year ended 31 March 2014 are detailed in the table below:

	A\$ Millions	A\$ to US\$ rate	US\$ Millions
Deferred Tax Assets 31 March 2013	A\$ 434.4	0.9597	\$ 452.7
Offset to Income Tax Payable ¹	(18.0)	1.0716	(16.8)

Effect of foreign exchange			(51.8)
Deferred tax asset 31 March 2014	A\$ 511.4	1.0845	\$ 471.7

¹ The average exchange rate for the period is used to convert the Australian dollar amount to US dollars based on the assumption that these transactions occurred evenly throughout the period.

² The spot exchange rate at 31 March 2014 is used to convert the Australian dollar amount to US dollars as the adjustment was made on that date.

³ The weighted average spot exchange rates on the dates the transactions occurred are used to convert the Australian dollar amounts to US dollars as the adjustments were made on those dates.

Income Taxes Payable

A portion of the deferred income tax asset is applied against the Company's income tax payable. At 31 March 2014 and 2013, this amount was US\$16.8 million and US\$25.6 million, respectively. During the year ended 31 March 2014, there was a US\$3.9 million unfavourable effect of foreign currency exchange.

Other Net Liabilities

Other net liabilities include a provision for asbestos-related education and medical research contributions of US\$1.7 million and US\$1.9 million at 31 March 2014 and 2013, respectively.

Also included in other net liabilities are the other assets and liabilities of AICF including trade receivables, prepayments, fixed assets, trade payables and accruals. These other assets and liabilities of AICF were a net asset of US\$0.9 million and US\$0.3 million at 31 March 2014 and 2013, respectively. During the year ended 31 March 2014, there was US\$0.2 million favourable effect of foreign currency exchange on these other assets and liabilities.

Edgar Filing: James Hardie Industries plc - Form 20-F

Restricted Cash and Short-term Investments of AICF

Cash and cash equivalents and short-term investments of AICF are reflected as restricted assets as these assets are restricted for use in the settlement of asbestos claims and payment of the operating costs of AICF.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

The changes in restricted cash and short-term investments of AICF for the year ended 31 March 2014 are set forth in the table below:

	A\$ Millions	A\$ to US\$ rate	US\$ Millions
Restricted cash assets 31 March 2013	A\$ 128.1	0.9597	\$ 133.5

³ The weighted average spot exchange rates on the dates the transactions occurred are used to convert the Australian dollar amounts to US dollars as the adjustments were made on those dates.

Actuarial Study; Claims Estimate

AICF commissioned an updated actuarial study of potential asbestos-related liabilities as of 31 March 2014. Based on KPMG Actuarial's assumptions, KPMG Actuarial arrived at a range of possible total cash flows and calculated a central estimate, which is intended to reflect a probability-weighted expected outcome of those actuarially estimated future cash flows.

The following table sets forth the Central Estimates, net of insurance recoveries, calculated by KPMG Actuarial as of 31 March 2014:

	Year Ended 31 March 2014	
(Millions of US and Australian dollars, respectively)	US\$	A\$

Edgar Filing: James Hardie Industries plc - Form 20-F

Central Estimate	Discounted & Inflated	\$	1,724.5	A\$ 1,870.2
Central Estimate	Undiscounted but Inflated		2,586.5	2,805.1
Central Estimate	Used by the Company	\$	1,426.1	A\$ 1,546.6

The asbestos liability has been revised to reflect the most recent actuarial estimate prepared by KPMG Actuarial as of 31 March 2014. The Company has released the KPMGA actuarial report in its entirety on the Company's Investor Relations website at <http://www.ir.jameshardie.com.au>.

In estimating the potential financial exposure, KPMG Actuarial made assumptions related to the total number of claims which were reasonably estimated to be asserted through 2076, the typical cost of

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

settlement (which is sensitive to, among other factors, the industry in which a plaintiff claims exposure, the alleged disease type and the jurisdiction in which the action is brought), the legal costs incurred in the litigation of such claims, the rate of receipt of claims, the settlement strategy in dealing with outstanding claims and the timing of settlements.

Due to inherent uncertainties in the legal and medical environment, the number and timing of future claim notifications and settlements, the recoverability of claims against insurance contracts, and estimates of future trends in average claim awards, as well as the extent to which the above named entities will contribute to the overall settlements, the actual amount of liability could differ materially from that which is currently projected.

The potential range of costs as estimated by KPMG Actuarial is affected by a number of variables such as nil settlement rates, peak year of claims, past history of claims numbers, average settlement rates, past history of Australian asbestos-related medical injuries, current number of claims, average defence and plaintiff legal costs, base wage inflation and superimposed inflation. The potential range of losses disclosed includes both asserted and unasserted claims. While no assurances can be provided, the Company believes that it is likely to be able to partially recover losses from various insurance carriers. The Company has not netted the insurance receivable against the asbestos liability on its consolidated balance sheets.

A sensitivity analysis has been performed to determine how the actuarial estimates would change if certain assumptions (i.e., the rate of inflation and superimposed inflation, the average costs of claims and legal fees, and the projected numbers of claims) were different from the assumptions used to determine the central estimates. This analysis shows that the discounted (but inflated) central estimates could be in a range of A\$1.3 billion (US\$1.2 billion) to A\$3.0 billion (US\$2.7 billion). The undiscounted (but inflated) estimates could be in a range of A\$1.8 billion (US\$1.7 billion) to A\$5.0 billion (US\$4.6 billion) as of 31 March 2014. The actual cost of the liabilities could be outside of that range depending on the results of actual experience relative to the assumptions made.

During the 2014 fiscal year, mesothelioma claims reporting activity has been above actuarial expectations for the second consecutive year. One of the critical assumptions is the estimated peak year of mesothelioma disease claims, which was previously assumed to have occurred in 2010/2011. Potential variation in this estimate has an impact much greater than the other assumptions used to derive the discounted central estimate. In performing the sensitivity assessment of the estimated period of peak claims reporting for mesothelioma, KPMG Actuarial has determined that if claims reporting does not begin to reduce until after 2018/19, the discounted central estimate could increase by approximately 22% (in addition to the 17% increase that has already been factored into the 31 March 2014 valuation). At 31 March 2014, KPMG Actuarial has formed the view that the higher claims reporting assumed in the short and medium term is not necessarily indicative of longer term impacts, as at this stage it is too early to form such a conclusion on the basis of one year's experience.

Claims Data

AICF provides compensation payments for Australian asbestos-related personal injury claims against the Former James Hardie Companies. The claims data in this section are reflective of these Australian asbestos-related personal injury claims against the Former James Hardie Companies.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

The following table shows the activity related to the numbers of open claims, new claims and closed claims during each of the past five years and the average settlement per settled claim and case closed:

	For the Years Ended 31 March				
	2014	2013	2012	2011	2010
Number of open claims at beginning of period	462	592	564	529	534
Number of new claims	608	542	456	494	535
Number of closed claims	604	672	428	459	540
Number of open claims at end of period	466	462	592	564	529
Average settlement amount per settled claim	A\$ 253,185	A\$ 231,313	A\$ 218,610	A\$ 204,366	A\$ 190,627
Average settlement amount per case closed	A\$ 212,944	A\$ 200,561	A\$ 198,179	A\$ 173,199	A\$ 171,917
Average settlement amount per settled claim	US\$ 236,268	US\$ 238,615	US\$ 228,361	US\$ 193,090	US\$ 162,250
Average settlement amount per case closed	US\$ 198,716	US\$ 206,892	US\$ 207,019	US\$ 163,642	US\$ 146,325

Under the terms of the AFFA, the Company has rights of access to actuarial information produced for AICF by the actuary appointed by AICF (the Approved Actuary). The Company's disclosures with respect to claims statistics are subject to it obtaining such information from the Approved Actuary. The AFFA does not provide the Company an express right to audit or otherwise require independent verification of such information or the methodologies to be adopted by the Approved Actuary. As such, the Company relies on the accuracy and completeness of the information and analysis of the Approved Actuary when making disclosures with respect to claims statistics.

AICF NSW Government Secured Loan Facility

On 9 December 2010, AICF, Amaca, Amaba and ABN 60 (together, the Obligors) entered into the Facility with The State of New South Wales, Australia whereby AICF may borrow, subject to certain conditions, up to an aggregate amount of A\$320.0 million (US\$295.1 million, based on the exchange rate at 31 March 2014). The amount available to be drawn depends on the value of the insurance policies benefiting the Obligors and may be adjusted upward or downward, subject to a ceiling of A\$320.0 million. At 31 March 2014, the discounted value of insurance policies was A\$214.3 million (US\$197.6 million, based on the exchange rate at 31 March 2014).

At 31 March 2014, AICF had A\$50.6 million (US\$47.0 million, based on the exchange rate at 31 March 2014) outstanding on the Facility. The term of the Facility expires on 1 November 2030, at which time all amounts outstanding under the Facility become due and payable.

In accordance with the terms of the Facility, drawings under the Facility may only be used by AICF to fund the payment of asbestos claims and certain operating and legal costs of the Obligors. The amount available to be drawn is subject to periodic review by NSW. The Facility is available to be drawn up to the tenth anniversary of signing and must be repaid on or by 1 November 2030.

Interest accrues daily on amounts outstanding. Interest is calculated based on a 365-day year and is payable monthly. AICF may, at its discretion, elect to capitalise interest payable on amounts outstanding under the Facility on the date interest becomes due and payable. In addition, if AICF does not pay interest on a due date, it is taken to have elected to capitalise the interest.

NSW will borrow up to 50% of the amount made available under the Facility from the Commonwealth of Australia (Commonwealth).

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

To the extent that NSW's source of funding the Facility is from the Commonwealth, the interest rate on the Facility is calculated by reference to the cost of NSW's borrowings from the Commonwealth for that purpose, being calculated with reference to the Commonwealth Treasury fixed coupon bond rate for a period determined as appropriate by the Commonwealth.

In summary, to the extent that NSW's source of funding is not from the Commonwealth, the interest rate on drawings under the Facility is calculated as (i) during the period to (but excluding) 1 May 2020, a yield percent per annum calculated at the time of the first drawdown of the Facility by reference to the NSW Treasury Corporation's 6% 1/05/2020 Benchmark Bonds, (ii) during the period after 1 May 2020, a yield percent per annum calculated by reference to NSW Treasury Corporation bonds on issue at that time and maturing in 2030, or (iii) in any case, if the relevant bonds are not on issue, a yield percent per annum in respect of such other source of funding for the Facility determined by the NSW Government in good faith to be used to replace those bonds, including any guarantee fee payable to the Commonwealth in respect of the bonds (where the bonds are guaranteed by the Commonwealth) or other source of funding.

Under the Facility, Amaca, Amaba and ABN 60 each guarantee the payment of amounts owed by AICF and AICF's performance of its obligations under the Facility. Each Obligor has granted a security interest in certain property including cash accounts, proceeds from insurance claims, payments remitted by the Company to AICF and contractual rights under certain documents including the AFFA. Each Obligor may not deal with the secured property until all amounts outstanding under the Facility are paid, except as permitted under the terms of the security interest.

Under the terms of the Facility, each Obligor must, upon receipt of proceeds from insurance claims and payments remitted by the Company under the AFFA, apply all of such proceeds in repayment of amounts owing under the Facility. NSW may, at its sole discretion, waive or postpone (in such manner and for such period as it determines) the requirement for the Obligors to apply proceeds of insurance claims and payments remitted by the Company to repay amounts owed under the Facility to ensure AICF has sufficient liquidity to meet its future cash flow needs.

The Obligors are subject to certain operating covenants under the Facility and the terms of the security interest, including, without limitation, (i) positive covenants relating to providing corporate reporting documents, providing particular notifications and complying with the terms of the AFFA, and (ii) negative covenants restricting them from voiding, cancelling, settling, or adversely affecting existing insurance policies, disposing of assets and granting security to secure any other financial indebtedness, other than in accordance with the terms and conditions of the Facility.

Upon an event of default, NSW may cancel the commitment and declare all amounts outstanding as immediately due and payable. The events of default include, without limitation, failure to pay or repay amounts due in accordance with the Facility, breach of covenants, misrepresentation, cross default by an obligor and an adverse judgment (other than a personal asbestos or Marlew claim) against an Obligor. The term of the Facility expires on 1 November 2030. At that time, all amounts outstanding under the Facility become due and payable.

Because the Company consolidates AICF due to the Company's pecuniary and contractual interests in AICF as a result of the funding arrangements outlined in the AFFA, any drawings, repayments or payments of accrued interest by AICF under the Facility impact the Company's consolidated financial position, results of operations and cash flows.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

Any drawings, repayments, or payments of accrued interest under the Facility by AICF do not impact the Company's free cash flow, as defined in the AFFA, on which annual contributions remitted by the Company to AICF are based. James Hardie Industries plc and its wholly-owned subsidiaries are not a party to, guarantor of, or security provider in respect of the Facility.

12. Fair Value Measurements

Assets and liabilities of the Company that are carried at fair value are classified in one of the following three categories:

- Level 1 Quoted market prices in active markets for identical assets and liabilities that the Company has the ability to access at the measurement date;
- Level 2 Observable market-based inputs or unobservable inputs that are corroborated by market data for the asset or liability at the measurement date;
- Level 3 Unobservable inputs that are not corroborated by market data used when there is minimal market activity for the asset or liability at the measurement date.

Fair value measurements of assets and liabilities are assigned a level within the fair value hierarchy based on the lowest level of any input that is significant to the fair value measurement in its entirety.

The Company's financial instruments consist primarily of cash and cash equivalents, restricted cash and cash equivalents, restricted short-term investments, trade receivables, trade payables, debt and interest rate swaps.

At 31 March 2014, the Company's financial instruments consist primarily of cash and cash equivalents, restricted cash and cash equivalents, restricted short-term investments, trade receivables, trade payables, debt and interest rate swaps.

Cash and cash equivalents, Restricted cash and cash equivalents, Trade receivables and Trade payables These items are recorded in the financial statements at historical cost. The historical cost basis for these amounts is estimated to approximate their respective fair values due to the short maturity of these instruments.

Restricted short-term investments Restricted short-term investments are held and managed by AICF and are recorded in the financial statements at fair value. The fair value of restricted short-term investments is based on inputs that are observable in the market or can be derived principally from or corroborated by observable market data such as pricing for similar securities, recently executed transactions, cash flow models with yield curves and benchmark securities. Accordingly, restricted short-term investments are categorised as Level 2. Changes in fair value are recorded as other comprehensive income and included as a component in shareholders' equity.

Debt Debt is generally recorded in the financial statements at historical cost. The carrying value of debt provided under the Company's credit facilities approximates fair value since the interest rates charged under these credit facilities are tied directly to market rates and fluctuate as market rates change. As of 31 March 2014, no debt was outstanding under the Company's existing credit facilities.

Derivatives and Hedging The Company uses derivatives from time to time for risk management purposes and does not engage in speculative activity. A key risk management objective for the

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

Company is to mitigate interest rate risk associated with the Company's external credit facilities and foreign currency risk primarily with respect to forecasted transactions denominated in foreign currencies, as further described below. The determination of whether the Company enters into a derivative transaction to achieve these risk management objectives depends on a number of factors, including market related factors that impact the extent to which derivative instruments will achieve such risk management objectives of the Company.

The notional amount of interest rate swap contracts and foreign currency forward contracts represents the basis upon which payments are calculated and are reported on a net basis when a legal and enforceable right of set-off exists. The following table sets forth the total outstanding notional amount and the fair value of the Company's derivative instruments held at 31 March 2014 and 2013.

(Millions of US dollars)	Notional Amount		Fair Value as of			
	31 March 2014	31 March 2013	31 March 2014		31 March 2013	
			Assets	Liabilities	Assets	Liabilities
Derivatives accounted for as hedges						
Foreign currency forward contracts	\$ 9.7	\$ -	\$ 0.5	\$ -	\$ -	\$ -
Derivatives not accounted for as hedges						
Foreign currency forward contracts	124.0	-	1.8	-	-	-
Interest rate swap contracts	125.0	25.0	-	0.5	-	1.3
Total	\$ 258.7	\$ 25.0	\$ 2.3	\$ 0.5	\$ -	\$ 1.3

Interest Rate Swaps

The Company may from time to time enter into interest rate swap contracts to protect against upward movements in US\$ LIBOR and the associated interest the Company pays on its external credit facilities. Interest rate swaps are recorded in the financial statements at fair value. Changes in fair value are recorded in the consolidated statements of operations and comprehensive income in *Other income*. At 31 March 2014 and 2013, the Company had interest rate swap contracts with a total notional principal of US\$125.0 million and US\$25.0 million, respectively. For all of these interest rate swap contracts, the Company has agreed to pay fixed interest rates while receiving a floating interest rate.

The fair value of interest rate swap contracts is calculated based on the fixed rate, notional principal, settlement date and present value of the future cash inflows and outflows based on the terms of the agreement and the future floating interest rates as determined by a future interest rate yield curve. The model used to value the interest rate swap contracts is based upon well recognised financial principles, and interest rate yield curves can be validated through readily observable data by external sources. Although readily observable data is used in the valuations, different valuation methodologies could have an effect on the estimated fair value. Accordingly, the interest rate swap contracts are categorised as Level 2.

During the year ended 31 March 2014, the Company entered into three additional interest rate swap contracts with an aggregate notional principal of US\$100.0 million. The first was entered into in October 2013 with a notional principal of US\$50.0 million, term of 5 years, fixed interest rate of 2.0% and a forward start date of October 2014. The remaining two contracts were entered into in December 2013 with notional principal amounts of US\$25.0 million and US\$25.0 million, terms of 6 years and 4 years, fixed interest rates of 2.3% and 1.5%, respectively, and a forward start date of July 2014.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

At 31 March 2014, the weighted average fixed interest rate of these contracts is 2.1% and the weighted average remaining life is 4.5 years. These contracts have a fair value of US\$0.5 million and US\$1.3 million at 31 March 2014 and 2013, respectively, which is included in *Accounts payable*. For the years ended 31 March 2014 and 2013, the Company included in *Other income* an unrealised gain of US\$0.8 million and US\$1.8 million, respectively, on interest rate swap contracts. Included in interest expense is a realised loss on interest rate swap contracts of US\$0.6 million and US\$2.1 million for the years ended 31 March 2014 and 2013, respectively.

Foreign Currency Forward Contracts

The Company uses foreign currency forward contracts and enters into hedging relationships from time to time in order to mitigate exposure to foreign currency fluctuations. When achievable, these instruments are designated as hedges and treated as a cash flow hedging arrangement for accounting purposes. In September 2013, the Company entered into foreign currency forward contracts designated as hedges in order to mitigate exposure associated with the anticipated purchases of production assets denominated in a foreign currency in a future period.

For foreign currency forward contracts that are designated as a cash flow hedging arrangement, the effective portion of the change in fair value of the contract is reported as a component of shareholders' equity within *Accumulated other comprehensive income* on the consolidated balance sheet and reclassified into earnings contemporaneously and in the same caption with the earnings effect of the hedged transaction. For cash flow hedges, the amount of ineffectiveness in the hedging relationship and amount of the changes in fair value of the foreign currency forward contracts that are not included in the measurement of ineffectiveness are both reflected in earnings each reporting period within *Other income*. For foreign currency forward contracts not designated as a hedge, changes in the fair value of foreign currency forward contracts are reflected in earnings within *Other income* at each measurement date.

The estimated fair value associated with these contracts was US\$0.5 million at 31 March 2014. In addition, the cumulative unrealised gains arising from changes in the fair value of foreign currency forward contracts designated as a cash flow hedging arrangement was US\$0.9 million as of 31 March 2014, which were classified within *Accumulated other comprehensive income*. There were no amounts reclassified from *Accumulated other comprehensive income* into earnings for the fiscal year ended 31 March 2014. The maximum term of foreign currency forward contracts that hedged forecasted transactions was 1.1 years at 31 March 2014. There were no significant gains or losses reclassified into earnings as a result of a discontinuance of a cash flow hedge resulting from an unfavourable change in probability of a forecasted transaction occurring. Further, the amount of deferred gains or losses to be reclassified into earnings within the next 12 months is not expected to be significant. The fair value of these contracts is included in *Other assets* at 31 March 2014.

In addition, the Company has entered into foreign currency forward contracts that are not designated as a cash flow hedging arrangements. For the years ended 31 March 2014 and 2013, the Company included in *Other income* the cumulative unrealised gains arising from changes in the fair value of these contracts of US\$1.8 million and nil, respectively. The maximum term of foreign currency forward contracts that are not designated as hedges was 1.1 years at 31 March 2014.

The Company's foreign currency forward contracts are valued using models that maximise the use of market observable inputs including interest rate curves and both forward and spot prices for currencies and are categorised as Level 2 within the fair value hierarchy.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

The following table sets forth by level within the fair value hierarchy, the Company's financial assets and liabilities that were accounted for at fair value on a recurring basis at 31 March 2014 according to the valuation techniques the Company used to determine their fair values.

(Millions of US dollars)	Fair Value at 31 March 2014	Fair Value Measurements Using Inputs Considered as		
		Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	\$ 167.5	\$ 167.5	\$ -	\$ -
Restricted cash and cash equivalents	65.2	65.2	-	-
Restricted short-term investments	0.1	-	0.1	-
Forward contracts included in Other Assets	2.3	-	2.3	-
Total Assets	\$ 235.1	\$ 232.7	\$ 2.4	\$ -
Interest rate swap contracts included in Accounts Payable	0.5	\$ -	\$ 0.5	\$ -
Total Liabilities	\$ 0.5	\$ -	\$ 0.5	\$ -

13. Commitments and Contingencies

The Company is involved from time to time in various legal proceedings and administrative actions related to the normal conduct of its business, including general liability claims, putative class action lawsuits and litigation concerning its products.

Although it is impossible to predict the outcome of any pending legal proceeding, management believes that such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows, except as they relate to asbestos and New Zealand product liability claims as described in these financial statements.

