Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the Quarterly Period Ended September 30, 2018

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period from _____ to _____

Commission File No. 001-08032

SAN JUAN BASIN ROYALTY TRUST

(Exact name of registrant as specified in the Amended and Restated San Juan Basin Royalty Trust Indenture)

Texas
(State or other jurisdiction of
incorporation or organization)

75-6279898
(I.R.S. Employer
Identification No.)

Compass Bank

300 W. 7th Street, Suite B

Fort Worth, Texas 76102

(Address of principal executive offices) (Zip Code)

(866) 809-4553

(Registrant's telephone number, including area code)

N/A

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, a smaller reporting company or an emerging growth company. See definitions of large accelerated filer, accelerated filer, smaller reporting company or emerging growth company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Number of Units of beneficial interest outstanding at November 9, 2018: 46,608,796

Table of Contents

1. Basis of Presentation

The condensed financial statements included herein have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). These condensed financial statements should be read in conjunction with the financial statements and the notes thereto included in San Juan Basin Royalty Trust (the Trust) Annual Report on Form 10-K for the year ended December 31, 2017. In the opinion of Compass Bank, the trustee of the Trust (the Trustee), and based upon information provided to the Trust by Hilcorp San Juan L.P. (Hilcorp), the present owner of certain oil and gas interests originally owned by Southland Royalty Company (the Subject Interests) in properties located in the San Juan Basin of northwestern New Mexico (the Royalty Income), all adjustments, consisting only of normal recurring adjustments, have been included that are necessary to fairly present the assets, liabilities and trust corpus of the Trust at September 30, 2018 and December 31, 2017 and the distributable income and changes in trust corpus for the three-month and nine-month periods ended September 30, 2018 and 2017. The distributable income for such interim periods is not necessarily indicative of the distributable income for the full year.

The financial statements of the Trust are prepared on the following basis and are not intended to present the financial position and results of operations of the Trust in conformity with U.S. generally accepted accounting principles (GAAP):

The net proceeds attributable to the 75% net overriding royalty interest (the Royalty) that burdens the Subject Interests recorded for a month is the amount computed and paid by Hilcorp to the Trustee for the Trust. Royalty Income consists of the proceeds received by Hilcorp from the sale of production less accrued production costs, development and drilling costs, applicable taxes, operating charges, and other costs and deductions, multiplied by 75%. The calculation of net proceeds by Hilcorp for any month includes adjustments to proceeds and costs for prior months and impacts the Royalty Income paid to the Trust and the distribution to Unit Holders for that month. See the sections entitled *Gross Proceeds and Severance Tax True-ups* and *Outstanding Months to be Reconciled/Trued-up* in Note 3 Commitments and Contingencies and Item 4 of Part I of this Quarterly Report on Form 10-Q entitled *Controls and Procedures* for a more detailed explanation of the true-up process for net income reporting and distributions to Unit Holders.

Although permitted under the Net Overriding Royalty Conveyance that transferred the Royalty to the Trust (the Conveyance), Hilcorp has informed the Trust that, for wells operated by Hilcorp, it does not intend to accrue lease operating expenses to the Trust.

Hilcorp has informed the Trust that oil revenue is typically reported to the Trust based on actual volumes and pricing and that due to timing, Hilcorp reports accrued natural gas revenues to the Trust based on actual production volumes from the meters. Generally, Hilcorp reconciles the natural gas revenue accruals with the plant processing statements the month following the previously reported financial information.

Trust expenses recorded are based on liabilities paid and cash reserves established from Royalty Income for liabilities and contingencies.

Distributions to Unit Holders are recorded when declared by the Trustee.

The Conveyance provides that any excess production costs applicable to the Subject Interests over gross proceeds from such properties must be recovered from future net proceeds before Royalty Income is again paid to the Trust. The Trust is not obligated to reimburse Hilcorp for any excess production costs if future gross proceeds from the Subject Interests are insufficient to cover such costs. Gross excess production costs were \$140,780 as of September 30, 2018.

The financial statements of the Trust differ from financial statements prepared in accordance with GAAP because revenues are not accrued in the month of production; certain cash reserves may be established for liabilities and contingencies which would not be accrued in financial statements prepared in accordance with GAAP; expenses are recorded when paid instead of when incurred; and amortization of the Royalty calculated on a unit-of-production basis is charged directly to trust corpus instead of as an expense. Most accounting pronouncements apply to entities whose financial statements are prepared in accordance with GAAP, directing such entities to accrue or defer revenues and expenses in a period other than when such revenues were received or expenses were paid. Because the Trust's financial statements are prepared on the modified cash basis, as described above, most accounting pronouncements are not applicable to the Trust's financial statements, which include the provisions of the new revenue recognition standard in ASU 2014-09. The Trust has evaluated the impact of ASC 842, *Leases*, and determined that this standard has no impact on the Trust's financial statements.

