MEDIA RELEASE

**Gold Fields' Operational Results for Q4 F2008 Will
Be Better than Expected**

Johannesburg, June 25, 2008: Gold Fields Limited (“Gold Fields”) (NYSE, JSE, DIFX: GFI) today announced that operational results for Q4 F2008 will be better than the guidance provided on May 9, 2008.

Group attributable production for Q4 F2008 is expected to be up approximately 4.5% compared to that reported for Q3 F2008.

South African production for Q4 F2008 is expected to be up by approximately 6.6% against the production achieved for Q3 F2008, which is better than the previous guidance of an improvement of between 2% and 4%, due mainly to improved quality mining at Beatrix.

Attributable production from the International mines for Q4 F2008 is expected to be flat, which is in line with previous guidance.

Preliminary indications are that group cash costs in US\$ terms will be similar to the previous quarter.

Gold Fields will publish its results for F2008 and Q4 F2008 on Friday, August 1, 2008.

As previously guided, the Cerro Corona Project in Peru is on track to commence production and the shipment of concentrate in Q1 F2009; the two new underground mines at St Ives in Australia have been commissioned and are in the process of build-up; and the CIL Plant expansion at Tarkwa in Ghana is on track for completion and the commencement of build-up in Q2 F2009.

All of these projects are expected to have reached full production by the end of Q2 F2009, resulting in an increased production profile for Gold Fields.

ends

Gold Fields Limited is one of the world's largest unhedged producers of gold with attributable production approaching four million ounces per annum, total attributable ore reserves of 92 million ounces and mineral resources of 252 million ounces.