New Zealand Product Liability

Since fiscal year 2002, the Company's New Zealand subsidiaries have been and continue to be joined in a number of product liability claims in New Zealand that relate to residential buildings (single dwellings and apartment complexes) and a small number of non-residential buildings, primarily constructed from 1998 to 2004. The product liability claims often involve multiple parties and allege that losses were incurred due to excessive moisture penetration of the buildings' structures. The claims typically include allegations of poor building design, inadequate certification of plans, inadequate construction review and compliance certification and deficient work by sub-contractors.

The Company recognises a liability for both asserted and unasserted New Zealand product liability claims in the period in which the loss becomes probable and estimable. The amount of reasonably possible loss is dependent on a number of factors including, without limitation, the specific facts and circumstances unique to each claim brought against the Company's New Zealand subsidiaries, the existence of any co-defendants involved in defending the claim, the solvency of such co-defendants (including the ability of such co-defendants to remain solvent until the related claim is ultimately

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

resolved), the availability of claimant compensation under a Government compensation scheme, the amount of loss estimated to be allocable to the Company's New Zealand subsidiaries in instances that involve co-defendants in defending the claim and the extent to which the co-defendants and the Company's New Zealand subsidiaries have access to third-party recoveries to cover a portion of the costs incurred in defending and resolving such actions. In addition to the above limitations, the total loss incurred is also dependent on the manner and extent to which the statute of limitations will apply in future periods.

Historically, the Company's New Zealand subsidiaries have been joined to these product liability claims as one of several co-defendants, including local government entities responsible for enforcing building codes and practices, resulting in the Company's New Zealand subsidiaries becoming liable for only a portion of each claim. In addition, the Company's New Zealand subsidiaries have had access to third-party recoveries to defray a significant portion of the costs incurred in resolving such claims.

The Company has established a provision for asserted and unasserted New Zealand product liability claims within the current portion of *Other liabilities*, with a corresponding estimated receivable for third-party recoveries being recognised within *Accounts and other receivables*. At 31 March 2014 and 31 March 2013, the amount of the provision for New Zealand product liability claims, net of estimated third-party recoveries, was US\$12.7 million and US\$15.2 million, respectively.

The estimated loss for these matters, net of estimated third-party recoveries, incorporates assumptions that are subject to the foregoing uncertainties and are principally derived from, but not exclusively based on, historical claims experience together with facts and circumstances unique to each claim. If the nature and extent of claims in future periods differ from the historical claims experience, then the actual amount of loss may be materially higher or lower than estimated losses accrued at 31 March 2014. Accordingly, due to the inherent uncertainties associated with estimating the amount of loss incurred for these matters, as discussed above, and based on information presently available, the Company believes it is possible that the ultimate resolution of these matters collectively could result in an additional loss of up to approximately US\$3.6 million in excess of the amount already accrued, net of estimated third-party recoveries, at 31 March 2014.

Recently, the New Zealand High Court delivered a judgment holding that the ten year longstop under the Building Act did not apply to product liability lawsuits against building materials manufacturers. The Court's judgment has the potential to extend the time period in which claimants can pursue a limited type of claim against such parties for up to an additional five years. The Company has historically been successful in resolving such claims for de minimis amounts and as such does not expect the judgment to materially alter the provision for asserted and unasserted New Zealand product liability claims recorded on the Company's 31 March 2014 Consolidated Financial Statements.

New Zealand Ministry of Education Representative Action

On 16 April 2013, the New Zealand Ministry of Education and other related plaintiffs (the MOE) initiated a representative action in the New Zealand High Court against four building material manufacturers, including two of the Company's New Zealand subsidiaries, in relation to several thousand New Zealand school buildings. The MOE alleged that the cladding systems used on school buildings were defective and asserted claims of negligence, negligent misstatement, negligent failure to warn and breach of both the New Zealand Consumer Guarantees Act 1993 and Fair Trading Act 1986. On 23 December 2013, the Company finalised a commercial settlement with the MOE in relation

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

to these claims, the specific details of which the parties agreed to keep confidential. As part of the settlement, the MOE agreed to discontinue the claims made against the Company's two New Zealand subsidiaries. The settlement did not have a material adverse effect on the Company's financial position, results of operations, or cash flows.

Environmental and Legal

The operations of the Company, like those of other companies engaged in similar businesses, are subject to a number of laws and regulations on air and water quality, waste handling and disposal. The Company's policy is to accrue for environmental costs when it is determined that it is probable that an obligation exists and the amount can be reasonably estimated.

Operating Leases

As the lessee, the Company principally enters into property, building and equipment leases. The following are future minimum lease payments for non-cancellable operating leases having a remaining term in excess of one year at 31 March 2014:

Years ending 31 March (Millions of US dollars):	
2015	\$ 20.9
2016	17.7
2017	7.7
2018	6.3
2019	5.6
Thereafter	10.3
Total	\$ 68.5

Rental expense amounted to US\$18.0 million, US\$20.6 million and US\$19.6 million for the years ended 31 March 2014, 2013 and 2012, respectively.

Capital Commitments

Commitments for the acquisition of plant and equipment and other purchase obligations contracted for but not recognised as liabilities and generally payable within one year, were nil at 31 March 2014.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)****14. Income Taxes**

Income tax benefit (expense) includes income taxes currently payable and those deferred because of temporary differences between the financial statement and tax bases of assets and liabilities. Income tax benefit (expense) consists of the following components:

(Millions of US dollars)	Years Ended 31 March		
	2014	2013	2012
Income from operations before income taxes:			
Domestic	\$ 141.6	\$ 110.6	\$ 97.1
Foreign	(87.0)	(76.9)	54.0
Total income before income taxes	\$ 54.6	\$ 33.7	\$ 151.1
Income tax benefit (expense):			
Current:			
Domestic	\$ (8.9)	\$ (5.3)	\$ (2.5)
Foreign	44.6	(14.7)	454.3
Current income tax benefit (expense)	35.7	(20.0)	451.8
Deferred:			
Domestic	(3.3)	0.7	(4.2)
Foreign	12.5	31.1	5.6
Deferred income tax benefit	9.2	31.8	1.4
Total income tax benefit	\$ 44.9	\$ 11.8	\$ 453.2

Income tax benefit (expense) computed at the statutory rates represents taxes on income applicable to all jurisdictions in which the Company conducts business, calculated at the statutory income tax rate in each jurisdiction multiplied by the pre-tax income attributable to that jurisdiction.

Income tax benefit (expense) is reconciled to the tax at the statutory rates as follows:

(Millions of US dollars)	Years Ended 31 March		
	2014	2013	2012
Income tax benefit (expense) at statutory tax rates	\$ 6.2	\$ 8.8	\$ (28.4)
US state income taxes, net of the federal benefit	(1.8)	(0.1)	(0.8)
Asbestos - effect of foreign exchange	30.2	(0.3)	(1.9)

Edgar Filing: James Hardie Industries plc - Form 20-F

Expenses not deductible	(2.1)	(2.0)	(0.7)
Non-assessable items	0.6	1.8	0.4
Repatriation of foreign earnings	-	2.7	(0.1)
Amortisation of intangibles	1.7	2.0	1.7
Taxes on foreign income	(2.9)	(1.6)	2.6
Tax assessment in dispute	10.7	-	478.4
Other items	2.3	0.5	2.0
Total income tax benefit	\$ 44.9	\$ 11.8	\$ 453.2
Effective tax rate	(82.2%)	(35.0%)	(299.9%)

James Hardie FY 2014 20-F

153

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

Deferred tax balances consist of the following components:

(Millions of US dollars)	31 March	
	2014	2013
Deferred tax assets:		
Asbestos liability	\$ 471.8	\$ 452.7
Other provisions and accruals	52.5	56.5
Net operating loss carryforwards	12.8	18.9
Foreign tax credit carryforwards	135.4	123.9
Capital loss carryforwards	-	34.5
Total deferred tax assets	672.5	686.5
Valuation allowance	(142.4)	(165.1)
Total deferred tax assets, net of valuation allowance	530.1	521.4
Deferred tax liabilities:		
Depreciable and amortisable assets	(111.2)	(110.8)
Other	(6.9)	(7.8)
Total deferred tax liabilities	(118.1)	(118.6)
Net deferred tax assets	\$ 412.0	\$ 402.8

The Company establishes a valuation allowance against a deferred tax asset if it is more likely than not that some portion or all of the deferred tax asset will not be realised.

At 31 March 2014, the Company had European tax loss carry-forwards of approximately US\$7.0 million that are available to offset future taxable income, of which US\$5.6 million will never expire. Carry-forwards of US\$1.4 million will expire in fiscal years 2016 through 2022. At 31 March 2014, the Company had a 100% valuation allowance against the European tax loss carry-forwards.

The Company determined that US\$34.5 million of the Australian deferred tax assets which had a 100% valuation allowance at 31 March 2013 were unlikely to be realised and had effectively expired. The deferred tax asset and the related valuation allowance were written off and had no impact to the consolidated statement of operations during the year ended 31 March 2014.

At 31 March 2014, the Company had foreign tax credit carry-forwards of US\$135.4 million that are available to offset future taxes payable. At 31 March 2014, the Company had a 100% valuation allowance against the foreign tax credit carry-forwards.

In determining the need for and the amount of a valuation allowance in respect of the Company's asbestos related deferred tax asset, management reviewed the relevant empirical evidence, including the current and past core earnings of the Australian business and forecast earnings of the Australian business considering current trends. Although realisation of the deferred tax asset will occur over the life of the AFFA, which extends beyond the forecast period for the Australian business, Australia provides an unlimited carry-forward period for tax losses. Based upon managements' review, the Company believes that it is more likely than not that the Company will realise its asbestos related deferred tax asset

Edgar Filing: James Hardie Industries plc - Form 20-F

and that no valuation allowance is necessary as of 31 March 2014. In the future, based on review of the empirical evidence by management at that time, if management determines that realisation of its asbestos related deferred tax asset is not more likely than not, the Company may need to provide a valuation allowance to reduce the carrying value of the asbestos related deferred tax asset to its realisable value.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

At 31 March 2014, the undistributed earnings of non-Irish subsidiaries approximated US\$675.3 million. The Company intends to indefinitely reinvest its undistributed earnings of the majority of its subsidiaries owned by its US subsidiary and has not provided for taxes that would be payable upon remittance of those earnings. The amount of the potential deferred tax liability related to these undistributed earnings is impracticable to determine at this time.

Due to the size and nature of its business, the Company is subject to ongoing reviews by taxing jurisdictions on various tax matters. The Company accrues for tax contingencies based upon its best estimate of the taxes ultimately expected to be paid, which it updates over time as more information becomes available. Such amounts are included in taxes payable or other non-current liabilities, as appropriate. If the Company ultimately determines that payment of these amounts is unnecessary, the Company reverses the liability and recognises a tax benefit during the period in which the Company determines that the liability is no longer necessary. The Company records additional tax expense in the period in which it determines that the recorded tax liability is less than the ultimate assessment it expects.

In fiscal years 2014, 2013 and 2012, the Company recorded an income tax benefit of US\$0.3 million, income tax expense of US\$0.2 million and US\$0.5 million, respectively, as a result of the finalisation of certain tax audits (whereby certain matters were settled), the expiration of the statute of limitations related to certain tax positions.

Taxing authorities from various jurisdictions in which the Company operates are in the process of auditing the Company's respective jurisdictional income tax returns for various ranges of years. The Company accrues income tax liabilities in connection with ongoing audits and reviews based on knowledge of all relevant facts and circumstances, taking into account existing tax laws, its experience with previous audits and settlements, the status of current tax examinations and how the tax authorities view certain issues.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)***Unrecognised Tax Benefits*

A reconciliation of the beginning and ending amount of unrecognised tax benefits and interest and penalties are as follows:

(US\$ millions)	Unrecognised tax benefits	Interest and Penalties
Balance at 31 March 2011	\$ 185.5	\$ 196.3
Additions for tax positions of the current year	0.2	-
Additions for tax positions of prior year	-	6.1
Settlements paid during the current period	(184.4)	(208.9)
Other reductions for the tax positions of prior periods	(5.2)	-
Foreign currency translation adjustment	6.5	7.4
Balance at 31 March 2012	\$ 2.6	\$ 0.9
Additions for tax positions of the current year	0.1	-
Additions for tax positions of prior year	2.6	(0.1)
Expiration of statute of limitations	(2.8)	(0.7)
Other reductions for the tax positions of prior periods	(1.0)	-
Balance at 31 March 2013	\$ 1.5	\$ 0.1
Additions for tax positions of the current year	0.1	-
Additions for tax positions of prior year	0.1	-
Settlements paid during the current period	(1.2)	-
Other reductions for the tax positions of prior periods	-	(0.1)
Balance at 31 March 2014	\$ 0.5	\$ -

As of 31 March 2014, the total amount of unrecognised tax benefits and the total amount of interest and penalties accrued or prepaid by the Company related to unrecognised tax benefits that, if recognised, would affect the tax expense is US\$0.5 million and nil, respectively.

The Company recognises penalties and interest accrued related to unrecognised tax benefits in income tax expense. During the year ended 31 March 2014, income of US\$0.1 million relating to interest and penalties was recognised within income tax expense arising from movements in unrecognised tax benefits. During the year ended 31 March 2013, the total amount of interest and penalties recognised in income tax expense was US\$0.8 million.

The liabilities associated with uncertain tax benefits are included in other non-current liabilities on the Company's consolidated balance sheet.

Edgar Filing: James Hardie Industries plc - Form 20-F

A number of years may elapse before an uncertain tax position is audited or ultimately resolved. It is difficult to predict the ultimate outcome or the timing of resolution for uncertain tax positions. It is reasonably possible that the amount of unrecognised tax benefits could significantly increase or decrease within the next twelve months. These changes could result from the settlement of ongoing

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

litigation, the completion of ongoing examinations, the expiration of the statute of limitations, or other circumstances. At this time, an estimate of the range of the reasonably possible change cannot be made.

Interest Payments from ATO

During the fourth quarter ended 31 March 2012, the ATO provided a refund of US\$396.3 million to RCI Pty Ltd (RCI), a wholly owned subsidiary of the Company, resulting from RCI s successful appeal of a disputed amended tax assessment related to RCI s income tax return for its 1999 fiscal year. The facts and circumstances relating to RCI s successful appeal of the disputed amended tax assessment were fully disclosed in the notes to the Company s Consolidated Financial Statements as of and for the year ended 31 March 2012.

On 4 November 2013, the ATO notified RCI that RCI was entitled to a final additional amount of interest of A\$17.3 million (US\$15.4 million) in respect of amounts paid by RCI to the ATO while the appeal of the disputed amended tax assessment was in process. This final amount of interest was received from the ATO on 7 January 2014. As the receipt of this interest from the ATO relates to RCI s successful appeal of its disputed amended tax assessment, the additional interest, net of tax, is included in *Income tax benefit* in the Company s Consolidated Statements of Operations and Comprehensive Income for the year ended 31 March 2014.

15. Stock-Based Compensation

The Company recognised stock-based compensation expense (included in selling, general and administrative expense) of US\$13.0 million, US\$10.8 million and US\$11.1 million for the years ended 31 March 2014, 2013 and 2012, respectively. Compensation expense arising from equity-based award grants, as estimated using pricing models, was US\$8.5 million, US\$7.0 million and US\$7.8 million for the years ended 31 March 2014, 2013 and 2012, respectively. Included in stock-based compensation expense for the years ended 31 March 2014, 2013 and 2012 is US\$4.5 million, US\$3.8 million and US\$3.3 million, respectively, related to liability-classified awards. As of 31 March 2014, the unrecorded future stock-based compensation expense related to outstanding equity awards was US\$12.3 million after estimated forfeitures and will be recognised over an estimated weighted average amortisation period of 1.6 years.

JHI plc 2001 Equity Incentive Plan

Under the JHI plc 2001 Equity Incentive Plan (the 2001 Equity Incentive Plan), the Company can grant equity awards in the form of nonqualified stock options, performance awards, restricted stock grants, stock appreciation rights, dividend equivalent rights, phantom stock or other stock-based benefits such as restricted stock units. The 2001 Equity Incentive Plan was approved by the Company s shareholders in 2011. The Company is authorised to issue 45,077,100 shares under the 2001 Equity Incentive Plan.

Under the 2001 Equity Incentive Plan, grants have been made at fair market value to management and other employees of the Company. Each option confers the right to subscribe for one ordinary share in the capital of JHI plc. The options may be exercised as follows: 25% after the first year; 25% after the second year; and 50% after the third year. All unexercised options expire 10 years from the date of issue or 90 days after the employee ceases to be employed by the Company.

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

As set out in the plan rules, the exercise prices and the number of shares available on exercise may be adjusted on the occurrence of certain events, including new issues, share splits, rights issues and capital reconstructions.

Under the 2001 Equity Incentive Plan, the Company granted 315,749 and 265,988 restricted stock units to its employees in the years ended 31 March 2014 and 2013, respectively. These restricted shares may not be sold, transferred, assigned, pledged or otherwise encumbered so long as such shares remain restricted. The Company determines the conditions or restrictions of any restricted stock awards, which include requirements of continued employment. At 31 March 2014, there were 608,215 restricted stock units outstanding under this plan.

Long-Term Incentive Plan

At the 2006 Annual General Meeting, the Company's shareholders approved the establishment of a LTIP to provide incentives to certain members of senior management (Executives). The shareholders also approved, in accordance with certain LTIP rules, the issue of options in the Company to Executives of the Company. At the Company's 2008 Annual General Meeting, the shareholders amended the LTIP to also allow restricted stock units to be granted under the LTIP. The LTIP was re-approved by the Company's shareholders in 2012.

As of 31 March 2014, the Company had granted 8,216,899 restricted stock units under the LTIP. These restricted stock units may not be sold, transferred, assigned, pledged or otherwise encumbered so long as such shares remain restricted. The Company determines the conditions or restrictions of any restricted stock awards, which may include requirements of continued employment, individual performance or the Company's financial performance or other criteria. Restricted stock units expire on exercise, vesting or as set out in the LTIP rules.

In November 2006 and August 2007, 1,132,000 and 1,016,000 options were granted to Executives, respectively, under the LTIP. The vesting of these equity awards are subject to performance hurdles as outlined in the LTIP rules. Unexercised options expire 10 years from the date of issue unless an Executive ceases employment with the Company.

At 31 March 2014, there were 101,000 options and 3,275,703 restricted stock units outstanding under the LTIP.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

The following table summarises the Company's shares available for grant as options, restricted stock units or other equity instruments under the LTIP and 2001 Equity Incentive Plan at 31 March 2014, 2013 and 2012:

	Shares Available for Grant
Balance at 31 March 2012	25,695,988
Granted	(1,415,605)
Forfeitures available for re-grant	223,400
Balance at 31 March 2013	24,503,783
Granted	(1,266,656)
Balance at 31 March 2014	23,237,127

Stock Options

There were no stock options granted during the years ended 31 March 2014 and 2013. The following table summarises the Company's stock options activity during the noted period:

	Outstanding Options	
	Number	Weighted Average Exercise Price (A\$)
Balance at 31 March 2012	9,085,140	7.59
Exercised	(3,622,106)	7.01
Forfeited	(306,898)	8.56
Balance at 31 March 2013	5,156,136	7.94
Exercised	(4,056,860)	7.89
Balance at 31 March 2014	1,099,276	8.11

The total intrinsic value of stock options exercised was A\$13.8 million, A\$7.2 million and A\$2.0 million for the years ended 31 March 2014, 2013 and 2012, respectively.

Edgar Filing: James Hardie Industries plc - Form 20-F

Windfall tax benefits realised in the United States from stock options exercised and included in cash flows from financing activities in the consolidated statements of cash flows were US\$5.6 million, US\$3.5 million and nil for the years ended 31 March 2014, 2013 and 2012, respectively.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

The following table summarises outstanding and exercisable options under both the 2001 Equity Incentive Plan and the LTIP as of 31 March 2014:

Exercise Price (A\$)	Number	Options Outstanding			Options Exercisable		
		Weighted Average Remaining Life (in Years)	Weighted Average Exercise Price (A\$)	Aggregate Intrinsic Value (A\$)	Number	Weighted Average Exercise Price (A\$)	Aggregate Intrinsic Value (A\$)
5.99	47,500	0.7	5.99	\$ 396,150	47,500	5.99	\$ 396,150
6.38	200,896	3.7	6.38	1,597,123	200,896	6.38	1,597,123
8.40	337,880	2.6	8.40	2,003,628	337,880	8.40	2,003,628
8.40	101,000	2.6	8.40	598,930	101,000	8.40	598,930
8.90	394,900	1.7	8.90	2,144,307	394,900	8.90	2,144,307
8.90	17,100	1.7	8.90	92,853	17,100	8.90	92,853
Total	1,099,276			\$ 6,832,991	1,099,276		\$ 6,832,991

The aggregate intrinsic value in the preceding table represents the total pre-tax intrinsic value based on stock options with an exercise price less than the Company's closing stock price of A\$14.33 as of 31 March 2014, which would have been received by the option holders had those option holders exercised their options as of that date.

Restricted Stock

The Company estimates the fair value of restricted stock units on the date of grant and recognises this estimated fair value as compensation expense over the periods in which the restricted stock vests.

The following table summarises the Company's restricted stock activity during the noted period:

	Shares	Weighted Average Fair Value at Grant Date (A\$)
Non-vested at 31 March 2012	3,677,511	5.59
Granted	1,415,605	7.74
Vested	(846,415)	7.21
Forfeited	(242,333)	5.81
Non-vested at 31 March 2013	4,004,368	5.99
Granted	1,266,656	9.11

Edgar Filing: James Hardie Industries plc - Form 20-F

Vested	(1,227,372)	5.42
Forfeited	(159,734)	6.38
Non-vested at 31 March 2014	3,883,918	7.17

Table of Contents

James Hardie Industries plc

Notes to Consolidated Financial Statements (Continued)

Restricted Stock – service vesting

On 16 September 2013 and 9 December 2013, 56,128 and 259,621, respectively, restricted stock units (service vesting) were granted to employees under the 2001 Equity Incentive Plan. On 7 December 2012, the Company granted 265,988 restricted stock units (service vesting) to employees under the 2001 Equity Incentive Plan. The fair value of each restricted stock unit (service vesting) is equal to the market value of the Company's common stock on the date of the grant, adjusted for the fair value of estimated dividends as the restricted stock holder is not entitled to dividends over the vesting period.