Table of Contents

Based upon the advice provided to the Trustee by consultants to the Trust, the Trustee has determined that there are no additional disclosures required based on the Trust's method of accounting. This comprehensive basis of accounting corresponds to the accounting permitted for royalty trusts by the SEC, as specified by Staff Accounting Bulletin Topic 12:E, Financial Statements of Royalty Trusts.

The Trustee routinely reviews the Trust's royalty interests in oil and natural gas properties for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. If an impairment event occurs and it is determined that the carrying value of the Trust's royalty interests may not be recoverable, an impairment will be recognized as measured by the amount by which the carrying amount of the royalty interests exceeds the fair value of these assets, which would likely be measured by discounting projected cash flows and is charged directly to trust corpus instead of as an expense. There was no impairment of the Trust's assets as of September 30, 2018.

2. Federal Income Taxes

For federal income tax purposes, the Trust constitutes a fixed investment trust which is taxed as a grantor trust. A grantor trust is not subject to tax at the trust level. The Unit Holders are considered to own the Trust's income and principal as though no trust were in existence. The income of the Trust is deemed to have been received or accrued by each Unit Holder at the time such income is received or accrued by the Trust rather than when distributed by the Trust.

The Trust is a widely held fixed investment trust (WHFIT) classified as a non-mortgage widely held fixed investment trust (NMWHFIT) for federal income tax purposes. The Trustee is the representative of the Trust that will provide tax information in accordance with the applicable U.S. Treasury Regulations governing the information reporting requirements of the Trust as a WHFIT and a NMWHFIT.

The Royalty constitutes an economic interest in oil and natural gas properties for federal income tax purposes. Unit Holders must report their share of the production revenues of the Trust as ordinary income from oil and natural gas royalties and are entitled to claim depletion with respect to such income. The Royalty is treated as a single property for depletion purposes. The Trust has on file technical advice memoranda confirming such tax treatment.

Sales of natural gas production from certain coal seam wells drilled prior to January 1, 1993, qualified for federal income tax credits under Section 29 (now Section 45K) of the Internal Revenue Code of 1986, as amended (the Code), through 2002 but not thereafter. Accordingly, under present law, the Trust's production and sale of natural gas from coal seam wells does not qualify for tax credit under Section 45K of the Code (the Section 45 Tax Credit). Congress has at various times since 2002 considered energy legislation, including provisions to reinstate the Section 45 Tax Credit in various ways and to various extents, but no legislation that would qualify the Trust's current production for such credit has been enacted. No prediction can be made as to what future tax legislation affecting Section 45K of the Code may be proposed or enacted or, if enacted, its impact, if any, on the Trust and the Unit Holders.

The classification of the Trust's income for purposes of the passive loss rules may be important to a Unit Holder. Royalty income such as that derived through the Trust will generally be treated as portfolio income that may not be offset or reduced by passive losses.

Tax positions taken by the Trust related to the Trust's pass-through status and state tax positions have been reviewed, and the Trustee is of the opinion that the material tax positions it has taken would more likely than not be sustained by examination. As of September 30, 2018, the Trust's tax years 2014 and thereafter remain subject to examination.

Each Unit Holder should consult his or her own tax advisor regarding tax compliance matters related to such Unit Holder's interest in the Trust.

3. Commitments and Contingencies

Contingencies related to the Subject Interests that are unfavorably resolved would generally be reflected by the Trust as reductions to future Royalty Income payments to the Trust with corresponding reductions to cash distributions to Unit Holders. See Note 1 Basis of Presentation, for a summary of the terms of the Conveyance with respect to recovery of costs, and Note 4 Settlements and Litigation, for a discussion of the status of litigation matters.

Table of Contents

Gross Proceeds and Severance Tax Estimates. The sale of the Subject Interests from Burlington to Hilcorp closed on July 31, 2017. The Trust has been advised by Hilcorp that during the transition period since its acquisition of the Subject Interests that there has been a delay in the transfer of historical information and knowledge from Burlington to Hilcorp. During this transition, the Trust has been advised by Hilcorp that for certain months it has recorded estimates of cash revenues and expenses, based on the best information available. Hilcorp has informed the Trust that it believes that its estimates have been prepared in accordance with the Conveyance.

Hilcorp's process of reconciling actual revenue and severance tax numbers versus previously reported estimated numbers (which the Trust refers to as "true-ups") from prior periods during fiscal 2017 are still occurring and being reported in 2018. Thus, distributions to the Trust from Hilcorp in any given month may be subject to adjustment based upon prior months' true-ups, plus interest due to the Trust. Generally, there is a two or three month lag in Hilcorp trueing-up previously reported estimated financial information; however, Hilcorp has notified the Trustee that as of the date of this Quarterly Report, it will still need to true-up the previously reported natural gas production (and for the trust distribution months of January and October 2018, oil production) and financial information for the trust distribution months of January 2018 and June through October 2018 and, therefore, possibly adjust future distributions of net proceeds to reflect such true-ups plus interest on such amounts (as required by the Conveyance) to the extent an underpayment has occurred.

