(1) Domestic corporate bond credit ratings are generally defined to indicate the following:

Subject instrument	Credit rating	Definition
	AAA	Strongest capacity for timely repayment.
	AA+/AA/AA-	Very strong capacity for timely repayment. This capacity may, nevertheless, be slightly inferior than is the case for the highest rating category
Corporate bonds	A+/A/A-	Strong capacity for timely repayment. This capacity may, nevertheless, be more vulnerable to adverse changes in circumstances or in economic conditions than is the case for higher rating categories.

Edgar Filing: LG Display Co., Ltd. - Form 6-K

BBB+/BBB/BBB-	Capacity for timely repayment is adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity.
BB+/BB/BB-	Capacity for timely repayment is currently adequate, but that there are some speculative characteristics that make the repayment uncertain over time.
B+/B/B-	Lack of adequate capacity for repayment and speculative characteristics. Interest payment in time of unfavorable economic conditions is uncertain.
CCC	Lack of capacity for even current repayment and high risk of default.
CC	Greater uncertainties than higher ratings.
C	High credit risk and lack of capacity for timely repayment.
D	Insolvency.

- (3) Cash dividend yield is the percentage that is derived by dividing cash dividend by the arithmetic average of the daily closing prices of our common shares during the one-week period ending two trading days prior to the closing of the register of shareholders for the purpose of determining the shareholders entitled to receive annual dividends.

Table of Contents**2. Business****A. Business overview**

We were incorporated in February 1985 under the laws of the Republic of Korea. LG Electronics and LG Semicon transferred their respective LCD business to us in 1998, and since then, our business has been focused on the research, development, manufacture and sale of display panels, applying technologies such as TFT-LCD and OLED.

As of September 30, 2016, in order to support our business activities, we operated TFT-LCD and OLED production and research facilities in Paju and Gumi in Korea, and we have also established subsidiaries in the Americas, Europe and Asia.

As of September 30, 2016, our business consisted of the manufacture and sale of display and display related products utilizing TFT-LCD, OLED and other technologies under a single reporting business segment.

2016 Q1~Q3 consolidated operating results highlights

2016 Q1~Q3	(Unit: In billions of Won)
	Display business
Sales Revenue	18,568
Gross Profit	2,176
Operating Profit	407

B. Industry**(1) Industry characteristics and growth potential**

The entry barriers to manufacture display panels are relatively high due to the technology and capital intensive nature of the mass manufacturing process that is required to achieve economies of scale, among other factors.

While growth in the market for displays used in notebook computer, monitor and other traditional IT products has stagnated or declined, the market for small- and medium-sized displays (including those used in smartphones) in the rapidly evolving IT environment has shown steady growth. The display market for televisions has also shown steady growth mainly due to growing demand from developing countries as well as from consumers in general for larger sized display panels. As for displays used in industrial, automobile and other value added products, we expect to see growth in these markets.

(2) Cyclicalities

The display panel business is highly cyclical and sensitive to fluctuations in the general economy. The industry experiences recurring volatility caused by imbalances between supply and demand due to capacity expansion and changing production utilization rates within the industry.

Macroeconomic factors and other causes of business cycles can affect the rate of growth in demand for display panels. Accordingly, if supply exceeds demand, average selling prices of display panels may decrease. Conversely, if growth in demand outpaces growth in supply, average selling prices may increase.

(3) Market conditions

Overall, while there have been some variations in rates of production capacity growth among individual display panel manufacturers, display panel manufacturers have generally slowed their respective rates of production capacity growth since 2011 due to a slowdown in growth of the display panel industry.

Table of Contents

Most display panel manufacturers are located in Asia.

- a. Korea: LG Display, Samsung Display, etc.
- b. Taiwan: AU Optronics, Innolux, CPT, HannStar, etc.
- c. Japan: Japan Display, Sharp, Panasonic LCD, etc.
- d. China: BOE, CSOT, CEC Panda, etc.

(4) Market shares

Our worldwide market share of large-sized display panels (i.e., panels that are 9 inches or larger) based on revenue is as follows:

	2016 Q1~Q3	2015	2014
Panels for Televisions ⁽¹⁾	27.8%	25.4%	25.0%
Panels for Monitors	37.1%	39.0%	32.7%
Panels for Notebook Computers	27.2%	27.3%	27.5%
Panels for Tablet Computers	22.4%	22.5%	27.0%
Total	29.1%	27.7%	26.9%

Source: Large-Area Display Market Tracker (IHS Technology)

(1) Includes panels for public displays.

(5) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, timely investments, adaptable production capabilities, development of new and premium products through technological advances, competitive production costs, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.

In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.

A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.

As a leading technology innovator in the display industry, we continue to focus on delivering differentiated value to our customers by developing various technologies and products, including display panels with OLED, IPS, in-TOUCH and other technologies. With respect to OLED panels, following our supply of the world's first 55-inch OLED 3D panels for televisions in January 2013, we have supplied ultra-high definition (Ultra HD) OLED panels for televisions, flexible plastic OLED panels for smartphones, round OLED panels for wearable devices among others and have shown that we are technologically a step ahead of the competition. With respect to TFT-LCD panels, we are leading the market with our differentiated products with IPS technology, such as our ultra-large and high definition Ultra HD television panels and 21:9 screen aspect ratio ultra-wide IPS curved monitors, and have prepared our production facilities to produce products with in-TOUCH technology.

Table of Contents

Moreover, we entered into long-term sales contracts with major global firms to secure customers and expand partnerships for technology development.

C. New businesses

For our continued growth, we are actively exploring and preparing for new business opportunities that may arise in the changing market environment. As such, we are continually reviewing and looking at opportunities in the display and promising new industries.

3. Major Products and Raw Materials

A. Major products

We manufacture TFT-LCD and OLED panels, of which a significant majority is sold overseas.

(Unit: In billions of Won, except percentages)

Display	Product/ Service/ Other sales	Display panel (Overseas ⁽¹⁾)	Panels for notebook computers, monitors, televisions, smartphones, tablets, etc.	LG Display	17,143 (92.3%)
		Display panel (Korea ⁽¹⁾)	Panels for notebook computers, monitors, televisions, smartphones, tablets, etc.	LG Display	1,425 (7.7%)
Total					18,568 (100.0%)

Period: January 1, 2016 ~ September 30, 2016.

(1) Based on ship-to-party.

B. Average selling price trend of major products

The average selling price of LCD panels per square meter of net display area shipped in the third quarter of 2016 increased by approximately 10% from the second quarter of 2016, largely as a result of an increase in the overall average selling prices of panels, particularly large-sized panels, as well as changes in our product mix, while average selling prices of LCD panels exhibited varying trends according to demand by product category. There is no assurance that the average selling prices of LCD panels will not fluctuate in the future due to changes in market conditions.