On 9 December 2013 and 24 January 2014, 253,741 and 5,231, respectively, restricted stock units (service vesting) that were previously granted as part of the 2001 Equity Incentive Plan became fully vested and the underlying common stock was issued. On 7 December 2012, 240,645 restricted stock units (service vesting) that were previously granted as part of the 2001 Equity Incentive Plan became fully vested and the underlying common stock was issued.

Restricted Stock – performance vesting

The Company granted 461,019 and 450,336 restricted stock units with a performance vesting condition under the 2006 Long Term Incentive Plan (LTIP) to senior executives and managers of the Company on 16 September 2013 and 14 September 2012, respectively. The vesting of the restricted stock units is deferred for three years and is subject to a Return on Capital Employed (ROCE) performance hurdle being met. The vesting of the restricted stock units is also subject to limited discretion by the Board. The Board's discretion will reflect the Board's judgment of the quality of the returns balanced against management's delivery of market share growth and a scorecard of key qualitative and quantitative performance objectives.

The Company granted 266,627 restricted stock units with a performance vesting condition under the LTIP to senior executives and managers of the Company on 7 June 2012. The vesting of the restricted stock units is deferred for two years and the amount of restricted stock units that will vest at that time is subject to the Board's exercise of negative discretion.

When the Board reviews the awards and determines whether any negative discretion should be applied at the vesting date, the award recipients may receive all, some, or none of their awards. The Board may only exercise negative discretion and may not enhance the maximum award that was originally granted to the award recipient.

The fair value of each restricted stock unit (performance vesting) is adjusted for changes in JHI plc's common stock price at each balance sheet date until the performance conditions are applied at the vesting date.

On 7 June 2013, 61,363 restricted stock units (performance vesting) that were granted on 7 June 2011 as part of the FY2011 long-term incentive award became fully vested and the underlying common stock was issued.

On 7 June 2012, 592,442 restricted stock units (performance vesting) that were granted on 7 June 2010 as part of the FY2001 long-term incentive award became fully vested and the underlying common stock was issued.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)***Restricted Stock market condition*

Under the terms of the LTIP, the Company granted 489,888 and 432,654 restricted stock units (market condition) to senior executives and managers of the Company on 16 September 2013 and 14 September 2012, respectively. The vesting of these restricted stock units is subject to a market condition as outlined in the LTIP.

The fair value of each of these restricted stock units (market condition) granted under the LTIP is estimated using a binomial lattice model that incorporates a Monte Carlo simulation (the Monte Carlo method). The following table includes the assumptions used for restricted stock grants (market condition) valued during the year ended 31 March 2014 and 2013, respectively:

	FY14	FY13
Date of grant	16 Sep 2013	14 Sep 2012
Dividend yield (per annum)	3.0%	1.5%
Expected volatility	43.3%	52.2%
Risk free interest rate	1.4%	0.7%
Expected life in years	3.0	3.0
JHX stock price at grant date (A\$)	10.17	8.95
Number of restricted stock units	489,888	432,654

On 17 March 2014, 907,037 restricted stock units (market condition) that were previously granted became fully vested and the underlying common stock was issued.

Scorecard LTI cash settled units

Under the terms of the LTIP, the Company granted awards equivalent to 518,647 and 506,627 Scorecard LTI units on 16 September 2013 and 14 September 2012, respectively. These awards provide recipients a cash incentive based on JHI plc's common stock price on the vesting date and each executive's scorecard rating. The vesting of awards is measured on individual performance conditions based on certain performance measures. Compensation expense recognised for awards are based on the fair market value of JHI plc's common stock on the date of grant and recorded as a liability. The expense is recognised rateably over the vesting period and the liability is adjusted for subsequent changes in JHI plc's common stock price at each balance sheet date.

On 29 June 2013, 324,027 of the 821,459 Scorecard LTI units that were previously granted on 29 June 2010 as part of the FY2011 long-term incentive award became fully vested and the balance lapsed as a result of the Board's exercise of negative discretion. The cash amount paid to award recipients was based on JHI plc's common stock price on the vesting date.

On 21 June 2012, 501,556 of the 1,083,021 Scorecard LTI units that were previously granted on 21 June 2009 as part of the FY2010 long-term incentive award became fully vested and the balance lapsed as a result of the Board's exercise of negative discretion. The cash amount paid to award recipients was based on JHI plc's common stock price on the vesting date.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)****16. Capital Management and Dividends**

The following table summarises the dividends declared during the year ended 31 March 2014 and 2013:

(Millions of US dollars)	US Cents/Security	US\$ Total Amount	Announcement Date	Record Date	Payment Date
125 year anniversary special dividend	0.28	124.6	28 February 2014	21 March 2014	30 May 2014
FY 2014 first half dividend	0.08	35.5	14 November 2013	19 December 2013	28 March 2014
FY 2013 special dividend	0.24	106.1	23 May 2013	28 June 2013	26 July 2013
FY 2013 second half dividend	0.13	57.5	23 May 2013	28 June 2013	26 July 2013
FY 2013 first half dividend	0.05	22.1	15 November 2012	18 December 2012	25 January 2013
FY 2012 second half dividend	0.38	166.4	21 May 2012	29 June 2012	23 July 2012

Subsequent to 31 March 2014, the Company announced an ordinary dividend of US\$32.0 cents per security and a special dividend of US\$20.0 cents per security, both with a record date of 12 June 2014 and payment date of 8 August 2014.

During the year ended 31 March 2014, the Company acquired approximately 1.9 million shares of its common stock under a share repurchase program announced on 23 May 2013 to acquire up to 5% of its issued capital during the subsequent twelve month period. The acquired shares had an aggregate cost of US\$22.1 million (A\$24.5 million) and the average price paid per share of common stock was US\$11.64 (A\$12.92). The US dollar amount was determined using the weighted average spot exchange rates for the days on which shares were acquired. All acquired shares were officially cancelled prior to 31 March 2014. In addition, no securities were bought back during the year ended 31 March 2013 under the May 2012 announced share buyback program.

Subsequent to 31 March 2014, the Company acquired an additional 715,000 shares of its common stock, with an aggregate cost of A\$9.8 million (US\$9.1 million), at an average market price of A\$13.69 (US\$12.73).

17. Operating Segment Information and Concentrations of Risk

The Company has reported its operating segment information in the format that the operating segment information is available to and evaluated by senior management. USA and Europe Fibre Cement manufactures fibre cement interior linings, exterior siding products and related accessories in the United States; these products are sold in the United States, Canada and Europe. Asia Pacific Fibre Cement includes all fibre cement manufactured in Australia, New Zealand and the Philippines and sold in Australia, New Zealand, Asia, the Middle East (Israel, Kuwait, Qatar and United Arab Emirates), and various Pacific Islands. Research and Development represents the cost incurred by the research and development centres.

¹ Export sales and inter-segmental sales are not significant.

² Research and development costs of US\$9.6 million, US\$11.9 million and US\$10.1 million in fiscal years 2014, 2013 and 2012, respectively, were expensed in the USA and Europe Fibre Cement segment. Research and development costs of US\$1.3 million, US\$1.7 million and US\$1.6 million in fiscal years 2014, 2013 and 2012, respectively, were expensed in the Asia Pacific Fibre Cement segment. Research and development costs of US\$22.2 million, US\$23.6 million and US\$18.7 million in fiscal years 2014, 2013 and 2012, respectively, were expensed in the Research and Development segment. The Research and Development segment also included selling, general and administrative expenses of US\$2.2 million, US\$2.4 million and US\$2.0 million in fiscal years 2014, 2013 and 2012, respectively.

Research and development expenditures are expensed as incurred and in total amounted to US\$33.1 million, US\$37.2 million and US\$30.4 million for the years ended 31 March 2014, 2013 and 2012, respectively.

³ Included in the USA and Europe Fibre Cement segment for the years ended 31 March 2014, 2013 and 2012 are asset impairment charges of nil, US\$16.9 million and US\$14.3 million, respectively. See Note 7 for further information.

⁴ The principal components of the General Corporate segment are officer and employee compensation and related benefits, professional and legal fees, administrative costs, and rental expense on the Company's corporate offices. Included in the General Corporate segment for the year ended 31 March 2014 are unfavourable asbestos adjustments of US\$195.8 million and AICF SG&A expenses of US\$2.1 million. Included in the General Corporate segment for the year ended 31 March 2013 are unfavourable asbestos adjustments of US\$117.1 million, AICF SG&A expenses of US\$1.7 million and ASIC expenses of US\$2.6 million. Included in the General Corporate segment for the year ended 31 March 2012 are unfavourable asbestos adjustments of US\$15.8 million, AICF SG&A expenses of US\$2.8 million and ASIC expenses of US\$1.1 million.

Edgar Filing: James Hardie Industries plc - Form 20-F

- ⁵ The Company does not report net interest expense for each operating segment as operating segments are not held directly accountable for interest expense. Included in net interest (expense) income is AICF interest income of US\$2.9 million, US\$7.0 million and US\$3.3 million in fiscal years 2014, 2013 and 2012, respectively. See Note 11 for more information.
- ⁶ The Company does not report deferred tax assets and liabilities for each operating segment as operating segments are not held directly accountable for deferred income taxes. All deferred income taxes are included in the General Corporate segment.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)**

⁷ Asbestos-related assets at 31 March 2014 and 2013 are US\$812.4 million and US\$882.8 million, respectively, and are included in the General Corporate segment.

⁸ Included in the Asia Pacific Fibre Cement segment for the years ended 31 March 2014, 2013 and 2012 are expenses related to the legacy New Zealand product liability claims of US\$1.7 million, US\$13.2 million and US\$5.4 million, respectively. See Note 13 for more information.

Concentrations of Risk

The distribution channels for the Company's fibre cement products are concentrated. If the Company were to lose one or more of its major customers, there can be no assurance that the Company will be able to find a replacement. Therefore, the loss of one or more customers could have a material adverse effect on the Company's consolidated financial position, results of operations and cash flows.

The Company has two major customers that individually account for over 10% of the Company's net sales in one or all of the past three fiscal years.

These two customers' accounts receivable represented 14% and 22% of the Company's trade accounts receivable at 31 March 2014 and 2013, respectively. The following are gross sales generated by these two customers, which are all from the USA and Europe Fibre Cement segment:

(Millions of US dollars)	Years Ended 31 March					
	2014		2013		2012	
	\$	%	\$	%	\$	%
Customer A	174.2	11.7%	223.0	16.9%	207.4	16.8%
Customer B	139.6	9.3%	137.7	10.4%	135.7	11.0%
	313.8		360.7		343.1	

Approximately 27% and 30% of the Company's net sales in fiscal year 2014 and 2013, respectively, were derived from outside the United States. Consequently, changes in the value of foreign currencies could significantly affect the consolidated financial position, results of operations and cash flows of the Company's non-US operations on translation into US dollars.

Table of Contents**James Hardie Industries plc****Notes to Consolidated Financial Statements (Continued)****18. Reclassifications Out of Accumulated Other Comprehensive Income (Loss)**

During the year ended 31 March 2014, there were no reclassifications out of *Accumulated other comprehensive income*:

(Millions of US dollars)	Pension and Post-Retirement Benefit Adjustment	Unrealised Gain (Loss) on Investments	Cash Flow Hedges	Foreign Currency Translation Adjustments	Total
Balance at 31 March 2013	\$ (0.3)	\$ -	\$ -	\$ 47.7	\$ 47.4
Other comprehensive loss before reclassifications	-	-	-	(15.2)	\$ (15.2)
Cash flow hedges	-	-	0.9	-	0.9
Net current-period other comprehensive loss	-	-	0.9	(15.2)	(14.3)
Balance at 31 March 2014	\$ (0.3)	\$ -	\$ 0.9	\$ 32.5	\$ 33.1

19. Acquisitions

On 13 December 2013, the Company acquired the assets of a US business engaged in the research, development and manufacturing of fibreglass windows. The Company paid cash consideration of US\$4.1 million and assumed debt of US\$2.2 million, which has been classified in the current and non-current portion of *Other liabilities* and is consolidated within the USA and Europe Fibre Cement segment.

Table of Contents**REMUNERATION OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

(UNAUDITED, NOT FORMING PART OF THE CONSOLIDATED FINANCIAL STATEMENTS)

Fees billed for each of the last three fiscal years for professional services provided by our independent registered public accounting were as follows:

(Millions of US dollars)	Fiscal Years Ended 31 March		
	2014	2013	2012
Audit Fees ¹	\$ 3.1	\$ 3.6	\$ 2.6
Audit-Related Fees ²	-	-	0.1
Tax Fees	-	-	-
All Other Fees	-	-	-

¹ Audit Fees include the aggregate fees for professional services rendered by our independent registered public accounting firm. Professional services include the audit of our annual financial statements and services that are normally provided in connection with statutory and regulatory filings.

² Audit-Related Fees include the aggregate fees billed for assurance and related services rendered by our independent registered public accounting firm. Our independent registered public accounting firm did not engage any temporary employees to conduct any portion of the audit of our consolidated financial statements for the fiscal years ended 31 March 2014, 2013 and 2012.

Audit Committee Pre-Approval Policies and Procedures

In accordance with our Audit Committee's policy and the requirements of the law, all services provided by our independent registered public accounting firm are pre-approved from time to time by the Audit Committee. Pre-approval includes a list of specific audit and non-audit services in the following categories: audit services, audit-related services, tax services and other services. Any additional services that we may ask our independent registered public accounting firm to perform will be set forth in a separate document requesting Audit Committee approval in advance of the service being performed.

All of the services pre-approved by the Audit Committee are permissible under the SEC's auditor independence rules. To avoid potential conflicts of interest, the law prohibits a publicly traded company from obtaining certain non-audit services from its independent registered public accounting firm. We obtain these services from other service providers as needed.

Table of Contents**SELECTED QUARTERLY FINANCIAL DATA**

(UNAUDITED, NOT FORMING PART OF THE

CONSOLIDATED FINANCIAL STATEMENTS)

The information furnished in the selected quarterly financial data for the years ended 31 March 2014 and 2013 is unaudited but includes all adjustments which, in the opinion of management, are necessary for a fair statement of the financial results of the respective interim periods. Such adjustments are of a normal recurring nature. Interim financial statements are by necessity somewhat tentative; judgments are used to estimate interim amounts for items that are normally determinable only on an annual basis.

Table of Contents

SECTION 3

RISK FACTORS

Our business, operations and financial condition are subject to various risks and uncertainties. We have described below significant factors that may adversely affect our business, operations, financial performance and condition or industry. You should be aware that the occurrence of any of the events described in the following risk factors, elsewhere in or incorporated by reference into this report, and other events that we have not predicted or assessed, could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

ASBESTOS-RELATED RISKS

Our wholly owned Australian Performing Subsidiary is required to make payments to a special purpose fund that provides compensation for Australian asbestos-related personal injury and death claims for which certain Former James Hardie Companies are found liable. These payments may affect our ability to grow the Company.

On 21 November 2006, JHI plc (formerly JHI NV and JHI SE), AICF, the NSW Government and the Performing Subsidiary entered into the AFFA to provide long-term funding to AICF, a special purpose fund that provides compensation for Australian asbestos-related personal injury and death claims for which the Former James Hardie Companies are found liable.

We have recorded a gross asbestos liability of US\$1.7 billion in our consolidated financial statements as of 31 March 2014, based on the AFFA governing our anticipated future payments to AICF. The net unfunded AFFA liability, net of tax was US\$979.2 million at 31 March 2014. The initial funding was made to AICF in February 2007 and annual payments are to be made each July, subject to the terms of the AFFA. The amounts of these annual payments are dependent on several factors, including our free cash flow (as defined in the AFFA), actuarial estimations, actual claims paid, operating expenses of AICF and the annual cash flow cap. From the time AICF was established in February 2007 through to May 2014, we have contributed A\$601.5 million (including interest payments) to the fund. Our obligation to make future contributions to AICF continues to be linked under the terms of the AFFA to our long-term financial success, especially our ability to generate net operating cash flow.

As a result of our obligation to make payments under the AFFA, our funds available for capital expenditures (either with respect to our existing business or new business opportunities), repayments of debt, payments of dividends or other distributions have been, and will be, reduced by the amounts paid to AICF, and consequently, our financial position, liquidity and cash flows have been, and will be, reduced or materially adversely affected. Our obligation to make these payments could also affect or restrict our ability to access equity or debt capital markets.

Potential escalation in proven claims made against, and associated costs of, AICF could increase our annual funding payments up to our obligation of 35% of our operating cash flows, as defined in the AFFA, which may cause us to have to increase our asbestos liability in the future.

The amount of our asbestos liability is based, in part, on actuarially determined, anticipated (estimated), future annual funding payments to be made to AICF on an undiscounted and uninflated basis. Future annual payments to AICF are based on updated actuarial assessments that are to be performed as of 31 March of each year to determine expected asbestos-related personal injury and death claims to be funded under the AFFA for the financial year in which the payment is made and the next two financial years. Estimates of actuarial liabilities are based on many assumptions, which may

Table of Contents

not prove to be correct, and which are subject to considerable uncertainty, since the ultimate number and cost of claims are subject to the outcome of events that have not yet occurred, including social, legal and medical developments as well as future economic conditions.

If future proven claims are more numerous, the liabilities arising from them are larger than that currently estimated by AICF's actuary, KPMG Actuarial, or if AICF investments decline in value, it is possible that pursuant to the terms of the AFFA, we will be required to pay to the AICF higher than currently anticipated annual funding payments up to our obligation of 35% of our operating cash flows, as defined in the AFFA and on which our asbestos liability is based. If this occurs, we may be required to increase our asbestos liability which would be reflected as a charge in our consolidated statements of operations and comprehensive income (loss) at that date. Any such changes to actuarial estimates which require us to increase our asbestos liability could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Even though the AFFA has been implemented, we may be subject to potential additional liabilities (including claims for compensation or property remediation outside the arrangements reflected in the AFFA), because certain current and former companies of the James Hardie Group previously manufactured products that contained asbestos.

Prior to 1987, ABN 60, which is now owned and controlled by AICF, manufactured products in Australia that contained asbestos. In addition, prior to 1987, two former subsidiaries of ABN 60, Amaca and Amaba, which are now also owned and controlled by AICF, manufactured products in Australia that contained asbestos. ABN 60 also held shares in companies that manufactured asbestos-containing products in Indonesia and Malaysia, and held minority shareholdings in companies that conducted asbestos-mining operations based in Canada and Southern Africa. Former ABN 60 subsidiaries also exported asbestos-containing products to various countries. AICF is designed to provide compensation only for certain claims and to meet certain related expenses and liabilities, and legislation in New South Wales, Australia in connection with the AFFA seeks to defer all other claims against the Former James Hardie Companies. The funds contributed to AICF will not be available to meet any asbestos-related claims made outside Australia, or claims made arising from exposure to asbestos occurring outside Australia, or any claim for pure property loss or pure economic loss or remediation of property. In these circumstances, it is possible that persons with such excluded claims may seek to pursue those claims directly against us. Defending any such litigation could be costly and time consuming, and consequently, our financial position, liquidity, results of operations and cash flows could be materially adversely affected.

Prior to 1988, a New Zealand subsidiary in the James Hardie Group manufactured products in New Zealand that contained asbestos. In New Zealand, asbestos-related disease compensation claims are managed by the state-run Accident Compensation Corporation (ACC). Our New Zealand subsidiary that manufactured products that contained asbestos contributed financially to the ACC fund as required by law via payment of an annual levy while it carried on business. All decisions relating to the amount and allocation of payments to claimants in New Zealand are made by the ACC in accordance with New Zealand law. The Injury Prevention, Rehabilitation and Compensation Act 2001 (NZ) bars compensatory damages for claims that are covered by the legislation which may be made against the ACC fund. However, we may be subject to potential liability if any of these claims are found not to be covered by the legislation and are later brought against us, and consequently, our financial position, liquidity, results of operations and cash flows could be materially adversely affected.

Table of Contents

Because our revenues are primarily derived from sales in US dollars and the actuarially assessed asbestos liability is recorded in Australian dollars and payments pursuant to the AFFA are made in Australian dollars, we may experience unpredictable volatility in our reported results due to changes in the US dollar (and other currencies from which we derive our sales) compared to the Australian dollar.

Payments pursuant to the AFFA are required to be made to AICF in Australian dollars. In addition, annual payments to AICF include calculations based on various estimates that are denominated in Australian dollars. To the extent that our future obligations exceed Australian dollar cash flows derived from our Australian operations, and we do not hedge this foreign exchange exposure, we will need to convert US dollars or other foreign currency into Australian dollars in order to meet our obligations pursuant to the AFFA. As a result, any unfavourable fluctuations in the US dollar (the majority of our revenues is derived from sales in US dollars) or other currencies against the Australian dollar could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

In addition, because our results of operations are reported in US dollars and the asbestos liability is based on estimated payments denominated in Australian dollars, fluctuations in the A\$/US\$ exchange rate will cause unpredictable volatility in our reported results for the foreseeable future. For example, during fiscal years 2014, 2013 and 2012, we recorded a favourable impact of US\$97.2 million, a favourable impact of US\$0.2 million and an unfavourable impact of US\$6.2 million, respectively, due to fluctuations in the US dollar compared to the Australian dollar.

Any unfavourable fluctuation in the US dollar and the other currencies from which we derive our sales compared to the Australian dollar could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

The AFFA imposes certain non-monetary obligations.

Under the AFFA, we are also subject to certain non-monetary obligations that could prove onerous or otherwise materially adversely affect our ability to undertake proposed transactions or pay dividends. For example, the AFFA contains certain restrictions that generally prohibit us from undertaking transactions that would materially adversely affect the relative priority of AICF as a creditor, or that would materially impair our legal or financial capacity and that of the Performing Subsidiary, in each case such that we and the Performing Subsidiary would cease to be likely to be able to meet the funding obligations that would have arisen under the AFFA had the relevant transaction not occurred. Those restrictions apply to dividends and other distributions, reorganisations of, or dealings in, share capital which create or vest rights in such capital in third parties, or non-arm's length transactions. While the AFFA contains certain exemptions from such restrictions (including, for example, exemptions for arm's length dealings; transactions in the ordinary course of business; certain issuances of equity securities or bonds; and certain transactions provided certain financial ratios are met and certain amounts of dividends), implementing such restrictions could materially adversely affect our ability to enter into transactions that might otherwise be favourable to us and could materially adversely affect our financial position, liquidity, results of operations and cash flows.

