Corporate bonds	May 2017				

(1) Domestic corporate bond credit ratings are generally defined to indicate the following:

Subject instrument	Credit rating	Definition
Corporate bonds	AAA	Strongest capacity for timely repayment.
	AA+/AA/AA-	Very strong capacity for timely repayment. This capacity may, nevertheless, be slightly inferior than is the case for the highest rating category
	A+/A/A-	Strong capacity for timely repayment. This capacity may, nevertheless, be more vulnerable to adverse changes in circumstances or in economic conditions than is the case for higher rating categories.
	BBB+/BBB/BBB-	Capacity for timely repayment is adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this

	capacity.
BB+/BB/BB-	Capacity for timely repayment is currently adequate, but that there are some speculative characteristics that make the repayment uncertain over time.
B+/B/B-	Lack of adequate capacity for repayment and speculative characteristics. Interest payment in time of unfavorable economic conditions is uncertain.
CCC	Lack of capacity for even current repayment and high risk of default.
CC	Greater uncertainties than higher ratings.
C	High credit risk and lack of capacity for timely repayment.
D	Insolvency.

	May 2017	A1	Korea Investors Service, Inc. (A1 ~ D)
	May 2017	A1	Korea Ratings Corporation (A1 ~ D)

(2) Domestic commercial paper credit ratings are generally defined to indicate the following:

Subject instrument	Credit rating	Definition
	A1	Timely repayment capability is at the highest level with extremely low investment risk and is stable such that it will not be influenced by any reasonably foreseeable changes in external factors.
	A2	Strong capacity for timely repayment with very low investment risk. This capacity may, nevertheless, be slightly inferior than is the case for the highest rating category.
Commercial paper	A3	Capacity for timely repayment is adequate with low investment risk. This capacity may, nevertheless, be somewhat influenced by sudden changes in external factors.
	B	Capacity for timely repayment is acknowledged, but there are some speculative characteristics.
	C	Capacity for timely repayment is questionable.
	D	Insolvency.

+ or - modifier can be attached to ratings A2 through B to differentiate ratings within broader rating categories.

- (4) Based on profit for the period attributable to the owners of the controlling company.
- (5) Earnings per share is based on par value of ₩5,000 per share and is calculated by dividing net income by weighted average number of common shares.
- (6) Cash dividend payout ratio is the percentage that is derived by dividing total cash dividend by profit for the period attributable to the owners of the controlling company.
- (7) Cash dividend yield is the percentage that is derived by dividing cash dividend by the arithmetic average of the daily closing prices of our common shares during the one-week period ending two trading days prior to the closing of the register of shareholders for the purpose of determining the shareholders entitled to receive annual dividends.

**Table of Contents****2. Business****A. Business overview**

We were incorporated in February 1985 under the laws of the Republic of Korea. LG Electronics and LG Semicon transferred their respective LCD business to us in 1998, and since then, our business has been focused on the research, development, manufacture and sale of display panels, applying technologies such as TFT-LCD and OLED.

As of June 30, 2017, in order to support our business activities, we operated TFT-LCD and OLED production and research facilities in Paju and Gumi in Korea, and we have also established subsidiaries in the Americas, Europe and Asia.

As of June 30, 2017, our business consisted of the manufacture and sale of display and display related products utilizing TFT-LCD, OLED and other technologies under a single reporting business segment.

**2017 H1 consolidated operating results highlights**

	(Unit: In billions of Won)
2017 H1	Display business
Sales Revenue	13,691
Gross Profit	3,233
Operating Profit	1,831

**B. Industry****(1) Industry characteristics and growth potential**

The entry barriers to manufacture display panels are relatively high due to the technology and capital intensive nature of the mass manufacturing process that is required to achieve economies of scale, among other factors.

While growth in the market for displays used in notebook computer, monitor and other traditional IT products has stagnated or declined, the market for small- and medium-sized displays (including those used in smartphones) in the rapidly evolving IT environment has shown steady growth. The display market for televisions has also shown steady growth mainly due to growing demand from developing countries as well as from consumers in general for larger sized display panels. As for displays used in industrial, automobile and other value added products, we expect to see growth in these markets.

**(2) Cyclicalities**

The display panel business is highly cyclical and sensitive to fluctuations in the general economy. The industry experiences recurring volatility caused by imbalances between supply and demand due to capacity expansion and changing production utilization rates within the industry.

Macroeconomic factors and other causes of business cycles can affect the rate of growth in demand for display panels. Accordingly, if supply exceeds demand, average selling prices of display panels may decrease. Conversely, if growth in demand outpaces growth in supply, average selling prices may increase.

(3) Market conditions

Overall, while there have been some variations in rates of production capacity growth among individual display panel manufacturers, display panel manufacturers have generally slowed their respective rates of production capacity growth since 2011 due to a slowdown in growth of the display panel industry.

**Table of Contents**

Most display panel manufacturers are located in Asia.

- a. Korea: LG Display, Samsung Display, etc.
- b. Taiwan: AU Optronics, Innolux, CPT, HannStar, etc.
- c. Japan: Japan Display, Sharp, Panasonic LCD, etc.
- d. China: BOE, CSOT, CEC Panda, etc.

## (4) Market shares

Our worldwide market share of large-sized display panels (i.e., panels that are 9 inches or larger) based on revenue is as follows:

	2017 H1	2016	2015
Panels for Televisions <sup>(1)</sup>	29.2%	28.2%	25.4%
Panels for Monitors	34.1%	36.6%	39.0%
Panels for Notebook Computers	21.7%	27.8%	27.3%
Panels for Tablet Computers	30.9%	24.1%	22.5%
<b>Total</b>	<b>29.2%</b>	<b>29.4%</b>	<b>27.7%</b>

*Source: Large-Area Display Market Tracker (IHS Technology)*

(8) Includes panels for public displays.

## (5) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, timely investments, adaptable production capabilities, development of new and premium products through technological advances, competitive production costs, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.

In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.

A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.

As a leading technology innovator in the display industry, we continue to focus on delivering differentiated value to our customers by developing various technologies and products, including display panels with OLED, IPS, in-TOUCH and other technologies. With respect to OLED panels, following our supply of the world's first 55-inch OLED 3D panels for televisions in January 2013, we have supplied ultra-high definition ( Ultra HD ) OLED panels for televisions, flexible plastic OLED panels for smartphones, round OLED panels for wearable devices among others and have shown that we are technologically a step ahead of the competition. With respect to TFT-LCD panels, we are leading the market with our differentiated products with IPS technology, such as our ultra-large and high definition Ultra HD television panels and 21:9 screen aspect ratio ultra-wide IPS curved monitors, and have prepared our production facilities to produce products with in-TOUCH technology.

**Table of Contents**

Moreover, we entered into long-term sales contracts with major global firms to secure customers and expand partnerships for technology development.

## C. New businesses

For our continued growth, we are actively exploring and preparing for new business opportunities that may arise in the changing market environment. As such, we are continually reviewing and looking at opportunities in the display and promising new industries.

**3. Major Products and Raw Materials**

## A. Major products

We manufacture TFT-LCD and OLED panels, of which a significant majority is sold overseas.

(Unit: In billions of Won, except percentages)

Business area	Sales type	Items (Market)	Usage	trademark	Sales in 2017 H1 (%)
Display	Product/ Service/ Other sales	Display panel (Overseas <sup>(1)</sup> )	Panels for notebook computers, monitors, televisions, smartphones, tablets, etc.	LG Display	12,686 (92.7%)
		Display panel (Korea <sup>(1)</sup> )	Panels for notebook computers, monitors, televisions, smartphones, tablets, etc.	LG Display	1,005 (7.3%)
<b>Total</b>					<b>13,691 (100.0%)</b>

- Period: January 1, 2017 ~ June 30, 2017.

