REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Administrative Benefits Committee

of Dominion Resources, Inc. and the Participants

of the Dominion Salaried Savings Plan

Richmond, Virginia

We have audited the accompanying statements of net assets available for benefits of Dominion Salaried Savings Plan (the Plan) as of December 31, 2014 and 2013, and the related statement of changes in net assets available for benefits for the year ended December 31, 2014. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2014 and 2013, and the changes in net assets available for benefits for the year ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America.

The supplemental schedules listed in the Table of Contents have been subjected to audit procedures performed in conjunction with the audit of the Plan's financial statements. The supplemental schedules are the responsibility of the Plan's management. Our audit procedures included determining whether the supplemental schedules reconcile to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplemental schedules. In forming our opinion on the supplemental schedules, we evaluated whether the supplemental schedules, including their form and content, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. In our opinion, such schedules are fairly stated, in all material respects, in relation to the financial statements as a whole.

DOMINION SALARIED SAVINGS PLAN

NOTES TO FINANCIAL STATEMENTS

AS OF DECEMBER 31, 2014 AND 2013, AND FOR THE YEAR ENDED DECEMBER 31, 2014

1. DESCRIPTION OF PLAN

The following description of the Dominion Salaried Savings Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

- a. **General** The Plan is a defined contribution plan covering all salaried employees and certain hourly employees of Dominion Resources, Inc. and its subsidiaries (the Participating Companies) (see Note 1.d.) who are 18 years of age or older, regular full-time or part-time employees and are scheduled to work at least 1,000 hours per year. Dominion Resources, Inc. (Dominion or the Company) is the designated Plan sponsor. The Plan administrator is Dominion Resources Services, Inc., a subsidiary of Dominion. Effective January 1, 2013, The Northern Trust Company (Northern Trust) succeeded The Bank of New York Mellon (BNY Mellon) as the trustee of the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).
- b. **Contributions** Participants may contribute not less than 2% and not more than 50% of their eligible earnings, all of which may be on a tax-deferred basis, or up to 20% on an after-tax basis. Employee contributions are subject to certain Internal Revenue Code (IRC) limitations. Depending on a participant's hire date, years of service, and the percentage of tax-deferred and after-tax contributions, Participating Companies contribute a matching amount from 1% up to 7% of the participant's eligible earnings depending upon plan entry date.
- c. **Participant Accounts** Individual accounts are maintained for each Plan participant. Each participant's account includes the effect of the participant's contributions and withdrawals, as applicable, and allocations of the Participating Companies' contributions, Plan earnings or losses, and administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the vested portion of the participant's account. Individual participant accounts invested in the Dominion Stock Fund, the Common Collective Trust Funds and the separately managed accounts are maintained on a unit value basis. Participants do not have beneficial ownership in specific underlying securities or other assets in the various funds, but have an interest therein represented by units valued as of the last business day of the period. The various funds earn dividends and interest, which are automatically reinvested within the funds except for the Dominion Stock Fund. See Note 1.j. *Flexible Dividend Options* for more information about dividends on the Dominion Stock Fund. Generally, contributions to and withdrawal payments from each fund are converted to units by dividing the amounts of such transactions by the unit values as last determined,

and the participants' accounts are charged or credited with the number of units properly attributable to each participant.

- d. **Participants** Any subsidiary of Dominion may adopt the Plan for the benefit of its qualified salaried and certain hourly employees subject to approval of the Dominion Board of Directors.
- e. **Vesting** Participants become immediately vested in their own contributions and the earnings on these amounts. Participants generally become vested in the Participating Companies' matching contributions and related earnings after three years of service.
- f. **Forfeited Accounts** At December 31, 2014 and 2013, forfeited nonvested accounts totaled \$193,034 and \$222,459, respectively. During the year ended December 31, 2014, \$266,815 of forfeited nonvested accounts was used to reduce employer contributions.