The AFFA does not eliminate the risk of adverse action being taken against us.

There is a possibility that, despite certain covenants agreed to by the NSW Government in the AFFA, adverse action could be directed against us by one or more of the NSW Government, the government of the Commonwealth of Australia, governments of the other states or territories of Australia or any other governments, unions or union representative groups, or asbestos disease groups, with respect to the asbestos liabilities of the Former James Hardie Companies or other current and former companies

Table of Contents

of the James Hardie Group. Any such adverse action could materially adversely affect our financial position, liquidity, results of operations and cash flows.

The complexity and long-term nature of the AFFA and related legislation and agreements may result in litigation as to their interpretation.

Certain legislation, the AFFA and related agreements, which govern the implementation and performance of the AFFA, are complex and have been negotiated over the course of extended periods between various parties. There is a risk that, over the term of the AFFA, some or all parties may become involved in disputes as to the interpretation of such legislation, the AFFA or related agreements or the terms of the AFFA may change. We cannot guarantee that no party will commence litigation seeking remedies with respect to such a dispute, nor can we guarantee that a court will not order other remedies which may materially adversely affect us.

There is no certainty that the Facility to AICF will remain in place for the entire term of the Facility.

Drawings under the Facility to AICF, as described in Note 11 to our consolidated financial statements, are subject to satisfaction of certain specified conditions precedent and the NSW Government (as lender) has the right to cancel the loan facility, require repayment of money advanced and enforce security granted to support the loan in the various circumstances prescribed in the Facility agreement and related security documentation. There are also certain positive covenants given by, and restrictions on the activities of, AICF and the Former James Hardie Companies which apply during the term of the loan. A breach of any of these covenants or restrictions may also lead to cancellation of the Facility, early repayment of the loan and/or enforcement of the security. As such, there can be no certainty that the Facility will remain in place for its intended term.

If the Facility does not remain in place for its intended term, AICF may experience a short-term funding shortfall. A short-term funding shortfall for AICF could subject us to negative publicity. Such negative publicity could materially adversely affect our financial position, liquidity, results of operations and cash flows, as well as employee morale and the market prices of our publicly traded securities.

We may have insufficient Australian taxable income to utilise tax deductions.

We may not have sufficient Australian taxable income in future years to utilise the tax deductions resulting from the funding payments under the AFFA to AICF. Further, if as a result of making such funding payments we incur tax losses, we may not be able to fully utilise such tax losses in future years of income. Any inability to utilise such deductions or losses could materially adversely affect our financial position, liquidity, results of operations and cash flows.

Certain AFFA tax conditions may not be satisfied.

Despite the ATO rulings for the expected life of the AFFA, it is possible that new (and adverse) tax legislation could be enacted in the future. It is also possible that the facts and circumstances relevant to operation of the ATO rulings could change over the life of the AFFA. We may elect to terminate the AFFA if certain tax conditions are not satisfied for more than 12 months. However, we do not have a right to terminate the AFFA if, among other things, the tax conditions are not satisfied as a result of the actions of a member of the James Hardie Group.

Under certain circumstances, we may still have an obligation to make annual funding payments on an adjusted basis if the tax conditions remain unsatisfied for more than 12 months. If the tax conditions are not satisfied in a manner which does not permit us to terminate the AFFA, our financial position,

Table of Contents

liquidity, results of operations and cash flows may be materially adversely affected. The extent of this adverse effect will be determined by the nature of the tax condition which is not satisfied.

DOMICILE RELATED RISKS

The rules and regulations applying to us as an Irish plc may change.

We became an Irish public limited company in fiscal year 2013. As an Irish plc, our board meetings and all strategic decisions occur in Ireland. However, there can be no assurance that Irish or another jurisdiction's law will not become more restrictive or otherwise disadvantageous to us.

Tax benefits are available under the US-Ireland Income Tax Treaty to US and Irish taxpayers that qualify for those benefits. Our eligibility for benefits under the US-Ireland Tax Treaty is determined on an annual basis and we could be audited by the IRS for this issue. If during a subsequent tax audit or related process, the IRS determines that we are not eligible for benefits under the US-Ireland Treaty, we may not qualify for treaty benefits. As a result, our effective tax rate could significantly increase and we could be subject to a 30% US withholding tax rate on payments of interest, royalties and dividends from our US subsidiaries to our Irish resident subsidiaries.

We believe that interest, royalties and dividends paid by our US subsidiaries to our Irish resident subsidiaries qualify for treaty benefits in the form of reduced withholding tax under the US-Ireland Treaty.

We believe that, under the limitation on benefits (LOB) provision of the US-Ireland Treaty, no US withholding tax applies to interest or royalties that our US subsidiaries paid to our Irish resident subsidiaries. The LOB provision has various conditions of eligibility for reduced US withholding tax rates and other treaty benefits, all of which we believe are satisfied. If, however, we do not qualify for benefits under the US-Ireland Treaty, those interest and royalty payments would be subject to a 30% US withholding tax.

We believe that, under the US-Ireland Treaty, a 5% US withholding tax applies to dividends paid by our US subsidiaries to our Irish resident subsidiaries. The LOB provision of the US-Ireland Treaty has various conditions of eligibility for reduced US withholding tax rates and other treaty benefits, all of which we believe we have satisfied. If, however, we do not qualify for benefits under the US-Ireland Treaty, dividend payments by our US subsidiaries would be subject to a 30% US withholding rate.

Our eligibility for benefits under the US-Ireland Tax Treaty is determined on an annual basis and we could be audited by the IRS for this issue. If during a subsequent tax audit or related process, the IRS determines that we are not eligible for benefits under the US-Ireland Treaty, we may not qualify for treaty benefits. As a result, our effective tax rate could significantly increase beginning in the fiscal year that such determination is made and we could be liable for taxes owing for calendar year 2011 and subsequent periods, which could adversely affect our financial position, liquidity, results of operations and cash flows.

Table of Contents

Irish law contains provisions that could delay or prevent a change of control that may otherwise be beneficial to you.

Irish law contains several provisions that could have the effect of delaying or preventing a change of control of our ownership. The Irish Takeover Rules generally prohibit the acquisition of shares of our common stock if, because of an acquisition of a relevant interest (including interests held in the form of shares of our common stock, CUFS or ADSs) in such shares, the voting rights of the shares in which a person (or persons acting in concert) holds relevant interests increases (i) from 30% or below to over 30% or (ii) from a starting point that is above 30% and below 50%. However, this prohibition is subject to exceptions, including acquisitions that result from acceptances under a mandatory takeover bid made in compliance with the Irish Takeover Rules. Although the Irish Takeover Rules may help to ensure that no person acquires voting control of us without making an offer to all shareholders, they may also have the effect of delaying or preventing a change of control that may otherwise be beneficial to you. In addition to the operation of the Irish Takeover Rules, the Company may, from time to time, put in place appropriate retention arrangements to ensure that it retains its key employees during periods of corporate change.

Our ability to pay dividends and conduct share buy-backs is dependent on Irish law and may be limited in the future if we are not able to maintain sufficient levels of distributable profits.

Under Irish law, in order to pay dividends and/or conduct a buy-back of shares, an Irish Company requires sufficient distributable profits which are determined under applicable accounting practices generally accepted in Ireland (Irish GAAP). We believe that our current corporate structure has allowed us to maintain sufficient levels of distributable profits to continue paying dividends in accordance with our publicly disclosed dividend policy, which is updated from time to time, and to conduct share buy-backs as announced in May 2013. However, transactions or events could cause a reduction in our distributable profits, resulting in our inability to pay dividends on our securities or to conduct share buy-backs, which could have a material adverse impact on the market value of the securities that you have invested in.

TAXATION RELATED RISKS

Our effective income tax rate could increase and materially adversely affect our business.

We operate in multiple jurisdictions and pay tax on our income according to the tax laws of these jurisdictions. Various factors, some of which are beyond our control, determine our effective tax rate. The primary drivers of our effective tax rate are the tax rates of the jurisdictions in which we operate, the level and geographic mix of pre-tax earnings, intra-group royalties, interest rates and the level of debt which give rise to interest expense on external debt and intra-group debt, extraordinary and non-core items, and the value of adjustments for timing differences and permanent differences, including the non-deductibility of certain expenses, all of which are subject to change and which could result in a material increase in our effective tax rate. Such changes to our effective tax rate could materially adversely affect our financial position, liquidity, results of operations and cash flows.

Exposure to additional tax liabilities due to audits could materially adversely affect our business.

Due to our size and the nature of our business, we are subject to ongoing reviews by authorities in taxing jurisdictions on various tax matters, including challenges to various positions we assert on our income tax and withholding tax returns. We accrue for tax contingencies based upon our best estimate of the taxes ultimately expected to be paid, which we update over time as more information becomes available. Such amounts are included in taxes payable or other non-current liabilities, as appropriate.

Table of Contents

We record additional tax expense in the period in which we determine that the recorded tax liability is less than the ultimate assessment we expect. The amounts ultimately paid on resolution of reviews by taxing jurisdictions could be materially different from the amounts included in taxes payable or other non-current liabilities and result in additional tax expense which could materially adversely affect our financial position, liquidity, results of operations and cash flows.

OTHER RISKS

Our business is dependent on the residential and commercial construction markets.

Demand for our products depends in large part on the residential construction markets and, to a lesser extent, on commercial construction markets. The level of activity in residential construction markets depends on new housing starts and residential remodeling projects, which are a function of many factors outside our control, including general economic conditions, the availability of financing, mortgage and other interest rates, inflation, unemployment, the inventory of unsold homes, the level of foreclosures, home resale rates, housing affordability, demographic trends, gross domestic product growth and consumer confidence in each of the countries and regions in which we operate.

Any slowdown in the markets we serve could result in decreased demand for our products and cause us to experience decreased sales and operating income. In addition, deterioration or continued weaknesses in general economic conditions, such as higher interest rates, high levels of unemployment, restrictive lending practices and increased foreclosures could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Substantial and increasing competition in the building products industry could materially adversely affect our business.

Competition in the building products industry is based largely on price, quality, performance and service. Our fibre cement products compete with products manufactured from natural and engineered wood, vinyl, stucco, masonry, gypsum and other materials, as well as fibre cement products offered by other manufacturers. Some of our competitors may have greater product diversity, greater financial and other resources, and better access to raw materials than we do and, among other factors, may be less affected by reductions in margins resulting from price competition.

Increased competition in any of the markets in which we compete would likely cause pricing pressures in those markets. Any of these factors could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We rely on only a few customers to buy our fibre cement products and the loss of any major customer could materially adversely affect our business.

Our two largest customers individually account for over 10% of our net sales in one or all of the past three fiscal years. These two customers accounts receivable represented 14% and 22% of our trade accounts receivable at 31 March 2014 and 2013, respectively. We generally do not have long-term contracts with our large customers. Accordingly, if we were to lose one or more of our large customers because our competitors were able to offer customers more favourable pricing terms or for any other reason, we may not be able to replace customers in a timely manner or on reasonable terms. The loss of one or more of our large customers could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Table of Contents

We may experience unforeseen delays and/or cost overruns in our planned capital expenditures in future periods, and such delays and/or cost overruns could result in additional expenses and impairment of the carrying value of our assets in future periods. Such unforeseen delays, cost overruns or asset impairment charges could have a material adverse effect on our business.

We are expanding production capacity in anticipation of the continued improvement of the operating environment and we expect to incur significant capital expenditures in fiscal year 2014 and beyond to meet anticipated demand increases in major markets.

For example, we currently expect to spend approximately US\$200 million in fiscal year 2015 on facility upgrades and expansions, equipment to ensure regulatory compliance and the implementation of new fibre cement technologies.

We may incur unforeseen delays and/or cost overruns due to a variety of factors, including but not limited to, an overall decline in general economic conditions, a downturn in the principal markets in which we operate, the entrance of a key competitor leading to a loss in market share or an adverse change in the regulatory environment impacting our business. Any one or combination of these or other factors could have a significant adverse effect on the nature, timing, extent and amount of our planned capital expenditures, and may also result in potential additional expenses and a write-down in the carrying value of our capital projects and other existing production assets. Such delays, cost overruns and asset impairment charges could have a material adverse effect on our financial position, results of operations and liquidity.

Regulatory action and continued scrutiny may have an adverse effect on our business.

Our compliance with laws and regulations can be subject to future government review and interpretation. If we fail to comply with applicable laws and regulations, we could be subject to fines, penalties, or other legal liability. Also, should these laws and regulations be amended or expanded, or should new laws and regulations be enacted, we could incur additional compliance costs or restrictions on our ability to manufacture our products and operate our business. Furthermore, our failure to comply with such laws and regulations could result in additional costs, fees or reporting requirements, as well as significant regulatory action, including fines, penalties and legal defence costs, and could subject us to negative publicity. Such actions could have a material adverse effect on our financial position, results of operations and cash flows.

Our Irish residency could also result in increased negative publicity related to the Company. There continues to be negative publicity regarding, and criticism of, companies that have subsidiaries which conduct substantial business in the US but are domiciled in foreign countries. We cannot assure you that we will not be subject to similar criticism. We previously have been the subject of significant negative publicity in connection with the events that were considered by the Special Commission Inquiry and the ASIC proceedings in Australia, which we believe has in the past contributed to declines in the price of our publicly traded securities.

We believe that any such adverse action or negative publicity could materially adversely affect our financial position, liquidity, results of operations and cash flows, employee morale and the market prices of our publicly traded securities.

Table of Contents

Because we have significant operations outside of the United States and report our earnings in US dollars, unfavourable fluctuations in currency values and exchange rates could have a material adverse effect on our business.

Because our reporting currency is the US dollar, our non-US operations face the additional risk of fluctuating currency values and exchange rates. Such operations may also face hard currency shortages and controls on currency exchange. Approximately 27%, 30% and 33% of our net sales in fiscal years 2014, 2013 and 2012, respectively, were derived from sales outside the United States. Consequently, changes in the value of foreign currencies (principally Australian dollars, New Zealand dollars, Philippine pesos, euros, U.K. pounds and Canadian dollars) could materially affect our business, results of operations and financial condition. We generally attempt to mitigate foreign exchange risk by entering into contracts that require payment in local currency, hedging transactional risk, where appropriate, and having non-US operations borrow in local currencies. We enter into such financial instruments from time to time to manage our foreign exchange risks, and had material foreign exchange contracts outstanding at 31 March 2014 to purchase 119.4 million Australian dollars, and 17.1 million euro. There can be no assurance that we will be successful in these mitigation strategies, or that fluctuations in foreign currencies and other foreign exchange risks will not have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may be adversely affected by the current disruptions and volatility in the Eurozone.

The Eurozone has experienced difficult credit and liquidity conditions and market disruptions leading to general fiscal and economic weakening, including in Ireland, the Company's country of domicile. Concerns regarding the Eurozone sovereign debt and banking crisis have resulted in instability and uncertainty in financial markets and adversely impacted market sentiment across Europe. These negative trends have caused considerable turbulence on the global financial and credit markets due to concerns related to the possible downgrading of the sovereign debt and fiscal instability of several Eurozone countries.

The ongoing uncertainty surrounding conditions in the Eurozone, and the impact it has on the world financial markets, may result in reduced access to credit for the Company. In addition, if conditions in the Eurozone deteriorate and the initiatives being implemented to resolve the sovereign debt and banking crisis ultimately fail, there is a risk of departure from the euro by one or more Eurozone countries, which may lead to volatility in foreign exchange rates as the negative effects of such a departure impact the world financial markets. Also, rescue measures that are or may be implemented to address the Eurozone sovereign debt and banking crisis may result in significant changes to the current tax structure in Eurozone countries, which could have a significant adverse effect on the Company's effective tax rate on earnings.

Any such adverse consequences from the current disruptions and volatility in the Eurozone could have a material adverse effect on our financial position, results of operations and cash flows.

If payouts for product liability claims resulting from allegations of product defects exceed our insurance coverage, these payouts could result in a material adverse effect on our business.

The actual or alleged existence of defects in any of our products could subject us to significant product liability or recall claims, including potential putative class or representative action claims. Although we do not have insurance coverage for damage to, or defects in, our products, we do have product liability insurance coverage for bodily injury or property damage which may arise from the use of our products. Although we believe this coverage is adequate and we intend to maintain this coverage in the future, we cannot assure you that this coverage will be sufficient to cover all future product liability claims or that this coverage will be available at reasonable rates in the future. In some jurisdictions, we are

Table of Contents

subject to joint and several liability. The successful assertion of one or more claims against us, or a co-defendant, that exceed our insurance coverage could require us to incur significant expenses to pay these damages. These additional expenses could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Losses and expenses relating to the New Zealand product liability claims could have a material adverse effect on our business.

Since fiscal year 2002, our New Zealand subsidiaries have been and continue to be joined in a number of construction defect claims in New Zealand that relate to residential buildings (single dwellings and apartment complexes) and a small number of non-residential buildings, primarily constructed from 1998 to 2004. The claims often involve multiple parties and allege that losses were incurred due to excessive moisture penetration of the buildings' structures. The claims typically include allegations of poor building design, inadequate certification of plans, inadequate construction review and compliance certification and deficient work by sub-contractors.

We recognise a liability for both asserted and unasserted claims in New Zealand in the period in which the loss becomes probable and estimable. The amount of reasonably possible loss is dependent on a number of factors, including, without limitation, the specific facts and circumstances unique to each claim brought against our New Zealand subsidiaries, the existence of any co-defendants involved in defending the claim, the solvency of such co-defendants (including the ability of such co-defendants to remain solvent until the related claim is ultimately resolved), the availability of claimant compensation under a government compensation scheme, the amount of loss estimated to be allocable to our New Zealand subsidiaries in instances that involve co-defendants in defending the claim and the extent to which our New Zealand subsidiaries have access to third-party recoveries to cover a portion of the costs incurred in defending and resolving such actions. In addition to the above limitations, the total loss incurred is also dependent on the manner and extent to which the statute of limitations will apply in future periods.

The amount of provision for these asserted and unasserted claims in New Zealand, net of estimated third-party recoveries, is US\$12.7 million at 31 March 2014. During the year ended 31 March 2014 the Company recognised US\$1.7 million in expenses related to the legacy claims in New Zealand. Due to the inherent uncertainties associated with estimating the amount of loss incurred for asserted and unasserted claims, as discussed above, and based on information presently available, we believe it is possible that the ultimate resolution of these legacy claims could result in an additional loss of up to approximately US\$3.6 million in excess of the amount accrued, net of estimated third-party recoveries, at 31 March 2014. The provision and estimated additional loss incorporates assumptions that are subject to the foregoing uncertainties and are principally derived from, but not exclusively based on, historical claims experience. If the nature and extent of claims in future periods differ from historical claims experience, then the actual amount of losses incurred may be materially higher or lower than the Company's estimates.

Warranty claims relating to our products and exceeding our warranty reserves could have a material adverse effect on our business.

We have offered, and continue to offer, various warranties on our products, including offering a prorated 50-year limited warranty until 2009 and a non-prorated 30-year limited warranty offering thereafter and to present for certain of our fibre cement siding products in the United States. In total, as of 31 March 2014, we have accrued US\$31.4 million for such warranties within "Accrued product warranties" on our consolidated balance sheets and have disclosed the movements in our consolidated warranty reserves within Note 10 to our consolidated financial statements in Section 2. Although we maintain reserves for warranty-related claims and legal proceedings that we believe are adequate, we

Table of Contents

cannot assure you that warranty expense levels or the results of any warranty-related legal proceedings will not exceed our reserves. If our warranty reserves are significantly exceeded, the costs associated with such warranties could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may incur significant costs, including capital expenditures, in complying with applicable environmental and health and safety laws and regulations.

In each jurisdiction in which we operate, we are subject to environmental, health and safety laws and regulations governing our operations, including, among other matters (i) the air, soil, and water quality of our plants and (ii) the use, handling, storage, disposal and remediation of hazardous substances currently or formerly used by us or any of our affiliates. Under these laws and regulations, we may be held jointly and severally responsible for the remediation of any hazardous substance contamination at our or our predecessors' past or present facilities and at third-party waste disposal sites. We may also be held liable for any claims, penalties or fines arising out of human exposure to hazardous substances or other environmental damage, including damage to natural resources, and our failure to comply with air, water, waste, and other environmental regulations.

In addition, many of our products contain crystalline silica, which can be released in a respirable form in connection with manufacturing, and product installation, demolition, and handling or use. The inhalation of respirable crystalline silica, identified as a carcinogen by certain governmental entities, at high and prolonged exposure levels is known to be associated with silicosis and has been the subject of extensive tort litigation. Current standards may be heightened if a proposed rulemaking by the United States Occupational Health and Safety Administration is made final. If such an event occurs, we may also face future costs related to engineering and compliance to meet these new standards or regulations relating to crystalline silica. Additionally, there is a risk that claims for silica-related health effects could be made against us resulting in litigation. Although we carry what we believe to be appropriate workers compensation and third-party liability insurance limits, we cannot assure you that we will have adequate limits or resources to satisfy any future silica-related health effect claims. Nor can we assure you that this coverage will continue to be available at reasonable rates in the future. In addition, our sales could decrease if silica-related claims are made against us, or regulations impact the use of our products, and as a result, potential users may decide not to use our products. Such outcomes may have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

The costs of complying with environmental and health and safety laws relating to our operations or the liabilities arising from past or future releases of, or exposure to, hazardous substances, greenhouse gases, or product liability matters, or our failure to comply with air, water, waste, and other than existing environmental regulations may result in us making future expenditures that could have a material adverse effect on our financial position, liquidity, results of operations and cash flows. Such regulations and laws may increase the cost to procure energy or other products necessary to our operation, thereby increasing our operating costs. In addition, we cannot make any assurances that the laws currently in place that directly or indirectly relate to environmental liability will not change. If, for example, applicable laws or judicial interpretations related to successor liability or piercing the corporate veil were to change, such changes could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

We may experience adverse fluctuations in the supply and cost of raw materials and energy supply necessary to our business, which could have a material adverse effect on our business.