The Trust has been advised by Hilcorp that as a result of its continued transitioning of historic information and knowledge from Burlington to Hilcorp, Hilcorp estimated the oil and natural gas revenue and severance taxes for the October 2017 through January 2018 distribution months. Hilcorp included an additional \$1.0 million in "Other" revenue in the gross proceeds estimates for each of the October, November and December 2017 and January 2018 distribution months based on Hilcorp's estimated increased natural gas production. However, such "Other" proceeds were subsequently offset due to lower natural gas pricing.

Gross Proceeds and Severance Tax True-ups. Hilcorp has reconciled actual revenue and severance tax numbers versus the previously reported numbers (referred to as "true-ups") and adjusted the distributions for certain months. More specifically, the July 2018 distribution included a true-up of oil production used in the December 2017 and June 2018 distributions which totaled a net reduction of \$60,000. The August 2018 distribution included a true-up of oil production used in the July 2018 distribution resulting in a net increase of \$41,000. The September 2018 distribution included a true-up of natural gas production used in the December 2017 distribution which resulted in a net decrease of \$92,000.

Outstanding Months to be Reconciled/Trued-up. As of the date of this Quarterly Report, Hilcorp has not yet trued-up the previously reported natural gas production (and for the trust distribution months of January and October 2018, oil production) and financial information for the trust distribution months of January 2018 and June through October 2018. Furthermore, Hilcorp has not yet trued-up the \$1.0 million in "Other" gross proceeds included in both the December 2017 and January 2018 distributions. Upon Hilcorp's true-ups of the prior estimates paid to the Trust, any true-ups, plus interest, may result in adjustments to future distributions to Unit Holders.

4. Settlements and Litigation

For information about the Trust's 2014 litigation with Burlington, see Part I, Item 3. Legal Proceedings in the Trust's Annual Report on Form 10-K for the year ended December 31, 2017.

5. Subsequent Events

Reversal of Capital Expenditures for Well Recompletions. In September 2018, the Trustee reported that, based on capital expenditure amounts charged by Hilcorp to the Subject Interests, it would not declare a monthly cash distribution to Unit holders primarily because of excess capital expenditures in the July 2018 production month. Following the excess production costs Hilcorp charged to the Trust in the July 2018 production month that resulted in no distribution being paid by the Trust to Unit holders in September 2018, at the Trustee's request, the Trust's external compliance auditors investigated the increased capital expenditures for additional well recompletions charged to the Trust. Upon review of the information Hilcorp provided to the Trust, they discovered, and subsequently informed Hilcorp that the Trust's 75% net overriding royalty interest did not burden Hilcorp's working interest in certain wells for which the Trust was charged recompletion capital expenditures. As a result, such expenditures should not have been charged to the Trust. Hilcorp's royalty payment calculation in its October 2018 report to the Trust included a gross approximately \$2.4 million reversal of such capital expenditures, plus interest, along with the recoupment by Hilcorp of \$140,780 in gross excess production costs from the September 2018 distribution month.

Table of Contents

2018 Capital Expenditure Budget Second Revised. Hilcorp is reviewing its Revised 2018 Capital Expenditure Plan that the Trust disclosed on September 20, 2018, to determine how much of the disclosed future capital expenses would remain attributable to the Trust. The Trust intends to continue to disclose promptly such information to its Unit Holders following receipt and verification.

Item 2. Trustee's Discussion and Analysis of Financial Condition and Results of Operations. Overview

The Trust is an express trust created under the laws of the state of Texas by the San Juan Basin Royalty Trust Indenture entered into on November 1, 1980 between Southland Royalty Company ("Southland") and The Fort Worth National Bank. Effective as of September 30, 2002, the original indenture governing the Trust was amended and restated and, effective as of December 12, 2007, the restated indenture was again amended and restated, which the Trust refers to as the Indenture. As a result of a series of mergers and other transactions involving the Trustee of the Trust, the current Trustee of the Trust is Compass Bank, which is a wholly-owned subsidiary of Banco Bilbao Vizcaya Argentaria, S.A.

The Conveyance and the Royalty

Pursuant to the Net Overriding Royalty Conveyance (the Conveyance) effective November 1, 1980, Southland conveyed the Royalty that burdens the Subject Interests in properties located in the San Juan Basin of northwestern New Mexico to the Trust. Subsequent to the Conveyance of the Royalty, through a series of sales, assignments and mergers, Southland's successor became Hilcorp, which acquired the Subject Interests from Burlington Resources Oil & Gas Company LP ("Burlington"), an indirect wholly-owned subsidiary of ConocoPhillips, on July 31, 2017.

