PART I**ITEM 1. BUSINESS**

The Gorman-Rupp Company (Registrant , Gorman-Rupp or the Company) was incorporated in Ohio in 1934. The Company designs, manufactures and globally sells pumps and pump systems for use in water, wastewater, construction, dewatering, industrial, petroleum, original equipment, agriculture, fire protection, heating, ventilating and air conditioning (HVAC), military and other liquid-handling applications.

PRODUCTS

The Company operates in one business segment, the manufacture and international sale of pumps and pump systems. The following table sets forth, for the years 2012 through 2014, the total net sales, income before income taxes and year-end total assets (in thousands) of the Company.

| | 2014 | 2013 | 2012 |
|----------------------------|------------|------------|------------|
| Net Sales | \$ 434,925 | \$ 391,665 | \$ 375,691 |
| Income Before Income Taxes | 53,734 | 44,277 | 42,447 |
| Total Assets | 380,904 | 355,638 | 335,183 |

The Company's product line consists of pump models ranging in size from $\frac{1}{4}$ to nearly 15 feet and ranging in rated capacity from less than one gallon per minute to nearly one million gallons per minute. The types of pumps which the Company produces include self-priming centrifugal, standard centrifugal, magnetic drive centrifugal, axial and mixed flow, vertical turbine line shaft, submersible, high pressure booster, rotary gear, diaphragm, bellows and oscillating.

The pumps have drives that range from 1/35 horsepower electric motors up to much larger electric motors or internal combustion engines capable of producing several thousand horsepower. Many of the larger units comprise encased, fully integrated water and wastewater pumping stations. In certain cases, units are designed for the inclusion of customer-supplied drives.

The Company's larger pumps are sold principally for use in the construction, industrial, water and wastewater handling fields; for flood control; for boosting low residential water pressure; for pumping refined petroleum products, including the ground refueling of aircraft; for fluid control in HVAC applications; and for various agricultural purposes.

The Company's pumps are also utilized for dewatering purposes. Additionally, pumps manufactured for fire protection are used for sprinkler back-up systems, fire hydrants, stand pipes, fog systems and deluge systems at hotels, banks, factories, airports, schools, public buildings and hundreds of other types of facilities throughout the world.

Many of the Company's smallest pumps are sold to customers for incorporation into such products as food processing, chemical processing, photo processing, medical and other waste treatment, HVAC equipment, appliances and solar heating.

MARKETING

The Company's pumps are marketed in the United States and worldwide through a network of more than 1,000 distributors, through manufacturers' representatives (for sales to many original equipment manufacturers), through third-party distributor catalogs, and by direct sales. The Company is continuously seeking alliances to further enhance marketing opportunities. Government sales are handled directly by the Company and export sales are made primarily through foreign distributors and representatives.

During 2014, 2013 and 2012, there were no shipments to any single customer that exceeded 10% of total net sales.

Gorman-Rupp continues to actively pursue international business opportunities and, in 2014, shipped its pumps to nearly 150 countries around the world. However, we believe that the Company's foreign operations do not involve material financial or other risks due to their relatively small size, both individually and collectively. No sales made to customers in any one foreign country amounted to more than 5% of total net sales during 2014, 2013 or 2012.

PART I CONTINUED

ITEM 1. BUSINESS CONTINUED

As a result of our active pursuit of international business, approximately \$136.6 million of 2014 sales were shipped outside the United States, as compared to \$134.6 million in 2013 and \$136.5 million in 2012. International sales represented 31%, 34% and 36% of total sales in 2014, 2013 and 2012, respectively. The Company continues its efforts to penetrate international markets principally by its increased global investments and its sales responses to worldwide pumping needs.

COMPETITION

Since the late 1990 s, a number of consolidations have occurred within the highly competitive pump industry. As a consequence, numerous pump competitors now exist as subsidiaries, divisions or departments within significantly larger corporations. Foreign-sourced pumps have also increasingly penetrated into most of the Company s domestic markets.

Gorman-Rupp estimates that approximately 80 other domestic and global companies selling pumps and pump units compete in one or more of the lines of business and applications in which comparable products of the Company are utilized. International competitors are based mostly in Europe and Asia.

Most commercial and industrial pumps are specifically designed and engineered for a particular customer s application. The Company believes that proper application, product performance, and quality of delivery and service are its principal methods of competition, and attributes its success to its continued emphasis in these areas.

PURCHASING AND PRODUCTION

Virtually all materials, supplies, components and accessories used by the Company in the fabrication of its products, including all castings (for which most patterns are made and owned by the Company), structural steel, bar stock, motors, solenoids, engines, seals, and plastic and elastomeric components are purchased by the Company from other suppliers and manufacturers. No purchases are made under long-term contracts and the Company is not dependent upon a single source for any materials, supplies, components or accessories which are of material importance to its business.

The Company purchases motors for its polypropylene bellows pumps and magnetic drive pumps from several alternative vendors; and motor components for its large submersible pumps, and motors and engines for its pump systems, are purchased from a limited number of suppliers. Small motor requirements are also currently sourced from alternative suppliers.