Description	(Unit: US\$ / m ²)			
	2016 Q3	2016 Q2	2016 Q1	2015 Q4
Display panel ⁽¹⁾⁽²⁾	555	504	525	632

- (1) Quarterly average selling price per square meter of net display area shipped.
(2) Excludes semi-finished products in the cell process.

C. Major raw materials

Prices of major raw materials depend on fluctuations in supply and demand in the market as well as on change in size and quantity of raw materials due to the increased production of large-sized panels.

4. Production and Equipment

A. Production capacity and output

(1) Production capacity

The table below sets forth the production capacity of our Gumi, Paju, Guangzhou and Ochang facilities in the periods indicated.

(Unit: 1,000 glass sheets)

Business area	Items	Location of facilities	2016 Q1~Q3 ⁽¹⁾	2015 ⁽²⁾	2014 ⁽²⁾
Display	Display panel	Gumi, Paju, Guangzhou, Ochang	7,576	9,781	9,573

(1) Calculated based on the maximum monthly input capacity (based on glass input substrate size for eighth generation glass sheets) during the period multiplied by the number of months in the period (i.e., 9 months).

(2) Calculated based on the maximum monthly input capacity (based on glass input substrate size for eighth generation glass sheets) during the year multiplied by the number of months in a year (i.e., 12 months).

(2) Production output

The table below sets forth the production output of our Gumi, Paju, Guangzhou and Ochang facilities in the periods indicated.

(Unit: 1,000 glass sheets)

Business area	Items	Location of facilities	2016 Q1~Q3	2015	2014
Display	Display panel	Gumi, Paju, Guangzhou, Ochang	6,667	8,609	8,425

Based on glass input substrate size for eighth generation glass sheets.

B. Production performance and utilization ratio

(Unit: Hours, except percentages)

Production facilities	Available working hours in 2016 Q1~Q3	Actual working hours in 2016 Q1~Q3	Average utilization ratio
Gumi	6,576 ⁽¹⁾ (274 days) ⁽²⁾	6,412 ⁽¹⁾ (267 days) ⁽²⁾	97.5%
Paju	6,576 ⁽¹⁾ (274 days) ⁽²⁾	6,552 ⁽¹⁾ (273 days) ⁽²⁾	99.6%

Ochang	6,576 ⁽¹⁾ (274 days) ⁽²⁾	5,736 ⁽¹⁾ (239 days) ⁽²⁾	87.2%

(1) Based on the assumption that all 24 hours in a day have been fully utilized.

(2) Number of days is calculated by averaging the number of working days for each facility.

Table of Contents

C. Investment plan

In 2015, our total capital expenditures on a cash out basis was ₩2.4 trillion. In 2016, we currently expect that our total capital expenditures on a cash out basis will be higher than in 2015, in order to fund the construction of our P10 fabrication facility in Paju, Korea and expansion of our OLED panel production capacities, while maintaining and making improvements to our existing facilities. Such amount is subject to change depending on business conditions and market environment.

5. Sales

A. Sales performance

Business area	Sales types	Items (Market)	(Unit: In billions of Won)			
			2016 Q1~Q3	2015	2014	
Display	Products, etc.	Display panel	Overseas ⁽¹⁾	17,143	26,166	23,847
			Korea ⁽¹⁾	1,425	2,218	2,608
			Total	18,568	28,384	26,456

(1) Based on ship-to-party.

B. Sales route and sales method

(1) Sales organization

As of September 30, 2016, each of our television, IT, mobile and OLED businesses had individual sales and customer support functions.

Sales subsidiaries in the United States, Germany, Japan, Taiwan, China and Singapore perform sales activities and provide local technical support to customers.

(2) Sales route

Sales of our products take place through one of the following two routes:

LG Display HQ and overseas manufacturing subsidiaries g Overseas sales subsidiaries (USA/Germany/Japan/Taiwan/China/Singapore), etc. g System integrators and end-brand customers g End users

LG Display HQ and overseas manufacturing subsidiaries g System integrators and end-brand customers g
End users

(3) Sales methods and sales terms

Direct sales and sales through overseas subsidiaries, etc. Sales terms are subject to change depending on the fluctuation in the supply and demand of LCD panels.

(4) Sales strategy

As part of our sales strategy, we have secured stable sales to major personal computer manufacturers and leading consumer electronics manufacturers globally, led the television market with our OLED and other market leading television panels, increased the proportion of sales of our differentiated television panels, such as our Ultra HD and large television panels, in our product mix and strengthened sales of high-resolution, IPS, narrow bezel and other high-end display panels in the monitor, notebook computer and tablet markets.

Table of Contents

In the smartphone, commercial (including interactive whiteboards and video wall displays), industrial products (including aviation and medical equipment) and automobile displays segment, we have continued to build a strong and diversified business portfolio by expanding our business with customers with a global reach on the strength of our differentiated products applying IPS, plastic OLED, high-resolution, high-reliability, Super Narrow bezel, in-TOUCH and other technologies.

(5) Purchase orders

Customers generally place purchase orders with us one month prior to delivery. Our customary practice for procuring orders from our customers and delivering our products to such customers is as follows:

Receive order from customer (overseas sales subsidiaries, etc.) g Headquarter is notified g Manufacture product g Ship product (overseas sales subsidiaries, etc.) g Sell product (overseas sales subsidiaries, etc.)

6. Market Risks and Risk Management

A. Market risks

The display industry continues to experience continued declines in the average selling prices of TFT-LCD and OLED panels irrespective of cyclical fluctuations in the industry, and our margins would be adversely impacted if prices decrease faster than we are able to reduce our costs.

The display industry is highly competitive. We have experienced pressure on the prices and margins of our major products due largely to additional industry capacity from panel manufacturers in Korea, Taiwan, China and Japan coupled with changes in the production mix of such manufacturers. Our main competitors in the industry include Samsung Display, AU Optronics, Innolux, Sharp, BOE, CSOT, Japan Display, CPT, HannStar, Panasonic LCD and CEC Panda.

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, timely investments, adaptable production capabilities, utilization of differentiated technologies in product development, success or failure of our end-brand customers in marketing their brands and products, component and raw material supply costs, and general economic and industry conditions. We cannot provide assurance that we will be able to compete successfully with our competitors on these fronts and, as a result, we may be unable to sustain our current market position.

Our results of operations are subject to exchange rate fluctuations. To the extent that we incur costs in one currency and generate sales in a different currency, our profit margins may be affected by changes in the exchange rates between the two currencies. Our sales of display panels are denominated mainly in U.S. dollars, whereas our foreign currency denominated purchases of raw materials are denominated mainly in U.S. dollars and Japanese Yen. Seeking to achieve stable management, we take every precaution in our foreign currency risk management to minimize the risk of foreign currency fluctuations on our foreign currency denominated assets and liabilities.