The Royalty constitutes the principal asset of the Trust. The beneficial interest in the Royalty is divided into 46,608,796 units (the Units) representing undivided fractional interests in the beneficial interest of the Trust equal to the number of shares of the common stock of Southland outstanding as of the close of business on November 3, 1980. Each stockholder of Southland of record at the close of business on November 3, 1980 received one freely tradable Unit for each share of the common stock of Southland then held. Holders of Units in the Trust are referred to herein as Unit Holders.

The Trustee

The primary function of the Trustee is to collect Royalty Income, to pay all expenses and charges of the Trust and distribute the remaining available income to the Unit Holders. The amount of income distributable to Unit Holders, which we refer to as Distributable Income, depends on the amount of Royalty Income and interest received by the Trust, as well as the amount of expenses paid by the Trust and any change in cash reserves. The Trust has no employees, officers or directors. All administrative functions of the Trust are performed by the Trustee.

Hilcorp

Hilcorp is the principal operator of the majority of the Subject Interests. Hilcorp is also responsible, subject to the terms of a prior agreement with the Trust, for marketing the oil and natural gas production from such properties, either under existing sales contracts or under future arrangements, at the best prices and on the best terms it shall deem reasonably obtainable in the circumstances. A very high percentage of the Royalty Income is attributable to the production and sale by Hilcorp of natural gas from the Subject Interests. Accordingly, the market price for natural gas

produced and sold from the San Juan Basin heavily influences the amount of Royalty Income distributed by the Trust and, by extension, the price of the Units.

Results of Operations Three Months Ended September 30, 2018 and 2017

Royalty Income

Royalty Income consists of monthly net proceeds attributable to the Royalty. Royalty Income for the three and nine months ended September 30, 2018 and 2017 was determined as shown in the following table:

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Gross proceeds from the Subject				
Interests:				
Natural Gas	\$ 15,103,981	\$ 16,466,051	\$ 45,035,952	\$ 52,206,242
Oil	624,120	586,312	2,172,015	1,692,296
Other	507,000 ⁽¹⁾	9,998,201 ⁽²⁾	(493,000) ⁽⁴⁾	9,998,201 ⁽²⁾
Total	16,235,101	27,050,564	46,714,967	63,896,739
Production Costs:				
Severance tax gas	2,036,314	1,727,011	5,809,115	5,420,515
Severance tax oil	43,931	55,076	193,200	162,641
Other		(1,000,000) ⁽³⁾	(3,734)	(1,000,000) ⁽³⁾
Lease operating expense and property tax	7,482,530	5,985,383	20,743,335	18,676,317
Capital expenditures	2,811,568	122,697	3,262,516	397,934
Total	12,374,343	6,890,167	30,004,432	23,657,407
Production costs in excess of gross proceeds	140,780		140,780	
Net profits	4,001,538	20,160,397	16,851,315	40,239,332
Net overriding royalty interest	75%	75%	75%	75%
Royalty Income	\$ 3,001,153	\$ 15,120,298	\$ 12,638,486	\$ 30,179,499

1. Estimated income from outside operated properties.
2. Includes \$7.5 million (\$10.0 million gross up) received for settlement of the 2014 Litigation offset by \$1,799 for Burlington's revenue adjustment for gas imbalance settlements.
3. Credit by Burlington for reversal of accrued capital expenses.
4. Reflects \$1.0 million in estimated additional revenue received in the Trust month of January 2018 and \$507,000 in estimated income for outside operated properties received in the third quarter of 2018, offset by a \$2.0 million reduction due to the reversal of the \$1.0 million gross revenue estimate received in Trust months October and November 2017.

Due to the transition to Hilcorp from Burlington, portions of the Royalty Income in the table above for the three and nine months ended September 30, 2018 consist of estimated oil and natural gas gross proceeds and true-ups from prior month distributions. See Part I, Item 1. Unaudited Financial Statements, Note 3 Commitments and Contingencies, for

a discussion of the gross proceeds estimates and true-ups.

The Royalty Income distributed to the Trust for both the three and nine months ended September 30, 2018 was lower than that distributed during the same periods of 2017 due primarily to lower natural gas prices, reductions in revenue due to Hilcorp's true-ups, and the \$7.5 million settlement amount received from Burlington in September 2017 with respect to the 2014 Litigation. The average natural gas price decreased from \$2.54 per Mcf for the three months ended September 30, 2017, to \$1.76 per Mcf for the three months ended September 30, 2018, and the average natural gas price decreased from \$2.70 per Mcf for the nine months ended September 30, 2017, to \$1.80 per Mcf for the nine months ended September 30, 2018.

Gross Proceeds from Subject Interests. Total Gross proceeds decreased \$10.8 million or 40% for the three months ended September 30, 2018 compared to the three months ended September 30, 2017 and decreased \$17.2 million or 27% for the nine months ended September 30, 2018 compared to the nine months ended September 30, 2017. The decrease was primarily attributable to lower natural gas prices, to reductions in revenue due to Hilcorp's true-ups, and to the \$7.5 million (\$10.0 million gross up) received from Burlington in September 2017 for settlement of the 2014 Litigation.