g. ***Investment Options***

Participant Contributions Upon enrollment in the Plan, a participant may direct his or her contributions in any option in 1% increments totaling to 100%. Changes in investment options may be made at any time and participant investment election changes become effective with the subsequent pay period. However, if the participant has not made investment directions at the time the contribution is made, the participant contributions will be automatically invested in the Target Date Retirement Trust corresponding with the participant's age (assuming retirement at age 65). The Plan provides for employee contributions to be invested in the following:

i Mutual Fund:
International Equity Fund⁽⁷⁾

- (1) The Dominion Stock Fund invests primarily in Dominion common stock.
- (2) See *Plan Interest in Master Trust* in Note 5 for details about the related investment strategies.
- (3) These Funds do not have any unfunded commitments, and do not have any applicable liquidation periods or defined terms/periods to be held. The Plan may generally sell assets from the Trusts to satisfy participant payment obligations (assets are redeemable daily) and may transfer assets from the Trusts to other investment options based on participant elections (overnight liquidity is generally available).
- (4) The Target Retirement Income Trust is designed for investors with an intermediate-term investment horizon (at least three to five years) who are seeking a high level of current income. Normal investment mix includes 70% bonds and 30% stocks.
- (5) These Target Date Retirement Trusts are designed for investors seeking to retire between 2013 and 2032 and to provide for a reasonable level of income and long-term growth of capital and income. Normal investment mix: 2015 Trust I 47% bonds and 53% stocks; 2020 Trust I 38% bonds and 62% stocks; 2025 Trust I 31% bonds and 69% stocks; and 2030 Trust I 23% bonds and 77% stocks.
- (6) These Target Date Retirement Trusts are designed for investors seeking to retire between 2033 and 2057, and who seek long- term growth of capital and income. Normal investment mix: 2035 Trust I 16% bonds and 84% stocks; and 2040 Trust I, 2045 Trust I, 2050 Trust I and 2055 Trust I 10% bonds and 90% stocks.
- (7) The International Equity Fund invests in a diverse group of strong, undervalued companies which the investment manager believes exhibit growing earnings based primarily in Europe and the Pacific Basin, ranging from small firms to large corporations.

Table of Contents

Employer Contributions Participating Companies' matching contributions are deposited in accordance with the participant's investment directions, or the Target Date Retirement Trust corresponding with the participant's age (assuming retirement at age 65) if the participant has not made investment directions at the time the contribution is made.

- h. ***Participant Loans*** Participants are eligible to secure loans against their plan account with a maximum repayment period of 5 years. The minimum loan amount is \$1,000 and the maximum loan amount is the lesser of:

50% of the vested account balance, or

\$50,000 (reduced by the maximum outstanding loan balance during the prior 12 months)

The loans are interest-bearing at the prime rate of interest plus 1%. The rate is determined at the beginning of each month if a change has occurred in the prime rate. However, the rate is fixed at the inception of the loan for the life of the loan.

Participants make principal and interest payments to the Plan through payroll deductions. Any defaults in loans result in a reclassification of the remaining loan balances as taxable distributions to the participants.

- i. ***Payment of Benefits*** On termination of service, a participant may elect to receive either a lump sum amount equal to the value of the participant's vested interest in his or her account, or defer the payment to a future time no later than the year in which the participant attains age 70 1/2. If the participant retires from the Company, he or she may elect to receive installment payments. There were no amounts payable to participants at December 31, 2014 or 2013.
- j. ***Flexible Dividend Options*** Participants are given the choice of (1) receiving cash dividends paid on vested shares held in their Dominion Stock Fund or (2) reinvesting the dividends in the Dominion Stock Fund.
- k. ***Plan Changes*** In April 2014, the Small Cap Value Fund's underlying assets were sold and the units of the Russell 2000 Value Index Fund were purchased within the Master Trust. Northern Trust replaced Lee Munder Capital Group as the fund's investment manager. The passively managed approach for the Russell 2000 Value Index Fund resulted in lower annual management fees.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- a. ***Basis of Accounting*** The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).
- b. ***Use of Estimates*** The preparation of financial statements in conformity with GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of net assets available for

benefits, and changes therein. Actual results could differ from those estimates.

- c. ***Risks and Uncertainties*** The Plan utilizes various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate, credit and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such change could materially affect the value of the participants' account balances and the amounts reported in the financial statements.
- d. ***Valuation of Investments*** The Plan's investments are stated at fair value. See Note 6 for further information on fair value measurements. Investment contracts held by a defined contribution plan are required to be reported at fair value; however, contract value is the relevant measurement attribute for that portion of the net assets available for benefits that is attributable to fully benefit-responsive investment contracts. Contract value is the amount Plan participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan's interest in the Master Trust includes a separately managed Stable Value Fund that is

Table of Contents

considered to be fully benefit-responsive. The Plan interest in the Master Trust is included at fair value in participant-directed investments in the statements of net assets available for benefits and an additional line item is presented representing the adjustment from fair value to contract value. The statement of changes in net assets available for benefits is prepared using the contract value basis. See Note 5 for further information.