(9) Based on ship-to-party.

## B. Average selling price trend of major products

The average selling price of LCD panels per square meter of net display area shipped in the second quarter of 2017 decreased by approximately 6%p compared to the first quarter of 2017, largely as a result of a comparative decrease in the shipment of small- and medium-sized panels, which generally have higher selling prices per square meter of net display area compared to other panels, while average selling prices of LCD panels exhibited varying trends according to demand by product category. There is no assurance that the average selling prices of LCD panels will not fluctuate in the future due to changes in market conditions.

Description	(Unit: US\$ / m <sup>2</sup> )			
	2017 Q2	2017 Q1	2016 Q4	2016 Q3
Display panel <sup>(1)(2)</sup>	574	608	642	555

(10) Quarterly average selling price per square meter of net display area shipped.

(11) Excludes semi-finished products in the cell process.

#### C. Major raw materials

Prices of major raw materials depend on fluctuations in supply and demand in the market as well as on change in size and quantity of raw materials due to the increased production of large-sized panels.

**Table of Contents**

#### 4. Production and Equipment

##### A. Production capacity and output

###### (1) Production capacity

The table below sets forth the production capacity of our Gumi, Paju, Guangzhou and Ochang facilities in the periods indicated.

Business area	Items	Location of facilities	(Unit: 1,000 glass sheets)		
			2017 H1 <sup>(1)</sup>	2016 <sup>(2)</sup>	2015 <sup>(2)</sup>
Display	Display panel	Gumi, Paju, Guangzhou, Ochang	4,867	9,906	9,781

(13) Calculated based on the maximum monthly input capacity (based on glass input substrate size for eighth generation glass sheets) during the period multiplied by the number of months in the period (i.e., 6 months).

(14) Calculated based on the maximum monthly input capacity (based on glass input substrate size for eighth generation glass sheets) during the year multiplied by the number of months in a year (i.e., 12 months).

###### (2) Production output

The table below sets forth the production output of our Gumi, Paju, Guangzhou and Ochang facilities in the periods indicated.

Business area	Items	Location of facilities	(Unit: 1,000 glass sheets)		
			2017 H1	2016	2015

Display	Display panel	Gumi, Paju, Guangzhou, Ochang	4,456	8,996	8,609
---------	---------------	-------------------------------	-------	-------	-------

- Based on glass input substrate size for eighth generation glass sheets.

## B. Production performance and utilization ratio

Production facilities	(Unit: Hours, except percentages)		
	Available working hours in 2017 H1	Actual working hours in 2017 H1	Average utilization ratio
Gumi	4,344 <sup>(1)</sup> (181 days) <sup>(2)</sup>	4,132 <sup>(1)</sup> (172 days) <sup>(2)</sup>	95.1%
Paju	4,344 <sup>(1)</sup> (181 days) <sup>(2)</sup>	4,344 <sup>(1)</sup> (181 days) <sup>(2)</sup>	100.0%

Ochang	4,344 <sup>(1)</sup> (181 days) <sup>(2)</sup>	3,744 <sup>(1)</sup> (156 days) <sup>(2)</sup>	86.2%

**Table of Contents**

(15) Based on the assumption that all 24 hours in a day have been fully utilized.

(16) Number of days is calculated by averaging the number of working days for each facility.

C. Investment plan

In 2016, our total capital expenditures on a cash out basis was ₩3.7 trillion. In 2017, we plan to continue capital expenditures to lead the market for OLED panels, prepare for mass production of future display products and respond to increases in demand for large-sized panels.

## 5. Sales

A. Sales performance

Business area	Sales types	Items (Market)	(Unit: In billions of Won)		
			2017 H1	2016	2015
Display	Products, etc.	Overseas <sup>(1)</sup>	12,686	24,679	26,166
		Korea <sup>(1)</sup>	1,005	1,825	2,218
		Total	13,691	26,504	28,384

(17) Based on ship-to-party.

B. Sales route and sales method

(1) Sales organization

As of June 30, 2017, each of our television, IT, mobile and OLED businesses had individual sales and customer support functions.

Sales subsidiaries in the United States, Germany, Japan, Taiwan, China and Singapore perform sales activities and provide local technical support to customers.

(2) Sales route

Sales of our products take place through one of the following two routes:

LG Display HQ and overseas manufacturing subsidiaries g Overseas sales subsidiaries (USA/Germany/Japan/Taiwan/China/Singapore), etc. g System integrators and end-brand customers g End users

LG Display HQ and overseas manufacturing subsidiaries g System integrators and end-brand customers g End users

(3) Sales methods and sales terms

Direct sales and sales through overseas subsidiaries, etc. Sales terms are subject to change depending on the fluctuation in the supply and demand of LCD panels.

(4) Sales strategy

As part of our sales strategy, we have secured stable sales to major personal computer manufacturers and leading consumer electronics manufacturers globally, led the television market with our OLED and other market leading television panels, increased the proportion of sales of our differentiated television panels, such as our Ultra HD and large television panels, in our product mix and strengthened sales of high-resolution, IPS, narrow bezel and other high-end display panels in the monitor, notebook computer and tablet markets.

## **Table of Contents**

In the smartphone, commercial (including interactive whiteboards and video wall displays), industrial products (including aviation and medical equipment) and automobile displays segment, we have continued to build a strong and diversified business portfolio by expanding our business with customers with a global reach on the strength of our differentiated products applying IPS, plastic OLED, high-resolution, high-reliability, Super Narrow bezel, in-TOUCH and other technologies.

### (5) Purchase orders

Customers generally place purchase orders with us one month prior to delivery. Our customary practice for procuring orders from our customers and delivering our products to such customers is as follows:

Receive order from customer (overseas sales subsidiaries, etc.) g Headquarter is notified g Manufacture product g Ship product (overseas sales subsidiaries, etc.) g Sell product (overseas sales subsidiaries, etc.)

## **6. Market Risks and Risk Management**

### A. Market risks

The display industry continues to experience continued declines in the average selling prices of TFT-LCD and OLED panels irrespective of cyclical fluctuations in the industry, and our margins would be adversely impacted if prices decrease faster than we are able to reduce our costs.

The display industry is highly competitive. We have experienced pressure on the prices and margins of our major products due largely to additional industry capacity from panel manufacturers in Korea, Taiwan, China and Japan coupled with changes in the production mix of such manufacturers.

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, performance and reliability, timely investments, adaptable production capabilities, utilization of differentiated technologies in product development, success or failure of our end-brand customers in marketing their brands and products, component and raw material supply costs, and general economic and industry conditions. We cannot provide assurance that we will be able to compete successfully with our competitors on these fronts and, as a result, we may be unable to sustain our current market position.

Our results of operations are subject to exchange rate fluctuations. To the extent that we incur costs in one currency and generate sales in a different currency, our profit margins may be affected by changes in the exchange rates between the two currencies. Our sales of display panels are denominated mainly in U.S. dollars, whereas our foreign currency denominated purchases of raw materials are denominated mainly in U.S. dollars and Japanese Yen. Seeking to achieve stable management, we take every precaution in our foreign currency risk management to minimize the risk of foreign currency fluctuations on our foreign currency denominated assets and liabilities.