The other production operations of the Company consist of the machining of castings, the cutting, shaping and welding of bar stock and structural members, the design and assembly of electrical control panels, the manufacture of a few minor components, and the assembling, painting and testing of its products. Virtually all of the Company s products are tested prior to shipment.

OTHER ASPECTS

As of December 31, 2014, the Company employed approximately 1,247 persons, of whom approximately 744 were hourly employees. The Company has no collective bargaining agreements, has never experienced a work stoppage and considers its labor relations to be satisfactory.

Although the Company owns a number of patents, and several of them are important to its business, Gorman-Rupp believes that the business of the Company is not materially dependent upon any one or more patents. The Company s patents, trademarks and other intellectual property are adequate for its business purposes.

The backlog of orders at December 31, 2014 was valued at \$160.7 million compared to \$182.2 million at December 31, 2013. Approximately 95% of the Company s backlog of unfilled orders is scheduled to be shipped during 2015, with the remainder principally during the first half of 2016. The decrease in backlog from a year ago reflects record shipments, including \$11.7 million of shipments for the Permanent Canal Closures & Pumps (PCCP) project to supply major flood control pumps to a member of a joint venture construction group for a significant New Orleans flood control project.

PART I CONTINUED

ITEM 1. BUSINESS CONTINUED

Approximately \$43.2 million of the project remain in the December 31, 2014 backlog total. The PCCP project is a fixed-price contract and full government funding has been appropriated for the project. The termination, cancellation and delay provisions within the PCCP project contract are governed by provisions of the Federal Acquisition Regulation (FAR), principally by clauses 52.222-12 (Contract Termination-Debarment), 52.242-14 (Suspension of Work), 52.242-2 Alt. 1 (Production Progress Reports), and 52.249.10 (Default Fixed-Price Construction).

AVAILABLE INFORMATION

The Company maintains a website accessible through its internet address of *www.gormanrupp.com*. Gorman-Rupp makes available free of charge on or through *www.gormanrupp.com* its Annual Report to Shareholders, its annual reports on Form 10-K, its quarterly reports on Form 10-Q, and its current reports on Form 8-K, and any amendments to those reports, as soon as reasonably practicable after those reports (and any amendments) are electronically filed with or furnished to the Securities and Exchange Commission (Commission). However, the information contained on the Company s website is not a part of this Form 10-K or any other report filed with or furnished to the Commission.

As noted in Gorman-Rupp s Annual Report to Shareholders, a paper copy of the Company s Form 10-K is also available free of charge upon written request to the Company s Corporate Secretary.

ITEM 1A. RISK FACTORS

Continuation of current and projected future business environment

The overall pump industry is cyclical in nature, and some of its business activity is related to general business conditions in the durable goods and capital equipment markets. Demand for most of the Company s products and services is affected by the level of new capital investment and planned maintenance expenditures by its customers. The level of such expenditures by our customers depends, in turn, on general economic conditions, availability of credit, economic conditions within their respective industries and expectations of future market behavior. Also, volatility in commodity prices such as oil and agricultural products can negatively affect the level of these activities and can result in postponement of capital spending decisions or the delay or cancellation of existing orders. Additionally, raw material and energy are substantive drivers of costs in the manufacture of pumps and changes of these costs are often unpredictable. While efforts are made to recoup higher production costs through increased prices, the future acceptability of such price increases by customers is not guaranteed due to the highly competitive market place.

Compliance with, and costs related to, a variety of import and export laws and regulations

The Company is subject to a variety of laws regarding international operations, including regulations issued by the U.S. Department of Commerce Bureau of Industry and Security and various foreign governmental agencies. Actual or alleged violations of import-export laws could result in enforcement actions and financial penalties. The Company cannot predict the nature, scope or effect of future regulatory requirements to which our international operations and trading practices might be subject or the manner in which existing laws might be administered or interpreted. Future regulations could limit the countries in which certain of our products may be manufactured or sold or could restrict our access to, and increase the cost of obtaining, products from foreign sources.

International operations exposure to fluctuations in foreign currency exchange rates

Approximately 10% of the Company s revenue and certain of its costs, assets and liabilities, are denominated in currencies other than the U.S. dollar. The primary currencies to which the Company has exposure are the Canadian Dollar, the Euro and the South African Rand. Devaluations of these currencies can reduce the value of the Company s local monetary assets, reduce the U.S. dollar value of its local cash flow, and generate local currency losses that may reduce the U.S. dollar value

PART I CONTINUED

ITEM 1A. RISK FACTORS CONTINUED

of future local net income. Historically these exchange rate fluctuations have not materially affected our financial condition, results of operations or cash flows.