Cellulose fibre (wood-based pulp), silica, cement and water are the principal raw materials used in the production of fibre cement, and the availability and cost of such raw materials are critical to our

Table of Contents

operations. Our fibre cement business periodically experiences fluctuations in the supply and costs of raw materials, and some of our supply markets are concentrated. In fiscal year 2014, the average NBSK pulp price relative to our US business was US\$971 per ton, an increase of 11% compared to fiscal year 2013. In April 2014, the average NBSK pulp price relative to our US business increased to US\$1030 per ton.

Freight costs in the US were also lower in fiscal year 2014 compared to the prior year. Freight costs are expected to increase in fiscal year 2015 as compared to fiscal year 2014.

Price fluctuations or material delays may occur in the future due to lack of raw materials, suppliers, or supply chain disruptions. The loss or deterioration of our relationship with a major supplier, an increase in demand by third parties for a particular supplier's products or materials, delays in obtaining materials, or significant increases in fuel and energy costs could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Demand for our products is subject to changes in consumer preference.

The continued development of builder and consumer preference for our fibre cement products over competitive products is critical to sustaining and expanding demand for our products. Therefore, a failure to maintain and increase builder and consumer acceptance of our fibre cement products could have a material adverse effect on our growth strategy, as well as our financial position, liquidity, results of operations and cash flows.

Our ability to sell our products in certain markets is influenced by building codes and ordinances in effect in the related localities and states and may limit our ability to compete effectively in certain markets and our ability to increase or maintain our current market share for our products.

Most states and localities in the markets in which we sell our products maintain building codes and ordinances that determine the requisite qualities of materials that may be used to construct homes and buildings for which our products are intended. Our products may not qualify under building codes and ordinances in certain markets, prohibiting our customers from using our products in those markets. This may limit our ability to sell our products in certain markets. In addition, ordinances and codes may change over time which may, from the time they are implemented, prospectively limit or prevent the use of our products in those markets, causing us to lose market share for our products. Although we keep up-to-date on the current and proposed building codes and ordinances of the markets in which we sell or plan to sell our products and, when appropriate, seek to become involved in the ordinance and code setting process, our efforts may be ineffective, which would have a material adverse effect on our financial condition, liquidity, results of operations and cash flows.

Our financial performance could be impacted by a customer's inability to pay amounts owed.

Our financial performance is dependent on our customers within the building products industry. Our customers' businesses have been impacted by the current economic environment, disruptions to the capital and credit markets and decreased demand for their products and services. If any of our largest customers or a substantial number of smaller customers are adversely affected by these conditions, if we become aware of information related to the credit worthiness of a major customer, or if future actual default rates on receivables in general differ from those currently anticipated, we may have to adjust the reserves for uncollectible receivables, which could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Table of Contents

Our reliance on third-party distribution channels could impact our business.

We offer our products directly and through a variety of third-party distributors and dealers. Changes in the financial or business condition of these distributors and dealers could subject the Company to losses and affect its ability to bring our products to market and could have a material adverse effect on our business, financial position, liquidity, results of operations and cash flows. Further, our ability to effectively manage inventory levels at distributor locations may be impaired under such arrangements, which could increase expenses associated with excess and obsolete inventory and negatively impact cash flows.

Changes in, or failure to comply with, the laws, regulations, policies or conditions of any jurisdiction in which we conduct our business could result in, among other consequences, the loss of our assets in such jurisdiction, the elimination of certain rights that are critical to the operation of our business in such jurisdiction, a decrease in revenues or the imposition of additional taxes or other costs.

Because we own assets, manufacture and sell our products internationally, our activities are subject to political, economic, legal and other uncertainties, including:

changing political and economic conditions;

changing laws and policies;

the general hazards associated with the assertion of sovereign rights over certain areas in which we conduct our business; and

laws limiting or conditioning the right and ability of subsidiaries and joint ventures to pay dividends or remit earnings to affiliated companies.

Although we seek to take applicable laws, regulations and conditions into account in structuring our business on a global basis, changes in, or our failure to comply with, the laws, regulations, policies or conditions of any jurisdiction in which we conduct our business could result in, among other consequences, the loss of our assets in such jurisdiction, the elimination of certain rights that are critical to the operation of our business in such jurisdiction, a decrease in revenues or the imposition of additional taxes. Therefore, any change in laws, regulations, policies or conditions of a jurisdiction could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

Because our intellectual property and other proprietary information may become publicly available, we are subject to the risk that competitors could copy our products or processes.

Our success depends, in part, on the proprietary nature of our technology, including non-patentable intellectual property such as our process technology. To the extent that a competitor is able to reproduce or otherwise capitalise on our technology, it may be difficult, expensive or impossible for us to obtain adequate legal or equitable relief. Also, the laws of some foreign countries may not protect our intellectual property to the same extent as do the laws of the United States. In addition to patent protection of intellectual property rights, we consider elements of our product designs and processes to be proprietary and confidential and/or trade secrets. To safeguard our confidential information, we rely on employee, consultant and vendor non-disclosure agreements and contractual provisions and a system of internal and technical safeguards to protect our proprietary information. However, any of our registered or unregistered intellectual property rights may be subject to challenge or possibly exploited by others in the industry, which could materially adversely affect our financial position, liquidity, results of operations, cash flows and competitive position.

Table of Contents

Severe weather, natural disasters and climate change could have an adverse effect on our overall business.

Our plants and other facilities are located in places that could be affected by natural disasters, such as hurricanes, typhoons, cyclones, earthquakes, floods, tornados and other natural disasters. Natural disasters and widespread adverse climate changes that directly impact our plants or other facilities could materially adversely affect our manufacturing or other operations and, thereby, harm our overall financial position, liquidity, results of operations and cash flows.

In the manufacture of our products, we rely on a continuous and uninterrupted supply of electric power, water and, in some cases, natural gas, as well as the availability of water, waste and emissions discharge facilities. Any future shortages or discharge curtailments of a material nature could significantly disrupt our operations and increase our expenses. We currently do not have backup generators on our sites with the capability of maintaining all of a site's full operational power needs and we do not have alternate sources of power in the event of a sustained blackout. While our insurance includes coverage for certain business interruption losses (i.e., lost profits) and for certain service interruption losses, such as an accident at our supplier's facility, any losses in excess of the insurance policy's coverage limits or any losses not covered by the terms of the insurance policy could have a material adverse effect on our financial condition. If blackouts interrupt our power supply, we would be temporarily unable to continue operations at the affected facilities. Any future material and sustained interruptions in our ability to continue operations at our facilities could damage our reputation, harm our ability to retain existing customers or obtain new customers and could result in lost revenue, any of which could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

In the future, we may be unable to renew our credit facilities on their current terms or terms that are customary for other companies in our industry or which have similar credit ratings, or be able to obtain any alternative or additional financing arrangements.

In the future, we may not be able to renew credit facilities on substantially similar terms, or at all; we may have to pay additional fees and expenses that we might not have to pay under current circumstances; and we may have to agree to terms that could increase the cost of our debt facilities. If we are unable to renew our credit facilities on terms which are not materially less favourable than the terms currently available to us or obtain alternative or additional financing arrangements, we may experience liquidity issues and will have to reduce our levels of planned capital expenditures, suspend dividend payments and/or share buy-back programs or take other measures to conserve cash in order to meet our future cash flow requirements.

Ineffective internal controls over financial reporting could impact our business and operating results.

The SEC, as directed by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring companies to include in their Annual Report on Form 20-F a report of management on the Company's internal controls over financial reporting that contains an assessment by management of the effectiveness of the Company's internal controls over financial reporting. In addition, the Company's independent registered public accounting firm must report on the Company's internal control over financial reporting. Our management concluded that our internal controls over financial reporting are effective. Moreover, our independent registered public accounting firm was satisfied with our internal controls, the level at which our controls are documented, designed, operated and reviewed. Nonetheless, during the course of future evaluation, documentation and attestation, we may identify deficiencies that we may not be able to remedy in a timely manner. Furthermore, our internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations,

Table of Contents

including the possibility of human error, the circumvention or overriding of controls, or fraud. If we fail to achieve and maintain the adequacy of our internal controls, we may not be able to conclude that we have effective internal controls, on an ongoing basis, over financial reporting in accordance with the Sarbanes-Oxley Act. Furthermore, effective internal controls over financial reporting are necessary for us to produce reliable financial reports and are important to help prevent fraud. As a result, our failure to achieve and maintain effective internal controls over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and negatively impact the trading price of our ADSs. Furthermore, even effective internal controls can only provide reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, we have incurred considerable costs and used significant management time and other resources in our effort to comply with Section 404 and other requirements of the Sarbanes-Oxley Act.

Our use of accounting estimates involves judgment and could impact our financial results.

The preparation of financial statements requires management to make judgments, estimates, and assumptions that affect the reported amounts of assets, liabilities, income, and expenses. Due to the inherent uncertainty in making estimates, actual results reported in future periods may be based upon amounts which differ from those estimates. Estimates, judgments, and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The accounting policies deemed critical to the Company's results, based upon materiality and significant judgments and estimates, are described in Note 2 to our consolidated financial statements in Section 2. In addition, as discussed in Note 10, Product Warranties and Note 13, Contingencies and Commitments to our consolidated financial statements in Section 2, we make certain estimates including decisions related to legal proceedings and warranty reserves. If the judgment, estimates, and assumptions used by the Company in preparing its financial statements are subsequently found to be incorrect, there could be a material impact on the Company's results of operations.

We may acquire or divest businesses from time to time, and this may materially adversely affect our results of operations and financial condition and may significantly change the nature of the company in which you have invested.

In the past, we have divested business segments. In the future, we may acquire other businesses or sell some or all of our assets or business segments. Any significant acquisition or sale may materially adversely affect our results of operations and financial condition and could change the overall profile of our business. As a result, the value of our shares may decrease in response to any such acquisition or sale and, upon any such acquisition or sale, our shares may represent an investment in a company with significantly different assets and prospects from the Company when you made your initial investment in us.

We are dependent upon our key management personnel for our future success.

Our success is greatly influenced by our ability to attract and retain qualified executives with experience in our market and industry. Our ability to retain executive officers and key management personnel is important to the implementation of our strategy. We could potentially lose the services of any of our senior management personnel due to a variety of factors that could include, without limitation, death, incapacity, personal issues, retirement, resignation, or competing employers. We may fail to attract and retain qualified key management personnel required to continue to operate our business successfully. The unexpected loss of senior management, coupled with our failure to recruit qualified successors, could have a material adverse effect on our business and the trading price of our common stock.

Table of Contents

Our systems may be subject to security breaches and other cyber security incidents.

We may face attempts by others to penetrate our computer systems and networks to misappropriate our proprietary information and technology or interrupt our business. The reliability and security of our information technology infrastructure and software, and our ability to expand and continually update technologies in response to our changing needs is critical to our business. To the extent that any disruptions or security breaches result in a loss or damage to our data, or in inappropriate disclosure of proprietary information, it could cause significant damage to our reputation, affect our relationships with our customers and ultimately harm our business.

LEGAL PROCEEDINGS

The Company is involved from time to time in various legal proceedings and administrative actions related to the normal conduct of its business, including general liability claims, putative class and representative action lawsuits and litigation concerning our products and services. Although it is impossible to predict the outcome of any pending legal proceeding, management believes that such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows, except as they relate to asbestos, tax contingencies, New Zealand product liability claims and the matters described in the Other Legal Matters sections below. For further details, see Risk Factors in this Section.

Tax Contingencies

Due to our size and the nature of our business, we are subject to ongoing reviews by taxing jurisdictions on various tax matters. We accrue for tax contingencies based upon our best estimate of the taxes ultimately expected to be paid, which we update over time as more information becomes available. Such amounts are included in taxes payable or other non-current liabilities, as appropriate. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognise a tax benefit during the period in which we determine that the liability is no longer necessary. We record additional tax expense in the period in which we determine that the recorded tax liability is less than the ultimate assessment we expect.

In fiscal years 2014, 2013 and 2012, we recorded an income tax benefit of US\$0.3 million, US\$0.2 million and income tax expense of US\$0.5 million, respectively, as a result of the finalisation of certain tax audits (whereby certain matters were settled) and the expiration of the statute of limitations related to certain tax positions.

We file income tax returns in various jurisdictions, including Ireland, the United States, Australia, New Zealand, the Philippines and The Netherlands. We are no longer subject to US federal examinations by the IRS for tax years prior to tax year 2009. We are no longer subject to examinations by The Netherlands tax authority, for tax years prior to tax year 2008. We are no longer subject to Australian federal examinations by the ATO for tax years prior to tax year 2010.

New Zealand Product Liability

Since fiscal year 2002, our New Zealand subsidiaries have been and continue to be joined in a number of construction defect claims in New Zealand that relate to residential buildings (single dwellings and apartment complexes) and a small number of non-residential buildings, primarily constructed from 1998 to 2004. The claims often involve multiple parties and allege that losses were incurred due to excessive moisture penetration of the buildings' structures. The claims typically include allegations of poor building design, inadequate certification of plans, inadequate construction review and compliance certification and deficient work by sub-contractors.

Table of Contents

We recognise a liability for both asserted and unasserted claims in the period in which the loss becomes probable and estimable. The amount of reasonably possible loss is dependent on a number of factors including, without limitation, the specific facts and circumstances unique to each claim brought against our New Zealand subsidiaries, the existence of any co-defendants involved in defending the claim, the solvency of such co-defendants (including the ability of such co-defendants to remain solvent until the related claim is ultimately resolved), the availability of claimant compensation under a government compensation scheme, the amount of loss estimated to be allocable to our New Zealand subsidiaries in instances that involve co-defendants in defending the claim and the extent to which our New Zealand subsidiaries have access to third-party recoveries to cover a portion of the costs incurred in defending and resolving such actions. In addition to the above limitations, the total loss incurred is also dependent on the manner and extent to which the statute of limitations will apply in future periods.

Historically, our New Zealand subsidiaries have been joined to these claims as one of several co-defendants, including local government entities responsible for enforcing building codes and practices, resulting in our New Zealand subsidiaries becoming liable for only a portion of each claim. In addition, our New Zealand subsidiaries have had access to third-party recoveries to defray a significant portion of the costs incurred in resolving such claims.

We have made a provision for the asserted and unasserted claims within Other Current and Other Non-current Liabilities, with a corresponding estimated receivable for third-party recoveries being recognised within Accounts and Other Receivables at 31 March 2014. The amount of provision for these claims in New Zealand, net of estimated third-party recoveries, is US\$12.7 million at 31 March 2014. During the year ended 31 March 2014 the Company recognised US\$1.7 million in expenses related to the legacy claims in New Zealand.

The estimated loss incorporates assumptions that are subject to the foregoing uncertainties and are principally derived from, but not exclusively based on, historical claims experience. If the nature and extent of claims in future periods differ from the historical claims experience, then the actual amount of loss may be materially higher or lower than estimated losses accrued at 31 March 2014. Accordingly, due to the inherent uncertainties associated with estimating the amount of loss incurred for asserted and unasserted claims, as discussed above, and based on information presently available, we believe it is possible that the ultimate resolution of these legacy claims could result in an additional loss of up to approximately US\$3.6 million in excess of the amount accrued, net of estimated third-party recoveries, at 31 March 2014. Accordingly, losses incurred in connection with defending and resolving asserted and unasserted claims in the future could have a material adverse effect on our financial position, liquidity, results of operations and cash flows.

For further information, see **Risk Factors** in this Section and Note 13 to our consolidated financial statements in Section 2.

Other Legal Matters

Environmental

Our operations, like those of other companies engaged in similar businesses, are subject to a number of laws and regulations on air and water quality, waste handling and disposal. Our policy is to accrue for environmental costs when it is determined that it is probable that an obligation exists and the amount can be reasonably estimated.

Table of Contents*Other Product Liability*

As of 31 March 2014, one of our US subsidiaries has been named as a defendant in 12 related lawsuits in eight separate U.S. federal district courts. One lawsuit was filed between March 2013 and March 2014, adding to the 11 lawsuits already pending as of the end of March 2013. Each lawsuit has a different set of facts and circumstances; however, the lawsuits all relate to products allegedly manufactured by the subsidiary, raise virtually the same claims and are brought by generally the same underlying plaintiffs' counsel. In addition to the individually-named plaintiffs, each lawsuit seeks to pursue claims on behalf of a purported but unidentified class of homeowners.

The plaintiffs moved to transfer and consolidate all of the related actions within one federal district court, and their motion was granted in June 2012. However, no class has been certified. We believe we have meritorious defences to each lawsuit and in opposition to class certification, and intend to vigorously defend the actions.

EMPLOYEES

During each of the last three fiscal years, we employed the following average number of people:

	Fiscal Years Ended 31 March		
	2014	2013	2012
Fibre Cement United States and Canada	2,061	1,681	1,581
Fibre Cement Australia	497	446	453
Fibre Cement New Zealand	138	142	143
Fibre Cement Philippines	178	166	154
Pipes Australia	64	62	62
Fibre Cement Europe	61	53	47
Research & Development, including Technology	105	155	128
General Corporate	36	33	36
Total Employees	3,140	2,738	2,604

As of the end of 31 March 2014, of the 3,138 average number of people employed, approximately 180 employees were members of labour unions (approximately 130 and 50 employees in Australia and New Zealand, respectively). Under Australian law, we cannot keep records of union members. The number quoted is the number of people who work in our factories that have union participation and therefore may be represented by a union). Our management believes that we have a satisfactory relationship with these unions and its members and there are currently no ongoing labour disputes. We currently have no employees who are members of a union in the United States.

LISTING DETAILS

As a company incorporated under the laws of Ireland, we have listed our securities for trading on the ASX, through the use of the Clearing House Electronic Subregister System (CHESS), via CUFS. CUFS are a form of depositary security that represent a beneficial ownership interest in the securities of a non-Australian corporation. Each of our CUFS represents the beneficial ownership of one share of common stock of JHI plc, the legal ownership of which is held by CHESSE Depositary Nominees Pty Ltd. The CUFS are listed and traded on the ASX under the symbol JHX.

We have also listed our securities for trading on the NYSE. We sponsor a program, whereby beneficial ownership of five CUFS is represented by one American Depositary Share (ADS), which is issued by The Bank of New York Mellon. These ADSs trade on the NYSE in the form of American Depositary

Table of Contents

Receipts (ADRs), under the symbol JHX. Unless the context indicates otherwise, when we refer to ADSs, we are referring to ADRs or ADSs and when we refer to our common stock we are referring to the shares of our common stock that are represented by CUFS.

Price History

The high and low trading prices of JHI plc CUFS on the ASX are as follows:

Trading Markets

Our securities are listed and quoted on the following stock exchanges:

Common Stock (in the form of CUFS)
ADs

Australian Securities Exchange
New York Stock Exchange

We cannot predict the prices at which our shares and ADs will trade or the volume of trading for such securities, nor can we assure you that these securities will continue to meet the applicable listing requirements of these exchanges.

Trading on the Australian Securities Exchange

The ASX is headquartered in Sydney, Australia, with branches located in each Australian state capital. Our CUFS trade on the ASX under the symbol JHX. The ASX is a publicly listed company with trading being undertaken by brokers licensed under the Corporations Act. Trading principally takes place between the hours of 10:00 a.m. and 4:00 p.m. Australian Eastern Standard Time on each weekday (excluding Australian public holidays). Settlement of trades in uncertificated securities listed on the ASX is generally effected electronically. This is undertaken through CHESS, which is the clearing and settlement system operated by the ASX.

Trading on the New York Stock Exchange

In the United States, five JHI plc CUFS equal one JHI plc ADs. Our ADs trade on the NYSE under the symbol JHX. Trading principally takes place between the hours of 9:30 a.m. and 4:00 p.m. Eastern Time on each weekday (excluding US public holidays). All inquiries and correspondence regarding ADs should be directed to BNY Mellon, depositary for our ADs, at P.O. Box 30170, College Station, TX 77842-3170. To speak directly to a BNY Mellon representative, please call 1-888-BNY-ADRS (1-888-269-2377) if you are calling from within the United States. If you are calling from outside the US, please call 201-680-6825. You may also send an e-mail inquiry to shrrelations@pushareownerservices.com or visit the website at www.mybnymdr.com.

¹ Pursuant to a share repurchase program originally announced on 23 May 2013 of up to 5% of our issued capital (approximately 22.1 million shares), we repurchased approximately 1.9 million shares at a cost of US\$22.1 million in fiscal year 2014 as part of this plan. The program expired in May 2014.

Table of Contents

MEMORANDUM AND ARTICLES OF ASSOCIATION

General

On 17 June 2010, we completed our Re-domicile from The Netherlands to Ireland and became an Irish SE company incorporated and existing under the laws of Ireland. On 15 October 2012, we completed our conversion from an Irish SE to become an Irish public limited liability company under Irish law, with the name of James Hardie Industries plc.

Our corporate domicile is in Ireland and our office is located at Europa House, Second Floor, Harcourt Center, Harcourt Street, Dublin 2, Ireland. We are registered at the Companies Registration Office of the Department of Enterprise Trade and Innovation in Dublin, Ireland under number 485719.

Key Provisions of Our Articles of Association

Purpose of the Company

Our main object, which is stated in our Memorandum of Association, is to:

carry on the businesses of manufacturer, distributor, wholesaler, retailer, service provider, investor, designer, trader and any other business (except the issuing of policies of insurance) which may seem to the Company's board of directors capable of being conveniently carried on in connection with these objects or calculated directly or indirectly to enhance the value of or render more profitable any of the Company's property.

The Memorandum of Association also states that we will have the power to carry on the business of a holding company and co-ordinate the administration, finances and activities of any subsidiary companies or associated companies. Our objects and purposes are set out in Clause 3 of our Memorandum of Association.