- e. ***Notes Receivable from Participants*** Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are recorded as distributions based on the terms of the Plan document.

- f. ***Investment Income*** Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividend income is recognized on the ex-dividend date.

Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Net investment income from Common Collective trust fund and mutual fund holdings includes dividend income and realized and unrealized appreciation (depreciation).

Management fees and operating expenses charged to the Plan for investments in Common Collective trust funds and mutual funds are deducted from income earned on a daily basis and are not separately reflected. Consequently, management fees and operating expenses are reflected as a reduction of investment return for such investments.

- g. ***Administrative Expenses*** As permitted by law, the reasonable administrative costs of the Plan are paid from the Plan's Trust. Dominion pays any administrative costs that are not charged to the Plan. In addition, participants who elect to participate in a financial advisory program offered by the Plan will have administrative fees deducted from their account.
- h. ***Payment of Benefits*** Distributions from the Plan are recorded when a participant's valid withdrawal request is distributed by the recordkeeper.
- i. ***Transfers*** In addition to the Plan, Dominion also sponsors several other savings plans for employees of Dominion and certain of its subsidiaries which do not participate in this Plan. If participants change employment among Dominion and its covered subsidiaries during the year, their account balances are transferred into the corresponding plan. For the year ended December 31, 2014, the Plan transferred \$170,311 and \$6,786,019 of participants' assets to and from other plans, respectively.
- j. ***Excess Contributions Payable*** The Plan is required to return to Plan participants any contributions received during the Plan year in excess of the IRC limits. There were no excess contributions payable at December 31, 2014 and 2013.

3. INVESTMENTS

The Plan's investments that represented 5% or more of the Plan's net assets available for benefits as of December 31, 2014 and 2013 are as follows:

	December 31, 2014	December 31, 2013
Dominion Stock Fund:		
Participant-directed 12,398,827 and 12,514,385 units, respectively	\$ 953,469,796	\$ 809,555,586

4. NONPARTICIPANT-DIRECTED INVESTMENTS

Prior to 2008, Participating Companies' matching contributions were deposited in the Dominion Stock Fund and were designated as nonparticipant-directed investments. Participants may transfer 100% of the value of their nonparticipant-directed Dominion Stock Fund investments at any time. Upon transfer, such investments are considered participant-directed.

Information about net assets and the significant components of changes in net assets relating to nonparticipant-directed investments as of December 31, 2014 and 2013, and for the year ended December 31, 2014, is as follows:

5. PLAN INTEREST IN MASTER TRUST

The Plan's investments in the Stable Value Fund, the Large Cap Value Fund, the Large Cap Growth Fund, the Russell 2000 Value Index Fund, the Russell 2000 Growth Index Fund, the Real Estate Fund, the Intermediate Bond Fund, the S&P 500 Index Fund and the Extended Equity Market Index Fund are held in a Master Trust that was established for the investment of assets for the Plan and other employee benefit plans of Dominion and its subsidiaries. In April 2014, the Small Cap Value Fund's underlying assets were sold and the units of the Russell 2000 Value Index Fund were purchased within the Master Trust. Northern Trust held the assets of the Master Trust as of December 31, 2014.

Stable Value Fund As of December 31, 2014 and 2013, the Plan's interest in the net assets of the Fund was approximately 75% and 76%, respectively. Investment income and administrative expenses relating to the Fund are allocated to the individual plans based upon average monthly balances invested by each plan. The Fund invests primarily in cash equivalents and two types of synthetic guaranteed investment contracts (GICs) described below, which are stated at fair value and then adjusted to contract value. The fair value of synthetic GICs is based on quoted market prices and a fair value estimate of the wrapper contract. Fair market value of the wrapper is estimated by Standish Mellon, the Fund's investment manager, using an internal model. Contract value represents contributions made to the fund, plus earnings, less participant withdrawals and administrative expenses.