Environmental compliance costs and liabilities

The Company's operations and properties are subject to numerous, and increasing, domestic and foreign environmental laws and regulations which can impose operating and financial sanctions for violations. Moreover, environmental and sustainability initiatives, practices, rules and regulations are under increasing scrutiny of both governmental and non-governmental bodies and may require changes in operational practices, standards and expectations and in turn increase the Company's compliance costs. Periodically, the Company has incurred, and expects to continue to incur, operating and capital costs to comply with environmental requirements. The Company monitors its environmental responsibilities, together with trends in the related laws, and believes it is in substantial compliance with current regulations. The Company believes that reasonably anticipated future environmental compliance expenditures will not have a material adverse effect on our financial condition, results of operations or cash flows.

Defined benefit pension plan settlement expense

The Company sponsors a defined benefit pension plan covering most domestic employees and accrues amounts for funding of its obligations under the plan. The defined benefit pension plan allows eligible retiring employees to receive a lump-sum distribution for benefits earned in lieu of annual payments and most retirees elect this option. Under applicable accounting rules, if the lump-sum distributions made for a plan year exceed an actuarially-determined threshold of the total of the service cost and interest cost for the plan year, the Company at such point would need to recognize for that year's results of operations a settlement expense for the resulting unrecognized actuarial loss. The Company has been required to make such adjustments in some prior years and, if such non-cash adjustments are necessary in future periods, they may be comparably adverse to the Company's operating results.

Family ownership of common equity

A substantial percentage of the Company's Common Shares is held by various members of the Gorman and Rupp families and their affiliates. These family holdings do not typically trade; therefore, the Common Shares, in part because of these circumstances, generally have a history of relatively low volume trading experiences on the NYSE MKT Exchange.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company's corporate headquarters are located in Mansfield, Ohio. The production operations of the Company are conducted at several locations throughout the United States and other countries as set forth below. The Company is a lessee under a number of operating leases for certain real properties, none of which is material to its operations.

The Company owns facilities in Sparks, Nevada and Dallas, Texas comprising training centers and warehouses, and leases a warehouse and training facility in Bangkok, Thailand. In addition, the Company leases warehouse facilities in Jebel Ali, Dubai and Leeuwarden, The Netherlands.

ITEM 3. LEGAL PROCEEDINGS

For more than ten years, numerous business entities in the pump and fluid-handling industries, as well as a multitude of companies in many other industries, have been targeted in a series of lawsuits in several jurisdictions by various individuals seeking redress to claimed injury as a result of the entities' alleged use of asbestos in their products. The Company and one of its subsidiaries remain drawn into this mass-scaled litigation, typically as one of many co-defendants in a particular proceeding; the majority of these cases are against Patterson Pump Company. The allegations in the lawsuits involving the Company and/or Patterson Pumps Company are vague, general and speculative, and most cases have not advanced beyond the early stage of discovery. Insurers of the Company have engaged legal counsel to represent the Company and its subsidiaries and to protect their interests. In certain situations, the plaintiffs have voluntarily dismissed the Company and/or Patterson Pump Company from some of the lawsuits after the plaintiffs have acknowledged that there is no basis for their claims. In other situations, the Company and/or Patterson Pump Company have been dismissed from some of the lawsuits as a result of court rulings in favor of motions to dismiss and/or motions for summary judgment. In one hundred cases the Company has entered into nominal economic settlements recommended for payment by its insurers, coupled with dismissal of the lawsuits.

In addition, the Company and/or its subsidiaries are parties in a small number of legal proceedings arising in the ordinary course of business. Management does not currently believe that these proceedings, or the industry-wide asbestos litigation, will materially impact the Company's consolidated results of operations, liquidity or financial condition.

On May 22, 1997, the Company's Board of Directors adopted a Non-Employee Directors' Compensation Plan, which was amended and restated on July 24, 2014 (the Plan). This Plan became effective without shareholder approval and constitutes the Company's only equity compensation plan. The Plan provides for share compensation for regular services performed by each of the Company's non-employee Directors. In addition to cash compensation, non-employee Directors receive an award of Common Shares (from the Company's treasury) on each July 1. The Plan expires on the earliest of (i) May 21, 2017, (ii) at such time as all of the Company's Common Shares authorized for award under the Plan and registered under Form S-8 Registration Statement No. 333-30159 shall have been awarded and issued, (iii) at such time as the Company deregisters any Common Shares not issued under the foregoing Registration Statement, or (iv) at such time as the Plan is terminated by action of the Board of Directors. The number of Common Shares which may be awarded under the Plan cannot exceed 50,000, subject to certain conditions (e.g., stock splits, stock dividends).

As of December 31, 2014, 65,500 Common Shares had been issued to non-employee Directors and 20,132 Common Shares remained available for future issuance (6,875 Common Shares were added as a result of the 5 for 4 stock split effective September 10, 2004; 7,093 Common Shares were added as a result of the 5 for 4 stock split effective December 8, 2006; 8,117 Common Shares were added as a result of the 5 for 4 stock split effective December 10, 2007; 8,021 were added as a result of the 5 for 4 stock split effective June 10, 2011; and 5,526 Common Shares were added as a result of the 5 for 4 stock split effective December 10, 2013). No options, warrants or rights are available for issuance under the Plan.