Capital Expenditures. Capital expenditures increased \$2.7 million or approximately 2,191% for the three months ended September 30, 2018 compared to the three months ended September 30, 2017 and increased \$2.9 million or approximately 720% for the nine months ended September 30, 2018 compared to the nine months ended September 30, 2017. The significant increase in capital expenditures was due to an error in Hilcorp's reporting of expenses for certain well recompletions. For a more detailed discussion see Note 5 Subsequent Events, *Reversal of Capital Expenditures for Well Recompletions*, in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Table of Contents

Severance Taxes. Aggregate severance taxes increased \$0.3 million or approximately 17% for the three months ended September 30, 2018 compared to the three months ended September 30, 2017, and increased \$0.4 million or approximately 8% for the nine months ended September 30, 2018 compared to the nine months ended September 30, 2017. The increase was primarily attributable to certain tax exemptions that have not been applied to the time period and higher revenues. Severance taxes represented approximately 13% of gross proceeds for the three months ended September 30, 2018, compared to approximately 10.5%, excluding the \$7.5 million settlement amount, for the same period of 2017. Severance taxes represented approximately 13% of gross proceeds for the nine months ended September 30, 2018 compared to 10.4%, excluding the \$7.5 million settlement amount, for the same period of 2017. The increase was primarily attributable to certain tax exemptions that have not been applied to the time period and higher revenues.

Lease Operating Expenses and Property Taxes. Lease operating expenses and property taxes increased \$1.5 million or approximately 25% for the three months ended September 30, 2018 compared to the three months ended September 30, 2017, and increased \$2.1 million or approximately 11% for the nine months ended September 30, 2018 compared to the nine months ended September 30, 2017. The increases were primarily due to differences between operators over the comparison periods and increased activity at the Subject Interests by Hilcorp which is commiserate with the increase in oil prices offset by a decrease in natural gas prices. Natural gas production from the Subject Interests increased approximately 33% for the three months ended September 30, 2018 and approximately 29% for the nine months ended September 30, 2018 as compared to the same periods in 2017, respectively. Production has increased primarily due to Hilcorp's successful recompletion, workover and reactivation program. Hilcorp continues to find high quality downhole projects and surface facility optimizations which grow rate and reserves.

Monthly lease operating expenses of the Subject Interests, including property taxes, in third quarter 2018 averaged approximately \$2.5 million, as compared to \$2.0 million in the third quarter of 2017. Monthly lease operating expenses of the Subject Interests, including property taxes, in the first nine months of 2018 averaged approximately \$2.3 million, as compared to \$2.1 million in the first nine months of 2017.

Distributable Income

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Royalty Income	\$ 3,001,153	\$ 15,120,298 ⁽¹⁾	\$ 12,638,486	\$ 30,179,499 ⁽¹⁾
Interest Income	4,648	2,446	13,890	5,305
Total income	3,005,801	15,122,744	12,652,376	30,184,804
General and administrative expenses	(273,736)	(286,756)	(1,161,023)	(1,220,375)
Decrease in cash reserves	97,909		97,909	
Distributable Income	\$ 2,829,974	\$ 14,835,988	\$ 11,589,262	\$ 28,964,429
Distributable Income per Unit (46,608,796 Units)	\$ 0.060718	\$ 0.318308	\$ 0.248650	\$ 0.621437

(1)

Edgar Filing: SAN JUAN BASIN ROYALTY TRUST - Form 10-Q

Includes \$7.5 million received for settlement of the 2014 Litigation and a \$1.0 million gross credit for the reversal of accrued capital expenses.

Distributable Income. Distributable Income decreased by approximately \$12 million or 81% to \$2.8 million (\$0.060718 per Unit) for the three months ended September 30, 2018 from \$14.8 million (\$0.318308 per Unit) for the three months ended September 30, 2017, which included aggregate true-ups in 2018 by Hilcorp of approximately \$0.1 million that decreased Royalty Income from \$3.1 million to \$3 million. Distributable Income decreased by approximately \$17.4 million or 60% to \$11.6 million (0.248650 per Unit) for the nine months ended September 30, 2018 from \$29 million (\$0.621437 per Unit) for the nine months ended September 30, 2017, which included aggregate true-ups in 2018 by Hilcorp of \$1.9 million that decreased Royalty Income from \$14.5 million to \$12.6 million.

Table of Contents

Distributable Income for the three and nine months ended September 30, 2018 was lower than that distributed during the same periods of 2017 due primarily to lower natural gas prices, a reduction of revenue from Hilcorp's true-ups of estimated versus actual revenue, and no Royalty Income being reported for the September 2018 distribution month. Distributable Income was also higher in those periods in 2017 because it included \$7.5 million for settlement of the 2014 Litigation and a \$1.0 million gross credit for the reversal of accrued capital expenses. There was no Distributable Income in September 2018 due to capital expenditures for certain well recompletions erroneously charged to the Trust, resulting in \$140,780 in gross excess production costs.