B. Risk management

As the average selling prices of TFT-LCD and OLED panels can continue to decline over time irrespective of industry-wide cyclical fluctuations, we may find it hard to manage risks associated with certain factors that are outside our control. However, we counteract such declines in average selling prices by increasing the proportion of high value added panels in our product mix while also implementing various cost reduction measures. In addition, in order to manage our risk against foreign currency fluctuations, we continually monitor our currency position and risk, and when needed, we may from time to time enter into cross-currency interest rate swap contracts and foreign currency forward contracts.

Table of Contents

7. Derivative Contracts

A. Currency risks

We are exposed to currency risks on sales, purchases and borrowings that are denominated in currencies other than in Won, our functional currency. These currencies are primarily the U.S. dollar, the Japanese Yen and the Chinese Yuan.

Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by our underlying operations, primarily in Won, the U.S. dollar and the Chinese Yuan.

In respect of other monetary assets and liabilities denominated in foreign currencies, we ensure that our net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates, when necessary, to address short-term imbalances.

As of September 30, 2016, we have entered into an aggregate of US\$200 million in Won/US\$ forward foreign exchange contracts with Crédit Agricole and NongHyup Bank, for which we have not applied hedge accounting.

We recognized a loss on valuation of derivative instruments in the amount of ₩10,261 million with respect to currency derivative instruments held as of September 30, 2016.

B. Interest rate risks

Our exposure to interest rate risks relates primarily to our floating rate long term loan obligations. We have established and are managing interest rate risk policies to minimize uncertainty and costs associated with interest rate fluctuations by monitoring cyclical interest rate fluctuations and enacting countermeasures.

As of September 30, 2016, we have entered into an aggregate of ₩350 billion in interest rate swap agreements with Shinhan Bank and NongHyup Bank, for which we have not applied hedge accounting.

We recognized a loss on valuation of derivative instruments in the amount of ₩2,454 million with respect to interest rate derivative instruments held as of September 30, 2016.

8. Major contracts

Our material contracts, other than contracts entered into in the ordinary course of business, are set forth below:

Type of agreement	Name of party	Term	Content
Technology licensing agreement	Semiconductor Energy Laboratory	October 2005 ~	Patent licensing of LCD and OLED related technology
	Hewlett-Packard	January 2011 ~	Patent licensing of semi-conductor device technology

A. Summary of R&D-related expenditures

		(Unit: In millions of Won, except percentages)		
Items		2016 Q1~Q3	2015	2014
Material Cost		503,123	679,603	762,008
Labor Cost		370,486	510,455	542,857
Depreciation Expense		107,167	196,799	249,306
Others		95,572	159,983	233,422
Total R&D-Related Expenditures		1,076,348	1,546,840	1,787,593
	Selling & Administrative Expenses	653,749	995,336	987,594
Accounting Treatment ⁽¹⁾	Manufacturing Cost	177,144	324,437	532,918
	Development Cost (Intangible Assets)	245,455	227,067	267,081
	R&D-Related Expenditures / Revenue Ratio (Total R&D-Related Expenditures ÷ Revenue for the period × 100)	5.8%	5.4%	6.8%

- (1) For accounting treatment purposes, selling & administrative expenses are presented as research and development expenses in our statements of comprehensive income, net of amortization of capitalized intangible asset development costs, and the amounts for 2014 and 2015 have been restated.

B. R&D achievements

Achievements in 2014

- (1) Developed the world's first green plus structure television panel products (42-inch, 49-inch and 55-inch Ultra HD)

Added white pixels to increase transmittance by 55% compared to conventional display panels

Developed energy conservation technology for Ultra HD products

- (2)

Developed the world's narrowest, at the time, bezel (BtB 3.5 mm) videowall product (55-inch Full HD (FHD))

The world's narrowest, at the time, bezel (BtB 3.5 mm) videowall product

Reduced panel PAD parts and minimized bezel size

- (3) Developed our first 79-inch Ultra HD product

New size in our product lineup

Achieved narrow bezel (On 9.9 mm) and slim depth (13.9 mm)

- (4) Developed the world's first four-sided borderless like product (49-inch, 55-inch and 60-inch FHD)

Removed front case top and narrowed gap between the panel and front deco cabinet (set side reduced from 2.0 mm to 0.5 mm)

- (5) Developed the world's first a-Si AF-IPS 5Mask panel product for smartphones (5.0 WVGA)

Reduced production cost and simplified manufacturing process by reducing the number of mask steps from 6 to 5

Same level of performance as 6Mask panels

- (6) Developed the world's first Low Temperature Polycrystalline Silicon (LTPS) Advanced High Performance IPS (AH-IPS) photo alignment and negative LC panel product for smartphones (5.0-inch FHD)

LTPS AH-IPS photo alignment and negative LC panel product for smartphones developed in March 2014

Improved luminance and contrast ratio through improvement in panel transmittance (450 nit to 515 nit; 1,000:1 to 1500:1).

Table of Contents

- (7) Developed the world's first 23.8-inch FHD ultra slim and light monitor product

Achieved ultra-light design (reduced LCM weight from 2,270g to 1,280g compared to conventional LCMs)

Achieved ultra slim design by using slim component parts (7.6t reduced to 5.5t)

- (8) Developed LTPS AH-IPS Quad HD (QHD) smartphone product (5.5-inch QHD, 538 ppi, LG Electronics G3 model smartphone)

LTPS AH-IPS QHD smartphone product developed in April 2014

Width of panel bezel: 0.95 mm (L/R); luminance: 500 nit; G1F Touch Direct Bonded LCM

- (9) Developed our first curved Ultra HD product (65-inch and 55-inch Ultra HD)

The curved LCM retains the same panel transmissivity as a conventional flat LCM through application of BM-less COT structure with a double pigment lamination

Realized curved LCM technology by applying Frame (Horizontal / Vertical / Center) Structure and Curved C/T & Guide Panel Technologies

- (10) Developed the world's first 6-inch plastic OLED product

Developed the world's first curved display with a curvature radius (R) of 700

Precursor to the development of future bendable, foldable and rollable display products

- (11) Developed the world's first 34-inch curved monitor product (3,800R)

Launched the world's first blade type 21:9 screen aspect ratio 34-inch wide QHD 3,800R curved monitor product and created a new market and standard for curved monitor products

Achieved curvature of 3,800R by using annealing process and setting up assembly equipment utilizing 0.4t glass for curved panels and pol edge type curved backlight

- (12) Developed the world's first AH-IPS FHD Gate in Panel (GIP)/Double Rate Driving (DRD) product (15.6-inch notebook product)

The world's first AH-IPS FHD (more than 142 ppi) GIP/DRD product developed in September 2014