### B. Risk management

As the average selling prices of TFT-LCD and OLED panels can continue to decline over time irrespective of industry-wide cyclical fluctuations, we may find it hard to manage risks associated with certain factors that are outside our control. However, we counteract such declines in average selling prices by increasing the proportion of high value added panels in our product mix while also implementing various cost reduction measures. In addition, in order to manage our risk against foreign currency fluctuations, we continually monitor our currency position and risk, and when needed, we may from time to time enter into cross-currency interest rate swap contracts and foreign currency forward contracts.

**Table of Contents**

**7. Derivative Contracts**

A. Currency risks

We are exposed to currency risks on sales, purchases and borrowings that are denominated in currencies other than in Won, our functional currency. These currencies are primarily the U.S. dollar, the Japanese Yen and the Chinese Yuan.

Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by our underlying operations, primarily in Won, the U.S. dollar and the Chinese Yuan.

In respect of other monetary assets and liabilities denominated in foreign currencies, we ensure that our net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates, when necessary, to address short-term imbalances.

During the first six months of 2017, we entered into an aggregate of US\$100 million in Won/US\$ forward foreign exchange contracts with Shinhan Bank and HSBC, which contracts were subsequently settled on June 26, 2017. As of June 30, 2017, there are no outstanding amounts to be settled under our foreign currency derivative instruments.

We recognized a gain on valuation of derivative instruments in the amount of ₩3,106 million with respect to foreign exchange derivative instruments held during the first six months of 2017.

B. Interest rate risks

Our exposure to interest rate risks relates primarily to our floating rate long term loan obligations. We have established and are managing interest rate risk policies to minimize uncertainty and costs associated with interest rate fluctuations by monitoring cyclical interest rate fluctuations and enacting countermeasures.

As of June 30, 2017, we have entered into an aggregate of ₩350 billion in interest rate swap agreements with Shinhan Bank and NongHyup Bank, for which we have not applied hedge accounting.

We recognized a gain on valuation of derivative instruments in the amount of ₩255 million with respect to interest rate derivative instruments held during the first six months of 2017.

**8. Major contracts**

Our material contracts, other than contracts entered into in the ordinary course of business, are set forth below:

Type of agreement	Name of party	Term	Content
Technology licensing agreement	Semiconductor Energy Laboratory	October 2005 ~	Patent licensing of LCD and OLED related technology
	Hewlett-Packard	January 2011 ~	Patent licensing of semi-conductor device technology
	Ignis Innovation, Inc.	July 2016 ~	Patent licensing of OLED related technology
	HannStar Display Corporation	December 2013 ~	Patent cross-licensing of LCD technology
Technology licensing/supply agreement	AU Optronics Corporation	August 2011~	Patent cross-licensing of LCD technology
	Innolux Corporation	July 2012 ~	Patent cross-licensing of LCD technology
	Universal Display Corporation	January 2015 ~ December 2022	Patent cross-licensing of OLED related technology

## B. R&amp;D achievements

*Achievements in 2015*

- (1) Developed the world's narrowest, at the time, module bezel (0.7mm) LTPS smartphone display (5.3-inch FHD in-TOUCH)

Developed the world's first FHD in-TOUCH display (LTPS 5.3-inch FHD) applying the Neo Edge module process (new manufacturing technology) in January 2015

Set-up glue & laser cutting process, 0.6mm panel bezel (L/R)

- (2) Developed the world's first QHD in-TOUCH LTPS smartphone display (5.5-inch QHD)

Developed LTPS 5.5-inch QHD display applying LG Display's new capacitive type in-cell touch technology with all points sensing in March 2015; luminance: 500nit, contrast ratio: 1500:1 (using photo alignment & negative LC), 0.95mm panel bezel (L/R)

Delivered differentiated value proposition based on touch performance, simplified SCM process and competitive cost innovation

- (3) Developed the world's narrowest, at the time, bezel videowall product (49-inch FHD)

Developed the world's narrowest bezel videowall product (bezel to bezel 3.5mm)

Optimized sizing of panel PAD and mechanical bezel

- (4) Developed 43-inch Ultra HD slim and light LED television product

Achieved LCD module thickness of 8.4mm

Reduced thickness through publication of set LCM parts (back cover and middle cabinet)

- (5) Developed the world's first Ultra HD OLED television product (55-inch, 65-inch and 77-inch Ultra HD)

Developed the world's first Ultra HD television product lineup

- (6) Developed the world's first Ultra HD television product applying DRD technology (55-inch, 49-inch and 43-inch Ultra HD)

World's first application of Ultra HD DRD technology based on an RGBW(M+) pixel structure

Utilized RGBW(M+) technology to optimize picture quality (high definition, high luminance, low energy consumption and High Dynamic Range (HDR))

**Table of Contents**

- (7) Developed Ultra HD asymmetric RGBW(M+) structure product (15.6-inch)

Improved panel transmittance, lowered energy consumption and enhanced outdoor visibility compared to previous models

- (8) Developed the world's first second display LTPS smartphone product (5.7-inch QHD+)

Delivered differentiated set design through the realization of a second display by applying a panel exterior manufacturing process

Developed panel and instrumental optics technology for the independent operation of main display and second display

Developed advanced power consumption technology for the realization of Always On Display functionality for the second display

- (9) Developed the world's first four-sided borderless monitor product (23.8-inch FHD and 27-inch QHD)

Developed the world's first four-sided borderless design LCD module

Improved design by reducing lower bezel size from 12.6mm to 6.15mm (23.8-inch FHD)

- (10) Developed the world's first in-TOUCH notebook product (15.6-inch and 14-inch FHD)

Improved touch functionality and cost competitiveness through world's first application of in-TOUCH technology on notebook products

Simplified customer supply chain management by providing touch total solution

- (11) Developed the world's first 15.6-inch FHD notebook narrow bezel (2.9mm) product

Ultra-light and narrow concept project for 15.6-inch line extension to LG Electronics 13.3-inch and 14-inch Gram products

Delivered differentiated design utilizing 2.9mm bezels (Top/L/R)

Ultra slim and light design (225g, 2.3t)

(12) Developed 1900R curved monitor product (34-inch, 21:9 screen aspect ratio)

Strengthened product competitiveness by improving the curvature radius of 21:9 screen aspect ratio monitors (3800 reduced to 1900R)

Applied 0.25T etching to address looseness and backlight bleeding attributable to curved screen

Applied COT structure to enhance panel transmittance and address color mixing defects

(13) Developed the world's first four-sided borderless 55-inch Ultra HD LED television product

Developed panel reverse structure in order to deliver a four-sided borderless product

(14) Developed the world's first a-Si 98-inch Quad Ultra HD 120Hz television product

Developed the world's first drive technology for a-Si based extra-large 8K 120Hz panels

(15) Developed the world's first 65-inch 8K M+ product

Achieved cost competitiveness and maximized 8K transmittance by applying GIP/Source single bank for the first time in the world

Developed super resolution (4K enhanced to 8K) and M+ algorithm technologies

(16) Developed 75-inch Ultra HD Signage product

Delivered 11.9mm thickness on large-size LCD module

*Achievements in 2016*

(1) Developed the world's narrowest, at the time, bezel videowall product (55-inch/49-inch FHD, bezel to bezel 1.8mm)

Delivered 0.9mm even bezel, four-sided borderless product (bezel to bezel 1.8mm)

- (2) Developed the world's first ultra-stretch format display product (86-inch, 58:9 screen aspect ratio)

Developed new display panel size and screen aspect ratio (86-inch, 58:9 screen aspect ratio)

**Table of Contents**

Applied next-generation stain (per pixel) offset technology

- (3) Developed the world's first ultra-large display product utilizing data single bank and GIP technology (86-inch Ultra HD)