Based on 46,608,796 Units outstanding, the per-Unit distributions during the third quarter of 2018 were as follows:

July	\$ 0.029077
August	0.031641
September	0.000000
Quarter Total	\$ 0.060718

Interest Income. Interest income increased by approximately \$2.2 thousand or approximately 90% to \$4.7 thousand for the three months ended September 30, 2018 from approximately \$2.5 thousand for the three months ended September 30, 2017. Interest income increased by approximately \$8.7 thousand or approximately 162% to \$14 thousand for the nine months ended September 30, 2018 from approximately \$5.3 thousand for the nine months ended September 30, 2017. Such increases in interest income were primarily due to higher yields on short-term investments held by the Trust.

General & Administrative Expenses. General and administrative expenses decreased approximately \$13 thousand or approximately 4.5% for the three months ended September 30, 2018 compared to the three months ended September 30, 2017, and decreased approximately \$59 thousand or approximately 4.9% for the nine months ended September 30, 2018 compared to the nine months ended September 30, 2017. The decrease was primarily attributable to differences in timing in the receipt and payment of certain expenses by the Trust.

Cash Reserves. The net amount of \$98 thousand was withdrawn from the established \$1.0 million cash reserve in September 2018 to pay Trust general and administrative expenses. Total cash reserves were \$0.9 million as of September 30, 2018. The primary purpose of the cash reserves is to have sufficient funds to cover monthly general and administrative expenses in the event that there is insufficient Royalty Income to cover such expenses. The Trust received sufficient Royalty Income from Hilcorp in October 2018 to replenish the cash reserve balance back to \$1.0 million. The Trustee did not increase the cash reserves during 2017 and does not anticipate any increases in 2018, although it cannot guarantee that the Trustee will not increase such cash reserves in the future.

Liquidity and Capital Resources

The Trust's principal source of liquidity and capital is Royalty Income. The Trust's distribution of income to Unit Holders is funded by Royalty Income after payment of Trust expenses. The Trust is not liable for any production costs or liabilities attributable to the Royalty. If at any time the Trust receives more than the amount due under the Royalty, it is not obligated to return such overpayment, but the amounts payable to it for any subsequent period are reduced by such amount, plus interest, at a rate specified in the Conveyance. If the Trustee determines that the Trust does not have sufficient funds to pay the Trust's liabilities, the Trustee may borrow funds on behalf of the Trust, in which case no distributions will be made to Unit Holders until such borrowings are repaid in full. The Trustee may not sell or dispose

of any part of the assets of the Trust without the affirmative vote of 75% of all of the Units outstanding; however, the Trustee may sell up to 1% of the value of the Royalty (as determined pursuant to the Indenture) during any 12-month period without the consent of the Unit Holders.

Oil and Natural Gas Production

Royalty Income for the quarter ended September 30, 2018 is associated with oil and natural gas production during May through July 2018 from the Subject Interests. Production of oil and natural gas and related average sales prices attributable to each of the Subject Interests and the Royalty for the three months ended September 30, 2018 and 2017 were as follows:

Table of Contents

	For the Three Months Ended September 30, 2018		2017	
	Natural Gas (Mcf)	Oil and Condensate (Bbls)	Natural Gas (Mcf)	Oil and Condensate (Bbls)
Production				
Subject Interests	8,589,309	10,149	6,470,208	16,894
Royalty	1,640,691	3,486	2,911,089	7,374
Average Price (per Mcf/Bbl) ¹	\$1.86	\$56.02	\$2.54	\$34.71
Average Price (per Mcf/Bbl) ²	\$1.76	\$61.49	\$2.54	\$34.71

¹ Reflects Average Price (per Mcf/Bbl) before revenue true-up.

² Reflects Average Price (per Mcf/Bbl) after revenue true-up.

Production of oil and natural gas and related average sales prices attributable to each of the Subject Interests and the Royalty for the nine months ended September 30, 2018 and 2017 were as follows:

	For the Nine Months Ended September 30, 2018		2017	
	Natural Gas (Mcf)	Oil and Condensate (Bbls)	Natural Gas (Mcf)	Oil and Condensate (Bbls)
Production				
Subject Interests	24,958,635	42,656	19,314,802	46,525
Royalty	7,400,583	23,992	8,671,241	20,453
Average Price (per Mcf/Bbl) ¹	\$1.95	\$50.73	\$2.70	\$36.37
Average Price (per Mcf/Bbl) ²	\$1.80	\$50.92	\$2.70	\$36.37

¹ Reflects Average Price (per Mcf/Bbl) before revenue true-up.

² Reflects Average Price (per Mcf/Bbl) after revenue true-up.