Increased cost competitiveness by developing GIP/DRD technology

- (13) Developed the world's first in-TOUCH LTPS smartphone product (4.5-inch HD product)

Completed development of an AH-IPS LTPS product applying LG Display's own in-cell touch technology, which utilizes the AH-IPS Vcom electrodes in an all point sensing self-capacitive manner in July 2014 (450 nit luminance; L/R panel bezel of 1.00 mm; module thickness of 2.28 mm)

Simplified SCM and provided a cost competitive and differentiated valued product with touch functionality

- (14) Developed the world's first in-TOUCH a-Si smartphone product (4.5-inch WVGA product)

Completed development of an AH-IPS a-Si product applying LG Display's own in-cell touch technology, which utilizes the AH-IPS Vcom electrodes in an all point sensing self-capacitive manner in August 2014 (450 nit luminance; L/R panel bezel of 1.35 mm; module thickness of 2.6 mm)

Simplified SCM and provided a cost competitive and differentiated valued product with touch functionality

- (15) Developed the world's first Ultra HD+ curved (6,000R) product (105-inch Ultra HD)

The world's first large 105-inch 21:9 screen aspect ratio Ultra HD curved (6,000R) display product

- (16) Developed our first 98-inch Ultra HD product

Our new line of 98-inch Ultra HD products

Achieved ultra-high definition through utilizing the direct BLU local dimming and FCIC circuit compensation algorithm.

- (17)

Edgar Filing: LG Display Co., Ltd. - Form 6-K

Developed four-sided product with even bezels (5.9 mm) for commercial use (42-inch, 49-inch and 55-inch FHD product)

Developed our first four-sided even bezel product (off bezel: 5.9 mm)

Reduced panel PAD and lower bezel thickness

Improved PAC transmittance and after image reliability

Table of Contents

(18) Developed our first 60-inch Ultra HD product

Our new line of 60-inch Ultra HD products

Achieved narrow panel bezel of 7.8 mm

(19) Developed the world's first circular plastic OLED product (1.3 f)

Developed the world's first circular plastic OLED product in September 2014

Developed ultrathin display module of 559 μm (without cover window)

Lowered power consumption by developing Power Save Mode algorithm

Display can be turned on without powering the P-IC

(20) Developed the world's first four-sided borderless OLED television product (55-inch)

Product developed using the world's first four-sided borderless technology utilizing reverse tab bonding manufacturing process in September 2014

(21) Developed the world's first ultra-slim OLED television products (49-inch, 55-inch and 65-inch Ultra HD)

Achieved LCM thickness of 7.5 mm

Reduced thickness by combining exterior set with LCM parts (B/cover, M/cabinet)

(22) Developed the world's first 1:1 screen aspect ratio New Platform Monitor (26.5-inch; 1920 x 1920 resolution)

Creation of new market through the development of new 1:1 screen aspect ratio platform display

Development of high resolution display with four-sided even bezels (on bezel: 8 mm)

- (23) Development of 14-inch FHD notebook product with three sided even bezels (3.9 mm)

World's first notebook panel with three sided narrow bezels (top and side bezels: 3.9 mm)

Reduced GIP area by 50% compared to conventional GIP area

- (24) Development of 12.3-inch new display size UXGA tablet product

Developed new display panel size for tablet products: 12.3-inch UXGA (4:3 screen aspect ratio)

Increased yield of glass panel area per glass substrate by cutting glass substrates at 12.3 inches

Achievements in 2015

- (1) Developed the world's narrowest, at the time, module bezel (0.7mm) LTPS smartphone display (5.3-inch FHD in-TOUCH)

Developed the world's first FHD in-TOUCH display (LTPS 5.3-inch FHD) applying the Neo Edge module process (new manufacturing technology) in January 2015

Set-up glue & laser cutting process, 0.6mm panel bezel (L/R)

- (2) Developed the world's first QHD in-TOUCH LTPS smartphone display (5.5-inch QHD)

Developed LTPS 5.5-inch QHD display applying LG Display's new capacitive type in-cell touch technology with all points sensing in March 2015; luminance: 500nit, contrast ratio: 1500:1 (using photo alignment & negative LC), 0.95mm panel bezel (L/R)

Delivered differentiated value proposition based on touch performance, simplified SCM process and competitive cost innovation

- (3) Developed the world's narrowest, at the time, bezel videowall product (49-inch FHD)

Developed the world's narrowest bezel videowall product (bezel to bezel 3.5mm)

Optimized sizing of panel PAD and mechanical bezel

- (4) Developed our first 43-inch Ultra HD slim and light LED television product

Achieved LCD module thickness of 8.4mm

Reduced thickness through publication of set LCM parts (back cover and middle cabinet)

Table of Contents

- (5) Developed the world's first Ultra HD OLED television product (55-inch, 65-inch and 77-inch Ultra HD)

Developed the world's first Ultra HD television product lineup

- (6) Developed the world's first Ultra HD television product applying DRD technology (55-inch, 49-inch and 43-inch Ultra HD)

World's first application of Ultra HD DRD technology based on an RGBW(M+) pixel structure

Utilized RGBW(M+) technology to optimize picture quality (high definition, high luminance, low energy consumption and High Dynamic Range (HDR))

- (7) Developed our first Ultra HD asymmetric RGBW(M+) structure product (15.6-inch)

Improved panel transmittance, lowered energy consumption and enhanced outdoor visibility compared to previous models

- (8) Developed the world's first second display LTPS smartphone product (5.7-inch QHD+)

Delivered differentiated set design through the realization of a second display by applying a panel exterior manufacturing process

Developed panel and instrumental optics technology for the independent operation of main display and second display

Developed advanced power consumption technology for the realization of Always On Display functionality for the second display

- (9) Developed the world's first four-sided borderless monitor product (23.8-inch FHD and 27-inch QHD)

Developed the world's first four-sided borderless design LCD module

Improved design by reducing lower bezel size from 12.6mm to 6.15mm (23.8-inch FHD)

(10) Developed the world's first in-TOUCH notebook product (15.6-inch and 14-inch FHD)

Improved touch functionality and cost competitiveness through world's first application of in-TOUCH technology on notebook products

Simplified customer supply chain management by providing touch total solution

(11) Developed the world's first 15.6-inch FHD notebook narrow bezel (2.9mm) product

Ultra-light and narrow concept project for 15.6-inch line extension to LG Electronics 13.3-inch and 14-inch Gram products

Delivered differentiated design utilizing 2.9mm bezels (Top/L/R)

Ultra slim and light design (225g, 2.3t)

(12) Developed 1900R curved monitor product (34-inch, 21:9 screen aspect ratio)

Strengthened product competitiveness by improving the curvature radius of 21:9 screen aspect ratio monitors (3800 reduced to 1900R)