- (1) **Fixed Maturity Synthetic Guaranteed Investment Contracts** General fixed maturity synthetic GICs consist of an asset or collection of assets that are owned by the Master Trust and a benefit-responsive, book value wrap contract purchased for its portfolio. The wrap contract provides book value accounting for the asset, so that book value, benefit-responsive payments would be made for participant directed withdrawals. The crediting rate of the contract is set at the start of the contract and typically resets every quarter. Generally, fixed maturity synthetic GICs are held to maturity. The crediting rate aims at converging the book value of the contract and the market value of the underlying portfolio over the duration of the contract and therefore will be affected by movements in interest rates and/or changes in the market value of the underlying

portfolio. The initial crediting rate is established based on the market interest rates at the time the initial asset is purchased and the contract will have an interest crediting rate not less than 0%. The remaining fixed maturity synthetic GICs matured in 2014.

Variable synthetic GICs consist of an asset or collection of assets that are managed by a bank or insurance company and are held in a bankruptcy remote vehicle for the benefit of the Fund. The contract is benefit-responsive and provides next day liquidity at book value. The crediting rate on this product resets every quarter based on the then current market index rates and an investment spread. The investment spread is established at time of issuance and is guaranteed by the issuer for the life of the investment.

Table of Contents

- (2) *Constant Duration Synthetic Guaranteed Investment Contracts* Constant duration synthetic GICs consist of a portfolio of securities owned by the Master Trust and a benefit-responsive, book value wrap contract purchased for its portfolio. As of December 31, 2014 and 2013, the portfolio of securities includes 1-3 Year Credit Bond Index Fund, 1-3 Year Government Bond Index Fund, Asset-Backed Securities Index Fund, Commercial Mortgage-Backed Securities Index Fund, Government Bond Index Fund, Credit Bond Index Fund and Mortgage-Backed Securities Index Fund. The redemption frequency of the Funds is daily liquidity. The wrap contract amortizes gains and losses of the underlying securities over the portfolio duration, so that book value, benefit-responsive payments will be made for participant directed withdrawals. The crediting rate on a constant duration synthetic GIC resets every quarter based on the book value of the contract, the market yield of the underlying assets, the market value of the underlying assets and the average duration of the underlying assets. The crediting rate aims at converging the book value of the contract and the market value of the underlying portfolio over the duration of the contract and therefore will be affected by movements in interest rates and/or changes in the market value of the underlying portfolio. The initial crediting rate is established based on the market interest rates at the time the underlying portfolio is first put together and the contract will have an interest crediting rate of not less than 0%.

The following are the investment strategies for each portfolio of securities:

1-3 Year Credit Bond Index Fund Each 1-3 Year Credit Bond Index Fund shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the returns of the short-term sector of the United States fixed income market as defined by the Barclays U.S. 1-3 Year Credit Index.

1-3 Year Government Bond Index Fund Each 1-3 Year Government Bond Index Fund shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the returns of the short-term sector of the United States fixed income market as defined by the Barclays 1-3 Year Government Bond Index.

Asset-Backed Securities Index Fund Each Asset-Backed Securities Index Fund shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the total rate of return of the Barclays Aggregate Asset-Backed Securities Index.

Commercial Mortgage-Backed Securities Index Fund Each Commercial Mortgage-Backed Securities Index Fund shall be invested and reinvested primarily in mortgage-backed securities collateralized by loans which are secured by income-producing commercial real estate with the objective of approximating as closely as practicable the total rate of return of that portion of the Barclays Commercial Mortgage-Backed Securities Index which is included in the Barclays Aggregate Bond Index.

Government Bond Index Fund Each Government Bond Index Fund shall be invested and reinvested primarily in a portfolio of debt securities with the objective of approximating as closely as practicable the total rate of return for all outstanding United States Treasury government bonds as defined by the

Barclays Government Bond Index. The investment manager, in its discretion, may divide such a Collective Fund into an intermediate-term division consisting of United States government bonds with maturities between one and ten years and a long-term division consisting of United States government bonds with maturities greater than ten years. Each of these divisions shall be accounted for as separate Collective Funds.

Credit Bond Index Fund Each Credit Bond Index Fund shall be invested and reinvested primarily in debt securities with the objective of approximating as closely as practicable the total rate of return of the United States market for all outstanding investment grade corporate bonds as defined by the Barclays Credit Bond Index. The investment manager, in its discretion, may divide such a Collective Fund into an intermediate-term division consisting of corporate bonds with maturities between one and ten years and a long-term division consisting of corporate bonds with maturities greater than ten years. Each of these divisions shall be accounted for as separate Collective Funds.