Achieved cost-competitiveness by developing world's first ultra-large display product utilizing data single bank and GIP technology

- (4) Developed the world's first in-TOUCH monitor product (23-inch)

Improved touch functionality and strengthened cost-competitiveness by applying the world's first in-TOUCH technology to monitor display products

Simplified customer software configuration management by providing touch total solution

- (5) Developed ultra-slim OLED television display product applying high dynamic range (65-inch, 800 nit luminance, 2.52 mm module thickness)

Applied high dynamic range (HDR) technology to achieve 800 nit peak luminance and improved display quality

Achieved module thickness of 2.52mm (without back cover) and 5.92mm (with back cover)

- (6) Developed combined 5.3-inch QHD in-TOUCH + 3D cover glass product for LG Electronics

Developed world class smartphone product (G5) through collaboration with other LG Group companies

Strengthened competitiveness of design by achieving processability and productivity for 0.4t 3D cover glass

Improved power consumption of AoD Mode from Self Font Generation technology and operation optimization

- (7) Developed the world's first large-scale outdoor high luminance 3000 nit product (75-inch Ultra HD)

Developed the world's first large-scale outdoor 75-inch Ultra HD, high luminance 3000 nit product

Achieved cost competitiveness and power consumption reduction through utilization of high transmittance M+ panel

- (8) Developed the world's first FHD/Ultra HD multi-input Interactive Whiteboard product (75-inch Ultra HD)

Strengthened product competitiveness through delivery of customer FHD/Ultra HD selective input functionality

- (9) Developed 4.9mm depth Art Slim2 Ultra HD television (55-inch/65-inch Ultra HD)

Strengthened design competitiveness through delivery of ultra-slim product with application of Glass Light Guide Plate

- (10) Developed the world's largest 21:9 screen aspect ratio curved monitor (37.5-inch UltraWide Quad HD ( WQHD ))+)

Continued pioneering of the market with the world's largest 21:9 screen aspect ratio IPS curved monitor lineup (37.5-inch, 2300R curvature radius, 44mm curvature depth)

Established flagship line through application of new high definition technology (WQHD+, 3840 x 1600 resolution)

Improved panel transmittance and backlight bleeding through our first-time application of a Super-IPS COT panel structure to monitor models

- (11) Developed the world's first in-TOUCH GIP/DRD notebook product (15.6-inch FHD)

Strengthened competitiveness through application of GIP/DRD technology to FHD-quality notebook in-TOUCH products

- (12) Developed a transparent 32-inch FHD product

Achieved high transmittance of transparent panel through application of RGBW(M+) panel technology

- (13) Developed the world's first Light Absorption Polarizer ( LAP ) product (65-inch/60-inch Ultra HD)

Developed differentiated wide color gamut solution

(14) Developed the world's first Ultra HD DRD product (50-inch Ultra HD)

Utilized Ultra HD RGBW(M+) pixel structure-based DRD technology to strengthen product competitiveness and optimize picture quality (high definition, high luminance, low energy consumption and HDR)

(15) Developed a 5.7-inch QHD flexible display product

Developed a flexible display smartphone product through collaboration with other LG Group companies

**Table of Contents**

Reduced the lower bezel size by 0.59mm and improved power consumption by applying VESA Display Stream Compression 1.1

- (16) Developed the world's first wallpaper OLED television product (65-inch Ultra HD)

Achieved an ultra-slim wallpaper-style design that completely sticks to walls (65-inch, 3.9 mm hindmost thickness, 7.4 kg)

Achieved long-distance signal and power transmission technology for the separation of the driver circuit  
*Achievements in 2017*

- (1) Developed 5.7-inch QHD+ full vision display (LG Electronics)

Developed a full vision display smartphone product (G6) through strategic collaboration with other LG Group companies

Applied first 18:9 screen aspect ratio with 4-corner round display

- (2) Developed mobile LTPS 30Hz product (SH 5.1-inch FHD)

Secured 30Hz low-frequency drive technology based on LTPS TFT-LCD

Reduced logic power consumption through 30Hz low-frequency drive (reduced from 96mW to 69mW on 5.1-inch FHD)

- (3) Developed and released the world's first Crystal Sound OLED, or CSO, television product

Released product with a new platform concept through development of OLED panel product with integrated speakers

Delivered OLED television product that achieves differentiated value not only in picture quality and design, but also sound quality

- (4) Developed notebook oxide product (13.9-inch, Ultra HD)

Achieved high definition/narrow bezel product through application of oxide BCE GIP technology

Delivered low power consumption product through application of low refresh rate, or LRR, technology

- (5) Developed medical monitor product for surgical endoscope (27.0-inch, Ultra HD)

Newly entered the medical devices market through development and production of medical monitor product for surgical endoscope

Achieved high definition (3,840 x 2,160), high luminance (800 nit) and high contrast ratio (1,300:1)

Implemented coverglass direct bonding applying our own manufacturing processes (M6 line)

- (6) Developed the world's first four-side borderless monitor with a resolution of 8K4K (31.5-inch 8K4K Oxide)

Pioneered Ultra HD Premium MNT market through development of the world's first four-side borderless monitor with a resolution of 8K4K

Delivered Ultra HD based on oxide GIP (280 PPI with a resolution of 7680x4320)

Delivered wide color gamut (Adobe RGB 100%/DCI 98%), four-side borderless

- (7) Developed the world's largest automotive Center Information Display (CID) product (15.4-inch Widescreen Ultra Extended Graphics Array (WUXGA))

Developed the world's largest auto component display in the automotive industry

Guaranteed the first 1000hr reliability in the automotive industry

## 10. Intellectual Property

As of June 30, 2017, our cumulative patent portfolio (including patents that have already expired) included a total of 32,871 patents, consisting of 15,440 in Korea and 17,431 in other countries.

**Table of Contents****11. Environmental and Safety Matters**

We are subject to a variety of environmental laws and regulations, and we may be subject to fines or restrictions that could cause our operations to be interrupted. Our manufacturing processes generate worksite waste, including water and air pollutants, at various stages in the manufacturing process, and we are subject to relevant laws and regulations in each area of the environment, including with respect to the treatment of chemical by-products. We have installed various types of anti-pollution equipment, consistent with environmental standards, for the treatment of chemical waste and equipment for the recycling of treated waste water at our various facilities. However, we cannot provide assurance that environmental claims will not be brought against us or that the local or national governments will not take steps toward adopting more stringent environmental standards. Any failure on our part to comply with any present or future environmental regulations could result in the assessment of damages or imposition of fines against us, suspension of production or a cessation of operations. In addition, environmental regulations could require us to acquire costly equipment or to incur other significant compliance expenses that may materially and negatively affect our financial condition and results of operations.

In accordance with the Framework Act on Low Carbon, Green Growth, we implemented the greenhouse gas emission and energy consumption target system from 2012 to 2014. In 2015, we implemented the greenhouse gas trading system, under which we are responsible to meet our emission targets based on the emission credits allocated to us by the Ministry of Environment of the Korean government. As a result, we have been investing in additional equipment and there may be other costs associated with meeting reduction targets, which may have a negative effect on our profitability or production activities. As a designated company subject to greenhouse gas emission targets under the Framework Act on Low Carbon, Green Growth, if we fail to meet a reduction target and are unable to comply with the government's subsequent enforcement notice relating to such failure, we may be subject to fines. Furthermore, as a designated company subject to the Act on Allocation and Trading of Greenhouse Gas Emissions, if do not have enough emission credits, we may be required to purchase additional credits or be subject to fines.