Applied 0.25T etching to address looseness and backlight bleeding attributable to curved screen

Applied COT structure to enhance panel transmittance and address color mixing defects

(13) Developed the world's first four-sided borderless 55-inch Ultra HD LED television product

Developed panel reverse structure in order to deliver a four-sided borderless product

Table of Contents

(14) Developed the world's first a-Si 98-inch Quad Ultra HD 120Hz television product

Developed the world's first drive technology for a-Si based extra-large 8K 120Hz panels

(15) Developed the world's first 65-inch 8K M+ product

Achieved cost competitiveness and maximized 8K transmittance by applying GIP/Source single bank for the first time in the world

Developed super resolution (4K enhanced to 8K) and M+ algorithm technologies

(16) Developed our first 75-inch Ultra HD Signage product

Delivered 11.9mm thickness on large-size LCD module

Achievements in 2016

(1) Developed the world's narrowest, at the time, bezel videowall product (55-inch FHD, bezel to bezel 1.8mm)

Delivered 0.9mm even bezel, four-sided borderless product (bezel to bezel 1.8mm)

(2) Developed the world's first ultra-stretch format display product (86-inch, 58:9 screen aspect ratio)

Developed new display panel size and screen aspect ratio (86-inch, 58:9 screen aspect ratio)

Applied next-generation stain (per pixel) offset technology

(3) Developed the world's first ultra-large display product utilizing data single bank and GIP technology (86-inch Ultra HD)

Achieved cost-competitiveness by developing world's first ultra-large display product utilizing data single bank and GIP technology

(4) Developed the world's first in-TOUCH monitor product (23-inch)

Improved touch functionality and strengthened cost-competitiveness by applying the world's first in-TOUCH technology to monitor display products

Table of Contents

Simplified customer software configuration management by providing touch total solution

- (5) Developed ultra-slim OLED television display product applying high dynamic range (65-inch, 800 nit luminance, 2.52 mm module thickness)

Applied high dynamic range (HDR) technology to achieve 800 nit peak luminance and improved display quality

Achieved module thickness of 2.52mm (without back cover) and 5.92mm (with back cover)

- (6) Developed combined 5.3-inch QHD in-TOUCH + 3D cover glass product for LG Electronics

Developed world class smart phone product (G5) through collaboration with other LG Group companies

Strengthened competitiveness of design by achieving processability and productivity for 0.4t 3D cover glass

Improved power consumption of AoD Mode from Self Font Generation technology and operation optimization

- (7) Developed the world's first large-scale outdoor high luminance 3000 nit product (75-inch Ultra HD)

Developed the world's first large-scale outdoor 75-inch Ultra HD, high luminance 3000 nit product

Achieved cost competitiveness and power consumption reduction through utilization of high transmittance M+ panel

- (8) Developed the world's first FHD/Ultra HD multi-input Interactive Whiteboard product (75-inch Ultra HD)

Strengthened product competitiveness through delivery of customer FHD/Ultra HD selective input functionality

- (9) Developed our first 4.9mm depth Art Slim2 Ultra HD television (55-inch Ultra HD)

Strengthened design competitiveness through delivery of ultra-slim product with application of Glass Light Guide Plate

- (10) Developed the world's largest 21:9 screen aspect ratio curved monitor (37.5-inch UltraWide Quad HD (WQHD)+)

Continued pioneering of the market with the world's largest 21:9 screen aspect ratio IPS curved monitor lineup (37.5-inch, 2300R curvature radius, 44mm curvature depth)

Established flagship line through application of new high definition technology (WQHD+, 3840 x 1600 resolution)

Improved panel transmittance and backlight bleeding through our first-time application of a Super-IPS COT panel structure to monitor models

- (11) Developed the world's first in-TOUCH GIP/DRD notebook product (15.6-inch FHD)

Strengthened competitiveness through application of GIP/DRD technology to FHD-quality notebook in-TOUCH products

- (12) Developed the world's narrowest, at the time, bezel (BtB 1.8mm) videowall product (49-inch FHD)

Achieved 0.9mm even bezel, four-sided borderless design

- (13) Developed a transparent 32-inch FHD product

Achieved high transmittance of transparent panel through application of RGBW(M+) panel technology

- (14) Developed the world's first Light Absorption Polarizer (LAP) product (65-inch/60-inch Ultra HD)

Developed differentiated wide color gamut solution

- (15) Developed the world's first UHD DRD product (50-inch UHD)

Utilized UHD RGBW(M+) pixel structure-based DRD technology to strengthen product competitiveness and optimize picture quality (high definition, high luminance, low energy consumption and HDR)

(16) Developed a 5.7-inch QHD flexible display product

Developed a flexible display smart phone product through collaboration with other LG Group companies

Reduced the lower bezel size by 0.59mm and improved power consumption by applying VESA Display Stream Compression 1.1

Table of Contents**10. Intellectual Property**

As of September 30, 2016, our cumulative patent portfolio (including patents that have already expired) included a total of 30,728 patents, consisting of 14,569 in Korea and 16,159 in other countries.

11. Environmental and Safety Matters

We are subject to a variety of environmental laws and regulations, and we may be subject to fines or restrictions that could cause our operations to be interrupted. Our manufacturing processes generate worksite waste, including water and air pollutants, at various stages in the manufacturing process, and we are subject to relevant laws and regulations in each area of the environment, including with respect to the treatment of chemical by-products. We have installed various types of anti-pollution equipment, consistent with environmental standards, for the treatment of chemical waste and equipment for the recycling of treated waste water at our various facilities. However, we cannot provide assurance that environmental claims will not be brought against us or that the local or national governments will not take steps toward adopting more stringent environmental standards. Any failure on our part to comply with any present or future environmental regulations could result in the assessment of damages or imposition of fines against us, suspension of production or a cessation of operations. In addition, environmental regulations could require us to acquire costly equipment or to incur other significant compliance expenses that may materially and negatively affect our financial condition and results of operations.

In accordance with the Framework Act on Low Carbon, Green Growth, we implemented the greenhouse gas emission and energy consumption target system from 2012 to 2014. In 2015, we implemented the greenhouse gas trading system, under which we are responsible to meet our emission targets based on the emission credits allocated to us by the Ministry of Environment of the Korean government. As a result, we have been investing in additional equipment and there may be other costs associated with meeting reduction targets, which may have a negative effect on our profitability or production activities. As a designated company subject to greenhouse gas emission targets under the Framework Act on Low Carbon, Green Growth, if we fail to meet a reduction target and are unable to comply with the government's subsequent enforcement notice relating to such failure, we may be subject to fines. Furthermore, as a designated company subject to the Act on Allocation and Trading of Greenhouse Gas Emissions, if do not have enough emission credits, we may be required to purchase additional credits or be subject to fines.