Table of Contents

Mortgage-Backed Securities Index Fund Each Mortgage-Backed Securities Index Fund shall be invested and reinvested primarily in mortgage-backed securities with the objective of approximating as closely as practicable the total rate of return of the Barclays Mortgage-Backed Securities Index. Certain Plan-initiated events, such as plan termination, bankruptcy and mergers, may limit the ability of the Plan to transact at contract value. In general, issuers may terminate the contracts and settle at other than contract value if the qualification status of the Plan changes, there is a breach of material obligations under the contract and misrepresentation by the contract holder, or the underlying portfolio fails to conform to the pre-established investment guidelines. The Plan Sponsor does not believe that any events that may limit the ability of the Plan to transact at contract value are probable.

6. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. Fair values are based on assumptions that market participants would use when pricing an asset or liability, including assumptions about risk and the risks inherent in valuation techniques and the inputs to valuations. Fair value measurements assume that the transaction occurs in the principal market for the asset or liability (the market with the most volume and activity for the asset or liability from the perspective of the reporting entity), or in the absence of a principal market, the most advantageous market for the asset or liability (the market in which the reporting entity would be able to maximize the amount received or minimize the amount paid). The Plan applies fair value measurements to the Plan's investments in accordance with the requirements described above.

Inputs and Assumptions

The Plan maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring the fair value of its investments. Fair value is based on actively-quoted market prices, if available. In the absence of actively-quoted market prices, the Plan seeks price information from external sources, including broker quotes. When evaluating pricing information provided by brokers, the Plan considers whether the broker is willing and able to trade at the quoted price, if the broker quotes are based on an active market or an inactive market and the extent to which brokers are utilizing a particular model if pricing is not readily available. If pricing information from external sources is not available, or if the Plan believes that observable pricing is not indicative of fair value, judgment is required to develop the estimates of fair value. In those cases, the Plan must estimate prices based on available historical and near-term future price information and certain statistical methods that reflect market assumptions.

Table of Contents

The inputs and assumptions used in measuring fair value for investments include the following:

- Û Quoted securities prices and indices
- Û Securities trading information including volume and restrictions
- Û Maturity
- Û Interest rates
- Û Credit quality

The Plan regularly evaluates and validates the inputs used to estimate fair value by a number of methods, including review and verification of models, as well as various market price verification procedures such as the use of multiple broker quotes to support the market price of the various investments in which the Plan transacts.

The Plan's investments are stated at fair value. Mutual funds are valued at quoted market prices, which represent the value of shares held by the Plan at year-end. Investment in the Dominion Stock Fund is stated at fair value, which has been determined by the custodian based on the fair value of the underlying investments within the fund. The Dominion Stock Fund is a unitized fund specific to the Plan and other employee benefit plans of Dominion and its subsidiaries, and is made up of Dominion common stock and a money market fund. Common Collective Trust Funds are stated at fair value as determined by the issuer of the Common Collective Trust Funds based on the fair value of the underlying investments.

Levels

The Plan utilizes the following fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- a. *Level 1* Quoted prices (unadjusted) in active markets for identical assets that the Plan has the ability to access at the measurement date.
- b. *Level 2* Inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for the asset, including quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets, inputs other than quoted prices that are observable for the asset, and inputs that are derived from observable market data by correlation or other means.
- c. *Level 3* Unobservable inputs for the asset, including situations where there is little, if any, market activity for the asset.

The fair value hierarchy gives the highest priority to quoted prices in active markets (Level 1) and the lowest priority to unobservable data (Level 3). In some cases, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. In these cases, the lowest level input that is significant to a fair value measurement in its entirety determines the applicable level in the fair value hierarchy. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset.

The wrapper contracts related to GICs in the Stable Value fund, held in the Master Trust, represent a Level 3 fair value measurement due to the use of significant unobservable inputs, including the models used to measure their fair value. The Level 3 amounts are not material, therefore additional Level 3 disclosures are not included in this report.

The Plan recognizes transfers among Level 1, Level 2 and Level 3 based on fair values as of the first day of the month in which the transfer occurs. Transfers out of Level 3 represent assets that were previously classified as Level 3 for which the inputs became observable for classification in either Level 1 or Level 2.