Portions of the production numbers and average sales prices in the table above for the three and nine months ended September 30, 2018 consist of estimated oil and natural gas gross proceeds and true-ups. For a discussion of the gross proceeds estimates and true-ups, see the sections entitled *Gross Proceeds and Severance Tax True-ups* and *Outstanding Months to be Reconciled/Trued-up* in Part I, Item 1, Note 3 Commitments and Contingencies and Item 4 of Part I of this Quarterly Report on Form 10-Q entitled *Controls and Procedures* for a more detailed explanation of the true-up process for distributable income reporting and distributions to Unit Holders.

The Trust recognizes production during the month in which the related net proceeds attributable to the Royalty are paid to the Trust by Hilcorp, based upon estimated oil and natural gas production. Royalty Income for a calendar year is based on the actual natural gas and oil production during the period beginning with November of the preceding calendar year through October of the current calendar year. Sales volumes attributable to the Royalty are determined by dividing the net profits by the Trust from the sale of oil and natural gas, respectively, by the prices received by Hilcorp for sales of such volumes from the Subject Interests, taking into consideration production taxes attributable to the Subject Interests. Because the oil and natural gas sales attributable to the Royalty are based upon an allocation formula dependent on such factors as price and cost, including Hilcorp's capital expenditures and the timing of

Hilcorp's true-ups of prior reported estimated oil and natural gas production data, the aggregate sales amounts from the Subject Interests may not provide a meaningful comparison to sales attributable to the Royalty. Future true-ups will impact future royalty proceeds, but will not change the reported amounts due to the accounting basis used.

The fluctuations in natural gas production that have occurred during the three-month and nine-month periods ended September 30, 2018 and 2017, respectively, generally resulted from changes in the demand for natural gas during that time, market conditions, and variances in capital spending to generate production from new and existing wells, as offset by the natural production decline curve. Also, production from the Subject Interests is influenced by the line pressure of the natural gas gathering systems in the San Juan Basin. As noted above, oil and natural gas sales attributable to the Royalty are based on an allocation formula dependent on many factors, including oil and natural gas prices and capital expenditures.

Table of Contents

Marketing

There were no changes to the contracts pursuant to which Hilcorp sells production from the Subject Interests and for the gathering and processing of production during the third quarter of 2018.

Off-Balance Sheet Arrangements

None.

Critical Accounting Policies and Estimates

For a discussion of significant accounting policies and estimates that impact the Trust's financial statements, see Part I, Item 1. Unaudited Financial Statements, Note 1 Basis of Presentation and Part II, Item 8. Financial Statements and Supplemental Data contained in the Trust's Annual Report on Form 10-K for the year ended December 31, 2017.

Information Regarding Forward-Looking Information

Certain information included in this Quarterly Report on Form 10-Q contains, and other materials filed or to be filed by the Trust with the SEC (as well as information included in oral statements or other written statements made or to be made by the Trust) may contain or include, forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and Section 27A of the Securities Act of 1933, as amended. Such forward-looking statements may be or may concern, among other things, capital expenditures, drilling activity, development activities, production efforts and volumes, hydrocarbon prices, estimated future net revenues, estimates of reserves, the results of the Trust's activities, and regulatory matters. Such forward-looking statements generally are accompanied by words such as "may," "will," "based," "estimate," "expect," "predict," "project," "anticipate," "plan," "intend," or other words that convey the uncertainty of future events or outcomes. Such statements are based on certain assumptions of Compass Bank, the Trustee and by Hilcorp, with respect to future events; are based on an assessment of, and are subject to, a variety of factors deemed relevant by the Trustee and Hilcorp; and involve risks and uncertainties. However, whether actual results and developments will conform with such expectations and predictions is subject to a number of risks and uncertainties which could affect the future results of the energy industry in general, and the Trust and Hilcorp in particular, and could cause those results to differ materially from those expressed in such forward-looking statements. The actual results or developments anticipated may not be realized or, even if substantially realized, they may not have the expected consequences to or effects on Hilcorp's business and the Trust. Such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in such forward-looking statements. The Trust undertakes no obligation to publicly update or revise any forward-looking statements, except as required by applicable law.

Hilcorp Information

As a holder of a net overriding royalty interest, the Trust's reporting of financial information is reliant upon Hilcorp accurately and timely reporting information regarding Hilcorp and its affiliates; the Subject Interests, including the operations, acreage, well and completion count, working interests, production volumes, sales revenues, capital expenditures, operating expenses, reserves, drilling plans, drilling results and leasehold terms related to the Subject Interests, and factors and circumstances that have or may affect the foregoing. See Part I, Item 4. Controls and Procedures.

Due to the transition to Hilcorp from Burlington, Hilcorp has estimated gross proceeds and severance tax and has performed true-ups for certain prior distribution months in 2017 and 2018. See Part I, Item 1. Unaudited Financial

Statements, Note 3 Commitments and Contingencies.