In connection with the greenhouse gas emission and energy reduction target system, we submitted a statement of our domestic emissions and energy usage for 2015 to the Korean government (i.e., the Ministry of Environment) in March 2016 after it was certified by the Korean Foundation for Quality, a government-designated certification agency. The table below sets forth yearly levels of our greenhouse gases emissions and energy usage in the statement submitted to the Korean government:

Category	(Unit: thousand tonnes of CO ₂ equivalent; Tetra Joules)		
	2015	2014	2013
Greenhouse gases	7,348	7,537	6,922
Energy	60,146	60,002	61,092

Operations at our manufacturing plants are subject to regulation and periodic scheduled and unscheduled on-site inspections by the Ministry of Environment and local environmental protection authorities. We believe that we have adopted adequate anti-pollution measures and have minimized our impact on the environment by improving existing and developing new technologies for the effective maintenance of environmental protection standards consistent with local industry practice. In addition, we have continually monitored, and we believe that we are in compliance in all

material respects with, the applicable environmental laws and regulations in Korea. Expenditures related to such compliance may be substantial. Such expenditures are generally included in capital expenditures. As required by Korean law, we employ licensed environmental specialists to manage our water and air pollution, toxic materials and waste. In December 2013, to ensure safe water quality and reduce costs, we entered into a contract with a specialist company to operate our waste water treatment facilities. In stages beginning in November 1997, we have obtained environmental management system ISO 14001 certifications for our domestic panel and module production facilities and our overseas module production plants in Nanjing, Yantai and Guangzhou, China, and with respect to our domestic panel and module production plants, we received ISO 50001 certification in December 2013 for our energy management system.

Table of Contents

In addition, in August 2014, GP1, our newest eighth-generation panel fabrication facility located in Guangzhou, China, was the first electronics plant in China to receive the Green Plant designation under China's Green China Policy, in addition to receiving ISO 14001, ISO 50001, OHSAS 18001, ISO 9001, PAS 2050 and ISO 14064-1 certifications. Furthermore, with respect to our production facilities in Gumi, we have been certified by the Ministry of Environment as a Green Company for P1 and our Gumi module production plant since 1997, P2 and P3 since 2006 and P4, P5 and P6 since 2008. Also, we received certification to self-inspect designated waste products with respect to our Paju plant by the Ministry of Environment in 2011, which was recertified in 2013. In recognition of our efforts to reduce greenhouse gas emissions, we were awarded a commendation from the Minister of Environment in the efforts against climate change category in the 2013 Green Management Awards, which was jointly hosted by the Ministry of Environment and the Ministry of Trade, Industry & Energy. In addition, in recognition of our efforts to improve recycling and reduce waste, we received a citation in 2014 for being a leading recycling company from the Prime Minister of Korea and, in recognition of our continued greenhouse gas emission reduction activities, we received a special carbon management award in 2015 from the Carbon Disclosure Project, which was presided over by the Carbon Disclosure Project Korea Committee.

We also have an internal monitoring system to control the use of hazardous substances in the manufacture of our products as we are committed to compliance with all applicable environmental laws and regulations, including European Union Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU, and restricts the use of certain hazardous substances in the manufacture of electrical and electronic equipment.

In addition, as part of our commitment to use environment-friendly raw materials, we have implemented a green purchasing system that prevents the introduction of hazardous materials at the purchasing stage. The green purchasing system has been a key component in our efforts to comply with RoHS and other applicable environmental laws and regulation.

In October 2005, we became the first display panel company to receive accreditation as an International Accredited Testing Laboratory by the Korea Laboratory Accreditation Scheme, which is operated by the Korean Ministry of Trade, Industry & Energy. In September 2006, we received international accreditation from TUV SUD, EU's German accreditation agency, as a RoHS testing laboratory. Our efforts to keep pace with the increasingly stringent accreditation standards and to receive and maintain such accreditations are part of our on-going efforts to systematically monitor environmentally controlled substances in our component parts inventory. Moreover, we participated in reforming IEC 62321, an international testing standard published by the International Electrotechnical Commission and used by RoHS, and the commission adopted our halogen-free combustion ion chromatography method in as IEC 62321-3-2, which was published in June 2013.

In February 2015, we were issued a corrective order and assessed a fine of ₩276 million, which we subsequently followed and paid, respectively, for violating the Occupational Health and Safety Act in connection with an accidental nitrogen gas exposure at one of our production facilities in Paju, Korea in January 2015. In 2016, we were assessed an additional fine of ₩10 million in connection with such accidental exposure for other violations of the Occupational Health and Safety Act. To prevent such accidents happening again in the future, we have strengthened our safety standards and management and employee education.

Table of Contents

- (1) In March 2016, we completed the liquidation of LG Display U.S.A. Inc. We recovered ₩380 million and recorded ₩152 million, the excess over carrying value, as finance income. During the reporting period, we divested our entire shareholding interest in AVACO Co., Ltd. for ₩16,756 million and recorded finance income of ₩4,290 million representing the difference above book value.
- (2) In May 2016, LG Display Vietnam Haiphong Co., Ltd. was formed in Haiphong, Vietnam for the establishment of our overseas module production infrastructure. Our shareholding in such company as of June 30, 2016 was 100%.
- (3) In July 2016, Suzhou Raken Technology Co., Ltd., which was under the common control of AmTRAN Technology Co., Ltd. and us, spun-off Suzhou Lehui Display Co., Ltd. as a newly-formed entity. We acquired a 100% interest in the newly-formed Suzhou Lehui Display Co., Ltd. through a stock-swap with AmTRAN Technology Co., Ltd. in which AmTRAN Technology Co., Ltd. acquired a 100% interest in Suzhou Raken Technology Co., Ltd.
- (4) During the first half of 2016, Wooree E&L Co., Ltd. conducted a rights offering in which we did not participate. As a result, our shareholding percentage interest in such company decreased from 21% as of December 31, 2015 to 14% as of September 30, 2016. As of March 31, 2016, we determined that the recoverability of such investment was uncertain and we recognized an impairment loss of ₩6,137 million, an amount equal to the difference between the carrying amount and the recoverable amount of such investment, which loss was categorized as finance costs.
- (5) In February and June 2016, we redeemed from LB Gemini New Growth Fund No. 16 our principal investment of ₩2,820 million and ₩2,330 million, respectively. The investment did not affect our shareholding percentage interest.
- (6) During the reporting period, YAS Co., Ltd. conducted a rights offering in which we did not participate. As a result, our shareholding percentage interest in such company decreased from 18.52% as of December 31, 2015 to 18.19% as of September 30, 2016.
- (7) During the reporting period, Avatec Co., Ltd. retired treasury stock. As a result, our shareholding percentage interest in such company increased from 16% as of December 31, 2015 to 17% as of June 30, 2016.