(1) As discussed in Note 5, the Plan's interest in the net assets of the Master Trust at December 31, 2014 and 2013 was as follows: Stable Value Fund (75% for 2014 and 76% for 2013), Large Cap Value Fund (90% for both periods),

Large Cap Growth Fund (84% for 2014 and 83% for 2013), Small Cap Value Fund (84% for 2013), Russell 2000 Value Index Fund (85% for 2014), Russell 2000 Growth Index Fund (86% for both periods), Real Estate Fund (86% for 2014 and 84% for 2013), Intermediate Bond Fund (82% for 2014 and 83% for 2013), S&P 500 Index Fund (84% for both periods) and Extended Equity Market Index Fund (87% for both periods).

- (2) In April 2014, the Small Cap Value Fund's underlying assets were sold and the units of the Russell 2000 Value Index Fund were purchased within the Master Trust.

Table of Contents**7. FEDERAL INCOME TAX STATUS**

The Plan is a qualified employees' profit sharing trust under Section 401(k) of the IRC and, as such, is exempt from federal income taxes under Section 501(a). Pursuant to Section 402(a) of the IRC, a participant is not taxed on the income and pre-tax contributions allocated to the participant's account until such time as the participant or the participant's beneficiaries receive distributions from the Plan.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service (IRS). The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014 and 2013, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions. The Plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2011.

The Plan obtained its latest determination letter on February 20, 2014, in which the IRS stated that the Plan, as then designed, was in compliance with the applicable requirements of the IRC. The Plan has been amended since applying for the determination letter; however, the Plan administrator believes that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

8. EXEMPT PARTY-IN-INTEREST TRANSACTIONS

As of December 31, 2014, the Plan had an interest in the Master Trust and invested in shares of certain Common Collective Trusts that were managed by Northern Trust. At that date, Northern Trust was the trustee as defined by the Plan and, therefore, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan for investment management services were included as a reduction of the return earned on each investment fund.

At December 31, 2014 and 2013, the Plan's investment in the Dominion Stock Fund included 12,398,827 and 13,024,147 shares, respectively, of common stock of Dominion, the Plan sponsor, with a cost basis of approximately \$558 million and \$536 million, respectively. During the year ended December 31, 2014, the Plan recorded dividend income related to Dominion common stock of approximately \$31 million.

Table of Contents**10. PLAN TERMINATION**

Although they have not expressed any intention to do so, the Participating Companies have the right under the Plan to discontinue their contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event of any termination of the Plan, or upon complete or partial discontinuance of contributions, the accounts of each affected participant shall become fully vested.

11. SUBSEQUENT EVENTS

Effective June 30, 2015, Dominion will make several changes to the investment options in the Plan that are designed to provide participants with greater opportunities to diversify their investments and to realign funds with overlapping risk/return profiles.

From		To		
Fund Name	Fund Manager	Fund Name	Fund Manager	Fund Strategy
Large Cap Value Fund	Herndon Capital Management	S&P 500 Index Fund	Northern Trust Global Investments	To replicate the S&P 500 Index

(1) Effective July 1, 2015, the Extended Equity Fund will be renamed the Small/Mid Cap Equity Index Fund in order to have the fund's name better reflect the fund's investment focus. The Fund will continue to be managed by Northern Trust Global Investments.

Effective July 1, 2015, Dominion announced four new funds will be added to the investment options in the Plan providing opportunities for additional diversification:

Fund Name	Fund Manager	Fund Strategy
Emerging Markets Equity Fund	Van Eck Associates	The fund is a mutual fund that invests in stocks listed on the stock exchanges of emerging countries that are expected to have strong economic growth over the longer term.
International Bond Fund	Pacific Investment Management Company LLC	The fund is a mutual fund that invests primarily in non-U.S. fixed income securities issued by investment grade issuers.
1 to 3 Year Bond Fund	Northern Trust Global Investments	The fund is a mutual fund that invests primarily in bonds issued in the U.S. with maturities of three years or less. As a general rule, the fund's investments are expected to be in high quality bonds.
Multi-Asset Class Inflation Managed Fund	Neuberger Berman	The fund is a mutual fund that seeks to provide long term real returns (i.e., returns above inflation) across various markets, especially during stable and/or rising inflationary periods.