In connection with the greenhouse gas emission and energy reduction target system, we submitted a statement of our domestic emissions and energy usage for 2016 to the Korean government in March 2017 after it was certified by BSI Korea, a government-designated certification agency. The table below sets forth yearly levels of our greenhouse gases emissions and energy usage in the statement submitted to the Korean government:

Category	(Unit: thousand tonnes of CO <sub>2</sub> equivalent; Tetra Joules)		
	2016	2015	2014
Greenhouse gases	5,851	7,348	7,537
Energy	60,423	60,146	60,002

Operations at our manufacturing plants are subject to regulation and periodic scheduled and unscheduled on-site inspections by the Ministry of Environment and local environmental protection authorities. We believe that we have adopted adequate anti-pollution measures and have minimized our impact on the environment by improving existing and developing new technologies for the effective maintenance of environmental protection standards consistent with local industry practice. In addition, we have continually monitored, and we believe that we are in compliance in all material respects with, the applicable environmental laws and regulations in Korea. Expenditures related to such compliance may be substantial. Such expenditures are generally included in capital expenditures. As required by Korean law, we employ licensed environmental specialists to manage our water and air pollution, toxic materials and waste. In December 2013, to ensure safe water quality and reduce costs, we entered into a contract with a specialist company to operate our waste water treatment facilities. In stages beginning in November 1997, we have obtained environmental management system ISO 14001 certifications for our domestic panel and module production facilities and our overseas module production plants in Nanjing, Yantai and Guangzhou, China, and with respect to our

domestic panel and module production plants, we received ISO 50001 certification in December 2013 for our energy management system.

**Table of Contents**

In addition, in August 2014, GP1, our newest eighth-generation panel fabrication facility located in Guangzhou, China, was the first electronics plant in China to receive the Green Plant designation under China's Green China Policy, in addition to receiving ISO 14001, ISO 50001, OHSAS 18001, ISO 9001, PAS 2050 and ISO 14064-1 certifications. Furthermore, with respect to our production facilities in Gumi, we have been certified by the Ministry of Environment as a Green Company for P1 and our Gumi module production plant since 1997, P2 and P3 since 2006 and P4, P5 and P6 since 2008. Also, we received certification to self-inspect designated waste products with respect to our Paju plant by the Ministry of Environment in 2011, which was recertified in 2013. In recognition of our efforts to reduce greenhouse gas emissions, we were awarded a commendation from the Minister of Environment in the efforts against climate change category in the 2013 Green Management Awards, which was jointly hosted by the Ministry of Environment and the Ministry of Trade, Industry & Energy. In addition, in recognition of our efforts to improve recycling and reduce waste, we received a citation in 2014 for being a leading recycling company from the Prime Minister of Korea and, in recognition of our continued water conservation activities (reuse system investments, etc.) and greenhouse gas emission reduction activities (process gas and energy reduction, etc.), we attained the highest level, Leadership A, and received the grand prize award at the CDP Water Korea Best Awards in 2016 from the Carbon Disclosure Project, which was presided over by the Carbon Disclosure Project Korea Committee. We also attained a Leadership A in the climate change information technology sector and received a carbon management honors award.

In the case of the European Union's Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU, with the adoption of Directive (EU) 2015/863 in 2016, four additional substances (four phthalate substances) will be added to the six already restricted substances and the additional restrictions are scheduled to come into effect on July 22, 2019. In order to address the latent risk elements of the four phthalate substances scheduled to be restricted in 2019 and to establish a more stable management system, we implemented in 2016 a preemptive response process with respect to such four phthalate substances. In implementing this process, we collaborated with external agencies to ascertain regulatory trends and establish our response strategy, and we formulated and applied effective management measures through the collaborative efforts of our development, procurement and quality teams. Beryllium (Be) was not designated internationally as a mandatorily restricted substance but has continued to be the subject of discussion for restriction, and certain of our customers have designated it as a restricted substance not to be used in products. Accordingly, we have completed verification of the parts used in products for customers who have banned the use of Beryllium. We have also conducted verification of the parts used in products for all customers who are expected to implement a ban and we have established a Beryllium verification process for parts in development. Through such efforts, we have established a voluntary hazardous substance response process that can be expanded to products for all customers, not only those who have requested a response.

In October 2005, we became the first display panel company to receive accreditation as an International Accredited Testing Laboratory by the Korea Laboratory Accreditation Scheme, which is operated by the Korean Ministry of Trade, Industry & Energy. In September 2006, we received international accreditation from TUV SUD, EU's German accreditation agency, as a RoHS testing laboratory. Our efforts to keep pace with the increasingly stringent accreditation standards and to receive and maintain such accreditations are part of our on-going efforts to systematically monitor environmentally controlled substances in our component parts inventory. Moreover, we participated in reforming IEC 62321, an international testing standard published by the International Electrotechnical Commission and used by RoHS, and the commission adopted our halogen-free combustion ion chromatography method in as IEC 62321-3-2, which was published in June 2013.

In February 2015, we were issued a corrective order and assessed a fine of ₩276 million, which we subsequently followed and paid, respectively, for violating the Occupational Health and Safety Act in connection with an accidental nitrogen gas exposure at one of our production facilities in Paju, Korea in January 2015. In 2016, we were assessed an additional fine of ₩10 million in connection with such accidental exposure for other violations of the Occupational

Health and Safety Act. To prevent such accidents happening again in the future, we have strengthened our safety standards and management and employee education.

In 2015 and 2016, we were assessed fines in the aggregate amount of ₩1.6 million, which we subsequently paid, for failure to meet certain reporting obligations under the Industrial Safety and Health Act. To prevent such violations from occurring again, we have strengthened our monitoring process and management and employee education training initiatives.

In June 2017, we were assessed a fine of ₩1 million, which we subsequently paid, for failure to meet certain waste disposal subcontractor requirements under the Waste Management Act. To prevent such violations from occurring again, we are strengthening the periodic evaluation process for our waste management subcontractors.

In July 2017, we were investigated by the Ministry of Employment and Labor in connection with the occurrence of a safety accident and found to be in violation of certain provisions of the Industrial Safety and Health Act relating to supervisory obligations. As a result, we were issued a corrective order and assessed a fine of ₩2.4 million. Police and the Ministry of Employment and Labor are currently conducting further investigations. In order to prevent such accidents from occurring again, we are strengthening our safety management standards and training for our employees.

(Unit: in millions of Won)

Name	Method of calculation
Sang Beom Han	<u>Total remuneration</u>

—₩1,592 million (consisting of ~~₩~~₩714 million in salary and ~~₩~~₩878 million in bonus).

Salary

Basic salary is set in accordance with the executive compensation regulations established by the board of directors. Annual salary is paid on a monthly basis (~~₩~~₩65 million per month from January to March and ~~₩~~₩67 million per month from April to June).

Position salary is calculated based on the significance of the position, etc. Position salary is paid on a monthly basis (~~₩~~₩52 million per month from January to March and ~~₩~~₩53 million per month from April to June).

Bonus

Bonus is awarded by the board of directors based on performance and evaluation standards derived from the special bonus provisions of the executive compensation regulations.

Bonus in the range of 0 to 150% of annual salary may be awarded by evaluating the previous year's performance through certain financial indicators, such as revenue and operating profit, and non-financial indicators, such as meeting our medium- to long-term expectations, leadership and other contributions.

Financial indicators: Revenue decreased from ~~₩~~₩28.4 billion for the year ended December 31, 2015 to ~~₩~~₩26.5 billion for the year ended December 31, 2016, and operating

profit decreased from ₩1.6 billion for the year ended December 31, 2015 to ₩1.3 billion for the year ended December 31, 2016.