Independent Auditors' Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Reviewed Financial Statements

We have reviewed the accompanying condensed consolidated interim financial statements of LG Display Co., Ltd. and subsidiaries (the Group) which comprise the condensed consolidated interim statement of financial position as of September 30, 2016, the condensed consolidated interim statements of comprehensive income (loss) for each of the three-month and nine-month periods ended September 30, 2016 and 2015, and statements of changes in equity and cash flows for the nine-month periods ended September 30, 2016 and 2015, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Condensed Consolidated Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Security and Futures Commission of the Republic of Korea. A review of interim financial information consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

Other Matters

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

We audited the consolidated statement of financial position as of December 31, 2015 and the related consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this review report, in accordance with Korean Standards on Auditing, and our report thereon, dated February 19, 2016, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2015, presented for comparative purposes, is not different from that audited by us from which it was derived in all material respects.

As of September 30, 2016, LG Display U.S.A., Inc., a subsidiary of the Controlling Company, completed its voluntary liquidation.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) No.1034, *Interim Financial Reporting*. They do not include all of the information required for full annual consolidated financial statements and should be read in conjunction with the consolidated financial statements of the Group as of and for the year ended December 31, 2015.

(b) **Basis of Measurement**

The condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the statements of financial position:

Derivative instruments, financial assets at fair value through profit or loss and available-for-sale financial assets measured at fair value, and

liabilities for defined benefit plans are recognized as the present value of defined benefit obligations less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed consolidated interim financial statements are presented in Korean won, which is the Controlling Company's functional currency.

(d) Use of Estimates and Judgments

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those applied in its consolidated financial statements as of and for the year ended December 31, 2015.

Table of Contents**3. Summary of Significant Accounting Policies**

The significant accounting policies followed by the Group in the preparation of its condensed consolidated interim financial statements are the same as those followed by the Group in its preparation of the consolidated financial statements as of and for the year ended December 31, 2015, except for the application of K-IFRS No. 1034, *Interim Financial Reporting*, and the amended accounting standards explained below:

(a) Change in Accounting Policies**(i) K-IFRS No. 1001, *Presentation of Financial Statements***

The Group has applied the amendment to K-IFRS No. 1001, *Presentation of Financial Statements*, effective January 1, 2016. The amendment clarifies that the disclosed line items can be omitted, added, or aggregated based on materiality. In addition, the amendment clarifies that the share in the other comprehensive income of associates and joint ventures should be presented separately in the financial statements based on whether they will or will not subsequently be reclassified to profit or loss. Also, additional requirements for disclosures in the notes and others are provided.

The Group has applied the amendment to K-IFRS No. 1001 and separated the share of other comprehensive income of associates and joint ventures into the share of items that (i) will be reclassified subsequently to profit or loss or (ii) will not be reclassified subsequently to profit or loss.

The Group restated the comparative condensed consolidated interim statements of comprehensive income (loss) for each of the three-month and nine-month periods ended September 30, 2015 and changes in equity for the nine-month period ended September 30, 2015.

(b) New Standards and Amendments Not Yet Adopted**(i) K-IFRS No. 1109, *Financial Instruments***

K-IFRS No. 1109, *Financial Instruments*, provides revised guidance on the classification and measurement of financial instruments and replaces incurred loss model with expected credit losses model for calculating impairment on financial assets. K-IFRS No. 1109 also includes new general hedge accounting requirements including hedged items, hedging instruments and risk being hedged in order to expand applicable risk management strategies being utilized. K-IFRS No. 1109 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. K-IFRS No. 1109 has not been early adopted in preparing this condensed consolidated interim financial statements.

(ii) K-IFRS No. 1115, *Revenue from Contracts with Customers*

K-IFRS No. 1115, *Revenue from Contracts with Customers*, establishes a single new revenue recognition standard for contracts with customers and introduces a five-step model for determining whether, how much and when revenue is recognized. K-IFRS No. 1115 replaces risk-and-reward based model with control-based model. K-IFRS No. 1115 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. K-IFRS No. 1115

has not been early adopted in preparing this condensed consolidated interim financial statements.

Management is currently assessing the potential impact on its consolidated financial statements resulting from the application of new standards.

(ii) Sensitivity analysis

A weaker won, as indicated below, against the following currencies which comprise the Group's assets or liabilities denominated in foreign currency as of September 30, 2016 and December 31, 2015, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Group considers to be reasonably possible as of the end of reporting period. The analysis assumes that all other variables, in particular interest rates, would remain constant. The changes in equity and profit or loss would have been as follows:

<i>(In millions of won)</i>	September 30, 2016		December 31, 2015	
	Equity	Profit or loss	Equity	Profit or loss
USD (5 percent weakening)	₩ 10,585	16,424	24,838	33,152
JPY (5 percent weakening)	(8,558)	(7,614)	(11,340)	(9,486)
CNY (5 percent weakening)	(7,684)	(1,337)	(8,582)	1,069
TWD (5 percent weakening)	77	4	42	
EUR (5 percent weakening)	(402)	744	(214)	270
PLN (5 percent weakening)	930	(242)	575	(208)
VND (5 percent weakening)	1,659			

A stronger won against the above currencies as of September 30, 2016 and December 31, 2015 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(1) Litigations and Others

Delaware Display Group LLC and Innovative Display Technologies LLC (DDG and IDT)

In December 2013, Delaware Display Group LLC and Innovative Display Technologies LLC filed a patent infringement case (First Case) against the Controlling Company and LG Display America, Inc. in the United States District Court for the District of Delaware. The Controlling Company does not have a present obligation for this matter and has not recognized any provision at September 30, 2016. It is not possible to reasonably estimate an amount of potential loss, if any, because the information plaintiffs have provided regarding damages are unreliable and may substantially change as litigation proceeds.

In December 2015, DDG and IDT filed a new patent infringement case against the Controlling Company and LG Display America, Inc. over the three patents that were dismissed without prejudice from the First Case. In May 2016, the case has been stayed by the United States District Court for the District of Delaware pending Inter Partes Review. The Controlling Company does not have a present obligation for this matter and has not recognized any provision at September 30, 2016. It is not possible to reasonably estimate an amount of potential loss, if any, because the plaintiffs have not provided any information regarding damages.

In August 2016, Innovative Display Technologies LLC filed a new patent infringement case against the Controlling Company and LG Display America, Inc. in the United States District Court for the Eastern District of Texas with respect to two new patents. The Controlling Company does not have a present obligation for this matter and has not recognized any provision at September 30, 2016. It is not possible to reasonably estimate an amount of potential loss, if any, because the plaintiffs have not provided any information regarding damages.