There have been no material changes to the Trust's market risk during 2018. For information on the Trust's exposure to market risk, please see Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risk contained in the Trust's Annual Report on Form 10-K for the year ended December 31, 2017.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

None.

Table of Contents

Item 4. Controls and Procedures.

The Trust maintains a system of internal disclosure controls and procedures that is designed to ensure that the information required to be disclosed in the Trust's filings under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. In its evaluation of its disclosure controls and procedure, the Trustee has relied, to the extent considered reasonable, on information provided by Hilcorp, the owner of the properties. Consequently, the Trust's ability to timely and accurately disclose relevant information in its periodic reports is dependent upon Hilcorp's timely delivery of accurate oil and gas revenue and production cost information and, therefore, the net proceeds owed to the Trust.

The Net Overriding Royalty Conveyance (the "Conveyance") that transferred the royalty to the Trust obligates Hilcorp to provide the Trust with certain financial and operational information, including information concerning calculations of net proceeds owed to the Trust. Pursuant to the settlement of litigation in 1996 between the Trust and Burlington Resources Oil & Gas Company LP ("Burlington"), an indirect wholly-owned subsidiary of ConocoPhillips, Burlington agreed to newer, more formal financial reporting and audit procedures as compared to those required to be provided by the Conveyance. As it did with Burlington, once the Trust receives the financial information from Hilcorp, the Trust engages independent public accountants, compliance auditors, attorneys and petroleum engineers in order to assist the Trustee to ensure the accuracy and completeness of the information required to be disclosed in the Trust's periodic reports. These outside professionals advise the Trustee in its review and compilation of this information for inclusion in this Form 10-Q and the other periodic reports provided by the Trust to the SEC.

The Trust has been advised by Hilcorp that during the transition period since its acquisition of the Subject Interests that there has been a delay in the transfer of historical information and knowledge from Burlington to Hilcorp. During this transition, the Trust has been advised by Hilcorp that it has recorded estimates of cash revenues and expenses based on the best information available. Hilcorp has informed the Trust that it believes that its estimates have been prepared in accordance with the Conveyance. As a result, AMS-PAR, the Trust's compliance auditors, have had to audit vast amounts of new data in a largely unfamiliar format. This new data format has necessitated AMS-PAR to develop its own internal systems, processes, and tools to organize and interpret the vast amount of raw data so that it can make a meaningful analysis. Hilcorp is aware that the Trustee and AMS-PAR have had to implement additional processes. As a result, Hilcorp has informed the Trustee that Hilcorp has hired third-party consultants to help it through this transition. The Trustee and its third party compliance auditors have been coordinating with Hilcorp to ensure that Hilcorp can provide the required level of detail on a timely and accurate basis.

Despite the Trust's internal controls and procedures ensuring the accuracy of the Trust's reporting based upon the financial information received from Hilcorp, Hilcorp's process of reconciling actual revenue and severance tax numbers versus previously reported estimated numbers (which the Trust refers to as "true-ups") from prior periods during fiscal 2017 are still occurring and being reported in 2018. Thus, distributions to the Trust from Hilcorp in any given month may be subject to adjustment based upon prior months' true-ups, plus interest due to the Trust. Generally, there is a two or three month lag in Hilcorp reconciling previously reported estimated financial information; however, Hilcorp has notified the Trustee that as of the date of this Quarterly Report, it will still need to true-up the previously reported estimated natural gas (and for the trust distribution months of January and October 2018, oil production) and financial information for the trust distribution months of January 2018 and June through October 2018. Furthermore, Hilcorp will still need to true-up the \$1.0 million in "Other" gross proceeds included in both the December 2017 and January 2018 trust distributions and, therefore, possibly adjust future distributions of net proceeds to reflect such true-ups plus interest on such amounts (as required by the Conveyance) to the extent an underpayment has occurred. Hilcorp has agreed to waive the interest on any overpayments (as required by the Conveyance) that are determined following such true-ups until June of 2019.

The Trustee has evaluated the Trust's internal disclosure controls and procedures as of September 30, 2018, and has concluded that such disclosure controls and procedures are effective, at the reasonable assurance level (as such term is used in Rule 13a-15(f) of the Exchange Act), to ensure that material information received from Hilcorp is gathered on a timely basis to be included in the Trust's periodic reports and recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Additionally, during the quarter ended September 30, 2018, there were no changes in the Trust's internal control over financial reporting (as such term is used in Rule 13a-15(f) of the Exchange Act) that materially affected, or are reasonably likely to materially affect, the Trust's internal control over financial reporting. Because the Trust does not have, nor does the Indenture provide for, officers, a board of directors or an independent audit committee, the Trustee has reviewed neither the Trust's disclosure controls and procedures nor the Trust's internal control over financial reporting in concert with management, a board of directors or an independent audit committee.