We also have the usual powers of an Irish public limited company. These include the power to borrow, to charge assets, to grant guarantees and indemnities, to incorporate new companies and to acquire existing companies.

Provisions of Our Articles of Association Related to Directors

General and borrowing powers: Our Articles of Association grant the directors a general power to manage the Company. The directors will have the power to exercise all of the powers of the Company that have not been otherwise expressly reserved to the shareholders by Irish Company Law or our Articles of Association. In addition, the directors also will be granted certain specific powers by our Articles of Association, including:

the power to delegate their powers to the CEO, any director, any person or persons employed by us or any of our subsidiaries or to a committee of the Board;

the power to appoint attorneys to act on our behalf;

the power to borrow money on our behalf and to mortgage or charge our undertaking, property, assets, and uncalled capital as security for such borrowings; and

the power to do anything that is necessary or desirable for us to participate in any computerised, electronic or other system for the facilitation of the transfer of CUFS or the operation of our registers that may be owned, operated or sponsored by the ASX.

Table of Contents

Our Articles of Association expressly list some, but not all, of the duties of directors.

Under Irish law, directors have a common law fiduciary duty to act in the best interest of Irish plc and to exercise good faith and due care and skill. Directors also have statutory duties that mainly relate to administrative obligations.

Power to vote on compensation: The maximum aggregate remuneration of the non-executive directors is US\$2,000,000 and can be changed from time to time by an ordinary resolution. Changes to non-executive director remuneration are recommended by the Remuneration Committee and are approved at a properly convened meeting of the Board (which consists of eight non-executive directors and the CEO).

Arrangements for remuneration in the form of shares or CUFs for directors requires shareholder approval pursuant to an ordinary resolution.

There is no requirement for our shareholders to approve the remuneration policy. The Company currently intends to continue voluntarily producing a remuneration report.

These provisions are subject to the relevant listing rules of the ASX regarding director remuneration.

Age limit for retirement or non-retirement: Our Articles of Association do not include any provisions regarding the mandatory retirement age of a director.

Number of shares for director's qualification: No director will require a share qualification in order to act as a director.

Power to vote on proposals, arrangements or contracts in which the director is materially interested: The Company's Articles of Association provide that a director cannot vote on any resolution concerning a matter in which he has, directly or indirectly, an interest which is material or a duty which conflicts or may conflict with the interests of the Company. A director cannot be counted in the quorum present at a meeting in relation to any such resolution on which the director is not entitled to vote.

Under Irish law, directors who have a personal interest in a contract or a proposed contract with the Company are required to declare the nature of their interest at a meeting of the directors of the Company. The Company is required to maintain a register of such declared interests which must be made available for inspection by the shareholders at general meetings.

Issuance of Shares; Pre-emptive Rights

We have been registered with one class of shares; however, our Articles of Association will allow for any share to be issued with such rights or restrictions as the shareholders may by ordinary resolution determine.

Shareholders may authorise us (acting through our directors) by special resolution to issue shares in whatever manner on the basis that they will be subsequently redeemed. Once issued, we may cancel redeemed shares or alternatively hold them as treasury shares (which subsequently will be reissued or cancelled).

The Board has the power (a) to issue shares up to a maximum of our authorised share capital and (b) to limit or exclude statutory pre-emptive rights in respect of such issue for cash consideration, for a period of up to five years in each case, subject to renewal, by a special resolution of shareholders (which requires the approval of holders of 75% of shares present in person or by proxy and voting at the relevant general meeting) in the case of disapplication of statutory pre-emptive rights, and an

Table of Contents

ordinary resolution (which requires the approval of holders of a majority of shares present in person or by proxy and voting at the relevant general meeting in the case of authorising the board to issue shares).

Our Articles of Association grant these authorisations to the board, which will expire (unless renewed) on 13 August 2017.

These authorisations are subject to the listing rules of the ASX and NYSE in relation to the issue of new equity securities, which require:

in the case of the ASX, shareholder approval for the issue of equity securities which exceed 15% of the number of equity securities on issue (as determined in accordance with the ASX listing rules and subject to the various exemptions set out therein); and

in the case of the NYSE, shareholder approval for the issuance of shares that have or will have upon issuance voting power equal to or in excess of 20% of the voting power outstanding before the issuance of such shares (subject to certain exceptions).

If the Board is at any time not designated as the authorised body for such powers, the shareholders acting by ordinary resolution have the power to issue shares, but only upon the proposal of the Board.

As an Irish company that has listed securities in Australia and the United States, we are subject to applicable legislation regarding insider trading. Generally, Australian law prohibits persons from trading on the basis of information which is not generally available and which, if it were generally available, a reasonable person would expect to have a material effect on the price or value of securities. Similarly, in the United States, persons are prohibited from trading on the basis of material, non-public information. We have adopted an internal code on insider trading consistent with Australian and US laws and regulations.

Repurchase of Shares and Reduction of Capital

Irish law permits us to redeem our shares (provided such shares are redeemable) at any time whether on or off market without shareholder approval. Accordingly, our Articles of Association provide that, when we agree to acquire any shares (unless we elect to treat the acquisition as a purchase), it shall be a term of such contract that the relevant shares become redeemable on the entry into of that contract and that completion of that contract shall constitute redemption of the relevant shares. This means that we may acquire our own shares.

In addition, Irish law permits an Irish company and its subsidiaries to make market purchases of the shares of the Irish company on a recognised stock exchange if shareholders of the company have granted the company and/or its subsidiaries a general authority by ordinary resolution to do so. Currently, the Irish Stock Exchange, the NYSE, NASDAQ and the London Stock Exchange are the recognised stock exchanges for this purpose.

As the ASX is not currently a recognised stock exchange for the purposes of Irish law, on- and off-market purchases of our shares (by way of trading CUFS) will only be available to us through their redemption in accordance with the redemption mechanism in our Articles of Association, outlined above, provided we do not treat such acquisition as a purchase.

A redemption or repurchase of shares may only be funded out of freely distributable reserves or out of the proceeds of a fresh issue of shares for that purpose.

Table of Contents

Under Irish Company Law, the Board may determine whether shares that we have repurchased or redeemed will either be held in treasury or cancelled. However, under Irish Company Law, the nominal value of treasury shares held by us may not, at any one time, exceed 10% of the nominal value of our issued share capital.

Unless otherwise required by Irish plc's Articles of Association or Irish law, no business other than the appointment of a chairman may be transacted at any general meeting unless at least 5% of Irish plc's issued share capital is present or represented.

Shareholders Meetings and Voting Rights

Our AGMs will generally be held in Ireland unless shareholder approval, pursuant to an ordinary resolution, is granted at the preceding AGM to hold the following general meeting outside of Ireland. There is no requirement that extraordinary general meetings be held in Ireland. We must hold an AGM in each calendar year and within nine months after the financial year end and we shall announce the date of each such AGMs no less than 35 business days before such meeting is due to be held. All business that is transacted at an AGM shall be deemed to be special business, except: (1) the declaration of a dividend; (2) the consideration of the accounts, balance sheets and reports of the directors and auditors; (3) the election of directors in the place of those retiring (whether by rotation or otherwise, with rotation occurring at staggered intervals and in any event at least once every three years, except for the CEO, who is not subject to re-election); (4) the fixing of the remuneration of the directors (if required); and (5) the fixing of the remuneration of the auditors.

We shall announce the date of an extraordinary general meeting no less than 35 business days before such meeting is due to be held save in exceptional circumstances where the Board resolves otherwise. An extraordinary general meeting may be convened by (1) the directors or (2) pursuant to Irish Company Law, by one or more persons who alone or together hold 10% of our issued share capital. An extraordinary general meeting must be convened within 21 calendar days after a request has been made of us by a shareholder (who holds 10% or more of our issued share capital), and the extraordinary general meeting must be held no later than two months after such a request has been made by a shareholder.

One or more persons who alone or together hold at least 10% of our issued share capital may request that the Board call an extraordinary general meeting. In addition, such holders may also request that the Board place a matter on the agenda of any general meeting so long as any such request shall be received by us at least 30 business days before the general meeting to which it relates, at such postal or e-mail address as specified by us for that purpose in the announcement of the general meeting. Such request must be accompanied by stated grounds justifying its inclusion, or a draft resolution, together not to exceed 1,000 words. Such a request will be declined by our Board where: (i) the request is contrary to the Memorandum or Articles of Association, Irish law or the ASX Listing Rules, or (ii) the time limits specified in the Articles of Association have not been complied with.

The quorum for general meetings and for meetings of a separate class of shareholders of an Irish plc is one or more persons who alone or jointly hold at least 5% of such Irish plc's issued share capital or, in the case of a separate class meeting, 5% of the issued share capital of that class. These same quorum requirements also apply to all adjourned meetings.

Holders of CUFs and ADSs do not appear on our share register as legal holders of shares. Accordingly, the ability to call an extraordinary general meeting only may be exercised, in the case of holders of CUFs, by providing instructions to the CUFs depository or by converting their CUFs to shares, and, in the case of holders of ADSs, by converting their ADSs to CUFs and thereafter providing instructions to the CUFs depository or converting their CUFs to shares.

Table of Contents

All shares issued have the right to one vote for each share held on every matter submitted to a vote of the shareholders. CUFS holders are entitled to attend and to speak at our shareholder meetings and can vote at our shareholder meetings:

by instructing CHESS Depository Nominees Pty Limited (CDN), as legal owner of our shares represented by CUFS, how to vote the shares represented by the holder s CUFS;

by directing CDN to appoint itself (or another person) as the Nominated Proxy pursuant to a voting instruction form provided by the Company; or

by converting the holder s CUFS into our shares and voting the shares at the meeting, which must be undertaken prior to the meeting. However, in order to sell their shares on the ASX thereafter, it will first be necessary to convert them back to CUFS.

ADS holders will not be entitled to attend our general meetings of shareholders, but can vote by giving an instruction to The Bank of New York Mellon, as the ADS depository on how to instruct CDN to vote at a meeting.

Irish law and our Articles of Association currently do not impose any limitations on the rights of persons who are not residents of Ireland to hold or vote shares, solely as a result of such non-resident status.

Annual Report

Our fiscal year runs from 1 April through 31 March. Irish law requires that our annual accounts must be laid before the shareholders at the AGM within nine months of the balance sheet date and that copies of our financial statements must be sent to the shareholders 21 days before the AGM. We prepare consolidated annual accounts under modified US GAAP, which is US GAAP to the extent that it is not inconsistent with Irish Company Law. We will also prepare standalone annual entity accounts under Irish GAAP and lay those accounts before a general meeting of shareholders.

The annual accounts will also include report of an independent accountant.

Indemnification

Our Articles of Association provide that our current and former directors, company secretary, employees and persons who may be deemed by our Board to be our agent are indemnified by us for costs, losses and expenses arising out of such person s exercise of their duties to us. However, under Irish Company Law, this indemnity only binds us to indemnify a current or former director or company secretary where judgment is given in any civil or criminal action in favour of such director or company secretary, or where a court grants relief because the director or company secretary acted honestly and reasonably and ought fairly to be excused. Our Articles of Association apply the same restrictions to employees and persons deemed by our Board to be our agent who are not current or former directors or company secretary.

We have also entered into deeds of access, insurance and indemnity with our directors, company secretary and certain senior employees.

Dividends

Dividends and distributions of assets to shareholders may be declared (a) in the case of dividends, by the Board or (b) upon the recommendation of the Board, by an ordinary resolution of shareholders, provided that with respect to dividends or distributions declared pursuant to subsection (b) above, the dividends or distributions may not exceed the amount recommended by the Board.

Table of Contents

Dividends and distributions may only be made in-so-far as (a) we have sufficient distributable profits and (b) our net assets are in excess of the aggregate of called up share capital plus undistributable reserves and the distribution does not reduce our net assets below such aggregate.

If directors so resolve, any dividend that has remained unclaimed for 12 years from the date of its declaration shall be forfeited and cease to be owned by the Company. The payment by directors of any unclaimed dividend or other moneys payable in respect of a share into a separate account shall not constitute us a trustee in respect thereof. However, it is unlikely that any such unclaimed dividends will be forfeited due to the operation of Australian legislation, under which dividends that have been unclaimed for six years are paid to the relevant state authority, through which shareholders can claim a refund of such dividends in the future.

Our Board determines the record dates at which time registered holders of our shares, including the CHESSE Depositary Nominee issuing CUFS to the ADS depositary, will be entitled to dividends and also sets the payment dates for these dividends. Dividends are declared payable to our shareholders in US dollars. The ADS Depositary (Bank of New York Mellon) receives dividends in US dollars directly from JHI plc on each CUFS dividend payment date and will distribute any dividend to holders of ADSs in US dollars pursuant to the terms of the deposit agreement. Other CUFS holders registered at a dividend record date are paid their dividend on each CUFS dividend payment date in the equivalent amount of Australian dollars, as determined by the prevailing exchange rate shortly after the CUFS dividend record date.

Amendment of Articles of Association

Our Articles of Association may be amended by our shareholders, which include changes to the rights of shareholders, subject to Irish Company Law restrictions, by resolution approved by 75% of the votes cast at a general meeting of shareholders at which at least 5% of our issued share capital is present or represented.

Liquidation Rights

In the event of our liquidation, and after we have paid all debts and liquidation expenses, the excess of any assets shall be distributed among our shareholders in proportion to the capital at the commencement of the winding up which is paid up or credited as paid up on such shares held by our shareholders. As a holding company, our sole material assets will be the capital stock of our subsidiaries.

Limitations on Right to Hold Common Stock

The Irish Takeover Rules regulate takeover and merger transactions, however effected, by which control of a target incorporated in Ireland may be obtained or consolidated. Control means a holding or aggregate holding of shares carrying 30% or more of the voting rights of a company, irrespective of whether the holding or holdings give de facto control.

The Irish Takeover Rules are statute based. The Irish Takeover Panel is the body that regulates all transactions subject to the Irish Takeover Rules.

Rule 9 of the Irish Takeover Rules states that, except with the consent of the Irish Takeover Panel, when:

any person acquires, whether by a series of transactions over a period of time or not, shares or other securities which (taken together with shares or other securities held or acquired by persons acting in concert) carry 30% or more of the voting rights of a company; or

Table of Contents

any person, who together with persons acting in concert, holds not less than 30% of the voting rights and such person or any person acting in concert with them acquires, in any period of 12 months, additional shares or other securities of more than 0.05% of the total voting rights of the company, such person must extend offers to the holders of any class of equity securities (whether voting or non-voting) and to holders of any class of transferable voting capital in respect of all such equity securities and transferable voting capital.

A single holder (that is, a holder excluding any parties acting in concert with the holder) holding more than 50% of the voting rights of a company is not subject to Rule 9.

The Irish Takeover Rules also contain rules called Substantial Acquisition Rules which restrict the speed with which a person may increase their holding of shares and rights over shares to an aggregate of between 15% and 30% of the voting rights of a company. These rules also require accelerated disclosure of acquisitions of shares or rights over shares relating to such holdings.

The Irish Takeover Rules are built on the following general principles that apply to any transaction regulated by such rules:

all holders of the securities of an offeree of the same class must be afforded equivalent treatment; moreover, if a person acquires control of a company, the other holders of securities must be protected;

the holders of the securities of an offeree must have sufficient time and information to enable them to reach a properly informed decision on the offer; where it advises the holders of securities, the board of the offeree must give its views on the effects of implementation of the offer on employment, conditions of employment and the locations of the offeree's places of business;

the board of an offeree must act in the interests of the company as a whole and must not deny the holders of securities the opportunity to decide on the merits of the offer;

false markets must not be created in the securities of the offeree, of the offeror or of any other company concerned by the offer in such a way that the rise or fall of the prices of the securities becomes artificial and the normal functioning of the markets is distorted;

an offeror must announce an offer only after ensuring that he or she can fulfil in full any cash consideration, if such is offered, and after taking all reasonable measures to secure the implementation of any other type of consideration;

an offeree must not be hindered in the conduct of its affairs for longer than is reasonable by an offer for its securities; and

a substantial acquisition of securities (whether such acquisition is to be effected by one transaction or a series of transactions) shall take place only at an acceptable speed and shall be subject to adequate and timely disclosure.

The prohibition does not apply to holdings by the CUFS depositary, CDN, of our shares as custodian for the CUFS holders but will apply to CDN where another person acquires or holds a relevant interest in breach of the provisions. If a person acquires or holds a relevant interest in breach of the prohibition, we have several powers available to us under our Articles of Association. These include powers to

Table of Contents

require the disposal of our common stock, disregard the exercise of votes and suspend dividend rights. These powers will only extend to that number of shares of common stock which are acquired or held in breach of the prohibition.

Although these provisions of our Articles of Association may help to ensure that no person may acquire voting control of us without making an offer to all shareholders, these provisions may also have the effect of delaying or preventing a change in control of the Company.

Disclosure of Holdings

Under Irish law, a person must notify us in writing within five business days of an acquisition or disposition of shares in Irish plc where:

such person's interest was below 5% of our issued share capital prior to such acquisition and equals or exceeds 5% after such acquisition;

such person's interest was equal to or above 5% of our issued share capital before an acquisition or disposition and increases or decreases through an integer of a percentage as a result of such acquisition or disposition (e.g., from 5.8% to 6.3% or from 8.2% to 7.9%); and

where such person's interest was equal to or above 5% of our issued share capital before a disposition and falls below 5% as a result of such disposition.

In addition, under Irish law, we can, if we have reasonable cause to believe that a person or company has an interest in our shares, require such person or company to confirm that belief (or as the case may be) to indicate whether or not it is the case and to provide certain information in relation to such holdings, including details of his or her interest in our shares and the interests (if any) of all persons having a beneficial interest in the shares. To the extent any such information is made available to us, Irish law requires that we make such information available to any person upon such person's request.

Failure of a shareholder to disclose its interests in our shares as described above will result in no right or interest of any kind in respect of that person's shares being enforceable, whether directly or indirectly by action or legal proceeding. If a person fails to respond to us when we make a request for information in the manner described above, we may apply to the High Court of Ireland for an order stating that: (a) any transfer of such shares will be void; (b) such shares will have no voting rights; (c) no further shares will be issued in right of those shares or pursuant to any offer made to the holder thereof; and (d) such shares will not be entitled to any payment from us. Such restrictions, whether imposed for a failure to disclose a notifiable interest or for a failure to respond to a request for information, may only be lifted by an order of the High Court of Ireland.

Shareholders are also subject to beneficial ownership reporting disclosure requirements under US securities laws, including the filing of beneficial ownership reports on Schedules 13D and 13G with the SEC. The SEC's rules require all persons who beneficially own more than 5% of a class of securities registered with the SEC to file either a Schedule 13D or 13G. This filing requirement applies to all holders of our shares of common stock, ADSs or CUFs because our securities have been registered with the SEC. The number of shares of common stock underlying ADSs and CUFs is used to determine whether a person beneficially owns more than 5% of the class of securities. This beneficial ownership reporting requirement applies whether or not the holders are US residents. The decision of whether to file a Schedule 13D or a Schedule 13G will depend primarily on the nature of the beneficial owner and the circumstances surrounding the person's beneficial ownership. A copy of the rules and regulations relating to the reporting of beneficial ownership with the SEC, as well as Schedules 13D and 13G, are available on the SEC's website at www.sec.gov.

Table of Contents

MATERIAL CONTRACTS

In addition to the other contracts that are described in this annual report, including without limitation the AFFA and certain other related agreements described in Commitment to Provide Funding on a Long-Term Basis in Respect of Asbestos-Related Liabilities of Former Subsidiaries, our stock option plans and certain material employment contracts described under Section 2, Remuneration Report, and any material contracts that have been entered into in the ordinary course of business, the following are the contracts we consider to be material to us. All contracts described below have been filed as exhibits to this annual report and are hereby incorporated by reference, and the summary below is qualified in its entirety by reference to the full texts of such contracts.

US Dollar Cash Advance Facilities. For all facilities, the interest rate is calculated two business days prior to the commencement of each draw-down period based on LIBOR, plus the margins of individual lenders, and is payable at the end of each draw-down period. At 31 March, 2014, there were no facilities drawn under the combined facilities and US\$355.0 million was available.

At 31 March 2014, the Company was in compliance with all restrictive debt covenants contained in its credit facility agreements. Under the most restrictive of these covenants, the Company (i) must not exceed a maximum of net debt to earnings before interest, tax, depreciation and amortisation, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited and excluding assets, liabilities and other balance sheet items of the AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, (ii) must meet or exceed a minimum ratio of earnings before interest and taxes to net interest charges, excluding all income, expense and other profit and loss statement impacts of AICF, Amaba, Amaca, ABN 60 and Marlew Mining Pty Limited, and (iii) must ensure that no more than 35% of Free Cash Flow (as defined in the AFFA), in any given financial year (Annual Cash Flow Cap) is contributed to AICF on the payment dates under the AFFA in the next following financial year. The Annual Cash Flow Cap does not apply to payments of interest, if any, to AICF and is consistent with contractual obligations of the Performing Subsidiary and the Company under the AFFA.

Gypsum Indemnity. We sold our gypsum wallboard manufacturing facilities in April 2002. Under the terms of the sale agreement with the buyer, BPB US Holdings, Inc., we agreed to customary indemnification obligations which generally have expired. However, pursuant to the sale agreement, we agreed to indemnify the buyer for any future liabilities arising from asbestos-related injuries to persons or property arising from our former gypsum business. We are not aware of any asbestos-related claims arising from the gypsum business nor circumstances that would give rise to such claims. Further, our obligation under the sale agreement to indemnify the buyer for liabilities arising from asbestos-related injuries arises only if such claims exceed US\$5.0 million in the aggregate, is limited to US\$250.0 million in the aggregate and will continue for 30 years after the closing date of the sale of the gypsum business.

EXCHANGE CONTROLS

The European Commission has imposed financial sanctions on a number of countries throughout the world that are suspected of being involved in activities such as terrorism or repression of its citizens. Ireland has given effect to these sanctions through the implementation of regulations and statutory instruments. We do not have any subsidiaries located in countries with imposed financial sanctions by the European Commission. In addition, we do not conduct business or other revenue-generating activities in these countries.