Surpass Tech Innovation LLC

In March 2014, Surpass Tech Innovation LLC filed a complaint in the United States District Court for the District of Delaware against the Controlling Company and LG Display America, Inc. for alleged patent infringement. In November 2014, the case has been stayed by the United States District Court for the District of Delaware pending Inter Partes Review. The Controlling Company does not have a present obligation for this matter and has not recognized any provision at September 30, 2016. It is not possible to reasonably estimate an amount of potential loss, if any, because the plaintiffs have not provided any information regarding damages.

Anti-trust litigations

The Controlling Company reached agreements on individual lawsuit and class actions in the United States and Canada, respectively, in connection with alleged violation of the antitrust laws after the nine-month period ended September 30, 2016.

During the nine-month period ended September 30, 2016, the Group updated its estimates on the amount of potential outflow of resources for pending antitrust litigations which resulted in a decrease of provision in the amount of ₩39,365 million upon payment for the settlement. The Group also recognized additional provision of ₩24,231 million and reversed ₩14,887 million. While the Group continues its vigorous defense of the various pending proceedings described above, management's assessment of the facts and circumstances could change based upon new information, intervening events and the final outcome of the cases. Consequently, the actual results could be materially different from management's current estimates.

The Controlling Company recognized ₩4,013 million for the difference between the carrying amount and the fair value as finance income in the consolidated statements of comprehensive income for the nine-month period ended September 30, 2016 regarding the previously held 51% ownership in Suzhou Raken Technology Co., Ltd.

The revenue and profit or loss of the Group for the current reporting period, as though the acquisition date for the business combination occurred during the nine-month period ended September 30, 2016 had been as of the beginning of the annual reporting period, were not disclosed as they are not estimated reliably since the revenue and profit or loss of Suzhou Lehui Display Co., Ltd. from the beginning of the annual reporting period to acquisition date are not reported separately.

The fair value of property, plant and equipment and others transferred have been provisionally recorded and subject to change since the independent valuation process of the property, plant and equipment and others have not been completed as of September 30, 2016.

23. Subsequent Event

The Controlling Company issued the following public debentures on October 12, 2016:

Independent Auditors' Review Report

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

Reviewed Financial Statements

We have reviewed the accompanying condensed separate interim financial statements of LG Display Co., Ltd. (the Company) which comprise the condensed separate interim statement of financial position as of September 30, 2016, the condensed separate interim statements of comprehensive income (loss) for each of the three-month and nine-month periods ended September 30, 2016 and 2015, and statements of changes in equity and cash flows for the nine-month periods ended September 30, 2016 and 2015, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Condensed Separate Interim Financial Statements

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to issue a report on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Security and Futures Commission of the Republic of Korea. A review of interim financial information consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of Korea and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed separate interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

Other Matters

The procedures and practices utilized in the Republic of Korea to review such condensed separate interim financial statements may differ from those generally accepted and applied in other countries.

We audited the separate statement of financial position as of December 31, 2015, and the related separate statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this review report, in accordance with Korean Standards on Auditing, and our report thereon, dated February 19, 2016, expressed an unqualified opinion. The accompanying condensed separate statement of financial position of the Company as of December 31, 2015, presented for comparative purposes, is not different from that audited by us from which it was derived in all material respects.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed separate interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) No.1034, *Interim Financial Reporting*. They do not include all of the information required for full annual financial statements and should be read in conjunction with the financial statements of the Company as of and for the year ended December 31, 2015.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027, *Separate Financial Statements*, presented by a parent, an investor in an associate or a venture in a joint ventures, in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and net assets of the investees.

Table of Contents

2. **Basis of Presenting Financial Statements, Continued**

(b) **Basis of Measurement**

The condensed separate interim financial statements have been prepared on the historical cost basis except for the following material items in the statements of financial position:

Derivative instruments, financial assets at fair value through profit or loss and available-for-sale financial assets measured at fair value, and

liabilities for defined benefit plans are recognized as the present value of defined benefit obligations less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed separate interim financial statements are presented in Korean won, which is the Company's functional currency.

(d) **Use of Estimates and Judgments**

The preparation of the condensed separate interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those applied in its financial statements as of and for the year ended December 31, 2015.

3. **Summary of Significant Accounting Policies**

The significant accounting policies followed by the Company in the preparation of its condensed separate interim financial statements are the same as those followed by the Company in its preparation of the financial statements as of and for the year ended December 31, 2015, except for the application of K-IFRS No. 1034, *Interim Financial Reporting*, and the amended accounting standards explained below:

(a) **Changes in Accounting Policies**

(i) **K-IFRS No. 1027, *Separate Financial Statements***

From January 1, 2016, the company adopts the amendment to K-IFRS No. 1027, *Separate Financial Statements*. Amendment to K-IFRS No. 1027, *Separate Financial Statements*, introduces equity accounting as a third option in the

entity's separate financial statements, in addition to the existing cost and fair value options. There is no impact of applying this amendment on the condensed separate interim financial statements.

Table of Contents3. Summary of Significant Accounting Policies, Continued(a) Changes in Accounting Policies, Continued(ii) K-IFRS No. 1001, *Presentation of Financial Statements*

The Company has applied the amendment to K-IFRS No. 1001, *Presentation of Financial Statements*, effective January 1, 2016. The amendment clarifies that the disclosed line items can be omitted, added,

or aggregated based on materiality. In addition, the amendment clarifies that the share in the other comprehensive income of associates and joint ventures should be presented separately in the financial statements based on whether they will or will not subsequently be reclassified to profit or loss. Also, additional requirements for disclosures in the notes and others are provided. There is no significant impact of applying this amendment on the condensed separate interim financial statements.

(b) New Standards and Amendments Not Yet Adopted(i) K-IFRS No. 1109, *Financial Instruments*

K-IFRS No. 1109, *Financial Instruments*, provides revised guidance on the classification and measurement of financial instruments and replaces incurred loss model with expected credit losses model for calculating impairment on financial assets. K-IFRS No. 1109 also includes new general hedge accounting requirements including hedged items, hedging instruments and risk being hedged in order to expand applicable risk management strategies being utilized. K-IFRS No. 1109 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. K-IFRS No. 1109 has not been early adopted in preparing this condensed separate interim financial statements.

(ii) K-IFRS No. 1115, *Revenue from Contracts with Customers*

K-IFRS No. 1115, *Revenue from Contracts with Customers*, establishes a single new revenue recognition standard for contracts with customers and introduces a five-step model for determining whether, how much and when revenue is recognized. K-IFRS No. 1115 replaces risk-and-reward based model with control-based model. K-IFRS No. 1115 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. K-IFRS No. 1115 has not been early adopted in preparing this condensed separate interim financial statements.

Management is currently assessing the potential impact on its separate financial statements resulting from the application of new standards.