Non-financial indicators: We maintained industry-leading technology through the continual release of differentiated technologies and products. We are preparing for a successful transition to OLED business through stable production of OLED TVs and by securing a base for our plastic OLED business, while improving profit structure and market position. Mr. Han showed leadership in leading us to achieve our management goals. ₩878 million was calculated as bonus based on the reasons stated above.

**Independent Auditors' Review Report**

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

***Reviewed Financial Statements***

We have reviewed the accompanying condensed consolidated interim financial statements of LG Display Co., Ltd. and subsidiaries (the Group) which comprise the condensed consolidated interim statement of financial position as of June 30, 2017, the condensed consolidated interim statements of comprehensive income (loss) for each of the three-month and six-month periods ended June 30, 2017 and 2016, and statements of changes in equity and cash flows for the six-month periods ended June 30, 2017 and 2016, and notes comprising a summary of significant accounting policies and other explanatory information.

***Management's Responsibility for the Condensed Consolidated Interim Financial Statements***

Management is responsible for the preparation and fair presentation of these condensed consolidated interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed consolidated interim financial statements that are free from material misstatement, whether due to fraud or error.

***Auditors' Responsibility***

Our responsibility is to issue a report on these condensed consolidated interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Security and Futures Commission of the Republic of Korea. A review of interim financial information consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

***Conclusion***

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

***Other Matters***

The procedures and practices utilized in the Republic of Korea to review such condensed consolidated interim financial statements may differ from those generally accepted and applied in other countries.

We audited the consolidated statement of financial position as of December 31, 2016 and the related consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this review report, in accordance with Korean Standards on Auditing, and our report thereon, dated February 21, 2017, expressed an unqualified opinion. The accompanying condensed consolidated statement of financial position of the Group as of December 31, 2016, presented for comparative purposes, is not different from that audited by us from which it was derived in all material respects.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed consolidated interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards ( K-IFRSs ) No.1034, *Interim Financial Reporting*. They do not include all of the information required for full annual consolidated financial statements and should be read in conjunction with the consolidated financial statements of the Group as of and for the year ended December 31, 2016.

(b) **Basis of Measurement**

The condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the statements of financial position:

derivative instruments, financial assets at fair value through profit or loss and available-for-sale financial assets are measured at fair value, and

net defined benefit liabilities are recognized as the present value of defined benefit obligations less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed consolidated interim financial statements are presented in Korean won, which is the Controlling Company's functional currency.

(d) **Use of Estimates and Judgments**

The preparation of the condensed consolidated interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those applied in its consolidated financial statements as of and for the year ended December 31, 2016.

**Table of Contents**

3. Summary of Significant Accounting Policies

The significant accounting policies followed by the Group in the preparation of its condensed consolidated interim financial statements are the same as those followed by the Group in its preparation of the consolidated financial statements as of and for the year ended December 31, 2016, except for the application of K-IFRS No. 1034, *Interim Financial Reporting*, and the amended accounting standards explained below:

(a) Changes in Accounting Policies

(i) K-IFRS No. 1007, *Statement of Cash Flows*

The Group has adopted the amendment to K-IFRS No. 1007, *Statement of Cash Flows*, since January 1, 2017. The amendment to K-IFRS No. 1007 is part of the disclosure initiative to improve presentation and disclosure in financial statements and requires an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities including both changes due to cash flows and non-cash changes such as changes from financing cash flows, changes arising from obtaining or losing control of subsidiaries or other businesses, the effect of changes in foreign exchange rates and changes in fair value and other changes. The Group has applied the amendment and disclosed changes in liabilities arose from financing activities including both changes due to cash flows and non-cash changes in note 26.

(ii) K-IFRS No. 1012, *Income Taxes*

The Group has adopted the amendment to K-IFRS No. 1012, *Income Taxes*, since January 1, 2017. The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendment provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. There is no impact of applying this amendment on the condensed consolidated interim financial statements.

**Table of Contents****3. Summary of Significant Accounting Policies, Continued****(b) New and Amended Standards and Interpretations Not Yet Adopted**

A number of new standards and interpretations are effective for annual periods beginning after January 1, 2017 and earlier application is permitted; however, the Group has not early adopted the following new standards and interpretations in preparing these condensed consolidated interim financial statements.

**(i) K-IFRS No. 1109, *Financial Instruments***

The Group plans to adopt K-IFRS No. 1109, *Financial Instruments*, in its consolidated financial statements for annual periods beginning on January 1, 2018, finalize assessing the financial impact of the adoption of K-IFRS No. 1109 by September 30, 2017 and disclose the results in its consolidated financial statements for the year ending December 31, 2017. As of June 30, 2017, other than the potential impacts described in the consolidated financial statements as of and for the year ended December 31, 2016, there are no significant changes in relation to preparation for the adoption of this new standard.

**(ii) K-IFRS No. 1115, *Revenue from Contracts with Customers***

The Group plans to adopt K-IFRS No. 1115, *Revenue from Contracts with Customers*, in its consolidated financial statements for annual periods beginning on January 1, 2018, finalize assessing the financial impact of the adoption of K-IFRS No. 1115 by September 30, 2017 and disclose the results in its consolidated financial statements for the year ending December 31, 2017. As of June 30, 2017, other than the potential impacts described in the consolidated financial statements as of and for the year ended December 31, 2016, there are no significant changes in relation to preparation for the adoption of this new standard.

**(iii) K-IFRS No. 2112, *Foreign Currency Transactions and Advance Consideration***

According to the new interpretation, K-IFRS No. 2112, *Foreign Currency Transactions and Advance Consideration*, the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the entity shall determine a date of the transaction for each payment or receipt of advance consideration. K-IFRS No. 2122 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. Management is currently assessing the potential impact on its condensed consolidated interim financial statements resulting from the application of new interpretation.

25. Financial Risk Management

The Group is exposed to credit risk, liquidity risk and market risks. The Group identifies and analyzes such risks, and controls are implemented under a risk management system to monitor and manage these risks at below a threshold level.

## (a) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices, will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

## (i) Currency risk

The Group is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the functional currency of the Group, Korean won (KRW). The currencies in which these transactions primarily are denominated are USD, CNY, JPY, etc.

Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by the underlying operations of the Group, primarily KRW and USD.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Group adopts policies to ensure that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

**Table of Contents**25. Financial Risk Management, Continuedii) Sensitivity analysis

A weaker won, as indicated below, against the following currencies which comprise the Group's assets or liabilities denominated in foreign currency as of June 30, 2017 and December 31, 2016, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Group considers to be reasonably possible as of the end of reporting period. The analysis assumes that all other variables, in particular interest rates, would remain constant. The changes in equity and profit or loss would have been as follows:

<i>(In millions of won)</i>	<b>June 30, 2017</b>		<b>December 31, 2016</b>	
	<b>Equity</b>	<b>Profit or loss</b>	<b>Equity</b>	<b>Profit or loss</b>
USD (5 percent weakening)	₩ 45,797	75,734	57,111	63,337
JPY (5 percent weakening)	(11,177)	(11,534)	(8,972)	(7,237)
CNY (5 percent weakening)	(2,686)	(2,365)	(3,410)	7,077
TWD (5 percent weakening)	105	2	88	
EUR (5 percent weakening)	(143)	277	(40)	(79)
PLN (5 percent weakening)	2,132	(203)	1,129	(167)
VND (5 percent weakening)	1,230	1,230	(867)	

A stronger won against the above currencies as of June 30, 2017 and December 31, 2016 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(ii) Interest rate risk

Interest rate risk arises principally from the Group's debentures and borrowings. The Group establishes and applies its policy to reduce uncertainty arising from fluctuations in the interest rate and to minimize finance cost and manages interest rate risk by monitoring of trends of fluctuations in interest rate and establishing plan for countermeasures.

i) Profile

The interest rate profile of the Group's interest-bearing financial instruments as of June 30, 2017 and December 31, 2016 is as follows:

## (b) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers.

The Group's exposure to credit risk of trade and other receivables is influenced mainly by the individual characteristics of each customer. However, management believes that the demographics of the Group's customer base, including the default risk of the country in which customers operate, do not have a significant influence on credit risk since the majority of the customers are global electronic appliance manufacturers operating in global markets.