Table of Contents

Except for restrictions contained in the regulations or statutory instruments referred to above, there are no legislative or other legal provisions currently in force in Ireland or arising under our Articles of Association restricting the import or export of capital, including the availability of cash and cash equivalents for use by JHI plc and its wholly owned subsidiaries, or remittances to our security holders not resident in Ireland. In addition, except for restrictions contained in the regulations or statutory instruments referred to above, cash dividends payable in US dollars on our common stock may be officially transferred from Ireland and converted into any other convertible currency.

There are no limitations, either by Irish law or in our Articles of Association, on the right of non-residents of Ireland to hold or vote our common stock.

TAXATION

The following summarises the material US and Irish tax consequences of an investment in shares of our common stock. This summary does not address every aspect of taxation relevant to a particular investor subject to special treatment under any applicable law and is not intended to apply in all respects to all categories of investors. In addition, except for the matters discussed under **Irish Taxation**, this summary does not consider the effect of other foreign tax laws or any state, local or other tax laws that may apply to an investment in shares of our common stock. This summary assumes that we will conduct our business in the manner described in this annual report. Changes in our organisational structure or the manner in which we conduct our business may invalidate all or parts of this summary. The laws on which this summary is based could change, perhaps with retroactive effect, and any law changes could invalidate all or parts of this summary. We will not update this summary for any law changes after the date of this annual report.

This discussion does not bind either the US or Irish tax authorities or the courts of those jurisdictions. Except where outlined below, we have not sought a ruling nor will we seek a ruling of the US or Irish tax authorities about matters in this summary. We cannot assure you that those tax authorities will concur with the views in this summary concerning the tax consequences of the purchase, ownership or disposition of our common stock or that any reviewing judicial body in the United States or Ireland would likewise concur.

PROSPECTIVE INVESTORS SHOULD CONSULT THEIR TAX ADVISERS REGARDING THE PARTICULAR TAX CONSEQUENCES OF ACQUIRING, OWNING AND DISPOSING OF SHARES OF OUR COMMON STOCK, INCLUDING THE EFFECT OF ANY FOREIGN, STATE OR LOCAL TAXES.

United States Taxation

The following is a summary of the material US federal income tax consequences generally applicable to US Shareholders (as defined below) who beneficially own shares of our common stock and hold the shares as capital assets. For purposes of this summary, a US Shareholder means a beneficial owner of our common stock that is: (1) an individual who is a citizen or resident of the United States (as defined for US federal income tax purposes); (2) a corporation or other entity created or organised in or under the law of the United States or any of its political subdivisions; (3) an estate whose income is subject to US federal income taxation regardless of its source; or (4) a trust if (i) a court in the United States can exercise primary supervision over the administration of the trust, and one or more United States persons can control all of the substantial decisions of the trust, or (ii) the trust has in effect a valid election to be treated as a United States person for U.S. federal income tax purposes. If a partnership (including for this purpose any entity treated as a partnership for US federal tax purposes) is a beneficial owner of a share of our common stock, the US federal tax treatment of a partner in the partnership generally will depend on the status of the partner and the activities of the partnership. A

Table of Contents

holder of our common stock that is a partnership and partners in that partnership should consult their own tax advisers regarding the US federal income tax consequences of holding and disposing of those shares.

This summary does not comprehensively describe all possible tax issues that could influence a current or prospective US Shareholder's decision to buy or sell shares of our common stock. In particular, this summary does not discuss: (1) the tax treatment of special classes of US Shareholders, like financial institutions, life insurance companies, tax exempt organisations, tax-qualified employer plans and other tax-qualified or qualified accounts, investors liable for the alternative minimum tax, dealers in securities, shareholders who hold shares of our common stock as part of a hedge, straddle or other risk reduction arrangement, or shareholders whose functional currency is not the US dollar; (2) the tax treatment of US Shareholders who own (directly or indirectly by attribution through certain related parties) 10% or more of our voting stock; and (3) the application of other US federal taxes, like the US federal estate tax. The summary is based on the Internal Revenue Code, applicable US Department of Treasury regulations, judicial decisions and administrative rulings and practice, all as of the date of this annual report.

Treatment of ADSs. For US federal income tax purposes, a holder of an ADS is considered the owner of the shares of stock represented by the ADS. Accordingly, except as otherwise noted, references in this summary to ownership of shares of our common stock includes ownership of the shares of our common stock underlying the corresponding ADSs.

Taxation of Distributions. Subject to the passive foreign investment company rules discussed below, the tax treatment of a distribution on shares of our common stock held by a US Shareholder depends on whether the distribution is from our current or accumulated earnings and profits (as determined under US federal income tax principles). To the extent a distribution is from our current or accumulated earnings and profits, a US Shareholder will include the amount of the distribution in gross income as a dividend. To the extent a distribution exceeds our current and accumulated earnings and profits, a US Shareholder will treat the excess first as a non-taxable return of capital to the extent of the US Shareholder's tax basis in those shares and thereafter as capital gain. See the discussion of *Capital Gain Rates* below. Notwithstanding the foregoing described treatment, we do not intend to maintain calculations of our current and accumulated earnings and profits. Dividends received on shares of our common stock will not qualify for the inter-corporate dividends received deduction.

Distributions to US Shareholders that are treated as dividends may be subject to a reduced rate of tax under US tax laws. For taxable income years beginning after 31 December 2012 *qualified dividend income* is generally subject to a maximum rate of 20%. For taxpayers whose taxable income is above this threshold the maximum rate is 20%. *Qualified dividend income* includes dividends received from a *qualified foreign corporation*. A *qualified foreign corporation* includes (1) a foreign corporation that is eligible for the benefits of a comprehensive income tax treaty with the United States that contains an exchange of information program and (2) a foreign corporation that pays dividends with respect to shares of its stock that are readily tradable on an established securities market in the United States. We believe that we are, and will continue to be, a *qualified foreign corporation* and that dividends we pay with respect to our shares will qualify as *qualified dividend income*. To be eligible for the 20% tax rate, a US Shareholder must hold our shares un-hedged for a minimum holding period (generally, 61 days during the 121-day period beginning on the date that is 60 days before the ex-dividend date of the distribution). Although we believe we presently are, and will continue to be, a *qualified foreign corporation*, we cannot guarantee that we will so qualify. For example, we will not constitute a *qualified foreign corporation* if we are classified as a *passive foreign investment company* (discussed below) in either the taxable year of the distribution or the preceding taxable year. In addition, the net investment income (including dividend income) of certain taxpayers are subject to an additional 3.8% tax rate.

Table of Contents

Distributions to US Shareholders that are treated as dividends are generally considered income from sources outside the United States and, for purposes of computing the limitations on foreign tax credits that apply separately to specific categories of income, foreign source passive category income or, in the case of certain holders, general category income. In addition, special rules will apply to determine a US Shareholder's foreign tax credit limitation if a dividend distributed with respect to our shares constitutes qualified dividend income (as described above). See the discussion of Credit of Foreign Taxes Withheld below.

The amount of any distribution we make on shares of our common stock in foreign currency generally will equal the fair market value in US dollars of that foreign currency on the date a US Shareholder receives it. A US Shareholder will have a tax basis in the foreign currency equal to its US dollar value on the date of receipt and will recognise ordinary US source gain or loss when it sells or exchanges the foreign currency. US Shareholders who are individuals will not recognise gain upon selling or exchanging foreign currency if the gain does not exceed US\$200 in a taxable year and the sale or exchange constitutes a personal transaction under the Code. The amount of any distribution we make with respect to shares of our common stock in property other than money will equal the fair market value of that property on the date of distribution.

Credit of Foreign Taxes Withheld. Under certain conditions, including a requirement to hold shares of our common stock un-hedged for a certain period, and subject to limitations, a US Shareholder may claim a credit against the US Shareholder's federal income tax liability for the foreign tax owed and withheld or paid with respect to distributions on our shares. Alternatively, a US Shareholder may deduct the amount of withheld foreign taxes, but only for a year for which the US Shareholder elects to deduct all foreign income taxes. Complex rules determine how and when the foreign tax credit applies, and US Shareholders should consult their tax advisers to determine whether and to what extent they may claim foreign tax credits.

Sale or Other Disposition of Shares. Subject to the passive foreign investment company rules discussed below, a US Shareholder will recognise capital gain or loss on the sale or other taxable disposition of shares of our common stock, equal to the difference between the US Shareholder's adjusted tax basis in the shares sold or disposed of and the amount realised on the sale or disposition. Individual US Shareholders may benefit from lower marginal tax rates on capital gains recognised on shares sold, depending on the US Shareholder's holding period for the shares. See the discussion of Capital Gain Rates below. Capital losses that do not offset capital gains are subject to limitations on deductibility. The gain or loss from the sale or other disposition of shares of our common stock generally will be treated as income from sources within the United States for foreign tax credit purposes, unless the US Shareholder is a US citizen residing outside the United States and certain other conditions are met.

Capital Gain Rates. Effective 1 January 2013, long-term capital gains of certain US individual Shareholders are subject to a maximum rate of 20%. In addition, the net investment income (including long and short-term capital gain income) of certain taxpayers is subject to an additional tax of 3.8%.

Passive Foreign Investment Company Status. Special US federal income tax rules apply to US Shareholders owning capital stock of a PFIC. A foreign corporation will be a PFIC for any taxable year in which 75% or more of its gross income is passive income or in which 50% or more of the average value of its assets is passive assets (generally assets that generate passive income or assets held for the production of passive income). For these purposes, passive income excludes certain interest, dividends or royalties from related parties.

Table of Contents

If we were a PFIC, each US Shareholder would likely face increased tax liabilities upon the sale or other disposition of shares of our common stock or upon receipt of excess distributions, unless the US Shareholder elects (1) to be taxed currently on its pro rata portion of our income, regardless of whether the income was distributed in the form of dividends or otherwise (provided we furnish certain information to our shareholders), or (2) to mark its shares to market by accounting for any difference between the shares' fair market value and adjusted basis at the end of the taxable year by either an inclusion in income or a deduction from income (provided our ADSs, CUFS or common shares satisfy a test for being regularly traded on a qualified exchange or other market). Because of the manner in which we operate our business, we are not, nor do we expect to become, a PFIC.

Controlled Foreign Corporation Status. If more than 50% of either the voting power of all classes of our voting stock or the total value of our stock is owned, directly or indirectly, by citizens or residents of the United States, United States domestic partnerships and corporations or estates or trusts other than foreign estates or trusts, each of which owns 10% or more of the total combined voting power of all classes of our stock entitled to vote, which we refer to as 10-Percent Shareholders, we could be treated as a Controlled Foreign Corporation (CFC), under the Code. This classification would, among other consequences, require 10-Percent Shareholders to include in their gross income their pro rata shares of our Subpart F income (as specifically defined by the Code) and our earnings invested in US property (as specifically defined by the Code).

In addition, gain from the sale or exchange of our common shares by a United States person who is or was a 10-Percent Shareholder at any time during the five-year period ending with the sale or exchange is treated as dividend income to the extent of the earnings and profits attributable to the stock sold or exchanged. Under certain circumstances, a corporate shareholder that directly owns 10% or more of our voting shares may be entitled to an indirect foreign tax credit for income taxes we paid in connection with amounts so characterised as dividends under the Code.

US Federal Income Tax Provisions Applicable to Non-United States Holders. A Non-US Holder means a beneficial owner of our common stock that is (1) a non-resident alien of the United States for US federal income tax purposes; (2) a corporation created or organised in or under the law of a country, or any of its political subdivisions, other than the United States; or (3) an estate or trust that is not a US Shareholder. A Non-US Shareholder generally will not be subject to US federal income taxes, including US withholding taxes, on any dividends paid on our shares or on any gain realised on a sale, exchange or other disposition of the shares unless the dividends or gain is effectively connected with the conduct by the Non-US Shareholder of trade or business in the United States (and is attributable to a permanent establishment or fixed base the Non-US Shareholder maintains in the United States if an applicable income tax treaty so requires as a condition for the Non-US Shareholder to be subject to US taxation on a net income basis on income related to the common stock). A corporate Non-US Shareholder under certain circumstances may also be subject to an additional branch profits tax on that type of income, the rate of which may be reduced pursuant to an applicable income tax treaty. In addition, gain recognised on a sale, exchange or other disposition of our shares by a Non-US Shareholder who is an individual generally will be subject to US federal income taxes if the Non-US Shareholder is present in the United States for 183 days or more in the taxable year in which the sale, exchange or other disposition occurs and certain other conditions are met.

US Information Reporting and Backup Withholding. Dividend payments on shares of our common stock and proceeds from the sale, exchange or redemption of shares of our common stock may be subject to information reporting to the Internal Revenue Service and possible US backup withholding at a current rate of 28%. Backup withholding will not apply to a shareholder who furnishes a correct taxpayer identification number or certificate of foreign status and makes any other required certification or who is otherwise exempt from backup withholding. United States persons who are required to establish their exempt status generally must provide that certification on a properly completed Internal

Table of Contents

Revenue Service Form W-9 (Request for Taxpayer Identification Number and Certification). Non-US Shareholders generally will not be subject to US information reporting or backup withholding. However, Non-US Shareholders may be required to provide certification of non-US status in connection with payments received in the United States or through certain US related financial intermediaries.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a shareholder's US federal income tax liability, and a shareholder may obtain a refund of any excess amounts withheld under the backup withholding rules by filing the appropriate claim for refund with the Internal Revenue Service and furnishing any required information.

Irish Taxation

The following is a summary of the material Irish tax consequences generally applicable to shareholders who invest in shares of our common stock, who are neither tax resident, nor ordinarily resident in, Ireland. This summary does not contain a detailed description of all of the Irish tax consequences for all shareholders, which depend on that shareholder's particular circumstances, and should not be a substitute for advice from an appropriate professional adviser in relation to all of the possible tax issues that could influence a prospective shareholder's decision to acquire shares of our common stock. This summary is based on Irish tax legislation, relevant Irish case law, other Irish Revenue guidance and published opinions and administrative pronouncements of the Irish tax authorities, income tax treaties to which Ireland is a party, and such other authorities as we have considered relevant, all as in effect and available as at the date of this annual report, any of which may change possibly with retroactive effect.

Treatment of ADSs. In general, for Irish tax purposes, an owner of depositary receipts is considered the owner of the shares of stock represented by depositary receipts. Accordingly, except as otherwise noted, references in this section of the annual report to ownership of shares of our common stock includes ownership of the shares underlying the corresponding ADSs.

Irish Dividend Withholding Tax. Distributions made by us to non-Irish resident shareholders will, subject to certain exceptions, be subject to Irish dividend withholding tax at the standard rate of income tax (which is currently 20%) unless you are a shareholder who falls within one of the categories of exempt shareholders referred to below. Where dividend withholding tax applies, we will be responsible for withholding the dividend withholding tax at source. For dividend withholding tax purposes, a dividend includes any distribution made by us to our shareholders, including cash dividends, non-cash dividends and additional shares taken in lieu of a cash dividend.

Dividend withholding tax is not payable where an exemption applies provided that we have received all necessary documentation required by the relevant legislation from our shareholders prior to payment of the dividend.

Certain of our non-Irish tax resident shareholders (both individual and corporate) are entitled to an exemption from dividend withholding tax. In particular, a non-Irish tax resident shareholder is not subject to dividend withholding tax on dividends received from us where the shareholder is:

an individual shareholder resident for tax purposes in either a member state of the EU (apart from Ireland) or in a country with which Ireland has a double tax treaty, and the individual is neither resident nor ordinarily resident in Ireland;

a corporate shareholder not resident for tax purposes in Ireland nor ultimately controlled, directly or indirectly, by persons so resident and which is resident for tax purposes in either a member state of the EU (apart from Ireland) or a country with which Ireland has a double tax treaty;

Table of Contents

a corporate shareholder that is not resident for tax purposes in Ireland and which is ultimately controlled, directly or indirectly, by persons resident in either a member state of the EU (apart from Ireland) or in a country with which Ireland has a double tax treaty;

a corporate shareholder that is not resident for tax purposes in Ireland and whose principal class of shares (or those of its 75% parent) is substantially and regularly traded on a recognised stock exchange in either a member state of the EU (including Ireland where the Company trades only on the Irish stock exchange) or in a country with which Ireland has a double tax treaty or on an exchange approved by the Irish Minister for Finance; or

a corporate shareholder that is not resident for tax purposes in Ireland and is wholly-owned, directly or indirectly, by two or more companies the principal class of shares of each of which is substantially and regularly traded on a recognised stock exchange in either a member state of the EU (including Ireland where the Company trades only on the Irish stock exchange) or in a country with which Ireland has a double tax treaty or on an exchange approved by the Irish Minister for Finance,

and provided that, in all cases noted above, the shareholder has made the appropriate non-resident declaration to us prior to payment of the dividend.

Where the shareholder is not the beneficial owner, we will be required to withhold Irish dividend withholding tax at the standard rate of income tax unless the shareholder is a qualifying intermediary under Irish law and that shareholder has received all necessary documentation required by the relevant legislation, as described above, from the beneficial owner prior to payment of the dividend.

Where our shareholders hold ADSs, they may not be required to submit an appropriate declaration in order to receive dividends without deduction of Irish dividend withholding tax provided their registered address is in the US.

Prior to 31 July 2013 non-resident shareholders who were entitled to an exemption, as outlined above, were generally able to receive dividends without any dividend withholding tax and without the need to complete the aforementioned non-resident declaration forms, pursuant to a waiver we have received from the Irish Revenue authorities.

From 31 July 2013 shareholders must complete and send to us a non-resident declaration form in order to avoid Irish dividend withholding tax. If the appropriate declaration is not made, these shareholders will be liable for Irish dividend withholding tax of 20% on dividends paid by us and may not be entitled to offset this tax. In this case, it will be necessary for shareholders to apply for a refund of the withholding tax directly from the Irish Revenue authorities.

Shareholders that do not fulfil the documentation requirements or otherwise do not qualify for one of the withholding tax exemptions outlined above may be able to claim treaty benefits under a double taxation convention. In this regard, where a double taxation convention is in effect between Ireland and the country of residence of a non-resident shareholder, depending on the terms of that double taxation convention, such a non-resident shareholder may be eligible for a full or partial exemption resulting in a lower dividend withholding tax rate than 20%.

For example, under the US-Ireland Treaty, certain US corporate shareholders owning directly at least 10% of our voting power, are eligible for a reduction in withholding tax to 5% with respect to dividends that we pay, unless the shares of common stock held by such residents form part of the business property of a business carried on through a permanent establishment in Ireland. The same exception applies if the beneficial owner of the shares, being a citizen or resident of the United States, performs

Table of Contents

independent personal services from a fixed base situated in Ireland and the holding of the shares of common stock in respect of which the dividends are paid pertains to such fixed base in Ireland. A shareholder of our common stock, other than an individual, will be ineligible for the benefits of the US-Irish Treaty unless the shareholder satisfies certain tests under the LOB provisions of Article 23 of the US-Ireland Treaty. To prevent so-called dividend stripping, Irish law generally denies the treaty benefit of a reduced dividend withholding tax rate for any dividend paid to a recipient who is not the beneficial owner of the dividend.

Irish Taxes on Income and Capital Gains. Shareholders who are neither tax resident of, nor ordinarily resident in, Ireland should not be subject to any Irish taxes in respect of dividends distributed by us (other than the dividend withholding tax described above) or capital gains realised on the disposition of shares of our common stock unless such shares are used, held or acquired for the purposes of a trade carried on in Ireland through a branch or an agency. An individual who is temporarily a non-resident of Ireland at the time of the disposal may, under anti-avoidance legislation, still be liable to Irish taxation on any chargeable gains realised (subject to the availability of exemptions).

Capital Acquisitions Tax. Irish capital acquisitions tax (CAT) applies to gifts and inheritances. Subject to certain tax-free thresholds (which are determined by the relationship between the donor and successor or donee), gifts and inheritances are liable to tax at the rate of 33%. Gifts and inheritances passing between spouses are exempt from CAT.

Where a gift or inheritance is taken under a disposition made on or after 1 December 1999, it will be within the charge of CAT:

to the extent that the property of which the gift or inheritance consists is situated in Ireland at the date of the gift or inheritance;

where the person making the gift or inheritance is or was resident or ordinarily resident in Ireland at the date of the disposition under which the gift or inheritance is taken; or

where the person receiving the gift or inheritance is resident or ordinarily resident in Ireland at the date of the gift or inheritance.

Please note that the charge to CAT in respect of appointments from a discretionary trust can be different and as a result, specific advice should be taken in this regards.

A non-Irish domiciled individual will not be regarded as resident or ordinarily resident in Ireland for CAT purposes on a particular date unless they are resident or ordinarily resident in Ireland on that date and have been resident in Ireland for the five consecutive tax years immediately preceding the year of assessment in which the date falls.

A gift or inheritance of our common stock will be within the charge of CAT, notwithstanding that the person from whom or by whom the gift or inheritance is received is domiciled or resident outside Ireland.

The Estate Tax Convention between Ireland and the United States generally provides for CAT paid on inheritances in Ireland to be credited against US federal estate tax payable in the United States and for tax paid in the United States to be credited against tax payable in Ireland, based on priority rules set forth in the Estate Tax Convention. The Estate Tax Convention does not apply to CAT paid on gifts. Irish domestic legislation also provides for a general relief from double taxation in respect of gifts and inheritances.

Irish Stamp Duty. Any electronic transfers of shares through the CHESSE or the ADR system will be treated as exempt from stamp duty in Ireland. If a shareholder undertakes an off-market transaction involving a transfer of the underlying shares, this will be subject to Irish stamp duty at a rate of 1% of market value or consideration paid, whichever is greater and will not be able to be registered until duly stamped. An off-market transfer of CUFS will also, where evidenced in writing, be subject to the 1% Irish stamp duty. In addition a conversion of shares into CUFS or ADSs or a conversion of CUFS or ADSs into underlying shares will be liable to 1% Irish stamp duty where the conversion is on a sale or in contemplation of a sale. In each case, payment of this stamp duty will be the responsibility of the person receiving the transfer.

