### 3. Impairment ( Devaluation ) of Securities

Securities other than Trading Securities (excluding Securities for which it is deemed to be extremely difficult to determine the fair value) are devalued to the fair value, and the difference between the acquisition cost and the fair value is treated as the loss for the period (impairment (devaluation)), if the fair value (primarily the closing market price at the consolidated balance sheet date) has significantly deteriorated compared with the acquisition cost (including amortized cost), and unless it is deemed that there is a possibility of a recovery in the fair value. The amount of impairment (devaluation) for the period was ¥993 million.

The criteria for determining whether a security's fair value has significantly deteriorated are outlined as follows:

Securities whose fair value is 50% or less of the acquisition cost

Securities whose fair value exceeds 50% but is 70% or less of the acquisition cost and the quoted market price maintains a certain level or lower.