The Group establishes credit limits for each customer and each new customer is analyzed quantitatively and qualitatively before determining whether to utilize third party guarantees, insurance or factoring as appropriate.

The Group does not establish allowances for receivables under insurance or receivables from customers with a high credit rating. For the rest of the receivables, the Group establishes an allowance for impairment of trade and other receivables that have been individually or collectively evaluated for impairment and estimated on the basis of historical loss experience for assets.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk as of June 30, 2017 and December 31, 2016 are as follows:

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises primarily from the sales and investing activities. Trade accounts and notes receivables are insured in order to manage credit risk and uninsured trade accounts and notes receivables are managed in accordance with the Group's management policy.

## (c) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group has historically been able to satisfy its cash requirements from cash flows from operations and debt and equity financing. To the extent that the Group does not generate sufficient cash flows from operations to meet its capital requirements, the Group may rely on other financing activities, such as external long-term borrowings and offerings of debt securities, equity-linked and other debt securities. In addition, the Group maintains a line of credit with various banks.

The following are the contractual maturities of financial liabilities, including estimated interest payments, as of June 30, 2017.

## (d) Capital management

Management's policy is to maintain a capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Liabilities to equity ratio, net borrowings to equity ratio and other financial ratios are used by management to achieve an optimal capital structure. Management also monitors the return on capital as well as the level of dividends to ordinary shareholders.

(e) Determination of fair value

(i) Measurement of fair value

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

i) Current Assets and Liabilities

The carrying amounts approximate fair value because of the short maturity of these instruments.

ii) Trade Receivables and Other Receivables

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. This fair value is determined for disclosure purposes. The carrying amounts of short-term receivables approximate fair value.

iii) Investments in Equity and Debt Securities

The fair value of marketable available-for-sale financial assets is determined by reference to their quoted closing bid price at the reporting date. The fair value of non-marketable securities is determined using valuation methods.

iv) Non-derivative Financial Liabilities

Fair value, which is determined for disclosure purposes, except for the liabilities at FVTPL, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date.

## (ii) Fair values versus carrying amounts

The fair values of financial assets and liabilities, together with the carrying amounts shown in the condensed consolidated interim statements of financial position, are as follows:

(\*) Excluded from disclosures as the carrying amount approximates fair value.

The basis for determining fair values above by the Group are consistent with those disclosed in the financial statements as of and for the year ended December 31, 2016.

**Table of Contents**25. Financial Risk Management, Continued

## (iii) Financial Instruments measured at cost

Available-for-sale financial assets measured at cost as of June 30, 2017 and December 31, 2016 are as follows:

*(In millions of won)*

	<b>June 30, 2017</b>	<b>December 31, 2016</b>
Intellectual Discovery Co., Ltd.	₩ 729	729
Kyulux, Inc.	1,968	3,266
Henghao Technology Co., Ltd.	1,559	1,559
ARCH Venture Fund VIII, L.P	2,264	2,285
	₩ 6,520	7,839

Available-for-sale-financial assets consist of investments in equity securities and the fair value of some investments in equity securities are measured at cost because the range of reasonable fair value measurements is significant and the probabilities of the various estimates cannot be reasonably assessed since there is not a quoted price in an active market for an identical instrument.

## (iv) Fair values of financial assets and liabilities

## i) Fair value hierarchy

The table below analyzes financial instruments carried at fair value based on the input variables used in the valuation method to measure fair value of assets and liabilities. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: inputs for the asset or liability that are not based on observable market data

**Independent Auditors' Review Report**

Based on a report originally issued in Korean

To the Board of Directors and Shareholders

LG Display Co., Ltd.:

***Reviewed Financial Statements***

We have reviewed the accompanying condensed separate interim financial statements of LG Display Co., Ltd. (the Company ) which comprise the condensed separate interim statement of financial position as of June 30, 2017, the condensed separate interim statements of comprehensive income (loss) for each of the three-month and six-month periods ended June 30, 2017 and 2016, and statements of changes in equity and cash flows for the six-month periods ended June 30, 2017 and 2016, and notes, comprising a summary of significant accounting policies and other explanatory information.

***Management's Responsibility for the Condensed Separate Interim Financial Statements***

Management is responsible for the preparation and fair presentation of these condensed separate interim financial statements in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*, and for such internal controls as management determines necessary to enable the preparation of condensed separate interim financial statements that are free from material misstatement, whether due to fraud or error.

***Auditors' Responsibility***

Our responsibility is to issue a report on these condensed separate interim financial statements based on our reviews.

We conducted our reviews in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Security and Futures Commission of the Republic of Korea. A review of interim financial information consists principally of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

***Conclusion***

Based on our reviews, nothing has come to our attention that causes us to believe that the condensed separate interim financial statements referred to above are not presented fairly, in all material respects, in accordance with Korean International Financial Reporting Standards No. 1034, *Interim Financial Reporting*.

***Other Matters***

The procedures and practices utilized in the Republic of Korea to review such condensed separate interim financial statements may differ from those generally accepted and applied in other countries.

We audited the separate statement of financial position as of December 31, 2016, and the related separate statements of comprehensive income, changes in equity and cash flows for the year then ended, which are not accompanying this review report, in accordance with Korean Standards on Auditing, and our report thereon, dated February 21, 2017, expressed an unqualified opinion. The accompanying condensed separate statement of financial position of the Company as of December 31, 2016, presented for comparative purposes, is not different from that audited by us from which it was derived in all material respects.

2. **Basis of Presenting Financial Statements**

(a) **Statement of Compliance**

The condensed separate interim financial statements have been prepared in accordance with Korean International Financial Reporting Standards (K-IFRSs) No.1034, *Interim Financial Reporting*. They do not include all of the information required for full annual financial statements and should be read in conjunction with the separate financial statements of the Company as of and for the year ended December 31, 2016.

These condensed interim financial statements are separate interim financial statements prepared in accordance with K-IFRS No.1027, *Separate Financial Statements*, presented by a parent, an investor in an associate or a venture in a joint ventures, in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and net assets of the investees.

**Table of Contents**

2. **Basis of Presenting Financial Statements, Continued**

(b) **Basis of Measurement**

The condensed separate interim financial statements have been prepared on the historical cost basis except for the following material items in the statements of financial position:

derivative instruments, financial assets at fair value through profit or loss and available-for-sale financial assets are measured at fair value, and

net defined benefit liabilities are recognized as the present value of defined benefit obligations less the fair value of plan assets

(c) **Functional and Presentation Currency**

The condensed separate interim financial statements are presented in Korean won, which is the Company's functional currency.

(d) **Use of Estimates and Judgments**

The preparation of the condensed separate interim financial statements in conformity with K-IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these condensed separate interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those applied in its separate financial statements as of and for the year ended December 31, 2016.