Documents Available for Review

We are subject to the reporting requirements of the Exchange Act applicable to foreign private issuers and in accordance therewith file reports, including annual reports, and other information with the SEC. Such reports and other information have been filed electronically with the SEC since 4 November 2002. The SEC maintains a site on the Internet, at www.sec.gov, which contains reports and other information regarding issuers that file electronically with the SEC. In addition, such reports may be obtained, upon written request, from our company secretary at our Corporate Headquarters in Ireland or our Investor Relations department in Australia. Such reports and other information filed with the SEC prior to November 2002 may be inspected and copied at prescribed rates at the public reference facilities maintained by the SEC at 100 F Street N.E., Washington, D.C. 20549, or obtained by written request to our company secretary. Although, as a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of proxy statements and annual reports to shareholders and the quarterly reporting requirements of the Exchange Act, we:

furnish our shareholders with annual reports containing consolidated financial statements examined by an independent registered public accounting firm; and

furnish quarterly reports for the first three quarters of each fiscal year containing unaudited consolidated financial information in filings with the SEC under Form 6-K.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Cash and cash equivalents include amounts on deposit in banks and cash invested temporarily in various highly liquid financial instruments with original maturities of three months or less when acquired.

We have operations in foreign countries and, as a result, are exposed to foreign currency exchange rate risk inherent in purchases, sales, assets and liabilities denominated in currencies other than the US dollar. We also are exposed to interest rate risk associated with our long-term debt and to changes in prices of commodities we use in production.

Periodically, interest rate swaps, commodity swaps and forward exchange contracts are used to manage market risks and reduce exposure resulting from fluctuations in interest rates, commodity prices and foreign currency exchange rates. Our policy is to enter into derivative instruments solely to mitigate risks in our business and not for trading or speculative purposes.

Foreign Currency Exchange Rate Risk

We have significant operations outside of the United States and, as a result, are exposed to changes in exchange rates which affect our financial position, results of operations and cash flow. In addition,

Table of Contents

payments to AICF are required to be made in Australian dollars which, because the majority of our revenues is produced in US dollars, exposes us to risks associated with fluctuations in the US dollar/Australian dollar exchange rate. See **Risk Factors** in this Section.

For our fiscal year ended 31 March 2014, the following currencies comprised the following percentages of our net sales, expenses and liabilities:

	US\$	A\$	NZ\$	Other ¹
Net sales	73.3%	17.4%	4.2%	5.1%
Expenses ²	62.5%	29.7%	3.2%	4.6%
Liabilities (excluding borrowings) ²	17.1%	81.1%	1.2%	0.5%

For our fiscal year ended 31 March 2013, the following currencies comprised the following percentages of our net sales, expenses and liabilities:

	US\$	A\$	NZ\$	Other ¹
Net sales	69.9%	20.6%	4.2%	5.3%
Expenses ²	62.8%	28.3%	4.1%	4.8%
Liabilities (excluding borrowings) ²	10.9%	86.6%	1.9%	0.6%

¹ Comprised of Philippine Pesos and Euros.

² Liabilities include A\$ denominated asbestos liability, which was initially recorded in the fourth quarter of fiscal year 2006. Expenses include cost of goods sold, selling general and administrative expenses, research and development expenses and adjustments to the asbestos liability. See **Risk Factors**, **Commitment to Provide Funding on a Long-Term Basis in Respect of Asbestos-Related Liabilities of Former Subsidiaries** in this Section, and Note 11 of our consolidated financial statements in Section 2 for further information regarding the asbestos liability.

We purchase raw materials and fixed assets and sell some finished product for amounts denominated in currencies other than the functional currency of the business in which the related transaction is generated. Further, in order to protect against foreign exchange rate movements, we may enter into forward exchange contracts timed to mature when settlement of the underlying transaction is due to occur. As of 31 March 2014 foreign exchange contracts outstanding included contracts to purchase 119.4 million Australian dollars and 17.1 million Euro. The significant forward contract to purchase Australian dollars at 31 March 2014 represents our efforts to hedge against the variation in the Australian dollar between the 21 March 2014 record date of our 125 year anniversary special dividend, and the payment of the dividend on 30 May 2014. Due to the special nature of this dividend, we consider it an off-cycle dividend non-recurring in nature, and thus, not part of our regular dividend cycle.

For further information, see Note 12 Fair Value Measurements, to our consolidated financial statements in Section 2.

Funding Under the AFFA

The A\$ to US\$ assets and liabilities rate moved from 0.9597 as of 31 March 2013 to 1.0845 as of 31 March 2014, a 13.0% movement, resulting in a US\$97.2 million favourable impact on our fiscal year 2014 net income. Assuming that our unfunded net AFFA liability in Australian dollars remains unchanged at A\$1,061.9 million and that we do not hedge this foreign exchange exposure, a 10% movement in the A\$ to US\$ exchange rate (at the 31 March 2014 exchange rate of 1.0845) would have approximately a US\$89.0 million and US\$108.8 million favourable or unfavourable impact, respectively, on our net income.

Table of Contents

For fiscal year 2013, assuming that our unfunded net AFFA liability in Australian dollars remained unchanged at A\$817.3 million and that we did not hedge this foreign exchange exposure, a 10% favourable or unfavourable movement in the A\$ to US\$ exchange rate (at the 31 March 2013 exchange rate of 0.9597) would have had approximately an US\$77.4 million and US\$94.6 million favourable and unfavourable impact, respectively, on our net income.

Interest Rate Risk

We have market risk from changes in interest rates, primarily related to our credit facilities. As of 31 March 2014 and 2013, all of our credit facilities were subject to variable interest rate. The interest rate is calculated two business days prior to the commencement of each draw-down period based on the US\$ London Interbank Offered Rate (LIBOR) plus the margins of the individual lenders and is payable at the end of each draw-down period. From time to time, we may enter into interest rate swap contracts in an effort to mitigate interest rate risk. As of 31 March 2014, we had interest rate swap contracts with a total notional principal of US\$125.0 million and a fair value of US\$1.3 million, which are included in Accounts Payable. For all of these interest rate swap contracts, we have agreed to pay fixed interest rates while receiving the floating interest rate. These contracts were entered into to protect against upward movements in LIBOR and the associated interest the Company pays on its external debt.

At 31 March 2014, we had no amounts outstanding under our credit facilities. However, if we draw-down on the existing credit facilities, we may become exposed to market risk due to changes in the rate at which interest accrues.

At 31 March 2013, we had no amounts outstanding under our credit facilities.

Commodity Price Risk

We are exposed to changes in prices of commodities used in our operations, primarily associated with energy, fuel and raw materials such as pulp and cement. Pulp has historically demonstrated more price sensitivity than other raw materials that we use in our manufacturing process. We expect that pulp prices will rise and that energy, fuel and cement prices will also fluctuate in the near future. To minimise the additional working capital requirements caused by rising prices related to these commodities, we have entered into various contracts that discount pulp prices in relation to pulp indices and purchase our pulp from several qualified suppliers in an attempt to mitigate price increases and supply interruptions. However, if such commodity prices do not continue to rise, our cost of sales may be negatively impacted due to fixed pricing over the longer-term.

We have assessed the market risk for pulp and believe that, a US\$97 per metric ton movement in market pulp prices, which represents approximately 10% of the average NBSK average pulp price relative to our US business for the year ended 31 March 2014, would have had approximately a 1.3% change in our cost of sales in fiscal year 2014. We have also assessed the market risk for cement and believe that, a US\$9 per metric ton price movement in cement prices, which represents approximately 10% of the market cement price at 31 March 2014, would have had approximately a 0.6% change in cost of sales in fiscal year 2014.

For fiscal year 2013, we had assessed the market risk for pulp and believe that, a US\$88 per metric ton movement in market pulp prices, which represented approximately 10% of the average NBSK pulp price relative to our US business for the year ended 31 March 2013, would have had approximately a 0.9% change in our cost of sales in fiscal year 2013. We also assessed the market risk for cement and believe that, a US\$9 per metric ton price movement in cement prices, which represents approximately 10% of the market cement price at 31 March 2013, would have had approximately a 0.5% change in cost of sales in fiscal year 2013.

Table of Contents

AMERICAN DEPOSITARY SHARES

We have listed our securities for trading on the NYSE. We sponsor a program whereby beneficial ownership of five CUSF is represented by one ADS, which is issued by The BNY Mellon. These ADSs trade on the NYSE in the form of ADRs under the symbol JHX. Trading principally takes place between the hours of 9:30 a.m. and 4:00 p.m. Eastern Time on each weekday (excluding US public holidays).

The following is a summary of the fee provisions of our deposit agreement with The Bank of New York Mellon. For more complete information regarding ADRs, the entire deposit agreement should be read. The deposit agreement, as amended, has been filed as an exhibit to this annual report as Exhibit 2.1.

Persons depositing or withdrawing share

or ADS holders must pay:

Taxes and other governmental charges

Registration or transfer fees

Any charges incurred by the depositary or its

agents for servicing the deposited securities

Expenses of the depositary

\$5.00 (or less) per 100 ADSs (or portion of 100

ADSs)

\$0.02 (or less) per ADS (or portion thereof)

If any tax or other governmental charge becomes payable with respect to any security on deposit, such tax or other governmental charge is payable by the ADS holder to the Depositary. The Depositary may refuse to effect any transfer or withdrawal of a deposited security until such payment is made. The Depositary may withhold any dividends or other distributions or may sell for the account of the ADS holder any part or all of the deposited securities, and may apply such dividends, other distributions, or proceeds of any such sale in payment of such tax or other governmental charge and the ADS holder will remain liable for any deficiency.

The Depositary collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The Depositary may collect its annual fee for depositary services by deductions from cash distributions or by directly billing investors or by charging the book-entry system of accounts of participants acting for them. The Depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

For:

As necessary

Transfer and registration of shares on our share register to or from the name of the depositary or its agent when you deposit or withdraw shares

As necessary

Converting foreign currency to US dollars, cable, telex and facsimile transmission expenses (when expressly provided for in the deposit agreement)

Execution and delivery of ADSs, including issuances resulting from a distribution of shares, rights, or other property

Cancellation of ADSs for the purpose of withdrawal, including if the deposit agreement terminates

Cash distributions and depositary services

Table of Contents

BNY Mellon, as Depositary, has agreed to reimburse us for expenses we incur that are related administrative and maintenance expenses of the ADR program. The Depositary has also agreed to pay the standard out-of-pocket maintenance costs for the ADRs, which consist of the expenses of postage and envelopes for mailing annual financial reports, printing and distributing dividend checks, electronic filing of U.S. Federal tax information, mailing required tax forms, stationery, postage, facsimile and telephone calls. It has also agreed to reimburse us annually for certain investor relationship programs or special investor relations promotional activities. There are limits on the amount of expenses for which the Depositary will reimburse us, but the amount of reimbursement available is not necessarily tied to the amount of fees the Depositary collects from investors. For fiscal years ended 31 March 2014 and 2013, the Depositary waived US\$100,132 and US\$121,805, respectively, in fees for standard, out-of-pocket maintenance costs for the administration of the ADR program.

All inquiries and correspondence regarding ADSs should be directed to BNY Mellon, Depositary for our ADSs, at P.O. Box 30170, College Station, TX, 7784-3170. To speak directly to a Bank of New York Mellon representative, please call 1-888-BNY-ADRS (1-888-269-2377) if you are calling from within the United States. If you are calling from outside the US, please call 201-680-6825. You may also send an e-mail inquiry to shrrelations@cpushareownerservices.com or visit the website at www.mybnymdr.com.

Table of Contents**SECTION 4****SHARE/CHESS UNITS OF FOREIGN SECURITIES INFORMATION****James Hardie Industries plc voting rights:**

As of 31 May 2014, James Hardie Industries plc had on issue 445,293,092 CUFS issued over 445,293,092 ordinary shares held by CHESS Depository Nominees Pty Ltd (CDN) on behalf of 10,772 CUFS holders. Each ordinary share carries the right to one vote. CUFS holders can direct CDN how to vote the ordinary shares on a one vote per CUFS basis. Options and RSUs carry no voting rights.

James Hardie Industries plc distribution schedule as at 31 May 2014:

Size of Holding Range	CUFS		Options	
	Holders	Holdings	Holders	Holdings
1-1,000	5,262	2,422,252	-	-
1,001-5,000	4,241	9,845,762	11	24,800
5,001-10,000	730	5,199,887	15	114,711
10,001-100,000	477	11,055,377	22	515,309
100,001 and over	62	416,769,814	1	112,600
Totals	10,772	445,293,092	49	767,420

Based on the closing price of A\$14.33 on 31 May 2014, 252 CUFS holders held less than a marketable parcel.

James Hardie Industries plc substantial CUFS holders as at 31 May 2014:

As of 31 May 2014, all issued and outstanding ordinary shares were listed on the ASX in the form of CUFS. CUFS represent beneficial ownership of our shares. CHESS Depository Nominees Pty Ltd is the registered owner of the shares represented by CUFS. Each of our CUFS represents one share of our common stock.

To our knowledge, the following table identifies those shareholders who beneficially owned 5% or more of our shares based on the holdings reported by the shareholder in its last shareholder notice filed with the ASX and their percentage of shares outstanding based on the number of shares outstanding as of 31 May 2014 which was 445,293,092 shares.

Shareholder	Shares Beneficially Owned	Percentage of Shares Outstanding
FMR LLC and FIL Limited ¹	38,815,173	8.72%
Baillie Gillford & Co ²	31,301,628	7.03%
Lazard Asset Management Pacific Co ³	29,071,990	6.53%
National Australia Bank Limited Group ⁴	28,198,184	6.33%
The Capital Group Companies, Inc. ⁵	27,010,612	6.07%
BlackRock Group ⁶	22,404,258	5.03%

¹ FMR LLC and FIL Limited became a major shareholder on 23 July 2009, with a holding of 34,119,335 shares of our issued share capital and through subsequent sales and purchases, increased its holding to 38,815,173 shares of our issued share capital on 27 March 2014, the last notice received.

Table of Contents

- 2 Baillie Gifford & Co and its affiliated companies most recently became a major shareholder on 12 November 2009 and through subsequent purchases, increased its holding to 31,301,628 shares of our issued share capital on 9 January 2012, the last notice received.
- 3 Lazard Asset Management Pacific Co most recently became a major shareholder on 29 April 2011, and through subsequent purchases and sales, decreased its holding to 29,071,990 shares of our issued share capital on 4 March 2014, the last notice received.
- 4 National Australia Bank Limited Group became a major shareholder on 25 May 2004, and through subsequent purchases and sales, increased its holding to 28,198,184 shares of our issued share capital on 16 June 2004, the last notice received.
- 5 The Capital Group Companies, Inc. became a substantial shareholder on 8 May 2012, and through subsequent purchases and sales, increased its holding to 27,010,612 shares of our issued share capital on 15 January 2013, the last notice received.
- 6 BlackRock Group became a major shareholder on 10 August 2012 with 21,970,820 shares of our issued capital and, through subsequent purchases and sales, ceased to be a major shareholder on 10 September 2012. On 2 October 2012, BlackRock Group increased their holdings to over 5% of our issued share capital, but their substantial holding status again ceased on 2 November 2012. Through subsequent purchases, they became a substantial holder again on 8 November 2012, but ceased their substantial holding status on 4 February 2013. BlackRock Group became a substantial shareholder again on 19 February 2013 but again ceased their substantial holding status on 22 November 2013. Through subsequent purchases, they became a substantial shareholder again on 11 February 2014, but ceased their substantial holding status on 28 February 2014. BlackRock Group became a substantial shareholder again on 13 March 2014, but their substantial holding status again ceased on 17 March 2014. On 24 March 2014, they became a substantial shareholder again through subsequent purchases. However they ceased to be a substantial shareholder on 25 March 2014. Again on 26 March 2014, they became a substantial holder but ceased their substantial holding status on 28 March 2014. Through subsequent purchases, BlackRock Group became a substantial holder on 1 April 2014 but their substantial holding status ceased again on 3 April 2014. BlackRock Group became a substantial shareholder again by increasing its holding to 22,404,258 shares of our issued share capital on 4 April 2014, the last notice received.
- Commonwealth Bank of Australia became a major shareholder on 12 November 2009, with a holding of 21,820,423 shares of our issued share capital and, through subsequent purchases and sales, increased its holdings of our issued capital to 22,887,930 shares on 14 March 2014. Their substantial holding status ceased when their holdings of our issued capital fell below 5% on 14 April 2014, the last notice received.

Schroder Investment Management Australia Limited most recently became a major shareholder on 10 February 2014, holding 22,231,974 of our issued share capital, however, their substantial holding status ceased on 21 February 2014, the last notice received.

The information above is based on filings made by the shareholder with the ASX, generally based on Irish law substantial shareholder notification requirements. The Company has also received notice of the following US securities law filings.

Ownership Reports files with the SEC

On 14 February 2014, FMR LLC and affiliated entities filed a Schedule 13G/A with the SEC reporting beneficial ownership of 50,024,123 shares or approximately 11.278%¹ of our outstanding. On 13 February 2014, Commonwealth Bank of Australia and affiliated entities filed a Schedule 13G with the SEC reporting beneficial ownership of 24,288,843 shares or approximately 5.48%¹ of our outstanding shares. Blackrock, Inc. and affiliated entities filed a Schedule 13G/A with the SEC on 10 December 2013 reporting beneficial ownership of 22,678,684 shares or approximately 4.65%² of our outstanding shares.

¹ Represents beneficial ownership as of 31 December 2013.

² Represents beneficial ownership as of 29 November 2013.

Table of Contents

Each of the above shareholders has the same voting rights as all other holders of our common stock. To our knowledge, except for the major shareholders described above, we are not directly or indirectly owned or controlled by another corporation, by a foreign government or by any other natural or legal persons severally or jointly.

James Hardie Industries plc 20 largest CUFS holders and their holdings as at 31 May 2014:

¹ Entities which hold interests in CUFS solely as a nominee or trustee for another person may have those interests disregarded for the purposes of (i) the substantial share/CUFS holder provisions, and (ii) the takeover provisions in the Articles of Association. Those nominees may hold CUFS for holders which include the substantial shareholders named in the preceding table.

² At 31 May 2014, through its previously announced share buyback program, the Company held interest in 715,000 CUFS, 0.16% of the CUFS outstanding at that date. These have not been included in the table above as they are being held as treasury stock until the end of June 2014 when they will be cancelled, as is customary for the Company.

Table of Contents**Distribution of Issued Capital by Geography:**

The following analysis is based on record ownership and is taken from a Top 100 extract of the share register:

	31 May 2014	31 May 2013
North America	37.14%	31.37%
Australia	34.91%	39.61%
United Kingdom	13.77%	14.31%
Asia	5.13%	4.92%
Europe (excluding the United Kingdom)	2.27%	2.34%
Other	0.60%	0.16%

As of 31 May 2014, 0.33% of the outstanding shares of our common stock was held by 65 CUFs holders with registered addresses in the United States. In addition, as of 31 May 2014, 1.09% of our outstanding shares was represented by ADSs held by three holders, all of whom have registered addresses in the United States. A total of 1.42% of our outstanding capital stock was registered to 68 US holders as of 31 May 2014.

Definitions

Financial Measures Australian equivalent terminology

The Remuneration Report included in Section 1 of this 20-F contains financial measures that are considered to be non-US GAAP, but are consistent with those used by Australian companies. Because the Company prepares its consolidated financial statements in accordance with US GAAP, the following table and definitions listing cross-references each US GAAP financial measure as used in the Company's consolidated financial statements to the equivalent non-US GAAP financial measure, as used in the Remuneration Report:

Consolidated Statements of Operations and Other Comprehensive Income (Loss) (US GAAP)	Remuneration Report (non US GAAP)
Net sales	Net sales
Cost of goods sold	Cost of goods sold
Gross profit	Gross profit
Selling, general and administrative expenses	Selling, general and administrative expenses
Research and development expenses	Research and development expenses
Asbestos adjustments	Asbestos adjustments
Operating income (loss)	EBIT*
Sum of interest expense and interest income	Net interest income (expense)*
Other income (expense)	Other income (expense)
Income (loss) before income taxes	Operating profit (loss) before income taxes*
Income tax (expense) benefit	Income tax (expense) benefit
Net income (loss)	Net operating profit (loss)*

*- Represents non-US GAAP descriptions used by Australian companies.

Operating income and Operating income margin is equivalent to EBIT and EBIT margin

Income before income taxes is equivalent to operating profit before income taxes

Net Income is equivalent to net operating profit

Other Financial Measures

mmsf million square feet, where a square foot is defined as a standard square foot of 5/16" thickness.

msf thousand square feet, where a square foot is defined as a standard square foot of 5/16" thickness.

Table of Contents**Non-GAAP Financial Information Derived from GAAP Measures**

The following tables set forth the reconciliation of our non-GAAP financial measures included in our discussion above to the most directly comparable GAAP financial measure. These non-GAAP financial measures are not prepared in accordance with US GAAP; therefore, the information is not necessarily comparable to other companies' financial information and should be considered as a supplement to, not a substitute for, or superior to, the corresponding measures calculated in accordance with US GAAP.

EBIT and EBIT margin excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability EBIT and EBIT margin excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability are not measures of financial performance under US GAAP and should not be considered to be more meaningful than EBIT and EBIT margin. Management has included these financial measures to provide investors with an alternative method for assessing its operating results in a manner that is focussed on the performance of its ongoing operations and provides useful information regarding its financial condition and results of operations. Management uses these non-US GAAP measures for the same purposes.

(Millions of US dollars)	Fiscal Years Ended 31 March		
	2014	2013	2012
EBIT	\$ 53.1	\$ 29.5	\$ 155.5

EBIT margin excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability	16.9%	13.7%	15.7%

Table of Contents

Operating income excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability operating income excluding asbestos, asset impairments, ASIC expenses and New Zealand product liability is not a measure of financial performance under US GAAP and should not be considered to be more meaningful than operating income. Management has included this financial measure to provide investors with an alternative method for assessing our operating results in a manner that is focussed on the performance of our ongoing operations and provide useful information regarding our financial condition and results of operations. Management uses these non-US GAAP measures for the same purposes.