**Table of Contents**

3. Summary of Significant Accounting Policies

The significant accounting policies followed by the Company in the preparation of its condensed separate interim financial statements are the same as those followed by the Company in its preparation of the separate financial statements as of and for the year ended December 31, 2016, except for the application of K-IFRS No. 1034, *Interim Financial Reporting*, and the amended accounting standards explained below:

(a) Changes in Accounting Policies

(i) K-IFRS No. 1007, *Statement of Cash Flows*

The Company has adopted the amendment to K-IFRS No. 1007, *Statement of Cash Flows*, since January 1, 2017. The amendment to K-IFRS No. 1007 is part of the disclosure initiative to improve presentation and disclosure in financial statements and requires an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities including both changes due to cash flows and non-cash changes such as changes from financing cash flows, changes arising from obtaining or losing control of subsidiaries or other businesses, the effect of changes in foreign exchange rates and changes in fair value and other changes. The Company has applied the amendment and disclosed changes in liabilities arose from financing activities including both changes due to cash flows and non-cash changes in note 25.

(ii) K-IFRS No. 1012, *Income Taxes*

The Company has adopted the amendment to K-IFRS No. 1012, *Income Taxes*, since January 1, 2017. The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of that deductible temporary difference. Furthermore, the amendment provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. There is no impact of applying this amendment on the condensed separate interim financial statements.

**Table of Contents****3. Summary of Significant Accounting Policies, Continued****(b) New and Amended Standards and Interpretations Not Yet Adopted**

A number of new standards and interpretations are effective for annual periods beginning after January 1, 2017 and earlier application is permitted; however, the Company has not early adopted the following new standards and interpretations in preparing these condensed separate interim financial statements.

**(i) K-IFRS No. 1109, *Financial Instruments***

The Company plans to adopt K-IFRS No. 1109, *Financial Instruments*, in its separate financial statements for annual periods beginning on January 1, 2018, finalize assessing the financial impact of the adoption of K-IFRS No. 1109 by September 30, 2017 and disclose the results in its separate financial statements for the year ending December 31, 2017. As of June 30, 2017, other than the potential impacts described in the separate financial statements as of and for the year ended December 31, 2016, there are no significant changes in relation to preparation for the adoption of this new standard.

**(ii) K-IFRS No. 1115, *Revenue from Contracts with Customers***

The Company plans to adopt K-IFRS No. 1115, *Revenue from Contracts with Customers*, in its separate financial statements for annual periods beginning on January 1, 2018, finalize assessing the financial impact of the adoption of K-IFRS No. 1115 by September 30, 2017 and disclose the results in its separate financial statements for the year ending December 31, 2017. As of June 30, 2017, other than the potential impacts described in the separate financial statements as of and for the year ended December 31, 2016, there are no significant changes in relation to preparation for the adoption of this new standard.

**(iii) K-IFRS No. 2112, *Foreign Currency Transactions and Advance Consideration***

According to the new interpretation, K-IFRS No. 2112, *Foreign Currency Transactions and Advance Consideration*, the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the entity shall determine a date of the transaction for each payment or receipt of advance consideration. K-IFRS No. 2122 is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted. Management is currently assessing the potential impact on its condensed separate interim financial statements resulting from the application of new interpretation.

**Table of Contents****24. Financial Risk Management**

The Company is exposed to credit risk, liquidity risk and market risks. The Company identifies and analyzes such risks, and controls are implemented under a risk management system to monitor and manage these risks at below a threshold level.

**(a) Market risk**

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

**(i) Currency risk**

The Company is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the functional currency of the Company, Korean won (KRW). The currencies in which these transactions primarily are denominated are USD, JPY, etc.

Interest on borrowings is denominated in the currency of the borrowing. Generally, borrowings are denominated in currencies that match the cash flows generated by the underlying operations of the Company, primarily KRW and USD.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Company adopts policies to ensure that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

**i) Exposure to currency risk**

The Company's exposure to foreign currency risk based on notional amounts as of June 30, 2017 and December 31, 2016 is as follows:

## ii) Sensitivity analysis

A weaker won, as indicated below, against the following currencies which comprise the Company's assets or liabilities denominated in foreign currency as of June 30, 2017 and December 31, 2016, would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis is based on foreign currency exchange rate variances that the Company considers to be reasonably possible as of the end of reporting period. The analysis assumes that all other variables, in particular interest rates, would remain constant. The changes in equity and profit or loss would have been as follows:

*(In millions of won)*

	June 30, 2017		December 31, 2016	
	Equity	Profit or loss	Equity	Profit or loss
USD (5 percent weakening)	₩ 87,850	87,850	69,986	69,986
JPY (5 percent weakening)	(9,756)	(9,756)	(6,383)	(6,383)
CNY (5 percent weakening)	(490)	(490)	8,609	8,609
PLN (5 percent weakening)	(93)	(93)	(109)	(109)
EUR (5 percent weakening)	99	99	96	96

A stronger won against the above currencies as of June 30, 2017 and December 31, 2016 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

## (ii) Interest rate risk

Interest rate risk arises principally from the Company's debentures and borrowings. The Company establishes and applies its policy to reduce uncertainty arising from fluctuations in the interest rate and to minimize finance cost and manages interest rate risk by monitoring of trends of fluctuations in interest rate and establishing plan for countermeasures.

## i) Profile

The interest rate profile of the Company's interest-bearing financial instruments as of June 30, 2017 and December 31, 2016 is as follows:

(In millions of won)

	<b>June 30, 2017</b>	<b>December 31, 2016</b>

<b>Variable rate instruments</b>		
Financial liabilities	₩ (1,303,445)	(1,649,334)

## ii) Equity and profit or loss sensitivity analysis for variable rate instruments

As of June 30, 2017 and December 31, 2016, a change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below for each 12-month period following the reporting dates. This analysis assumes that all other variables, in particular foreign currency rates, remain constant.

(In millions of won)

	<b>Equity</b>		<b>Profit or loss</b>

## (b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers.

The Company's exposure to credit risk of trade and other receivables is influenced mainly by the individual characteristics of each customer. However, management believes that the demographics of the Company's customer base, including the default risk of the country in which customers operate, do not have a significant influence on credit risk since the majority of the customers are global electronic appliance manufacturers operating in global markets.

The Company establishes credit limits for each customer and each new customer is analyzed quantitatively and qualitatively before determining whether to utilize third party guarantees, insurance or factoring as appropriate.

The Company does not establish allowances for receivables under insurance or receivables from customers with a high credit rating. For the rest of the receivables, the Company establishes an allowance for impairment of trade and other receivables that have been individually or collectively evaluated for impairment and estimated on the basis of historical loss experience for assets.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk as of June 30, 2017 and December 31, 2016 are as follows:

*(In millions of won)*

	<b>June 30, 2017</b>	<b>December 31, 2016</b>

	<b>₩ 6,184,794</b>	<b>6,923,460</b>

In addition to the financial assets above, as of June 30, 2017, the Company provides payment guarantees of ₩307,692 million, for its subsidiaries.

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises primarily from the sales and investing activities. Trade accounts and notes

receivables are insured in order to manage credit risk and uninsured trade accounts and notes receivables are managed in accordance with the Company's management policy.

## (c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company has historically been able to satisfy its cash requirements from cash flows from operations and debt and equity financing. To the extent that the Company does not generate sufficient cash flows from operations to meet its capital requirements, the Company may rely on other financing activities, such as external long-term borrowings and offerings of debt securities, equity-linked and other debt securities. In addition, the Company maintains a line of credit with various banks.

The following are the contractual maturities of financial liabilities, including estimated interest payments, as of June 30, 2017.
